All medical schools are reviewed and accredited by the Liaison Committee on Medical Education, a national body representing the Association of American Medical Colleges and the American Medical Association. The academic philosophy and plan have been endorsed by this committee, and the school is fully accredited.

Philosophy

The fundamental purpose of medical schools is to educate physicians. The prime objective of all professionals, physicians included, is to apply a sophisticated body of knowledge and skills to the solution of problems faced by people. In doing so, the individual will follow standards of the profession for competence, ethics and communication and will demonstrate commitment to the principles of professionalism - altruism, humanism, excellence and accountability.

The school does not separate the several obligations of a medical school: to educate the student, the house officer and the physician; to attract new talent to the health-care field and to ensure that talent remain active and prepared; to maintain maximum standards of ethics and care; to have concern equally for the individual and for the community; and to foster inquiry, to find answers and to apply those answers.

Library and Information Services

Information services, including periodicals, computer literature searching and a full range of innovative reference services, are available through the [Health Sciences Library](#). For more information, see the section on [Library Services](#).

Medical Education Media Center

The MedicalEducationMediaCenter is a learning resources facility that offers over 3,000 anatomical and physical exam models, audiovisual programs and instructional software. Collection development is primarily in support of the School of Medicine curriculum for classroom instruction and self-study. However, additional services provide a collection of audiovisual CME, USMLE study/review titles and a subscription to the online testing bank Exam Master. Exam Master provides over 17,000 board type questions for USMLE Steps 1-3 and medical specialty boards (UMKC SOM user ID/password required).

The facility offers a computer lab with Internet access, open tables for model usage and an audiovisual viewing room equip with DVD and video players for small groups. Our quarterly newsletter, "MultiMedia Memo," may be found at: www.med.umkc.edu/news/

For access to our online catalog, Exam Master or general information, go to our web site: www.umkc.edu/medicine/mediacenter.

Location: UMKCSchool of Medicine, 2nd floor, room M2-C04A Phone: 816-235-1832; 816-235-1864 Hours: Monday – Friday, 8:00 a.m. to 8 p.m.

Information Services

Information Services are maintained by the department of Evaluation and Computer Resources (ECR).

ECR provides all computer-related support for all Faculty/Staff/Students and various research groups within the School of Medicine.

In addition to providing support and many other services, including the School of Medicine's official web site, it also maintains computer and printing resources for student use which are accessible 24/7 in the building, with additions to follow in the future.

ECR also maintains a Digital Signage Network that allows the creation and delivery of targeted messages (i.e. Text/Image/Audio/Video) that timely inform and educate the audience of relevant news, events, and other happenings, in high-traffic areas throughout the School of Medicine.

Current resources include:

38 - Dell/Windows XP workstations that are found in all Student Unit areas on the 4th/5th floors. Each of the 8 Student Unit areas also incorporates a conference room workstation with a large monitor setup for presentations, etc.

18 - Dell/Windows XP workstations located in the Technical Learning Center (TLC) on the 3rd floor.
Note: Currently, use of lab is by reservation only.

4 – Dell XPS One/Windows Vista Kiosk workstations located in the Theater A lobby on the 1st floor.

3 - Apple iMac/Windows XP Kiosk workstations located in the main lobby on the 1st floor.

2 - Dell/Windows XP Kiosk workstations located in the Canteen/Vending area on the 1st floor.

2 - Dell/Windows XP Kiosk workstations located outside the Health Sciences Library on the 2nd floor.

2 - Dell/Windows XP Kiosk workstations located next to the TrumanMedicalCenter entrance on the 4th floor.

The School of Medicine also incorporates a secured, wireless network that virtually covers the entire building. Additionally, much of the UMKC Volker and Hospital Hill campus buildings have additional wireless access coverage areas for your convenience. For more information on wireless locations and details, please visit: www.umkc.edu/medicine/wireless

More information on School of Medicine computer-related resources, as well as other informative technology information, is available at: www.umkc.edu/medicine/techguide

Student Services

The School of Medicine's Office of Student Affairs coordinates a variety of support services that are available to all medical students. These include counseling, financial aid, student organizations and activities.

The Office of Student Affairs also provides career information to students and assistance in applying for postgraduate residency training programs.

The Council on Selection; the Minority Recruitment and Retention Committee; the associate dean for cultural diversity and minority programs; the associate dean of the Office of Medical Education and Research; the assistant dean for admission and recruitment; and the manager for student affairs work together in recruitment and retention of students, including minority students.

Students may participate fully in the services and activities provided to all UMKC students through the Office of the Vice Chancellor for Student Affairs.

The Office of Student Life, located in the University Center, coordinates the cultural, social and recreational programs of the campus. Also located on the Volker campus are the Center for Academic Development; the Women's Center; the Counseling, Health and Testing Center; and Career Services.

Academic Support Services

The School of Medicine provides academic support to all its students. The curriculum provides challenging coursework, and students should explore all opportunities for alternative study methods. Students have the responsibility to become life-long learners and to meet their own and the school's learning goals. The following services are offered:

Support for Basic Science Courses

During the first years the students take several basic science courses. Lecturers in the school of medicine provide several support sessions and open office-hours during the week as well as individual appointments for students to attain their learning goals. For many classes the school provides successful senior medical students as tutors. Tutors set meeting times and agenda according to students' needs. Students are also encouraged to take advantage of Supplemental Instruction for courses in which it is offered.

Additional Assistance

Individual assistance is available to medical students through a variety of means. Students may receive individual analysis of their study techniques, including reading comprehension; time management; short- and long-term retention techniques; and test-taking abilities. Analysis of a student's basic science knowledge is available through several computer-assisted programs. If required, individual tutoring may be available to supplement the assistance offered through study-group programs. Counseling support also is available to students with personal issues that may hinder their academic performance.

United States Medical Licensing Exam Step 1 Preparation

Students preparing for Step 1 of the USMLE are offered a variety of programs to supplement their individual review of the basic sciences. These programs consist of discussion groups, interactive video review sessions, individual test-taking analysis and a Step 1 mock exam. Some of the programs are free to all students and other involve enrollment in fee-based programming. In addition to academic preparation support, resources are available to help students manage the stress related to their preparation for the exam.

Workshops

Periodically, special workshops are arranged in response to student needs and interests.

Counseling and Advising

The School of Medicine has a number of personal and academic support systems in place to assist students at all levels of the program. There are two education team coordinators with offices on the Volker campus who help the first- and second-year students in curriculum planning and who are available to counsel them on personal problems.

Each group of 10-13 students has a physician-scholar (or docent) who instructs the students in medical coursework during the first two years and who also serves as a role model and personal counselor. Additionally 10-12 Year 2 students are selected as peer mentors to the Year 1 class.

From year 3 through year 6, each student is a member of a 12-student team assigned to a docent who teaches and counsels throughout these years of the curriculum. Teams are assigned an education team coordinator to advise about course selection and personal problems in consultation with the docent. In their third and fourth years, students are partnered with older students who serve as senior partners.

Additional campus resources are available to students in the areas of counseling and support including the UMKC Counseling and Testing Center./html>

Students at the UMKC School of Medicine have access to the resources of the UMKC Financial Aid and Scholarship Office. Additionally, that office has a designated health science specialist with an office on Hospital Hill. A variety of need-based and merit-based scholarships are offered to School of Medicine students in conjunction with scholarships and aid available through institutional and external sources.

For the latest information on financial aid programs at UMKC see <http://www.sfa.umkc.edu>.

Medical Student Organizations, Publications and Awards

Alpha Omega Alpha

The Delta Chapter of the Alpha Omega Alpha Honor Society is an organization open to the no more than 1/6th of the graduating class. In accordance with the national constitution, scholastic achievement should be the primary but not sole basis for election of a student. Leadership capabilities, ethical standards, fairness in dealing with colleagues, potential for achievement in medicine, integrity, compassion, professionalism, conscientiousness, and a record of service to the school and community at large should be criteria considered in addition to the academic record. Memberships are also granted each year to a faculty member, an alum of the school, and a member of the housestaff or fellow each year.

American Medical Association - Medical Student Section

Dedicated to representing medical students, improving medical education, developing leadership and promoting activism for the health of America.

American Medical Student Association

The primary goal of AMSA is the initiation of student-organized projects for the benefit of medical students and the community on local, state and national levels. The development of hypertension clinics, presentations about venereal disease to area high schools, AIDS awareness programs and a drug-replacement program represent some of AMSA's projects in past years.

American Medical Women's Association

The AMWA promotes an understanding of the individual in medicine. Its membership is open to all interested men and women. AMWA's programs include speakers on special topics, field trips, social projects and other activities of benefit to all students.

Association of American Medical Colleges - Organization of Student Representatives

The OSR is the student branch of the Association of American Medical Colleges (AAMC). The OSR is charged with the representation of the undergraduate medical student body of the United States to the academic medical community.

Asian Pacific American Medical Students' Association

The goals of APAMSA are to educate all medical students about health-care needs specific to the Asian Pacific community and to address issues important to Asian Pacific American medical students.

Christian Medical/Dental Society

This group is open to students of all faiths. The organization fosters greater understanding of spiritual concerns in relationship to health and well-being.

Global Medicine Relief Program

GMRP's mission is to promote quality health care in under-served communities around the world by working with local doctors and health care professionals and by providing medical supplies and equipment; to provide dental, hygiene and basic health care supplies in areas of natural disaster; to promote human rights in developing regions by improving health infrastructure; to participate in a global community of organizations which are similarly dedicated to providing health care in developing regions; and to organize student groups at all educational levels in these humanitarian efforts. GMRP especially seeks to touch the lives of the most vulnerable people in any population and believes in the importance of assisting both internally and externally displaced refugees.

Gold Humanism Society

The Gold Humanism Society is sponsored by the Arnold P. Gold Foundation and is closely linked to the Sirridge Office of Medical Humanities.

Medical Student Advisory Council

The MSAC serves as the student government body in the School of Medicine and is comprised of student-elected representatives who focus on promoting student interests, keeping the administration informed of student opinion and organizing social activities. MSAC serves as an umbrella organization for student interest groups in the areas of Anesthesiology, Emergency Medicine, Family Medicine, Geriatric Medicine, Internal Medicine, International Medicine, Med/Peds, Obstetrics/Gynecology, Physical Medicine and Rehabilitation, Psychiatry, Spanish in Medicine, and Surgery

Sojourner Clinic

The Sojourner Health Clinic is a free clinic developed and managed by UMKC Medical Students to provide outpatient care to the homeless and underprivileged population served by GrandAvenueUnitedMethodistTemple. On Sunday afternoons, the students, with faculty supervision, provide acute and chronic medical care to the Sojourners of downtown Kansas City, many of whom also are served a free hot lunch at Grand AvenueTemple.

Student National Medical Association

The promotion of the interests of minority students is the foundation of the SNMA. Leadership development, social awareness, service to humanity and excellence as physicians are the major objectives of this group

Student Wellness Council

The Student Wellness Council promotes healthy habits and wellness amongst UMKC School of Medicine students

Publications

A monthly publication of the school, P.R.N., provides information on school programs, policies and student activities and is distributed online to School of Medicine students, their families and faculty. A quarterly magazine, Panorama, is primarily distributed to alumni, affiliated hospitals and friends of the school and is available throughout the school.

Six Year Program Description

The fundamental objective of the School of Medicine is to graduate physicians able to meet the health care needs of Missouri and the nation.

Classes begin in the fall of year 1. By using 35 weeks of study the first year and 48 weeks every year after that, each student will have the opportunity to earn the credits necessary for both a baccalaureate and a medical degree. This six-year continuum does not make an arbitrary separation between liberal arts and professional education.

The first two years of the six-year curriculum are arranged for the student to blend three-fourths of the time in liberal arts coursework and one-fourth of the time in introduction to medicine coursework. This initial two-year period allows students adequate time to determine whether they are motivated enough to continue in medicine. At the same time, the faculty will have adequate opportunity to judge whether each student has the characteristics and capabilities necessary for a career in medicine.

The introduction to medicine courses during the first two years are designed to provide just that -- an introduction to medicine. Special attention is given to the effect of illness on the patient, the family and the community. There is emphasis on the coordination of effort, the team approach, to the solution of medical and health care problems. The year 1 and 2 curriculum has been further enhanced with the addition of a geriatrics program which pairs students with aging mentors. The courses will integrate patient interviews and examinations with branches of science fundamental to clinical medicine, including anatomy, physiology, biochemistry, psychology and sociology.

These courses have certain coordinated objectives, each of which represents an important component in the general concept of medicine as applied to human biology. The objectives are to help students understand and learn about the following:

- The language and vocabulary of medicine.
- The effects of illness on individuals, families and communities.
- The background setting of illness and health care, including the importance of social, psychological and economic factors.
- The history of medicine and its present state.
- The roles and responsibilities of physicians and other personnel involved in health care.
- Selected content information from anatomy, physiology, chemistry, psychology, sociology and other sciences fundamental to medicine, together with the continuing importance of such information in the reasoning of the physician.
- The logic, rationale and process of clinical reasoning.

An important feature of the School of Medicine program is the early and continuing contact of the student with a team of scholars called docents. Each docent is a full-time physician responsible for the education of a small group of students. The docent serves as a role model for students as well as a guide and mentor. At year 3, students are assigned to a docent team, a group composed of students from each of year 3 through year 6 classes. Beginning in year 4, students spend two months each year on docent rotation, an internal medicine clerkship. During this time in particular, and throughout the rest of the academic year, the docents guide their students through the experiences necessary to acquire a strong foundation of clinical competence. Students in their third and fourth years are partnered with their fifth- and sixth-year peers on the docent unit.

The School of Medicine program in years 3 to 6 of the combined degree program has several features:

- The core educational program is designed and directed by physicians who are primarily concerned with medical student education and who have patient care responsibilities;
- Since the curriculum core content is based on clinical experiences, the medical student's education will be problem-centered. Faculty from many University disciplines participate in teaching medical students, and education in the clinical sciences takes place in affiliated hospitals. These hospitals provide a communitywide model for patient care;
- The curriculum integrates liberal arts, basic sciences and clinical medicine. It uses planned repetition, reinforcement and relevancy to enable students to acquire the requisite attitudes, knowledge and skills expected of a Medical School graduate;
- Students may have an extended program by taking extra time;
- During the third through sixth years, students are required to return to the Volker campus at least two times, usually in years 3 and 4, to take liberal arts coursework. Students are also required to enroll in a medical humanities course in year 5 or year 6.

Typical Six-Year Program of Study

Year 1*Medicine*

Fall Medical Terminology
Learning Basic Medical Sciences
Fundamentals of Medical Practice I
Spring Fundamentals of Medical Practice II

Arts & Sciences

Fall Human Biology I (Anatomy) w/Lab
General Chemistry I w/Lab
Psychology
Courses for B.A. Degree*
Spring Human Biology III (Microbiology) w/Lab
General Chemistry II w/Lab
Sociology

Year 2*Medicine*

Summer Hospital Team Experience
Fall Fundamentals of Medical Practice III
Spring Fundamentals of Medical Practice IV

Arts & Sciences

Summer Organic Chemistry w/Lab
Cell Biology
Fall Human Biochemistry
Sociology - Life Cycles
Genetics
Courses for B.A. Degree*
Spring Structure/Function I, II, III
Courses for B.A. Degree*

Year 3*Medicine*

History of Medicine
Clinical Correlations
Clinical Skills
Introduction to Pharmacology (Independent Study)
CUES (Communication, Understanding, Education and Self-Awareness)
Pathology I & II
Medical Microbiology
Medical Neurosciences
Continuing Ambulatory Care Clinic

Arts & Sciences

Structure/Function IV

Year 4*Medicine*

Pharmacology
Behavioral Sciences in Medicine
Docent Rotation
Family Medicine
Ambulatory Care Pharmacology (Indep Study)
Continuing Ambulatory Care Clinic
Patients, Physicians, and Society I and II

Arts & Sciences

Courses for B.A. Degree*

Year 5*Medicine*

Psychiatry
Prescribing for Special Populations (Indep Study)
Obstetrics/Gynecology
Pediatrics
Family Medicine Preceptorship

Surgery
Elective
Docent Rotation
Emergency Medicine(may be taken in Year 6)

Arts and Sciences

Medical Humanities (may be taken in Year 6)

Year 6

Medicine

Docent Rotation
Emergency Medicine(may be taken in Year 5)
Rational & Safe Drug Prescribing (Indep Study)
Electives
Continuing Ambulatory Care Clinic

Arts & Sciences

Medical Humanities (may be taken in Year 5)

* 3 to 12 credit hours will come from general degree requirements and/or core major requirements.
All students are required to take three clinical electives, one of which must be direct patient care.

Master of Science in Anesthesia Program

The Master of Science in Anesthesia Program will graduate highly skilled and competent Anesthesiologist Assistants (AAs). AA's are physician extenders licensed to work as anesthetists under the supervision of anesthesiologists. AA's provide various services in hospitals, surgery centers, and other health care environments

For application deadline and other information regarding the 27 month program and the AA profession please go to the UMKC MSA program website: www.med.umkc.edu/msa

Admission Requirements

The School of Medicine offers a six-year B.A./M.D. program that requires students to complete both a baccalaureate degree and doctor of medicine degree. Admission to the B.A./M.D. program is highly competitive, and admitted students are challenged by a demanding curriculum scheduled for 35 weeks in the first year and 48 weeks in each of the remaining five years.

Applicants for admission to Year 1 of the six-year medical program must first be accepted by the University of Missouri – Kansas City. Admission to the university is determined by a combination of ACT score and class rank, as well as graduation from an accredited U.S. high school with completion of the following high school curriculum:

- Four units of English,
- Four units of Mathematics (Algebra 1 or higher),
- Three units of science (including one unit of Biology and one unit of Chemistry),
- Three units of social studies,
- Two units of a single foreign language,
- One unit of fine arts (visual arts, music, dance, or theater).

For more information about UMKC admission requirements and/or the application procedures, please contact the UMKC Office of Admissions at:

Office of Admissions
University of Missouri – Kansas City
120 Administrative Center
5100 Rockhill Road
Kansas City, MO 64110-2499

In addition, School of Medicine applicants are also required to submit a supplemental application and additional supporting documents, consisting of the following:

- Personal statement (500 words or less)
- Short answer responses
- Listing of all health-related and co-curricular activities (last 5 years only)

- Letters of recommendation (minimum 3)

The School of Medicine strongly encourages prospective students to earn credit through Advanced Placement (AP) courses, if available, in math, English, European history, or American history.

Students whose high school does not offer biology, chemistry, and/or foreign language are encouraged to contact the Council on Selection at the School of Medicine.

Students are selected to interview based on the information provided in a complete application. Once interviews are complete, the Council on Selection will convene to determine which students will be offered admission to the program. Most applicants to the combined degree program display outstanding academic credentials and backgrounds and strong leadership and involvement. The applicant pool is extremely competitive.

Current College Students

Students with 24 college credit hours or less: Students with 24 hours or less of post high school graduation college credit at the time of application are eligible to apply for admission to the 6-year B.A./M.D. program. These applicants will be reviewed with the same criteria as freshman applicants.

If the applicant is currently enrolled in college in the semester in which they apply to the six-year program, the number of hours accumulated at the end of that semester must not exceed the 24-hour credit limit. While the application is being processed, applicants may continue taking college courses during the next semester.

Applicants must have a 3.0 GPA or higher for all college credit attempted or earned. Official college transcripts must be submitted along with other application materials. Grades for courses completed in the fall semester in which the applicant applied must also be submitted upon completion of the semester. A current ACT test within the last three years is also required.

Students with more than 24 college credit hours: Students who have completed more than 24 college credit hours and have not yet received a Bachelor's degree are not eligible to apply to the School of Medicine.

Students who have earned, or will be earning in the year of application, a Bachelor's degree: Students who have completed more than 24 college credit hours and have earned, or will soon earn, a Bachelor's degree are eligible to apply to the M.D.-Only program. A limited number of positions are available for students who have completed their baccalaureate degree. For admission requirements for entrance as an M.D.-only student, please contact the Council on Selection in the School of Medicine.

For more information about the combined B.A./M.D. program, please contact the Council on Selection at:

UMKC School of Medicine
Council on Selection
2411 Holmes
Kansas City, MO 64108

Application Deadlines

Completed application materials will be accepted during the following period:

- Earliest date - Aug. 1 of the year preceding the fall semester for which applying.
- Latest date - Nov. 1 of the year preceding the fall semester for which applying.

All applications must be complete with supporting documents by November 1. Late applications and incomplete applications will not be considered.

(Applicants are urged to apply as soon after Aug. 1 as possible.)

High school students wishing to enter this program should recognize that many other well-qualified high school students with strong science backgrounds also will be applying.

Because this is a state-assisted university, primary consideration is given to Missouri residents with over fifty percent of the incoming class from the state of Missouri.

Criminal background checks will be performed on combined-degree students and M.D.-only students before matriculation into the program.

Application Fee and Timetable for Applying

Applicants are strongly advised to apply online. A \$35 application fee is required of all resident applicants. A \$50 application fee is required of all regional and nonresident applicants. If the applicant submits a paper application,

an additional processing fee may be assessed.

Completed application materials will be accepted during the following period:

- Earliest date - Aug. 1 of the year preceding the fall semester for which applying.
- Latest date - Nov. 1 of the year preceding the fall semester for which applying.

(Applicants are urged to apply as soon after Aug. 1 as possible.)

High school students wishing to enter this program should recognize that many other well-qualified high school students with strong science backgrounds also will be applying.

Because this is a state-assisted university, primary consideration is given to Missouri residents with over fifty percent of the incoming class from the state of Missouri.

Criminal background checks will be performed on combined-degree students and M.D.-only students before matriculation into the program.

Student Learning Outcomes for Six Year B.A.-M. D. Program

Years 1-2

Effective Communication

- The student demonstrates competence in written communications such as laboratory reports, term papers and other classroom writing assignments.
- The student demonstrates competence in oral communications in a one-on-one setting, such as introducing and beginning a history with an individual patient. History-taking skills at this level will be very basic and straightforward.
- The student demonstrates effective listening skills with faculty members, other students and patients.

Clinical Skills

- The student is able to perform the basic elements of a history. The student will have observed a physical examination and observed some of the routine clinical procedures.

Using Basic Science in the Practice of Medicine

- The student has an introductory and very general understanding of anatomy and microbiology.
- The student has a more advanced understanding and an ability to apply some information to a few clinical situations in biochemistry and physiology.

Diagnosis, Management and Prevention

- The student has an introductory understanding of principles of diagnosis, management and prevention.
- The student is able to identify general, rather than specific approaches to management, but is usually not expected to carry them out in real settings.

Lifelong Learning in Medicine, Basic Sciences, the Social Sciences and the Humanities

- The student is proficient in framing a question, utilizing modern information searching modalities, organizing data, compiling and using information to answer the question in the context of a structured setting, such as an undergraduate course.
- The student has an introductory knowledge of the humanities and social science. Enough information is learned at this level to stimulate the student to desire further learning in medicine, humanities and social sciences.

Self-awareness, Self-care, Personal Growth and Professional Behavior

- The student exhibits behaviors indicative of personal self-awareness through a process of self reflection. Students are able to identify potential areas of weakness and are able to conceive of potential options for addressing these areas.
- The student is able to identify areas of strength and is able to build on these strengths.
- The student is able to set goals for a self-study plan.
- The student is aware of his/her personal growth in regards to age specific developmental tasks.
- The student knows the elements of professional behavior and can explain the meaning of each element.
- The student can cite an example of how each of the elements applies in Year 1 and Year 2 coursework for the baccalaureate and M.D. degree.
- The student shows courteous regard for other students and faculty and acknowledges the views of others. The student shows courteous regard for his/her mentor on aging and for the patients they meet in their docent group experiences. The student interacts with patients they meet in their docent group experiences in an appropriately compassionate fashion. The student expresses empathy for his/her mentor on aging as appropriate.
- The student puts the legitimate needs of his/her mentor on aging, patients, docent group members and study group members first before his/her own needs.
- The student demonstrates academic honesty in all aspects of his/her coursework for the baccalaureate-M.D. degree.
- The student carries through on assignments and other responsibilities; arrives promptly for meetings or classes; accepts personal responsibility for group projects; and completes course evaluations in a timely and thoughtful fashion.
- The student searches out opportunities to learn and tries to excel in their coursework.

Diversity and the Social and Community Contexts of Health Care

- The student appreciates some of the non-biological factors that influence health, disease, disability and access to care.
- The student attributes proper importance to identifying non-biological factors.
- The student is aware of different value systems and life styles.

Moral Reasoning and Ethical Judgment

- The student can identify and apply ethical considerations relating to professional behavior and student conduct as a forerunner to professional behavior.
- The student develops an introductory understanding of ethical choices related to a few controversial medical issues.

Problem-Solving Skills

- The student displays competence in basic problem-solving skills as applied to basic science courses or simple, straightforward medical problems.

Years 3-4

Effective Communication

- The student develops and demonstrates competency in using the written language effectively by:
 - Medical record documentation in the continuing care clinic and on docent rotation.
 - Writing papers for courses and rotations.
 - Essay examinations in medical ethics.
- The student develops and demonstrates competency in using oral language and listening effectively by:
 - Communicating with patients and families in the continuing care clinic and on docent rotation.
 - Communicating with senior partners, peers and faculty.
 - Functioning as an effective junior partner.

Clinical Skills

- The student is able to perform a comprehensive history and physical examination of patients in the outpatient setting and the general medical wards, excluding critical care settings.
- The student is competent in performing venipuncture and basic CPR.
- The student is able to perform a gram-stain, vaginal smear wet prep, stool occult blood, urinalysis, urine pregnancy test, finger stick glucose determination and peak expiratory flow rate.
- The student has observed and is familiar with some of the more complex or specialized lab and diagnostic tests.
- The student knows the basics in the interpretation of plain x-ray studies; chest x-ray, abdominal x-ray.

Using Basic Science in the Practice of Medicine

- The student applies knowledge in the areas of behavioral science, anatomy, pathology, biochemistry, physiology, microbiology and immunology, and pharmacology to the overall care of patients.

Diagnosis, Management, Continuing Care and Prevention

- The student is able to interpret standard diagnostic studies and history and physical examination data. From these data, the student is able to state the most likely diagnosis when presented with straightforward presentations of common problems in general internal medicine. The student is expected to carry out management plans in those situations that are relatively straightforward and uncomplicated.

Lifelong Learning in Medicine, Basic Sciences, the Social Sciences and the Humanities

- The student is able to do a computerized literature search as it applies to patient problems.
- The student is able to comprehend the medical literature and understand basic statistics and the scientific method.
- The student is continually motivated by an awareness of the limits of his/her personal knowledge and experience.

Self-awareness, Self-care, Personal Growth and Professional Behavior

- The student is reflective about him or herself in a group context.
- He or she is able to confront his/her own values as they relate to the practice of medicine.
- The student is able to identify real situations of stress and his/her response to these situations.
- The student is able to practice personal techniques for relaxation and time management and can modify behavior and respond to constructive criticism.
- The student is able to identify learning needs, plan a program to meet those needs and determine how well they have met them and what further learning issues they need to address.
- The student identifies the elements of professional behavior and can explain the meaning of each element: respect, compassion and empathy, altruism, honesty, responsibility, and excellence. The student can give an example of how each of the elements of professionalism applies to Year 3 and Year 4 coursework for the baccalaureate and MD degrees and actively demonstrates them by behavior.
- The student shows courteous regard for patients, students, faculty, and members of the health care team and acknowledges their views.
- The student interacts with patients, patients' families, and members of the health care team in an appropriately empathic and compassionate fashion.
- The student contributes to the docent team and other small groups by sharing knowledge and skills, expressing positive attitudes and accepting help from others to address his/her deficiencies.
- The student recognizes how potential conflicts between his/her own needs and the legitimate needs of patients, docent group members, and study group members might be resolved and can discuss a rationale for alternative resolutions.
- The student is honest in all aspects of coursework for the baccalaureate-MD degree and takes responsibility for his/her errors in the patient care setting after discussion with supervisors.
- The student carries through on assignments and other responsibilities; arrives promptly for meetings, classes, rounds and clinics; accepts personal responsibility for group projects and for assigned patients; and completes course evaluations in a timely and thoughtful fashion.
- The student searches out opportunities to learn, demonstrates lifelong learning skills, and tries to excel in coursework and scholarship.

Diversity and the Social and Community Contexts of Health Care

- The student elicits and identifies non-biological factors as part of the routine history taking and includes those issues, as appropriate, in the problem list formulations and management plans.
- The student takes personal responsibility for discussing these issues with patients, assessing their needs and matching them to appropriate community resources.
- The student works with his/her individual patients and families to enhance their total well-being.

Moral Reasoning and Ethical Judgment

- The student is able to employ ethical concepts and reasoning when presented with typical ethical cases in medicine, and is able to recognize ethical issues in medical practice.

Problem-Solving Skills

- The student displays competence in problem-solving skills with common clinical problems utilizing a limited knowledge base.

Years 5-6

Effective Communication

- The student develops and demonstrates competency in using the written language effectively by:
 - medical record documentation on clinical rotations.
 - preparing written patient education material.
 - writing clinical papers.
 - journals, short stories, papers or poetry during medical humanities and social science courses.
- The student develops and demonstrates competency in using oral language and listening effectively by:
 - communicating with patients and families in the continuing care clinic and clinical rotations.
 - presenting new patients to faculty in continuing care clinic and clinical rotations.
 - delivering lectures on clinical rotations utilizing slides and handouts.
 - communicating with student partners, peers, faculty and the health care providers.
 - oral examinations.
- The student develops and demonstrates competency in respecting patients and sharing information effectively with patients, families and health care team members by:
 - interacting with the individuals on clinical rotations and the continuing care clinic.
 - working as an integral part of the docent team and teams on other clinical rotations.
 - functioning as an effective senior student partner.

Clinical Skills

- The student is able to perform the basic and emergency elements of a history and physical examination smoothly and efficiently in the outpatient setting, inpatient setting, critical care setting and emergency department settings.
- The student is able to perform and interpret basic clinical procedures, laboratory and diagnostic tests smoothly and efficiently as listed.
- The student is able to describe the procedural steps necessary to carry out advanced clinical procedures as listed.
- The student observes and is able to state the indications, complications, and limitations of advanced clinical procedures as listed.
- The student is aware of the indications, complications and limitations of and interpret from the written reports complex and specialized laboratory and diagnostic tests as listed.

Using Basic Science in the Practice of Medicine

- The student is able to explain a multi-system health problem in terms of pathogenesis, mechanisms of system-to-system interactions and potential complications. The student is able to present therapeutic goals and interventions aimed at the multiple pathophysiological forces in motion.
- The student is able to exhibit clinical decision analysis that weighs the pros and cons of proposed interventions, taking into consideration such factors as drug-drug interactions and the trade-off of proposed drug interventions in the context of multi-system problems.

Diagnosis, Management, and Prevention

- The student is able to state the most likely diagnosis and management plan when presented with presentations of common problems in any of the major disciplines.
- The student is able to integrate the approach of care to individuals, families and communities, taking advantage of opportunities for prevention and education in addition to the immediate physical care.
- The student through his/her experiences in the continuing care clinic is able to provide continuing care and management for both chronic and acute medical problems and provide appropriate plans for prevention.

Lifelong Learning in Medicine, Basic Sciences, the Social Sciences and the Humanities

- The student begins to explore new opportunities for intellectual growth and professional enlightenment in medicine, the social sciences and humanities.
- The student attends a continuing medical education course.
- The student continues to recognize his/her limits of knowledge and experience.
- The student is able to recognize the significance of valid scientific discoveries reported in medical journals and recognize unsubstantiated, inaccurate or poorly performed studies and conclusions.

Self-awareness, Self-care, Personal Growth and Professional Behavior

- The student utilizes skill in coping with stress during clinical rotations.
- The student develops and demonstrates appropriate personal values and beliefs relevant to his/her practice of medicine.
- The student identifies the elements of professional behavior and can explain the meaning each element: respect, compassion and empathy, altruism, honesty, responsibility, and excellence. The student gives examples of how each of the elements of professionalism applies to Year 5 and Year 6 coursework for the baccalaureate and MD degrees and actively demonstrates them by behavior. He/she teaches these elements of professional behavior to junior students by explicit role modeling.
- The student shows courteous regard for patients, student, faculty and health care team members, and acknowledges their views. He/she teaches respect for other people to junior students by explicit role modeling.
- The student interacts with patients, patient families and members of the health care team in an appropriately empathic and compassionate fashion. He/she teaches compassion and empathy to junior students by explicit role modeling.
- The student contributes to the docent team and other small groups by exercising effective leadership and active teaching of teamwork.
- The student resolves potential conflicts between his/her own needs and the legitimate needs of his/her patients or health care team members appropriately and can discuss a credible rationale for the resolution.
- The student is honest in all aspects of coursework for the baccalaureate-MD degree and takes responsibility for his/her errors in the patient care setting after discussion with little or no supervision.
- The student carries through on assignments and other responsibilities; arrives promptly for meetings, classes, rounds and clinics; accepts personal responsibility for group projects and for assigned patients; and completes course evaluations in a timely and thoughtful fashion. He/she teaches junior students about responsibility through explicit role modeling.
- The student searches out opportunities to learn, demonstrates lifelong learning skills, and endeavors to excel in coursework and scholarship. He/she teaches junior students about life learning.

Diversity and the Social and Community Contexts of Health Care

- The student is able to identify and propose solutions for non-biological factors that influence health, disease, disability and access to care.
- The student is able to utilize resources in the community that may provide assistance to his or her patients.
- The student is an advocate for better health for the patients and the community.
- The student demonstrates knowledge of practice management, utilization review, quality improvement and economic and cultural issues in health care.

Moral Reasoning and Ethical Judgment

- The student is able to identify patient care and health policy ethical issues and choices in his or her own clinical experience; to evaluate critically alternative ethical courses of action by analyzing and articulating reasons for the relative importance of the different ethical considerations bearing on each choice; to select and ethically defend a course of action.
- The student recognizes the importance of the ethical treatment of research subjects and the functions of an Institutional Review Board.

Problem Solving

- The student displays competence in more advanced clinical problem solving using a comprehensive knowledge base.
- The student can effectively utilize a team approach in solving clinical problems.

Requirements for Graduation in the Master of Science in Anesthesia Program

Note to Editor: The MS in Anesthesia Student Learning Outcomes and Program Requirements should be added here.

The Master of Science in Anesthesia Program will graduate highly skilled and competent Anesthesiologist Assistants (AAs). AA's are physician extenders licensed to work as anesthesiologists under the supervision of anesthesiologists. AA's provide various services in hospitals, surgery centers, and other health care environments

For application deadline and other information regarding the 27 month program and the AA profession please go to the UMKC MSA program website: www.med.umkc.edu/msa

Requirements for Graduation in the B.A. - M.D. Combined Program

Graduation Requirements for students in the Combined Baccalaureate/MD Program:

1. Minimum of 90 credit hours from the College of Arts and Sciences acceptable to the School of Medicine.
2. Three returns back to the College of Arts and Sciences.
3. Satisfactory completion, certified by the UMKC registrar, of requirements for the baccalaureate degree.
4. Satisfactory completion of all required medical curriculum.
5. Cumulative GPA of 2.7 to 4.0.
6. 38 months medical curriculum credit.
7. Passing scores on USMLE Steps 1 and 2 (Clinical Knowledge and Clinical Skills).
8. 3 clinical electives which must be selected from 9 separate categories.
9. Docent certification of clinical competence.
10. 48 months of enrollment in the School of Medicine, years 3 to 6.
11. Current certification in Advanced Cardiac Life Support.
12. Evidence of adherence to the Fee Policies.
13. Evidence of Financial Aid Exit Interview.
14. Year 6 Year-End Docent Interview.

Graduation Requirements for students in the MD Program:

1. Satisfactory completion of all required medical curriculum.
2. Cumulative GPA of 2.7 to 4.0.
3. 34 months medical curriculum credit.
4. Passing scores on USMLE Steps 1 and 2 (Clinical Knowledge and Clinical Skills).
5. 3 clinical electives which must be selected from 9 separate categories.
6. Docent certification of clinical competence.
7. 48 months of enrollment in the School of Medicine.
8. Current certification in Advanced Cardiac Life Support.
9. Evidence of adherence to the Fee Policies.
10. Evidence of Financial Aid Exit Interview.
11. Year 6 Year-End Docent Interview.

Graduation Requirements for CURRENT students in the OS/MD Program:

1. Satisfactory completion of all required medical curriculum.
2. Cumulative GPA of 2.7 to 4.0.
3. 34 months medical curriculum credit.
4. Passing scores on USMLE Steps 1 and 2 (Clinical Knowledge and Clinical Skills).
5. 2 clinical electives which must be selected from 9 separate categories.
6. Docent certification of clinical competence.
7. 42 months of enrollment in the School of Medicine.
8. 18 months of enrollment in Oral Surgery through the School of Dentistry.
9. Current certification in Advanced Cardiac Life Support.
10. Passing scores on USMLE Steps 1 and 2 (Clinical Knowledge and Clinical Skills).
11. Evidence of adherence to the Fee Policies.
12. Evidence of Financial Aid Exit Interview.
13. Year 6 Year-End Docent Interview.

Graduation Requirements for students in the Advanced Standing/Transfer Program:

1. Satisfactory completion of all required medical curriculum.
2. 23 months of enrollment in the School of Medicine, years 5 and 6.
3. Passing scores on USMLE Step 2 (Clinical Knowledge and Clinical Skills).
4. 4 clinical electives, 3 of which must be selected from 9 separate categories.
5. Docent certification of clinical competence.
6. 22 months earned UMKC medical school credit plus at least 12 months earned medical school credit from another US-accredited osteopathic or allopathic school of medicine.
7. Current certification in Advanced Cardiac Life Support.
8. Evidence of adherence to the Fee Policies.
9. Evidence of Financial Aid Exit Interview.
10. Year 6 Year-End Docent Interview.

Graduation Requirements for students in the OS/MD Program (effective Summer Semester 2009):

1. Satisfactory completion of all required medical curriculum.
2. 23 months of enrollment in the School of Medicine, years 5 and 6.
3. Passing scores on USMLE Step 2 (Clinical Knowledge and Clinical Skills).
4. 3 clinical electives which must be selected from 9 separate categories.
5. Docent certification of clinical competence.
6. 22 months earned UMKC medical school credit plus 12 months of enrollment in Oral Surgery through the School of Dentistry.
7. Current certification in Advanced Cardiac Life Support.
8. Evidence of adherence to the Fee Policies.
9. Evidence of Financial Aid Exit Interview.
10. Year 6 Year-End Docent Interview.

Requirements for Graduation in the Master of Science Program in Bioinformatics

Note to Editor: the Student Learning Outcomes for the Master of Science in Bioinformatics should be added here.

The Program Description for the Bioinformatics program can be moved to the General Information catalog if desired.

Master of Science in Bioinformatics

The Master of Science in Bioinformatics Program supports the education of students interested in a career in bioinformatics and/or clinical research. Graduates become effective team members who contribute to multidisciplinary approaches to education, research, and development in the fields of bioinformatics and/or clinical research. The Program is administratively housed in the UMKC School of Medicine and is a cooperative Graduate Program coordinated amongst the School of Medicine, the School of Biological Sciences and the School of Computing and Engineering. A core curriculum is offered to all students, with specialty tracks in Genomics led by the School of Biological Sciences, in Computational Bioinformatics led by the School of Computing and Engineering and in Clinical Research, led by the School of Medicine.

Computational Track — The goal of this emphasis area is to train students to develop and use the next generation of bioinformatics tools and software.

Genomics Track — Students will become highly trained end-users of existing software for biological analysis and be able to analyze a diverse set of biological data.

Clinical Research Track — Students will be well trained in the creation and understanding of data generated by patient care and clinical studies and on the **research** methodology needed for clinical research and improved bedside care.

Additional information and admission requirements may be obtained at the bioinformatics website at <http://www.med.umkc.edu/msb/>

History

The Conservatory is an active participant in mid-America's most important cultural center, Kansas City. This geographical setting provides students with the opportunity to hear and work with the Conservatory's own talented artist-faculty and internationally known artists who perform in the area.

The Conservatory of Music and Dance traces its lineage to a merger of two early Kansas City conservatories, the Kansas City Conservatory of Music and the Horner Institute of Fine Arts. A second merger in 1959 joined the Conservatory with the University of Kansas City. In 1963, the private University of Kansas City became a part of the state university system as UMKC, with the Conservatory as a component college.

Accreditation

The Conservatory of Music's degree programs are accredited by the National Association of Schools of Music (1933), the National Association of Schools of Dance (2008), and the National Council for Accreditation of Teacher Education (1961).

Advising

All undergraduate and graduate students should be advised by the appropriate student services coordinator or associate dean prior to any registration. All music education or therapy students should see a faculty member in music education/therapy for advising.

Studies in American Music

The UMKC Conservatory's Barr Institute for American Composition Studies was formed through the generosity of Howard and Patricia Barr for the purpose of:

1. Supporting the acquisition, care, preservation, use and promotion of existing materials related to the period of American composition between 1890 and thereafter, excluding the art of jazz and its derivatives.
2. Promoting individual research initiatives related to the historical and theoretical underpinnings of post-1890 American Classical Music.
3. Supporting new composition efforts including commissions, theses and dissertations by composition students.
4. Supporting collaborative and interactive efforts to study new music.

Ensembles

The Conservatory offers students the opportunity to participate in a variety of ensembles that perform throughout the year. More than 20 ensembles are open by audition to all University students who can qualify. The ensembles include:

- Conservatory Orchestra
- Chamber Orchestra
- Percussion Ensemble
- Jazz Workshop
- Jazz Orchestra
- Jazz Band
- Wind Symphony
- Wind Ensemble
- Bella Voce
- Conservatory Concert Choir
- Conservatory Singers
- Canticum Novum
- Musica Nova
- Opera/Musical Theatre Ensemble
- Ensemble for Composers

Professional Organizations

The Conservatory sustains chapters of national professional and honor fraternities, including Sigma Alpha Iota and Mu Phi Epsilon, and the national honor society, Pi Kappa Lambda.

The Conservatory maintains an affiliation with the National Federation of Music Clubs and with student chapters of MENC: The National Association for Music Education, the American Music Therapy Association, the International Association of Jazz Educators, the American Guild of Organists and the American Choral Directors Association.

Continuing Education

The Conservatory's Community Music and Dance Academy has the mission of bridging the national reputation and excellence of the UMKC Conservatory of Music and Dance with the local musical needs of the Kansas City community. The Academy currently offers private and group instruction to 600 area musicians and dancers; coordinates camps and festivals for the Kansas City area and provides professional development through workshops and in-service to area educators and therapists.

The instructors in the Community Music and Dance Academy are professional educators, therapists, musicians and dancers. Many have advanced degrees or are current graduate students or professors at the University of Missouri-Kansas City Conservatory of Music and Dance. Academy faculty have trained with professional musicians within and outside the Conservatory and regularly perform as soloists or with ensembles locally, nationally and internationally. Some have even published and recorded their work. Most are active members of professional music organizations at the local, state and national levels.

Scholarships or Special Awards

Scholarships are available to Conservatory students and are awarded on the basis of ability (demonstrated at the audition) and academic standing. Scholarships are awarded for one year but can be renewed annually, provided students maintain the appropriate grade level, continue satisfactory performance in the major performance area, and participate in major ensembles as prescribed.

Applicants for Conservatory scholarships must complete all regular admissions procedures in order to be considered. Conservatory scholarship applications are included with the applicant's packet.

In accordance with the code of ethics of the National Association of Schools of Music, the acceptance of financial aid by a candidate is considered a declaration of intent to attend the institution, and each candidate will be so informed. The code further declares that such a student may not consider any other offer from an institutional member of the NASM except with the written consent of the music executive of the first institution. Similarly, a transfer applicant cannot be considered for financial aid without the written recommendation of the head of the music department from which the transfer is being made.

Undergraduate Programs

The Conservatory of Music and Dance offers the bachelor of fine art, bachelor of art, bachelor of music and bachelor of music education degrees. The specific degrees and their requirements are listed on the following pages.

Admissions: New Students

New students must meet the general requirements for admission to the University. Additionally, a 10-minute audition is required in the applicant's major performance field to determine proficiency and placement in the appropriate applied level.

Auditions serve as criteria for admission and for scholarships and are held during the late fall and early winter. Auditions are advisory in nature regarding performance level. It is preferred that auditions take place at the Conservatory. In cases of extreme distance or scheduling problems, a taped audition may be submitted by the applicant.

Admissions: Transfer Students

All undergraduate transfer students must:

1. Be admitted to the University and the Conservatory.
2. Present complete official transcripts.
3. Audition for applied placement.
4. Take a theory examination for validation of theory level (Music majors only).

Requirements for Placing Students in Applied Music Courses

1. All new students (including transfers) must audition before the appropriate faculty for advisement and placement. The final determination of course number and hours of credit is made at the first jury. (This placement could range from a non-credit program to Music 402 or Dance 442.)
2. All readmitted students will be assigned a level (major or secondary), a course number and the appropriate hours credit based on their last jury at UMKC. Any students who have interrupted their applied studies at UMKC for two or more consecutive semesters (not counting the summer session) must re-audition before the appropriate faculty.
3. Periodically, as required by the performance divisions, all students taking lessons for credit will perform before a jury composed of the appropriate faculty, with the exception of levels 100B and 100C. If a jury is not required in a given semester, the grade will be assigned by the applied teacher. Students who have presented a degree-plan recital (an evaluated recital) for the current semester will be assigned a recital grade without a jury. Recital and jury grades are assigned according to the average of the teacher's grade (50 percent) and the jury committee's grade (50 percent).
4. Final approval for advancement is subject to the action of the appropriate jury. If the jury decides that students have not made satisfactory progress, the students will be required to repeat a level, even though they might receive a passing grade.
5. Upon completion of the 202 applied level, all students must have applied jury approval to move on to the 301 applied level of study. All students seeking a bachelor of music degree in performance must petition the appropriate applied jury for permission to continue in the degree program at the junior level.
6. Students can request a change of level from secondary to major, or from major to secondary, for the next term but not the current term. In any case, students must complete the total number of hours required for the degree in applied music. Credit hours in major applied-music studies earned at another institution will be validated according to the approval of the appropriate jury.
7. Skipping a class number is not allowed. Students advance either by satisfactory performance at a regular jury or by credit obtained through examination. The UMKC Registration Office should be contacted for details and actual registration for receiving credit through examination.
8. All freshman and transfer students who are applying for admission as composition majors must take an applied audition as part of the application and admissions process. Results of the audition will be communicated to the composition coordinator, and will be used as part of the overall decision-making process, together with the student's portfolio, transcripts and supporting documents. In cases where the audition is not acceptable or where there is no room for that student in a given applied studio, the composition faculty may elect, if the other portions of the application are sufficiently strong, to recommend admission for the student on a provisional basis. The student must re-audition after a maximum of two semesters of study; if the situation is not resolved by the end of the first year, the student may then be denied composition major status and/or music major status.
9. All Conservatory students, except those in bachelor of music performance with piano emphasis, are required to successfully complete CONSVTY 310, Keyboard Skills IV, with a grade of B- or better before graduation.
10. Students who are late for lessons, or who miss them, do so at their own loss. Lessons missed for personal reasons of the instructor will be made up. Lessons missed because of students' illness will be made up at the discretion of the instructor.
11. All bachelor of music students, except composition majors, must complete Applied Music Studies 402. A graded public recital is required. Music Theory majors must complete Applied Studies 402 (2 credit hours), with participation in CONSVTY 498 required in lieu of the graded public recital.
12. All bachelor of music education students must complete Applied Music Studies 401 (secondary). A studio recital is required.
13. All bachelor of music education-therapy students must complete Applied Music Studies 301 (secondary).
14. All bachelor of arts music students must complete Applied Music Studies 301 (secondary).

Recital Requirements

1. Performance majors are required to perform in at least one Conservatory student recital each semester. Non-performance majors are expected to participate in student recitals at the request of the applied music teacher. A public senior recital at least 55 minutes long is required of all undergraduate performance majors. This recital will be in lieu of the jury examination for that semester.
2. Bachelor of music education majors with choral emphasis or instrumental emphasis are required to perform a studio recital at least 30 minutes long. Students may petition their division if they want to give a public recital. The public recital may be graded at the option of students and the division. This grade will be in lieu of the jury at the option of the division.
3. Students must give the required recital during a semester that they are enrolled in a 400-level applied music studies course.
4. Bachelor of music majors with a jazz and studio music emphasis are required to present a public senior recital at least 50-minutes in length during the 402J semester. The program will include works arranged or composed by the student, chosen from a portfolio submitted to the appropriate jazz/studio music and composition faculty for approval. The student will perform works from the jazz repertoire on his or her major instrument.

Ensemble Requirements

1.

Participation in at least one ensemble is required each semester that students are enrolled full-time (12 hours or more) on campus, as required by the students' degree programs, except composition majors (see music composition programs for required courses).
2. Student participation in Conservatory ensemble rehearsals and performances shall take precedence over non-Conservatory presentations.
3. A minimum of eight semesters of ensemble credit is required for graduation on any degree plan, except for the music education degree with emphasis in music therapy, which requires six semesters.
4. All undergraduate students enrolled in applied lessons on orchestral instruments must be enrolled in a major instrumental ensemble each semester, except composition majors (see music composition program for required courses), and music education students during the student-teaching semester.
5. All undergraduate Conservatory students whose major instruments are orchestral and who are enrolled in six or more hours must be enrolled in a major instrumental ensemble. This applies to all degree programs.
6. Bachelor of music majors with jazz and studio emphasis must participate in either Jazz Orchestra or Jazz Band each semester in residence. These students also will be required to participate in a major ensemble as stated in numbers 1-5 of Recital Requirements.

Recital and Concert Attendance

Undergraduate Conservatory students in BA Music, BM Jazz, BM Organ Performance, BM Theory and BME Choral are required to register for CONSVTY 154 and to be an audience member at 12 live performances, lectures or master classes in the performing arts each semester until degree requirements are met. Four of these must be Conservatory events, four must be approved by faculty of the student's major division, and four may be chosen at the student's discretion. Events chosen at the student's discretion may include concerts/lectures needed to fulfill the requirements of a Conservatory academic course. A part-time Conservatory student may spend two semesters of an academic year in completing one credit hour.

Degree Program Prerequisites

1. The student should be able to qualify for Conservatory 101, Applied Music Studies for Freshmen, for two hours credit, in the major performance area. The student also should have some familiarity with a keyboard instrument.
2. Previous experience in music, such as high school band, orchestra or chorus, is desirable.
3. Interest in a field of study outside of music is desirable.

Certification Procedures

Upon completion of the bachelor of music education degree, students must initiate the application for Missouri and Kansas certification in the Student Services Office of the School of Education. Applications should be filed during the student teaching semester. Certification is not automatic.

Elementary and secondary student teaching are required for the K-12 certificate. All prospective teachers must take and receive a satisfactory score on the following tests for state certification:

For Missouri certification, students must receive a satisfactory score on the Praxis II professional knowledge.

For Kansas certification, students must receive satisfactory scores on the Pre-Professional Skills Test (PPST) in reading, writing and mathematics, and the Praxis II core test.

Graduate Programs

The Conservatory of Music and Dance offers graduate programs leading to the following degrees: master of arts in music; master of arts in music -- music therapy; master of music in music composition, conducting, musicology, music theory and performance; master of music education; and doctorate of musical arts in music composition, conducting and performance. The Conservatory participates in the Interdisciplinary Ph.D. program for students who desire music education as their coordinating discipline and education as a co-discipline. Graduate students in the Conservatory are also subject to the regulations, listed in the General Graduate Academic Regulations and Information section of this catalog.

Interdisciplinary Ph.D. study in Music Education

The Conservatory participates in the [Interdisciplinary Ph.D. Program](#) for students who desire music education as their coordinating discipline and curriculum and instruction as a co-discipline. Students with a background in music therapy can elect music education as their coordinating discipline and choose from possible co-discipline options in consultation with the music therapy faculty.

Application is made through the [School of Graduate Studies](#).

Graduate Academic Regulations

Admission Requirements

Admission to the Conservatory of Music and Dance does not constitute an approval of major. Graduate students attending the Conservatory of Music and Dance do not have a major until divisional requirements are met and an approved planned program of study is filed.

Requirements for Admission

All students applying for admission must:

- Complete an application for admission.
- Submit transcripts of all prior work.
- Possess a minimum overall grade-point average of 3.0 for all prior coursework.
- Perform an applied audition, the purpose of which is diagnostic only, except as indicated in certain divisional standards.

Meet admission standards listed below:

- Choral Conducting
 - Master's and doctoral degrees: live interview/choral conducting students are required to audition before enrolling in applied lessons, but may be admitted without an applied audition.
- Orchestral/Wind Conducting
 - Master's and doctoral degrees: live interview/applied audition.
- Master of Arts
 - Achieve Conservatory 302 at the audition or submit area of concentration approval form.
- Music Composition
 - Master's and doctoral degrees: submit portfolio of compositions for evaluation.
- Music Education
 - Master's degree: document completion of a bachelor's degree in music education or the equivalent/have an acceptable interview with faculty from this discipline/provide evidence of musical proficiencies applicable to music education settings.
- Musicology
 - Master's degree:
 1. Possess a bachelor's degree in music.
 2. Possess a minimum grade-point average of 3.0 in undergraduate music history courses.
 3. Submit examples of writing. (The writing sample should be either 1) a research paper on some aspect of the major field - can be an earlier term paper from the baccalaureate degree or 2) a senior project from the baccalaureate degree.)
 4. Perform an applied audition before enrolling in the first term.
- Music Theory
 - Master's degree:
 1. Possess a bachelor's degree in music theory or the equivalent.
 2. Possess a minimum grade-point average of 3.0 in undergraduate music theory courses.
 3. Perform a keyboard proficiency examination.
 4. Submit examples of writing.
 5. Translate a selection into English from either French or German using a dictionary.
- Music Therapy
 - Master's degree:
 1. (a) Possess a bachelor's degree in music therapy from an NASM-accredited institution or the equivalent.
(b) Possess a bachelor's degree in music or music education from an NASM-accredited institution or the equivalent. Students who do not have the appropriate music therapy professional status must pursue a music therapy equivalency program of study that is inclusive of all undergraduate music therapy requirements before being admitted to the master's program. Provisional admission to the master of arts in music-music therapy degree may be granted by the music therapy faculty.
 2. Have an acceptable interview with one or more members of the music therapy faculty.
 3. Demonstrate leadership ability and music skills through a successful music therapy clinical presentation in a music therapy setting. This demonstration may consist of a live presentation observed by UMKC music therapy faculty, or a videotape of a session submitted to the music therapy faculty.
- Performance
 - Master's degree: achieve Conservatory 5501 (Graduate Masters Performance) at the audition.
 - Doctoral degree: achieve Conservatory 5601 (Graduate Doctoral Performance) at the audition.
- Performer's Certificate
 1. Possess a bachelor's degree in music.
 2. Achieve Conservatory 5501 at the audition.
 3. Interview with faculty/coaches in the applied area.
 4. Submit a standard resume including performance experiences.
- Artist's Certificate
 1. Possess a master's degree in music or the appropriate equivalent as determined by applied faculty in the area.
 2. Achieve Conservatory 5601 at the audition.
 3. Interview with faculty/coaches in the applied area.
 4. Submit a standard resume including performance experiences.

Matriculation Examination

The matriculation exam applies to all students whose degree program requires a 5500-level music history and/or music theory class. The matriculation examination in dictation, music theory and music history must be completed by students before enrolling for the term of admission. Students must pass all sections of the exam *or* complete review courses (421A/B, 497JA/B with a grade of B- or higher) before enrolling in 5500-level theory and history courses.

Graduate Assistantships, Fellowships and Scholarships

Graduate assistantships are available with stipends varying for the academic year depending upon assignment. Assistantships are available in accompanying, assessment, conducting, instrumental ensembles, jazz and studio music, keyboard skills, music appreciation, music composition, music education, musicology, music theory, percussion, pep band, piano, saxophone, recording/lighting, stage management and voice. Recipients are expected to devote 10 hours a week in assigned duties. Applicants for assistantships should have and maintain a minimum 3.0 (B) grade-point average.

Students who wish to apply for assistantships or fellowships should visit Conservatory Admissions for application materials and a list of current positions. Applications must be submitted by March 1. Awards will be made by April 1, and a letter of acceptance or rejection sent to the applicant by April 15. Awarding a graduate assistantship is contingent upon admission.

For information concerning assistantships, fellowships and other forms of student financial aid and scholarships, contact the

General Graduate Degree Requirements

Information concerning specific degree requirements is available upon request from Conservatory Admissions,

UMKC Conservatory of Music and Dance
4949 Cherry St.
Kansas City, MO 64110-2499
(816) 235-**2900**
cadmissions@umkc.edu

Conservatory graduate students must maintain a 3.0 graduate grade-point average in order to remain in good standing. A maximum of two courses not exceeding three hours of credit in each course at the 5500 or 5600 level in which C's are received shall be acceptable for the planned program of any advanced degree. No grade lower than a 3.0 (B) is acceptable in the major field, except in the master of arts degree.

Ensemble Requirements

All graduate students in the master of music and doctor of musical arts performance degree programs must enroll in Conservatory Wind Ensemble, Conservatory Wind Symphony or Conservatory Orchestra for a minimum of two semesters if their major instrument is an orchestral instrument. Master of music students in vocal performance must participate in Bella Voce, Conservatory Concert Choir or Conservatory Singers for a minimum of two semesters.

All graduate students in the doctor of musical arts conducting degree program are required to participate in at least one major ensemble, as advised by the conducting faculty, during each term of enrollment as a full-time student.

Foreign Language Proficiency Requirements

Master's students in musicology and theory, as well as doctoral students in composition, conducting and performance must satisfy language requirements for the degree.

For all M.M. students in Musicology, a grade of B- (2.7) or better in a first-semester, sophomore-level foreign language course is required. Students must study French, German or Italian unless the substitution of another language is approved by the supervisory committee. A language proficiency test may be substituted for course requirements, provided it documents language capabilities equivalent to the completion of a first-semester, sophomore-level, course. This must be approved in advance by the supervisory committee. In such cases, a letter describing the process and results must be forwarded to the chair of the supervisory committee, the musicology area coordinator, and the Conservatory Associate Dean for Academic Studies.

For master's students in theory as well as doctoral students in conducting and performance *who speak English as their first language*, a grade of B- (2.7) or better in a first-semester, sophomore-level foreign language course or C (2.0) work or better in each of two junior-level courses or in one senior-level literature or civilization course is viewed as an adequate demonstration of foreign language skills. Students must study French, German or Italian unless the substitution of another language is approved by a minimum of two-thirds of the supervisory committee. A language proficiency test, if provided by language instructors or departments, may be substituted for course requirements provided it documents language capabilities equivalent to the previously described courses. In such cases, a letter from the university language professor, describing the process and results, must be forwarded to the Conservatory Associate Dean for Academic Affairs. Doctoral students in conducting or performance *who speak English as a second language* must achieve a score of 600 on the TOEFL exam. If students have not completed a TOEFL exam with a score greater than 600 before arriving at UMKC, they must complete a language test in English provided by UMKC's Applied Language Institute. All courses recommended by ALI must be successfully completed and a score of 600 on the TOEFL, or the equivalent as determined by ALI must be achieved. This policy applies to all ESL students regardless of the number of years they have studied in the United States.

For doctoral composition students *who speak English as their first language*, a grade of B- (2.7) or better in a first-semester, sophomore-level foreign language course or C (2.0) work or better in each of two junior-level courses or in one senior-level literature or civilization course is viewed as an adequate demonstration of appropriate foreign language skills. A language proficiency test, if provided by language instructors or departments, may be substituted for course requirements provided it documents language capabilities equivalent to the previously described courses. In such cases, a letter from the university language professor, describing the process and results, must be forwarded to the Conservatory Associate Dean for Academic Affairs. Students who have demonstrated evidence of foreign language skills by passing one year of foreign language study at the college level, or by passing the final exam for a level-two college foreign language course, may elect the following options for fulfilling their foreign language requirement: A grade of B- or better in CONS 534B Advanced Computer Music Language Study or 598B Research Problems in Computer Languages and Music. If one of these courses is used to fulfill the foreign language requirement, it cannot also be used as part of the area of concentration. Doctoral students in composition *who speak English as a second language* must achieve a score of 600 on the TOEFL exam. If students have not completed a TOEFL exam with a score greater than 600 before arriving at UMKC, they must complete a language test in English provided by UMKC's Applied Language Institute. All courses recommended by ALI must be successfully completed and a score of 600 on the TOEFL, or the equivalent as determined by ALI must be achieved. This policy applies to all ESL students regardless of the number of years they have studied in the United States.

Master's Degrees

The master of arts, master of music and master of music education degree programs require a minimum of 30 semester hours; at least 18 hours must be numbered 5500 or above. No 300- or 400-level courses may be included in a master's program if required in the comparable baccalaureate degree at the Conservatory of Music and Dance. CONSVTY 5599 (Thesis), CONSVTY 5598 (Research Problems) or CONSVTY 5589 (Academic Portfolio) is required on all degree programs except performance. With the approval of the supervisory committee and the principal graduate adviser, students can transfer hours equal to 20 percent of the planned program from an accredited institution other than UMKC, but any such transfer credit must be less than seven years old at the time the degree is awarded. The official time limit for the completion of the master's degree is seven years.

The comprehensive examination must be taken during or after the last term of coursework. It is designed to last a total of eight hours and the content is at the discretion of the supervisory committee. The examination is offered during the fifth week of fall and spring semesters and may be scheduled during a summer session with the approval of the supervisory committee. If taken in the summer, the questions may not be graded until the Fall Semester. Students must be enrolled during the term the comprehensive examination is administered.

Student Learning Outcomes

The Conservatory of Music and Dance aims to meet or exceed the educational standards set by the National Association of Schools of Music (NASM) for the training of master's level music students. To that end, the Conservatory endorses the development of

- Individual talents, interests and philosophies which can be used creatively both to preserve and extend our cultural heritage.
- Professional competence in such disciplines as composition and performance interpretation and the evaluation of knowledge.
- Scholarly competence in the organization, interpretation and evaluation of knowledge.
- Professional competence in the communication and dissemination of knowledge.
- Individuals with the potential to solve contemporary problems in various aspects of music.

Doctor of Musical Arts

Ordinarily, doctor of musical arts candidates will be expected to show from 75 to 90 hours of approved coursework beyond the bachelor's degree (including the master's degree) on their planned programs. Approximately 80 percent of the coursework on the planned program must be at the graduate level (5500-5600).

If it is of acceptable quality and appropriate to the student's program, graduate credit not to exceed more than one-half the total credit earned beyond the bachelor's degree may be transferred from another institution to a doctoral program. Except for courses included in the earned master's degree, work done at institutions other than UMKC must have been completed within nine years of the awarding of the degree. A D.M.A. or Ph.D. student must take and pass the doctoral comprehensive examination and advance to candidacy within five years from the beginning of doctoral coursework (within four years if entering with a master's degree in the same or closely related field). After the establishment of degree candidacy, a maximum of five years will be allowed for completion of degree requirements. All D.M.A. students must demonstrate proficiency in one foreign language and satisfy the residency requirement. Residency for the D.M.A. cannot begin until the first term of enrollment as a D.M.A. student at the Conservatory. The residency requirement for the D.M.A. may be satisfied in any one of the following ways: 1) two adjacent semesters with a minimum of nine hours each, or 2) one semester with a minimum of nine hours and two summer sessions with a minimum of five hours each, provided that the full-time semester is adjacent to one of the summer sessions [it is expected that the summer sessions will be consecutive], or 3) completion of 24 hours within 18 consecutive months.

The Supervisory Committee

The supervisory committee for students seeking the doctor of musical arts shall consist of three faculty members who will approve the planned program of study and the doctoral research plan, and agree to serve as the three faculty responsible for writing and grading the major portion of the doctoral comprehensive examination.

Comprehensive Examination

Before taking the written comprehensive examination, the planned program, residency, language requirement, coursework, doctoral research plan and other divisional requirements must be completed. The student must be enrolled during the term the comprehensive examination is administered and 30 consecutive days are allowed for its completion. This examination of 24 hours consists of 18 hours of in-depth scrutiny of the major field, prepared and graded by the supervisory committee, and an objective examination covering music history and music theory, prepared and graded by faculty from the Musicology and Music Theory areas. The integrated music history-music theory examination consists of a research essay to be completed over the sixth weekend and a proctored component administered on the seventh Saturday of the fall and winter semesters. **ALL** parts of the comprehensive examination **MUST** be taken at UMKC. The integrated music history-music theory exam affects students who enter the DMA program beginning in fall 2006. Each section of the music theory and music history examinations must be passed with a grade of B- or better. If a student does not achieve a B- or better on any section of these exams, he or she must retake that section. The comprehensive examination must be completed successfully before the dissertation topic is approved. Performance students must also successfully complete their comprehensive exams before the final recital is given. Students selecting doctoral research options (Conservatory [5697](#) and [5698](#)) instead of the dissertation must complete at least one project after comprehensive exams are passed.

The Comprehensive Examination Committee

The comprehensive examination committee for students seeking the doctor of musical arts shall consist of three faculty members of the supervisory committee and any other faculty who have contributed and graded questions.

Master of Music in Music Composition Required Courses

Conservatory 5500-5600 Music History	3
Conservatory 5500-5600 Music Theory	3
CONSVTY 5533 Advanced Composition (three courses)	9
CONSVTY 5593 Introduction to Research and Bibliography in Music	3
CONSVTY 5599 Thesis(a) area of concentration(b)	4 8
Electives	2
Total hours (minimum)	32

(a) An appropriate composition. A score must be filed in the Conservatory Library.

(b) The Area of Concentration is developed by the student with guidance and approval of the supervisory committee as a part of the planned program. Examples include Applied Music/Ensemble Performance, Music Scholarship, Conducting (Choral and/or Instrumental), Music Technology and interdisciplinary courses.

Note: Each master's student majoring in music composition must audition on an instrument or voice as part of the initial enrollment process. Based on the audition results, the applied music requirement will be as follows:

1. If the student qualifies for applied music at the 301 secondary level, no applied music is required.
2. If the student does not qualify for applied music at the 301 secondary level, the student must enroll in applied music in the same performing medium for two terms or until 301 secondary is completed.

Master of Music in Conducting Required Courses

Conservatory 5582 Advanced Choral Conducting
(any two from 5582 ABC)

-and-

Conservatory 5587 Seminar in Choral Literature
(select two from 5587 ABCDE or
CONSVTY 459, Choral Literature) 8-9

-or-

Conservatory 5583 Advanced Instrumental
Conducting (any two from 5583 ABCD)

-and-

Conservatory 5586 Seminar in Orchestral or
Wind/Band Literature (5586 A or B) 8

And the following:

Conservatory 400-5500A Applied Music(a)	2-6
Conservatory 5500-5600 Music History	3
Conservatory 5500-5600 Music Theory	3
CONSVTY 5593 Introduction to Research and Bibliography in Music	3
CONSVTY 5597A Master's Conducting Performance(b)	4
CONSVTY 5598 Research Problems	2
Electives	1-5

Total hours (minimum)30

(a) (Choral Track Voice Requirement) The applicant must enroll in applied voice the first term of registration as a full-time, degree-seeking student. Progress will be measured by the following:

1. If the applicant qualifies for applied voice at the 5500A level, a minimum of two credit hours is required.
2. If the applicant does not qualify for applied voice at the 5500A level, the student must enroll in applied voice for three terms or until completion of the 5500A level.

(a) (Instrumental Track Applied Requirement) The applicant must enroll in applied music the first term of registration as

a full-time, degree-seeking student. Progress will be measured by the following:

1. If the applicant qualifies for applied music at the 401 level, a minimum of two credit hours is required.
2. If the applicant does not qualify for applied music at the 401 level, the student must enroll in applied music for a minimum of two terms, until completion of the 401 level, or until graduation.
3. In addition, instrumental conducting majors will be required to enroll in two terms of applied music on other appropriate instruments, as advised by the conducting faculty.

(b) One public performance is required. One rehearsal or lecture demonstration is required.

Master of Music Education Required Courses

CONSVTY 5500, 5600 Music History or Theory	3
CONSVTY 5574 History and Philosophy of Music Education	3
CONSVTY 5589 Academic Portfolio	3
-or-	
CONSVTY 5599 Thesis	3
CONSVTY 5594A Introduction to Descriptive and Experimental Research in Music	3
Applied Musicianship(a)	2
Methods/Materials Advanced Courses (e.g., Conservatory 5540x, 5582x, 5583x, 5586x, 5587x, Summer Workshops)	6
Electives	10
Total hours (minimum)30	

(a) MME students wishing to satisfy the applied musicianship requirement by taking lessons in their undergraduate applied area will be required to perform an applied audition prior to enrolling in the first term. Typically, these lessons will occur on a TBA arrangement with applied faculty during the fall or spring semesters. These students must complete a semester of applied lessons at no lower than the 402-2 level. Other students who wish to refine applied skills through pedagogy study (e.g., CONSVTY 491/5591 or summer workshops) or through applied study on other instruments (e.g., CONSVTY 5500C) will not be required to audition.

Master of Music in Musicology Required Courses

Conservatory 5500A Applied Music (or three terms in the same performing medium at any level)(a)	2
Conservatory 5500-5600 Music History (four courses, two periods and two of choice)	12
Conservatory 5500-5600 Music Theory	3
CONSVTY 5591K Pedagogy of Music History	3
CONSVTY 5593 Introduction to Research and Bibliography in Music	3
CONSVTY 5693 Advanced Research and Bibliography in Music	3
CONSVTY 5598 Research Problems	2
CONSVTY 5599 Thesis	6
Electives	1-3
Total hours (minimum)35	

(a) Elective credit may be substituted if Conservatory 5500A (Applied Music) is achieved at the audition.

Language Requirements: For all M.M. students in Musicology, a grade of B- (2.7) or better in a first-semester, sophomore-level foreign language course. Students must study French, German or Italian unless the substitution of another language is approved by the supervisory committee. A language proficiency test may be substituted for course requirements, provided it documents language capabilities equivalent to the completion of a first-semester, sophomore-level course. This must be approved in advance by the supervisory committee. In such cases, a letter describing the process and results must be forwarded to the chair of the supervisory committee, the musicology area coordinator and the Conservatory Associate Dean for Academic Studies.

Supervisory Committee: The Supervisory Committee, which consists of at least two musicology faculty plus one other member, is assigned to approve the planned program and prepare and grade the comprehensive examination. The committee must be selected before the student completes two terms of enrollment.

Graduate Approval of Major: Complete CONSVTY 5593 (Introduction to Research and Bibliography in Music) with a grade of A; complete one graduate-level music theory course and one graduate-level music history course with a grade of A in each course; and present a scholarly paper before a public forum on a topic agreed to in advance by the musicology faculty (the duration of the presentation is to be at least 20 minutes).

Master of Music in Performance: Keyboard Emphasis

Conservatory 5500-5600 Music History	3
Conservatory 5500-5600 Music Theory	3
Conservatory 5501 Applied Study(a)	4
CONSVTY 5593 Introduction to Research and Bibliography in Music	3
CONSVTY 5591E Advanced Pedagogy I - Piano	2
CONSVTY 5597 Master's Recital (two required)	8
Collaborative Experiences	2
Electives(b)	10

Total hours (minimum)36

(a) A minimum of one semester of applied music (5501) is required before the first recital. CONSVTY 5501 or 5597 is required each semester of enrollment until the recital requirement is met.

(b) A maximum of four elective credits may be in the performance area.

Master of Music in Performance:

Orchestral Instruments and Guitar Emphasis Areas

Conservatory 5500-5600 Music History	3
Conservatory 5500-5600 Music Theory	3
Conservatory 5501 Applied Study(a)	4
CONSVTY 5593 Introduction to Research and Bibliography in Music	3
CONSVTY 5597 Master's Recital (two required)	8
CONSVTY 305G Principles of Chamber Music	4
Electives (Non-applied music course)	3
Electives	8

Total hours (minimum)36

(a) A minimum of one semester of applied music (5501) is required before the first recital. CONSVTY 5501 or 5597 is required each semester of enrollment until the recital requirement is met.

Notes: All students whose major is an orchestral instrument must be enrolled in Conservatory Wind Symphony, Wind Ensemble or Conservatory Orchestra for a minimum of two semesters. Not more than one half the total hours counted toward the planned program may be in applied music and recitals.

A maximum of two semesters of an ensemble can be counted on any master's planned program of study.

Master of Music in Performance: Voice Emphasis

Conservatory 5500-5600 Music History	3
Conservatory 5500-5600 Music Theory	3
Conservatory 5501 Applied Study(a)	4
CONSVTY 5547 History of Opera I	3
CONSVTY 5548 History of Opera II	3
Conservatory 5566 (A, B, C, D) Vocal Literature (one required)	2
CONSVTY 5593 Introduction to Research and Bibliography in Music	3
CONSVTY 5597 Master's Recital (two required)	8
Electives	6

Total hours (minimum)35

(a) A minimum of one semester of applied music (5501) is usually required before the first solo recital. However, Voice Performance majors, with the approval of the Vocal Studies Division, may enroll in 5597 (Master's Recital) any semester to receive credit for a major UMKC opera role.

Notes: Not more than one-half the total hours counted toward the planned program may be in applied music and recitals. Participation for two semesters in a major choral ensemble is required. The diction proficiency test for French, German and Italian must be passed.

Master of Music in Performance: Woodwind Emphasis

Note: The five instruments covered in this degree shall be flute, oboe, clarinet, saxophone and bassoon.

Conservatory 5501 Applied Music (Instrument #1)(a)	4
Conservatory 5500A Applied (Instrument #2)(b)	2
Conservatory 5500A Applied (Instrument #3)(b)	2
Conservatory 5500-5600 Music Theory	3
Conservatory 5500-5600 Music History	3
Conservatory 5591,5592 Advanced Pedagogy	4
CONSVTY 5593 Introduction to Research and Bibliography in Music	3
CONSVTY 5597 Master's Recital	8
Ensemble(c)/Electives	5

Total hours (minimum)34

(a) A minimum of one semester of applied music is required before the recital. Not more than one-half of the total hours counted toward the planned program may be in applied music and recitals.

(b) A graded half recital during the second semester of study on instruments #2 and #3 is required.

(c) Two semesters of participation in a major ensemble are required on instrument #1. One semester of ensemble participation each is required on instruments #2 and #3.

Note: Jury approval of the 101(2) applied level on instruments #4 and #5 is required before graduation.

Master of Music in Music Theory Required Courses

CONSVTY 5599 Thesis	4
CONSVTY 5593 Introduction to Research and Bibliography in Music	3
CONSVTY 5524B Advanced Analysis II - Common Practice Period	3
CONSVTY 5524C Advanced Analysis III - Contemporary Period	3
CONSVTY 5526A Introduction to Schenkerian Theory and Analysis	3
CONSVTY 5526B Schenkerian Analysis	3
CONSVTY 5591G Pedagogy of Music Theory I	3
CONSVTY 5620 History of Music Theory I	3

-or-

CONSVTY 5621 History of Music Theory II	3
Music History (Graduate Level)	3
Electives	6

Total hours (minimum)34

Piano Proficiency Requirement:

The Conservatory's undergraduate piano proficiency requirement must be met.

Applied Music Requirement

Successful completion of one of the following is required:

- If the student qualifies for applied music at the 302 level, then no applied study is required.
- If the student does not qualify through audition for applied music at the 302 level, then the student must enroll for applied study for three semesters or until the 301 jury is passed.

Foreign Language Requirement

For all masters students in Music Theory, a grade of B- (2.7) or better in a first-semester, sophomore-level foreign language course or C (2.0) work or better in each of two junior-level courses or in one senior-level literature or civilization course is viewed as an adequate demonstration of foreign language skills. Students must study French, German, Italian or Latin unless the substitution of another language is approved by a minimum of two-thirds of the supervisory committee. A language proficiency test, if provided by language instructors or departments, may be substituted for course requirements provided it documents language capabilities equivalent to the previously described courses. In such cases, a letter from the university language professor, describing the process and results, must be forwarded to the Conservatory Associate Dean for Academic Affairs.

Master of Arts in Music Required Courses

Area of Concentration(a)	9
Conservatory 5500-5600 Music Theory(b)	3
Conservatory 5500-5600 Music History(c)	3
CONSVTY 5593 Introduction to Research and Bibliography in Music	3

-or-

CONSVTY 5594A Introduction to Descriptive and Experimental Research in Music	3
CONSVTY 5598 Research Problems	2
Conservatory 302 Applied Music(d)	2
Electives	8

Total hours (minimum)30

(a) The area of concentration is developed by the student with guidance and approval of the supervisory committee as part of the planned program. Nine hours of work in one discipline must be completed. Examples of concentration areas include (but are not limited to): Arts Administration, Composition, Conducting, Education, Musicology, Jazz and Studio Music, Performance, Theory and Therapy (equivalency).

(b) Elective credit may be substituted for students pursuing an area of concentration in music theory.

(c) Elective credit may be substituted for students pursuing an area of concentration in music history.

(d) If the applicant qualifies for applied lessons at the 302 level, a minimum of two credit hours is required. If the applicant does not qualify for applied lessons at the 302 level, the student must enroll in applied lessons for three terms or until completion of the 302 level. Students who chose a performance area of concentration must complete a minimum of one semester of 5500A. A total of nine hours of lessons/ensembles is required for an applied area of concentration.

Master of Arts in Music - Music Therapy

CONSVTY 5544 Advanced Clinical Experience	2
CONSVTY 5545 Seminar in Music Therapy	2
CONSVTY 5594A Introduction to Descriptive and Experimental Research in Music	3
CONSVTY 5599 Thesis	3
Select one course from the following four:	3
Conservatory 5573 Administration of Music Education/Music Therapy	
CONSVTY 5596 Theories of Learning Music	
EDUC-R&P 5505 Statistical Methods I	
EDUC-R&P 5502 Advanced Educational Psychology	
Special Interest Areas (suggested options):	16
Gerontology Certificate program	
Health Services Administration	
Gerontology Administration	
Counseling Psychology and Counselor Education	
Education	
Sociology	
Electives (5500 level music courses)	6
Total hours (minimum)	35

Notes: Students seeking this degree are not required to take the matriculation exams unless coursework in musicology and theory is required.

Performer's Certificate Required Courses

Lessons and Recitals (Solo Experiences)(a)	16
Chamber and Ensemble Work (Collaborative Experiences) and/or Prescribed Electives	8
Music Literature/Pedagogy(b)	3-5
Total hours (minimum)	27-29

Note: Voice students must pass the diction proficiency test in French, German and Italian.

(a) Instrumental and keyboard students: four hours of lessons and 12 hours of recitals. Voice students: eight hours of lessons and eight hours of recitals.

(b) Instrumental students, three hours; keyboard students, five hours; voice students, four hours.

Student Learning Outcomes

The Conservatory of Music and Dance aims to meet or exceed the educational standards set by the National Association of Schools of Music (NASM) for the training of doctoral level music students. To that end, the Conservatory endorses the development of

- Intellectual awareness and curiosity sufficient to predict continued growth and contribution to the discipline.
- Significant accomplishment in performance, composition, scholarship, music education or conducting.
- A knowledge of the techniques of music theory sufficient to perform advanced analysis.
- A knowledge of representative literature and composers of each major period of music history.
- A knowledge of general bibliographic resources in music.
- Considerable depth of knowledge in some aspect of music, such as historical period, an aspect of theory, performance practice or compositional styles.
- Sufficient writing and speaking skills to communicate clearly and effectively to members of the scholarly community and to the wider community.
- A reading knowledge of one or more foreign languages, or other appropriate research skills.

Doctor of Musical Arts in Music Composition Required Courses

Conservatory 5500-5600 Music Theory (three courses)	9
Conservatory 5500-5600 Music History (three courses)(a)	9
Conservatory 5531 Advanced Orchestration	3
Conservatory 5533 Advanced Composition (three classes)	9
Conservatory 5533 Advanced Composition (one additional) -or- 5534 Advanced Electronic Music Composition	3
Conservatory 5593 Introduction to Research and Bibliography in Music	3
Conservatory 5699 Dissertation Research(b)	6
Area of Concentration(c)	11

(a) All doctoral students are required to complete three graduate music history courses. One must be a period course (Conservatory 5555-5559), one must be a seminar course, and the remaining course may be either. Any substitutions must be approved by the music history faculty.

(b) An extended work in a format approved by the composition faculty. Two copies of the full score must be placed in the Conservatory Library.

(c) The area of concentration is developed by the student with guidance and approval of the supervisory committee as part of the planned program. Examples include Applied Music/Ensemble Performance, Music Scholarship, Conducting (Choral and/or Instrumental), Music Technology and interdisciplinary courses.

Language Requirement: A proficiency in one foreign language is required. See this section of the catalog for options.

Note: Each doctoral student majoring in music composition must audition on an instrument or voice as part of the initial enrollment process. Based on the audition results, the applied music requirement will be as follows:

1. If the student qualifies for applied music at the 301 level, no applied music is required.
2. If the student does not qualify for applied music at the 301 level, the student must enroll in applied music in the same performing medium for two terms or until 301 secondary is completed.

Doctor of Musical Arts in Conducting Required Courses

Conservatory 5582 Advanced Choral Conducting (any three from 5582 ABC)	6
Conservatory 5583D Advanced Instrumental Conducting for Choral Majors	2
Conservatory 5587 Seminar in Choral Literature (any four from 5587 ABCDE or Conservatory 459)	8(9)

-or-

Conservatory 5586 Seminar in Orchestral or Wind/Band Literature(5586 A or B)	8
Conservatory 5583 Advanced Instrumental Conducting (three from 5583 ABCD)	6

And the following:

Conservatory 5500A Applied Music(a)	2
Conservatory 5500-5600 Music History(b) (three required)	9
Conservatory 5500-5600 Music Theory (three required)	9
Conservatory 5593 Introduction to Research and Bibliography in Music	3
Conservatory 5697B Doctoral Conducting Performance(c) (Two public performances with supporting documents)	8
Conservatory 5697/5698/5699 (d) Doctoral Research	4

(a) Each doctor of musical arts conducting major must enroll in applied music the first term of registration as a full-time, degree-seeking student. If the applicant qualifies for applied music at the 5500A level, a minimum of two credit hours is required. If the applicant does not qualify for applied music at the 5500A level, then the student must enroll in applied music until completion of the 5500A level or until graduation.

1. Choral conducting majors whose major applied music is not voice will be required to take three terms of applied voice at any level.
2. Instrumental conducting majors will be further required to enroll in two additional semesters of two different instruments at the 5500B level as advised by the conducting faculty.

(b) All doctoral students are required to complete three graduate music history courses. One must be a period course (Conservatory 5555-5559), one must be a seminar course, and the remaining course may be either. Any substitutions must be approved by the music history faculty.

(c) Conducting recitals may be done with the approval of the major adviser at any time after successful completion of the Graduate Approval of Major.

(d) A minimum of one doctoral research project, exhibiting the highest level of independence, must be finished after comprehensive examinations are successfully completed. Two rehearsal/lecture demonstrations must be completed. Participation in at least one major ensemble, as advised by the conducting faculty, during each term of enrollment as a full-time student is required.

Language Requirement: A proficiency in one foreign language is required. See this section of the catalog for options.

Doctor of Musical Arts in Performance Required Courses

CONSVTY 5500-5600 Music History (three required)(a)	9
CONSVTY 5500-5600 Music Theory (three required)	9
CONSVTY 5591 Advanced Pedagogy	2(3)
CONSVTY 5593 Introduction to Research and Bibliography in Music	3
CONSVTY 5601 Applied Study(b)	4
CONSVTY 5697 Doctoral Recital (three required)(c)	12
CONSVTY 5697A Doctoral Lecture Recital	4
CONSVTY 5697/5698/5699(d) Doctoral Research	4

(a) All doctoral students are required to complete three graduate music history courses. One must be a period course (Conservatory 5555-5559), one must be a seminar course, and the remaining course may be either. Any substitutions must be approved by the music history faculty.

(b) A minimum of one semester of Conservatory 5601, Applied Music, is required before the first solo recital. Voice performance majors, with the approval of the Vocal Studies Division, may enroll in 5697 (Doctoral Recital) any semester to receive credit for a major UMKC opera role (one time only).

(c) Performance majors must enroll in CONSVTY 5601, Applied Music; CONSVTY 5697, Doctoral Recital; or CONSVTY 5697A, Doctoral Lecture Recital, each semester of registration until the recital requirement has been fulfilled.

(d) A minimum of one doctoral research project, exhibiting the highest level of independence, must be finished after comprehensive examinations are successfully completed.

Language Requirement: A proficiency in one foreign language is required. See this section of the catalog for options.

Notes:

Voice majors:

Must enroll in CONSVTY 5547, History of Opera (3.0 hours), and one from CONSVTY 5566A, 5566B, 5566C CONSVTY 5566D, Vocal Literature (2.0 hours). Voice majors must pass the diction proficiency test in French, German and Italian.

Instrumentalists:

All students whose major is an orchestral instrument must be enrolled in Conservatory Wind Symphony, Wind Ensemble or Conservatory Orchestra for a minimum of two semesters.

A maximum of three semesters of an ensemble can be counted on any D.M.A. planned program of study.

Must include three major works of chamber music in the recital component of the degree as determined in consultation with students' applied professor. These works may be performed on one program, or spread among the three recitals.

Keyboard:

Piano majors must enroll for a total of two credits in chamber music.

Artist's Certificate Required Courses

Lessons and Recitals (Solo Experiences)(a)	16
Electives(b)	13
Total hours (minimum)	29

(a) Instrumental Students - Lessons = four hours, recitals=12 hours; Keyboard Students - Recitals =16 hours (two solo, one concerto, one chamber); Voice Students - Lessons = four hours, recitals, opera roles, and/or oratorio roles =12 hours.

(b) Instrumental Students - Students must participate or enroll in four large ensembles and two chamber ensembles; Keyboard Students - Collaborative experiences, literature and pedagogy courses are recommended; Voice Students - Opera workshop, vocal literature, history of opera, vocal pedagogy, related arts courses in theater and art, as well as independent study experiences in language and performance are recommended.

Note: Voice students must pass the diction proficiency test in French, German and Italian.

Conservatory General Education Requirements

1. All Conservatory students must meet the requirements as covered in the General Undergraduate Academic Regulations and Information section of this catalog.
 2. When American history or social science is required, courses may be selected from the following: HISTORY 101, 102 or POL-SCI 210, American Government.
1. Withdrawal policy for all Conservatory students:
 2. Students can withdraw without academic assessment during the first eight weeks of a semester.
 3. Students can withdraw with academic assessment from week nine to one month before the beginning of the examination period.
 4. Students who withdraw from classes any time during the final month of scheduled classes will receive an automatic assessment of WF.
1. All Conservatory undergraduate students must take the UMKC Written English Proficiency Test after completion of 45 hours of coursework or before beginning their junior years. Students who fail the test must take ENGLISH 299 and pass the proficiency test before their diplomas are awarded. Exceptions would be Conservatory students for whom English is a second language. These students would be required to take the test after all English language requirements of their degree program are met.
 2. Students enrolling in Music Theory I-IV and Ear Training and Solfege I-IV must receive a C- grade or better to progress to the next appropriate class level. Students enrolling in Keyboard Skills I-IV must receive a B- grade or better to progress to the next appropriate class level.

Minimum Foreign Language Requirements for B. M. Degrees

The following foreign language requirements for the various bachelor of music degrees may be met by high-school equivalency courses, or by taking college-level foreign language courses. High-school foreign language coursework must be evaluated by the Conservatory to determine applicability toward a degree.

- Composition: Any foreign language 110 & 120, 10 hours
- Guitar: Any foreign language 110 & 120, 10 hours
- Organ: French or German 110 & 120, 10 hours
- Piano: French or German 110 & 120, 10 hours
- Piano Pedagogy: French or German 110 & 120, 10 hours
- String Instrument: Any foreign language 110 & 120, 10 hours
- Theory: Any foreign language 110 & 120, 10 hours
- Voice: French, German or Italian 110, 120, 211 & 221, sixteen (16) hours*
- Wind and Percussion: Any foreign language 110 & 120, 10 hours

* Two years of foreign language (French, German or Italian) are required. If two years of one of the required languages have been completed at the high-school level, then the language selected will be one of the other

Electives	14
CONSVTY 310 Keyboard Skills IV	2

Successful completion of CONSVTY 310, Keyboard Skills IV, with a grade of B- or better is required.

(a) Students majoring in composition must complete level 301 secondary in any applied area.

(b) Ensemble: Participation as a performer by enrollment in a major ensemble (other ensembles may be substituted for a major ensemble only by petition) for a minimum of four semesters is required. Four additional semesters (not necessarily major ensembles) must be fulfilled either through additional enrollment as a performer or through enrollment in CONSVTY 301G Ensemble for Composers, though a minimum of two semesters of CONSVTY 301G must be taken. It is expected that students enrolling for CONSVTY 301G more than once will observe a different ensemble or ensembles each time they enroll.

Participating ensembles include: Conservatory Orchestra, Conservatory Wind Ensemble, Conservatory Wind Symphony, Men's Chorus, Women's Chorus, Heritage Chorale, Jazz Band, Jazz Orchestra, Jazz Workshops, Canticum Novum, Musica Nova, Percussion Ensemble and Zephyr Quintet. (Others may be added as the course develops.)

Course enrollment is done through the appropriate student services coordinator in the Conservatory Academic Affairs Office, but assignment of students to particular ensembles will be done by the composition faculty in consultation with ensemble directors.

Composition faculty will be responsible for communicating with conductors regarding upcoming repertoire.

(c) Major status for the B.M. Music Composition degree is determined for new students (freshmen and transfer students) by the faculty through the standard admissions process. Students currently enrolled at UMKC who were accepted as majors in other programs must petition the composition faculty for major status. The petition will include:

A portfolio of 2-3 representative scores and/or tape recordings of original work.

A complete list of original compositions by the petitioner.

Transcripts and other academic credentials.

A personal interview (at the discretion of the composition faculty).

Normally, petitions will be considered during the spring semester as a part of the admissions review process for the coming

year.

Maintenance of major status is required for eligibility for composition scholarships and fellowships. In order to maintain major status, two conditions must be met:

A minimum of a B- average in Music Theory classes (121, 129A, 122, 129B, 221, 229A, 222A, 229B) must be maintained. No grade below a B- may be received in any Composition class (133, 134, 233, 234, 333, 433).

A student who fails to meet either or both of these conditions is considered to be on probation, and must retake classes or raise the average within one year to avoid loss of major status. If major status is revoked, it may only be reinstated by petition (as described above).

(d) The Area of Concentration is developed by the student before the end of the freshman year (or before the end of the first semester of CONSVTY study for transfer students) with guidance and approval of the composition faculty as a part of the planned program.

Student Learning Outcomes

The Conservatory of Music and Dance aims to meet or exceed the educational standards set by the National Association of Schools of Music (NASM) for the training of undergraduate music students. To that end the Conservatory endorses the acquisition of skills in musicianship and general studies.

Musicianship:

Every musician functions to some extent as:

- Performer
- Listener
- Historian
- Composer
- Theorist
- Teacher

Therefore students are required to be exposed to and develop basic competencies in all of these areas. The content of this area includes:

- Sight-singing
- Ear-training
- Harmony
- Keyboard skills
- Counterpoint
- Orchestration/arranging
- Conducting
- Music literature
- Performance practice

Undergraduate musicianship studies focus on:

1. Conceptual understanding of musical components and processes.
2. Continued practice in creating, interpreting, presenting, analyzing and evaluating music.
3. Increasing understanding of various musical cultures and historical periods.
4. Acquiring capacities to integrate musical knowledge and skills.
5. Accumulating capabilities for independent work in the music professions.

General Studies:

Studies in other areas of human achievement are important in the education of musicians. As a result students are required to develop an awareness of basic ideas and concepts in:

- Natural and physical sciences
- Social sciences and communication
- Other areas of the arts and humanities

Students are encouraged to view the combination of musicianship and general studies as a means of developing a broad foundation for future artistic and intellectual development.

Bachelor of Music in Performance

Students seeking degrees in this program may select an emphasis area in:

- Guitar
- Organ
- Piano
- Piano pedagogy
- Jazz and studio music
- String instruments (cello, string bass, viola, and violin)
- Voice
- Wind and percussion instruments (bassoon, clarinet, euphonium, flute, horn, oboe, percussion, saxophone, trombone, trumpet, and tuba)

Guitar Emphasis Area

Prerequisites

1. Students must show demonstrable knowledge of all major and minor scales and arpeggios in two and three octaves.
2. Students should be able to perform selections in contrasting styles at the level of Sor, Giuliani, Carulli, etc.
3. Students must be able to sight read single-line melodies in all positions.

Bachelor of Music in Music Theory

Degree Program Prerequisites

Formal approval of the music theory program must be acted upon after the student completes CONSVTY 222A or its equivalent. Students in this degree plan must maintain a minimum GPA of B- in the undergraduate music theory sequence (CONSVTY 121-129A, 122-129B, 221-229A, 222A-229B). Students not maintaining this minimum average may not graduate until an appropriate class or classes are retaken and the minimum average achieved. Students must demonstrate functional piano facility, aural skills and satisfactory part-writing and analysis proficiency.

Bachelor of Music

The bachelor of music program is a professional baccalaureate degree program offered in performance, music composition or music theory.

The courses listed below represent a core curriculum that is required of all students seeking bachelor of music degrees. Additional emphasis area requirements are listed under the specific degree majors.

Bachelor of Fine Arts

The Conservatory of Music offers a bachelor of fine arts in dance.

Student Learning Outcomes

The Conservatory of Music aims to meet or exceed the educational standards set by the National Association of Schools of Dance (NASD) for the training of undergraduate dance students. To that end students must

1. Demonstrate a basic ability in, and theoretical foundation for, ballet.
2. Demonstrate a basic ability in, and theoretical foundation for, modern dance.
3. Demonstrate basic knowledge of choreography.
4. Meet general studies requirements for the purpose of broadening their outlook on the world.

Students are encouraged to view the combination of dance and general studies as a means of developing a broad foundation for future artistic and intellectual development.

Bachelor of Fine Arts in Dance

The Dance Division curriculum reflects the career goals and employment opportunities of the undergraduate dance students. Students will be admitted to the dance program on the basis of a successful audition before the dance faculty, and a positive evaluation of their academic credentials and physical fitness. Student progress in the dance program will be evaluated by the dance faculty each semester during training.

Students are admitted provisionally until they are approved for their major, based on the evaluation and recommendation of the dance faculty.

Eligibility and Assessment Criteria

1. Students auditioning for acceptance at the freshman level must demonstrate a basic ability in, and theoretical foundation for, dance training.
2. At the completion of the second semester of the freshman year, students may advance to the next technical level in ballet and/or modern dance on the basis of a juried examination and assessment by the dance faculty.
3. Students not advancing to the next technical level in ballet and/or modern dance will be required to repeat their present level. This is only inclusive of the 100 technique level and the 200 technique level in ballet and modern. Students are allowed to repeat a technical level for one year or two semesters. If unsuccessful advancement occurs, students will be advised to change their major.
4. When a student has met the proficiency standards at the completion of the sophomore year through a juried examination and at the recommendation of the dance faculty, the student may petition for declaration of a major and minor area of emphasis in ballet or modern dance.
5. Following acceptance by the dance faculty, a student will be expected to achieve a fourth-year level of technical proficiency in the major area of emphasis and achieve a third-year level of technical proficiency in the minor area of emphasis.
6. Dance majors must maintain a B average in all dance technique classes and an overall combined 3.0 GPA in all dance courses.
7. All BFA candidates must perform in at least one main stage dance concert during the four years of study with the Dance Division. There are two main stage concerts per year - the Fall Dance Concert and the Spring Dance Concert. This does not include senior recitals. A program of one main stage concert shall be submitted by the candidate to the Conservatory dance advisor for record.
8. Upon completion of all degree requirements, and a satisfactory evaluation by the dance faculty of the senior recital, a student may submit application for graduation.

Program Prerequisites

1. Students applying for the dance program must have previous training in ballet and/or modern dance.
2. Applicants will be admitted, upon approval of the dance faculty, following mandatory auditions by the students.

* A senior recital is required. The recital must consist of two different dance forms studied in the four years of coursework, including one solo and one group work choreographed by the student. Further senior recital requirements are contained in the CONSVTY dance student handbook.

Throughout their programs of study, all dancers are expected to maintain general physical fitness and dance aesthetic as prescribed by the dance faculty. Health and dance aesthetic requirements, and many other details, are contained in the Conservatory Dance Student Handbook that is furnished to all dance students.

Bachelor of Arts in Music

The bachelor of arts in music degree program recognizes students' diverse interests and the shifting vocational market. This program of study offers students great flexibility in designing programs that emphasize their musical strengths, as well as their abilities in other fields.

The Conservatory's bachelor of arts in music degree requires a minimum of 129 credit hours of study. Fifty-four credit hours will be in music, including music theory and history, applied music, ensemble, listening laboratory and electives. There are approximately 48 credit hours required in the field of biological, physical and social sciences, and the humanities. A secondary specialty area, known as an area of concentration, requires approximately 15-18 credit hours from a block of 27 credit hours of electives.

Students accepted into the Conservatory's bachelor of arts music program have great freedom in designing individual programs of study around their musical training. They may take courses in such areas as business, communications, English, theater, computer science, foreign languages and music therapy, which may lead to a double-major degree.

Student Learning Outcomes

The Conservatory of Music and Dance aims to meet or exceed the educational standards set by the National Association of Schools of Music (NASM) for the training of undergraduate music students. To that end the Conservatory endorses the acquisition of skills in musicianship and general studies.

Musicianship:

Every musician functions to some extent as:

- Performer
- Listener
- Historian
- Composer
- Theorist
- Teacher

Therefore students are required to be exposed to and develop basic competencies in all of these areas. The content of this area includes:

- Sight-singing
- Ear-training
- Harmony
- Keyboard skills
- Counterpoint
- Orchestration/arranging
- Conducting
- Music literature
- Performance practice

Undergraduate musicianship studies focus on:

1. Conceptual understanding of musical components and processes.
2. Continued practice in creating, interpreting, presenting, analyzing, and evaluating music.
3. Increasing understanding of various musical cultures and historical periods.
4. Acquiring capacities to integrate musical knowledge and skills.
5. Accumulating capabilities for independent work in the music professions.

General Studies:

Studies in other areas of human achievement are important in the education of musicians. As a result students are required to develop an awareness of basic ideas and concepts in:

- Natural and physical sciences
- Social sciences and communication
- Other areas of the arts and humanities

Students are encouraged to view the combination of musicianship and general studies as a means of developing a broad foundation for future artistic and intellectual development. While broadly interacting with general studies courses, students in this degree program are encouraged to develop an "area of concentration" which represents a deeper knowledge of an area outside of music.

Required Music Courses

CONSVTY 121, 122, 221, 222A
 CONSVTY 129A, 129B, 229A, 229B
 CONSVTY 154 (Seven Semesters)
 CONSVTY 154A
 CONSVTY 323
 CONSVTY 101-301
 CONSVTY 490S
 Piano (If not the applied area)*
 Major Ensemble (Eight Semesters)**
 Electives (Music)

*Successful completion of CONSVTY 310, Keyboard Skills IV, with a grade of B- or better is required. If keyboard is the applied area, two hours of music electives are required to be chosen from music history, music composition or music theory.

**All students whose applied area is voice are required to participate satisfactorily in two opera productions as assigned by the choral faculty in consultation with voice and opera faculty.

Required General Studies Courses

Humanities	6
Social Science	6
American History 101 or 102	3
Biological Science (with lab)	3(4)
ENGLISH 110, 225, and one 300-level Writing Intensive Course	9
COMM-ST 110 Fundamentals of Effective Speaking and Listening	3
Advanced Math* (Calculus) or Statistics or MATH 206	3
CONSVTY 150 Intro to Music Literature	3
CONSVTY 351, 352 History of Music in Western Civilization I, II	6
CONSVTY 424 Acoustics	3
CONSVTY 437 Computer Literacy	3
Area of Concentration (Non-music)	15-18
Electives (Non-music)	9-12
Total Hours	75

*Must be higher than College Algebra & Trigonometry

Music Therapy Emphasis Area Prerequisites

1. Students should be able to qualify for CONSVTY 101, Applied Study for Freshman, for two hours of credit in their major performance area.
2. Students should have enough proficiency at the piano to play popular songs and church hymns, and to harmonize simple folk songs. The ability to play by ear is useful.
3. Emotional stability and good physical stamina are also essential for a music therapist.
4. Applicants are required to complete an interview with a music therapy faculty member prior to admission.

Retention

In order to continue in the B.A. in music therapy degree program, a minimum 3.0 cumulative average in CONSVTY 128, 180 and 130 is required by the end of the student's first year as a music therapy major. A student who fails to do so is considered to be on probation, and must retake the class or classes that caused the GPA to be under 3.0. The grade from the second taking of a class will supersede the grade for the first taking of a class when figuring the 3.0 minimum requirement.

Music Therapy Emphasis Area Required Music Courses

CONSVTY 101-301
 CONSVTY 101C
 CONSVTY 121, 122, 221, 222A

CONSVTY 128
CONSVTY 129A, 129B, 229A, 229B
CONSVTY 150
CONSVTY 154 (seven semesters)
CONSVTY 154A
CONSVTY 223-310
CONSVTY 302/306A/306C/307C/308A/301C (8 semesters)(c)
CONSVTY 315

Bachelor of Music Education

Completion of the bachelor of music education degree at UMKC fulfills the requirements to teach music in grades K-12 (elementary general music and secondary vocal or instrumental music) in either Missouri or Kansas. As a member of NASM and NCATE, the Music Education/Music Therapy Division seeks to fully prepare future music educators and believes that the best preparation for teaching is the completion of all courses in the undergraduate music education curriculum. Therefore, all students seeking certification through the Conservatory of Music must satisfy the course requirements of the bachelor of music education degree. Before being admitted into the music teacher education sequence, students must:

1. Pass the C-BASE examination and
2. Submit an acceptable application to the School of Education by the end of the sophomore year.

Student Learning Outcomes

The Conservatory of Music and Dance aims to meet or exceed the educational standards set by the National Association of Schools of Music (NASM) and the National Council for the Accreditation of Teacher Education (NCATE) for the training of undergraduate music students. To that end the Conservatory endorses the acquisition of skills in musicianship, education, and general studies.

Musicianship:

Every musician functions to some extent as:

- Performer
- Listener
- Historian
- Composer
- Theorist
- Teacher

Therefore students are required to be exposed to and develop basic competencies in all of these areas. The content of this area includes:

- Sight-singing
- Ear-training
- Harmony
- Keyboard skills
- Counterpoint
- Orchestration/arranging
- Conducting
- Music literature
- Performance practice

Undergraduate musicianship studies focus on:

1. Conceptual understanding of musical components and processes.
2. Continued practice in creating, interpreting, presenting, analyzing, and evaluating music.
3. Increasing understanding of various musical cultures and historical periods.
4. Acquiring capacities to integrate musical knowledge and skills.
5. Accumulating capabilities for independent work in the music professions.

Education:

The UMKC Teacher Preparation program seeks to prepare teachers who:

- Have a strong liberal arts education and who are well-grounded in their content field(s).
- Demonstrate the development of pedagogic skills.
- Possess a professional and caring commitment to education.

Program goals are based on a set of key principles and express knowledge, skills and dispositions. These goals reflect

the current knowledge base of teacher education as well as a commitment to the preparation of teachers who will be able to practice in schools as they are, and schools as they might be.

Program Goals:

1. The beginning teacher understands the discipline(s) he or she will teach and can create learning experiences that make these aspects of the subject matter meaningful to students.
2. The beginning teacher is able to engage in long range planning and curriculum development and evaluation based upon district, state and national performance standards.
3. The beginning teacher understands how children learn and develop, and can provide opportunities that support their intellectual, social and personal development.
4. The beginning teacher understands and respects students' differences and creates instructional opportunities that are adapted to diverse learners.
5. The beginning teacher is able to use a variety of instructional strategies to encourage learners' development of critical thinking, problem solving and process skills.
6. The beginning teacher creates a productive learning environment through the use of individual and group motivation that encourages positive social interaction, active engagement in learning, and self-motivation.
7. The beginning teacher models effective communication techniques (verbal, non-verbal, media, etc.) and facilitates student communication, collaboration and supportive interaction in the classroom.
8. The beginning teacher understands and uses formal and informal assessment strategies to evaluate and ensure the continuous intellectual, social, emotional and physical development of the learner
9. The beginning teacher is a reflective practitioner who continually evaluates the effects of his/her choices and actions on others and actively seeks opportunities to grow professionally.
10. The beginning teacher fosters relationships with school colleagues, parents and educational partners in the larger community to support student learning and wellbeing.
11. The beginning teacher understands theories and applications of technology in educational settings and has adequate technological skills to create meaningful learning opportunities for all students.

General Studies:

Studies in other areas of human achievement are important in the education of musicians. As a result, students are required to develop an awareness of basic ideas and concepts in:

- Natural and physical sciences
- Social sciences and communication
- Other areas of the arts and humanities

Students are encouraged to view the combination of musicianship and general studies as a means of developing a broad foundation for future artistic and intellectual development.

Bachelor of Music Education Emphasis Areas

The Conservatory of Music and Dance offers a bachelor of music education degree with an emphasis in choral music, instrumental music or music therapy.

Bachelor of Music Education - Choral and Instrumental Emphasis Areas

Prerequisites

1. Students must have an ACT score of 21 or higher, or be at the 50 percentile or higher in the high school class rank, or have a high school grade-point average of 2.5 or better.
2. Applicants should complete an interview with a music education faculty member prior to admission.
3. Students who do not achieve these standards (listed above) may be considered for admission, but must meet the standards listed below to progress through the degree.

To be retained in the program the student must achieve the following:

Before starting the junior year:

Complete 201 and be admitted into 202 in the applied area of study.

Complete CONSVTY 223 or complete CONSVTY 310, Keyboard Skills IV, with a grade of B- or better.

Compile a GPA of at least 2.8 overall and/or 3.0 GPA in music.

Must maintain a combined GPA of at least 2.75 in music theory and ear training classes.

Before the student teaching semester the student:

Must complete a 30-minute public recital and 401.

Must complete CONSVTY 310, Keyboard Skills IV, with a grade of B- or better.

Must maintain an overall GPA of at least 2.8 with a 3.0 in music and a 3.0 in music methods (128, 385 and 386/387).

Bachelor of Music Education - Instrumental Emphasis Area

Required Music Courses

CONSVTY 101-401

TE 419/437

- (a) A 30-minute recital is required. Applied studies requirement: the performance area may be in any area which carries applied music study numbers through 401. Those students majoring in a performing area other than an orchestral instrument must complete 202 level on an orchestral instrument and be admissible to band or orchestra.
- (b) Successful completion of CONSVTY 310, Keyboard Skills IV, with a grade of B- or better is required.
- (c) String students must complete seven semesters of major ensemble. Wind and percussion students must complete six semesters of major ensemble.
- (d) Wind and Percussion students: one hour in each of high brass, low brass, high strings, low strings, percussion, woodwind I, woodwind II and woodwind III, attaining a minimum grade of C in individual instrument blocks within classes (the final grade will be an average of the grade from the two blocks). CONSVTY 373I, Instrumental Techniques and Woodwind III, will include a half-semester independent-study review of wind instrument pedagogy and should be taken at the end of the techniques sequence. String students: one hour each in high brass, low brass, woodwind I, woodwind II, percussion and high or low strings depending upon specialty area and faculty recommendation (i.e.: violin students take low strings, cello students take high strings) attaining a minimum grade of C in individual instrument blocks within classes (the final grade will be an average of the grades from the two blocks) plus two more hours at the 101 level (minimum) on the other instrument in their specialty area (i.e.: violin students take viola, cello students take double bass).
- (e) Two seven-credit-hour experiences divided between the CONSVTY and School of Education provide certification in Music K-12.

Bachelor of Music Education - Music Therapy Emphasis

Teacher Certification:

(see Bachelor of Music Education procedures)

Therapy Certification:

Graduates may apply for membership by writing to the American Music Therapy Association (AMTA). For Board Certification, graduates may write to the Certification Board For Music Therapy (CBMT). All coursework must be completed before beginning CONSVTY 410 Clinical Experience. Therapy students are required to enroll in a professional liability insurance program.

Prerequisites

Students must have an ACT score of 21 or higher, or be at the 50th percentile or higher in the high school class rank, or have a high school grade-point average of 2.5 or better.

Applicants should complete an interview with a music therapy faculty member prior to admission.

Students who do not achieve these standards (listed above) may be considered for admission, but must meet the standards listed below to progress through the degree.

Retention

Before starting the junior year:

Complete 201 and be admitted into 202 in the applied area of study.

Complete CONSVTY 223 or complete CONSVTY 310, Keyboard Skills IV, with a grade of B- or better.

Compile a GPA of at least 2.8 overall and/or 3.0 GPA in music.

Complete CONSVTY 260, Clinical Foundations of Music Therapy.

Maintain a combined GPA of at least 2.75 in music theory and ear training classes.

Before the student teaching/internship year the student must:

Maintain an overall GPA of at least 2.8, with a 3.0 in music and a 3.0 in music methods classes (128, 385, 386/387) and therapy core classes (CONSVTY 130, 180, 210, 260, 406, 408, 409).

Complete CONSVTY 310, Keyboard Skills IV, with a grade of B- or better.

History

In 1973-74, a graduate nursing program was started under the aegis of the School of Graduate Studies. On Nov. 16, 1979, the Board of Curators approved a proposal to establish a school of nursing at the University of Missouri-Kansas City. In 1981, following a developmental period, two new curricula were implemented. These were an upper-division baccalaureate degree for registered nurses and a master's degree program. In 1992, the Board of Curators approved the offering of an inter-campus, cooperative doctoral program in nursing (Ph.D. N.D.). The doctoral curricula was implemented on the Kansas City campus in the Fall Semester of 1995. In 2000, the Board of Curators approved the offering of a pre-licensure baccalaureate degree program beginning in the Fall Semester of 2001.

Accreditation

The Bachelor of Science in Nursing (BSN) and Master of Science in Nursing (MSN) programs are accredited by the Commission on Collegiate Nursing Education (CCNE).

Academic Programs Offered

Please visit the School of Nursing's website at www.umkc.edu/nursing for more specific program information and plans of study for the following programs.

Bachelor of Science in Nursing

- Pre-licensure Program (128 credit hours)

- RN-BSN Program (120 credit hours)

Master of Science in Nursing

- Adult Nurse Practitioner (42 credit hours)

- Family Nurse Practitioner (42 credit hours)

- Neonatal Nurse Practitioner (43 credit hours)

- Nurse Educator (41 credit hours)

- Pediatric Nurse Practitioner (43 credit hours)

- Women's Health Nurse Practitioner (42 credit hours)

BSN to PhD (73 credit hours)

Nurse Educator Post Master's Certificate Program (12 credit hours)

Doctorate in Nursing Practice (post master's) (25 credit hours)

PhD in Nursing (61 credit hours)

Facilities

The University of Missouri-Kansas City has extensive educational facilities on the Volker campus combined with the health care educational facilities and main office on the Hospital Hill campus. These include libraries, resource centers, audiovisual resources, data processing and science information specialists. The affiliated clinical facilities include Truman Medical Center, Children's Mercy Hospital and nearly 100 community-wide facilities in the Kansas City metro area.

Admissions

The Office of Admissions is located in room 120, Administrative Center, 5115 Oak St. All applicants should complete the UMKC application for admission. Applications and transcripts should be mailed to the UMKC Office of Admissions, 120 Administrative Center, 5100 Rockhill Road, Kansas City, MO 64110-2499. Go to <http://www.umkc.edu/admissions/>

The School of Nursing recommends that applicants check the School of Nursing website, specifically Academic Programs, to access supplemental materials requested for application and to look at application deadline dates. Deadlines mean that all application materials should have been received. Applications received after these dates may or may not be reviewed depending on available space.

Once admitted, all official University communication is conducted via UMKC e-mail.

Financial Assistance

The School of Nursing offers a range of scholarships, traineeships and other funds for both full- and part-time graduate and undergraduate nursing students. Students who complete the Free Application for Federal Student Aid (FAFSA) are eligible for the following:

- Brisley Phillips Scholarship
- Chuck and Glo Curtis Scholarship
- Goppert Scholarship
- Helen Blond Scholarship
- Integral Scholarship
- John S. Waggoner Memorial Nursing Scholarship
- Laura Larkin Dexter Scholarship
- Susie Sinton Scholarship

Other funds may be available for students demonstrating financial need. Applications for nursing scholarships are considered after submission of the FAFSA. Priority deadline for that submission is March 1. Further information about applications and qualifications for any of these funds may be obtained from the School of Nursing Student Services Office, room 1410, 2464 Charlotte Street, Kansas City, MO 64108-2718.

International Students

The School of Nursing coordinates recruitment, retention and continuing advisement for nursing students from abroad in cooperation with the University's Office of International Student Affairs. In addition to the English proficiency examination (TOEFL), all graduates of foreign schools of nursing must complete the Commission on Graduates of Foreign Nursing Schools (CGFNS) qualifying examinations. This will enable registered nurses applying to the School of Nursing to take the National Council Licensure Examinations (NCLEX) for licensure as a registered nurse in Missouri. Students who are registered nurses must also send official transcripts to the CGFNS to determine degree equivalencies. Information about specific requirements for admission and progression may be obtained from the School of Nursing Student Services Office. The School of Nursing retains the right to assess the level of current clinical skills prior to enrollment in clinical coursework.

Organizations

Student Nurses Association

Membership in the Student Nurses Association (SNA) is automatic for all students admitted to and enrolled in the School of Nursing's degree programs. Students admitted into pre-nursing are encouraged to attend all meetings. Officers and representatives to the school's standing committees are elected annually. Council meetings and special events are held periodically throughout the academic year.

Sigma Theta Tau International, Lambda Phi Chapter

This international nursing honor organization is designed to recognize and encourage superior scholarship and leadership achievements in nursing. Students are eligible for consideration as junior and senior undergraduate students and as continuing graduate students. Membership, based on integrity and scholarship, is by invitation only. The induction of new members is held each spring.

Nursing Alumni Association

All students at the School of Nursing qualify for membership in the Nursing Alumni Association. Objectives of the alumni association are to provide mentoring to the student body and garner support for the school. Meetings are held periodically and officers are elected each spring by the Nursing Alumni Board.

Program Changes

The School of Nursing reserves the right to make changes in courses, degree requirements and course schedules without notice.

Academic Regulations in the School of Nursing

Nursing students are expected to be familiar with policies and procedures specific to their level of study and to review these each semester for updates and changes. These can be found in the UMKC General Catalog and in the School of Nursing's Policies and Procedures manual, which can be found at the "Policies" link on the School's home page (<http://www.umkc.edu/nursing/>). Students must also be familiar with the Nursing Honor Code found at <http://nursing.umkc.edu/documents/honorcode.pdf>.

Academic and Professional Behavior

Students in the School of Nursing abide by the University of Missouri Student Conduct Code (listed in the appendices of this catalog) and by the School of Nursing Honor Code found at <http://nursing.umkc.edu/documents/honorcode.pdf>. The Standards of Professional and Ethical Behavior detailed in the honor code have been developed to guide students who are enrolled at all levels with the UMKC-SON, including undergraduate and graduate students, and are designed to assure accountability for the professional and ethical standards of the nursing profession.

Master of Science in Nursing (M.S.N.)

Student Learning Outcomes

Graduates of the M.S.N. Program will be prepared to:

1. Demonstrate advanced knowledge, values and skills in a selected area of nursing.
2. Demonstrate advanced knowledge, collaboration values and skills in a selected functional role.
3. Apply the process of systematic inquiry (research) to validate and expand nursing practice.
4. Integrate theory and research into advanced nursing practice.

M.S.N. Degree Requirements

Students have the option to attend full-time or part-time. Nurse practitioner students choosing to attend full-time must begin in a summer semester.

Core Courses required of all students:

NURSE 5526 Health Promotion (3)
NURSE 5527 Cultural Diversity & Ethics (3)
NURSE 5528 Policy, Politics & Professional Ethics in Healthcare (3)
NURSE 5550 Theoretical Foundations In Nursing (3)
NURSE 5555 Nursing Research: Evidence-based Practice (3)
NURSE 5598 Directed Research (3)

Additional Courses required for specific programs:

Adult, Family and Women's Health Nurse Practitioner Programs:

NURSE 5548 Advanced Pathophysiology (3)
NURSE 5549 Pharmacology for Advanced Nursing Practice (3)

NURSE 5547 Diagnostic Reasoning/Advanced Assessment (4)
NURSE 5564 Primary Care I Courses (5)
NURSE 5566 Primary Care II Courses (4)
NURSE 5572 Advanced Nursing Practice: Synthesis Practicum (5)

Neonatal Nurse Practitioner Program:

NURSE 5548N Physiology/Pathophysiology of the Neonate (3)
NURSE 5549N Pharmacology for the Neonate (3)
NURSE 5547N Advanced Assessment of the Neonate (3)
NURSE 5564N Neonatal Nursing I (3)
NURSE 5566N Neonatal Nursing II (3)
NURSE 5572NI Preceptorship I (5)
NURSE 5572II Preceptorship II (5)

Pediatric Nurse Practitioner Program:

Advanced Growth & Development (1)
Technology Foundations of Advanced Practice (1)
NURSE 5547C Diagnostic Reasoning/Advanced Assessment (4)
NURSE 5548C Advanced Pediatric Pathophysiology (3)
NURSE 5549C Pediatric Pharmacology for Advanced Nursing Practice (3)
NURSE 5564C Primary Care of Children (4)
NURSE 5566C Chronic Child Health Care (4)
NURSE 5572 Advanced Nursing Practice: Synthesis Practicum (5)

Nurse Educator Program:

NURSE 5515NE Preparing Nurse Educators (3)
NURSE 5516 Curriculum Development (3)
NURSE 5517 Teaching Strategies (3)
NURSE 5547NE Health Assessment & Clinical Reasoning for Nurse Educators (3)
NURSE 5548 Advanced Pathophysiology (3)
NURSE 5564NE Clinical for Nurse Educators (5)
NURSE 5572 Synthesis Practicum for Nurse Educators (3)

Doctor of Nursing Practice Program

Student Learning Outcomes

Graduates of the DNP program will be prepared to:

1. serve as leaders in nursing and health care.
2. demonstrate advanced knowledge, values, and skills in a selected area of nursing.
3. demonstrate advanced knowledge, values, and skills in a selected functional role.
4. synthesize theory, research knowledge and methods to create, implement, and evaluate
 - a. practice interventions,
 - b. health delivery systems,
 - c. clinical teaching.

Program Requirements

Pre-Requisite Coursework:

NURSE 5550 Theoretical Foundations in Nursing (3)
NURSE 5555 Nursing Research: Evidence-Based Practice (3)

Core Coursework:

Summer I

NURSE 5602 Healthcare Systems & Leadership (3) and four days on-site

Fall I
NURSE 5606 Policy & Advocacy (3)
NURSE 5608 Theory I (3)

Spring I
NURSE 5611 Healthcare Economics & Quality (3)
NURSE 5613 Application of Evidence-based Practice (3)

Summer II
NURSE 5620 Advanced Practice V (5) - DNP Clinical and a 2-4 day site visit

Fall II
NURSE 5624 Clinical Capstone (5)

Ph.D. in Nursing

Program Objectives

The nurse scholars prepared in this program will:

- Serve as leaders in nursing and health care.
- Function as nurse scientists to advance the body of knowledge that guides the practice of nursing and contributes to interdisciplinary knowledge.

Program Requirements

BSN-PhD/Pre-requisite Coursework:
NURSE 5527 Cultural Diversity & Values (3)
NURSE 5528 Policy, Politics & Ethics (e)
NURSE 5550 Theoretical Foundations in Nursing (3)
NURSE 5555 Nursing Research: Evidence-based Practice (3)

Core Coursework:
NURSE 5603 Research Institute I (2)
NURSE 5604 Research Institute II (2)
NURSE 5608 Theory Development I (3)
NURSE 5610 Theory Development II (3)
NURSE 5612 Statistics I (3)
NURSE 5622 Statistics II (3)
NURSE 5631 Substantive Seminar: Health Promotion (3)
NURSE 5662 Psychometrics (3)
NURSE 5668 Quantitative Research Methods (3)
NURSE 5664 Concepts & Approaches of Epidemiology & Statistics in Research (3)
NURSE 5670 Qualitative Research (3)
NURSE 5666 Designing Research (3)
NURSE 5697B Ethics/Responsible Conduct of Research (3 one-hour courses)
Collateral Coursework (12)
NURSE 5699 Dissertation (12)

Bachelor of Science in Nursing

Student Learning Outcomes

Upon graduation the B.S.N. student will:

1. incorporate knowledge from arts, humanities and sciences in the planning and provision of professional nursing care.
2. demonstrate Personal Effectiveness as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Critical Thinking, Professional Valuing/Caring, and Professional Role Development.
3. demonstrate Interpersonal Effectiveness as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Communication, Teaching/Learning, and Technology Utilization.
4. demonstrate Effectiveness in Human Health Outcomes as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Health Promotion and Disease Prevention and Evidence-Based Care.
5. demonstrate Effectiveness Within Complex Health Systems as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Leadership/Management, Global Perspectives, and Health Care Systems and Policy.

Pre-licensure Option

Baccalaureate Nursing Education

Baccalaureate nursing education is designed to prepare a nurse generalist who demonstrates responsibility, accountability and critical thinking. The nurse generalist uses a comprehensive approach to health care and can meet diversified health concerns of individuals, families and communities at all stages of development. The University of Missouri-Kansas City offers an innovative program in the management of health.

Program Requirements

A sample course of study for a full-time B.S.N. student is listed below. Students must maintain a minimum grade of C in all nursing coursework as well as carry a minimum semester GPA of 2.75. See specific course requirements at the School of Nursing website.

Fall Semester Year 1 (18 hours)

A&S 100 Methodologies for Pre-Health (3)
NURSE 101 Introduction to Nursing (2)
NURSE 120 Anatomy and Physiology I (4)
ENGLISH 110 English I (3)
MATH 110 College Algebra (3)
LS-MCRB 112 Microbiology and Man (3)

Spring Semester Year 1 (18 hours)

Apply to Clinical Major
CHEM 115 Chemistry (4)
CHEM 115L Chemistry Lab (1)
NURSE 160 Anatomy and Physiology II (4)
PSYCH 210 General Psychology (3)
POL-SCI 210 American Government (3)
ENGLISH 225 English II (3)
Complete WEPT (or complete Summer Year 1)

Fall Semester Year 2 (18 hours)

Fine Arts Humanities Elective (3)
NURSE 127 Drug Calculations (1)
NURSE 230 Health Issues in Aging (2)
NURSE 220 Fundamental Concepts and Skills (6)
NURSE 250 Health Assessment (3)

NURSE 395 Pathophysiology (3)

Spring Semester Year 2 (17 hours)

CHEM 206 Nutrition (3)
NURSE 252 Human Growth and Development (3)
NURSE 256 Pharmacology (3)
NURSE 262 Management of Adult Health (5)
Writing Intensive Course (3)

Fall Semester Year 3 (16 hours)

PHILOS 210 OR PHILOS 221 or PHILOS 222 (3)
NURSE 342 Legal and Ethical Issues (2)
NURSE 345 Quantitative Analysis in the
Health Sciences (3)
NURSE 364 Management of Maternal and
Family Health (eight weeks) (4)
NURSE 366 Management of Child and
Adolescent Health (eight weeks)(4)

Spring Semester Year 3 (15 hours)

NURSE 356 Applied Spanish for Health Care Pre-Professionals (3)
NURSE 360 Management of Mental Health (4)
NURSE 362 Management of Adult Health II (5)
NURSE 476 Scientific Inquiry (3)

Fall Semester Year 4 (14 hours)

Socio-Political Elective (3)
Nursing Elective (2)
NURSE 465 Management of Community Health Nursing (4)
NURSE 467 Management of Critical and Emergent Care (5)

Spring Semester Year 4 (12 hours)

NURSE 462 Special Topics in Health Care (2)
NURSE 468 Effectiveness in Complex Health
Systems II (5)
NURSE 472 Clinical Internship (5)

R.N. to B.S.N. Program

General Education Requirements

Students complete 56 credit hours in general education coursework that may include the humanities, mathematics and social, behavioral and natural sciences.

The University requires that all students complete a three-hour constitution course. UMKC courses that currently satisfy this requirement include: HISTORY 101, HISTORY 102, or HISTORY 360R **or-** POL-SCI 210. In addition, students must complete the following, or an equivalent course:

- ENGLISH 110
- ENGLISH 225
- Philosophy Course
- NURSE 345 Statistics (upper-division)
- NURSE 395 Pathophysiology (upper-division)

Nursing Education Requirements

Twenty-eight hours of lower-division nursing credits may be obtained by:

- Direct transfer from a National League for Nursing Accrediting Commission (NLNAC) associate degree program.
- Completion of specific coursework for graduates of diploma programs and non-NLNAC associate degree programs.

Thirty-six hours of upper-division nursing credits are required. The UMKC School of Nursing has developed an innovative program where students, as a cohort group, progress through four "blocks" of coursework. Rather than traditional, individual courses, the curriculum is integrated and based on concepts integral to successful nursing in the changing health care system. Both full- and part-time plans are available.

The nursing curriculum consists of:

NURSE 401 Health Assessment (3)

NURSE 476 Scientific Inquiry (3)

NURSE 481 Tools for Personal Effectiveness (6)

- Introduction to Manuscript for Publication
- Introduction to Theory
- Professionalism
- Historical Roots of Health Professions
- Power Bases and Image
- Time and Stress Management
- Career Mapping
- Scope and Standards of Practice
- Moral Development and Values
- Critical Thinking and Decision Making
- Introduction to Research/Evidence-based Practice
- Ethics
- Introduction to Informatics
- Diversity in the Work Force

NURSE 482 Tools for Interpersonal Effectiveness (6)

- Conflict Resolution and Negotiation
- Communication Skills and Theories
- Leading and Managing Change
- Professional Ethics
- Groups and Teams
- Legalities of Health Care
- Marketing
- Informatics
- Nursing, and Public Policy
- Cultural Diversity in Health Care
- Manuscript for Publication Assignment

NURSE 483 Effectiveness in Human Health Outcomes (6)

- Theories Used in Care of Humans
- Cultural Competence
- Case Management
- Community Based Care/Public Health
- Epidemiology
- Health Promotion and Restoration
- Health Care Policy
- Precede - Proceed Model
- Bioterrorism Preparedness
- Human Patient Simulation
- Electronic Health Record
- Economics in Health Care
- Health & Inequality
- Vulnerable Populations
- Social Justice in Nursing

NURSE 484 Effectiveness in Complex Health Systems (6)

- Managing Quality and Risk
- Systems Theory
- Health Care Delivery and Financing
- Organizational Theories and Culture
- Politics, Use of Legislative System
- Leadership Styles and Theories
- Managing Costs and Budgets
- Magnet Recognition Program
- Health Care Policy Issues
- Staffing, Scheduling & Evaluating Staff
- Practice Issues Related to Technology
- Conducting Nursing Research
- Delegation & Managing Personal/Personnel Problems
- Leading Through Professional Organizations

NURSE 485 Application to Practice I (clinical practicum) (3)

- Team-building concepts
- Applied leadership principles
- Applied research and writing skills
- Technology application for project management
- Business communication
- Conflict management

NURSE 486 Application to Practice II (clinical practicum) (2)

- Team-building concepts
- Applied leadership principles
- Applied research and writing skills
- Technology application for project management
- Business communication
- Conflict management

NURSE 488 Special Topics (1)

General Information

History

Originally organized in 1885 as the Pharmaceutical Department of the University of Kansas City, the school was reorganized and reincorporated in 1898 as the Kansas City College of Pharmacy and Natural Science. In 1943, this forerunner of the present school joined the University of Kansas City as its third professional school.

When the University of Kansas City was incorporated into the University of Missouri System in 1963, the School of Pharmacy became the only state-supported pharmacy school in Missouri. In October 1985, the school observed its centennial celebration, commemorating 100 years of progress in pharmaceutical education, research and service.

The School of Pharmacy is a member of the American Association of Colleges of Pharmacy (AACP). The doctor of pharmacy program is accredited by the Accreditation Council for Pharmacy Education (ACPE). The most recent accreditation review was in 2003, when full accreditation was continued. The next on-site accreditation review will be during the 2009-10 academic year. Anyone interested can contact ACPE at <http://www.acpe-accredit.org> for more information. The bachelor of science and master of science degrees are accredited by The Higher Learning Commission North Central Association of Colleges and Schools.

Degrees Offered

The School of Pharmacy offers programs leading to the advanced professional degree of doctor of pharmacy and the undergraduate-level bachelor of science in pharmaceutical sciences. Graduate-level degrees include the master of science in pharmaceutical sciences. Emphasis areas available in the master's degree program are:

- Pharmaceutics (including pharmaceutical technology and pharmacokinetics)
- Pharmaceutical chemistry (including medicinal chemistry),
- Pharmacology
- Toxicology

The School of Pharmacy participates in the Interdisciplinary Ph.D. program with emphasis areas in pharmaceutical sciences and pharmacology and toxicology.

The School of Pharmacy offers programs leading to the advanced professional degree of doctor of pharmacy and the undergraduate-level bachelor of science in pharmaceutical sciences. The master of science in pharmaceutical sciences is the graduate-level degree. Emphasis areas available in the master's degree program are pharmaceutics (including pharmaceutical technology and pharmacokinetics), pharmaceutical chemistry (including medicinal chemistry), pharmacology and toxicology. The School of Pharmacy participates in the Interdisciplinary Ph.D. program through the school of graduate studies with emphasis areas in pharmaceutical science and pharmacology.

The UMKC School of Pharmacy offers a Pharm.D. satellite program on the University of Missouri-Columbia (UMC) campus in conjunction with the School of Health Professions. The traditional (UMKC campus) and satellite Pharm.D. programs encompass five years of professional study after completion of the required pre-pharmacy coursework. Although students enrolled in the satellite program will be on the UMC campus, these students will be considered UMKC students. Students accepted into the satellite Pharm.D. program will complete the basic science and general education courses in traditional classroom settings on the Columbia campus whereas students accepted to the traditional program will complete coursework on the UMKC campus. Pharmacy specific courses offered on the UMKC campus will be transmitted via distance education technology from UMKC to students enrolled in the satellite program.

Ph.D. programs at UMKC are interdisciplinary. Students desiring to study at the doctoral level in pharmaceutical sciences or pharmacology and toxicology must apply to the School of Graduate Studies. Detailed information on the general and discipline-specific admission requirements may be found in the School of Graduate Studies section of this catalog.

Students pursuing Interdisciplinary Ph.D. study, who have selected pharmaceutical sciences or pharmacology and toxicology as one of their disciplines, should consult the School of Graduate Studies section of this catalog for degree requirements and other academic regulations applicable to their degree programs.

Career Applications

The M.S. degree offers advanced education in pharmaceutical sciences to students with undergraduate degrees in pharmacy or baccalaureate degrees in other fields such as chemistry, chemical engineering or biology. An M.S. degree is often a requisite for management positions in industrial pharmaceuticals production, quality assurance, regulatory affairs and other areas. It is sometimes desired as a milestone for full-time graduate students who are pursuing Interdisciplinary Ph.D. degrees, but the M.S. is not a prerequisite for the Ph.D. degree. Full-time students applying for admission to the graduate programs in the School of Pharmacy are urged to apply to the Interdisciplinary Ph.D. program.

The Ph.D. degree is the highest academic degree offered in any American university. It is a research degree. Merely attaining high grades in didactic coursework and passing examinations is insufficient demonstration of merit for this degree. Obtaining the Ph.D. degree requires demonstration of the highest order of scholarship; diligent and inventive pursuit of a research program; and defense of a dissertation based upon original research.

The Ph.D. is usually a requirement for obtaining appointment to university faculties or to senior-level appointments in research and development in pharmaceutical and related industries, research institutes and in government.

Bachelor of Science in Pharmaceutical Sciences: Program Description

The four-year bachelor of science in pharmaceutical sciences degree program is an undergraduate degree that does not prepare graduates for pharmacist licensure. Interest in developing a four-year baccalaureate degree program in pharmaceutical sciences was generated by the desire of the faculty to expand the educational base of the school in the health-related sciences and the projection that graduates of the bachelor of sciences in pharmaceutical sciences program will help meet current and future societal needs in these fields of study.

Definition and General Description of the Program

Schools of pharmacy, as well as schools of medicine, have traditionally focused on the medically related life sciences. While schools of medicine generally have not become involved in undergraduate education, schools of pharmacy have evolved professional programs producing pharmacists and pharmaceutical scientists in direct collaboration with colleges of arts and sciences. Pharmaceutical sciences represents, in one sense, the collective basic science that underlies pharmacy. Rooted in discovery and development of therapeutics, pharmaceutical scientists seek to identify and understand chemical, biochemical, pharmacological, toxicological and other fundamental processes necessary to define and sustain the desired therapeutic effect. Pharmaceutical science and pharmacy itself both clearly require early training in biology, chemistry and physics. While students in these more basic disciplines move on to increasingly specialized courses of study indigenous to those separate sciences, students of pharmaceutical sciences, or related life sciences, evolve in a course of study which continues to stress a cross-fertilization of ideas of fundamental biology and chemistry while focusing on the complexity and balance of living systems.

Students in the pharmaceutical sciences degree program will be broadly trained during the early stages of the curriculum in the arts, humanities and social sciences while achieving a broad early emphasis in the natural sciences and a later specialization within the chemical and pharmaceutical sciences. The program of study will sharpen their cognitive and affective skills consistent with other alternative programs at the UMKC campus. The structure, diversity and functional characterization of living systems will be studied, examined, and understood with emphasis on the nature of disease, the disease process, and the design and development of drugs and dosage forms.

Career Applications

Students in the B.S. in pharmaceutical sciences program will be prepared to begin specialized study at the graduate level in a number of pharmaceutical sciences. They may directly enter the work force in the biomedical or pharmaceutical industry and make a significant contribution to the health and well-being of society through the design and development of novel therapeutic agents or processes. More importantly, their understanding of the interactions between environmental chemicals and humans will make them attractive applicants for positions in regulatory agencies and industries dealing with such issues. The advanced graduate and postgraduate education which some will seek will result in a higher level of scholarship and the potential for a more fundamental contribution.

The specific demand for students trained at the B.S. level in pharmaceutical sciences is increasing. In the pharmaceutical industry, graduates with this specific training have been sought as technical assistants in pharmacological and pharmaceutical laboratories and related areas where the B.S. trained biologist or chemist would not be expected to be as attractive a candidate.

It is widely acknowledged that schools and colleges of pharmacy need to increase the number of B.S.-trained pharmaceutical scientists who will enter their graduate programs. The graduates of Ph.D. programs in pharmaceutical sciences are in increasing demand in both academia and the pharmaceutical industry, and are expected to provide the primary base from which the professorate of colleges and schools of pharmacy is renewed and continued. Graduates with a B.S. in pharmaceutical sciences also can apply for sales positions in the pharmaceutical industry.

Advising

Students will receive academic advising from professional staff in the Pharmacy Student Services Office, as well as a faculty adviser. Applicants may elect to complete the first two years of the B.S. in pharmaceutical sciences curriculum at another accredited college or university and then transfer to UMKC. Students planning to transfer coursework should check with the Pharmacy Student Services Office to verify course transfer equivalencies from other institutions.

School Activities

Advising System

On entry into the pharmacy program, each student is assigned a professional development adviser (PDA). The PDA acts as a mentor during the program.

It is particularly important that students regularly meet with their PDA to ensure that they are meeting all requirements.

The PDA's role is to counsel and advise students, based on each student's individual needs. If students are experiencing difficulties, whether academic, financial or personal, or if they would like more in-depth information about various facets of the curriculum or career alternatives, they should seek counsel from the PDA. The advisers are familiar with the various sources of assistance and will help students seek the best solution to their problems. Building a strong relationship with the PDA is strongly encouraged.

Libraries

The University Libraries provide the full spectrum of information services to support study and research in pharmacy. For additional information, consult the University Libraries section of this catalog.

Student Services

Student Life

Student Government

The student body annually elects a Executive Pharmacy Student Council from each campus, which consists of the president, president-elect (KC), vice president, membership vice president, secretary, historian, treasurer and student pharmacy advocacy representative of the student chapter of the American Pharmacists Association, the Academy of Student Pharmacists (ASP), one Student Government Association representative and two representatives from each professional class. This group supervises the annual student activities budget process and recommends students to represent the student body on various campus committees. As issues and concerns arise, the voice of student pharmacists are expressed at bi-monthly executive meetings.

The Student ASP Script

A student-administered, student-oriented newsletter is published two-three times each semester by the Academy of Student Pharmacists (ASP) at UMKC. Its purpose is to inform the student body, as well as the faculty and staff of student activities and achievements, announce available opportunities and report on developments affecting student life. It is a primary vehicle of communication within the school. Articles are welcomed from any student, student organization, faculty or staff member.

Student Organizations

Academy of Managed Care Pharmacy (AMCP)

AMCP is the national professional society dedicated to the concept and practice of pharmaceutical care in managed health care environments. Its mission is to promote the development and application of pharmaceutical care in order to ensure appropriate health care outcomes for all individuals. Its sole purpose is to represent the views and interests of managed care pharmacy. The UMKC Chapter of AMCP members participate in programs such as Kansas City Antibiotic Taskforce (KART). The KART program teaches elementary school children about germ transfer and the importance of washing hands. Members also participate in pharmacy and therapeutics competitions at the national level. Membership in the organization helps to expose student pharmacists to the practice of managed care pharmacy.

Academy of Student Pharmacists (ASP)

This professional organization is the student branch of the American Pharmacists Association (APhA). ASP provides a means for pharmacy students to become involved at the state, regional and national levels in the pharmacy profession. Members annually send delegations to the regional and national meetings of the association. The UMKC ASP chapter has been recognized numerous times at regional and national levels for its many professional and service activities.

The local chapter acts as the student governing body for the School of Pharmacy and represents the pharmacy students in the campus Student Government Association. Membership is encouraged of all pharmacy students. Pre-pharmacy students also are eligible to join. Membership in ASP includes subscriptions to several professional publications such as the Journal of the American Pharmacists Association, Pharmacists.com and the Missouri Pharmacist. In addition, membership entitles a student to discounts on books, malpractice insurance and car insurance.

Community service is a major part of professional career development and outreach. Through nationally sponsored service projects like Operation Diabetes, Operation Immunization, and Heartburn Awareness along with local chapter initiatives such as ROOt for Health, Project Outreach and Asthma Awareness, students have a direct impact on the health of their community while promoting the role of the pharmacist.

Professional aspects of the organization include hosting a wealth of speakers from various aspects of the pharmacy profession to discuss opportunities and necessary training. These bi-monthly meetings allow students to expand their career paths and network with students from other classes.

ASP is not all work though. Its members reach across the borders and plan social events with neighboring schools of pharmacy to promote lasting relationships.

The National Community Pharmacists Association (NCPA)

The National Community Pharmacists Association is a national organization dedicated to representing pharmacists who practice in the independent community setting. Membership in NCPA provides an excellent opportunity for students who are interested in independent pharmacy practice to network and make contacts with pharmacy students and practitioners.

Rho Chi

The Alpha Omega chapter of this pharmaceutical honor society was established at UMKC in 1954. Eligibility is limited to students who have completed five semesters of the scholastic work applicable toward the doctor of pharmacy degree. To be invited to membership, students must have a minimum GPA of 3.0, be in the upper 20 percent of their class and have shown evidence of good character and leadership.

Kappa Epsilon

Kappa Epsilon is a professional pharmacy fraternity open to all pharmacy, pre-pharmacy, and allied health students, whose mission is to empower its members to achieve personal and professional fulfillment by developing their confidence, self esteem, interpersonal skills, and leadership vision and represent the interest of the members to healthcare professionals and the community at large. The Omega Chapter of this national organization was established at UMKC in 1958. Each year the chapter sponsors certain worthwhile projects for the school and the community including Breast Cancer Awareness Month, Poison Prevention and a Patient Assistance Program at the Jackson County Free Health Clinic.

Kappa Psi

This national professional pharmaceutical fraternity was founded in 1879 and offers membership to both men and women. The Gamma Theta Chapter of Kappa Psi was established at UMKC in 1957. Steeped in tradition, its purpose is to maintain the highest ideals of pharmacy through ethics, scholarship and fellowship. Many social and professional activities are planned each year with emphasis on campus and community service projects.

Phi Lambda Sigma

Phi Lambda Sigma is the national pharmacy leadership society which promotes the development of leadership in pharmacy, especially among pharmacy students. The society encourages participation in all pharmacy activities. Membership crosses fraternal and organizational lines to include pharmacy students, faculty, alumni and honorary members. Students must be nominated for membership and must have shown evidence of good character and leadership.

Student Society of Health-System Pharmacists (SSHP)

The Student Society of Health-System Pharmacists (SSHP) purpose shall be to provide students in the School of Pharmacy with an understanding of career opportunities in health-systems pharmacy; provide knowledge of the preferred credentials for a career in health-systems pharmacy; and encourage participation in local, state, and national societies as a student and as a pharmacist after graduation. During the academic year, SSHP sponsors events to include residency information roundtables, clinical skills competition, and presenters from local, state and national organizations.

Scholarships, Special Awards and Financial Assistance

The Dean's List

At the end of each semester, the names of full-time doctor of pharmacy and bachelor of science in pharmaceutical science students whose term GPA is 3.5 or higher are placed on the dean's list. These students receive a letter of congratulations and a notation is placed on their permanent records. Students must complete a minimum full-time program of 12 graded hours to qualify for the dean's list. The credit/no credit option may not be used as part of the 12 hours.

Degrees With Honors

Students who meet the academic standards prescribed by the faculty will be graduated "with honors." The criteria for latin honors eligibility is as follows:

Pharm.D. Students

Summa Cum Laude

- Pharmacy GPA* greater than or equal to 3.750.
- No periods of probation.
- No incidents of unprofessional behavior.

No more than 5% of the graduating class will be awarded Summa Cum Laude honors. If more than 5% of the class qualifies under the criteria above, the GPA criteria will be raised and students below the revised GPA will be awarded their degrees with Magna Cum Laude honors.

Magna Cum Laude

- Pharmacy GPA* greater than or equal to 3.600.
- No periods of probation.
- No incidents of unprofessional behavior.

No more than 5% of the graduating class will be awarded Magna Cum Laude honors. If more than 5% of the class qualifies under the criteria above, the GPA criteria will be raised and students below the revised GPA will be awarded their degrees with Cum Laude honors.

Cum Laude

- Pharmacy GPA* greater than or equal to 3.500.
- No periods of probation.
- No incidents of unprofessional behavior.

No more than 10% of the graduating class will be awarded Cum Laude honors. If more than 10% of the class qualifies under the criteria above, the GPA criteria will be raised and students below the revised GPA will be awarded their degrees without Latin honors.

* GPA for Latin honors is the School of Pharmacy GPA on all courses completed at UMKC through the end of the 9th semester of the professional program.

Bachelor of Science in Pharmaceutical Sciences (BSPS)

Summa, Magna and Cum Laude Latin Honors decisions for BSPS students will be awarded based upon an average of the GPAs of students receiving the BSPS during the previous two years.

- No more than 5% of the graduating class may be awarded the BSPS with Summa Cum Laude honors.
- No more than 5% of the graduating class may be awarded the BSPS with Magna Cum Laude honors.
- No more than 10% of the graduating class may be awarded the BSPS with Cum Laude honors.

Adjustments to the GPA minimums will be made if necessary in order not to exceed the maximum percentages. In addition, BSPS students must have had no periods of probation and no incidents of unprofessional behavior.

Graduation Awards Banquet

An annual awards recognition program is held at the end of the final term in conjunction with the doctor of pharmacy graduation banquet. At that time, recognition is given to graduating students for superior academic achievement, leadership, and service. Selection of the recipients, except where noted otherwise, is made by vote of the pharmacy faculty in conjunction with the scholarship and financial aid committee.

Achievers of Excellence Awards Ceremony

Each fall an awards ceremony is held to recognize those students in the School of Pharmacy who receive scholarships or awards from the school, the University or the school's constituent groups. Most of these awards are competitive and are confirmed by the scholarship and financial aid committee.

Student Leadership Recognition

Annually, student leaders are recognized for their efforts on behalf of the School and the University.

Doctor of Pharmacy Graduation Awards

Douglas Adcock Memorial Award

An annual cash award established in memory of Douglas Adcock, a 1977 graduate of the School of Pharmacy, is presented to a student who plans a career in the public health service or who exhibits the ability to overcome adversity with professionalism.

Pharmacy Alumni Association Award

The Alumni Association of the School of Pharmacy gives an engraved plaque to the graduate who has exhibited outstanding leadership in school affairs. Selection is made by the board of directors of the Pharmacy Alumni Association in conjunction with the scholarship and financial aid committee.

The American College of Apothecaries Award

The graduating student who intends to practice in an independent community pharmacy after graduation and who has shown outstanding scholastic achievement and participation in school activities receives an engraved silver bowl from the American College of Apothecaries.

American Pharmacists Association Service Award

A certificate is presented by the American Pharmacists Association-Academy of Student Pharmacists to the graduating student who has done the most for the student branch of the association. Selection is made by the ASP Executive Board.

First DataBank Medical Writing Award

An Evaluations of Drug Interactions loose leaf edition is presented to a graduating doctor of pharmacy student who has demonstrated excellence in medical writing.

GlaxoSmithKline Award

An personalized certificate and four reference books published through the American Pharmacists Association is awarded from GlaxoSmithKline Pharmaceuticals of Philadelphia, Pa., to a member of the graduating class for superior achievement in clinical pharmacy patient care.

Lilly Achievement Award

The Eli Lilly Company of Indianapolis, Ind., presents a trophy to a member of the graduating class for superior scholastic and professional achievement.

Mitzi McGee Memorial Award

An annual cash award established in memory of Mitzi McGee, a 1977 graduate of the School of Pharmacy, is presented to a female member of the graduating class who, while in school, has been active in professional pharmacy affairs, especially those which affect the status of women in pharmacy. Preference will be given to a married student. The recipient must be present at the graduation awards banquet to receive the award.

Merck Award

Merck & Company Inc. of Rahway, N.J., presents a Merck Manual and Merck Index to two graduating students for noteworthy academic achievement in the area of pharmaceutical chemistry.

Mylan Pharmaceutical Excellence in Pharmacy Award

Mylan Pharmaceuticals Inc. of Birmingham, Ala., presents a plaque and a limited edition lithograph to a graduate in the top 20 percent of the class who exhibits exceptional skills in the area of drug information dissemination.

The Natural Medicines Comprehensive Database Award

Recognition is presented to the senior student who has shown an interest in the use of natural medicines. The recipient also must have proven academic and extracurricular activities demonstrating outstanding promise in the assessment, evaluation and delivery of patient care related to the use of natural medicines. The recipient receives a copy of the natural medicines comprehensive database, a subscription to the Natural Medicines Continuing Education series and a certificate.

Perrigo Award

The Perrigo Company of Allegan, Mich., awards a stipend and hand-engraved wall plaque to a graduating student in recognition of excellence in nonprescription medication studies.

Pharmacists Mutual Award

One year of pharmacists liability insurance is presented by the Pharmacists Mutual Insurance Co. of Algona, Iowa, to

a graduate, based on academic achievement and professional pharmacy outlook.

Pharmacy Student Organizational Awards

Honors are presented to graduating students based on a combination of scholastic achievement, strengths of character, dedication and leadership evidenced during residency in the School of Pharmacy as a member of a particular student organization. Selection is made by the respective pharmacy student organizational officers.

Roche Pharmacy Communications Award

Roche Laboratories, a division of Hoffman-La Roche Inc. of Nutley, N.J., presents an engraved plaque to a graduating Pharm.D. student demonstrating outstanding communication skills in clinical pharmacy coursework.

TEVA Outstanding Student Award

A personalized plaque and cash award are presented by TEVA Pharmaceuticals of Sellersville, Pa., to a graduate. The criteria are scholastic achievement, professional pharmacy outlook and participation in school activities.

United States Public Health Service Excellence in Public Health Pharmacy Practice Award

A framed certificate and book award is presented to a graduate whose public and community service efforts are recognized.

Fall Awards

Fred Angle Scholarship

This scholarship was established by Christina Ferguson, a 2007 alumnus, in honor of her grandfather, Fred Angle. It is awarded to a professional pharmacy student in their third, fourth or fifth year, with a minimum 3.0 grade point average. Preference is given to a student who indicates as their first choice a career with a community pharmacy and who has preferably served an internship with a community pharmacy.

Baptist-Trinity Lutheran Legacy Foundation Scholarship

This scholarship is awarded to a fifth-year professional pharmacy student with a minimum 3.0 grade point average. Preference is given to a student who indicates as their first choice a career with a hospital pharmacy following graduation and who plans to stay in the Kansas City metropolitan area following graduation.

Wright V. and Gladys A. Bartholomew Scholarship

This scholarship is awarded competitively to a Pharm.D. student entering the third semester of the professional program in the School of Pharmacy. The student must have expressed interest in entering community pharmacy practice after graduation. Pending satisfactory academic performance, this scholarship can be renewed for a maximum of four additional semesters.

Mary Bisceglia Memorial Scholarship

A gift was made by Bud Bisceglia, a 1953 alumnus, in memory of his wife, Mary, for a memorial scholarship. The Mary Bisceglia Memorial scholarship is awarded to a second- or third-year Pharm.D. student interested in community pharmacy practice.

Lewis Bratt Scholarship

This scholarship will be awarded to a student who has an interest in independent community pharmacy. Financial need will be taken into consideration.

G. Thomas Burns, R.Ph. Memorial Scholarship

Two student scholarships will be disbursed to students in the UMKC School of Pharmacy who are eligible to receive

financial aid and are in good standing academically. Preference will be made to applicants in their third, fourth or fifth year in the School of Pharmacy with an expressed interest in a career in an independent pharmacy with plans to practice in either the Missouri or Kansas metropolitan area following graduation. Student applicants for the Burns Memorial Scholarship who have a past working experience with the U.S. military and/or positive leadership involvement with the State, county or local legislature will also be given preference in the selection process.

Carthage Pharmacy Services, Inc. Scholarship

One student scholarship will be disbursed each year to a student at the UMKC School of Pharmacy who demonstrates financial need, is eligible to receive financial aid and is in good standing academically. Preference will be made to a student who is a high school graduate of Jasper, Lawrence, Green or Bates counties in the State of Missouri or Cherokee or Miami counties in the State of Kansas and also to a student who indicates a preference for a career in an independent pharmacy following graduation and/or a preference to work in one of the counties listed in the above criteria.

Century Club Grant

The UMKC Pharmacy Foundation awards this grant to a third-year Pharm.D. student who intends to practice in a hospital or other clinical setting.

CVS Pharmacy Community Scholarships

CVS awards scholarships to four Pharm.D. students entering the second professional year who plan to practice community pharmacy after graduation.

D & H Prescription Drug Store Scholarship

This scholarship will be awarded to a student in the UMKC School of Pharmacy satellite program located on the campus of the University of Missouri – Columbia with the following criteria:

1. Student is a high school graduate of Audrain, Boone, Cole, Cooper or Callaway counties in the State of Missouri
2. Student is a current Missouri resident
3. Student indicates a preference for a career in an independent pharmacy following graduation
4. Student is in the high need category for financial aid

Students may fit more than one of these criteria; if so, they are added together. Example: the student is from Boone County, MO and indicates a preference for a career in an independent pharmacy, they would then qualify for criteria (a) and (c) listed above.

Dean's Advisory Council Scholarship

This scholarship shall be awarded to a professional pharmacy student in their third, fourth or fifth year who demonstrates extraordinary leadership qualities. Preference shall be given to a student who has held an elected office while in pharmacy school or has developed an innovative service project. Financial need should be taken into consideration.

Leslie Eisenbrandt Scholarship

A stipend is awarded to a student in years three through five of the professional pharmacy program who is excelling academically and qualifies for financial aid.

Erickson Family Scholarship

Preference for this award will be given to a student who is a direct descendant of J. Stephen Erickson and/or K. Clydean Erickson and/or their brothers or sisters; employed by The Drug Store of Cameron, Missouri and from a town of less than 20,000 in population or is employed by a privately held (independent) pharmacy company. Applicants must have a letter of recommendation from a currently employed pharmacist of The Drug Store of Cameron, Missouri.

Fendler Family Scholarship

One scholarship will be disbursed each year to a student in the School of Pharmacy who is eligible to receive financial aid and is in good standing academically. Preference will be made to a minority applicant who is an entering first year

professional degree student with demonstrated leadership experience and significant financial need.

Kathy McClary Fife Memorial Scholarship

This scholarship was established in memory of Kathy McClary Fife, a 1975 alumnus, by her brother Bert McClary (class of 1966) and family. It is awarded to a student who applies for admission to and attends the University of Utah School on Alcoholism and Other Drug Dependencies summer program, to help defray the expenses of attending the program. The recipient is selected by Mr. McClary and the Executive Director of the Pharmacy Foundation.

Spencer S. Glenn Memorial Scholarship

In memory of Spencer S. Glenn, a scholarship recognizing the superior pursuits of a doctor of pharmacy student with a record of clinical research abilities and academic achievement was established. Selection preference is given to married students who are U.S. citizens and Missouri residents.

The Glenski Family Scholarship

An award is presented to a doctor of pharmacy student in years three through five of the professional pharmacy curriculum who has maintained a cumulative School of Pharmacy GPA of 3.0. The student must be involved in extracurricular activities with a community service emphasis. Preference will be given to a student who has a family member who is either in a health-care profession or is a UMKC alumnus.

Good Neighbor Pharmacy Community Scholarship

Eight student scholarships will be disbursed to students within the School of Pharmacy who are eligible to receive financial aid and are in good standing academically. Preference will be made to applicants in their 4th and 5th years of Pharmacy School with a demonstrated interest in community pharmacy and plans to practice in either Missouri or Kansas following graduation. A letter of reference for each student applicant from a local community or independent pharmacist will be required as a part of the student's scholarship application.

Travis and Maqual Graham Scholarship

One student scholarship will be disbursed each year to a fourth or fifth year Pharm.D. student interested in obtaining clinical post-doctoral training, who is in good academic standing, and is involved in community healthcare initiatives. The recipient must also be eligible to receive financial aid in the current academic year.

Greater Kansas City Society of Health-System Pharmacists (GKCSHP) Book Scholarship

This scholarship is awarded by the GKCSHP to a second-year doctor of pharmacy student who plans to pursue a career in hospital pharmacy.

George Guastello Scholarship

This scholarship was established in 1996 by the Guastello family and recognizes a deserving fourth or fifth year pharmacy student interested in practicing in a community pharmacy setting. Applicants' financial need will be considered.

Harvey H. Haynes Scholarship

This scholarship shall be awarded to a third-year pharmacy student planning to work in an independent pharmacy in a rural area with a population less than 10,000. Financial need is not a consideration.

Bruce J. "Bud" Huber Memorial Scholarship

This is scholarship for a Pharm.D. student in years two through five who has a minimum cumulative GPA of 3.0 and documented involvement in extracurricular activities in the area of service. Priority should be given to a pharmacy technician or intern of Express Pharmacy, or to an older, returning student. Financial need is considered.

Richard D. Johnson Undergraduate Pharmaceutical Sciences Award

This award is given to undergraduate and professional students in the last year of the program who are engaged in graduate-level laboratory research projects. Financial need is not to be considered. The dean and donor or his designee shall select the recipient.

Kavanaugh Charitable Trust Scholarship

This scholarship was established by Paul and Debbie Kavanaugh and shall be awarded to a doctor of pharmacy student based on evidence of financial need.

Kilgore's Medical Pharmacy Scholarship

The recipient of this scholarship must be in the high category for financial aid. The recipient must be enrolled in the Pharm. D. satellite program on the University of Missouri-Columbia campus. Preference shall be given to students who graduated from a high school in Boone, Cole, Moniteau, Cooper, Howard, Randolph, Audrain, or Callaway counties in Missouri.

Rocky and Laurie Levell Scholarships

These scholarships shall be awarded to two Pharm.D. students who are eligible to receive financial aid and are in good standing academically. Each student should demonstrate a compassionate attitude toward others and be involved in extracurricular activities in the community. Preference will be given to students with an interest in geriatric care who plan to practice in an independent or community pharmacy upon graduation.

Lindman-Gershman Scholarship

A scholarship for a student in the doctor of pharmacy program with financial need.

Alexander and Mary Margolis and Bernard A. Margolis Perpetual Memorial Fund

A bequest through the estate of Bernard A. Margolis was established in 1994 for a worthy pharmacy student enrolled in years one through five of the professional program who has financial need.

Wes McIntire Scholarship

This scholarship was established in memory of UMKC doctor of pharmacy student and Kappa Psi Brother, Wesley McIntire. It is awarded to a fifth-year professional year student who is a Kappa Psi Brother and who has been actively involved throughout their membership. This brother must have been either a Kappa Psi officer or organized the Wes McIntire Volley for Charity event held annually in the spring. The scholarship recipient is selected by the Kappa Psi members.

J. Leo McMahan Grant

A stipend is awarded to a second professional year student who represents the caring and professional attitudes of Leo McMahan.

Joe McNerney Pharmacy Leadership Scholarship

This award is given to any female or minority doctor of pharmacy student or pre-pharmacy student with anticipated entry into the Pharm.D. program who has demonstrated leadership abilities. Financial need should be taken into consideration.

Medicine Shoppe International Scholarship

Doctor of pharmacy students with an interest in community pharmacy or community oriented extracurricular activities may receive this scholarship. This award is not given every year.

Mid-Missouri Society of Health-System Pharmacists Scholarship

This scholarship will be awarded to a student in the UMKC School of Pharmacy satellite program located on the University of Missouri-Columbia campus based on a point system. Points are assigned by the following criteria: a student who is a member of the Missouri Society of Health-Systems Pharmacists; student is presently employed by a health-

systems pharmacy; student is a high school graduate of Boone, Cole, Cooper or Callaway counties in the state of Missouri; student is currently a Missouri resident and student should be in the high need category for financial aid. Student may re-apply and receive the award for more than one year.

Missouri Pharmacy Foundation Scholarship

The Missouri Pharmacy Foundation provides a scholarship to a third year Pharm.D. student who is a Missouri resident. The recipient should be on track with his or her class and have maintained a minimum cumulative 2.5 GPA during the first two years of the pharmacy program. The recipient should be planning on a career in Missouri and have demonstrated involvement in his or her community.

Tim Mitchell Scholarship

This scholarship shall be awarded to an active UMKC National Community Pharmacists Association student member in their third, fourth, or fifth professional year in the Pharm.D. program. The student must be in good standing.

Timothy G. Mitchell Scholarship

This scholarship is awarded to one Pharm.D. student in the second through fifth year in good academic and professional standing. The student must have a stated career interest in community pharmacy, with preference given to those with interest in independent pharmacy.

National Association of Chain Drug Stores (NACDS) Scholarship

Awarded to a Pharm.D. student who intends to pursue a career in chain community pharmacy practice after graduation. Financial need is taken into consideration.

Jim Newman Memorial Scholarship Fund

A stipend is awarded to a doctor of pharmacy student in years 3-5 who has financial need. Preference is given to a student from Joplin or Southwest Missouri.

Kit Ngoc Nguyen, Pharm.D. Scholarship

One student scholarship will be disbursed each year to a student at the UMKC School of Pharmacy who is eligible to receive financial aid and is in good standing academically. Preference will be made to students who demonstrate financial need and plan to practice in an independent or community pharmacy upon graduation. It is intended that the recipient use this scholarship for purchasing books or other needed supplies.

Nyberg Pharmacy Independent Pharmacy Scholarship

An award is made available to a doctor of pharmacy student, regardless of practice interests or year in school, who maintains a minimum 2.5 GPA and is a Missouri resident. Financial need is considered. This award not given every year.

Owen Healthcare Scholarship

A matching fund program through Owen employee donations to provide a scholarship for a top academically ranked second- or third-year pharmacy student with financial need. This award is not awarded every year.

Ozark Society of Health-System Pharmacists Award

Awarded to a full-time student enrolled in years three through five of the doctor of pharmacy program who has a 3.0 GPA or higher. Preference will be given to students from the Southwest Missouri area (Vernon, Barton, Jasper, Newton, McDonald, Barry, Lawrence, Dade, Cedar, Polk, Greene, Christian, Stone, Taney, Ozark, Douglas, Webster, Wright, Texas, Howell, Dallas and Laclede counties).

PBA Health / TrueCare Pharmacy Scholarships

PBA Health / TrueCare Pharmacy, the Midwest's first interdependent chain of independent pharmacists, awards

scholarships to deserving doctor of pharmacy students in the last three years of the curriculum. Students must have a minimum of 500 intern hours in independent pharmacy and a minimum 2.5 GPA.

Pharmacists Mutual Scholarship Award

This scholarship is awarded annually by the Pharmacists Mutual Insurance Cos. of Algona, Iowa, to a second-year doctor of pharmacy student who intends to practice pharmacy in a community setting after graduation.

Pharmacy Foundation Memorial Scholarship

Awarded to a second-year student recognized for his or her earnest pursuit of a doctor of pharmacy degree and intent to practice in a community setting after graduation.

Powers Family Scholarship

This scholarship shall be awarded to a professional pharmacy student in their 3rd, 4th or 5th (P4, P5 or P6) with a minimum 2.5 GPA. Preferences shall be given to a student who indicates as their first choice a career in independent/community pharmacy and who has served an internship with an independent pharmacy. It is also requested that the student applicant's letter of reference come from an independent pharmacist.

Prescription Solutions Scholarship

Two student scholarships will be disbursed to students in the UMKC School of Pharmacy who are eligible to receive financial aid and are in good standing academically. Preference will be made to applicants in their 4th and 5th years in the School of Pharmacy with a demonstrated interest in a career with a mail order pharmacy and managed care with plans to practice in either Missouri or Kansas following graduation. A letter of reference for each student applicant from a pharmacist will be required as part of the student's scholarship application.

The RAN Institute Award

Awarded to a female pharmacy student who has demonstrated an interest in and documented activities of strong entrepreneurial ambitions, active involvement in UMKC athletic programs and financial need.

Red Cross Pharmacy Scholarship

Preference for this award will be given to a student who is: a direct descendant of Benjamin R. Hartwig, employed by Red Cross Pharmacy and/or from a Red Cross Pharmacy market area, from a town of less than 20,000 in population, or is employed by a privately held (independent) pharmacy company. Each applicant must have a letter of recommendation from a currently employed pharmacist of Red Cross Pharmacy.

Stanley M. Reinhaus Family Foundation Scholarship

Second-year doctor of pharmacy students with a minimum 2.75 GPA may apply for this award. Applicants must be interested in hospital or community pharmacy, be a Missouri resident and plan to work in Missouri after graduation with no plans of pursuing an advanced degree. Applicants must have financial need. The award is renewable.

Toni Sena Memorial Scholarship

This scholarship shall be awarded to a student in the Pharm.D. program with a minimum 2.5 GPA and to a student who shows evidence of an earnest pursuit of a pharmacy degree.

The Joseph G. Shalinsky Scholarship

This scholarship was established in 1996 by the family of Joseph G. Shalinsky. The scholarship recipient must have achieved academic success (minimum 3.0 cumulative GPA), and an interest in practicing in a community pharmacy setting after graduation. Applicants' significant financial need should be demonstrated.

Leo Shalinsky Scholarship

The recipient of the award should be a second- or third-year Pharm.D. pharmacy student interested in practicing in a retail pharmacy. The applicant must have a minimum 2.5 GPA average, be involved in extracurricular activities and have a financial need.

Morris R. Shlensky Award

The Morris R. Shlensky award was originally made available through officers of the Katz Drug Co., (now CVS), specifically for professional pharmacy students. Financial need or high scholastic achievement should be demonstrated. The award is renewable for one additional semester.

William and Carole Sitland Scholarship

One student scholarship will be disbursed each year to a third, fourth or fifth year student at the UMKC School of Pharmacy is eligible to receive financial aid and is in good standing academically. Preference will be made to students who demonstrate the personal characteristics of integrity, a strong work ethic, generosity of spirit and a commitment to quality in all that they do for the profession of pharmacy. Special consideration will be given to students who also demonstrate excellent verbal and written communication skills.

Smock Family Scholarship

This scholarship shall be awarded to a third, fourth or fifth year student that currently is in good standing, currently obtains the bulk of his/her academic funding through financial aid programs, and who has an interest in community or independent pharmacy practice.

The Anthony J. Spalitto, Sr. Scholarship

Awarded to a doctor of pharmacy student in years two through four who has a minimum 2.5 GPA and has expressed interest in independent community pharmacy. Financial need will be taken into consideration.

Spalitto Pharmacy Scholarship

This scholarship was established by Pete (1986 alumnus) and Jude (1979 alumnus) Spalitto. It is awarded to a professional pharmacy student in their third, fourth or fifth year, with a minimum 2.5 grade point average. Preference is given to a student who indicates as their first choice a career with an independent or independent chain pharmacy and who has preferably served an internship with an independent pharmacy.

Bruce and Shirley Stocker Scholarship

The applicant for this scholarship, established in 2000, must be either a Missouri or Kansas full-time resident in years one through five of the professional pharmacy program. The applicant must have maintained a minimum 3.0 GPA, have expressed an interest in pursuing a career in institutional pharmacy and be or planning to be involved in the appropriate professional pharmacy organizations (i.e., MSHP, KSHP, ASHP). Financial need will be taken into consideration.

David A. Strauch, R.Ph. Scholarship

One or two student scholarship(s) will be disbursed each year to a 1st through 4th year student(s) in the UMKC School of Pharmacy who demonstrates financial need, who is in good academic standing and shows evidence of leadership experience. Preference will be given to a student wishing to pursue a career with an independent pharmacy and/or in a community of less than 10,000 people following graduation. The student must be eligible to receive financial aid in the current academic year.

Evelyn F. Suffecool/Esther C. Plank Scholarships

The funds of the Evelyn F. Suffecool and Esther C. Plank endowments will be used to award scholarships to Pharm. D. students.

Harry N. Tishk Scholarship

Awarded to a first professional Doctor of Pharmacy student with evidence of financial need. The student must have been

a provisional student the year prior to receiving the award. This scholarship fund was created in honor of Harry N. Tishk, a 1964 alumnus.

Fred Tonnies Scholarship

This scholarship shall be awarded to a doctor of pharmacy student based on a point system. Points are assigned by the following criteria: a student who is a graduate of a high school in Boone County, Mo., is a past or current employee at the University of Missouri-Columbia Hospitals & Clinics, minimum cumulative 3.6 GPA and financial need.

Phyllis Vaughn Scholarship

This scholarship will be awarded to a doctor of pharmacy student in the second through fifth year of the professional pharmacy program who expresses a caring and friendly attitude toward others. Preference will be given to a student who exemplifies this attitude through involvement in extracurricular activities helping people. Financial need will be taken into consideration.

Walgreens Student Scholarship

This is an annual award to a pharmacy student entering their final professional year. The student should have demonstrated outstanding leadership and communication skills and have an interest in community pharmacy practice.

Wal-Mart Scholarship

The Wal-Mart Corporation awards this scholarship to a fourth- or fifth-year Pharm.D. student who has an interest in pursuing a career in community pharmacy and who has demonstrated leadership qualities and high scholastic standing. Financial need should be considered.

Mathew W. "Bill" Wilson Scholarship

In honor of Matthew W. "Bill" Wilson, a 1950 alumnus of the school, this scholarship is awarded to a third-year professional student whose integrity and professionalism matches that of Bill Wilson.

Wilson Family Scholarship

This scholarship was established by Marcus (class of 1996) and Melissa (class of 1998) Wilson. Preference for the award is given to an applicant who is a high school graduate of Bates, Morgan or Jasper counties in Missouri, or Cherokee, Miami or Johnson counties in Kansas. Preference is also given to an applicant who indicates as their first choice a career in an independent pharmacy following graduation and/or a preference to work in one of the aforementioned counties.

Larry Windmoeller Scholarship

This scholarship shall be awarded to a doctor of pharmacy student based on a point system. Points are assigned by the following criteria: a student who is a graduate of a high school in Boone County, Mo., is a past or current employee at the University of Missouri-Columbia Hospitals & Clinics, minimum cumulative 3.6 GPA and financial need.

Lawrence G. Windmoeller / Mid-Missouri Society of Health-System Pharmacists Scholarship

The Windmoeller/MMSHP Scholarship will be awarded to a student in UMKC School of Pharmacy satellite program with the following criteria:

- a. Student is a member of the Missouri Society of Health-Systems Pharmacists
- b. Student is presently employed by a health-systems pharmacy
- c. Student is a high school graduate of Boone, Cole, Cooper or Callaway counties in the state of Missouri
- d. Student is currently a Missouri resident
- e. The student should be in the high need category for financial aid.

Students may fit more than one of these criteria; if so, they are then added together. Example: the student is from Columbia, Mo., works at a health-system pharmacy, and is a member of MSHP; they would then qualify for criteria (a), (b) and (c) listed above.

Other Financial Assistance and Awards

American Institute for the History of Pharmacy Certificate

This award recognizes and encourages superior achievement in pharmacohistorical study or activity by a pharmacy student.

Gracia Bremer Loan Fund

An endowment through the unitrust of Gracia Bremer and Mercantile Bank was established in 1996 for pharmacy students enrolled in years one through five of the first professional program who need additional financial support while pursuing a pharmacy degree.

George H. Hargrave Pharmacy Student Loan Fund

An endowment through the unitrust of George H. and Edith L. Hargrave was established in 1994 for pharmacy students enrolled in years one through five of the first professional program who need additional financial support while pursuing a pharmacy degree.

Kmart Scholarship

Second- or third-professional-year Pharm.D. students with an interest in pursuing a career in community pharmacy and who are employed by Kmart as a summer intern are eligible for the Kmart Scholarship. A special application is required and can be obtained through the Kmart Corp.

Facts & Comparisons Scholarship for Postgraduate Study in Drug Information

This \$2,500 scholarship is awarded to a Pharm.D. candidate entering the last year of the program and who is interested in pursuing advanced training in drug information pharmacy practice.

Searle Fellowships in Pharmacy

First-, second- and third-place awards beginning at \$7,500 are awarded to Pharm.D. candidates entering the last year of the program who show leadership potential, professional development and educational achievement.

UNITED DRUGS Scholarship Program

A scholarship for a fourth- or fifth-year doctor of pharmacy student involved in pharmacy related student affairs and service to the community, preferably in a leadership capacity. The qualified student must have a minimum overall 2.5 GPA and an interest in independent pharmacy practice.

State Licensure Requirements

Students planning to practice the profession of pharmacy are required to satisfy the licensure requirements of the state in which they intend to practice. Licensure requirements vary, therefore, information concerning these requirements may be obtained by contacting the board of pharmacy of the state concerned.

Students enrolled in the Doctor of Pharmacy curriculum are required to obtain a valid Pharmacist Intern License issued by the Missouri Board of Pharmacy or provide proof of application submission for a license by the start of semester three in order to fully participate/continue in the curriculum. The Missouri Pharmacist Intern License must remain valid through the last Advanced Pharmacy Practice Experience. Successful completion of all portions of the curriculum, both credit and non-credit requirements, are necessary for a student to meet graduation requirements and accrue sufficient internship hours toward pharmacist licensure eligibility.

The state of Missouri requires that an applicant for registration be 21 years of age, a graduate of an accredited school of pharmacy approved by the state's board of pharmacy and have on file with the board proof of 1,500 hours of internship experience in a retail/community or hospital pharmacy under the supervision of a registered pharmacist/preceptor. Students attending a pharmacy school in the state of Missouri must complete three rotations through the school's

externship program of at least 160 hours each, for a total of 480 hours which will satisfy the internship requirements. Refer to the Missouri Board of Pharmacy Web site <http://pr.mo.gov/pharmacists.asp> for the most up-to-date information as requirements can change at any time. Kansas internship requirements are presently 1,500 hours also.

Career Applications

Pharmacy Careers

A number of graduates choose to practice in community and hospital pharmacies, but a wide variety of career possibilities in the pharmacy profession are available. Pharmacists have a wide spectrum of practice environments to choose from in which their professional skills can be applied. The salary range will vary with the location and type of practice. However, the annual starting salary in the Midwest for a pharmacist ranges from \$85,000 to \$120,000.

The community environment, including both private and corporate-owned pharmacies, offers the pharmacist the opportunity to practice, or to assume management positions. Organized health care institutions (hospitals, nursing homes and managed health care facilities) also offer the practitioner exciting practice opportunities.

Many nontraditional services are provided by pharmacists in the community including home nutrition, nuclear pharmacy, nursing home consultation and long-term care.

Graduates may choose to enter careers in the pharmaceutical industry in product development and control, marketing and manufacturing, management, sales and public relations and advertising. Career opportunities for pharmacists are available in state and federal government service in staff and supervisory positions in the U.S. Public Health Service, Department of Veterans Affairs, Food and Drug Administration, Bureau of Narcotics and Dangerous Drugs, in-state health agencies and in all branches of the armed services.

The doctor of pharmacy program also provides an appropriate academic base for students wishing to enter graduate study in the pharmaceutical sciences, chemistry and biology. Others have gone on to pursue degrees in medicine, dentistry and law.

Postgraduate training in the form of a residency and optional fellowship is recommended for all doctor of pharmacy graduates seeking advanced career opportunities in industry or academia.

Interdisciplinary Ph.D. Degree Requirements in Pharmaceutical Sciences and Pharmacology

See discipline-specific requirements for the Interdisciplinary Ph.D. program in Pharmaceutical Sciences and Pharmacology and Toxicology.

Academic Regulations and Requirements

Class Attendance

Regular attendance at classes is strongly recommended for students to progress satisfactorily through the pharmacy curriculum. Required attendance, however, is left to the discretion of the individual instructor. Students are responsible for familiarizing themselves with all course requirements and assignments.

Students are to report absences to instructors as outlined in individual course policies (e.g., syllabus, course outline). Absences for official school or University activities will be handled through the dean's office. The dean's office must be notified prior to the event or activity. In either event, any notice sent to instructors is for purposes of information only and does not relieve students of any responsibilities for completing work missed in their absence or non-adherence to individual course policies.

Absences from Scheduled Examinations

Unless specified otherwise on the course syllabus, students may be excused from a scheduled examination if they notify the school of their absence in advance of the examination and present a statement from their private physician

confirming their illness on their return. The manner in which a justified absence from an examination will be made up will be determined by the course instructor. Instructors do reserve the right to hold examinations outside of regularly scheduled class times. Such examinations will be noted in the University schedule of classes.

Students will not be given an opportunity to make up an unexcused absence from an examination, and their scores shall be recorded as zero for a numerically scored exam and F for a letter-graded examination.

The only exceptions to this rule shall be when the student's absence is traumatic in nature (e.g., automobile accident, sudden death in family, etc.) or when prior arrangements have been made with the course instructor.

Immunizations

Adequate protection for students and patients against certain diseases requires standard immunizations. Submission of immunization certificates are a condition of acceptance and must be on file in the Office of Experiential Programs. MMR proof is required prior to beginning the First Professional Year. The remaining immunizations and tests must be on file prior to enrollment in Pharmacy 7310 and/or prior to beginning summer Introductory Pharmacy Practice Experiential Rotations in the summer between the Third and Fourth Professional Years. These proofs must remain current through the last advanced pharmacy practice experience rotation. Students are required to have:

- The three-injection series of the Hepatitis B vaccination.
- Vaccination against or proof of chicken pox immunity.
- Two MMR (measles, mumps, rubella) vaccinations.
- A yearly tuberculin skin test (a chest x-ray is required if skin test is positive) completed as a condition of advancement.
- Additional tests may be required.

Newly enrolled students will receive information regarding immunization provider options at orientation.

Academic Loads

All coursework in the pharmacy curriculum is sequential and success depends upon the instruction and content from the previous semester and builds upon knowledge needed for subsequent semesters. Pharmacy students must enroll for the total program as outlined for each semester in the most current version of the curriculum.

Exceptions to Pharmacy Curriculum

Students are expected to satisfactorily complete all required courses and noncredit requirements in the pharmacy curriculum. Any exception to the normal curriculum must be approved by the school's Committee on Admissions and Academic Requirements. For a student to be excused from any of the required courses, a petition for exception must be submitted to the committee for its consideration at least one month prior to the start of the semester for which the exception is being requested.

Concurrent Enrollment

A pharmacy student may not enroll at another institution while also enrolled at UMKC unless prior approval has been obtained from the Committee on Admissions and Academic Requirements. Approval requires completion of a petition for exception or a Kansas City Area Student Exchange Program (KCASE) form. KCASE applications are available from the Registrar's Office.

Grading System

Refer to the grade-point system listed in the [General Undergraduate Academic Regulations and Information](#) section of this catalog and to the individual course syllabi. Note: Letter grade changes must be made no later than four weeks from the beginning of the next semester, to include summers, unless a shorter time frame be affixed by a course coordinator. This policy applies to School of Pharmacy division courses only and does not apply to incomplete grades.

Doctor of Pharmacy students are not eligible for GPA Adjustment through the UMKC repeated courses policy.

Academic Probation

Doctor of Pharmacy students are placed on academic probation if they receive any of the following:

- Less than a 2.0 term or cumulative grade point average [GPA], with no grades of D, F, WF, or NC in any one semester.

To remove themselves from probation, students must receive not less than a 2.0 term GPA and must raise their cumulative GPA above 2.0 in the next academic semester.

All such cases of probation will be reviewed by the Committee on Admissions and Academic Requirements to determine the reasons for the unsatisfactory progress. Students on probation will have an advising hold placed on their record and will not be able to register until the advising hold is removed.

Academic Dismissal

Doctor of Pharmacy students are considered ineligible to progress in the Pharm.D. program under any of the following conditions:

- Receipt of a D, F, WF, or No Credit grade in any coursework in a single semester.
- Receipt of less than a 2.0 term GPA while on academic probation.
- Placement on academic probation for more than two non-consecutive semesters.
- Receipt of two consecutive semesters of less than a 2.0 cumulative GPA.

All such cases of ineligibility will be reviewed by the school's dean or designee to determine the reasons for the unsatisfactory progress. The dean or designee will then either propose a program whereby the student might make up the deficiencies or recommend termination.

If a student's petition for readmission is approved, the student must sign an agreement for the program proposed by the dean or designee to correct the deficiencies and will be governed by the signed agreement until the conditions stipulated in it have been satisfactorily met.

First Professional Year students who become academically ineligible to continue at the end of the first semester may not petition for re-admission and must reapply to the Pharm.D. program through the regular admission process.

Students who withdraw from required coursework are ineligible to continue in the regular curriculum unless course equivalents can be successfully completed during the summer term. A student who withdraws from a required course will not be allowed to matriculate.

All students are given the terms governing academic performance on entering the School of Pharmacy.

Student Conduct

All students entering the School of Pharmacy receive a copy of the University of Missouri Student Conduct Code. A student proved to have illegally obtained, sold or used a controlled substance shall be permanently dismissed from the School of Pharmacy.

Student Honor Council

All students entering the Doctor of Pharmacy program receive a copy of the school's Honor Council Procedures and Standards of Professional and Ethical Behavior. These policies and procedures provide peer and faculty review to ensure these standards are upheld by each pharmacy student. In all cases of academic dishonesty, the instructor shall make an academic assessment about the student's grade on that work and in that course.

Standards of Professional Attire and Classroom Etiquette

Upon acceptance and entry into the School of Pharmacy, students begin a process of developing the knowledge, skills and attitudes that creates the fundamental core of the profession of pharmacy. The development of these competencies to a practitioner's level takes several years, but early initiation of these professional behaviors promotes the development of professionalism. In order to provide students direction to this end, upon entering the Doctor of Pharmacy program all students receive a copy of the school's Standards of Professional Attire and Classroom Etiquette and must abide by these standards. Abiding by these Standards at the UMKC School of Pharmacy is a piece of the educational process that establishes esteem and responsible behaviors.

Noncredit Requirements

All doctor of pharmacy students are expected to actively participate in professional activities offered or required by the School of Pharmacy. These activities mirror those expected in professional practice and are intended to better prepare the student for professional life. The following are requirements for all Pharm.D. students:

1. Certification in Basic Cardiac Life Support (completion of the Health Professionals BCLS certification) each year starting prior to enrollment in Pharmacy 7310 and/or prior to beginning summer Introductory Pharmacy Practice Experiential [IPPE] rotations between the Third and Fourth Professional Years. Certification must remain current throughout the entire program and is required for progression to the next professional year.
2. Certification in First Aid each year starting prior to enrollment in the Pharmacy 7310 and/or prior to beginning summer Introductory Pharmacy Practice Experiential rotations. Certification must remain current throughout the entire program and is required for progression to the next professional year.
3. Licensure as a Missouri Intern Pharmacist each year starting prior to enrollment in the Second Professional Year. Licensure must remain current throughout the entire program and is required for progression to the next professional year.
4. Proof of pharmacy intern liability insurance prior to enrollment in Pharmacy 7310 and/or summer IPPE and valid throughout the program.
5. All students must successfully complete the University of Missouri HIPAA [Health Insurance Portability and Accountability Act] tutorial yearly prior to beginning Introductory and Advanced Pharmacy Practice Experiences.
6. Any student completing Introductory or Advanced Pharmacy Practice Experiences at the University of Missouri Hospital and Clinics is required to complete the University of Missouri Code of Conduct online tutorial.
7. Proof of all required immunizations as noted prior to enrollment in the First Professional Year [two MMRs] and prior to enrollment in Pharmacy 7310 and/or prior to beginning summer IPPE rotations [Hepatitis B, Chicken Pox, negative TB] and valid throughout the program.
8. Students are required to have a laptop computer prior to beginning the Third Professional Year.
9. Attendance and participation during the Doctor of Pharmacy orientation sessions prior to full matriculation into the First Professional Year unless previously excused, in writing, in advance of the event by the dean or designee.
10. Attendance at all Pharmacy Grand Rounds unless previously excused, in writing, in advance of the event by the dean or designee.
11. Attendance and participation during the third professional year in the School of Pharmacy Professional Dedication Ceremony held in Kansas City unless previously excused, in writing, in advance of the event by the dean or designee.
12. Attendance and participation during the fifth professional year at the School of Pharmacy Career Enhancement and Professional Preparation Day held in Kansas City unless excused by the dean or designee.
13. Attendance and participation in seminars, colloquia and workshops thought to be beyond the scope of education provided in the curriculum as requested by faculty and staff. Attendance is required unless previously excused in writing in advance of the event by the dean or designee.

Written English Proficiency Test Requirement

Students enrolled in the doctor of pharmacy and bachelor of science programs must complete the Written English Proficiency Test (WEPT). The University requires that all students successfully complete ENGLISH 110 and ENGLISH 225. At the end of ENGLISH 225, the WEPT is administered. Any student failing to pass the WEPT twice will be required to take ENGLISH 299. Completion of English 299 will not count toward the degree, however will satisfy the WEPT requirement for students who earn a C- or better in the course. All students who have completed English I and II elsewhere are required to take the WEPT. They, too, must abide by the results of the exam to be eligible for graduation. The WEPT is given twice each semester; the dates of the test appear regularly on the academic calendar. Students entering the doctor of pharmacy program after having earned a baccalaureate degree from a regionally accredited, English speaking country are exempt from the WEPT requirement. The WEPT must be successfully completed prior to enrollment in a writing intensive course {BSPS students} or prior to matriculation into the Third Professional Year {Pharm.D. students}.

Directed Individual Study

The opportunity to undertake independent study is offered through Pharmacy 7497 courses. These courses may satisfy part of the professional elective requirement. Generally, the student receives the individual attention of a professor in the chosen field of study, and the project may involve any topic considered appropriate to the academic needs of the student. Once the student and instructor have agreed on a project, a permission-to-enroll form that includes an outline of the proposed course of study signed by the instructor must be reviewed and approved for credit by the school's committee on admission and academic requirements. This must be done at least one month prior to the start of the term in which the coursework is to commence. Pharmacy 7497 requests that are part of a national, regional, or local competitive proposal or any part of a student organizational initiative may not be used for Directed Individual Study proposals.

No more than five credit hours of Pharmacy 7497 courses may be counted toward the degree requirements. Pharmacy

7497 courses are offered on a credit/no credit basis only.

Off-campus Learning Experiences

All Pharm.D. students are required to participate in experiential learning rotations. All of the experiential learning courses are conducted in actual practice settings (e.g., community, hospitals, nursing homes, etc.) under the supervision of clinical practitioners—instructors who serve as exemplary role models in their particular types of pharmacy practice. Students are expected to provide their own transportation to sites assigned for the experiential learning.

Experiential sites may be located outside the Kansas City area. During the clerkship rotations, living and travel expenses are the responsibility of the student.

Criminal Background Checks

The University, on behalf of the School of Pharmacy, agrees to inform students that as a condition of participating in any affiliated institution or site [academic service learning and/or introductory and advanced pharmacy practice experiential rotations], they must obtain and provide verification of a current, criminal background check prior to that student's assignment at an affiliated hospital/institution. The affiliated hospital/institution hereby understands and agrees that the decision to permit a student to participate at that affiliated hospital/institution on the basis of the result of any criminal background check remains solely with the affiliated hospital/institution and not the University. Failure on the student's part to submit to criminal background checks will delay progression or render a student unable to complete the professional degree program.

Liability Insurance

Students who are completing internship requirements or who are enrolled in academic service learning or introductory and advanced pharmacy practice experiential rotations must obtain pharmacy liability insurance. Students must be covered by pharmacy liability insurance prior to the first day of a school, sponsored service learning experience or experiential rotation. Students should contact the Pharmacy Student Services Office or the Office of Experiential Programs for information.

Drug Screening

Pharmacy students may be subject to random drug screens as a condition of participation in patient care activities (Academic Service Learning, introductory and advanced pharmacy practice experiential rotations). Students wishing assistance for a drug related impairment may voluntarily seek counsel through the UMKC Counseling Center, the School of Pharmacy's PAALS program, or other available treatment centers. Treatment does not guarantee a student's participation in patient care activities.

Outside Employment

Because of the intensity of the professional curriculum, students are strongly urged to limit outside employment to no more than 10 hours per week while enrolled in the school. Students experiencing academic difficulties as a result of commitments to outside employment may be asked by the school's committee on admissions and academic requirements to stop outside work until their academic difficulties are resolved.

Note: Program requirements and course descriptions are subject to change without notice after publication of this catalog. Pharmacy students are encouraged to remain in contact with their faculty adviser and professional staff in the Pharmacy Student Services Office to stay apprised of program requirements in effect.

Requirements for M.S. Degree Conferral

In addition to completing the M.S. degree requirements listed in this section, students must adhere to all requirements for the graduate degree sought and related stipulations noted in the [General Graduate Academic Regulations and Information](#) section of this catalog.

Note: Program requirements and course descriptions are subject to change without notice after publication of this catalog. Pharmacy graduate students are encouraged to remain in contact with their major faculty adviser to stay apprised of program requirements in effect.

Non-Degree Seeking Graduate-Level Students

The School of Pharmacy recognizes that area residents employed in the pharmaceutical industry and related organizations may not desire to pursue a graduate degree, but may wish to take an occasional graduate course to update their knowledge base. Persons with baccalaureate degrees in pharmacy, chemistry or biology who have completed the appropriate prerequisite coursework for the courses they wish to undertake may request classification as non-degree-seeking graduate students. No more than 12 credit hours may be taken as a non-degree seeking student classification. Enrollment in any School of Pharmacy course requires a completed UMKC application form and approval of the course coordinator and director of pharmacy student affairs.

Master of Science in Pharmaceutical Science

Admission Requirements

All applications to master's programs in the School of Pharmacy must be made through the UMKC Admissions Office. An applicant must meet the general requirements of the University to be considered by the School of Pharmacy.

Applications are reviewed by the appropriate division and must be approved by the graduate programs committee of the school, composed of professors who have appointments to the University graduate or doctoral faculty, and by the dean of the School of Pharmacy.

Admission to the graduate programs in the School of Pharmacy is contingent on the ability of the graduate faculty to accept additional graduate students and the availability of space and funding in the proposed area of emphasis.

Thus, worthy candidates may not be accepted due to a lack of a match in students' interests to faculty availability and other considerations.

Requirements for admission to the master of science program in the School of Pharmacy include:

- A professional degree in pharmacy or a baccalaureate degree in a related-science field.
- An aggregate minimum undergraduate GPA of 3.0 for students graded on a 4.0 basis, a first-class degree for students graded on the British system or equivalent undergraduate achievement for others. (A prospective faculty adviser may require more stringent standards in the emphasis area and may recommend acceptance based on consideration of other factors.) (For those students whose emphasis area is pharmacology and toxicology, a minimum 3.5 GPA is required on all post-baccalaureate work.)
- Submission of three letters of reference bearing on the academic and research potential of the applicant from individuals who have in-depth knowledge of evaluating the applicant's ability and potential for graduate level study.
- Submission of scores obtained in the Graduate Record Examination (GRE). A minimum score of 1800 is required. (For those students whose emphasis area is pharmacology and toxicology, a minimum combined score of 1200 for the verbal and quantitative areas and the minimum score on the analytical writing portion of the GRE must be 4.5 or higher.)
- For students whose primary language is not English, scores from the Test of English as a Foreign Language (TOEFL) must be submitted. A minimum TOEFL score of 580 (paper) or 237 (computer) is required.
- Foreign students must meet financial independence criteria established by the University.
- Students whose native language is not English must follow the UMKC English Proficiency Requirements for International Students.

Although new students pursuing the pharmaceutical sciences emphasis are accepted during all terms, because of course sequencing, it is recommended that students enter in the fall term. The priority deadline for application to the M. S. program is Feb. 1 for fall entry and Sept. 1 for Spring entry. Due to course sequencing, new pharmacology and toxicology emphasis students will preferably be accepted in the fall term. To have credentials included in the review process, applicants should submit GRE scores and all other necessary supporting documentation no later than the priority deadline.

Part-Time Graduate Students

Once all admission requirements have been satisfied, students admitted to the master of science in pharmaceutical sciences emphasis area or doctoral students whose coordinating unit is pharmaceutical sciences may enroll part time. Scientists who are employed in the Kansas City area may complete graduate study on a part-time basis by electing up to six credit hours each semester. However, the student must satisfy residency requirements and time limit restrictions of the School of Graduate Studies and the School (or its disciplines) before a degree is conferred. Research toward the thesis or dissertation must be independent of the projects ongoing at the student's place of employment. Research must be conducted in School of Pharmacy laboratories during at least two weekdays and one weekend day each week for one year. Students whose coordinating unit or emphasis area is pharmacology and toxicology should contact the division chair for separate regulations in this area.

Degree Requirements

Prior to full admission in the School of Pharmacy, graduate students in the pharmaceutical science or pharmacology and toxicology areas will have completed coursework in calculus, organic chemistry, physical chemistry, biochemistry, microbiology, human anatomy and physiology in University departments and schools outside the School of Pharmacy, when these courses are appropriate to their interests. They may also elect advanced courses related to their areas of interest. Because many courses have prerequisites, the sequence of emphasis area courses and elective courses is determined by the academic background of each student and their research interests and requires the concurrence of the faculty adviser.

Graduate students whose emphasis area is pharmaceutical science will be given a placement examination, administered by division faculty, to assess undergraduate preparation for graduate-level study. Deficiencies existing on admission must be discussed with the interim faculty adviser during the first semester of graduate work. Course equivalency is determined by the pharmaceutical science discipline faculty on a case-by-case basis. Students are required to pass the discipline placement exams before appearing for the comprehensive exams administered by the supervisory committee.

Minimum Requirements for M.S. Degree

1. The M.S. degree requires completion of a minimum of 32 credit hours of graduate study including two credit hours of Pharmacy Seminar, three credit hours of statistics and six credit hours of Pharmacy 5599 Research and Thesis. Although students are required to enroll and successfully complete only two credit hours of Pharmacy Seminar, pharmacy graduate students (degree- and non-degree-seeking) are required to participate and attend all scheduled sessions of Pharmacy Seminar each semester.
2. Before full acceptance to a degree-seeking program, students will be selected by a faculty adviser who must be a member of the University graduate faculty. The faculty adviser and student will plan the degree program of study, contingent on approval by the supervisory committee and the graduate programs committee of the school. The faculty adviser and two additional graduate faculty members serve as the M.S. supervisory committee.

Emphasis Area Requirements

Following are the emphasis area requirements for the M.S. degree in pharmaceutical science:

Courses	Hours
Pharmaceutical Science Courses	10
Other Coursework	11
Statistics	3
PHARM 5580A Seminar	2
PHARM 5599A Research and Thesis Pharmacy	
-or-	
PHARM 5599B Research and Thesis Pharmaceutical Chemistry	6

Other graduate-level courses offered by the division or coursework in the Division of Pharmacology and Toxicology, Chemistry Department or the School of Biological Sciences may be taken with prior approval.

Following are the requirements for the M.S. degree in pharmaceutical science with emphasis in pharmacology and toxicology:

PHARM 5509	Basic Toxicology	3
PHARM 5519	Pharmacology I	4
PHARM 5520	Pharmacology II	5
PHARM 5615	Methods in Pharmacology and Toxicology	3
PHARM 5580C	Seminar*	2
PHARM 5599C	Research and Thesis	6
EDUC 5505	Statistical Methods I	3

A minimum of six credit hours must be chosen from the following optional courses:

PHARM 5521	Advanced Organic Medicinal Chemistry	3
PHARM 5531	Physical Pharmacy Equilibria	3

PHARM 5515	Drug Absorption, Distribution, Metabolism and Excretion	3
PHARM 5590AB	Receptor Pharmacology and Signal Transduction	3

* One credit hour of Pharmacy 5580C must be successfully completed in each academic year enrolled beginning with the second year. Attendance at all seminars is mandatory regardless of enrollment. Other graduate-level courses offered by the division or coursework in the Division of Pharmaceutical Science, Department of Chemistry or School of Biological Sciences may be taken with prior approval. Students with professional degrees in pharmacy will be required to take other advanced graduate-level courses that are offered.

M.S. Supervisory Committee and Program of Study

This committee comprises the faculty adviser and two other graduate faculty members recommended to the School of Graduate Studies by the student and faculty adviser. The faculty adviser, who serves as chairperson of the committee, and a majority of the members of a master's student supervisory committee must be full members of the graduate faculty. Therefore, no more than one member of a master's supervisory committee may be an adjunct graduate faculty member. A majority of the faculty making up the supervisory committee must be from the student's emphasis area. An adjunct member may not be counted toward the mandated representation from the emphasis area discipline. The supervisory committee must approve the plan of study and thesis research protocol submitted by the student.

Graduate credit for courses requires that the courses be at least 300- or 400-level and that a grade of B or better be obtained. A grade lower than B in a required 5500- or 5600-level course may be allowed to stand; however, the student's adviser and supervisory committee may require that the course be repeated.

Students enroll in courses with the approval of their faculty advisers. Within the first 12 hours of degree-seeking graduate study, the student has advanced to the point where a supervisory committee is appointed and the planned program of study is developed. The program of study must receive the approval of the supervisory committee and graduate programs committee.

A majority of the coursework applicable to any graduate degree at UMKC must be completed at UMKC. See the [General Graduate Academic Regulations and Information](#) section of this catalog for more information.

Comprehensive Examination for M.S. Candidates in Pharmaceutical Science

Students are required to pass written and oral comprehensive examinations on questions provided by the supervisory committee during the semester before the degree is to be conferred. However, the oral comprehensive exam may be incorporated with the thesis defense or final project. Generally, the written examination covers knowledge which should have been obtained in performance of coursework. The oral examination encompasses knowledge which should have been obtained in performance of research, as well as coursework.

The first comprehensive examination is written. Questions are submitted by each member of the supervisory committee, as guided by the chairperson. For students with an emphasis in pharmaceutical science, the division faculty, in conjunction with the supervisory committee, will submit questions for comprehensive exams. Once the written examination has been taken, the supervisory committee must convene to determine whether the student has passed. In the event that this examination is failed, the student may retake the examination within the next semester, but no sooner than 10 weeks after the first attempt. Failure to pass the second written examination results in dropping the student from the program.

On passing the written examination, the student and his or her major adviser will schedule an oral comprehensive examination at a time mutually agreeable to the supervisory committee. The general requirements of the oral comprehensive examination will be presented to the student in writing at least six weeks in advance of the date of the examination. A determination of pass or fail on the oral examination will be made by vote of the committee after the oral examination has been completed. In the event the oral examination is failed, the student will be given a second oral examination to take place no later than the semester following the failed examination. Failure to pass the oral examination a second time will mean the candidate is dropped from the program.

More than one negative vote on an M.S. oral or written comprehensive exam constitutes failure of the examination.

A minimum of three members of the supervisory committee must be present at the oral examination for the examination

to be held. If the examination is canceled for lack of the required number of examiners, it should be scheduled again as soon as possible.

M.S. candidates whose emphasis is pharmacology and toxicology are not required to take written or oral comprehensive exams. However, the supervisory committee may examine a candidate's basic pharmacology knowledge at the time of the final oral thesis defense.

Thesis Defense

The final requirement for conferral of the M.S. degree is defense of the thesis, where the supervisory committee is the examining body. The thesis must be submitted in complete typewritten form to the adviser and supervisory committee at least six weeks before the date the advanced degree is to be conferred. See the Thesis and Dissertation Preparation and Approval Process listed under the School of Graduate Studies section of this catalog for regulations pertaining to thesis preparation. The defense is conducted only after the thesis has been certified for acceptance by the dean of the School of Graduate Studies and may not be administered when UMKC is not officially in session, nor on a weekend. The defense must be announced with an abstract at least two weeks in advance of the scheduled date of the defense.

The defense of the thesis is approved when a majority of the supervisory committee members recommend approval and sign the report of results form. Students must comply with all rules and regulations governing theses outlined under [Minimum Academic Regulations Specific to Master's Degrees](#) in the [General Graduate Academic Regulations and Information](#) section of this catalog.

Requirements for Retention

A cumulative GPA of 3.0 (B) or better must be maintained during each semester of enrollment in all work applicable to a graduate degree.

If a student does not maintain a cumulative GPA of 3.0 (B), eligibility to continue graduate enrollment will be determined in accordance with the probation policies of the School of Graduate Studies. See the School of Graduate Studies Requirements for Retention section of this catalog. Recommendations from the School of Pharmacy will be based on evaluations by the student's supervisory committee and the school's graduate programs committee, which reviews the progress of all graduate students at the end of each semester. The student is allowed one semester to return to good academic standing.

In addition to the above requirements, master's students in pharmaceutical science with an emphasis in pharmacology and toxicology who receive a grade below B in courses offered by the Division of Pharmacology and Toxicology will be required to repeat the course. A course may not be repeated more than once, and the repeated grade achieved must be a B or higher.

A student with an emphasis in pharmacology and toxicology who receives a grade of C in more than six credit hours or who receives a grade lower than C or NC is ineligible to continue the graduate program. A C grade achieved in courses approved and offered by the Division of Pharmacology and Toxicology must be repeated.

Doctor of Pharmacy

Curricular Outcomes Expected of Doctor of Pharmacy Graduates

"Graduates must possess the basic knowledge, skills, attitudes, and values to practice pharmacy independently at the time of graduation. In this regard, the college or school must ensure that graduates are competent to: [\[1\]](#)

- provide patient-centered care, through the ability to:
 - o design, implement, monitor, evaluate, and adjust pharmacy care plans that are patient-specific; address health literacy, cultural diversity, and behavioral psychosocial issues; and are evidence-based
 - o manage a successful patient-centered practice (including establishing, marketing, and being compensated for medication therapy management and patient care services rendered)
- provide population-based care, through the ability to develop and implement population-specific, evidence-based

disease management programs and protocols based upon analysis of epidemiologic and pharmacoeconomic data, medication-use criteria, medication use review, and risk-reduction strategies

- manage human, physical, medical, informational, and technological resources, through the ability to ensure efficient, cost-effective use of these resources in the provision of patient care
- manage medication use systems, through the ability to apply patient- and population-specific data, quality improvement strategies, medication safety and error reduction programs, and research processes to minimize drug misadventures and optimize patient outcomes; to participate in the development of drug use and health policy; and to help design pharmacy benefits
- promote the availability of effective health and disease prevention services and health policy through the ability to apply population-specific data, quality improvement strategies, informatics, and research processes to identify and solve public health problems and to help develop health policy

To be capable of the above, pharmacy graduates also must be able to:

- communicate and collaborate with patients, care givers, physicians, nurses, other health care providers, policy makers, members of the community, and administrative and support personnel to engender a team approach to patient care
- retrieve, analyze, and interpret the professional, lay, and scientific literature to provide drug information and counseling to patients, their families or care givers, and other involved health care providers
- demonstrate expertise in informatics^[2]
- carry out duties in accordance with legal, ethical, social, economic, and professional guidelines
- maintain professional competence by identifying and analyzing emerging issues, products, and services”

^[1] Adapted from CAPE Educational Outcomes, 2004

^[2] Competencies in informatics include basic terminology (data, information, knowledge, hardware, software, networks, information systems, information systems management); reasons for systematic processing of data, information and knowledge in health care; and the benefits and current constraints in using information and communication technology in health care. (*Adapted from recommendations of the International Medical Informatics Association*)

Admission Requirements

The doctor of pharmacy (Pharm.D.) degree provides minimum and advanced level competencies necessary for the graduate to assume a pharmacist's professional responsibilities and qualify for the licensure examinations. The program of study emphasizes clinical sciences and training experiences. The training of doctor of pharmacy students concentrates on rational drug therapy decision-making within the interprofessional health care team.

Application Procedures

Applications for the doctor of pharmacy program are accepted between Sept. 1 and Dec. 15 of each year for consideration for admission to the class entering the following fall. Admission to the School of Pharmacy is competitive. Applicants who meet the minimum requirements for admission may not be accepted due to space availability restrictions. New students are admitted to the doctor of pharmacy program only in the fall of each year. Complete UMKC Doctor of Pharmacy applications, which include supplemental materials, must be postmarked no later than Dec. 15 in order to be considered. For application forms and information about degree programs and requirements, prospective students can visit <http://pharmacy.umkc.edu/> or contact:

UMKC School of Pharmacy
Student Services Office
2464 Charlotte Street
Kansas City, MO 64108
(816) 235-1613
Fax: (816) 235-5562
pharmacy@umkc.edu

As part of the process for application to the Doctor of Pharmacy program, all of the steps listed below must be adhered to carefully and all required documents must be postmarked by or submitted to the UMKC Pharmacy Student Services Office no later than the Dec. 15 deadline, unless otherwise stated.

1. You must submit a completed UMKC Doctor of Pharmacy Application for Admission, to include supplemental materials and the application fee.

2. Official transcripts of all previous college coursework must be received by the School of Pharmacy Student Services Office. Applicants must have achieved a minimum 2.75 cumulative grade-point average {GPA} (on a 4.0 scale) and a 2.5 science/math grade-point average (on a 4.0 scale) on all college-level work completed through the end of the fall term preceding the year of entry to meet minimum eligibility requirements. Cumulative and science/math GPAs include all college-level coursework completed.
3. The Pharmacy College Admission Test (PCAT) must be taken and scores forwarded to the School of Pharmacy from the official testing agency no later than March 1.
4. One official recommendation form must be completed from the application packet.
5. Students whose native language is not English must follow the UMKC English Proficiency Requirements for International Students. The minimum TOEFL score required is 220 computer score or 560 paper version.
6. Eligible applicants must complete a structured interview at the School of Pharmacy on the UMKC campus scheduled on a Saturday in March or April as a factor for admission. Applicants are notified by e-mail before their scheduled interview. Note: meeting minimum eligibility requirements does not automatically qualify an applicant for an interview. The student selection process is based on a multi-variant formula and the qualifications of the applicant pool. Factors considered include application materials submitted, results of the PCAT, collegiate scholastic achievement, collegiate science and math achievement, complexity of previous college work, recommendation form and recent leadership [including, but not limited to, campus and community involvement, health care and/or supervisory experience, honors and awards]. Based on the academic and application credentials of the applicant pool, the school will select candidates for an interview. Students who do not qualify for the interview will also receive written notice.

Notification of Acceptance

Admission decisions are based, in part, on the criteria noted above and the results of a formal interview. Students will receive written notification of the school's decision concerning their applications on or prior to May 1 unless otherwise indicated.

Official supplementary college transcripts must be submitted to the Pharmacy Student Services Office upon completion of winter/spring and summer coursework. Acceptance is contingent on submission of a criminal background check, good academic and behavioral standing, satisfactory completion (grade of C or higher) of the specified minimum hours of pre-professional collegiate coursework and any other coursework completed during the winter/spring and/or summer term prior to admission. Those students approved for admission will be required to confirm their acceptance and submit an advance deposit to guarantee their places in the entering class. This deposit is applied to the first term's educational fee and is not refundable.

Curricular Requirements

The doctor of pharmacy degree program provides broad and general preparation in professional areas of practice with the intent that, on completion, graduates will be able to practice at a level sufficient to perform the established functions of a pharmacist. In addition, the Pharm.D. program prepares the student for advanced levels of professional practice. The major emphasis is on the clinical sciences and drug-related patient care.

This program is designed to provide advanced education and training in clinical pharmacy and drug information with particular emphasis on interprofessional team participation in the delivery of health care. To enable students to concentrate solely on this advanced professional coursework, those entering the doctor of pharmacy program are strongly encouraged to limit their work and/or intern hours during the academic year.

The five year professional course of study leading to the doctor of pharmacy encompasses 10 semesters. Coursework in the first professional year includes various required science courses and additional humanities and social science coursework, as well as introductory-level pharmacy courses.

In semesters three and four, students complete their basic science foundation courses, lecture and lab courses in the pharmaceutical sciences and continue the professional development series.

In semesters five and six, students engage in advanced lecture and laboratory coursework in the pharmaceutical and pharmacological sciences, introductory clinical sciences, finish the professional development series and select professional electives designed to reinforce the pharmacy career track. During the summer before the fourth year, students take part in introductory pharmacy practice experiences (IPPE).

In semesters seven and eight, Pharm.D. students pursue advanced coursework in the clinical sciences to include pharmacotherapeutics, evidence based medicine and health assessment, continue the next series of introductory pharmacy practice experiences (IPPE). During this period, students also finish professional electives.

The final two semesters encompass advanced pharmacy practice experiences (APPE). Drug literature evaluation, instruction and practice will be an integral part of the APPEs. Each student will be exposed to a core number of required and elective APPEs.

During the advanced pharmacy practice experiences the Pharm.D. student is expected to assume the clinical responsibility of a pharmacist under the direct supervision of a faculty member. The emphasis of the student's activities will be the management of pharmacotherapeutic and pharmacokinetic problems encountered with patients' drug regimens at the assigned practice site. Students will also be engaged in ongoing drug utilization reviews, patient and health provider education programs, and other pertinent activities involved in the provision of patient care.

While clinical responsibilities occur during all of the students APPEs, the primary focus will vary with a student's choice of elective experiential rotations. Health systems rotations will focus on the organizational, technical and administrative aspects of providing pharmaceutical care.

Pharm.D. students are required to complete approximately nine months of experiential rotations. IPPE and APPE prerequisites include satisfactory completion of all degree requirements prior to the respective term of the professional curriculum that these experiences take place. Candidates must also complete and submit all required documentation as noted on the School of Pharmacy Experiential Programs website at http://pharmacy.umkc.edu/experientialprograms/home_page.asp. All immunizations, as listed on the above website link, must be on file with the Office of Experiential Programs before academic service learning and IPPE and APPEs begin and must remain current through the last experiential rotation. Students on experiential rotations may not enroll in didactic courses outside of the required Pharm.D. curriculum without prior approval of the Director of Experiential Learning.

Doctor of pharmacy students are strongly encouraged to attend the American Society of Health-Systems Pharmacists Mid-Year Clinical Meeting in December to begin residency interviews.

Because pharmacy is a profession undergoing rapid change, the curriculum is subject to continual review and modification. As society's needs for specific types of pharmaceutical service change, the curriculum will change as well. To assure the best pharmacy education for its students, the School of Pharmacy reserves the right of making judicious changes and improvements in course sequence, course content, or other program requirements at any time that must be completed and adhered to in order to meet graduation degree requirements.

Pharm.D. Graduation Requirements

To graduate, Pharm.D. candidates must meet the following requirements in addition to the 31 credit hour prerequisite requirements:

Semester One

PHARM 7101 Professional Skills Development I 2
PHARM 7125 Medical Terminology (a) 1
PHARM 7151 Introduction to Pharmacy Law 1
LS-ANATO 119 Human Anatomy 3
LS-ANATO 119L Human Anatomy Lab 1
CHEM 321 Organic Chemistry I 3
CHEM 321L Organic Chemistry I Lab 1
BIOLOGY 202 Cell Biology 3
COMM-ST 110 Fund. of Eff. Speaking and Listening 3

Total 18 Semester Hours

Semester Two

PHARM 7110 Pharmacy Calculations 2

PHARM 7125 Medical Terminology (a) 1
PHARM 7233 U.S. Health Care System & Marketing 3
CHEM 322R Organic Chemistry II 3
CHEM 322L Organic Chemistry II Lab 1
LS-MCRB 121 Microbiology 3

LS-MCRB 121L Microbiology Lab 1
Course covering the U.S. Constitution 3

HISTORY 101 American History to 1877,
HISTORY 102 American History Since 1877 or
POL-SCI 210 American Government

Total 16 Semester Hours

(a) Pharmacy 7125 must be successfully completed during either the fall or spring semester.

Semester Three

PHARM 7202	Pharmaceutics I	4
PHARM 7341	Medicinal Chemistry I	3
LS-BIOC 365	Human Biochemistry I	3
LS-PHYS 399	Pharmacy Physiology I	3

Total 13 Semester Hours

Semester Four

PHARM 7203	Pharmaceutics II	3
PHARM 7344	Medicinal Chemistry II	3
PHARM 7414	Professional Skills Development II	3
LS-BIOC 366	Human Biochemistry II	3
LS-PHYS 400	Pharmacy Physiology II	3

Total 15 Semester Hours

Semester Five

PHARM 7245	Top 200 Drugs I (b)	.5
NURSE 5548	Advanced Pathophysiology	3
PHARM 7361	Pharmacology I	4
PHARM 7325	Professional Communications in Pharmacy	3
PHARM 7465	Economics of Health and Medicine	3
Professional Electives (c)		2
PHARM 7104	Professional Skills Development III	2

Total(a) 17.5 Semester Hours

Semester Six

PHARM 7245	Top 200 Drugs I (b)	.5
PHARM 7303	Pharmacokinetics & Biopharmaceutics	4
Professional Elective (c)		2
PHARM 7362	Pharmacology II	5
PHARM 7405	Pharmacotherapy I	3
PHARM 7463	Toxicology	2

Total(a) 16.5

(b) Pharmacy 7245 must be successfully completed during either the fall or spring semester.

Summer Semester

PHARM 7378	Introduction to Community Pharmacy Practice	2
------------	---	---

Semester Seven

PHARM 7389	Advances in Drug Therapy	2
PHARM 7345	Top 200 Drugs II(d)	.5
PHARM 7406P	General Medicine I(e)	4
PHARM 7420	Health Assessment & Pharmacotherapy II	7
PHARM 7451	Pharmacy Law & Ethics	2
Professional Elective(s)(c)		4

Total(d) 19.5 Semester Hours

Semester Eight

PHARM 7326	Evidence Based Medicine	5
------------	-------------------------	---

PHARM 7345 Top 200 Drugs II(d)	.5
PHARM 7485P Health Assessment & Pharmacotherapy III	7

PHARM 7466 Pharmacy Practice Management Professional Elective (c)	3 2
--	--------

Total(d) 17.5 Semester Hours

(c) A minimum of 10 credit hours of professional elective coursework must be completed while enrolled in the School of Pharmacy. No more than five credit hours of the 10 hours can come from courses outside the School of Pharmacy. Coursework completed before entry in the professional program will not transfer as professional elective credit. General and professional elective courses cannot be double counted.

The following is a partial list of courses approved to satisfy professional electives. A current list of approved professional electives is available on the School of Pharmacy home page at <http://pharmacy.umkc.edu/> under the Current Students section.

- Home Health Care
- Principles of Nutritional Support
- Reproductive Biology
- Computers in Pharmacy
- Radiopharmaceuticals Nuclear Pharmacy and Medicine
- Hospital Pharmacy
- Islam and Modern Practice of Medicine and Pharmacy
- Academic Service Learning
- Pediatric Pharmacotherapy
- Comprehensive Diabetes Management
- Introduction to Dietary Supplement Therapeutics
- Oncology and Hematology Pharmacotherapy
- Social and Psychological Development Through the Life Cycle
- The Experience of Health in Aging
- Death and Dying
- Policies of Drug Use and Control
- Pharmacy Seminar
- Directed Individual Study
- Health Service Administration and the Health Professions

(d) PHARM 7345 must be successfully completed during either the fall or spring semester.

(e) Students enroll in General Medicine I during the fall semester for 4.0 credit hours. Half of the General Medicine I course is completed during the fall and the remainder of the course during the spring semester. Spring re-enrollment is not required.

Semester Nine

Advanced Pharmacy Practice Experiential Rotations	Hours vary
---	------------

Semester Ten

Advanced Pharmacy Practice Experiential Rotations	Hours vary
---	------------

Required Introductory and Advanced Pharmacy Practice Experiences

PHARM 7404P	Drug Information Clerkship
PHARM 7406P	General Medicine I
PHARM 7407P	General Medicine II
PHARM 7409P	Health Systems Clerkship
PHARM 7410P	General Medicine III
PHARM 7412P	Community Pharmacy Practice Clerkship
PHARM 7418P	Elective Clerkship I
PHARM 7419P	General Medicine IV
PHARM 7420P	Elective Clerkship II

Optional Advanced Pharmacy Practice Experience

Students must complete all required Pharm.D. didactic coursework and a number of required documentation minimums prior to enrollment in the Introductory and Advanced Pharmacy Practice Experiences. Required documents must be on file in the Office of Experiential Rotations and must remain current through the student last rotation. Please see the School of Pharmacy Experiential Programs website at <http://pharmacy.umkc.edu/experientialprograms/homepage.asp> for a list of required documentation.

Graduation Requirements

To graduate, students must successfully complete all credit and non-credit requirements as listed. The curriculum includes a minimum of 195 hours (including the 31-hour pre-professional coursework requirement) and all non-credit requirements in effect at the time of completion. Prior to graduation, students also must demonstrate proficiency in English through completion of the Written English Proficiency Test. Within the 195 hours, the following minimums must be met:

Mathematics/Basic Science coursework	53 hours
Pharmacy Didactic coursework	78 hours
Professional Electives	10 hours
IPPE and APPE Experiential Learning	42 hours

Humanities and social science course requirements (including pre-pharmacy coursework):

English Composition	6 hours
Fundamentals of Effective Speaking & Listening	3 hours
U.S. Constitution course	3 hours

Bachelor of Science in Pharmaceutical Sciences

Curricular Outcomes Expected of Baccalaureate Pharmacy Graduates

Domain I. Provide Pharmaceutical Care

Competency IA: Interprets and evaluates pharmaceutical data and related information needed to prevent or resolve health-related problems or to respond to information requests. Components:

- Understands basic principles of pharmacology, including mechanisms and theories in Pharmacokinetics and Bio-pharmaceutics, classification, mechanisms of drug actions, therapeutic uses, contraindications and toxic effects of the major classes or prescribed drugs, over-the-counter drugs and common dietary supplements.
- Assesses physical properties and chemical data.
- Evaluates laboratory test results and Pharmacokinetics and Bio-pharmaceutics data.
- Makes reasonable assumptions and/or draws reasonable conclusions when data are incomplete.

Domain II: Behavioral-Based Abilities. Displays habits, attitudes and values consistent with pharmaceutical care.

Competency IIA: Thinking. Components:

- Identifies, retrieves, understands, analyzes, synthesizes and applies information needed to make informed, rational and ethical decisions.
- Solves problems that require an integration of one's ideas and values within a context of scientific, social, cultural, legal, clinical and ethical decisions.

Competency IIB: Communication. Effective communication is clear, accurate, confident and appropriate to the situation. Components:

- Listens effectively.
- Uses spoken language effectively.
- Uses written language effectively.

Competency IIC: Ethical Decision Making. Components:

- Recognizes ethical dilemmas in all areas of professional life.
- Makes and defends rational decisions regarding professional situations within a context of personal values and professional ethics.

Competency IID: Social and Contextual Awareness. Components:

- Demonstrates an awareness of and value for diversity.
- Demonstrates competency within cross cultural interactions and settings.
- Evaluates different types of interpersonal behaviors and their roles in effective social interactions.

Competency IIE: Social Responsibility. Components:

- Participates in professional growth opportunities through volunteer activities in the community.
- Demonstrates an appreciation of the obligation to participate in efforts to help individuals and to improve society and the health care system.
- Advocates improved professional approaches to meet the pharmacy-related needs of society and individual patients.

Competency IIF: Self-Learning Abilities. Component:

- Self-assess learning needs and design, implement and evaluate strategies to promote intellectual growth and development.
- Deliver and receive constructive critique regarding professional performance.

Application

Admission to the program requires a student to complete the UMKC general application. Completion of supplemental materials currently are not required. Applicants must have achieved a minimum 2.5 cumulative college grade-point average and minimum 2.0 science/math grade point average to meet eligibility requirements for admission. Contact the Pharmacy Student Services Office at (816) 235-**1613** or send an e-mail to pharmacy@umkc.edu if you have questions regarding the degree program.

Because pharmacy is a profession undergoing rapid change, the curriculum is subject to continual review and modification. As society's needs for specific types of pharmaceutical service change, the curriculum will change as well. To assure the best pharmaceutical education for its students, the School of Pharmacy reserves the right of making judicious changes and improvements in course sequence, course content, or other program requirements at any time that must be completed and adhered to in order to meet graduation requirements for the degree program.

Description of the Curriculum

Semester One	Hours
ENGLISH 110 or ENGLISH 110A English I	3
BIOLOGY 108 General Biology I	3
BIOLOGY 108L General Biology I Lab	1
CHEM 211 General Chemistry I	4
CHEM 211L General Chemistry I Lab	1
General Educ Elective (COMM-ST 110)	3
Total	15
Semester Two	Hours
ENGLISH 225 or 225A English II	3
BIOLOGY 109/109L General Biology II	3
BIOLOGY 109I General Biology II Lab	1
CHEM 212R General Chemistry II	4
CHEM 212LR General Chemistry II Lab	1
General Educ Electives	6

Total	18
Semester Three	Hours
MATH 210 Calculus w/Analytical Geometry	4
CHEM 321 Organic Chemistry I	3
CHEM 321L Organic Chemistry I Lab	1
BIOLOGY 202 Cell Biology	3
General Educ Elective (U.S. Constitution)	3
General Educ Elective	3

Total	17
Semester Four	Hours
PHARM 7110 Pharmaceutical Calculations	2
CHEM 322R Organic Chemistry II	3
CHEM 322LR Organic Chemistry II Lab	1
PHYSICS 210 Physics /Lab	4
Statistics*	3
General Educ Elective	3

Total **16**

*Statistics course can be satisfied by successful completion of EDUC 5505 or STAT 235

Semester Five	Hours
PHARM 7341 Medicinal Chemistry I	3
LS-BIOC 365 Human Biochemistry I	3
LS-PHYS 399 Pharmacy Physiology I	3
General Educ Electives	6

Total **15**

Semester Six	Hours
PHARM 7344 Medicinal Chemistry II	3
CHEM 341 Analytical Chemistry I	4
LS-BIOC 366 Human Biochemistry II	3
LS-PHYS 400 Pharmacy Physiology II	3
General Educ Elective (writing intensive)**	3

Total **16**

** Students must pass the Written English Proficiency Test (WEPT) prior to enrollment in the writing intensive elective.

General CLEP credits may not be used to fulfill the mathematics, physics, or chemistry requirements.

Semester Seven	Hours
PHARM 7202 Pharmaceutics I	4
PHARM 7361 Pharmacology I	4
Pharmacy Capstone Course	2
CHEM 345R Instrumental Analysis	3
400/5500 level Science Elective***	3

Total **16**

Semester Eight	Hours
PHARM 7203 Pharmaceutics II	3
PHARM 7203L Pharmaceutics II Lab	1
PHARM 7303 Pharmacokinetics & Biopharmaceutics	4
PHARM 7362 Pharmacology II	5
PHARM 7463 Toxicology	2
Pharmacy Capstone Course	2

Total **17**

*** This optional elective brings the credit hours to 129. This elective is not necessary to achieve the minimum credit hours for a UMKC baccalaureate degree, but it allows the student to select a 400- or 5500-level course in chemistry or biology or a 5500-level course in pharmacy.

Students must complete the following general education requirements:

- ENGLISH 110 or 110A English I
- ENGLISH 225 or 225A English II
- 3 credit hours of fine arts from:
 - Art
 - Art History
 - Music
 - Theatre
- 3 credit hours of humanities course work from:
 - Foreign Language
 - Philosophy
 - Religion
 - additional English
 - Communication Studies
- 6 credit hours of social and behavioral sciences from:
 - Sociology
 - Geography
 - Criminal Justice
 - Psychology
 - Economics
 - additional History
 - additional Political Science
- One course covering the U.S. Constitution from:
 - HISTORY 101 or 102
 - POL-SCI 210
- One public speaking course COMM-ST 110
- 6 credit hours of higher order thinking courses from:
 - Western Civilization
 - Ancient History
 - Philosophy
 - Logic
 - Cultural Anthropology
- One 3 credit hour writing intensive course.

Students are encouraged to work with their faculty adviser in planning their capstone course work. Students may choose to complete a double major or double B.S. degrees in a related area. Students are also encouraged to seek out internship opportunities. Internship opportunities are usually paid experiences where a student can gain valuable, hands-on knowledge related to their program of study (Note: students may not obtain course credit through internships).

First Professional Programs

First Professional Program

A pharmacist is a medication expert whose obligation is to deliver pharmaceutical care. Pharmaceutical care is "the responsible provision of drug therapy for the purpose of achieving a definite outcome that improves a patient's quality of life" (Hepler and Strand). A pharmacist's functions include but are not limited to:

- Identifying, preventing and/or resolving drug-related problems.
- Preventing disease and promoting good health practices through rational drug therapy.
- Providing drug information to the public.
- Educating other health care professionals about appropriate drug therapies.
- Collaborating with other health care professionals to improve health outcomes, especially as they relate to the appropriate use of medications.
- Ensuring that medications are delivered to the patient in a safe manner.

Many practice areas are covered by these responsibilities. The curriculum is designed to develop the competencies of graduates, allowing them to assume the responsibilities listed above.

Preparing for a Pharmacy Education

To help prepare themselves for a pharmacy education, high school students should plan a course of study that includes a mathematics and science emphasis. Pre-pharmacy advisers are available on the campuses of most Missouri institutions of higher education. College students planning to apply for admission to the School of Pharmacy should consult these special advisers for assistance in planning their pre-pharmacy coursework. Students taking their pre-professional coursework at UMKC should contact the School of Pharmacy Student Services Office for advising on pre-pharmacy courses.

Program for Top High School Seniors

High school seniors with a minimum cumulative high school grade point average of 3.25 (on a 4.0, non-weighted scale) at the beginning of their senior year and whose ACT composite score is a minimum of 23 or higher (1060 SAT minimum) are eligible to apply for the Freshman Provisional Admission Program. High school students are encouraged to take their school's math-science option, if available, in order to prepare for the health professional curriculum.

As many as 30 provisional freshmen are accepted each year. Provisional students complete the pre-pharmacy coursework at UMKC and take the Pharmacy College Admission Test (PCAT) during their freshman collegiate year. Students accepted into the provisional admission program hold a reserve seat in the first professional year of the Pharm.D. program if freshmen collegiate year eligibility requirements are successfully completed. A student admitted provisionally must complete minimum standards and requirements during their freshman college year in order to be admitted into the Doctor of Pharmacy program the following fall semester. This includes completion of required pre-pharmacy coursework, meeting the minimum grade point average and PCAT score requirements, good behavioral standing, and passing a formal interview during the spring semester of their freshmen year.

The School of Pharmacy Provisional Application includes supplemental materials. Completed Provisional Application and supplemental materials, including an application fee, must be postmarked or submitted to the UMKC School of Pharmacy Student Services Office no later than the Dec. 15 deadline. Official scores from the ACT should be received no later than the Dec. 15 deadline, however, December ACT scores will be considered if official score reports are received no later than Jan. 15.

For special application forms and information about degree programs and requirements, prospective students can visit <http://pharmacy.umkc.edu>. Admission to the Provisional Admission program is competitive. Applicants who meet the minimum requirements for provisional admission may not be accepted due to space availability restrictions.

Pre-Pharmacy Requirements for College Transfer Students

A minimum of 31 credit hours of college work, including the specified pre-professional requirements listed below, must be completed prior to admission to the professional pharmacy program of study with a grade of C or better. In addition, an overall cumulative grade-point average of 2.75 (on a 4.0 scale) and a science/math grade-point average of 2.5 (on a 4.0 scale) must be achieved on all college-level work completed through the end of the fall term preceding the year of entry to meet minimum eligibility requirements. Pre-pharmacy courses may be completed at UMKC or at any accredited higher education institution as long as equivalents are met.

Pre-Pharmacy Curriculum/Semester Hours

English Composition*	6
Calculus with Analytical Geometry**	4
General Chemistry I & II with Lab	8
General Biology I & II#	6
Physics with Lab	4
Electives in Humanities and Social Sciences*	3-6
Minimum Required Hours	31

*Students attending institutions restricting freshman admission to the English Composition II course may substitute three additional hours of electives in the social sciences or humanities. A second semester of English composition may be completed on admission to the School of Pharmacy. All pharmacy students must successfully complete six hours of English composition, Communication Studies 110 or its equivalent, and pass the Written English Proficiency Test prior to enrollment in Pharmacy 7414.

**Calculus courses that are less than 4.0 credit hours or that do not include analytical geometry will not meet the minimum requirement.

#Preparatory or introductory biology courses will not meet the minimum requirement.

Pre-pharmacy coursework must total a minimum of 31 credit hours. General CLEP credits will not be used to fulfill the mathematics, biology, physics, or chemistry requirements. Advanced Placement Program scores through the

College Board are accepted for some pre-pharmacy courses. Please see acceptable scores and courses at <http://www.umkc.edu/registrar/creditbyexam.asp#AP>. Check with an academic advisor in the School of Pharmacy regarding minimum score requirements and score and course transferability.

Choosing an Undergraduate Major

Pre-Medicine/Dentistry

Advising

College of Arts and Sciences Track

School of Biological Sciences Track

Honors Program

Student Organizations

Description

Among the fastest-growing career areas are the health-related professions and this trend is likely to continue in the 21st century, according to the U.S. Department of Labor. These employment opportunities require specialized training and one to four years of college-level studies in the appropriate pre-professional curricula. The pre-medicine/pre-health tracks are designed to help prepare students for future careers in the health arena and guide them through the process of applying to the various professional programs in health care.

The pre-medicine/pre-health tracks designed by the College of Arts and Sciences and the School of Biological Sciences assist students following a traditional path toward ultimately earning a professional degree in a medical or health care field. Most students first earn a bachelor's degree, followed by training in a professional program such as a four-year medical or dental school. These tracks are distinctly different from the unique six-year programs offered by UMKC in medicine and pharmacy described elsewhere in this catalog. For information about dentistry please see the UMKC Dental Program in the Graduate Catalog.

Some of the pre-professional programs in health care include:

- Pre-Dental Hygiene
- Pre-Dentistry
- Pre-Health, which includes advising for careers in:
 - Chiropractic
 - Clinical Perfusion
 - Health Administration
 - Health Information Management
 - Nutrition/Dietetics
 - Occupational Therapy
 - Optometry
 - Physical Therapy
 - Podiatry
 - Respiratory Therapy
 - Veterinary Medicine
- Pre-Medicine (allopathic and osteopathic)
- Pre-Nursing
- Pre-Pharmacy
- Medical Technology (see section under School of Biological Sciences)

Choosing an Undergraduate Major

Following the pre-medicine or pre-health track means taking specific courses that professional programs require for admission, but "pre-medicine" or "pre-health" **are not actual degrees**. Students need to choose a major field of study to combine with one of these tracks. Students can choose to follow these tracks through the College of Arts and Sciences or the School of Biological Sciences, depending on the major selected. Professional schools accept individuals from a variety of educational backgrounds and majors. When choosing a major, it is wise for students to consider their personal interests and strengths as well as possible alternative career goals.

The School of Biological Sciences offers degrees in biology, including a bachelor of science in biology with an emphasis in the cellular and molecular basis of health and disease for pre-medicine students, and a pre-dentistry concentration for pre-dentistry students. Undergraduate students in the biological sciences also have the opportunity to work with faculty mentors in life sciences research.

The College of Arts and Sciences offers degree choices and medically related undergraduate research in areas spanning the sciences, social sciences and humanities. Popular majors to combine with pre-medicine and pre-health include psychology, chemistry, communication studies, physics, English, Spanish, and philosophy. Many other combinations in the 18 academic departments are possible, and advisers in the tracks will help students apply their interests to design the right combination.

Pre-Medicine/Dentistry

Pre-Medicine/Dentistry

The purpose of the pre-medicine/dentistry curriculum is to prepare the student for application to medical/dental schools. Students may complete the pre-medicine/dentistry curriculum within any major.

The courses recommended in the pre-medicine/dentistry curriculum do not constitute an academic major but are the courses required for entrance into the majority of medical/dental schools in the United States and Canada. They also provide students with the information needed to obtain top scores on the Medical College Admission Test (MCAT) and Dental Admissions Test (DAT), which are required for entrance into medical and dental schools.

In addition to gaining a strong foundation in the sciences, pre-medicine/dentistry students also will receive support services to help them best prepare for application to medical or dental school.

For students considering other health professions or seeking admission to specific programs with additional prerequisite courses, the curriculum may be tailored to meet these requirements.

Medical/Dental School Admission Requirements

A. Two semesters (eight semester hours) of general biology with corresponding laboratories:

- BIOLOGY 108 General Biology I
- BIOLOGY 108L General Biology I Lab
- BIOLOGY 109 General Biology II
- BIOLOGY 109L General Biology II Lab

B. Two semesters (10 semester hours) of general chemistry with corresponding laboratories:

- CHEM 211 General Chemistry I
- CHEM 211L General Chemistry I Lab
- CHEM 212R General Chemistry II
- CHEM 212LR General Chemistry II Lab

C. Two semesters (eight semester hours) of organic chemistry with corresponding laboratories:

- CHEM 321 Organic Chemistry I
- CHEM 321L Organic Chemistry I Lab
- CHEM 322R Organic Chemistry II
- CHEM 322L Organic Chemistry II Lab

D. Two semesters (eight semester hours) of physics including laboratories:

- PHYSICS 210 General Physics I
- PHYSICS 220 General Physics II

E. Two semesters (six semester hours) of English composition:

- ENGLISH 110 Freshman English I
- ENGLISH 225 English II

In addition to the admission requirements listed above, most medical and dental schools recommend more advanced courses in biology, such as cell biology, genetics and biochemistry, and/or additional chemistry courses. Students should also take upper-level courses that demonstrate the requisite intellectual discipline and analytical and problem solving skills necessary to succeed in medical or dental school. Students are strongly encouraged to balance their work in the sciences with courses in communication studies, computer science, English literature, philosophy, psychology and sociology. A broad understanding of health care and medicine is also expected and work and/or volunteer experiences, including physician shadowing, in settings such as health care agencies, hospitals and physician offices is recommended.

UMKC School of Medicine MD Completion program

While the UMKC School of Medicine is primarily a combined-degree (BA/MD) program, it annually accepts a limited number of MD-only students who have completed their pre-medical studies and baccalaureate degrees. Students completing their pre-medical studies at UMKC and applying to the School of Medicine have the advantage of taking courses with medical students, interacting with faculty who also teach at the medical school and securing recommendations from individuals familiar with the School of Medicine's curriculum and faculty. For more information about this program or to request an application, contact the Admissions Office at the School of Medicine.

UMKC School of Dentistry Reserved Admission Program

The Reserved Admission Program for the Doctor of Dental Surgery (DDS) degree at the UMKC School of Dentistry enables highly motivated, ambitious, talented students to pursue their dream of becoming a dentist. Because admission to the Reserved Admission Program is very competitive, qualified reserved admission program students will have a reserved seat in a future UMKC School of Dentistry DDS Program class of their choosing, and they will not have to compete further for admission into the UMKC dental school. Entry into the program is available to students from Missouri and Kansas.

To be eligible to apply for Reserved Admission you must have completed a minimum of but not more than four semesters of college credit while being continuously enrolled in full-time course loads (a minimum of 15-18 credit hours per semester). Your science grade point average must be at least 3.60 in a degree-seeking program including prerequisite courses.

For more information about this program or to request an application, contact the Office of Student Programs at the School of Dentistry, 816-235-2080.

Advising

Experienced advisers in the College of Arts and Sciences and the School of Biological Sciences are knowledgeable about the professional school admission processes.

Advisers guide students in:

- Choice of majors
- Choice of courses
- Volunteer and shadowing opportunities
- Undergraduate research options
- Other health care professions
- Career alternatives

Advisers also give students invaluable help with:

- The professional school application process
- Preparation for professional school admission tests (MCAT, DAT, OAT, VCAT, etc.)
- Letters of recommendation
- Writing the personal statement
- Successful interview strategies

Students following the pre-medicine/pre-health track can enhance their preparation for health care careers through any major in the College of Arts and Sciences. While the relationship to majors such as chemistry or physics is clear, students may be surprised to discover how their interests in other majors within the College of Arts and Sciences will strengthen their abilities as future health care providers. For example:

- Students combining a major in psychology with the pre-medical/pre-health track will learn how psychology influences health and wellness, the prevention of disease and the healing process.
- Students majoring in communication studies will learn the critical importance of communication in health care, from the doctor-patient relationship to the interpersonal communication between members of a health care team to the power and politics of mass media.
- Philosophy majors will apply bioethical principles to "real world" dilemmas such as physician-assisted suicide.

However, pre-medical and pre-health students can easily combine any major within the College of Arts and Sciences with the prerequisites for medical, dental or other health professions schools. The College also offers:

- **The pre-medical/pre-dental curriculum** which may be combined with any major within the College of Arts and Sciences. This allows students the opportunity to complete the necessary prerequisite courses for admission to medical/dental schools in the United States and Canada.
- **A freshman seminar for pre-health/pre-medicine students.** Guest speakers discuss getting into medical school,

and students investigate medical case studies and explore important issues such as "Is health care a right or a privilege?"

- **Interdisciplinary courses that examine the complicated nature of health care.** Topics include the doctor-patient relationship, other aspects of health communication, health promotion and prevention and controversial issues in bioethics.
- **Medically related research projects** in such areas as clinical health psychology, chemistry, and physics. Current topics include disease prevention, psychological and communication barriers to adherence, and factors linking obesity, smoking, alcohol abuse, diet and exercise with cancer, cardiovascular disease and HIV/AIDS. Research partners include the Mid-America Heart Institute, Saint Luke's Hospital, UMKC Schools of Dentistry and Medicine and the Kansas City Free Health Clinic.
- **Dental-related research projects** which investigate topics such as pain management, disease prevention, psychological barriers in the healing process and the use of chemistry and physics to identify and construct new polymers for use as posterior restorations.
- **The Gerontology Certificate** allows students to explore relevant medical and social issues of the new millennium as people live longer, our population ages, and "care" becomes as important as "cure."
- **The Healing and Humanities Minor.** Faculty from the College of Arts and Sciences offer courses that enhance a student's ability to understand the complicated world of health care and the relationship of healthcare with the humanities and social sciences. Students can combine the healing and humanities minor with any major in the College of Arts and Sciences or the School of Biological Sciences. Through courses for the healing and humanities minor, students may strengthen their preparation for health careers by improving their communication skills, their appreciation of diversity and the arts, their understanding of bioethical dilemmas and their knowledge of the values, economics, and politics of health care. See the [Healing and Humanities Minor](#) under the College's Interdisciplinary Minors and Concentrations section of this catalog for more information.

College of Biological Sciences Track

Students interested in the scientific aspects of medicine or dentistry may find the School of Biological Sciences to be the right place for them. A major in biology incorporates courses in biology, chemistry and physics with a broad foundation in the social sciences and humanities. By meeting the degree requirements for the bachelor of science in biology with the cellular and molecular basis of health and disease emphasis, students will automatically fulfill all of the prerequisites and the upper-level biology courses which are highly recommended by most medical schools. The bachelor of science in biology with the pre-dentistry concentration allows students to complete all of the prerequisites and upper-level biology courses strongly suggested by most dental schools. More information about this can be found in the School of Biological Sciences section of this catalog.

- **Investigate the molecular basis of disease.** Courses such as genetics, cell biology, biochemistry and molecular biology examine the essential elements of modern biological sciences. Electives like neurobiology, endocrinology, immunology and virology emphasize experimental approaches that lay the foundation for the treatment and prevention of disease.
- **Perform hands-on experiments** with cells and tissues in facilities equipped with cutting-edge technology. Laboratory courses such as microbiology and histology bring textbook topics to life and allow students to learn the basics of research.
- **Discover and create new knowledge.** In cooperation with faculty, students apply powerful techniques like automated DNA sequencing, robotic genomic analysis and electron and confocal microscopy, to current biomedical problems. Students electing to do their own research may open many doors for their future.
- **Pursue personal interests in biology.** From the study of plants to the study of insects, students can explore practical applications like drug discovery and disease control by selecting from a variety of courses. Field trips and outings allow students to observe biological principles in action.

Honors Program

The College of Arts and Sciences and the School of Biological Sciences both offer Honors Programs for students with exemplary academic performance. The College of Arts and Sciences' program uses an interdisciplinary approach that encompasses studies in the sciences, humanities and social sciences, and engages students in a weekly Honors Colloquium and honors-designated courses.

The School of Biological Sciences' program combines a requirement for high levels of academic achievement with an undergraduate experimental research project and enrichment activities like study trips and seminar attendance.

Student Organizations

There are more than 200 active student organizations (including Greek) at UMKC that promote student leadership, volunteerism, community service and socialization. Some of the popular organizations among pre-medical students include:

Pre-Medical Society.

This is a university-wide student organization that provides various extracurricular opportunities for students to learn about the health care professions and to network with other like-minded students. Previous meetings have included discussions on Bioethics, HMOs, organ donation, complementary medicine, genetics and gene therapy, cloning, HIV/AIDS and taking patient histories. The society regularly hosts recruiters from medical schools and holds social events.

Biological Sciences Student Government (BSSG).

The BSSG plans informational and social activities for students. Past activities include guest speakers from the Kansas City Police Department Forensics Unit, Children's Mercy Hospital and the Missouri Department of Natural Resources, picnics and group ice-skating. Pre-medical students can participate in the School of Biological Sciences' annual hosting of distinguished biomedical scientists, including Nobel Prize winners and National Academy of Sciences members, addressing frontier issues in biomedicine.

Arts and Sciences Student Council.

The council aims to provide an interdisciplinary body in which Arts and Sciences students can provide input on decisions and policies of the College. The council works to enhance student-faculty interaction and communication, allocate its authorized budget and insure that Arts and Sciences students' needs, desires and attitudes are correctly represented to the administration.

Alpha Eta Chapter of Alpha Phi Omega.

This organization carries out service programs aimed at serving the chapter, campus, community and nation with emphasis on serving primarily the UMKC campus and the Kansas City area.

Faculty

Faculty of the University of Missouri-Kansas City

- College of Arts and Sciences
 - Architecture, Urban Planning and Design
 - Art and Art History
 - Chemistry
 - Communications Studies
 - Criminal Justice and Criminology
 - Economics
 - English Language and Literature
 - Foreign Languages and Literature
 - Geosciences
 - History
 - Mathematics
 - Philosophy
 - Physics
 - Political Science
 - Psychology
 - Social Work
 - Sociology
 - Theatre
- School of Biological Sciences
- Henry W. Bloch School of Business and Public Administration
- School of Computing and Engineering
- School of Dentistry
- School of Education
- School of Law
- Academic Librarians
- School of Medicine
- Conservatory of Music and Dance
- School of Nursing
- School of Pharmacy

Architecture, Urban Planning and Design

@ Associate or Adjunct Graduate Faculty

* Members of UMKC Graduate Faculty

Members of UMKC Doctoral Faculty

+ Located at UM-St. Louis campus

Architecture, Urban Planning and Design

#* Michael Frisch  ; assistant professor of architecture, urban planning and design; M. City Planning (Massachusetts Institute of Technology); Ph.D. (Rutgers University); A.I.C.P.

Sungyop Kim  ; assistant professor of architecture, urban planning and design; M. Urban and Regional Planning (University of Hawaii); Ph.D. (University of Washington).

Theodore H. Seligson  ; visiting professor of architecture, urban planning and design; B.Arch. (Washington University); F.A.I.A.

Joy D. Swallow  ; chair, department of architecture, urban planning and design, and associate professor of architecture; B.Arch. (Kansas State University); M.Arch. (University of Pennsylvania); A.I.A.

#* Jacob A. Wagner  ; assistant professor of architecture, urban planning and design; B.A.,M.S. (University of Oregon); Ph.D. (University of New Orleans).

Art and Art History

@ Associate or Adjunct Graduate Faculty

* Members of UMKC Graduate Faculty

Members of UMKC Doctoral Faculty

+ Located at UM-St. Louis campus

Art and Art History

Eric J. Bransby; professor emeritus of art; B.A., M.A. (Colorado College); M.F.A. (Yale University).

@#***Robert Cohon**; associate research professor of art history; B.A. (Columbia University); M.A., Ph.D. (New York University).

#***Frances Connelly** ; associate professor of art history; B.A. (Wake Forest University); M.A. (University of Pittsburgh); M.F.A. (University of North Carolina at Greensboro); Ph.D. (University of Pittsburgh).

William G. Crist; professor emeritus of art; B.A. (University of Washington, Seattle); M.F.A. (Cranbrook Academy of Art).

Nancy DeLaurier; instructor emeritus of art; B.S. (Northwestern University).

#***Burton L. Dunbar, III** ; chair, department of art and art history, and professor of art history; B.A. (Park College); M.A., Ph.D. (University of Iowa).

George Ehrlich; professor emeritus of art history; B.S., M.F.A., Ph.D. (University of Illinois).

***Geraldine E. Fowle** ; associate professor of art history; A.B. (Aquinas College); M.A., Ph.D. (University of Michigan).

Stephen J. Gosnell ; associate professor emeritus of art; M.A. (State University of New York).

***P. Elijah Gowin** ; assistant professor of art; B.A. (Davidson College); M.F.A. (University of New Mexico).

Edward Hogan ; lecturer of art; B.F.A. (Kansas City Art Institute); M.A. (University of Missouri-Kansas City).

Leonard I. Koenig; professor emeritus of art; B.A. (Adelphi College); M.A. (University of Iowa); M.F.A. (University of Wisconsin-Madison).

Barbara A. Mueller; professor emeritus of art; B.A. (Maryville College); M.A. (University of Iowa).

***Craig A. Subler** ; associate professor of art; B.F.A. (Dayton Art Institute); M.A., M.F.A. (University of Iowa).

Joy D. Swallow ; associate professor of architecture; B.Arch. (Kansas State University); M.Arch. (University of Pennsylvania).

***Kati Toivanen** ; assistant professor of digital media and photography; M.F.A. (School of the Art Institute of Chicago).

#***Maude Wahlman** ; Dorothy and Dale Thompson/Missouri Endowed Professor in Arts; B.A. (Colorado College); M.A. (Northwestern University); M.Phil., Ph.D. (Yale University).

*#**Rochelle N. Ziskin** ; associate professor of art history; B.A. (University of Illinois-Chicago).

Chemistry

@ Associate or Adjunct Graduate Faculty

*** Members of UMKC Graduate Faculty**

Members of UMKC Doctoral Faculty

+ Located at UM-St. Louis campus

Chemistry

Keith R. Buszek ; associate professor of chemistry; B.S. (University of California, Irvine); Ph.D. (University of California, Los Angeles).

Kuang Lu Cheng; professor emeritus of chemistry; B.S. (Northwestern College, China); M.S., Ph.D. (University of Illinois).

John W. Connolly; professor emeritus of chemistry; B.S. (Xavier University); Ph.D. (Purdue University).

Wesley J. Dale; professor emeritus of chemistry; B.S. (University of Illinois); Ph.D. (University of Minnesota).

#* Jerry R. Dias ; professor of chemistry; B.S. (San Jose State College); Ph.D. (Arizona State University).

Henry A. Droll; professor emeritus of chemistry; B.S., M.S. (George Washington University); Ph.D. (University of Pennsylvania).

#* James R. Durig ; curators' professor of chemistry and geosciences; B.A. (Washington and Jefferson College); Ph.D. (Massachusetts Institute of Technology).

Todor K. Gounev ; assistant professor of chemistry and program director; B.S., M.S. (University of Sophia, Bulgaria); Ph.D. (University of South Carolina).

Peter Groner ; director of laboratories and associate professor of chemistry; Diploma, Ph.D. (Swiss Federal Polytechnic Institute).

Eckhard W. Hellmuth; professor emeritus of chemistry; B.S., M.S., Ph.D. (University of Marburg, Germany).

#* Andrew J. Holder ; professor of chemistry; B.S. (Mobile College); Ph.D. (University of Southern Mississippi).

#* Y. C. Jerry Jean ; chair, department of chemistry, and curators' professor of chemistry and physics; B.S. (Taipei Institute of Technology Taiwan); Ph.D. (Marquette University).

#* Ekaterina N. Kadnikova ; assistant professor of chemistry; diploma in chemistry (Higher Chemical College of the Russian Academy of Sciences); Ph.D. (Iowa State University).

#* Kathleen V. Kilway ; associate professor of chemistry; B.S. (St. Mary's College); M.S., Ph.D. (University of California-San Diego).

Peter F. Lott; professor emeritus of chemistry; B.S., M.S. (St. Lawrence University); Ph.D. (University of Connecticut).

Layton L. McCoy; professor emeritus of chemistry; B.S., Ph.D. (University of Washington).

#* Nathan A. Oyler ; assistant professor of chemistry; B.S. (University of Arizona); Ph.D. (University of Washington).

#* Zhonghua Peng ; professor of chemistry; B.S. (University of Science and Technology of China); M.S. (Chinese Academy of Sciences); Ph.D. (University of Chicago).

#* Thomas C. Sandreczki ; professor of chemistry; B.A. (Houghton College); M.S., Ph.D. (University of Rochester).

#* Kenneth S. Schmitz ; professor of chemistry; B.A. (Greenville College); Ph.D. (University of Washington-Seattle).

Timothy F. Thomas; professor emeritus of chemistry; A.B. (Oberlin College); Ph.D. (University of Oregon).

#***J. David Van Horn** ; assistant professor of chemistry; B.A. (Point Loma Nazarene College); Ph.D. (University of Utah).

#***Charles J. Wurrey** ; executive associate dean and curators' distinguished teaching professor of chemistry; B. S. (Northern Michigan University); Ph.D. (Massachusetts Institute of Technology).

Communications Studies

@ Associate or Adjunct Graduate Faculty

* Members of UMKC Graduate Faculty

Members of UMKC Doctoral Faculty

+ Located at UM-St. Louis campus

Communications Studies

#***Joan E. Aitken**; professor emerita of communication studies; B.A. (Michigan State University); M.A., Ed.D. (University of Arkansas).

Gregory D. Black ; professor emeritus of communication studies; B.S. (Bowling Green State University); M. A. (California State); Ph.D. (University of Kansas).

***Linda M. Collier** ; associate professor of communication studies; director of debate; B.A., J.D. (University of Missouri-Kansas City).

Angela C. Elam ; assistant professor of communication studies and radio producer; B.A. (Clemson University); M.F. A. (University of Georgia-Athens).

***Daven Gee** ; assistant professor of communication studies; B.A. (California State University, Chico & University of Hawaii, Hilo); M.F.A. (San Francisco State University).

#***Gregory Gutenko** ; associate professor of communication studies; B.A., M.A. (University of Missouri-Kansas City); Ph.D. (University of Missouri-Columbia).

Caitlin M. Horsmon ; assistant professor of communication studies; B.A. (Oberlin College); M.A., M.F.A. (University of Iowa).

#***Carol F. Koehler** ; associate professor of communication studies; B.A. (Rosary College); M.A., Ph.D. (University of Missouri-Kansas City).

Gaylord V. Marr; professor emeritus of communication studies; B.A., M.A. (University of Nebraska).

Donald H. Matthews ; director of black studies and associate professor of communication studies; B.S., M. A. (Northwestern University); M.Div. (The Pacific School of Religion, Berkeley); Ph.D. (University of Chicago).

Judith McCormick ; associate dean and assistant professor of communication studies; B.A., M.A. (Texas Tech University), Ph.D. (Kansas State University).

Peter Morello ; associate professor of communication studies; B.A. (University of Wisconsin-Madison); M.S. (Columbia University).

Michael Neer ; professor of communication studies; B.A., M.A., Ph.D. (University of Missouri-Columbia).

***G. Thomas Poe**  ; chair, department of communication studies, and associate professor of communication studies; B.A. (Central Methodist College); M.A. (Northwest Missouri State), M.Div. (Emory University), M.A. (University of Missouri-Kansas City); Ph.D. (University of Kansas).

Robert B. Unger  ; professor of communication studies and English; B.A. (University of Missouri-Columbia); M.P.A. (Harvard University).

Economics

@ Associate or Adjunct Graduate Faculty

* Members of UMKC Graduate Faculty

Members of UMKC Doctoral Faculty

+ Located at UM-St. Louis campus

Economics

#***W. Robert Brazelton**; professor emeritus of economics; B.A. (Dartmouth College); M.A., Ph.D. (University of Oklahoma).

#***Willaim Black**; associate professor of economics and law; Ph.D. (University of California at Irvine).

Doug Bowles; research associate, assistant director, CEI, director, SSC, Ph.D., (University of Missouri-Kansas City)

#***Peter J. Eaton**  ; associate professor of economics; B.A. (University of Santa Clara); Ph.D. (University of Florida).

#***Mathew Forstater**  ; associate professor of economics; B.A. (Temple University); M.A. (New School for Social Research); Ph.D. (New School for Social Research).

John Henry. Lecturer in Economics, Ph.D. (McGill University)

L. Kenneth Hubbell  ; professor emeritus of economics and joint professor in the L.P. Cookingham Institute of Public Affairs; B.A., M.A. (Texas Christian University); Ph.D. (University of Nebraska).

#***Stephanie A. Kelton**  ; associate professor of economics; B.A. (California State University-Sacramento); M. Phil. (Cambridge University); Ph.D. (New School for Social Research).

Michael Kelsay, Lecturer, Ph.D. (University of Tennessee).

#***Frederic S. Lee**  ; professor of economics; B.A. (Frostburg State University); M.Phil, Ph.D. (Rutgers University).

#***Erik K. Olsen**  ; assistant professor of economics; B.S. (Northeastern University); Ph.D. (University of Massachusetts at Amherst).

Ross Shepherd; professor emeritus of economics; A.B. (Harvard University); M.A., Ph.D. (Syracuse University).

#***James I. Sturgeon**  ; chair, department of economics, and professor of economics; B.A. (Kansas State Teachers College-Emporia); M.A. (University of Missouri-Kansas City); Ph.D. (University of Oklahoma).

#***Linwood Tauheed**, assistant professor of economics; Ph.D. (University of Missouri at Kanas City).

#***Karen S. Vorst**  ; professor of economics; B.S. (Bowling Green State University); Ph.D. (Indiana University).

F. Eugene Wagner  ; professor emeritus of economics; B.A., M.S. (University of Missouri-Kansas City); Ph.D. (Syracuse University).

#* **John O. Ward** ; professor emeritus of economics; B.A., M.A. (University of Toledo); Ph.D. (University of Oklahoma).

#* **L. Randall Wray** ; professor of economics; B.A. (University of the Pacific); M.A. (Washington University); Ph.D. (Washington University).

Ben Young, lecturer, Ph.D. (University of Oklahoma).

English Language and Literature

@ Associate or Adjunct Graduate Faculty

* Members of UMKC Graduate Faculty

Members of UMKC Doctoral Faculty

+ Located at UM-St. Louis campus

English Language and Literature

#* **Hadara Bar-Nadav** ; assistant professor of English; B.A. (William Paterson College); M.A. (Montclair State University); Ph.D. (University of Nebraska-Lincoln).

#* **John C. Barton** ; assistant professor of English; B.A. (University of California-Berkeley); M.A., Ph.D. (University of California-Irvine).

Ralph A. Berets; associate professor emeritus of English; B.A., M.A., Ph.D. (University of Michigan).

#* **Virginia Blanton** ; assistant professor of English; B.A. (Southwestern College); M.A., Ph.D. (Binghamton University).

* **Michelle A. Boisseau** ; professor of English; B.A., M.A. (Ohio University); Ph.D. (University of Houston).

#* **Joan F. Dean** ; curators' teaching professor of English; A.B. (Canisius College); M.A., Ph.D. (Purdue University).

#* **Stephen Dilks** ; associate professor of English; B.A. (University of Stirling, Scotland); M.A., Ph.D. (Rutgers University).

Laurie Ellinghausen ; assistant professor of English; B.A. (University of Houston), M.A. (Ohio State University), Ph.D. (University of California-Santa Barbara).

Robert M. Farnsworth; professor emeritus of English; B.A. (University of Michigan); M.S. (University of Connecticut); Ph.D. (Tulane University).

Maira Ferguson; professor emerita of English; B.A. (University of London, Birkbeck College); M.A., Ph.D. (University of Washington, Seattle).

#* **Jennifer Frangos** ; assistant professor of English; B.A. (Vassar College); M.A. (State University of New York-Buffalo), Ph.D. (State University of New York-Stony Brook).

#* **Jane Greer** ; associate professor of English; B.A. (Hanover College); M.A., Ph.D. (Ohio State University).

#* **Christie Hodgen** ; assistant professor of English; B.A. (University of Virginia, Charlottesville); M.F.A. (Indiana University, Bloomington), Ph.D. (University of Missouri, Columbia).

Sheila Honig ; lecturer in English; B.A., M.A. (University of Missouri, Columbia).

Patricia Huyett ; lecturer in English; B.A., M.A. (University of Missouri-Kansas City).

Daniel Freeman Jaffe; professor emeritus of English; B.A. (Rutgers University); M.A. (University of Michigan).

Katie Kline  ; lecturer in English; .

#*Daniel Mahala  ; associate professor of English; B.A. (State University of New York at Binghamton); M.A. (New York University); D.A. (State University of New York at Albany).

James C. McKinley; professor emeritus of English; B.J., M.A., Ph.D. (University of Missouri, Columbia).

#*Jennifer Phegley  ; associate professor of English and women's studies; B.A. (Southwest Texas State University); M.A., Ph.D. (Ohio State University).

#*Michael Pritchett  ; associate professor of English; B.J. (University of Missouri, Columbia); M.F.A (Warren Wilson College).

David Ray; professor emeritus of English; B.A., M.A. (University of Chicago).

James A. Reeds; associate professor emeritus of English and linguistics; B.A., M.A. (University of Iowa); A.M., Ph.D. (University of Michigan).

#*Jeffrey A. Rydberg-Cox  ; chair, department of English language and literature, and associate professor of English and classics; B.A. (Colorado College); M.A., Ph.D. (University of Chicago).

#*Anthony Shiu  ; assistant professor of English; B.A. (Ohio University); M.A. (University of Vermont), Ph.D. (Michigan State University).

@Robert Stewart  ; assistant professor of English and editor of New Letters; B.A. (University of Missouri-St. Louis), M.A. (University of Missouri-Kansas City).

#*Thomas Stroik  ; professor of English; B.A., M.A., Ph.D. (University of Wisconsin-Madison).

#*Linda E. Voigts  ; curators' professor emerita of English; B.A. (William Jewell College); M.A. (University of Missouri-Kansas City); Ph.D. (University of Missouri, Columbia).

#*David H. Weinglass; professor emeritus of English; B.A., M.A. (St. Catherine's College-University of Cambridge); Ph.D. (Kansas State University).

#*Robert F. Willson, Jr.  ; professor emeritus of English; B.A. (Wayne State University); M.A., Ph.D. (University of Wisconsin).

Foreign Languages and Literature

Richard J. Ackerman; professor emeritus; D.D.S., M.S., Certificate, Pediatric Dentistry (University of Missouri-Kansas City); Certificate, Orthodontics and Dentofacial Orthopedics (Forsyth Dental Center); Certificate, Postdoctoral Research Fellowship (Harvard University).

#* **Cynthia Amyot** ; professor; B.S.D.H., M.S., Ed.D. (University of Missouri-Kansas City).

James L. Andrews; professor emeritus; D.D.S., Certificate, Oral and Maxillofacial Surgery (The Ohio State University); Diplomate, American Board of Oral and Maxillofacial Surgery.

Dan Ang; clinical assistant professor; D.D.S. (University of Alberta); Certificate GPR (Truman Medical Center), Certificate Oral and Maxillofacial Radiology, Certificate Periodontics, M.S. (University of Missouri-Kansas City)

Brad Babcock; clinical assistant professor; D.D.S. (University of Nebraska).

Bruce F. Barker ; professor emeritus; D.D.S. (University of Michigan); Certificate, Oral Pathology (University of Southern California); Diplomate, American Board of Oral Pathology.

Gerry J. Barker ; professor emerita; B.S. (University of Michigan); M.A. (University of Missouri-Kansas City).

#* **Maria del Cielo Barragan-Adjemian**; clinical assistant professor; D.D.S. (Intercontinental University); Ph.D. (University of Missouri – Kansas City).

James Beatty ; clinical assistant professor; D.D.S. (Ohio State University), Certificate GPR (VA Cleveland, OH); Certificate Prosthodontics (University of Missouri-Kansas City, VA Medical Center)

* **Melanie Beck** ; assistant professor; B.S.D.H. (University of Missouri-Kansas City); M.S. (University of Missouri-Kansas City).

John Bellome ; clinical associate professor; D.D.S. (New York University); Diplomate, American Board of Oral and Maxillofacial Surgery.

Tamara Bendure; fellow-radiology; B.S.D.H. (University of Missouri-Kansas City).

Marsha Black; assistant professor; B.S.D.H., M.S. (University of North Carolina-Chapel Hill).

@Brenda S. Bohaty ; professor; D.D.S. (University of Nebraska); M.S.D., Certificate, Pediatric Dentistry (Baylor College of Dentistry), Diplomate, American Board of Pedodontics.

#*Lynda F. Bonewald ; Curators' Professor; Dr. William L. Lefkowitz/Missouri Endowed Professor in Oral Biology; B.S. (University of Texas, Austin); Ph.D. (Medical University of South Carolina-Charleston).

#*Bonnie Branson ; associate professor; B.S. (University of South Carolina); M.S., Ph.D. (Southern Illinois University-Carbondale).

***Kimberly S. Bray** ; professor; A.A. (Sinclair Community College); B.S.D.H., M.S. (University of Missouri-Kansas City).

Lorraine Forgas Brockmann ; associate professor; A.A.S.-DH (Pueblo Community College); B.S.D.H., M.S. (University of Missouri-Kansas City).

William G. Brockmann ; clinical assistant professor; D.D.S. (Loyola University, Chicago); Ph.D. (University of Missouri-Kansas City).

Alan R. Brown ; associate professor emeritus; D.D.S. (The Ohio State University); Certificate, Oral and Maxillofacial Surgery (Fitzsimmons Army Medical Center); Diplomate, American Board of Oral and Maxillofacial Surgery.

H. Clifford Carlson; professor emeritus; A.A. (Graceland College); B.S., M.S. (Montana State University); D.D.S. (University of Missouri-Kansas City).

Robert P. Chappell; professor emeritus; B.S., D.D.S. (University of Illinois).

Susan Charles; fellow-special patient care, D.D.S. (University of Missouri-Kansas City).

Tsau-Mau Chou ; associate professor emeritus; B.D.S. (Kaohsiung Medical College); D.Sc.D., M.Sc.D., D.M.D. (Boston University).

Barbara R. Clark ; professor emerita; Pharm.D. (University of California).

Charles M. Cobb; professor emeritus; D.D.S., M.S. (University of Missouri-Kansas City); Ph.D. (Georgetown University).

Eileen L. Cocjin ; clinical assistant professor; D.M.D. (Manila, Philippines); Certificate Pediatric Dentistry (University of Southern California-Los Angeles); D.D.S. (University Missouri-Kansas City).

David E. Cohen ; clinical assistant professor, B.S., (Indiana University); D.D.S. (University of Missouri - Kansas City).

@Ann Marie Corry ; dental librarian and associate professor; B.A. (Washburn University); M.A.L.S. (University of Denver); M.A. (University of Missouri-Kansas City).

John Cottrell ; clinical instructor; B.A. (Pittsburg State University); M.A. (University of Northern Iowa).

Robert D. Cowan professor emeritus; D.D.S. (University of Michigan); M.S., Certificate, General Dentistry (University of Texas-Houston).

Ana K. Crawford ; clinical assistant professor; D.D.S. (Baylor College of Dentistry).

Christopher G. Cumming ; professor; B.D.S., Ph.D. (University of Edinburgh); C.Biol., MIBiol. (Institute of Biology, England); Assoc. Pathologist (Royal College of Pathologists); FDSRCS (Royal College of Surgeons); D.M.D. (University of Pennsylvania).

#*Sarah L. Dallas ; associate professor; B.S. Anatomical Studies (University of Birmingham); Ph.D. (University of London).

Barry Daneman ; clinical associate professor, B.A., M.A. (S.U.N.Y.-Binghamton).

Donna N. Deines ; associate professor; A.B. (Drury College); D.D.S., M.S., Certificate, Prosthodontics (University of Missouri-Kansas City).

Nidya O. De La Torre ; clinical assistant professor; D.D.S. (Pontificia Universidad Javeriana, Bogota, Colombia), Certificate – Pedodontics (Howard University).

Kathryn M. Dockter ; clinical assistant professor; B.S.D.H.; M.S. (University of Missouri-Kansas City).

James A. Dryden ; clinical professor; D.D.S., M.S. (University of Missouri-Kansas City).

Charles L. Dunlap ; professor; D.D.S., Certificate, Oral Pathology (University of Missouri-Kansas City); Diplomate, American Board of Oral Pathology.

Shara M. Dunlap ; clinical assistant professor; D.D.S. (University of Missouri-Kansas City).

#*J. David Eick ; curators' professor; B.S. (University of Michigan); M.S. (George Washington University); Ph.D. (State University of New York).

Dean A. Elledge ; associate professor; B.S. (Missouri Southern State College); D.D.S. (University of Missouri-Kansas City); M.S. (University of Minnesota).

Edgar J. Ellyson ; assistant dean for business affairs and clinical associate professor; M.B.A., Ph.D. (University of Missouri-Kansas City).

C. Weldon Elrod ; clinical associate professor; D.M.D. (Medical College of Georgia); Certificate, Prosthodontics (Walter Reed Army Medical Center); Diplomate, American Board of Prosthodontics.

Harvey C. Eplee ; assistant dean for clinical programs, patient & facilities management, associate professor; B.S. (Kansas State University); D.D.S. (University of Missouri-Kansas City); M.P.A. (University of Kansas); M.J. (Loyola University).

E. Grant Eshelman ; clinical assistant professor; A.B. (Franklin-Marshall College); M.S. (University Missouri-Kansas City); D.D.S. (Columbia University).

Philip H. Feil ; professor emeritus; B.A. (Sir George Williams University); M.S. (State University of New York); Ed. D. (Indiana University).

Brett L. Ferguson ; clinical associate professor; B.S. (Lane College); D.D.S., Certificate, Oral and Maxillofacial Surgery (University of Missouri-Kansas City); Diplomate, American Board of Oral and Maxillofacial Surgery.

David J. Ferguson; associate professor emeritus; D.D.S., Certificate Prosthodontics (University of Missouri-Kansas City).

Hayley Ferris; clinical assistant professor; B.S.D.H. (University of Missouri-Kansas City).

Adam Flack; fellow-oral surgery; D.D.S. (University of Missouri-Kansas City).

Gerald L. Foley ; clinical assistant professor; D.D.S. (University of Missouri-Kansas City).

Sharon A. Furby ; clinical assistant professor; RPh, D.D.S. (University of Texas-Houston).

Ronald E. Gier; professor emeritus; B.S. (Kansas State University); D.M.D. (Washington University); M.S.D. (Indiana University).

John A. Gilbert; associate professor emeritus; D.M.D. (University of Oregon); (Washington University); M.L.A. (Baker University).

#Alan G. Glaros; professor emeritus; A.B. (Stanford University); Ph.D. (State University of New York).

#*Jeffrey P. Gorski; professor; B.Sc.-Chemistry; Ph.D.-Biochemistry (University of Wisconsin-Madison); postdoctoral fellowship in molecular immunology (Scripps Clinic and Research Foundation).

Eric Gottman; clinical assistant professor; D.D.S. (University of Missouri-Kansas City); Certificate, Prosthodontics (University of Missouri-Kansas City).

Carrie Hanson; clinical assistant professor; B.S.D.H., M.A., (Northern Arizona University).

Patrick K. Hardman; professor emeritus; B.S. (Fort Hays State University); D.D.S., M.S., Certificate, Oral Diagnosis/Oral Medicine (University of Missouri-Kansas City).

Terrance B. Harris; associate professor emeritus; B.S. (University of Kansas); D.D.S., M.S., Certificate, Oral Diagnosis/Oral Medicine (University of Missouri-Kansas City).

John I. Haynes; professor; B.S., D.D.S., M.A. (University of Missouri-Kansas City).

James K. Hocott; associate professor emeritus; B.S. (Kansas State University); D.D.S. (University of Missouri-Kansas City).

Lyndal G. Holmes; associate professor emeritus; B.S. (Drury College); D.D.S., M.S., Certificate, Periodontics (University of Missouri-Kansas City).

Lori Holt; associate professor; B.S., M.S. (University of Missouri-Kansas City).

Liang Hong; assistant professor; D.D.S. (West China University of Medical Science), M.S. Dental Public Health, Ph.D. Oral Science, Certificate, Operative Dentistry and Dental Public Health (University of Iowa); Certificate, Dental Public Health (NIH).

Gregory C. Houston; clinical assistant professor; B.S. (University of Missouri); D.D.S. (University of Missouri-Kansas City).

Donald Howe; clinical assistant professor; B.A. (University of Iowa, Iowa City, IA); D.D.S., M.S., Prosthodontics; Certificate Fixed Prosthodontics (University of Iowa).

Shirley H. Hung; associate professor; D.D.S. (National Taiwan University); M.S. (University of Missouri-Kansas City); D.D.S. (University of Southern California-Los Angeles).

#*Laura R. Iwasaki; Leo Rogers Chair and associate professor; B.Sc., (University of Alberta, Edmonton, Alberta); Certificate - Orthodontics, M.S., Ph.D. (University of Manitoba, Winnipeg, Manitoba).

Gregory Johnson; clinical associate professor; B.S. (Fort Hays State University); D.D.S. (University of Missouri-Kansas City); M.A. (Antioch University).

#*Mark Johnson; professor; B.S. (University of Minnesota-Minneapolis); Ph.D. Biochemistry (University of Minnesota Mayo Graduate School of Medicine-Rochester).

Ryan Johnson; clinical assistant professor; B.A. (Drury College); D.D.S. (University Missouri-Kansas City).

Jay J. Jones  ; clinical assistant professor; B.S., D.D.S. (University of Missouri-Kansas City).

***Jerald O. Katz**  ; associate professor; B.S. (Albright University); D.M.D. (University of Pittsburgh); M.S. (University of Texas); Diplomate, American Board of Oral and Maxillofacial Radiology.

***Nancy Keselyak**  ; associate professor; B.S. (University of Maryland); M.A. (Simon Fraser University).

John W. Killip  ; assistant dean for student programs and clinical professor; B.S. (Northern Arizona University); D.D.S. (University of Missouri-Kansas City).

William J. Killoy; professor emeritus; D.D.S. (Creighton University); M.S. (University of Texas-Houston); Diplomate, American Board of Periodontology.

Marvin Kramer; clinical associate professor; D.D.S. (Creighton University).

@James C. Kulild  ; professor; D.D.S. (University of Missouri-Kansas City); M.S. (George Washington University); Diplomate, American Board of Endodontics.

Amit Kumar; clinical assistant professor; B.D.S. (College of Dental Surgery, Manipal, India), M.D.S. (Annamalai University, Nagar, India), Information Science M.S. (University of N. Carolina – Chapel Hill).

***Vandana Kumar**; assistant professor; B.S.D. (Rohtak, India), M.S. Conservative Dentistry (Punjab Government Dental College, India), M.S. oral and Maxillofacial Radiology (University of North Carolina-Chapel Hill); Diplomate-Oral and Maxillofacial Radiology.

Leonard L. Lausten  ; clinical associate professor; M.Sc. (McGill University); D.D.S. (Toronto, Canada).

Charley C. Lee; associate professor; D.D.S. (Hubei Dental School); M.S. (Beijing University); M.S. (New Jersey University of Medicine and Dentistry); D.D.S. (University of Missouri-Kansas City).

Ruohong Liu  ; assistant professor; D.D.S. (West China University of Medical Sciences, Chengdu, Sichuan, China); Certificate - Prosthodontics, M.S., Ph.D. (Ohio State University).

Alison Louie; fellow; B.S., (University of California-Los Angeles), D.D.S., (University of Pacific School of Dentistry-San Francisco)

James W. Lowe; professor emeritus; A.B. (William Jewell College); D.D.S., M.S. (University of Missouri-Kansas City); Diplomate, American Board of Pedodontics.

***Simon R. MacNeill**  ; associate professor; B.D.S. (King's College, London); D.D.S. (University of Missouri-Kansas City); Certificates, General Dentistry, General Practice, Periodontics (Louisiana State University); Diplomate, American Board of Periodontology.

Moncy Mathew  ; clinical assistant professor; B.D.S. (Bangalore University, India); M.P.H. (University of Michigan); dental public health residency (New York State Department of Health, Bureau of Dental Health, SUNY, Albany, NY).

Joy Wylie Matthews  ; clinical assistant professor; B.A. (Kansas State University); D.D.S. (University of Missouri-Kansas City).

William E. Mayberry; professor emeritus; A.B. (Washington University); M.S. (Southern Illinois University); Ph.D. (University of Illinois).

#*Carole P. McArthur  ; professor; B.Sc., Ph.D. (University of Otago); M.D. (University of Missouri-Kansas City).

***Michael D. McCunniff** ; associate professor; B.S. (Creighton University); M.S. (University of Iowa); D.D.S. (University of Missouri-Kansas City).

Susan D. McMillen ; clinical associate professor; B.S. (Central Missouri State University); D.D.S. (University of Missouri-Kansas City); M.S. (University of Kansas).

Gary D. McReynolds ; clinical assistant professor; B.S., D.D.S. (University of Missouri-Kansas City).

@*Tanya V. Mitchell ; associate professor; B.S., M.S. (University of Missouri-Kansas City).

James Mixson; associate professor; D.M.D. (University of Missouri – Kansas City).

@Behjat K.H. Moghadam ; professor; D.D.S. (Tehran University); D.S.D., Certificate, Advanced Graduate Study in Oral Medicine (Boston University); D.D.S. (University of Missouri-Kansas City).

Patricia A. Marken  ; professor of pharmacy practice; B.S. (Dalhousie University, Canada); Pharm.D. (Medical University of South Carolina).

William D. Mason; professor emeritus of pharmaceutical science, School of Pharmacy and School of Medicine; B.S., M.S., Ph.D. (Ohio State University).

Cydney McQueen  ; clinical associate professor of pharmacy practice; Pharm.D. (University of Missouri-Kansas City).

Tatum Mead; clinical assistant professor of pharmacy practice; Pharm.D. (University of Iowa); B.A. (University of Northern Iowa).

#*Srikumaran K. Melethil  ; professor emeritus of pharmaceutical science; B.Pharm., M.Pharm. (Andhra University, India); Ph.

D. (State University of New York at Buffalo).

#*Ashim K. Mitra ; vice provost for interdisciplinary research, co-director of Vision Research Center, curators professor of pharmaceutical science and chair, Division of Pharmaceutical Science; B.S., M.S. (Jadavpur University, India); M.S., Ph.D. (University of Kansas).

Mridul Mukherji; assistant professor of pharmaceutical science; B.S. (University of Allahabad, India); M.S. (University of Calicut, India); Ph.D. (University of Oxford, United Kingdom).

Leigh Anne Nelson ; assistant professor of pharmacy practice; B.S., Pharm.D. (University of Missouri-Kansas City).

Noel O. Nuessle; professor emeritus of pharmaceutical science; B.S. (St. Louis College of Pharmacy and Allied Sciences); M.S., Ph.D. (University of Florida).

Crystal D. Obering ; clinical assistant professor of pharmacy practice; Pharm.D., M.B.A. (Drake University).

Heather A. Pace ; clinical assistant professor of pharmacy practice; Pharm.D. (University of Missouri-Kansas City).

Brooke Y. Patterson ; clinical assistant professor of pharmacy practice; Pharm.D. (Purdue University).

D. Keith Perkins; clinical associate professor of pharmacy practice; B.S. (University of Missouri-Kansas City); Pharm.D. (University of Utah).

#*Robert W. Piepho ; dean, school of pharmacy, and professor of pharmacology and toxicology; B.S. (University of Illinois); Ph.D. (Loyola University).

Rafia S. Rasu ; assistant professor of pharmacy practice; B.S., M.S., M.B.A. (Dhaka University, Dhaka, Bangladesh); Ph.D. (University of Texas).

William J. Rost; professor emeritus of pharmaceutical science; B.S., Ph.D. (University of Minnesota).

Valerie L. Ruehter ; clinical assistant professor of pharmacy practice and director, experiential programs; B.S., Pharm.D. (University of Missouri-Kansas City).

Nicole Russell; clinical assistant professor of pharmacy practice; Pharm.D. (Midwestern University College of Pharmacy-Glendale).

Jennifer A. Santee ; clinical associate professor of pharmacy practice; Pharm.D. (University of Iowa).

Stephanie Schauner; clinical assistant professor of pharmacy practice; Pharm.D. (University of Missouri-Kansas City).

Andrew Smith; clinical assistant professor of pharmacy practice; Pharm.D. (University of Missouri-Kansas City).

Kathleen A. Snella ; associate dean, school of pharmacy, and clinical associate professor of pharmacy practice; B.S. (University of Iowa); Pharm.D. (The University of Texas at Austin and The University of Texas Health Science Center at San Antonio).

Roger W. Sommi, Jr. ; professor of pharmacy practice; B.S. (University of Wisconsin-Madison); Pharm.D. (University of Utah).

Morgan Sperry; clinical assistant professor of pharmacy practice; Pharm.D. (Creighton University).

Steven Stoner ; associate professor of pharmacy practice and chair, Division of Pharmacy Practice; Pharm.D. (University of Nebraska).

Deepti Vyas ; clinical assistant professor of pharmacy practice; Pharm.D. (Purdue University).

#*Jianping Wang ; assistant professor of pharmacology and toxicology; M.D., M.S. (Second Military Medical University); Ph.D. (Louisiana State University of Health Sciences Center).

Elizabeth Winans ; clinical associate professor of pharmacy practice; B.S. (Kansas State University); B.S., Pharm.D. (University of Oklahoma College of Pharmacy).

***Bi-Botti C. Youan** ; associate professor of pharmaceutical science; Pharm.D. (University of Cote, Abidjan); MBA (United Business Institutes, Belgium); M.Sc., Ph.D. (Catholic University of Louvain, Belgium).

David M. Yourtee ; professor emeritus of pharmacology and toxicology, School of Pharmacy and School of Medicine; B.S. (University of Missouri-Columbia); Ph.D. (University of Missouri-Kansas City).

Manager: Pete Eisentrager  

Owned and operated by the University of Missouri, the UMKC bookstores provide a wide array of educational materials and a variety of services. Student success hinges on having the necessary resources at the right time and the right price. At the main bookstore in [University Center](#), students can find a wide array of educational materials and a variety of services to assist in their academic success. Required and recommended textbooks are immediately available, as well as numerous supplemental materials including general reference and study guides. The UMKC bookstore also carries bestsellers, fiction, non-fiction and academic titles as well as an assortment of school and office supplies. Need something special to show your college spirit? Come browse through our large selection of UMKC clothing and gifts. Other services for your convenience include:

- Textbook Reservation program
- Textbook Buyback

- Graduation Fairs
- The Booker's Dozen reading rewards program
- Special Order programs

Technology is Affordable and Easy

At RooTech, located inside the main bookstore, UMKC students are automatically eligible for special savings on technology hardware, software and supplies. Look no further for a technology package that is user friendly and residence hall ready. A valid UMKC ID is necessary to obtain these terrific savings with educational pricing.

Textbook Buyback

There aren't too many items that can be purchased, used for a few months and then returned to the store for cash. During the last two weeks of the fall and spring semesters, an independent wholesale book company conducts book buyback to help the campus bookstore fill the textbook department with used books required for the upcoming semester. At this time, students can sell back their books for cash. If an instructor has requested a particular book for the next semester, the bookstore will pay up to 50 percent of the new price until the order is filled. Even if you originally bought the book for used price, you'll still get 50 percent of the new price if the book is needed. If a textbook is not required for the upcoming semester or if an instructor has not yet turned in their order, the wholesale book company may buy back your books to fill orders at other colleges and universities. They may offer you 0-30 percent of the new book price. Sometimes, books cannot be bought back due to a newer edition being used or if the book is in unsaleable condition.

Convenient Payment Options

Customers may use cash, personal checks, credit cards (MC, Visa or Discover), UMKC Bookstore Gift Cards and student charge. A valid photo ID is required for check transactions and a valid UMKC ID is required for student charge.

Student Charge

Student charge is available for financially enrolled students. Student charge allows students to purchase bookstore items with their UMKC ID and charge it to their UMKC account. Financial enrollment means that a student has made the minimum educational fee payment for the academic semester. A student may not student charge if they are not officially enrolled for the current semester (eg. if you're not enrolled for summer school, you can't student charge during the summer semester). A student may charge a maximum of \$1,000 per semester. Once the limit is reached, another form of payment is needed. Making a payment to your University of Missouri bill will not adjust the balance back to \$1,000.

Whether visiting in person or online, you will find there's more at your UMKC Bookstore, where profits support student services, facilities and programs.

University of Missouri System Information

Campus locations: Kansas City, Columbia, Rolla, St. Louis

Total enrollment (fall 2006): 63,783; 75 percent undergraduates, 25 percent graduate and first professional students

Web site: <http://www.umsystem.edu/>

Total degrees granted: 12,323 in fiscal year 2006

Total faculty (fall 2006): 7,478; 67 percent full time, 33 percent part time

Total staff (fall 2006): 16,457; 74 percent full time, 26 percent part time

Student financial aid: \$587,705,678 in grants, loans, work programs, scholarships, fellowships and other aid awarded to 51,341 students in fiscal year 2006

Land holdings: 19,517 acres

University of Missouri Extension

<http://extension.missouri.edu/>

Every year, more than 1 million Missourians turn to University of Missouri Extension to help them address complex change, solve problems and make informed decisions. They benefit from one-on-one assistance, seminars, online courses and research-based publications. They further their formal education through degrees and continuing education.

An integral part of the University's land-grant mission, University of Missouri Extension is a joint venture of the UM campuses, Lincoln University, the people of Missouri through county extension councils, the U.S. Department of Agriculture, and other stakeholders and partners. People throughout Missouri have access to University experts through county extension centers and through the Web: extension.missouri.edu

Using science-based knowledge, University of Missouri Extension focuses University resources on high-priority needs at the local level. Educational programs address agriculture and natural resources; business and workforce development; community development; 4-H youth development; and human environmental sciences, including health and nutrition.

The statewide TeleCenter Network, administered by University of Missouri Extension, links University faculty and staff with local learners using interactive video and other distance technologies to deliver credit and non-credit education to citizens at times and places convenient for them.

School Honor Codes School of Pharmacy Honor Codes

Honor Council Procedures for Violations of the Standards of Professional Growth and Ethical Behavior

University of Missouri-Kansas City School of Pharmacy

I. Jurisdiction of the Honor Council

The Honor Council shall be concerned with specified incidents of alleged violations by University of Missouri-Kansas City School of Pharmacy students of the School's Standards of Professional and Ethical Behavior, Sections IIA and IIB. Violations of the University of Missouri Student Conduct Code as described in Section III will be referred to the Office of the Vice Chancellor for Student Affairs. The standards identify areas of conduct which are judged unacceptable for individuals who are either in or aspire to be in the profession of pharmacy. The Standards of Professional and Ethical Behavior are distributed to all newly enrolled students during orientation. When a pharmacy student has been charged with one or more acts of misconduct according to these standards, the Honor Council shall adhere to the following procedures detail herein. The Honor Council shall have the authority to recommend sanctions upon any accused appearing before the Council. The disciplinary proceedings described are not to be construed as judicial trials. Care shall be taken, however, to comply as fully as possible with the spirit and intent of these procedural safeguards.

II. Organization of the Honor Council

A. Composition

The Honor Council members shall consist of the Chair; three voting faculty members, one from each division (3 votes); and one student member from each year 2-6 of the professional degree programs (5 students). The three most senior students no in accused's class will vote. Voting will take place by secret ballot. The chair and faculty members will not be administrators or division chairs. Four members or their alternates (2 faculty (to exclude the chair), 2 students) constitute a quorum. One nonvoting Honor Council staff member will assist the Chair in generation of reports and will be present at the hearings to take minutes. In case of a tie among the Honor Council as a whole, the chair shall vote in order to make the final determination upon recommendations from the other members. Proxy votes will not be allowed.

B. Eligibility and Appointment

The chair of the Honor Council shall be elected by the full faculty. An alternate will also be elected. The three division representatives and an alternate for each shall be elected by their respective divisions. The student representatives and their alternates shall be elected by their class officers. All elections shall be held on an annual basis at the beginning of the academic year, no later than September 15. After elections, a preliminary meeting of all members to discuss the role and function of the Honor Council will be held within two weeks.

C. Time of Appointment and Term of Office

All members shall serve a one year appointment or until replaced by election but may be re-elected in subsequent years. A student is ineligible to continue as a member of the Honor Council if placed on academic or disciplinary probation, or if for any other reason membership of the Council may not be in the best interest of the School of Pharmacy as determined by the Honor Council chair. In this case, the alternate would assume membership on the Council, and another alternate would be chosen by the class officers.

D. Primary Administrative Liaison (PAL)

A primary administrative liaison (PAL) will be appointed by the Dean for a minimum of a two year term. The PAL will draft the charge and represent the School of Pharmacy in all cases. The PAL will include all references to the School of Pharmacy within this document.

III. Procedures for Report of Violation, Investigation, Informal Disposition, and Notice

A. Report of Violation

An alleged violation of the Standards of Professional and Ethical Behavior should be reported to the PAL of the Honor Council or designee as soon as possible after discovery of the incident. The Chair shall notify the Dean of all accusations.

B. Preliminary Procedures and Meeting

The PAL shall investigate any reported student misconduct before initiating formal conduct procedures. The PAL is responsible for notifying the accused, in writing by certified mail, of the allegations brought against him/her prior to the commencement of the preliminary meeting and shall receive a copy of these Procedures for Violations of the Standards of Professional and Ethical Behavior along with the written notice. The PAL shall meet with the accused student to give the student the opportunity to present a personal version of the incident or occurrence.

C. Informal Disposition

The PAL shall have the authority to dismiss an allegation or propose appropriate sanctions to the accused student and shall fix a reasonable time within which the student shall accept or reject a proposed informal disposition. A failure of the student either to accept or reject within the time fixed shall be deemed to be an acceptance and, in such event, the proposed disposition shall become final upon expiration of such time. If the student rejects informal disposition, it must be in writing and shall be forwarded to the Honor Council.

D. Prior to Formal Hearing

The PAL shall draft the charge and call the Honor Council into session for a preliminary meeting within 10 working days of receipt of a written accusation of misconduct. The Chair of the Honor Council shall approve meeting dates. In the case that an elected member and an alternate have a conflict of interest in the case, the electing body would choose another member for the one case at the time of the preliminary meeting. [See section IIB for election procedures.] If the case is found to be within the jurisdiction of the Honor Council, a formal hearing will be held. If it is not within the jurisdiction of the Honor Council, the case will be forwarded to the Office of the Vice Chancellor for Student Affairs or other appropriate action will be taken. The PAL and the accused may meet with the Chair separately to discuss these policies and procedures. The Dean, designee, or other appropriate university official(s), may at any time temporarily suspend or deny readmission to the accused from the School of Pharmacy pending formal procedures when the Dean or the Chancellor or the Chancellor's designee finds and believes from available information that the presence of the accused on campus would seriously disrupt the School of Pharmacy or constitute a danger to the health, safety, or welfare of members of the School of Pharmacy community. The appropriate procedure to determine the future status of the accused will be initiated within seven calendar days of any action taken.

E. Notice of Formal Hearing

If the accusation is found at the preliminary meeting to be within the jurisdiction of the Honor Council, the formal hearing will be held within 15 working days of mailing of the official notice. Notice by certified mail will be sent to the address currently on record with the UMKC Registrar's Office. Failure by the accused to have a current local address on record with the Registrar's Office shall not be construed to invalidate such notice. The PAL, witnesses, and the accused will be given written notice of the hearing by certified mail. The notice shall set forth the date, time, and place of the alleged violation, the conduct for inquiry, the date, time and place of the hearing before the Council, request for attendance of the parties involved, and a reference for the accused to the Rights of the Accused Student Upon Hearing which are outlined in these Procedures. The notice shall be given at least seven (7) consecutive calendar days prior to the hearing, unless a shorter time be fixed by the Chair for good cause. Any request for continuance shall be made in writing to the Chair who shall have the authority to postpone the hearing if it is determined that the request is timely and made for good cause. The Chair shall notify the Honor Council members, the accused, the PAL, the witnesses, and any other relevant individuals of the new date for the hearing. If the accused fails to appear at the scheduled time, the Honor Council may hear and determine the matter in the accused's absence.

IV. Procedure for Honor Council Hearing

A. Rights of the Honor Council

The Honor Council shall have the right to:

- hear together cases involving more than one accused which arise out of the same act of misconduct, but in that event shall make separate findings and determinations for each accused;
- permit a stipulation of facts by the accused involved and the PAL;
- permit the incorporation in the record by a reference of any document, affidavit, or other material produced and desired in the record by the PAL or the accused charged and make a determination of whether the information is relevant to the case at hand.
- question witnesses, the accused, and/or the PAL or challenge other evidence introduced by either the PAL or the accused at any time;

- hear from the Council Chair about dispositions made in similar cases;
- call additional witnesses or require additional investigation,
- dismiss any action at any time;
- permit or require at any time, within a reasonable time as determined by the Council, amendment of the Notice of Hearing to include new or additional matters which may come to the attention of the Council before final determination of the case; provided, however, that in such event the Council shall grant to the accused or the School such time as the Council may determine reasonable under the circumstances to answer or explain such additional matters; and,
- dismiss any person from the hearing who interferes with or obstructs the hearing or fails to abide by the rulings of the Council Chair on any procedural question or request of the Chair for order.

B. Rights of the Accused Upon Hearing

The accused scheduled to appear before the Honor council pursuant to formal notice of charges and disciplinary hearing shall have the right to:

- submit a written response to the charge outlined in the Notice before the scheduled hearing is to commence;
- request in advance of the scheduled hearing a review of any materials contained in the accused's hearing file which will be kept in the Student Affairs Office;
- submit a written request for the identities of witnesses to be called to testify before the Council;
- be present at the hearing;
- have an advisor or counselor appear with the accused and to consult with such an advisor or counselor before and/or during the hearing: however, the advisor/counselor will not be allowed to question witnesses and/or address members of the Council:
- hear or examine evidence presented to the Honor Council
- question the PAL and/or witnesses present who are testifying at the hearing.
- present evidence by witness, affidavit, written report, other memoranda, photographs, drawings, and any other relevant evidence of any defense the accused desires:
- make any statement to the Honor Council in mitigation or explanation of the conduct in question;
- remain silent to avoid self-incrimination;
- be informed in writing of the findings and any decisions imposed by the Honor Council, the Executive Committee; and, • appeal the decision and/or disposition to the Chancellor, as herein provided.

C. Rights of School of Pharmacy

The Primary Administrative Liaison (PAL) has the right to:

- be present at the hearing;
- present evidence by witness, affidavit, written report, other memoranda, photographs, drawings, and any other relevant evidence the PAL desires;
- offer rebuttal at the appropriate time as determined by the Chair;
- question witnesses or the accused;
- have an advisor or counselor appear with the PAL and to consult with such an advisor or counselor before or during the hearing; however, the advisor/counselor will not be allowed to question witnesses and/or address members of the Council;
- hear or examine evidence presented to the Honor Council by witnesses or the accused; and,
- be informed in writing of the findings and any decisions imposed by the Honor Council or the Executive Committee.

D. Rights of Witnesses

Witnesses shall be notified of the scheduled time, date, and location of the hearing. Witnesses shall bring with them whatever documentation is requested. Failure of a student witness to appear, without good cause, is a violation of the Standards of Professional and Ethical Behavior.

E. Record of Hearing

All proceedings of the Honor Council are to be held in the strictest confidence by the members and all other persons involved. The hearings shall be audio taped, and written minutes will also be recorded. The notice, exhibits, hearing record, verdict, and disposition of the Honor Council shall become the record of the Case. This official document shall be filed under strictest security in the permanent records of the Students Affairs Office of the School of Pharmacy. The record shall be accessible at the reasonable times and places to both the University and the accused for the purpose of review or appeal.

F. Conduct of the Hearing

The Honor Council Chair shall preside at the hearing, call the hearing to order, call the roll of the Honor Council members in attendance, ascertain the presence or absence of the accused, read the Notice of Hearing and Charge and verify the receipt of Notice of Charge by the accused, report any continuances requested or granted, establish the presence of any adviser or councilor of the accused, call t the attention of the accused and the adviser any special or extraordinary procedures to be employed during the hearing, and permit suggestions for or objections to any procedures for the Honor Council to consider. NOTE: Advisors will not be allowed to questions the PAL, witnesses, and/or address members of the Council All requests to address the Council shall be addressed to the Chair. The Chair will rule on all requests and points of order and may consult with Council's legal adviser prior to any ruling. The Chair's ruling shall be final, and all participants shall abide thereby, unless the Chair shall present the question to the Council at the request of a member of the Council, in which event, the ruling of the Council by majority vote shall be final. Rules of common courtesy and decency shall be observed at all times.

1. Opening Statements

- The Honor Council Chair or designee shall make opening remarks outlining the general nature of the case.
- The accused may make an opening statement to the Council about the charge at this time.
- The PAL may make an opening statement and may add additional clarification to other opening statements as necessary.
- Witnesses of the School of Pharmacy are to be called by the PAL and identified or written reports of evidence are introduced as appropriate.
- The Council may question witnesses at any time.
- The accused may question witnesses or examine evidence at the conclusion of the PAL's presentation.

2. School of Pharmacy's Evidence

- The PAL may question own witnesses.
- The accused shall have the opportunity to make a statement to the Honor Council about the charge.
- The accused may present evidence through witnesses or written memoranda.
- The Council may question the accused or witnesses at any time.
- The PAL may question witnesses or examine evidence at the conclusion of the accused's presentation.
- the accused may question own witnesses.
- Accused's Evidence:

4. Rebuttal Evidence:

The Honor Council may permit the PAL or the accused to offer a rebuttal to the other's presentation. If it appears that essential testimony is unavailable, or that for other good cause the hearing should be deferred, the Council

may continue, recess or discontinue the hearing without prejudice.

V. Determination of the Honor Council

Following the hearing, the Council shall promptly deliberate in closed session out of the presence of the accused, the witnesses, or the PAL. Determination is to be made regarding both the validity of the charge and the discipline, if any, to be imposed.

A. Violation of the Standards of Professional and Ethical Behavior

The Honor Council shall determine if the evidence presented in the hearing supports the charge of violation of the Standards of Professional and Ethical Behavior. The Council shall render a decision, by simple majority vote, of whether a violation has been committed by the accused. Each charge, if there are more than one, shall be considered individually and/or collectively at the discretion of the Council.

B. Discipline Imposed

The Honor Council shall determine the discipline to be imposed, if any, based upon its deliberations. The following forms of discipline are to be recommended by means of a simple majority vote of the Council members. Where there are multiple violations, there can be separate sanctions for each violation. The sanctions include, but are not limited to, the following:

No Disciplinary Action –

Given when the student is not found in violation of the Standards of Professional and Ethical Behavior.

Warning

– A written reprimand that the student has violated the Standards of Professional and Ethical Behavior.

Probation –

A written reprimand for violation of the Standards of Academic Conduct that includes a designated period of time, the probability of more severe sanctions if the student violates any institutional regulations(s) during the probationary period, and subject to any appropriate terms or conditions, such as loss of privileges, restitution, and discretionary assignments.

Suspension –

An involuntary separation from the School of Pharmacy for a specified period of time or until special conditions have been met, with a statement whether suspension should relate back to the date of the offense, begin at the time imposed, or begin at a date specified in the future. At the conclusion of the period of suspension, the suspended student is automatically returned to student status. Conciliation for readmission may be specified.

Dismissal –

An involuntary separation from the School of Pharmacy for an indefinite period of time. The order of dismissal may specify a date before which the faculty will not consider a petition for readmission from the dismissed student.

Expulsion –

Permanent separation from the School of Pharmacy. A copy of the imposed sanction is to be placed in the student's non-academic file.

C.

An oral presentation of the Council's findings and recommendations is permitted following the hearing, but a written document including findings of fact, verdict, and recommended disposition shall be completed as soon as possible after the hearing. This Final Report of the Council shall be submitted to the Executive Committee and the Office of the Vice Chancellor for Student Affairs. All parties will be notified in writing of the Honor Council's recommendation

by certified mail within seven calendar days.

VI. Decision of the Executive Committee

The findings and determination of the Honor Council serve as recommendations to the Executive Committee. The Executive Committee, as described in the School of Pharmacy By-Laws, chaired by the Dean or designee, reviews the charge, the finding of fact, the decision of the Council, and the recommended discipline to be imposed from the Honor Council. They also assured that the procedures outlined for the Honor Council were successfully followed. The Executive Committee has the right to request further information from either party. Either party can also request to address the Executive Committee. In either case, both parties will be notified of the request, the nature of the request, and be asked to attend if deemed necessary by the Executive Committee. Both parties will have the same rights as they have upon hearing as outlined in IV B & C of this document. The Executive Committee hearings shall be audio taped, and written minutes will also be recorded. The notice, exhibits, hearing record, verdict, and disposition of the Executive Committee shall become the record of the Case. This official document shall be filed in the permanent records of the Student Affairs Office of the School of Pharmacy. The record shall be accessible at the reasonable times and places to both the University and the accused for the purpose of review or appeal. After deliberation and careful consideration, the Executive Committee approves, by simple majority vote, one of the following actions:

- to sustain the recommendations of the Honor Council;
- to amend the recommendations of the Honor Council to another type of sanction;
- to remand the Honor Council's recommendations; or,
- to reverse the Honor Council's recommendations.

The Dean shall notify the accused of the findings of the Honor Council and the Executive Committee in writing, by certified mail, within seven calendar days of the Executive Committee meeting. Copies of the letter will be sent to the Honor Council Chair, the PAL, and the Office of Student Affairs for placement in the accused's file and in the official hearing file.

VII. Right of Appeal

When a recommendation from the Honor Council and the Executive Committee is made for some form of disciplinary action other than 'no disciplinary action', the accused may appeal such decision to the Chancellor or designated representative by filing written notice of appeal with the Chancellor within ten (10) consecutive calendar days after notification of the decision of the Executive Committee. A copy of the Notice of Appeal will also be given by the accused to the Dean of the School of Pharmacy at the time of filing who will transmit copies to the Executive Committee and the Honor Council. The accused may file a written memorandum for consideration by the Chancellor with the Notice of Appeal.

The Chancellor or designated representative shall review the record of the case and the appeal documents and may affirm, reverse, or remand the case for further proceedings and shall notify the Dean and the accused in writing of the decision on the appeal. The action of the Chancellor shall be final unless it be to remand the matter for further proceedings.

Status during Appeal:

In cases of suspension, dismissal or expulsion where a Notice of Appeal is filed within the required time, the accused may petition the Chancellor in writing for permission to attend classes pending final determination of appeal. The Chancellor may permit the accused to continue in school under such conditions as may be designated pending completion of appellate procedures, provided such continuance will not disrupt the University or constitute a danger to the health, safety or welfare of the University Community. In such event, however, any final disciplinary action imposed shall be effective from the date of the action of the Executive Committee.

VIII. Status of the Standards of Professional and Ethical Behavior

Amendments to the Standards of Professional and Ethical Behavior and/or Honor Council Procedures for Violations may be proposed by petition of any twenty-five members of the student body, or the Honor Council on its own motion, or the faculty.

A proposed amendment in the Standards of Professional and Ethical Behavior and/or Honor Council Procedures for Violations must be approved by a 2/3 majority vote of the Honor Council members present (all members have the right to vote on amendments = 9 votes), by a 2/3 majority vote of the faculty present, by the Chancellor, and the Board

of Curators.

The Standards of Professional and Ethical Behavior and/or Honor Council Procedures for Violations may be terminated at any time by action under the general amending procedure.

Standards of Professional and Ethical Behavior

University of Missouri-Kansas City School of Pharmacy

I. Preamble

One of the goals of a pharmacy school is to educate a pharmacy student during the transition to a professional life. The University of Missouri-Kansas City School of Pharmacy has an obligation to evaluate students pursuing the B.S. and Pharm.D. practice degrees as thoroughly as possible for their cognitive abilities, their academic and professional knowledge and skills, their integrity, and their suitability for the practice of pharmacy. Accordingly, the Standards of Professional and Ethical Behavior detailed in this document have been developed to guide the pre-professional behavior of **professional degree-seeking** pharmacy students of the University of Missouri-Kansas City School of Pharmacy and to prepare the pharmacy students to meet the ethical standards of the pharmacy profession.

Students enrolled in the graduate programs in pharmaceutical sciences and pharmacology will be governed by the University of Missouri Student Conduct Code.

II. Professional Integrity

A. Professional Integrity

1. Honesty

A pharmacy student shall deal honestly with people including, but not limited to, colleagues, instructors, representatives of the University, patients, attending physicians, and other members of the health care team. Pharmacy students are expected to demonstrate honesty and integrity in all aspects of their interaction with patients and staff – particularly in assuring accuracy and completeness in their actions and documentation. The pharmacy student shall be willing to admit errors and must not mislead others or promote himself/herself at the patient's expense. The pharmacy student shall strive to report, by utilizing the Honor Council Procedures for Violations of the Standards of Professional and Ethical Behavior, those pharmacy students deficient in character or competence, or who engage in fraud or deception.

The basic principle underlying all research is honesty. Scientists and pharmacy students who participate in research have a responsibility to provide research results of the highest quality; to gather facts meticulously, to keep impeccable records of work done; to interpret results realistically, not forcing them into preconceived molds or models; and to report new knowledge through appropriate channels. Co-authors of research reports must be sufficiently acquainted with the work of their co-workers that they can personally vouch for the integrity of the study and validity of the findings, and must have been active in the research itself.

Examples of academic dishonesty include, but are not limited to, the following:

Cheating

- use of any unauthorized assistance in taking quizzes, tests, or examinations;
- dependence upon the aid of unauthorized sources in writing papers, preparing reports, solving problems, or carrying out other assignments;
- acquisition or possession without permission of tests or other academic material belonging to a member of the University faculty or staff;
- in any way giving assistance to others who are participating in any of the three preceding types of behavior; or
- falsifying attendance records or other official documents.

Plagiarism

- use by paraphrase or direct quotation of the published or unpublished work of another person without fully and

properly crediting the author with footnotes, citations or bibliographical reference;

- unacknowledged use of materials prepared by another person or agency engaged in the selling of term papers or other academic materials; or
- unacknowledged use of original work/material that has been produced through collaboration with others without release in writing from collaborators.

Sabotage

- unauthorized interference with, modification of, or destruction of the work or intellectual property of another member of the University community.

Examples of dishonesty related to clinical practice include, but are not limited to, the following:

Falsification of Patient's Medical Record or Information

- Writing progress notes or other documentation regarding the patient's status, including, but not limited to, clinical observations or results in the patient's chart when the pharmacy student has not seen or evaluated the patient, or using incorrect times of data entry.
- Reporting medical information such as physical examination finds, lab values, test results, or any other relevant patient information to other students, residents, attending physicians, the patient, the patient's family, or other relevant health care personnel that has been fabricated by the pharmacy student.

2. Responsibility

A pharmacy student must acquire competencies with the appropriate concepts, knowledge, and skills which the faculty determine to be essential. These competencies shall be utilized to care for the sick and to promote the health and welfare of society. A pharmacy student shall recognize a responsibility to participate in activities contributing to an improved community.

Pharmacy students in the care of patients must not be harmful, dangerous, or negligent to the mental or physical health of a patient or the public. Negligent means the failure to use that degree of skill and learning ordinarily used under the same or similar circumstances by other pharmacy students.

Students must be familiar with and follow the rules and regulations of the School of Pharmacy, the University, and related professional organizations.

B. Pharmacy Professional Behavior

1. Nondiscrimination

It is against University regulations to discriminate on the basis of race, color, creed, sex, age, national origin, disability, or Vietnam Era Veterans status. The University has an AIDS policy statement consistent with state law that prohibits discrimination against persons with AID or who are HIV positive.

2. Representation

A pharmacy student shall accurately represent himself/herself to others including, but not limited to, colleagues, instructors, representatives of the University, patients, pharmacists and other members of the health care team.

Examples of misrepresentation include, but are not limited to the following:

- A pharmacy student shall never use the title of "pharmacist", as this clearly misrepresents the student's position, knowledge, and authority.
- Use of fraud, deception, lies, or bribery in securing any certificate of registration or authority, diploma, permit or license issued, or in obtaining permission to take any examinations.
- Impersonation of any person holding a certificate of registration or authority, permit, license or allowing any person to use his/her certificate of registration or authority, permit, license, or diploma from any school.
- Forgery, alteration, or misuse of a patient's medical records or knowingly furnishing false information to the other

members of the health care profession and/or professional organizations.

3. Confidentiality

A pharmacy student shall respect the rights of patients, colleagues, and other health professionals, and shall safeguard patient confidences within the constraints of the law. The patient's right to confidentiality in regard to his/her medical record, which includes confidentiality of personal and social history, is a fundamental tenet to medical care. Proprietary information from clerkship and/or externships shall not be shared.

The discussion in public of the problems of an identified patient, without the patient's permission, by professional staff (including other students) violates patient confidentiality and is unethical. Under no circumstances can any medical record be removed from the institution. Photocopying of the entire record is never permitted for presentations or rounds; students are permitted to extract information, but not copy 'wholesale' parts of the chart. Names of patients should be omitted from any documents used for these presentations.

4. Disclosure

While the pharmacy student is a member of the patient care team and under faculty supervision, a pharmacy student shall continue to study, apply and advance scientific knowledge, make relevant information available to patients, colleagues, and the public, obtain consultation, and use the talents of other health professionals when indicated.

Sharing of medical information appropriately with a patient and colleagues involved in the care of the patient is a fundamental ethical requirement. The patient must be well informed to make health care decisions and work intelligently in partnership with the patient care team. Information that the patient needs for decision making shall be presented in terms the patient can understand. If, for some reason, the patient is unable to comprehend, there shall be disclosure to the patient's authorized representative.

Failure of a pharmacy student to share medical information relevant to a patient with the patient and colleagues involved in the care of the patient is unethical. Providing inaccurate information with these individuals is also unacceptable.

5. Assessment of Personal Competence (Self-Evaluation)

Pharmacy students shall seek consultation and supervision whenever their ability to play their role in the care for a patient is inadequate because of lack of knowledge or experience.

Students are expected to respond to constructive criticism by appropriate modification of behavior.

It is unacceptable for a pharmacy student to dispense prescription medications or to prescribe therapies without supervision.

6. Professional Demeanor

The pharmacy student is expected to be thoughtful and professional when interacting with faculty, patients and their families, attending physicians, pharmacy preceptors, other students, and other members of the health care team and whenever his/her behavior may influence adversely the judgments of others about the professional school of University.

Students shall maintain a neat and clean appearance, and dress in attire that is generally accepted as professional by the patient populations served.

Inappropriate behavior includes, but is not limited to, the use of offensive language, gestures, or remarks. Attempting, directly or indirectly, by way of intimidation, coercion or deception, to obtain or retain a patient or discourage the use of a second opinion or consultation is not appropriate.

7. Conflict of Interest

If a conflict of interest arises, the moral principle is clear – the welfare of the patient must be, at all times, paramount. For example, gifts, hospitality, or subsidies offered by manufacturers and distributors of medical and pharmaceutical equipment/goods shall not be accepted if acceptance would influence the objectivity of clinical judgment.

8. Misconduct with Patients

The pharmacy student will not engage in romantic, sexual, or other nonprofessional behaviors with a patient – even upon the apparent request of a patient – while the pharmacy student is involved with the patient's care.

9. Impairment

The pharmacy student will not use alcohol or drugs in ways that impair his/her ability to perform the work of the profession or results in compromised patient care. It is the responsibility of every pharmacy student to strive to protect the public from an impaired colleague and to assist that colleague whose capability is impaired because of alcohol or drug use.

10. Criticism of Colleagues

Professional relations among all members of the medical community shall be marked by civility. Scholarly contributions shall be acknowledged and each person shall recognize and facilitate the contributions of others to this community; slanderous comments and acts are not acceptable. Pharmacy students shall deal with professional, staff, and peer members of the health team in a considerate manner and with a spirit of cooperation.

It is unethical and harmful for a pharmacy student to disparage, without sufficient evidence, the professional competence, knowledge, qualifications, or services of a colleague to anyone. It is also unethical to imply without reliable evidence – by word, gesture, or deed – that a patient has been poorly managed or mistreated by a colleague.

11. Teaching

It is incumbent upon those entering this profession to teach what they know of the science, art, and ethics of pharmaceutical care. It includes communicating clearly and teaching patients so that they are properly prepared to participate in their own care and in the maintenance of their health.

III. The University of Missouri Student Conduct Code

In addition to the conduct detailed in the preceding sections, a pharmacy student is subject to the University of Missouri Student Conduct Code, as administered by the Office of the Vice Chancellor for Student Affairs, except for provisions dealing with academic dishonesty, Section 200.010 B. 1.

Conduct for which students are subject to sanctions falls into the following categories:

- A. Forgery, alteration, or misuse of University documents, records or identification, or knowingly furnishing false information to the University.
- B. Obstruction or disruption of teaching, research, administration, conduct proceedings, or other University activities, including its public service functions on or off campus.
- C. Physical abuse or conduct which threatens or endangers the health or safety of any person.
- D. Attempted or actual theft of, damage to, or possession without permission of property of the University or of a member of the University community or of a campus visitor.
- E. Unauthorized possession, duplication, or use of keys to any University facilities or unauthorized entry to or use of University facilities.
- F. Violations of University policies, rules or regulations or of campus regulations including, but not limited to, those governing residence in University-provided housing, or the use of University facilities, or the time, place and manner of public expression.
- G. Manufacture, use, possession, sale, or distribution of alcoholic beverages or any controlled substance without proper prescription or required license or as expressly permitted by law or University regulations.
- H. Disruptive or disorderly conduct or lewd, indecent, or obscene conduct or expression.
- I. Failure to comply with directions of University officials acting in the performance of their duties.
- J. Illegal or unauthorized possession of firearms, explosives, other weapons, or dangerous chemicals.
- K. Actual or attempted theft or other abuse of computer time, including but not limited to:
 - Unauthorized entry into a file to use, read, or change the contents, or for any other purpose;
 - Unauthorized transfer of a file;
 - Unauthorized use of another individual's identification and password;

- Use of computing facilities to interfere with the work of another student, faculty member, or University official;
- Use of computing facilities to interfere with normal operation of the University computing system; and
- Knowingly causing a computer virus to become installed in a computer system or file. Details of the policies, procedures, sanctions, and due process for violations of the University of Missouri Student Conduct Code are found in the University of Missouri-Kansas City General Catalogue and the student handbook.

School of Medicine Honor Codes

I. Preamble

Medicine is a profession characterized by 1) a prolonged specialized training in a body of knowledge and skills; 2) ethical principles; 3) a service orientation; and 4) judgment. The medical profession determines its own standards of education, training, licensure, and practice and has long subscribed to a body of ethical statements developed primarily for the benefit of the patient. As a potential future member of this profession, a medical student must recognize responsibility and an obligation not only to patients, but also to society, other health professionals, and self to behave in a manner compatible with the medical profession's standards of conduct.

One of the goals of a medical school is to educate a medical student during the transition to a professional life. The University of Missouri-Kansas City School of Medicine has an obligation to evaluate students pursuing the M.D. degree as thoroughly as possible for their cognitive abilities, their academic and professional knowledge and skills, their integrity, and their suitability for the practice of medicine. Accordingly, the Standards of Professional Conduct detailed in this document have been developed to guide the pre-professional behavior of medical students of the University of Missouri-Kansas City School of Medicine and to prepare the medical students to meet the ethical standards of the medical profession.

II. Standards of Professional Conduct

b>A. Professional Integrity

1. Honesty

A medical student shall deal honestly with people including, but not limited to, colleagues, instructors, representatives of the University, patients, attending physicians, and other members of the health care team. Medical students are expected to demonstrate honesty and integrity in all aspects of their interaction with patients and staff -- particularly in assuring accuracy and completeness of their part of the medical record. The medical student shall be willing to admit errors and must not mislead others or promote himself/herself at the patient's expense. The medical student shall strive to report, by utilizing the Honor Council Procedures for Violations of the Standards of Professional Conduct, those medical students deficient in character or competence, or who engage in fraud or deception.

The basic principle underlying all research is honesty. Scientists and medical students who participate in research have a responsibility to provide research results of the highest quality; to gather facts meticulously; to keep impeccable records of work done; to interpret results realistically, not forcing them into preconceived molds or models; and to report new knowledge through appropriate channels. Co-authors of research reports must be sufficiently acquainted with the work of their co-workers that they can personally vouch for the integrity of the study and validity of the findings, and must have been active in the research itself.

Examples of academic dishonesty include, but are not limited to, the following:

• Cheating

1. use of any unauthorized assistance in taking quizzes, tests, or examinations;
2. dependence upon the aid of sources beyond those authorized by the instructor in writing papers, preparing reports, solving problems, or carrying out other assignments;
3. acquisition or possession without permission of tests or other academic material belonging to a member of the University faculty or staff;
4. in any way giving assistance to others who are participating in any of the three preceding types of behavior; or,
5. falsifying attendance records or other official documents.

• Plagiarism

1. use by paraphrase or direct quotation of the published or unpublished work of another person without fully and properly crediting the author with footnotes, citations or bibliographical reference;

2. unacknowledged use of materials prepared by another person or agency engaged in the selling of term papers or other academic materials;
3. unacknowledged use of original work/material that has been produced through collaboration with others without release in writing from collaborators.

• **Sabotage**

1. Unauthorized interference with, modification of, or destruction of the work or intellectual property of another member of the University community.

Examples of dishonesty related to clinical practice include, but are not limited to, the following:

• **Falsification of Patient's Medical Record**

Writing progress notes regarding the patient's status, including, but not limited to, clinical observations or results in the patient's chart when the medical student has not seen or evaluated the patient, or using incorrect times of data entry.

• **Falsification of Patient's Medical Information**

Reporting medical information such as physical examination findings, lab values, test results, and any other relevant patient information to other students, residents, attending physicians, the patient, the patient's family, or other relevant medical personnel that has been fabricated by the medical student.

2. Responsibility

A medical student must acquire competences with the appropriate concepts, knowledge, and skills which the faculty determine to be essential. These competences shall be utilized to care for the sick and to promote the health and welfare of society. A medical student shall recognize a responsibility to participate in activities contributing to an improved community.

Medical students in the care of patients must not be harmful, dangerous, or negligent to the mental or physical health of a patient or the public. Negligent means the failure to use that degree of skill and learning ordinarily used under the same or similar circumstances by other medical students.

Medical students must pay tuition and other University fees, such as the Quarterly Profile Exam fee, on time. Medical students must complete required forms of evaluation, degree forms, examination applications, etc. on time.

Students must be familiar with and follow the rules and regulations of the School of Medicine, the University, and related professional organizations.

B. Medical Professional Behavior

1. Nondiscrimination

A medical student shall be dedicated to providing supervised competent medical service with compassion, respect for human dignity, and without discrimination. It is against University regulations to discriminate on the basis of race, color, creed, sex, age, national origin, disability, or Vietnam Era Veterans status. The University has an AIDS policy statement consistent with state law that prohibits discrimination against persons with AIDS or who are HIV positive.

2. Representation

A medical student shall accurately represent himself/herself to others including, but not limited to, colleagues, instructors, representatives of the University, patients, attending physicians, and other members of the health care team. Examples of misrepresentation include, but are not limited to, the following:

1. A medical student shall never use the title of "Doctor" or M.D., as this clearly misrepresents the student's position, knowledge, and authority.
2. Use of fraud, deception, lies, or bribery in securing any certificate of registration or authority, diploma, permit or license issued, or in obtaining permission to take any examinations.
3. Impersonation of any person holding a certificate of registration or authority, permit, license or allowing any person to use his/her certificate of registration or authority, permit, license or diploma from any school.
4. Forgery, alteration, or misuse of a patient's medical records or knowingly furnishing false information to the medical team and/or professional organizations.

3. Confidentiality

A medical student shall respect the rights of patients, colleagues, and other health professionals, and shall safeguard patient confidences within the constraints of the law. The patient's right to confidentiality in regard to his/her medical record, which includes confidentiality of personal and social history, is a fundamental tenet to medical care.

The discussion in public of the problems of an identified patient, without the patient's permission, by professional staff (including medical students) violates patient confidentiality and is unethical. Under no circumstances can any medical record be removed from the institution. Photocopying of the entire record is never permitted for presentations or rounds; students are permitted to extract information, but not copy "wholesale" parts of the chart. Names of patients should be omitted from any documents used for these presentations.

4. Disclosure

While the medical student is a member of the medical team and under faculty supervision, a medical student shall continue to study, apply and advance scientific knowledge, make relevant information available to patients, colleagues, and the public, obtain consultation, and use the talents of other health professionals when indicated.

Sharing of medical information appropriately with a patient and colleagues involved in the care of the patient is a fundamental ethical requirement. The patient must be well informed to make health care decisions and work intelligently in partnership with the medical team. Information that the patient needs for decision making shall be presented in terms the patient can understand. If, for some reason, the patient is unable to comprehend, there shall be disclosure to the patient's authorized representative.

Failure of a medical student to share medical information relevant to a patient with the patient and colleagues involved in the care of the patient is unethical. Providing inaccurate information with these individuals is also unacceptable.

5. Assessment of Personal Competence (Self-Evaluation)

Medical students shall seek consultation and supervision whenever their ability to play their role in the care for a patient is inadequate because of lack of knowledge or experience.

Students are expected to respond to constructive criticism by appropriate modification of behavior.

It is unacceptable for a medical student to attempt procedures or to prescribe therapies without supervision.

6. Professional Demeanor

The medical student is expected to be thoughtful and professional when interacting with patients and their families, attending physicians, supervising residents, and other medical students, and whenever his/her behavior may influence adversely the judgments of others about the professional school or University.

Students shall maintain a neat and clean appearance, and dress in attire that is generally accepted as professional by the patient populations served.

Inappropriate behavior includes, but is not limited to, the use of offensive language, gestures, or remarks. Attempting, directly or indirectly, by way of intimidation, coercion or deception, to obtain or retain a patient or discourage the use of a second opinion or consultation is not appropriate.

7. Informed Consent

Students are to understand the physician's obligation to obtain informed consent from patients, but are not responsible for obtaining it for a physician. Simply, it is the physician's responsibility to ensure that the patient or his/her surrogate be appropriately informed as to the nature of the patient's medical condition, the objectives of proposed treatments, treatment alternatives, and risks involved. The patient's or surrogate's concurrence must be obtained without coercion.

8. Conflict of Interests

If a conflict of interest arises, the moral principle is clear -- the welfare of the patient must be, at all times, paramount. For example, gifts, hospitality, or subsidies offered by manufacturers and distributors of medical and pharmaceutical equipment/goods shall not be accepted if acceptance would influence the objectivity of clinical judgement.

9. Misconduct with Patients

The medical student will not engage in romantic, sexual, or other non-professional behaviors with a patient -- even upon the apparent request of a patient -- while the medical student is involved with the patient's care.

10. Impairment

The medical student will not use alcohol or drugs in ways that impair his/her ability to perform the work of the profession or results in compromised patient care. It is the responsibility of every medical student to strive to protect the public from an impaired colleague and to assist that colleague whose capability is impaired because of alcohol or drug use.

In some instances a medical student's alcohol or drug problem may also be referred to the AIMS Council. However, consideration by the AIMS Council does not remove the medical student's obligation to comply with these Standards of Professional Conduct or the University's Student Conduct Code.

11. Criticism of Colleagues

Professional relations among all members of the medical community shall be marked by civility. Scholarly contributions shall be acknowledged and each person shall recognize and facilitate the contributions of others to this community; slanderous comments and acts are not acceptable. Medical students shall deal with professional, staff, and peer members of the health team in a considerate manner and with a spirit of cooperation.

It is unethical and harmful for a medical student to disparage, without sufficient evidence, the professional competence, knowledge, qualifications, or services of a colleague to anyone. It is also unethical to imply without reliable evidence -- by word, gesture, or deed -- that a patient has been poorly managed or mistreated by a colleague.

12. Teaching

The word "doctor" (for the Latin "docere" -- to teach) implies a responsibility to share knowledge and information with colleagues and patients. It is incumbent upon those entering this profession to teach what they know of the science, art, and ethics of medicine. It includes communicating clearly and teaching patients so that they are properly prepared to participate in their own care and in the maintenance of their health.

III. University of Missouri Student Conduct Code

In addition to the conduct detailed in the preceding sections, a medical student is subject to the University of Missouri Student Conduct Code, as administered by the Office of the Vice Chancellor for Student Affairs, except for provisions dealing with academic dishonesty, Section 200.010 B.1.

Conduct for which students are subject to sanctions falls into the following categories:

- A. Forgery, alteration, or misuse of University documents, records or identification, or knowingly furnishing false information to the University.
- B. Obstruction or disruption of teaching, research, administration, conduct proceedings, or other University activities, including its public service functions on or off campus.
- C. Physical abuse or conduct which threatens or endangers the health or safety of any person.
- D. Attempted or actual theft of, damage to, or possession without permission of property of the University or of a member of the University community or of a campus visitor.
- E. Unauthorized possession, duplication, or use of keys to any University facilities or unauthorized entry to or use of University facilities.
- F. Violation of University policies, rules or regulations or of campus regulations including, but not limited to, those governing residence in University-provided housing, or the use of University facilities, or the time, place and manner of

public expression.

G. Manufacture, use, possession, sale, or distribution of alcoholic beverages or any controlled substance without proper prescription or required license or as expressly permitted by law or University regulations.

H. Disruptive or disorderly conduct or lewd, indecent, or obscene conduct or expression.

I. Failure to comply with directions of University officials acting in the performance of their duties.

J. Illegal or unauthorized possession of firearms, explosives, other weapons, or dangerous chemicals.

K. Actual or attempted theft or other abuse of computer time, including but not limited to: a) unauthorized entry into a file to use, read, or change the contents, or for any other purpose; b) unauthorized transfer of a file; c) unauthorized use of another individual's identification and password; d) use of computing facilities to interfere with the work of another student, faculty member, or University official; e) use of computing facilities to interfere with normal operation of the University computing system; and f) knowingly causing a computer virus to become installed in a computer system or file.

HONOR COUNCIL PROCEDURES FOR VIOLATIONS OF THE STANDARDS OF PROFESSIONAL CONDUCT

University of Missouri-Kansas City School of Medicine

Approved by the University of Missouri Board of Curators: December 1994

Honor Council Procedures for Violations of the Standards of Professional Conduct

University of Missouri-Kansas City School of Medicine

I. Jurisdiction of the Honor Council

The Honor Council shall be concerned with incidents of alleged violations by University of Missouri-Kansas City School of Medicine students of the School's Standards of Professional Conduct, Sections II.A and II.B. Violations of Section III will be referred to the Office of the Vice Chancellor for Student Affairs. The standards identify areas of conduct which are judged unacceptable for individuals either who are in or aspire to the profession of medicine. The Standards of Professional Conduct are published in the Council on Evaluation Policy Manual and Guidelines document of the School of Medicine. It is distributed to all newly accepted students during orientation. When a medical student has been charged with one or more acts of misconduct according to these standards, the Honor Council shall adhere to the following procedures detailed herein. The Honor Council shall have the authority to recommend sanctions upon any student appearing before the Council. The disciplinary proceedings described are not to be construed as judicial trials. Care shall be taken, however, to comply as fully as possible with the spirit and intent of these procedural safeguards.

II. Organization of the Honor Council

1. Composition

The Honor Council voting members shall consist of the Chair representing the Dean's Office, five faculty/staff members (1 Docent, 1 Basic Scientist, 2 Clinical Scientists, and 1 Humanities/Social Sciences representative), and one student member (1 Years III-VI). Four members constitute a quorum. Two nonvoting Honor Council staff, the Council Coordinator and the Administrative Assistant, assist the Chair in investigations and generation of reports and are present at the hearings to take minutes.

2. Eligibility and Appointment

Faculty/staff, and student members shall be appointed to the Honor Council by the Dean of the School of Medicine.

3. Chair

The Chair shall count as one member of the Honor Council and shall be entitled to vote on all matters before the

Council.

4. Time of Appointment and Term of Office

The Chair and faculty/staff members of the Honor Council shall serve for the duration of their appointments by the Dean. The student member of the Honor Council shall serve for one year.

A student is ineligible to continue as a member of the Honor Council if he/she is placed on academic or disciplinary probation, or if for any other reason his/her continued membership on the Council may not be in the best interest of the School of Medicine as determined by the Dean.

III. Procedures for Report of Violation, Investigation, Informal Disposition, and Notice

A. Report of Violation

An alleged violation of the Standards of Professional Conduct should be reported to the Chair or his/her designee of the Honor Council as soon as possible after discovery of the incident.

B. Preliminary Procedures and Investigation

The Chair of the Honor Council or his/her designee shall investigate any reported student misconduct before initiating formal conduct procedures. The reporter will be requested to meet with the Chair or his/her designee to discuss the alleged violation.

The Chair is responsible for notifying, in writing, the accused student of the charge brought against him/her prior to the commencement of the investigation. In addition, the student charged with misconduct shall receive a copy of these Procedures for Violations of the Standards of Professional Conduct along with the written notice. The Chair shall meet with the accused student to give the student the opportunity to present a personal version of the incident or occurrence.

C. Informal Disposition

After conducting an investigation, the Chair or his/her designee shall provide a written report to the Dean, the accused student, and the Honor Council members.

The Chair shall have the authority to dismiss a charge that is determined unfounded or to impose appropriate sanctions and shall fix a reasonable time within which the student shall accept or reject a proposed informal disposition.

A failure of the student either to accept or reject within the time fixed shall be deemed to be an acceptance and, in such event, the proposed disposition shall become final upon expiration of such time.

If the student rejects informal disposition, it must be in writing and shall be forwarded to the Honor Council.

The Chair may refer cases to the Honor Council for formal investigation and hearing without first offering informal disposition.

The Dean or his/her designee may at any time temporarily suspend or deny readmission to a student from the School of Medicine pending formal procedures when the Dean or his/her designee finds and believes from available information that the presence of a student on campus would seriously disrupt the School of Medicine or constitute a danger to the health, safety, or welfare of members of the School of Medicine community. The appropriate procedure to determine the future status of the student will be initiated within seven calendar days.

D. Notice of Hearing

Upon completion of the investigation, when a student rejects informal disposition or the charge justifies a formal hearing, in the judgment of the Honor Council Chair, the Chair will schedule a formal hearing as soon as possible.

The reporter, witnesses, and accused student will be given written notice of the hearing by certified mail or personal delivery. The notice shall set forth the date, time, and place of the alleged violation, the conduct for inquiry, the date,

time, and place of the hearing before the Council, request for attendance of the parties involved, and a reference for the accused student to the Rights of the Accused Student Upon Hearing which are outlined in these Procedures.

Notice by certified mail may be addressed to the last address currently on record with the School of Medicine. Failure by the accused student to have a current correct local address on record with the School of Medicine shall not be construed to invalidate such notice.

The notice shall be given at least seven (7) consecutive calendar days prior to the hearing, unless a shorter time be fixed by the Chair for good cause.

Any request for continuance shall be made in writing to the Chair who shall have the authority at his/her discretion to postpone the hearing if he/she determines the request is timely and made for good cause. The Chair shall notify the Honor Council members, the accused student, the reporter, the witnesses, and any other relevant individuals of the new date for the hearing.

If the accused student fails to appear at the scheduled time, the Honor Council may hear and determine the matter in the student's absence.

IV. Procedure for Honor Council Hearing

Rights of the Honor Council

The Honor Council shall have the right to:

- o hear together cases involving more than one student which arise out of the same act of misconduct, but in that event shall make separate findings and determinations for each student;
- o permit a stipulation of facts by the Honor Council member who performed the investigation and the student involved;
- o permit the incorporation in the record by a reference of any document, affidavit, or other material produced and desired in the record by the School of Medicine or the student charged;
- o question witnesses or challenge other evidence introduced by either the School of Medicine or the student at any time;
- o hear from the Council Chair about dispositions made in similar cases
- o and any dispositions offered to the student appearing before the Council;
- o call additional witnesses or require additional investigation;
- o dismiss any action at any time or permit informal disposition as otherwise provided;
- o permit or require at any time, within a reasonable time as determined by the Council, amendment of the Notice of Hearing to include new or additional matters which may come to the attention of the Council before final determination of the case; provided, however, that in such event the Council shall grant to the student or the School such time as the Council may determine reasonable under the circumstances to answer or explain such additional matters; and,
- o dismiss any person from the hearing who interferes with or obstructs the hearing or fails to abide by the rulings of the Council Chair on any procedural question or request of the Chair for order.

A. Rights of the Accused Student Upon Hearing

A student scheduled to appear before the Honor Council pursuant to formal notice of charges and disciplinary hearing shall have the right to:

- o submit a written response to the charge outlined in the Notice before the scheduled hearing is to commence;
- o request in advance of the scheduled hearing a review of any materials contained in his/her hearing file which will be kept in the Council on Evaluation Office;
- o submit a written request for the identities of witnesses to be called to testify before the Council;
- o be present at the hearing;
- o have an adviser or counselor appear with him/her and to consult with such an adviser or counselor during the hearing; however, the adviser/counselor will not be allowed to question witnesses and/or members of the Council;
- o hear or examine evidence presented to the Honor Council against him/her;
- o question witnesses present who are testifying against him/her at the hearing;
- o present evidence by witness, affidavit, written report, other memoranda, photographs, drawings, and any other relevant evidence of any defense the student desires;
- o make any statement to the Honor Council in mitigation or explanation of the conduct in question;

- o remain silent to avoid self-incrimination;
- o be informed in writing of the findings and any decisions imposed by the Honor Council, Coordinating Committee, and the Dean; and,
- o appeal the decision and/or disposition to the Chancellor, as herein provided.

B. Rights of Witnesses

Witnesses shall be notified of the scheduled time, date, and location of the hearing. Witnesses shall bring with them whatever documentation is requested. Failure of a student witness to appear, without good cause, is a violation of the Standards of Professional Conduct.

C. Record of Hearing

All proceedings of the Honor Council are to be held in the strictest confidence by the members and all other persons involved. The hearings shall be audio taped, and written minutes are also recorded. The notice, exhibits, hearing record, verdict, and disposition of the Honor Council shall become the "Record of the Case". This official document shall be filed under strictest security in the permanent records of the Evaluation Council Office. The record shall be accessible at reasonable times and places to both the University and the student for the purpose of review or appeal.

D. Conduct of the Hearing

The Honor Council Chair shall preside at the hearing, call the hearing to order, call the roll of the Honor Council members in attendance, ascertain the presence or absence of the student charged with misconduct, read the Notice of Hearing and charge and verify the receipt of notice of charge by the student, report any continuances requested or granted, establish the presence of any adviser or counselor of the student, call to the attention of the student charged and the adviser any special or extraordinary procedures to be employed during the hearing, and permit the student to make suggestions of or objections to any procedures for the Honor Council to consider.

All requests to address the Council shall be addressed to the Chair. The Chair will rule on all requests and points of order and may consult with Council's legal adviser prior to any ruling. The Chair's ruling shall be final, and all participants shall abide thereby, unless the Chair shall present the question to the Council at the request of a member of the Council, in which event the ruling of the Council by majority vote shall be final.

Rules of common courtesy and decency shall be observed at all times. An adviser or counselor may be permitted to address the Council at the discretion of the Chair. An adviser or counselor may request clarification of a procedural matter or object on the basis of procedure at any time by addressing the Chair after recognition.

Opening Statements:

1) The Honor Council Chair or his/her designee shall make opening remarks outlining the general nature of the case and testify to any facts the investigation has revealed. 2) The accused student may make an opening statement to the Council about the charge at this time or at the conclusion of the School of Medicine's presentation.

School of Medicine Evidence:

1) School of Medicine witnesses are to be called by the Chair of the Honor Council and identified or written reports of evidence are introduced as appropriate. 2) The Council may question witnesses at any time. 3) The student may question witnesses or examine evidence at the conclusion of the School of Medicine's presentation.

Student Evidence:

1) The student shall have the opportunity to make a statement to the Honor Council about the charge. 2) The student may present evidence through witnesses or written memoranda. 3) The Council may question the student or witnesses at any time.

Rebuttal Evidence:

The Honor Council may permit the School of Medicine or the student to offer a rebuttal of the other's presentation.

If it appears that essential testimony is unavailable, or that for other good cause the hearing should be deferred, the

Council may continue, recess or discontinue the hearing without prejudice.

V. Determination of the Honor Council

Following the hearing, the Council shall promptly deliberate in closed session out of the presence of the student charged. Determination is to be made regarding both the validity of the misconduct charge *and* on the discipline, if any, to be imposed.

A. Violation of the Standards of Professional Conduct

The Honor Council shall determine if the evidence presented in the hearing supports the charge of violation of the Standards of Professional Conduct. The Council shall render a decision, by simple majority vote, of whether a violation has been committed by the accused. Each charge of misconduct, if there are more than one, shall be considered individually and/or collectively at the discretion of the Council.

B. Discipline Imposed

The Honor Council shall determine the discipline to be imposed, if any, based upon its deliberations. One of the following forms of discipline is to be recommended by means of simple majority vote of the Council members. Where there are multiple violations, there can be separate sanctions for each violation. The sanctions include, but are not limited to, the following:

- o **No Disciplinary Action.** Given when the student is not found in violation of the Standards of Professional Conduct.
- o **Warning.** A written reprimand to the student that the student has violated the Standards of Professional Conduct. A copy is to be placed in the student's file.
- o **Probation.** A written reprimand to the student for violation of the Standards of Academic Conduct that includes a designated period of time, the probability of more severe sanctions if the student violates any institutional regulation(s) during the probationary period, and subject to any appropriate terms or conditions, such as loss of privileges, restitution, and discretionary assignments.
- o **Suspension.** An involuntary separation of the student from the School of Medicine for a specified period of time or until a special conditions have been met, with a statement whether suspension should relate back to the date of the offense, begin at the time imposed, or begin at a date specified in the future. At the conclusion of the period of suspension, the suspended student is automatically returned to student status. Conditions for readmission may be specified.
- o **Dismissal.** An involuntary separation from the the School of Medicine for an indefinite period of time. The order of dismissal may specify a date before which the faculty will not consider a petition for readmission from the dismissed student.
- o **Expulsion.** Permanent separation of the student from the School of Medicine.

The above sanctions apply to the status of the accused student in the School of Medicine. Any sanction impacting a student's enrollment status and/or privileges will be forwarded to the Vice Chancellor for Student Affairs or designee for information purposes.

An oral presentation of the Council's findings and recommendations is permitted following the hearing, but a written document including findings of fact, verdict, and recommended disposition shall be completed as soon as possible after the hearing. This Final Report of the Council shall be submitted to the Coordinating Committee, the Dean, and the Office of the Vice Chancellor for Student Affairs.

VI. Decision of the Coordinating Committee

The findings and determination of the Honor Council serve as recommendations to the Coordinating Committee and to the Dean of the School of Medicine. The Coordinating Committee, chaired by the Associate Dean for Academic Affairs and composed of members detailed in The Academic Plan for the School of Medicine, reviews the charge of misconduct, the findings of fact, the decision of the Council, and the recommended discipline to be imposed from the Honor Council.

After deliberation and careful consideration, the Coordinating Committee approves, by simple majority vote, one of the following actions: 1) to sustain the recommendations of the Honor Council; 2) to amend the recommendations of the Honor Council to another type of sanction; 3) to remand the Honor Council's recommendations; or, 4) to reverse the Honor Council's recommendations.

The findings and determinations of the Honor Council and the Coordinating Committee shall be transmitted to the Dean in writing within seven (7) consecutive calendar days following the Coordinating Committee meeting. A copy of this recommendation shall also be transmitted to the accused student by certified mail or personal delivery in the indicated time frame.

VII. Decision of the Dean

Upon receipt of the documents from the Honor Council and the Coordinating Committee, the Dean shall review the entire record that includes the following: 1) formal notice of the charges; 2) minutes of the Honor Council hearing; 3) written findings of the Honor Council and its recommendations to the Coordinating Committee; and 4) written decision of the Coordinating Committee concerning the sanction passed.

The Dean will, within a reasonable amount of time, make a decision to either affirm, amend, or reverse the Coordinating Committee's sentence, or remand the Coordinating Committee for further proceedings.

The Dean shall notify the student in writing by certified mail or personal delivery of his/her final decision. Copies of the letter will be sent to the Honor Council Chair, the Coordinating Committee Chair, and the Evaluation Council Office for placement in the student's file and in the official hearing file.

VIII. Right of Appeal

When a recommendation from the Honor Council and the Coordinating Committee is made for some form of disciplinary action other than "none", and this is upheld by the Dean, or if a recommendation of "no disciplinary action" is revised to one of greater severity by the Dean, the student may appeal such decision to the Chancellor or his/her designated representative by filing written notice of appeal with the Chancellor within ten (10) consecutive calendar days after notification of the decision of the Dean. A copy of the Notice of Appeal will also be given by the student to the Dean of the School of Medicine at the time of filing. The student may file a written memorandum for consideration by the Chancellor with the Notice of Appeal.

The Chancellor or his/her designated representative shall review the full record of the case and the appeal documents and may affirm, reverse, or remand the case for further proceedings and shall notify the Dean and the student in writing of the decision on the appeal. The action of the Chancellor shall be final unless it be to remand the matter for further proceedings.

Status during Appeal: In cases of suspension, dismissal or expulsion where a Notice of Appeal is filed within the required time, a student may petition the Chancellor in writing for permission to attend classes pending final determination of appeal. The Chancellor may permit a student to continue in school under such conditions as may be designated pending completion of appellate procedures, provided such continuance will not disrupt the University or constitute a danger to the health, safety or welfare of the University community. In such event, however, any final disciplinary action imposed shall be effective from the date of the action of the Dean.

IX. Status of the Standards of Professional Conduct

Amendments to the Standards of Professional Conduct and/or Honor Council Procedures for Violations may be proposed by petition of any twenty-five members of the student body, the Honor Council on its own motion, or the faculty.

A proposed amendment in the Standards of Professional Conduct and/or Honor Council Procedures for Violations must be approved by the Honor Council, the Coordinating Committee, the Dean, the Chancellor, and the Board of Curators.

The Standards of Professional Conduct and/or Honor Council Procedures for Violations may be terminated at any time by action under the general amending procedure.

All students in the School of Medicine are subject to the jurisdiction of the Standards of Professional Conduct and Honor Council Procedures for Violations upon enrollment.

To insure their knowledge of the Standards of Professional Conduct and Honor Council Procedures for Violations, the presentation of these documents shall be an integral part of the orientation of newly accepted students to the School of Medicine.

School of Dentistry Honor Codes

Standards of Professional Conduct

(Approved by the Faculty of the School of Dentistry: 9/12/2002, Curator approval 4/2004)

Definition: In this document, "student" shall refer to any person having once been admitted to the School of Dentistry who has not completed a course of study and who intends to or does continue a course of study in or through the School of Dentistry. For the purpose of these rules, student status continues whether or not the University's academic programs are in session.

Students at the University of Missouri at Kansas City School of Dentistry are seeking special knowledge, skills, and privileges. The confirmation of a professional degree, inferring the acquisition of knowledge and privileges, places the graduate of this institution in a unique position of assuming direct responsibility for health issues of those persons and institutions who place their trust in the University and the dental and dental hygiene professions. It is a demonstration of, and commitment to, special knowledge, protection of privileges, and assumption of responsibility and trust that, by definition, delineates a professional. Therefore, those who would aspire to receive the confirmation of a professional degree are expected to provide satisfactory evidence that exceeds knowledge and technical competence. Evidence that the well-being of patients, trust of society and respect of colleagues is a primary goal must be demonstrated. Accordingly, students must subscribe to principles of ethics and a code of professional conduct that gives testimony to their commitment and ability to deserve the privileges and trust with which society and their patients will honor them. This document serves as a guide for students.

The Standards of Professional Conduct are drawn from the Principles of Ethics and Code of Professional Conduct of the American Dental Association, and the American Dental Hygienists' Association Code of Ethics. The former recognizes that students are under the supervision of graduate dentists and dental hygienists and other faculty during interactions with patients. Students should aspire to meet the high ideals of their professions which may exceed their legal duties, but must meet the minimum standards expressed in the School of Dentistry's Code of Professional Conduct.

A. Dental and dental hygiene students must achieve and consistently demonstrate acceptable levels of personal hygiene and dress.

B. Dental and dental hygiene students must achieve and consistently demonstrate concern for patients, peers, and others. Dental and dental hygiene health care providers have a duty to ensure:

1. Patients are treated according to their desires and must be included in treatment decisions.
2. Patient confidentiality in the entire range of the provider-patient relationship which includes dental records.
3. That no harm or potential harm is done to the patient either through intent, ignorance, lack of preparation for the patient encounter, lack of skill, personal impairment of any kind.
4. That no patient is "abandoned" which is defined as discontinuance of care without just cause and without giving the patient adequate notice and the opportunity to obtain the services of another provider.
5. That the patient's welfare (i.e. the provision of competent and timely delivery of dental care within the bounds of clinical circumstances as presented by the patient such as needs, desires and values) is paramount and takes precedence above all else. This also includes the obligation to a) identify and report perioral signs of abuse and neglect and to consult with faculty to report suspected cases to proper authorities as required by law; and, b) report instances of faulty treatment whether intentional or not, to the appropriate faculty member.
6. That all people including patients, staff, faculty and all other individuals are treated fairly, respectfully, and without prejudice.
7. All standards and requirements of patient care established by the School of Dentistry are followed.

C. Dental and dental hygiene students' behavior must exemplify the highest moral and ethical standards. The following represents conduct that is incompatible with these standards:

1. Any behavior that tends to gain an unfair advantage for any student in an academic matter. This includes, but is not necessarily limited to, the following guidelines:

- a. No student shall, during an examination have, use or solicit any unauthorized information or material (written or oral), copy from another student's paper or discuss the examination with any other person.
- b. No student shall during an examination knowingly give any unauthorized aid to another student.
- c. No student shall acquire by any means knowledge of the contents of an examination yet to be given.
- d. No student shall fraudulently claim for credit any classroom, clinical, laboratory, or other procedure or assignment performed by an unauthorized person, including a fellow student.

Anyone who has reasonable cause to believe that a student has acted unethically is obligated to bring the matter to the attention of the Assistant Dean for Student Programs or his/her designee who will follow the process identified in the Preliminary Procedures section of the UMKC School of Dentistry Honor Council Due Process Procedures for Violations of the Standards of Professional Conduct, to determine whether there has been a violation and whether charges should be brought.

School of Nursing Honor Codes

Honor Code Procedures for Violations of the Standards of Professional and Ethical Behavior University of Missouri-Kansas City School of Nursing

I. Jurisdiction of the School of Nursing

The School of Nursing (SON) shall have jurisdiction over incidents of alleged violations of the University of Missouri-Kansas City School of Nursing's Standards of Professional and Ethical Behavior, Sections IIA and IIB by students accepted into degree programs in the School of Nursing while at the School of Nursing or enrolled in any nursing course or on clinical rotations at affiliated institutions. Alleged violations of the University of Missouri Student Conduct Code as described in Section III will be referred to the Office of the Vice Chancellor for Student Affairs. The Standards of Professional and Ethical Behavior identify areas of conduct which are judged unacceptable for individuals who are either in or aspire to be in the profession of nursing. The Standards of Professional and Ethical Behavior and these Procedures will be distributed to all newly enrolled students during orientation. When a nursing student has been charged with one or more acts of misconduct according to these standards, the Honor Council shall adhere to the following procedures detailed herein.

The Honor Council shall have the authority to recommend sanctions upon any accused appearing before the Council. The disciplinary proceedings described are not to be construed as judicial trials. Care shall be taken, however, to comply as fully as possible with the spirit and intent of these procedural safeguards.

II. Sanctions

The following sanctions may be imposed upon any nursing student found to have violated Sections IIA and IIB of the University of Missouri – Kansas City School of Nursing Standards of Professional and Ethical Behavior:

Warning – A notice in writing that the student is violating or has violated the Standards of Professional and Ethical Behavior.

Probation – A written reprimand for violation of specific provisions of the Standards of Professional and Ethical Behavior that includes a designated period of time and the probability of more severe sanctions if the student violates any institutional regulations(s) during the probationary period.

Loss of Privileges - Denial of specified privileges in the School of Nursing for a designated period of time. Discretionary Sanctions. Work assignments in the School of Nursing, service to the School of Nursing, or other related discretionary assignments in the School of Nursing.

Suspension from the School of Nursing – An involuntary separation from the School of Nursing for a specified period of time after which the student is eligible to return. Conditions for readmission may be specified.

Dismissal from the School of Nursing – An involuntary separation from the School of Nursing for an indefinite period of time. It does not imply or state a minimum separation time.

Expulsion from the School of Nursing – Permanent separation from the School of Nursing.

III. Organization of the Honor Council

A. Composition

The Honor Council members shall consist of the Chair; three voting faculty members, one representing each program, BSN, MSN, PhD (3 votes); five student members, 4 from the BSN program and one from the MSN or PhD program. Five members or their alternates (2 faculty, excluding the chair, and three students) constitute a quorum. An assigned staff member will assist the Chair in generation of reports and will be present at the hearings to take minutes.

B. Eligibility and Appointment

Faculty members Voting members of the faculty who have no more than a 50% administrative appointment are eligible to serve as chair or members of the honor council. Voting members of the School of Nursing Faculty Forum shall elect the chair of the Honor Council and the undergraduate and graduate faculty representatives. Alternates for each position will also be elected.

Student members In order to be eligible for election to the Honor council, students must be in good standing within the School. A student who is placed on academic or disciplinary probation is ineligible for service on the Honor council. In addition, a student may be determined ineligible for service if his or her membership on the Council is assessed by the Chair not to be in the best interest of the School.

Each BSN class shall elect their student representative and their alternates. The graduate representative and alternate shall be elected from among students in all SON graduate programs.

C. Time of appointment and Term of Office

All members shall serve a one-year appointment, with the exception of the chair who will serve 2 years. Members may be serve more than one term if they are re-elected in subsequent years. Members will serve until they resign or a new member is voted into their position.

Election of student members shall be held on an annual basis at the beginning of the academic year, no later than September 15.

Election of faculty will occur at the last spring faculty forum meeting of the year for the next academic year during regular School committee elections. Faculty vacancies are filled by special election.

After fall elections, a preliminary meeting of all members (including the chair) will be held within two weeks in order to discuss the role and function of the Honor Council.

D. Hearing Panel of the Honor Council

All faculty representatives including alternate and the three most senior students not in the accused student's class will serve as a hearing panel for the honor code violation. A chair of the Hearing Panel will be elected by simple majority vote of the members of the panel.

Voting by the hearing panel will take place by secret ballot.

The chair of the hearing panel will not vote except in case of a tie among the rest of the hearing panel in which case, the chair shall vote to break the tie.

Proxy votes will not be allowed.

E. Primary Administrative Liaison (PAL)

A primary administrative liaison (PAL) will be appointed by the Dean for a minimum of a two year term. The PAL is not eligible to serve as a member of the Honor Council while serving as the PAL. The PAL and the Chair, when possible, should be serve overlapping terms. The PAL will draft the charge and represent the School of Nursing in all cases.

IV. Procedures for Report of Violation, Investigation, Informal Disposition, and Notice

A. Report of Violation

An alleged violation of the Standards of Professional and Ethical Behavior should be reported to the PAL of the Honor Council or designee as soon as possible after discovery of the incident. The PAL shall inform the chair and Honor Council of the alleged violation within one week if a hearing will be required. The Chair shall notify the Dean of all accusations. If the

PAL determines that no violation occurred then the Dean and the Honor Council will be informed via an annual report submitted at the end of each academic year.

B. Preliminary Procedures and Meeting

The PAL shall determine whether the allegations fall within Sections IIA or IIB, or Section III of the Standards of Professional and Ethical Behavior, and shall refer any allegations of violations of Section II to the UMKC Office of Student Affairs. The PAL shall investigate any reported violation of Sections IIA or IIB before initiating formal conduct procedures.

The PAL will notify the accused, in writing by certified mail, of the allegations brought against him/her prior to the commencement of the preliminary meeting between the PAL and the student. In addition, the student shall receive a copy of these Procedures for Violations of the Standards of Professional and Ethical Behavior along with the written notice. The PAL shall meet with the accused student to give the student the opportunity to present a personal version of the incident or occurrence.

Following the investigation the PAL shall determine the appropriate preliminary outcome: no formal charge of misconduct, informal disposition, or formal disposition involving an honor council meeting. The PAL will notify the Chair and the Dean of the outcome as required in section IV A.

C. Informal Disposition

The PAL shall have the authority to propose appropriate sanctions to the accused student and within a week the student shall accept or reject a proposed informal disposition.

A failure of the student either to accept or reject the informal disposition within the 10 working days shall be deemed to be an acceptance and, in such event, the proposed disposition shall become final upon expiration of such time.

If the student rejects informal disposition, it must be in writing and the matter shall then be forwarded to the Honor Council for a formal hearing.

D. General Statement of Procedures

A student charged with a breach of the Standards of Professional and Ethical Behavior is entitled to a written notice of the charge against him or her and a formal hearing unless the matter is disposed of under the rules for informal disposition. Honor Code Procedures are not to be construed as judicial trials and need not wait for legal action before proceeding; however, care shall be taken to comply as fully as possible with the spirit and intent of the procedural safeguards set forth herein. The University of Missouri Office of the General Counsel shall be legal adviser to the Committee and to the PAL.

E. Notice

The PAL shall initiate formal proceedings by arranging with the chair to call a meeting of the Honor Council and by giving written notice to the accused student by email and by certified mail to the student's last address currently on record with the Office of the Registrar. Failure of the student to have a current correct local address on record shall not be construed to invalidate such notice. The notice shall set forth the date, time and place of the alleged violation and the date, time and place of the hearing before the Honor Council.

F. Conflicts of Interest

Any member of the Honor Council may recuse him or herself if he or she believes he or she has a conflict of interest. The PAL or the accused student may raise the question of a member's Conflict of Interest at the initial meeting of the Honor Council to hear the charge against the student, and the Chair will determine whether the member should be recused. The member will be replaced by his or her alternate. If both the member and the alternate are recused, the appropriate electing body will chose a second alternate for this case only. [See Section IIB for election procedures.].

G. Temporary Suspension

The Dean or his/her designee may at any time temporarily suspend or deny readmission to a student from the School of Nursing pending formal procedures when the Dean or his/her designee finds and believes from available information that the student would seriously disrupt the School of Nursing or constitute a danger to the health, safety or welfare of members of the School of Nursing Community. The appropriate procedure to determine the future status of the student

will be initiated within seven calendar days.

V. Procedure for Honor Council Hearing

A. Rights of the Honor Council

- Hear together cases involving more than one accused student which arise out of the same transaction or occurrence, but in that event shall make separate findings and determinations for each accused;
- Permit a stipulation of facts by the involved accused and the PAL;
- Permit the incorporation in the record by a reference of any documentation produced and desired in the record by the PAL or the accused student;
- Question witnesses or challenge other evidence introduced by either the PAL or the accused student at any time;
- Hear from the PAL about dispositions made in similar cases and any dispositions offered to the student appearing before the Committee;
- Call additional witnesses or require additional investigation; · Dismiss any action at any time;
- Permit or require at any time amendment of the Notice of Hearing to include new or additional matters which may come to the attention of the Council before final determination of the case; provided, however, that in such event the Council shall grant to the accused or the PAL such time as the Council may determine reasonable under the circumstances to answer or explain such additional matters; and,
- Dismiss any person from the hearing who interferes with or obstructs the hearing or fails to abide by the rulings of the Council Chair.

B. Rights of the Accused Student Upon Hearing – An accused student appearing before the Honor Council shall have the right to:

Submit, if he or she should choose to do so, a written response to the charge outlined in the Notice before the scheduled hearing is to commence;

- Review and obtain copies, in advance, of any materials that will be presented by the PAL at the hearing;
- Submit a written request for a list of witnesses to be called by the PAL at the hearing;
- Be present at the hearing;
- Have an advisor or counselor appear with the accused and to consult with such an adviser or counselor before and/or during the hearing; however, the adviser/counselor will not be allowed to question witnesses and/or address members of the Council. The accused student must notify the chair at least 48 hours in advance with the name and relationship of the advisor and the name of any witness that will attend the hearing;
- Hear or examine evidence presented to the Honor Council; · Question the PAL and any witnesses who testify at the hearing;
- Present evidence by witness, affidavit, or documents in any media; · Make any statement to the Honor Council in mitigation or explanation of the conduct in question;
- Be informed in writing of the findings and any decisions imposed by the Honor Council;
- Appeal the decision and/or disposition to the Dean and to the Chancellor, as herein provided.

C. Conduct of the Hearing

All proceedings of the Honor Council are to be held in confidence by the members. The hearings shall be taped or stenographically recorded. The notice, exhibits, hearing record, verdict, and findings and determination of the Honor Council shall become the record of the Case and shall be filed in the Dean's office at the School of Nursing. The record shall be accessible at the reasonable times and places to both the PAL and the accused student for the purpose of review or appeal.

The Honor Council Chair shall preside at the hearing, call the hearing to order, call the roll of the Honor Council members in attendance, ascertain the presence or absence of the accused student, read the Notice of Hearing and Charge and verify the receipt of Notice of Charge by the accused, report any continuances requested or granted, establish the presence of any adviser or counselor of the accused student, call to the attention of the accused student and the adviser any special or extraordinary procedures to be employed during the hearing, and permit suggestions for or objections to any procedures for the Honor Council to consider. NOTE: Advisors will not be allowed to question the PAL, witnesses, and/or address members of the Council.

All requests to address the Council shall be addressed to the Chair. The Chair will rule on all requests and points of order and may consult with Council's legal advisor prior to any ruling. The Chair's ruling shall be final, and all participants shall abide thereby, unless the Chair shall present the question to the Council at the request of a member of the Council, in which event, the ruling of the Council by majority vote shall be final.

Rules of common courtesy and decency shall be observed at all times.

1. Opening Statements:

- The PAL may make an opening statement outlining the general nature of the case.
- The accused student may make an opening statement to the Council about the charge at this time or at the conclusion of the School of Nursing's presentation.

2. School of Nursing's Evidence:

- Witnesses of the School of Nursing are to be called, identified and questioned by the PAL, and any written reports or evidence introduced by the PAL as appropriate.
- The Council may question witnesses at any time.
- The accused student may question witnesses or examine evidence at the conclusion of the PAL's presentation.

3. Accused Student's Evidence:

- If the accused student has not elected to make an opening statement previously, he or she shall have the opportunity to make a statement to the Honor Council about the charge at this time.
- The accused student may present evidence through questioning witnesses or by written memoranda or other documents.
- The Council may question the accused student or witnesses at any time.
- The PAL may question witness or examine evidence at the conclusion of the accused student's presentation.

4. Rebuttal Evidence:

The Honor Council may permit the PAL or the accused to offer a rebuttal to the other's presentation.

VI. Determination of the Honor Council

Following the hearing, the Council shall promptly deliberate in closed session out of the presence of the accused, the witnesses, and the PAL. The Honor Council shall determine by a simple majority vote based on the evidence presented in the hearing whether they believe the student violated the Standards of Professional and Ethical Behavior as charged, and if so what sanction, if any, is appropriate. Separate findings shall be made as to the conduct of the student and as to the sanction, if any, to be imposed. The Council shall promptly submit its findings and determination in writing to the accused student and to the PAL.

The findings and determination of the Honor Council shall serve as a decision for the School of Nursing.

VII. Appeal to the Dean

If the student so desires, he or she may appeal the decision of the Council to the Dean within 10 business days of the Honor Council decision. A copy of the Notice of Appeal shall be given by the student to the PAL. The student may file a

written memorandum for consideration by the Dean with the Notice of Appeal, and the Dean may request a reply from the PAL. The Dean shall review the record of the case and the appeal documents, and may affirm, reverse, or remand the case for further proceedings before the Honor Council.

The Dean shall notify the accused of his or her decision in writing, by certified mail. Copies of the letter will be sent to the Honor Council Chair, the PAL, and will be included with the official hearing file.

VIII. Appeal to the Chancellor

The accused student may appeal from the Dean's decision to the Chancellor or designated representative by filing written notice of appeal with the Chancellor within ten (10) business days after notification of the decision of the Dean. A copy of the Notice of Appeal will also be given by the accused to the Dean of the School of Nursing and to the PAL at the time of filing. The accused student may file a written memorandum for consideration by the Chancellor with the Notice of Appeal.

The Chancellor or designated representative shall review the record of the case and the appeal documents and may affirm, reverse, or remand the case for further proceedings and shall notify the Dean and the accused student in writing of the decision on the appeal. The action of the Chancellor shall be final unless it be to remand the matter for further proceedings.

IX. Status during the Appeal

In cases of suspension, dismissal or expulsion where a Notice of Appeal is filed within the required time, the accused student may petition the Chancellor in writing for permission to attend classes pending final determination of appeal. The Chancellor may permit the accused student to continue in school under such conditions as may be designated pending completion of appellate procedures, provided such continuance will not disrupt the University or constitute a danger to the health, safety or welfare of the University Community. In such event, however, any final disciplinary action imposed shall be effective from the date of the action of the Honor Council.

X. Status of the Standards of Professional and Ethical Behavior

Amendments to the Standards of Professional and Ethical Behavior and/or Honor Council Procedures for Violations may be proposed by petition of any twenty-five members of the student body, or the Honor Council on its own motion, or the faculty.

A proposed amendment in the Standards of Professional and Ethical Behavior and/or Honor Council Procedures for Violations must be approved by a 2/3 majority vote of the Honor Council members present (all members have the right to vote on amendments = 9 votes), by a 2/3 majority vote of the faculty present, by the Chancellor, and by the Board of Curators.

The Standards of Professional and Ethical Behavior and/or Honor Council Procedures for Violations may be terminated at any time by action under the general amending procedure.

STANDARDS OF PROFESSIONAL AND ETHICAL BEHAVIOR University of Missouri – Kansas City School of Nursing

I. Preamble

One of the goals of a school of nursing is to educate student nurses during the transition to a professional life. The University of Missouri – Kansas City School of Nursing (UMKC-SON) has an obligation to society [1] to evaluate students pursuing the B.S.N., M.S.N., and Ph.D. degrees, as thoroughly as possible. This responsibility includes their cognitive abilities, their academic and professional knowledge and skills, their integrity, and their suitability to practice nursing in their desired professional role. Accordingly, the Standards of Professional and Ethical Behavior detailed in this document have been developed to guide students who are enrolled at all levels with the UMKC-SON, including undergraduate and graduate students, and are designed to assure accountability for the professional and ethical standards of the nursing profession.

II. Integrity

A. Personal and Professional Integrity

1. Honesty

A student nurse shall deal honestly with people including, but not limited to, colleagues, instructors, representatives of the University, patients, attending physicians, nursing staff, any representative of our clinical agencies, and other members of the health care team. Student nurses are expected to demonstrate honesty and integrity in all aspects of their interaction with patients and staff – particularly in assuring accuracy and completeness in their actions and documentation. The student nurse shall be willing to admit errors and must not mislead others or promote himself or herself at the patient's expense. The student nurse shall strive to report, by utilizing the Honor Council Procedures for Violations of the Standards of Professional and Ethical Behavior, those student nurses deficient in character or competence, or who engage in fraud, deception, and/or dishonesty.

A basic principal underlying all research is honesty. Scientists and student nurses who participate in research have a responsibility to provide research results of the highest quality; to gather facts meticulously, to keep impeccable records of work done; to interpret results realistically, not forcing them into preconceived molds or models; and to report new knowledge through appropriate channels. Co-authors of research reports must be sufficiently acquainted with the work of their co-workers that they can personally vouch for the integrity of the study and validity of the findings, and must have been active in the research itself.

Examples of academic dishonesty include, but are not limited to, the following:

a. Cheating

- Use of any unauthorized assistance in taking quizzes, tests, or examinations;
- Dependence upon the aid of unauthorized sources in writing papers, preparing reports, solving problems, or carrying out assignments;
- Acquisition or possession without permission of tests or other academic material belonging to a member of the University faculty or staff;
- Use of assignments or papers prepared in one class for another class without disclosing such information to the faculty
- In any way giving assistance to others who are participating in any of the three preceding types of behavior; or
- Falsifying attendance records or other official documents.

b. Plagiarism

- Use by paraphrase or direct quotation of the published or unpublished work of another person without fully and properly crediting the author with footnotes, citations or bibliographical reference;
- Unacknowledged use of materials prepared by another person or agency engaged in the selling of term papers or other academic materials; or
- Unacknowledged use of original work/material that has been produced through collaboration with others without release in writing from collaborators.

c. Sabotage

- Unauthorized interference with, modification of, or destruction of the work or intellectual property of another member of the University.

d. Falsification of Patient's Medical Record or Information

Examples of dishonesty related to clinical practice include, but are not limited to, the following:

- Writing progress notes or other documentation regarding the patient's status, including, but not limited to, clinical observations, medication administration or results in the patient's chart when the student nurse has not seen

or evaluated the patient, or using incorrect times of data entry.

Reporting medical information such as physical examination findings, lab values, test results, medications, or any other relevant patient information to other students, nurses, nursing supervisors, residents, attending physicians, the patient, the patient's family or other relevant health care personnel that has been fabricated by the student nurse.

2. Responsibility

A student nurse must acquire competencies with the appropriate concepts, knowledge and skills that the faculty determine essential. These competencies shall be utilized to care for the sick and to promote the health and welfare of society [2]. A student nurse shall recognize a responsibility to participate in activities contributing to an improved community.

Student nurses in the care of patients must not be harmful, dangerous, or negligent to the mental or physical health of a patient or the public. Negligent means failure to exercise that degree of skill and learning ordinarily used under the same or similar circumstances by other student nurses.

Students must be familiar with and follow the rules and regulations of the School of Nursing, the University, and professional organizations which they are required to follow as nursing students. Copies of such rules and regulations are attached herewith.

B. Professional Nursing Behavior

1. Nondiscrimination

A nursing student shall provide care to patients without discriminating based on race, color, creed, sex, age, national origin, disability or Vietnam Era Veterans status.

It is against the University regulations to discriminate on the basis of race, color, creed, sex, age, national origin, disability, or Vietnam Era Veterans status. The University has an AIDS policy statement consistent with state law that prohibits discrimination against persons with AIDS or who are HIV positive.

2. Confidentiality

A student nurse shall respect the rights of patients, colleagues, affiliated institutions, and other health professionals, and shall safeguard patient confidences within the constraints of law. The patient's right to confidentiality in regard to his or her medical record, which includes confidentiality of personal and social history, is a fundamental tenet to health care.

The discussion in public of the problems of an identified patient, without the patient's permission, by professional staff (including other students) violates patient confidentiality and is unethical. Under no circumstances can any medical record be removed from any institution. Photocopying of the entire record is never permitted for presentations, rounds, or conferences; if permitted by the health care institution or provider students are permitted to extract information, but not copy 'wholesale' parts of the chart. Names of the patients should be omitted from any documents used for these presentations.

3. Disclosure

While the student nurse is a member of the patient care team and under direct or indirect faculty supervision, a student nurse shall continue to study, apply and advance scientific knowledge, make relevant information available to patients, colleagues, and the public, obtain consultation and use the talents of other health professionals when indicated.

Sharing of medical information appropriately with a patient and colleagues involved in the care of the patient is a fundamental ethical requirement. The patient must be well informed to make health care decisions and work intelligently in partnership with the patient care team. Information that the patient needs for decision-making shall be presented in terms that patient can understand. If, for some reason, the patient is unable to comprehend, there shall be disclosure to the patient's authorized representative.

Failure of a student nurse to share medical information relevant to a patient with a patient and colleagues involved in the care of the patient is unethical. Providing inaccurate information with these individuals is also unacceptable.

4. Misconduct with Patients

The student nurse will not engage in nonprofessional behaviors with a patient – even upon the apparent request of a patient – while the student nurse is involved with the patient’s care.

5. Representation

A student nurse shall accurately represent himself or herself to others including, but not limited to, colleagues, instructors, representatives of the University and their affiliates, partner institutions, patients, nurses, and other members of the health care team.

Examples of misrepresentation include, but are not limited to the following:

- Misrepresentation of the student’s position, knowledge, and authority, including use of the title “nurse” by an undergraduate student nurse, or by use of the titles advanced practice nurse (APRN), nurse practitioner (NP), clinical nurse specialist (CNS), nurse midwife (NM), or nurse anesthetist (CRNA) by a graduate student.
- Use of fraud, deception, lies, or bribery in securing any certificate or registration or authority, diploma, permit or license issued, or in obtaining permission to take any examinations.
- Impersonation of any person holding a certificate of registration or authority, permit, license or allowing any person to use his/her certificate of registration or authority, permit license, or diploma from any school.
- Forgery, alteration, or misuse of a patient’s medical records or knowingly furnishing false information to the other members of the health care profession and/or professional organizations.

6. Assessment of Personal Competence (Self-Evaluation)

Student nurses shall seek consultation and supervision whenever their ability to play their role in the care for a patient is inadequate because of lack of knowledge or experience.

Students are expected to respond to constructive criticism by appropriate modification of behavior.

7. Professional Demeanor

The student nurse is a representative of UMKC, and should realize that their behavior may positively and negatively affect the judgments of others about UMKC-SON.

UMKC-SON students are expected to be thoughtful and professional when interacting with faculty, patients and their families, nurses, attending physicians, nursing preceptors, affiliated institutional staff, other students, and other members of the health care team.

Students shall maintain a neat and clean appearance, and dress in attire that is generally accepted as professional by the patient populations served.

Inappropriate behavior includes, but is not limited to, the use of offensive language, gestures, or remarks. Attempting, directly or indirectly, by way of intimidation, coercion or deception, to obtain or retain a patient or discourage the use of a second opinion or consultation is not appropriate.

8. Impairment

The student nurse will not use alcohol or drugs in ways that impair his/her ability to perform the work of the profession or results in compromised patient care. It is the responsibility of every student nurse to strive to protect the public from an impaired colleague and to assist that colleague whose capability is impaired because of alcohol or drug use.

9. Conflict of Interest

If a conflict of interest arises, the moral principle is clear – the welfare of the patient must be, at all times, paramount. For example, gifts, hospitality, or subsidies offered by manufacturers and distributors of medical and or other equipment/goods shall not be accepted if acceptance would influence the objectivity of clinical judgment.

10. Criticism of Colleagues

Professional relations among all members of the medical community shall be marked by civility. Scholarly contributions shall be acknowledged and each person shall recognize and facilitate the contributions of others to this community; slanderous comments and acts are not acceptable. Student nurses shall deal with professional, staff, and peer members of the health team in a considerate manner and with a spirit of cooperation.

It is unethical and harmful for a student nurse to disparage, without sufficient evidence, the professional competence, knowledge, qualifications, or services of a colleague to anyone. It is also unethical to imply without reliable evidence – by word, gesture, or deed – that a patient has been poorly managed or mistreated by a colleague.

11. Teaching

It is incumbent upon those entering this profession to teach what they know of the science, art, and ethics of nursing care. It includes communicating clearly and teaching patients so that they are properly prepared to participate in their own care and in the maintenance of their health.

III. The University of Missouri Student Conduct Code

In addition to the conduct detailed in the preceding sections, a student nurse is subject to the University of Missouri Student Conduct Code, as administered by the Office of the Vice Chancellor for Student Affairs, except for provisions dealing with academic dishonesty, Section 200.01 O B. 1.

Conduct for which students are subject to sanctions falls into the following categories:

- A. Forgery, alteration, or misuse of University documents, records or identification, or knowingly furnishing false information to the University.
- B. Obstruction or disruption of teaching, research, administration, conduct proceedings, or other University activities, including its public service functions on or off campus.
- C. Physical abuse or conduct which threatens or endangers the health or safety of any person.
- D. Attempted or actual theft of, damage to, or possession without permission of property of the University or of a member of the University community or of a campus visitor.
- E. Unauthorized possession, duplication, or use of keys to any University facilities or unauthorized entry to or use of University facilities.
- F. Violations of University policies, rules or regulations or of campus regulations including, but not limited to, those governing residence in University-provided housing, or the use of University facilities, or the time, place and manner of public expression.
- G. Manufacture, use, possession, sale or distribution of alcoholic beverages or any controlled substance with out proper prescription or required license or as expressly permitted by law or University regulations.
- H. Disruptive or disorderly conduct or lewd, indecent, or obscene conduct or expression.
- I. Failure to comply with direction of University officials acting in the performance of their duties.
- J. Illegal or unauthorized possession of firearms, explosives, other weapons, or dangerous chemicals.
- K. Actual or attempted theft or other abuse of computer time, including but not limited to:

- Unauthorized entry into a file to use, read, or change the contents, or for any other purpose;
- Unauthorized transfer of a file;
- Unauthorized use of another individual's identification and password;
- Use of computing facilities to interfere with the work of another student, faculty member, or University official;
- Knowingly causing a computer virus to become installed in a computer system or file.

Details of the policies, procedures, sanctions, and due process for violations of the University of Missouri Student Conduct Code are found in the University of Missouri – Kansas City General Catalogue and the student handbook.

School of Law Honor Codes

I. Preamble

We, the students at the University of Missouri - Kansas City School of Law, recognizing that the recorded evaluation of our academic pursuits must reflect the products of intelligence guided by integrity, do hereby establish this Honor Code so that all who may inquire can be assured that our individual accomplishments were honestly achieved; and so all who achieve may welcome inquiry. Wherefore we pledge ourselves, each and all, to careers founded in integrity and to the enforcement of the standards herein defined. Each student shall have the affirmative duty of assisting in the implementation of this Code.

II. Definitions

1 Academic Matter:

All examinations, writing assignments, and programs or activities (such as Moot Court, Law Review or Urban Lawyer) which in any manner affect or result in a Law School grade or satisfaction of a requirement for graduation.

2 Accused:

Student who is the subject of a hearing on an Honor Code violation.

3 Class:

Group of students, based on year in Law School and academic progress. For the purposes of this code, those who are in their post third-year or are working on advanced degrees, shall be deemed third-year students.

4 Gender:

Any use of grammatical gender reference shall be interpreted as applying equally to males and females.

5 Matter Relating to Academic Credentials:

Any representation made to any person concerning academic achievements or performance in Law School sponsored programs affecting a requirement for graduation.

6 SBA President:

President of the Student Bar Association.

7 Student:

A student (as defined in 200.020.B.8. of the University's Collected Rules and Regulations) at the University of Missouri-Kansas City School of Law.

8 Unauthorized Sources:

All written material and persons except as otherwise authorized by the instructor.

III. Violations

1 Jurisdiction:

Any conduct by a student that tends to gain or give an unfair advantage for any student in any academic matter or in any matter relating to academic credentials is considered unethical and a violation of the Code. It shall not be necessary for the Prosecutor to prove that any advantage was, in fact, achieved. Any conduct by a student impeding the fair operation of this Code is also a violation of this Code

2 Specific Violations:

Prohibitions of the Code include, but are not limited to, the following:

- During an examination, no student shall have, consult, give to another, receive from another, or solicit from another any information or material unless specifically authorized by the instructor.
- No student shall knowingly convey, directly or indirectly, to another student any information about the contents of an examination that the other student has yet to take.
- No student, with the intent to improve his or her grade, shall convey to an instructor any information that tends to identify his or her authorship of an examination yet to be graded.
- No student shall work on his or her examination other than during the time prescribed, nor in a room other than one designated for the taking of the examination.
- For any assignment that counts toward a grade or is required for graduation, no student shall consult unauthorized sources of information.
- No student shall remove or withhold library material from the library, or secrete such material in the library, or destroy or mutilate such material, or use such material in a manner calculated to gain an unfair advantage for either him or herself or another student in connection with any academic matter.
- No student shall make any false representation on a resume, transcript or other written material relating to his or her Law School credentials. Nor may any student falsely represent his or her Law School credentials in any other way to a potential employer or academic institution.
- No student shall plagiarize. Violation of the plagiarism policy adopted by the faculty of the Law School on October 11, 1990 is a violation of the Code. A statement of the offense and definition of plagiarism is incorporated in this Code by reference and linked to this Code at the following Web address: <http://www1.law.umkc.edu/academic/plagiarism.htm>
- No student other than the accused shall fail to report a suspected violation of this Code or fail to give information about such violation, testify, or attend hearings authorized by the Code, except for good cause shown.
- No student witness shall fail to appear at a hearing held under the Code, unless good cause exists.
- No student shall improperly induce a person not to comply with this Code.
- No student shall fail to use best efforts in the performance of his or her duty under this Code.

3 Mens Rea:

Unless otherwise specifically stated in this Code, a student is not guilty of a violation unless he or she acted knowingly or recklessly with respect to each material element of the violation.

4 Specific Exclusions:

The Code does not cover:

- Infractions of rules limiting smoking, soft drinks and coffee, etc., to certain designated examination rooms.
- Disciplinary matters not related to academic credentials or academic matters. The University of Missouri Standards of Conduct details these matters not covered by this Honor Code.

IV. Honor Court and Prosecutor

.01 Honor Court. There shall be a body known as the Honor Court composed of a Chief Justice and four Associate Justices. The Chief Justice shall be selected by a majority vote of the entire Court to serve at the pleasure of the Court.

The Honor Court shall hear all cases involving alleged violations of this Code by students, excepting those cases disposed of informally per 6.03. The proper Court to hear a charge shall be the Court sitting at the time of the hearing rather than at the time of the violation. The Court shall also make advisory opinions.

Four (4) Justices shall constitute a quorum. Each of the justices shall have one (1) vote. The Chief Justice shall be entitled to vote on all matters before the Court.

The Chief Justice, or his or her designee, shall inform new students of this Code during orientation. A copy of the Code shall be published in each edition of the Law School Student Handbook and available in the law building in the Dean's office.

.02 Student Prosecutor. There shall be a Student Prosecutor and an Assistant Student Prosecutor. The Prosecutor shall conduct investigations and present the case against the accused. The Student Prosecutor shall not make plea agreements at any time.

V. Appointments and Qualifications

.01 General. The Justices of the court shall be two third-year students, two second-year students and one first-year student. There shall be alternate justices in the same number and composition.

The Student Prosecutor shall be a third-year student. The Assistant Student Prosecutor shall be a second-year student.

.02 Appointment and Term of Office:

a) Justices. One first-year justice, one first-year alternate justice, one second-year justice, and one second-year alternate justice will be selected by the SBA President on the basis of applications submitted to him or her. The selection will be made at the first SBA meeting of the fall semester that includes the first-year representatives.

Justices will serve three one-year terms unless they re-sign, graduate, are removed for cause or become otherwise ineligible. Justices who graduate may serve until the first-year justices are appointed.

Justices seated at the time this Code becomes effective are deemed to have been appointed in accordance with this section.

b) Prosecutor. The student prosecutor shall be the person who was the assistant student prosecutor during the previous academic year, provided, however, that if that person is no longer eligible, the SBA President shall select a student prosecutor. The selection of the assistant student prosecutor shall be made by the SBA President before the end of winter semester classes. Selections shall be made on the basis of the designee's class for the following year.

The Prosecutor's term of office shall begin on the first day of the summer session, provided, however, that cases arising before or during the winter semester final examination period shall be conducted by winter semester office-holders.

.03 Forfeiture of Office for Cause. A student is ineligible to continue as a Justice, Prosecutor or an alternate if he or she is placed on academic or disciplinary probation, or if for any other reason his or her continuation in office may not be in the best interest of the School of Law as determined by the Board of Governors.

.04 Disqualified from Duty. Justices or Prosecutors shall disqualify themselves from performing their duties when they feel that they cannot impartially perform those duties. The accused can raise or suggest grounds for such disqualification of a justice. The failure of Justices to disqualify themselves may be raised on appeal as a possible abuse of discretion.

Disqualification of a Justice or Prosecutor creates a temporary vacancy and shall be filled pursuant to 5.05(b).

.05 Vacancies.

a) Permanent Vacancies. If by graduation, or for any other reason, a permanent vacancy occurs during a normal term of office, such vacancy shall be filled in a manner consistent with 5.01. If for any reason a vacancy is not filled when needed, it may be treated as a temporary vacancy and filled as prescribed. 5.05(b).

b) Temporary Vacancies. Vacancies that are created when a student is unavailable, disqualifies him or herself or the Court sustains a challenge for cause, shall be filled by the SBA President who shall ask the alternate from the same class to serve. If the alternate is not available, the SBA President shall select another member of the class who is not ineligible to serve.

IV. Violation and Investigation Reports

.01 Reports Made. Any person may report a suspected violation of the Honor Code. Reports may be made to either the SBA President or to the Associate Dean.

If reported to the SBA President, the SBA President shall notify the Associate Dean of the report of a suspected violation as soon as possible.

.02 When Made. Reports of suspected Honor Code violations must be made within 45 days of the discovery of the suspected violation.

.03 Informal Disposition or Submission of Case to Student Prosecutor. The Associate Dean shall have the authority to investigate the reported suspected violation of the Honor Code before initiating formal disciplinary procedures and give the student the opportunity to present his/her personal version of the incident or occurrence. After doing so, the Associate Dean may, for good cause shown, informally dispose of the case, and, after explaining to the student the various options available, shall fix a reasonable time within which the student suspected to have violated the Honor

Code shall accept or reject a proposed informal disposition. If no informal disposition is deemed appropriate by the Associate Dean or the student rejects a proposed informal disposition, the Associate Dean shall notify the student prosecutor of the report of a suspected violation of the Honor Code. Should the Prosecutor disqualify him or herself pursuant to 5.04, the SBA President shall fill the temporary vacancy pursuant to 5.05(b). Any statements made by the student suspected of violating the Honor Code to the Associate Dean in the course of the informal disposition process shall not be communicated to the student prosecutor or be admissible against the student in subsequent Honor Court proceedings.

.04 Investigation by the Prosecutor. Upon notification by the Associate Dean of the report of a suspected violation of the Honor Code, the Prosecutor shall conduct an investigation.

Any student called upon to supply information relevant to the investigation, other than the accused, shall comply as fully as possible.

At the completion of the investigation, if the Prosecutor feels the evidence is insufficient to justify prosecution.

The Prosecutor shall so notify the SBA President and the Associate Dean, and with their concurrence the case may be dropped.

If the Prosecutor determines that probable cause exists to prosecute a person for a violation of the Honor Code, he or she shall send notice of this finding to the Associate Dean of the Law School.

.05 Submission of Case to Grand Jury.

a) Upon notice that the Prosecutor has determined that probable cause exists to prosecute a person for a violation of the Honor Code, the Associate Dean shall convene a grand jury hearing.

b) The Associate Dean shall select six names at random from the Law School student body. The Associate Dean shall summon the people selected to attend a meeting with himself and the SBA President. At this meeting the Associate Dean shall inform the students selected that the first three qualified students selected will be required to serve on a grand jury to determine whether or not probable cause exists to believe the Honor Code has been violated. The Associate Dean may excuse any grand juror for cause and replace that grand juror with an alternate. The Associate Dean shall inform the grand jury of their membership on the grand jury and all grand jury proceedings are confidential. The SBA President and the grand jurors shall select a date, time and place for the grand jury proceeding, providing that the selection of such a date will not unreasonably delay the Honor Court proceedings. The SBA President shall inform the Chief Justice and the Prosecutor of the date of the hearing.

c) The Prosecutor shall have the duty of providing the Chief Justice with a copy of the items of evidence that form the basis for his or her determination that probable cause exists to prosecute for a violation of this Honor Code. The copies provided by the Prosecutor to the Chief Justice shall have all identifying characteristics removed except as necessary to establish probable cause that a violation of this Code has been committed. The Prosecutor shall place a copy of these items of evidence and a summary of why he or she believes probable cause exists in a signed and sealed envelope. The envelope of evidence shall be delivered to the Chief Justice before the grand jury proceeding. If the suspected violation is plagiarism, the Prosecutor shall provide the Chief Justice with the original sources that the grand jury needs to adequately evaluate the evidence provided in the packet. The Chief Justice shall make arrangements to provide the grand jury with the source material. This packet shall also contain a form for the grand jury to report its findings.

The investigative power of the grand jury is strictly limited to the evidence presented by the Prosecutor. The grand jury shall not independently investigate the matter. The grand jury may submit written questions to the prosecutor through the Chief Justice.

d) The Chief Justice of the Honor Court will initiate the grand jury proceeding by informing the grand jury that the grand jury proceedings are to be confidential. The Chief Justice should elicit from the grand jurors signed statements that the grand jurors understand fully the duty of confidentiality. The Chief Justice shall advise the students that the information presented to the grand jury will be known only to the student prosecutor and themselves and that a breach of confidentiality may be an Honor Code violation.

e) After the Chief Justice has fulfilled the obligations imposed by section (d), he or she should give the grand jury the sealed envelope provided by the Prosecutor containing the evidence and remove him or herself from the grand jury proceedings.

f) After the Chief Justice has left the grand jury room, the grand jury will break the seal on the evidence envelope and examine the contents. The grand jury shall examine the evidence and determine whether probable cause exists for finding a violation of this Code. A decision shall be made within a reasonable period of time, not to exceed ten (10) days.

g) The finding of probable cause or the lack of probable cause will be determined by a majority vote of the grand jurors. This vote is binding on all members of the grand jury.

h) After the grand jury has reached a decision, it shall record that decision on the form provided for such purpose in the envelope described in 6.04(c) and sign it. The evidence shall be returned to the envelope provided by the Prosecutor, sealed, and signed. The envelope shall be delivered to the Chief Justice in a place and manner prescribed by the Chief Justice.

i) The Chief Justice shall deliver the envelope with the grand jury finding to the Associate Dean. The Associate Dean shall break the seal on the envelope in the presence of the Prosecutor who shall verify that the envelope

contains all the items of evidence the Prosecutor originally placed in the envelope.

j) The Associate Dean shall reveal the finding of the grand jury only in furtherance of the procedures of this Honor Code and then only to the necessary parties.

.06 Hearing Date and Notice. A hearing shall be held as soon as possible after the grand jury has determined that there is probable cause to believe the accused has violated the Honor Code. In no case shall more than 45 days elapse between the suspected violation report and the hearing, unless a later date is agreed upon by the Prosecutor and the student charged.

The student shall be notified of a hearing in writing by the Chief Justice. The notice shall set forth the date, time and place of the alleged violation, the conduct to be inquired into, and the date, time, and place of hearing before the Honor Court. The notice shall be given at least seven (7) days in advance of the scheduled date of the hearing, unless a shorter time be fixed for good cause.

VII. Hearing Procedure

.01 Confidentiality. Honor Court hearings shall be closed to the public unless the accused requests a public hearing, in which case one shall be provided. An audio recording shall be made of the proceeding and shall become part of the record.

.02 Ex Parte Communication. Except as to procedural matters, there shall be no ex parte communication with any Justice by the Prosecutor, by defense counsel or by the accused.

.03 Pre-Trial Motions. All pre-trial motions, including motions in limine, shall be in writing and given to the Chief Justice at least four days prior to the hearing. The Court may set a time limit on hearing pre-trial motions. The Court shall hear pre-trial motions no later than the day before the trial.

.04 Evidence. A student defendant or prosecutor appearing before the Honor Court shall have the right to present any evidence by witness or affidavit relating to any charge or defense. The formal rules of evidence shall not apply and the Court may consider relevant testimony of witnesses, affidavits, written reports, and any other relevant evidence.

.05 Witnesses. At least two (2) days in advance of the scheduled date of the hearing, witnesses shall be notified by the party calling them of their obligation to appear. Witnesses shall bring with them whatever documentation is requested. Failure of a student witness to appear, without good cause, is a violation of this Code.

The Prosecutor may not call the defendant as a witness. The defendant may elect to testify or not, as he or she chooses. No unfavorable inference may be drawn should the defendant choose not to testify.

.06 The Court. The Chief Justice shall preside at the hearing. The Prosecutor shall present the case against the accused. The accused may represent him or herself or may be represented by an adviser or legal counsel.

.07 The Hearing. The Prosecutor shall make an opening statement and present the evidence against the accused. The Accused or his or her representative may elect to make an opening statement either at the conclusion of the Prosecutor's opening or after the Prosecution's evidence has been presented. At the conclusion of the Prosecution's case-in-chief, the accused may present his or her evidence.

Each party shall have the right to cross-examine the opposing party's witnesses. Either party may present further rebuttal evidence when, in the discretion of the Chief Justice such evidence is relevant and will not unduly delay the proceedings. After all evidence has been presented, the Prosecutor may make a closing argument, if so elected, the Prosecutor may present a rebuttal.

.08 Court's Decision. The Court shall promptly deliberate and make its findings and determinations in executive session. If seventy-five percent (75%) of the members of the court find by clear and convincing evidence that the accused has committed the violations charged, it shall recommend to the Dean one or more of the sanctions prescribed in 8.02, subject to the mitigating circumstances exception in 8.03.

If at all possible, the Court shall render a decision immediately following its deliberations. In no event shall its decision be announced later than three (3) days following the conclusion of the hearing. An oral presentation of the Court's findings and recommendations is permitted following the hearing, but a written report including findings of facts, conclusions and recommended disposition shall be filed within one week after conclusion of the hearing. Concurring or dissenting opinions may be filed according to the same terms.

The report of the Court, including any concurring or dissenting opinions, and the entire record of the proceedings shall be submitted to the Dean and the accused as soon as possible after issuance.

.09 Procedural Questions. Procedural questions arising during the course of proceedings that are not covered by these rules shall be resolved by the Chief Justice. All objections concerning procedure shall be made/raised in writing to the Chief Justice. The Chief Justice shall answer all objections in writing and forward both the objection and the decision to both the Prosecutor and defense counsel and to all other justices sitting on the Court for that hearing.

The decision of the Chief Justice on a procedural question may be challenged by the accused, the prosecutor, or a sitting member of the Court. The Chief Justice shall present any challenge to the sitting Court and the ruling of the majority of the Court shall be final. There shall be a form, prepared by the Chief Justice, for appealing a procedural decision. The party challenging the decision shall complete the form and forward a copy to all sitting justices. All such challenges must be made on a timely basis.

.10 Review of Record by Dean. Upon receipt of the Court's report, the Dean will, within a reasonable amount of time, review the entire record, including the Court's findings of facts, conclusions and recommendations and render a decision

in the case.

The Dean may remand for further consideration of specific issues. A decision by the Dean to remand shall include a list of questions for the Court. The Court shall then respond in writing within fourteen (14) calendar days. The Dean may not reverse a finding of not guilty by the Court.

The Dean's decision shall be transmitted in writing to the accused and to the Chief Justice of the Honor Court. Where the accused has been found guilty by the Court, a copy of the Dean's decision will be placed in the student's official file.

VIII. Sanctions

.01 Report of Misconduct. Where a finding that the accused has violated the Code has been made, the misconduct may be called to the attention of the proper University authorities, Bar authorities or any other affected parties for appropriate action.

.02 Sanctions. The following sanctions may be recommended by the Court to the Dean and imposed by the Dean:

- a) Expulsion. Permanent separation of the student from the School of Law.
- b) Dismissal. An involuntary separation of the student from the School of Law. It does not imply or state a minimum separation time.
- c) Suspension. Separation of the student from the School of Law for a definite period of time, after which the student is eligible to return. Conditions for readmission may be specified.
- d) Probation. Disciplinary probation, subject to any appropriate terms or conditions.
- e) Reprimand. Written or oral reprimand.

.03 Mitigating Circumstances. When considering a recommended sanction upon finding that a violation has occurred, the Court may consider mitigating circumstances such as, but not limited to, any physical, mental, financial, or emotional problems of the accused. If the severity of mitigating circumstances requires, the Court may recommend no sanction be levied on the accused, even though a violation has occurred.

If the Court considers mitigating circumstances when recommending a sanction, the written report of the Court shall include a full explanation thereof.

IX. Appeals

.01 Right to Petition for Review (other than dismissal or suspension). In all cases where the discipline imposed by the Dean is other than dismissal or suspension, the accused may petition the Chancellor in writing for a review of the decision within ten (10) consecutive calendar days after notification. A copy of the Petition for Review must also be served upon the Dean within such time. The Petition for Review shall state the grounds or reasons for review, and the Dean may answer the petition within ten (10) consecutive calendar days if he or she so desires.

The Chancellor or his or her designated representative may grant or refuse the right of review. In all cases where the Petition for Review is refused, the decision shall be final. If the Chancellor or representative reviews the decision, the action of the Chancellor shall be final unless it be to remand the matter for further proceedings.

.02 Right of Appeal (dismissal or suspension only). When a student is dismissed or suspended from the University for an Honor Code violation by the Dean, the student may appeal such decision to the Chancellor within twenty (20) consecutive days after notification of the decision of the Dean. A copy of the notice of appeal will contemporaneously be given by the student to the Dean. The student may file a written memorandum for consideration by the Chancellor with the notice of appeal, and the Chancellor may request a reply to such memorandum by the appropriate party. The Chancellor or his/her designee shall review the full record of the case and the appeal documents and may affirm, reverse, or remand the case for further proceedings and shall notify the Dean and the student in writing of the decision on the appeal. The action of the Chancellor shall be final unless it be to remand the matter for further proceedings.

.03 Status During Appeal. In the cases of suspension or dismissal where a notice of appeal is filed within the required time, a student may petition the Chancellor in writing for permission to attend classes pending final determination of appeal. The Chancellor may permit a student to continue in school under such conditions as may be designated pending completion of appellate procedures, provided such continuance will not seriously disrupt the University or constitute a danger to the health, safety or welfare of the University community. In such event, however, any final disciplinary action imposed shall be effective from the date of the action of the Dean.

X. Advisory Opinions

.01 When required to do so, the Court may render advisory opinions on matters relating to the application of the Code.

.02 A box shall be located in a public area of the Law School for the purpose of receiving written requests by students of the Law School for advisory opinions.

.03 The Honor Court shall submit its advisory opinion, in writing, to the Dean and the SBA President.

.04 The Dean, within a reasonable time, shall respond to the advisory opinion.

.05 The advisory opinion and the Dean's response shall be appropriately posted and made available to the students in the library.

.06 Conduct consistent with an advisory opinion shall be presumed not to be in violation of the Code.

XI. Amendments

.01 Amendments to the Honor Code may be proposed by petition of any ten (10) students, by the Board of Governors of the Student Bar Association on its own motion, or by petition of a majority of the Honor Court.

.02 A proposed amendment shall be adopted if at the adoption election at least two-thirds (2/3) of the students voting shall vote favoring the proposed amendment.

XII. Adoption

This Honor Code shall be in effect when approved by a two-thirds vote of the students voting, by the Dean of the School of Law, the Chancellor, and by the Board of Curators.

Student Conduct

This policy is also available at <http://www.umsystem.edu/ums/departments/gc/rules/programs/200/010.shtml>.

A student enrolling in the University assumes an obligation to behave in a manner compatible with the University's function as an educational institution.

A. JURISDICTION OF THE UNIVERSITY OF MISSOURI generally shall be limited to conduct which occurs on the University of Missouri premises or at University-sponsored or University-supervised functions. However, nothing restrains the administration of the University of Missouri from taking appropriate action, including, but not limited to, the imposition of sanctions under [Section 200.020 \(C\)](#), against students for conduct on or off University premises in order to protect the physical safety of students, faculty, staff and visitors.

B. CONDUCT for which students are subject to sanctions falls into the following categories:

1. Academic dishonesty, such as cheating, plagiarism, or sabotage. The Board of Curators recognizes that academic honesty is essential for the intellectual life of the University. Faculty members have a special obligation to expect high standards of academic honesty in all student work. Students have a special obligation to adhere to such standards. In all cases of academic dishonesty, the instructor shall make an academic judgment about the student's grade on that work and in that course. The instructor shall report the alleged academic dishonesty to the Primary Administrative Officer.
 - a. The term **cheating** includes but is not limited to:
 - (i) use of any unauthorized assistance in taking quizzes, tests, or examinations;
 - (ii) dependence upon the aid of sources beyond those authorized by the instructor in writing papers, preparing reports, solving problems, or carrying out other assignments;
 - (iii) acquisition or possession without permission of tests or other academic material belonging to a member of the University faculty or staff; or
 - (iv) knowingly providing any unauthorized assistance to another student on quizzes, tests, or examinations.
 - b. The term **plagiarism** includes, but is not limited to:
 - (i) use by paraphrase or direct quotation of the published or unpublished work of another person without fully and properly crediting the author with footnotes, citations or bibliographical reference;
 - (ii) unacknowledged use of materials prepared by another person or agency engaged in the selling of term papers or other academic materials; or
 - (iii) unacknowledged use of original work/material that has been produced through collaboration with others without release in writing from collaborators.
 - c. The term **sabotage** includes, but is not limited to, the unauthorized interference with, modification of, or destruction of the work or intellectual property of another member of the University community.
2. Forgery, alteration, or misuse of University documents, records or identification, or knowingly furnishing false information to the University.
3. Obstruction or disruption of teaching, research, administration, conduct proceedings, or other University activities, including its public service functions on or off campus.
4. Physical abuse or other conduct which threatens or endangers the health or safety of any person.
5. Attempted or actual theft of, damage to, or possession without permission of property of the University or of a member of the University community or of a campus visitor.
6. Unauthorized possession, duplication or use of keys to any University facilities or unauthorized entry to or use of University facilities.
7. Violation of University policies, rules or regulations or of campus regulations including, but not limited to, those governing residence in University-provided housing, or the use of University facilities, or the time, place and manner of public expression.
8. Manufacture, use, possession, sale or distribution of alcoholic beverages or any controlled substance without proper prescription or required license or as expressly permitted by law or University regulations, including operating a vehicle on University property, or on streets or roadways adjacent to and abutting a campus, under the influence of alcohol or a controlled substance as prohibited by law of the state of Missouri.

9. Disruptive or disorderly conduct or lewd, indecent, or obscene conduct or expression.
10. Failure to comply with directions of University officials acting in the performance of their duties.
11. The illegal or unauthorized possession or use of firearms, explosives, other weapons, or hazardous chemicals.
12. Misuse in accordance with University policy of computing resources, including but not limited to:
 - a. Actual or attempted theft or other abuse.
 - b. Unauthorized entry into a file to use, read, or change the contents, or for any other purpose.
 - c. Unauthorized transfer of a file.
 - d. Unauthorized use of another individual's identification and password.
 - e. Use of computing facilities to interfere with the work of another student, faculty member, or University official.
 - f. Use of computing facilities to interfere with normal operation of the University computing system.
 - g. Knowingly causing a computer virus to become installed in a computer system or file.

Rules of Procedures in Student Conduct Matters

(200.020 Rules of Procedures in Student Conduct Matters; Bd. Min. 11-8-68, Amended Bd. Min. 3-20-81; Bd. Min. 12-8-89, Amended 5-19-94; Bd. Min. 5-24-01.)

This policy is also available at www.umsystem.edu/ums/departments/gc/rules/programs/200/020.shtml.

A. PREAMBLE. The following rules of procedure in student conduct matters are hereby adopted in order to insure insofar as possible and practicable

- (a) that the requirements of procedural due process in student conduct proceedings will be fulfilled by the University,
- (b) that the immediate effectiveness of Section 10.030, which is Article V of the Bylaws of the Board of Curators relating to student conduct and sanctions may be secured for all students in the University of Missouri, and
- (c) that procedures shall be definite and determinable within the University of Missouri.

B. DEFINITIONS. As used in these rules, the following definitions shall apply:

1. **Primary Administrative Officers.** As used in these procedures, the Chief Student Affairs Administrator on each campus is the Primary Administrative Officer except in cases of academic dishonesty, where the Chief Academic Administrator is the Primary Administrative Officer. Each Primary Administrative Officer may appoint designee(s) who are responsible for the administration of these conduct procedures, provided all such appointments must be in writing, filed with the Chancellor of the campus, and the office of General Counsel. The Primary Administrator's Office will certify in writing that the given designee has been trained in the administration of student conduct matters.
2. **Student Panel.** A panel of students appointed by the Chancellor, from which shall be selected by the Chair, upon the request of a student charged before the Student Conduct Committee, not more than three students to serve with the Student Conduct Committee.
3. **Student.** A person having once been admitted to the University who has not completed a course of study and who intends to or does continue a course of study in or through one of the campuses of the University. For the purpose of these rules, student status continues whether or not the University's academic programs are in session.
4. **Student Conduct Committee.** As used in these procedures, "Student Conduct Committee," hereinafter referred to as the Committee, is that body on each campus which is authorized to conduct hearings and to make dispositions under these procedures or a Hearing Panel of such body as herein defined.

C. SANCTIONS.

1. The following sanctions may be imposed upon any student found to have violated the Student Conduct Code; more than one of the sanctions may be imposed for any single violation:
 - a. **Warning.** A notice in writing to the student that the student is violating or has violated institutional regulations.

- b. **Probation.** A written reprimand for violation of specified regulations. Probation is for a designated period of time and includes the probability of more severe sanctions if the student is found to be violating any institutional regulation(s) during the probationary period.
- c. **Loss of Privileges.** Denial of specified privileges for a designated period of time.
- d. **Restitution.** Compensation for loss, damage, or injury to the University or University property. This may take the form of appropriate service and/or monetary or material replacement.
- e. **Discretionary Sanctions.** Work assignments, service to the University, or other related discretionary assignments.
- f. **Residence Hall Suspension.** Separation of the student from the residence halls for a definite period of time, after which the student is eligible to return. Conditions for readmission may be specified.
- g. **Residence Hall Expulsion.** Permanent separation of the student from the residence halls.
- h. **University Dismissal.** An involuntary separation of the student from the institution for misconduct apart from academic requirements. It does not imply or state a minimum separation time.
- i. **University Suspension.** Separation of the student from the University for a definite period of time, after which the student is eligible to return. Conditions for readmission may be specified.
- j. **University Expulsion.** Permanent separation of the student from the University.

2. **Temporary Suspension.** The Chancellor or Designee may at any time temporarily suspend or deny readmission to a student from the University pending formal procedures when the Chancellor or Designee finds and believes from available information that the presence of a student on campus would seriously disrupt the University or constitute a danger to the health, safety, or welfare of members of the University community. The appropriate procedure to determine the future status of the student will be initiated within seven calendar days.

D. RECORDS RETENTION. Student conduct records shall be maintained for five years after University action is completed.

E. POLICY AND PROCEDURES.

- 1. **Preliminary Procedures.** The Primary Administrative Officer/Designee(s) shall investigate any reported student misconduct before initiating formal conduct procedures and give the student the opportunity to present a personal version of the incident or occurrence. The Primary Administrative Officer/Designee(s) may discuss with any student such alleged misconduct and the student shall attend such consultation as requested by the Primary Administrative Officer/Designee(s). The Primary Administrative Officer/Designee(s), in making an investigation and disposition, may utilize student courts and boards and/or divisional deans to make recommendations.
- 2. **Informal Disposition.** The Primary Administrative Officer/Designee(s) shall have the authority to make a determination and to impose appropriate sanctions and shall fix a reasonable time within which the student shall accept or reject a proposed informal disposition. A failure of the student either to accept or reject within the time fixed may be deemed by the University to be an acceptance of the determination, provided the student has received written notice of the proposed determination and the result of the student's failure to formally reject and, in such event, the proposed disposition shall become final upon expiration of such time. If the student rejects informal disposition it must be in writing and shall be forwarded to the Committee. The Primary Administrative Officer/Designee(s) may refer cases to the Committee without first offering informal disposition.
- 3. **Formal Procedure and Disposition.**

- a. **Student Conduct Committee:**

- (1) The Committee shall be appointed by the Chancellor and shall have the authority to impose appropriate sanctions upon any student or students appearing before it.
- (2) The Committee, when appropriate or convenient, may be divided by the Chair of the Committee into Hearing Panels, each panel to be composed of at least five Committee members, which may include a maximum of two students, present at the hearing, including a designated chair. A Hearing Panel has the authority of the whole Committee in those cases assigned to it. The Chair of the Committee or of a Hearing Panel shall count as one member of the Committee or Hearing Panel and have the same rights as other members.
- (3) Each Chancellor shall appoint a panel of students, to be known as the Student Panel. Upon written request of a student charged before the Committee, made at least seventy-two (72) hours prior to the

hearing, the Chair of the Committee or Hearing Panel shall appoint from the Student Panel not more than three students to sit with the Committee or two students to sit with the Hearing Panel (as stated in 4.a. (2)) for that particular case. When students from the Student Panel serve at the request of a student charged, they shall have the same rights as other members of the Committee or Hearing Panel.

b.

General Statement of Procedures. A student charged with a breach of the Student Conduct Code is entitled to a written notice and a formal hearing unless the matter is disposed of under the rules for informal disposition. Student conduct proceedings are not to be construed as judicial trials and need not wait for legal action before proceeding; but care shall be taken to comply as fully as possible with the spirit and intent of the procedural safeguards set forth herein. The Office of the General Counsel shall be legal adviser to the Committee and the Primary Administrative Officer/Designee(s).

c.

Notice. The Primary Administrative Officer/Designee(s) shall initiate student conduct proceedings by arranging with the Chair to call a meeting of the Committee and by giving written notice by certified mail or personal delivery to the student charged with misconduct. The notice shall set forth the date, time, and place of the alleged violation and the date, time, and place of the hearing before the Committee. Notice by certified mail may be addressed to the last address currently on record with the University. Failure by the student to have a current correct local address on record with the University shall not be construed to invalidate such notice. The notice shall be given at least seven (7) consecutive days prior to the hearing, unless a shorter time is fixed by the Chair for good cause. Any request for continuance shall be made in writing to the Chair, who shall have the authority to continue the hearing if the request is timely and made for good cause. The Chair shall notify the Primary Administrative Officer/Designee(s) and the student of the new date for the hearing. If the student fails to appear at the scheduled time, the Committee may hear and determine the matter.

4. **Right to Petition for Review:** (other than University expulsion, University dismissal, or University suspension)

a.

In all cases where the sanction imposed by the Committee is other than University expulsion, University dismissal, or University suspension, the Primary Administrative Officer/Designee(s) or the student may petition the Chancellor or Designee in writing for a review of the decision within five (5) calendar days after written notification. A copy of the Petition for Review must also be served upon the nonappealing party within such time. The Petition for Review shall state the grounds or reasons for review, and the nonappealing party may answer the petition within five (5) calendar days.

b.

The Chancellor or Designee may grant or refuse the right of review. In all cases where the Petition for Review is refused, the action of the Committee shall be final. If the Chancellor or Designee reviews the decision, the action of the Chancellor shall be final unless it is to remand the matter for further proceedings.

5. **Right of Appeal:** (University expulsion, University dismissal, or University suspension only)

a.

When a student is expelled, dismissed, or suspended from the University by the Committee, the Primary Administrative Officer/Designee(s), or the student may appeal such decision to the Chancellor or Designee by filing written notice of appeal with the Chancellor within ten (10) calendar days after notification of the decision of the Committee. A copy of the Notice of Appeal will contemporaneously be given by the student to the Primary Administrative Officer/Designee(s) or by the Primary Administrative Officer/Designee(s) to the student. The appealing party may file a written memorandum for consideration by the Chancellor with the Notice of Appeal, and the Chancellor may request a reply to such memorandum by the appropriate party.

b.

The Chancellor or Designee shall review the record of the case and the appeal documents and may affirm, reverse, or remand the case for further proceedings and shall notify each party in writing of the decision on the appeal. The action of the Chancellor shall be final unless it is to remand the matter for further proceedings.

6. **Status During Appeal.** In cases of suspension, dismissal, or expulsion where a Notice of Appeal is filed within the required time, a student may petition the Chancellor in writing for permission to attend classes pending final determination of appeal. The Chancellor may permit a student to continue in school under such conditions as may be designated pending completion of appellate procedures, provided such continuance will not seriously disrupt the University or constitute a danger to the health, safety, or welfare of members of the University community. In such event, however, any final sanctions imposed shall be effective from the date of the action of the Committee.

7. **Student Honor System.** Forums under the student honor systems established for investigating facts, holding hearings, and recommending and imposing sanctions are authorized when the student honor code or other regulations containing well defined jurisdictional statements and satisfying the requirements of Section 10.030, which is Article V of the Bylaws of the Board of Curators, have been reduced to writing and have been approved by the Chancellor and the Board of Curators and notice thereof in writing has been furnished to students subject thereto. Though the student honor system has jurisdiction, together with procedures set forth therein, instead of the Primary Administrative Officer/Designee(s), the standard of conduct called for in any such student honor system shall be deemed to contain at a minimum the same standards set forth in Section 200.010, entitled Standards of Conduct. Procedures shall satisfy the requirements of the Board of Curators' Bylaws, Section 10.030, which is Article V, and shall contain procedures herein before stated insofar as appropriate and adaptable to the particular situation and shall be approved by the Chancellor and the General Counsel. Students subject to student honor systems shall have the rights of appeal as set forth in Section 200.020 E.6 and 7.

F. Hearing Procedures.

1. **Conduct of Hearing.** The Chair shall preside at the hearing, call the hearing to order, call the roll of the Committee in attendance, ascertain the presence or absence of the student charged with misconduct, read the notice of hearing and charges and verify the receipt of notices of charges by the student, report any continuances requested or granted, establish the presence of any adviser or counselor of the student, and call to the attention of the student charged and the adviser any special or extraordinary procedures to be employed during the hearing and permit the student to make suggestions regarding or objections to any procedures for the Conduct Committee to consider.

a.

Opening Statements.

(1)

The Primary Administrative Officer/Designee(s) shall make opening remarks outlining the general nature of the case and testify to any facts the investigation has revealed.

(2)

The student may make a statement to the Committee about the charge at this time or at the conclusion of the University's presentation.

b.

University Evidence.

(1)

University witnesses are to be called and identified or written reports of evidence introduced as appropriate.

(2)

The Committee may question witnesses at any time.

(3)

The student or, with permission of the Committee, the adviser or counselor may question witnesses or examine evidence at the conclusion of the University's presentation.

c.

Student Evidence.

(1)

If the student has not elected to make a statement earlier under a. (2) above, the student shall have the opportunity to make a statement to the Committee about the charge.

(2)

The student may present evidence through witnesses or in the form of written memoranda.

(3)

The Committee may question the student or witnesses at any time. The Primary Administrative Officer/Designee(s) may question the student or witnesses.

d.

Rebuttal Evidence. The Committee may permit the University or the student to offer a rebuttal of the other's presentation.

e.

Rights of Student Conduct Committee. The Committee shall have the right to:

(1)

Hear together cases involving more than one student which arise out of the same transaction or occurrence, but in that event shall make separate findings and determinations for each student;

(2)

Permit a stipulation of facts by the Primary Administrative Officer/Designee(s) and the student involved;

(3)

Permit the incorporation in the record by reference of any documentation, produced and desired in the record by the University or the student charged;

(4)

Question witnesses or challenge other evidence introduced by either the University or the student at any time;

(5)

Hear from the Primary Administrative Officer/Designee(s) about dispositions made in similar cases and any dispositions offered to the student appearing before the Committee;

(6)

Call additional witnesses or require additional investigation;

(7)

Dismiss any action at any time or permit informal disposition as otherwise provided;

(8)

Permit or require at any time amendment of the Notice of Hearing to include new or additional matters which may come to the attention of the Committee before final determination of the case; provided, however, that in such event the Committee shall grant to the student or Primary Administrative Officer/Designee(s) such time as the Committee may determine reasonable under the circumstances to answer or explain such additional matters;

(9)

Dismiss any person from the hearing who interferes with or obstructs the hearing or fails to abide by the rulings of the Chair of the Committee;

(10)

Suspend summarily students from the University who, during the hearing, obstruct or interfere with the course of the hearing or fail to abide by the ruling of the Chair of the Committee on any procedural question or request of the Chair for order.

2. **Student's Rights Upon Hearing.** A student appearing before a Committee shall have the right to:
 - a. Be present at the hearing;
 - b. Have an adviser or counselor and to consult with such adviser or counselor during the hearing;
 - c. Have students from the Student Panel sit with the Committee or Hearing Panel;
 - d. Hear or examine evidence presented to the Committee;
 - e. Question witnesses present and testifying;
 - f. Present evidence by witnesses or affidavit;
 - g. Make any statement to the Committee in mitigation or explanation of the conduct in question;
 - h. Be informed in writing of the findings of the Committee and any sanctions it imposes; and
 - i. Request review or appeal to the Chancellor as herein provided.
3. **Determination by Student Conduct Committee.** The Committee shall then make its findings and determinations in executive session out of the presence of the Primary Administrative Officer/Designee(s) and the student charged. Separate findings are to be made:
 - a. As to the conduct of the student, and
 - b. On the sanctions, if any, to be imposed. No sanctions shall be imposed on the student unless a majority of the Committee present is reasonably convinced by the evidence that the student has committed the violation charged.
4. **Official Report of Findings and Determinations.** The Committee shall promptly consider the case on the merits and make its findings and determination and transmit them to the Primary Administrative Officer/Designee(s) and the student charged forthwith.
5. **Other Procedural Questions.** Procedural questions which arise during the hearing not covered by these general rules shall be determined by the Chair, whose ruling shall be final unless the Chair shall present the question to the Committee at the request of a member of the Committee, in which event the ruling of the Committee by majority vote shall be final.
6. **General Rules of Decorum.** The following general rules of decorum shall be adhered to:
 - a. All requests to address the Committee shall be addressed to the Chair.
 - b. The Chair will rule on all requests and points of order and may consult with Committee's legal adviser prior to any ruling. The Chair's ruling shall be final and all participants shall abide thereby, unless the Chair shall present the question to the Committee at the request of a member of the Committee, in which event the ruling of the Committee by majority vote shall be final.
 - c. Rules of common courtesy and decency shall be observed at all times.
 - d. An adviser or counselor may be permitted to address the Committee at the discretion of the Committee. An adviser or counselor may request clarification of a procedural matter or object on the basis of procedure at any time by addressing the Chair after recognition.
7. **Record of Hearing.** A taped or stenographic record of the hearing shall be maintained. The notice, exhibits, hearing record, and the findings and determination of the Committee shall become the "Record of the Case" and shall be filed in the Office of the Primary Administrative Officer/Designee(s) and for the purpose of review or appeal be accessible at reasonable times and places to both the University and the student.
8. **Crimes of Violence and Non-Forcible Sex Offences.** In cases of alleged crimes of violence and non-forcible sex offences:
 - a. The alleged victim is entitled to have an adviser or counselor present during his or her participation in the hearing.
 - b. The alleged victim and the accused shall be informed of the outcome of any campus disciplinary proceeding brought alleging a crime of violence or non-forcible sexual assault.

Attendance Policy

General Principles

- Students are expected to attend and participate in classes.
- Advance notice of attendance policies of academic units and individual instructors should be given, and such notice should be in writing.
- Students should notify instructors of excused absences in advance, where possible.
- Students who have an excused absence are expected to make arrangements with instructors for alternative or make-up work. Such arrangements should be made in advance of the absence, where possible.
- Instructors should accommodate excused absences to the extent that an accommodation can be made that does not unreasonably interfere with the learning objectives of the course or unduly burden the instructor.
- Attendance policies shall be applied in a non-discriminatory manner.

The Policy

Each academic unit and instructor may adopt an attendance policy appropriate to that unit, a particular field of study, or for a specific course. Such policy or policies must be consistent with the general principles, and must give students advance notice in writing. In the case of an academic unit, notice may be given in the appropriate section of the General Catalog, or in other materials provided to students for the purpose of informing them of the rules and regulations of the academic unit. In the case of an individual instructor, notice of an attendance policy should be given in the course syllabus.

If neither the academic unit nor the instructor has adopted an attendance policy, or if proper advance notice of the attendance policy was not given, the UMKC general attendance policy will govern. The general attendance policy is that students shall not be penalized for excused absences. "Excused absences" include absences due to illness of the student, illness of an immediate family member for whom the student must care, death of an immediate family member, religious observance (where the nature of the observance prevents the student from being present during class), representation of UMKC in an official capacity, and other compelling circumstances beyond the student's control. Students seeking an excused absence must provide documentation upon request to substantiate the excuse. Students with excused absences shall undertake appropriate make-up or alternative work to be provided by instructors of the courses in which excused absences were incurred.

Complaints concerning the application of an attendance policy or an instructor's attendance policy should be raised with the Department Chair of the instructor, or with the Dean if there is no Department Chair or the instructor is the Department Chair. If the student or instructor is not satisfied with the resolution of the complaint, the matter may be appealed to the Dean and to the Division of Academic Affairs. Complaints concerning the adoption or modification of an attendance policy by an academic unit should be raised with the Division of Academic Affairs. Complaints are to be promptly addressed at each level of review.

This policy was approved July, 2002 and effective Fall, 2002.

Acceptable Use Policy

(110.005 Acceptable Use Policy; Bd. Min. 9-14-00.)

This policy is also available at <http://www.umssystem.edu/ums/departments/gc/rules/facilities/110/005.shtml>.

This policy applies to all users including faculty, staff, students, and guest users of University of Missouri computer networks, equipment, or connecting resources.

A. UNIVERSITY INSPECTION OF PERSONAL ELECTRONIC INFORMATION -- Electronic information on University networks or equipment, including, but not limited to, electronic mail and personal information, is subject to examination by the University where:

1. It is necessary to maintain or improve the functioning of University computing resources;
2. Where there is a suspicion of misconduct under University policies, or suspicion of violation of Federal or State laws; or
3. It is necessary to comply with or verify compliance with Federal or State law.

B. ACCEPTABLE USE GUIDELINES

1. Responsibilities of Users of University Computer Resources:

- a. Respect the intellectual property rights of authors, contributors, and publishers in all media.
- b. Protect user ID, password, and system from unauthorized use.
- c. Adhere to the terms of software licenses and other contracts. Persons loading software on any University computer must adhere to all licensing requirements for the software. Except where allowed by University site licenses, copying software licensed for University use for personal use is a violation of this policy.
- d. Adhere to other University and campus policies, including the Collected Rules and Regulations of the University of Missouri, and, if applicable, the University Business Policy Manual, Human Resources Manual and policies established for a specific resource.
- e. Adhere to data access policies of the University or those established by law.
- f. Use University computer resources in a manner that is compliant with University policies and State and Federal law.

2. Prohibited Uses of University Computer Resources:

- a. Unauthorized or excessive personal use. Use may be excessive if it overburdens a network, results in substantial use of system capacity, or otherwise subjects the institution to increased costs or risks (employees additionally may be subject to discipline for unauthorized or excessive personal use of computer resources).
- b. Uses that interfere with the proper functioning of the University's information technology resources.
- c. Uses that unreasonably interfere with the ability of others to make use of University computer resources.
- d. Attempting to gain or gaining unauthorized access to the computer system, or files of another.
- e. Use of University computer resources to infringe the intellectual property rights of others.
- f. Use of University computer resources for personal profit, except as permitted under the University's conflict of interest policy.

C. ENFORCEMENT OF ACCEPTABLE USE POLICY -- Violation of the Acceptable Use Policy may result in a denial of access to University computer resources, and those disciplinary actions provided or authorized by the Collected Rules and Regulations of the University of Missouri.

Students who violate these guidelines will be subject to sanctions as outlined in [section 200.010](#) of the Student Conduct Code. All such cases will be forwarded to the Primary Administrative Officer in the Student Life Office for

appropriate action.

Faculty or staff who violate these guidelines will be subject to disciplinary measures as outlined within the University Policy Manuals.

Violations of some of the above guidelines may constitute a criminal offense. Individuals using UMKC computing resources are urged to review the University Policy Manual, [Computer Crimes Bill passed by the Missouri State Legislature](#) and the [MOREnet Acceptable Use Policy](#), all of which are stored on-line for easy access.

Policy on Student Records

(180.020 Student Records; Bd. Min. 6-10-59, p. 15,059; Bd. Min. 2-28-75; Amended 3-18-77; Bd. Min. 5-24-01.)

This policy is also available at <http://www.umsystem.edu/ums/departments/gc/rules/information/180/020.shtml>.

A. PURPOSE. The purpose of this regulation is to set forth the guidelines governing the protection of the privacy of student records and to implement The Family Educational Rights and Privacy Act of 1974 (Buckley Amendment; Pub. L. 93-380, as amended). These regulations apply to all students who are or have attended the University of Missouri.

B. DEFINITIONS.

1. **"Act"** means the Family Educational Rights and Privacy Act of 1974, as amended, enacted as Section 444 of the General Education Provisions Act.
2. **"Attendance"** at the University includes, but is not limited to:
 - a. The period of time during which a student attends the University. Examples of dates of attendance include an academic year, a spring semester, or a first quarter.
 - b. The term does not include specific daily records of a student's attendance at the University.
3. **"Directory Information/Public Information"** includes a student's name, address, e-mail address, telephone listing, date and place of birth, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, the most recent previous educational agency or institution attended by the student, student level, and full- or part-time status.
4. **"Disclosure"** means to permit access to or the release, transfer, or other communication of personally identifiable information contained in education records to any party, by any means, including oral, written, or electronic means.
5. **"Education Records"**
 - a. The term means those records that are:
 - (1) Directly related to a student; and
 - (2) Maintained by the University or by a party acting for the University.
 - b. The term does not include:
 - (1) Records that are kept in the sole possession of the maker of the record, and are not accessible or revealed to any other person except a temporary substitute for the maker of the record;
 - (2) Records of a law enforcement unit of the University, but only if education records maintained by the University are not disclosed to the unit, and the law enforcement records are:
 - (a) Maintained separately from education records;
 - (b) Maintained solely for law enforcement purposes; and
 - (c) Disclosed only to law enforcement officials of the same jurisdiction;
 - (3)
 - (i) Records relating to an individual who is employed by the University, that:
 - (a)

- Are made and maintained in the normal course of business;
- (b) Relate exclusively to the individual in that individual's capacity as an employee; and
- (c) Are not available for use for any other purpose.
- (ii) Records relating to an individual in attendance at the University who is employed as a result of his or her status as a student are education records and not excepted under Section 180.020 B.5.b (3) of this definition.
- (4) Records on a student who is attending the University, that are:
 - (a) Made or maintained by a physician, psychiatrist, psychologist or other recognized professional or paraprofessional acting in his or her professional capacity or assisting in a paraprofessional capacity;
 - (b) Made, maintained, or used only in connection with treatment of the student; and
 - (c) Disclosed only to individuals providing the treatment. For the purpose of this definition, "**treatment**" does not include remedial educational activities or activities that are part of the program of instruction at the University; and
- (5) Records that only contain information about an individual after he or she is no longer a student at the University.
- 6. "**Parent**" means a natural parent, an adoptive parent or the legal guardian of the student.
- 7. "**Party**" means an individual, agency, institution or organization.
- 8. "**Personally identifiable information,**" includes:
 - a. The student's name;
 - b. The name of the student's parent or other family member;
 - c. The address of the student or student's family;
 - d. A personal identifier, such as the student's social security number or student number;
 - e. A list of personal characteristics that would make the student's identity easily traceable; or
 - f. Other information that would make the student's identity easily traceable.
- 9. "**Record**" means information or data recorded in any medium, including, but not limited to handwriting, print, computer media, video or audio tape, film, microfilm, and microfiche.
- 10. "**Student**" means any person who is or has been in attendance at the University where the University maintains education records or personally identifiable information on such person. However, the term does not include a person who has not been in attendance at the University of Missouri.
- 11. "**University Official**" is a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.

C. NOTIFICATION OF ACCESS RIGHTS BY THE UNIVERSITY.

1. The University shall annually notify students currently in attendance of their rights under the Act.
2. Notice must be included in each campus' information manual, or other publication, and must inform students that they have the right to:
 - a. Inspect and review the student's education records;
 - b. Seek amendment of the student's education records that the student believes to be inaccurate, misleading, or otherwise in violation of the student's privacy rights;
 - c. Consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that the Act and Section 180.020 M authorize disclosure without consent; and
 - d. File with the Department of Education's Family Policy Compliance Office a complaint under Sections 99.63 and 99.64 of the Act concerning alleged failures by the University to comply with the requirements of the Act.
3. The notice must include all of the following:
 - a.

- b. The procedure for exercising the right to inspect and review education records;
 - c. The procedure for requesting amendment of records under Section 180.020 I; and
 - d. A specification of criteria for determining who constitutes a school official and what constitutes a legitimate educational interest, as listed in Section 180.020 M.1.a.
4. The University may provide this notice by any means that are reasonably likely to inform the students of their rights. The University shall effectively notify students who are disabled.

D. RECORDS OF THE UNIVERSITY'S LAW ENFORCEMENT UNIT.

1. **"Law enforcement unit"** means any individual, office, department, division or other component of the University, such as the University of Missouri Police Department or noncommissioned security guards, that is officially authorized or designed by the University to:
- a. Enforce any local, state or federal law, or refer to appropriate authorities a matter for enforcement of any local, state or federal law against any individual or organization other than the University itself; or
 - b. Maintain the physical security and safety of the University.
2. A component of the University does not lose its status as a **"law enforcement unit"** if it also performs other, non-law enforcement functions for the University, including investigation of incidents or conduct that constitutes or leads to a disciplinary action or proceedings against the student.
3. **"Records of law enforcement unit"** means those records, files, documents, and other materials that are:
- a. Created by a law enforcement unit;
 - b. Created for a law enforcement purpose; and
 - c. Maintained by the law enforcement unit.
4. **"Records of law enforcement unit"** does not mean:
- a. Records created by a law enforcement unit for a law enforcement purpose that are maintained by a component of the University other than the law enforcement unit; or
 - b. Records created and maintained by a law enforcement unit exclusively for a non-law enforcement purpose, such as disciplinary action or proceeding conducted by the University.
5. The University may contact its law enforcement unit, orally or in writing, for the purpose of asking that unit to investigate a possible violation of, or to enforce, any local, state or federal law.
6. Education records, and personally identifiable information contained in education records, do not lose their status as education records and remain subject to the Act, as well as the disclosure provisions of Section 180.020 L, while in possession of the law enforcement unit.

E. RIGHTS OF INSPECTION AND REVIEW OF EDUCATION RECORDS.

1. The University shall provide students access to their educational records except as provided in Section 180.020 G.
2. The University shall comply with a request within a reasonable period of time, but in no case more than 45 days after the request has been received.
3. The University shall respond to reasonable requests for explanations and interpretations of those records.
4. If circumstances effectively prevent the student from exercising the right to inspect and review the student's education records, the University shall:
 - a. Provide the student with a copy of the records requested; or
 - b. Make other arrangements for the student to inspect and review the requested records.
5. The University shall not destroy any education records if there is an outstanding request to inspect and review the records under this section.

F. FEES FOR COPIES OF EDUCATIONAL RECORDS.

1. Unless the imposition of a fee effectively prevents a student from exercising the right to inspect and review the student's education records, the University may impose a reasonable fee for reproduction costs. This fee will not exceed the actual cost of production.
2. The University shall not charge a fee to search for or to retrieve the education records of a student.

G. LIMITATION ON ACCESS.

1. If the education records of a student contain information on more than one student, the student may inspect and review or be informed of only the specific information about that student.
2. The University will not permit a student to inspect and review education records that are:
 - a. Financial records, including any information those records contain, of his or her parents;
 - b. Confidential letters and confidential statements of recommendation placed in the education records of the student before January 1, 1975, as long as the statements are used only for the purposes for which they were specifically intended; and
 - c. Confidential letters and confidential statements of recommendation placed in the student's education records after January 1, 1975, if:
 - (1) The student has waived his or her right to inspect and review those letters and statements; and
 - (2) Those letters and statements are related to the student's:
 - (a) Admission to the University;
 - (b) Application for employment; or
 - (c) Receipt of an honor or honorary recognition.

H. WAIVERS.

1. A waiver under Section 180.020 G is valid only if:
 - a. The University does not require the waiver as a condition for admission to or receipt of a service or benefit from the University; and
 - b. The waiver is made in writing and signed by the student, regardless of age.
2. If a student has waived his or her rights under Section 180.020 G, the University shall:
 - a. Give the student, on request, the names of the individuals who provided the letters and statements of recommendation; and
 - b. Use the letters and statements of recommendation only for the purpose for which they were intended.
3. A waiver under Section 180.020 G may be revoked with respect to any actions occurring after the revocation. A revocation must be in writing.

I. AMENDMENT OF EDUCATION RECORDS.

1. If a student believes the education records relating to the student contain information that is inaccurate, misleading, or in violation of the student's rights of privacy, he or she may ask the University to amend the record by contacting the University Registrar.
2. The University shall decide whether to amend the record as requested within a reasonable time after the request is received.
3. If the University decides not to amend the record as requested, the University Registrar shall inform the student of its decision and of his or her right to a hearing under Section 180.020 J.

J. RIGHTS TO A HEARING.

1. The University shall give a student, on request, an opportunity for a hearing to challenge the content of the student's education records on the grounds that the information contained in the education records is in violation of the privacy rights of the student.
2. If, as a result of the hearing, the University decides that the information is inaccurate, misleading, or otherwise in violation of the privacy rights of the student, it shall:
 - a. Amend the record accordingly; and
 - b. Inform the student of the amendment in writing.
3. If, as a result of the hearing, the University decides that the information in the education record is not inaccurate,

misleading, or otherwise in violation of the privacy rights of the student, it shall inform the student of the right to place a statement in the record commenting on the contested information in the record or stating why he or she disagrees with the decision of the University, or both.

4. If the University places a statement in the education records of a student, it shall:
 - a. Maintain the statement with the contested part of the record for as long as the record is maintained; and
 - b. Disclose the statement whenever it discloses the portion of the record to which the statement relates.

K. CONDUCT OF A HEARING. Upon the request of the University official charged with custody of the records of the student, the hearing required by Section 180.020 J shall be conducted.

1. The request for a hearing shall be submitted in writing to the campus Chancellor, who will appoint a hearing officer or a hearing committee to conduct the hearing.
2. The hearing shall be conducted and decided within a reasonable period of time following the request for the hearing. The University shall give the student notice of the date, time, and place, reasonably in advance of the hearing.
3. The hearing shall be conducted and the decision rendered by an appointed hearing official or officials who shall not have a direct interest in the outcome of the hearing.
4. The student shall be afforded a full and fair opportunity to present evidence relevant to the hearing, and may be assisted or represented by individuals of his or her choice at his or her own expense, including an attorney.
5. The decision of the University shall be based solely upon the evidence presented at the hearing and shall include a summary of the evidence and the reasons for the decision.
6. The decision shall be rendered in writing within a reasonable period of time after the conclusion of the hearing.
7. Either party may appeal the decision of the hearing official or officials to the campus Chancellor.

L. CONDITIONS UNDER WHICH PRIOR CONSENT IS REQUIRED.

1. The student shall provide a signed and dated written consent before the University discloses personally identifiable information from the student's education records, except as provided in Section 180.020 M.
2. The written consent must:
 - a. Specify the records that may be disclosed;
 - b. State the purpose of the disclosure; and
 - c. Identify the party or class of parties to whom the disclosure may be made.
3. If a student so requests, the University shall provide him or her with a copy of the records disclosed.

M. CONDITIONS UNDER WHICH PRIOR CONSENT IS NOT REQUIRED.

1. The University may disclose personally identifiable information from an education record of a student without the consent required by Section 180.020 L if the disclosure meets one or more of the following conditions:
 - a. The disclosure is to other University officials, including teachers, within the University who have been determined by the University to have legitimate educational interests. A University official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.
 - b. The disclosure is to officials of other schools or school systems in which the student seeks or intends to enroll, upon condition that the student is notified of the transfer, receives a copy of the record if requested, and has an opportunity for a hearing to challenge the content of the record.
 - c. The disclosure is, subject to the requirements of Section 180.020 P, to authorized representatives of:
 - (1) The Comptroller General of the United States;
 - (2) The Attorney General of the United States;
 - (3) The Secretary; or
 - (4) State and local educational authorities.
 - d. The disclosure is in connection with financial aid - defined as a payment of funds provided to an individual (or a payment in kind of tangible or intangible property to the individual) that is conditioned on the individual's

attendance at the University - for which the student has applied or which the student has received, if the information is necessary for such purposes as to:

- (1) Determine eligibility for the aid;
 - (2) Determine the amount of the aid;
 - (3) Determine the conditions for the aid; or
 - (4) Enforce the terms and conditions of the aid.
- e. The disclosure is to state and local officials or authorities to which such information is specifically required to be reported or disclosed pursuant to a state statute adopted prior to November 19, 1974.
- f. The disclosure is to organizations conducting studies for, or on behalf of, educational agencies or institutions to develop, validate, or administer predictive tests, administer student aid programs, or improve instruction. Such studies are to be conducted in such a manner as will not permit the personal identification of students or their parents by persons other than representatives of the organization, and this information will be destroyed when no longer needed for the purpose for which the study is conducted.
- g. The disclosure is to accrediting organizations to carry out their accrediting functions.
- h. The disclosure is to parents of a dependent student, as defined in Section 152 of the Internal Revenue Code of 1986, as amended.
- i. The disclosure is to comply with a lawfully issued subpoena.
- (1) The University may disclose this information only if it makes a reasonable effort to notify the student of the order or subpoena in advance of compliance, so that the student may seek protective action, unless the disclosure is in compliance with --
 - (a) A federal grand jury subpoena and the court has ordered that the existence or the contents of the subpoena or the information furnished in response to the subpoena not be disclosed; or
 - (b) Any other subpoena issued for a law enforcement purpose and the court or other issuing agency has ordered that the existence or the contents of the subpoena or the information furnished in response to the subpoena not be disclosed.
 - (2) If the University initiates legal action against a parent or student, the University may disclose to the court, without a court order or subpoena, the education records of the student that are relevant for the University to process with the legal action as plaintiff.
 - (3) If a parent or eligible student initiates legal action against the University, the University may disclose to the court, without a court order or subpoena, the student's education records that are relevant for the University to defend itself.
- j. The disclosure is in connection with a health or safety emergency, under the conditions described in Section 180.020 Q.
- k. The disclosure is information the University has designated as "**directory information**," under the conditions described in Section 180.020 R.
- l. The disclosure is to the student.
- m. The disclosure, subject to the requirements in Section 180.020 S, is to a victim of an alleged perpetrator of a crime of violence or a non-forcible sex offense. The disclosure may include only the final results of the disciplinary proceeding conducted by the University with respect to that alleged crime or offense. The University may disclose the final results of the disciplinary proceeding, regardless of whether the University concluded a violation was committed.
- n.
 - (i) The disclosure, subject to the requirements in Section 180.020 S, is in connection with a disciplinary proceeding at the University providing that the University determines that:
 - (1) The student is an alleged perpetrator of a crime of violence or non-forcible sex offense; and
 - (2) With respect to the allegation made against him or her, the student has committed the violation of the

- University's rules or policies.
- (ii) The University may not disclose the name of any other student, including a victim or witness, without the prior written consent of the other student.
 - (iii) This section applies only to disciplinary proceedings in which the final results were reached on or after October 7, 1998.
- o. The disclosure is to a parent of a student under the age of twenty-one at the time of disclosure, and is limited to a determination that the student violated University regulations pertaining to the use or possession of alcohol or a controlled substance, as provided by and under the restrictions contained in Section 180.025.

N. RECORD KEEPING.

1. The University shall maintain a record of each request for access to and each disclosure of personally identifiable information from the education records of each student, for as long as the records are maintained.
2. For each request or disclosure the record must include:
 - a. The parties who have requested or received personally identifiable information from the education records; and
 - b. The legitimate interests the parties had in requesting or obtaining the information.
3. If the University discloses personally identifiable information from an education record with the understanding authorized under Section 180.020 O.2, the record of the disclosure required under this section must include:
 - a. The names of the additional parties to which the receiving party may disclose the information on behalf of the University; and
 - b. The legitimate interests under Section 180.020 M which each of the additional parties has in requesting or obtaining the information.
4. The following parties may inspect the record relating to each student:
 - a. The student;
 - b. The school official or his or her assistants who are responsible for the custody of the records; and
 - c. Those parties authorized in Section 180.020 M.1.a and M.1.c for the purposes of auditing the record keeping procedures of the University.
5. Paragraph 1 of this section does not apply if the request was from, or the disclosure was to:
 - a. The student;
 - b. A University official under Section 180.020 M.1.a;
 - c. A party with written consent from the student;
 - d. A party seeking directory information; or
 - e. A party seeking or receiving the records as directed by a federal grand jury or other law enforcement subpoena and the issuing court or other issuing agency has ordered that the existence or the contents of the subpoena or the information furnished in response to the subpoena not be disclosed.

O. LIMITATIONS TO THE REDISCLOSURE OF INFORMATION.

1. The University may disclose personally identifiable information from an education record only on the condition that the party to whom the information is disclosed will not disclose the information to any other party without the prior consent of the student. The officers, employees, and agents of a party that receives information may use the information, but only for the purposes for which the disclosure was made.
2. This does not prevent the University from disclosing personally identifiable information with the understanding that the party receiving the information may make further disclosures of the information on behalf of the University if:
 - a. The disclosures meet the requirements of Section 180.020 M; and
 - b. The University has complied with the requirements of Section 180.020 N.3.
3. Section 180.020 O.1 does not apply to disclosures made pursuant to court orders, lawfully issued subpoenas, litigation under Section 180.020 M.1.i, to disclosures of directory information under Section 180.020 M.1.k, to disclosures made

- to a parent or student under Section 180.020 M.1.j, to disclosures made in connection with a disciplinary proceeding under Section 180.020 M.1.n, or to disclosures made to parents under Section 180.025.
4. Except for disclosures under Section 180.020 M.1.k, l, m, and n, the University shall inform a party to whom disclosure is made of the requirements of this section.
 5. If the University determines that a third party improperly rediscloses personally identifiable information from education records in violation of Section 180.020 O.1, the University may not allow that third party access to personally identifiable information from education records for at least five years.

P. DISCLOSURE OF INFORMATION FOR FEDERAL OR STATE PROGRAM PURPOSES.

1. The officials listed in Section 180.020 M.1.c may have access to education records in connection with an audit or evaluation of federal or state supported education programs, or for the enforcement of or compliance with federal legal requirements which relate to those programs.
2. This information must:
 - a. Be protected in a manner that does not permit personal identification of individuals by anyone except the officials referred to in part 1 of this section; and
 - b. Be destroyed when no longer needed for the purposes listed in part 1 of this section.
3. Part 2 of this section does not apply if:
 - a. The student has given written consent for the disclosure under Section 180.020 L; or
 - b. The collection of personally identifiable information is specifically authorized by Federal law.

Q. RELEASE OF INFORMATION FOR HEALTH OR SAFETY EMERGENCIES. The University may release information from an education record to appropriate persons in connection with an emergency if the knowledge of such information is necessary to protect the health or safety of a student or other persons. The factors which will be taken into account in determining whether the records may be released under this section include the following:

1. The seriousness of the threat to the health or safety of the student or other persons;
2. The need for such records to meet the emergency;
3. Whether the persons to whom such records are released are in a position to deal with the emergency; and
4. The extent to which time is of the essence in dealing with the emergency.

R. CONDITIONS FOR DISCLOSURE OF DIRECTORY INFORMATION.

1. The University may disclose directory information if it has given public notice to students in attendance at the University of:
 - a. The types of personally identifiable information that the University has designated as directory information;
 - b. A student's right to refuse to let the University designate any or all of those types of information about the student as directory information; and
 - c. The period of time within which a student has to notify the University in writing that he or she does not want any or all of those types of information about the student designated as directory information.
2. The University may disclose directory information about former students without meeting the conditions of this section.

S. DEFINITIONS APPLYING TO THE NONCONSENSUAL DISCLOSURE OF RECORDS IN CONNECTION WITH DISCIPLINARY PROCEEDINGS CONCERNING CRIMES OF VIOLENCE OR NON-FORCIBLE SEX OFFENSES.

As used in this part:

1. **"Alleged perpetrator of a crime of violence"** is a student who is alleged to have committed acts that would, if proven, constitute any of the following offenses or attempts to commit the following offenses that are defined in Title 18, **"Crimes and Criminal Procedure,"** of the United States Code:
 - a. Arson;
 - b. Assault offenses;
 - c. Burglary;
 - d.

- e. Criminal homicide - manslaughter by negligence;
 - f. Criminal homicide - murder and nonnegligent manslaughter;
 - g. Destruction/damage/vandalism of property;
 - h. Kidnapping/abduction;
 - i. Robbery; or
 - i. Forcible sex offenses.
2. **"Alleged perpetrator of non-forcible sex offense"** means a student who is alleged to have committed acts that, if proven, would constitute statutory rape or incest. These offenses are defined in Title 18, **"Crimes and Criminal Procedure,"** of the United States Code.
 3. **"Final results"** means a decision or determination, made by an honor court or council, committee, commission, or other entity authorized to resolve disciplinary matters within the University. The disclosure of final results must include only the name of the student, the violation committed, and any sanction imposed by the University against the student.
 4. **"Sanction imposed"** means a description of the disciplinary action taken by the University, the date of its imposition, and its duration.
 5. **"Violation committed"** means the University rules or code sections that were violated and any essential finding supporting the University's conclusion that the violation was committed.

Procedure for Appeal of Grades

Students are responsible for meeting the standards of academic performance established for each course in which they are enrolled. The establishment of the criteria for grades and the evaluation of student academic performance are the responsibilities of the instructor.

This grade appeal procedure is available only for the review of allegedly capricious grading and not for review of the instructor's evaluation of the student's academic performance. Capricious grading, as that term is used here, comprises any of the following:

- The assignment of a grade to a particular student on some basis other than the performance in the course;
- The assignment of a grade to a particular student according to more exacting or demanding standards than were applied to other students in the course; (**Note:** Additional or different grading criteria may be applied to graduate students enrolled for graduate credit in 300- and 400-level courses.)
- The assignment of a grade by a substantial departure from the instructor's previously announced standards.

Appeal Procedures

1. The student should first discuss the course grade fully with the instructor of the course. This must be done within six weeks after the beginning of the succeeding regular academic semester.
2. If the matter cannot be resolved by consultation with the instructor, the student should use the departmental grade-appeal procedure. Every academic unit (school, College or department) must have a set of appeal procedures that are to be made available to students on request. These procedures will specify the manner in which the departmental review of the challenged grade will be conducted.
3. If the matter is not resolved at the departmental level, an appeal can be made to the academic dean, in accordance with the school's or College's appeals process.
The decision of the dean will be communicated to the student, the instructor and the department.
4. If the matter is not resolved within the school or College, the student may appeal to the chancellor or designated representative. This appeal must be made within 10 consecutive calendar days after notification of the decision of the dean.
5. The chancellor or designated representative shall review the full record of the case and appeal documents. At this level, the chancellor may appoint an ad hoc academic appeals committee to review the record and provide advice on the matter.
The decision of the chancellor, or designated representative, is final and will be communicated to the student, the instructor, the department and the dean of the school or College.

Academic Amnesty Policy

The University of Missouri-Kansas City has an Amnesty policy to enable those students who did not perform adequately in their undergraduate enrollment at UMKC to be given a second chance to pursue their academic goals. The policy is as follows:

I. A student may apply or petition for amnesty if she or he meets the following requirements:

1. Has not been enrolled at UMKC at any time during the past two years.
2. Applies for readmission at UMKC and applies for academic amnesty at the same time or applies for amnesty before the end of the first semester of re-enrollment.

Note: Amnesty will not be considered for students who are concurrently enrolled or who intend to enroll at colleges and universities other than UMKC.

II. Academic Amnesty will be implemented as follows:

1. Grades for all UMKC courses taken in the semester or semesters for which amnesty is requested will be marked if the request is approved. The student may not choose specific courses to be included, leaving other courses with an unmarked original grade.
2. The original grade will remain on the student's record, but will be marked by an "x" preceding the grade. For plus/minus grades, the plus or minus will be dropped and the base grade will be used. For example, grades of A, B+, B, B-... F will be changed to XA, XB,XF. These hours and grades will remain on the transcript, but will not count toward cumulative hours nor GPA, nor can they be used to fulfill any degree requirements, regardless of the original grade.
3. A statement "Grades granted amnesty by faculty committee action" (or similar) will follow the courses granted amnesty.
4. The change to the transcript will be processed within 30 days following an approved petition for amnesty but in no case sooner than the end of the fourth week of classes in the first term in which the student re-enrolls. If the student then withdraws before grades are awarded at the end of that term the grades will be returned to the original grades.
5. Students can receive amnesty only one time.

Academic Amnesty Procedures

1. Application may be made by use of a standard application form available online at www.umkc.edu/registrar/forms.html or by any written document or letter which contains the necessary information (see form). Applications should be submitted to the UMKC Records Office, to the attention of the Assistant Registrar-Records, prior to the first day of classes in the student's second semester of readmission.
2. Amnesty applications are acted upon by a standing faculty committee to be appointed by the Provost's Office.
3. Notification of committee decisions will be made in writing to the student and the appropriate Academic Deans by the UMKC Records Office.

Guidelines on Sex Discrimination

The University of Missouri-Kansas City complies with Title IX of the Educational Amendment of 1972 which ensures that all employees and students are not victims of sex discrimination. To ensure compliance with this policy of nondiscrimination on the basis of sex, the University has taken the following steps:

1. The University recruits employees of both sexes for all jobs except where sex is a bona fide occupational qualification.
2. Advertisements in journals, newspapers and other media for employment do not express a sexual preference unless sex is a bona fide occupational qualification for the position.
3. Personnel policies for the University explicitly state that there will be no discrimination on account of sex.
4. Promotion and job advancement opportunities except where governed by the rules and regulations of tenure are afforded to all employees regardless of sex. The University makes no distinction based upon sex in employment opportunities, wages, hours or other conditions of employment.
5. Policies and practices of the University assure that appropriate physical facilities are available for both sexes.
6. Women employees are not penalized in their conditions of employment because of time away from work on account of child bearing. Following childbirth and upon signifying intent to return within a reasonable time, such female employees are reinstated to their original jobs or positions of like status and pay without loss of service credit.
7. The wage schedule and job classifications of the University are not related to or based on the sex of the employee.

8. The University has issued policies and guidelines to ensure an educational and work environment that is free from sexual harassment.
9. The University has taken the above steps to alleviate sex discrimination within the institution. Those employees who believe they have been discriminated against on the basis of sex may use the appropriate internal grievance procedure.

Guidelines on Discrimination on the Basis of Religion or National Origin

Members of various religious and ethnic groups, primarily but not exclusively of Eastern, Middle and southern European ancestry, such as Muslim, Jewish, Catholic, Italian, Greek and Slavic groups, continue to be excluded from executive, middle management and other job levels because of discrimination based on their religion or national origin. Under the Equal Opportunity Clause contained in section 202 of Executive Order 11246 as amended, the University of Missouri-Kansas City does not discriminate against employees or applicants for employment because of religion or national origin, and employees are treated during employment without regard to their religion or national origin. To ensure this, the University of Missouri-Kansas City has taken the following steps:

1. The University's Office of Equal Opportunity/Affirmative Action and external communications media have made known that equal employment opportunity without regard to religion or national origin is the policy of the University. All employees of the University must be committed to equal employment for all persons without regard to religion or national origin.
2. In all of its recruitment sources, the University of Missouri-Kansas City expresses that it is committed to equal employment opportunity without regard to religion or national origin.
3. Through local and national publications, as well as through its Web site job listings at <http://www.umkc.edu/html/acjobs> and <http://www.umkc.edu/adminfinance/hr/jobs/index.asp>, the University informs the public, including community, religious and ethnic groups, of employment opportunities available at the University of Missouri-Kansas City.
4. The University of Missouri-Kansas City accommodates the religious observance and practices of all employees when reasonably possible.
5. The University has taken the above steps to eliminate discrimination based on religion or national origin. Employees who believe they have been discriminated against on the basis of religion or national origin may use the University's internal grievance procedures.

Guidelines on Sexual Harassment

(Executive Order No. 20, 3-17-81; 330.060 Sexual Harassment; Bd. Min. 3-18-93.)

This policy is also available at <http://www.umsystem.edu/ums/departments/gc/rules/personnel/330/060.shtml>.

This University of Missouri policy aims for an increased awareness regarding sexual harassment by making available information, education and guidance on the subject for the University community.

A. Policy Statement. It is the policy of the University of Missouri, in accord with providing a positive, discrimination-free environment, that sexual harassment in the work place or educational environment is unacceptable conduct. Sexual harassment is subject to discipline, up to and including separation from the institution.

B. Definition. Sexual harassment is defined for this policy as either

1. Unwelcome sexual advances or requests for sexual activity by a University employee in a position of power or authority to a University employee or a member of the student body, or
2. Other unwelcome verbal or physical conduct of a sexual nature by a University employee or a member of the student body to a University employee or a member of the student body, when:
 - a. Submission to or rejection of such conduct is used explicitly or implicitly as a condition for academic or employment decisions; or
 - b. The purpose or effect of such conduct is to interfere unreasonably with the work or academic performance of the person being harassed; or
 - c.

The purpose or effect of such conduct, to a reasonable person, is to create an intimidating, hostile, or offensive environment.

C. Non-Retaliation. This policy also prohibits retaliation against any person who brings an accusation of discrimination or sexual harassment or who assists with the investigation of sexual harassment. Notwithstanding this provision, the University may discipline an employee or student who has been determined to have brought accusation of sexual harassment in bad faith.

D. Redress Procedures. Members of the University community who believe they have been sexually harassed may seek redress, using the following options:

1. Pursue appropriate informal resolution procedures as defined by the individual campuses. These procedures are available from the campus Equal Opportunity/Affirmative Action Officer.
2. Initiate a complaint or grievance within the period of time prescribed by an applicable grievance procedure. Faculty are referred to Section 370.010, "Academic Grievance Procedures"; staff to Section 380.010, "Grievance Procedure for Administrative, Service and Support Staff" and students to Section 390.010, "Discrimination Grievance Procedure for Students". Pursuing a complaint or informal resolution procedure does not compromise one's rights to initiate a grievance or seek redress under state or federal laws.

E. Discipline. Upon receiving a charge of sexual harassment against a member of faculty, staff, or student body, the University will investigate and, if substantiated, will initiate the appropriate disciplinary procedures. There is a five year limitation period from the date of occurrence for filing a charge that may lead to discipline. An individual who makes an accusation of sexual harassment will be informed:

- At the close of the investigation, whether or not disciplinary procedures will be initiated; and

Minimum Standards of Progress for Veterans

Veterans Affairs regulations require that all veterans drawing VA educational benefits at UMKC must comply with the Veterans Affairs Minimum Standards of Progress. These standards dictate that the veteran must be making satisfactory progress toward a degree while enrolled. The University's academic and probation policies have been approved by the Veterans Affairs as those Minimum Standards of Progress.

Undergraduate Student

Undergraduate degree-seeking students' academic status is assessed at the end of every term, whether the student is full-time or part-time for that term. A summer session is considered the same as a semester for the purpose of the following regulations:

1. In general, students will be placed on academic probation whenever their official UM grade-point average falls below 2.0 (C average). Some academic units may have a higher grade-point average requirement. New freshman admitted to UMKC on the basis of high school records, who have grade-point averages between 1.50 and 1.99 at the end of the first semester of either full- or part-time study will be placed on academic warning. Students on academic warning must achieve an overall C average by the end of their second semester or be placed on regular probation. They then would be subject to the regular probation requirements.
2. Students on academic probation will be restored to good standing when their UM grade-point average reaches 2.0 or the GPA level established by their academic units.
3. Students on academic probation must maintain the grade-point average required by their academic units during each subsequent semester or summer session while on probation. Otherwise, they are ineligible to re-enroll without the approval of the academic units.
4. Students on academic probation must remove themselves from probation within three successive semesters (including the semester in which they originally were placed on probation). Otherwise, they are ineligible to re-enroll without the approval of the academic units.
5. Students are responsible for knowing their academic status by referring to the term grade reports and their permanent academic records in the UMKC Records Office.

Graduate and Professional Students

Because there may be some variation in the academic and probation policies in the various graduate and professional schools within the University, reference should be made to the appropriate sections in this catalog.

Conduct

Institutional policy relating to conduct for veteran students is the same as for all other students. Statement of requirements is shown elsewhere in this catalog.

Student Records

Adequate records are kept by the school to show the progress of each eligible veteran. The records are sufficient to show continued pursuit at the rate for which enrolled and the progress being made.

These records include the final grade in each subject completed and a record of the date of withdrawal from any class the veteran does not complete. The last date of attendance must be reported to the Veterans Affairs.

No veteran will be considered to have made satisfactory progress when the veteran fails all subjects undertaken except with a show of mitigating circumstances, when enrolled in two or more unit subjects. This is immediately reported to Veterans Affairs. The determination for the continuance of benefits is made by the regional office of the Veterans Affairs.

Discrimination Grievance Procedure for Students

(390.010 Discrimination Grievance Procedure for Students; Bd. Min. 12-17-82, Bd. Min. 1-25-90, Amended Bd. Min. 10-16-03)

This policy is also available at <http://www.umsystem.edu/ums/departments/gc/rules/grievance/390/010.shtml>.

A. General

1. It is the policy of the University of Missouri to provide equal opportunity for all enrolled students and applicants for admission to the University on the basis of merit without discrimination on the basis of their race, color, religion, sex, sexual orientation, national origin, age or disability, or Vietnam era veteran status. Sexual harassment shall be considered discrimination because of sex. This policy shall not be interpreted in such a way as to violate the legal rights of religious organizations or military organizations associated with the Armed Forces of the United States of America.
2. To insure compliance with this policy, all University of Missouri prospective or enrolled students shall have available to them this student discrimination grievance procedure for resolving complaints or grievances regarding alleged discrimination.
3. This grievance procedure neither supersedes nor takes precedence over established University procedures of due process for any and all matters related to Academic Dishonesty, Grade Appeals, Traffic Appeals, Disciplinary Appeals, or other specific campus procedures which are authorized by the Board of Curators and deal with faculty/staff responsibilities.
4. These proceedings may be terminated at any time by the mutual agreement of the parties involved. **Note:** A grievance concerning specific incidents filed under this discrimination grievance procedure shall not be processed on behalf of any student who elects to utilize another University grievance procedure. In addition, the filing of a grievance under these procedures precludes the subsequent use of other University grievance or appeals procedures for the same incident.

B. Definitions

1. A complaint is an informal claim of discriminatory treatment. A complaint may, but need not, constitute a grievance. Complaints shall be processed through the informal procedure herein set forth.
2. A Grievance is the written allegation of discrimination which is related to:
 - a. Recruitment and admission to the institution.
 - b. Admission to and treatment while enrolled in an education program.
 - c. Employment as a student employee on campus.
 - d. Other matters of significance relating to campus living or student life, including, but not limited to: assignment of roommates in resident halls; actions of fraternities and sororities; membership in or admission to club/organizations; student health services; and financial aid awards.
3. A student is any person who has applied for admission or readmission, or who is currently enrolled, or who was a student of the University of Missouri at the time of the alleged discrimination.

4. Persons with disabilities--For the purpose of this student discrimination grievance procedure, a "person with a disability" has been substituted for "handicapped individual" (Section 504, Rehabilitation Act of 1973) and shall be defined as ". . . any person who:
 - a. Has a physical or mental impairment which substantially limits one or more of such person's major life activities;
 - b. Has a record of such impairment; or
 - c. Is regarded as having such an impairment." For purpose of this definition, "major life activity" means any mental or physical function or activity which, if impaired, creates a substantial barrier to employment or education. Any reference in this document to written materials or to written or oral presentations within the student discrimination grievance procedure may be adjusted to accommodate persons with disabilities for whom the stated materials or required presentations would not be appropriate. Cost of such accommodation will be borne by the University, with no charge to the individual.
5. Appropriate Administrative Officer -- The primary administrative officer on the staff of the Chancellor (in the area of Student Affairs/Services, Administrative Services, Development, and Academic Affairs) having administrative responsibility for the unit in which the discrimination is alleged to have occurred.
6. Grievance Consultant -- At any step the Director of Equal Opportunity or of Affirmative Action may be asked to serve as a consultant by any of the parties involved in this grievance procedure.

C. Complaints

1. Policies and Procedures -- A student with a complaint will be provided with copies of appropriate policies and procedures pertaining to student complaints and grievances, and the Chief Student Personnel Administrator or his/her designee and the Officer for Equal Opportunity/Affirmative Action shall be available to assist the student in understanding the opportunities afforded through such policies and procedures. The student may choose to have an adviser participate in any stage of the grievance procedures, subject to the restrictions of the hearing procedures set forth in Section 390.010 F.
2. Joint Complaint -- If more than one student is aggrieved by the same action, these students may, by mutual written agreement among themselves, file with the Chief Student Personnel Administrator a complaint and pursue their complaints jointly under this grievance procedure. If the number of students in such a case is so large as to make it impractical for them to be heard individually in a joint proceeding, they may, by mutual agreement, elect one or more of their number to act on behalf of them all.
3. Students may informally discuss a complaint with the relevant supervising administrator. Every reasonable effort should be made to resolve the matter informally at this administrative level. If a satisfactory resolution is not reached, the student may pursue the matter through each level of administrative jurisdiction up to and including the Appropriate Administrative Officer, or file a grievance within the time specified in D.1.b.
4. Complaints Involving Recruitment
 - a. Undergraduate applicants must first present complaints about recruitment to the Director of Admissions. If a satisfactory resolution is not reached, the applicant may appeal the matter to the immediate supervising officer of the Director of Admissions.
 - b. Applicants for graduate study may request a meeting with the academic department head and the Dean of the College, or their designees, who are actually involved in the recruitment effort to discuss the matter informally. If a satisfactory resolution is not reached, the applicant may appeal to the Dean of the Graduate School and finally to the Appropriate Administrative Officer.
5. Complaints Involving Admissions (Undergraduate or Professional)
 - a. Undergraduate and professional student applicants shall present complaints to the Director of Admissions or to the Dean of the School or College, depending upon where the application was originally filed.
 - b. This University official shall compare the person's academic qualifications against the official University admissions criteria and review the denial. If the denial is sustained, the applicant may appeal this decision to the official's immediate supervisor or to the appropriate admissions committee.
6. Complaints Involving Admissions (Graduate) -- Applicants to the Graduate School may ask for a meeting with the academic department head of the program to which the applicant was seeking admission. This official shall explain the reasons for the denial of recommendation for admission. If a satisfactory resolution is not reached, the applicant may then appeal to the Dean of the Graduate School or to the appropriate admissions committee. If the denial is upheld, the applicant may appeal the decision to the appropriate administrative officer.
7. Complaints Involving Admissions to or Treatment in an Educational Program or in the Granting of Assistantships -- An undergraduate or graduate student enrolled at the institution who has a discrimination complaint involving admission to or treatment in an educational program or in the granting of assistantships may request a conference with the appropriate department head and with the Dean of the School or College (or the Dean's designee) to discuss the matter informally. If a satisfactory resolution is not reached, the student may present a grievance pursuant to Section 390.010 F.

8. Complaints Involving Non-academic Matters Related to Campus Living and Student Life -- A currently enrolled student who has a University-related complaint concerning discrimination in non-academic matters including but not limited to assignment of roommates, actions of fraternities and sororities, membership in or admission to clubs/organizations, student health services and financial aid awards, may request a conference with the appropriate administrative supervisor, department head or director to discuss the matter informally. If a satisfactory resolution is not reached, the student may present a grievance pursuant to Section 390.010 D.
9. Complaints Involving Student Employment on Campus -- A student enrolled at the University who alleges that discrimination occurred either in applying for work or while working as a student employee at a University job may request a conference with the supervisor, department head or director of the employing unit to discuss the matter informally. If a satisfactory resolution is not reached, the student may present a grievance pursuant to Section 390.010 D.
10. Complaints Involving Financial Aid (Undergraduate, Graduate, Professional):
 - a. Undergraduate, graduate and professional student aid applicants shall present complaints to the Director of Student Financial Aid where the application was originally filed or the award originally made.
 - b. This University official shall compare the person's financial and academic qualifications against the official University financial aid criteria and review the award amount or denial of the aid. If the original judgment is sustained, the applicant may appeal this decision to the official's immediate supervisor or to the appropriate financial aid committee.

D. Initiating a Grievance

1. Policies and Procedures -- A student with a grievance will be provided copies of appropriate policies and procedures pertaining to student complaints and grievances, and the Chief Student Personnel Administrator or designee, and the Officer for Equal Opportunity/Affirmative Action, shall be available to assist the student in understanding the opportunities afforded through such policies and procedures. The student may choose to have an adviser participate in any stage of the grievance procedure, subject to the restrictions of the hearing procedures set forth in Section 390.010 F.
 - a. Joint Grievance -- If more than one student is aggrieved by the same action, these students may, by mutual written agreement among themselves, file with the Chief Student Personnel Administrator a grievance and pursue their grievances jointly under this grievance procedure. If the number of students in such a case is so large as to make it impractical for them to be heard individually in a joint proceeding, they may, by mutual agreement, elect one or more of their number to act on behalf of all of them.
 - b. Regardless of their nature, all discrimination grievances are to be filed with the Chief Student Personnel Administrator. A grievance must have been filed by a student within one-hundred-eighty(180) calendar days of the date of the alleged discriminatory act.
2. Filing a Grievance
 - a. All grievances must be presented in writing and contain the following information:
 1. A clear concise statement of the grievance which includes the name of the person(s) against whom the grievance is made, the date(s) of the alleged discrimination and a statement describing the specific supporting evidence;
 2. A brief summary of the prior attempts to resolve the matter, which includes the names of persons with whom the matter was discussed, and the results of those previous discussions;
 3. A specific statement of the remedial action or relief sought.
 - b. Within seven (7) working days, the original grievance form with an explanation will be returned to the student if, in the judgment of the Chief Student Personnel Administrator, the statements are vague or do not meet the above requirement. The student may make the necessary corrections and resubmit the grievance within seven (7) days.
3. Any grievance not filed within the time limits specified in Section 390.010 D.1.b shall be deemed waived by the grievant. The Chief Student Personnel Administrator may extend the time limits only if adequate cause for an extension of the time limits can be shown by the student.
4. For informational purposes, copies of the grievance shall be forwarded to the Appropriate Administrative Officer and the Director of Equal Opportunity/Affirmative Action.
5. Within fifteen (15) working days of receipt of a grievance that satisfies the requirement of Section 390.010 D.1.b, the Appropriate Administrative Officer, with the consent of the parties involved, may establish an informal hearing with the aggrieved student, the responding faculty/staff/organization, the respondent's supervisor and the Appropriate Administrative Officer's designee. The Appropriate Administrative Officer shall not involve himself/herself in this meeting. If the informal means of resolving the grievance fails, a grievance committee will be impaneled as called for in Section 390.010 E.1.

E. Formation of a Grievance Committee

1. It is the Appropriate Administrative Officer's responsibility to initiate the selection of the grievance committee within fifteen (15) working days after the request for the formation of a grievance committee, or after the completion of the informal hearing provided for in Section 390.010 F.5 without satisfaction to the grievant.
2. A grievance hearing panel shall be established by October 1 of each year from which a grievance committee should be constituted. The panel shall consist of ten (10) faculty, ten (10) staff and ten (10) students. Selection of the panel will be made by the Chief Student Personnel Administrator from recommendations by the appropriate faculty, staff and student associations. Selection of membership will consider sex, race, disability, academic rank, student classification and employee classification. Membership on the hearing panel shall be for two years. A member's term shall expire on September 30 of the second year unless he/she is serving at that time on a hearing committee still in the process of reviewing an unresolved grievance. In such case, the member's term shall expire as soon as the committee has submitted a written report of its findings and recommendations to the Appropriate Administrative Officer.
3. A hearing committee shall be composed of five (5) members. The grievant shall select two (2) members from the grievance hearing panel provided by the Chief Student Personnel Administrator. The responding faculty/staff/organization shall select two (2) members from the grievance hearing panel. Both parties should have their selections made within 15 working days of the receipt of the request. The four committee members shall then select an additional member from the grievance hearing panel to serve as chair. Neither members of the immediate departmental unit nor student members of pertinent student organizations involved in the grievance shall be eligible to serve on the committee.
4. Any person selected to a grievance committee will be expected to serve on such committee and to be present at all sessions. If a member is absent from a single session, that person will be required to review all tapes or transcribed proceedings of that session prior to the next meeting of the committee. Should a member be absent from two sessions or should a member request to be excused from service for reasons of illness, necessary absence from the campus or other hardship, then the member shall be replaced in the same manner used in the original selection (see Section 390.010 E.3). If a member is unable or ineligible to serve for whatever reason, the replacement shall review all tapes or written transcripts and all submitted evidence prior to service on the committee. Five members of the hearing committee, duly selected as in Sections 390.010 E.3 and E.4 must attend the opening and closing session of the hearing.

F. Hearing Procedures for Formal Grievances

1. It shall be the responsibility of the Appropriate Administrative Officer to coordinate the procedures contained herein, to make provisions for hearing rooms, to coordinate secretarial and recording services and to otherwise serve the grievance committee as needed.
2. At the first organizational meeting of the grievance committee, the committee shall elect a chairperson from among the members to preside over subsequent meetings. Then the chairperson shall schedule a hearing at the earliest convenient time when all affected parties can be present.
3. A quorum consists of a minimum of four members of the committee except as provided by Section 390.010 E.4.
4. The grievance committee shall invite the grievant and the responding person to all hearings. Attendance at the hearings shall be limited to persons who have an official connection with the case as determined by the chairperson. The grievant and the responding person may choose to be accompanied by an adviser. Others whose participation in the hearing is considered essential in order to assist the committee in establishing the facts of the case shall appear before the committee only long enough to give testimony and to answer questions of committee members.
5. It is within the duties and responsibilities of all members of a grievance committee to commit themselves to observe procedures consistent with fairness to all parties concerned. For example, it is a matter of principle that members of the grievance committee will not discuss a case with anyone outside of the hearing process and that their finding will not be influenced by anything other than the evidence presented to them in meetings in which all affected parties are present.
6. The grievance committee shall set forth the rules of procedure for the hearing within the guidelines set forth herein. The chairperson may, for good cause and with the concurrence of a majority of the entire committee, authorize deviation from the suggested format, in which case the principal parties shall be notified.
 - a. The grievant shall be heard first in all phases of a grievance hearing and shall be primarily responsible for the presentation of his/her position.
 - b. The adviser of the grievant or respondent may advise that person and may briefly explain his or her position but shall not be permitted to testify or to cross-examine.
 - c. A reasonable time limit should be established for opening and closing statements and shall be announced prior to the hearing.
 - d. Length of hearing sessions may be established in advance; every effort should be made to conduct the hearing as expeditiously as possible, with equal fairness to both parties.
 - e.

The interested parties shall provide the chairperson with the names of the adviser and potential witnesses at least forty-eight (48) hours prior to the hearing. It is the responsibility of the interested party, working with the chairperson, to ensure the presence of these individuals in a timely manner.

- f. After initial witnesses for both parties have been heard, such witnesses may be recalled for additional questioning if requested by either party or the grievance committee. The committee may call new witnesses whose testimony it deems relevant or helpful.
 - g. In order to promote the truthful, unfettered exchange of information and ideas, all testimony pertaining to the grievance hearing shall be held in confidence.
 - h. Only evidence relevant to the grievance may be introduced. Questions regarding the admissibility of evidence shall be decided by the chairperson.
7. At any point in the proceedings prior to the time at which the committee reaches its final decision, the grievant may withdraw any portion or all of the grievance with the consent of a majority of the committee members and of the respondent. In all cases of withdrawal at the consent of the committee and of the respondent, the grievant shall not have the privilege of reopening the same grievance at any time in the future. In the event that the student refuses to participate further in the committee hearing, the committee may choose to continue the case or to move to closure with an appropriate closing statement as per Section 390.010 F.9.
 8. A confidential tape recording of the grievance hearing shall be made and will be accessible to the parties involved, the committee, the Appropriate Administrative Officer, the Chancellor, the President, members of the Board of Curators and authorized representatives on a need-to-know basis. Either party to the grievance may request that the committee provide a written transcript of testimony. The cost of preparation of such a transcript is to be paid by the party making such request unless Section 390.010 B.4 is applicable. After the report of the grievance committee has been prepared, the tapes and relevant materials will be sealed and filed in the Appropriate Administrative Office. Unless extraordinary circumstances apply, these materials will be destroyed at the end of five years.
 9. At the conclusion of the grievance hearing, the members of the grievance committee shall meet in closed session to deliberate upon their findings. A majority vote of the entire committee shall be required on all decisions. The grievance committee shall make a written report on findings and recommendations to the Appropriate Administrative Officer of the University, with copies to the grievant(s) and the responding person(s). The written report will contain:
 - a. A statement of the purpose of the hearing,
 - b. Issues considered,
 - c. A summary of the testimony and other evidence presented,
 - d. Findings of fact as developed at the hearing, and
 - e. Recommendations for final disposition of the case.
 10. The Appropriate Administrative Officer will make his/her decision. This decision and the actions that have been taken shall be presented to both parties in writing. If the administrative officer does not accept the recommendations of the grievance committee, a written statement of the reasons for so ruling must be given to both parties and to the chairperson of the committee.
 11. If requested by the grievant or the responding party, normally within seven (7) calendar days of the notification of the decision, the decision of the Appropriate Administrative Officer may be subject to a review of the records by the Chancellor. Any review and decision by the Chancellor shall be made normally within thirty (30) calendar days. The decision of the Chancellor can be appealed to the President, who shall have thirty (30) calendar days in which to make a decision, which shall be final.
 12. Grievances shall receive prompt attention. The hearing and the report of the grievance committee shall normally be completed within sixty (60) calendar days of the formation of the grievance committee, and a final decision shall be made by the Appropriate Administrative Officer normally within ten (10) calendar days thereafter. In any case in which these time schedules should prove to be inadequate, the committee shall present, in writing, an amended time schedule to all parties involved.

Student Discrimination Grievance Procedure Form

(Use additional sheets if needed)

1. Your Name:

Check One: Male____ Female____

Student I.D. No.:

Mailing Address:

City, State, Zip Code:

Telephone:

2. Submitted to (Campus specific title for Chief Student Personnel Administrator):

On (Month/Day/Year):

3. The basis for the grievance is alleged discrimination on the basis of (Race/Color/Religion/Sex/National Origin/Age/Disability):

4. University official or unit against whom this grievance is filed (Name/ Department):

5. Explain in a clear and detailed statement the following:

a. The nature of the grievance and a description of specific supporting evidence:

b. The specific remedial action or relief sought:

For grievances alleging discrimination to admission and/or treatment while enrolled in an educational program, employment on campus, or other matters of consequence relating to campus living or activities.

c. A summary outlining with whom the point(s) of dissatisfaction were discussed and with what results:

6. Date you consider the "Informal discussion" ended:

I HAVE READ AND UNDERSTAND THE ABOVE GRIEVANCE FORM AND GRIEVANCE PROCEDURE FOR STUDENTS. THIS GRIEVANCE I AM FILING IS TRUE TO THE BEST OF MY KNOWLEDGE, INFORMATION, OR BELIEF.

Signature_____ Date_____

This form forwarded to (Appropriate Administrative Officer):

On (Month/Day/Year):

By (Campus-specific title for Chief Student Personnel Administrator):

(Campus Address)

Suggested Format for Hearing

I. Opening remarks accompanied by written submission of parties' outlines of relevant, non-redundant evidence to be offered to committee.

a. Grievant

b. Respondent

II. Consideration of any decision on objections to acceptance of items of evidence.

III. Presentation of relevant, non-redundant evidence.

a. Grievant (with additional questions from Respondent and/or committee)

1. Witnesses

2. Non-testimonial evidence

b. Respondent (with additional questions from Grievant and/or committee)

1. Witnesses

2. Non-testimonial evidence

IV. Opportunity for presentation of any rebuttal evidence.

a. Grievant

b. Respondent

V. Presentation of additional evidence requested by committee.

VI. Summation of case

a. Grievant

b. Respondent

Policy on Positive Work and Learning Environment

(330.080 Maintaining a Positive Work and Learning Environment; Executive Guideline No. 3, 7-18-97; Executive Order No. 3 replaced by policy stated in Bd. Min. 1-29-99.)

This policy is also available at <http://www.umsystem.edu/ums/departments/gc/rules/personnel/330/080.shtml>.

1. The University of Missouri is committed to providing a positive work and learning environment where all individuals are treated fairly and with respect, regardless of their status. Intimidation and harassment have no place in a university community. To honor the dignity and inherent worth of every individual -- student, employee, or applicant for employment or admission -- is a goal to which every member of the university community should aspire and to which officials of the University should direct attention and resources.
2. With respect to students, it is the University's special responsibility to provide a positive climate in which students can learn. Chancellors are expected to provide educational programs and otherwise direct resources to creative and serious measures designed to improve interpersonal relationships, to help develop healthy attitudes toward different kinds of people, and to foster a climate in which students are treated as individuals rather than as members of a particular category of people.
3. With respect to employees, the strength we have as a university is directly related to maintaining a positive work environment throughout the institution. The University should provide a positive recruiting and work environment focused on the duties and skills of the work to be performed. It is the expectation of the University that all employees and potential employees will be treated on the basis of their contribution or potential contribution without regard to personal characteristics not related to competence, demonstrated ability, performance, or the advancement of the legitimate interests of the University. The General Officers are expected to provide training programs for supervisors to assist in achieving this objective.
4. With respect to violations of the policy, faculty, staff and students may utilize their respective grievance procedures approved by the Board of Curators. The approved grievance procedures are as follows: Grievance procedure in Section 370.010 for faculty; grievance procedure in Section 380.010 for staff; and grievance procedure in Section 390.010 for students, and each such procedure shall be deemed as amended to include grievances filed under this policy. This policy shall not be interpreted in such a manner as to violate the legal rights of religious organizations, or military organizations associated with the Armed Forces of the United States of America.

College of Arts & Sciences

College of Arts & Sciences American Studies

AMER-ST 250 Introduction To American Studies I

This course is the first half of the year long, required introductory course in American Studies. It is also open to all undergraduates. It focuses on works and authors, from the turn-of-the century to the present, who are generally considered part of the American Studies canon and emphasizes understanding what America is/was according to these writers. The course is grounded in questions of citizenship, civic responsibility, ethics, character, progress and westward expansion. It will also look at the place of distinct disciplines (political science, English, anthropology, history, sociology, communication studies) in grappling with many of these questions. The course will introduce students to American Studies as an area of study and interdisciplinary scholarship as a methodological tool. Offered: Fall Semester.

3 hrs

[back to top](#)

AMER-ST 251 Introduction To American Studies II

This course is the second half of the year long, required introductory course in American Studies. It is also open to all undergraduates. Students will be expected to locate themselves within American Studies as an area of study and will be pushed to think critically about the field by looking at the work of scholars in Cultural History, Media Studies, Regional Studies, Black Studies, Public History, Critical Legal Studies, Women's Studies and American Studies in an international context. Students will also be encouraged to place this scholarship in dialogue with that from the first semester in order to look at the boundaries of a field that is constantly changing. Prerequisite: A&S 250 Offered: Winter Semester.

3 hrs

[back to top](#)

AMER-ST 300 CD American Social Film: Silver Screen And The American Dream

This course will combine American social history and American film history. Using Hollywood entertainment films, the course will look at Hollywood as an indicator of social, political and economic conditions in the United States from the early 1900s to the late 1950s. The main topics are war and the threat of war, poverty and affluence, racial tensions, censorship, and political zealotry. A paper is required and a social history textbook, a film history textbook, a play by Arthur Miller, an a collection of articles constitute core readings. This course is offered as a cluster with COMM- ST 402CD and ENGLISH 300cd

3 hrs

[back to top](#)

AMER-ST 301 American Stds: Is/Tutorial: Themes In The American Popular Arts

This course uses the popular arts as an entree to the examination of stereotypes in American life, to a better understanding of challenges to tradition, and to assessing the consequences of conflict that have resulted from cultural pluralism. This is a modified independent study course. Students are exposed to some of America's best-known literature, films and music. Instructional audio tapes and traditional literature about American Culture show the relevance of examples of popular art to broader themes. Prerequisites: Concurrent enrollment in AMER-ST 302P and AMER-ST 303PW. Offered: On demand.

4 hrs

[back to top](#)

AMER-ST 302 Survey Of American Studies

This course offers a look at changes and continuities in American life from the era of British colonization to the present. It emphasizes philosophical, scientific and creative ideas that have had lasting effects, changing social structure, the factors that determine lifestyle, and the consequences of the national preoccupation with pluralism and consensus. The course also covers the main features of American political history. Prerequisite: Concurrent enrollment in AMER-ST 303PW. Offered: On demand.

4 hrs

[back to top](#)

AMER-ST 303 W1 Methods & Problems In American Studies

This course examines four topics that are important in American culture; each topic is approached from a different methodological perspective. The topics (problems) are related to cultural resources in the Kansas City area and may change from semester to semester. Methods of problem solving are determined by the topic; however, students should expect to participate in oral history, interpretation of material culture, and traditional archival research and document analysis.

4 hrs

[back to top](#)

AMER-ST 340 Seminar: Critical Issues In American Culture

An interdisciplinary seminar which will examine various cultural topics relevant to understanding contemporary issues in American society. Students will write individual research papers as well as offer critiques of each other's work. Prerequisites: None. Offered: Every Fall semester.

3 hrs

[back to top](#)

AMER-ST 341 American Material Culture: Objects And Images

This course will examine American cultural and social history from earliest times to the present, with a special emphasis on the ways artifacts and visual images can provide information and insight about the American experience. Offered: Fall

4 hrs

[back to top](#)

AMER-ST 342 American Material Culture: Museums

This course will focus on local institutions that use material culture in their presentation of history and the American experience. Offered: Fall

4 hrs

[back to top](#)

AMER-ST 375 Censorship And Popular Culture In America

The First Amendment to the Constitution states that "Congress shall make no law ... abridging the freedom of speech or the press." The American experience, however, is that controversial books, radio and television programs, motion pictures, and, most recently, the Internet have been subjected to various types of censorship. This course will study the censorship of popular culture in America.

3 hrs

[back to top](#)

AMER-ST 380 Decade Of Dissent: The 1960S

The social movements and conflicts that developed during the 1960s continue to define American culture in the 1990s. Questions of racial and gender equity, a greater willingness to challenge authority, concerns about the environment, and a new openness about issues of sexuality all developed during the Sixties and remain as arenas of debate today. This course will examine the origins, contexts, and major themes of these social and cultural movements.

Anthropology

ANTHRO 103 Introduction To Cultural Anthropology

An introduction to culture and the basic concepts of anthropology. Topics include kinship, language, and cultural change. Also offered as SOCIOL 103. Offered: Fall/Winter.

3 hrs

[back to top](#)

ANTHRO 202 R Social Organization

This course focuses on the principles of social organization that undergird all human societies: social groups; age and gender differences; the institutions of family, economy, religion and polity; power; community and other units of residence; and social differentiation based on such factors as wealth and/or prestige. The focus of analysis is on the maintenance of social order, social change, and integration of society. Crosslisted with SOCIOL 202R. Prerequisite: SOCIOL 101. Offered: Every semester.

3 hrs

[back to top](#)

ANTHRO 205 The Social Life of Things

This course examines the ways anthropologists have studied the connections between people and things. It explores how social relationships are created and changed through the use and exchange of objects, and how objects themselves take on particular meanings and histories in these processes. In questioning the relationship between material culture and human sociality, the course will expose students to a range of ethnographic and historical case studies, as well as introduce them to some core theoretical perspectives and debates within anthropology

3 hrs

[back to top](#)

ANTHRO 207 The Culture of Ethnography

This course will explore the contexts in which powerful social groups learn, talk, and write about less powerful groups. The course material will explore how the identities and biases of anthropologists condition how they perceive, analyze, and represent others. Students will compare changes in ethnographic methods, theories, and styles across time and geography.

3 hrs

[back to top](#)

ANTHRO 212 Global Health

This course will use the lens of critical medical anthropology to analyze the sources of poor health outcomes, health disparities, and the global impacts of health policy. Students will explore the connections between population health and other aspects of social life, such as power, inequality, war, and economics, exploring the ways in which globalization and the privatization of health creates conditions that facilitate disease.

3 hrs

ANTHRO 302 Social Stratification

The distribution of power, privileges and prestige are examined in a historical and comparative perspective. The process whereby distribution systems develop, become institutionalized, and become transformed are analyzed. Also offered as SOCIOL 302. Offered: Fall

3 hrs

[back to top](#)

ANTHRO 303 Cluster Course: Terrorism, Civil War and Trauma

This interdisciplinary course examines the modern experience of terrorism and civil war in the light of art, film, history, literature, and philosophy. It explores a number of traumatic events, historic and contemporary, challenging us to think about such contemporary issues as violence and identity formation, civil rights and state-sponsored terrorism, pacifism and patriotism, resistance and collaboration, fundamentalism and fascism, neo-colonialism and anti-imperialism. Cross-listed with ENGLISH 300CN.

3 hrs

[back to top](#)

ANTHRO 306 Culture, Emotion, and Identity

This course introduces students to some of the key theoretical perspectives and debates within the field of psychological anthropology. By drawing upon cross-cultural studies of emotion, personhood, sexuality, illness, and consciousness it seeks to understand some of the ways that culture and society influence human psychology and experience.

3 hrs

[back to top](#)

ANTHRO 314 Anthropology of Gender

This class explores theories of the social construction of gender in cross-cultural contexts. It will also explore global issues of local and international politics, the economy, work and education as these relate to gender.

3 hrs

[back to top](#)

ANTHRO 322 Race And Ethnic Relations

The nature, origin and dynamics of ethnic and race relations in the U. S. and other societies. Specific attention will be given to the historical and contemporary contexts of prejudice, discrimination and confrontation. Also offered as Soc 322. Offered: Fall/Winter.

3 hrs

[back to top](#)

ANTHRO 324 Diversity And You

This course will examine diversity from the perspectives of race, ethnicity, class and gender. Emphasis will be placed on the impact of racism, classism and sexism on interpersonal relationships and strategies to encourage diversity in schools, neighborhoods, and the work place. Students may also enroll in "directed research" in conjunction with his course.

3 hrs

[back to top](#)

ANTHRO 325 The Imagery Of The American Indian In Film

This course will trace the imagery of the American Indian used by film makers through the years and how this has played a role in reinforcing certain inaccurate perceptions of American Indian cultural, social, and economic life. The course examines the sociological implications created by persistently showing misrepresented images of American Indians. The goal is to measure and compare the reality of American Indian life (values, traditions, and beliefs) with the images created by film makers from the early years of the 20th century to the present. Also cross listed as SOCIOL 325.

1 hr

[back to top](#)

ANTHRO 327 Us Government's Indian Policies: Practices Of A Colonizing Nation

This class will convey information about the implementation of US Government policies, from treaty making, establishing reservations, removing, confronting tribes militarily, and abolishing reservations through allotment resulted in consequences detrimental to tribal welfare. The colonization process created ramifications and consequences that Indian people contend with to this day. This class will provide a historical overview of the consequences associated with political, social, and economic processes that divested Indian people of control over their lives and land they originally lived on. Also cross listed as SOCIOL 323.

1 hr

[back to top](#)

ANTHRO 328 Anthropology Of The Body

The Anthropology of the Body is an interdisciplinary and comparative approach to the study of the body as the subject and object of social processes. Anthropological approaches to ritual, performance, reproduction, and healing will provide a framework for classical as well as contemporary explorations of bodily representation and experiences across a variety of cultural contexts. Prerequisite: Introduction to Cultural Anthropology

3 hrs

[back to top](#)

ANTHRO 329 The Imagery Of The American Indian In Film

This course will trace the imagery of the American Indian used by film makers through the years and how this has played a role in reinforcing certain inaccurate perceptions of American Indian cultural, social, and economic life. The course examines the sociological implications created by persistently showing misrepresented images of American Indians. The goal is to measure and compare the reality of American Indian life (values, traditions, and beliefs) with the images created by film makers from the early years of the 20th century to the present. Also cross listed as SOCIOL 325

1 hr

[back to top](#)

ANTHRO 331 Urban Anthropology

A course designed to apply anthropological methods to the study of various urban environments. The approach to the subject is comparative, seeking to spell out those features of the urban setting which vary from culture to culture as well as those which are common to all. Also offered as SOCIOL 331.

3 hrs

[back to top](#)

ANTHRO 339 American Indian Leaders: Past And Present

This course will examine the definition of leadership as it relates to American Indian issues. Consideration will be given to the nuances of leadership by examining the social, cultural, economic, and political situations that gave cause for particular individuals to assume roles of leadership. The course will compare and contrast the notions of leadership within American Indian ranks with those practiced by non-Indian leaders. It will trace the evolving nature of leadership within tribal nations and American Indian communities from past to present, as well as looking at Indian leadership roles in time of war and peace. Lives of the major characters of American Indian historical record will be reviewed, such as Geronimo, Crazy Horse, Sitting Bull, Osceola, Tecumseh, Pontiac, Black Hawk, Quannah Parker, and Captain Jack. Also cross listed as SOCIOL 326

1 hr

[back to top](#)

ANTHRO 341 R The Anthropology Of Economic Institutions

Examines in a comparative perspective the social, cultural and political framework of economic activities. Emphasis is placed on socioeconomic systems and the contradictions they generate. Crosslisted with SOCIOL 341R. Offered: Annually.

3 hrs

[back to top](#)

ANTHRO 343 Societies And Cultures Of Latin America

A survey of emerging cultures and societies in Latin America; pre-history and geography; the Mayan, the Aztec and Incan civilizations; contemporary Indian, peasant and urban subcultures; the impact of forces such as migration, urbanization, peasant mobilization, and agrarian reform. Also offered as SOCIOL 343.

3 hrs

[back to top](#)

ANTHRO 346 Cultures Of The African Diaspora

This course will explore the cultures of African people and their descendants who settled in Europe, the Caribbean or the Americas due primarily to the impact of the Trans-Atlantic trade in human beings. The focus will be comparative, with emphasis on cultural adaptation, kinship systems, music and religion.

3 hrs

[back to top](#)

ANTHRO 347 The American Indian Image: Stereotype Vs. Reality

This class will take a historical, sociological, and cultural approach to review how society at large views American Indians. The course will trace the origin and continued use of American Indian stereotyped views, and assess the sociological and psychological complications that result when judging Indians solely on stereotyped imagery. The course will review the historical content of American Indian life as portrayed in early plays, films, and newspaper accounts and compare these stereotyped images with the reality of American Indian life by providing a depiction of a series of historical events that will offer a more balanced and accurate consideration for American Indian life past and present. Also cross listed as SOCIOL 324.

1 hr

[back to top](#)

ANTHRO 348 Latin American Immigrants & Refugees in the U.S.

The course is an introduction to the study of the culture and societies of U.S. citizens and immigrants of Latin American heritage living in the U.S. The course emphasizes recent anthropological as well as historical and cultural studies. Topics covered: ethnohistory, kinship, labor, intergenerational relations, gender transnationalism and immigration and cultural diffusion over successive generations.

3 hrs

[back to top](#)

ANTHRO 352 Multicultural Women's Histories In The U.S.

This course offers an introduction to the histories of women in the U.S. from the 17th to the beginning of the 20th century. We will study colonial and US women of Native, Latino, European, African, and Asian descent, their contact with women (and men) of other ethnic groups, the political, economic, and legal changes affecting their lives, and the images they created of themselves and each other. Offered: Every Fall Semester

1 hr

[back to top](#)

ANTHRO 353 Women, Class, And Ethnicity In The U.S.

This course focuses on contemporary women's lives and issues such as welfare and immigration, stereotypical imagery, and the pressure to put ethnic and/or class interests before gender concerns. We will study women of Native, African, European, Latin, Asian, and heterogeneous descent and the ethnic, economic, and legal forces shaping their lives. Offered: Every Fall

1 hr

[back to top](#)

ANTHRO 354 Women's Lives In The Global Economy

This course explores the realities of women's lives and the work that women contribute to all societies. Using an anthropological approach, we will explore women's productive work in gathering, horticulture, agriculture, and industrialization, women's reproductive work, as well as their work of status enhancement and caring. Highlighting the changes wrought by colonialism, we will also explore women's work, both voluntary and involuntary, in the global economy. Offered: Every Winter

1 hr

[back to top](#)

ANTHRO 355 The United Nations' Womens Conferences

This class studies the United Nations' Women's Conferences in Mexico City (1975), Copenhagen (1980), Nairobi (1985), Beijing (1995), and Beijing +5 (2000), their themes, participants, documents, solutions, and consequences. Special attention will be paid to women's human rights. Offered: Every Winter

1 hr

[back to top](#)

ANTHRO 356 Cross-Cultural Gender Conceptions

This class surveys the varieties of gender definitions and roles in historical and contemporary human cultures in their association to stratified or equitable access to economic, political, and ideological resources. Topics include the definitions and varieties of human sexes and of human genders, and the multiple ways in which people create sexual and gender intersections and variations. Offered: Every Winter

1 hr

[back to top](#)

ANTHRO 373 Anthropology of Religion

This course explores the ways anthropologists have gone about studying religion from the opening decades of the 20th century to present. The course introduces students to the diversity of human religious expression and experience through anthropological literature and to the diversity of anthropological expression especially as it has been revealed in social scientific studies of religious life. The course is designed to generate a critical dialogue about the special role that religion has played in the ongoing anthropological engagement with "other" societies and cultures over time.

3 hrs

[back to top](#)

ANTHRO 374 Anthropology of Childhood

This course explores how children's lives are shaped by cultural, economic, and political forces and relations. Drawing upon a range of case studies and disciplinary perspectives it will consider how and why children emerge as sites of contestation and debate, and it will examine the various ways in which the category and experience of childhood unfold in different socio-historical contexts. The main objective of the course is to better understand the social construction of childhood and use the study of childhood as a privileged window for exploring the articulation of cultural, economic and political relations within the context of contemporary global society.

3 hrs

[back to top](#)

ANTHRO 381 Archaeological Resources Management

This class examines contemporary issues managing archaeological resources. The class is intended for students seeking work in Cultural Resources Management (CRM); those already working CRM, or student anthropology, environmental studies, geology, geography, public administration and other fields likely to deal with archaeological and historical resources in a research or employment setting. This class does not require a background in archaeology. Cross-listed with GEOLOGY 407.

3 hrs

[back to top](#)

ANTHRO 382 Archaeological Field Survey Methods

This class offers instruction in the basic skills required to conduct field surveys in archaeology and other geosciences disciplines. In the classroom, students learn about the development of archaeology as a scientific discipline and how to recognize some of the basic field data sought by archaeologists. Students learn about mapping and land navigation techniques. The field phase of instruction includes visits to archaeological sites in the region. Cross-listed with GEOLOGY 408.

3 hrs

[back to top](#)

ANTHRO 383 Field School in Archaeology

This class offers students an opportunity to attend a field school in archaeology. Students will be taught how to: design archaeological research, set-up excavation, keep a wide range of excavation records, make maps and drawings, take photographs related to excavation problems, identify and receive a broad spectrum of artifact and faunal remains, collect samples for specialized analysis and use a wide range of excavations tools. This course will also introduce students to recording and analyzing excavated materials in the archaeological laboratory. Cross-listed with GEOLOGY 409.

3 hrs

[back to top](#)

ANTHRO 414 Feminist Theories

This class introduces the major feminist theories and their primary authors over the last 200 years. The class takes both a historical view (beginning with two millenia of male-centered theories about women) and a conceptual approach (theories are grouped by common ground) and familiarizes the student with both the historical processes that necessitate feminist theories as well as with the breadth and depth of the historically and currently available scholarship. Prerequisite: Introduction to Women's Studies Offered: Winter Semester

3 hrs

[back to top](#)

ANTHRO 441 Developing Countries

Focuses on issues of economic development, social stratification, political institutions, and political mobilization in societies where colonialism provided the context for their long-term disadvantages in the international economic order. Specific attention is paid to the intersection of the international components that define the options and limits for societal development (e.g., market shifts, international institutions and contracts, foreign policies, and migration) and the distinct social, political and cultural implications of these factors for developing societies. Crosslisted with ANTHRO or SOCIOL 441.

[back to top](#)

Architectural Studies

ENV-DSN 110 The Meaning Of Architecture

Architecture is a visual and physical expression of civilization. Significant architecture embodies the inspired use of spaces and forms in such a way as to enrich the lives of humanity. This course will introduce to the student an understanding and appreciation of architecture and our built environment through a broad examination of cultural and aesthetic paradigms. The student will be informed of the historic legacy and value of architecture; how it impacts our society today and our daily lives. This course will employ slides, lectures, and text to familiarize the student with a select group of significant works of architecture of the western world.

3 hrs

[back to top](#)

ENV-DSN 201 Environmental Design Studio I

Foundation studies introducing the principles, processes and vocabularies of environmental design. Instruction in two and three dimensional visualization of objects and spaces. Instruction in the use of instrument-aided drawing, freehand drawing and model building to represent and communicate design ideas at different scales of observation. Prerequisite: Permission of department. Offered: Fall semesters.

4 hrs

[back to top](#)

ENV-DSN 202 Environmental Design Studio II

Continuation of ENV-DSN 201. Prerequisites: ENV-DSN 201 and permission of department. Offered: Winter semester.

4 hrs

[back to top](#)

ENV-DSN 203 Survey Of The Design Professions

Overview of the evolution of the design professions. Comparative study of the roles of the architect, interior architect, interior designer, landscape architect and planner; their working methods, collaborative endeavors, and interaction with consultants and specialists. Description of career paths, educational alternatives, licensure, and professional organizations. One lecture per week for 8 weeks. Offered: Fall

1 hr

[back to top](#)

ENV-DSN 248 Building Science

Instruction in the materials of building and landscape design; sources, characteristics and uses in design and construction: emphasis on evaluation and selection. Two lectures and one recitation per week. Offered: Fall semester.

3 hrs

[back to top](#)

ENV-DSN 250 History Of The Designed Environment I

This course will present an overview of the developments in architectural, urban, landscape and interior design which have had an impact on the physical environment from ancient times through the medieval up to the gothic period. A central objective of the course is to gain an understanding of why these developments occurred and how the needs and aspirations of a given time were manifested in physical form. Offered: Winter

3 hrs

[back to top](#)

ENV-DSN 251 History Of The Designed Environment II

This course will present an overview of the developments in architectural, urban, landscape and interior design which have had a consequential impact on the physical environment of the Western world from the Italian Renaissance (starting in the 15th century) up to the present day. Offered: Fall

3 hrs

[back to top](#)

ENV-DSN 252 History Of The Designed Environment III

The history of the designed environment from the mid-18th century to the present. Offered: Fall semester

3 hrs

[back to top](#)

ENV-DSN 301 Architectural Design Studio I

Instruction in architectural design focusing on the application of elements and principles of form and space in design. Instruction in the use of techniques for visually representing design ideas. Prerequisites: ENV-DSN 202 Offered: Fall.

5 hrs

[back to top](#)

ENV-DSN 302 Architectural Design Studio II

Instruction in architectural design focusing on the synthesis of basic social, functional, technical, and aesthetic factors in design. Continued instruction in techniques for visually representing ideas. Prerequisite: ENV-DSN 301 Offered: Winter semester.

5 hrs

[back to top](#)

ENV-DSN 348 Structural Systems In Architecture I

Introduction to statics: force analysis and the study of forces in equilibrium; principles of statics as applied to the study of simple elemental structures; the origin, the nature and the action of loads on structural systems. Instruction in the use of statics in the preliminary stages of building design. Prerequisites: MATH 110 & PHYSICS 210. Offered: Fall semester.

3 hrs

[back to top](#)

ENV-DSN 413 Environmental Systems In Architecture I

Instruction in bioclimatic and ecological design principles as a basis for architectural and landscape design: emphasis on passive solar heating and cooling and daylighting. Offered: Winter semester.

4 hrs

[back to top](#)

ENV-DSN 449 Structural Systems In Architecture II

Instruction in strength of materials focusing on the behavior of building materials under loading: their ability to resist deformation and failure. Instruction in sizing simple structural elements. Prerequisite: ENV-DSN 348. Offered: Winter semester.

3 hrs

[back to top](#)

Art and Art History (ART-HIST)

ART-HIST 300 CJ Cluster Course: Aestheticism In The Arts

This cluster course will deal with aesthetic problems in the arts illustrated with specific examples in music, literature and the visual arts. Winter.

3 hrs

[back to top](#)

ART-HIST 403 Advanced Typography

A continuation of ART 203, Introduction to Typography, this course looks at more sophisticated typographic use, using advanced layout and design principles, based on both historical and contemporary typographic design practice. In addition, typographic design theory will be studied as a basis for practice and experimentation. The influence of the computer in contemporary typographic design will be studied through lecture and practice. Typography in motion-and time-based media such as websites and multimedia presentations will be examined in how these forms of typography differ from 2-dimensional type usage.

3 hrs

[back to top](#)

ART-HIST 436 P Introduction to Graphic Design and Desktop Publishing

Students will gain a basic understanding of two-dimensional design, typography, and graphic design. Introductory skills in industry-standard computer design software will be offered. Issues and techniques related to the field of graphic design will be discussed. Restrictions: Does not count towards Studio Art major requirements

4 hrs

[back to top](#)

ART-HIST 437 P Introduction to Digital Imaging and Computer Multimedia

Students will acquire a basic understanding of lens-based image creation using still and video camera. Introductory skills in industry-standard multimedia software will be used. Issues and techniques related to the field of electronic media will be discussed. Restrictions: Does not count towards Studio Art major requirements.

4 hrs

[back to top](#)

ART-HIST 438 P First Fridays: Guided Self Study

Students will be exposed to contemporary issues in art through readings, discussions, and audio-visual presentations. Various types of art will be viewed and experienced in professional art venues (galleries, museums, alternative spaces). Independent visual and written projects related to lectures and visits will be required. Restrictions: Does not count towards Studio Art major requirements. Concurrent enrollment in ART436P or ART 437P is required.

4 hrs

[back to top](#)

ART-HIST 497 Special Studies in Art History: Internship

Advanced art history students gain invaluable practical experience in a professional setting in the field of art.

1-6 hrs

[back to top](#)

ART-HIST 497 Q Special Studies in Art History: Internship

Advanced art history students gain invaluable practical experience in a professional setting in the field of art. Prerequisite: Permission of the department

1-6 hrs

[back to top](#)

ART-HIST 498 Special Studies in Art: Internship

Advanced students gain invaluable practical experience in a professional setting in the field of art. Prerequisite: Permission of the department.

1-6 hrs

[back to top](#)

Art History

ART 100 Topical Studies In Art History

This course consists of a series of lectures on selected subjects of European, American and Oriental art. No prerequisite. Does not meet baccalaureate requirements in fine arts. Does not meet departmental requirements for art or art history majors.

1-3 hrs

[back to top](#)

ART 101 Topical Studies In Studio Art

(A,B,C,D) This course provides students with an opportunity to explore offerings in a variety of fine arts media. No prerequisite. Does not meet baccalaureate requirements in the fine arts. Different sections of the course may be repeated.

1-3 hrs

[back to top](#)

ART 101 B Topical Studies In Studio Art

1-3 hrs

[back to top](#)

ART 101 G Topical Studies In Studio Art

1-3 hrs

[back to top](#)

ART 105 Introduction To Photography

An introduction to the general practice of photography. This course is intended for non-majors. It does not serve as a prerequisite for advanced art photography courses. The course centers on the basic technical and aesthetic aspects of the medium. A fully adjustable 35mm camera is required. Offered: Every semester

3 hrs

[back to top](#)

ART 110 Introduction To The Visual Arts

An introduction to the study of art--especially architecture, sculpture, painting and the graphic arts. Consideration given to purpose and patronage, the visual elements, design and techniques. The meaning of style and expression is studied in the context of the historical background of chief periods of Western civilization. This course meets the college fine arts requirement, but does not count towards the art history requirement for departmental majors. Every semester.

3 hrs

[back to top](#)

ART 112 Foundation Drawing

Drawing on the introductory level. Every semester.

3 hrs

[back to top](#)

ART 114 Introduction To Computer Multimedia

General techniques and practical application for computer multimedia. This is a course intended for non-majors. It does not serve as a prerequisite for advanced art multimedia courses. Lectures, demonstrations, readings, discussions and application sessions. Fulfills the College of Arts and Sciences computer competency requirement. Offered: Fall and Winter.

3 hrs

[back to top](#)

ART 116 Computer Animation

General techniques and practical application for computer animation. This course is intended for both studio majors and non-majors. It does not serve as a prerequisite for any advanced electronic art courses. Lectures, demonstrations, readings, discussions and application sessions. Offered: Summer.

3 hrs

[back to top](#)

ART 121 Foundation Design--Two Dimensional

The principles of visual thinking with emphasis on color theory and perception of form and space. Prerequisite: ART 112; concurrent enrollment with ART 112 is with approval. Every semester.

3 hrs

[back to top](#)

ART 131 Foundation Design--Three Dimensional

Introductory study in three-dimensional formal principles with emphasis on the aesthetic properties. Prerequisite: ART 112. Every semester.

3 hrs

[back to top](#)

ART 203 Introduction To Typography

The format and applied aspects of typography are studied in the context of the design process, involving basic concepts of copyfitting, specification of type, layout, and the use of computer assisted design software. Prerequisites: ART 112, ART 121, and ART 131.

3 hrs

[back to top](#)

ART 204 Computer Multimedia I

Introductory level computer multimedia. This course is intended for studio majors. General techniques and practical application of animation, imaging, video, text and sound to multimedia. Lectures, demonstrations, readings, discussions and application sessions. Prerequisite: Studio major or permission of instructor. Offered: Fall and Winter.

3 hrs

[back to top](#)

ART 206 Photography I

An introduction to photography as a means of creative self-expression. The course centers on the technical and aesthetic aspects of the medium. Extensive darkroom work will be required. A fully adjustable 35mm camera is required. Prerequisites: Studio major or permission of instructor. Offered: Every semester.

3 hrs

[back to top](#)

ART 212 Intermediate Drawing

Continuation of foundation drawing. Emphasis is on gaining technical facility with various drawing mediums and expanding conceptual approaches. Prerequisites: ART 112 Offered: Every Semester

3 hrs

[back to top](#)

ART 221 Introductory Painting

Exploration of the visual language in paint. Emphasis on continuing color and design exploration. Prerequisites: ART 112, ART 121, ART 212. Every semester.

3 hrs

[back to top](#)

ART 224 Introductory Printmaking

An introduction to the process and technique of printmaking centering on metalplate printing. Prerequisites: ART 212,ART 221. Annually.

3 hrs

[back to top](#)

ART 231 Introductory Sculpture

Introductory study of sculptural expression and technique in a variety of materials and processes. Prerequisite: ART 131. Every semester.

3 hrs

[back to top](#)

ART 235 Digital Imaging I

This is an introductory course to the computer as a creative tool for the visual artist. Images will be digitized, enhanced and altered. Practical and ethical issues regarding digital image processing are explored. Various input and output options will be discussed.

3 hrs

[back to top](#)

ART 244 Visual Tools For The Computer

Specific training in using software programs (such as Adobe Photoshop, Adobe Illustrator, Quark Express, etc.) for artists, architects, and graphic designers. Each section deals with a different program and thus the course may be repeated if the student signs up for a different section. Prerequisite: None.

1-3 hrs

[back to top](#)

ART 245 Digital Applications

This is an introductory class to software that has graphic and desktop applications. The course will deal principally with digital graphic software that is currently considered the industry standard. The class will also touch on other software that can have an impact on future computer applications pertaining to applied design. Through a variety of class projects/exercises, students will learn various software and how they interrelate. The class is open to all art students and general students. It will be a prerequisite for studio art students with a graphic design emphasis before entering advanced graphic design classes. (Course replaces visual tools, ART 244A,ART 244B,ART 244C which is a series of three one hour classes.)

Offered: Fall

3 hrs

[back to top](#)

ART 246 Digital Applications

This is an introductory class to software that has graphic and desktop applications. The course will deal principally with digital graphic software that is currently considered the industry standard. The class will also touch on other software that can have an impact on future computer applications pertaining to applied design. Through a variety of class projects/exercises, students will learn various software and how they interrelate. The class is open to all art students and general students. It will be a prerequisite for studio art students with a graphic design emphasis before entering advanced graphic design classes. (Courses replaces visual tools, ART 244A, ART 244B, ART 244C, which is a series of three one hour classes).

Offered: Fall

3 hrs

[back to top](#)

ART 253 History Of The Designed Environment I , Ancient And Medieval

An overview of developments in architectural, urban, land and interior design which have shaped the physical environment of the Western world from prehistory through the period known as the "Romanesque." Emphasis will be given to relationships between institutions, values and needs of different societies and the architectural forms produced by those societies. Prerequisite: None.

3 hrs

[back to top](#)

ART 254 History Of The Designed Environment II , Late Medieval To Modern

An overview of developments in architectural, urban, land and interior design which have had an impact on the physical environment of the Western World from the Gothic era to the beginning of the modern era. A central objective of the course is to gain an understanding of why these developments occurred and how the needs and aspirations of a given time were manifested in physical form. Prerequisite: None.

3 hrs

[back to top](#)

ART 255 History Of The Designed Environment III , Modern (1750 To Present)

An overview of developments in architectural, urban, land and interior design which have shaped the physical environment of the Western world during the Modern period. Issues to be explored include renewed interest in archaeology during the eighteenth century, shifts in patronage, the impact of new industrial materials and techniques, demands for an array of new building types, and dilemmas of expression throughout the modern era. Our concerns will broaden and become more global in scope when we examine the twentieth century. Prerequisite: None.

[back to top](#)

ART 300 CD Cc:The African Diaspora In The Arts And Culture

This new cluster course examines aspects of African culture in the Diaspora: Africa, the Caribbean and certain parts of South and North America. Attention will be on charms, painting, sculpture, secret scripts, textiles, as well as religions and spirituality. Understanding African Diaspora culture also involves an analysis of historical and sociological movements, the interpretation of written culture, and the effects of Africa's response to colonialism. The transmission and transformation of African cultures will be addressed by a close investigation of visual and material culture, and the cosmological constructions of African peoples. Methodologies are from the Art History, Literature and Religious Studies. Restrictions: Sophomore or above.

[back to top](#)

ART 308 Lithography

Study of stone lithographic process. Prerequisite: ART 224. Winter.

3 hrs

[back to top](#)

ART 309 Intaglio

Advanced study of intaglio printing processes. Prerequisite: ART 224. Annually.

3 hrs

[back to top](#)

ART 310 Computer Multimedia II

Continuation of ART 204, Intermediate level computer multimedia. This course is intended for studio majors. General techniques and practical application sessions. Prerequisites: ART 204 and specific permission of instructor. Offered: Fall and Winter.

3 hrs

[back to top](#)

ART 311 Painting I

Painting in oil or acrylic on the intermediate level. Emphasis on continuing color and design exploration. Prerequisite: ART 212, ART 221. Every semester.

3 hrs

[back to top](#)

ART 312 Figure Drawing I

A study of the structure of the human figure with emphasis on the dynamics of figure movement. Prerequisite: ART 212. Annually.

3 hrs

[back to top](#)

ART 313 Graphic Design I

Intermediate study of graphic design methodology and techniques, stressing a visual approach to problem solving in design, image making techniques, materials, and production processes standard to the industry. Prerequisites: ART 203, ART 206, ART 212, ART 224 or permission of the instructor.

3 hrs

[back to top](#)

ART 314 Graphic Design Production

Study of the Mechanical procedures and techniques used for the realization of graphic design production. Prerequisite: Instructor's permission. Winter.*

3 hrs

[back to top](#)

ART 315 The Arts Of African and New World Cultures

This historical survey of ethnographic arts includes two diasporas: 1) African art and the influences of Africans on the arts of new world cultures (in Brazil, Surinam, Cuba, Haiti, and the United States) ;and 2) Meso-American art and the influence of Meso-Americans on the arts of the Native North American cultures. Emphasis is placed on interdisciplinary theoretical approaches drawn from Art History, Anthropology, and folklore, as well as the importance of geography and trade. These ethnographic arts are examined from aesthetic, political, religious, and economic perspectives, in comparison with arts made in these countries in Western European traditions, including the cross-cultural impact that these various art traditions have on each other. This course satisfies the College requirement for a course in cultural perspectives.

3 hrs

[back to top](#)

ART 319 Asian Art

The survey will emphasize the philosophical and cultural context of the arts of India, Southeast Asia, China, Korea and Japan. The course will stress the elements that give an underlying unity to the arts as well as those qualities which distinguish the art of each country as unique. Each Fall.

3 hrs

[back to top](#)

ART 322 Advanced Drawing

Further development of technique and content. Emphasis is on forming and clarifying a personal voice. Prerequisite: ART 212
Offered: Annually

3 hrs

[back to top](#)

ART 335 A Digital Imaging II

This class will strengthen the competence and knowledge of digital imaging techniques. Research, conceptual and verbal abilities within digital image making will be explored. Students will apply new techniques to their personal interests in the studio arts. Prerequisite: Digital Imaging I or permission of instructor.

3 hrs

[back to top](#)

ART 353 The Design And Form Of Kansas City

An overview of the historical development of Kansas City with a particular emphasis on the architecture, and the factors influencing what was built, when and where. Prerequisite: Junior standing and a previous course in the history of art or architecture, or permission of the instructor. May not be taken for graduate credit. Offered: Fall

3 hrs

[back to top](#)

ART 403 Advanced Typography

A continuation of ART 203, Introduction to Typography, this course looks at more sophisticated typographic use, using advanced layout and design principles, based on both historical and contemporary typographic design practice. In addition, typographic design theory will be studied as a basis for practice and experimentation. The influence of the computer in contemporary typographic design will be studied through lecture and practice. Typography in motion-and time-based media such as web-sites and multimedia presentations will be examined in how these forms of typography differ from 2-dimensional type usage. Prerequisite: ART 413 Offered: On demand

3 hrs

[back to top](#)

ART 404 Computer Multimedia III

Continuation of ART 310. Advanced level computer multimedia. This course is intended for studio majors. Lectures, demonstrations, readings, discussions and application sessions. Prerequisites: ART 310 and specific permission of instructor. Offered: Fall and Winter.

3 hrs

[back to top](#)

ART 405 Art In Secondary School

An introduction to the special problems, procedures and materials associated with the art curriculum in the public schools. This course meets certification requirements in "Special Methods of Teaching Field." Prerequisites: The equivalent of senior standing in art plus permission of the instructor. Winter semester only.

3 hrs

[back to top](#)

ART 406 Advanced Problems In Photography

This course provides students a forum in which the issues and techniques of contemporary photography can be investigated on a rather esoteric level. The format of the course allows for a mutual decision by the instructor and students, dictating which investigations will be pursued during that particular semester. Possible areas of investigation would include, but are not limited to, color photographic theory and practice, non-silver photographic techniques (e.g. Kwikprint, gum bichromate, cyanotype, Van Dyke Brown, etc.), hand coloring techniques, photo-collage, etc. Prerequisite: ART 305, or permission of instructor.

3 hrs

[back to top](#)

ART 411 Painting II: Oil/Acrylic

Painting on the advanced level with individual selection of medium and technique. Prerequisite: ART 311. Every semester.

3 hrs

[back to top](#)

ART 412 Figure Drawing II

A continuation of Figure Drawing I, ART 312. Drawing on the advanced level with study of the figure in environmental context. Prerequisite: ART 312 or ART 322. Annually.

3 hrs

[back to top](#)

ART 413 Graphic Design II

Advanced study in graphic design methodology and techniques, involving more intense project problem solving. Projects include visual communication strategies of a more advanced nature including newsletter, brochures, annual report, book, magazine and journalism spreads. Prerequisite: ART 313.

3 hrs

[back to top](#)

ART 415 WI Romanticism

Art of the Romantic Era, principally in Europe, from c. 1790 to c. 1860. Consideration is given to the problems of patronage, criticism and stylistic influences. Prerequisite: ART 303 or permission of instructor and successful completion of the WEPT (effective FS93). Offered: Every other year.

3 hrs

[back to top](#)

ART 416 WI Later 19Th Century Painting And Sculpture

From Realism through Post-Impressionism. A study of art, principally in Europe, from c. 1850 to c. 1905, with consideration given to factors influencing stylistic changes during this period. May be taken independently of ART 415. Prerequisite: ART 303 or permission of instructor and successful completion of the WEPT (effective FS93). Offered: Fall, odd years.

3 hrs

[back to top](#)

ART 421 Painting III: Oil/Acrylic

Continuation of ART 411. Prerequisite: ART 411. Every semester.

3 hrs

[back to top](#)

ART 422 Advanced Drawing II

Continuation of ART 322. Prerequisite: ART 312 or 322. Annually.

3 hrs

[back to top](#)

ART 423 WI Design Seminar

Critical issues in design, design theory and design history/personalities (specific individuals and movements critical to contemporary design practice) from selected readings, slide presentations and invited speakers. A research paper/presentation on a topic evolving from the topics discussed will be required. The course will also address resume and portfolio preparation for design majors. Prerequisites: ART 313, ART 413 or instructor's permission Offered: On Demand

3 hrs

[back to top](#)

ART 424 Early 20Th Century European Painting And Sculpture

A study of European painting and sculpture from c. 1900 to c. 1940. Prerequisite: ART 303 or permission of instructor. Winter, odd years.

3 hrs

[back to top](#)

ART 426 Twentieth Century Painting

A study of major artists and stylistic changes in painting, beginning c. 1905. Consideration also given to the role of media and to drawings and prints during this period. Prerequisite: ART 303 or permission of instructor. Offered: On demand.

3 hrs

[back to top](#)

ART 427 Twentieth Century Sculpture

A study of major artists and stylistic changes in sculpture, beginning c. 1905. Consideration also given to the role of new materials and techniques. Prerequisite: ART 318. On demand.*

3 hrs

[back to top](#)

ART 428 American Architecture And Urbanism

A survey of architecture and urbanism in the United States. We begin in the early years of the republic, but focus on the period from the Civil War to the present. Topics include the planning and development of major American cities, the creation of the skyscraper as a new commercial type, the evolution and design of the suburb, the emergence of the United States as the center of modernism following World War II and its displacement from that center with the pluralistic trends of the last three decades. Prerequisites: ART 254, ART 303 or instructor's permission. Offered: Fall.

3 hrs

[back to top](#)

ART 429 WI American Painting And Sculpture

A study of the history of painting and sculpture, and other figurative arts, from earliest colonial times to the present. Emphasis will be placed on those artists who illuminate the major achievements in American art, and also the ongoing role played by European training and tradition. Prerequisite: ART 303 or permission of the instructor and successful completion of the WEPT (effective FS93). Offered: Fall, even years.

3 hrs

[back to top](#)

ART 430 Graphic Design III

Advanced application of graphic design techniques to complex design problems. The course will stress individualized assignments and portfolio preparation. Prerequisite: ART 413 which may be taken concurrently. Offered: WS96

3 hrs

[back to top](#)

ART 436 P Introduction to Graphic Design and Desktop Publishing

Students will gain a basic understanding of two dimensional design, typography, and graphic design. Introductory skills in industry standard computer design software will be offered. Issues and techniques related to the field of graphic design will be discussed. Restrictions: Does not count towards Studio Art major requirements

4 hrs

[back to top](#)

ART 437 P Introduction to Digital Imaging and Computer Multimedia

Students will acquire a basic understanding of lens- based image creation using still and video cameras. Introductory skills in industry standard multimedia software will be used. Issues and techniques related to the field of electronic media will be discussed. Restrictions: Does not count towards Studio Art major requirements

4 hrs

[back to top](#)

ART 438 P First Fridays: Guided Self-Study

Students will be exposed to contemporary issues in art through readings discussions, and audio-visual presentations. Various types of art will be viewed and experienced in professional art venues (galleries, museums, alternative spaces). Independent visual and written projects related to lectures and visits will be required. Restrictions: Does not count towards Studio Art requirements. Concurrent enrollment in ART 436P or ART 437P is required

4 hrs

[back to top](#)

ART 440 WI French Art: Renaissance And Baroque

A history of French art from the time of Louis XII through the Age of Louis XIV, with emphasis on painting and architecture. Prerequisite: ART 302 or permission of instructor and successful completion of the WEPT (effective FS93). Offered: Every other year.

3 hrs

[back to top](#)

ART 441 WI Northern Baroque: The Age Of Rubens, Rembrandt And Wren

The arts of England and the Low Countries in the 17th and early 18th centuries. Emphasis on painting and the graphic arts in the Spanish and Dutch Netherlands and on architecture in England. Prerequisite: ART 302 or permission of instructor and successful completion of the WEPT (effective FS93). Offered: Every other year.

3 hrs

[back to top](#)

ART 442 Art Of Sub-Saharan Africa

This course presents an in-depth study of African Art from the sub-Sahara Region. The first half of the course will explore the major art-producing archaeological cultures of Mali, Nigeria, Chad, and Zimbabwe. The second half will concentrate on the ethnographic present and focuses on the major art-producing cultures of West, Central and Southern Africa. Prerequisite: ART 315 or instructor's permission. Offered: On demand.

3 hrs

[back to top](#)

ART 443 Pre-Columbian Art

The course will discuss 2500 years of the arts of ancient Mexico, Guatemala and Peru. Included is the rise of such important cultures as the Olmec, Maya, Aztec and Inca. Equal emphasis will be placed on the development of elaborate ceremonial centers such as Monte Alban and the Teotihuacan as well as the ceramic tradition of the West and East coasts of Mexico and the ceramic textile traditions of pre-Columbian Peru. Prerequisite: ART 315 or permission of instructor. Offered: On demand.

3 hrs

[back to top](#)

ART 445 Northern European Art: 15Th And 16Th Centuries

A study of panel painting, sculpture and manuscript illumination in Flanders, France, Germany, and Spain from the Hundred Years' War through the Reformation. Special emphasis will be placed upon the stylistic and iconographic innovations of such major Northern artists as Claus Sluter, Jan van Eyck, Jerome Bosch, Pieter Bruegel, Jean Fouquet and Albrecht Durer. Artistic developments will be presented within the context of changing economic, political, religious and social institutions of the period. Prerequisite: ART 302 or permission of instructor. Offered: On demand.

3 hrs

[back to top](#)

ART 447 WI Italian Baroque: The Age Of Caravaggio, Bernini And Borromini

Painting, sculpture and architecture in Italy from the creation of the Baroque style in the late 16th century to the beginnings of the Barocchetto era. Prerequisite: ART 302 or permission of instructor and successful completion of the WEPT (effective FS93). Offered: Every other year.

3 hrs

[back to top](#)

ART 448 WI Spanish Art: El Greco To Goya

A history of Spanish art from the later fifteenth century to the Napoleonic invasion. Prerequisite: ART 302 or permission of instructor and successful completion of the WEPT (effective FS93). Offered: Every other year.

3 hrs

[back to top](#)

ART 449 Art And Architecture In The Age Of Enlightenment

Painting, sculpture and architecture in France, Italy, England, Spain and Central Europe during the 18th-century. Prerequisite: ART 302 or permission of instructor.

3 hrs

[back to top](#)

ART 450 15Th Century Italian Art And Architecture

An examination of the visual arts from the International Style and the Early Renaissance to the beginnings of the High Renaissance. Problems of patronage, artistic theory, the Antique, the role of art in humanist circles, and the effect of religious, political and economic developments on the arts will also be discussed. Prerequisite: ART 110 or ART 302 or permission of instructor.

3 hrs

[back to top](#)

ART 452 Greek Art And Architecture

A survey of Greek sculpture, vase painting, and architecture from the third millennium to the first-century B.C. Emphasis will be placed on the relationship of Minoan and Helladic aesthetics, and the connections between late Helladic and Geometric forms, and the nature and development of the classical and baroque styles. Prerequisite: ART110 or ART 301 or permission.

3 hrs

[back to top](#)

ART 453 Roman Art And Architecture

The subjects to be included are: wall painting, portraiture, sarcophagi, historical reliefs, and secular and religious architecture. Emphasis will be placed on material from the Late Republic to The Severan period. Prerequisite: ART 301 or permission of instructor.

3 hrs

[back to top](#)

ART 454 16Th Century Italian Art And Architecture

The visual arts in Italy from the beginnings of the High Renaissance in the late 15th century through the Late Renaissance and the developing phenomenon of Mannerism. The effect of religious, political and economic developments will be discussed as well as problems of patronage, artistic theory and the role of art in humanist circles. Prerequisite: ART 110 or ART 302 or permission of instructor.

3 hrs

[back to top](#)

ART 455 History Of Photography

A survey of the history of photography as a pictorial art; technical developments and the interaction of photography with other arts will be included. Prerequisite: ART 303 or permission of instructor. Offered: On demand.

3 hrs

[back to top](#)

ART 456 The Painting And Sculpture Of China

Jade sculptures of the 14th-century B.C., the terra cotta army of the first emperor of China, Buddhist and secular sculptures from the Han through the Sung dynasties will be covered. The study of Chinese painting will include important new discoveries of paintings on silk dating from the third century B.C.; figure and landscape scrolls, and wall paintings from the fourth through 20th centuries A.D. The masterpieces in the Nelson-Atkins Museum will be examined in detail.

3 hrs

[back to top](#)

ART 457 The Painting And Sculpture Of Japan

Clay sculptures from 3,000 B.C., the haniwa sculptures from the fourth century A.D., and Buddhist sculpture from the sixth through the 14th centuries as well as the rich tradition of portrait sculptures will be the focus of the first half of the course. The study of paintings will begin with mural paintings preserved in tombs from the fourth century A.D. Murals in Buddhist temples; painted screen and sliding panels from temple buildings, castles and palaces; Zen painting; paintings and prints of the floating world from the 17th through the 19th centuries will be included. The rich resources in the Nelson-Atkins Museum will receive special attention.

3 hrs

[back to top](#)

ART 458 Ceramic Art Of China And Japan

A study of the development of pottery and porcelain arts from the prehistoric pottery of China and Japan to the polychrome glazed porcelains of the 18th century in both countries. Ceramic models and figural sculpture as well as ceramic architectural ornamentation will be included. The Nelson-Atkins Museum collection will be used extensively.

3 hrs

[back to top](#)

ART 459 Architecture And Gardens Of China And Japan

Among the topics that will be considered in this course are the development of the pagoda and other temple architecture (Buddhist, Confucian, Taoist and Shinto). Palace and domestic architecture of both countries and the castle architecture of Japan as well as the literati and Zen gardens unique to China and Japan will all be included. Prerequisite: ART 319 or permission of instructor.

3 hrs

[back to top](#)

ART 460 Oceanic Arts

The arts of Polynesia, Micronesia and Melanesia express a concept of the world that came to an end for most cultures in the Pacific in the 19th century, certainly by the early 20th century. Spectacular in form and complex in meaning, they range from art forms associated with centralized leadership to those associated with men's societies, esoteric knowledge and status enhancement. Emphasis will be placed on the stylistic relationships between island groupings and the contexts in which the varying arts are employed. Prerequisite: ART 315 or permission of instructor.

3 hrs

[back to top](#)

ART 473 Visual Arts Administration

This course on professional arts administration includes assignments in: copyright laws, database management, ethics issues, evaluation design, gallery museum management, grant writing and budgeting, public relations, resume design, tax laws, and website design and management. Students are required to learn relevant computer programs. This course is also open to music and theatre majors. Prerequisite: permission of instructor. Offered: Winter.

3 hrs

[back to top](#)

ART 480 Art Since 1945

An inquiry into the range and purpose of the visual arts since 1945. Taught in a seminar format. Prerequisite: Permission of Department Advisor or instructor of the course. Annually.*

3 hrs

[back to top](#)

ART 482 Scope & Methods Of Art History

A history of the discipline, bibliography, procedures and methods, sources, and cataloging of illustrative materials, and similar topics essential to majors in art history. Prerequisites: Senior standing and permission of instructor. Every Winter.

3 hrs

[back to top](#)

ART 485 Technical Colloquium

An advanced study of technical matters pertinent to the production and study of art. Demonstration projects required. Prerequisite: Permission of department. Offered: Every Fall.

3 hrs

[back to top](#)

ART 486 Special Topics In Art Education

With permission of the department, an advanced student already certified to teach art may pursue special studies in art education on a seminar or tutorial basis. Every semester.

2-4 hrs

[back to top](#)

ART 495 Technical Studies In Art

With the permission of the department, an advanced student may pursue a technical investigation on a seminar or individual basis. Every semester.

2-4 hrs

[back to top](#)

ART 495 A Technical Studies In Art: Papermaking

2-4 hrs

[back to top](#)

ART 497 A Special Studies In Medieval/Renaissance Art

With the permission of the department, an advanced student may pursue a selected subject on a seminar or tutorial basis. Acceptable for graduate credit with approval. Every semester.

1-6 hrs

[back to top](#)

ART 497 B Special Studies In Baroque/Rococo Art

With the permission of the department, an advanced student may pursue a selected subject on a seminar or tutorial basis. Acceptable for graduate credit with approval. Every semester.

1-6 hrs

[back to top](#)

ART 497 C Special Studies In 19Th- And 20Th-Century Art

With the permission of the department, an advanced student may pursue a selected subject on a seminar or tutorial basis. Acceptable for graduate credit with approval. Every semester.

1-6 hrs

[back to top](#)

ART 497 D Special Studies In American Art And Architecture

With the permission of the department, an advanced student may pursue a selected subject on a seminar or individual basis. Acceptable for graduate credit with approval. Every semester.

1-6 hrs

[back to top](#)

ART 497 Special Studies In Art Museum

Selections from the permanent collections and loan exhibitions in the Nelson-Atkins Museum are studied with attention to historical, aesthetic and technical considerations. Prerequisites: Junior standing and at least nine hours of art history. Every semester.

1-6 hrs

[back to top](#)

ART 497 F Special Topics In Asian Art

With the permission of the department, an advanced student may pursue a selected subject on a seminar or individual basis. Acceptable for graduate credit with approval. Prerequisite: ART 319 or permission of instructor. Offered: Every semester.

1-6 hrs

[back to top](#)

ART 497 H Sp St In The Art Of African, Oceanic, And New World Cultures

With permission of the department, an advanced student may pursue a selected subject on a seminar or tutorial basis. Acceptable for graduate credit with approval. Every semester.

1-6 hrs

[back to top](#)

ART 497 I Special Studies In Ancient Art

An advanced student may pursue a selected subject on seminar or tutorial basis. Acceptable for graduate credit with approval. Prerequisite: Permission of Department. Every semester.

ART 498 F Special Problems In Casting

1-6 hrs

[back to top](#)

ART 498 G Special Problems In Construction

With permission of the department, an advanced student may pursue selected projects on a group or individual basis. Acceptable for graduate credit with approval. On demand.

1-6 hrs

[back to top](#)

ART 498 I Advanced Problems In Lithography

With permission of the department, an advanced student may pursue selected projects on a group or individual basis. Acceptable for graduate credit with approval. Every semester.

1-6 hrs

[back to top](#)

ART 498 J Advanced Problems In Intaglio

With permission of the department, an advanced student may pursue selected projects on a group or individual basis. Acceptable for graduate credit with approval. Every semester.

1-6 hrs

[back to top](#)

ART 498 L Special Problems In Photography

With permission of the department, an advanced student may pursue selected projects on a group or individual basis. Acceptable for graduate credit with approval. Every semester.

1-6 hrs

[back to top](#)

ART 498 M Special Problems In Electronic/Media

With permission of the Department, an advanced student may pursue selected projects in electronic media on a group or individual basis. Acceptable for graduate credit with approval. Prerequisites: Permission of Instructor. Semester Offered: Every.

1-6 hrs

[back to top](#)

ART 498 O Special Problems In Graphic Design Internship

Advanced students are accepted into the production studios of participating graphic design companies in the metropolitan region as a training experience. Prerequisite: Permission of the department.

1-6 hrs

[back to top](#)

ART 498 Q Special Studies in Art: Internship

Advanced students gain invaluable practical experience in a professional setting in the field of art.

1-6 hrs

[back to top](#)

ART 499 WI Senior Seminar

Capstone course for studio majors in all media. Meets once a week, three hours. Course covers contemporary issues in the arts, and critical theory. Seminar discussions are based on readings, guest speakers, visiting artists, and students' research. Intention of course is to address theoretical and practical issues in studio art practice, and to prepare students for graduation. Multiple papers, class presentation, and class participation are required. This course is writing intensive. Successful completion of the WEPT test required prior to enrolling. Prerequisite: Senior standing in studio. Offered: Winter Semester Annually

3 hrs

A&S 100 Methodologies In Liberal Arts & Sciences: Theories & Application

This three hour course is designed for freshmen and transfer students, to be taken during their first semester of study at UMKC. The curriculum provides students an introduction to the major disciplines and methodologies of the liberal arts and sciences (the humanities, social sciences, and sciences), including sessions on choosing majors and careers. Additional emphases will include learning to use the library, writing and computational skills, oral presentations, cultural diversity, stress management, and study strategies.

3 hrs

[back to top](#)

A&S 103 A Critical Thinking In The Arts And Humanities

This 3 hour course is designed to be taken in conjunction with entry level courses in Arts and Sciences disciplines. The course is designed to enhance students' critical thinking and intellectual capacity, communication skills, and life long learning strategies. Assignments and problem solving activities in the course focus on developing thinking in the disciplines through interactive class sessions, experiments, and problem solving applications. The course is intended to be taught concurrently with a departmental course offered in the Video Supplemental Instruction model. Numerous additional assignments and activities enable students to both succeed in the departmental course and develop transferable cognitive skills at the same time. Credit and grades for the A&S 103 course are based on a series of separate assignments specifically designed to enable students to succeed academically in the current and subsequent semesters. A&S 103 assignments would vary according to the discipline course it is linked with, but would include numerous supplemental readings, writing and problem solving activities done individually and in groups/teams. Class attendance and participation are required. Only one of the A&S 103 abc sequence may apply toward graduation requirements. Offered: Every Semester.

A&S 110 Successful Research: Making Sense Of The World Of Information

Do you know what you don't know? Find out in this course as we learn and discuss many of the common things you are expected to know to succeed in college, including the importance of discovering, understanding, analyzing, and using ideas and information in order to achieve academic success and genuine learning. You will learn how to ask meaningful questions, understand the structure and content of information resources, evaluate information, and use information resources as learning tools. The course is not geared to any specific discipline, but is core to success in any discipline. The course is open to all students, but is most beneficial when taken early in a student's academic career.

1 hr

[back to top](#)

A&S 160 Wine And Civilization

Geography of wine growing; the anatomy and physiology of the grapevine; the sociological forces of alcohol in American culture; wine and classical culture; economic aspects of wine and wine growing.

2 hrs

[back to top](#)

A&S 200 British Life And Culture

A survey of British history and culture from Roman times to the present day. The course includes such topics as British education, the legal system, the economic system, the Common Market, the development of working class movements such as Trade Union Councils, pictorial arts in Britain, dramatic arts, British music, and contemporary communications. The course is taught with lectures from British authorities in the various fields, discussions with lecturers and local faculty, and field trips to places associated with the weekly lectures. Grade for the course is determined by a combination of papers and exams. Offered under the Missouri-London Program in London. Each semester.

3 hrs

[back to top](#)

A&S 205 Contemporary Europe

An examination of selected political, cultural, economic and social forces shaping Europe today and of how they are related to Europe's past. The course is taught in Europe and employs field trips, lectures by European authorities on the various topics and lectures by the accompanying faculty member. Grades determined by a combination of papers and exams. Summers or Interim.

3-6 hrs

[back to top](#)

A&S 206 Contemporary Asia

An examination of selected political, cultural, economic and social forces shaping Asia today and of how they are related to Asia's past. The course is taught in Asia and employs field trips, lectures by Asian authorities on the various topics and lectures by the accompanying faculty member. Grades determined by a combination of papers and exams. Summers or Interim.

3-6 hrs

[back to top](#)

A&S 207 Contemporary Latin America

An examination of selected political, cultural, economic and social forces shaping Latin America today, and of how they are related to Latin America's past. The course is taught in Latin America and employs field trips, lectures by Latin American authorities on the various topics, and lectures by the accompanying faculty member. Grades determined by a combination of papers and exams. Offered: Summers or Interim.

3-6 hrs

[back to top](#)

A&S 208 Contemporary World Cultures

An examination of societies and cultures around the world. Students visit one or more countries, where they go on field trips, meet with local experts and students, and learn by studying and doing. Grades are determined by written assignments and practical performance. Offered: Summers or Interim

3 hrs

[back to top](#)

A&S 210 Cross-Cultural Interaction: Experience & Understanding

This course focuses on the social and cultural context of interactional patterns. U.S. and international students are paired in academic activities to encourage mutual understanding and self-awareness. They will draw on a variety of resources and learning modalities to examine aspects of their own and one another's societies, cultures, religions, and family relations. Making use of intercultural theories, students will reflect upon and explore cultural myths and stereotypes and develop a general understanding of cultural similarities and differences. Offered: Fall, Winter

3 hrs

[back to top](#)

A&S 240 Analysis Of Medical Terminology

Analyze the structure of medical words and apply this to basic anatomy, physiology and disease processes of the human body, stressing spelling and pronunciation. Offered: Fall and Winter

3 hrs

[back to top](#)

A&S 300 CF Cluster Course: African/African American Women And Creativity

3 hrs

[back to top](#)

A&S 304 CM Cluster Course: Body Images In Medicine And The Arts

Open to all students, this course focuses on the human body as an object of study in the history and practice of medicine. The class identifies a number of key issues which affect the attitudes that contemporary physicians often have about their patients based upon prevalent attitudes toward the human body in our society. Societal values which shape our ideas about gender, physical appearance, cosmetic surgery, obesity, and genetic abnormalities will be the focus of determining the extent to which these issues may actually affect the education of physicians and choices of medical treatment. The course examines the evolution of these values historically through works of art and recurring themes in literature. The course is interdisciplinary, involving lectures in contemporary medicine, the history of medicine, the history of art, and literature. It satisfies current baccalaureate requirements for interdisciplinary coursework in the humanities. The course will not count toward required courses for the major in art, art history, literature or history. Prerequisite: Junior standing. Offered: Summer 1994.

3 hrs

[back to top](#)

A&S 305 Ethics In America: The View From The Heartland

This interdisciplinary course brings national and local specialists together through the media of television case study and personal dialogues for an exploration of the ethical issues facing Americans today. Problems of the corporate world, of academe, of law, of medicine, of media and of the military will be subjected to analysis. With the assistance of experts from the faculty and the community, students will create a paradigm for ethical decision making. Prerequisites: PHILOS 210, PHILOS 222 or consent of the instructor or Foundations of Social Science. Offered: On demand.

3 hrs

[back to top](#)

A&S 310 Cross-Cultural Interaction II: Social Relations

This course will match international students with U.S. students to prepare them to interact more effectively in multilingual and/or intercultural settings. Students learn through readings on cultural theory and cultural relations, in-class small group activities, discussions and lectures, how issues of identity, such as age, sexual orientation, and ethnicity; impact cross-cultural interaction. Papers written for this course will help students integrate theory with previous experience, leading to an understanding of oppression in cross-cultural interaction. This course is a continuation of A&S 210: Cross-Cultural Interaction: Experience and Understanding, which is a prerequisite. Prerequisite: A&S 210 Offered: Fall, Winter

3 hrs

[back to top](#)

A&S 334 Introduction To African American Studies

This course provides an introduction to the contexts, theories, and methodologies that undergird African American studies. In addition to substantial time spent covering particular research skills and resources, students will also be introduced to African American culture and the issues related to African American studies from several perspectives: history, literature, sociology, communication studies, and the like. Influences and perspectives from Africa, the Caribbean and South America will also be covered. The course will thus provide a broad background in African American culture and history, an introduction to the methodologies of several disciplines, and discussion of particular contemporary and historical issues such as slavery, segregation and integration, the Civil Rights Movement, Pan-Africanism, Afrocentrism, and current political debates. Prerequisite: None. Offered: Once a year.

3 hrs

[back to top](#)

A&S 341 Union Leadership and Administration

This course focuses on the roles and challenges of union leadership in a changing environment. Topics include the union leaders' role as a representative, organizer and educator as well as administrative responsibilities within the union and the relationship with enterprise management in both adversarial and participatory situations. Options for leadership styles and organizational models will be discussed and explored in both theory and practice. Leaders will develop their skills of motivation, speaking, strategic planning and managing complex campaigns and diverse organizations. This course is part of the Certificate Program in Labor Studies and is offered on the University of Missouri Interactive Video Network at UMKC, UMSL, and UMC.

Chemistry

CHEM 115 Elements Of Chemistry I

A one-term course in general chemistry with special emphasis on organic chemistry and biochemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course. Corequisite: CHEM 115L. Three hours of lecture each week, one hour of discussion each week. Fall, Winter.

4 hrs

[back to top](#)

CHEM 115 L Elements Of Chemistry, Laboratory I

A one-term course in general chemistry with special emphasis on organic chemistry and biochemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course. Corequisite: CHEM 115. One three hour laboratory period each week. Fall, Winter.

1 hr

[back to top](#)

CHEM 160 Chemistry, Society, And The Environment

This course is intended to offer a survey of chemical and scientific concepts surrounding current issues. The emphasis will be on the application of fundamental chemical knowledge to allow a full understanding of these issues in the context of currently known facts and theories. Through classroom discussion and application of the scientific method, the ramifications of the issues will be examined. Topics will include pollution, the importance of the chemical industry, its responsibilities to society, and other items of current scientific and environmental interest.

3 hrs

[back to top](#)

CHEM 160 L Laboratory For Chemistry, Society, And The Environment

This course is offered in support of CHEM 160. It will consist of field activities, experiments, and demonstrations to reinforce the concepts and ideas presented in that course.

1 hr

[back to top](#)

CHEM 206 Human Nutrition

Introduction to nutrition for health and wellness and the use of chemical energy in the breakdown and synthesis of biomolecules. Nutrition as it applies to a variety of life situations from infancy to older adults. Learning encompasses elements of anatomy and physiology related to nutrition and health.

3 hrs

[back to top](#)

CHEM 211 General Chemistry I

Stoichiometry, gas laws, thermochemistry, atomic structure, molecular shapes and bonding theories. Prerequisites: or corequisite MATH 110 or equivalent Restrictions: corequisite CHEM 211L Offered: Each Term

4 hrs

[back to top](#)

CHEM 211 L Experimental General Chemistry I

Introduction to the laboratory techniques used in studying the chemical properties of substances. Some quantitative techniques are included. Prerequisites: MATH 110 or equivalent Restrictions: corequisite CHEM 211 Offered: Each Term

1 hr

[back to top](#)

CHEM 212 LR Experimental General Chemistry II

Introduction to analysis and synthesis. Descriptive chemistry of the more common elements. Three hours per week. Prerequisites: CHEM 211 and CHEM 211L or equivalent (each with a C-or better) Restrictions: corequisite CHEM 212R Offered: Each Term

1 hr

[back to top](#)

CHEM 212 R General Chemistry II

Liquids and solids, solutions, equilibrium, kinetics, electrochemistry and thermodynamics. Introductory course to all advanced work in chemistry. Prerequisites: CHEM 211 and CHEM 211L or equivalent (each with a C-or better) Restrictions: corequisite CHEM 212LR Offered: Each Term

4 hrs

[back to top](#)

CHEM 311 Laboratory Safety And Health I

An introduction to laboratory safety and health. Topics to be discussed include good laboratory practice; laboratory hazards; safe chemical handling, storage and disposal; first aid; protective equipment; and federal regulations. Prerequisite: CHEM 320 or CHEM 321, or equivalent. Fall.

1 hr

[back to top](#)

CHEM 320 Elementary Organic Chemistry

A one-semester course covering both aliphatic and aromatic fields designed to satisfy requirements for dental schools, medical technology programs, six-year medical programs, pharmacy schools, biology majors. Prerequisite: CHEM 211 CHEM 211L and CHEM 212 CHEM 212L or their equivalents (each with a C-or better). Restrictions: corequisite CHEM 320L Offered: Winter, Summer

4 hrs

[back to top](#)

CHEM 320 L Experimental Organic Chemistry

Elementary organic chemistry experiments to teach basic laboratory operations. Three hours of laboratory a week. Prerequisite: CHEM 211 CHEM 211L and CHEM 212 CHEM 212L or their equivalents (each with a C-or better). Restrictions: corequisite CHEM 320 Offered: Winter, Summer

1 hr

[back to top](#)

CHEM 321 Organic Chemistry I

The two terms (CHEM 321, CHEM 322R) constitute an integrated unit in which the chemistry of aliphatic, aromatic, and some heterocyclic compounds are studied. The study begins with simple monofunctional compounds and ends with polyfunctional natural products. Prerequisites: CHEM 211 CHEM 211L and CHEM 212 CHEM 212L or their equivalents (each with a C-or better). Restrictions: corequisite CHEM 321L Offered: Each Term

3 hrs

[back to top](#)

CHEM 321 L Organic Chemistry Laboratory I

CHEM 321L introduces the student to basic techniques and procedures in isolation, purification, and characterization of organic compounds and simple reactions used in the organic chemistry laboratory. The student will also be trained in the proper way to write a scientific laboratory report. Prerequisite: CHEM 211 CHEM 211L and CHEM 212 CHEM 212L or their equivalents (each with a C-or better) Restrictions: corequisite CHEM 321 Offered: Each Term

1 hr

[back to top](#)

CHEM 322 L Organic Chemistry Laboratory II

CHEM 322L is an extension of CHEM 321L. CHEM 322L builds from the basic techniques, procedures, and writing to more advanced organic operations. Prerequisite: CHEM 321 and CHEM 321L or equivalent (each with a C-or better) Restrictions: corequisite CHEM 322R Offered: Each Term

1 hr

[back to top](#)

CHEM 322 R Organic Chemistry II

Continuation of CHEM 321. Prerequisites: CHEM 211/211L, CHEM 212/212L and CHEM 321/321L or their equivalents. (each with a C-or better) Restrictions: corequisite CHEM 322L Offered: Each Term

3 hrs

[back to top](#)

CHEM 330 Elementary Physical Chemistry

An introductory course in the principles of physical chemistry for students who have not had calculus. Prerequisites: CHEM 320, CHEM 322R or CHEM H322R, college physics, and a good background in algebra and trigonometry. Three lecture hours a week. Fall.

3 hrs

[back to top](#)

CHEM 341 Analytical Chemistry I: Quantitative Analysis

Principles of gravimetric, volumetric, electrolytic, and other methods of analysis. Prerequisites: CHEM 212R or CHEM H214, and MATH 120. Two lectures and six laboratory hours a week. Offered: Every Fall; Winter term in odd years.

4 hrs

[back to top](#)

CHEM 341 WI Analytical Chemistry I: Quantitative Analysis

Principles of gravimetric, volumetric, electrolytic, and other methods of analysis. Satisfies writing intensive requirement for the B.A. degree in Chemistry. Prerequisites: CHEM 211 CHEM 211L, CHEM 212 CHEM 212L, and MATH 120 or their equivalents (each with a C-or better). Restrictions: Has passed the WEPT Offered: Each Term

4 hrs

[back to top](#)

CHEM 345 R Instrumental Analysis

An introductory course on the use of instruments for chemical analysis with particular reference to applications of interest to medical technologists and other students in the sciences. Emphasis will be placed on optical, electrochemical and separation methods. Prerequisites: CHEM 320, CHEM 341, or their equivalents. (Does not meet requirements for an A.C.S. certified degree). Two lectures and three laboratory hours each week.

3 hrs

[back to top](#)

CHEM 367 Bioorganic Chemistry

An examination into the current topics at the interface between chemistry and biology. Emphasis will be on the current literature and will include such topics as nucleic acid chemistry, protein chemistry, and carbohydrate chemistry.

Prerequisites: CHEM 321 CHEM 321L and CHEM 322 CHEM 322L or their equivalents_(each with a C-or better) Offered: Fall

3 hrs

[back to top](#)

CHEM 382 Inorganic And Organic Synthesis

A number of inorganic, organic, and organometallic compounds will be prepared using a variety of synthetic techniques.

Prerequisites: CHEM 321 CHEM 321L and CHEM 322 CHEM 322L or their equivalents. (each with a C-or better Offered: Fall

2 hrs

[back to top](#)

CHEM 387 Environmental Chemistry I

A survey of how chemical principles can be applied to the environment. Included will be topics in aquatic chemistry, atmospheric chemistry and chemistry of the geosphere and soil. Prerequisites: CHEM 320 OR CHEM 322. Offered: Winter Semester.

3 hrs

[back to top](#)

CHEM 388 Environmental Chemistry II

Discussion of selected topics in advanced environmental chemistry, such as environmental toxicology, environmental risk, the chemistry of hazardous wastes and their treatment, and environmental analytical chemistry. Prerequisite: CHEM 387.

3 hrs

[back to top](#)

CHEM 390 Special Topics In Chemistry

This course will focus on an area of chemistry of contemporary significance. The amount of credit is to be determined by arrangement with the department. May be repeated for credit when the topic varies but no more than three hours of credit may be applied to major course requirements. Prerequisites: Consent of instructor and either CHEM 320, 322R or H322R. On demand.

1-3 hrs

[back to top](#)

CHEM 390 PT Special Topics In Chemistry

1-3 hrs

[back to top](#)

CHEM 395 Directed Readings In Chemistry

Intensive readings in areas of joint interest to the enrolled student and the cooperating faculty member. Readings may not duplicate or substitute for current course offerings. Prerequisites: CHEM 320 CHEM 320L or CHEM 321 CHEM 321L and CHEM 322/322L or their equivalents. (each with a C-or better). Restrictions: permission of supervising faculty member Offered: By Arrangement

1-3 hrs

[back to top](#)

CHEM 399 Intro To Research

Special problems to introduce undergraduate chemistry majors to research methods. A comprehensive written report is required and a copy of the report is to be retained in the chemistry office. May be taken only after consultation with a member of the chemistry staff. Prerequisite: CHEM 212R or CHEM H214. Semester offered: Every semester

1-3 hrs

[back to top](#)

CHEM 410 Chemical Literature

A systematic introduction to the efficient use of the chemical literature. Topics will include both classical search methods and computer search methods. Prerequisites: CHEM 320 CHEM 320L or CHEM 321 CHEM 321L and CHEM 322 CHEM 322L or their equivalents. (each with a C-or better). Offered: Fall

1 hr

[back to top](#)

CHEM 431 Physical Chemistry I

A first course in physical chemistry having a calculus base. This course emphasizes thermodynamics with an introduction to the basic principles of quantum mechanics. Prerequisites: MATH 210 and MATH 220; and PHYSICS 220 or preferable PHYSICS 250 Restrictions: Prerequisite or corequisite MATH 250 Offered: Fall

3 hrs

[back to top](#)

CHEM 432 Physical Chemistry II

A second course in physical chemistry having a calculus base. This course emphasizes the quantum mechanics description of atoms and molecules, molecular spectroscopy, statistical mechanics, and kinetics. Prerequisites: MATH 210, MATH 220 and MATH 250; and PHYSICS 220 or preferably PHYSICS 250; and CHEM 431 (each with a C-or better). Restrictions: corequisite CHEM 437WI Offered: Winter

3 hrs

[back to top](#)

CHEM 434 Molecular Spectroscopy

A theoretical introduction to molecular spectroscopy and its relation to structure. Electronic, vibrational and rotational spectra of chemical systems will be discussed. Prerequisite: CHEM 432 or consent of instructor. Offered: Fall term.

3 hrs

[back to top](#)

CHEM 437 WI Experimental Physical Chemistry I

Experimental methods in physical chemistry. One hour lecture and six hours laboratory each week. Satisfies writing intensive requirements for the B.A. or B.S. degree. Prerequisites: MATH 210, MATH 220 and MATH 250; and PHYSICS 220 or preferably PHYSICS 250; and CHEM 431 (each with a C-or better). Restrictions: Corequisite CHEM 432 and has passed the WEPT prior to enrollment Offered: Winter

3 hrs

[back to top](#)

CHEM 442 R Analytical Chemistry II: Instrumental Analysis

A continuation of CHEM 341. The experimental and theoretical aspects of optical and electrochemical, chromatographic and other physicochemical methods of analysis. Prerequisite: CHEM 341. Prerequisite or corequisite: CHEM 432. Two lectures and four hours laboratory a week. Winter.

3 hrs

[back to top](#)

CHEM 451 R Inorganic Chemistry

Modern concepts and theories of inorganic chemistry. Prerequisite or corequisite: CHEM 432. Three lecture hours each week. Winter.

3 hrs

[back to top](#)

CHEM 471 Introduction To Polymer Chemistry

Survey of organic and inorganic monomers and polymers; the occurrence, synthesis, structures and properties of natural and synthetic polymers; discussion of general properties of plastics, elastomers, fibers, resins, and plasticizers. Three lecture hours a week. Prerequisites: CHEM 432 (C-or better) Offered: Fall

3 hrs

[back to top](#)

CHEM 480 Computer Applications To Chemical Problems

An intense course in Fortran programming and its uses in chemical problems related to theory and experimentation. Emphasis will be placed on the mathematical structures of chemical problems and the coding of those problems into Fortran. No previous programming experience is required. Prerequisites: CHEM 320 or CHEM 322R.

3 hrs

[back to top](#)

CHEM 490 Special Topics In Chemistry

This course will focus on an area of chemistry of contemporary significance. The amount of credit is to be determined by arrangement with the department. May be repeated for credit when the topic varies but no more than three hours of credit may be applied to major course requirements. Prerequisites: Consent of instructor. Prerequisite or corequisite. CHEM 431. On demand.

1-3 hrs

[back to top](#)

CHEM 495 Directed Readings In Chemistry

Intensive readings in areas of joint interest to the enrolled student and the cooperating faculty member. Readings may not duplicate or substitute for current course offerings. Prerequisites: CHEM 432 and permission of the cooperating faculty member. By arrangement.

1-3 hrs

[back to top](#)

CHEM 499 Senior Research

The student is given an original research problem and will be held responsible for all previous experience in working toward its solution. A well-written, comprehensive, and well-documented research report is required, and a copy of the report is to be retained in the Chemistry department. Prerequisites: CHEM 432 and consent of a member of the Chemistry staff. Credit arranged. Semester offered: Every semester

1-9 hrs

[back to top](#)

CHEM H212 LR Experimental General Chemistry II-Honors

An alternative laboratory experience to CHEM 212LR, for those students gifted in laboratory skills and interested in working in a research lab setting. By arrangement. Winter.

1 hr

[back to top](#)

CHEM H321 Honors: Organic Chemistry I

3 hrs

[back to top](#)

CHEM H321 L Organic Chemistry Laboratory I - Honors

A more intense version of CHEM 321L. See course description for CHEM 321L for details. Offered: Winter term.

1 hr

[back to top](#)

CHEM H322 LR Organic Chemistry Laboratory II-Honors

A more intense version of CHEM 322L. See course description for CHEM 322L. Prerequisite: CHEM 321L.

Classical and Ancient Studies

CLASSICS 210 Foundations Of World Literature I

This course studies ancient world literature such as The Descent of Inanna, Egyptian love poetry, Hebrew Scriptures, the epics of Homer and Virgil, the Analects of Confucius, and the Oriental wisdom of Laozi. The course also considers ancient creation epics such as the cosmic battle between Marduk and Tiamat, the Metamorphosis of Ovid, and the great Indian epic The Ramayana. Also listed as WLD-LIT 210.

3 hrs

[back to top](#)

CLASSICS 300 Special Topics

A course about a selected field, genre or individual figure from the ancient world that is not part of the program's regular offerings. May be repeated for credit.

1-3 hrs

[back to top](#)

CLASSICS 300 A Special Topics

A course about a selected field, genre or individual figure from the ancient world that is not part of the program's regular offerings. May be repeated for credit.

1-3 hrs

[back to top](#)

CLASSICS 300 CB Cc: Women In The Ancient World

This course focuses on the history, representation, literature, social lives, and political roles of women in ancient civilization including Egypt, Mesopotamia, the Biblical World, Greece, and Rome. It integrates methodologies from history, art history and archaeology, literary studies, and women's studies.

3 hrs

[back to top](#)

CLASSICS 300 CR Roman Revolution: History And Culture From Gracchi To Augustus

The period of Roman history from the revolution initiated by the Gracchi to the demise of the Republic and the establishment of the Principate under the Augustus will be studied. The course begins with the Scipionic Circle under whose leadership foreign imperialism, domestic factionalism, and the influx of Greek culture increased. Political, social and cultural developments which culminated in the violent death of the old system will be traced. We will also show how Augustus kept the past alive to make his new government acceptable to the tradition-loving Romans. Students will read the words of such writers as Terence, Cato, Polybius, Cicero, Caesar, Sallust, Catullus, Horace, Virgil, and Ovid, whose works cover the important genres of Roman literature—new comedy, rhetoric, satire, history, epic, pastoral and lyric poetry.

3 hrs

[back to top](#)

CLASSICS 300 CS Cc: Clio And The Other Muses

This course focuses on the history, art, architecture, literature, and culture of Athens in the 5th Century BCE. Course readings will include primary literary and historical sources such as lyric poetry, comedy and tragedy, philosophy, and historical writings.

3 hrs

[back to top](#)

CLASSICS 300 CY Cc: Ancient World/Cinema

This course will explore the tradition of depicting the ancient Mediterranean world in film from the early silent era to the present. Topics to be covered include the ways that filmmakers respond to literary and historical sources from the ancient world, interact with the artistic tradition of films about the ancient world, the relation of these films to other works by the same creative personnel (directors, actors, writers, producers, etc.), and the political and cultural contexts in which the films were released.

3 hrs

[back to top](#)

CLASSICS 300 CZ Cc: Archaeology Of Ancient Disasters

Remarkable human achievements are revealed by archaeological research, but the human past was frequently shaped as well by disasters of natural and human origin. Drawing on case studies that include data from the geosciences, archaeological excavations, and historical sources, this class examines how earth processes, the biosphere, and human cultural behavior were all sources of catastrophe. We begin with the geological context of disaster, including earthquakes, volcanic eruptions, climate change, and soil depletion. Next, we examine how ancient societies responded to disease, an ever present threat from the biological environment. Finally, we look at how ancient human groups were changed by stresses of cultural origin, including overpopulation, depletion of vital resources, and warfare. The study of ancient disasters not only gives us a wider understanding of human history, it may offer lessons for coping with future catastrophes. Also cross listed as GEOLOGY 326CZ. Offered: On Demand

3 hrs

[back to top](#)

CLASSICS 300 D Special Topics

A course about a selected field, genre or individual figure from the ancient world that is not part of the program's regular offerings. May be repeated for credit.

1-3 hrs

[back to top](#)

CLASSICS 310 WI Ancient Philosophy

A survey of the central figures of classical philosophy: the pre-Socratics, Socrates, Plato, Aristotle, the Stoics, the Epicureans and other philosophers of antiquity. The contributions of major philosophers to the development of science, religion, and social and political theories are studied. Also listed as PHILOS 310WI. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent and successful completion of the WEPT.

3 hrs

[back to top](#)

CLASSICS 318 Bible As Literature

A critical study of the major portions of the Old and New Testaments and the Apocrypha, with special attention to the development of literature from oral tradition, the literary genres, themes and archetypes represented in the collection, and the diction and style which have influenced later literature. Consideration also of the relation of Biblical literature to the historical, religious, and cultural milieu of the ancient Near East. Also listed as ENGLISH 318.

3 hrs

[back to top](#)

CLASSICS 319 Myth And Literature

A study of classical myth including readings from Homer to Ovid, analysis of selected myths in later literature, art, and music, and a study of contemporary definitions and approaches to myth. Also listed as ENGLISH 319.

3 hrs

[back to top](#)

CLASSICS 340 A Classical Literature In Translation

This course will focus on representative authors and works from the Greek and Roman Classical periods, such as Homer, Sophocles, Euripides, Aeschylus, Aristophanes, Plato, the Greek Lyric Poets, Virgil, Horace Juvenal, Ovid and Plautus. Also listed as ENGLISH 340A

3 hrs

[back to top](#)

CLASSICS 369 Introduction To Prehistoric And Classical Archaeology

An introduction to archaeological research methods that traces human origins and cultural development from the earliest fossil evidence to the threshold of written history and civilization. This class emphasizes the evolutionary and cultural developments that allowed our ancestors to colonize the continents and develop lifeways involving hunting and gathering, farming and urbanism.

3 hrs

[back to top](#)

CLASSICS 376 Ancient Concepts of the Hero

This course traces the ancient concept of the hero by reading selected ancient works by authors such as Homer, Thucydides, Livy, Plutarch, Caesar, Tacitus, and Sallust. Students will also examine the impact of the ancient concept of the hero on modern literature and art. Also listed as ENGLISH 376

3 hrs

[back to top](#)

CLASSICS 430 Plato

Selected dialogues of Plato are studied with a view to understanding Plato's philosophy and its position in the world of Greece and antiquity. Plato's philosophy is also examined with reference to his place in the Western tradition and in modern philosophy. Also listed as PHILOS 430. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent

3 hrs

[back to top](#)

CLASSICS 431 Aristotle

Selected portions of Aristotle's works on logic, metaphysics, science, ethics, politics, and poetics are studied with a view to understanding Aristotle's philosophy and its position in the world of Greece and antiquity. Aristotle's philosophy is examined with reference to its place in the Western tradition and in modern philosophy. Also listed as PHILOS 431. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent

3 hrs

[back to top](#)

CLASSICS 467 Myth And Ritual

"Myth" and "ritual" have long been fundamental categories in the study of religion. This course will briefly survey some of the major theories and approaches to the study of myth and ritual from the Enlightenment to the present. Will not only trace the shifting meanings of "myth" and "ritual," but will critically evaluate the utility of diverse approaches to the study of religious phenomena designated by these terms. Reading will include theoretical works, as well as selected case studies. Also listed as HISTORY 467.

3 hrs

[back to top](#)

CLASSICS 469 Archaeology And Biblical History

An examination of ancient Israel as she emerges from the ruins of the past, both lapidary and literary. Through a study of the "mute documents," artifacts man-made (storied cities, household utensils, inscribed shards from Jericho to Jerusalem) we gain an insight indispensable for Biblical studies, for ancient Near Eastern history. Also listed as HISTORY 469.

3 hrs

[back to top](#)

CLASSICS 470 Ancient Egypt

This course describes the political, social and cultural evolution of ancient Egypt from pre-dynastic times, with major emphasis upon the Old, Middle, and new Kingdoms (especially the 18th dynasty and the reign of Akhenaton). Also listed as HISTORY 470.

3 hrs

[back to top](#)

CLASSICS 470 P Ancient World: The Social History Of The Ancient World

The optional four-credit-hour component (modified independent study) will concern the social aspects of these civilizations, i. e., their daily lives. Readings and audiovisual aids will be used to help the student who will be expected to choose one aspect of each civilization, such as women, slavery, merchants, education, medicine, etc., and write a five-page paper about that topic for each period, i.e, Mesopotamia, Egypt, Greece and Rome. Also listed as HISTORY 470P.

4 hrs

[back to top](#)

CLASSICS 471 Ancient Greece

This course begins with a survey of the pre-classical Minoan and Mycenaean civilizations and then describes the rise of prominent Greek city-states (with particular emphasis upon the evolution of Sparta and the political, social and cultural contributions of Athens). The course concludes with the rise of Macedon and Alexander's conquests and significance. Also listed as HISTORY 471.

3 hrs

[back to top](#)

CLASSICS 471 P Ancient World: The Political Structure Of The Ancient World

The four-hour lecture period on weeknights will emphasize the historical aspects of the ancient civilizations. The lectures will be chronologically organized to focus upon their evolution from their rise to their collapse. Also listed as HISTORY 471P.

4 hrs

[back to top](#)

CLASSICS 472 Ancient Rome

This course covers Roman history from its origins (including the Etruscans) to the decline of the imperial system. Particular emphasis is placed upon the political, social and economic developments in the Republic, the death of the Republic, the early Principate, and the factors that led to Rome's decline in the ancient world. Also listed as HISTORY 472.

3 hrs

[back to top](#)

CLASSICS 472 P Ancient World: The Cultural & Intellectual Dimensions Ancient Civ

The four weekend periods will provide the students with a general picture of these civilizations: society, religion, economics, and culture (w.f., arts, literature, philosophy, science, etc.). Guest lecturers, slides, films and video cassettes will be used to introduce the varied aspects of these ancient peoples. Also listed as HISTORY 472P.

4 hrs

[back to top](#)

CLASSICS 475 WI History Of Ancient Israel

Judaism has had a tremendous impact on our civilization and yet most Americans are only dimly aware of its origins and development. This course will trace the roots of the Jewish religion in its historical context from its beginnings through the formation of rabbinic culture. The rise of Christianity will be examined in its original Judaic context, and recent discoveries, particularly those pertaining to the Dead Sea Scrolls, will be interpreted. Also listed as HISTORY 475WI.

3 hrs

[back to top](#)

CLASSICS 499 Senior Tutorial

A three-hour comprehensive reading and research tutorial leading to the writing of a senior paper. It consists of tutorial sessions and independent research leading to a major paper using original source materials. Prerequisite: Recommended for students wishing to pursue a graduate degree in Classical and Ancient Studies. Restrictions: Recommended for students wishing to pursue a graduate degree in Classical and Ancient Studies.

3 hrs

[back to top](#)

Communication Studies

COMM-ST 110 Fundamentals Of Effective Speaking And Listening

An introduction to the dimensions of effective platform speaking with special emphasis on developing critical listening skills. Lecture, performance, and discussion. Every semester.

3 hrs

[back to top](#)

COMM-ST 140 Principles Of Communication

An interdisciplinary introduction to the study of contemporary communication studies including a consideration of intrapersonal, interpersonal and public communication. Lecture. For non-majors only. Offered: Fall or winter.

3 hrs

[back to top](#)

COMM-ST 212 Argumentation And Debate

A study of the nature of logical discourse generated through the preparation and presentation of oral argument within the framework of the debate format. Lecture, performance and discussion. Offered: Fall and winter.

3 hrs

[back to top](#)

COMM-ST 213 Argumentation And Critical Thought

An introduction to the theory and application of argument construction. The course is designed to examine the fundamental strategies of critical thinking and to help understand the relationships among critical thought and argumentation development and refutation. This course is designed for application across many fields and is not specific to debate or oral argument. Lecture, discussion. Prerequisite: None. Offered: Fall.

3 hrs

[back to top](#)

COMM-ST 220 Introduction: Modern Communications Media

A comprehensive survey of the content, structure and control of the communications media in American society--newspaper, motion pictures, radio and television; providing an informational frame of reference that will enable discerning students to formulate and apply useful critical concepts in evaluating America's media environment. Every semester.

3 hrs

[back to top](#)

COMM-ST 230 Introduction To Film Studies

The course is an introduction to the study of film as an art form and industrial practice. Students are introduced to the basic terms and concepts of film theory, including theories of film editing and mise-en-scene while becoming familiar with the basic "canon" of major films and directors that form the foundations for the academic field of film studies. Offered: Fall

3 hrs

[back to top](#)

COMM-ST 250 Introduction To Film And Video Methods

This course is a comprehensive examination of film and video production methods and visual literacy. It is the foundation and prerequisite for all film, video, and new media production courses. It is also the professional media production overview course for advertising, public relations, and other creative, non-technical communications careers. Prerequisite: None Offered: Spring, Fall

3 hrs

[back to top](#)

COMM-ST 265 Media Photoimaging

An introduction to the production and manipulation of photographic images as they are applied in the print publishing medium, multi-image, and multimedia communications. Photography will be examined as a fundamental medium for the study of visual communication and the techniques of creating specifically meaningful images. This course will provide an essential familiarity with the terminology, concepts, practices, and process variables involved in photographic direction and production supervision, and will also introduce the basics of image composition, manipulation, and quality control. Offered: Summer & Fall

3 hrs

[back to top](#)

COMM-ST 281 Animation

This course provides an introduction to animation production techniques and an overview of the history of American animation arts. We will address both stop-motion and computer animation using industry standard software.

3 hrs

[back to top](#)

COMM-ST 303 WI Introduction To Journalism

Introduction to the styles and techniques of reporting and writing basic news through assignments in straight news, features and in-depth stories. Exposure to the history and principles of American journalism. Practical application in writing news and news feature articles. Also offered as ENGLISH 303WI.

3 hrs

[back to top](#)

COMM-ST 308 Introduction To The Study Of Human Communication

This course serves to introduce students to the basic theories, perspectives and methodologies used (historically and currently) in the study of speech, interpersonal and mass communication.

3 hrs

[back to top](#)

COMM-ST 308 WI Introduction To The Study Of Human Communication

This course serves to introduce students to the basic theories, perspectives and methodologies used (historically and currently) in the study of speech, interpersonal and mass communication. Writing Intensive course.

3 hrs

[back to top](#)

COMM-ST 311 Radio & Television Performance

A study of the specialized radio and television performing and operating situations and techniques simulated and evaluated in studio sessions. Lecture, discussion and performance. Prerequisite: None.

3 hrs

[back to top](#)

COMM-ST 312 Advanced Public Speaking

Advanced study of rhetorical theory and its application to the presentation and criticism of public discourse. Prerequisite: COMM-ST 110. Offered: Fall & Winter.

3 hrs

[back to top](#)

COMM-ST 312 P Advanced Public Speaking

Advanced study of rhetorical theory and its application to the presentation and criticism of public discourse. Prerequisite: COMM-ST 110. Offered: Fall & Winter.

3 hrs

[back to top](#)

COMM-ST 314 WI Reporting

A seminar of practical application in advanced reporting. Assignments to cover news events and to pursue in-depth news reports on the campus and off. Work is turned in on deadline and critiqued by the instructor. Also offered as ENGLISH 313. Prerequisite: ENGLISH 110, ENGLISH 225, and successful completion of the WEPT.

3 hrs

[back to top](#)

COMM-ST 317 Persuasion

A study of the rhetorical, psychological and ethical principles of influencing and controlling individuals and groups, and of the methods of adapting to various attitudes and audiences through the preparation, presentation and evaluation of persuasive speeches. Lecture, discussion and performance. Prerequisite: COMM-ST 110. Offered: On demand.

3 hrs

[back to top](#)

COMM-ST 320 Mass Media, Culture And Society

A critical exploration of the role of mass media (and its reception) in the social construction of reality. The course employs theoretical, analytical and empirical approaches derived from multidisciplinary sources, particularly "critical theory" semiology, post-structuralism, psychoanalysis and ethnography. Term paper required. Prerequisite: Offered: Every semester.

3 hrs

[back to top](#)

COMM-ST 322 Oral Performance In Speech Communication

This course is designed to develop and strengthen oral communication for students pursuing careers in pre-law, media, human resources, and education as well as increase the skills of potential professional speakers. The student will learn to develop emotional, vocal, physical, and non-verbal skills through an investigation of poetry, prose, and non-fiction literature. Through the process of reading, studying, investigating, rehearsing, and performing literary and nonliterary works, the students will learn to pay particular attention to the voice embodied in a given text and the cultural and social context within which that voice speaks. Prerequisite: COMM-ST 110. Offered: Fall and Winter.

3 hrs

[back to top](#)

COMM-ST 331 WI Mass Media In America

Writing intensive. Social History of the development of mass media, radio, film and television, from Marconi's first experiments to the present. Emphasis placed on relationship of American culture and American media. Term paper required. Prerequisite: Successful completion of the WEPT. Offered: Fall.

3 hrs

[back to top](#)

COMM-ST 339 Film Theory And Criticism

The course serves to locate the film medium within the study of human communication while developing an understanding of the effects of film on the individual and society with an emphasis on understanding the film medium as both an art form and a reflection of a social system with national, cultural & sub-cultural components. Term paper required. Offered: Spring

3 hrs

[back to top](#)

COMM-ST 341 Rhetorical Theory And Criticism

An analysis of significant public discourse within the context of social protest and political rhetoric with attention to applying methods of communication criticism in evaluating the effectiveness of persuasive advocacy aimed at social change. Fall.

3 hrs

[back to top](#)

COMM-ST 341 WI Rhetorical Theory And Criticism

Writing intensive. An analysis of significant public discourse within the context of social protest and political rhetoric with attention to applying methods of communication criticism in evaluating the effectiveness of persuasive advocacy aimed at social change. Prerequisite: COMM-ST 308 and successful completion of the WEPT required for admission.

3 hrs

[back to top](#)

COMM-ST 343 Group Dynamics

A study of strategies and communication relationships unique to non-dyadic situations, with an emphasis on the integral structure of leadership, roles, norms and task functions. Discussion. Offered: On demand.

3 hrs

[back to top](#)

COMM-ST 344 Communication In Organizational Settings

An examination of the major elements of interpersonal, group, and oral communication competence essential to human interaction in organizational settings. The course focuses on developing communication competencies and increasing theoretical understanding of the communication process within the organizational context. COMM-ST 110 OR COM-ST 308. Offered: Fall/Winter.

3 hrs

[back to top](#)

COMM-ST 344 WI Communication In Organizational Settings

An examination of the major elements of interpersonal, group, and oral communication competence essential to human interaction in organizational settings. The course focuses on developing communication competencies and increasing theoretical understanding. Prerequisite(s): COMM-ST 110 or COMM-ST 308 and WEPT.

3 hrs

[back to top](#)

COMM-ST 351 WI Fundamentals Of Writing For The Media

Writing intensive. Analysis of individual differences and common characteristics of copy for eye and ear, with emphasis on the application of both verbal and visual imagery in the process of communicating the writer's ideas and intentions. Weekly written assignments and critical analysis of the student's work. Prerequisites: COMM-ST 110 and successful completion of the WEPT. Offered: Fall and winter.

3 hrs

[back to top](#)

COMM-ST 354 Introduction to Screenwriting

An introduction to the form and language of the motion picture screenplay. Students will learn to create a workable blueprint for a movie and undertake an in-depth examination of visual storytelling. This will include understanding the basics of dramatic structure, scene and sequence construction and the role of dialogue. Emphasis will be placed on students mastering the accepted movie industry format of the screenplay. They will also adapt a short story and revise it after giving and receiving feedback in small groups.

3 hrs

[back to top](#)

COMM-ST 363 Radio Production I

A study of the techniques of producing audio material for use in radio, in concerts, on film, on television and in the recording studio. Lecture, discussion, and laboratory. Prerequisite: COMM-ST 308. Offered: Fall.

3 hrs

[back to top](#)

COMM-ST 371 Intermediate Video Production

A study of the principles and techniques of studio production, with emphasis on introducing and developing intermediate skills using professional broadcast video equipment and post-production technologies. Lecture, discussion, and laboratory. Prerequisite: COMM-ST 250 or consent of instructor.

3 hrs

[back to top](#)

COMM-ST 373 Intermediate Media Production

Emphasis on digital production and non-sync 16mm film. Students produce, direct and edit a significant narrative, documentary or experimental project. Lecture, discussion and laboratory. Prerequisite: COMM-ST 250 Offered: Spring

3 hrs

[back to top](#)

COMM-ST 376 History Of The Film Industry

A history of the development of the American film industry from 1900 to the end of the studio era. The course will stress such issues as studio production, censorship, the economics of production and the selling of mass culture through the film medium. Term paper required. On demand.

3 hrs

[back to top](#)

COMM-ST 377 Interpersonal Communication

An intensive analysis of the dimensions of intrapersonal and interpersonal communication designed to identify the philosophies and methods which underwrite effective human communication. Lecture and discussion. Prerequisite: COMM-ST 308 Offered: Fall and winter.

3 hrs

[back to top](#)

COMM-ST 377 WI Interpersonal Communication

Writing intensive. An intensive analysis of the dimensions of intrapersonal and interpersonal communication designed to identify the philosophies and methods which underwrite effective human communication. Lecture and discussion. Prerequisite: Successful completion of the WEPT (effective FS93). Offered: Fall and winter.

3 hrs

[back to top](#)

COMM-ST 378 Computer-Mediated Communication

Examination of the nature of human communication on the Internet. Design function, content innovations of computer mediated communication discussed, with emphasis on technology as a means of interpersonal communication. Research, essays, and participation in online environment required. Prerequisite: None Offered: On demand

3 hrs

[back to top](#)

COMM-ST 378 WI Computer Mediated Communication

Examination of the nature of human communication on the internet. Design, function, content innovations of computer mediated communication discussed, with emphasis on technology as a means of interpersonal communication. Research, essays, and participation in online environment required. Prerequisite: Successful completion of the WEPT EXAM Restrictions: Writing Intensive. Successful completion of the WEPT Exam required. Offered: Fall 2003.

3 hrs

[back to top](#)

COMM-ST 380 Contemporary Media Topics

3 hrs

[back to top](#)

COMM-ST 382 Advanced Media Topics

Variable content: Media Arts and Media Studies Topics will be addressed in this course including film/video production and post-production techniques, and analytical evaluation of recent trends in media. Prerequisite: Topic Dependent Restrictions: Approval of instructor Offered: Winter

3 hrs

[back to top](#)

COMM-ST 384 Documentary Film

The purpose of this course is to familiarize students with the history, terminology, film making techniques, film makers and cultural/societal influences of documentary film. Five distinguishing characteristics will be examined in terms of 1) subjects, 2) purposes, points of view, or approaches, 3) forms, 4) production methods and techniques and 5) experiences they offer to audiences. Prerequisites: None. Offered: Every winter.

3 hrs

[back to top](#)

COMM-ST 385 Documentary Production

This course is designed to familiarize students with the basics of documentary production from an artistic, ethical, and practical results-oriented perspective. Prerequisites: COMM-ST 250 or COMM-ST 270 Offered: Fall

3 hrs

[back to top](#)

COMM-ST 388 Media Ethics

This course is designed to sensitize the ethical considerations the underlie the conventions and practices of print, broadcast, and internet media. By placing traditional and new media in a wider intellectual context than is generally possible under the daily demands of producing news, information, and entertainment, it seeks to produce a larger sense of media as industry and as a career choice.

3 hrs

[back to top](#)

COMM-ST 390 Forensic Activities

Participation in the intercollegiate forensic program. A practicum in debate, discussion, oratory and other forensic activities. Prerequisite: Consent of instructor. Offered: Summer, fall, winter.

1-4 hrs

[back to top](#)

COMM-ST 391 The World(S) Of Alfred Hitchcock

The course offers an historical study of the film art of Alfred Hitchcock. The course gives special attention to the director's work in the silent cinema of the U.K., Hitchcock's early major British sound films, his arrival in the United States, his major World War II propaganda films, the directors maturing into a major influence on world cinema in the 1940s, and Hitchcock's "masterworks" of the 1950s-1960s. Offered: On Demand

3 hrs

[back to top](#)

COMM-ST 392 Great Directors Of Foreign Film

The course is an introduction to the major films and directors of the international cinema. Particular attention will be given to the influence of German Expressionism, Italian "Neo-Realism," the "French New Wave," the "New German Cinema" of the 1970s, post-Franco Spanish cinema, and the national cinemas of South America, India, China, and Japan. Offered: On Demand

3 hrs

[back to top](#)

COMM-ST 393 History Of The Hollywood Musicals

The course offers an historical survey of the development of the film musical as a major Hollywood film genre from the introduction of the sound film in 1927 to current manifestations of the genre. The course gives particular attention to the development of the studio musicals of the 1930s, the role of the musical during World War II, the "Golden Age" of the MGM musical in the 1950s-60s, and the effects on the traditional Hollywood musical of the Vietnam Era social upheavals. Offered: On Demand

3 hrs

[back to top](#)

COMM-ST 394 The World Of "Film Noir"

The course offers an historical survey of the development of "film noir" as a major film genre. The course examines the major characteristics that define "film noir" and offers an introduction to the historical roots of this genre in German Expressionism, as well as the social and political context for the development of "film noir" as a Hollywood studio genre in the late 1940s. Particular attention is given to the social/ political conditions of the 1950s that contributed to both the rise and decline in popularity of "film noir" during the Cold War, as well as the film genre's revival in the "neo-noirs" of the 1970s. Offered: On Demand

3 hrs

[back to top](#)

COMM-ST 400 Special Studies

(A-N) This is an upper-level course on a subject which is not a part of the regular department offering. The course results from one or more of the following: (1) the expressed desire of students (2) the broadened or refocused scholarship of a member of the communication studies faculty (3) the temporary presence of a scholar whose specialization is not reflected in the department's regular offerings (4) the conclusion by the department that the course meets a community need (5) the effort of the Communication Studies faculty to provide an interdisciplinary approach to an era or topic. The course is experimental in the sense that it is a "one-time" offering with the potential of repetition or modification, depending upon student, faculty and community response. On demand.

1-3 hrs[back to top](#)**COMM-ST 400 CB Cc:The African Diaspora In The Arts And Culture**

This new cluster course will examine the expression of certain aspects of African culture in the African Diaspora. Black culture in the area now popularly termed "The Black Atlantic," and in particular Western Africa, the Caribbean and certain parts of South and North America, will be examined. Special attention will be paid to visual and material culture, feminist and anti-apartheid literature, and religion and spirituality. African culture is a multi-layered and complex phenomenon. An understanding of African Diastolic culture involves an analysis of the effects of historical and sociological movements, the interpretation of written culture and the effects of Africa's response to colonial intrusion. Questions concerning the transmission and transformation of African cultures will be addressed by a close investigation of visual and material culture, literary texts, and cosmological constructions of African peoples. Students will be exposed to methodologies garnered from the Arts, Literature and Religious Studies. Offered: Fall Restrictions: Sophomore or above

COMM-ST 402 CD Cluster Course: American Social Film:Silver Screen&American Dream

This course will combine American social history and American film history. Using Hollywood entertainment films, the course will look at Hollywood as an indicator of social, political, and economic conditions in the U.S. from the early 1900s to the late 1950s. The main topics are war and the threat of war, poverty and affluence, racial tensions, censorship, and political zealotry. A paper is required, and a social history textbook, a film history textbook, a play by Arthur Miller and a collection of articles constitute core readings.

3 hrs

[back to top](#)

COMM-ST 403 CE Cc: Radical Changes Since 1945

This cluster course will focus on modernism, post-modernism and expressionism in the visual arts and literature since World War II. Lectures address intellectual movements-such as existentialism and formalism-and cultural development-such as increased impact of technology and mass media-in contemporary society. By focusing on these movements, we hope to provide an integrated view of the literature and visual arts of the period and to draw upon analogous developments in contemporary architecture, music, philosophy and film. This course is offered as a cluster with ENGLISH 300CE.

3 hrs

[back to top](#)

COMM-ST 404 CD World War I in Film: The World made Modern

This cluster course examines World War I and its legacy through the lenses of international history and film studies. It explores the origins and conduct of the "Great War," as it was called at the time, as well as its transforming effects on the modern international relations and the ongoing process of globalization. It also examines how the war spurred the growth of an infant motion picture industry, and how movies produced during the decades that followed helped shaping popular memories of the conflict-reflecting and shaping cultural discourses regarding the myth or reality of modern civilizational progress; the ethics of modern weaponry; the individual's placed in mass society; constructions of class, race, and gender; and the meaning of national identify in a globalizing world. The class will draw on selected history texts and an array of films and film clips. Cross listed with HISTORY 420CC

3 hrs

[back to top](#)

COMM-ST 431 Colloquium In Interpersonal Dynamics

An examination of the practical application of communication principles and theories, with focus on one of the following: health, organizational, nonverbal, intrapersonal, conflict management, computer0mediated, or intercultural communication. Prerequisite: None Offered: On demand.

3 hrs

[back to top](#)

COMM-ST 432 Press, Politics And Public Policy

Undergraduate component of COMM-ST 532. An advanced course in the study of the press and political establishments in the formation of public policy. Lecture, discussion and research. Prerequisites: Two semester of undergraduate writing courses of 300-400 level or professional equivalents.

3 hrs

[back to top](#)

COMM-ST 444 WI Intercultural Communication

A consideration of communication phenomena in multicultural settings. A study of the public forum with an emphasis on the interpersonal aspects of international, intercultural, and co-cultural communication. Lecture and discussion. On demand. Prerequisite: Successful completion of the WEPT.

3 hrs

[back to top](#)

COMM-ST 448 Principles Of Public Relations

An overview, presenting the function, purposes, procedures and practices of public relations, its role in society, industry, government and politics, and its potential as a career field. This is a survey course with primary emphasis on theory, supplemented with applied techniques.

3 hrs

[back to top](#)

COMM-ST 454 Advanced Screenwriting

This course provides students with advanced theory in narrative screenwriting, training in industry standard script analysis (called "coverage") and story editing. Students will be required to draft, revise and workshop a short film screenplay or will focus on a feature screenplay, delivering a draft and revision of the first act and a detailed outline for the rest of the script. Students will workshop feature screenplays in small groups, emphasizing the art of constructive story editing. Prerequisite(s): COMM-ST 240 Intro to Screenwriting

3 hrs

[back to top](#)

COMM-ST 457 Producing And Distributing Media

Survey of Contemporary practices used in the producing, funding and distribution of media for theatrical, broadcast, home video/dvd and web-based markets. Lectures, discussion and projects. Prerequisites: None

3 hrs

[back to top](#)

COMM-ST 458 WI Publicity, Promotion And The Media

Writing intensive. A study of controlled and uncontrolled (public) media and their use to effect motivation of various target audiences, and alteration of attitudes, opinions, and beliefs in special publics; examination of the theory and nature of messages and materials generated by PR departments or counseling firms; analysis and practice in development of specialized communications materials, such as house organs, news releases, publicity and speeches to gain reaction and support from specialized groups. Prerequisite: COMM-ST 351 and successful completion of the WEPT. Offered: Fall.

3 hrs

[back to top](#)

Criminal Justice and Criminology

CJC 101 Introduction To Criminal Justice

This introductory overview course is designed to familiarize students with the three main components of the adult criminal justice system: police, courts, and corrections. The course will investigate the viewpoints of offenders, victims, social scientists, the general public, and workers in the system on diverse issues of social control, criminal behavior, treatment and punishment.

3 hrs

[back to top](#)

CJC 101 P Introduction To Criminal Justice

This introductory overview course is designed to familiarize students with the three main components of the adult criminal justice system: police, courts, and corrections. The course will investigate the viewpoints of offenders, victims, and social scientists, the general public, and workers in the system on diverse issues of social control, criminal behavior, treatment and punishment.

3 hrs

[back to top](#)

CJC 250 Introduction To Policing

A comparison of law enforcement and peace-keeping functions of the police provides a basic theme for the course, with examination of several topics related to police accomplishing these functions. Some of the topics covered include police discretion, police professionalism, the police officer as a bureaucratic agent, and police-community relations.

3 hrs

[back to top](#)

CJC 260 Principles & Practices of Criminal Courts

The course examines the American criminal judicial system, including the history, philosophy, and changing nature of criminal courts. The activities of lawyers, judges, and related professionals are emphasized, and current topics involving the criminal court are discussed.

3 hrs

[back to top](#)

CJC 265 Delinquency And Juvenile Justice

This course focuses on the nature, extent and theoretical explanations of delinquency and the history and philosophy behind the juvenile justice system in terms of the roles played by law enforcement, juvenile courts, and corrections. Juvenile groups such as status offenders, delinquents, gang members, victims, and juveniles adjudicated as adult criminals will also be examined.

3 hrs

[back to top](#)

CJC 270 Principles Of Corrections

This course explores adult institutional and community-based corrections in the United States. Major areas examined include the evolution of corrections, the process of correctional reform, adult offenders and prison culture, treatment and rehabilitation of offenders, intermediate sanctions, and correctional workers.

3 hrs

[back to top](#)

CJC 300 Structural Theories Of Crime

The impact of sociodemographic, geographic, economic, political variables and sex roles in the occurrence and distribution of crime.

3 hrs

[back to top](#)

CJC 315 Crime, Criminals And Victims

This course addresses the study of crime, criminal and victims. It examines the relationship between victims and offenders. Special treatment is given to criminological as well as victimological theories. A segment of the course will address the sporadic nature of juvenile crime. The course will examine viable strategies to reduce levels of victimization. In the final analysis the course will offer crime prevention strategies.

3 hrs

[back to top](#)

CJC 316 Race, Class and Justice

This course examines the intersection of race and class as it relates to crime and justice. Specifically, the course focuses on race and class in relation to criminological theory and the application of justice system practices and policies.

3 hrs

[back to top](#)

CJC 317 Policies Of Drug Use And Control

Utilizing both historical and contemporary information, this course provides an assessment of the "drug problem" in the U.S. and policies of control developed in response to the problem. Drug use criminalization, legalization, medical treatment, and prevention strategies and related issues are considered in regard to scientific knowledge related to the patterns, causes, and impact of substance abuse. Also offered as SOCIOL 317. Offered annually.

3 hrs

[back to top](#)

CJC 319 Theoretical Criminology

A comprehensive examination of the major criminology theories, their philosophical assumptions, and the socio-historical context in which they were articulated. Also offered as SOCIOL 319.

3 hrs

[back to top](#)

CJC 320 The Supreme Court And The Criminal Process

Course examines recent Supreme Court decisions on the constitutional aspects of the administration of justice. Topics include the nationalization of the Bill of Rights and jurisdiction with an emphasis on problems involving the Fourth, Fifth, Sixth, Eighth, and 14th Amendments.

3 hrs

[back to top](#)

CJC 351 Policing In The Community

The purpose of this class is to introduce the student to police operations and the effectiveness of different police programs. The material discussed in class focuses on empirical evaluations of police effectiveness, and the role of the police in today's society. This class is divided into four broad areas: the nature and effectiveness of patrol; criminal investigations; special operations including crackdowns, responses to domestic assaults, and hot spot policing; and the latest crime prevention strategies, such as community oriented policing and problem solving.

3 hrs

[back to top](#)

CJC 355 Crime And Public Policy

This course addresses how society has responded to the crime problem during changing social, historical, political and economic contexts. Special attention will be given to how society has reacted to crime (with liberal treatment and rehabilitation or conservative punitive approaches) from the 1920's to the present.

3 hrs

[back to top](#)

CJC 355 P Crime And Public Policy

This course addresses how society has responded to the crime problem during changing social, historical, political and economic contexts. Special attention will be given to how society has reacted to crime (with liberal treatment and rehabilitation or conservative punitive approaches) from the 1920's to the present.

3 hrs

[back to top](#)

CJC 360 Criminal Behavior Systems

A first-hand account of typologies drawn from empirical studies of professional criminals, organized crime, white-collar offenders, political criminals and street-level offenders such as the burglar, thief, murderer, drug dealer, rapist, or armed robber.

3 hrs

[back to top](#)

A first course in the statistical analysis of quantitative data. Course emphasizes descriptive statistics, probability theory, parameter estimation, bivariate hypothesis testing, and computer applications. Prerequisites: MATH 110, MATH 116 or an equivalent. Offered: Fall

3 hrs

[back to top](#)

CJC 371 Community Corrections

This course will examine intermediate sanctions in the United States, such as probation, halfway houses, boot camps, among others. Specifically, the origin and proliferation of the use of corrections in the community will be explored in depth. The effectiveness of several major community correctional strategies will be explored through a review of the research literature base. Several issues will be highlighted including (but not limited to) ethical constraints, political problems, and treatment effectiveness in light of the use of community sanctions. Offered: One time every other year

3 hrs

[back to top](#)

CJC 373 Institutional Corrections

This course will examine several aspects of the American Prison, Specifically, current issues in the management and growth of the prison industry will be reviewed. These issues will include major constitutional applications, the management of special populations within the prison environment, and a general review of several aspects of day-to-day prison life. These issues and others will be explored through a review of the research literature base germane to prisons and institutions.

3 hrs

[back to top](#)

CJC 380 Psycho-Social Determinants of Crime & Delinquency

This course offers an interdisciplinary approach to the study of crime and delinquency outlining biological, developmental, psychological, social-psychological, and societal factors associated with criminal behavior. the course also focuses on ways in which these factors may be integrated to solve, explain, and prevent crimes.

3 hrs

[back to top](#)

CJC 390 New Dimensions In Criminal Justice

Examination of contemporary topics, issues or problems related to the development of justice and/or operations in response to criminal and related behaviors addressed by the justice system. May be repeated for credit. Prerequisites: None. Offered: Every semester.

3 hrs

[back to top](#)

CJC 420 Control Of Crime And Delinquency

The various ways societies have tried to control and prevent violations. Topics: the nature and types of law; a critical analysis of American police, judicial and penal systems; the prevention of crime and delinquency. Also offered as SOCIOL 420.

3 hrs

[back to top](#)

CJC 421 Criminal Behavior In The United States

A description and causal analysis of complex forms of criminal behavior in contemporary American society; included for study will be organized and professional crime, white collar crime, homicide, street crime, and crimes against morals involving sex, alcohol, drugs and gambling. Also offered as SOCIOL 421.

3 hrs

[back to top](#)

CJC 421 P Criminal Behavior In The United States

A description and casual analysis of complex forms of criminal behavior in contemporary American society; included for study will be organized and professional crime, white collar crime, homicide, street crime, and crimes against morals involving sex, alcohol, drugs and gambling.

3 hrs

[back to top](#)

CJC 424 The Death Penalty In America

This course takes a sociological look at the most extreme punishment currently in use in the United States. Society debates its value without giving much weight to the research which social science conducts. Indeed, the political domain frequently misrepresents the data that is available. The course evaluates the adequacy of the research and separates the strands of the debates in order to understand the role of the death penalty in our society. Also offered as SOCIOL 424.

3 hrs

[back to top](#)

CJC 429 Restorative Justice

This course is an introduction to the concept of restorative justice. The course examines the roots of the concept, its theoretical perspective, and its applications in juvenile justice, mediation and correctional settings.

3 hrs

[back to top](#)

CJC 435 Gender And Law

This course examines the contemporary legal rights and obligations of women in light of the historical relationships between the social status of women and their legal status. Topics investigated include proprietary and contractual rights, family law, employment practices, educational opportunities, and women as victims and perpetrators of crime.

3 hrs

[back to top](#)

CJC 435 WI Gender And Law

This course examines the contemporary legal rights and obligations of women in light of the historical relationships between the social status of women and their legal status. Topics investigated include proprietary and contractual rights, family law, employment practices, educational opportunities, and women as victims and perpetrators of crime. Prerequisite: Successful Completion of the Wept Test

3 hrs

[back to top](#)

CJC 440 Hate & Bias Crimes

The purpose of this course is to examine the development and enforcement of hate crime law within our legal system. Discussion focuses on the causes and consequences of hate crimes, the constitutional issues associated with bias crime statutes, and the effectiveness of formal and informal social controls for eliminating hate and bias crimes.

3 hrs

[back to top](#)

CJC 450 Women, Crime And Criminal Justice

This course will focus on the experiences of women and girls with crime in America. The primary areas studied will be females as victims, offenders, and professionals in the criminal justice system. Various criminological theories and research will also be examined in light of gender.

3 hrs

[back to top](#)

CJC 470 WI Capstone: Criminal Justice And Criminology

This course is designed to integrate student's program of study in the major of criminal justice and criminology. The class examines current conditions of the justice system with respect of race, gender and social class. This course satisfies the writing intensive requirement for the General Degree Requirements of the College. Prerequisites: WEPT, course taken in student's last semester. Semester offered: Fall/Winter

3 hrs

[back to top](#)

CJC 475 White Collar Crime

This course examines activities variously called white-collar crimes, crimes of privilege, corporate and government crimes, and upperworld crimes. The purposes of the course are (1) to describe, analyze, and assess social impact of these offenses, (2) to examine the capacity of existing theories in criminology and social deviance to account for those activities, (3) to describe the responsibilities, powers, and activities of those agencies which have jurisdiction over them, and (4) to assess the effectiveness of various legal sanctions in controlling such activities and to review the problems involved in legislation intended to achieve that control.

3 hrs

[back to top](#)

CJC 476 Seminar In Criminal Justice And Criminology Issues

This course is an advanced exploration of the relationship between the criminal justice system and criminal behavior from at least one of the following perspectives: psychological, sociological, economic, legal, political or administration/ management. Will include discussions and analysis of contemporary readings and on-going research in the selected perspective.

3 hrs

[back to top](#)

CJC 483 Methods Of Sociological Research

A seminar which explores the interrelationships between sociology theory, research methods and statistics. May focus on major contemporary issues building on and integrating knowledge obtained in previous courses. Also offered as SOCIOL 362.

3 hrs

[back to top](#)

CJC 486 Methods Of Program Evaluation

This course focuses on applying research methodological techniques to evaluation of programs designed to respond to social problems and issues (e.g., drug use, crime, delinquency, indigent care). Topics of interest to those charged with designing and executing program evaluations are considered, including types of program evaluation assessment, use of time series models, special research issues for program evaluation, and generating and testing hypotheses from program objectives. Also offered as SOCIOL 486. Offered annually.

3 hrs

[back to top](#)

CJC 490 Directed Studies In Criminal Justice And Criminology

Individual research and study in the student's field of interest as approved and directed by major professors. The work involves examination and reporting of selected problems affecting the various agencies of our legal system. Only two of the 490 sequence courses can be applied to the major. A. Law Enforcement B. Court Operations and Administration C. Corrections D. Legal Theory and Philosophy E. Criminological Theory F. Sociology of Law.

1-3 hrs

[back to top](#)

CJC 491 Internship In Criminal Justice

Intern experience under faculty supervision in local, state, federal or private agencies working with justice system involved offenders. Prerequisites: CJC 101, junior standing prior consent and arrangement. Offered: Every semester.

3-6 hrs

[back to top](#)

CJC 492 Topics In Criminal Justice

Specialized, short courses with focused examination of particular topics germane to the study of the justice system. May be repeated for credit. Prerequisites: None. Offered: Every semester.

This course focuses on the theory and policy issues involved in resource reation and depletion; environmental destruction, preservation and recreation; and the interrelation of these problems of and prospects for economic growth. Prerequisite: ECON 202 Offered: On request

3 hrs

[back to top](#)

ECON 421 Mathematical Economics

An introduction to mathematical methods as applied to the questions addressed by economists. The principal methods to be applied are matrix algebra and differential calculus in the context of optimization. Other topics may include integral calculus, differential equations, difference equations, or linear and non-linear programming. Prerequisites: ECON 301, ECON 302 and MATH 210

3 hrs

[back to top](#)

ECON 423 P Legal & Social Issues Of The Hospitality Industry

This course will investigate societal and economic issues that have influenced the development of significant industry legal issues. Additionally, students will examine laws pertinent to the hospitality industry and investigate the relationship of these legal issues to historical and current societal issues. This course may not be used by students to fulfill requirements for the major in Economics or a Concentration in Commercial Economics. Prerequisites: None. Offered: Winter.

4 hrs

[back to top](#)

ECON 425 Intermediate Economic Statistics

An introduction to the empirical side of economics. Estimation theory and the properties of commonly used estimators are covered. Some of the more important topics dealt with are: multiple regression, heteroscedasticity and autocorrelation in regression analysis, analysis of variance and the use of qualitative variables in regression analysis. Hands-on work with computer software designed for econometrics is stressed. No experience with computers necessary. Prerequisites: ECON 301, ECON 302 and MATH 235 or its equivalent. Semester offered: Every year.

3 hrs

[back to top](#)

ECON 429 Environment, Resources And Economic Growth

This course focuses on the theory and policy issues involved in resource creation and depletion; environmental destruction, preservation and recreation; and the interrelation of these problems of and prospects for economic growth. Prerequisite: ECON 202. On request.

3 hrs

[back to top](#)

ECON 431 Monetary Theory And Policy

A study of the nature and functions of money and the financial system, with emphasis on monetary theory and its application to current banking and financial problems. Recent contributions to monetary theory and current literature. Prerequisite: ECON 301. Every year.

3 hrs

[back to top](#)

ECON 433 P Commercial Economics Aspects Of The Hospitality Industry

This course will examine economic policies that are the basis for accounting and financial practices within the hospitality industry. Additionally, students will explore managerial accounting essentials and examine their use in planning, controlling, and developing budgets within the hospitality industry. This course may not be used by students to fulfill requirements for the major in Economics or a Concentration in Commercial Economics. Prerequisites: None. Offered: Winter.

4 hrs

[back to top](#)

ECON 435 Public Finance

Problems of public and private sector decision making of revenue-expenditure policies and an examination of the actual legal, political and economic policies for revenues and expenditures of federal, state and local governments. Prerequisite: ECON 302. On request.

3 hrs

[back to top](#)

ECON 437 State And Local Government Finance

This course investigates the role, problems and relative importance of municipal governments in the United States. Such areas as the demand for public services, tax and expenditure policies, and intergovernmental fiscal relations will be explored in detail. Case studies of state and local governments will be introduced to emphasize the problems and proposed solutions arising in modern municipal governments. Prerequisite: ECON 302. On request.

3 hrs

[back to top](#)

ECON 438 Economic Policy

Analysis of the confluence of political and economic behavior, the economics of collective action. Prerequisites: ECON 301 and ECON 302. On request.

3 hrs

[back to top](#)

ECON 442 International Finance

This course emphasizes the global activity and balance of payments implications of government taxation, expenditure and monetary policies under various capital market conditions. Major topics include: exchange rates and the balance of payments; national income determination in an open economy; integrated and non-integrated capital markets; economic growth stabilization policies and the quest for global economic stability. Prerequisite: ECON 301 or equivalent

3 hrs

[back to top](#)

ECON 448 Socialist Economic Systems

3 hrs

[back to top](#)

ECON 450 R Regional Economics

Contemporary policy approaches to regional growth and decline are analyzed in this course. Prerequisite: ECON 302
Semester offered: On request

3 hrs

[back to top](#)

ECON 451 Institutional Economic Theory

Analysis of impact of modern philosophy and developments in social sciences on economic theory. Prerequisites: ECON 301, ECON 302 or consent. Semester offered: Every semester

3 hrs

[back to top](#)

ECON 458 Urban Economics

An inquiry into the economics of location decisions and the influence of these on urban growth and on the real estate market; the evaluation of urban transportation and other public services; an examination of economic development of ghetto neighborhoods. Prerequisite: ECON 302 or its equivalent, or by special permission of the instructor. On request.

3 hrs

[back to top](#)

ECON 460 Industrial Organization

The structure, conduct, and performance of American industry. Historical evolution of American industry; alternative industrial systems. Antitrust policies and their alternatives. Technological change and industrial performance. .Prerequisite: ECON 301, ECON 302. On request.

3 hrs

[back to top](#)

ECON 461 Public Utility Economics

This course is designed to examine the theory and practice of public utility economics. It includes study of the public utility concept and how it has evolved and is evolving, the operation of public utilities in the U.S. economy, the methods and practice of regulating utilities, industry by industry case studies and current issues in public utility economics. On request.

3 hrs

[back to top](#)

ECON 465 The Economics Of Health And Medicine

An economic analysis of the development of the medical market; organized medicine and the structure of existing health delivery systems. The problems of the medical market will be analyzed; the role of insurance will be investigated and alternative public policies will be studied. Prerequisite: Advanced standing or consent of the instructor. On request.

3 hrs

[back to top](#)

ECON 480 Managerial Economics And Operations Analysis

This course focuses on the application of microeconomic theory to a variety of contemporary business and government problems. Through case studies, students are introduced to the full complexity of actual industrial and government decisions and the diversity of microeconomic tools and concepts that can be brought to bear on these decisions. Prerequisites: ECON 301 and ECON 302. Semester offered: On request

3 hrs

[back to top](#)

ECON 487 History Of Labor Movements

This course is concerned with the early formation and the transformation of labor unions given the changing American industrial climate. Study will include early union structures, forerunners of modern unions, such as the Knights of Labor, development of the current unions and the potential for union survival in the post-industrial era.

3 hrs

[back to top](#)

ECON 487 H Human Resource Economics

An analysis of the factors determining the productivity of human resources: education, nutrition, job training and work environment. An analysis of work patterns, wage patterns and the impact of automation. Prerequisite: ECON 302 Semester Offered: Fall, every other year.

3 hrs

[back to top](#)

ECON 488 Radical Political Economy

This course will cover the ideas that constitute radical political economy. It will show how radical political economy can be used to examine current economics and social problems and will outline possible economic structures of utopian visions. Offered: On Request

3 hrs

[back to top](#)

ECON 490 Readings In Economics

Intensive reading and/or research in an area selected by the student in consultation with the professor in any of the following fields: (a) economic theory, (b) history of economic thought, (c) labor economics, (d) urban economics, (e) monetary and fiscal policy and theory, (f) international economics, (g) economic development. (h) comparative economic systems, (i) public finance, (j) public policy toward business, (k) quantitative economics. By permission only. On request.

1-3 hrs

[back to top](#)

ECON 495 Colloquium In Economics

Each course will deal with a particular topic in economics: A) Manpower Economics; B) Political Economy; C) Area Studies in Economics-Europe; D) Area studies in Economics-Africa; and E) Area studies in Economics-Asia. Prerequisite: ECON 201, ECON 202. On request.

3 hrs

[back to top](#)

ECON 497 Internship

The course allows the student to participate in cognate, approved internships of a professional nature. Prerequisite: Senior or graduate standing. Offered by permission only.

3 hrs

[back to top](#)

ECON 499 WI Capstone Colloquim

This course provides a common intellectual experience for all economics majors while recognizing the diversity of experiences students bring with them to their final semester before graduation. A series of lectures, reading assignments, and writing assignments help students to synthesize their knowledge of the broad areas of study within (and outside) the field of economics. Guest lecturers provide a critical summary of and synthesis of major areas of study. Each student will also assess their own development by critically examining their individual portfolio of work (containing papers, essay exams, and term papers written during their undergraduate career), and of the department's program. Prerequisite: Successful completion of WEPT. Offered: Winter

3 hrs

[back to top](#)

English

ENGLISH 100 Introductory Writing

The study and practice of the rhetorical principles and basic skills of standard English prose, and critical reading. Frequent writing exercises emphasize formulating a thesis, organization, development and the grammatical elements of sentences. This course carries no credit toward graduation in the College of Arts and Sciences. However, on the recommendation of the instructor, a student may take the standard ENGLISH 110 final examination. If, in the opinion of the Director of Freshman English and two other readers, the student passes the examination with a B or better grade, the student may receive ENGLISH 110 credit.

3 hrs

[back to top](#)

ENGLISH 100 S Special Topics In English As A Second Language

A course designed to address the specific needs of an individual student or group of students studying English as a Second Language. In addition to targeting English skills, the course may address topics or skills which are not covered in the standard Academic English curriculum of the Applied Language Institute. This course will accommodate individual students or groups of students studying at the Institute for periods of time other than the standard semester length. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisite: ALI Approval Offered: Fall/Winter/Summer

1-6 hrs

[back to top](#)

ENGLISH 100 T TOEFLPreparation

This course will prepare students to take the TOEFL (Test of English as a Foreign Language), in either the Paper(PBT) or Computer-based (CBT) form, and/or to improve their scores from previous attempts. Exercises focus on developing the skills and strategies necessary for navigating TOEFL questions while continuing to develop the general English language skills that support success on the TOEFL. The course will provide students with a personal awareness of strengths and weaknesses so they may focus their test preparation work in and outside of class. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisite: Applied Language Institute approval Offered: Every semester

3 hrs

[back to top](#)

ENGLISH 101 B Academic Speaking & Listening For Non-Native Speakers I

The study and practice of speaking and listening for basic social functions in English. Exercises include the practice of basic descriptions and the development of oral/aural skills for beginning ESL students. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 101 C Academic Reading & Vocabulary For Non-Native Speakers I

The study and practice of reading with basic English vocabulary in context. Exercises focus on reading comprehension, identifying the topics of short readings, and the introduction of basic dictionary skills. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 101 D Academic Writing For Non-Native Speakers I

The study and practice of basic writing skills including handwriting, spelling, capitalization and punctuation. Frequent short exercises emphasize basic sentence structure, biographical description, and completion of standard forms. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 101 G Academic Grammar For Non-Native Speakers I

The study and practical application of basic sentence structure and word parts. Frequent exercises emphasize use and understanding of simple sentences, questions, directions, and descriptions in the present and past tenses. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute Approval. Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 102 B Academic Speaking & Listening For Non-Native Speakers II

The study and practice of speech in environments such as the classroom, work, and simple social occasions. Exercises focus on students's ability to distinguish sounds and to produce them correctly in the context of a sentence and to listen for specific information. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 102 C Academic Reading & Vocabulary For Non-Native Speakers II

The study and practice of reading narrative and expository texts and standard forms. Exercises focus on the development of vocabulary and introduction of reading techniques such as identification of topics and main ideas, skimming, scanning, prediction, and inference. This course carries no credit toward graduation in the College of Arts and Science. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 102 D Academic Writing For Non-Native Speakers II

The study and practice of techniques for writing short paragraphs in English. Frequent exercises emphasize various forms of paragraph organization and the improvement of punctuation and mechanical skills in writing. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 102 G Academic Grammar For Non-Native Speakers II

The study and practical application of basic sentence structures, including future and irregular past tense constructions. Frequent exercises emphasize use and understanding of comparatives, wh-questions, and compound nouns and verbs. This course carried no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer

3 hrs

[back to top](#)

ENGLISH 103 B Academic Speaking & Listening For Non-Native Speakers III

The study and practice of listening for and producing speech in the past, present and future tenses. Exercises introduce note-taking techniques and focus on the ability to hear and express abstract ideas. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 103 C Academic Reading & Vocabulary For Non-Native Speakers III

The study and practice of longer reading passages of various rhetorical styles. Exercises focus on improvement of reading speed and the development of vocabulary and comprehension through complex inferences. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 103 D Academic Writing For Non-Native Speakers III

The study and practice of writing multi-paragraph academic essays. Frequent exercises emphasize point-of-view, process writing, and a variety of rhetorical styles. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 103 G Academic Grammar For Non-Native Speakers III

The study and practical application of complex sentence structures, including perfect and perfect progressive tenses. Frequent exercises emphasize use and understanding of passive voice, gerunds and infinitives, articles, conditionals, and modals. The course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 104 B Academic Speaking & Listening For Non-Native Speakers IV

The study and practice of standard English, particularly in the college classroom. Exercises include training in academic lecture comprehension and note-taking as well as formal (classroom presentation) and informal (conversation) English speaking. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Lang. Inst. approval. Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 104 C Advanced Academic English Reading For Non-Native Speakers IV

This course focuses on preparing students to deal effectively with sophisticated academic reading materials by guiding them in the development of a conscious and reflective approach toward reading. It emphasizes advanced reading skills of interpretation, inference, critical analysis, evaluation and application. There will be frequent exercises addressing the acquisition and practice of study skills and collaborative academic work. Prerequisites: Completion of ENGLISH 103C with a grade of B or better or Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 104 D Academic Writing For Non-Native Speakers IV

The study and practice of rhetorical principles in standard English prose. Frequent writing exercises emphasize critical thinking and research skills as well as fluency and accuracy in academic writing. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Lang. Inst. approval. Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 104 G Advanced Academic English Grammar For Non-Native Speakers IV

This course focuses on the analytical understanding and application of English grammar. Students will be expected to observe usage patterns of the English language in a combination of both normative and prescriptive grammars appropriate for academic English application. There will be frequent exercises emphasizing mastery of complex grammar structures including all verb tenses, dependent clauses, modals, and unreal conditionals, and of the relationship between ideas and the construction of sentences in academic discourse. Prerequisites: Completion of ENGLISH 103G with a grade of B or better or Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 105 A Advanced Academic English (Multiskills) For Non-Native Speakers V

The comprehensive study and practice of standard English skills for advanced students of English as a second language. Level readings focusing on current issues serve as the basis for frequent writing exercises and for classroom discussions and presentations. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Inst. approval. Offered: Fall/Winter/Summer Letter grade assigned.

3 hrs

[back to top](#)

ENGLISH 110 English I: Introduction To Academic Prose

This course introduces students to college-level reading, writing, and discourse analysis: it engages students in the analysis and creation of texts that reveal multiple perspectives about specific rhetorical situations and cultural issues. In addition to learning how to revise by analyzing their own writing, students will learn to edit their own work and use proper academic documentation. Offered: Every Semester

3 hrs

[back to top](#)

ENGLISH 110 A Freshman English I For Non-Native Speakers

The study and practice of analytical and critical reading. The study of basic rhetorical principles and the practice of those principles in frequent short papers; close reading of prose. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer.

3 hrs

[back to top](#)

ENGLISH 200 Introduction To Undergraduate Study In English

An investigation of reading, writing, and research practices associated with studies in English. Students will learn about multiple forms, genres, and critical approaches, as well as encounter texts from various historical periods and places. Required of all English majors before enrolling in 400-level English courses.

3 hrs

[back to top](#)

ENGLISH 204 Writing About Literature

This course is designed to be taken either prior to or concurrent with a student's first literature course. It introduces students to literary criticism in its broadest, most generic sense, as a stylized response to reading. Students in the course will be introduced to different approaches to writing about literature, to methods of generating ideas, and focusing and developing a topic. Prerequisite: ENGLISH 110 or its equivalent.

3 hrs

[back to top](#)

ENGLISH 205 Popular Literature

The course focuses on writing in English by a range of popular authors from a variety of periods and places, historic and contemporary. The course may include popular stories, songs and ballads, the scripts of blockbuster plays and films, best-selling novels, and widely distributed nonfictional prose.

3 hrs

[back to top](#)

ENGLISH 213 Introduction To Drama

Beginning with an intensive study of a few plays analyzed to elicit general principles, the course moves on to consider several representative examples of each of the major periods and types of Western drama, from the Greeks to the present. The two-hour version of this course will be offered only off-campus.

2-3 hrs

[back to top](#)

ENGLISH 214 Introduction To Fiction

Emphasis in this course is on critical reading of short stories and the novel selected from all periods of English, American, and European literatures. The course will introduce the systematic study of fiction as a literary genre and will equip students for more advanced work in literature or creative writing. Writing assignments are designed to aid in the understanding of the structure and content of the material covered. Every semester

3 hrs

[back to top](#)

ENGLISH 215 Introduction To Poetry

An introduction to the study of poetry for students desiring a basic course either to develop a greater appreciation of poetry or to prepare for more advanced courses in literature or creative writing. Class discussions will focus on close readings of poems and analysis of poetic techniques. Writing assignments will complement reading and class discussion and will enable students to develop their own critical and creative skills.

3 hrs

[back to top](#)

ENGLISH 225 English II: Intermediate Academic Prose

This course extends the work of ENGLISH 110 with an additional emphasis on research. Each section of ENGLISH 225 uses a combination of book-length and shorter texts on focus on specific historical and/or cultural issues. As they learn to participate in scholarly conversations, students will find and evaluate library and internet sources. As with ENGLISH 110, this course emphasizes revision, editing, and proper academic documentation. Satisfactory completion of ENGLISH 110 and sophomore standing are prerequisites for ENGLISH 225. Every semester. Note: ENGLISH 225 or its equivalent is a prerequisite for all 300- and 400-level English courses.

3 hrs

[back to top](#)

ENGLISH 225 A English II For Non-Native Speakers

The study and practice of expository writing and analytical and critical reading geared to the needs of students for whom English is not the first language. The course emphasizes the development and integration of all areas of language comprehension and production. The writing focus is on kinds of organization, diction, style, etc. used in academic writing in the United States. Frequent research papers. Prerequisite: Satisfactory completion of ENGLISH 110 or ENGLISH 110A and sophomore standing. Applied Language Institute approval. Offered: Fall/Winter/Summer.

3 hrs

[back to top](#)

ENGLISH 241 Women And Literary Culture: Introduction

The course offers an introduction to women as producers and consumers of literature. Students will become acquainted with women writers, explore women's reading practices, and interrogate the issues that have surrounded women's participation in cultural arenas.

3 hrs

[back to top](#)

ENGLISH 250 Introduction To Language Acquisition And Diversity

Investigation of the basic principles of first and second language acquisition. Topics addressed include language competency, socio-cultural factors in language, dialects, acquisitional principles, and language diversity. Students will take part in monitored classroom observations in public schools, and will critically analyze how the topics addressed in class apply to real life and to teaching situations. A service learning component is included.

3 hrs

[back to top](#)

ENGLISH 299 Form And Structure Of Writing

This course is required for students who have twice failed the Written English Proficiency Test (WEPT) and is open only to students who have failed the test at least once. The class will cover the basic conventions of successful expository and academic writing. Emphasis will be placed on methods of development and on strategies for organization. This course satisfies neither the college humanities requirement nor the junior-level writing requirement. Completion of the course with a grade of C or better does fulfill the WEPT requirement for graduation, however, and renders students eligible to enroll in courses designated Writing Intensive (WI). Does not count toward graduation.

ENGLISH 300 CD Cluster Course: American Social Film:Silver Screen&American Dream

This course will combine American social history and film history in the sound era. Using Hollywood entertainment films, the course will look at Hollywood as an indicator of social, political and economic conditions in the United States since the 1930s. The main topics are representations of the American dream and nightmare, poverty and affluence, success and failure. This course is offered as a cluster with COMM-ST 402CD, HISTORY 400CP, and AMER- ST 300CD.

3 hrs

[back to top](#)

ENGLISH 300 CE Cluster Course: Radical Changes Since 1945

This cluster will focus on modernism, post-modernism and expressionism in the visual arts and literature since World War II. Common lectures will address intellectual movements--such as existentialism and formalism--and cultural development--such as the increased impact of technology and mass media--in contemporary society. By focusing on these movements, the cluster course hopes to provide an integrated view of the literature and visual arts of the period and to draw upon analogous developments in contemporary architecture, music, philosophy and film.

3 hrs

[back to top](#)

ENGLISH 300 Cluster Course: Terrorism, Civil War And Trauma

This interdisciplinary course examines the modern experience of terrorism and civil war in the light of art, film, history, literature, and philosophy. It explores a number of traumatic events, historic and contemporary, challenging us to think about such contemporary issues as violence and identity formation, civil rights and state-sponsored terrorism, pacifism and patriotism, resistance and collaboration, fundamentalism and fascism, neo-colonialism and anti-imperialism.

3 hrs

[back to top](#)

ENGLISH 300 CR CC:Roman Revolution:History&Culture From The Gracchi To Augustus

The period of Roman history from the revolution initiated by the Gracchi to the demise of the Republic & the establishment of the Principate under Augustus will be studied. The course begins with the Scipionic Circle under whose leadership foreign imperialism, domestic factionalism, and the influx of Greek culture increased. Political, social and cultural developments which culminated in the violent death of the old system will be traced. We will also show how Augustus kept the past alive to make his new government acceptable to the tradition-loving Romans. Students will read the words of such writers as Terence, Cato, Polybius, Cicero, Caesar, Sullust, Catullus, Horace, Virgil, and Ovid, whose works cover the important genres of Roman literature--new comedy, rhetoric, satire, history, epic, pastoral, and lyric poetry.

3 hrs

[back to top](#)

ENGLISH 300 CS Cluster Course:Clio&The Other Muses:Hist&Culture 5th Cent Athens

Faculty from at least two different departments (one of which must be a department in the Division of Humanities including History) may determine the topic and syllabus, subject to the approval of the director of Integrated Studies and the program's advisory committee in addition to the approval of the departments involved. This special topics course will satisfy the interdisciplinary course requirement for the B.A.

3 hrs

[back to top](#)

ENGLISH 300 CY Cluster Course: Ancient World/Cinema

this course will explore the tradition of depicting the ancient mediterranean world film from the early silent era to the present. Topics to be covered include the ways that filmmakers respond to literary and historical sources from the ancient world, interact with the artistic tradition of films about the ancient world, the relation of these films to other works by the same creative personnel (directors, actors, writers, producers, etc.), and the political and cultural contexts in which the films were released. This course is cross-listed with HISTORY 400CY.

3 hrs

[back to top](#)

ENGLISH 300 F SS:Academic English/International Grad Teaching Assistants

The study and practice of standard spoken English combined with the study and practice of classroom teaching techniques. Excercises focusing on improvement of pronunciation, and formal (classroom presentation) and informal (conversation) English speaking are combined with techniques for lecture organization, strategies for clear content presentation, and with analysis of the American post-secondary educational culture. This course is designed for prospective International Graduate Teaching Assistants who need to improve their English communication skills and obtain an understanding of American educational culture. Prerequisite: ALI approval

3 hrs

[back to top](#)

ENGLISH 301 WI Writing And The Academy

This course examines social and ethical issues raised by academic reading and writing. While some attention is paid to the formal aspects of academic prose within specific disciplines, the main emphasis of the course is on the cultural consequences of the different ways that academic knowledge is created and taught. In addition to studying the language and structure of academic reading and writing, the course explores the various rhetorics of the academy in terms of a broad range of subjects including economics, gender, education, history, and myth. This course satisfies the junior-level writing requirement and counts towards the writing minor. Prerequisites: ENGLISH 110, ENGLISH 225 and successful completion of the WEPT. Offered every semester.

3 hrs

[back to top](#)

ENGLISH 303 WI Introduction To Journalism

Introduction to the styles and techniques of reporting and writing basic news through assignments in straight news, features and in-depth stories. Exposure to the history and principles of American journalism. Practical application in writing news and news feature articles. Also offered as COMM-ST 303WI.

3 hrs

[back to top](#)

ENGLISH 304 WI Writing And Technology

This course takes a student-centered approach to writing about and with technology. The course examines the reciprocity of culture and technology in intersecting local and global contexts. Course materials will vary depending on the instructor, but all sections will use genres of technical writing to explore the relationships between specific institutional and professional environments and such broader issues as economics, gender, history, myth, and nature. Prerequisites: ENGLISH 110, ENGLISH 225 and pass on WEPT. Offered: Every semester.

3 hrs

[back to top](#)

ENGLISH 305 WI Theory And Practice Of Composition

A course in expository writing for the student with superior writing preparation and ability. The work of the course will include readings on the nature of language, the writing of frequent short essays and a long paper. Admittance by consent of the instructor. (NOTE: Students may not receive credit for more than one of the following: ENGLISH 305, ENGLISH 305WO, and ENGLISH 307WI). Prerequisites: ENGLISH 110, ENGLISH 225, and successful completion of the WEPT. Offered: Every semester.

3 hrs

[back to top](#)

ENGLISH 307 WI Writing In Cultural Contexts

This course focuses on writings that evolve from cultural, intercultural, and natural environments and offers development of students' critical reading, writing, and thinking skills by focusing on rhetorical situations and the more global contexts of writing. Students enhance their understanding of leadership and cooperation through synthesizing their knowledge and abilities of written communication with knowledge they have gained in other courses. Required for business students. Offered for undergraduate credit only. (Note: Students may not receive credit for more than one of the following: 305WI, 307WI, 403). Prerequisites: ENGLISH 110 and ENGLISH 225 or equivalent and successful completion of the WEPT. Offered: Every semester.

3 hrs

[back to top](#)

ENGLISH 310 Introduction To Linguistics/Language Science

This course is a comprehensive introduction to the theory, methodology, and applications of the science of language. It examines properties of human language, covers all branches of language science, and provides a foundation for a critical understanding of language issues. Required for ENGLISH 470; recommended for ENGLISH 320 and ENGLISH 330.

3 hrs

[back to top](#)

ENGLISH 311 American Literature I

A survey of American literature and culture from its beginnings to 1865. This course will cover a range of authors, several genres, and culture forms, which may include fiction, poetry, drama, autobiography, oral, contact and/or slave narratives, folklore, and songs.

3 hrs

[back to top](#)

ENGLISH 312 Creative Writing I Fiction

A course centered on the short story. Emphasis is placed on three areas: general principles governing the writing of fiction; practice in short fiction (primarily the short story, but including the novella); criticism; and technical skills (including editing and rewriting). Prerequisite: Concurrent enrollment in or completion of ENGLISH 213 or ENGLISH 214 or instructor's permission.

3 hrs

[back to top](#)

ENGLISH 313 WI Reporting

A seminar of practical application in advanced reporting. Assignments to cover news events and to pursue in-depth news reports on the campus and off. Work is turned in on deadline and critiqued by the instructor. Prerequisites: ENGLISH 110, ENGLISH 225, and successful completion of the WEPT.

3 hrs

[back to top](#)

ENGLISH 315 Creative Writing Poetry

Writing and rewriting poems, with discussion of techniques needed to produce desired effects. Analysis and evaluation of student work. Examination of technical means utilized in selected poems by accomplished poets. Offered: Winter. Prerequisites: Concurrent enrollment in or completion of ENGLISH 215 or instructor's permission.

3 hrs

[back to top](#)

ENGLISH 316 WI Literary Nonfiction

Literary Nonfiction is a writing intensive course in the reading and writing of nonfiction prose as a literary art. We'll survey the historical development of literary nonfiction (especially the essay), sample contemporary authors of the genre, write critical commentary on works we read, and compose personal essays of our own. The course is not exclusively a literary seminar nor a creative writing workshop, but seeks to mix and make connections between these modes, in the tradition of the essay itself. Prerequisites are ENGLISH 110, ENGLISH 225, and completion of the WEPT.

3 hrs

[back to top](#)

ENGLISH 317 British Literature I

A survey of British Literature and culture from its beginnings to the 18th century, including works by Chaucer and Milton.

3 hrs

[back to top](#)

ENGLISH 318 Bible As Literature

A critical study of the major portions of the Old and New Testaments and the Apocrypha, with special attention to the development of literature from oral tradition, the literary genres, themes and archetypes represented in the collection, and the diction and style which have influenced later literature. Consideration also of the relation of Biblical literature to the historical, religious, and cultural milieu of the ancient Near East.

3 hrs

[back to top](#)

ENGLISH 319 Myth And Literature

A study of classical myth including readings from Homer to Ovid, analysis of selected myths in later literature, art and music, and a study of contemporary definitions and approaches to myth.

3-4 hrs

[back to top](#)

ENGLISH 320 Structure Of English

Not a remedial grammar course. Methods of linguistic inquiry and grammatical description. Study of traditional and modern schools of syntax, especially transformational grammar. Practice describing the structure of sentences. Application to the teaching of grammar in high schools.

3 hrs

[back to top](#)

ENGLISH 321 American Literature II

A survey of American literature and culture from 1865 to the present. This course will cover a range of authors, several genres, and culture forms, which may include fiction, poetry, drama, autobiography, essay, lyrics, and film.

3 hrs

[back to top](#)

ENGLISH 323 Shakespeare

An intensive critical study of William Shakespeare's writings in various contexts (historical, social, political, literary, contemporary, for example). Readings will encompass at least eight plays and will include at least one comedy, history, tragedy, and romance. Required of all English majors.

3 hrs

[back to top](#)

ENGLISH 325 Arthurian Legends

Focusing on writers such as Marie de France, Chretien de Troyes, Sir Thomas Malory, Alfred, Lord Tennyson, Sara Teasdale, Bernard Malamud, and Marion Zimmer Bradley, this course examines the legend of King Arthur and his Round Table as a recurring myth, repeatedly manifested in time through literature, art, history, music, and film. Prerequisite: None

3 hrs

[back to top](#)

ENGLISH 326 Modern And Contemporary Irish Literature

This course examines a range of texts written by Irish-born writers from the end of the nineteenth century on. While it is likely the course will include texts by the most famous Irish writers, such as Yeats, Joyce, Beckett, O'Brien, Heaney, and Friel, course materials will vary from semester to semester and may focus on a specific genre, historical period, or area of interest. Offered: On Demand

3 hrs

[back to top](#)

ENGLISH 327 British Literature II

A survey of British Literature and culture from the late 18th century to the present. This course will cover a range of authors and genres, including at least one novel.

3 hrs

[back to top](#)

ENGLISH 329 Film As Art

An application and formulation of critical approaches to the major artistic achievements of the important creators of this modern aesthetic form -- D.W. Griffith, Chaplin, Hitchcock, Bergman, Einstein, Kubrick.

3 hrs

[back to top](#)

ENGLISH 330 History Of The English Language

The study of English beginning with the Indo-European language family up to and including varieties of English spoken around the world today. Both outer history and the inner history of phonology, morphology, syntax, and lexicon will be addressed.

3 hrs

[back to top](#)

ENGLISH 331 African American Literature I

This course provides a survey of African American literature from its beginnings to the Harlem Renaissance of the 1920s and 1930s. Areas of interest will include abolitionist literature (especially Slave Narratives), turn-of-the-century literature and the Harlem Renaissance. This course will examine any or all of the following literary forms: fiction, poetry, drama, autobiography and essay. It will view African American literature in its historical and cultural contexts. Prerequisite: None.

3 hrs

[back to top](#)

ENGLISH 332 WI African American Novel

This course will examine the African American Novel in the 19th and 20th centuries; the emphasis will be on the period from the 1920s to the present. The novels will be examined in their historical and cultural contexts. Offered: On demand

3 hrs

[back to top](#)

ENGLISH 333 African American Literature II

A survey of African American literature from its beginnings to World War I. This course will cover a range of authors, several genres, and culture forms, which may include fiction, poetry, drama, autobiography, essay, oral, contact and/or slave narratives, folklore, and songs.

3 hrs

[back to top](#)

ENGLISH 336 Contemporary American Literature

An intensive study of American literature since World War II, concentrating on the profound literary changes following that war, as a new kind of poetry, fiction and drama emerges which chronicles the simultaneous dissolution of old values and the efforts to establish new ones. Writers such as Lowell, Roethke, Ginsberg, Ellison, Salinger, Bellow, Mailer, Baldwin, Flannery O'Connor, Pynchon, Katherine Anne Porter, Heller, Richard Wright, Tennessee Williams, Arthur Miller, and Edward Albee will be considered along with others, as American writing develops in our time.

3 hrs

[back to top](#)

ENGLISH 339 Creative Writing: Screenwriting

An introduction to the form and language of the motion picture screenplay. Students will learn to create a workable blueprint for a movie and undertake an in-depth examination of visual storytelling. This will include the basics of dramatic structure, scene and sequence construction, and the role of dialogue. Emphasis will be placed on students mastering the accepted movie industry format of the screenplay. They will accept a short story and revise it after giving and receiving feedback in small groups. Crosslisted with COMM-ST 354: Intro to Screenwriting.

3 hrs

[back to top](#)

ENGLISH 340 A Classical Literature In Translation

This course will focus on representative authors and works from the Greek and Roman Classical periods, such as Homer, Sophocles, Euripides, Aeschylus, Aristophanes, Plato, the Greek Lyrics, Virgil, Horace, Juvenal, Ovid and Plautus.

3-4 hrs

[back to top](#)

ENGLISH 342 WI Women And Rhetoric

A study of the position of women within the traditions of western rhetoric. Students will examine the rhetorical practices of women as they pursue both public and private goals. Christine de Pizan, Sor Juana Ines de la Cruz, Hannah More, Maria Stewart, Frances Willard, Ida Wells-Barnett, Meridel Le Sueur, and Gloria Anzaldua are among the female rhetorians who may be studied in this course. Prerequisite: Successful completion of the WEPT. Offered: On Demand

3 hrs

[back to top](#)

ENGLISH 344 WI Women & Literary Culture: Genre Focus

A study of women writers that focuses on genre, i.e., texts that share a common set of conventions. The course will explore the conventions associated with a particular genre in various historical periods and consider the ways in which gender and genre intersect in shaping texts and their interpretation. Prerequisite: Successful completion of the WEPT Offered: On Demand Restrictions: None

3 hrs

[back to top](#)

ENGLISH 345 WI Women And Literary Culture: Historical Focus

A study of women's literary culture in a specific historical period either as broadly defined as Medieval or Renaissance or as narrowly defined as a decade or movement (e.g., 1960s, abolitionist movement). This course includes women writers across multiple boundaries (e.g., national, generic, racial, sexual, socio-economic). Content will change depending on the instructor. Prerequisite: Successful completion of the WEPT.

3 hrs

[back to top](#)

ENGLISH 350 The 18th Century Novel

A detailed examination of the development of the novel in the 18th-century. The course emphasizes the evolution of the novel from such predecessors as rogue literature, the picaresque story and the romance, due to changing social realities. The novelists studied may include Austen, Behn, Fielding, Godwin, Haywood, Richardson, Smollett, and Sterne. Prerequisite: None Restrictions: None.

3 hrs

[back to top](#)

ENGLISH 351 Special Readings

Readings in a period, genre or theme to be selected by the instructor with attention to the needs of students who are interested in literary topics not covered in regular offerings. Proposals for a course in such readings require the approval of the department.

1-3 hrs

[back to top](#)

ENGLISH 355 The Novel Before 1900

Intensive attention to novels in English written before 1900, which may include comparative or analytical studies of genre; critical reception of novels; serialization, gender issues; authors and editors; and valuation. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 356 Studies in Poetry

An intensive study of poetry through the examination of a specific topic or the works of particular poets, for instance: Love, Seduction, and Betrayal; Form and Change; Death, Grief, and Consolation; Whitman, Dickinson, and the Soul; Sacred Poetry; Poetry and Metaphysics; The Long Poem; The Comic Poem; Sonnet, Sonnet Sequence and the Lyric; The Voyage; Nature, Self, and the Romantic Poet.

3 hrs

[back to top](#)

ENGLISH 360 The Modern Novel

A study of the 20th-century novel, American, British and Continental, with attention to the development of fiction during this century. This course deals with novelists principally active before 1930, such as Conrad, James Joyce, Kafka, Hemingway, Lawrence, Woolf, Mann, Fitzgerald, and others. Offered: Fall.

3 hrs

[back to top](#)

ENGLISH 365 Contemporary Novel

This course focuses on selected novelists since 1945 and is organized around particular literary themes, sub-genres, or contemporary issues.

3 hrs

[back to top](#)

ENGLISH 375 Colonial Literature

An exploration of colonialism through the study of a variety of texts, which may include literary, historical, and theoretical texts. These texts should represent the formation and elaboration of discourses surrounding colonialism. Texts will be drawn from more than one genre and from the metropole as well as multiple colonial contexts. The course will consider several definitions of colonialism and related terms such as empire, imperialism, and nationalism. Prerequisite: None

3 hrs

[back to top](#)

ENGLISH 376 Ancient Concepts of the Hero

This course traces the ancient concept of the hero by reading selected ancient works by authors such as Homer, Thucydides, Livy, Plutarch, Caesar, Tacitus, and Sallust. Students will also examine the impact of the ancient concept of the hero on modern literature and art. Also listed as CLASSICS 376.

3 hrs

[back to top](#)

ENGLISH 378 Asian American Literature

This course examines literary and cultural texts produced by Asian Americans from the nineteenth century to the present. Texts will be drawn from a variety of genres and from several Asian American groups in order to examine how Asian American literature engages, challenges, revises, and reinvents American literary traditions. The course will identify and explore specific cultural and political issues that have shaped the writings, including transnationalism, immigration, racial identity, group identity, and community. Authors may include Carlos Bulosan, Maxine Hong Kingston, John Okada, Bienvenido Santos, and Hisaye Yamamoto.

3 hrs

[back to top](#)

ENGLISH 400 CA Cluster Course: Images Of The Human Body In Renaissance

Focusing on Renaissance conceptions of the human body, this cluster treats the following topics as they are reflected in Renaissance literature, art, astrology, astronomy, biology, anatomy, medicine and politics: A) The dignity of the human body B) Microcosm and macrocosm C) The human body and the heavens D) Stranger manifestations: freaks and beasts E) The humors F) Disorders of the human body G) The body politic H) The human body as an object of study.

3 hrs

[back to top](#)

ENGLISH 400 CB England King's And Shakespeare's: Literature, History, Film

The aim of this cluster course is to study the historical and dramatic personae of selected English kings: John, Richard II, Henry IV, Henry V, Henry VI, Richard III, and Henry VIII. In common sessions History and English will alternate lectures. The English focus will be on Shakespeare's two tetralogies and individual histories, discussing significant themes, characters and performance elements. Students will also be asked to familiarize themselves with the critical commentaries on these plays, especially recent theoretical studies about politics and gender construction. Film versions of the plays will be shown to demonstrate how directorial interpretation influences an audience's perception of these kings and their worlds. In addition to two exams and shorter written exercises, students will be required to write an interdisciplinary essay. Graduate students will be expected to write longer, more extensively researched papers.

3 hrs

[back to top](#)

ENGLISH 400 CF Cluster Course: Courts And Culture In The Middle Ages

This cluster course offers an interdisciplinary approach to the study of the Middle Ages, focusing on medieval cultures in Europe. Arranged around a series of themes, the cluster will read a variety of documentary and literary texts to investigate not only the "high culture" of the courts but also the interactions of people from various social backgrounds in Western Europe. Cross listed with FRN-LNG 400CF and HISTORY 400CF.

3 hrs

[back to top](#)

ENGLISH 400 CQ Cluster Course: Sinai And Olympus: Two Views Of Man And God

An examination of the two distinct views of the universe and the place of man and God in it as reflected in the literature of the Hebrews and the Greeks. A comparison of the various types of creative expression such as philosophy, historical writing, drama, rhetoric, and law. Readings are in English.

3 hrs

[back to top](#)

ENGLISH 401 WI Feature Writing

Survey of the techniques of news feature writing and practical application in writing the news feature, the historical feature, travel, personal feature, etc. Assignments are given each week and student manuscripts read in class. Prerequisites: ENGLISH 110, 225, and successful completion of the WEPT.

3 hrs

[back to top](#)

ENGLISH 402 Newspaper Editing

Practical laboratory experience in newspaper copy editing, simulating actual newsroom problems and practices, with emphasis on handling wire service stories; grammar and newspaper style; reporter accuracy, fairness, and avoidance of libel; news management; layout and production; headline writing.

3 hrs

[back to top](#)

ENGLISH 404 Old English

This course is a study of Old English, its grammar, its poetic style, and its literature, both poetry and prose.

3 hrs

[back to top](#)

ENGLISH 405 Magazine Editing

A course combining academic study of editorial management, publishing operations and language skills, with "hands on" experience in article evaluation, editing, magazine production, and legal matters such as copyright and libel. Class work concentrates on authentic and effective language use, with attention given to copy editing, grammar, typography, printing processes, financing and distribution for commercial and small-press publications.

3 hrs

[back to top](#)

ENGLISH 408 Harlem Renaissance

This course examines the period from 1920 to 1940, known as the Harlem Renaissance, a time of unprecedented literary and cultural creativity by Black artists. This course explores a variety of cultural productions, not only traditional forms of literature such as novels, short stories, plays and poetry, but also nonliterary objects of study such as painting, sculpture, and music.

3 hrs

[back to top](#)

ENGLISH 410 Black Women Writers

This course explores the writings of African American Women Writers. The course examines how these writers have interacted with and often revised stereotypical representations of African American womanhood typically found within canonical and African American male literatures. The course will examine literature (which might include fiction, poetry, autobiography, and drama) of the nineteenth and twentieth centuries; the majority of the works will be by modern and contemporary authors such as Nella Larsen, Zora Neale Hurston, Toni Morrison, and Terry McMillan. By placing the works in this sort of cultural and historical context, it will be possible to examine the unique tradition of African American women's writing as well as individual texts. Prerequisite: None.

3 hrs

[back to top](#)

ENGLISH 412 Chaucer

Readings from Chaucer's most important works, especially "The Canterbury Tales" and "Troilus and Criseyde" with emphasis on them as types of medieval genres and on the Middle English language. Prerequisite: ENGLISH 317 or permission of the instructor. This prerequisite applies only to undergraduate students.

3 hrs

[back to top](#)

ENGLISH 413 Renaissance Literature I

English literature from the time of Wyatt and Surrey to the beginning of the 17th century, including the works of Spenser, Marlowe, Sidney, Shakespeare and others. Prerequisite: ENGLISH 317 or permission of the instructor. This prerequisite applies only to undergraduate students.

3 hrs

[back to top](#)

ENGLISH 414 Milton

A study of Milton's prose and poetry, with special attention to "Paradise Lost". Prerequisite: ENGLISH 317 or permission of the instructor. This prerequisite applies only to undergraduate students. Offered: On demand.

3 hrs

[back to top](#)

British literature from the late 17th century to the mid 18th century. Selected writers may include Addison and Steele, Behn, Congreve, Defoe, Dryden, Finch, Milton, Pope, Rochester, Swift, and Wortley Montagu. Prerequisites: ENGLISH 317 or permission of instructor. Offered: On demand

3 hrs

[back to top](#)

ENGLISH 416 The Romantic Period

An extensive study of selected writers (such as Austen, Barbauld, Byron, Coleridge, Hazlitt, Hemans, Keats, Gilpin, the Shelleys, Wollstonecraft, and Wordsworth) organized around literary themes and/or cultural issues important to the Romantic period. Prerequisite: ENGLISH 327 or permission of the instructor. This prerequisite applies only to undergraduate students.

3 hrs

[back to top](#)

ENGLISH 417 Modern Poetry

Study of works by modernist poets such as Hopkins, Yeats, Frost, Stevens, Williams, Moore, Pound, H.D., Eliot, Millay, Hughes. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 418 19th-Century American Literature

An intensive study of either selected major American writers in the 19th century or of 19th century literary movements. Prerequisite: ENGLISH 311 or permission of instructor. This prerequisite applies only to undergraduate students.

3 hrs

[back to top](#)

ENGLISH 422 Medieval Literature

Western religious and secular verse and prose to the 15th century. Late Middle English works are read in the original; all other selections in translation. Prerequisite: ENGLISH 317 or permission of the instructor. This prerequisite applies only to undergraduate students. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 423 Renaissance Literature II

English literature from 1600 to the beginning of the Restoration, including the works of Donne, Jonson, Milton and other contemporaries. Prerequisite: ENGLISH 317 or permission of the instructor. This prerequisite applies only to undergraduate students. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 425 18th-Century British Literature II

British literature in its critical and historical context from 1750 to 1798. The writers studied may include Blake, Burney, Collins, Johnson, and Gray. Prerequisite: ENGLISH 317 or permission of the instructor. This prerequisite applies only to undergraduate students. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 426 The Victorian Period

An intensive study of selected writers (such as Arnold, Braddon, the Brontes, the Brownings, Dickens, Darwin, Eliot, Gaskell, Hardy, Ruskin, and the Rossettis) organized around literary themes and/or cultural issues important to the Victorian period. Prerequisite: ENGLISH 327 or permission of the instructor. This prerequisite applies only to undergraduate students.

3 hrs

[back to top](#)

ENGLISH 427 Contemporary Poetry

Study of works by contemporary poets (post World War II), such as Auden, Bishop, Hayden, Berryman, Rukeyser, Larkin, Rich, Plath, Heaney, Boland, Komunyakaa. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 428 20th-Century American Literature

An intensive study of either selected major American writers in the 20th century or of 20th century literary movements. Prerequisites: ENGLISH 321 or permission of instructor. This prerequisite applies only to undergraduates.

3 hrs

[back to top](#)

ENGLISH 429 B Advanced Creative Writing: Screenwriting

This course provides students with advanced theory in narrative screenwriting, training in industry standard script analysis (called "coverage") and story editing. Crosslisted with COMM-ST 454 Advanced Screenwriting. Prerequisite: ENG 312, 315, 339 or COMM-ST 354

3 hrs

[back to top](#)

ENGLISH 430 WI Advanced Technical Writing

This course is designed for those who plan to do or teach professional, business, or technical writing. Beginning with a brief background in the history of technical writing, the course will deal with current theories and methods of teaching technical and professional writing, and will cover such areas as business usage; technical linguistic problems and theories; the language of contracts, specifications, and other binding documents; and computer-oriented problems. Prerequisite: Successful completion of the WEPT. Offered: Every Semester.

3 hrs

[back to top](#)

ENGLISH 431 18th-Century British Literature

British literature from the mid to late 18th century. Selected writers may include Blake, Burney, Collins, Equiano, Fielding, Gray, Johnson, Sheridan, and Wollstonecraft.

3 hrs

[back to top](#)

ENGLISH 432 Advanced Creative Writing Prose

A course for advanced students of fiction writing. Open to students who have taken ENGLISH 312 or its equivalent. The class will proceed through analysis of models, discussion of general principles, critique of student work. Students will simultaneously be encouraged to experiment and to refine the form and subjects best suited to their talents. Emphasis will remain on the short story, though there may be units in other forms--novella, film script, the non-fiction essay.

3 hrs

[back to top](#)

ENGLISH 433 Histories Of Writing, Reading, And Publishing

A study of selected topics concerning the material practices of writing, reading, and publishing within specific cultural and historical contexts. Issues examined may include authorship, education, information technologies, libraries, literacy, periodicals, popular literature, publishers, and communities of readers. Prerequisite: One appropriate introductory course at the 300 level. Offered: On Demand.

3 hrs

[back to top](#)

ENGLISH 434 Postcolonial Literature

An exploration of postcolonialism through the study of literary and theoretical texts created by or representing peoples whose historical experience has been decisively shaped by the experience or legacies of colonialism. Texts will be drawn from a variety of genres and from several countries. The course will consider several definitions of postcolonialism and related terms such as cosmopolitanism, hybridity, diaspora, and nationalism. Cross-listed with ENGLISH 5534. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 435 Advanced Creative Writing Poetry

Advanced Creative Writing Poetry. An advanced poetry workshop that includes intensive reading of contemporary poetry and aims at each student creating a portfolio of publishable poems. The focus of the course will vary to address a variety of topics such as metaphor and closure; imitation and the line; form and voice. May be repeated once for credit. Prerequisite: For Undergraduates Restrictions: ENGLISH 315 or equivalent. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 436 Poetic Forms

An advanced creative writing course that focuses on intensive study of and practice in metrics and traditional and nonce forms. May be repeated once for credit. Prerequisite: For Undergraduates Restrictions: ENGLISH 315 or equivalent. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 437 Prose Forms

The making of a work of prose requires expertise with the structure of the chosen form, and an understanding of the relationship of form to content. This class teaches the techniques for planning and drafting major prose forms which could include the very-short story, the story, novella, novel, linked-story collection, episodic novel, essay novel, the play, the creative nonfiction book, and others. Students will learn how to create particular prose forms and how to use content as a guide to inventing new forms. We will examine some of the best examples of both traditional and newly invented forms by writers such as Anton Chekhov, Katherine Anne Porter, Tim O'Brien, and Sandra Cisneros. Prerequisite: ENGLISH 312. Offered: Each year.

3 hrs

[back to top](#)

ENGLISH 438 The "New Letters" Writing Conference

An intensive weekend conference for creative writers of varying genres and levels of experience, published and unpublished -- fiction, poetry, nonfiction, stage and screen. The conference includes creative and interdisciplinary sessions on writing and publishing, genre-specific workshops, socializing and networking opportunities, and private manuscript consultations. The course of study for two and three-credit students includes selected reading and post-weekend tutorial time conducted by accomplished, working writers. The conference may be repeated once for credit. Two- and three- credit students need the instructor's consent and must have taken a 300-level creative-writing course in the focus genre prior to enrolling. Prerequisites: 2- and 3- credit students must have previous coursework at the 300 level in Creative Writing in the focus genre.

1-3 hrs

[back to top](#)

ENGLISH 440 American Culture

Texts that offer perspectives on key historical themes of American culture. Texts may be grouped around any culturally significant principle (e.g. region, race, gender, class, ethnicity, religion) or theme (e.g. the mythology of the frontier, marriage and domesticity, the American Dream). The course may be taken twice for credit, provided substantive changes in topic. Prerequisites: ENGLISH 311 and ENGLISH 321 or permission of the instructor. These prerequisites apply only to undergraduate students. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 441 Girls And Print Culture

This course deals with girls' relationships to the continually evolving print culture. Students will examine various literary representations of girlhood by adult writers, explore texts directed at girls (e.g., conduct books, periodicals, textbooks), and study the writing and reading practices of girls themselves.

3 hrs

[back to top](#)

ENGLISH 445 History And Principles Of Rhetoric

A study of selected writings of ancient, and modern rhetoricians illustrating key issues in the development of Western discourse theory and practice. Issues examined include the relationships between rhetoric and knowledge, orality and literacy, and rhetoric and poetics. Attention will also be given to the implications of rhetorical theory for modern language instruction. Prerequisites: None. Offered: on demand.

3 hrs

[back to top](#)

ENGLISH 447 Introduction To Literary Criticism

An introduction to major schools or methods of literary criticism. The first third of the course is an historical overview of criticism from Aristotle to Northrop Frye. The remainder of the semester is devoted to a study of genetic, formalist, mimetic, affective, intertextual, and deconstructionist approaches. Prerequisite: junior or senior status and six hours of literature.

3 hrs

[back to top](#)

ENGLISH 448 External Internship

Students may complete an external internship involving writing and editing with a publishing company, trade magazine, literary or academic journal, other print or electronic media organization, or with advertising, public relations, or non-profit firms. Internships are granted on a competitive basis. Students will compile a portfolio of their work under the direction of the internship supervisor to be submitted for evaluation by their chosen faculty mentor. Students will work 5 hours per week per credit hour.

1-3 hrs

[back to top](#)

ENGLISH 449 A Publication Practicum

This course provides practical experience with New Letters magazine, New Letters on the Air, and BkMk Press in business analysis/reporting, copy-editing, manuscript evaluation, promotion/grant development, library research, market research, and other skills. The practicum is limited to three students per semester, to be chosen on the basis of demonstrated writing and organizational skills. References are required. May be taken for no more than three credit hours over a maximum of two semesters. Permission of the instructors required. Prerequisite: None.

1-3 hrs

[back to top](#)

ENGLISH 449 B Publication Practicum

This course covers the basics of producing an issue of an academic journal. Students acquire hands-on experience at all stages of production. In addition to production work on essays for the journal, each student prepares a manuscript of his/her own (e.g. critical essay, creative piece, review or review essay) for submission to an appropriate journal or other venue #. Restrictions: Consent of the instructor.

1-3 hrs

[back to top](#)

ENGLISH 450 Special Readings

Intensive individual readings in a field, genre, or individual figure to be selected by a student or a group of students in consultation with an instructor willing to direct the project. Generally limited to graduating seniors who have completed the majority of the work for their major. Not open to students in their first semester at UMKC. May be repeated for credit. No more than six hours of independent study (exclusive of ENGLISH 499) may be used to fulfill the 33-hour requirement for the English major. Offered: Every semester. Arrangements must be made prior to registration.

1-3 hrs

[back to top](#)

ENGLISH 451 Shakespeare Comedies And Histories

A study of Shakespeare's major comedies and history plays with special emphasis on his dramatic works before 1600. Prerequisites: ENGLISH 317 and ENGLISH 323 or permission of the instructor. These prerequisites apply only to undergraduate students.

3 hrs

[back to top](#)

ENGLISH 452 Early English Drama

English religious and secular drama prior to Shakespeare. Mystery and morality plays are studied, with emphasis on their literary and social backgrounds. Close reading of such works as "Everyman," "The Wakefield Second Shepherd's Play," and "The Spanish Tragedy." Prerequisites: ENGLISH 317 and ENGLISH 323 or permission of the instructor. These prerequisites apply only to undergraduate students. On demand.

3 hrs

[back to top](#)

ENGLISH 453 Modern Drama, 1880-1945

A study of modern drama: Continental, British, and American, including history and development, critical theory, and literary evaluation. This course will focus on the earlier modern playwrights from Ibsen and Shaw, with special attention to naturalism. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 455 Studies In The Novel 1740-1900

An intensive study of no more than three major novelists of the eighteenth or nineteenth century. The content of the course will change, depending on the instructor. Prerequisite: The completion of six hours of literature or permission of the instructor.

3 hrs

[back to top](#)

ENGLISH 460 Special Offerings

The visiting professor who gives this course determines what its content shall be. All aspects of literature and linguistics are within its possible range. On demand.

1-4 hrs

[back to top](#)

ENGLISH 460 A Special Offerings

1-4 hrs

[back to top](#)

ENGLISH 461 Shakespeare Tragedies And Romances

A study of Shakespeare's major tragedies and late romances with special emphasis on his dramatic literature after 1600. Prerequisites: ENGLISH 317 and ENGLISH 323 or permission of the instructor. These prerequisites apply only to undergraduate students. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 462 Restoration And 18th-Century Drama

The drama after the restoration of the monarchy and the reopening of the theaters through the 18th century. Special emphasis is placed on the comedy of manners and the heroic drama in the Restoration and the sentimental comedy in the 18th-century. Includes such playwrights as Dryden, Congreve, Etherege, Wycherley, Steele, Lillo, Cumberland, Sheridan, and Goldsmith. Prerequisite: ENGLISH 317 or permission of the instructor. This prerequisite applies only to undergraduate students. On demand.

3 hrs

[back to top](#)

ENGLISH 463 Contemporary Drama II

A study of contemporary drama: Continental, British, and American, including history and development, critical theory and literary evaluation. This course will focus on the more recent writers, including the absurdist, with special attention to experimental drama. This course is a continuation of ENGLISH 453. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 465 Studies In The Modern Novel

An intensive study of no more than three major 20th-century novelists. The content of the course will change, depending on the instructor. Prerequisite: The completion of six hours of literature or permission of the instructor.

3 hrs

[back to top](#)

ENGLISH 470 Introduction To Descriptive Linguistics

General introduction to linguistics science. Linguistic analysis, structures and change. Language families. Historical reconstruction. Generative grammar. Prerequisite: ENGLISH 310 or permission of instructor. The prerequisite only applies to undergraduate students. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 498 Senior Seminar On Writing In The Secondary Classroom

This course is intended to help students move from discussions of education & composition theory to classroom research and practice. Students will examine their own language uses, study current composition pedagogy, and undertake action research projects in cooperation with teachers affiliated with the Greater Kansas City Writing Project. In a culminating study, students will compile their action research data and prepare classroom resources based on their findings. ENGLISH 498 is designed for English # Secondary Education majors. Other education majors may enroll with instructor's permission. This course is offered fall semester only and cannot be taken for graduate credit. Prerequisite: None Offered: Fall Semester Only

3 hrs

[back to top](#)

ENGLISH 499 Senior Tutorial

A three-hour comprehensive reading and research tutorial (to be taken during the student's final semester) leading to the writing of a senior paper. A requirement for all English majors. For regular English majors and those with an emphasis in secondary education, the paper will be a critical or scholarly study of 20-25 pages. For journalism and creative writing students, the paper will be a creative writing project of similar length. Prerequisite: Students must have completed all core requirements before enrolling in this course. Each semester.

3 hrs

[back to top](#)

ENGLISH H327 British Literature II

A survey of British Literature and culture from the late 18th century to the present. This course will cover a range of authors and genres, including at least one novel.

3 hrs

[back to top](#)

Environmental Science

ENV-SCI 110 L Understanding The Earth Laboratory

Laboratory and field demonstration and exercises in environmental science. Weekly exercises or field trips. This lab should preferably be taken in the same semester as ENV-SCI 110R. Prerequisite: None Offered: Each semester

2 hrs

[back to top](#)

ENV-SCI 110 R Understanding The Earth

This introductory course surveys the processes that shape our planet. Topics include: plate tectonics and mountain-building, rivers and oceans, atmospheric circulation, weather and climate, and the amazingly complex relationships between life on earth and the physical environment. Prerequisite: None Offered: Each semester

3 hrs

[back to top](#)

ENV-SCI 210 Issues In Environmental Science

Explores important environmental issues such as air and water pollution, water supply, climate change, agriculture and food supply, environmental health, ecosystem disruption, environmental management, environmental ethics, and energy resources. Topics may vary depending on current events. Offered: Fall and Winter

3 hrs

[back to top](#)

ENV-SCI 310 Field Experience In Waste Management

This course provides an overview of waste management issues, including nature, classification and disposal of waste. U.S. laws governing the management of solid, hazardous, biologic and nuclear waste; lectures and discussions will be supplemented by visits to waste management facilities to study methods and technologies used for wastewater treatment and disposal of solid, hazardous and biologic wastes. The course includes travel to neighboring states and Yucca Mountain, Nevada. Students may register for neighboring states coursework only (2 credit hours) or neighboring states and Yucca Mountain coursework (3 credit hours). Final report required. Prerequisites: Jr/Sr or instructor's consent Offered: Summer

2-3 hrs

[back to top](#)

ENV-SCI 332 CZ Enviromental Sustainability

This course will introduce the concept of sustainability and review how sustainability might work at the individual, neighborhood, state, nation and global scales. Students will participate in some form of community engagement on sustainability as well as reflect upon how their own practices impact the environment.

3 hrs

[back to top](#)

ENV-SCI 3 Upper Level Environmental Science Elective Lab

Upper Level Transfer Credit

99 hrs

[back to top](#)

ENV-SCI 449 Global Water and Sustainability

This course examines the physical characteristics of water and its role in Earth systems. The challenges facing societies in as era of rapidly changing climate are explored. Cross-listed with GEOG 446.

3 hrs

[back to top](#)

ENV-SCI 496 Environmental Internship

Students obtain practical experience working for local engineering and environmental firms, or governmental agencies. Specific duties and application requirements will vary depending on the funding organization's needs. Junior or senior standing required for undergraduates. Applicant (s) must be accepted for the position prior to enrollment. Prerequisite: Permission of instructor Offered: Summer, Fall or Winter as available.

1-4 hrs

[back to top](#)

Environmental Studies

ENV-STDY 225 Animals and Society

This course explores the wide variety of cultural and ecological interactions that exist between people and animals whether wild or domesticated, aquatic, terrestrial, or avian. Utilitarian and ethical perspectives are used to study current patterns of use and abuse in animal keeping. Cross-listed with GEOG 225

3 hrs

[back to top](#)

ENV-STDY 251 Women's Studies: Women & Environment

This course provides a survey of different ways women relate to nature. The objectives of the course are: to understand historical relationships between women and nature in the western world, to understand different theoretical approaches to studying women and nature, to explore the geography of women's activism on behalf of the environment, and to understand how women's health are linked to environmental issues.

3 hrs

[back to top](#)

ENV-STDY 430 Soil And Groundwater Remediation

Review of basic geoenvironmental concepts. Nature, cause, and occurrence of contaminated soil and groundwater. Principles of remediation, discussion of cleanup goals and various remediation alternatives and technologies. Design a remediation system: Project planning, data requirements, cost considerations, and implementation. A class project is required.

Prerequisites: GEOLOGY 335 / GEOG 335 or permission of instructor Offered: Winter

3 hrs

[back to top](#)

ENV-STDY 499 WI Environmental Studies Practicum

Students conduct research, participate in discussions, and prepare written reports on selected topics concerning the environment. Prerequisites: Senior standing and successful completion of the WEPT exam. Offered: Winter.

3 hrs

[back to top](#)

Foreign Language

FRN-LNG 180 Special Elementary Foreign Languages Topics I

Instruction in foreign languages at the elementary level. Essentials of grammar, basic conversation and reading, practical vocabulary. May include introduction of new methods of foreign language teaching, special texts, and languages not offered through regular courses. As needed.

2-5 hrs

[back to top](#)

FRN-LNG 190 Special Elementary Foreign Languages Topics II

Continuation of Foreign Languages and Literature 180. Prerequisite: Elementary I college-level course or equivalent. As needed.

2-5 hrs

[back to top](#)

FRN-LNG 280 Special Intermediate Foreign Languages Topics I

Instruction in foreign languages at the second-year intermediate level. Further development of comprehension and communicative skills. Readings of moderate difficulty and grammar review. May include introduction of new methods of foreign language teaching, special texts and topics, and new languages not offered through regular courses. Prerequisite: Elementary I & II college courses or equivalent. As needed.

2-4 hrs

[back to top](#)

FRN-LNG 290 Special Intermediate Foreign Languages Topics II

Continuation of Foreign Languages and Literature 280. Prerequisite: Third semester college level-courses or equivalent. As needed.

2-4 hrs

[back to top](#)

FRN-LNG 300 CM Cluster Course: Mexico, Central America And The Human Condition

Faculty from at least two different departments (one of which must be a department in the Division of Humanities including history) may determine the topic and syllabus, subject to the approval of the director of Integrated Studies and the departments involved. This special topics course will satisfy the interdisciplinary course requirement for the B.A.

3 hrs

[back to top](#)

FRN-LNG 300 CS Cluster Course: History Of Russian Culture

Faculty from at least two different departments (one of which must be a department in the Division of Humanities including history) may determine the topic and syllabus, subject to the approval of the director of Integrated Studies and the program's advisory committee in addition to the approval of the departments involved. This special topics course will satisfy the interdisciplinary course requirement for the B.A. Fall/winter.

3 hrs

[back to top](#)

FRN-LNG 380 Special Topics

Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes. Prerequisite: Permission of instructor. On demand.

1-3 hrs

[back to top](#)

FRN-LNG 400 CF Courts and Culture in the Middle Ages

This cluster course offers an interdisciplinary approach to the study of the Middle Ages, focusing on medieval cultures in Europe. Arranged around a series of themes, the cluster will read a variety of documentary and literary texts to investigate not only the "high culture" of the courts but also the interactions of people from various social backgrounds in Western Europe. May be taken for French major with permission of instructor. Cross listed with ENGLISH 400CF and HISTORY 400CF.

3 hrs

[back to top](#)

FRN-LNG 400 CI Cc:Culture,Kultur,Civilisation:Identity Formation In the Middle Classes

This cluster course will explore the dynamics of bourgeois class formation in Western Europe in the "long" 19th century (1750-1920) from historical, thematic, and theoretical perspectives. It will focus on how this class-based identity developed and functioned in the context of historical and cultural changes and how the bourgeoisie defined themselves vis a vis nobles, peasants, workers, "primitives," and criminals. Class assignments will include historical, literary, theatrical, anthropological, and cinemagraphic sources.

3 hrs

[back to top](#)

FRN-LNG 400 CM Nazi-Occupied Europe & The Holocaust

With the collaboration of many other nations, Nazi Germany attempted a genocidal war to systematically colonize, relocate and annihilate entire social groups, most notably the Jews. Employing an intentionally cosmopolitan perspective, this interdisciplinary cluster-course will explore how ordinary Europeans behaved in these circumstances and the different ways that scholars have attempted to comprehend, analyze and represent those choices.

3 hrs

[back to top](#)

FRN-LNG 401 Linguistics And Language Teaching

A survey of issues in linguistics with particular emphasis on areas and applications pertaining to the teaching of foreign languages. Contrastive analysis of the history and structure of Germanic and Romance languages. Examination of social, cultural and biological aspects of language. Prerequisite: Two years of a foreign language at college level and junior/senior standing.

3 hrs

[back to top](#)

FRN-LNG 480 Special Topics

Each time this course is offered a particular genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes. Permission of the department chairman required. On demand.

1-3 hrs

[back to top](#)

FRN-LNG 480 A Special Topics

Each time this course is offered a particular genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes. Permission of the department chairman required. On demand.

1-3 hrs

[back to top](#)

FRN-LNG 494 Methods Of Teaching Foreign Languages

Teaching methods and materials for beginning and advanced classes in French, German, and Spanish. Modern language teaching methodology and material will be evaluated and demonstrated, together with effective use of the Language Resource Center, tapes, slides, film strips, and other audio-visual materials. Prerequisite: A 3.0 grade average in the foreign language to be considered for practice teaching. Does not count toward a major in foreign language. Offered in conjunction with the School of Education.

3 hrs

[back to top](#)

FRN-LNG H400 CM (HONORS) Nazi-Occupied Europe & The Holocaust

With the collaboration of many other nations, Nazi Germany attempted a genocidal war to systematically colonize, relocate and annihilate entire social groups, most notably the Jews. Employing an intentionally cosmopolitan perspective, this interdisciplinary cluster-course will explore how ordinary Europeans behaved in these circumstances and the different ways that scholars have attempted to comprehend, analyze and represent those choices.

Explorations of the genre through the analysis of 17th- and 18-century French novels. Introduced by a theoretical review. Also offered as FRENCH 5545.

3 hrs

[back to top](#)

FRENCH 446 17Th-Century French Drama

The classical period: Emphasis on Corneille, Racine and Moliere. Also offered as FRENCH 5546.

3 hrs

[back to top](#)

FRENCH 447 19Th-Century French Poetry

The study of the poetry and dominant poetic movements of the 19th-century, with special attention given to different approaches to its analysis. Also offered as FRENCH 5547.

3 hrs

[back to top](#)

FRENCH 448 20Th Century French Theater

Analysis of major currents of French theater of the 20th-Century, with emphasis upon the postwar period and its movements. Also offered as FRENCH 5548.

3 hrs

[back to top](#)

FRENCH 452 Medieval Poetry

A study of medieval poetry including religious and secular poetry, Provençal and Old French lyric, the influence of poetry in other genres such as romance and theater, later medieval poetry of the 14th and 15th centuries, as well as a discussion of the origins of the lyric. Also offered as FRENCH 5552. Prerequisites: FRENCH 221 or the equivalent.

3 hrs

[back to top](#)

FRENCH 454 Intellectual Origins Of The French Revolution

Study of philosophical and political texts by Montesquieu, Rousseau, Voltaire, Diderot, etc. on government, society, language, freedom and equality. Critical study of the Enlightenment. Also offered as FRENCH 5554.

3 hrs

[back to top](#)

FRENCH 455 Fin-De-Siecle And Belle Epoque

Study of the literary, cultural and historical context of this time period in French history, for example: Symbolism, Decadence, and the years 1900-1914. Also offered as FRENCH 5555.

3 hrs

[back to top](#)

FRENCH 456 20Th Century French Poetry

The study of 20th-century poetry with special consideration given to different approaches to its analysis. Also offered as FRENCH 5556.

3 hrs

[back to top](#)

FRENCH 457 20Th Century French Narrative

The analysis of major currents in French 20th century narrative, especially fiction and film. Courses will be organized around narrative themes or historical events and will include social and cultural components. Also offered as FRENCH 5557.

3 hrs

[back to top](#)

FRENCH 463 19Th-Century French Fiction

Studies in the birth, development and variation of French Romanticism. Readings include de Stael, Senancour, Constant, Hugo, Stendhal and Merimee. The advent of realism and naturalism in France. Readings include Balzac, Flaubert, Daudet, De Maupassant, and Zola. Also offered as FRENCH 5563.

3 hrs

[back to top](#)

FRENCH 470 Studies In Critical Thought

Various currents of 20th-century literary criticism and their political and historical contexts. Also offered as FRENCH 5570.

3 hrs

[back to top](#)

FRENCH 471 Autobiography

Analysis of autobiographies and autobiographical texts such as diaries and memoirs together with theoretical texts on the genre. The concentration on different periods or issues may change from semester to semester, i.e. the art of autobiography as practiced by 20th-century writers, especially women. Also offered as FRENCH 5571.

3 hrs

[back to top](#)

FRENCH 472 Francophone Studies

Study of different national Francophone literatures. Reading may include writers from Quebec, Haiti, Africa, Louisiana, Vietnam, the French Indies, etc. Also offered as FRENCH 5572.

3 hrs

[back to top](#)

FRENCH 480 Special Topics

Each time this course is offered a particular author, genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes. Permission of the department chairman is required. On demand.

1-3 hrs

[back to top](#)

FRENCH 490 Special Readings

Intensive readings in field or literary figure to be selected by the student in consultation with the instructor. Available, by permission only, to advanced students of French; available only when student cannot take regularly scheduled courses. Prerequisite: 3.0 GPA. On demand.

1-3 hrs

[back to top](#)

FRENCH 499 Senior Seminar (Capstone)

Required for major. Covers seminal works of French literature in their historical and cultural context. Course content varies, but will include such elements as geography, politics, folklore, history of the language, architecture, art and music. To be taken during final Winter Semester of residence. Prerequisite: 21 hours beyond first year. Offered: Winter Semester.

3 hrs

[back to top](#)

FRENCH H280 Special Intermediate French Topics I

Instruction of French on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit. Prerequisite: Elementary I and II college-level courses or equivalent. As needed.

2-4 hrs

[back to top](#)

FRENCH H380 Special Topics

Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes. Prerequisite: Permission of the instructor. On demand.

1-3 hrs

[back to top](#)

Geography

GEOG 105 Introduction To The Elements Of Geography

A survey of major elements of physical and human geography, with a concise overview of the world's regions. Emphasis on global relationships and distributions, both environmental and cultural. Climates, natural vegetation, land forms, cultural origins and diffusions, economic patterns. Fall and winter.

3 hrs

[back to top](#)

GEOG 150 Introduction To Physical Geography

This course is an introduction to the study of the natural environmental systems of earth--the atmosphere, the hydrosphere, the biosphere, and the lithosphere. The primary objective of the course is to provide a broad overview of these systems at a global scale. This overview will entail descriptions of natural systems and the variations they exhibit both from place to place and through time. It will also entail explaining how natural systems operate and interact with each other, thereby providing a necessary foundation for understanding the tremendously diverse physical geography of earth. Applies to natural science requirement. Prerequisites: None. Offered: Fall semester.

3 hrs

[back to top](#)

GEOG 200 World Geography I

A study of Europe, Australia and New Zealand, Anglo America, and Latin America organized around the basic concepts of human -environmental relationships and spatial interaction. Fall.

3 hrs

[back to top](#)

GEOG 202 World Geography II

A study of Russia and the other former Soviet Republics, the Middle East, the Orient, Africa, and the Pacific World organized around the basic geographic concepts of human-environmental relationships and spatial interaction. Offered: Winter

3 hrs

[back to top](#)

GEOG 203 Introduction To Geographic Information Systems

An introductory course covering the basic principles of geographic information systems focusing on such software programs as ARC-INFO and ARC-VIEW. Offered: Fall and Winter

4 hrs

[back to top](#)

GEOG 210 Human Geography

A study of the geographical underpinnings and distribution of the main elements of culture, including population patterns, language, religion, political territorial organization, settlement, and economic livelihood. The environmental settings, geographic origins, diffusion, and geographic interrelationships of these culture traits are emphasized. Offered: On demand

3 hrs

[back to top](#)

GEOG 215 Introduction To Weather And Climate

Overview of the basic components of the climate system. Emphasis is on the basic physical processes that determine global and regional climate and the linkages between components of the climate system. The theme throughout the course will be importance of climate as one of the major forcing mechanisms in environmental change. Both human-induced and natural climate variability will be covered. Three hours of lecture and two hours of laboratory per week. Offered: Fall

4 hrs

[back to top](#)

GEOG 225 Animals and Society

This course explores the wide variety of cultural and ecological interactions that exist between people and animals whether wild or domesticated, aquatic, terrestrial, or avian. Utilitarian and ethical perspectives are used to study current patterns of use and abuse in animal keeping. Cross-listed with Environmental Studies 225.

3 hrs

[back to top](#)

GEOG 300 Interdisciplinary Studies:Cluster Courses

3 hrs

[back to top](#)

GEOG 309 Urban Geography

Historical development, morphology and functions of urban places, including intercity relationships and the relationship between cities and their hinterlands; emphasis on American cities. Offered: On Demand.

3 hrs

[back to top](#)

GEOG 311 Economic Geography

A systematic study of the modern world economy that includes discussion of the location of production and consumption, the nature and role of multinational enterprises in trade, resource limitations to growth, and cultural responses to globalization. Three hours lecture, discussion a week. Offered: On demand

3 hrs

[back to top](#)

GEOG 314 Principles Of Geomorphology

Explores the processes that shape the earth's surface. Focuses on the development and description of fluvial, glacial, eolian, and coastal landforms. Studies the influence of tectonic and climatic factors. Three hours lecture and two hours lab per week. Field trip. Prerequisite: ENV-SCI 111R or GEOLOGY 220; GEOLOGY 230 suggested. Offered: On demand.

4 hrs

[back to top](#)

GEOG 317 Cartography

Design and preparation, by hand and computer, of informative, effective, and attractive maps and other graphics for various geographical purposes, especially term papers, thesis, and public presentations. Lectures, discussion, and laboratory. Offered: On demand.

4 hrs

[back to top](#)

GEOG 319 Descriptive And Synoptic Meteorology

Synoptic weather observations, air mass analysis, analysis of frontal systems, weather disturbances, preparation of weather charts and diagrams used in synoptic meteorology and forecasting. Prerequisites: ENV-SCI 110R or GEOLOGY 215 Offered: On demand

4 hrs

[back to top](#)

GEOG 329 World Political Geography

An analysis of the influence of geographic factors (both physical and human) on the economic and political relationships of the nations of the world. Emphasis will be placed on population size and political viability of states, boundaries and frontiers as limits of national space, problems related to the spatial integration of states, and the independence and interdependence of states within the larger world political system. Offered: On demand

3 hrs

[back to top](#)

GEOG 332 Cultural Geography

A study of the distribution and interpretation of cultural patterns throughout the world. Examined are material and non-material elements of culture such as settlement, land use, technology and belief systems. The geographic origins and diffusion of culture traits are emphasized. On demand.

3 hrs

[back to top](#)

GEOG 333 Geographic Elements Of Urban Planning

Analysis of the changing form and structure of urban places from a planning viewpoint. The focus will be on land-use trends on both the intraurban and interurban levels. Covered will be such topics as planning for urban transportation, new towns, land-use planning, urban renewal, and environmental planning. Offered: On demand

3 hrs

[back to top](#)

GEOG 335 Introduction To Waste Management

Overview of issues in waste management. Nature and classification of waste. Municipal solid waste: disposal methods, design, construction and maintenance of sanitary landfills. Nature and sources of hazardous waste, storage, transportation, treatment and disposal of hazardous waste. Types and sources of nuclear waste; disposal of high level and low level nuclear wastes. Sources, nature, handling and disposal of biologic waste. Pollution prevention, recycling and resource conservation. Prerequisites: ENV-SCI 110R; GEOLOGY 150, GEOLOGY 220 or instructor's permission. Offered: On demand.

3 hrs

[back to top](#)

GEOG 336 Principles Of Soil Science

Study of genesis, evolution, distribution and classification of soils. Analysis of soil-forming materials and processes. Three hours lecture, discussion and laboratory a week. Prerequisites: ENV-SCI 110R; GEOLOGY 220 required; Offered: On demand Restrictions: college chemistry recommended.

3 hrs

[back to top](#)

GEOG 340 Regional Geography Of The United States And Canada

A systematic study of the physical and human geography of the United States and Canada. Emphasis is placed on the physical setting and the influence of the people on the land. Contemporary issues such as public vs. private land, water resources and energy resource distribution are emphasized. Offered: On demand.

3 hrs

[back to top](#)

GEOG 341 Regional Geography Of South America

A study of the physical and human geography of South America, with an emphasis on cultural processes and the historical record. Contemporary issues such as economic development, trade, urbanization, and geopolitical conflicts are discussed. Offered: On demand

3 hrs

[back to top](#)

GEOG 342 Regional Geography Of Mexico, Central America And The Caribbean

A study of the physical and human geography of Middle America, with an emphasis on cultural processes and the historical record. Contemporary issues such as economic development, trade urbanization, and geopolitical conflicts are discussed. Offered: On demand

3 hrs

[back to top](#)

GEOG 350 Regional Geography Of Europe

A study of human activities in relation to the physical environment in Europe. Emphasis is placed on nation states and their economic, social and political geography within their physical and historical context. Offered: On demand

3 hrs

[back to top](#)

GEOG 351 Regional Geography Of The Middle East

A study of human imprint upon the land through settlement patterns, institutions of land organization, and types of economy. Strategies for the economic development of various regions in the Middle East are discussed. Offered: On demand

3 hrs

[back to top](#)

GEOG 352 Regional Geography Of Southeast Asia

A study of human imprint on the land through settlement patterns, institutions of land organization, and types of economy. Strategies for the economic development of various regions in Southeast Asia are discussed. Offered: On demand

3 hrs

[back to top](#)

GEOG 355 Regional Geography Of Africa

A study of human imprint on the land through settlement patterns, institutions of land organization, and types of economy. Strategies for the economic development of various regions in Africa are discussed. Offered: On demand

3 hrs

[back to top](#)

GEOG 360 Principles Of Biogeography

Distribution of plants and animals on earth, emphasizing variations in the physical environment over space and time, the concept of the biological niche, the phenomena of speciation and extinction, island biogeography, and recent theoretical developments relating to species disjunctions (vicariance biogeography). Prerequisite: ENV-SCI 110R. Offered: On demand.

3 hrs

[back to top](#)

GEOG 398 Field Trip

Three-day field trip in March or April (at student's expense) for department majors. An opportunity to observe and study physical and cultural features and collect materials. Brief descriptive report of trip required. Prerequisite: 6-9 hours of upper level geography. Yearly.

1 hr

[back to top](#)

GEOG 401 Advanced Geographic Information Science

This course is designed for the students knowledgeable in the fundamentals of geographic information systems, who wish to gain expertise in advanced topics and applications in geographic information systems, remote sensing, and related environmental informatics. Classes are organized to encourage active learning. Students are encouraged and guided to develop their research projects by integrating related techniques of geographic information science. Prerequisite: GEOG 203
Offered: On demand

4 hrs

[back to top](#)

GEOG 402 Environmental Remote Sensing And Digital Image Analysis

This course will provide students with innovative techniques for landscape-level environmental analysis, geographic and geological studies, earth science research, and environmental resources management using remotely sensed data including satellite images. Students will be taught basic remote sensing concepts and technical skills, including energy radiative transfer processes in remote sensing, sensors and resolutions, computer-based image processing and classification, and remote sensing/GIS integration. Prerequisite: GEOG 203 (formerly GEOG 401) or permission of instructor. Offered: On Demand

4 hrs

[back to top](#)

GEOG 403 WI History and Philosophy of Geoscience

A survey of geoscientific thought since antiquity. The substance of geography, geology, and environmental studies will be sought primarily in scholarly treatise and formal analytical systems including cartography, but the course also addresses geoscientific principles emerging from the history of environment, government, law, economy, religion, literature, and material culture. Readings, lectures, discussions, research, writing. Also offered as GEOG 503wi. Offered: on demand

3 hrs

[back to top](#)

GEOG 404 Biogeography And Landscape Ecology

Principles and applications of biogeography and landscape ecology, emphasizing distribution of major ecosystems and related plants and animal species on earth, biodiversity, landscape patterns and processes, and physical, biological, and human interactions. The course explores ecosystem and landscape analyses using advanced GIS, remote sensing, and spatial modeling methods for real problem solving in environmental and biological research, ecosystem conservation, and urban planning and studies. Prerequisites: GEOG 203, GEOG 402 / GEOG 5502 or permission of instructor. Offered: On demand

3 hrs

[back to top](#)

GEOG 406 Global Environmental Change

This course will examine the current rates of global environmental change and potential causes in the context of Earth's natural climate variability. The course will follow a seminar format. Students will read and discuss published articles on current and emerging theories of forcing mechanisms in the Earth's systems.

3 hrs

[back to top](#)

GEOG 410 Landscape, Language, Literature, And Law

An examination of the geographic underpinnings and implications of languages, literatures, and jurisprudence. The course explores languages' historic rootedness in the interactions between human beings and their surroundings; the varying geographic expressiveness and discrimination of languages; the effect and significance of literary evocations of landscapes; and the cultural and environmental geographic content of the language of law. Readings, lectures, discussions, writing. Prerequisite: Permission of the instructor. Offered: On demand. Also offered as GEOG 5510.

3 hrs

[back to top](#)

GEOG 415 History And Philosophy Of Cartography

An examination of the techniques, assumptions, psychology, and cultural implications of mapping from the Stone Age to the age of satellites and the computerized Geographic Information System. Readings, lectures, discussions, writing. Offered: On demand. Also offered as GEOG 5515.

3 hrs

[back to top](#)

GEOG 417 Special Topics

Individual research and study of a selected topic in geography, meteorology or earth science. Prerequisites: Approval of instructor. On demand.

1-3 hrs

[back to top](#)

GEOG 426 Paleocology: Microfossils And Climate Change

Paleocology will focus on questions addressing past environments and past climates based on the ecology of microfossils. Micro-organisms are very sensitive to a wide variety of environmental conditions including temperature, precipitation, hydrology, water chemistry, salinity, habitat, and pollution. The fossil remains of these organisms are used as proxy indicators for reconstructing past environmental conditions, climate change, vegetation dynamics, and human impacts. Students will have the opportunity to process microfossils and make interpretations based on analysis data. Prerequisite: Permission of Instructor Offered: Every other Fall semester

3 hrs

[back to top](#)

GEOG 430 Energy Resources

Theories regarding the origins of energy resources with emphasis on hydrocarbon fuels. Practical problems of exploration, production, storage and conservation of energy resources. Discussion of estimated national and worldwide energy supplies, reserves and alternate sources in relation to environmental concerns. Three hours lecture, occasional field trips. Prerequisite (s): ENV-SCI 110R; GEOLOGY 220 recommended. Offered: On demand.

3 hrs

[back to top](#)

GEOG 435 Geoarchaeology

This course examines geomorphological and archaeological methods used in reconstructing sites, settlement patterns, and paleoenvironments. Explores dating methods, soils, and stratigraphy as tools for studying landscape evolution and human occupation. Prerequisites: GEOG 314 or GEOLOGY 314, or permission of instructor. Offered: On demand

3 hrs

[back to top](#)

GEOG 437 Population Geography

This course analyzes human populations: how they grow, how their compositions change, and how and why people migrate from one place to another. Students will study basic demographic processes- mortality, fertility, and migration- and underline theory and techniques. Students will also examine relationships between population growth and population planning, immigration, urbanization and cities, and the environment. Offered: On demand.

3 hrs

[back to top](#)

GEOG 442 Quaternary Environments

This course reviews earth climatic history and focuses on major mechanisms for global and regional climate change. Methods of paleoclimatic reconstruction are examined, including analysis of proxy data and climate modeling. Application of these methods toward prediction of future climate change is also explored. Also offered as GEOG 5542. Prerequisite(s): GEOG 314 or GEOLOGY 314, and GEOG 215, or permission of instructor. Offered: On demand.

3 hrs

[back to top](#)

GEOG 444 Spatial Data Analysis

Quantitative techniques and applications of spatial data analysis. The course will cover basic geospatial analysis techniques including hypothesis testing, kriging, variogram analysis, multivariate analysis and reliability analysis. Emphasis is on practical applications rather than theories. Intended for Geology, Geography, Environmental Studies, and relevant fields. Three hours lecture and computer lab per week. Prerequisites: Elementary statistics or permission of instructor Offered: On demand

3 hrs

[back to top](#)

GEOG 448 Satellite Climatology

Use of satellite observations to study the climate system. Discussions consider the development of satellite climatology, sensors, platforms and methodologies used to estimate climate variables from radiance measurements. Aspects of climate that are emphasized include cloud climatologies, cloud systems, atmospheric moisture, radiation budget, and land-surface conditions. Prerequisites: GEOG 215 or GEOG 319, or permission of instructor Offered: On demand

3 hrs

[back to top](#)

GEOG 449 Global Water and Sustainability

This course examines the physical characteristics of water and its role in Earth systems. The challenges facing societies in as era of rapidly changing climate are explored. Cross-listed with Environmental Science 446.

3 hrs

[back to top](#)

GEOG 450 Gis Fundamentals For Research Applications

This course will address the needs of upper level undergraduate and graduate students who desire to learn and apply fundamental Geographic Information Systems concepts and techniques for their research projects. This course will draw on the content of the Introductory GIS course offered by the department but will also be flexible such that the individual needs or interest of students can be met through guided reading and/or tailored laboratory sessions. The Department of Geosciences GIS computer laboratory, with a variety of GIS and Remote Sensing software, will be available for this course. Prerequisite: Permission by instructor Offered: Winter Restrictions: Only for upper level undergraduate and graduate students

4 hrs

[back to top](#)

GEOG 460 Transportation Geography

Relation between transportation and spatial organization, selected analytical models dealing with traffic demand, network configuration, and allocation of transport facilities; application to specific problem areas including commuting. Seminar with discussions of briefs and term paper. Offered: On demand

3 hrs

[back to top](#)

GEOG 489 Tutoring In Geography

Geography majors in their senior year may enroll for 1-3 hours tutoring for credit. This will entail working as a tutor, under the direction of the faculty, to students in the 100 to 200-level courses in the department who either have inadequate background preparation in environment studies and geography or are identified by the instructor as needing tutorial help. Tutoring will be on a credit/non-credit basis. Prerequisite: Permission of instructor Offered: On demand

1-3 hrs

[back to top](#)

GEOG 496 Geography Internship

Students obtain directed practical experience working with non-profits, governments, or private enterprises. Duties will vary based on contractual agreement between the student, host organization, and the professor. Students should have junior standing or higher, and the instructor's permission. Prerequisite: Permission of the instructor Offered: Summer, Fall, or Winter as available

1-6 hrs

[back to top](#)

GEOG 499 WI Geography Seminar

Students critique geographic research and prepare a paper and an oral presentation on an approved topic. Prerequisite: Senior standing and successful completion of the WEPT Offered: Winter

3 hrs

[back to top](#)

Geology

GEOLOGY 120 Energy Science

An introductory foundation course on energy in all its guises, the physical laws and factors which control it and the availability of energy for human use. Includes consideration of resources, reserves, conversion efficiencies, conservation, and other relevant factors. Conventional sources and nonconventional alternatives such as solar, wind, water, geothermal, biomass and fusion will be addressed. Lecture and discussions. No prerequisites. Offered: On demand

3 hrs

[back to top](#)

GEOLOGY 1 Geology Elective Lecture

Transfer Credit

99 hrs

[back to top](#)

GEOLOGY 220 General Geology

Origin and composition of the primary earth materials; agents of erosion, transportation, sedimentation and metamorphism; modes of occurrence of common minerals and analysis of the common crustal structures. Field trips. Three hours lecture and discussion. Semester offered: Fall and Winter

3 hrs

[back to top](#)

GEOLOGY 220 L General Geology Laboratory

Laboratory and field investigations of principles of the geology designed to complement the topics covered in GEOLOGY 220 through the use of inquiry-based investigations in the laboratory and field. Prerequisite: Co-requisite or Prerequisite GEOLOGY 220. Semester offered: Fall and Winter

2 hrs

[back to top](#)

GEOLOGY 230 Historical Geology

An interpretation of the biological and physical history of the earth. Three hours lecture, discussion and two hours laboratory a week. Field trips. Prerequisites: GEOLOGY 220 or permission of instructor Offered: On demand

4 hrs

[back to top](#)

GEOLOGY 250 Field Methods In Earth And Environmental Science

This course will provide students with an introductory, inquiry-based learning experience that focuses on the application of field methods for understanding surface and subsurface earth processes and environmental issues. Students will collect field data at off-campus sites, conduct periodic monitoring, and analyze samples using departmental instrumentation. Students will work on collaborative projects and will present their results. Class will meet once a week for three hours. Prerequisite: GEOLOGY 101 and GEOLOGY 101L or ENV-SCI 111 and ENV-SCI 111L. GEOLOGY 220 and GEOLOGY 220L or ENV-SCI 110R and ENV-SCI 110L Offered: Fall

3 hrs

[back to top](#)

GEOLOGY 251 Field Methods in Earth and Environmental Science: Off-Campus

This course will provide students with an introductory, inquiry-based learning experience that focuses on the application of field methods for understanding surface and subsurface earth processes and environmental issues. Students will collect field data at off-campus sites, conduct periodic monitoring, and analyze samples using departmental Instrumentation. Students will work on collaborative projects and will present their results. Class will meet at an off campus location during break (added cost) plus have four on campus meetings. Prerequisites: GEOLOGY 220 and GEOLOGY 220L or ENV-SCI 110R and ENV-SCI 110L

3 hrs

[back to top](#)

GEOLOGY 302 Environmental Geology

An introduction to the role and scope of geological processes in the light of contemporary urban society. Lecture and discussion periods include topics such as air and water pollution, earth movements, waste disposal, mineral, energy and water resources, construction engineering, and effects caused by human activities. Three hours lecture, discussion per week. Semester offered: Fall and Winter

3 hrs

[back to top](#)

GEOLOGY 312 Mineralogy

Introduction to crystallography, mineral chemistry and the systematic classification and identification of minerals. Prerequisites: GEOLOGY 220 and CHEM 212R. Three hour lecture and discussion with two hours laboratory a week. Fall.

4 hrs

[back to top](#)

GEOLOGY 313 Evolution And The Geologic Record

An introduction to the history of life by studying the geologic record. Students will examine major features of the fossil record including: invertebrates, vertebrates, and plants. Students explore what the fossil record tells us about geologic time, evolution, past environments and distributions of organisms. Three hours of lecture and two hours of laboratory a week. The course will include field trips to collect and interpret fossils and paleoenvironments. Prerequisites: None Offered: Winter

4 hrs

[back to top](#)

GEOLOGY 314 Principles Of Geomorphology

Explores the processes that shape the earth's surface. Focuses on the development and description of fluvial, glacial, eolian, and coastal landforms. Studies the influence of tectonic and climatic factors. Three hours lecture and two hours lab per week. Field trip. Prerequisite(s): ENV-SCI 110R; or GEOLOGY 220; Offered: On demand.

4 hrs

[back to top](#)

GEOLOGY 325 Sedimentology/Stratigraphy

Study of sedimentary rocks with special emphasis given to hand specimen identification based on mineral composition and textural features. Characteristics of sediments, transportation and environment of sediment deposition. Principles of stratigraphy, facies analysis and interpretation. Measurement and description of stratified rocks. Three hours lecture and two hours lab per week. Field trips. Prerequisite: GEOLOGY 220 Offered: Fall

4 hrs

[back to top](#)

GEOLOGY 326 CZ Cc:Archaeology Of Ancient Disasters

Remarkable human achievements are revealed by archaeological research, but the human past was frequently shaped as well by disasters of natural and human origin. Drawing on case studies that include data from the geosciences, archaeological excavations, and historical sources, this class examines how earth processes, the biosphere, and human cultural behavior were all sources of catastrophe. We begin with the geological context of disaster, including earthquakes, volcanic eruptions, climate change, and soil depletion. Next, we examine how ancient societies responded to disease, an ever present threat from the biological environment. Finally, we look at how ancient human groups were changed by stresses of cultural origin, including overpopulation, depletion of vital resources, and warfare. The study of ancient disasters not only gives us a wider understanding of human history, it may offer lessons for coping with future catastrophes. Also cross listed as CLASSICS 300CZ. Offered: Winter Semester

3 hrs

[back to top](#)

GEOLOGY 335 Introduction To Waste Management

Overview of issues in waste management. Nature and classification of waste. Municipal solid waste: disposal methods, design, construction and maintenance of sanitary landfills. Nature and sources of hazardous waste, storage, transportation, treatment and disposal of hazardous waste. Types and sources of nuclear waste; disposal of high level and low level nuclear wastes. Sources, nature, handling and disposal of biologic waste. Pollution prevention, recycling and resource conservation. Prerequisites: ENV-SCI110R, GEOG 150, GEOLOGY 220 or instructor's permission. Offered: On demand

3 hrs

[back to top](#)

GEOLOGY 342 Igneous And Metamorphic Petrology

Introduction to the principles governing the classification, occurrence and origins of igneous and metamorphic rocks. Prerequisite: GEOLOGY 312. Three hours lecture and discussion with two hours laboratory a week. Winter.

4 hrs

[back to top](#)

GEOLOGY 342 R Electrical Methods In Near Surface Geophysics

Fundamental theory and near-surface applications of the 'electrical' geophysical methods; (1) electrical resistivity, (2) electromagnetics, (3) ground penetrating radar, and (4) induced polarization. Emphasis will be placed on the use of these methods in environmental and engineering investigations, addressing such issues as water resources, contaminant transport, geotechnical properties and archaeological protection. Course will include a field component illustrating application of selected technique to a local environmental problem. Prerequisites: Permission of Instructor Offered: On demand

3 hrs

[back to top](#)

GEOLOGY 350 Earth Structures And Tectonics

This course is designed to teach students the basic techniques and approaches for problem solving in structural geology. The course will cover the fundamentals of crustal deformation and discuss joints, faulted and folded rocks in their plate tectonic context. Two hours of lectures and three hours of laboratory a week. Course will include local field trips and one weekend field trip. Prerequisite: GEOLOGY 220, PHYSICS 210 or PHYSICS 240. Offered: Winter

4 hrs

[back to top](#)

GEOLOGY 370 R Hydrogeology

Geology and hydrologic factors controlling the occurrence, movement, quality, recovery and development of water supply and distribution. Problems relating to urbanization of flood plains. Prerequisites: Permission of instructor

3 hrs

[back to top](#)

GEOLOGY 398 Geology Midcontinent Field Trip

A study of a selected area of the midcontinent U.S. with emphasis on locations to be visited during a three-day field trip (at the student's expense). An opportunity to observe and study physical features and collect materials. Several scheduled one-hour meetings in addition to field trip. Lectures, discussion and reading assignments provide a background to place the area covered by the field trip into the overall geologic framework of the Midcontinent U.S. Descriptive report or written examination. Limited enrollment. Prerequisite: Junior or senior level. Fall.

1 hr

[back to top](#)

GEOLOGY 404 Fluid Transport in Geologic Media

This course examines the processes governing the fate and transport of solutes and contaminants in the subsurface environment. This course will provide computational modeling skills, laboratory tests, and case studies of subsurface transport. Three hours lecture, discussion and laboratory a week. Prerequisites: Hydrogeology or permission of instructor.

3 hrs

[back to top](#)

GEOLOGY 407 Public Archaeology: Issues in Archeological Resources

This class examines contemporary issues managing archaeological resources. This class is intended for students seeking work in Cultural Resources Management (CRM); those already working CRM, or student anthropology, environmental studies, geology, geography, public administration and other fields likely to deal with archaeological and historical resources in a research or employment setting. This class does not require a background in archaeology.

3 hrs

[back to top](#)

GEOLOGY 408 Archaeological Field Survey Methods

This class offers instruction in the basic skills required to conduct field surveys in archaeology and other geosciences disciplines. In the classroom, students learn about the development of archaeology as a scientific discipline and how to recognize some of the basic field data sought by archaeologists. Students learn about mapping and land navigation techniques. The field phase of instruction includes visits to archaeological sites in the region.

3 hrs

[back to top](#)

GEOLOGY 409 Field School in Archaeology

This class offers students an opportunity to attend a field school in archaeology. Students will be taught how to: design archaeological research, set-up excavation, keep a wide range of excavation records, make maps and drawings, take photographs related to excavation problems, identify and receive a broad spectrum of artifact and faunal remains, collect samples for specialized analysis and use a wide range of excavation tools. This course will also introduce students to recording and analyzing excavated materials in the archaeological laboratory. Prerequisite: Consent of the instructor. Restrictions: Class size limited to 20 students.

1-5 hrs

[back to top](#)

GEOLOGY 411 Mineral Deposits

Distribution, origin and environmental implications of extractable resources including non-metallic deposits, ores, and selected energy resources. Prerequisite: Instructor's permission Offered: On Demand

3 hrs

[back to top](#)

GEOLOGY 412 Geology And Hazardous Waste Management

Nature sources and characterization of hazardous waste; collection, transportation and disposal of hazardous wastes. Fundamentals of toxicology and risk assessment. Application of geologic principles and methods in the assessments and remediation of abandoned hazardous waste sites and contaminated aquifers. Review of selected case histories. Experts from government and private organizations will be invited to deliver guest lectures. An out-of-town field trip to a hazardous waste site is required. Prerequisites: GEOLOGY 325, GEOLOGY 342, and GEOLOGY 350 or permission of the instructor.

3 hrs

[back to top](#)

GEOLOGY 417 Special Topics

Individual research and study of a selected topic in geology or earth science. Prerequisites: Approval of instructor and departmental sanction. On demand.

1-3 hrs

[back to top](#)

GEOLOGY 417 A Special Topics: Common Rocks, Minerals & Fossils Of The K C Area

1-3 hrs

[back to top](#)

GEOLOGY 417 C Special Topics

1-3 hrs

[back to top](#)

GEOLOGY 425 Engineering Geology

Review of engineering properties of rock and soils. Evaluation of geologic materials for civil engineering construction projects. Techniques of engineering geologic investigations; special problems in urban areas. Data evaluation, analyses, and preparation of engineering geologic reports. Application of geologic factors in design and construction of dams, tunnels, power plants, highways and waste disposal facilities. Review of engineering geologic case histories. A field trip is required. Prerequisite: GEOLOGY 325, GEOLOGY 342, and GEOLOGY 350, and permission of instructor. On demand.

3 hrs

[back to top](#)

GEOLOGY 434 Hazardous Waste Operations Management

Overview of federal regulations dealing with hazardous waste management, toxicology, hazard communication, site management, air monitoring, operating procedures, and health and safety. The course includes hands-on training on spill control, equipment use and emergency response. Practical training involves physical stress and participants must be in good physical health. This course satisfies OSHA's 40 hour training requirement for hazardous waste personnel. Prerequisite: Permission of instructor Offered: On demand

2 hrs

[back to top](#)

GEOLOGY 435 Hazardous Waste Operation Management

Review of federal regulations governing hazardous waste management, operations procedures, and health and safety issues. Hands-on training on spill control, equipment use, and emergency response will be included. The course satisfies OSHA's 40-hour training requirement for hazardous waste personnel. Practical training involves physical stress and participants must be in good health. Prerequisites: GEOLOGY 302, GEOLOGY / GEOG 335, GEOLOGY 412 or permission of instructor Restrictions: Must be in good health to withstand physical stress during training Offered: Winter

2 hrs

[back to top](#)

GEOLOGY 441 Environmental Geophysics

Fundamental theory and near-surface applications of the geophysical methods; (1) seismic refraction, (2) seismic reflection, (3) gravity, and (4) magnetics. Emphasis will be placed on the use of these methods in environmental and engineering investigations, addressing such issues as water resources, contaminant transport, geotechnical properties and archaeological protection. Course will include a field component illustrating application of selected techniques to local environmental problem. Prerequisites: Permission of instructor Offered: On demand

3 hrs

[back to top](#)

GEOLOGY 442 R Optical Crystallography

Theory and practical application of polarized light microscopy in the identification and characterization of crystalline and non-crystalline materials. Special emphasis is given to use of refractive index oils and thin sections. Two hours of lecture and discussion, one 2-hour lab per week. Prerequisite: GEOLOGY 312, Mineralogy or consent of instructor Offered: Winter bi-annually

3 hrs

[back to top](#)

GEOLOGY 451 Geology's Role In Land Use Planning

Examination of principles and techniques of geology as related to land use planning. Lecture and discussion periods devoted to topics such as physical features of soils in an urban setting, geophysical surveying, photo interpretation, engineering geology, mineral and water resources, and multiple-tier planning. Lecture, discussion and laboratory. Prerequisite: GEOLOGY 220 or ENV-SCI 110R Offered: On demand.

3 hrs

[back to top](#)

GEOLOGY 460 Introduction To Geochemistry

Basic principles governing the origin, distribution and migration of the elements and the geochemical cycles operating in the earth's atmosphere, hydrosphere and lithosphere. Prerequisite: GEOLOGY 312, CHEM 212. On demand.

3 hrs

[back to top](#)

GEOLOGY 471 Tectonics

A detailed inquiry into plate tectonics and the geophysical and geological data that define the motion of lithospheric plates. Global examples of divergent, convergent, and transform plate boundaries will be studied through lectures, discussions, problem sets, and term papers. Prerequisite: GEOLOGY 325 and GEOLOGY 350. Offered: On demand.

3 hrs

[back to top](#)

GEOLOGY 472 Earthquake Geology

A detailed inquiry into the study of present and past earthquakes as they are preserved in the seismological, geophysical, and geologic record. Global examples of earthquakes will be studied through lectures, discussions, problem sets, term papers, field trips and field projects.

3 hrs

[back to top](#)

GEOLOGY 490 Geology Field Camp

Study and practical involvement in the methods of geological mapping. The six-week course is conducted during the summer, partially in a field camp away from the Kansas City area. Students pay their own travel expenses to and from the field. Participation in the course involves individual mapping in the field area and field reports. Prerequisite: Permission of instructor. Summer.

6 hrs

[back to top](#)

GEOLOGY 496 Geology Internship

Students gain directed practical experience working with non-profits, governments, or private enterprises. Duties will vary based on contractual agreement between the student, host organization, and the professor. Students should have junior standing or higher, or the instructor's permission. Prerequisites: Permission of Instructor. Offered: Summer, Fall or Winter as available

1-6 hrs

[back to top](#)

GEOLOGY 498 Undergraduate Field Research

The student will collaborate with fellow students and instructors in collection of original field geologic data at a location remote from campus. Field research will be carried out during semester intersessions or summer semesters. Prerequisite: Permission of instructor Semester offered: On demand

1-5 hrs

[back to top](#)

GEOLOGY 499 WI Geology Seminar

Students participate in discussions; present formal talks; and prepare written papers on selected topics. Prerequisite: Senior standing and successful completion of the WEPT Offered: Winter

3 hrs

[back to top](#)

GEOLOGY H434 Hazardous Waste Operations Management

Overview of federal regulations dealing with hazardous waste management, toxicology, hazard communication, site management, air monitoring, operating procedures, and health and safety. The course includes hands-on training on spill control, equipment use and emergency response. Practical training involves physical stress and participants must be in good physical health. This course satisfies OSHA's 40 hour training requirement for hazardous waste personnel. Prerequisite: Permission of instructor Offered: On demand

[back to top](#)

German

GERMAN 110 Elementary German I

The goals of this course are an ability to speak and to understand simple (spoken) German as well as to read and write simple prose.

5 hrs

[back to top](#)

GERMAN 111 Introduction To Business German I

The goals of this course are the development of essential language skills in order to communicate effectively in basic situations.

5 hrs

[back to top](#)

GERMAN 120 Elementary German II

Continuation of GERMAN 110. Prerequisite(s): GERMAN 110 or equivalent.

5 hrs

[back to top](#)

GERMAN 121 Introduction To Business German II

GERMAN 121 (5 Credits): Continuation of GERMAN 111. Every Semester. Prerequisites: GERMAN 110 or GERMAN 111 or equivalent. Offered: Winter.

5 hrs

[back to top](#)

GERMAN 211 Second-Year German I

Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language. Prerequisite: GERMAN 120. Fall.

3 hrs

[back to top](#)

GERMAN 221 Second-Year German II

Continuation of GERMAN 211. Every winter.

3 hrs

[back to top](#)

GERMAN 250 Commercial German

Business practices and correspondence in the German language; special vocabulary of business, trade, banking and administration. Refinement of grammatical and stylistic skills. Subjects treated include price inquiries, quotations, offers, orders, complaints, administrative, banking and diplomatic correspondence. Prerequisite: GERMAN 221 or equivalent.

3 hrs

[back to top](#)

GERMAN 280 Special Intermediate German Topics I

Instruction of German on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit. Prerequisite: Elementary I and II college-level courses or equivalent. As needed.

2-4 hrs

[back to top](#)

GERMAN 290 Special Intermediate German Topics II

Continuation of GERMAN 280. May not be repeated for credit. As needed.

2-4 hrs

[back to top](#)

GERMAN 301 Introduction To Literary Studies

An introduction to the study of the different genres of German literature and techniques of criticism. Readings include representative works of major authors from various periods. Strongly recommended for all majors. To be taken before or concurrently with other literature courses. Even numbered years, fall.

3 hrs

[back to top](#)

GERMAN 305 Current Events In Germany

This course focuses on contemporary issues in Germany such as politics, the economy, foreign affairs, culture, science, education, etc. Various television news programs, news magazines, and newspapers will be the primary sources of information in this course. Prerequisites: GERMAN 221 or equivalent.

3 hrs

[back to top](#)

GERMAN 306 Aspects Of Contemporary German Culture (Conducted In German)

The goal of the course is to familiarize the student with various aspects of contemporary culture in the German-speaking countries (Germany, Switzerland, Austria). The class will be structured around lectures, guest lectures, audiovisual presentations and discussions, emphasizing crosscultural comparisons.

3 hrs

[back to top](#)

GERMAN 307 From The Middle Ages To The Baroque

The goal of this course is to introduce students to the history of German literature from the Middle Ages to the Baroque, emphasizing the historical and social context and the development of various genres. Prerequisite: GERMAN 221 or equivalent . Offered: On Demand.

3 hrs

[back to top](#)

GERMAN 308 From The Enlightenment Through The 19Th Century

The goal of this course is to introduce students to the history of German literature from the Enlightenment through the 19th century, emphasizing the historical and social context and the developemtn of various genres. Prerequisite: GERMAN 221 or equivalent. Offered: On demand.

3 hrs

[back to top](#)

GERMAN 310 Classical Period Of German Literature

Readings in the late 18th and 19th centuries with emphasis on Goethe and Schiller.

3 hrs

[back to top](#)

GERMAN 315 Intermediate Conversation And Composition I

Practice in speaking and writing German; emphasis on idiomatic usage. Required for major. Prerequisite: GERMAN 221 or equivalent. Every fall.

3 hrs

[back to top](#)

GERMAN 325 Intermediate Conversation And Composition II

Continuation of GERMAN 315. Required for major. Prerequisite: GERMAN 315. Every winter.

3 hrs

GERMAN 340 Society And Literature In 20Th-Century Germany

Conducted in English with English translations. Literary currents and figures in 20th-century Germany against their social and political background, from the turn of the century to the postwar period. Reading and discussion of major works by such authors as Thomas Mann, Hesse, Kafka, Rilke, Brecht, Boll, Grass, Hochhuth and Weiss. Open to students of all disciplines. (Not for major credit in German).

3 hrs

[back to top](#)

GERMAN 341 Survey Of German Film 1920-1980

Introduces students to the important contributions of German films to the development of movies as a unique literary art form. The class will cover important terms and concepts in film theory, the specifically German context of film, and important themes and periods in German film history. Taught in English with subtitled films.

3 hrs

[back to top](#)

GERMAN 342 Contemporary German Film 1980-

This course will introduce students to the important role film has played in the public discourse about German society immediately prior to reunification in the 1980's and during the turbulent social adjustments in unified Germany after 1990. Lectures and readings in the first week will cover important terms and concepts in film theory as well as provide background for the specific German context of film history. The class will treat film in the 1980's in terms of continuations of and liberations from the New German Cinema of the 1970's in West Germany, and in the context of state censorship and sponsorship of film in East Germany. We will approach movies from the 1990s and 2000's by accessing their depiction of historical and contemporary Germany through the lens of reunification, and we will examine issues of German identity especially as contextualized by reunification and multiculturalism. The course will be taught in English with subtitled films. Prerequisite: GERMAN 315 for German majors/minors

3 hrs

[back to top](#)

GERMAN 345 The Antifascist Tradition In Germany

This course examines the political and cultural roots of German fascism. It then discusses varieties of resistance to fascism as exemplified in works of fiction, drama, poetry and auto-biography, as well as in music and the visual arts.

3 hrs

[back to top](#)

GERMAN 400 Rainer Maria Rilke

The course examines the works of the Austrian poet Rainer Maria Rilke, emphasizing close readings of texts in their historical, cultural, biographical and psychological contexts. It examines Rilke both as a representative of his epoch, and as the poet who revolutionized German poetic language.

3 hrs

[back to top](#)

GERMAN 401 Bertolt Brecht

Covers major works by Brecht in their social and historical context. May focus on a specific genre or survey parts or all of Brecht's career. Discussions and readings in German. Prerequisite: GERMAN 315 or instructor's permission. Offered: On Demand

3 hrs

[back to top](#)

GERMAN 410 Music in German Culture

This course examines the role of music in German national self-definition from late 18th century to the present. The political and ideological role of music will be examined from 1789 to National Socialism, the GDR and reunification, including the gendering of music as feminine in Romanticism, and modernism. Music as it relates to the public and private, as well as collective and individual experiences will also be explored. Different genres and media will be discussed, from opera, art song, and cabaret to ballads and film; literary works thematizing music will be read. Prerequisites: GERMAN 315 or instructor's permission

3 hrs

[back to top](#)

GERMAN 410 A Music in German Culture

This course examines the role of music in German national self-definition from late 18th century to the present. The political and ideological role of music will be examined from 1789 to National Socialism, the GDR and reunification, including the gendering of music as feminine in Romanticism, and modernism. Music as it relates to the public and private, as well as collective and individual experiences will also be explored. Different genres and media will be discussed, from opera, art song, and cabaret to ballads and film; literary works thematizing music will be read. All works available in English: no German required.

HISTORY 101 American History To 1877

This course covers the evolution of American civilization from its colonial beginnings to Reconstruction. It is not a prerequisite for 102. Fall, winter, summer.

3 hrs

[back to top](#)

HISTORY 102 American History Since 1877

This covers American history from the end of Reconstruction to the present. HISTORY 101 is not a prerequisite for this course. Fall, winter, summer.

3 hrs

[back to top](#)

HISTORY 201 Western Civilization To 1600

This course surveys the political, social and cultural history of Europe from ancient times to 1600. Beginning with a brief description of the riverine civilizations of the ancient Near East, the course then examines the political and cultural evolution of classical Greco-Roman civilization, the medieval world, the rise of the national state, and the essential characteristics of the eras of the Renaissance and Reformation. Fall, Summer, Winter.

3 hrs

[back to top](#)

HISTORY 202 Western Civilization Since 1600

This course surveys the political, economic, social, intellectual, and cultural history of Europe from about 1600 to the present, through these major developments in those centuries: the origins of the modern sovereign state (absolutist and constitutional), the English revolutions; the European Enlightenment, the French Revolution, and Napoleonic Europe; Romanticism and Scientism in culture and thought, the Industrial Revolution and urban society, and nationalism and imperialism; the two world wars, the Russian Revolution, dictators and totalitarian states, and the current postwar world and culture. Fall, Summer, Winter.

3 hrs

[back to top](#)

HISTORY 206 World History To 1600

This course is a comparative history of the civilizations of the world from prehistory to the seventeenth century. From a global perspective, this course explores themes relevant to social, political, and cultural history, such as science and technology, women and social classes, religion, politics, and education. Images of art and examples of primary sources enrich the lectures and readings.

3 hrs

[back to top](#)

HISTORY 208 World Civilization Since 1600

This course surveys the social, economic, political and institutional history of the world from the 17th century to the present. It is designed to foster deeper understanding of the continuity between past and present and of the interdependence among nations in contemporary times.

3 hrs

HISTORY 302 America,1000-1763:The Formative Era

Early American history encompasses the formative era of many institutions and attitudes which still persist in technetronic, post-modern America. A study of how these patterns and policies emerged will enlighten us as to our current ways society seeks to adapt to change. Semester offered: On demand

3 hrs

[back to top](#)

HISTORY 303 America, 1763-1783: The Revolutionary Heritage

The American Revolution created American history by creating a new nation. What the American Revolution was depends to a large extent upon what Americans think they are or ought to be. The goals of this course, therefore, are twofold: (1) to probe the nature, causes and consequences of the American Revolution; (2) to assess the intentions and behavior of both the Framers in 1763-1783 and of the inheritors of modern America. Also offered as HISTORY 503. Semester offered: On demand

3 hrs

[back to top](#)

HISTORY 304 America, 1783-1828: The National Experience

The two major threads of this course are the formation and implementation of the Constitution and the cultural adolescence of the new nation. Topics considered include the political bequest of the framers' generation, the growing pains of territorial expansion and industrialism, the paradoxical development of regionalism and nationalism. Also offered as HISTORY 504.

3 hrs

[back to top](#)

HISTORY 305 America, 1828-1852: The Jacksonian Period

An analysis of the political, social, economic, and intellectual factors in American society, 1828-1852. The period featured the presidency of Andrew Jackson, the shaping of a new democratic ideology, the culmination of manifest destiny, the quickening of the antislavery impulse, the Mexican War, the growing sectional split, and the Compromise of 1850. Also offered as HISTORY 505.

3 hrs

[back to top](#)

HISTORY 306 America, 1850-1877: Civil War And Reconstruction

A survey of the political, social and economic factors leading to the dissolution of the federal union is followed by a consideration of the major features and developments of the war period. This, in turn, leads to an analysis of the major factors and relationships involved in the "reconstruction" of the federal union. The course covers the years 1850 to 1877. Also offered as HISTORY 506.

3 hrs

[back to top](#)

HISTORY 306 A History of Christianity to the Middle Ages

This course examines the historical and theological development of Christianity from its origins to the High Middle Ages. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major social, institutional, and intellectual force with a focus on patterns of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship. Cross listed as Religious Studies 306

3 hrs

[back to top](#)

HISTORY 307 America 1877-1917: Development Of Industrial America

This course deals with the reactions of different groups of Americans to the industrialization and urbanization of the United States from 1877 to 1917, using concepts associated with modernization upon the behavior of the business community, farmers, laborers, immigrants, professionals and major ethno-cultural groupings. Other contemporary proposals for the adjustment to industrialism are explained as well as the programs which each group eventually used to adjust to modern society. Also offered as HISTORY 507.

3 hrs

[back to top](#)

HISTORY 307 A History of Christianity from the Middles Ages to Present

This course examines the historical and theological development of Christianity from the High Middle Ages to the present. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major social, institutional, and intellectual force with a focus on patterns of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship. cross-listed as Religious Studies 307

3 hrs

[back to top](#)

HISTORY 308 A America: 1914-1945: The Era Of The World Wars

This course examines United States social, intellectual, economic, political and diplomatic history from the beginning of World War I to the end of World War II. Special emphasis is placed on the coexistence of realism and idealism in American foreign policy, the evolution of power shifts within the American federal system, and the causes and consequences of rapid urban growth and increased industrial sophistication. Students examine the material and social texture of life during the two world wars, the so-called "roaring 20s", and the Great Depression through contemporary art forms (especially novels) and historical monographs.

3 hrs

[back to top](#)

HISTORY 308 B America: 1945-Present: Our Times

This course examines United States social, intellectual, economic, political, and diplomatic history from the end of World War II to the present. Given our focus on the recent past, special emphasis is placed upon the importance of the historical perspective to an understanding of contemporary affairs. Major themes include: America's rise to the world power, the development of the Keynesian welfare state, the concentration of corporate wealth and power, the persistence of poverty amidst plenty, and the changing status of American minority groups.

3 hrs

[back to top](#)

HISTORY 310 WI History Of Modern Computing

This is a writing-intensive introduction to the history of modern computing. After an introduction to historical writing, the course surveys the history of electronic computing, covering both technological changes and their social and economic context. Student efforts then will be focused on individual research leading to the writing of a paper on a topic in this field selected with the approval of the instructor. Students will carry out a series of written assignments in order to learn how to do historical research and to improve one's reading, writing, and analytical skills. Prerequisite: WEPT Restrictions: Must have passed the WEPT Offered: WS2004

3 hrs

[back to top](#)

HISTORY 333 Introduction to African American Studies

This course provides an introduction to the contexts, theories, and methodologies that undergird African American studies. In addition to substantial time spent covering particular research skills and resources, students will also be introduced to African American culture and the issues related to African American studies from several perspectives: history, literature, sociology, communication studies, and the like. Influences and perspectives from Africa, the Caribbean and South America will also be covered. The course will thus provide a broad background in African American culture and history, an introduction to the methodologies of several disciplines, and discussion of particular contemporary and historical issues such as slavery, segregation and integration, the Civil Rights Movement, Pan-Africanism, Afrocentrism, and current political debates.

3 hrs

[back to top](#)

HISTORY 352 Latin American History Through the Movies

This course explores the national cinemas and film industries of various regions in Latin America. Students analyze films both as artistic endeavors and as sociological documents that provide a window into the socio-historical context of the nation in question. This course will also examine the history of Latin American cinema from the beginnings of sound to the present.

3 hrs

[back to top](#)

HISTORY 353 Immigrants And Immigration In American History

This course surveys the effects of immigration on the social, intellectual and economic development of the United States. As well, it treats the fate of immigrant groups. Attention is given to the forces affecting assimilation, ethnic identity, mobility and discrimination. In some semesters particular emphasis is placed on one immigrant group, one time period, or the immigrant groups of Kansas City. Also offered as HISTORY 553.

3 hrs

[back to top](#)

HISTORY 354 R Women In Modern America

This course traces the part women have played in the processes of industrialization and urbanization. It looks at the general demographic, economic and social changes affecting women of all classes, as well as the role of middle-class women in the progressive, prohibition and suffrage movements. The course will also study the impact of the two world wars and the Depression upon the roles of women. Also offered as HISTORY 554.

3 hrs

[back to top](#)

HISTORY 355 A Indians Of South America And The European Invasion

Origins and Latin America. Consideration of the origins of Indian culture throughout the entire Western hemisphere is followed by an analysis of the great Native American civilizations of Mexico, Central America and the Andes; Indian reactions to the Spanish and Portuguese invaders; and the present situation of Latin American Indians. Also offered as HISTORY 555A.

3 hrs

[back to top](#)

HISTORY 355 BA Indians Of North America To 1789

The history of the native peoples of North America from their origins to the era of the American Revolution. Prerequisite: None. Offered: Fall.

3 hrs

[back to top](#)

HISTORY 355 BB Indians Of North America Since 1789

The history of the native people of North America (Indians and Inuit) and their interaction with the European invaders since 1789. This course is the sequel to HISTORY 355BA, Indians of North America to 1789. Prerequisite: None. Offered: Winter.

3 hrs

[back to top](#)

HISTORY 356 Rise Of The City In The U.S.

This course treats the background and major developments of the urbanization of the United States. Includes the American urban tradition, the scope of urbanization, colonial beginnings, urban rivalries, promotion, case studies of cities, the growth of urban services, the slum, problems of government, population trends, urban planning, and suburban growth.

Consideration is also given to the methods and techniques of urban research and history of the development of this field. Also offered as HISTORY 556.

3 hrs

[back to top](#)

HISTORY 356 R Kansas City: History Of A Regional Metropolis

This course uses Kansas City as an urban laboratory to help students better understand the dynamics of the urbanization process in America. It features lectures and discussions on such subjects as early settlement patterns, the battle for the first bridge over the Missouri River, the development of an economy based on agricultural pursuits, the City Beautiful Movement, the social fabric, the Pendergast Machine, and the impact of World War II and after. The course fits Kansas City into the larger framework of the American urban mosaic. Also offered as HISTORY 556R.

3 hrs

[back to top](#)

HISTORY 357 The American West

This course deals with the relationship of the American West to the social and economic development of the United States. Major emphasis is placed on the role of the trans-Mississippi West in the economic growth of the national economy. Related cultural and political events are evaluated in the terms of the many Western frontiers. Emphasis will be placed on the Turner thesis, the Indian heritage, frontier violence, and the cow town experience. Also offered as HISTORY 557.

3 hrs

[back to top](#)

HISTORY 360 R Constitutional History Of The United States

The general question covered is: how does American society govern itself? Topics include the fusion of Anglo traditions and American environment, creation of the American republic under the Constitution of 1787, the struggle for sovereignty during the Marshall-Taney era, and the Supreme Court's utilization of the 14th Amendment to adapt the Constitution to modernity. Also offered as HISTORY 560R.

3 hrs

[back to top](#)

HISTORY 361 American Foreign Relations

Following a rapid survey of major principles and actions in American diplomatic affairs before 1900, this course analyzes developing principles, problems, methods and factors in American foreign relations since that date. Attention is given to the interrelationships of domestic factors and foreign relations with an attempt to discover principal influences that have shaped this area of American development. Also offered as HISTORY 561R.

3 hrs

[back to top](#)

HISTORY 364 R Nature, Culture And The Human Experience

This course is an introduction to various interpretations of nature with a focus on American culture and society. We will consider ideas about nature from diverse perspectives including history, literature, philosophy and religion-in order to understand how human perceptions and uses shape relations with the natural world. Specific themes include such diverse topics as the aesthetic tradition, environmental thought, and environmental justice.

3 hrs

[back to top](#)

HISTORY 365 A American Environmental History

This course examines the changing relationships between human beings and the natural world through time. The main argument of this course will be that American History looks very different through an environmental lens. Nature is an important category of historical analysis-as well as a topic worthy of historical study itself-and this course will examine themes as diverse as Native American ecology to the modern environment crusade.

3 hrs

[back to top](#)

HISTORY 366 RR American Labor History

This course examines the history of work and the working class in the U.S. from 1750 to the present. We will focus on the transformation of the workplace, the rise of the union movement, the nature of cultural and political organizations, workers' relationships with other social groups, and the role played by gender, race, and ethnicity in uniting or dividing the working class. Also offered as HISTORY 566RR.

3 hrs

[back to top](#)

HISTORY 368 Children and Youth in American History

This course-which brings a gendered perspective to the history of childhood and the study of youth-focuses on the changing construction of girlhood and boyhood from precontact to the present. We will examine the variety of forces that have scripted the lives of children and adolescents and explore the active role they have played in shaping their lives and American culture. We will make use of the scholarly literature on childhood and youth as well as examine such primary sources as childbearing manuals, laws, literature, cartoons, and toys as material culture. Semester offered: On demand

3 hrs

[back to top](#)

HISTORY 369 Women And Work In Early America

Drawing upon more than two decades of outstanding scholarship that places women and gender at the center of investigation and interpretation, this course focuses on the ways in which gender, race, region and class have shaped the historical experiences of women in north America. We will trace the lives of American women from precontact to 1865 through an examination of a wide variety of social, cultural, economic, and political forces and factors including work and leisure, family life, political activities and organizations, and education Semester offered: On demand

3 hrs

[back to top](#)

HISTORY 370 Introduction To Material Culture

This course will consider the ways in which material culture contributes to our understanding of history. Scholars have increasingly recognized the significance of "the things they left behind," particularly as they provide insights to the lives of those who did not leave extensive written records. Students will consider all aspects of material culture, drawing largely on examples from American history: architecture , domestic utensils and furnishings, clothing, tools, and good agricultural practices. The courses will emphasize the process of handicraft technology as well as the product, and will consider the impact of modernization upon both process and product. Also offered as HISTORY 570.

3 hrs

[back to top](#)

HISTORY 391 Archival Methods

This combined discussion and research course will examine the research potential of primary-source materials in the custody of archival depositories and the methodology employed to utilize effectively these resources. An analysis of archival method, specifically in the areas of arrangement, description and preservation, will be emphasized during the discussion portion of the course. Most of the course will be devoted to independent research in various collections of the Regional Archives of the Kansas City Federal Records Center. The course will meet at such places as the Federal Records Center, 2306 Bannister Road, or the Truman Library for both the discussion and research segments. Also offered as HISTORY 591. Summer.

3 hrs

[back to top](#)

HISTORY 392 A Archival Internship

Students work directly with professional archivists and other personnel at the Kansas City Federal Records Center, the Truman Library, Jackson County Historical Society, and similar facilities in the area. Emphasis will be given to areas of arrangement, description and preservation of archival materials. Each student must make individual arrangements through the department. Also offered as HISTORY 592. Prerequisites: None Offered: Fall, Winter, Summer Restriction: Approval of Department Chair

1-3 hrs

[back to top](#)

HISTORY 392 B Public History Internship

Students work directly with public history and editorial personnel at the Kansas City Museum, the Kansas City Pitch Weekly, the Truman Library, and similar facilities in the area. Depending on the institutional affiliation, emphasis will be given to museum operations and displays, editing, fund-raising, historical research and writing. Each student must make individual arrangements through the department. Also offered as HISTORY 592B. Prerequisites: approval of the department chair.

1-3 hrs

[back to top](#)

HISTORY 393 Museum Studies

This course is designed to acquaint students with specific careers in museums and historical agencies; to introduce students to the wide range of operating issues facing those working in the museum profession on a day-to-day basis; and to familiarize students with the organizations, reference works and resources available to develop the skills and training required for those who choose to make this their profession. Also offered as HISTORY 593. Offered: On demand.

3 hrs

[back to top](#)

HISTORY 394 African American History Before 1877

This course is a survey of the African American experience from Pre-Columbian exploration through reconstruction. The course focuses on the trans-Atlantic slave trade, slavery in the colonies as well as resistance and abolition movements. Prerequisite: None.

3 hrs

[back to top](#)

HISTORY 395 African American History Since 1877

This course is a survey of African Americans in the United States from 1877 to the present. The course explores the post-reconstruction era, civil rights and black nationalistic movements; the concepts of racism, desegregation/integration and separation. Contemporary issues facing a multiracial and pluralistic society are also addressed. Prerequisite: None.

HISTORY 400 Special Studies

Courses on subjects which are not a part of the regular department offering. The courses result from one or more of the following: (1) The expressed desire of students; (2) the broadened or refocused scholarship of a member of the history faculty; (3) the temporary presence of a scholar whose specialization is not reflected in the department's regular offerings; (4) the conclusion by the department that the course meets a community need; (5) the effort of the history faculty to provide an interdisciplinary approach to an era or topic. The course is experimental in the sense that it is a one-time offering with the potential of repetition or modification--depending upon student, faculty and community response. Also offered as HISTORY 500R.

HISTORY 400 CI Cc:Culture,Kultur,Civilisation:Identity Formation In Middle Class

This cluster course will explore the dynamics of bourgeois class formation in Western Europe in the "long" 19th century (1750-1920) from historical, thematic, and theoretical perspectives. It will focus on how this class-based identity developed and functioned in the context of historical and cultural changes and how the bourgeoisie defined themselves vis a vis nobles, peasants, workers, "primitives" and criminals. Class assignments will include historical, literary, theatrical, anthropological, and cinema-graphic sources. Offered: WS 2001

HISTORY 400 CP American Social Film: Silver Screen And The American Dream

This course will combine American social history and American film history. Using Hollywood entertainment films, the course will look at Hollywood as an indicator of social, political, and economic conditions in the U.S. from the early 1900s to the late 1950s. The main topics are war and the threat of war, poverty and affluence, racial tensions, censorship, and political zealotry. A paper is required, and a social history textbook, a film history textbook, a play by Arthur Miller and a collection of articles constitute core readings. This course is offered as a cluster with AMER-ST 300CD, COMM-ST 402CD and ENGLISH 300CD.

HISTORY 400 CR Cc:Roman Revolution:History&Culture From The Gracchi To Augustus

In this course, the period of Roman history from the revolution initiated by the Gracchi to the demise of the Republic and the establishment of the Principate under Augustus will be discussed. Political, social and cultural developments will be traced which culminated in the violent death of the old system and a new government established by Augustus acceptable to the tradition-loving Romans. The events will be examined through the words of participants such as Terence, Cato, Polybius, Cicero, Caesar, Sallust, Catullus, Horace, Virgil, and Ovid. The disciplines of history and English will be treated together; therefore all sessions will be held in common. Grades will be based upon two examinations and assigned papers using both historical and English perspectives.

HISTORY 406 Modern Latin America

This course studies social, political, economic and cultural trends in Latin America in the nineteenth and twentieth centuries. Discussion topics include nation building after independence with an emphasis on gender and race in the creation of national identities and new forms of social stratification; integration of national economies into the world economic system; the expansion of political participation and citizenship; immigration (national and transnational) and the tensions caused by the forces of modernization and tradition. Although the purpose of the course is to provide a general background for a large and diverse region (more than 20 countries), case studies from Argentina, Mexico and Brazil will illustrate the above-mentioned themes and will provide the basis for a comparative regional perspective.

HISTORY 412 A Medieval Women & Children

This course explores the roles of women in the social, economic, political and cultural environments of medieval and early modern Europe. We examine the lives of women in all areas of life, from the ordinary to the extraordinary, in urban and rural environments, from the centers of religious and political power to the margins of society. Focus will be on the world of work for urban and peasant women and on the social and legal institutions of marriage, kinship and the family. The course makes extensive use of primary sources by and about women during this period.

3 hrs

[back to top](#)

HISTORY 412 B The Black Death And Late Medieval Society

This course examines all aspects of late medieval and early Renaissance society in Western Europe. The Black Death of 1348/1349 serves as the entry point into the historical study of the economy, demography, and culture during this transitional period. Offered: On demand

3 hrs

[back to top](#)

HISTORY 413 Renaissance

Beginning with a definition and exploration of the Renaissance as a period of gradual transition between the Middle Ages and the beginning of modern culture, this course concerns itself primarily with the rise and spread of Humanism; the revival of interest in antiquity; the growth of individualism; and the rise of secularism, as well as with the artistic achievements of the period. Also offered as HISTORY 513.

3 hrs

[back to top](#)

HISTORY 414 Reformation

Beginning with a description and analysis of the social, intellectual and political aspects of the later Middle Ages, the course continues with an examination of those profound religious, social and political changes which mark the 16th century as the end of the Middle Ages and the beginning of the modern secular era. Also offered as HISTORY 514.

3 hrs

[back to top](#)

HISTORY 415 B 17Th And 18Th Century European History

this course is designed to present the upper-division undergraduate with a firm grasp of the major intellectual, cultural, political and economic developments of 17th and 18th century Europe. It considers the bitter Thirty Years War in Central Europe, the rise of the Netherlands, the fall of Italy and Spain, the rise of constitutional and absolutist styles of government, the scientific revolution, the colonization by European of the Pacific and Indian Ocean Basins, Enlightenment political philosophy, the Agricultural Revolution, and the French Revolution. Also offered for graduate students as HISTORY 515.

3 hrs

[back to top](#)

HISTORY 416 R The French Revolution And Napoleon

Narrative history concentrating on the explosive and colorful events and personalities in France, but also showing the European and Western context and impact of the revolution and Napoleon. Illustrated accounts cover such "great days" as the storming of the Bastille, the fall of Robespierre, and Napoleon's Coup of 18 Brumaire, and great battles. Main periods are: the origins of the revolution (economic, social, political, intellectual); revolution and reconstruction (1789-92); through terror to Thermidor (Jacobins and sans-culottes); Napoleon's wars and reconstruction (France and Europe). Cinema, slides and martial music periodically. Discussion of major authors and interpretations. Also offered as HISTORY 516.

3 hrs

[back to top](#)

HISTORY 417 R Nations & Empires: 19th Century Europe

This upper-division course will survey significant trends in warfare, politics, economics, social relations and culture in 19th century Europe, paying particular attention to the rise of modern ideologies and identities, world hegemony, and the social technologies of dehumanization that foreshadowed the unprecedented inhumanities of the 20th century. Also offered for graduate students as HISTORY 5517.

3 hrs

[back to top](#)

HISTORY 418 R The Age of Extremes 20th Century History

This upper-division course traces the history of Europe in the 20th century. It will survey significant trends in warfare, politics, economics, social relations and culture, paying particular attention to the issues of modernity and post modernity, imperialism and decolonization, dehumanization and genocide as well as the role of ordinary people in these systems of mass destruction. Also offered for graduate students as HISTORY 5518.

3 hrs

[back to top](#)

HISTORY 419 R Contemporary Europe: 1930-2000

This upper-division course traces the history of Europe in the period of living memory. It will survey significant trends in warfare, politics, economics, social relations and culture, paying particular attention to the rise of globalization and the condition of postmodernity, decolonization and neocolonization, European unification and everyday life. Also offered for graduate students as HISTORY 5519.

3 hrs

[back to top](#)

HISTORY 420 CC World War I in Film: The World made Modern

This cluster course examines World War I and its legacy through the lenses of international history and film studies. It explores the origins and conduct of the "Great War," as it was called at the time, as well as its transforming effects on the modern international relations and the ongoing process of globalization. It also examines how the war spurred the growth of an infant motion picture industry, and how movies produced during the decades that followed helped shaping popular memories of the conflict-reflecting and shaping cultural discourses regarding the myth or reality of modern civilizational progress; the ethics of modern weaponry; the individual's placed in mass society; constructions of class, race, and gender; and the meaning of national identify in a globalizing world. The class will draw on selected history texts and an array of films and film clips. Cross listed with Comm-St 404CD

3 hrs

[back to top](#)

HISTORY 424 A Colonial And Post Colonial South Asia

South Asian historians have very effectively applied many new approaches to the studies of the past to modern Indian and Sri Lankan history. This course examines topics and debates in this literature as they bear on the methods and practices of the historian. The topics to be investigated include the nature of colonial rule, the nation-state, and ethnicity. Students will be introduced to issues of methodology, periodization and explanation posed by the relationship between colonial and post-colonial South Asia. The case studies will be drawn from twentieth century India and Sri Lanka, but the topics are of relevance to students of other regions and disciplines. Prerequisites: None. Offered. Fall.

3 hrs

[back to top](#)

HISTORY 424 R 20Th Century Asia

A survey of the major states of Asia from the beginning of the century to the present, focusing on resistance to Western imperialism, national independence and problems of economic and social change. Also offered as HISTORY 524.

3 hrs

[back to top](#)

HISTORY 425 R European Criminal Justice History, 500-1900

This course will survey European crime, criminal procedure, policing and punishment between 500 and 1900. Particular attention will be given to changing methods of proof (oaths, ordeals, juries); changing type of criminal activity (banditry, vagrancy, witchcraft, professional theft) and changing penal strategies (the stocks, breaking on the wheel, the workhouse, the prison, the penitentiary). English experiences are emphasized. Also offered as HISTORY 525R.

3 hrs

[back to top](#)

HISTORY 426 R The Scientific Revolution, 1500-1700

An analysis of the intellectual and social currents which culminated in the Scientific Revolution. After presenting the Renaissance world view, the course will examine the influence of humanism, art, religion, and the voyages of discovery on science, as a prelude to understanding the achievements of Galileo, Harvey, Newton, and the scientific societies of the 17th century. Also offered as HISTORY 526R.

3 hrs

[back to top](#)

HISTORY 427 R The Darwinian Revolution, 1650-1900

An inquiry into the intellectual background of Darwin's "Origin of Species." The course will examine 18th- and 19th-century attitudes toward time, species, change, race, the age of the earth, the nature of fossils, creation, and evolution, as background to understanding the achievement of Darwin and the reception of his work. Also offered as HISTORY 5527.

3 hrs

[back to top](#)

HISTORY 428 A History Of The Body

This advanced course will explore the new field of the history of the body, with particular attention to sexuality and gender. Topics will include the history of sexualities, the body and society, body disciplines, medical practices and representations of illness, beauty and fashion, and the relationship between sexualities and nationalisms. Semester offered: On demand

3 hrs

[back to top](#)

HISTORY 428 B Gender & Medicine: Patients & Practitioners From Antiquity To Present

This course explores, in a selective fashion, the role of women in Western medicine both as health care providers and patients. The subject of the history of medicine is too broad to be covered comprehensively in a semester, and so we will focusing on diseases or physical conditions which were believed to be limited to women--childbirth, certain mental health conditions, reproductive health, breast cancer-- as well as the increasing marginalization of women within the profession of health care providers to those branches concerned primarily with "women's problems." Offered: On demand

3 hrs

[back to top](#)

HISTORY 430 RA 'We Are The Dead': The Great War Experience Through its Artifacts

World War One was the "war to end all wars"; all previous wars were indeed eclipsed by its scale of destruction. And yet, it was a war that initiated a century of continual bloodshed and crimes against humanity. This course will explore the causes, nature and consequences of the Great War of 1914-18. It will be taught on different themes each Winter semester at the National World War One Memorial Museum at Liberty Memorial.

3 hrs

[back to top](#)

HISTORY 431 R Medieval England, 1066 To 1485

Beginning with the Norman conquest of England in 1066, this course traces the history of Medieval England through the establishment of the Tudor dynasty. Covered will be such items as the rise of the Angevin Empire, the conflict between monarch & nobility, the evolution of Parliament, as well as the Anglo-French rivalry which culminated in the Hundred Years' War.

3 hrs

[back to top](#)

HISTORY 432 R Tudor England, 1485-1603

This course covers England from the accession of Henry VII, the first Tudor, to the death of Elizabeth I in 1603. Topics to be covered are: transformation of England into a modern state, the Reformation, the role of Parliament, conflicts with European powers, especially Spain, etc. Also offered as HISTORY 5532.

3 hrs

[back to top](#)

HISTORY 433 R History of Britain 1603-1832

This course analyzes the rise and fall of the Stuart dynasty and the effects of civil war, rebellion, and religious turmoil on the peoples of Britain. The domination of politics and culture by the aristocracy in the eighteenth century is examined. The rise of the Navy due to constant warfare and the exploration of the Pacific are discussed. The monarchy of George III, the loss of the American colonies, and the wars with Napoleon are examined. Finally, the Agricultural and early Industrial Revolutions are considered through an analysis of the social changes they brought in Britain and the Empire.

3 hrs

[back to top](#)

HISTORY 434 R History of Britain 1832-Present

This course surveys the history of the British Isles from the industrial revolution to the present day. Topics include Victorian society, the rise of the class system, imperialism, the domestic impact of the two world wars, the reaction to the loss of the Empire, pop culture, and contemporary issues.

3 hrs

[back to top](#)

HISTORY 436 R Modern German History

This course traces the history of Central Europe from the fall of Bismarck to the reunification of Germany one century later. It will ask students to think critically about the relationship between state and society, elites and 'ordinary' Germans, in the various German-speaking regimes that existed over the course of this era: two empires, two interwar republics, two fascist dictatorships, and three post-fascist republics. All assigned readings will be in English; a background knowledge of European history is recommended. This course follows from HISTORY 435 / HISTORY 535: the contents and assignments will be coordinated, but the former course is not a prerequisite for the latter.

3 hrs

[back to top](#)

HISTORY 437 AWI Imperial Germanies, 1848-1918

This course traces the history of German-speaking Central Europe from the Revolutions of 1848 to the collapse of the Hohenzollern and Habsburg empires at the end of World War One. It will ask students to think critically about the relationship between state and society and the role played by 'elite' and 'ordinary' people in shaping German history. This reading and writing intensive course will be run as a seminar. Final grades will be based on a portfolio of assignments of which students will select what they consider to be the best examples of their work. Prerequisites: HISTORY 202, HISTORY 208 or equivalent

3 hrs

[back to top](#)

HISTORY 437 BWI First German Republics, 1917-1935

This course traces the history of the two German Republics during the inter-war years—the First Austrian Republic and the so-called Weimar Republic—from the peace movements of the First World War to the solidification of fascist dictatorships. It will ask students to think critically about the relationship between state and society and the role played by 'elite' and 'ordinary' people in shaping German history. This reading- and writing-intensive course will be run as a seminar. Final grades will be based on a portfolio of assignment of which students will select what they consider to be the best portfolio of assignments of which students will select what they consider to be the best examples of their work. Prerequisites: HISTORY 202, HISTORY 208 or equivalent

3 hrs

[back to top](#)

HISTORY 437 CWI The Third Reich, 1930-1950

This course traces the history of the Third Reich--its origins, nature, and crimes against humanity--from its first electoral successes in the Great Depression to the trials of its leaders for various war crimes. At its center stand the challenging questions of the ethical and historical responsibility for the Holocaust. It will ask students to think critically about the relationship between state and society and the roles played by 'elite' and 'ordinary' people in shaping this tragic era of German and European history. This reading- and writing-intensive course will be run as a seminar. Final grades will be based on a portfolio of assignments of which students will select what they consider to be the best examples of their work. Prerequisites: HISTORY 202, HISTORY 208 or equivalent

3 hrs

[back to top](#)

HISTORY 437 DWI Cold War Germanies, 1941-1991

This course traces the history of the three postwar German Republics-- the Second Austrian Republic, the German Democratic Republic, and the Federal Republic of Germany -- from the initial plans of the Allies for postwar reconstruction to the Reunification of Germany in 1991. It will ask students to think critically about relationship between state and society and the role played by 'elite' and 'ordinary' people in shaping, and in the remembering, of German history. This reading-and writing-intensive course will be run as a seminar. Final grades will be based on a portfolio of assignments of which students will select what they consider to be the best examples of their work. Prerequisites: HISTORY 202, HISTORY 208 or equivalent

3 hrs

[back to top](#)

HISTORY 445 The Ottoman Empire In The Middle East To World War I

The second semester of a three-semester sequence covers the transition from Arab to Turkish hegemony in most of the Middle East as well as the restoration of native Persian dynasties in Iran and their subsequent development. The emphasis is on the rise and decline of the Ottoman Turkish Empire. Attention is given to the Ottoman provinces and to the national movements of subject peoples. The course ends with an overview of World War I and the peace treaties which marked the dissolution of the Ottoman Empire. HISTORY 444R is not a prerequisite. Also offered as HISTORY 545.

3 hrs

[back to top](#)

HISTORY 446 R The Middle East From World War I To The Present

The third semester of a three-semester sequence deals with the emergence of the modern countries of the Middle East after World War I and their history and course of development to the present day. There will be a general survey of the government and politics, economic situation, and social and cultural characteristics of each important country in the area. In addition, special topics will be discussed such as the modernization process, ideological alternatives, relations with the great powers, the economics and politics of oil, and the Arab-Israeli conflict. HISTORY 444R and HISTORY 445 are not prerequisites. Also offered as HISTORY 546.

3 hrs

[back to top](#)

HISTORY 462 J Japanese Civilization

A survey of Japanese civilization and cultural history from the prehistorical period to the present. Emphasis on the interplay between religion, the arts, politics, and social structure.

3 hrs

[back to top](#)

HISTORY 464 Medieval Methods and Paleography

This course examines the methodology and historiography of Medieval Studies. Through an introduction to paleography, the study of medieval handwritings, it prepares students for advanced work in Medieval and Renaissance studies. Using an interdisciplinary approach, this course will examine the historical and cultural settings for medieval texts, their physical form and production, as well as the tradition of textual transmission in the medieval world. In addition to gaining familiarity with the many different types of primary sources, such as literary, artistic, legal, and notarial sources, students will be exposed to methods for practical archival work in various European nations. Prerequisite: First Year Latin or permission from instructor. Offered: On Demand

3 hrs

[back to top](#)

HISTORY 467 Myth And Ritual

"Myth" and "ritual" have long been fundamental categories in the study of religion. This course will briefly survey some of the major theories and approaches to the study of myth and ritual from the Enlightenment to the present. Will not only trace the shifting meanings of "myth" and "ritual," but will critically evaluate the utility of diverse approaches to the study of religious phenomena designated by these terms. Reading will include theoretical works, as well as selected case studies.

3 hrs

[back to top](#)

HISTORY 468 R Archaeology And The History Of Antiquity

This course will analyze the contributions of archaeology to the understanding of ancient history. It will cover archaeological excavations and their pertinence to classical civilization in the Near East and Greece. The techniques and methodology of field archaeologists will be discussed and demonstrated. Archaeological excavations relating to the Hittite capital, to the Ugaritic tablets, to the Minoan-Mycenaean civilization and its link to the Near East will be treated. Also offered as HISTORY 568R.

3 hrs

[back to top](#)

HISTORY 469 Archaeology And Biblical History

An examination of ancient Israel as she emerges from the ruins of the past, both lapidary and literary. Through a study of the "mute documents," artifacts man-made (storied cities, household utensils, inscribed shards from Jericho to Jerusalem) we gain an insight indispensable for Biblical studies, for ancient Near Eastern history. Also offered as HISTORY 569R.

3 hrs

[back to top](#)

HISTORY 470 Ancient Egypt

This course describes the political, social and cultural evolution of ancient Egypt from pre-dynastic times, with major emphasis upon the Old, Middle, and New Kingdoms (especially the 18th dynasty and the reign of Akhenaton). Also offered as HISTORY 570R.

3 hrs

[back to top](#)

HISTORY 471 Ancient Greece

This course begins with a survey of the pre-classical Minoan and Mycenaean civilizations and then describes the rise of prominent Greek city-states (with particular emphasis upon the evolution of Sparta and the political, social and cultural contributions of Athens). The course concludes with the rise of Macedon and Alexander's conquests and significance. Also offered as HISTORY 571R.

3 hrs

[back to top](#)

HISTORY 472 Ancient Rome

This course covers Roman history from its origins (including the Etruscans) to the decline of the imperial system. Particular emphasis is placed upon the political, social and economic developments in the Republic, the death of the Republic, the early Principate, and the factors that led to Rome's decline in the ancient world. Also offered as HISTORY 572R.

3 hrs

[back to top](#)

HISTORY 473 History Of Astronomy

The course will examine how and why our views of the planets, the stars, and the universe have changed from Babylonian and Greek times to the 20th century. The course will consider such topics as ancient earth-centered cosmologies, the origin of astrology, the development and acceptance of the Copernican cosmology, the contributions of Newton, Galileo, Kepler and others to uncovering the laws of heavenly bodies, the gradually successful attempts to determine the distances to and composition of the stars, various interpretations of the Milky Way, and the eventual discovery of galaxies beyond our own, as well as touching on such other matters as early views of comets and "new" stars, the development of the telescope, the impact of photography, and early speculations on extraterrestrial life. Also offered as HISTORY 573R .

3 hrs

[back to top](#)

HISTORY 475 WI The History Of Ancient Israel

Judaism has had a tremendous impact on our civilization and yet most Americans are only dimly aware of its origins and development. This course will trace the roots of the Jewish religion in its historical context from its beginnings through the formation of rabbinic culture. The rise of Christianity will be examined in its original Judaic context, and recent discoveries, particularly those pertaining to the Dead Sea Scrolls, will be interpreted. Offered: Fall

3 hrs

[back to top](#)

HISTORY 476 Medieval Jewish History

This course covers the general period from the decline of the Roman Empire to the dawn of early modern times. It is concerned with Jewish centers of life and learning in the Diaspora, both East and West. The course considers the Jews under Islamic rule from the time of Mohammed through the Golden Age of Moorish Spain. The focus then shifts to the situation of the Jews in Christian Europe, from the period of Constantine to the expulsions from England, France and Christian Spain. The Jews in the Ottoman Empire are mentioned and the course ends with the episode of Sabbatai Zevi, the false Messiah. Also offered as HISTORY 576R.

3 hrs

[back to top](#)

HISTORY 477 Modern Jewish History

This course surveys modern Jewish history from the Napoleonic period to World War II. Analyzing the social status of the Jews in Medieval Europe, it proceeds towards a discussion of the growth of the national state and the breakup of the Holy Roman Empire and analyzes the growth of socialism, integral nationalism, and liberalism as they affected the Jewish communities in Europe and America. The course serves as a survey of modern political and economic trends as they affect a distinct group. Also offered as HISTORY 577R.

3 hrs

[back to top](#)

HISTORY 496 Historical Research Project

Working extensively with an individual faculty member actively engaged in his/her research, students practice the multiple facets of investigating the sources of history, developing a comprehensive analysis from such sources, and composing a persuasive interpretation. Prerequisite: HISTORY 301WI and instructor's approval Offered: On demand.

1-3 hrs

[back to top](#)

HISTORY H208 World Civilization Since 1600

This course surveys the social, economic, political and institutional history of the world from the 17th century to the present. It is designed to foster deeper understanding of the continuity between past and present and of the interdependence among nations in contemporary times.

3 hrs

[back to top](#)

HISTORY H444 R Islam And The Arabs: The Formative Period

The first semester of a three-semester sequence begins with a brief overview of the geography and topography of the Middle East. The course proceeds with a discussion of the conditions of pre-Islamic Arabia; the appearance of Muhammad and his mission; the rise and spread of Islam; the establishment and consolidation of the Arab dynasties in the Middle East, North Africa and Spain; Islamic institutions; and Islamic society and culture. The time span will be approximately 500 A.D. to the Mongol conquest of Baghdad in 1258. Also offered as HISTORY 544.

3 hrs

Italian

ITALIAN 110 Elementary Italian I

Intended to give the student the ability to read prose of ordinary difficulty and to understand and speak simple Italian. Fall.

5 hrs

[back to top](#)

ITALIAN 120 Elementary Italian II

Continuation of ITALIAN 110. Winter. Prerequisite(s): ITALIAN 110 or equivalent.

5 hrs

[back to top](#)

ITALIAN 211 Second Year Italian I

Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language. Prerequisite: ITALIAN 120. Fall.

3 hrs

[back to top](#)

ITALIAN 221 Second Year Italian II

Continuation of ITALIAN 211. Winter.

3 hrs

[back to top](#)

ITALIAN 280 Special Intermediate Italian Topics I

Instruction of Italian on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit. Prerequisite: Elementary I and II college-level courses or equivalent. As needed.

2-4 hrs

[back to top](#)

ITALIAN 290 Special Intermediate Italian Topics II

Continuation of ITALIAN 280. May not be repeated for credit. As needed.

2-4 hrs

[back to top](#)

Latin

LATIN 110 Elementary Latin I

Fundamentals of grammar and syntax; selected passages from various Latin authors concluding with readings from Caesar. Every fall.

5 hrs

[back to top](#)

LATIN 120 Elementary Latin II

Continuation of LATIN 110. Every Winter. Prerequisite(s): LATIN 110 or equivalent.

5 hrs

[back to top](#)

LATIN 211 Second Year Latin Readings I

Selected readings from works by various Latin authors. Grammar review. Prerequisite: LATIN120. Fall.

3 hrs

[back to top](#)

LATIN 221 Second Year Latin Readings II

Continuation of LATIN 211. Winter.

3 hrs

[back to top](#)

LATIN 280 Special Intermediate Latin Topics I

Instruction of Latin on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit. Prerequisite: Elementary I and II college-level courses or equivalent. As needed.

2-4 hrs

Continuation of LATIN 280. May not be repeated for credit. As needed.

2-4 hrs

[back to top](#)

LATIN 301 Virgil

Selected readings in Classical Latin from the works of Virgil. Prerequisite: LATIN 211 or consent from the instructor.

3 hrs

[back to top](#)

LATIN 302 Ovid

Selected readings in Classical Latin from Ovid's Metamorphoses. Prerequisite: LATIN 211 or consent from the instructor.

3 hrs

[back to top](#)

LATIN 311 Prose Fiction and Epistolography

Selected readings in Classical Latin from Apuleius, Cicero, Petronius, Pliny, etc. Prerequisite: LATIN 211 or consent of the instructor.

3 hrs

[back to top](#)

LATIN 314 Lyric and Elegiac Poetry

Selected readings in Classical Latin from Catullus, Horace, Martial, Ovid, etc. Prerequisite: LATIN 211 or Consent from the instructor.

3 hrs

[back to top](#)

LATIN 490 Special Readings In Latin

Intensive readings in period or genre or literary figure to be selected by the student in consultation with the instructor. Available only to advanced Latin students.

1-3 hrs

[back to top](#)

Mathematics

MATH 100 Intermediate Algebra

Numbers and their arithmetic properties, introduction to elementary algebra including exponents and radicals, elementary geometry and formulas, linear and quadratic functions and their graphs, and equations with two unknowns. Given on credit, no-credit basis. Does not fulfill Arts and Sciences mathematics requirement. Does not count toward graduation. Fall, Winter,

3 hrs

[back to top](#)

MATH 105 The Language Of Mathematics

Reading comprehension and writing skills in the language of Mathematics; grammar, syntax and logic, understanding, expressing, proving; recognizing and employing common patterns of mathematical thought; emphasizing not what is said, but how it is said. Particularly useful to students returning to school after a long hiatus, the math-anxious, students with weak skills, and those interested in elementary or middle school teaching. Prerequisite: Three units of high school mathematics

3 hrs

[back to top](#)

MATH 110 College Algebra

Review of elementary algebra, solution of equations, functions, exponential and logarithmic functions, inequalities, systems of linear equations, equations of second degree and their graphs, binomial theorem, complex numbers, and polynomials. Credit will not be given for both MATH 110 and MATH 120. Prerequisite: Three units of high school mathematics (Algebra I and higher) or MATH 100. Fall, winter, summer.

3 hrs

[back to top](#)

MATH 116 Mathematics For Liberal Arts

A survey of elementary mathematics covering such topics as: logic, sets, counting methods, introduction to probability theory, introductory statistics, plane and coordinate geometry. The course will emphasize mathematical concepts and does not require the level of computational skill of College Algebra. Topics from the history of mathematics will be presented as well as the influence of mathematics on a variety of disciplines. Prerequisite: Three units of high school mathematics (Algebra I and higher). Offered: Fall, Winter

3 hrs

[back to top](#)

MATH 120 Precalculus

Review of elementary algebra, solution of equations, functions, inequalities, systems of linear equations, exponential and logarithmic functions, trigonometric functions, trigonometric identities, triangles, equations of second degree and their graphs, binomial theorem, complex numbers, and polynomials. Credit will not be given for both MATH 120 and MATH 110 or for both MATH 120 and MATH 125. Prerequisites: Three units of high school mathematics (Algebra I or higher) or MATH 100. Fall, Winter, Summer.

5 hrs

[back to top](#)

MATH 125 Trigonometry

Trigonometric functions, trigonometric identities, triangles, and complex numbers. Credit will not be given for both MATH 125 and MATH 120. Prerequisite: Two units of high school algebra and one unit of geometry, or MATH 110. Fall, winter, summer.

2 hrs

[back to top](#)

MATH 130 Mathematics For Teachers: Number Systems

Designed for elementary school teachers. A constructive development of the real number system beginning with the system of whole numbers; concepts from elementary number theory; applications of quantitative systems to problems in discrete mathematics. Prerequisite: High school algebra and geometry. Offered: Fall, Winter, Summer

3 hrs

[back to top](#)

MATH 140 Mathematics For Teachers: Elementary Geometry

Designed for elementary school teachers. A development from informal geometric concepts to elements of the Euclidean deductive system; groups of congruence transformations, similarity transformations and symmetries; coordinate systems and vectors. Prerequisite: High school algebra and geometry. Fall/Winter

3 hrs

[back to top](#)

MATH 202 Analytic Geometry

Coordinate plane, lines, circles, the parabola, the ellipse, the hyperbola, transformation of coordinates, equations of the second degree, curve sketching, polar coordinates and parametric equations, complex numbers, vectors and vector operations, and solid analytic geometry. Prerequisites: 4 units of high school math, or MATH 110 and credit for or concurrent enrollment in MATH 125. Offered: Fall, Winter.

3 hrs

[back to top](#)

MATH 204 Mathematics For Teachers: Mathematical Immersion

Adaptable for elementary-, middle-, or secondary-school mathematics teachers. Intensive problem solving experience. Develop confidence and enthusiasm about recognizing mathematics reasoning in oneself and in students. Combat mathematics anxiety and myths. Encourage flexibility in the mathematical knowledge of teacher candidates. Prerequisites: MATH 120, MATH 130, MATH 140, or any mathematics course numbered 200 or above. Offered: On demand

3 hrs

[back to top](#)

MATH 205 Discrete Mathematics

Logic, sets, and functions. Algorithms, especially integer algorithms. Methods of proof, especially induction and recursion, counting principles, and discrete probability. Relations and partial ordering with applications. Graphs, circuits, and paths. Prerequisite: 4 units of high school math, or MATH 110. Offered: Fall, winter, summer.

3 hrs

[back to top](#)

MATH 206 Brief Calculus And Matrix Algebra

Brief review of selected topics in algebra. Introduction to matrix algebra. Introduction to differential calculus and optimization. Applications to problems in business. Credit will not be given for both MATH 160 and MATH 206 Prerequisite: MATH 110, or equivalent Offered: Every semester

3 hrs

[back to top](#)

MATH 210 Calculus I

Functions and graphs, rational, trigonometric, exponential functions, composite and inverse functions, limits and continuity, differentiation and its applications, integration and its applications. Prerequisite: Four units of high school mathematics including trigonometry, or MATH 120, or MATH 110 and MATH 125, or MATH 202. Offered: Fall, Winter, and Summer

4 hrs

[back to top](#)

MATH 214 Mathematics For Teachers: Algebra

Designed for middle school mathematics teachers. Algebraic reasoning, patterns and inductive reasoning, arithmetic and algebra of integers, algebraic systems, algebraic modeling in geometry, axiomatic mathematics. Prerequisites: MATH 110, MATH 130, and one of MATH 140 or MATH 224 Offered: Fall/Winter

3 hrs

[back to top](#)

MATH 220 Calculus II

Techniques of integration, applications of the definite integral, improper integrals, sequences and series, power series. Taylor series and convergence, analytic geometry in calculus. Prerequisite: MATH 210. Fall, Winter, Summer.

4 hrs

[back to top](#)

MATH 224 Mathematics For Teachers: Geometry

Designed for middle school mathematics teachers to connect middle school and college mathematics. Geometric reasoning, Euclidean geometry, congruence, area and volume, similarity, rigid motions and symmetry, vectors and transformations, some other geometries. Prerequisites: MATH 110 and MATH 130; MATH 140 is recommended. Offered: Fall/Winter

3 hrs

[back to top](#)

MATH 244 Mathematics For Teachers: Calculus

Designed for elementary-and middle-school mathematics teachers. Elementary calculus, beginning with sequences and series, proceeding to functions, limits, continuity, differentiation and integration. Focus on concepts and applications with a discovery and inquiry approach. Prerequisites: Four units of high school mathematics including Trigonometry, or MATH 120, or MATH 110 and MATH 125. Offered: Winter

3 hrs

[back to top](#)

MATH 250 Calculus III

Vectors, solid analytic geometry, vector functions and multiple variable functions, partial derivatives, multiple integrals, line and surface integrals with applications. Prerequisite: MATH 220. Fall, Winter, Summer

4 hrs

[back to top](#)

MATH 300 Linear Algebra I

Vectors, matrices, linear equations, matrix algebra, determinants, vector spaces, linear transformations, vector spaces with an inner product. Prerequisite: MATH 250, or consent of instructor Offered: Fall, Winter

3 hrs

[back to top](#)

MATH 301 On Solid Ground: Sets And Proofs

Transition to advanced mathematics, elements of set theory and cardinality of sets, logic, mathematical proof techniques, induction, functions, elementary proofs in various subjects such as algebra, number theory, calculus, and others as time permits. Satisfies a state requirement for teacher certification. Prerequisite: MATH 220

3 hrs

[back to top](#)

MATH 345 Ordinary Differential Equations

First order equations, linear second order differential equations, Taylor series and power series solutions, Laplace transforms, elementary systems of differential equations, numerical methods, and Fourier series and boundary value problems. Prerequisite: MATH 250. Fall, winter, summer.

4 hrs

[back to top](#)

MATH 400 Introduction To Number Theory

Congruences and residue classes. The theorems of Euler and Fermat. Primitive roots and indices. Quadratic residues. The Legendre and Jacobi symbols, the law of quadratic reciprocity. Number theoretic functions: the Euler phi-function, the Moebius inversion formula. Quadratic forms. The approximation of irrationals by rationals. Prerequisite: MATH 301

3 hrs

[back to top](#)

MATH 402 Advanced Analysis I

Numerical sequences and completeness of the real numbers, numerical series, continuity and differentiation of real-valued functions of a real variable, integration and the fundamental theorem of calculus. Prerequisite: MATH 250 and MATH 301

3 hrs

[back to top](#)

MATH 406 Partial Differential Equations

Separation of variables, boundary value problems, Fourier series and integrals, wave equation, heat equation, potential equation, problems in several dimensions, and Bessel's differential equation. Prerequisite: MATH 345. Offered: Winter.

3 hrs

[back to top](#)

MATH 407 Introduction To Complex Variables

Complex numbers, complex differentiation, elementary functions, contour integration and the Cauchy integral formula, Taylor series and Laurent series, residue calculus and its applications, and special functions. Prerequisites: MATH 250, and one of MATH 300, MATH 301, or MATH 345, with MATH 301 recommended Offered: Fall

3 hrs

[back to top](#)

MATH 410 Modern Algebra

Groups, rings, integral domains, fields and polynomial rings. Prerequisite: MATH 300 and MATH 301.

3 hrs

[back to top](#)

MATH 412 Advanced Analysis II

Topics in advanced analysis such as sequences and series of functions, power series and elementary functions, Fourier series, metric spaces, analysis in Euclidean spaces, or advanced integration. Prerequisite: MATH 402 or consent of instructor Offered: Winter

3 hrs

[back to top](#)

MATH 414 Mathematics For Secondary Teachers: Algebra And Analysis

Designed for secondary-school teachers. Examine high school mathematics from a higher point of view. Real and complex numbers, functions, algebraic structures of equations, integers and polynomials, number system structures; analyses of alternate approaches, extensions, and applications of mathematical ideas, discussion of historical contexts and connections between ideas that may have been studied separately in different courses, relationships of ideas studied in secondary-school to those students may encounter in later study. When taken for graduate credit as MATH 5514, an extra project is required. Prerequisites: MATH 220, MATH 301, and one of MATH 402 or MATH 410 Offered: Winter

3 hrs

[back to top](#)

MATH 420 Linear Algebra II

Vector spaces and linear transformations, eigenvalues and eigenvectors, vector spaces with an inner product, orthogonality, least squares approximation, quadratic forms singular value decomposition, the theory of determinants. Prerequisite: MATH 300 Offered: Winter

3 hrs

[back to top](#)

MATH 424 Mathematics For Secondary Teachers: Geometry

Designed for secondary-school teachers. Examine high school mathematics from a higher point of view. Congruence, distance and similarity, trigonometry, area and volume, axiomatics and Euclidean geometry; analyses of alternate approaches, extensions, and applications of mathematical ideas, discussion of historical contexts and connections between ideas that may have been studied separately in different courses, relationships of ideas studied in secondary-school to those students may encounter in later study. When taken for graduate credit as MATH 5524, an extra project is required. Prerequisite: MATH 220, MATH 301, and one of MATH 402 or MATH 410 Offered: Fall or Winter as needed

3 hrs

[back to top](#)

MATH 430 Numerical Analysis I

Error analysis, solutions of equations of one variable, interpolation and polynomial approximation, numerical integration and differentiation, numerical solutions of initial-value problems. Prerequisite: MATH 250

3 hrs

[back to top](#)

MATH 440 Numerical Analysis II

Direct and iterative methods for solving linear systems, introduction to approximation theory, approximating eigenvalues and eigenvectors, solution of systems of nonlinear equations. Prerequisites: MATH 300 and MATH 430, or consent of instructor Offered: Winter

3 hrs

[back to top](#)

MATH 444 Modern Geometries

Modern axiomatic development of Euclidean geometry and neutral geometry, followed by examination of non-Euclidean geometries; geometric transformations, and other geometries as time permits. Satisfies a state requirement for teacher certification. Prerequisites: MATH 300 and MATH 301

3 hrs

[back to top](#)

MATH 464 WI History Of Mathematics

Topics in the History of Mathematics from Babylonian times through the invention and consolidation of Calculus, with some modern subjects as time permits. The course will emphasize proofs, ideas, and arguments as given in original sources (in translation) from around the world and throughout history. In this writing intensive course, one or two term papers, in addition to several short essays and historical proof explications are required. A field trip will be taken to the Linda Hall Library Rare Book Room. This course is of special interest to secondary mathematics teachers as well as mathematics majors. Prerequisites: MATH 300 or MATH 301. MATH 301 is recommended.

3 hrs

[back to top](#)

MATH 490 Special Topics

Selected topics in various fields of mathematics. May be repeated for credit when the topic varies. Prerequisite: consent of instructor. On demand.

1-3 hrs

[back to top](#)

Military Science

MIL-SCI 100 Introduction To Military Operations

Introduction into the areas of: leadership, role of the Army (to include the citizen soldier concept), organization of the Army, U.S. Constitution, customs and traditions of the service, and the role of the officer and NCO. Offered: Fall/Winter.

1 hr

[back to top](#)

MIL-SCI 105 Introduction To Survival Skills And Rappelling

Techniques for survival: Direction finding, basic land navigation, primitive fire starting, water purification. Basic rappelling and rope bridging, knot tying and rope management. All College of Arts and Sciences students who complete this course can receive physical education credit. Offered: Fall/Winter.

1 hr

[back to top](#)

MIL-SCI 201 Introduction To Military Leadership And Communication

Introduces students to duties of an officer, providing an overview of the unique purpose, roles and obligation of commissioned officers. It includes a detailed look at the origin of our institutional values and their practical application. Prerequisite: None Offered: None Restrictions: None

2 hrs

[back to top](#)

MIL-SCI 202 Military Leadership & Communication II

This course focuses principally on officership, providing an extensive examination of the unique purpose, roles and obligations of commissioned officers. It provides an introduction to tactics and a detailed look at the origin of our institutional values and their practical application. Prerequisite: None Offered: Winter Restrictions: None

2 hrs

[back to top](#)

MIL-SCI 205 Reserve Officer Training Corps

Five weeks of preparatory training at Fort Knox, Kentucky. Travel pay and salary stipend provided through Military Science Department. The student is not obligated to any military service as a result of attending Basic Camp. Camp graduates are eligible to enroll in advanced military science courses and may be considered for a commission as a second lieutenant in the U. S. Army, Army Reserves or National Guard. Students are also eligible to compete for a full-tuition two-year scholarships. All College of Arts and Sciences students who complete this course can receive Physical Education credit.

3 hrs

[back to top](#)

MIL-SCI 210 Map Reading And Land Navigation

Introduction to map reading, terrain analysis, orienteering and day/night land navigation techniques and considerations. Includes several practical exercises in which students navigate with the use of a compass and terrain association.

Prerequisite: None. Offered: Winter.

1 hr

[back to top](#)

MIL-SCI 220 Urban And Field Survival Skills

Psychology of survival, preparedness; emergency water, food and shelter; fire starting; direction finding, water survival, Biological Terrorism and selected First Aid topics. All College of Arts and Sciences students who complete this course can receive physical education credit. Offered: Winter

1 hr

[back to top](#)

MIL-SCI 300 Leadership And Management I

Investigates organizational leadership styles, effective managerial and leadership traits, and military ethics; includes a review of the military correspondence formats and writing techniques. Prerequisite: Advanced placement by ROTC instructor. Offered: Fall.

3 hrs

[back to top](#)

MIL-SCI 310 Small Unit Leadership And Tactics

Study of electronic communications and techniques. Advanced study is conducted in the areas of land navigation, branches and functions of the U.S. Army and selected military skills. Emphasis is placed upon preparation for advanced camp.

Prerequisite: Advanced placement by ROTC instructor. Offered: Winter.

3 hrs

[back to top](#)

MIL-SCI 400 Leadership And Management II

Discussion and application of the principles of military organization and management. Includes the comprehensive study of executive decision making and communication and the Army Training Management System. Prerequisites: Completion of MIL-SCI 300 and MIL-SCI 310. Offered: Fall.

3 hrs

[back to top](#)

MIL-SCI 410 Army Management And Organizational Systems

Study of the Army Personnel Management System, the Uniform Code of Military Justice and the Army legal system; and selected topics in leadership management and decision making. Prerequisites: Completion of MIL-SCI 300 and MIL-SCI 310 or consent of the department chairperson. Offered: Winter.

3 hrs

[back to top](#)

MIL-SCI 497 Leadership And Management Practicum - Directed Study

Practical application in military problem analysis, decision making, planning and organization, delegation and control, and development of interpersonal skills required for effective management. Prerequisite: Instructor's approval. Offered: Summer.

1-3 hrs

[back to top](#)

PACE - American Studies

AMER-ST 301 P American Studies:Is/Tutorial:Themes In The American Popular Arts

This course uses the popular arts as an entree to the examination of stereotypes in American life, to a better understanding of challenges to tradition, and to assessing the consequences of conflict that have resulted from cultural pluralism. This is a modified independent study course. Students are exposed to some of America's best-known literature, films and music. Instructional audio tapes and traditional literature about American Culture show the relevance of examples of popular art to broader themes. Prerequisites: Concurrent enrollment in AMER-ST 302P and AMER-ST 303PW. Offered: On demand.

P

4 hrs

[back to top](#)

AMER-ST 302 P Survey Of American Studies

This course offers a look at changes and continuities in American life from the era of British colonization to the present. It emphasizes philosophical, scientific and creative ideas that have had lasting effects, changing social structure, the factors that determine lifestyle, and the consequences of the national preoccupation with pluralism and consensus. The course also covers the main features of American political history. Prerequisite: Concurrent enrollment in AMER-ST 303PW. Offered: On demand.

P

4 hrs

[back to top](#)

AMER-ST 303 PW Methods & Problems In American Studies

This course examines four topics that are important in American culture; each topic is approached from a different methodological perspective. The topics (problems) are related to cultural resources in the Kansas City area (such as a museum exhibit or a library research collection) and may change from semester to semester. Methods of problem solving are determined by the topic; however, students should expect to participate in oral history, interpretation of material culture, and traditional archival research and document analysis. Prerequisite: Concurrent enrollment in AMER-ST 302P. Offered: On demand.

P

4 hrs

[back to top](#)

AMER-ST 340 P American Material Culture: The 20th Century

This course will focus on the material culture of modern and post-modern America. This is an area of inquiry particularly well-suited to the examination of material culture resources. Students will be required to write a term paper or do a material culture project. Offered: Fall

P

4 hrs

[back to top](#)

AMER-ST 340 PP American Material Culture: The 1950s

This course will focus on the period of American culture from demobilization after World War II to the end of the 1950s--an era particularly well-suited to employing material culture resources as evidence. Students will be required to write a term paper or do a material culture project.

P

4 hrs

[back to top](#)

AMER-ST 341 P American Material Culture: Objects And Images

This course will examine American cultural and social history from earliest times to present, with a special emphasis on the ways artifacts and visual images can provide information and insight about the American experience.

P

4 hrs

[back to top](#)

AMER-ST 342 P American Material Culture: Museums

This course will focus on local institutions that use material culture in their presentation of history and the American experience.

P

4 hrs

[back to top](#)

AMER-ST 410 P The American Conception Of Evil: Historical And Cultural Contexts

This interdisciplinary course may focus on time periods in American history where the concept of evil has played a crucial role in determining public attitudes and policy, as well as the Western European roots of those attitudes. The course may focus on several broad time periods and topics: Western Europe before Columbus and during the initial years of contact between Europeans and Native Americans; Puritan New England, including the Salem witch trials; indentured servitude and slavery among Africans and other racial minorities; the Progressive Era; World War II, especially the experiences of American liberators of the concentration camps, the Japanese American internment experience, and the decision to use the atomic bomb; and Post WWII, especially the Cold War, the Vietnam War, 9/11, and contemporary hate groups.

P

3 hrs

[back to top](#)

AMER-ST 411 P The American Conception Of Evil: Readings In Primary Sources

This interdisciplinary course is a companion to AMER-ST 410P and may focus on understanding documents from the listed time periods in light of their original contexts, as well as developing an understanding of the roots of contemporary definitions of evil. Selections may include Puritan captivity narratives, diary entries, sermons, fiction, poetry, oral histories, WPA interviews with former slaves, films, television shows, and other appropriate materials.

CIT 420 P Cgi Perl

CGI Perl teaches CGI scripting techniques using the CGI.pm Perl module. Students learn how to create on-demand, server-based HTML; write and process fill-out forms; write responses to form submissions back to the client browser; store and process cookies; handle file uploads securely; create, read, and write to text databases. Students also explore CGI Perl's role in server push technology and continuous page updating. Students are not required to have previous Perl programming experience, although a through knowledge of HTML is necessary. Prerequisite: COMP-SCI IT222p or consent of instructor.

PACE - Communication Studies

COMM-ST 254 P Communication Competence: Theory And Practice

An introduction to the discipline of communication. A core set of issues is investigated in three major areas of the field: interpersonal communication, small group communication and public speaking. The course design is based on the premise that the development of communication skills involves two important factors: (1) understanding the theoretical principles underlying effective communication behavior and (2) practical application of those principles in various communicative exercises. Offered: Summer.

P

4 hrs

[back to top](#)

COMM-ST 260 P Introduction To Web Communications

This four credit hour web-based multimedia course will examine the process of critically evaluating information delivered on the Internet. It is designed as an introduction for adults and students who use Internet information for work and/or school. The process of critically evaluating Internet information will be described in four modules: traditional evaluation techniques; searching and researching strategies; Internet evaluation techniques and Internet evaluation resources.

P

4 hrs

[back to top](#)

COMM-ST 345 P Communication In Organizational Settings

An examination of the major elements of interpersonal, group, and oral communication competence essential to human interaction in organizational settings. The course focuses on developing communication competencies and increasing theoretical understanding of the communication process within the organizational context. prerequisite(s): None.

P

3 hrs

[back to top](#)

COMM-ST 361 Broadcast Management

An analysis of the trends, patterns and methods of radio and television operations. Prerequisite: COMM-ST 308. Offered: On demand.

B

3 hrs

[back to top](#)

COMM-ST 421 P Multimedia & New Media Streaming

This course is designed to teach students the technology of streaming multimedia on the web and analyze the components of interactivity on the web. Students will examine the process of streaming, as well as the various advantages and disadvantages of streaming. Students will study the hardware, software, and technology involved in the different types of streaming media. Prerequisites: COMM-ST 100, COMM-ST 105P or equivalent is recommended.

P

3 hrs

[back to top](#)

COMM-ST 422 P New Media Writing For The Web

This course is designed to teach students new media writing and the technology of reporting for online publications. Students will analyze the components of online writing, including the design, creation, and transfer of online digital media. Students will be introduced to digital formats and production tools. Students will examine the technology of writing for the web and the particular needs of new media writing for users of the web, techniques to transfer writing electronically, and how to use resources on the web for online reporters. Prerequisites: COMM-ST100,COMM-ST 105P or equivalent is recommended.

P

3 hrs

[back to top](#)

COMM-ST 423 P Shooting Digital Video For The Web And New Media

This course is designed to teach students the fundamental concepts of digital video, with special consideration given to shooting the new media and the web. Students will learn the process of digital video, the types of file formats, technical considerations of displaying video on the web, and technical features of the digital video camera. This class will enable students to maximize the use of video in various new media digital formats (CD-ROM,DVD, etc.), as well as its use on the web. Prerequisites: COMM-ST 100 COMM ST 105P or equivalent is recommended.

P

3 hrs

[back to top](#)

COMM-ST 424 P Web Radio

This course is designed to teach students the technology and underlying concepts in producing Web radio. A general overview of radio techniques and historical context, as well as practical and technical information will be given. Legal and copyright implications of making Web radio will be reviewed. Prerequisites: COMM-ST 100, COMM-ST 105P or equivalent is recommended.

P

3 hrs

[back to top](#)

COMM-ST 456 Electronic Journalism

A practical approach to the practices and principles of broadcasting news media, including preparing copy for microphone and camera, editing wire copy, reporting public affairs and public relations, and an intensive scrutiny of the concepts of freedom and responsibility as they apply to the press and current legislation. Prerequisite: COMM-ST 351. Fall and winter.

P

3 hrs

PACE - Economics

ECON 201 P Introduction To Economics I

Economics I deals primarily with macroeconomic or national economic concepts, the economics of the determination of recession, inflation, maintenance of full employment and economic growth, with an emphasis upon the economics of modern Keynesian analyses. It further introduces the economics of Marx and Ayres and discusses relevant and current economic issues. ECON 201 and 202 are prerequisites for all other economics courses except with specific permission of the instructor. Every semester.

P

3 hrs

[back to top](#)

ECON 202 P Introduction To Economics II

Economics II deals primarily with microeconomics, firm analysis, the principles of demand, supply, elasticity, price determination, costs, income distribution, market structures, trade, and other related social, economic issues. ECON 201, ECON 202 are prerequisites for all other economics courses except with specific permission of the instructor. Every semester.

P

3 hrs

[back to top](#)

ECON 204 P Principles Of Economics

The course will combine macro and micro principles of economics. Credit will not be given for both macro (ECON 201 and ECON 204) or for both micro (ECON 202 and ECON 204) towards a degree. The course will be offered over two nights a week (2 1/2 hr/class) and two weekends. Offered: Summer.

P

5 hrs

[back to top](#)

ECON 301 P Macroeconomic Analysis

The economic system as a whole and the ways in which its functioning is affected by the behavior of the interdependent sectors of which it is composed. Major factors affecting national income; use of sectoral accounts in analyzing general economic prospects.

P

3 hrs

[back to top](#)

ECON 302 P Microeconomic Analysis

Functioning of the individual enterprise and households. Problems confronting business enterprises operating under different types of market situations; influence of the prices factors of production on methods of production; effects that changes in income levels and in relative prices have on sales of different types of goods and services. Every semester.

P

3 hrs

[back to top](#)

ECON 331 P Money And Banking

A study of the structure, operations and problems of banks and other financial institutions with emphasis on their macroeconomic performance. The importance of banking in the financial system and the influence of Federal Reserve monetary policies are also studied. Offered: Fall.

P

3 hrs

[back to top](#)

ECON 353 Financial Analysis And The Economy

This course examines techniques of financial evaluation used by individuals, corporate managers, and portfolio analysts. Focus of the course will be on the interaction of the mechanics of analytical methods and economic activity. Topics covered will include individual portfolio building, asset evaluation, and financial market theory. Prerequisites: ECON 201 and ECON 202. Offered: Winter odd years.

B

3 hrs

[back to top](#)

ECON 366 Art Markets

An economic analysis of the development of art markets and the issue of government involvement in the arts. Prerequisite: ECON 202 is recommended, but not required.

P

3 hrs

[back to top](#)

ECON 397 CP Current Macroeconomic Issues

This is an independent studies course which addresses such macroeconomic issues as causes and remedies of inflation, recession and economic growth. This course is part of a Macro Pace Block. Prerequisites: ECON 201, ECON 202. Offered: Winter, odd years.

P

3 hrs

[back to top](#)

ECON 486 Labor Economics

An examination of the theories of wage determination, the economic effects of wage determination upon the wage structure, the distribution of national income, employment, and an introduction to collective bargaining. Prerequisite: ECON 302. On request.

PACE - English

ENGLISH 352 P Critical Approaches To The Short Story

In this course the student will explore the short story as a literary genre. Stories will range from the early masters such as Chekov, Kafka, and Hawthorne through contemporary offerings from Lessing, Mishima, and Achebe. Several critical approaches will be presented including formalism, New Historicism, and race/class/gender criticism. Students will keep a reading journal covering all material read for the course, and will be assessed on the basis of this journal, a mid-term and a final examination. Prerequisites: None.

P

4 hrs

[back to top](#)

ENGLISH 353 PW Critical Review & Evaluation Of Fiction & Film(Writing Intensive)

The weekend component of this block meets one weekend per month for a total of 70 contact hours. The goal of the course is to improve students' writing skills along with their ability to read and analyze texts, both literary and cinematic. During the course students will read four novels and a set of critical essays, one for each weekend, which will be followed by viewing and discussing a film adaptation of the novel in class. Various critical approaches will be included in the reading and will be discussed in class in an effort to enable students to apply these critical principles in their own critical essays. Because the class meets only one weekend per month and a process approach to writing is utilized, students will be encouraged to use the facilities of the internet to share drafts of their essays with their peer revision group members and with the instructors during the weeks between class meetings. Students will bring revised drafts of their work to the weekend meeting where a significant amount of class time will be spent in writing workshops. Students will be assessed on the basis of their portfolios of critical writing consisting of four major essays and an extensive cover letter, their reading/viewing journals, and their participation, both in class and in peer response groups. Prerequisites: WEPT. Offered: 1 weekend/month for 4 months.

P

4 hrs

[back to top](#)

ENGLISH 354 P Masterpieces Of Fiction

The goal of this independent study is to provide the student with time and space to read and respond to 7-9 critically acclaimed and classic novels. Students will be allowed to choose the novels they wish to read from a list of 50 that will be provided by the instructors. This course must be taken in conjunction with at least one of the other two courses in this block in order to ensure that the student has exposure to literary theory. Students will be assessed on the basis of their response journal, casual oral examination, and a critical essay. Prerequisites: None.

P

4 hrs

[back to top](#)

ENGLISH 460 PW Written Discourse: Speaking, Writing, Composing

Prerequisite: Successful completion of the WEPT (effective FS93).

P

PACE - History

HISTORY 102 P American History Since 1877

This covers American history from the end of Reconstruction to the present. HISTORY 101 is not a prerequisite for this course. Offered: Fall, winter, summer.

P

3 hrs

[back to top](#)

HISTORY 330 PW The Works Of Western Man

In the period 1750-1987, the nations bordering the Atlantic Ocean, largely relying on their technological advances, became world powers. This course, relying on analysis of films plus required readings, will survey the energy sources employed, the tools developed, and the regimes of the workplace which led to this dominance. Grades will be assigned to three types of exercises: frequent quizzes, a mini-project in historical research and a book critique of a piece of fiction. Prerequisite: Successful completion of the WEPT (effective FS93).

B

4 hrs

[back to top](#)

HISTORY 331 P America In The Machine Age

The United States has experienced repeated waves of technological advancements. This course will largely focus on industrialization in the 19th century as well as consumer society of our own era. How Americans produced goods and what were the dynamics of the market place are two central themes. Required readings will be complemented by films and presentations from resource persons throughout Kansas City. A research project and three tests are required.

B

4 hrs

[back to top](#)

HISTORY 332 P The City: Past And Present

The optional four-credit-hour component (modified independent study) will concern the social aspects of these civilizations, i. e., their daily lives. Readings and audiovisual aids will be used to help the student who will be expected to choose one aspect of each civilization, such as women, slavery, merchants, education, medicine, etc., and write a five-page paper about that topic for each period, i. e., Mesopotamia, Egypt, Greece and Rome.

B

4 hrs

[back to top](#)

HISTORY 400 Z Special Studies

B

1-3 hrs

[back to top](#)

HISTORY 470 P Ancient World: The Social History Of The Ancient World

The optional four-credit-hour component (modified independent study) will concern the social aspects of these civilizations, i. e., their daily lives. Readings and audiovisual aids will be used to help the student who will be expected to choose one aspect of each civilization, such as women, slavery, merchants, education, medicine, etc., and write a five-page paper about that topic for each period, i.e., Mesopotamia, Egypt, Greece and Rome.

P

4 hrs

[back to top](#)

HISTORY 471 P Ancient World: The Political Structure Of The Ancient World

The four-hour lecture period on weeknights will emphasize the historical aspects of the ancient civilizations. The lectures will be chronologically organized to focus upon their evolution from their rise to their collapse.

P

4 hrs

[back to top](#)

HISTORY 472 P Ancient World: The Cul/Intellectual Dimension Of Ancient Civi

The four weekend periods will provide the students with a general picture of these civilizations: society, religion, economics, and culture (w.f., arts, literature, philosophy, science, etc.). Guest lecturers, slides, films and video cassettes will be used to introduce the varied aspects of these ancient peoples.

PACE - Humanities

HMNTY 104 P Indep Study/Tutorial: Spec Applications: Themes Of Individuality

In this course students apply knowledge and skills gained in the weekend and weekday courses to four supervised and well delineated study projects relating to the major themes of Block II, and involving various art forms and presentation media.

P

4 hrs

[back to top](#)

HMNTY 105 P Literature, Composition & Critical Thinking: Individual & Society

This course develops facility in writing, reading and critical thinking through numerous writing and critical thinking activities, papers and readings focused around the topic of the relationship of the individual and society. This course accomplishes the purposes and fulfills the requirement of the first semester of freshman English.

P

4 hrs

[back to top](#)

HMNTY 106 P The Individual In Literature, Philosophy And Art

This weekend course acquaints students with classic works of literature, philosophy and the fine arts, as well as the methodologies of the humanities, by means of an historical and systematic analysis of the developmental stages of individuality from the classical period to the contemporary era.

P

4 hrs

[back to top](#)

HMNTY 201 P The Many Lives Of Dr. Faust

This course will involve the development, impact and artistic forms of "The Lives of Dr. Faust," a major legend in Western Culture. This course examines Faust as dealing with a search for knowledge from Byzantium to modern Europe and America. This approach covers such topics as the limits of power, the choice between good and evil, and the limits of human awareness. The course will present this Faust legend in various artistic forms, by allowing the student to experience this "myth" through art, drama, literature and culture. Offered: Winter.

P

4 hrs

[back to top](#)

HMNTY 202 P The Meaning Of The American Experience

This course meets the College requirement for ENGLISH 225. Integrated with the other courses in the block, its aim is to help students to become informed writers on the topics of American myths. The first part of the course will require students to write personal response papers; the second half will involve library research that can be synthesized into research papers. Offered: Winter.

P

4 hrs

[back to top](#)

HMNTY 203 P American Dreams: Four Major American Myths

This course examines several meanings of four major American myths: the Puritan myth, the myth of the land, the myth of individualism and the myth of the machine. Students will examine works of literature, art, and film in order to comprehend the meaning of myth in their own culture and grasp the way in which cultural artifacts shape and express current values in American life. The course will take special note of the Faust myth's relevance in American culture. Prerequisites: Concurrent enrollment in HMNTY 202P. Offered: Winter.

P

4 hrs

[back to top](#)

HMNTY 320 P International Cultures

At the beginning of the new Millennium, this PACE course should heighten students' awareness of the values, esthetics and historical baggage of a particular culture as it introduces them to the dynamics of a rapidly changing world. Literature and scholarly texts will be in the in-roads to the culture and will deepen the students' insight into contemporary events. Course will vary with geographical area of study.

P

4 hrs

[back to top](#)

HMNTY 340 PW The World Of Advertising

This course will present a broad overview of advertising literature. Students will be given some idea of the issues inherent in the world of advertising, procedures for running an ad campaign, and the role of persuasive writing and graphic design. As projects to accompany the historical and theoretical aspects of advertising, students will design a commercial or an ad campaign. The course will emphasize critical thinking, ethical issues, writing and speaking. Prerequisite: Two semesters of composition and successful completion of the WEPT (effective FS93).

P

4 hrs

[back to top](#)

HMNTY 375 P Research In Women's Culture

Independent Study: Each student, with an instructor, will develop a research topic of personal or professional interest related to PACE 376P or PACE 377P and produce appropriate writing on the topic.

P

4 hrs

[back to top](#)

HMNTY 376 P Textural Representation Of Feminine

Focusing on the roles women have played in literature, as characters, as readers, and as writers, students will read, write about, and discuss short fiction, novels, and feminist literary theory. This course explores the ways in which both the choice of subject matter and the method of presentation differ in female-written and male-written texts, the ways in which women have been portrayed in literature by women writers and by men writers, and the ways in which ethnicity affects both subject matter and writing style in women's writing.

P

4 hrs

[back to top](#)

HMNTY 377 P Growing Up Female With Mass Media

The purpose of this course is to examine women and women's issues in American film, media and culture. Focusing on the construction of women's images in the information age, the course follows the rise of feminism, backlash and "post feminism" to the position of the contemporary woman, providing a historical context for popular culture.

P

4 hrs

[back to top](#)

HMNTY 401 PW The Culture Of The Working Class: Independent Study

This course, the independent study component of the labor and economics block, will employ a variety of cultural media which illustrate some of the issues covered in the weekend and evening courses. "The Culture of the Working Class" will show how literature, art, music and film have reflected and/or influenced the labor movement. Students will read novels, short stories and poems, view movies and works of art which address problems of the working class, both in Western Europe and the United States, from the late 1800's to the present. The work done will be validated through written work by the student. Prerequisite: Successful completion of the WEPT (effective FS93).

P

4 hrs

[back to top](#)

HMNTY 404 PW Professional Communication

In this course students will study formats for various types of technical reports, from resumes to completion reports, most of which will use as content research projects assigned in the independent study segment. Students will also study techniques for presenting material orally, from small group communication to formal presentations of longer technical reports, complete with audio-visual aids. In both written reports and oral communication, students will learn to consider a variety of audiences. The course will have texts and will be team-taught. The writing element will provide another option for PACE students to fulfill the new junior/senior writing requirement. Prerequisite: Successful completion of the WEPT (effective FS93).

P

4 hrs

[back to top](#)

HMNTY 408 P Images Of Aging In Literature

This one credit hour course will give students an opportunity to examine human attitudes towards the changes that occur in later life viewing them through fictional characters and events. It is one thing to learn the facts of the aging process and aging in society, but quite another to examine attitudes and feelings about such issues subjectively, through the eyes of one facing them. Through reading literature about older people and their concerns, discussing it and writing papers about it, students should develop a truer perspective about that portion of their own lives and alter their attitudes towards older people in their present culture. Though this is a one-credit-hour course, discussions and papers may also draw from readings done in the Independent Study portion of the block.

P

1 hr

[back to top](#)

HMNTY 410 PW Turning Life Into Stories

This course will take a factual approach to creative prose writing, including both artistic nonfiction and fiction in various forms. The instructor will describe a form, suggest ways it might be written, and illustrate the form with examples of his own work and that of other writers. Student papers will be critiqued in writing by the instructor. Students will also read much of their work to the class, which will operate as a writing workshop. Prerequisite: ENGLISH 110 & ENGLISH 225 (or equivalents) and successful completion of the WEPT (effective FS93).

P

4 hrs

[back to top](#)

HMNTY 452 Images Of The Family In Art And Literature

An application of the skills and knowledge gained from the companion weekend and/or weekday courses in this block by means of the instructor-approved and guide independent study projects of the student's own individual or small group choice, focusing on images of the family in literature and art. Each student must select and present four projects (one on each of the following faith cultures-Christianity/Judaism, Islam, and one on a topic of their choice) in written, oral and/or audio/visual media. Students meet in groups and individual sessions with the instructor of this block.

P

4 hrs

[back to top](#)

HMNTY 461 Interpreting Past And Present Rhetorical Practices

The purpose of this course is to examine what rhetoric is and how it has been (and is currently) used to influence what we believe, practice and value as individuals and as a society. Beginning with the classical period, then moving chronologically to present day rhetorical theories, students will analyze the ways in which rhetoric has both influenced and been influenced by its historical context. Course grades will be determined by four examinations, an 8-10 page course paper, and an oral presentation of the work of one rhetorician.

P

4 hrs

[back to top](#)

HMNTY 462 Analyzing Modern Discourse Communities

In this course, students will learn how to critically examine the rhetorical effects of political, legal, journalistic, literary documents. Students will also learn how to more effectively argue by mastering particular rhetorical strategies. There will be four written projects in this course: a summary/research assignment, a review assignment, an analysis assignment and an argument assignment.

P

4 hrs

[back to top](#)

HMNTY 490 P Perceptions & Images Of Disabilities In Literature And Film

This course combines classroom discussion of selected films and literature and independent study. Students will study films and selections from literature to develop an understanding and awareness of the social, economic and political aspects of disability as conveyed through popular culture. Students will also apply research, observation and writing skills to gain awareness and insights regarding disabilities, through working on an individual or team project. The project will further the understanding of disabilities and how various social, psychological and environmental conditions may affect people with disabilities and their families.

P

PACE - Integrated Studies

INT-DISC 201 P Energy, Technology And Society

Independent study television course. Technology is examined as a human activity that reflects society's needs and values. The social implications of technology are explored and the concept of technological systems is developed. The history and evolution of technology is studied, particularly as it has influenced life and planning for the future. Prerequisites: Concurrent enrollment in INT-DISC 202P and INT-DISC 203P.

P

4 hrs

[back to top](#)

INT-DISC 202 P Energy Science

Weeknight course. Fundamental physical principles and concepts concerning energy sources, energy production, energy use and energy reserves will be studied. Emphasis will be placed on the physics of energy including chemical, electrical, mechanical, nuclear, solar and thermal energy. Prerequisite: Concurrent enrollment in IINT-DISC 201P and INT-DISC 203P.

P

4 hrs

[back to top](#)

INT-DISC 203 P Social, Economic And Political Influences On Energy

Weekend course. Some of the most important determinants of uses of energy and technology are social rather than physical. This course will consider such influences as energy conservation, the psychology of decision making, the impact of our organization on the means of production and our ability to utilize available energy to satisfy human needs, the human costs of high technology with respect to basic biological requirements and also with respect to higher human needs. Finally, alternative social organizations will be studied. Prerequisite: Concurrent enrollment in INT-DISC 201P and INT-DISC 202P.

P

4 hrs

[back to top](#)

INT-DISC 204 P Work, Labor And Society

This course focuses on work, labor and society. Agrarian societies and the rise of industrialism are studied. Emphasis is placed upon understanding the role of the worker in today's society. Prerequisites: Concurrent enrollment in Social Science and HMNTY 202P and HMNTY 203P.

P

4 hrs

[back to top](#)

INT-DISC 205 P Liberalism And The Technological Society

Weeknight course. The philosophy of liberalism and the reactions against that philosophy will be studied. We will examine the factors that have led to the rise of industrialism and technology and study the ways in which they have affected other aspects of the society. Students will be required to write a term paper. Emphasis will be placed on research and bibliographic methodology. Prerequisites: Concurrent enrollment in Social Science and HMNTY 203P is required.

P

4 hrs

[back to top](#)

INT-DISC 206 P Political And Social Aspects Of A Technological Society

Weekend course. Industrialism has changed our way of looking at ourselves and the world. We will examine the new conception of the individual that arose with industrial society and will focus on some of the problems and prospects that have been associated with it. Social Darwinism, unions, and various utopian/anti-utopian theories will be among the ideas studied. Prerequisite: Concurrent enrollment in Social Sciences and HMNTY 202.

P

4 hrs

[back to top](#)

INT-DISC 308 P Introduction To Physical Anthropology

Study of the basic concepts, methods, and research areas in physical anthropology. Topics include: scientific methods, forces of evolution, dating methods, archaeological techniques, primate characteristics and behavior, and the tracing of primate and human evolution through skeletal material and artifacts. The evolutionary and adaptive forces resulting in human physical diversity and the underlying physical unity of all humans will be addressed.

P

4 hrs

[back to top](#)

INT-DISC 310 P Global Political And Social Issues

This course will give students a broad overview of a particular culture, region or ethnic group's political and social issues within the context of contemporary global challenges. Major topics include politics, economics, environmental and international concerns appropriate to understanding a cross section of traditions and values of a variety of social strata within a designated area of study.

P

4 hrs

[back to top](#)

INT-DISC 350 P Interdisciplinary Perspectives On Aging: Readings And Film

This course within the PACE block provides the student an opportunity to pursue special areas of interest in gerontology which will be only parenthetically covered or omitted altogether from the other courses in the block. Furthermore it challenges the student to become acquainted with and develop his/her independent study and research skills by means of addressing issues in the field which are of special interest to him/her and relevant to the field.

P

4 hrs

[back to top](#)

INT-DISC 380 P People With Special Needs: Education Planning

This course will address educational and psychological assessment strategies that result in a diagnosis of disability. Various specific disabilities and legal parameters for public education of people with disabilities will be discussed. Students will learn how to read and understand various educational and psychological assessment reports and will become knowledgeable about how to access community supports and services to address special needs in an education setting. By the end of the course students will have created a personal notebook of educational planning and accommodations for use as a resource for parents, teachers, or students in educational settings. Offered: Fall or Winter

P

4 hrs

[back to top](#)

INT-DISC 381 P People With Special Needs: Career Exploration

This course will address the issues that arise in career exploration and planning for people with a disability diagnosis. Students will become familiar with the philosophy of community inclusion and will learn how to plan based upon the unique strengths and interest of the individual. Career exploration tools will be explored in class and as assigned, and students will create a personal notebook to be used as a resource tool of accommodation materials and aides. Offered: Fall or Winter

P

4 hrs

[back to top](#)

INT-DISC 382 P People With Special Needs: Disability Service Settings

Independent study course: Students will meet at specific times as a group with the instructor, will write a term paper, and complete a 20 hour practicum in a pre-approved disability service setting. Offered: Fall or Winter

P

4 hrs

[back to top](#)

INT-DISC 401 P The Natural Life Cycle

Independent study Television course. Students will be exposed to some of the latest concepts and research related to the natural life cycle. The various tapes to be viewed in this class will focus on the birth process, the maturation of the individual, and the abnormalities that can occur through various diseases and death. The tapes will have a predominantly biological orientation, although there will be a few tapes that provide artistic insight into the various stages of the life process. Prerequisites: Senior standing and concurrent enrollment in INT-DISC 402P and INT-DISC 403p.

P

4 hrs

[back to top](#)

INT-DISC 402 P Literature And Life Sciences

This integrated weeknight course attempts to provide students with an overview of the relationship between biology and literature. Other disciplines also will be discussed, but these two will be the dominant ones presented. The life cycle of the human organism will provide the structure for this course. This process will then be subdivided into various substrata focusing on such aspects as childhood development, nutrition, the cardiovascular system, and the nervous system. Each of these aspects will also be examined from an artistic point of view. Prerequisites: Senior standing and concurrent enrollment in INT-DISCy 403P.

P

4 hrs

[back to top](#)

INT-DISC 403 P Stages Of Growth

This integrated weekend course will attempt to offer the student both laboratory experiences and cinematic works that focus on the life-cycle process. Each of the weekend sections will be devoted to a particular stage of development, moving from conception to birth and childhood, to maturation and death. Prerequisites: Senior standing and concurrent enrollment in INT-DISC 402P.

P

4 hrs

[back to top](#)

INT-DISC 420 P Brain And Behavior

The class will explore current and sometimes contradictory theories and evidence for the interaction of biological and psychosocial processes in such areas as gender differences, the experience of pain, addictive behaviors, and diseases such as depression, heart attack, rheumatoid arthritis and anorexia. Students and instructor will also briefly examine the organization of the triune brain, neurologic accidents, the range of tools currently used in diagnosis and treatment of mind-body diseases, and raise some of the bioethical issues these problems engender. Methods will include lecture, discussion, readings, films, oral class presentations, papers and exams. Prerequisite: One course in biology and/or psychology. Summer

P

4 hrs

INT-DISC 482 P The Meanings Of Masculinity In Contemporary U.S. Culture

Topics include: Perspectives on Masculinity; Boyhood; Collegiate Masculinities: Privilege and Peril; Men and Work; Men and Health: Body & Mind; Men in Relationships; Male Sexualities; Men in Families; Masculinities in the Media; Men, Movements, and the Future. Small and large group discussions are anticipated in the classroom. Outside of the classroom, students will be expected to complete a series of assignments that are relevant to the topics at hand. This course would ideally incorporate UMKC faculty/staff and individuals/groups outside of the university who have completed research/work that seeks to understand men's lives better.

P

4 hrs

[back to top](#)

INT-DISC 483 P Artful Man Embodied: Cultural Icons Of Masculinity

This course will examine a variety of mediums used to "embody" meanings of masculinity (with special attention paid to shifting settings for one media source can alter its meaning drastically simple by being located in a different venue and/or time). This course will incorporate tours of, and works from, the Nelson-Atkins and Kemper Museums. Images by/of "men" to be examined include those found in the work of selected "masculine icon" authors; those found in popular culture; and those found in the everyday (seemingly mundane) worlds of family, work, and medicine. As the title of the course implies, students will explore historical ideas about bodies/embodiment (be they scientific, religious, social, etc.) into their image exploration. Restrictions: Enrollment in Meanings of Masculinity recommended to take the course.

PACE - Interdisciplinary Studies

INTGR 401 P The Creative Source: Concepts And Actions

A survey of the intellectual history of our culture highlighting the contributions of important philosophers, theologians, scientists, political figures, artists and musicians from antiquity through the contemporary period. Prerequisite: Senior standing.

P

4 hrs

[back to top](#)

INTGR 402 P Turning Points In The History Of Ideas

Focused discussions on specific aspects within the history of ideas in five major eras (Antiquity, the Middle Ages, the Renaissance, the Romantic Age and the 20th-century), Prerequisite: Senior standing.

P

4 hrs

[back to top](#)

INTGR 403 P Major Intellectual Developments In Western History

Major developments within the history of ideas in philosophy (and religion), the arts, political thought, and the history of science. Prerequisite: Senior standing.

P

4 hrs

[back to top](#)

INTGR 425 P Integrative Seminar In Disability Studies

The Integrative Seminar in Disability Studies provides students the venue to focus and synthesize their knowledge of disability within an academic field. Required for Interdisciplinary Certificate in Disability Studies. Prerequisites: HMNTY 490P, PSYCH 406P and PSYCH 407P Offered: On Demand

P

1 hr

[back to top](#)

INTGR 430 P Development Disabilities: Partners In Policymaking

Participants, selected through an application process conducted by the Missouri Planning Council for Developmental Disabilities, attend eight two-day sessions over a period of eight months. Partners meet with and learn from nationally known speakers, gaining state of the art information on critical issues, including state and federal issues. Partners develop skills that will enable them to form productive partnerships to influence police and law. Prerequisite: Selection by Missouri Planning Council Offered: TBD

PACE - Natural Science

NAT-SCI 101 P Changing Life On Earth

This course presents an overview of issues relating to our ever changing world. It is research oriented with papers required on topics dealing with behavior, environmental issues, and aspects of evolution. Prerequisites: Concurrent enrollment with NAT-SCI 102P.

P

4 hrs

[back to top](#)

NAT-SCI 102 P Fundamentals Of Life Science

This course emphasizes the essential properties of biological systems through four major themes: diversity, the chemical and physical basis of life, continuity, and the organismal nature of life. Prerequisite: Concurrent enrollment in NAT-SCI 103P. As needed.

P

4 hrs

[back to top](#)

NAT-SCI 103 P Applications Of Life Sciences

This course is designed to provide students with laboratory exercises, field trips, films and discussions that help apply biological principles from 102P. New concepts are introduced throughout the course. Prerequisite: Concurrent enrollment in NAT-SCI 102P. As needed.

P

4 hrs

[back to top](#)

NAT-SCI 308 P Physical Measurements

An introduction to metrology, this course will emphasize physical measurements in technology and trade as well as in daily life. Material will include the historical development of measurement units, from cubits to meters, especially since 1960; gravitational versus absolute systems; the International System of Units (SI); organizations, treaties and statutes; accuracy vs. precision; and numerical values: conventions, conversions and rounding. Student work will involve laboratory exercises, exams, practicum work and homework assignments (brief essays and/or problem solutions). Prerequisite: MATH 110 or MATH 150 (or equivalent) Summer.

P

4 hrs

[back to top](#)

NAT-SCI 375 P Nature Of Science

Selected topics from the natural sciences. Provides students fundamental principles and concepts of various physical and mathematical sciences. Lectures, demonstrations and discussions provide an integrated approach to the natural sciences.

P

4 hrs

[back to top](#)

NAT-SCI 425 P Introduction To Quantitative Methods

Topics addressed are the scientific approach to study of behavior (goals of science, research terminology, variables, distributions, measures of central tendency, confidence intervals, use of research methods and ethics in research), experimental design (validity, reliability, design and sampling techniques), and interpretation of research results. Course includes in-class computer data entry and analysis. Prerequisites: Intro to computers and MATH 110 or MATH 116

P

POL-SCI 358 Global Political And Social Issues

This course is designed to afford the student with an overview of important global and regional challenges associated with the emerging 21st century. Hence, there are three objectives: (1) gain an understanding of the facts and complexities of the selected issues within the framework of globalization; (2) describe and explain difficulties in formulating political/ policy consensus aimed at resolving these issues; (3) considering both the factual complexities and difficulties in formulating policy; identify future trends related to major global challenges.

P

4 hrs

[back to top](#)

POL-SCI 406 P Political Leadership

This weekend course will examine theories, institutions and styles of political leadership; analyze recruitment and selection methods; and study popular perceptions of such leaders. Using film, fiction and materials from political science, this course will culminate in a look at U.S. presidents and the presidency in the 20th century. Prerequisites: Social Science PACE 102P and 103P, or POL-SCI 210 or equivalent; concurrent enrollment in POL-SCI 409P for those in the PACE Program or in the B.L. A. degree program. For other students, the consent of the instructor is required. Students who have credit for POL-SCI 406A or its equivalent may not enroll in this course.

B

4 hrs

[back to top](#)

POL-SCI 407 P Politics Of Representation

A study of legislative institutions, procedures and behaviors in the U.S. Congress that raises practical as well as theoretical questions of political representation in modern society. This course will be presented by video cassette and will be integrated with POL-SCI 406P and POL-SCI 409P. Prerequisites: Social Science PACE 102P and 103P or POL-SCI 210 or equivalent; concurrent enrollment in POL-SCI 406P and POL-SCI 409P.

P

4 hrs

[back to top](#)

POL-SCI 409 P Bureaucratic Politics

This weeknight course will examine the emergence of bureaucracies as the modern method of collective problem solving. In the U.S. political context, this involves the dynamic interplay of rational choice, due process and pluralistic politics. The transitions from limited to positive government and then to the current ethos of deregulation will be studied.

B

4 hrs

[back to top](#)

POL-SCI 435 P Politics Of The Environment

A survey of the political aspects of environmental issues. The course poses the problems of environmental damage and examines actual and proposed policies aimed at addressing them. The course content is the same as POL-SCI 435 title except additional reading and writing will be required commensurate with a 4 credit hour course.

P

4 hrs

[back to top](#)

PACE - Psychology

PSYCH 270 P Compulsive Gambling And Other Addictions

Course will focus on compulsive gambling and the psychology of addiction. Alcohol, drug, food and sex addiction will also be explored. After attending this course, the student will be able to understand the problem gambling continuum, the phases of the problem gambler and how this addiction affects the family.

P

3 hrs

[back to top](#)

PSYCH 407 P Developmental Disabilities And Community Life

Focus is on developmental disabilities in community life and interdisciplinary process as a means of coordinating services and supports in community settings. Students will learn about specific disciplines and professions and how they must work together in the community. Topics include the State developmental disabilities network and service system, the principles of person-centered planning, the effects of severe disability on families, and the dynamics surrounding community inclusion of persons with severe disabilities.

B

4 hrs

[back to top](#)

PSYCH 490 P Perceptions & Images Of Disabilities In Literature And Film

This course combines classroom discussion of selected films and literature and independent study. Students will study films and selections from literature to develop an understanding and awareness of the social, economic and political aspects of disability as conveyed through popular culture. Students will also apply research, observation and writing skills to gain awareness and insights regarding disabilities, through working on an individual or team project. The project will further the understanding of disabilities and how various social, psychological and environmental conditions may affect people with disabilities and their families.

[back to top](#)

PACE - Social Science

SOC-SCI 210 P Foundations Of Social Science

An application of salient principles, facts and methods of social sciences to study of origins and nature of social institutions; problems of emotional adjustment and vocational choice; analysis of contemporary social, legal and economic trends affecting values, conception of freedom and of social power, and political organization.

P

3 hrs

[back to top](#)

SOC-SCI 305 P Economic Principles And Applications Of Accounting

In this one-hour course, students will use computers to apply accounting principles and to analyze annual reports of corporations. The course will be taught during one hour of a four-hour weeknight course, with ACCTNG 201 being taught during the other three hours. It should be taken concurrently with ACCTNG 201 and with the Independent Study course, SOC-SCI 403P, Business Administration Applications. On a two-year rotation.

P

1 hr

[back to top](#)

SOC-SCI 355 P The Environmental Movement: Roots And Actions

A multi-disciplinary course synergizing case studies from history, political science, environmental management, and urban planning to develop a deep understanding of current environmental issues. We will probe such issues as the Concept of Nature and Environmental aesthetics Agriculture and the Environment, Energy and the Environment, Developing the "Built Environment", Environmental Costs of Industrialism, the Birth of the Environmental Movement, Environmental Politics, Environmental Justice and many other topics.

P

4 hrs

[back to top](#)

SOC-SCI 359 P Technology Policies In Hospitality

This course will examine policies and practices of technology in hospitality and the impact of technology on decision making in the industry. Special attention will be given to the relationship between technology and organizational resources, examining the future development of policies and practices. Prerequisites: None. Offered: Any Semester.

P

4 hrs

[back to top](#)

SOC-SCI 364 PW Contemporary Industrial Society

This course examines the historical theoretical and behavioral foundations of the industrial economy of the U.S. Particular emphasis is placed on technological change, the culture of modern corporations, strategic planning and the contemporary environment of business enterprise (legal, social, environmental and economic). The major institutions of business structure of the modern corporation are covered. Prerequisites: ECON 201, ECON 202 and successful completion of WEPT Test. Offered: Fall.

P

3 hrs

[back to top](#)

SOC-SCI 375 P Contemporary Issues In The Service Industry

This course will allow students to undertake in-depth research of current issues important to the service industry. Focus will be placed on understanding theoretical principles and their impact on management behavior and decision making. Issues may include; the evolving technology of the industry, the impact of the industry on national employment issues, and the social impact of the industry on class and racial issues. This course is offered as an independent study and must be taken in conjunction with ECON 323P: Administration in the Service Industry. Prerequisites: None. Offered: Any Semester.

P

SOC-SCI 397 A The Economics Of Public Process I

This film/tape course and ECON 397B are specifically designed in the format of the PACE program. Regular majors in economics may count one of these two courses as meeting the 27 minimum required departmental hours. The J.K. Galbraith film series and text, *The Age of Uncertainty*, provide the central theme for this course. Offered: Fall.

P

1 hr

[back to top](#)

SOC-SCI 397 B The Economics Of Public Process II

This film/tape course and ECON 397A are specifically designed in the format of the PACE program. Regular majors in economics may count one of these two courses as meeting the 27 minimum required departmental hours. The Milton Friedman film series, *Free to Choose*, provides the central theme for this course. Prerequisites: ECON 201 and ECON 202. Offered: Summer.

P

1 hr

[back to top](#)

SOC-SCI 403 P Industrial Organization Applications

The students will read books and business journals and reflect, in written form, on topics related to the organizational environment. Students will also research and prepare technical reports on specific organizational issues. Validation will be coordinated with the technical writing component of the block. Offered: Fall

P

4 hrs

[back to top](#)

SOC-SCI 411 P Aging In American Society: Past And Present

Modern views of aging are often contrasted with views of aging in earlier times. The popular mythology suggests that the position of the older adult has fallen from a place of high status and respect. Exploring the myths and rhetoric, this introduction to the field of social gerontology examines aging in America as grounded in the nation's history and a variety of sociocultural contexts.

P

4 hrs

[back to top](#)

SOC-SCI 438 P Labor History & Economic Policy

Analysis of the confluence of political and economic behavior the economics of collective action. Prerequisites: ECON 301 and ECON 302.

[back to top](#)

SOC-SCI 456 P In-Depth Country Study

Students enrolled in this section will chose a country in Latin America (not their country of origin, if applicable) and prepare a country study. Students will receive a general reading list (which has to be incorporated) and, if desired, suggestions about country-specific readings. The studies should be founded in cultural anthropology: i.e., they should be holistic in integrating all population groups of the country, and they should be integrated in treating the country as an inter-connected, but open, system.

P

4 hrs

[back to top](#)

SOC-SCI 457 P First Nations And Survival In Latin America

This course examines the history of a specific country, historical and contemporary issues (such as genocide, land use, economic and political marginalization and independence movements.) The course focuses on history and experience as it is constructed by and impacts native people. Special consideration is given to women and gender constructs in the native societies and the impact of a dominant European patriarchy.

P

4 hrs

[back to top](#)

SOC-SCI 458 P Women, Men And Development In A Cultural Context

Students will explore two main areas of social scientific discourse in Latin America: theories of development and marginalization; and feminist interpretation of and responses to development. We will explore how the phases of political and economic history are reflected in ideas about development, dependency, and women's issues. A large part of the class will be concerned with the increasingly important issue of street children in Latin America and other minority issues. Offered: Winter

P

4 hrs

[back to top](#)

SOC-SCI 465 P Human Resources In The Service Industry

This course will trace the historical development, and examine current policies and procedures of human resources in service organizations. Special emphasis will be placed on understanding the evolving importance of employees in developing systems to meet operational goals. Management and labor perspectives on legal employment issues, compensations issues, and team development strategies will be examined. Prerequisites: None. Offered: Any Semester.

P

4 hrs

[back to top](#)

SOC-SCI 489 P Internship In Hospitality Studies

This course will allow students to demonstrate mastery of acquired theories and principles in conjunction with a working hospitality organization. Emphasis will be placed on directed research and readings to enhance individual understanding or concepts. Students will work with the Hospitality Studies Coordinator on exact course requirements. Prerequisites: Permission of instructor. Offered: Every Semester.

P

4 hrs

[back to top](#)

SOC-SCI 490 C Readings In Labor Economics

See ECON 490C. Prerequisites: ECON 201 and ECON 202. Offered: Winter.

P

1 hr

[back to top](#)

PACE - Sociology

SOCIOL 381 P Everyday Masculinities

This independent study course is designed to encourage students to put into play their study of and growing understanding of men's lives. Each student will design and carry out an independent study/research project that will take into account (critically) the experience of at least three men in their immediate surroundings. Ethnographic methods (observation, field-note/interview and transcription strategies, write-up, etc.) will be covered to facilitate the student's successful completion of their project. The project will be broken down into phases to insure timely progress throughout the semester. Restrictions: Concurrent enrollment in Meanings of Masculinity required.

P

4 hrs

[back to top](#)

Philosophy (PHILOS)

PHILOS 210 Foundations Of Philosophy

An introduction to the principal problems with which philosophy is concerned: methods of inquiry; rules of correct reasoning; analysis of values and value systems; appraisals of basic beliefs and attitudes. Emphasis is on the contribution of important movements and major philosophers and on the relevance of philosophy to religious, political, social, and scientific issues. Prerequisite: Sophomore standing or consent of the instructor.

3 hrs

[back to top](#)

PHILOS 221 Contemporary Moral Issues

This course offers a philosophical examination of ethical issues in contemporary society. Topics for discussion include ethical conflicts arising in business and technology, engineering, healthcare, politics, and the environment. Moral concerns addressed may include reproductive rights and technologies, warfare, capital punishment, pornography, privacy, consumerism, euthanasia, sexuality, and animal welfare.

3 hrs

[back to top](#)

PHILOS 222 Foundations Of Logic And Scientific Method

An introduction to the logic of evidence. Attention is given to language analysis, fallacies of reasoning, deductive and inductive procedures, subjective factors of reasoning and scientific method. Emphasis is on the practical application of basic principles to the analysis of ethical, economic, political, and scientific physical arguments and theories. Prerequisite: Sophomore standing or consent of the instructor.

3 hrs

[back to top](#)

PHILOS 300 CK Cluster Course: Controversy And Choice In Life And Science

An examination of advances in the health and life sciences that involve methodological questions about the pursuit and acceptance of theories. Procedures for choosing and conducting research will be analyzed using a model that incorporates existing knowledge. Assessment and management of research are also explored. Participating guests will present solutions derived.

3 hrs

[back to top](#)

PHILOS 310 WI Ancient Philosophy

A survey of the central figures of classical philosophy: the pre-Socratics, Socrates, Plato, Aristotle, the Stoics, the Epicureans and other philosophers of antiquity. The contributions of major philosophers to the development of science, religion, and social and political theories are studied. Prerequisites: PHILOS 210, PHILOS 222 or an equivalent and successful completion of the WEPT Offered: Fall.

3 hrs

[back to top](#)

PHILOS 315 Logic And Methodology In The Health And Social Sciences

Analysis of the reasoning processes and theory-building procedures specific to the health and social sciences. As its major focus, the course will critically examine the philosophical foundations of the health and social sciences using the case study method. In addition, brief case study analyses of reasoning and theory-construction in the physical sciences will be offered in comparison. Prerequisite: PHILOS 210, PHILOS ,222.

3 hrs

[back to top](#)

PHILOS 320 WI Descartes To Hume

A survey of the central figures of modern philosophy: Rene Descartes, Baruch Spinoza, Gottfried Leibniz, Thomas Hobbes, John Locke, George Berkeley, David Hume and Immanuel Kant. In addition to the philosophical issues of the period, cultural, historical and political matters are considered. A secondary goal is the establishment of the pedigree of contemporary philosophical problems. Prerequisites: PHILOS 210, or PHILOS 222 or an equivalent and successful completion of the WEPT Offered: Winter.

3 hrs

[back to top](#)

PHILOS 321 Ethics

Attention is given to the nature of ethical ideas and the development and history of ethical theory. Prerequisites: PHILOS 210, PHILOS 221, or PHILOS 222, or with permission of instructor.

3 hrs

[back to top](#)

PHILOS 322 Philosophy of Literature

A close study of the ancient problems at the intersection of philosophy and literature: what sort of truth, if any, do we find in literature? Does literature have ethical content? What makes a literary text beautiful? How do "literary" texts defer from philosophical and other kinds of texts? Should literary texts influence our thinking about politics and other social issues? We will study classic philosophers like Plato, Aristotle, Kierkegaard, and Nietzsche, great literary writers such as Sappho, Dante, Goethe, Dostoevsky, and Rilke, and harder to categorize figures like Freud. The class will include the study of several recent philosophers who worked specifically on the subject of the "philosophy of literature," such as Bakhtin, Benjamin, Lacan, Szondi.

3 hrs

[back to top](#)

PHILOS 325 Aesthetics

The basic problems of aesthetics are examined, with special emphasis on the character of the work of art, the aesthetic response of the viewer, the creative process of the artist, and the nature of aesthetic criticism. These topics are discussed in light of conflicting aesthetic theories. Prerequisite: PHILOS 210, PHILOS 222, or equivalent.

3 hrs

[back to top](#)

PHILOS 326 Epistemology: Theories Of Knowledge

A study of the problems connected with the nature of knowledge and human understanding. Prerequisite: PHILOS 210, 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 327 Metaphysics: Theories Of Reality

An investigation of the essential problems regarding the nature of reality in its most general aspects. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 328 Philosophy In The Middle Ages

The history of philosophy from St. Augustine to William of Ockham, including analysis of the relationships of medieval philosophical developments to earlier and later philosophical developments. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 329 American Philosophy

The main trends of American thought are covered, with special emphasis on the philosophies of Peirce, James and Dewey. Prerequisite: PHILOS 210 or PHILOS 215 or PHILOS 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 330 19Th-Century Philosophy

Following a review of the influence of Kant on European thought, consideration is given to the German idealists, Comte and Positivism, Mill and Empiricism, British Neo-Hegelianism, the rise of Evolutionary Philosophy and Nietzsche. Prerequisites: PHILOS 210 or PHILOS 215 or PHILOS 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 331 Philosophy Of Religion

An analysis of the nature and function of religion and its relation to culture. An examination is made of the basic ideas of religion, and special attention is given to the problems of religion and reality, religion and science, and the changing character of religion in our times. No prerequisites.

3 hrs

[back to top](#)

PHILOS 332 Existentialism

A study of the development of existentialism. Selections from the works of such thinkers as Kierkegaard, Nietzsche, Sartre, Heidegger, Camus and other related philosophers are considered. Special attention is devoted to the existential movements in literature, social science and medicine. Prerequisite: PHILOS 210, PHILOS 222 or equivalent.

3 hrs

[back to top](#)

PHILOS 333 Social And Political Philosophy

A consideration of representative views of the place of man in contemporary society. Contributions in psychology, political theory, economics, sociology and anthropology are investigated philosophically with a view toward offering a critical appraisal of the nature of man in the human community. No prerequisites.

3 hrs

[back to top](#)

PHILOS 334 Philosophy Of Science

A critical analysis of the assumptions, methods and conceptual frameworks of the sciences. The course emphasizes such topics as the influence of theory on observation; the problem of discovery, verification and experimental confirmation; and the relation of scientific language and concepts to ordinary language and beliefs. Prerequisite: PHILOS 222.

3 hrs

[back to top](#)

PHILOS 335 Philosophy Of Mind

A study of problems arising in connection with such topics as mental phenomena, the relation of mind to body, free will and determinism, the self and personal identity, and "thinking" machines. Classical and contemporary treatments of such concepts as "mind," "intention," "sensation," "perception," "stimulus," etc., and their relation to action and behavior are considered. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 336 Philosophy Of Language

A study of the nature and uses of language, with special reference to concepts of meaning, denotation, reference, syntax, name, metaphor, vagueness, and definition. Applications in the fields of psychology, linguistics, anthropology, and literary criticism are examined. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 337 Philosophy Of History

A discussion of methodological and substantive issues, including the nature of historical explanation, whether history can be a science, and various theories of history such as those of Vico, Hegel, Marx, and Collingwood. Prerequisite: PHILOS 210, PHILOS 215, PHILOS 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 338 Philosophy Of Biology

An investigation of methodological and conceptual issues in biology, such as the roles of mechanistic and teleological explanations, reductionism, the nature of evolutionary theories, and the relation between taxonomy and the concept of species. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 340 Philosophy Of Law

An analysis of major philosophies of law, including methods of justifying legal systems through natural law, legal positivism, sociological jurisprudence, theology, etc. Contemporary legal theories are critically analyzed. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 344 Philosophy of Sport

This course uses sports as a point of departure to explore central philosophical themes in metaphysic/epistemology, aesthetics, ethics, and social/political philosophy. Students will explore the concept and role of sports in society from ancient Greece to modern times.

3 hrs

[back to top](#)

PHILOS 346 Metaphysics and Epistemology

this course is an advanced overview of some central themes in metaphysics nad epistemology. Metaphysics focuses on basic questions about the nature of reality. Epistemology is concerned with questions about knowledge and justification. In this class, we will explore a variety of topics (causation, universals, scepticism, induction, etc.) that occupy contemporary philosophers. Prerequisite: PHILOS 222 or consent of the instructor.

3 hrs

[back to top](#)

PHILOS 350 Case Studies In The Methodologies Of Science

Topics in the methodology of science are considered through an examination of case studies in the history of science. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 360 Current Issues In Bioethics

Alternative approaches to issues such as life and death, human experimentation, the scarcity of resources, contraception, abortion, euthanasia, eugenics, etc. will be discussed critically. Major theories of ethics will be applied to several of the issues in order to have the student develop his or her own approach to ethical decision making in the area of bioethics. No prerequisites.

3 hrs

[back to top](#)

PHILOS 370 Environmental Ethics And Policy

Various philosophical approaches to issues such as the value of nature, human obligations to non-human animals, species, ecosystems and future generations; environmental justice; restoration; resource use; environmental politics; and the relation between environmental issues, policy and ethics will be discussed critically. Prerequisite: None Offered: Annually Restrictions: None

3 hrs

PHILOS 400 Interdisciplinary Studies: Cluster Course Offerings

3 hrs

[back to top](#)

PHILOS 400 CJ Cluster Course: Aesthetic Issues In The Arts

Specialists in various art forms (e.g., literature, music, painting) will discuss specific artworks from their own perspective as artists and/or critics. This gives the student first-hand experience of how questions dealt with in the philosophy of art arise. Using this common core of examples, philosophical issues such as relevance of artists' intentions to interpretation and evaluation, the nature of aesthetic value, the nature and significance of comedy, and special issues raised by contemporary developments in the arts are discussed.

3 hrs

[back to top](#)

PHILOS 400 CO Cluster Course: Issues In Death And Dying

A study of the various philosophical dimensions of death and dying in the history of thought from the pre-Socratics through the contemporary existentialist philosophers. Topics to be critically examined will include the ethical, religious and legal implications of the changing definitions of death, active and passive euthanasia, suicide, the ethical aspects of truth telling, and the impact of technological and scientific advancements as they relate to the rights and dignity of the dying patient and survivors as well as special populations such as children and incapacitated persons. The philosophical dimensions of death and dying will include epistemological, metaphysical, ethical and hermeneutic aspects. Alternate theories and approaches to ethical decision making concerning this important aspect of human existence will be presented.

3 hrs

[back to top](#)

PHILOS 423 Symbolic Logic

Advanced analysis of deductive procedures; sentential connectives, quantifiers, classes, and relations; the notion of formal system; introduction to axiomatics and metalogical proofs. No prerequisites.

3 hrs

[back to top](#)

PHILOS 424 Art, Aesthetics And Society

This course examines various moral and social issues concerning the arts and the aesthetics of our environment, bringing in case studies of particular artworks. It explores the relationships between aesthetic and moral value in the case of censorship, the effect of images on the public, and the aesthetics of the natural environment. It also looks at how public art is supposed to serve the public, and ethical dilemmas faced by art museums.

3 hrs

[back to top](#)

PHILOS 425 History Of Aesthetics

An examination of the major thinkers in the history of aesthetics, such as Plato, Aristotle, Kant, Nietzsche, Tolstoy and Croce. The focus will be on how their ideas bear on topics which will interest anyone desiring to understand the origin, nature and value of the arts. Examples of these topics are the relationships among art, knowledge and morality; the natures of originality, creativity and genius; the importance of form, content and expression of emotions; and standards of taste and the claims of criticism. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 430 Plato

Selected dialogues of Plato are studied with a view to understanding Plato's philosophy and its position in the world of Greece and antiquity. Plato's philosophy is also examined with reference to his place in the Western tradition and in modern philosophy. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 431 Aristotle

Selected portions of Aristotle's works on logic, metaphysics, science, ethics, politics, and poetics are studied with a view to understanding Aristotle's philosophy and its position in the world of Greece and antiquity. Aristotle's philosophy is examined with reference to its place in the Western tradition and in modern philosophy. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 435 R The British Tradition In Philosophy

This course is a survey of major British philosophers. Among those who will be studied are Thomas Hobbes, John Locke, David Hume, J.S. Mill, E.H. Bradley, and Bertrand Russell. The influence of British philosophy on other philosophical movements will also be included. Prerequisite: PHILOS 210, PHILOS 215, PHILOS 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 436 Kant

A study of selected writings of Immanuel Kant, with particular emphasis on the epistemological, metaphysical and ethical aspects of Kant's philosophy; an examination of Kant's significance within contemporary thought. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

3 hrs

[back to top](#)

PHILOS 445 20Th-Century Philosophy

A study of the development of philosophy in the 20th-Century, treating such movements as Idealism, Realism, Logical Positivism, Existentialism, Phenomenology, Pragmatism, and Analytic Philosophy. Prerequisite: PHILOS 210 or PHILOS 215 or PHILOS 222.

3 hrs

[back to top](#)

PHILOS 448 Recent Ethical Theories

An analysis and investigation of modern and contemporary ethical theories. Among the theories considered are ethical relativity, the emotive theory, utilitarianism, neo Kantianism, and situation ethics. Prerequisite: PHILOS 321.

3 hrs

[back to top](#)

PHILOS 450 WI Ethics And Government

An examination of ethical issues related to government, with the primary focus on national and local governmental bodies in the United States. Ethics in the executive, legislative and judicial branches are examined. Ethical standards for elected officials and appointed public servants are reviewed. Attempts to "legislate morality" are considered. The course includes a historical review of ethics and government and an analysis of the legal implications of legislation regarding ethics in the executive branch. Prerequisite: PHILOS 210 or permission of the instructor. Offered: On demand.

3 hrs

[back to top](#)

PHILOS 480 Selected Topics

Each time this course is offered a particular philosopher or particular area of philosophy will be the topic of discussion. The course may be repeated for credit when the topic varies. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent, depending on the topic.

1-3 hrs

[back to top](#)

PHILOS 480 A Selected Topics

1-3 hrs

[back to top](#)

PHILOS 480 B Selected Topics

1-3 hrs

[back to top](#)

PHILOS 490 Special Topics And Readings

Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies. Prerequisite: PHILOS 222, 310, 320, 321 or 423.

1-3 hrs

[back to top](#)

PHILOS 490 B Special Topics And Readings

Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies. Prerequisite: PHILOS 222, 310, 320, 321 or 423.

1-3 hrs

[back to top](#)

Physics

PHYSICS 102 Introduction To Physics

Introduction to fundamental concepts and basic laws of physics with daily life examples. Simple problem solving techniques. This course will meet the area requirements for the natural sciences. Prerequisite(s): None.

3 hrs

[back to top](#)

PHYSICS 130 Physics of Sports

A course intended for liberal arts students focusing on the physics involved in different sports. Physical laws and technological developments that impact sports will be studied.

3 hrs

[back to top](#)

PHYSICS 140 How Things Work

A course intended for liberal arts students focusing on the principles of operations, histories, and relationships of objects from our daily environment. The areas of investigation include mechanical and thermal objects, electromagnetism, light, special materials and nuclear energy. This course will meet the area requirement for natural sciences. Offered: Every Winter.

3 hrs

[back to top](#)

PHYSICS 140 L How Things Work Laboratory

Simple experiments based on everyday experiences are analyzed in terms of conceptual physics. The material includes elements of mechanics of a rigid body, elastic properties of matter, fluid dynamics, thermodynamics, electromagnetism, optics and modern physics. The laboratory supplements the PHYSICS 140 lecture and must be taken concurrently with the lecture. Offered: Every Winter. Restrictions: Concurrent with PHYSICS 140

1 hr

[back to top](#)

PHYSICS 150 Introduction To Astronomy

A survey of modern topics in astronomy covering cosmological origins, galaxy formation, stellar structure and generation of the chemical elements found in planetary systems. Exotic objects such as supernovae, white dwarves, black holes, neutron stars and quasars will be introduced as indicators of large-scale, energetic astronomical processes. This course will meet the area requirement for the natural sciences. Prerequisite(s): College Algebra or Equivalent.

3 hrs

[back to top](#)

PHYSICS 160 Vision and Imaging: From Light to Electrons

This course is intended for non-Physics majors who wish to learn about recent development in the field of physics. Students will explore light and electrons and learn how they are used to visualize nature from microscopic to macroscopic scales. The underlying physics principles in various imaging techniques and the concept of optics will be explained. Intriguing images will be shown and interpreted, to demonstrate that physics is fascinating and has great impact on our lives. No specific mathematics is required for taking this course. This course will meet the area requirements for the natural sciences.

3 hrs

[back to top](#)

PHYSICS 171 Physics for Future Presidents

A course intended for liberal arts students focusing on the physics they need to be informed citizens in a democracy. Energy, global warming, terrorism, and health are examples of the important topics examined from the perspective of how science should inform policy.

3 hrs

[back to top](#)

PHYSICS 210 General Physics I

Fundamental principles of physics including mechanics, heat and energy, and applications of these principles to different interdisciplinary natural science. Prerequisite or corequisite: College mathematics including trigonometry and algebra or equivalent. Three lectures and one two hour laboratory period per week. Offered: Fall and Winter.

4 hrs

[back to top](#)

PHYSICS 220 General Physics II

Fundamental principles of physics including sound, electricity, magnetism, optics, elementary modern physics, and applications of these principles to different interdisciplinary natural science. Prerequisite: PHYSICS 210 or equivalent or consent of instructor. Three lectures and one two hour laboratory period per week. Offered: Fall and Winter

4 hrs

[back to top](#)

PHYSICS 240 Physics For Science And Engineering I

Introduction to mechanics, wave motion and sound and heat and thermodynamics. CoRequisite: Calculus I Offered: Fall and Winter

5 hrs

[back to top](#)

PHYSICS 250 Physics For Science And Engineering II

Introduction to electricity and magnetism, light and optics and modern physics. Prerequisite: Physics for Science and Engineering I. Corequisite: Calculus II or consent of instructor. Four hours lecture and two hours laboratory per week. Offered: Fall and Winter.

5 hrs

[back to top](#)

PHYSICS 260 Introduction To Stellar Astronomy

An introduction to such topics as the properties of stars, their evolution, galaxies, nebulae, quasars and cosmology. Offered: Fall-Odd Years.

3 hrs

[back to top](#)

PHYSICS 265 L Astronomy Laboratory

Experiments in planetary motion, apparent solar time, stellar spectra, stellar magnitudes, binary stars, telescopic observations of the sun, moon and planets. Prerequisite: PHYSICS 260 or concurrently and consent of instructor. Offered: On demand.

2 hrs

[back to top](#)

PHYSICS 270 Introduction To Solar System Astronomy

A non-mathematical introduction to the astronomy of the solar system including the properties of the sun, planets and their satellites. Offered: On Demand.

3 hrs

[back to top](#)

PHYSICS 280 A Survey Of Astronomy

A one semester non laboratory science course intended for non-science majors which will cover the early history of Greek astronomy, the advances of the Renaissance, the physics of astronomy, the structure of the universe both our local solar system and on a galactic scale, and current development in the dynamic field of astronomy. Offered: On Demand.

4 hrs

[back to top](#)

PHYSICS 301 A Basic Science Physics

Selected topics from physics; their development and application to everyday problems. Discussion and demonstrations. Intended for teachers in the elementary schools. Offered: On Demand.

1 hr

[back to top](#)

PHYSICS 310 Mechanics I

Advanced statics and dynamics of particles and rigid bodies including gravitation. Prerequisites: One year of physics and calculus or consent of instructor. Offered: Fall.

3 hrs

[back to top](#)

PHYSICS 311 Mechanics II

Continuation of Mechanics I, including mechanics of continuous media, Lagrange's equations, tensor algebra and theory of small vibrations. Prerequisite: Mechanics I or consent of instructor. Offered: Winter.

3 hrs

[back to top](#)

PHYSICS 330 Methods Of Theoretical Physics I

Introduction to mathematical and numerical methods used in the theoretical modeling of physical systems. Treatments of linear systems in scientific and engineering applications will be emphasized. Prerequisite: MATH 250

3 hrs

[back to top](#)

PHYSICS 350 Modern Physics With Engineering Applications

An introduction to quantum and relativistic effects with applications in solid state, atomic and nuclear physics and in engineering problems. Prerequisites: MATH 345 and PHYSICS 240 PHYSICS 250. Offered: Winter Semester.

3 hrs

[back to top](#)

PHYSICS 380 Modern Developments In Physics I

4 hrs

[back to top](#)

PHYSICS 381 Modern Developments In Physics II

4 hrs

[back to top](#)

PHYSICS 385 L Elementary Circuits Laboratory

An introduction to analog and digital electronics. The topics covered include passive filters, operational amplifier applications, digital logic, and digital timing circuits. Prerequisites: Must be taking or have completed six hours of Physics courses numbered 300 or above.

3 hrs

[back to top](#)

PHYSICS 395 L Computer Interfacing Laboratory

An introduction to computer interfacing through the use of serial and parallel ports, and digital-to-analog and analog-to-digital converters. The course also introduces digital filtering techniques, data analysis techniques, and graphical presentation data. The programming techniques are taught using high level programming languages currently used in research and development labs. Prerequisite: PHYSICS 385L Offered: Fall Even Years.

3 hrs

[back to top](#)

PHYSICS 410 Thermal Physics

A study of the laws of thermodynamics and their applications, with an introduction to kinetic theory. Statistical methods are emphasized. Prerequisites: One year of physics and calculus. Offered: Fall Odd Years.

3 hrs

[back to top](#)

PHYSICS 413 Computational Physics

Introduction to scientific programming and numerical analysis with applications to physics. Prerequisites: Undergraduate mathematics through differential equations plus one year of physics or consent of instructor. Offered: Even Years.

3 hrs

[back to top](#)

PHYSICS 420 Optics

Geometrical optics, physical optics and introduction to selected topics in modern optics. Prerequisites: One year of physics and Calculus I and II.

3 hrs

[back to top](#)

PHYSICS 425 LW Optics Laboratory

Fundamental experiments with geometrical and physical optics. Prerequisite: Must be taking or have completed PHYSICS 420 and successful completion of the WEPT (effective FS93).

3 hrs

[back to top](#)

PHYSICS 431 Methods Of Theoretical Physics II

A continuation of PHYSICS 430R stressing applications to Physical and engineering problems. Prerequisite(s) PHYSICS 430R Offered: Winter

3 hrs

[back to top](#)

PHYSICS 445 Modern Physics Laboratory

Classical experiments in modern physics including such topics as hydrogen spectra, Faraday effect, holographs, e/m of the electron, the photoelectric effect, the Zeeman effect and the Franck-Hertz experiment. Four hours of laboratory work per week. Must have completed WEPT. Corequisite: PHYSICS 350. Offered: Winter-Even Years.

3 hrs

[back to top](#)

PHYSICS 450 Introduction To Solid State Physics

Crystal structure and binding, elementary lattice dynamics and energy band theory. Free electron models, theory of semiconductors and metals. Prerequisites: Mechanics I or Thermal Physics, or consent of instructor. Offered: Fall-Even Years.

3 hrs

[back to top](#)

PHYSICS 460 Electricity And Magnetism I

Static electric fields in free space and material media; Kirchoff's laws and direct current circuits; static magnetic fields. Prerequisite: One year of physics and calculus. Offered: Fall.

3 hrs

[back to top](#)

PHYSICS 461 Electricity And Magnetism II

Magnetostatics; alternating current circuits; Maxwell's equations and radiation; special relativity; topics in electromagnetism. Prerequisite: PHYSICS 460 or consent of instructor. Offered: Winter.

3 hrs

[back to top](#)

PHYSICS 472 Introduction To Quantum Mechanics

Introduction to the theory and applications of quantum mechanics with emphasis on the mathematical treatment of modern physics. Prerequisite: PHYSICS 350 or consent of instructor. Offered: Winter.

3 hrs

[back to top](#)

PHYSICS 475 Nuclear Physics Laboratories

Experiments concerning the properties of alpha, beta and gamma radiation, their emission and interactions with matter. Must have completed WEPT. Four hours of laboratory work per week. Offered: Winter-Odd Years.

3 hrs

[back to top](#)

PHYSICS 480 Electron and Scanning probe Microscopy

The principles of electron optics, diffraction, and sample preparation, image interpretation and photographic processing are taught; student operation of the electron microscope and individual projects are emphasized. Must have completed WEPT. Prerequisite: Consent of instructor. Offered: Fall.

3 hrs

[back to top](#)

PHYSICS 481 Electron Microscopy II

Graduate student research applications of electron microscopy to special projects are emphasized. Prerequisite: PHYSICS 480. Offered: On Demand.

3 hrs

[back to top](#)

PHYSICS 482 X-Ray Analysis:Theory And Practice

The physics of x-rays, methods of their detection, crystallography, x-ray diffraction, x-ray spectrometry, and sample preparation. Emphasis on laboratory techniques and the use of x-ray analysis as an analytical tool. Two hours lecture and two hours laboratory per week. Prerequisites: Consent of the instructor and senior departmental standing. Offered: On Demand.

3 hrs

[back to top](#)

PHYSICS 490 Special Problems

The kind of problem and the amount of credit to be given by arrangement with the department. Prerequisite: Consent of the department. Offered: On Demand.

1-3 hrs

[back to top](#)

PHYSICS 499 Undergraduate Research

Independent student research on a physics/astrophysics project under the supervision of a faculty member. Projects will engage students in aspects of the scientific process including data collection and analysis, research methods and strategies, scientific discussion and written/oral communication. Requires a minimum of 3-4 hours of research per week for each credit hour.

1-3 hrs

[back to top](#)

Physical Science

PHY-SCI 110 Foundations Of Physical Sciences I

Fundamental principles and concepts of the various physical and mathematical sciences, integrated by the history and philosophy of science. Fall and winter semester.*

4 hrs

[back to top](#)

PHY-SCI 110 L Foundations Of Physical Sciences, Laboratory I

General laboratory and discussion sessions on various topics in the physical and mathematical sciences.

1 hr

[back to top](#)

PHY-SCI 435 P Selected Topics In The History Of Science

3 hrs

[back to top](#)

PHY-SCI 435 PF Selected Topics In The History Of Science

3 hrs

[back to top](#)

Political Science

POL-SCI 210 American Government

American government and politics, with special reference to the U.S. Constitution. This course meets the state requirement for study of the U.S. and Missouri Constitutions. Prerequisite: None. Offered: Every semester.

3 hrs

[back to top](#)

POL-SCI 220 Introduction To Comparative Politics

An analysis of the way political institutions, processes and policies vary from country to country. Emphasis on politics in Europe, with attention to other nations when making comparisons. Prerequisite: None.

3 hrs

[back to top](#)

POL-SCI 300 Interdisciplinary Studies:Cluster Course

Provides an overview of the interrelationships of the humanities and social sciences. Offered in conjunction with other departments.

3 hrs

[back to top](#)

POL-SCI 300 CS Cluster Course: History Of Russian Culture

3 hrs

[back to top](#)

POL-SCI 301 Western Political Philosophy

An examination of the major theories of politics from Plato to today.

3 hrs

[back to top](#)

POL-SCI 302 Political Research And Analysis

The Internet and CD-Rom have opened up many sources of political information, and the computer facilitates the running of political simulations. The computer also makes it possible for many to use and to understand basic statistical techniques for the first time. In this course we will explore these and other techniques of political research and analysis. Prerequisites: None.

3 hrs

[back to top](#)

POL-SCI 303 Political Behavior

This course will survey research on conventional and unconventional forms of mass political behavior. Topics to be discussed include campaign participation, voting behavior, public opinion, the media, and participation in protests and revolutions. This course will also cover the methodological approaches to the study of political behavior.Offered: Spring

3 hrs

[back to top](#)

POL-SCI 304 Politics Of The Developing Nations

An analysis of the evolving political systems of the new nations in Africa, Asia and Latin America. Social, cultural and economic influences on political processes and policies are explored.

3 hrs

[back to top](#)

POL-SCI 305 Survey Research And Analysis

Students will learn the process of research design and how one designs and implements surveys. The students will also learn how one analyzes survey data. Prerequisite: None Offered: Annually

3 hrs

[back to top](#)

POL-SCI 306 International Relations

An analysis of relations among nations, with emphasis on structures of international power, causes of war, and approaches to peace.

3 hrs

[back to top](#)

POL-SCI 307 The United Nations: Politics And Economics

This interdisciplinary course covers many facets of the United Nations, acquainting students with its structure, its operations and its involvement in international events, past and present. It merges politics, economics issues and the history of the UN in an effort to understand more fully the UN's role in international diplomacy. Students in this course will have an opportunity to participate in various Model UN conferences during the year. Offered: Fall Semester

3 hrs

[back to top](#)

POL-SCI 308 Politics, Parties And Pressure Groups

This course is an introduction to parties and interest groups, and their important role in the political process. We will examine the formation, organization, activities, and impact of political parties and interest groups in the US and in comparative perspective.

3 hrs

[back to top](#)

POL-SCI 309 Public Opinion And Voting Behavior

A study of the formation, distribution and expression of public opinion and partisanship in the American political system.

3 hrs

[back to top](#)

POL-SCI 310 African Americans and the American Political Process

This course will analyze political culture, socialization, and mobilization with a focus on trends in the interaction between African Americans and institutions, processes, policies, and other actors that comprise the American system of politics and governance. Offered: Every other semester

3 hrs

[back to top](#)

POL-SCI 311 Comparative Politics: Techniques Of Social Control

An analysis of techniques used by regimes to perpetuate themselves in office and the effects of these techniques upon constitutional continuity, ideology, and social and economic change.

3 hrs

[back to top](#)

POL-SCI 312 Mass Media And American Politics

An examination of the role of mass media in American electoral and policy processes.

3 hrs

[back to top](#)

POL-SCI 313 Politics In The American States

A study of the structures, functions, and politics of the institutions of American state governments and an assessment of their role in the federal system. This course is particularly interested in the extent to which political economy and political culture, broadly defined, influence public policy within the states. Prerequisite: None.

3 hrs

[back to top](#)

POL-SCI 314 Politics of Kansas City Metro

This course will provide an understanding of politics in urban America through a study of metropolitan Kansas City. It will discuss the relationships between local governments, their decision making process, city-county consolidation, structure of regional council of governments, forming political alliances and current political issues affecting the metropolitan area. The course will discuss the politics of issues like transportation, sports facilities, environment and economic competitiveness.

Offered: Winter

3 hrs

[back to top](#)

POL-SCI 316 Terrorism And Political Violence

This course explores terrorism and armed struggle from theoretical and historical perspectives, and analyzes a number of violent movements with nationalist, ideological, and religious motivations. Offered: As Needed

3 hrs

[back to top](#)

POL-SCI 317 Revolutionary Origins Of The Modern State

An examination of the radical changes in economics, the social order, institutions and ideologies since the French Revolution which have led to the rise of totalitarianism and unstable democratic political systems in the advanced industrial nations.

3 hrs

[back to top](#)

POL-SCI 318 Political Psychology

The field of political psychology is an interdisciplinary field that draws on both psychology and political science to address topics in the political world. This course will focus on a variety of topics including inter-group conflict, stereotyping and prejudice, political socialization, attitude formation and change, political communication, decision heuristics and biases , public opinion, and the future of political psychology.

3 hrs

[back to top](#)

POL-SCI 319 Campaigns And Elections

This course will examine the role of campaigns in determining the outcome of both congressional and presidential elections and the way that electoral rules structure both campaign strategies and electoral outcomes. This course focuses on topics such as the role of the media, campaign advertising, campaign financing, public opinion, registration requirements, and the role of interest groups.

3 hrs

[back to top](#)

POL-SCI 326 Racial & Ethnic Politics

This course provides an analysis of the political behavior and roles of racial and ethnic groups in the American political system. Theoretical, empirical, and practical issues of race, racism, and race relations are examined (in the political context). Public policy, electoral behavior, and political institutions are also investigated with regards to the empowerment and political incorporation of communities of color

3 hrs

[back to top](#)

POL-SCI 327 Nationalism And Ethnic Conflict

Nationalism and ethnicity serve as a basis for group identification, political mobilization, terrorism, war, and genocide. This course provides students with theoretical frameworks for analyzing nationalism and ethnic strife, and explores case studies to test our assumptions and theories about nationalist violence. Offered: As needed

3 hrs

[back to top](#)

POL-SCI 328 State And Local Government

In this course, we will cover the major issues, institutions, and political actors involved with state and local government. The class will expose you to how American federalism impacts states, metropolitan regions, and cities. The politics of governance, agenda setting, and public budgeting are also examined. The main objective is to develop a good understanding of the literature (theoretically, empirically and practically) on state and local politics.

3 hrs

[back to top](#)

POL-SCI 336 American Foreign Policy

Understanding the contemporary debate over American foreign policy in terms of the premises and perspectives of several competing schools of thought.

3 hrs

[back to top](#)

POL-SCI 338 Religion And Politics

This course explores the rise of Islamic, Christian, and Jewish fundamentalisms in the modern world and assesses their impact on states, societies, and cultures around the globe. It explores how faith can be used to organize and legitimate social activism, liberation movements, and political terrorism. Offered: As needed

3 hrs

[back to top](#)

POL-SCI 339 Cyberspace, Technology, and Politics

In this course we will read significant thinkers who are pondering major changes occurring in politics and society because of technology and the internet. Some argue that the world is getting "flat" and think that the change will be beneficial, while others believe we need to make economic units smaller and more local. We will also explore the internet, blogs and web 2.0 and explore their effect on our lives and on politics.

3 hrs

[back to top](#)

POL-SCI 341 The Theory Of Democracy

Analysis of the writings of philosophers like Hobbes, Locke, Rousseau, Marx and Nietzsche who developed and analyzed the ideas associated with modern democracies.

3 hrs

[back to top](#)

POL-SCI 342 American Political Thought

A study of American political ideas, with emphasis on current problems and conflicts, and intellectual responses to social change.

3 hrs

[back to top](#)

POL-SCI 343 The Politics Of Social Security

A study of the American Social Security system, including its history, principles, and prospects for the future.

3 hrs

[back to top](#)

POL-SCI 344 Jurisprudence

An examination of theories of law from the viewpoint of political science.

3 hrs

[back to top](#)

POL-SCI 345 The Politics Of Sex And Gender

Just as there is a politics of class and race, so is there a politics of sex and gender. Though gender roles and sexual practices seem as though they are natural, post-modern theorists argue that they are social constructions that change over time, privilege some groups, and disadvantage others. In this course we will examine the debate between opposing viewpoints and discuss how and where political decisions are made in this area. Prerequisite: None.

3 hrs

[back to top](#)

POL-SCI 346 Introduction to the Trial Process

This course examines the trial process. We examine both about the structure of the judicial system and the different elements of a trial. Students will also participate in a mock trial using the American Mock Trial Associations annual problem.

3 hrs

[back to top](#)

POL-SCI 348 Constitutional Law: The Federal System

A study of the president, congress and state governments from the perspective of the Constitution, emphasizing powers and limitations on the exercise of authority.

3 hrs

[back to top](#)

POL-SCI 349 Constitutional Law: Civil Liberties

A study of civil liberties in American society, emphasizing factors and forces that restrict or enlarge their scope, as understood through constitutional interpretation.

3 hrs

[back to top](#)

POL-SCI 353 Chinese Politics

China's political system from earliest origins to the present. Close attention is given to the manner in which current political and economic institutions function. Comparisons are made with other communist and Asian political systems.

3 hrs

[back to top](#)

POL-SCI 354 Politics In Russia

A study of domestic and international politics in Russia, emphasizing the post-Soviet period.

3 hrs

[back to top](#)

POL-SCI 355 Politics In Eastern And Central Europe

An analysis of the internal politics and foreign policies of the Czech Republic, Slovakia, Hungary, Poland, and selected other countries in East-Central Europe, emphasizing the transition to post-Communist rule and new and enduring patterns of political culture.

3 hrs

[back to top](#)

POL-SCI 357 European Politics

An examination of government and politics in the established democracies of Western Europe, and of political developments in the former Communist states of Central and Eastern Europe. Offered: Winter .

3 hrs

[back to top](#)

POL-SCI 359 Latin American Politics

In this course we will focus on the major periods in Latin American political history since the Great Depression. This includes the post-War period of optimism in which democratic governments promoted rapid economic development, the period of pessimism and authoritarianism from the 1960s to the 1980s, and a new democratic renewal beginning in the 1990s. We will examine the consolidating democracies that emerged in the 1990s in depth. We will also examine case studies of recently failed democracy, Venezuela, and ask why this democracy failed.

3 hrs

[back to top](#)

POL-SCI 360 Labor, Politics and Society

This course explores many aspects of unions and the labor movement in society and the vital role organized labor plays as a pillar of democratic society. Unions impact the economy, growth, and the distribution of wealth, and the impact racial and gender equality, social security health and job safety, energy and the environment, and even foreign relations. As a social movement, labor has had a major impact on American history. This course covers these topics from a labor perspective. It examines current obstacles for union organizing, recent union campaigns, labor's political role, and the relationship between labor and the media. This course is part of the Certificate Program in Labor Studies and is offered on the University of Missouri Interactive Video Network at UMKC, UMSL, and UMC.

3 hrs

[back to top](#)

POL-SCI 369 Politics Of The Middle East

This course explores the formation of the modern Middle East; the role of Islam in shaping its political cultures; the post-colonial transformations that shaped its current political systems; the economic and democratic reforms that challenge existing regimes; and the pivotal states and conflicts that stir regional politics. Offered: As needed

3 hrs

[back to top](#)

POL-SCI 370 Labor Law

In this course, participants will examine the role of government in the regulation of labor-management relations in the United States. While the focus of the course will be on federal laws regulating private sector labor relations, parallel issues addressed in the Railway Labor Act and state public sector labor relations law will also be covered. Specific topics include the legal framework for the organization of workers, definition of prohibited or unfair labor practices of employers and unions, legal regulation of the collective bargaining process, regulation of the use of economic weapons in labor disputes, enforcement of collective bargaining agreements and the regulation of internal trade union activities. Prerequisites: None.

3 hrs

[back to top](#)

POL-SCI 380 Political Science And Politics

Offered as a special course in the individual faculty member's area of research specialization. The course may be repeated for credit when the topic varies. The topic and instructor will be announced in advance. Prerequisite: Consent of the instructor or advanced standing.

1-6 hrs

1-6 hrs

[back to top](#)

POL-SCI 381 Mock Trial

A study of the trial process in the U.S. judicial system focusing on the structure and rules of trials, including the role of attorneys. Combination of student performance with in-class lecture and discussion. Restrictions: Consent of instructor

1 hr

[back to top](#)

POL-SCI 403 Political Ideology

A critical examination of contemporary political ideologies including democratic and authoritarian theories.

3 hrs

[back to top](#)

POL-SCI 405 American Constitutional Thought

An analysis of the development of American constitutional doctrine, with emphasis on the historical and intellectual context within which the Supreme Court changes its attitudes toward economic and political issues.

3 hrs

[back to top](#)

POL-SCI 406 Presidential Politics

This course will examine the American presidency as an institution, and will analyze its role in the American political system. It will also consider the administrations of the various presidents.

3 hrs

[back to top](#)

POL-SCI 407 Congressional Politics

A study of legislative institutions, procedures and behavior (with emphasis on the U.S. Congress) in the context of theories of political representation.

3 hrs

[back to top](#)

POL-SCI 408 Judicial Politics

An examination of the judiciary in the American political process, emphasizing the role of judges, lawyers and the Supreme Court.

3 hrs

[back to top](#)

POL-SCI 409 Bureaucratic Politics

A study of political processes that create and operate within bureaucracies in the American pluralist system. Close attention is given to the tension between representation and rationality when making decisions.

3 hrs

[back to top](#)

POL-SCI 424 Urban Politics and Community Power Structures

This course surveys and analyzes the literature covering urban politics. Students will gain both a theoretical understanding of and empirical grounding in the politics of urban America. An array of important political, social and economic problems that impact urban politics will be examined.

3 hrs

[back to top](#)

POL-SCI 425 Comparative Politics

Aspects of politics in various countries as viewed through the language and thought processes of contemporary approaches to political science.

3 hrs

[back to top](#)

POL-SCI 427 Presidential Power: foundations, Growth, Issues

An intense examination of the growth of presidential power, from its constitutional foundations; the necessity of a strong presidency, but the potential for abuse. Appropriate for the general student, as well as for majors in political science.

3 hrs

[back to top](#)

POL-SCI 428 Political Culture And Political Behavior

This course will examine the concept of political culture and its use in the empirical analyses of political behavior in advanced political systems. Emphasis will be placed on the U.S system with comparisons drawn from Western Europe. The student will be expected to complete an empirically documented research paper.

3 hrs

[back to top](#)

POL-SCI 429 Courts And Public Policy

An analysis of how courts influence policy in selected political arenas.

3 hrs

[back to top](#)

POL-SCI 432 National Security Policy

An examination of national security policy as an organizational and intellectual response to changes in technology and international conflict.

3 hrs

[back to top](#)

POL-SCI 435 Politics Of The Environment

A survey of the political aspects of environmental issues. The course poses the problems of environmental damage and examines actual and proposed policies aimed at addressing them. Also offered through the PACE program. Prerequisite: None.

3 hrs

[back to top](#)

POL-SCI 438 Urban Politics

The study of local politics and government in metropolitan areas with special attention to political party and interest group activity; community leadership, influences and "power"; and citizen participation and political behavior.

3 hrs

[back to top](#)

POL-SCI 440 Contemporary Political Thought

Political philosophy from Nietzsche to today.

3 hrs

[back to top](#)

POL-SCI 441 Political Freedom

Selected writings by political thinkers dealing with the establishment of freedom and justice in the state. Examines the challenges to political freedom under various regimes.

3 hrs

[back to top](#)

POL-SCI 442 American Political Thought

This course will focus on intellectual reactions to the major periods in American history (the movement for independence, the writing of the Constitution, the Jacksonian period, the Civil War debate, the growth of big business, the rise of the positive state and contemporary America). Contemporary theorists will be included along with Adams, Jefferson, Madison, Hamilton, Marshall, etc.

3 hrs

[back to top](#)

POL-SCI 450 WI Ethics And Government

An examination of ethical issues related to government with the primary focus on national and local governmental bodies in the United States. Ethics in the executive, legislative and judicial branches are examined. Ethical standards for elected officials and appointed public servants are reviewed. Attempts to "legislate morality" are considered. The course includes a historical review of ethics and government and an analysis of the legal implication of legislation regarding ethics in the executive branch. Prerequisite: Successful completion of the WEPT.

3 hrs

[back to top](#)

POL-SCI 451 International Politics In Europe

An examination of developments in international politics in Europe since the end of the Cold War. Issues are discussed in the context of relevant theories of international relations. Offered: every two years Restrictions: May not be taken by those who took "Europe After the Cold War"

3 hrs

[back to top](#)

POL-SCI 480 Government And Politics

This variable credit course will explore different contemporary issues and problems related to government and politics. Credit may apply to the major but will not satisfy any of the four subfields distribution requirements.

1-6 hrs

[back to top](#)

POL-SCI 480 F Government And Politics

1-6 hrs

[back to top](#)

POL-SCI 490 Senior Seminar

A review, analysis and integration of the literatures of the several sub-fields of the discipline. For senior political science majors only. Prerequisite: Senior standing. Offered: Each semester.

3 hrs

[back to top](#)

POL-SCI 491 Internship

With the written consent of the department chairman, students may participate in structured internship programs approved by the department for a maximum of six hours.

1-6 hrs

[back to top](#)

POL-SCI 492 WI Senior Seminar (Capstone)

This intensive survey of political science provides graduating seniors an opportunity for integration and review of their study of political values, behavior, and institutions. Satisfies both writing intensive and capstone requirements. Prerequisites: Senior standing in political science and completion of the WEPT. Offered: Winter.

3 hrs

[back to top](#)

POL-SCI 497 Political Science Tutorial

Senior political science majors may apply to do independent study under a selected professor. Must have written consent of the professor prior to registration. Only one tutorial will count toward the major.

3 hrs

[back to top](#)

POL-SCI 498 Honors Tutorial

Senior political science majors with a grade point average of 3.4 or above in political science may apply to do independent study under a selected professor. Must have written consent of professor prior to registration. Only one tutorial will count toward the major.

1-3 hrs

[back to top](#)

POL-SCI H220 Introduction To Comparative Politics

An analysis of the way political institutions, processes and policies vary from country to country. Emphasis on politics in Europe, with attention to other nations when making comparisons. Prerequisite: None.

3 hrs

[back to top](#)

POL-SCI H318 Political Psychology

The field of political psychology is an interdisciplinary field that draws on both psychology and political science to address topics in the political world. This course will focus on a variety of topics including inter-group conflict, stereotyping and prejudice, political socialization, attitude formation and change, political communication, decision heuristics and biases, public opinion, and the future of political psychology.

3 hrs

[back to top](#)

Psychology

PSYCH 210 General Psychology

Psychological principles and methods. Prerequisite to all other courses in psychology except with consent of the instructor. Each semester.

3 hrs

[back to top](#)

PSYCH 211 P Applied Psychology

As a science psychology seeks to understand the mind. This course discusses the major applications of this understanding to human problems and behavior. Applications of psychology to law, business and industry, mental health, medicine, education and the general community will be discussed.

3 hrs

[back to top](#)

PSYCH 215 Meditation, Self-Hypnosis, And Biofeedback

This course provides a relatively nonTechnical introduction to current information on meditation, self-hypnosis, biofeedback, and related methods. It also provides practical guidance in the safe use of these procedures. This course will be oriented toward teaching the safe, personal use of available methods rather than toward the training of professionals. On demand.

3 hrs

[back to top](#)

PSYCH 300 Industrial Psychology

General course dealing with the psychology of the work environment. Included will be work rating techniques, job descriptions, selection and placement of workers, prediction of job success, supervisory and management training programs, individual interacting with others, human relations, job morale, individual satisfaction, and the structure of organizations. Prerequisite: PSYCH 210.

3 hrs

[back to top](#)

PSYCH 300 CS Interdisciplinary Studies: Special Topics

Faculty from at least two different departments (one of which must be a department in the Division of Humanities including History) may determine the topic and syllabus, subject to the approval of the director of Integrated Studies and the program's advisory committee in addition to the approval of the departments involved. This special topics course will satisfy the interdisciplinary course requirement for the B.A. Prerequisite: PSYCH 210.

3 hrs

[back to top](#)

PSYCH 300 CT Cluster Course: Healing And Cultural Diversity

3 hrs

[back to top](#)

PSYCH 302 WI Experimental Psychology

The rationale and methodology of experimentation in psychology, emphasizing interpretation of data and the design of experiments. Three hours lecture and two hours laboratory a week. Prerequisites: PSYCH 210; PSYCH 316 must be completed prior to or concurrently with this course. Offered: Each semester.

4 hrs

[back to top](#)

PSYCH 303 WI Psychological Writing

Psychological Writing satisfies the Writing-Intensive (WI) College of Arts and Sciences requirement. Writing skills in the psychological sciences will be emphasized. Students will receive instruction and intensive practice in writing the several components of experimental psychological reports. Prerequisite: Successful completion of the WEPT exam.

3 hrs

[back to top](#)

PSYCH 304 Learning

Survey course of the fundamental principles of contemporary theories of learning. Prerequisite: PSYCH 210

3 hrs

[back to top](#)

PSYCH 305 Psychology Of Women

This course will be devoted to a critical examination of studies of the psychology and behavior of women. Special topics for consideration will be (1) the sex role development of females; (2) female biology and endocrinology; (3) learning and cognitive functioning of the female; (4) female achievement in educational and occupational settings; (5) female sexual behavior; (6) the psychotherapeutic treatment of women. Prerequisite: PSYCH 210.

3 hrs

[back to top](#)

PSYCH 308 Sensation And Perception

The experimental study of how we perceive the world through our senses. Lectures, readings, and demonstrations cover the anatomy and function of the sense organs as well as the effect of normal and altered sensory experience on behavior. Prerequisite: PSYCH 302WI must be completed prior to or concurrently with this course. Restrictions: May not be taken for graduate credit

3 hrs

[back to top](#)

PSYCH 310 Theories Of Aggression

The two major theoretical approaches relative to explaining aggression, ethological and psychological, will be presented and contrasted. The adequacy of these approaches in explaining assaultive and criminal forms of human behavior will be examined. Specific topics may include child and spouse abuse, murder, delinquency, riots, territoriality, "catharsis" in sports, television and violence and others. Prerequisite: PSYCH 210.

3 hrs

[back to top](#)

PSYCH 311 Applied Psychology

This course discusses the major applications of scientific psychology to human problems and behavior. Applications of psychology to law, business and industry, mental health, medicine, education and the general community will be discussed. May not be taken for graduate credit. Prerequisite(S): PSYCH 210. Semester Offered: on demand.

3 hrs

[back to top](#)

PSYCH 312 Social Psychology

Lecture course in theories and methods of social psychology. Topics include attitudes, attitude change, leadership, conformity, person perception, cooperation and competition, racial and social class differences. May not be taken for graduate credit. Prerequisite(s): PSYCH 210. Offered: Each semester.

3 hrs

[back to top](#)

PSYCH 316 Quantitative Methods In Psychology

Correlation analysis, testing of hypotheses, and other techniques for evaluation of experimental designs and quantitative data. May not be taken for graduate credit. Prerequisite(s): PSYCH 210, MATH 116 or MATH 110. Offered: Each semester.

3 hrs

[back to top](#)

PSYCH 320 Ethnic And Minority Perspectives In Psychology

Critical examination of the theory, methods and content of psychology relevant to the interests and needs of ethnic minorities and the contributions of ethnic groups and other minorities to the interests and needs of psychology. Prerequisite: PSYCH 210. On demand.

3 hrs

[back to top](#)

PSYCH 322 Child Psychology

The relations between child's biological and social conditions of personality; problems concerning the familial role and the guidance of the child's social adaptation. May not be taken for graduate credit. Prerequisite(s): PSYCH 210. Offered: Each semester.

3 hrs

[back to top](#)

PSYCH 322 P Child Psychology

The relations between child's biological and social conditions of personality; problems concerning the familial role and the guidance of the child's social adaptation. May not be taken for graduate credit. Prerequisite(s): PSYCH 210. Offered: Each semester.

3 hrs

[back to top](#)

PSYCH 323 Theory And Methods Of Personality

The development, organization, dynamics and determinants of personality. May not be taken for graduate credit. Prerequisite: PSYCH 210. Offered: Each semester.

3 hrs

[back to top](#)

PSYCH 326 Alternate Sexual Lifestyles & Contemporary Issues Human Sexuality

One objective of this course will be to examine the psychological determinants that lead to the development of nontraditional relationships and the psychological effects on the participants. A second objective of this course will be to examine contemporary issues bearing on the sexual practices of wide segments of the community. Such factors as pornography and the roles played by the law, church and school as they pertain to the development of attitudes and on alternate sexual lifestyles. Prerequisite: PSYCH 210.

3 hrs

[back to top](#)

PSYCH 328 Psychology Of Human Sexual Behavior

The focus of this course will be on the psychological factors surrounding human sexuality. This will include discussions about some myths and fallacies surrounding sexual education, correction of sexual misinformation, and relationship of attitudes to various sexual mores and practices. Although personal counseling is not included in the course, students will be informed of community resources available for consultation. An analysis of local community standards used to evaluate sexual behavior will include input from professional representatives of the community such as lawyers, physicians and the clergy. Prerequisite: PSYCH 210.

3 hrs

[back to top](#)

PSYCH 330 Psychology Of Language

An introduction to the study of psycholinguistics. Topics will include psychological studies of language, animal communication, child language and psychotic language behavior. Prerequisite: PSYCH 210.

3 hrs

[back to top](#)

PSYCH 331 An Introduction To Health Psychology

The purpose of this course will be to survey the many applications of psychology to the encouragement of health and wellness, to the prevention of disease, and to the healing process. Prerequisite: PSYCH 210.

3 hrs

[back to top](#)

PSYCH 400 Principles Of Psychological Testing

The theory of psychological testing and measurement. Prerequisite: PSYCH 316. Winter.

3 hrs

[back to top](#)

PSYCH 403 Environmental Psychology

Analysis of environmental influences on behavior of individuals and their influence, in turn, on the environment. Topics will include processes relating to the environment (such as the perception, evaluation and adaptation to the environment) and social processes relating to the environment (such as privacy, territoriality and crowding). Prerequisite: PSYCH 210.

3 hrs

[back to top](#)

PSYCH 405 Motivation

The fundamental conditions and principles of both human and animal motivation. Included will be discussion of such topics as classical drive theory, psychoanalytic approaches to motivation, achievement motivation, and recent developments in theories of motivation. May not be taken for graduate credit. Prerequisites: PSYCH 316. Offered: On demand.

3 hrs

[back to top](#)

PSYCH 406 P Introduction To Developmental Disabilities

This course builds a knowledge base in developmental disabilities requisite to other studies in this field. Students will meet individuals with disabilities, encounter "people first" values, and examine their own attitudes about people with disabilities from a multicultural perspective. The course presents principles of human development, causes of disability, and the effects of disability on individuals and families over the life span. Topics include the health, education and social services systems serving people with disabilities with emphasis on severe disabilities and critical junctures in the life-span including childhood, school-age, transition to adult-living, employment, and aging.

4 hrs

[back to top](#)

PSYCH 407 Cognitive Psychology

This course we will review the historical foundations and current state of knowledge regarding human information processing and the mental processes that underlie human behavior. the topics covered will range from foundational cognitive processes such as attention and memory, to more complex, higher-level processes such as problem-solving and decision-making. Prerequisite: PSYCH 210; PSYCH 302WI Offered: Winter Semester

3 hrs

[back to top](#)

PSYCH 410 Abnormal Language

Abnormal language behaviors as clinical entities will be examined. Students will have an opportunity to study the language and thought of the schizophrenic, of abused and neglected children and autistic children, of individuals with brain damage, and of individuals with fluency disorders. Gender language and the misuse of language in the legal setting will also be presented. Discussion of listener's attitudes toward normal, but non-standard language, such as black dialect, will be given attention.

3 hrs

[back to top](#)

PSYCH 415 History And Systems Of Psychology

Traces the historical origins of psychology beginning with its philosophical origins and discusses problems, areas and methods which resulted in major attempts to systematize psychological theory. This is the department's capstone course. Required of psychology majors. Prerequisites: Grade of C or better in PSYCH 302WI Restrictions: 415 should be taken only by Psychology majors in their last semester

3 hrs

[back to top](#)

PSYCH 418 Biopsychology I

An introduction to the neural basis of human behavior. Covers research on the basic structure and function of the human brain, with topics including movement, perception, emotion, cognition, and psychological disorders. Prerequisite: PSYCH 302WI

3 hrs

[back to top](#)

PSYCH 419 Biopsychology II

This course assumes that the student has mastered the basics of biopsychology, and deals with this topic in greater depth and scope than PSYCH418. It will begin with a brief review and update of basic materials of biopsychology, will quickly go on to a more advanced treatment of the topic, taking up where PSYCH 418 left off. There will, in particular, be an emphasis on human biopsychology. This course is primarily intended for the advanced undergraduate. Prerequisite: PSYCH 418 or equivalent.

3 hrs

[back to top](#)

PSYCH 428 Advanced Applied Child Development

Course builds on the foundation laid in PSYCH 322, Child Development. Focus is on contemporary developmental issues, particularly those with applied and social policy implications for promoting positive healthy development of children and adolescents. This is an advanced course involving seminar like discussions and written assignments. Further, it is an academic service learning course and requires students to spend a minimum of 25 hours actively engaged in community work serving children or youth. Prerequisites: PSYCH 322 Child Psychology, earned grade of "B" or greater, or written permission of instructor.

3 hrs

[back to top](#)

PSYCH 430 Introduction To Community Psychology And Community Mental Health

Overviews the field of community psychology, a field which seeks to understand how social, political and economic factors contribute to social problems and seeks to improve community well-being through social innovation and action research. The history, philosophical underpinnings, concepts, methods and research in community mental health and community psychology are reviewed. The course provides students with both a conceptual and experiential understanding of these fields. Individual and group projects are required. Prerequisite: 6 hours of psychology. Offered: Fall semesters.

3 hrs

[back to top](#)

PSYCH 433 Abnormal Psychology

Interpretation of the major tensions and conflicts in normal personality and of unrealistic modes of reaction to these tensions and conflicts, as revealed in mental illness. May not be taken for graduate credit. Prerequisite(S): PSYCH 322 or PSYCH 323. Offered: Each semester.

3 hrs

[back to top](#)

PSYCH 438 Psychology And Business And Industry: Motivational Factors

Investigation of psychological principles in business and industry: personnel selection, attitudes, motivation, supervision, communication and others influencing work efficiency. This course involves student projects within the business community. Students will be acquainted with the techniques of measurement of quality of motivation, behavioral laws due to the differences in motivation, how to assess and change the practices utilized within a business regarding their motivational effects upon employees. One goal will be the production of a motivational analysis profile for use in business and industry within the community. Prerequisite: Nine hours of psychology.

3 hrs

[back to top](#)

PSYCH 440 The Psychology Of Aging

This course will identify major issues concerning psychology related to aging. The major influence on the behavior, cognitive functioning and emotions of older adults will be examined. Consideration will be given to individual, group and environmental influences. Possible interventions will be identified. Cross-sectional and longitudinal research will be reviewed in order to examine the changes in individuals due to aging and the differences between cohort groups. Three major areas of information will be the focus: Concepts, theory and methods in psychology of aging: Biological and social influences on behavior, and behavioral processes.

3 hrs

[back to top](#)

PSYCH 441 Adult Development And Aging

This course will identify major themes and issues of mid-life and older adults. It will examine major developmental theories of adult development and aging. A contextual approach is stressed, including research and theory on the impact of cohort, gender, race/ethnicity, socioeconomic status, and culture on development. Application to real life is integrated throughout the course. Prerequisites: None. Offered Winter semester.

3 hrs

[back to top](#)

PSYCH 450 Special Topics

These are courses which are offered as the result of student demand, specialized faculty interests or the availability of a visiting expert in a field related to psychology. Students may enroll in one section of 450 per semester but not limited in the total number they may take. Prerequisite: Consent of instructor. On demand.

PSYCH 453 Family Life Cycle: Developmental Approach Understanding Fam Dynmc

The primary purpose of this course is to enhance the student's understanding of the dynamics of healthy families. After receiving a historical overview of the development of families and the cultural roots and traditions behind different family structures, child-rearing values and other factors, the students will be given a framework to understand how healthy families establish a dynamic balance between individual and group needs, and between needs to establish structure and to be flexible in the face of change. A second framework will also be presented to provide students with an understanding of how families use their internal resources to cope with life stressors. Given these basic cultural, interactional, and coping frameworks as foundation for understanding, students will explore how families change as they move through time from formation as a couple, through early child-rearing, adolescence mid-life, and post retirement. Implications for human service professionals will be presented.

4 hrs

[back to top](#)

PSYCH 453 P Family Life Cycle: Developmental Approach Understanding Fam Dynmc

Implications for human service professionals will be presented.

4 hrs

[back to top](#)

PSYCH 458 Behavior Modification

A survey of behavior modification procedures used to change individual behaviors in variety of settings. The course will entail a critical examination of the behavior modification literature and will include training in the application of the principles to community problems. Prerequisite: Either PSYCH 302 or PSYCH 304.

3 hrs

[back to top](#)

PSYCH 460 Field Practicum In Behavior Modification

Practice in the application of behavior modification principles in community agencies. Students wishing to enroll in this course should apply to the director of the behavior modification program one semester in advance of anticipated enrollment. Prerequisites: PSYCH 302 or PSYCH 304 and PSYCH 458. On demand.

3 hrs

[back to top](#)

PSYCH 461 A Field Practicum

Provides supervised experience working in community agencies/ organizations which address various human and social problems. Students receive training in community service oriented skills and approaches; e.g., advocacy, community organizing, program assessment, development and evaluation, outreach, and applied research. Ten hours per week at practicum site and class attendance are required. Prerequisite: Consent of instructor. Offered: Fall and winter.

4 hrs

[back to top](#)

PSYCH 490 Directed Individual Research

Student will work on an individual research project under the supervision of a staff member. Consent of staff member is required prior to registration in this course. A maximum of three hours may be applied toward the major in psychology and a maximum of twelve toward the bachelor's degree. On demand.

1-6 hrs

[back to top](#)

Religious Studies

RELIG-ST 100 Introduction To Comparative Religion

An introduction to the major religious traditions of the world and small group or tribal religions. Emphasis on the comparative study of selected myths, rituals, types of religious specialists, and types of religious communities.

3 hrs

[back to top](#)

RELIG-ST 306 History of Christianity to the Middle Ages

This course examines the historical and theological development of Christianity from its origins to the High Middle Ages. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major social, institutional, and intellectual force with a focus on patterns of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship. cross-listed as HISTORY 306A

3 hrs

[back to top](#)

RELIG-ST 401 Religion in America

An in-depth examination of selected aspects of the history of religions in America from the colonial periods to the present. Special emphasis will be given to methodological issues in the study of American religious history. Offered: On Demand

3 hrs

[back to top](#)

RELIG-ST 402 Religion and Colonialism in Latin America

The study of selected aspects of the history of religions in the Americas. Primary focus is on the complex ways that European, Native American African religions helped to structure and negotiate the experiences and the significance of cultural contact and colonialism through lived worlds of meaning.

3 hrs

[back to top](#)

RELIG-ST 403 Vision, Dreams and Prophecies as Religious Phenomena

This course explores the ways visions, dreams, and prophecies have acquired religious significance in Western and non-Western contexts from the ancient period to the present.

3 hrs

[back to top](#)

RELIG-ST 404 Gender and Religion

Cross-cultural and comparative study of how religious groups create and transmit gender roles and expectations.

3 hrs

[back to top](#)

RELIG-ST 467 Myth And Ritual

"Myth" and "ritual" have long been fundamental categories in the study of religion. This course will briefly survey some of the major theories and approaches to the study of myth and ritual from the Enlightenment to the present. The course will not only trace the shifting meanings of "myth" and "ritual", but will critically evaluate the utility of diverse approaches to the study of religious phenomena designated by these terms. Reading will include theoretical works, as well as selected case studies.

3 hrs

[back to top](#)

RELIG-ST 492 Cults, Sects And New Religious Movements

In this course students will experience: (a) a variety of methods for analyzing and understanding new religious movements in society: sociological, historical and textual; (b) an introduction to the broad spectrum of religious beliefs which exist (and flourish) outside the cultural mainstream; and (c) an introduction to some of the means by which dominant religious and secular culture has confronted the presence of NRMs-- e.g., deprogramming, exit counseling, and theologically oriented countermovement. Note: This course will be offered with RELIG-ST 5592; requirements for undergraduates will be less than for graduate students in terms of the length and sophistication of the research paper. Offered: On demand

3 hrs

[back to top](#)

RELIG-ST 493 Sex & Religion: The Erotic & The Anti-Erotic In Comparative Persp

This course is designed to highlight issues related to the various ways in which religions of the world have integrated, embraced, or repressed one of the most basic human experiences sexual expression. NOTE: This course will be offered with RELIG-ST 5593; requirements for undergraduates will be less than for graduate students in terms of length and sophistication of the research paper. Offered: On demand

3 hrs

[back to top](#)

RELIG-ST 494 RS Death In The History Of Religions

As a biological "fact," death would appear to be a human universal. Yet, human beings have imagined--and, thus experienced--the meaning of death in many diverse ways in different cultures and over time. This course explores the conceptualization and representation of death and dying, as well as the ritual activities surrounding death, found in selected religious communities. The goal is to gain insight into how people have sought to (re) create a world of meaning in the face of death and to gain a critical perspective on our own contemporary situation.

3 hrs

[back to top](#)

RELIG-ST 495 RS Time And Space In The History Of Religions

Time and space are essential components of the lived worlds of human beings, yet the cultural and historical constructions of these are remarkably diverse and, moreover, are subject to change. This course is a cross-cultural, interdisciplinary, and comparative exploration of the constructions and experiences of time and space found in selected religious communities and historical periods. In addition, it investigates the pivotal role the categories of "sacred and profane time and space" have played in theorizing religion and in the study of religious myths and rituals in the modern period.

RELIG-ST 496 RS The Body In The History Of Religions

The human body is the site of extensive imaginal and ritual activities in all religious traditions. This course explores some of the diverse ways religious communities have imagined and experienced the human body, as well as how the body had been manipulated and worked on in an effort to transform the human situation in the world.

3 hrs

[back to top](#)

RELIG-ST 497 RS Special Topics And Readings

Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies. Permission of Faculty Member. Offered: On demand.

1-6 hrs

[back to top](#)

Social Science

SOC-SCI 210 Foundations Of Social Science I

An application of salient principles, facts and methods of social sciences to study of origins and nature of social institutions; problems of emotional adjustment and vocational choice; analysis of contemporary social, legal and economic trends affecting values, conception of freedom and of social power, and political organization. Every semester. Note: Continued in SOC-SCI 220.

3 hrs

[back to top](#)

SOC-SCI 302 P Power and Authority

This weeknight course is intended to deal with the issues of power and authority as they bear on people at the individual, family, social and political levels. The intent of the course is to discuss the issues of control, power, authority and the limits of obedience. Prerequisites: SOC-SCI 102 and SOC-SCI 103 or equivalent; concurrent enrollment in SOC-SCI 303P.

4 hrs

[back to top](#)

Sociology

SOCIOL 101 Sociology: An Introduction

An introduction to the study of society and the basic concepts of sociology. Fall, winter, summer.

3 hrs

[back to top](#)

SOCIOL 103 Introduction To Cultural Anthropology

An introduction to culture and the basic concepts of anthropology. Topics include kinship, language, and cultural change. also offered as ANTHRO 103. Offered: Fall/Winter.

3 hrs

[back to top](#)

SOCIOL 201 Introduction To Social Psychology

Exploration of the relationships between human behavior and social context. The course focuses on how realities are socially constructed and sustained, the role of symbol systems, definitions of the situation, the self as a product of interaction, and the relationship between language, thought and culture. Offered: Fall/Winter

3 hrs

[back to top](#)

SOCIOL 202 R Social Organization

This course focuses on the principles of social organization that undergird all human societies: social groups; age and gender differences; the institutions of family, economy, religion and polity; power; community and other units of residence; and social differentiation based on such factors as wealth and/or prestige. The focus of analysis is on the maintenance of social order, social change, and integration of society. Crosslisted with ANTHRO 202R. Prerequisite: SOC-SCI 101. Offered: Every semester.

3 hrs

[back to top](#)

SOCIOL 203 Contemporary American Issues

An examination of major social problems of modern Western society, including issues of racial conflict, war, civil rights, youth movements, the mass media, urban poverty, and crime. The topics will vary from year to year depending upon the instructor. Fall, winter.

3 hrs

[back to top](#)

SOCIOL 205 The Social Life of Things

This course examines the ways anthropologists have studied the connections between people and things. It explores how social relationships are created and changed through the use and exchange of objects, and how objects themselves take on particular meanings and histories in these processes. In questioning the relationship between material culture and human sociality, the course will expose students to a range of ethnographic and historical case studies, as well as introduce them to some core theoretical perspectives and debates within anthropology

3 hrs

[back to top](#)

SOCIOL 207 the culture of Ethnography

This course will explore the contexts in which powerful social groups learn, talk, and write about less powerful groups. The course material will explore how the identities and biases of anthropologists condition how they perceive, analyze, and represent others. Students will compare changes in ethnographic methods, theories, and styles across time and geography.

3 hrs

[back to top](#)

SOCIOL 211 Social And Psychological Development Through The Life Cycle

A survey of significant psychosocial issues, events and crises throughout the human life span. The life cycle of the family is examined as the primary context within which individual development occurs. Although the primary emphasis will be on normal adjustment and development, attention will also be given to the occurrence of special problems and deviations at each life stage. Fall/winter.

3 hrs

[back to top](#)

SOCIOL 212 Global Health

This course will use the lens of critical medical anthropology to analyze the sources of poor health outcomes, health disparities, and the global impacts of health policy. Students will explore the connections between population health and other aspects of social life, such as power, inequality, war, and economics, exploring the ways in which globalization and the privatization of health creates conditions that facilitate disease.

SOCIOL 303 CW Cluster Course: Introduction To Women's Studies

What does it mean to grow up female in America? How does being female influence the body, the mind, identity? This course is an interdisciplinary exploration of the issues that have shaped the lives of American women throughout the life cycle and across the timeline. This course examines the role that culture and society have played in shaping and defining what it means to be an American girl and woman.

3 hrs

[back to top](#)

SOCIOL 305 Language and Culture

This course is designed to familiarize students with the basic objects, aims, and methods of linguistic anthropology. Students will acquire this familiarity by studying both theoretical and ethnographic articles that focus on some of the major areas of concern within the field including: the evolution of human language, linguistic particularity and universality, the relationship of language to thought, structuralism and semiotics, trope theory, language and emotion, sociolinguistics, the development of writing systems, and language conservation and change.

3 hrs

[back to top](#)

SOCIOL 306 Culture, Emotion, and Identity

This course introduces students to some of the key theoretical perspectives and debates within the field of psychological anthropology. By drawing upon cross-cultural studies of emotion, personhood, sexuality, illness, and consciousness it seeks to understand some of the ways that culture and society influence human psychology and experience.

3 hrs

[back to top](#)

SOCIOL 310 R Families And The Life Course

This course is an upper level introduction examining the sociological, historical, and social psychological research on the family, focusing primarily on the United States. The course examines families of varied ethnicity, as well as family compositions at different stages of the life course. Emphasis is placed on the interdependence of family members, as well as how society and policy influence the family.

3 hrs

[back to top](#)

SOCIOL 313 R Sociology Of Women

A study of family, community and career roles of women in contemporary society. Special attention is directed to the variety of their life patterns and dual roles made possible by a changing society. Fall/winter.

3 hrs

[back to top](#)

SOCIOL 314 Anthropology of Gender

This class explores theories of the social construction of gender in cross-cultural contexts. It will also explore global issues of local and international politics, the economy, work and education as these relate to gender.

3 hrs

[back to top](#)

SOCIOL 316 Sociology Of Death And Dying

Examination of attitudes, behaviors and institutions related to death and dying in contemporary American society. Topics include the status of death in American society, effects of the setting on dying, interaction with the dying, funeral practices, bereavement customs, surviving spouse, and suicide.

3 hrs

[back to top](#)

SOCIOL 317 Policies Of Drug Use And Control

Utilizing both historical and contemporary information, this course provided an assessment of the "drug problem" in the U.S. and policies of control developed in response to the problem. Drug use criminalization, legalization, medical treatment and prevention strategies and related issues are considered in regard to scientific knowledge related to the patterns, causes and impact of substance abuse. Also offered as CJC 317. Annually.

3 hrs

[back to top](#)

SOCIOL 318 Sociology Of The Aging Woman

An exploration of the intersection of gender and aging issues with special attention to cultural images of women, the development of self-concept and identity in mid-life and beyond, caring roles in the family, work and retirement, and health and mental health issues. These issues are examined within the context of social class, race, and ethnicity. Implications for community programs and social policy are considered.

3 hrs

[back to top](#)

SOCIOL 319 Theoretical Criminology

A comprehensive examination of the major criminological theories, their philosophical assumptions, and the sociohistorical context in which they were articulated. Also offered as CJC 319.

3 hrs

[back to top](#)

SOCIOL 320 Social Deviance

The dominant sociological perspectives on deviance will be discussed with special attention given to the processes that define behavior and persons as deviant and the impact of such definitions on social relationships and identity.

3 hrs

[back to top](#)

SOCIOL 322 Race And Ethnic Relations

The nature, origin and dynamics of ethnic and race relations in the U. S. and other societies. Specific attention will be given to the historical and contemporary contexts of prejudice discrimination and confrontation. Also offered as ANTHRO 322. Offered: Fall/Winter.

3 hrs

[back to top](#)

SOCIOL 324 Diversity And You

This course will examine diversity from the perspectives of race, ethnicity, class and gender. Emphasis will be placed on the impact of racism, classism and sexism on interpersonal relationships and strategies to encourage diversity in schools, neighborhoods, and the work place. Students may also enroll in "directed research" in conjunction with his course.

3 hrs

[back to top](#)

SOCIOL 325 The Imagery Of The American Indian In Film

This course will trace the imagery of the American Indian used by film makers through the years and how this has played a role in reinforcing certain inaccurate perceptions of American Indian cultural, social, and economic life. The course examines the sociological implications created by persistently showing misrepresented images of American Indians. The goal is to measure and compare the reality of American Indian live (values, traditions, and beliefs) with the images created by film makers from the early years of the 20th century to the present. Also cross listed as ANTHRO 325.

1 hr

[back to top](#)

SOCIOL 327 Us Government's Indian Policies: Practices Of A Colonizing Nation

This class will convey information about the implementation of US government policies toward American Indians and how each of the policies, from treaty making, establishing reservations, removing, confronting tribes militarily, and abolishing reservations through allotment resulted in consequences detrimental to tribal welfare. The colonization process created ramifications and consequences that Indian people contend with to this day. This class will provide a historical overview of the consequences associated with political, social, and economic processes that divested Indian people of control over their lives and land they originally lived on. Also cross listed as ANTHRO 327.

1 hr

[back to top](#)

SOCIOL 328 Anthropology Of The Body

The Anthropology of the Body is an interdisciplinary and comparative approach to the study of the body as the subject and object of social processes. Anthropological approaches to ritual, performance, reproduction, and healing will provide a framework for classical as well as contemporary explorations of bodily representation and experiences across a variety of cultural contexts. Prerequisite: Introduction to Cultural Anthropology

3 hrs

[back to top](#)

SOCIOL 329 The Imagery Of The American Indian In Film

This course will trace the imagery of the American Indian used by film makers through the years and how this has played a role in reinforcing certain inaccurate perceptions of American Indian cultural, social, and economic life. The course examines the sociological implications created by persistently showing misrepresented images of American Indians. The goal is to measure and compare the reality of American Indian life (values , Traditions, and beliefs) with the images created by film makers from the early years of the 20th century to the present. Also cross listed as ANTHRO 325.

1 hr

[back to top](#)

SOCIOL 331 Urban Anthropology

A course designed to apply anthropological methods to the study of various urban environments. The approach to the subject is comparative, seeking to spell out those features of the urban setting which vary from culture to culture as well as those which are common to all. Crosslisted with ANTHRO 331. Offered: Fall.

3 hrs

[back to top](#)

SOCIOL 332 Sociology Of Political Life

The concept of power, community power structure and decision making. The social basis of liberal democracy; consensus and legitimacy; political stability and instability. Power and politics in a mass society; elites and masses; democracy and oligarchy; alienation; bureaucracy; pluralism and totalitarianism. Ideology and social movements.

3 hrs

[back to top](#)

SOCIOL 335 R Introduction To Social Work: Principles And Practice

An introductory course to social work, its history and current role in the delivery of social welfare services. Designed to give the student insight into the body of knowledge, theory, values, principles, and techniques of the social work process. Investigation into the varieties of practice methods, i.e., casework, group work, community organization, and the present trend toward the generic approach. Fall/winter.

3 hrs

[back to top](#)

SOCIOL 336 Society And Community Service

This course explores the history and increasing importance of the non-profit sector and volunteerism. Applying theoretical approaches from development and community organizing, the course analyzes the uses of volunteerism and NGOs nationally and internationally. Students' understanding will be enhanced through the inclusion of applied methods needed to manage a non-profit organization and by serving in an internship in a local non-profit during the semester. Offered: Fall Semester

3 hrs

[back to top](#)

SOCIOL 337 Community Development In Urban America

The focus in this course is on experiential learning in which the student participates in several urban community development projects that allow for learning about collaboratives, networking, problem-solving, and requisite skills to successfully manage a project. Principles of community development are presented to give the student background for understanding the projects visited.

3 hrs

[back to top](#)

SOCIOL 339 American Indian Leaders: Past And Present

This course will examine the definition of leadership as it relates to American Indian issues. Consideration will be given to the nuances of leadership by examining the social, cultural economic, and political situations that gave cause for particular individuals to assume roles of Indian ranks with those practiced by non-Indian leaders. It will trace the evolving nature of leadership within tribal nations and American Indian communities from past to present, as well as looking at Indian leadership roles in time of war and peace. Lives of the major characters of American Indian historical record will be reviewed, such as Geronimo, Crazy Horse, Sitting Bull, Osceola, Tecumseh, Pontic, Black Hawk, Quannah Parker, and Captain Jack. Also cross listed as ANTHRO 326.

1 hr

[back to top](#)

SOCIOL 341 R The Anthropology Of Economic Institutions

Examines in a comparative perspective the social, cultural and political framework of economic activities. Emphasis is placed on socioeconomic systems and the contradictions they generate. Crosslisted with ANTHRO 341R. Offered: Annually.

3 hrs

[back to top](#)

SOCIOL 343 Societies And Cultures Of Latin America

A survey of emerging cultures and societies in Latin America; pre-history and geography; the Mayan, the Aztec and Incan civilizations; contemporary Indian, peasant and urban subcultures; the impact of forces such as migration, urbanization, peasant mobilization, and agrarian reform. Also offered as ANTHRO 343.

3 hrs

[back to top](#)

SOCIOL 346 Cultures Of The African Diaspora

This course will explore the cultures of African people and their descendants who settled in Europe, the Caribbean or the Americas due primarily to the impact of the Trans-Atlantic trade in human beings. The focus will be comparative, with emphasis on cultural adaptation, kinship systems, music and religion.

3 hrs

[back to top](#)

SOCIOL 347 The American Indian Image: Stereotype Vs. Reality

This class will take a historical, sociological, and cultural approach to review how society at large views American Indians. The course will trace the origin and continued use of American Indian stereotyped views, and assess the sociological and psychological complications that result when judging Indians solely on stereotyped imagery. The course will review the historical content of American Indian life as portrayed in early plays, films, and newspaper accounts and compare these stereotyped images with the reality of American Indian life by providing a depiction of a series of historical events that will offer a more balanced and accurate consideration for American Indian life past and present. Also cross listed as ANTHRO 327.

1 hr

[back to top](#)

SOCIOL 348 Latin American Immigrants & Refugees in the U.S.

The course is an introduction to the study of the culture and societies of U.S. citizens and immigrants of Latin American heritage living in the U.S. The course emphasizes recent anthropological as well as historical and cultural studies. Topics covered: ethnohistory, and cultural diffusion over successive generations.

3 hrs

[back to top](#)

SOCIOL 351 Gender, Work And Social Change

This course examines the role of gendered work and consumption in global social change. Drawing from sociological perspectives on gender and work, this course foregrounds a global comparative analysis of societal development and working contexts, including tourism employment, sex work, domestic work, and agricultural, garment, and informatics production. Academic-service learning constitutes a primary course assignment. Offered: Winter

3 hrs

[back to top](#)

SOCIOL 352 Multicultural Women's Histories In The U.S.

This course offers an introduction to the histories of women in the U.S. from the 17th to the beginning of the 20th century. We will study colonial and US women of Native, Latino, European, African, and Asian descent, their contact with women (and men) of other ethnic groups, the political, economic, and legal changes affecting their lives, and the images they created of themselves and each other. Offered: Every Fall Semester

1 hr

[back to top](#)

SOCIOL 353 Women, Class, And Ethnicity In The U.S.

This course focuses on contemporary women's lives and issues such as welfare and immigration, stereotypical imagery, and the pressure to put ethnic and/or class interests before gender concerns. We will study women of Native, African, European, Latin, Asian, and heterogeneous descent and the ethnic, economic, and legal forces shaping their lives. Offered: Every Fall

1 hr

[back to top](#)

SOCIOL 354 Women's Lives In The Global Economy

This class explores the realities of women's lives and the work that women contribute to all societies. Using an anthropological approach, we will explore women's productive work in gathering, horticulture, agriculture, and industrialization, women's reproductive work, as well as their work of status enhancement and caring. Highlighting the changes wrought by colonialism, we will also explore women's work, both voluntary and involuntary, in the global economy. Offered: Every Winter Semester

1 hr

[back to top](#)

SOCIOL 355 The United Nations' Womens Conferences

This class studies the United Women's Conferences in Mexico City (1975), Copenhagen (1980), Nairobi (1985), Beijing (1995), and Beijing +5 (2000), their themes, participants, documents, solutions, and consequences. Special attention will be paid to women's human rights. Offered: Every Winter Semester

1 hr

[back to top](#)

SOCIOL 356 Cross-Cultural Gender Conceptions

This class surveys the varieties of gender definitions and roles in historical and contemporary human cultures in their association to stratified or equitable access to economic, political, and ideological resources. Topics include the definitions and varieties of human sexes and of human genders, and the multiple ways in which people create sexual and gender intersections and variations. Offered: Every Winter Semester

1 hr

[back to top](#)

SOCIOL 361 Social Theory

A survey of the major orientations in social theory, their historical development, and contemporary issues and controversies in social theory. Prerequisite: 3 hours in social science.

3 hrs

[back to top](#)

SOCIOL 362 Methods Of Sociological Research

Experimental and observational schemes; survey analysis; interview and questionnaire designs; scaling techniques; sampling. Also offered as CJC 483.

3 hrs

[back to top](#)

SOCIOL 363 Introduction To Statistics In Sociology/Criminal Justice

A first course in the statistical analysis of quantitative data. Course emphasizes descriptive statistics, probability theory, parameter estimation, bivariate hypothesis testing, and computer applications. Prerequisites: MATH 110, MATH 116 or an equivalent. Offered: Fall

3 hrs

[back to top](#)

SOCIOL 372 Introduction To The Sociology Of Religion

Using the tremendous diversity of religious belief and practice in North America, in particular new religious movements, this class will acquaint students with the academic study of religion as a social (and sociological) phenomenon. Students will learn how religion has been interpreted by sociologists in the past, and how evolving perspectives shape both the way academics perceive religion and how they study it. They will learn how religion permeates and affects virtually every domain of human culture and interaction. And they will gain experience in fieldwork, coming to understand in the process religious traditions other than those in which they may have been raised.

3 hrs

[back to top](#)

SOCIOL 373 Anthropology of Religion

This course explores the ways anthropologist have gone about studying religion from the opening decades of the 20th century to present. The course introduces students to the diversity of human religious expression and experience through anthropological literature and to the diversity of anthropological expression especially as it has been revealed in social scientific studies of religious life. The course is designed to generate a critical dialogue about the special role that religion has played in the ongoing anthropological engagement with "other" societies and cultures over time

3 hrs

[back to top](#)

SOCIOL 374 Anthropology of Childhood

This course explores how children's lives are shaped by cultural, economic, and political forces and relations. Drawing upon a range of case studies and disciplinary perspectives it will consider how and why children emerge as sites of contestation and debate, and it will examine the various ways in which the category and experience of childhood unfold in different socio-historical contexts. The main objective of the course is to better understand the social construction of childhood and use the study of childhood as privileged window for exploring the articulation of cultural, economic and political relations within the context of contemporary global society. Offered: On-demand

3 hrs

[back to top](#)

SOCIOL 390 R Directed Field Experience I

The student will work within one or more social agencies or organizations in the city under the joint supervision of a professional within the organization and a member of the Sociology Department. In-class discussion will cover the major problems of social organization. Prerequisite: Consent of instructor.

1-6 hrs

[back to top](#)

SOCIOL 390 RA Directed Field Experience I

1-6 hrs

[back to top](#)

SOCIOL 391 Directed Field Experience II

A continuation of SOCIOL 390. Winter.

1-6 hrs

[back to top](#)

SOCIOL 397 Independent Readings In Sociology

Intensive readings in an area selected by the student with prior consultation with instructor. Prerequisite: Twelve hours of sociology. On demand.

1-3 hrs

[back to top](#)

SOCIOL 398 Independent Research In Sociology

Intensive research in an area selected by the student with prior consultation with instructor. Prerequisite: Twelve hours of sociology. On demand.

1-6 hrs

[back to top](#)

SOCIOL 404 WI The Sociology Capstone: Senior Seminar

A seminar which explores the interrelationships between sociology theory, research methods and statistics. May focus on major contemporary issues building on and integrating knowledge obtained in previous courses. This course is a writing intensive course and satisfies this requirement for the general degree requirements of the college. Prerequisites: SOCIOL 361, SOCIOL 362, SOCIOL 363. Offered: Fall/Winter.

3 hrs

[back to top](#)

SOCIOL 410 R Aging In Contemporary Society

Attitudes and stereotypes, the status of the aged in American society; the social psychology of the aging process; the response of societal institutions such as the family and political system to the aging of the population as a whole. Applications and potentials of research are considered.

3 hrs

[back to top](#)

SOCIOL 411 Sociology Of Human Sexuality

A cross cultural examination of the most fundamental dichotomy in human society: male and female. Considering sex both as a biological and social category, this course compares diversity and similarity in the interrelationships of male and female in patterns of behavior and social organization found in human societies across time and space.

3 hrs

[back to top](#)

SOCIOL 416 Aging And Developmental Disabilities

This course explores the experience of aging with a developmental disability or mental retardation within the context of normative aging. Among the comparisons made between older persons with and without developmental disabilities are their demographic characteristics, physical and cognitive functioning, role transitions and losses, identities and self-concepts, and family and caregiving issues. Policies, programs, and emerging concepts of best practices are considered within the context of quality of life, ethical, and community inclusion issues. Prerequisites: None. Offered: Summer.

2 hrs

[back to top](#)

SOCIOL 417 Practicum In Aging And Developmental Disabilities

Students gain experience in working with and defining issues of Older persons with developmental disabilities through placements in sheltered workshops, senior centers, residential group homes, and other community-based programs.

Prerequisites: None. Offered: Summer.

1 hr

[back to top](#)

SOCIOL 418 Feminist Theories

This class introduces the major feminist theories and their primary authors over the last 200 years. The class takes both a historical view (beginning with two millenia of male-centered theories about women) and a conceptual approach (theories are grouped by common ground) and familiarizes the student with both the historical processes that necessitate feminist theories as well as with the breadth and depth of the historically and currently available scholarship. Prerequisite:

Introduction to Women's Studies Offered: Winter Semester

3 hrs

[back to top](#)

SOCIOL 420 Control Of Crime And Delinquency

The various ways societies have tried to control and prevent violations. Topics: the nature and types of law; a critical analysis of the American police, judicial and penal systems; the prevention of crime and delinquency. Also offered as CJC 420. Offered: Fall semester

3 hrs

[back to top](#)

SOCIOL 421 Criminal Behavior In The United States

A description and causal analysis of complex forms of criminal behavior in contemporary American society; included for study will be organized and professional crime, white collar crime, homicide, suicide, and crimes against morals involving sex, alcohol, drugs and gambling. Winter.

3 hrs

[back to top](#)

SOCIOL 424 The Death Penalty In America

This course takes a sociological look at the most extreme punishment currently in use in the United States. Society debates its value without giving much weight to the research which social science conducts. Indeed, the political domain frequently misrepresents the data that is available. The course evaluates the adequacy of the research and separates the strands of the debates in order to understand the role of the death penalty in our society. Also offered as CJC 424.

3 hrs

[back to top](#)

SOCIOL 430 R Complex Organizations

The sociology of complex organizations examines sociological theories and methods that explain what an organization is trying to accomplish and ways in which performance can be assessed. Emphasis will be on internal structures and processes of organizations, the organization's relationship to the individual and the organization's environment.

3 hrs

[back to top](#)

SOCIOL 431 Social Organization Of The City

An examination of the social structure of the American city with special reference to the historical development of American cities. Attention will be focused on the role of social institutions as they have changed in relation to urban problems.

3 hrs

[back to top](#)

SOCIOL 433 Immigration and the City

This course examines key issues and controversies in immigration research. Special attention will be paid to the social, economic, and historical developments of urban immigrant communities.

3 hrs

[back to top](#)

SOCIOL 439 Social Meanings Of Illness, Suffering And Healing

The course explores the human experience of illness and healing and its intersection with cultural values and institutional arrangements. Various meanings that are associated with the experience of being sick and caring for the sick are examined, especially in terms of economic, cultural, and racial factors. The struggle to make sense out of suffering and the harshness of disease is examined, as is the possibility for growth, transformation, and healing that are contained in the illness experience. Offered: Summer

3 hrs

[back to top](#)

SOCIOL 440 R Sociology Of Medicine

Relationship of basic concepts in sociology to health and medical care. Cultural and class variations in health status. Social and cultural aspects of health.

3 hrs

[back to top](#)

SOCIOL 441 Developing Countries

Focuses on issues of economic development, social stratification, political institutions, and political mobilization in societies where colonialism provided the context for their long-term disadvantages in the international economic order. Specific attention is paid to the intersection of the international components that define the options and limits for societal development (e.g., market shifts, international institutions and contracts, foreign policies, and migration) and the distinct social, political and cultural implications of these factors for developing societies. Crosslisted with ANTHRO 441.

3 hrs

[back to top](#)

SOCIOL 470 Colloquium: Law And Social Structure

3 hrs

[back to top](#)

SOCIOL 486 Methods Of Program Evaluation

This course focuses on applying research methodological techniques to evaluation of programs designed to respond to social problems and issues (e.g., drug use, crime, delinquency, indigent care). Topics of interest to those charged with designing and executing program evaluations are considered, including types of program evaluation assessment, use of time series models, special research issues for program evaluation and generating and testing hypotheses from program objectives. Also offered as CJC 486. Annually.

3 hrs

Spanish

SPANISH 110 Elementary Spanish I

The goals of this course are an ability to speak and to understand simple (spoken) Spanish as well as to read and write simple prose. Every semester and summer.

5 hrs

[back to top](#)

SPANISH 120 Elementary Spanish II

Continuation of SPANISH 110. Every semester. Prerequisite(s): SPANISH 110 or equivalent.

5 hrs

[back to top](#)

SPANISH 211 Second Year Spanish I

Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language. Prerequisite: SPANISH 120. Fall.

3 hrs

[back to top](#)

SPANISH 216 Spanish For The Health Sciences

This course will enable the student to converse with Hispanic patients and/or hospital personnel in situations such as admissions, patient care, lab work as ordered by a physician or dentist, emergency room procedures, etc. In addition, medical readings in Spanish will give professional and paraprofessional students an increased vocabulary related to the many fields within the health sciences. This course will satisfy one semester of the A&S language requirement. Prerequisite: one year of college Spanish or its equivalent. Summer and on demand.

3 hrs

[back to top](#)

SPANISH 221 Second Year Spanish II

Continuation of SPANISH 211. Winter.

3 hrs

[back to top](#)

SPANISH 250 Commercial Spanish

Business practices in correspondence in the Spanish language; special vocabulary of business, trade, banking and administration. Refinement of grammatical and stylistic skills. Subjects treated include price inquiries, quotations, offers, orders, complaints, administrative, banking and diplomatic correspondence. Prerequisite: SPANISH 221 or equivalent.

3 hrs

[back to top](#)

SPANISH 280 Special Intermediate Spanish Topics I

Instruction of Spanish on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit. Prerequisite: Elementary I and II college-level courses or equivalent. As needed.

2-4 hrs

[back to top](#)

SPANISH 290 Special Intermediate Spanish Topics II

Continuation of SPANISH 280. May not be repeated for credit. As needed.

2-4 hrs

[back to top](#)

SPANISH 301 Introduction To Literary Studies

Emphasis will be placed on the study of literary theory and the philosophical ideas behind the literary movements, their relations and differences. A representative work or works of each genre will be thoroughly studied and analyzed. Critical reports will be written about different features of the literary works under consideration. Strongly recommended for all majors, to be taken before 400-level literature courses. Prerequisite: SPANISH 315

3 hrs

[back to top](#)

SPANISH 315 Intermediate Conversation And Composition I

Grammar review, practice in speaking and writing Spanish; emphasis on idiomatic usage and practical vocabulary. Required for major. Prerequisite: SPANISH 221 or equivalent. Every fall.

3 hrs

[back to top](#)

SPANISH 325 Intermediate Conversation And Composition II

Continuation of SPANISH 315. Required for major. Prerequisite: SPANISH 315. Every winter.

3 hrs

[back to top](#)

SPANISH 350 Continental Spanish Civilization

General cultural characteristics of Spain. Readings from representative literary works.

3 hrs

[back to top](#)

SPANISH 351 Latin American Civilization

Historical development of Latin America. Readings from representative literary works.

3 hrs

[back to top](#)

SPANISH 365 The Search For Mexican Identity

The goal of the course is to familiarize the student with the poignant search for self awareness and definition witnessed in the letters and fine arts of Mexico in the 20th-century. Readings will include works by Vasconcelos, Reyes, Ramos, Paz, Rulfo and Fuentes, and will be complemented by slide presentations of pertinent works by major artists.

3 hrs

[back to top](#)

SPANISH 373 History Of Spanish Literature I

A study of the development of Spanish peninsular literature from the Middle Ages to 1700. Prerequisite: SPANISH 315 & SPANISH 325

3 hrs

[back to top](#)

SPANISH 374 History Of Spanish Literature II

A study of the development of Spanish peninsular literature from 1700 to present. Prerequisite: SPANISH 315 & SPANISH 325

3 hrs

[back to top](#)

SPANISH 380 Special Topics

Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes. Prerequisite: Permission of the instructor.

1-3 hrs

[back to top](#)

SPANISH 401 Introduction To Spanish American Literature I

The colonial period. Selected readings in historical and literary material from the time of the conquest to the period of struggle for independence. On demand.

3 hrs

[back to top](#)

SPANISH 402 Introduction To Spanish American Literature II

The 19th and 20th-centuries. Selected readings from prose and poetry of Spanish-American writers. On demand.

3 hrs

[back to top](#)

SPANISH 414 The Generation Of 1898

An examination of the intellectual, critical, historical, and social problems as reflected in the writings of Ganivet, Unamuno, Valle-Inclan, Baroja, Azorin, and others. Also offered as SPANISH 5514.

3 hrs

[back to top](#)

SPANISH 415 Advanced Conversation And Composition I

Continued practice in speaking and writing Spanish, with attention to the elements of style. Continued in SPANISH 425. First semester required of all majors and second semester recommended. Both semesters required of prospective high school teachers. Either or both semesters may be repeated with the consent of the instructor and the department chairman. No more than six hours credit may be applied towards a degree. Prerequisite: SPANISH 325. Every fall.

3 hrs

[back to top](#)

SPANISH 416 Medieval Spanish Literature

From the Cantar de Mio Cid to 1499. Winter.

3 hrs

[back to top](#)

SPANISH 417 Spanish-American Lyric Poetry

A survey of poetry in Spanish America from Colonial times to World War II, including a study of the most representative poets and their writings. Winter.

3 hrs

[back to top](#)

SPANISH 418 Romantic Movement In Spain

The origin and development of romantic literature against the historical and ideological background of the first half of the 19th century. Various literary genres will be studied; these will include works by Rivas, Espronceda, Larra, Zorrilla, Gil y Carrasco, Becquer and others.

3 hrs

[back to top](#)

SPANISH 420 Cervantes' Don Quixote, Part I

An intensive reading of the first part of Cervantes' novel, Don Quixote.

3 hrs

[back to top](#)

SPANISH 421 Cervantes' Don Quixote, Part II

An intensive reading of the second part of Cervantes' novel, Don Quixote. Part One is not a prerequisite. Also offered as SPANISH 5521.

3 hrs

[back to top](#)

SPANISH 425 Advanced Conversation And Composition II

Continuation of SPANISH 415. See SPANISH 415. Required for teacher certification in Spanish. Prerequisite: SPANISH 415. Winter.

3 hrs

[back to top](#)

SPANISH 426 Golden Age Drama

The development of the Spanish drama from Lope's youth to the death of Calderon. Also offered as SPANISH 5526.

3 hrs

[back to top](#)

SPANISH 427 Pre-Columbian And Spanish Colonial Literature

A study of the pre-Columbian works in drama, narrative, and poetry (Popol Vuh, Apu-Ollantay, Incan and Aztec poetry) leading into a survey of Spanish-American colonial literature. Also offered as SPANISH 5527.

3 hrs

[back to top](#)

SPANISH 428 Contemporary Spanish Poetry

A comprehensive and intensive study of 20th-century Spanish poetry. Poets and poetry will be studied in the light of literary movements, foreign influences, political tendencies and philosophical ideas. Also offered as SPANISH 5528.

3 hrs

[back to top](#)

SPANISH 429 The Novel Of The Mexican Revolution

The revolution as the principal focus of 20th-century Mexican fiction. The course will examine both the evolving understanding of the event/process and the sophistication of narrative technique employed in its presentation. Among the writers to be studied are Azuela, Guzman, Lopez y Fuentes, Yanez, Revueltas, Rulfo and Fuentes. Also offered as SPANISH 529.

3 hrs

[back to top](#)

SPANISH 430 Spanish Mysticism

An examination of the development of mysticism in Oriental and Occidental civilizations, with emphasis on the great periods of mystic experience as reflected in the literary production of the Spanish Golden Age. Readings could include the works of Fray Luis de Granada, Fray, Luis de Leon, Saint John of the Cross and Saint Teresa of Avila. Also offered as SPANISH 5530.

3 hrs

[back to top](#)

SPANISH 431 The Golden Age Novel

A study of major prose works of the Golden Age. Possible topics include authorship, innovative narrative techniques, textual strategies and metafiction issues. Readings could include works by Alfonso Martinez de Toledo, Diego de San Pedro, Fernando de Rojas, Francisco Delicado, Cervantes, and Lope de Vega. Also offered as SPANISH 5531.

3 hrs

[back to top](#)

SPANISH 432 Pastoral Literature

A study of the development of pastoral literature during the Spanish Golden Age. Possible texts: Juan del Encina's Eclogues, Montemayor's Los siete libros de la Diana and Cervantes' Galatea. These works will be examined within their historical and cultural context. Also offered as SPANISH 5532.

3 hrs

[back to top](#)

SPANISH 433 Cervantes' Exemplary Novels

A study of Cervantes' Exemplary Novels within the context of 17th-Century Spain. Attention will be paid to interpretive possibilities and how knowledge of historical contexts might influence readings of this rich and varied cultural output. Also offered as SPANISH 5533.

3 hrs

[back to top](#)

SPANISH 434 The Picaresque Novel

A study of the development of picaresque fiction during the Spanish Golden Age. The course deals with novelists principally active during the Baroque period such as Mateo Aleman, Francisco Lopez de Ubeda, Miguel de Cervantes, and Francisco de Quevedo. Also offered as SPANISH 5534.

3 hrs

[back to top](#)

SPANISH 450 Modern Classics Of Latin American Literature

The goal of the course is to familiarize the student with the principal Latin American writers of the modern period. The focus will be dual: the progressive sophistication of literary technique and the refinement of social conscience. Among the authors to be studied are: Asturias, Borges, Carpentier, Cortazar, Donoso, Fuentes, Garcia Marquez, Paz, Rulfo and Vargas Llosa. Also offered as SPANISH 5550.

3 hrs

[back to top](#)

SPANISH 453 Spanish-American Short Story

A study of Spanish-American short stories from Romanticism to the present. Also offered as SPANISH 5553.

3 hrs

[back to top](#)

SPANISH 460 U.S.-Latino Literature

An interdisciplinary approach to U.S.-Latino Studies, including both literary and cultural texts. The course will be taught in English, the language in which the texts are produced. Also offered as SPANISH 5560.

3 hrs

[back to top](#)

SPANISH 480 Special Topics

Each time this course is offered a particular genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes. Permission of the department chairman is required. On demand.

1-3 hrs

[back to top](#)

SPANISH 480 A Special Topics

Each time this course is offered a particular genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes. Permission of the department chairman is required. On demand.

1-3 hrs

[back to top](#)

SPANISH 490 Special Readings

Intensive readings in field or literary figure to be selected by the student in consultation with the instructor. Available, by permission only, to advanced students of Spanish; available only when student cannot take regularly scheduled courses. Prerequisite: 3.0 GPA. On demand.

1-3 hrs

[back to top](#)

SPANISH 499 Senior Seminar (Capstone)

Required for major. Covers seminal works of Peninsular and Latin American literature in their historical and cultural context. Course content varies, but will include such elements as geography, politics, folklore, history of the language, architecture, art and music. To be taken during final Fall Semester of residence. Prerequisite: 18 hours beyond first year Offered: Fall

3 hrs

[back to top](#)

SPANISH H425 Advanced Conversation And Composition II

Continuation of SPANISH 415. See SPANISH 415. Required for teacher certification in Spanish. Prerequisite: SPANISH 415. Winter.

3 hrs

[back to top](#)

SPANISH H426 Golden Age Drama

The development of the Spanish drama from Lope's youth to the death of Calderon. Also offered as SPANISH 5526.

3 hrs

[back to top](#)

Statistics

STAT 234 Mathematics For Teachers: Probability And Statistics

Designed for elementary-and middle-school mathematics teachers. Foundational knowledge of probability and statistics, elements of statistics, organizing, displaying and describing data, probability distributions, correlation, regression, prediction, estimation.

3 hrs

[back to top](#)

STAT 235 Elementary Statistics

An introduction to descriptive and inferential statistics. Organization and presentation of data, averages and variations, elementary probability, random variables, special discrete distributions, normal distributions, sampling distributions, point estimation, confidence intervals, and hypothesis testing. Credit will not be given for both STAT 235 and STAT 236.

Prerequisite: 4 units high school math or MATH 110. Semester offered: Fall, Winter, Summer

3 hrs

[back to top](#)

STAT 236 Applied Statistics For Public Administration

Designed for students in business, public administration, and urban studies; will cover descriptive and inferential statistics, elementary probability, analysis of nominal and ordinal data, regression analysis; will use a statistical software package to apply the tools of statistics and answer quantitative questions. Credit will not be given for both STAT 235 and STAT 236.

Prerequisite: 4 units high school math or MATH 110

3 hrs

[back to top](#)

STAT 436 Introduction To Mathematical Statistics I

Sample space, conditional probability, random variables, probability distribution functions and probability densities; transformations of random variables, mathematical expectation, conditional distributions and expectations, laws of large numbers and limit theorems, applications. Prerequisite: MATH 250. Fall.

3 hrs

[back to top](#)

STAT 441 Introduction To Mathematical Statistics II

Sampling Distributions; point estimation; interval estimation; hypothesis testing; analysis of variance; nonparametric methods; statistical software applications; topics in Applied Statistics. Prerequisites: STAT 436. Offered: Winter

[back to top](#)

Theatre

THEATRE 100 Topical Studies In Theatre Practice

(A, B, C, D) This course provides students with an opportunity to explore special offerings in theater practice. No prerequisite. Does not fulfill general education course requirement in the Fine Arts or Humanities. May count for elective credit in the Theatre major. Different sections of the course may be repeated. On demand.

1-3 hrs

[back to top](#)

THEATRE 101 Introduction To Acting

An introductory course to acquaint the freshman theatre major and non-major student with the process of acting through relaxation and improvisational exercise.

3 hrs

[back to top](#)

THEATRE 113 Introduction To Technical Production

An introduction to the technical production process with emphasis on production organization, planning and scenic construction techniques. Required laboratory work.

3 hrs

[back to top](#)

THEATRE 121 Oral Interpretation Of Literature

Principles of interpretation, analysis and oral reading of prose and poetry. Emphasis upon platform performance: body language, vocal control and performance techniques.

3 hrs

[back to top](#)

THEATRE 130 Foundations Of Fine Arts Theatre

An introduction to theatre arts and a general orientation to the creative and technical aspects of live performance. Includes historical overview, analysis of the components of a play, and observation of and critical reaction to theatrical productions. Frequent guest speakers.

3 hrs

[back to top](#)

THEATRE 180 Theatre Production I

A practicum course in theatre to be elected for one credit each semester during the freshman and sophomore years. The student will be assigned to a different area each semester. High school students may elect for college credit. Every semester.

1 hr

[back to top](#)

THEATRE 295 Speech For The Theatre I

Training in voice and articulation and the techniques of adaptation to the needs of the artist-performer in the theatre: exercises to free the voice, develop effective breathing, tone production, articulation, flexibility of vocal production, and projection.

3 hrs

[back to top](#)

THEATRE 295 B Speech For The Theater I

3 hrs

[back to top](#)

THEATRE 298 Movement For Actors

Basic movement training including relaxation and alignment techniques, exercises to increase physical facility and skills to enhance rhythmic coordination and physical characterization. THEATRE 298A prerequisite for THEATRE 298B. Fall/winter.

3 hrs

[back to top](#)

THEATRE 300 Acting I

Basic principles of dramatic performance: training in voice, movement and language as an organic developmental whole.

3 hrs

[back to top](#)

THEATRE 300 CH Cluster Course: Healing And The Arts

This course explores the healing potential of theatre fine arts, music and narrative literature in the lives of their creators, those who experience the works of art and in society as a whole. This course fulfills the Cluster Course Requirement.

Prerequisite: None Offered: Winter Semester

3 hrs

[back to top](#)

THEATRE 300 CR Interdisciplinary Studies:Special Topics

Faculty from at least two different departments (one of which must be a department in the division of humanities, including history) may determine the topic and syllabus, subject to the approval of the director of Integrated Studies and the programs advisory committee in addition to the approval of the departments involved. This special topics course will satisfy the interdisciplinary course requirement for the B.A. Winter.

3 hrs

[back to top](#)

THEATRE 300 CS Cluster Course: History Of Russian Culture

3 hrs

[back to top](#)

THEATRE 315 Acting II

Textual analysis, characterization and building a role. Prerequisite: Acting I (THEATRE 300).

3 hrs

[back to top](#)

THEATRE 317 Scene Design

Introduces the mechanics of layout: perspective, basic drafting techniques, front elevation and floorplan execution. Second half of the semester emphasizes scenic design as an art form. Prerequisite: THEATRE 113 (THEATRE 4311 recommended) or consent of instructor.

3 hrs

[back to top](#)

THEATRE 325 Acting III

Study and practice of period and contemporary styles of acting. Prerequisite: Acting II (THEATRE 315) . Each semester.

3 hrs

[back to top](#)

THEATRE 329 Master Class In Acting

(A,B,C,D) Class in advanced studies in acting. May be repeated for credit up to eight hours and guest artist change. Prerequisite: Acting III.

2 hrs

[back to top](#)

THEATRE 331 Advanced Oral Interpretation

Oral interpretation of poetry and prose. Careful analysis of selected masterpieces as art forms and an application of the aesthetic discipline to the oral reading of literature.

3 hrs

[back to top](#)

THEATRE 333 History Of Costuming

3 hrs

[back to top](#)

THEATRE 340 Stage Makeup

Lecture and laboratory work in the fundamentals of makeup for the stage.

1 hr

[back to top](#)

THEATRE 350 Theater History I

Development of theater art, including the physical stage, technical production elements, dramatic literature, and audience behavior from primitive origins to the 18th century.

3 hrs

[back to top](#)

THEATRE 351 WI Theater History II

Development of Theater art, including the physical stage, technical production elements, dramatic literature, and audience behavior from the 18th century to the present.

3 hrs

[back to top](#)

THEATRE 352 History Of Costuming

The study of the history of costume, with emphasis on the social and economic ramifications of costuming through the ages.

3 hrs

[back to top](#)

THEATRE 371 Stage Lighting

First half of the course introduces the student to the technical aspects of stage lighting through lectures, laboratory and crew work. Second half of semester involves the student in the fundamentals of design theory and procedure.

3 hrs

[back to top](#)

THEATRE 373 Master Class In Technology

Class in advanced studies in technology. May be repeated for credit up to eight hours as content and guest artist change. Permission of instructor or head of area required.

2 hrs

[back to top](#)

THEATRE 378 Stage Management I

A functional analysis of the duties and responsibilities of the stage manager, with particular reference to the organization and conducting of rehearsals and performances, professional practices and union requirements. Requires student to be an assistant to a stage manager on a University or an MRT production. The first of a two-semester requirement in stage management for theater majors.

3 hrs

[back to top](#)

THEATRE 379 Master Class In Design

Class in advanced studies in design. May be repeated for credit up to eight hours as content and guest artist change. Permission of instructor or head of area required. Undergraduate students elect THEATRE 379.

2 hrs

[back to top](#)

THEATRE 380 Theater Production II

(A,B,C,D) A practicum course in theater to be taken one hour each of the last four semesters. The student will work in various areas each semester, to be selected from: (1) scenery construction, (2) scene painting, (3) stage crew, (4) wardrobe, (5) properties, (6) lighting, (7) house management, (8) assistant stage management. As advanced theater majors, each student will be expected to accept crewhead responsibilities and demonstrate proficiency in the areas selected. Prerequisite: THEATRE 113. Fall/winter/summer.

1 hr

[back to top](#)

THEATRE 395 Speech For The Theater II

(C,D) THEATRE 395 is a continuation of THEATRE 295. The objective of these classes is: training in voice and articulation and the techniques of adaptation to the needs of the artist performer in the theater: exercises to free the voice, develop effective breathing, tone production, articulation, flexibility of vocal production, and projection. Prerequisites: THEATRE 295A and THEATRE 295B.

3 hrs

[back to top](#)

THEATRE 400 Special Problems In Theatre

(A-M) Research and/or production projects for advanced upperclass students. No more than three hours with any one instructor. Prerequisite: Consent of instructor. (A) Acting; (B) Children's Theatre; (C) Costumes; (D) Scenic Design; (E) Directing; (F) History; (G) Lighting; (H) Playwriting; (I) Sound; (J) Stage Management; (K) Technical Production (L) Theatre Management; (M) Theory and Criticism.

3 hrs

[back to top](#)

THEATRE 437 Playwriting I

Theory and practice of writing for the theatre with emphasis on the basic techniques.

3 hrs

[back to top](#)

THEATRE 438 Playwriting II

Theory and practice of writing for the theatre with emphasis on advanced techniques.

3 hrs

[back to top](#)

THEATRE 476 Theatre Sound And Electronics

Study of electronic principles used in audio and control devices. Concentrates on applying knowledge to using the equipment employed in the theater such as sound-effect systems, inter-communication equipment, and includes a special section on the creation of sound and music for theatre productions.

3 hrs

[back to top](#)

THEATRE 478 Stage Management II

Practicum course in stage management. Requires stage management of a University production and/or assistant stage management of an MRT production and/or assistant stage management of a main stage University production. Prerequisite: THEATRE 378 or consent of instructor. Fall/ winter/summer.

2 hrs

[back to top](#)

THEATRE 489 Seminar In Professional Theatre

This course shall be conducted by a visiting artist who is in residence with either Missouri Repertory Theatre or the academic theater. Both student work and the work of the visitor shall be analyzed and criticized in this semester. Fall.

1 hr

[back to top](#)

THEATRE 497 Repertory Theatre

Apprentice-level responsibilities for THEATRE 497 are as follows: apprentices will be used in as many production areas as possible: (1) as actors in small roles and/or extras or supers; (2) as understudies if possible; (3) as needed in the following departments: (a) properties; (b) carpentry and the shop; (c) lighting; (d) costumes; (e) house management; (f) stage management; (g) running crews. Prerequisite: Selection for apprenticeship by departmental chairman. Each semester.

3-6 hrs

[back to top](#)

Urban Planning and Design

UPD 101 Introduction To Urban Studies

This lecture and discussion course provides the undergraduate student with an overview of the interdisciplinary field of urban social science. The student who successfully completes this course will have a broad understanding of the major issues, vocabulary, basic methods, and prominent scholars in urban studies. We will also explore current events of relevance, including the opportunities and problems facing major cities in the United States including Kansas City. Also cross listed as URBAN ST 101. Offered: Fall

3 hrs

[back to top](#)

UPD 203 GIS For Urban Planning

This introductory level GIS course is designed to expose planning students to Geographical Information Systems (GIS). Students will learn basic concepts and theories of GIS and applications of GIS software with hands-on experience. Students will also learn how to search for demographic, socio-economic, land use, transportation, and geospatial data, and how to use such data for their academic research and professional planning work with GIS. Students will apply GIS to the multiple scales of planning work. Offered: Fall

3 hrs

[back to top](#)

UPD 260 History Of Planning And Urban Design

An overview of planning history with an emphasis on the 19th and 20th centuries. The historic framework will include urban history, the rise and development of urban planning, urban design, and social theory and how these areas have affected the shape of our cities. Offered: Fall

3 hrs

[back to top](#)

UPD 280 Land Use Planning

This course explores the basic principles of plan making, land use development and regulation. Students are introduced to contemporary planning and policy issues. Including land use conflicts and alternative models for sustainable planning, design and management. Students will learn how to develop a land use plan using Geographic Information Systems (GIS) and other design tools. An introductory GIS course (UPD 203) is highly recommended. Offered Spring

3 hrs

[back to top](#)

UPD 300 Quantitative Planning Methods And Techniques

Statistical analysis and other analytic techniques of data gathering. Data and problems framed from complex, real world situations. Competence in first-hand research; survey design; case study method; data gathering methods such as observation, open-ended interviewing and questionnaires. Offered: Fall

3 hrs

[back to top](#)

UPD 310 Planning And Design Studio I

The urban planning and design studio will introduce to the student a methodology of designing urban spaces. Students will actively participate in problem solving and determine the physical shaping of communities and cities, while developing abilities in graphic methods of communication and Presentation. The application of principles of urban design, social, political, cultural, economic and environmental considerations will help inform solutions. Students will have the opportunity to work interactively with a wide spectrum of professionals, neighborhood leaders, and political entities in developing strategies for solutions to real urban situations. Students are asked to supply their own computer for the course. Students should consult with the department before purchasing the computer. Prerequisite: ENV-DSN 201, ENV-DSN 202 Offered: Fall Restrictions: Consent of Department

4 hrs

[back to top](#)

UPD 312 Planning & Design Studio II

This course integrates material from Quantitative Methods in Urban Planning. Instruction in urban planning and design focusing on the synthesis of land use analyses, regulatory reviews, urban design issues, and public participation facilitation. Continued instruction in techniques for visually presenting planning and design ideas. Prerequisite(s) UPD 310, UPD 300 Offered: Winter Restrictions: Consent of Dept. of Architecture, Urban Planning & Design

4 hrs

[back to top](#)

UPD 320 Planning Theory

This course examines contemporary urban planning and design practice. Theories about planning practice and related case studies will be the basis of this course. Topics covered will include the definition of urban planning, the idea of the "public realm," planning/design expertise and the rational model, the role of diversity, public participation, communicative planning, advocacy and equity planning, ethics comprehensiveness and the limits of planning. The course is writing intensive and will include assignments that will build student's ability to write quick and analytical assessments, often required in planning practice. Students will be required to attend public planning forums in and around the region. Offered: Winter

3 hrs

[back to top](#)

UPD 332 CZ Enviromental Sustainability

This course will introduce the concept of sustainability and review how sustainability might work at the individual, neighborhood, state, nation and global scales. Students will participate in some form of community engagement on sustainability as well as reflect upon how their own practices impact the environment.

3 hrs

[back to top](#)

UPD 340 Neighborhood And Community Development

Course provides a comprehensive introduction to the field of community development and neighborhood planning. The development of theoretical models that explain neighborhood change and history in the U.S. will serve as the basis. Issues explored include: community organizing, social movements, federal and state policies, and the role of planning organizations and community development corporations in neighborhood revitalization. Offered Fall

3 hrs

[back to top](#)

UPD 400 Advanced GIS For Urban Planning

This advanced level GIS course is designed to expose students to high level GIS techniques and geospatial analyses in urban planning. Students will learn advanced theories and geographic information tools with hands-on experiences. Students will have an opportunity to apply their knowledge and skills in GIS to a real world planning project in class. Offered Spring

3 hrs

[back to top](#)

UPD 401 Portfolio and Resume Development

This class focuses on the development of portfolios necessary for professional advancement in the design fields. Students examine the various types of resumes and portfolios that can be used in different employment situations. Student will be exposed to the many design decisions that must be made when developing a resume and portfolio. Offered Spring

1 hr

[back to top](#)

UPD 410 Planning & Design Studio III

Instruction in problem analysis and plan development for defined urban or suburban location with multiple constituencies. Prerequisites: UPD 312 and not more than one grade of D in a UPD studio course. Restrictions: Permission of Department. Offered: Fall

4 hrs

[back to top](#)

UPD 411 Professional Practice I

This course prepares students for professional practice in planning and design. Issues to be addressed in the seminar include mediation, public meeting facilitation methods and presentation skills. Students engage in writing assignments addressing urban plans and designs concurrent with their work in UPD 410. Offered Fall

1 hr

[back to top](#)

UPD 412 WI Planning And Design Studio IV

Capstone course that incorporates a topical plan or a comprehensive plan for a client comprising a development subdivision, a community or a redevelopment area. Prerequisites: UPD 410 and not more than one grade of D in a UPD studio course. Offered: Spring

5 hrs

[back to top](#)

UPD 413 Professional Practice II

A continuation of professional practice seminar addressing issues of Urban Planning and Design practice including different career options in the public, private, and the nonprofit sectors. The course will chart a path of successful post graduation professional development. Restrictions: Concurrent enrollment in UPD 412WI. Offered Spring

1 hr

[back to top](#)

UPD 420 Transportation Planning

The course provides fundamental theories, methods, and contemporary issues in transportation planning. The topics covered in this course include the transportation planning process, transportation systems, travel demand analysis, and policy issues such as the linkage between land use and transportation, urban transportation finance, social and environmental justice, transportation and environmental impacts, and traffic congestion. Offered Fall

3 hrs

[back to top](#)

UPD 430 Planning For Historic Preservation

The course provides a survey of major issues in the field of historic preservation and heritage studies from a planning perspective. Will focus primarily on the built environment of the United States, as well as world heritage sites and international perspectives. The course will include the urban planning techniques used for preserving historic buildings, neighborhood and districts, as well as some of the landmark legal decisions and legislation that have shaped heritage preservation practice in the U.S. Prerequisite: UPD 260 Offered: Fall 2005

3 hrs

[back to top](#)

UPD 432 Urban Environment Planning And Design

The built environment does not exist in a vacuum. Cities operate within broad ecological processes. Effective environmental planning can protect important natural resources while providing for a higher quality of life for urban residents. As a survey course in a subfield of urban planning, this course introduces students to environment planning approaches and techniques. Prerequisites: UPD Urban Planning Theory and Practice recommended. Offered: Spring

3 hrs

[back to top](#)

UPD 440 New Urbanism

This course will focus on all the components of the New Urbanism—from the region to the block and the building. It will give a detailed analysis of the history and techniques of NU, and the current state of the practice. The course will be a combination of lecture and field work, as students will be asked to participate in exercises that will deepen their understanding of the built environment.

3 hrs

[back to top](#)

UPD 450 Planning Law & Practice

Introduction to legal procedures basic to urban planning, including legal, constitutional, legislative, and administrative concepts, controls, and land-use regulations. Offered Fall

3 hrs

[back to top](#)

UPD 472 Urban Redevelopment

Contemporary issues of urban redevelopment, with an emphasis on American cities, will be examined. Redevelopment processes recently completed or underway in the greater Kansas City region will be the subject of a case study and a theoretical review by each student. Offered: Fall

3 hrs

[back to top](#)

UPD 490 Urban Planning Internship

Work experience off-campus with an approved professional, Government, or non-profit agency sponsor. A contract specifying the expected product of the internship is required between the student, agency and faculty coordinator. Prerequisites: UPD 310 Urban Planning Studio I, UPD 312 Urban Planning Studio II, GEOG 401 GIS Mapping. Restrictions: Consent of the Department.

3 hrs

[back to top](#)

UPD 496 Directed Studies In Urban Planning

Intensive reading and/or research in an area selected by the student in consultation with the instructor. Prerequisites: UPD 260,UPD 270 and UPD 300 Offered: On Demand Restrictions: Permission of instructor Offered Fall and Spring

1-3 hrs

[back to top](#)

UPD 499 Special Topics In Urban Planning

Advanced independent research and analysis in urban planning. Topics and methods used in research, to be established by student and academic supervisor prior to enrollment. Offered: Every semester Restrictions: Permission of instructor

1-3 hrs

[back to top](#)

UPD 499 D Special Topics In Urban Planning

Advanced independent research and analysis in urban planning. Topics and methods used in research, to be established by student and academic supervisor prior to enrollment. Offered: Every semester Restrictions: Permission of instructor

1-3 hrs

[back to top](#)

UPD 499 Special Topics In Urban Planning

Advanced independent research and analysis in urban planning. Topics and methods used in research, to be established by student and academic supervisor prior to enrollment. Offered: Every semester Restrictions: Permission of instructor

1-3 hrs

[back to top](#)

UPD 499 F Special Topics In Urban Planning

Advanced independent research and analysis in urban planning. Topics and methods used in research, to be established by student and academic supervisor prior to enrollment. Offered: Every semester Restrictions: Permission of instructor

1-3 hrs

[back to top](#)

Urban Studies

URBAN ST 100 Neighborhood And Community Development

Course provides a comprehensive introduction to the field of community development and neighborhood planning. The development of theoretical models that explain neighborhood change and history in the United States will serve as the basis. Issues explored include: Community organizing, social movements, federal and state policies, and the role of planning organizations and community development corporations in neighborhood revitalization. Also cross listed as UPD 340

3 hrs

[back to top](#)

URBAN ST 101 Introduction To Urban Studies

Introduction to Urban Studies is a lecture and discussion course that provides the undergraduate student with an overview of the interdisciplinary field of urban social science. The Student who successfully completes this course will have a broad understanding of the major issues, vocabulary, basic methods, and prominent scholars in urban studies. We will also explore current events of relevance, including the opportunities and problems facing major cities in the United States including Kansas City. Also cross listed as UPD 101.

3 hrs

[back to top](#)

URBAN ST 340 Neighborhood and Community Development

Course provides a comprehensive introduction to the field of community development and neighborhood planning. The development of theoretical models that explain neighborhood change and history in the U.S. will serve as the basis. Issues explored include: community organizing, social movements, federal and state policies, and the role of planning organizations and community development corporations in neighborhood revitalization. Prerequisite: none

3 hrs

[back to top](#)

URBAN ST 495 Urban Studies Internship

Students obtain directed practical experience working with non-profits, governments, or private enterprises. Duties will vary based on contractual agreement between the student, host organization, and the professor. Students should have junior standing or higher and the instructor's permission. Prerequisite: Permission of the instructor. Offered: Summer, Fall, or Winter as available

1-6 hrs

[back to top](#)

URBAN ST 499 WI Urban Studies Seminar

This is the capstone course in the Urban Studies Program and is required for majors in the junior/senior year. Students critique urban research and prepare a paper and an oral presentation on an approved topic.

3 hrs

[back to top](#)

Women's and Gender Studies

WGS 201 Introduction To Women's Studies

This course will explore the lives of women from an interdisciplinary perspective. Each time this course is taught it will draw upon the disciplinary expertise of the course instructors. Offered: Every semester

3 hrs

[back to top](#)

WGS 405 Special Topics In Women's And Gender Studies

Each time this course is offered a different area of Women's and Gender Studies will be covered. This course may be repeated for credit when the topic changes. Offered: Every Semester

1-3 hrs

[back to top](#)

WGS 499 Women's And Gender Studies: Senior Seminar

This capstone course focuses on research leading to a term paper on a Women's and Gender Studies Topic. Offered: Every semester

3 hrs

[back to top](#)

World Literature

WLD-LIT 210 Foundations Of World Literature I

This course studies ancient world literature such as The Descent of Inanna, Egyptian love poetry, Hebrew Scriptures, the epics of Homer and Virgil, the Analects of Confucius, and the Oriental wisdom of Laozi. The course also considers ancient creation epics such as the cosmic battle between Marduk and Tiamat, the Metamorphosis of Ovid, and the great Indian epic The Ramayana. Also listed as CLASSICS 210.

3 hrs

[back to top](#)

School of Biological Sciences

School of Biological Sciences Courses Biology (BIOL)

BIOLOGY 102 Biology And Living

Introduction to structural organization and functional processes of living systems. Three hours lecture a week. For non-biology majors only. Does not count toward biology degree.

3 hrs

[back to top](#)

BIOLOGY 102 L Biology And Living Laboratory

Exploration of basic biological concepts through laboratory activities requiring data collection and analysis. Four hours laboratory per week. For non-majors only; does not count toward Biology degree requirements. Prerequisite: BIOLOGY 102 or concurrent.

1 hr

[back to top](#)

BIOLOGY 108 General Biology I

Basic studies in Biology emphasizing the unity and diversity of life. Cellular structure, function, heredity, development, ecology and evolution will be discussed. Three hours lecture per week. Prerequisite(s): High School Biology and Chemistry background highly recommended.

3 hrs

[back to top](#)

BIOLOGY 108 L General Biology I Laboratory

Basic laboratory studies in Biology emphasizing the unity and diversity of life. Structure, function, heredity, development, ecology and evolution will be explored. Three hours laboratory per week. Prerequisites or corequisite: BIOLOGY 108

1 hr

[back to top](#)

BIOLOGY 109 General Biology II

Basic studies in Biology emphasizing the unity and diversity of life. Structure, function, heredity, development, regulation of growth and evolution will be discussed. Three hours lecture per week. Prerequisite(s) High School Biology and Chemistry background highly recommended.

3 hrs

[back to top](#)

BIOLOGY 109 L General Biology II Laboratory

Basic laboratory studies in Biology emphasizing the unity and diversity of life. Structure, function, heredity, development, regulation of growth and evolution will be explored. Three hours laboratory per week. Prerequisites or corequisite: BIOLOGY 109

1 hr

[back to top](#)

BIOLOGY 115 First Year Seminar

This course is designed to provide students with the skills necessary to achieve success at the university. The curriculum includes time management, study, reading, note-taking and test-taking strategies, health and wellness, and student support services. Additional emphasis will include career exploration, including professionalism, writing a resume, and developing plan of study for degree completion. One hour lecture per week. Offered: Fall

1 hr

[back to top](#)

BIOLOGY 1 Biology Elective Lab

Transfer Credit

99 hrs

[back to top](#)

BIOLOGY 202 Cell Biology

Basic concepts of cellular and subcellular structure and function, including supramolecular and organelle structure and organization, bioenergetics, cell growth and cellular communication. Three lectures per week. Prerequisites: BIOLOGY 108, BIOLOGY 109, and CHEM 212, or LS-ANATO 119/119L, LS-MCRB 121 and CHEM 212, OR consent of SBS advisor.

3 hrs

[back to top](#)

BIOLOGY 203 Essential Cell Biology

Foundations of cellular functions. Serves as a bridge between biochemistry and cell and organ physiology for dental students. Applications of fundamental principles to the physiology and pathology of the oral tissues will be stressed.

3 hrs

[back to top](#)

BIOLOGY 206 Genetics

A modern approach integrating molecular and organismal studies of the general genetics of lower and higher organisms. Chromosomal structure and function, gene transmission, heredity, plasticity and population genetics will be discussed. Three hours lecture per week. Prerequisites: BIOLOGY 108, BIOLOGY 109, CHEM 212.

3 hrs

[back to top](#)

BIOLOGY 302 General Ecology

Introduction to the study of populations, communities, and ecosystems by examining the interrelationships between living organisms and their environments. The role of natural selection and evolution will also be considered. Three hours lecture per week. Prerequisites: BIOLOGY 108, BIOLOGY 109, or BIOLOGY 102.

3 hrs

[back to top](#)

BIOLOGY 303 Invertebrate Zoology

Taxonomy, evolutionary relationships, behavior, reproduction, morphology and ecology of the invertebrates. Three hours lecture a week. Prerequisites: BIOLOGY 108 & BIOLOGY 109, CHEM 212

3 hrs

[back to top](#)

BIOLOGY 305 Marine And Freshwater Biology

Introduction to the study of marine ecology, deep-sea biology, oceanic nekton, inter-tidal ecology, estuaries, mangroves and salt marshes, as well as ecology of rivers, lakes, streams, wetlands and human impact on aquatic habitats. Three hours lecture per week. Prerequisites: BIOLOGY 108 & BIOLOGY 109, CHEM 211.

3 hrs

[back to top](#)

BIOLOGY 308 Vertebrate Zoology

Taxonomy, evolutionary relationships, behavior, reproduction, morphology and ecology of the vertebrates. Three hours lecture a week. Prerequisites: BIOLOGY 108 & BIOLOGY 109, CHEM 212

3 hrs

[back to top](#)

BIOLOGY 312 WL Laboratory In Developmental Biology, Genetics And Cell Biology

Experimental studies of genetics and development in selected eukaryotic model organisms with an emphasis on the molecular and cellular mechanism of inheritance. Six hours lab and one hour lecture per week. Designation: Writing Intensive. Prerequisites: LS-BIOC 341, BIOLOGY 409 corequisite.

3 hrs

[back to top](#)

BIOLOGY 314 Entomology

Anatomy, physiology and identification of insects with emphasis on their environmental adaptations. Three hours lecture per week. Prerequisite: BIOLOGY 109 or LS- ANATO 119.

3 hrs

[back to top](#)

BIOLOGY 322 General Parasitology

Parasitic protists, worms and arthropods and the disease states they may induce, will be examined in relationship to human, animal and plants hosts. Three hours lecture per week. Prerequisite(s): BIOLOGY 109 OR LS-ANATO 119. Offered: Summer

3 hrs

[back to top](#)

BIOLOGY 326 Biological Conservation

Applications of ecology and genetics to the conservation of communities and individual species, including discussion of the Endangered Species Act extinction processes, and the effects of habitat fragmentation. Prerequisites: BIOLOGY 302 recommended: BIOLOGY 108 & BIOLOGY 109 required

2 hrs

[back to top](#)

BIOLOGY 327 Biogeography And Biodiversity

Evolutionary and climatological effects on the geographic distribution of organisms, including areas of endemism as well as preservation of biodiversity. Prerequisite(s): BIOLOGY 108 & BIOLOGY 109. Offered: Summer

2 hrs

[back to top](#)

BIOLOGY 328 Histology

Animal tissues and their specialization in the organism, with major emphasis on higher organisms. Two hours lecture per week. Prerequisite(s): BIOLOGY 109 or BIOLOGY 118, BIOLOGY 202, CHEM 212.

2 hrs

[back to top](#)

BIOLOGY 328 L Laboratory In Histology And Cellular Ultrastructure

Examination of structure/function relationships at the subcellular, cellular and organ levels. Both plants and animals will be examined with emphasis on vertebrates. Five hours lab per week. Prerequisite: BIOLOGY 201, CHEM 212, (corequisite) BIOLOGY 328, consent of SBS Adviser. Offered: Winter

3 hrs

[back to top](#)

BIOLOGY 328 WL Laboratory In Histology And Cellular Ultrastructure

Examination of structure/function relationships at the subcellular, cellular and organ levels. Both plants and animals will be examined with emphasis on vertebrates. Four hours lab per week. Designation: Writing Intensive. Prerequisites: BIOLOGY 202, CHEM 212, (co-requisite) BIOLOGY 328, consent of SBS advisor.

3 hrs

[back to top](#)

BIOLOGY 329 Endocrinology

Endocrine regulation and control of growth, development, homeostasis, and reproduction. Includes study of the endocrine organs, their products, and mechanisms of action. Two hours of lecture per week. Prerequisite: BIOLOGY 202 (Physiology background recommended.)

2 hrs

[back to top](#)

BIOLOGY 331 Reproductive Biology

Comprehensive overview of current concepts and knowledge regarding male and female reproductive processes, from gametogenesis through early placentation. Includes structural, developmental, physiological and pathophysiological aspects of reproduction. Two hours of lecture per week. Prerequisite: Recommended LS- ANATO 118, LS-ANATO 119, LS-PHYSICS 117 LS-PHYSICS 316, BIOLOGY 202 and/or BIOLOGY 329. Offered: Summer

2 hrs

[back to top](#)

BIOLOGY 344 Bioorganic Structure And Biomolecular Function

An introduction to chemical and physical properties of complex biological macromolecules and their functions in living cells. Nomenclature, functional groups, reactions and stereochemistry are among the topics to be emphasized. Prerequisites: BIOLOGY 109 and CHEM 320, CHEM 322. Offered (semester): Winter.

3 hrs

[back to top](#)

BIOLOGY 346 Plant Biology

An integrated study of growth, development, and reproduction of plants, including structure and function of plant tissues and organs, as well as a survey of the recent advances in genetic engineering, plant defense mechanisms, and medical botany and the usefulness of plants to humans. Three hours lecture per week. Prerequisites or corequisite: BIOLOGY 202

3 hrs

[back to top](#)

BIOLOGY 405 Introduction To Evolution

Discussion of the biological processes that produce organic diversity through phyletic change, including variation, mutation, adaptation, population genetics, natural selection, genetic drift, gene flow, and macroevolution. Prerequisite: BIOLOGY 206.

3 hrs

[back to top](#)

BIOLOGY 409 Developmental Biology

Principles of development and differentiation of structure during embryology in animals. Molecular, cellular and organismal level concepts and mechanisms will be considered. Three hours lecture per week. Prerequisites: BIOLOGY 202, BIOLOGY 206.

3 hrs

[back to top](#)

BIOLOGY 427 Plant Physiology

A study of the biochemical and physical processes involved in plant function at the molecular and cellular level and the mechanisms by which plants respond to environmental challenges. Three hours lecture per week. Prerequisites: BIOLOGY 202, BIOLOGY 206 AND LS-BIOC 341

3 hrs

[back to top](#)

BIOLOGY 442 Neurobiology

Neurobiology will consist of the presentation of theory and data concerning cellular and molecular fundamentals of the nervous system, synaptic mechanisms, sensory-motor systems, and higher-order functions of the nervous system. Three hours lecture per week. Prerequisite: LS-PHYSICS 316, LS-MCRB 341, or permission of instructor.

3 hrs

[back to top](#)

BIOLOGY 498 WI Critical Analysis Of Biological Issues

Reading and Analysis of scientific literature, including original papers, on a topic of broad biological interest. Critical discussion of experimental methods and results. Writing of scientific reviews and a term paper. Taking the MFAT test is a requirement of this course, and the course satisfies the general education synthesis requirement. Three hours per week of lecture and literature research. Prerequisite(s): CHEM 320 or CHEM 322, completion of core requirements, consent of SBS adviser. Designation: Writing Intensive.

3 hrs

[back to top](#)

Life Sciences (LS)

LIFE-SCI 399 Introduction To Research

Introduction to the theory and practice of research in modern biological sciences. Consent of full-time regular SBS doctoral faculty member and undergraduate programs office required. Requires minimum of 3-4 hours per week in the laboratory for each credit hour. Prerequisites: BIOLOGY 108, BIOLOGY 109, CHEM 212, 3.0 Science GPA. Semester offered: Every semester

1-3 hrs

[back to top](#)

LIFE-SCI 401 Biophysical Principles

Fundamental biophysical concepts and their application to the study of biological molecules, particularly macromolecules and supramolecular structures. Includes discussion of thermodynamics, kinetics, and spectroscopy. Prerequisites: PHYSICS 240 OR PHYSICS 210, MATH 210 AND LS-BIOC 341 Offered: Fall Semesters

3 hrs

[back to top](#)

LIFE-SCI 438 Molecular Recognition In Cellular Biology

Studies the latest development leading to an increased understanding of cellular biology processes when the experimental tools of structural biology analysis and molecular genetics are applied. Prerequisites: BIOLOGY 108 & BIOLOGY 109, BIOLOGY 360, BIOLOGY 202 & BIOLOGY 206. Offered: Fall

2 hrs

[back to top](#)

LIFE-SCI 490 WI Senior Seminar

Discussion, writing and specific readings to coordinate with and amplify topics covered in School of Biological Sciences seminars; must include a term paper on a specific topic. Designation: Writing Intensive. Prerequisite(s): Completion of core requirements, consent of SBS adviser.

3 hrs

[back to top](#)

LIFE-SCI 497 A Special Topics-Bioinformatics

Individual or small group study of topics in the area of bioinformatics including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements. Prerequisite(s) Completion of Biology degree core requirements; a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Advisor.

1-3 hrs

[back to top](#)

LIFE-SCI 497 B Special Topics-Genetics

Individual or small group study of topics in the area of genetics including class room work, presentation, library work, and writing of term papers or other reports. Prerequisite: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member, and permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 497 C Special Topics-Microbiology

Individual or small group study of topics in the area of microbiology including class room work, presentation, library work, and writing of term papers or other reports. Prerequisite: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 497 D Special Topics-Physiology

Individual or small group study of topics in the area of physiology including class room work, presentation, library work, and writing of term papers or other reports. Prerequisite: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 497 Special Topics - Biochemistry

Individual or small group study of topics in the area of biochemistry including class room work, presentation, library work, and writing of term papers or other reports. Prerequisite: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 497 F Special Topics - Biophysics

Individual or small group study of topics in the area of biophysics including class room work, presentation, library work, and writing of term papers or other reports. Prerequisite: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 497 G Special Topics-Cell Biology

Individual or small group study of topics in the area of cell biology including class room work, presentation, library work, and writing of term papers or other reports. Prerequisite: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 497 H Special Topics: Neuroscience

Individual or small group study of topics in the area of neuroscience including class room work, presentation, library work, and writing of term papers or other reports. Prerequisites: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 497 I Special Topics-Botany

Individual or small group study of topics in the area of botany including class room work, presentation, library work, and writing of term papers or other reports. Prerequisites: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 497 J Special Topics-Zoology

Individual or small group study of topics in the area of zoology including class room work, presentation, library work, and writing of term papers or other reports. Prerequisites: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 497 K Special Topics-Ecology

Individual or small group study of topics in the area of ecology including class room work, presentation, library work, and writing of term papers or other reports. Prerequisites: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 497 L Special Topics-Biological Sciences

Individual or small group study of topics in the area of biological sciences including class room work, presentation, library work, and writing of term papers or other reports. Prerequisites: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 497 P Special Topics-Biotechnology

Individual or small group study of topics in the area of biotechnology including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements. Prerequisite(s): Completion of Biology degree core requirements; a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Advisor. Offered: Fall, Winter, Summer

1-3 hrs

[back to top](#)

LIFE-SCI 499 A Undergraduate Research-Bioinformatics

Independent research, including the writing of research reports in the area of bioinformatics. Combined credit for LS 497 and 499 may not exceed 4 credit hours towards biology course degree requirements. Prerequisite(s) Completion of Biology degree core requirements a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Advisor.

1-3 hrs

[back to top](#)

LIFE-SCI 499 B Undergraduate Research-Genetics

Independent research, including the writing of research reports in the area of genetics. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0; consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 499 C Undergraduate Research-Microbiology

Independent research, including the writing of research reports in the area of microbiology. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0; consent of faculty member; permission from a School of Biological Sciences Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 499 D Undergraduate Research-Physiology

Independent research, including the writing of research reports in the area of physiology. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0; consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 499 Undergraduate Research-Biochemistry

Independent research, including the writing of research reports in the area of biochemistry. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0; consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LS 497 and 499 may not exceed 4 credit hours towards biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 499 F Undergraduate Research- Biophysics

Independent research, including the writing of research reports in the area of biophysics. Prerequisites: Completion of Biology degree core requirements, minimum GPA Of 3.0; consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 499 G Undergraduate Research-Cell Biology

Independent research, including the writing of research reports in the area of cell biology. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0; consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 499 H Undergraduate Research-Neuroscience

Independent research, including writing of research reports in the area of neuroscience. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0; consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 499 I Undergraduate Research-Botany

Independent research, including the writing of research reports in the area of botany. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0, consent of faculty member; permission from a school of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 499 J Undergraduate Research-Zoology

Independent research, including the writing of research reports in the area of zoology. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0, consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 499 K Undergraduate Research-Ecology

Independent research, including the writing of research reports in the area of ecology. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0, consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 499 L Undergraduate Research-Biological Sciences

Independent research, including the writing of research reports in the area of biological sciences. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0; consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

1-3 hrs

[back to top](#)

LIFE-SCI 499 M Undergraduate Research-Biological Sciences Honors

Independent research, including the writing of research reports in the area of biological sciences. Prerequisites: Consent of SBS adviser required.

1-3 hrs

[back to top](#)

LIFE-SCI 499 P Undergraduate Research-Biotechnology

Independent research, including the writing of research reports in the area of biotechnology. Combined credit for LS 497 and 499 may not exceed 4 credit hours towards biology course degree requirements. Prerequisite(s) Completion of Biology degree core requirements a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Advisor. Offered: Fall, Winter, Summer

1-3 hrs

[back to top](#)

LIFE-SCI H490 WI Honors Senior Seminar

Discussion, writing and specific readings to coordinate with and amplify topics covered in School of Biological Sciences seminars; must include a term paper on a specific topic. Designation: Writing Intensive. Prerequisite(s): Completion of core requirements, consent of SBS adviser.

3 hrs

[back to top](#)

Life Sciences - Anatomy (LSANAT)

LS-ANATO 118 Introductory Anatomy

Description and discussion of the cells, organs, organ systems and basic tissues of vertebrates with special emphasis on their interrelationships in functional anatomy. Three hours lecture per week.

3 hrs

[back to top](#)

LS-ANATO 118 L Introductory Anatomy Laboratory

Laboratory investigation of cells, tissues, and organs with special emphasis on their interrelationship in vertebrates. One hour recitation and three hours lab per week. Pre/co-requisite: LS ANAT 118

2 hrs

[back to top](#)

LS-ANATO 119 Functional Anatomy I

An introduction to the functional anatomy of vertebrates with emphasis on organs, organ systems and tissues. Three hours lecture per week.

3 hrs

[back to top](#)

LS-ANATO 119 L Functional Anatomy I Laboratory

An introduction to the functional anatomy of vertebrates with emphasis on organs, organ systems and tissues. Three hours recitation per week.

1 hr

[back to top](#)

Life Sciences - Biochemistry (LSBIOC)

LS-BIOC 304 Biochemistry And Nutrition

The chemistry of the structures and processes of the human body in their normal condition with special consideration of the chemical aspects of disease of the oral structure. A presentation of the basic principles of nutrition.

4 hrs

[back to top](#)

LS-BIOC 3120 Biochemistry And Nutrition

The fundamentals of biochemistry and the nutritional implications as they relate to source and utilization of essential nutrients.

3 hrs

[back to top](#)

LS-BIOC 3240 Applied Nutrition

Students will discuss life cycle nutrition as it relates to preventive dentistry and total health. Nutritional factors from infancy to old age are discussed, including diet and nutrition for special patients such as expectant mothers, diabetics, patients with heart disease, fracture patients, institutionalized patients, etc. Students will provide nutritional counseling to healthy patients and special patients within the framework of the course. Principles will be utilized in later clinical courses and practicums.

3 hrs

[back to top](#)

LS-BIOC 341 Basic Biochemistry

One semester course covering the properties of organic compounds important to biological systems. Structures, characterization and reactions of common compounds and their relationship to the building blocks of biological systems will be discussed. Three hours lecture per week. Prerequisites: BIOLOGY 202, and CHEM 320, or CHEM 322.

3 hrs

[back to top](#)

LS-BIOC 360 Biochemistry

Introduction to modern biochemistry. Structure and function of biologically important compounds, major biochemical pathways and their regulation in animals, plants and microorganisms, and the molecular and biochemical basis of gene function will be studied. Three hours lecture per week. Prerequisites: BIOLOGY 202, BIOLOGY 206, LS-BIOC 341, and CHEM 320 or CHEM 322.

3 hrs

[back to top](#)

LS-BIOC 360 L Laboratory In Biochemistry And Molecular Biology

Laboratory studies in biochemistry and molecular biology with an emphasis on modern techniques and quantitative relationships. Written consent of the instructor required. Prerequisites: LS-BIOC 360, MATH 220 and a 3.0 science GPA.

3 hrs

[back to top](#)

LS-BIOC 360 WL Laboratory In Biochemistry And Molecular Biology

Laboratory studies in biochemistry and molecular Biology with an emphasis on modern techniques and quantitative relationships. Written consent of the instructor required. Designation: Writing Intensive. Prerequisite(s): LS-BIOC 341.

3 hrs

[back to top](#)

LS-BIOC 365 Human Biochemistry I

The basic principles of human biochemistry for pharmacy students presented in a two-term integrated unit. Topics will include the chemistry and mechanisms involved in biosynthesis, degradations and utilization of the major constituents of living systems and the biochemistry of specialized tissues, hormones, nutrition and regulation. Restricted to students in the School of Pharmacy. Prerequisites: BIOLOGY 202 (pre or corequisite) and CHEM 320 or CHEM 322R.

3 hrs

[back to top](#)

LS-BIOC 366 Human Biochemistry II

The basic principles of human biochemistry for pharmacy students and other undergraduates presented in a two-term integrated unit. Topics will include the chemistry and mechanisms involved in biosynthesis, degradation and utilization of the major constituents of living systems and the biochemistry of specialized tissues, hormones, nutrition and regulation. Restricted to students in the School of Pharmacy. Prerequisite: LS-BIOC 365G

3 hrs

[back to top](#)

LS-BIOC 425 Bioinformatics

Study of the acquisition, storage, retrieval, analysis, modeling, and distribution of information in biomolecular databases. Recent developments in genomics and proteomics and how these databases are used in modern biological research will be emphasized. Prerequisites: LS-BIOC 341 or permission of instructor

3 hrs

[back to top](#)

LS-BIOC 430 Molecular Biology And Genetic Engineering

Molecular aspects of gene structure and function, including macromolecular synthesis, gene regulation, genetic transfer and biotechnology will be discussed in prokaryotes and eukaryotes. Three hours lecture per week. Prerequisites: BIOLOGY 202, BIOLOGY 206, and LS-BIOC 341.

3 hrs

[back to top](#)

Life Sciences - Microbiology (LSMCRB)

LS-MCRB 112 Microbiology And Living

Lectures and demonstrations concerning the cell structure, genetics and physiology of microorganisms and the role microorganisms play in the world around man with an emphasis on medical and clinical aspects of the significance of various groups of bacteria, viruses fungi and other microorganisms. This course is intended for nursing and other allied health students and for non-biology majors interested in life sciences. Prerequisite: None

3 hrs

[back to top](#)

LS-MCRB 113 Introductory Microbiology

An introduction to microbiology with emphasis on infection and the basis of immunity. Three hours lecture per week. For non-majors only; does not count toward Biology degree requirements. Prerequisite(s): High School Biology and Chemistry background highly recommended.

3 hrs

[back to top](#)

LS-MCRB 114 L Introductory Microbiology Laboratory

Introductory laboratory studies in microbiology and infection to correlate with LS-MCRB 113. Four hours per week. For non-majors only; does not count toward biology degree requirements. Prerequisite: LS-MCRB 112 or LS-MCRB113.

2 hrs

[back to top](#)

LS-MCRB 121 Human Biology III (Microbiology)

Basic concepts of microbiology with emphasis on infectious diseases and host defenses. Three hours lecture per week. Prerequisite(s): LS-ANATO 119, CHEM 211

3 hrs

[back to top](#)

LS-MCRB 121 L Human Biology III (Microbiology) Lab

Laboratory exercises demonstrating basic concepts of microbiology with emphasis on infectious diseases and host defenses. Three hours laboratory per week. Prerequisites or corequisite: LS-MCRB 121 Offered: (semester)

1 hr

[back to top](#)

LS-MCRB 313 Microbiology

Fundamental and applied aspects of microbial structure, metabolism, genetics and diversity. Experimental approaches to studying the microbial world will be emphasized. Three hours lecture per week. Prerequisites: BIOLOGY 202, BIOLOGY 206, and LS-BIOC 341 co-requisite.

3 hrs

[back to top](#)

LS-MCRB 313 L Laboratory In Microbiology

General microbiological procedures plus advanced work in the areas of microbial physiology and genetics, pathogenic microbiology, virology, applied microbiology and biotechnology. One hour lecture and six hours lab per week. Pre-or co-requisites, LS-MCRB 313, LS-BIOC 341, consent of SBS adviser. Offered: Fall

3 hrs

[back to top](#)

LS-MCRB 313 WL Laboratory In Microbiology

General microbiological procedures plus advanced work in the areas of microbial physiology and genetics, pathogenic microbiology, virology, applied microbiology, and biotechnology. One hour lecture and six hours lab per week. Designation: Writing Intensive. Prerequisite: Pre-or co-requisites, LS-MCRB 313, LS-BIOC 341 Offered: Fall

3 hrs

[back to top](#)

LS-MCRB 4180 Microbiology

Study of infectious diseases, their etiology, symptoms, prevention and treatment. Special emphasis is placed on plaque formation, caries development, periodontal and other oral diseases that relate to dentistry. Four hours lecture per week

4 hrs

[back to top](#)

LS-MCRB 431 Virology

Survey of the molecular biology of animal, plant, and bacterial viruses. The course will emphasize the molecular mechanisms of virus replication, viral pathogenesis, and the use of virus as model systems to study mammalian cells. Three hours lecture per week. Prerequisites: BIOLOGY 202 and BIOLOGY 206; pre or co-requisite LS-BIOC 341 or LS-BIOC 365

3 hrs

[back to top](#)

LS-MCRB 435 Immunology

A study of the cellular and humoral aspects of the immune response, with emphasis upon the mechanisms involved and the relationship of this response to disease processes. Three hours lecture per week. Prerequisites: LS-MCRB 121 or LS-MCRB 313, and LS-BIOC 341 or LS-BIOC 366. Offered: Winter Semesters

3 hrs

[back to top](#)

Life Sciences - Physiology (LSPHYS)

LS-PHYS 117 Human Physiology

Introduction to body functions presented from an organ systems approach. Three hours lecture per week. For non-majors only; does not count toward biology degree requirements.

3 hrs

[back to top](#)

LS-PHYS 3070 Oral Physiology

Concepts of general physiology will be discussed as they relate to the clinical practice of dental hygiene. Emphasis will be placed on the normal and abnormal physiology of oral structures, including such topics as neurophysiology, muscle function, salivation, and endocrinology.

3 hrs

[back to top](#)

LS-PHYS 316 Principles Of Physiology

Physiological functions and processes of animals at the organ and organ systems levels, including concepts of integrated and homeostatic mechanisms. The relationship between organ function and underlying cellular mechanisms in vertebrates will be emphasized. Three hours lecture per week. Prerequisites: BIOLOGY 202, BIOLOGY 206, and LS-BIOC 341.

3 hrs

[back to top](#)

LS-PHYS 399 Pharmacy Physiology I

Introduction to the general principles of neurophysiology. Prerequisites: BIOLOGY 202 and CHEM 320.

3 hrs

[back to top](#)

LS-PHYS 400 Pharmacy Physiology II

The principles of physiology presented by an integrated approach based on an organ system format. Emphasis is placed on facts and principles pertinent for the student enrolled in pharmacy. Prerequisite: LS-PHYSICS 399.

3 hrs

[back to top](#)

LS-PHYS 401 Physiology Lecture

An integrated study of normal functions of various organ systems of the human body with special consideration of the physiology of the oral cavity and its related structures.

5 hrs

[back to top](#)

Henry W. Bloch School of Business and Public Administration

Bloch School of Business & Public Administration Courses Accounting (ACCTNG)

ACCTNG 210 Introduction To Financial Accounting

An overview of basic concepts and terminology associated with reporting financial information to parties outside of an organization. Prerequisite: MATH 110 or its equivalent and completion of 30 hours

3 hrs

[back to top](#)

ACCTNG 211 Introduction To Managerial Accounting

An introduction to the use of cost accounting concepts and information in managing the activities of a business. Prerequisite: ACCTNG 210 or its equivalent

3 hrs

[back to top](#)

ACCTNG 307 Cost Management

A study of the principles and techniques of cost accounting with emphasis on the structure of cost accounting systems and the processing, summarizing and reporting of cost information. Topics include various issues relevant for manufacturing and service organizations, and introduction of situations that require the application of cost information to managerial settings. Prerequisite: ACCTNG 211 or its equivalent and Junior standing.

3 hrs

[back to top](#)

ACCTNG 310 Intermediate Accounting I

A study of theory and application of external corporate reporting. The course covers a variety of financial accounting issues including assets, liabilities, revenue recognition, and accounting change analysis. Publications and pronouncements of the accounting professions are emphasized where applicable. Prerequisites: ACCTNG 211 or its equivalent and junior standing

3 hrs

[back to top](#)

ACCTNG 311 Intermediate Accounting II

Continued study of intermediate accounting. The course covers a variety of financial accounting issues including corporate equities, income taxes, pensions, other post-employment benefits, leases, and the statement of cash flows. Publications and pronouncements of the accounting profession are emphasized where applicable. Prerequisites: ACCTNG 310 or its equivalent.

3 hrs

[back to top](#)

ACCTNG 350 Accounting Systems And Controls

A survey of computer file methods for accounting data; and, analysis of the administrative, operational, documentation, and security controls over the computer process. Illustrations of computerized accounting and auditing techniques. Prerequisites: MIS 203 or BIS 202, ACCTNG 307 and ACCTNG 310

3 hrs

[back to top](#)

ACCTNG 3 EC Upper Level Accounting Elective

Upper Level Transfer Credit

99 hrs

[back to top](#)

ACCTNG 405 Auditing

A study of how the auditor determines the nature and amount of evidence that should be accumulated considering the unique aspects of an engagement, as well as some idea of how that evidence is evaluated in the context of a financial audit. Prerequisites: ACCTNG 311 and ACCTNG 350 or equivalents.

3 hrs

[back to top](#)

ACCTNG 408 Federal Income Taxation

An examination of the theory and practice of taxation as applied to individuals and businesses. Prerequisite: ACCTNG 211 or its equivalent.

3 hrs

[back to top](#)

ACCTNG 409 Advanced Taxation

An examination of the theory, practice, and research methodology of taxation as applied to corporations, partnerships, estates and trusts. Prerequisite: ACCTNG 408 or equivalent.

3 hrs

[back to top](#)

ACCTNG 420 Advanced Accounting

A study of the accounting business combinations and the preparation of consolidated financial statements. Prerequisite: ACCTNG 311 or equivalent

3 hrs

[back to top](#)

ACCTNG 421 Governmental/Not-For-Profit Accounting

An overview of accounting for state and local governments and not-for-profit entities. Pronouncements of the accounting profession are emphasized where applicable. Prerequisite: ACCTNG 311 or equivalent

3 hrs

[back to top](#)

ACCTNG 450 Technology And The Accountant

A study of selected computer, systems, and technology issues that impact contemporary accounting practice and business. The course includes coverage of database management systems and incorporates several hands-on applications. Prerequisite: ACCTNG 350 or equivalent

3 hrs

[back to top](#)

ACCTNG 496 Internship

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Admission only by prior approval and consent of the instructor. Offered: Every Semester

1 hr

[back to top](#)

ACCTNG 497 Special Topics In Accounting

Study and research in accounting areas of special student interest, under individual faculty supervision and guidance. Admission only by prior approval and consent of the instructor. Prerequisite: Senior standing.

1-3 hrs

[back to top](#)

Decision Science and Operations Management (DSOM)

DSOM 309 Intermediate Business Statistics

This course emphasizes statistical applications in business, and students will complete research projects using one or more multivariate statistical techniques. Topics covered will include statistical software (such as SAS or SPSS), multiple regression, Chi-Square, analysis of variance, non-parametric methods, multidiscriminant analysis, factor analysis, and a brief introduction to structural equation models. Prerequisite: STAT 235 or BDS 308

3 hrs

[back to top](#)

DSOM 326 Production/Operations Management

This course presents an introduction to the concepts, models, and methods of operations management. Students will study approaches to planning, scheduling, and controlling product and service facilities, processes, cost, quality, quantity, production, capacity, inventory, and distribution requirements. Computer applications and computer-based operations control systems will be introduced as a means to effectively manage the operations functions of both product and service organizations. Prerequisites: ECON 202, STAT 235 or BDS 308

3 hrs

[back to top](#)

DSOM 346 Management Analysis

This course examines the application of various scientific and mathematical methods to decision making in various business disciplines, and makes use of spreadsheets and other software to construct and analyze practical models of real-world systems. Applications will be based on topics such as project management, decision analysis, scheduling, queuing systems, simulation, optimization/allocation models, forecasting, and profitability analysis. Prerequisites: STAT 235 or BDS 308, and MIS 203 or BIS 202

3 hrs

[back to top](#)

DSOM 431 Quality and Process Improvement

A study of planning and managing effective quality and processes in organizations. Students are expected to master important quality management and process improvement tools including Six Sigma, TQM, Theory of Constraints, and other contemporary tools via appropriate software, case studies, and projects. Prerequisite: DSOM 309

3 hrs

[back to top](#)

DSOM 496 Internship: Decision Science and Operations Management

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Prerequisite: Admission only by prior approval and consent of instructor

1-3 hrs

[back to top](#)

DSOM 497 Special Topics: Decision Science and Operations Management

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Prerequisite: Admission only by prior approval and consent of instructor

1-3 hrs

[back to top](#)

Entrepreneurship (ENT)

ENT 215 Introduction to Entrepreneurship

This course is designed to introduce students to the excitement and challenges of building your own business. It focuses on identifying and evaluating entrepreneurial opportunities, as well as identifying what it takes to get a new venture off the ground. The course is enriched with real-life examples, including case studies of start-ups and personal stories from local entrepreneurs. The instructor emphasizes active, hands-on learning; additionally, student teams will get a taste for starting and running a company through a computerized business simulation.

3 hrs

[back to top](#)

ENT 315 Introduction to Entrepreneurship

This course is designed to introduce students to the excitement and challenges of building your own business. It focuses on identifying and evaluating entrepreneurial opportunities, as well as identifying what it takes to get a new venture off the ground. The course is enriched with real-life examples, including case studies of start-ups and personal stories from local entrepreneurs. The instructor emphasizes active, hands-on learning; additionally, student teams will get a taste for starting and running a company through a computerized business simulation.

3 hrs

[back to top](#)

ENT 327 Creating the New Venture: Experiential Learning

This course guides students through the process, experiences, and requirements for creating a new venture and planning for operations up to the point of securing customers and generating first revenues. Key course actions include developing a business plan for the new venture, examining the initial steps for start-up and operational launch, and preparing for securing of customers/revenues. Prerequisites: ENT 215 or ENT 315

3 hrs

[back to top](#)

ENT 332 Managing the New Venture: Experiential Learning

In this course, students will acquire the skill sets needed for managing and growing a successful new venture, and will actually manage a new enterprise. Prerequisites: ENT 327 or ENT 328

3 hrs

[back to top](#)

ENT 341 Technology Entrepreneurship

This course is designed to familiarize students with the creation of successful, high-value enterprises, with an emphasis on markets for technology and venture capital. Students identify a business opportunity, create a technology-based solution, and assess the commercial and technological viability of the business opportunity. Case studies will emphasize both life science and IT technologies.

3 hrs

[back to top](#)

ENT 361 New Product Development

This course introduces students to a formal process to develop new products and services. Throughout the process, students will learn how an abstract idea can be transformed into concrete product concepts that will in turn be translated into tangible working prototypes.

3 hrs

[back to top](#)

ENT 364 Entrepreneurial Management

Students are exposed to the unique entrepreneurial experience of conceiving, evaluating, creating, managing, and potentially selling a business. The goal is to provide a comprehensive background with practical application of important concepts applicable to an entrepreneurial environment. Key business areas of finance, accounting, marketing, and management will be addressed from an entrepreneurial perspective.

3 hrs

[back to top](#)

ENT 412 Entrepreneurial Finance and Venture Capital Investment

This course examines the financing and valuation of new ventures from the perspectives of entrepreneurs and venture capitalists. The focus is on financial thinking, tools, and techniques that are relevant for seeking new venture financing and making investment decisions. The course is suitable for anyone with an interest in startup companies, or venture capital and private equity firms..

3 hrs

[back to top](#)

ENT 425 Corporate Entrepreneurship

Students receive an introduction to the field of corporate entrepreneurship, including the effectiveness of different models of corporate entrepreneurship. Specific topics include the creation of an entrepreneurial culture within the organization, the translation of opportunities into attractive corporate investments, corporate venturing, and the role of venture champions.

3 hrs

[back to top](#)

ENT 432 Entrepreneurial Marketing and Selling

This course exposes students to the objectives, challenges, and requirements for effective, results-oriented marketing activities and sales efforts for the entrepreneur/new venture. Key topics include the selection, design, and budgeting of entrepreneurial marketing and advertising programs, along with effective selling, customer acquisition, and service/retention efforts.

3 hrs

[back to top](#)

ENT 446 Entrepreneurial Selling and Sales Force Management

This course assists students in developing a successful sales plan for a new venture. The first half of the course deals with sales techniques; the second half addresses important sales force management topics such as recruitment, training, deployment, motivation, compensation, and evaluation.

3 hrs

[back to top](#)

ENT 460 Creating the Enterprise

This course looks at the processes and skills needed so that individuals can create their own enterprise, manage a new business, or work within an entrepreneurial organization. Students will learn how to take a good idea, assess that idea, and develop an appropriate business model, and will work in teams to develop a full-length business plan. Prerequisites: Students must have completed or be currently enrolled in the following courses: ACCTNG 211, FIN 325, MKT 324, MGT 330, and DSOM 326

3 hrs

[back to top](#)

ENT 491 Entrepreneurial Consulting

Working in teams, students will consult with small business client firms. This will require the identification of problems, the proposal of solutions, and the responsibility for implementing those solutions where practicable in the enterprise.

3 hrs

[back to top](#)

ENT 496 Internship: Entrepreneurship

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Prerequisite: Admission only by prior approval and consent of instructor

1-3 hrs

[back to top](#)

ENT 497 Special Topics: Entrepreneurship

Study and research in areas of special interest under individually faculty direction. Prerequisites: Senior standing and pre-registration consent of instructor.

1-3 hrs

[back to top](#)

Finance (FIN)

FIN 325 Financial Management

This course provides an overview of the relationship between business decisions and the value of the firm, as determined by the marketplace. Students will study the composition of capital structure, capital budgeting, and cost of capital theory, including incremental analysis of investment situations. Prerequisite: ACCTNG 210

3 hrs

[back to top](#)

FIN 340 Global Financial Markets and Institutions

Students are introduced to global financial markets and institutions as well as the regulators. Topics include financial instruments, past and current global financial crises, financial restructuring and reforms, and the interrelationships between financial and real economies. Prerequisites: FIN 325

3 hrs

[back to top](#)

FIN 345 Investments

The course develops the theoretical framework necessary for a systematic approach to portfolio management. Content includes consideration of investment objectives, measurement of risk and returns, alternative uses of invested funds, analysis of securities markets, and the techniques of security analysis. Students will have an opportunity for the creation and management of an investment portfolio. Prerequisite: FIN 325 or BUS-ADM 325

3 hrs

[back to top](#)

FIN 419 Financial Statement Analysis

Students will take an in-depth look at the external financial statements that are prepared by corporations, including the tools needed to organize, summarize, and understand corporate financial data for use in decision making. Ratio analysis, trend analysis, earnings forecasting, bankruptcy predictors, statistical methods important to finance, and financial data bases are among the topics that will be covered. Prerequisites: MGT 302, FIN 325 or BUS-ADM 325

3 hrs

[back to top](#)

FIN 427 Debt Instruments And Markets

An overall view of the financing process and the role of financial markets. The course will cover the characteristics of instruments traded in money and capital markets; determinants of and the relationships between different asset prices; and international aspects of financial markets. In particular, topics that will be covered include: Interest rate theory, valuing fixed income securities, managing interest rate risk, derivative financial instruments, capital market equilibrium, managing currency risk and applications of structured fixed income products. Prerequisite: BUS-ADM 325, FIN 325, ECON 202

3 hrs

[back to top](#)

FIN 428 Commercial Bank Management

This course presents an overview of financial management of the interest spreads, credit risk, liquidity, and capital positions of commercial banks. Topics to be covered include analysis of bank profitability, lending functions and policy, securities investment strategies, fund attraction, regulatory examination, capital adequacy, and integrated asset/liability management. Instructional media includes cases and computerized bank management simulation. Prerequisites: ECON 202, FIN 325 or BUS-ADM 325

3 hrs

[back to top](#)

FIN 435 Advanced Corporate Finance

The course focuses on the finance function of the firm from the managerial perspective. Topics include working capital management, capital budgeting, financial structure, merger and reorganization, capital rationing, and analysis of risk. Students will use cases and computer techniques. Prerequisite: FIN 325 or BUS-ADM 325

3 hrs

[back to top](#)

FIN 496 Internship: Finance

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Admission only by prior approval and consent of instructor.

1-3 hrs

[back to top](#)

FIN 497 Special Topics: Finance

Study and research in areas of special interest under individual faculty direction. Prerequisite: Senior Standing and pre-registration consent of instructor

1-3 hrs

[back to top](#)

Health Administration (HA)

HLTH-ADM 465 Contemporary Issues In Urban Public Health

This course examines current issues in urban public health and the policies and programs designed to address those issues. Issues of interest include treatment of drug addiction, the special health problems of the very young and very old, problems of urban public hospitals, policies towards AIDs treatments, as well as other emerging issues. Using local health officials as guest speakers, the course will examine how these issues affect the Kansas City area in particular.

3 hrs

[back to top](#)

Management (MGT)

MGT 100 Foundations of business and College Life

This course provides an introduction to the functional areas of business (e.g., accounting, systems, finance, marketing, human resources, and entrepreneurship) as well as a number of contemporary business topics, including social responsibility, diversity, ethics, and globalization. Additionally, students will be exposed to various topics that facilitate a successful transition from high school to college. Examples include an overview of University and Bloch School resources, development of effective study habits, time and stress management, selection of a major and career options. Restrictions: Open to Freshman.

3 hrs

[back to top](#)

MGT 301 Effective Business Communication

Business Writing introduces students to the strategic nature of business communication. By the end of the course, students should be able to analyze business situations and prepare messages that fulfill all of the intended purposes of their communication, meet the needs and expectations of business audiences, and take into account other relevant contextual factors. Students will develop the tools to deliver polished, professional communications in a variety of media. Prerequisite: ENGLISH 225, successful completion of WEPTRestrictions: Course must completed in student's junior year

3 hrs

[back to top](#)

MGT 302 Effective Business Research and Presentations

This course will emphasize the development of higher-order thinking skills, which include analysis, synthesis, and evaluation. By the end of the course, students will learn to analyze financial statements, effectively use library and electronic business research tools, and prepare and deliver effective oral and written presentations. Prerequisites: COMM-ST 110, ACCTNG 211, MIS 203 or BIS 202, MGT 301

3 hrs

[back to top](#)

MGT 306 Legal, Ethical And Regulatory Environment Of Business

The course looks at legal and moral thought, with attention to ethical issues in business. Students are introduced to our common law system; selected areas of law, with attention to the inclusion of cultural and moral values; and an introduction to government regulation of business.

3 hrs

[back to top](#)

MGT 320 Law Of Commercial Transactions

Study of major areas of law included in the Uniform Commercial Code. Topics may include sales, commercial paper, bank deposits and collections, aspects of property law, documents of title, investment securities, and secured transactions. Prerequisite: MGT 306 or BMA 306.

3 hrs

[back to top](#)

MGT 330 Understanding the Individual in the Organization

This course explores the micro dynamics of organizations: the individual and his/her relationship to other people, teams, and work groups. Topics will include: individual traits, behaviors, and skills for effective performance; self-assessment and professional development; staffing; motivation; individual and group dynamics; multicultural understanding and diversity; and ethical decision making.

3 hrs

[back to top](#)

MGT 337 Managing Human Capital

Building on prior coursework, this course will provide students with advanced human resource concepts and practices as well as practical experience in how human resources should be managed in successful businesses. Student groups will work with a local organization to diagnose, analyze, and make recommendations regarding effective programs in staffing, developing, rewarding, motivating, and managing its personnel. Prerequisite: MGT 330 or BMA 305

3 hrs

[back to top](#)

MGT 355 Organizational Effectiveness and Leadership

Students will study the ¿macro dynamics¿ of organizations: broad knowledge of how organizations work and the various ethical means of impacting outcomes. Topics will include: structure, culture, and politics of organizations; human resources and linkages to organizational culture and success; organization influence and political savvy; managing change and learning in a global context; organizational governance, codes of conduct, and internal controls; the role of business in society; and various professional development issues. Prerequisite: MGT 330 or BMA 305

3 hrs

[back to top](#)

MGT 370 International Management

Students receive an introduction to management in an international environment, addressing the management functions and behaviors necessary to develop global vision and management skills at a strategic (macro) and interpersonal (micro) level. Cross-cultural management and competitive strategy are evaluated in the context of global changes.

3 hrs

[back to top](#)

MGT 470 International Study in Business

This course is designed to provide a study-abroad experience for the student. The course involves three components: study of international business through on-campus lectures and discussions; travel to a foreign country for visitations to business firms, government organizations, and cultural sites; and critique sessions of the international learning experience after travel completion. Restrictions: Special application and selection process prior to enrollment

3-6 hrs

[back to top](#)

MGT 471 Strategic Management

The study of business strategy concepts and application using case studies representing "real world" situations. The course stresses the formulation of business strategies to achieve organizational objectives using strategic analysis and models based upon external and internal assessments of the organization's environment. Prerequisites: ACCTNG 211,FIN 325, or BUS-ADM 325,MGT 330 or BMA 305, MKT 324 or BUS-ADM 314, DSOM 326 or BUS-ADM 426 or concurrent enrollment.

3 hrs

[back to top](#)

MGT 496 Internship: Management

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Admission only by prior approval and consent of instructor

1-3 hrs

[back to top](#)

MGT 497 Special Topics: Strategic Management

Study and research in areas of special interest under individual faculty direction. Prerequisites: Senior Standing and pre-registration consent of instructor.

1-3 hrs

[back to top](#)

Management Information Systems (MIS)

MIS 100 Essentials of PowerPoint

An overview of numerous topics needed to take the Microsoft Office Specialist certification exam in PowerPoint. Topics covered will include creating and formatting content, and managing and delivering presentations.

1 hr

[back to top](#)

MIS 101 Essentials of Excel

An overview of numerous topics needed to take the Microsoft Office Specialist certification exam in Excel. Topics covered will include creating, analyzing, and formatting data and content and managing workbooks.

1 hr

[back to top](#)

MIS 202 Computer Applications In Management

A comprehensive coverage of computer tools for personal productivity in a management context, including spreadsheets and databases. Prerequisites: MATH 110 or equivalent.

3 hrs

[back to top](#)

MIS 203 Computer Applications for Business

A comprehensive coverage of computer tools for personal productivity in a management context, including advanced coverage of spreadsheets and introduction to databases. Prerequisite: MATH 110 and Certification as Microsoft Office Specialist in Excel and PowerPoint.

3 hrs

[back to top](#)

MIS 402 Information Management

This course introduces students to the impact of information technologies and systems on the enterprise. Business Intelligence and decision support capabilities are explored as well. Prerequisites: MIS 203 and STAT 235

3 hrs

[back to top](#)

MIS 415 Managing the Information Systems Resource

All organizations today have information systems, and managing the related resources (systems personnel, software applications, databases, networks, computing hardware) is a necessary skill for many employees. This course is aimed at developing the non-technical skills that business-school graduates need to make appropriate decisions about the deployment of information systems throughout the firm. Prerequisites: MIS 203 or BIS 202, and six hours of business school courses at the 300-level or above

3 hrs

[back to top](#)

MIS 469 Information Systems Consulting

An application of systems concepts to the evaluation and implementation of information systems. Student teams will analyze, document and make recommendations for the improvement of these systems, and will communicate their findings via written reports and oral presentations. Course content might be actual projects for local organizations, or it might be a simulation of a consulting engagement. Prerequisite: Senior Standing and Instructor Permission

3 hrs

[back to top](#)

MIS 496 Internship: Management Information Systems

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Prerequisite: Admission only by prior approval and consent of instructor

1-3 hrs

[back to top](#)

MIS 497 Special Topics: Management Information Systems

Study and research in areas of special interest under individual faculty direction. Prerequisite: Senior Standing and pre-registration consent of instructor

1-3 hrs

[back to top](#)

Marketing (MKT)

MKT 324 Marketing Concepts

The course focuses on the processes involved in the marketing of goods and services, including the meaning and importance of marketing terminology, the marketing mix, the marketing concept, consumerism, market segmentation, market and marketing research, and the impacts of different competitive structures on marketing decision making.

3 hrs

[back to top](#)

MKT 335 Consumer Behavior in Marketing

This course draws upon findings from various disciplines including cognitive psychology, social psychology, sociology, economics, and anthropology to understand and predict buying behavior. Structured around applications in marketing strategy, topical coverage includes motivation, perception, attitude change, choice decisions and the consumption process, as well as post-purchase satisfaction. Prerequisite: MKT 324 or BUS-ADM 324

3 hrs

[back to top](#)

MKT 348 Market Analysis

Market Analysis equips students with the tools needed to be intelligent users of market data. Topics to be covered include the design of research projects, questionnaire design, sampling, data collection techniques, data analysis, and the presentation of results. Prerequisites: MKT 324 and DSOM 309, or con-current enrollment

3 hrs

[back to top](#)

MKT 418 Sales and Promotion Strategies

Students receive exposure to the planning, implementation, and evaluation of various revenue-generating and promotional strategies. Topics covered will include the analysis of customers, competitors, and product markets; market segmentation; product positioning; media planning; promotional effectiveness; and client-agency relationships. Prerequisite: MKT 324 or BUS-ADM 324

3 hrs

[back to top](#)

MKT 442 Internet/Direct Marketing

This course examines internet and direct marketing as these topics relate to marketing strategy and the overall marketing plan. Coverage will include topics such as website traffic, customer relationship management (CRM), email marketing, podcasts, blogs, social media, online video, online advertising, online marketing research, and other strategies and tactics for customer acquisition, retention, and add-on selling. Prerequisite: MKT 324

3 hrs

[back to top](#)

MKT 476 Services Marketing

The purpose of this course is to show how the marketing of services differs from the marketing of goods. Additionally, students will learn the relationship between service quality and customer satisfaction, how to understand and assess service expectations, and how to match those expectations with company standards. Prerequisite: MKT 324 or BUS-ADM 324

3 hrs

[back to top](#)

MKT 480 Marketing Strategy

This senior-year capstone examines various activities within the overall marketing process, and introduces the development and application of an analysis framework. The use of case problems and technology, and exposure of issues related to ethics, allow the student to gain a full understanding of the relationship between marketing and management. Prerequisite: Nine hours of marketing, including MKT 324 or BUS-ADM 324

3 hrs

[back to top](#)

MKT 496 Internship: Marketing

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Prerequisite: Admission only by prior approval and consent of instructor

1-3 hrs

[back to top](#)

Public Administration (PA)

PUB-ADM 310 Introduction To Public Administration

Introductory analysis of the theory and practice of public administration and its special role in society. General examination of newer approaches to planning, programming, budgeting, and system analysis in the responsible-responsive administration context. The political role of the public administrator in public policy formulation and his/her general strategies.

3 hrs

[back to top](#)

PUB-ADM 410 Research Methods In Public Administration

This introductory course focuses on quantitative empirical research design and statistical analyses in relation to public administration issues and concerns. Prerequisite(s): Admission to MPA 5 year program. Offered: Fall, Winter, Summer.

3 hrs

[back to top](#)

PUB-ADM 415 Issues In Urban Administration

This course is designed for students in urban affairs, urban planning, business administration, political science, sociology, geosciences, economics and related fields. It provides an overview of major issues and trends in urban administration. Issues include taxes, urban sprawl, race/ethnicity, education, poverty, affordable housing, environment, crime, and land use. Particular focus will be paid to public policy, comparing policies and leadership to construct an interdisciplinary, comparative understanding of how cities address these problems, issues and trends. Offered: Fall

3 hrs

[back to top](#)

PUB-ADM 448 Leadership For Public Service

The two core purposes of this course are for students to learn about effective and ethical leadership, and for students to understand and develop their own capacity for leadership. The course is organized around three general themes: 1) leadership as relations with subordinates, including issues of work motivation; 2) leadership as lateral relations, including organizational politics and conflict management and resolution; and 3) leadership as influence in the organization's environment. Prerequisite(s) Admission to MPA 5 year program. Offered: Fall, Winter, Summer.

3 hrs

[back to top](#)

PUB-ADM 455 Non-Profit Leadership Issues

Focusing on leadership issues in nonprofits, this course will explore issues in an intensive seminar format (fifteen class hours). Topics include building and renewing nonprofit boards, and the power of diversity in nonprofit organizations. Recommended for nonprofit management students. Prerequisite(s): None.

1 hr

[back to top](#)

PUB-ADM 455 B Non-Profit Leadership Issues: Board-Staff Relations

1 hr

[back to top](#)

PUB-ADM 455 C Non-Profit Leadership Issues:A Vital Resource In A Changing World

1 hr

[back to top](#)

PUB-ADM 495 Voluntarism, Philanthropy & The Non-Profit Sector In The U.S.

This course provides a survey of the origins, development and contemporary functioning of the private, nonprofit sector in the U.S. The course explores theories and concepts that describe the social, political, legal and economic meaning of voluntarism, philanthropy and the nonprofit sector.

3 hrs

[back to top](#)

PUB-ADM 497 Special Topics In Public Administration

Study and research in areas of special interest under individual faculty direction. Prerequisite: Senior standing and pre-registration consent of instructor.

1-3 hrs

[back to top](#)

PUB-ADM 497 B Special Topics In Public Administration

1-3 hrs

[back to top](#)

Law Courses

School of Computing & Engineering

School of Computing & Engineering Courses Civil Engineering (CE)

CIV-ENGR 111 Essential Engineering

Introduction to the practice and history of engineering including its impact on human history, product design/ development and its relationship to the ecosystem, professionalism and ethics, the engineering approach to solving real-world problems, engineering communications and calculations, engineering teamwork and case studies. (Same as MEC-ENGR 111)

3 hrs

[back to top](#)

CIV-ENGR 190 Special Topics

Selected introductory topics in the area of computing. May be repeated for credit when topic varies. Prerequisite: Permission of Instructor

1-3 hrs

[back to top](#)

CIV-ENGR 211 The Engineering Enterprise

The engineering enterprise course covers four topics essential for engineering students with new venture creation interests: creating economic value, leadership, finance, and marketing. The primary objective of this course is to motivate the student to think as a blend of an engineer and a businessperson. (Same as MEC-ENGR 211.) Pre/corequisite: CIV-ENGR 111

3 hrs

[back to top](#)

CIV-ENGR 219 Computer Programming For Engineers

Analysis and synthesis of structured computer algorithms for solving engineering problems using high level programming tools such as Excel, Matlab, Fortran and/or C++. (Same as MEC-ENGR 219) Prerequisite: MATH 220

3 hrs

[back to top](#)

CIV-ENGR 275 Engineering Statics

Fundamentals of statics; static equilibrium and introduction to elements of mechanics of elastic materials. Prerequisite: PHYSICS 240; Co-requisite: MATH 250

3 hrs

[back to top](#)

CIV-ENGR 276 Strength Of Materials

Stress and strain; torsion; bending and shear stresses in beams; combined stresses; deflection of beams; columns. Prerequisite: CIV-ENGR 275.

3 hrs

[back to top](#)

CIV-ENGR 301 Fundamental Topics In Civil Engineering

Special engineering topics for undergraduate students. Prerequisite: Instructor's consent.

1-3 hrs

[back to top](#)

CIV-ENGR 311 The Technical Entrepreneur

The guiding principal for the course is that entrepreneurs are innovators and operate in an uncertain and risky environment. The course looks at the entrepreneurial mindset and the process of new product line launch. (Same as MEC-ENGR 311).

Prerequisite: CIV-ENGR 211

3 hrs

[back to top](#)

CIV-ENGR 319 Engineering Computation And Statistics

Statistical distribution functions and application to engineering problems. Limited treatment of curve-fitting and time-series analysis. Introduction to factorial design. (Same as MEC-ENGR 319). Prerequisites: CIV-ENGR 219 and MATH 220

3 hrs

[back to top](#)

CIV-ENGR 320 Introduction to Factorial Design

Concepts and techniques of ANOVA and factorial design to supplement standard undergraduate statistics courses.

Prerequisite: Undergraduate Statistics Offered: Winter

1 hr

[back to top](#)

CIV-ENGR 320 Introduction to Factorial Design

Concepts and techniques of ANOVA and factorial design to supplement standard undergraduate statistics courses.

Prerequisite: Undergraduate Statistics Offered: Winter

1 hr

[back to top](#)

CIV-ENGR 321 Structural Analysis I

Analysis of statically determinate beams, frames and trusses; shear and moment diagrams; influence line diagrams; beam deflections. Analysis of statically indeterminate structures. Energy methods. Prerequisite: CIV-ENGR 276 and MATH 345

4 hrs

[back to top](#)

CIV-ENGR 323 Structural Steel Design

Basic principles of structural steel design. Design of beams, axially loaded members, columns, and bolted and welded connections. Prerequisite: CIV-ENGR 321.

3 hrs

[back to top](#)

CIV-ENGR 335 Soil Mechanics

Detailed study of physical and mechanical properties of soil governing its behavior as an engineering material. Prerequisite: CIV-ENGR 276.

3 hrs

[back to top](#)

CIV-ENGR 342 Water And Wastewater Treatment Processes

Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineering systems for the distribution, collection and treatment of water and wastewater. Prerequisite: CIV-ENGR 351

3 hrs

[back to top](#)

CIV-ENGR 351 Fluid Mechanics

Concepts of the statics and dynamics of fluids, with emphasis on principles of continuity, momentum and energy. Boundary layers, dimensional analysis and drag are covered briefly. Thorough treatment of pipe flow. (Same as ME 351).

Prerequisites: MEC-ENGR 285 and MATH 345

3 hrs

[back to top](#)

CIV-ENGR 355 WI Water Resource Engineering

Design and analysis of water resource infrastructure. Applied surface water hydrology, analysis of pipeline systems, design of pumping plants and power generation, cavitation, water hammer, valves operations, open channel flow in rigid channels, gradually varied and rapidly varied flow. Prerequisites: CIV-ENGR 319, CIV-ENGR 351, WEPT passed

5 hrs

[back to top](#)

CIV-ENGR 378 WI Civil Engineering Materials

Composition, structure, properties, behavior and selection of civil engineering materials. Prerequisite: CIV-ENGR 276, WEPT passed

3 hrs

[back to top](#)

CIV-ENGR 390 Engineering Coop/Internship

Students may participate in structured Engineering Coop/ Internship under the supervision of employer. They must carry out significant professional responsibilities and whatever additional assignments are determined by the employer. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211

0 hrs

[back to top](#)

CIV-ENGR 3 Upper Level Civil Engineering Elective

Upper Level Transfer Credit

0 hrs

[back to top](#)

CIV-ENGR 3 EE Upper Level Civil Engineering Elective

Upper Level Transfer Credit

99 hrs

[back to top](#)

CIV-ENGR 400 Problems

Directed investigation of civil engineering problems. Prerequisite: Instructor's consent

1-4 hrs

[back to top](#)

CIV-ENGR 401 Topics In Civil Engineering

Study of current and new technical developments in civil engineering.

1-3 hrs

[back to top](#)

CIV-ENGR 401 A Special Topics In Civil Engineering

1-3 hrs

[back to top](#)

CIV-ENGR 401 D Topics In Civil Engineering**3 hrs**[back to top](#)**CIV-ENGR 401 G Topics In Civil Engineering****1-3 hrs**[back to top](#)**CIV-ENGR 401 J Special Topics In Civil Engineering**

Study of current and new technical developments in civil engineering.

1-3 hrs[back to top](#)**CIV-ENGR 401 X Topics in Civil Engineering****1-3 hrs**[back to top](#)**CIV-ENGR 411 Civil Engineering Systems Design I**

Comprehensive and realistic design project using the systems approach. Design choices and their effect upon the environment. Design constraints include constructability, minimization of environmental impact, and cost-effectiveness. Managerial and professional aspects of design practice. Prerequisite: CIV-ENGR 355, and CIV-ENGR 323 or CIV-ENGR 422

2 hrs[back to top](#)**CIV-ENGR 412 Civil Engineering Systems Design II**

Continuation of CIV-ENGR 411 Prerequisite: CIV-ENGR 411

3 hrs[back to top](#)**CIV-ENGR 412 WI Civil Engineering Systems Design II**

Continuation of CIV-ENGR 411 Prerequisite: CIV-ENGR 411

3 hrs[back to top](#)**CIV-ENGR 421 Matrix Methods Of Structural Analysis**

An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the computer programs to three dimensional structures. Prerequisite: CIV-ENGR 321.

3 hrs[back to top](#)**CIV-ENGR 422 Reinforced Concrete Design**

Basic principles of reinforced concrete design. Design of beams for flexure and shear; design of short and slender columns. Bond stress development. Footing design. Prerequisite: CIV-ENGR 321

3 hrs[back to top](#)

CIV-ENGR 423 Advanced Structural Steel Design

Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections. Prerequisite: CIV-ENGR 323.

3 hrs

[back to top](#)

CIV-ENGR 425 Prestressed Concrete

Theory and practice of prestressed concrete design. Pretensioning, posttensioning. Anchorage of steel. Materials, design specifications. Prerequisite: CIV-ENGR 422

3 hrs

[back to top](#)

CIV-ENGR 432 Foundation Engineering

Design of basic foundation structures, footings, retaining walls, pile foundations, dams. Prerequisite: CIV-ENGR 335.

3 hrs

[back to top](#)

CIV-ENGR 443 Hazardous Waste Management

Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211

3 hrs

[back to top](#)

CIV-ENGR 444 Unit Process Laboratory

Chemical and physical relationships as applied to unit processes of water and wastewater. Prerequisite: CIV-ENGR 342.

3 hrs

[back to top](#)

CIV-ENGR 446 Limnology

Physical, biological and chemical issues important in surface fresh waters. Includes carbonate chemistry, algal assay and thermocline analysis. Prerequisites: MATH 345, CHEM 211

3 hrs

[back to top](#)

CIV-ENGR 447 Contracts and Law for Engineers

Law of contracts, including types, construction, interpretation, performance, and termination. Construction and Engineering service contracts: proposals, general and financial conditions, specifications and drawings. Corporate and professional and person liability, insurance and bonds, property, evidence, arbitration and mediation. Offered: Fall

3 hrs

[back to top](#)

CIV-ENGR 448 Environmental Public Policy

Engineering and economic aspects of environmental policy. Basic understanding of environmental statutes and case law. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211

3 hrs

[back to top](#)

CIV-ENGR 449 Environmental Compliance, Auditing And Permitting

Statutes, regulations and permitting for air hazardous wastes and storage tanks. Asbestos, radon, EMF, and emerging areas of regulatory concern. Siting issues. Criminal and civil enforcement. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211

3 hrs

[back to top](#)

CIV-ENGR 452 Hydraulics Of Open Channels

Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves. Prerequisite: CIV-ENGR 351.

3 hrs

[back to top](#)

CIV-ENGR 453 Hydraulics And Variability Of Rivers

Introduction to the concepts of alluvial channel behavior, evolution and change due to natural and man-induced modifications to streams and watersheds. Numerous case studies of river behavior are studied from the perspective of hydraulics, geomorphology and sediment transport. Prerequisite: CIV-ENGR 355

3 hrs

[back to top](#)

CIV-ENGR 454 River Stability And Scour

Bridge hydraulics, stream stability, scour at bridge piers and abutments, hydraulic modeling of floods, countermeasures for protection of bridge infrastructure. Prerequisite: CIV-ENGR 355

3 hrs

[back to top](#)

CIV-ENGR 455 Highways, Hydraulics & Sediment Transport

Hydraulics of bridge encroachments, fundamentals of fluvial geomorphology, sediment transport, alluvial channel flow, sediment transport modeling, case studies of alluvial problems and bridges. Prerequisite: CIV-ENGR 355

3 hrs

[back to top](#)

CIV-ENGR 465 Engineering Administration

Cash flow analysis, financial analysis, managerial accounting and cost control, budgeting, organizational structure and behavior. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211.

3 hrs

[back to top](#)

CIV-ENGR 467 Introduction To Construction Management

Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211

3 hrs

[back to top](#)

CIV-ENGR 468 Construction Planning And Scheduling

Planning and scheduling of construction operations by the critical path method. Network diagramming, scheduling computations, and time-cost trade-offs. Manpower and equipment leveling. Computer and non-computer techniques. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211

3 hrs

[back to top](#)

CIV-ENGR 469 Construction Methods And Equipment

Selection and use of construction equipment; planning construction operations. Equipment economics. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211

3 hrs

[back to top](#)

CIV-ENGR 472 Advanced Mechanics Of Materials

Shear center; unsymmetric bending; curved beams; beams on elastic foundations; thick-walled cylinders. Energy methods. Torsion of noncircular sections. Theories of failure. Plate theory. Prerequisite: CIV-ENGR 276.

3 hrs

[back to top](#)

CIV-ENGR 475 Introduction To Earthquake Engineering

Introduction to the fundamentals of earthquake engineering and earthquake resistant design of civil engineering structures. Prerequisite: MEC-ENGR 285

3 hrs

[back to top](#)

CIV-ENGR 481 Highway And Traffic Engineering

Principles of highway engineering and traffic analysis, road/vehicle performance, geometric alignment of highways, traffic analysis and queuing theory, signal design, statistical analysis of traffic data and highway drainage. Prerequisite: MEC-ENGR 285

3 hrs

[back to top](#)

CIV-ENGR 484 Pavement Materials And Design

Properties of materials used in roads, airports, and other pavement construction. Design methods for rigid and flexible pavements. Prerequisite: CIV-ENGR 378WI.

3 hrs

[back to top](#)

CIV-ENGR 486 Planning and Geometric Design of Highways

Techniques of highway planning in rural and urban areas. Design of the visible elements of highways. Prerequisite: CIV-ENGR 481

3 hrs

[back to top](#)

CIV-ENGR 487 Applied Finite Element Analysis

The study of advanced simulation techniques for the solution to engineering problems. The use of Finite Element Method toward solving mechanical, structural, vibration and potential flow problems will be explored. The use of current commercial simulation tools will be used extensively. Prerequisite: MEC-ENGR 130, CIV-ENGR 275, Matrix Algebra Offered: Fall

3 hrs

[back to top](#)

CIV-ENGR 491 Internship

For International students who must register for 1 credit hour to cover off-campus employment which is approved as related to their degree by their departmental advisor and ISAO.

6 hrs

[back to top](#)

Computer Science (CS)

COMP-SCI 100 Computer Survival: Applications

Hands-on experience using a computer as a tool to enhance learning. Use of an integrated software package which includes word processing, graphics, database, spreadsheet, and telecommunications applications. Not applicable to Computer Science major requirements. Prerequisites: MATH 110 or equivalent.

3 hrs

[back to top](#)

COMP-SCI 101 Problem Solving And Programming I

Problem solving and algorithms, design using objects. Use of structured programming, arrays, control structures, strings searching, sorting and files in C++. Coding, testing and debugging using a modern development environment. Prerequisites: MATH 110 or equivalent.

3 hrs

[back to top](#)

COMP-SCI 190 Special Topics

Selected introductory topics in the area of computing. May be repeated for credit when topic varies. Prerequisite: Permission of Instructor

1-3 hrs

[back to top](#)

COMP-SCI 190 A Special Topics

Selected introductory topics in the area of computing. May be repeated for credit when topic varies. Prerequisite: Permission of Instructor

1-3 hrs

[back to top](#)

COMP-SCI 191 Discrete Structures I

Mathematical logic, sets, relations, functions, mathematical induction, algebraic structures with emphasis on computing applications. Prerequisite: MATH 110

3 hrs

[back to top](#)

COMP-SCI 1 EC Computer Science Elective

Transfer Credit

99 hrs

[back to top](#)

COMP-SCI 201 Problem Solving And Programming II

Problem solving and programming using classes and objects. Abstract data types, templates, pointers, linked lists, stacks and queues implemented C++. Recursion, efficiency of searching and sorting algorithms. Prerequisites: COMP-SCI 101, COMP-SCI 191.

3 hrs

[back to top](#)

COMP-SCI 243 C And Unix

Syntactics and semantics of C applied to dynamic structures, recursion, abstract data types, libraries. General introduction to UNIX operating system and UNIX file system, and use of UNIX system calls in C. Prerequisite: COMP-SCI 101.

3 hrs

[back to top](#)

COMP-SCI 246 Introduction To C++

Syntax and semantics of C++ applied to object oriented programming concepts of abstract data type, classes, data hiding, polymorphism and inheritance. Prerequisite: COMP-SCI 201, COMP-SCI 243.

2 hrs

[back to top](#)

COMP-SCI 281 Introduction To Computer Architecture

Data Representation, Number Systems, Boolean Algebra, Sequential Logic, Computer Organization and design, Computer Organization and design, Computer Software, Input and Output Organization. Prerequisite: COMP-SCI 191

3 hrs

[back to top](#)

COMP-SCI 282 Assembler Language Programming

Use of an Assembler Language for a virtual machine, Internal Representation of Data and Instructions, the Assembly Process, Loading and Program Relocation and Execution. I/O, Exception Handling, Alternative Architectures. Prerequisite: COMP-SCI 201 and COMP-SCI 281.

3 hrs

[back to top](#)

COMP-SCI 290 Special Topics

Selected intermediate topics in the area of computing. May be repeated for credit when topic varies. Prerequisite: Permission of Instructor.

1-3 hrs

[back to top](#)

COMP-SCI 291 Discrete Structures II

Lattice structures and graph theory, algorithms, Boolean algebra, introduction to computability theory and abstract machines. Prerequisite: COMP-SCI 191 or ECE 226 and E&C-ENGR 227 for ECE students.

3 hrs

[back to top](#)

COMP-SCI 304 WI Ethics And Professionalism

Societal and ethical obligations of computer science, IT, and electrical/computer engineering practice. Topics include ethical obligations of professional practice, electronic privacy, intellectual property, and whistle-blowing. This course is a writing-intensive course. Prerequisites: ENGL 225 (Freshman English II) or equivalent and completion of Written English Proficiency Test (WEPT)

3 hrs

[back to top](#)

COMP-SCI 349 Java Programming With Applications

The course covers the syntax and semantics of the Java programming language along with the use of essential class libraries. These topics will be taught in the context of application development. Students will learn how to write small to medium sized Java applications and applets. Specific topics covered include: essential classes in the Java API, interfaces, inheritance, exceptions, graphical user interface components, layout managers, events, I/O classes, Applets, data base access, and multithreading. Prerequisite: COMP-SCI 201 or equivalent Offered: Every Semester

3 hrs

[back to top](#)

COMP-SCI 352 Data Structures And Algorithms

Abstract data structures and analysis of associated algorithms, abstractions as separate from implementation. Structures include lists, trees, priority queues, advanced tree structures, hashing tables, and graphs. Comparison of efficiency of algorithms as implemented with various data structures. Advanced searching and sorting algorithms, shortest paths, spanning tree and flow algorithms. Introduction to the basic concepts of NP-complete problems. Prerequisites: (must be passed with a C or higher) COMP-SCI 201(or E&C-ENGR 216 for ECE students), COMP-SCI 291, MATH 210.

3 hrs

[back to top](#)

COMP-SCI 390 Special Topics

Selected topics in the area of computing at the junior level. May be repeated for credit when the topic varies. Prerequisite: Permission of Instructor.

1-3 hrs

[back to top](#)

COMP-SCI 393 Numerical Analysis And Symbolic Computation

Basic elements of numerical analysis: numerical solution of algebraic equations, solution of linear simultaneous algebraic equations, matrices, eigenvalues and eigenvectors, numerical integration and numerical solution of linear differential equations. Use of a symbolic manipulator on both symbolic and numerical computation, applied to the above listed basic elements of numerical analysis. Prerequisites: MATH 250, COMP-SCI 201, COMP-SCI 281.

3 hrs

[back to top](#)

COMP-SCI 394 R Applied Probability

Basic concepts of probability theory. Counting and measuring. Probability, conditional probability and independence. Discrete, continuous, and multivariate random variables. Functions of random variables. Sums of independent random variables and transform methods; random number generation and random event generation. Law of large numbers, central limit theorem, inequalities. Their applications to CS and ECE areas are stressed. Prerequisites: COMP-SCI 201, or E&C-ENGR 216, MATH 250, MATH 235 or E&C-ENGR 341

3 hrs

[back to top](#)

COMP-SCI 411 Introduction To Telecommunications Systems

Representation of signals and systems, Fourier Series, Fourier Transform, transmission of signal through linear system, amplitude modulation systems, frequency and pulse modulation systems, sampling, time division multiplexing, digital modulation and noise in modulation systems. Prerequisites: COMP-SCI 311, COMP-SCI 394R and MATH 250.

3 hrs

[back to top](#)

COMP-SCI 416 Telecommunications Systems: A Survey

Review of Telecommunications techniques; wire, radio, microwave, satellite and optical fiber communications systems; mobile phones, ISDN and broadband ISDN, Signalling System No. 7, CCITT telecommunications standards. Prerequisite: COMP-SCI 311 or consent of instructor.

3 hrs

[back to top](#)

COMP-SCI 420 Introductory Networking and Applications

This introductory course examines the systems aspects of the different LAN/MAN/WAN models, including topics such as protocols, network operating systems, applications, management and wireless communication systems. It also examines how the different models are interconnected using bridges and routers. NOTE: NOT FOR GRADUATE CREDIT. Prerequisites: Senior Standing/Consent of Instructor

3 hrs

[back to top](#)

COMP-SCI 421 Fundamentals Of Data Communication

3 hrs

[back to top](#)

COMP-SCI 421 A Foundations of Data Networks

This introductory course examines the analytical aspects of data communications and computer networking. Topics cover protocol concepts and performance analysis that arise in physical, data link layer, MAC sub layer, and network layer. Prerequisites: COMP-SCI 291, COMP-SCI 352, COMP-SCI 394 (recommended). Offered: Every Semester Restrictions: None

3 hrs

[back to top](#)

COMP-SCI 423 Client/Server Programming And Applications

Fundamentals of Client/Server programming using socket interface; features of network programming including connection oriented and connectionless communication in multiple environments (Windows, UNIX, and Java); other client/server mechanisms, such as RPC and RMI) and formal object environments designed to facilitate network programming (CORBA, COM and Beans). Prerequisites: COMP-SCI 352, COMP-SCI 431.

3 hrs

[back to top](#)

COMP-SCI 431 Introduction To Operating Systems

Concurrency and control of asynchronous processes, deadlocks, memory management, processor and disk scheduling, parallel processing, file system organization. Prerequisites: COMP-SCI 352, and COMP-SCI 281 (or both E&C-ENGR 226 and EDE 227 for ECE students).

3 hrs

[back to top](#)

COMP-SCI 441 Programming Languages: Design And Implementation

Specifications of syntax and semantics, simple statements, precedence, infix, prefix, and postfix notation, global properties of algorithmic languages, scope of declarations, storage allocation, binding time of constituents, subroutines, co-routines and tasks, list processing, string manipulation, run-time representation of program and data structures. Prerequisite: COMP-SCI 352.

3 hrs

[back to top](#)

COMP-SCI 444 Compiler/Translator Design

This course will teach modern compiler techniques applied to both general-purpose and domain-specific languages. The examples chosen will also convey a detailed knowledge of state-of-the-art based WWW technology. The fundamental goal of programming is to provide instructions to the computer hardware. The primary purpose of the compiler/translator is to facilitate communication from the programmer via some high level language to ultimately the computer hardware. Understanding how compiler/translators are built and operate is important to understanding efficiency of operation and storage. Prerequisite: COMP-SCI 352.

3 hrs

[back to top](#)

COMP-SCI 451 Software Engineering

Taxonomy of software engineering, software lifecycle, process structured vs. data structured analysis and design, structured design methodologies, object oriented design, foundations of software engineering. This course fulfills the senior general education synthesis requirement. Prerequisite: COMP-SCI 352.

3 hrs

[back to top](#)

COMP-SCI 456 Human Computer Interface

Design of human-computer interfaces considering the psychological and physical abilities of the user. User interface design from a functional and ergonomic perspective. Use of graphical interface standard X-Windows and the development of high quality user interfaces. Programming of user interfaces using Visual Basic. Prerequisites: COMP-SCI 451.

3 hrs

[back to top](#)

COMP-SCI 457 Software Architecture: Requirements & Design

Introduction to requirements and design engineering with emphasis on organization and presentation of system requirements and designs for customers, users and engineers; validation of requirements and design with needs of system customer; examination of requirement and design changes during the lifetime of a system; transformation of informal ideas into formal detailed descriptions; examination of the different stages in the design process including architectural design, interface design and data structure design; examination of domain modeling criteria and examination of design quality attributes. Also discusses non-functional attributes and project resource allocation. Prerequisite(s): COMP-SCI 352; knowledge of at least one high-level programming language.

3 hrs

[back to top](#)

COMP-SCI 458 Software Architecture: Testing & Maintenance

Introduction of software system testing (including verification), software reuse, software maintenance, and software re-engineering. Prerequisite(s): COMP-SCI 352; knowledge of at least one high-level programming language.

3 hrs

[back to top](#)

COMP-SCI 461 Introduction To Artificial Intelligence

Search space generation, pruning and searching, employment of heuristics in simulation of the cognitive process, an overview of predicate calculus, automatic theorem proving. Prerequisite: COMP-SCI 441.

3 hrs

[back to top](#)

COMP-SCI 464 Applied Artificial Intelligence

Intelligent agents. Solving problems by search. Game playing. Logical reasoning systems. Planning agents. Decision making. Learning methods. Neural networks and learning. Neural language processing. Perception Expert systems. Prerequisite(s): COMP-SCI 461 Artificial Intelligence.

3 hrs

[back to top](#)

COMP-SCI 470 Introduction To Database Management Systems

Database organization and query processing and optimization, database design, schema and sub-schema, data independence, query languages, physical and logical organization of databases, normalization transaction management, database recovery. Prerequisites: COMP-SCI S352.

3 hrs

[back to top](#)

COMP-SCI 471 Database Design, Implementation And Validation

This course discusses in detail all aspects of ORACLE database management systems. It covers in detail database design, implementation, and validation using ORACLE. In addition to these, it briefly covers ORACLE implementation, tuning, and implementation on Window NT. The course is suitable for undergrad seniors and professional alike. Prerequisite: COMP-SCI 352

3 hrs

[back to top](#)

COMP-SCI 475 Introduction To Computer Graphics

Interactive Computer Graphics, Hardware Interaction, 3D transformations, Shading, Lighting and Texturing. Prerequisite: COMP-SCI 352.

3 hrs

[back to top](#)

COMP-SCI 481 Advanced Computer Architecture

Organization and Function of Memories, Direct Access Storage Devices, Central Processor Units, and Sequential Storage Devices, Classical Von Neuman Architecture. Prerequisite: COMP-SCI 281 and COMP-SCI 282.

3 hrs

[back to top](#)

COMP-SCI 490 Special Topics

Selected topics in specific areas of computer science. May be repeated for credit when the topic varies.

1-3 hrs

[back to top](#)

COMP-SCI 490 BC Special Topics

1-3 hrs

[back to top](#)

Students may participate in structured internships under the joint supervision of an employer and a faculty member. The student must carry out significant professional responsibilities that also have academic merit. The number of credit hours is based on the quality of the academic experience. Available for credit/nocredit only and students must be in good standing with at least 18 credit hours of CS/IT counting towards the degree. Registration by consent number only: petition forms for CS/IT491 Internships are available in the office of CSEE Division and on the web. Prerequisite: Junior level or above and consent of instructor. Offered: Every Semester Restrictions: None

6 hrs[back to top](#)

COMP-SCI 493 Introduction To Computability, Formal Languages And Automata

Context-free grammars, finite state acceptors and regular languages, pushdown automata, Turing machines, Church's Thesis, primitive recursive functions, partial recursive functions and computational complexity. Prerequisite: COMP-SCI 291.

3 hrs

[back to top](#)

COMP-SCI 494 R Applied Stochastic Models

Review of basic probability, Poisson counting process, Markovian birth and death processes and elementary queuing theory. Basic models commonly used in computer and telecommunication networks, both in discrete time and continuous time. Stochastic processes as needed for communication theory; Power Spectral Density and Cross Correlation. Prerequisite: CS 394R or permission from instructor Offered: Fall Semester Restrictions: None

3 hrs

[back to top](#)

COMP-SCI 497 Directed Readings

Readings in an area selected by an undergraduate student in consultation with a faculty member. Arrangements must be made prior to registration.

1-3 hrs

[back to top](#)

COMP-SCI 498 Research Seminar

Undergraduate research based on intensive readings from the current research literature under the direction of a faculty member. Arrangements must be made prior to registration.

1-3 hrs

[back to top](#)

COMP-SCI 499 Undergraduate Research

Completion of project, including a final written report, under the direction of a faculty member. A prospectus must be accepted prior to registration.

1-3 hrs

[back to top](#)

Electrical and Computer Engineering (ECE)

E&C-ENGR 216 Engineering Computation

Analysis and synthesis of structured digital computer programs for solving engineering problems in a high level programming language, e.g., Pointers, linked-list in object-oriented language. Intro to symbolic language. Prerequisite: MATH 210

4 hrs

[back to top](#)

E&C-ENGR 226 Logic Design

Design of combinational logic circuits, logic minimization techniques, design of RAM, ROM, PLA, PAL, design of sequential logic circuits, state machine design techniques, digital system design, application of Verilog HDL design throughout the course. Co-requisite: E&C-ENGR 227 (1.)

3 hrs

[back to top](#)

E&C-ENGR 227 Logic Design Laboratory

Laboratory for 226. Experimental topics related to the design of combinational and sequential logic systems and small digital systems. Co-requisite: E&C-ENGR 226.

1 hr

[back to top](#)

E&C-ENGR 230 Biological Engineering

An introductory course that examines biological systems from an engineering viewpoint using engineering models. The student is introduced to friendly computer tools to model system behavior of first and second order systems and the effects of diffusion. The tools are then used to study neuron models in terms of diffusion, charge drift and the Einstein relation, ion pumps, membrane potential and the Goldman equation. The tools are then used to study closed loop models of human muscles, eye movements and the body's thermoregulation system. Prerequisites: MATH 210 and some computer programming skills

3 hrs

[back to top](#)

E&C-ENGR 276 Circuit Theory

Kirchoff's circuit laws, Ohm's Law, nodal and mesh analyses, source transformations, superposition, Thevenin and Norton equivalents, transient analysis of 1st and 2nd order systems. AC circuit analysis, phasors, impedance, sinusoidal steady-state responses, operational amplifiers and PSpice Prerequisites: E&C-ENGR 216, PHYSICS 250 with E&C-ENGR 341 or E&C-ENGR 401H concurrently.

3 hrs

[back to top](#)

E&C-ENGR 301 Fundamental Topics In Electrical And Computer Engineering

Undergraduate topics in electrical or computer engineering. Prerequisite: Instructor's consent. Offered: On demand.

1-4 hrs

[back to top](#)

E&C-ENGR 302 Traveling Waves And Fields

ECE 302: Traveling Waves and Fields (4). Dimensions in electromagnetic wave propagation; per unit length parameters of common transmission line configurations; derivation of general time-domain and time-harmonic (phasor) forms of transmission line equations; Laplace transform solution to arbitrary time excitations ζ the bounce diagram; introduction to the concept of voltage and current traveling waves; input impedance, VSWR and power flow on a transmission line; open- and short-circuit, $\zeta/4$ and ζ length lines; Smith Chart & applications; lossy lines; the complex number system, DeMoivre's theorem, analytic functions and Cauchy-Riemann equations, Taylor and Laurent series, Cauchy's integral formulas, Cauchy residue theorem; multi-valued functions complex vectors; review of Gauss's, Faraday and Ampere's laws of electromagnetism and differential form of Maxwell's equations; time-harmonic form of Maxwell's equations; Poynting vector; boundary conditions; wave equation from Maxwell's equations; uniform plane waves in lossy and lossless media; power flow in uniform plane waves; skin depth; normal incidence of uniform plane waves on good conductors. Prerequisite: MATH 250, PHYSICS 250, Pre-/Co- requisite: ECE341 or ECE401H.

4 hrs

[back to top](#)

E&C-ENGR 303 Traveling Waves And Fields-Laboratory

Students will be required to write computer programs that exploit the MATLAB toolbox features and write short technical reports on the results. Typical projects are: (a) signal amplitude and delay distortion on lossy transmission lines, (b) performance comparison of transient behavior of PCB, stripline, microstrip transmission line configurations and (c) cross-talk modeling on transmission lines (optional). Prerequisite: PSpice and MATLAB knowledge/proficiency. Co-requisite: E&C-ENGR 302

1 hr

[back to top](#)

E&C-ENGR 316 Microcomputer Fundamentals

Computer arithmetic, combinational and sequential circuit analysis and design. Computer organization, bus control, input/output transfers, and interrupts. Introduction to microprocessor-based systems. Prerequisites: E&C-ENGR 216 with E&C-ENGR 317 concurrently. No longer offered, please see advisor.

3 hrs

[back to top](#)

E&C-ENGR 317 Microcomputer Fundamentals Laboratory

Laboratory for E&C-ENGR 316. Combinational and sequential logic. 8-bit microprocessors. No longer offered, please see advisor.

1 hr

[back to top](#)

E&C-ENGR 326 Logic Design

Digital electronics, integrated circuit level logic design, algorithmic state machines, microprocessor architecture and interfacing and digital systems design methodology. Must be taken concurrent with E&C-ENGR 327. Prerequisites: E&C-ENGR 316 with a C or higher. No longer offered, please see advisor.

3 hrs

[back to top](#)

E&C-ENGR 327 Logic Design Laboratory

Laboratory for 326. Experimental topics related to the design of sequential logic systems and small digital systems. Must be taken concurrent with E&C-ENGR 326. Prerequisites: E&C-ENGR 317 with a C or higher. No longer offered, please see advisor.

1 hr

[back to top](#)

E&C-ENGR 330 Electronic Circuits

Semiconductor device physics, elementary analysis and design of integrated analog electronic circuits that utilize diodes, BJT's, and MOSFET's in current mirrors, differential amplifiers and multistage amplifiers with active loads and operational amplifiers. Prerequisite: E&C-ENGR 276 with a C or higher, Co-requisite: E&C-ENGR 331

4 hrs

[back to top](#)

E&C-ENGR 331 Electronic Circuits Laboratory I

Semiconductor devices to include pn junction diodes, bipolar and field effect transistors. operational amplifiers and applications, diode circuit applications, current mirrors, differential amplifiers and amplifiers with active loads. Prerequisite: E&C-ENGR 378, Co-requisite: E&C-ENGR 330.

1 hr

[back to top](#)

E&C-ENGR 341 Engineering Mathematics

Engineering Mathematics (3-4). Linear homogeneous and inhomogeneous differential equations, Laplace transform with applications; trigonometric and complex (exponential) Fourier series; Fourier transforms; Z-transforms; Matrices, properties and definitions; Gaussian elimination, linear systems, Cramer's rule, rank and inverse of a matrix; eigenvalue and eigenvectors. Their applications to transient analysis of electrical circuits, communication systems, EM theory, etc. will be discussed. Prerequisites: MATH 250 and ECE 216. Students who have MATH 345 should enroll in 3 credit hours.

3-4 hrs

[back to top](#)

E&C-ENGR 358 Control Systems

Study of feedback techniques, with applications to control systems. Includes modeling, applications of Bode plot, root locus, state-variable, and Nyquist methods. Prerequisite: E&C-ENGR 380. Offered: Every year; Winter.

3 hrs

[back to top](#)

E&C-ENGR 366 Power Engineering

Magnetic circuitry in general and in machinery; DC machine theory, operation, applications; transformer circuits, synchronous machine theory, operation applications; basic principles of energy conversion; use of matrices; basic principles of power transmission and control. Prerequisites: E&C-ENGR 376 with E&C-ENGR 302 concurrently. Offered: Winter.

3 hrs

[back to top](#)

E&C-ENGR 376 Circuit Theory II

A continuation of E&C-ENGR 276. R-L-C transients responses, complex s-plane methods, resonance, frequency response, two-port networks, Laplace transforms for circuit analysis. Prerequisite: E&C-ENGR 378 concurrently.

3 hrs

[back to top](#)

E&C-ENGR 378 Systems Lab

Introduction to the use and limitations of basic instruments used in electrical testing and measurement. Experimental techniques and laboratory safety. Data gathering, interpretation and presentation. Statistical data evaluation methods. Preparation of laboratory reports. Experimental work supporting theoretical concepts developed in E&C-ENGR 276. Prerequisite: E&C-ENGR 276.

2-3 hrs

[back to top](#)

E&C-ENGR 380 Signals And Systems

Continuous and discrete-time signals and systems, linearity and time-invariance, impulse response and convolution. Fourier analysis of discrete and continuous signals and systems and the application of Laplace, z, and Fourier transforms. Prerequisite: E&C-ENGR 341, and E&C-ENGR 381 concurrently. Offered: Fall

4 hrs

[back to top](#)

E&C-ENGR 381 Signals And Systems Lab

Computer Laboratory for E&C-ENGR 380. Various signal processing software programs (MATLAB and DSP) are used to investigate properties and applications of continuous and discrete time signals and systems. Corequisite: E&C-ENGR 380. Offered: Fall

1 hr

[back to top](#)

E&C-ENGR 400 Problems In Electrical And Computer Engineering

Analytic or experimental problems pertaining to electrical or computer engineering. Prerequisites: Senior standing, instructor's approval and an approved petition from his or her degree coordinator.

1-4 hrs

[back to top](#)

E&C-ENGR 401 Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and instructor's approval.

[back to top](#)

E&C-ENGR 402 WI Senior Design I

First capstone design course in electrical and computer engineering. Provides and accounts for laboratory, library, research and other work needed for the development of the project proposal. Stresses written and oral presentations and ethics. Prerequisites: E&C-ENGR 330, E&C-ENGR 380, and E&C-ENGR 428R. Must have passed the WEPT test and can only be taken if student is within three semesters of graduation.

2 hrs

[back to top](#)

E&C-ENGR 403 Senior Design II

Second capstone design course in electrical and computer engineering. Project management, professional engineering practice, economic, environmental and safety considerations in project design, the development of written and oral presentation skills and working in teams. Provides laboratory experiences in prototyping, fabrication and troubleshooting of a design project. Prerequisite: E&C-ENGR 402WI.

3 hrs

[back to top](#)

E&C-ENGR 403 WI Senior Design II

Second capstone design course in electrical and computer engineering. Project management, professional practice, ethical and engineering economic considerations and development of written and oral presentation skills. Provides laboratory experience in prototyping, fabrication, and troubleshooting of the design project. Stresses written and oral presentation. Prerequisite: E&C-ENGR 402WI.

3 hrs

[back to top](#)

E&C-ENGR 412 R.F./Microwave Techniques For Wireless Systems

Fundamental concepts of electromagnetic radiation from Maxwell's equations; basic antenna parameters-gain, directivity, radiation & aperture efficiency, effective area, polarization; calculation of radiation patterns of linear antennas (proof omitted); electromagnetic boundary conditions; oblique incidence of plan waves; Snell's laws and polarizationsimilarities between traveling waves on transmission lines and plane waves; Friis formulas; antenna noise temperature; basic antennas-dipole and monopoles; simple array theory and beamforming concepts; propagation path loss-ground reflections; review of transmission lines & Smith Chart; quarter-wave transformers and L-section matching; single stub tuning; microwave network analysis-port-matrices; fundamentals of filter theory; low - and high-pass filters; scaling and transformations; cellular propagation and link loss prediction; 2-ray and 3-ray (optional) models; introduction to smart antenna concepts; WiMAX systems, introduction to and applications of the state of art r.f. CAD tools, but not necessarily restricted to, IE3D, FIDELITY, for simulation and modeling projects for the course. Prerequisites: E&C-ENGR 302, E&C-ENGR 380, E&C-ENGR 341 OR E&C-ENGR 401H, MATLAB proficiency.

3 hrs

[back to top](#)

E&C-ENGR 413 R.F./Microwave Techniques For Wireless Systems Laboratory

Design of probe-and stripline-fed rectangular and circular patch microstrip antennas; simulation of performance using CAD tools; modeling of R.F. propagation path loss using CAD tools for site-specific prediction applications. Prerequisites: E&C-ENGR 302, E&C-ENGR 380, E&C-ENGR 341 or E&C-ENGR 401H, MATLAB proficiency. Co-requisite: E&C-ENGR 412. Offered on demand

1 hr

[back to top](#)

E&C-ENGR 414 Microwave Engineering For Wireless Systems

Microwave networks; s-, z-, y- and abcd matrices; signal flow graphs; circular waveguides; stripline & microstrip characteristics; impedance transformers; power dividers and directional couplers; microwave filters; microwave resonators; active microwave circuits. Prerequisites: ECE 302, ECE 380, ECE 398 Restrictions: MATLAB proficiency required. Offered on demand

3 hrs

[back to top](#)

E&C-ENGR 415 Microwave Engineering For Wireless Systems Lab

Design & performance simulation of microwave filters and active microwave circuits; comparative analysis of impedance transformers; use of CAD tools in microwave circuit design. Prerequisites: E&C-Engr 414 Restrictions: MATLAB proficiency required.

1 hr

[back to top](#)

E&C-ENGR 416 Neural And Adaptive Systems

A hands-on introduction to the theory and applications of neurocomputing. Includes classification, function approximation, supervised and unsupervised learning, time series analysis, and adaptive filtering using different feed-forward and recurrent artificial neural networks. Prerequisites: E&C-Engr 341 and Comp-Sci 394R; or an intermediate knowledge of calculus, probability, and linear algebra along with instructor's consent. Offered: Winter

3 hrs

[back to top](#)

E&C-ENGR 424 Computer Design

Design of general purpose computers including arithmetic and control units, input/output, memory systems, microprogramming and introduction to parallel structures and processing. Prerequisite: E&C-ENGR 226. Offered: On demand.

3 hrs

[back to top](#)

E&C-ENGR 425 Computer Design Laboratory

Laboratory for E&C-ENGR 424. Design and implementation of basic computer units including fixed and floating-point adders and multipliers, ALU's, control units. Prediction of performance using various software packages. Prerequisites: E&C-ENGR 227 with E&C-ENGR 424 concurrently. Offered: On demand.

1 hr

[back to top](#)

E&C-ENGR 426 Microcomputer Architecture And Interfacing

Advanced microprocessor architecture and programming; interfacing and programming of peripherals. Parallel and serial communication, interrupts, direct memory access, coprocessors. Prerequisite: E&C-ENGR 226. Offered: Fall

3 hrs

[back to top](#)

E&C-ENGR 427 Microcomputer Laboratory

Laboratory for E&C-ENGR 426. Microprocessor hardware and software involving interfacing of peripherals to 8-bit and 16-bit microprocessor. Simple D/A conversion, music composition, and various programmable controllers. Prerequisites: E&C-ENGR 227 with E&C-ENGR 426 concurrently. Offered: Fall

1 hr

[back to top](#)

E&C-ENGR 428 R Embedded Systems

This course examines the hardware/software aspects associated with developing microcontroller-based computer systems. The students learn about the architecture and assembly language for popular microcontrollers and how to take advantage of a variety of input/output options that include binary ports, A/D and D/A converters, communication ports, and interfacing techniques for various applications Prerequisites: E&C-ENGR 426 and E&C-ENGR 427 Co-requisite: E&C-ENGR 429

3 hrs

[back to top](#)

E&C-ENGR 429 Embedded Systems Laboratory

The laboratory introduces the students to a variety of challenging design projects using microcontroller interfacing techniques to develop real world applications, such as digital thermometer and digital pressure monitoring systems. Students must produce an individual design project. Prerequisite: E&C-ENGR 226 and E&C-ENGR 227 Co-requisite: E&C-ENGR 428R

1 hr

[back to top](#)

E&C-ENGR 430 Electronic Circuits II

Study of feedback amplifiers, regulated power supplies, sinusoidal and nonlinear oscillators, integrated circuit analog and digital devices, digital electronics. Prerequisite: E&C-ENGR 330. Offered: On demand.

3 hrs

[back to top](#)

E&C-ENGR 435 Design And Simulation Of Vlsi Circuits

Design of NMOS and CMOS integrated circuits with emphasis on digital applications. Device models are developed for circuit simulation. Prerequisite: E&C-ENGR 330 or instructor's consent.

3 hrs

[back to top](#)

E&C-ENGR 436 Power Electronics I

Power electronic device characteristics, important circuit and component concepts, phase controlled rectifiers, line communicated inverters and AC phase control. Includes laboratory projects. Prerequisite: E&C-ENGR 330.

3 hrs

[back to top](#)

E&C-ENGR 454 Robotic Control And Intelligence

Introduces robotics; robot system characteristics; robot motive power systems; geometric structure of robots; sensors and feedback; control applications and algorithms; data acquisition and output actuation functions; robots and Artificial Intelligence; microprocessor applications in robotics. Prerequisites: E&C-ENGR 358 and E&C-ENGR 226, or E&C-ENGR 426. Offered: on demand.

3 hrs

[back to top](#)

E&C-ENGR 458 R Automatic Control

Techniques for feedback control system modeling and design. Includes applications of Bode plots, root locus, Nyquist methods, state-variables, compensator design, and computational aids. Prerequisites: E&C-ENGR 341 and E&C-ENGR 380

3 hrs

[back to top](#)

E&C-ENGR 460 Electromechanical Conversion I

Magnetic circuitry in general and in machinery; DC machine theory, operation, applications; transformer circuits, synchronous machine theory, operation applications; basic principles of energy conversion; introduction to power electronics; and basic principles of power transmission and control are covered. Prerequisite: E&C-ENGR 276 or E&C-ENGR 302.

3 hrs

[back to top](#)

E&C-ENGR 461 Electromechanical Conversion II

Application of fundamentals and concepts of power systems to practical power plan and industrial applications. Identification of the significant internal components of power system equipment. Single and Three Phase Circuits, DC and AC Generators/ Alternators, Transformers, DC and AC Motors, DC and AC transmission, and System Electrical Protection. Prerequisite: E&C-ENGR 460.

3 hrs

[back to top](#)

E&C-ENGR 462 Symmetrical Components Analysis Of Power Systems

Short circuit analysis using symmetrical components. Simultaneous faults and open conductors. Prerequisite: E&C-ENGR 460 Offered: On demand.

3 hrs

[back to top](#)

E&C-ENGR 464 Electric Transportation And Industrial Drives

Electric vehicle propulsion and industrial drives; review of DC and AC machine principles, traction motor requirements and performance, DC and AC industrial drives, heating effects. Prerequisite: E&C-ENGR 460. Offered: On demand

3 hrs

[back to top](#)

E&C-ENGR 466 Power Systems I

Power System fundamentals; Methods of power system analysis and design; Modeling of power systems components such as transmission lines, transformers and generators; Analysis of steady state operation of power system and unbalanced conditions. Prerequisites: E&C-ENGR 460 or E&C-ENGR 276, and E&C-ENGR 341 or E&C-ENGR 401H.

3 hrs

[back to top](#)

E&C-ENGR 467 Power Systems II

Power system matrices. Power flow analysis. Gauss-Seidel and Newton-Raphson techniques. Fast-decoupled load flow. Economic dispatch. Voltage control system. Power system control. Prerequisites: E&C-ENGR 466 and E&C-ENGR 458.

3 hrs

[back to top](#)

E&C-ENGR 468 Electric Power Distribution Systems

Operation and design of utility and industrial distribution systems including distribution system planning; load characteristics; application of distribution transformers; design of subtransmission lines, distribution substations, primary systems, secondary systems; application of capacitors; voltage regulation and reliability. Prerequisite: E&C-ENGR 460. Offered: On Demand.

3 hrs

[back to top](#)

E&C-ENGR 469 Computer Applications To Power Systems

Load flow, fault, network reduction, and transient stability studies on digital and analog computers. Prerequisites: E&C-ENGR 460K. Offered: On demand.

3 hrs

[back to top](#)

E&C-ENGR 470 Reliability Of Electric Power Systems

Principles of reliability as applied to Power Systems with an overview of current methods to measure reliability of Power Systems are introduced. Analytical and Monte Carlo models for component state and system state duration, with contingency analysis and linear programming for optimal power flow are also covered. Restoration times and cost assessment after component or system failures due to internal or external problems provide focus to practical operating principles. Prerequisite: E&C-ENGR 460, COMP-SCI 394R or equivalent.

3 hrs

[back to top](#)

E&C-ENGR 472 Power Generation Systems

Multi discipline survey of power generation systems and subsystems, including coal-fired steam, co-generation and combined cycle, and combustion turbines. With a goal of reviewing all the major subsystems, this course exposes the electrical engineer to all the mechanical, thermodynamic, and chemical processes of power generation systems. Prerequisite: Senior standing

3 hrs

[back to top](#)

E&C-ENGR 474 Introduction To Communication Systems

Introduction to principles and fundamentals of communication systems. Signal representation and analysis, Fourier transform and applications, probability and random variables, analog and digital modulation techniques. Prerequisites: E&C-ENGR 380. Offered: Every year, Fall.

3 hrs

[back to top](#)

E&C-ENGR 476 Introduction To Wireless Communication Systems

Principles of wireless communication analysis and design. Digital communication basics, cellular radio, wireless PCS communications, multiple access techniques, channel coding and equalization, and standards of digital cellular/PCS systems. Prerequisites: E&C-ENGR 474. Offered: On demand.

3 hrs

[back to top](#)

E&C-ENGR 478 Modulation And Transmission Of Signals

Review of Fourier analysis of signals, study of signal transmission. Analog modulation and demodulation, use of nonlinear devices in modulation systems, sampling and pulse modulation systems, sampling and pulse modulation. Prerequisites: E&C-ENGR 330 and E&C-ENGR 380. On demand.

3 hrs

[back to top](#)

E&C-ENGR 480 Digital Signal Processing

Concepts, analytic tools, design techniques used in computer processing of signals: signal representation, sampling, discrete-time system analysis, recursive/non-recursive filters, design/implementation of digital filters. Prerequisites: E&C-ENGR 226 and E&C-ENGR Offered: On demand.

3 hrs

[back to top](#)

E&C-ENGR 481 Digital Signal Processing Laboratory

Laboratory for E&C-ENGR 480. Processing methods for discrete-time signals and digital filters. Prerequisites: E&C-ENGR 378 with E&C-ENGR 480 concurrently. Offered: On demand.

1 hr

[back to top](#)

E&C-ENGR 482 Analog Signal Processing

Fundamentals of network synthesis with emphasis on the design of analog filters; the approximation problem, sensitivity, LC and RC passive filters, RC active filters, and switched capacitor filters. Prerequisites: E&C-ENGR 330 and E&C-ENGR 380. Offered: on demand.

3 hrs

[back to top](#)

E&C-ENGR 483 Analog Signal Processing Laboratory

Laboratory for E&C-ENGR 482. Analog filters based upon active-RC circuits. Integrated circuit universal active filters and switched capacitor active filters. Prerequisites: E&C-ENGR 331 with E&C-ENGR 482 concurrently. Offered: On demand.

1 hr

[back to top](#)

E&C-ENGR 484 Digital Image Processing

Fundamentals of digital image processing hardware and software, including digital image acquisition, display, compression, transforms and segmentation. Prerequisites: E&C-ENGR 380 and experience in a high-level programming language. Offered: On demand

3 hrs

[back to top](#)

E&C-ENGR 486 Pattern Recognition

Pattern recognition techniques of applications such as automatic recognition for speech, visual inspection systems, clinical medicine, automatic photographic recognition systems and advanced automation systems. Prerequisite: Senior standing
Offered: On demand.

3 hrs

[back to top](#)

E&C-ENGR 488 Introduction To Digital Image Processing

Fundamentals of digital image processing hardware and software, including digital image acquisition, image display, image enhancement and compression. Prerequisites: Senior standing; experience in high-level language. Offered: On demand

3 hrs

[back to top](#)

E&C-ENGR 490 Digital Computer Applications In Engineering

Use of digital computers for the solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, differentiation, and differential equations. Prerequisites: MATH 250, E&C-ENGR 216 and junior standing in engineering. On demand.

3 hrs

[back to top](#)

E&C-ENGR 491 Internship

Students may participate in structured internships under the joint supervision of an employer and a faculty member. The student must carry out significant professional responsibilities that also have academic merit. The number of credit hours is based on the quality of the academic experience. Available for credit/nocredit only and students must be in good standing with at least 18 credit hours of ECE courses counting towards the degree. Registration by consent number only: petition forms for E&C-ENGR 491 internships are available in the office of CSEE Division and on the web. Prerequisite: At least 18 hours of E&C-ENGR courses toward the degree.

6 hrs

[back to top](#)

E&C-ENGR 496 Special Topics

Selected Topics in specific areas of electrical or computer engineering. May be repeated for credit when the topic varies. Prerequisite: At least 18 hours of ECE courses toward the degree. Offered: On demand

1-4 hrs

[back to top](#)

E&C-ENGR 497 Directed Readings

Readings in an area selected by an undergraduate student in consultation with a faculty member. Arrangements must be made prior to registration. Prerequisite: Consent of instructor Offered: On demand

1-4 hrs

[back to top](#)

E&C-ENGR 498 Research Seminar

Undergraduate research based on intensive readings from the current research literature under the direction of a faculty member. Arrangements must be made prior to registration. Prerequisite: Consent of instructor Offered: On demand

1-4 hrs

[back to top](#)

E&C-ENGR 499 Undergraduate Research

Completion of a project, including a final written report, under the direction of a faculty member. A prospectus must be accepted prior to registration. Prerequisite: Consent of instructor Offered: On demand

1-3 hrs

[back to top](#)

Information Technology (IT)

INFO-TEC 222 Multimedia Production And Concepts

Multimedia production and concepts will give an overview of multimedia technology and communication theory needed to deliver information and to produce interactive presentations for the web, for CD-ROM, and for in-person presentations and demos. The course offers exposure to software, hardware, other multimedia technologies, authoring and copyright matters. Prerequisite(s): COM-SCI 101 Offered: Winter Semester

3 hrs

[back to top](#)

INFO-TEC 290 Special Topics

Selected topics in specific subject areas of Information Technology which are not part of the regular offerings. Prerequisite: Approval of instructor. Offered: Winter

1-3 hrs

[back to top](#)

INFO-TEC 321 Introduction To Computing Resources Administration

This introductory course is designed to give an overview of a wide variety of technical, interpersonal, documentation, and managerial skills needed to become an effective systems administrator. Prerequisite: COMP-SCI 281 Offered: Winter

3 hrs

[back to top](#)

INFO-TEC 350 Object-Oriented Software Development

Application of object oriented programming languages as a means to implement object oriented designs. Polymorphism through inheritance and interfaces, design methods such as Responsibility Driven Design and such reusable design techniques as abstract classes and frameworks. Event-driven programming and the Java Swing classes for constructing interactive Graphical User Interfaces (GUIs), the basics of the Unified Modeling (UML) and elementary design patterns. Prerequisites: COMP-SCI 201 and COMP-SCI 352. Cross listed as COMP-SCI 350, and COMP-SCI 490OS

3 hrs

[back to top](#)

INFO-TEC 490 Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

1-3 hrs

[back to top](#)

INFO-TEC 490 A Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

1-3 hrs

[back to top](#)

INFO-TEC 490 C Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

1-3 hrs

[back to top](#)

INFO-TEC 490 IT Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

1-3 hrs

[back to top](#)

INFO-TEC 490 J Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

1-3 hrs

[back to top](#)

INFO-TEC 490 Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

1-3 hrs

[back to top](#)

INFO-TEC 490 NA Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

1-3 hrs

[back to top](#)

INFO-TEC 490 NS Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

1-3 hrs

[back to top](#)

INFO-TEC 490 SD Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

1-3 hrs

[back to top](#)

INFO-TEC 490 WD Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

1-3 hrs

[back to top](#)

INFO-TEC 491 Internship

Students may participate in structured internships under the joint supervision of an employer and a faculty member. The student must carry out significant professional responsibilities that also have academic merit. The number of credit hours is based on the quality of the academic experience. Available for credit/nocredit only, and students must be in good standing with a least 18 credit hours of CS/IT counting towards the degree. Registration by consent number only: petition forms for CS/IT 491 Internships are available in the CSEE Division Office. Prerequisite: AT least 18 hours of CS/IT that counts towards the B.I.T. degree.

1-6 hrs

[back to top](#)

Mechanical Engineering (ME)

MEC-ENGR 111 Essential Engineering

Introduction to the practice and history of engineering including its impact on human history, product design/ development and its relationship to the ecosystem, professionalism and ethics, the engineering approach to solving real-world problems, engineering communications and calculations, engineering teamwork and case studies. (Same as CIV-ENGR 111).

3 hrs

[back to top](#)

MEC-ENGR 130 Engineering Graphics

Introduction to Engineering Graphics with the use of the Computer Aided Design tools AutoCAD and SolidWorks. Introduction to 2D design with AutoCAD includes: basic features, layer control, geometric constructions, orthographic projections, dimensioning and notes, tolerancing, section views, and working drawings. Introduction to 3D design with SolidWorks includes: part modeling, revolved features, sweeps, lofts, assembly modeling and engineering drawings. No previous 2D or 3D CAD experience is necessary to take this class. Semester Offered: Fall/Winter

3 hrs

[back to top](#)

MEC-ENGR 130 L Engineering Graphics Lab

Supplemental lab instruction and assistance for MEC-ENGR 130.

0 hrs

[back to top](#)

MEC-ENGR 131 Engineering Graphics-3D design

Introduction to Engineering Graphics using the 3D Computer Aided Design tool SolidWorks. Introduction to 3D design with SolidWorks includes: part modeling, revolved features, sweeps, lofts, assembly modeling, and engineering drawings. Some previous 2D AutoCAD experience is required to take this class. NOTE: This class starts halfway through the semester by joining in with MEC-ENGR 130 when they finish AutoCAD and begin SolidWorks. Prerequisite: 2D AutoCAD experience.

1 hr

[back to top](#)

MEC-ENGR 131 L Engineering Graphics 3D Design Lab

Supplemental lab instruction and assistance for MEC-ENGR 131

0 hrs

[back to top](#)

MEC-ENGR 211 The Engineering Enterprise

The engineering enterprise course covers four topics essential for engineering students with new venture creation interests: creating economic value, leadership, finance, and marketing. The primary objective of this course is to motivate the student to think as a blend of an engineer and a businessperson. (Same as CIV-ENGR 211). Pre/corequisite: MEC-ENGR 111

3 hrs

[back to top](#)

MEC-ENGR 219 Computer Programming For Engineers

Analysis and synthesis of structured computer algorithms for solving engineering problems using high level programming tools such as Excel, Matlab, Fortran and/or C++. (Same as CIV-ENGR 219) Prerequisite: MATH 210

3 hrs

[back to top](#)

MEC-ENGR 220 Electric Circuits

Introduction to electric circuits for civil and mechanical engineering students. Prerequisites: MEC-ENGR 219, PHYSICS 250
Corequisite MATH 345 Offered: Winter

3 hrs

[back to top](#)

MEC-ENGR 285 Engineering Dynamics

Basic fundamentals of particle and rigid body dynamics; energy and momentum methods; computer use. Prerequisite: CIV-ENGR 275.

3 hrs

[back to top](#)

MEC-ENGR 299 Engineering Thermodynamics

Fluid properties, work and heat, first law, second law, entropy, applications to vapor and ideal gas processes. Prerequisites: PHYSICS 240 and MATH 220.

3 hrs

[back to top](#)

MEC-ENGR 301 Fundamental Topics In Mechanical Engineering

Current and new technical developments in mechanical engineering. Prerequisite: instructor's consent.

3 hrs

[back to top](#)

MEC-ENGR 301 Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 306 Computer-Aided Engineering

Principles, analysis and application of numerical methods for the solution of engineering problems. Computer implementation. Prerequisites: MEC-ENGR 319 and MATH 345

3 hrs

[back to top](#)

MEC-ENGR 311 The Technical Entrepreneur

The guiding principal for the course is that entrepreneurs are innovators and operate in an uncertain and risky environment. The course looks at the entrepreneurial mindset and the process of new product line launch. (Same as CIV-ENGR 311).
Prerequisite: MEC-ENGR 211

3 hrs

[back to top](#)

MEC-ENGR 319 Engineering Computation And Statistics

Statistical distribution functions and application to engineering problems. Limited treatment of curve-fitting and time-series analysis. Introduction to factorial design. (Same as CE 319) Prerequisite: MEC-ENGR 219 and MATH 220

3 hrs

[back to top](#)

MEC-ENGR 324 Engineering Materials

The nature of the structure of engineering materials. The relationship of material structure to the physical properties. Mechanical behavior of engineering materials. Prerequisites: MEC-ENGR 299, CIV-ENGR 276 and CHEM 211.

4 hrs

[back to top](#)

MEC-ENGR 351 Fluid Mechanics

Concepts of the statics and dynamics of fluids, with emphasis on principles of continuity, momentum and energy. Boundary layers, dimensional analysis and drag are covered briefly. Thorough treatment of pipe flow. (Same as CIV-ENGR 351.)

Prerequisites: MEC-ENGR 285, MATH 345

3 hrs

[back to top](#)

MEC-ENGR 352 Instrumentation & Measurements Lab I

Static and dynamic errors; experiment design; instrumentation selection and calibration; measurement of voltage, resistance, amperage, duration, frequency, displacement, velocity, acceleration, strain, force and torque. Prerequisites: MEC-ENGR 285, CIV-ENGR 276, and MEC-ENGR 220.

3 hrs

[back to top](#)

MEC-ENGR 360 Thermal System Design

Gas and vapor mixtures, cycles, availability, imperfect gases, thermodynamic relations, combustion, chemical equilibrium, power systems and design projects. Effects of design choices on the earth and living systems. Prerequisites: MEC-ENGR 299, MATH 250; Co-requisite: MEC-ENGR 351

3 hrs

[back to top](#)

MEC-ENGR 362 Instrumentation & Measurements Lab II

Continuation of 352 with emphasis on instruments to measure temperature, pressure, fluid flow, fluid velocity, sound, spectral content and emissions. Prerequisites: MEC-ENGR 351 and MEC-ENGR 352. Corequisite: MEC-ENGR 399.

3 hrs

[back to top](#)

MEC-ENGR 380 Manufacturing Methods

Introduction to manufacturing processes with emphasis on those aspects most relevant to methods, problems in force analysis, and practicum and experimentation in machine tool applications. Prerequisites: MEC-ENGR 324.

3 hrs

[back to top](#)

MEC-ENGR 385 System Dynamics

Kinematics of mechanical systems. Introduction to the modeling and analysis of dynamic mechanical systems. Computer analysis. Prerequisites: MEC-ENGR 285 and MATH 345.

3 hrs

[back to top](#)

MEC-ENGR 390 Engineering Coop/Internship

Students may participate in structured Engineering Coop/ Internship under the supervision of employer. They must carry out significant professional responsibilities and whatever additional assignments are determined by the employer. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211

0 hrs

[back to top](#)

MEC-ENGR 399 Heat And Mass Transfer

Fundamentals of conduction, convection, and radiation heat transfer. Use of nondimensional parameters. Theory of heat exchangers. Mass transfer. Prerequisites: MATH 345, MEC-ENGR 319, MEC-ENGR 351 Pre/corequisite: MEC-ENGR 306

3 hrs

[back to top](#)

MEC-ENGR 400 Problems

Special design, experimental and analytical problems in mechanical engineering.

1-6 hrs

[back to top](#)

MEC-ENGR 401 Topics In Mechanical Engineering

Current and new technical developments in mechanical engineering. Prerequisite: instructor's consent.

1-3 hrs

[back to top](#)

MEC-ENGR 401 BN Topics In Mechanical Engineering

1-3 hrs

[back to top](#)

MEC-ENGR 401 Topics In Mechanical Engineering

1-3 hrs

[back to top](#)

MEC-ENGR 401 FE Topics in Mechanical Engineering

1-3 hrs

[back to top](#)

MEC-ENGR 401 M Topics In Mechanical Engineering

1-3 hrs

[back to top](#)

MEC-ENGR 401 P Topics In Mechanical Engineering

1-3 hrs

[back to top](#)

MEC-ENGR 401 SA Topics In Mechanical Engineering

1-3 hrs

[back to top](#)

MEC-ENGR 401 V Topics In Mechanical Engineering

1-3 hrs

[back to top](#)

MEC-ENGR 401 X Topics in Mechanical Engineering

Current and new technical developments in mechanical engineering. Prerequisite: instructor's consent.

1-3 hrs

[back to top](#)

MEC-ENGR 411 Biomechanics

This course is to provide students with an introduction to the engineering principles of biomechanics. Following a general introduction to anatomical terminology, students will be exposed to three primary sub-disciplines of biomechanics including kinetics and kinematics of human movement, muscle mechanics, and biomaterials. Students will become familiar with measurement techniques and current research being done within each of these units through lectures and in-class discussions and presentations of relevant journal articles. A final semester project, culminating in a NIH-style research proposal, will be developed throughout the semester in one of the three units presented.

3 hrs

[back to top](#)

MEC-ENGR 414 Material Science For Advanced Applications

Study of the physical and mechanical metallurgy of alloy systems of interest in engineering applications. Prerequisite: MEC-ENGR 324.

3 hrs

[back to top](#)

MEC-ENGR 415 Feedback Control Systems

Introduction to feedback control theory for linear dynamic systems. Topics include root locus analysis, frequency response analysis, and controller design. Prerequisite: MEC-ENGR 385

3 hrs

[back to top](#)

MEC-ENGR 420 Human Powered Vehicle Design Lab

Introduction to the science of human powered vehicles (HPV) providing the background necessary for the design of such vehicles. Students will learn and utilize engineering design practices and apply them toward the creation of an aerodynamic, highly engineered land based HPV. Prerequisite: Consent of Instructor

3 hrs

[back to top](#)

MEC-ENGR 424 Non-Metallic Engineering Materials

Structures, properties and applications of ceramics, glasses, cermets, polymers and composite materials. Prerequisite: MEC-ENGR 324.

3 hrs

[back to top](#)

MEC-ENGR 431 Experimental Methods In Fluid Flow & Heat Transfer

Laboratory experiments involving fundamental mechanisms and phenomena associated with fluid flow and heat transfer. Current experimental methods and techniques employed. Prerequisites: MEC-ENGR 362 and MEC-ENGR 399.

3 hrs

[back to top](#)

MEC-ENGR 440 Heating And Air Conditioning

General principles of thermodynamics, heat transfer, and fluid dynamics are used to calculate building loads, size equipment and ducts, and evaluate system performance in maximizing human comfort. Consideration of indoor air quality and human health. Prerequisites: MEC-ENGR 360 and MEC-ENGR 399

3 hrs

[back to top](#)

MEC-ENGR 441 Intermediate Fluid Mechanics

Topics in potential and viscous flow theory, and computational fluid dynamics. Prerequisite: MEC-ENGR 351.

3 hrs

[back to top](#)

MEC-ENGR 444 Composite Materials

A survey of composite materials used in engineering, emphasizing fiber-reinforced composites as well as laminate and particulate composites. Prerequisite: MEC-ENGR 324.

3 hrs

[back to top](#)

MEC-ENGR 447 Contracts And Law For Engineers

Law of contracts, including types, construction, interpretation, performance, and termination. Construction and Engineering service contracts: Proposals, general and financial conditions, specifications and drawings. Corporate and professional and personal liability, insurance and bonds, property, evidence, arbitration and mediation. Offered: Fall

3 hrs

[back to top](#)

MEC-ENGR 449 Environmental Compliance, Auditing & Permitting

Statutes, regulations and permitting for air hazardous wastes and storage tanks. Asbestos, radon, EMF, and emerging areas of regulatory concern. Siting issues. Criminal and civil enforcement. Crosslisted as CIV-ENGR 449 Prerequisite: Junior standing within the degree program Offered: Winter

3 hrs

[back to top](#)

MEC-ENGR 451 Power Plant Design

Preliminary component and system design. Optimum design of boilers, steam turbines, condensers and cooling towers and their integration into a system to minimize production costs and impact on the environment. Prerequisites: MEC-ENGR 360 and MEC-ENGR 399.

3 hrs

[back to top](#)

MEC-ENGR 452 Advanced Mechanics Of Materials

Analysis of more complicated problems in stresses and strains. Prerequisite: CIV-ENGR 276.

3 hrs

[back to top](#)

MEC-ENGR 453 Experimental Stress Analysis

Photoelastic, electric strain gage, brittle lacquer methods of experimental stress analysis for static loads. Strain gage work includes strain rosettes. Prerequisite: CIV-ENGR 276.

3 hrs

[back to top](#)

MEC-ENGR 454 Power Generation Systems

Fundamentals of the power industry in a format suitable for all engineering disciplines. Survey of electric power systems, including fossil and nuclear steam cycles, combustion turbines, combines cycles, and renewable such as solar and wind. Introduction to major machinery components, systems, controls, and an overview of fuels, emissions, and emission control technologies. Offered: Winter

3 hrs

[back to top](#)

MEC-ENGR 455 Digital Control Of Mechanical Systems

Introduction to digital control systems. Topics include Z-transforms, sampling, stability analysis, and digital controller design. Prerequisites: MEC-ENGR 415 and MATH 345.

3 hrs

[back to top](#)

MEC-ENGR 456 WI Mechanical Component Design

Introduction to mechanical engineering design and its impact on human history, principles of design with ductile and brittle materials for static and dynamic loading, classical and reliability-based factors of safety, fracture mechanics in design, application to the design of selected machine components. Prerequisites: MEC-ENGR 380, MEC-ENGR 385, MEC-ENGR 130, WEPT passed

3 hrs

[back to top](#)

MEC-ENGR 457 Microcomputer Control Of Mechanical Systems

Synergistic combination of control, sensors, actuators, electronics, computers, and real-time programming. Actuator and computer fundamentals; logic devices; electronic components including transistors, operational amplifiers; and power amplifiers; interface design and control programming. Prerequisites: MEC-ENGR 362 and MEC-ENGR 415

3 hrs

[back to top](#)

MEC-ENGR 458 Modern Control Systems

Controller design for multiple-input/multiple-output systems; controllability and observability; stochastic control problems; regulators and tracking controllers; observers. Prerequisite: MEC-ENGR 415.

3 hrs

[back to top](#)

MEC-ENGR 460 Electromechanical Conversion

Magnetic circuitry in general and in machinery; DC machine theory, operation application; transformer circuits, synchronous machine theory, operation application: basic principles of energy conversion; use of matrices; basic principles of power transmission and control.

3 hrs

[back to top](#)

MEC-ENGR 461 Electromechanical Conversion II

Application of fundamental and concepts of power systems to practical power plant and industrial applications. Identification of the significant internal components of power system equipment: Single and Three Phase Circuits, DC and AC Generators/ Alternators, Transformers, DC and AC Motors, DC and AC Transmission, and System Electrical Protection. Prerequisite: MEC-ENGR 460

3 hrs

[back to top](#)

MEC-ENGR 466 Applied Optimization And Decision Modeling

Introduction to mathematical programming techniques and applications. Linear and integer programming, transportation models, multiple objective and goal programming. Prerequisite: MEC-ENGR 306

3 hrs

[back to top](#)

MEC-ENGR 476 Machine Tool Design

Methodology of machine tool design. Dynamic modeling, analysis, synthesis, and simulation of machine tools to meet functional requirements and design constraints. Prerequisites: MEC-ENGR 285 and MEC-ENGR 306.

3 hrs

[back to top](#)

MEC-ENGR 483 Manufacturing Automation

This course covers fundamentals underlying contemporary manufacturing automation. The following two aspects of manufacturing automation will be emphasized: (1) computer based systems for automating and controlling manufacturing processes such as numerically controlled machining and material handling robots; and (2) use of software systems in facilitating information exchange between different components of manufacturing decision support systems. The course will be taught using a project-based learning approach. Prerequisites: MEC-ENGR 319 and MEC-ENGR 380

3 hrs

[back to top](#)

MEC-ENGR 484 Vibration Analysis

Vibration theory with application to mechanical systems. Prerequisites: MEC-ENGR 385

3 hrs

[back to top](#)

MEC-ENGR 486 Introduction To Finite Element Methods

The application of matrix operations, energy concepts and structural mechanics to the development of the finite element method. Application of finite element methods to beams, frames and trusses. Prerequisites: MEC-ENGR 306, MEC-ENGR 324, MEC-ENGR 385, MEC-ENGR 399

3 hrs

[back to top](#)

MEC-ENGR 491 Internship

For International students who must register for 1 credit hour to cover off-campus employment which is approved as related to their degree by their departmental advisor and ISAO

6 hrs

[back to top](#)

MEC-ENGR 495 Vehicle Dynamics

Analysis and prediction of the dynamic behavior of ground vehicles utilizing computer simulation. Mechanics of various suspension systems, tire-roadway interaction, vehicle aerodynamics, vehicle handling and steering characteristics. Special topics including non-holonomic constraint formulation and stability of motion. Prerequisite: MEC-ENGR 385.

3 hrs

[back to top](#)

MEC-ENGR 496 WI Mechanical Design Synthesis

Modern design theories and methodologies, with emphasis on the initial stages of the design process. Effect of design choices on the earth and living systems. Principles of embodiment design and life-cycle considerations. A comprehensive group design project is required. The course satisfies the Writing Intensive requirement. Prerequisite: MEC-ENGR 456WI, WEPT passed

4 hrs

[back to top](#)

MEC-ENGR 499 Intermediate Heat Transfer

Advanced topics in conduction, convection and radiation heat transfer including transient heat transfer, phase change and heat exchangers. Prerequisites: MEC-ENGR 360 and MEC-ENGR 399

3 hrs

Conservatory

CONSVTY 101 C Voice Class I

A course in the fundamentals of correct voice productions; breathing, breath control, study of vowel forms and consonants. Elementary songs. Poise, posture, and stage presence. This course covers two points of view: development of the student's own voice and the pedagogy of voice-class instruction. A voice audition is required before registration.

2 hrs[back to top](#)**CONSVTY 103** Fundamentals Of Music Theory

An introduction to the rudiments of music theory and basic musicianship skills. Designed primarily as a review course for Conservatory students. Non-music majors may also enroll in this course.

2 hrs[back to top](#)**CONSVTY 104** Jazz Improvisation I

A systematic approach to the art of jazz improvisation. Emphasis upon performance as well as analysis. Prerequisite: CONSVTY 122 or consent of the instructor.

2 hrs[back to top](#)**CONSVTY 105** Jazz Improvisation For Non-Jazz Majors

This course is designed to provide the non-Jazz major with fundamental concepts needed to compose spontaneously. Blues and basic jazz forms are covered through performance and recordings. Offered: Fall

2 hrs[back to top](#)

CONSVTY 108 Beginning Piano For Non-Music Majors

A class for non-music majors to acquire basic piano skills. Popular arrangements and group techniques designed to encourage students to play the piano for pleasure. Prerequisite: Consent of the instructor.

2 hrs

[back to top](#)

CONSVTY 110 Keyboard Skills I

Group instruction in beginning techniques of reading, harmonization, transposition, and improvisation, including an introduction to MIDI technology.

2 hrs

[back to top](#)

CONSVTY 114 Piano Sight-Reading I

Laboratory practice in sight-reading for piano majors.

1 hr

[back to top](#)

CONSVTY 115 Piano Sight-Reading II

Continuation of CONSVTY 114.

1 hr

[back to top](#)

CONSVTY 120 Music Appreciation

Designed for the general University student with little or no music background and required for Dance Majors (no credit for music majors). An emphasis on the basic elements of music and the historical and stylistic periods, illustrated by examples from different genre, such as instrumental and vocal ensembles, large and small, solo literature for voice and instruments, and dance. Three class sessions a week with frequent live performance and guest speakers.

3 hrs

[back to top](#)

CONSVTY 121 Music Theory I

A course presenting the elementary melodic, rhythmic, and harmonic elements of music through part-writing and analysis. The vocabulary for the first semester includes traditional usage and analysis of triads and their inversions, nonharmonic tones, introduction to chords of the seventh, and elementary modulation.

3 hrs

[back to top](#)

CONSVTY 122 Music Theory II

Continuation of CONSVTY 121. Prerequisite: CONSVTY 121 or equivalent.

3 hrs

[back to top](#)

CONSVTY 123 Keyboard Skills II

Group instruction in intermediate-level reading, harmonization, transposition, accompaniments, and improvisation in a variety of styles. Introductory techniques in MIDI technology are also included.

2 hrs

[back to top](#)

CONSVTY 125 History And Development Of Rock And Roll

Designed for students with little or no music background, the course is an exploration of American popular music from early Rhythm and Blues and Country Western through Woodstock. Examines in detail the social/racial issues most important to the music and the cultural history of twentieth-century America. The course features online video lectures and numerous interviews with professors and scholars from other disciplines, presenting a perspective of the influence of this music on nearly every area of American life. Students are required to participate in online discussion groups as part of the class. Music majors may enroll for music elective credit.

3 hrs

[back to top](#)

CONSVTY 126 Introduction to World Music

An introduction to global music traditions and their cultural contexts. Open to all students.

3 hrs

[back to top](#)

CONSVTY 127 Music And Film

Designed for the general university student, this course will survey the use of music in cinema. It will include sections on music, technology, the film medium and the various ways in which music adds to the cinematic experience. Music majors may enroll for elective credit. No prerequisite.

3 hrs

[back to top](#)

CONSVTY 128 Introduction To Music Education/Music Therapy

An introductory course for all BME Choral and Instrumental majors, all music therapy majors, and all students who want general information about the field of music education and music therapy. Includes information on the profession and the role of music education in a school curriculum, as well as the roll of music therapy in various settings.

1 hr

[back to top](#)

CONSVTY 129 A Ear Training And Solfege

Study of tonal aural problems and rhythms. Introduction to movable do solfege.

1 hr

[back to top](#)

CONSVTY 129 B Ear Training And Solfege

Continuation of CONSVTY 129A. Prerequisite: CONSVTY 129A.

1 hr

[back to top](#)

CONSVTY 130 Music Therapy Techniques: Adults

Class demonstration and participation in use of materials for psychiatric and geriatric clients. Required of all BME Therapy majors.

3 hrs

[back to top](#)

CONSVTY 133 Beginning Composition I

Introduction to the compositional process, including notation, calligraphy and score preparation, styles and forms, and related topics. A weekly one-hour lab is required.

3 hrs

[back to top](#)

CONSVTY 133 A Beginning Composition For Non-Composition Majors I

An introductory course in music composition, with exercises in instrumentation, notation, orchestration, form, melodic construction, harmony, counterpoint, and rhythm. Discussion and analysis of current works, trends and techniques in music composition. Final project is an original composition. A weekly one-hour lab is required.

2 hrs

[back to top](#)

CONSVTY 133 B Beginning Composition For Prospective Composition Majors

A class for students wishing to work toward major status in the music composition program. Exercises and projects as in 133A, with an extra hour per-week of in-depth, guided exercises and portfolio development. Prerequisite: Permission of the instructor via evaluation of a composition portfolio-in-progress on the first day of class. A weekly one-hour lab is required.

3 hrs

[back to top](#)

CONSVTY 134 Beginning Composition II

Continuation of CONSVTY 133. Prerequisites: CONSVTY 121 and CONSVTY 133 or consent of the instructor. A weekly one-hour lab is required.

3 hrs

[back to top](#)

CONSVTY 134 A Beginning Composition For Non-Composition Majors II

Prerequisites: CONSVTY 133A or consent of the instructor via portfolio evaluation on the first day of class. A weekly one-hour lab is required.

2 hrs

[back to top](#)

CONSVTY 134 B Beginning Composition For Prospective Composition Majors II

Continuation of CONSVTY 133B. Exercises and projects as in CONSVTY 134A., with an extra hour per-week of in-depth, guided exercises and portfolio development. Prerequisites: CONSVTY 133B or consent of the instructor via portfolio evaluation on the first day of class. A weekly one-hour lab is required.

3 hrs

[back to top](#)

CONSVTY 150 Introduction To Music Literature

An introduction to the major composers, literature, and forms of the various historical periods. Bibliographical sources and library procedures as well as extensive listening requirements are included.

3 hrs

[back to top](#)

CONSVTY 154 Music Listening Laboratory

"Listening" includes works of all major periods and styles in live performance. May be repeated for credit. Required for all Conservatory music majors. Non-music majors encouraged to enroll.

1 hr

[back to top](#)

CONSVTY 154 A Music Listening Laboratory: Non-Western Cultures

The course is a study of music in culture and introduces undergraduate students to living music, musical instruments, and dance of oral traditions and music of high cultures outside the limits of urban European art music through discussion, performance, and observation. Required for all Conservatory music majors. Non-music majors are encouraged to enroll.

1 hr

[back to top](#)

CONSVTY 160 Wind And Percussion Laboratory

Designed for the student working at a beginning level of performance on wind and/or percussion instruments. Instruction will focus on basic playing techniques and pedagogical issues. Enrollment for credit not required if student is concurrently enrolled in CONSVTY 373 (C,D,E,F,H, OR I), CONSVTY 381, CONSVTY 383, or CONSVTY 386. Prerequisite(s): Permission of instructor.

1 hr

[back to top](#)

CONSVTY 161 String Instrument Laboratory

Designed for the student working at a beginning level of performance on string instruments. Instruction will focus on basic playing techniques and pedagogical issues. Enrollment for credit not required if student is concurrently enrolled in CONSVTY 373 (A&B), CONSVTY 381, CONSVTY 383, or CONSVTY 386. Prerequisite: Permission of instructor.

1 hr

[back to top](#)

CONSVTY 171 Foreign Language For Singing I

A course for Italian and German diction. Emphasis is placed on oratorio rather than conversational pronunciation. Required for BME Choral and BM voice.

2 hrs

[back to top](#)

CONSVTY 172 Foreign Language For Singing II

A course for French and Latin diction. Emphasis is placed on oratorio rather than conversational pronunciation. Required for BME Choral and BM voice.

2 hrs

[back to top](#)

CONSVTY 180 Music In Special Education

Class demonstration and participation in the use of music materials for handicapped children.

3 hrs

[back to top](#)

CONSVTY 185 A Foreign Language For Singing I

A course for English and Latin diction for oratorio performance with detailed study of the International Phonetic Alphabet. Required for BM voice.

2 hrs

[back to top](#)

CONSVTY 185 B Foreign Language For Singing II

A course for Italian diction. Emphasis is placed on sung rather than conversational pronunciation. Required for BM voice.

2 hrs

[back to top](#)

CONSVTY 185 C Foreign Language For Singing III

A course for German diction. Emphasis is placed on sung rather than conversational pronunciation. Required for BM voice.

2 hrs

[back to top](#)

CONSVTY 185 D Foreign Language For Singing Iv

A course for French diction. Emphasis is placed on sung rather than conversational pronunciation. Required for BM voice.

2 hrs

[back to top](#)

CONSVTY 199 Kangaroo Band

This band will provide music for men's and women's basketball games. Members are required to attend all home games. Open to all University students by audition.

1 hr

[back to top](#)

CONSVTY 202 Basic Techniques Of Audio Recording I

A study of the philosophy, history, and development of audio recording. Practical application of recording techniques and development of recording skills.

3 hrs

[back to top](#)

CONSVTY 203 Basic Techniques Of Audio Recording II

Continuation of study of recording techniques and development of recording skills. Prerequisite: CONSVTY 202 or consent of the instructor.

3 hrs

[back to top](#)

CONSVTY 204 Jazz Improvisation II

Prerequisite: CONSVTY 104 or consent of the instructor.

2 hrs

[back to top](#)

CONSVTY 205 Applied Jazz Studies

Unlimited repeatability. This weekly private lesson includes the study of advanced concepts used to compose spontaneously. Includes the analyses of harmonic progressions, applications of scales and rhythmic interpretation. Prerequisite: Jazz majors with the approval of the instructor.

2 hrs

[back to top](#)

CONSVTY 210 Clinical Experience

One hour minimum of supervised clinical experience in music therapy and one hour of seminar per week, which includes practice in developing a treatment plan and writing clinical progress reports. All clinicals regardless of contact hours must have a minimum on-site 10 week duration.

1 hr

[back to top](#)

CONSVTY 210 A Clinical Experience: I

Must be taken concurrently with CONSVTY 260

1 hr

[back to top](#)

CONSVTY 210 B Clinical Experience: II

Primarily assists the site coordinator with some leadership responsibilities.

1 hr

[back to top](#)

CONSVTY 210 C Clinical Experience: III

Equal assisting and leading responsibilities on-site

1 hr

[back to top](#)

CONSVTY 210 D Clinical Experience: Iv

Some assisting and primarily leading responsibilities on-site.

1 hr

[back to top](#)

CONSVTY 210 Clinical Experience: V

Must be taken concurrently with CONSVTY 408

1 hr

[back to top](#)

CONSVTY 210 F Clinical Experience Vi

Must be taken concurrently with CONSVTY 409.

1 hr

[back to top](#)

CONSVTY 214 Piano Sight-Reading III

Laboratory practice in sight-reading for piano majors. Prerequisite: CONSVTY 115.

1 hr

[back to top](#)

CONSVTY 215 Piano Sight-Reading IV

Laboratory practice in sight-reading for piano majors. Prerequisite: CONSVTY 214.

1 hr

[back to top](#)

CONSVTY 221 Music Theory III

Continuation of CONSVTY 122. Introduction to nineteenth century harmony. Prerequisite: CONSVTY 122.

3 hrs

[back to top](#)

CONSVTY 222 A Music Theory Iv

Continuation of CONSVTY 221. An introduction to 20th century analysis and techniques, focusing on popular music and jazz styles. Study in performing, compositional skills, and related ear-training. Prerequisite: CONSVTY 221.

3 hrs

[back to top](#)

CONSVTY 223 Keyboard Skills III

Group instruction in advanced techniques of reading, harmonization, transposition, and improvisation, with extended-range accompaniments. Techniques for practicing using MIDI technology are also included.

2 hrs

[back to top](#)

CONSVTY 229 A Ear Training And Solfege

Continuation of CONSVTY 129B. Prerequisite: CONSVTY 129B.

1 hr

[back to top](#)

CONSVTY 229 B Ear Training And Solfege

Continuation of CONSVTY 229A. Prerequisite: CONSVTY 229A.

1 hr

[back to top](#)

CONSVTY 233 Intermediate Composition I

Continuation of CONSVTY 134. A weekly one-hour lab is required. Prerequisites for composition majors: CONSVTY 134 and CONSVTY 122 or consent of the instructor. Prerequisites for non-majors: a significant composition portfolio (to be submitted on the first day of class for consideration).

3 hrs

[back to top](#)

CONSVTY 233 A Beginning Composition for Non-Composition Majors I

Continuation of CONSVTY 134A. A weekly one-hour lab is required. Prerequisite: CONSVTY 122 and CONSVTY 134A, or consent of the composition faculty via portfolio submission on the first day of class.

2 hrs

[back to top](#)

CONSVTY 234 Intermediate Composition II

Continuation of CONSVTY 233. Prerequisites for composition majors: CONSVTY 221 and CONSVTY 233 or consent of the instructor. Prerequisites for non-majors: a significant composition portfolio (to be submitted on the first day of class for consideration).

3 hrs

[back to top](#)

CONSVTY 234 A Beginning Composition for Non-Composition Majors II

Continuation of CONSVTY 233A. A weekly one-hour lab is required. Prerequisite: CONSVTY 221 and CONSVTY 233A, or consent of the composition faculty via portfolio submission on the first day of class.

2 hrs

[back to top](#)

CONSVTY 235 Techniques Of Electronic Music I: Digital Audio

CONSVTY 235 is designed to give students a thorough grasp of studio hardware and software used in composing music with digital audio. Studio configuration, sampling/recording, mixing, effects processing, synthesis, multi-tracking, wave editor and digital audio work station software, basic MIDI and electroacoustic literature and ear training will be discussed in the process of creating a short original composition. Focus will also be on fostering independent creativity and problem solving in a music studio. In addition to three 50-minute lecture/demo sessions per week, 3-5 hours minimum of in-studio work time is expected. Open to anyone regardless of musical training. Offered: Fall

3 hrs

[back to top](#)

CONSVTY 236 Techniques Of Electronic Music II: MIDI

CONSVTY 236 is designed to give students a grasp of studio hardware and software used in composing music with MIDI. Studio configuration, sampling, mixing, effects processing, multi-tracking, MIDI, and basic digital audio work station software will be taught along with electroacoustic literature and ear training. The course focuses on creating a short composition using MIDI technology. Focus will also be on fostering independent creativity and problem solving in a music studio. In addition to three 50-minute lecture/demo sessions per week, 3-5 hours minimum of in-studio time is expected. Open to anyone regardless of musical training. Offered: Spring

3 hrs

[back to top](#)

CONSVTY 260 Clinical Foundations Of Music Therapy

This course is intended to prepare students majoring in music therapy for clinical experiences in the community. Students learn and develop skills related to the treatment process. Prerequisites: Students must take concurrently with CONSVTY 210A, Clinical Experience I

3 hrs

[back to top](#)

CONSVTY 270 Marching Band Technique

A study of organization and formations involved for use with varsity and military bands.

1 hr

[back to top](#)

CONSVTY 285 Elementary Music Methods

Laboratory course for classroom teachers in which principles of instructional design will be applied to music teaching. Students who have extensive music background may elect CONSVTY 385 in place of CONSVTY 285.

3 hrs

[back to top](#)

CONSVTY 301 B Men's Chorus

[back to top](#)

CONSVTY 305 J Chamber Music Guitar

1 hr

[back to top](#)

CONSVTY 306 A Conservatory Wind Ensemble

2 hrs

[back to top](#)

CONSVTY 306 C Wind Symphony

The Wind Symphony comprises wind, brass and percussion students of the highest level in the Conservatory and performs repertoire of the highest caliber available to the medium. The curriculum is well balanced between traditional, modern, and chamber music and requires advanced musical and technical facility amongst its members. The class is open to all UMKC students by audition.

2 hrs

[back to top](#)

CONSVTY 307 A Canticum Novum

1 hr

[back to top](#)

CONSVTY 307 B Conservatory Chorale

2 hrs

[back to top](#)

CONSVTY 308 A Conservatory Concert Choir

1 hr

[back to top](#)

CONSVTY 309 Audio Recording III

Continuation of study of recording techniques and music production skills. Prerequisite: CONSVTY 203.

3 hrs

[back to top](#)

CONSVTY 310 Keyboard Skills Iv

Group instruction designed to fulfill the Piano Proficiency requirement. Students are required to demonstrate sight reading, harmonization, transposition, ear playing, improvisation, and accompanying skills at advanced levels. Midi technology is used with each of the skill requirements.

2 hrs

[back to top](#)

CONSVTY 311 Jazz Theory

The basics of written jazz harmony and its nomenclature will be addressed. Topics covered will include but not be limited to jazz scales and modes: chords, i.e. from the 7 through the 13 with all of their frequent jazz alterations; harmonic progressions, reharmonization; voice leading, dissonance; melody, transcription, analysis and the study of form(s). Notation will be addressed throughout. Students will acquire the fundamentals to pursue jazz improvisation, arranging and composition on a more informed level. This class is a prerequisite to Jazz Arranging. Prerequisite: CONSVTY 222B Theory IV and instructor permission

2 hrs

[back to top](#)

CONSVTY 314 Seminar In Chamber Music

Potential enrollees must audition. Those accepted from a pool of players from which chamber groups are drawn each semester. Groups must rehearse four hours a week, and will receive a one-hour coaching each week. All enrollees will also take part in a periodic chamber music master class. This class, two hours in length, will be taught by various members of the core chamber music faculty and by guest artists.

2 hrs

[back to top](#)

CONSVTY 315 Popular Piano Styles

Course covers techniques of leading piano stylists from early ragtime to the present. Includes listening, analysis, arranging, and performing. Prerequisite: Completion of Piano Proficiency Exam or consent of the instructor.

1 hr

[back to top](#)

CONSVTY 316 Popular Guitar Styles

Course covers techniques of leading guitar styles from the 1920's to present. Includes listening, analysis, transcription, and performing. Prerequisite: Completion or credit by exam of CONSVTY 373G, or by consent of instructor.

1 hr

[back to top](#)

CONSVTY 318 Jazz Ear Training And Listening

This course offers the student basic fundamental techniques needed to improve aural perceptions in both the translation of hearing into writing and the performance of reading into singing and playing in the jazz idiom. Introduction and practice in singing, aural recognition and writing of intervals and short, simple melodies. Also including rhythm, memory and improvisational drills. Prerequisite: CONSVTY 329 Advanced Ear Training

2 hrs

[back to top](#)

CONSVTY 319 Opera Role Performance

Preparation, rehearsal and performance of a role in an opera or music theatre production at UMKC. Credit for performance as part of the ensemble/chorus may be received from this course after the two chorus requirements are completed as part of the choral requirements. Credit for non-performing duties such as assistant directing or assistant stage managing may be available with approval of opera/music theatre staff. Prerequisite: Audition (generally held during the first week and a half of classes in the fall).

1 hr

[back to top](#)

CONSVTY 320 Music Theatre Role Performance

Perpetration, rehearsal and performance of a role in an opera or music theatre production at UMKC. Credit for performance as part of the ensemble/chorus may be received from this course after the two chorus requirements are completed as part of the choral requirements. Credit for non-performing duties such as assistant direction or assistant stage managing may be available with approval of opera/music theatre staff. Prerequisite: Audition (generally held during the first week and a half of classes in the fall).

1 hr

[back to top](#)

CONSVTY 323 Form And Analysis I

Application of theoretical principles of analysis to Western Art music. Prerequisite: CONSVTY 221.

2 hrs

[back to top](#)

CONSVTY 325 Piano Pedagogy I

Survey of beginning methods and materials. Introduction to learning theories and teaching strategies for individual and group instruction.

2 hrs

[back to top](#)

CONSVTY 325 A Piano Pedagogy - Supervised Teaching I

Supervised practicum includes evaluation of teacher effectiveness and student musical growth. Must be taken concurrently with CONSVTY 325.

1 hr

[back to top](#)

CONSVTY 326 Piano Pedagogy II

Comparison and evaluation of selected method series. Survey of elementary repertoire. Continuing study of the learning process. Philosophical and business aspects of the teaching profession. Prerequisite: CONSVTY 325.

2 hrs

[back to top](#)

CONSVTY 326 A Piano Pedagogy - Supervised Teaching II

Supervised individual and group teaching. Must be taken concurrently with CONSVTY 326. Prerequisite: CONSVTY 325A.

1 hr

[back to top](#)

CONSVTY 329 Advanced Ear Training

Study of atonal and highly chromatic tonal aural problems, complex rhythms, and recognition of instruments. Prerequisite: CONSVTY 222 or CONSVTY 222B or equivalent. May be repeated for credit.

2 hrs

[back to top](#)

CONSVTY 330 Jazz Composition

This course encourages composers to work towards developing an individual writing style and controlling the melodic line in the Jazz idiom. It includes writing assignments, and end-of-the-semester writing projects that are performed by UMKC Jazz ensembles and/or top Kansas City professionals.

3 hrs

[back to top](#)

CONSVTY 331 Orchestration I

An introduction to the instruments of the symphony orchestra and rudiments of scoring. Classification of instruments and learning to write for all transposing instruments. Prerequisites: CONSVTY. 222 or CONSVTY 222B or consent of an instructor or Music theory I-IV.

2 hrs

[back to top](#)

CONSVTY 331 A Orchestration I

An introduction to the instruments of the symphony orchestra and rudiments of scoring. Meets concurrently with CONSVTY 331; the third credit hour is required for music composition and music theory majors. Prerequisites: CONSVTY 222 or CONSVTY 222B or consent of an instructor of Music Theory I-IV.

3 hrs

[back to top](#)

CONSVTY 333 Advanced Composition

Prerequisites: CONSVTY 222 or CONSVTY 222B and CONSVTY 234 or consent of the instructor. May be repeated for credit.

3 hrs

[back to top](#)

CONSVTY 335 Electronic Music Composition

CONSVTY 335 focuses on creating an original music composition in any style utilizing the full range of digital audio or MIDI hardware, software and techniques available to the student. In addition to weekly meetings arranged with the instructor, 5-8 hours per week of studio time is required. Available each semester and may be repeated for credit. Prerequisite(s): CONSVTY 235 or CONSVTY 236 or consent of the instructor.

3 hrs

[back to top](#)

CONSVTY 349 Jazz Style And Analysis

This class will be an in-depth study of the contributions of one or a select group of outstanding jazz composers, arrangers, performers, focusing on the solo and compositional output and specific innovations associated with that individual or group. May repeat for credit. Content will vary from semester to semester. Prerequisite: CONSVTY 353A History and Development of Jazz I

2 hrs

[back to top](#)

CONSVTY 351 History Of Music In Western Civilization I

A chronological study of music in Western civilization with emphasis on periods and styles from early times to the death of Bach. Outside listening required. Prerequisite: CONSVTY 150 and successful completion of Cons. 122 highly recommended, or by consent of the instructor.

3 hrs

[back to top](#)

CONSVTY 351 WI History of Music in Western Civilization I - Writing Intensive

George Santayana once reasoned that if you cannot remember the past, you are condemned to repeat it. If that is the case, then as music students you all must ask how the music of the past can inform and change the music you make and make you better musicians. This class examines selected works from Western musical history and explores the biographical, stylistic,, and aesthetic issues they raise. It seeks to hone your analytical skills through knowledge of stylistic features while introducing you to musical debates that still rage today. Prerequisite: Must have a grade of "A" in CONSVTY 150, Completed ENGLISH 110 & ENGLISH 225, & Pass the WEPT.

3 hrs

[back to top](#)

CONSVTY 352 History Of Music In Western Civilization II

A chronological study of music in Western civilization from 1750 to the present. Outside listening required. Prerequisite: CONSVTY. 351.

3 hrs

[back to top](#)

CONSVTY 352 WI History Of Music In Western Civilization II-Writing Intensive

A chronological study of music in Western Civilization from 1750 to the present. Outside listening and writing projects required. Prerequisites: CONSVTY 150 Pass the WEPT GPA of 3.5 or higher Offered: Most semesters, at least once every academic year

3 hrs

[back to top](#)

CONSVTY 353 A History And Development Of Jazz I

History of Jazz from its beginning through the present, using recordings, films and musical examples. Emphasis on the major historical trends in Jazz, including Early Jazz, Ragtime, Dixieland, Swing, Bebop, Cool Jazz, Hard Bop, Free Jazz, Jazz-Rock Fusion and modern developments. This course makes use of the Marr Sound Archive, and is appropriate for all students throughout the UMKC Campus.

3 hrs

[back to top](#)

CONSVTY 353 B History And Development Of Jazz II

This course concentrates on the lives, bands, and works of people who have been instrumental in the development of the various jazz styles. In-depth analysis of major jazz figures including Louis Armstrong, Duke Ellington, Count Basie, Charlie Parker, Dizzy Gillespie, Thelonious Monk, Clifford Brown, Sonny Rollins, John Coltrane, Miles Davis, Wayne Shorter, and many others. This course is most appropriate for jazz Studies majors, and other Conservatory students with some jazz background and knowledge of the fundamentals of music. This course makes use of the Marr Sound Archive. Prerequisite: CONSVTY 353A and consent of the instructor.

3 hrs

[back to top](#)

CONSVTY 357 Choral Literature

Includes listening and analysis as they relate to programming and educational issues in choral ensemble setting. May be repeated for credit. Prerequisites: CONSVTY 380 or permission of instructor.

1 hr

[back to top](#)

CONSVTY 358 Band Literature

Includes listening and analysis as they relate to programming and educational issues in wind/percussion ensemble settings. May be repeated for credit. Prerequisites: CONSVTY 381 or permission of instructor.

2 hrs

[back to top](#)

CONSVTY 359 String Literature

Includes listening and analysis as they relate to programming and educational issues in string ensemble settings. May be repeated for credit. Prerequisites: CONSVTY 381 or permission of instructor.

1 hr

[back to top](#)

CONSVTY 360 Introduction To Jazz, Improvisation, And Popular Styles

A laboratory course for music students which includes a review of the basic history and concepts of jazz and other popular musical styles as well as an introduction to improvisational techniques.

1 hr

[back to top](#)

CONSVTY 362 Piano Literature II (Classical)

A survey through analysis, reading, listening, and performance of piano repertoire from 1750 (death of J.S. Bach) to 1828 (death of Schubert).

2 hrs

[back to top](#)

CONSVTY 368 Orchestral Literature for Trumpet

Intended to introduce students to the standard repertoire for orchestral trumpet; class meets once weekly for an hour. Students will be expected to prepare and play approximately a dozen works per semester, rotating parts in a full trumpet section. Prerequisite: Permission of faculty

1 hr

[back to top](#)

CONSVTY 370 Choral/Vocal Techniques

Laboratory applications of vocal pedagogy, ensemble rehearsal technique, literature selection, and performance practice. Students will participate in singing and observation activities in a large ensemble setting with an emphasis on critical analysis of technical and pedagogical issues. Prerequisites: CONSVTY 380 or permission of instructor.

2 hrs

[back to top](#)

CONSVTY 373 A Instrumental Techniques Violin-Viola

1 hr

[back to top](#)

CONSVTY 373 B Instrumental Techniques Cello-Double Bass

1 hr

[back to top](#)

CONSVTY 373 C Instrumental Techniques Flute And Clarinet

1 hr

[back to top](#)

CONSVTY 373 D Instrumental Techniques Trumpet-Horn

1 hr

[back to top](#)

CONSVTY 373 Instrumental Techniques Percussion

1 hr

[back to top](#)

CONSVTY 373 F Instrumental Techniques Oboe-Bassoon

1 hr

[back to top](#)

CONSVTY 373 G Instrumental Techniques Guitar

1 hr

[back to top](#)

CONSVTY 373 H Instrumental Techniques Trombone-Tuba

1 hr

[back to top](#)

CONSVTY 373 I Instrumental Techniques Saxophone-Wind Review

1 hr

[back to top](#)

CONSVTY 373 N Survey Of Wind And Percussion Instruments

An overview of basic wind and percussion instruments used in public school settings. Includes embouchre formation, hand position, sound production, and pedagogical issues encountered in beginning situations.

1 hr

[back to top](#)

CONSVTY 373 P Survey Of String Instruments

An overview of basic string instruments used in public school settings. Includes hand position, bowing, sound production, and pedagogical issues encountered in beginning situations.

1 hr

[back to top](#)

CONSVTY 375 A Special Percussion Methods For Music Therapy Students

Study of classroom and individual percussion techniques applicable to situations found in the field of music therapy.
Prerequisites: None.

1 hr

[back to top](#)

CONSVTY 375 B Special Percussion Methods For Dance Students

A class of percussion techniques which stresses hand drumming skills and advanced rhythmic counting and analysis.
Prerequisites: None.

1 hr

[back to top](#)

CONSVTY 376 Accompanying I

A course for piano majors designed to give experience in accompanying vocal and instrumental soloists and choral groups as well as experience in the keyboard skills of open score reading, transposition, harmonization, and reading of figured bass. Course includes lectures by members of the voice and instrumental faculty. Two class sessions and two hours of assigned accompanying per week.

2 hrs

[back to top](#)

CONSVTY 377 Accompanying II

Continuation of CONSVTY 376.

2 hrs

[back to top](#)

CONSVTY 378 Band Ensemble Techniques

Laboratory applications of wind/percussion pedagogy, ensemble rehearsal technique, literature selection, and performance practice. Students will participate in playing and observation activities in a large ensemble setting with an emphasis on critical analysis of technical pedagogical issues. Prerequisites: CONSVTY 381 and completion of large ensemble requirement or permission of instructor.

2 hrs

[back to top](#)

CONSVTY 379 String Ensemble Techniques

Laboratory applications of string pedagogy, ensemble rehearsal technique, literature selection, and performance practice. Students will participate in playing and observation activities in a large ensemble setting with an emphasis on critical analysis of technical and pedagogical issues. Prerequisites: CONSVTY 381 or permission of instructor. Registration concurrent with final semester of large ensemble requirement.

1 hr

[back to top](#)

CONSVTY 380 Basic Conducting - Choral

A study of the basic techniques of all rhythms, patterns, subdivision of beats, dynamics, starting, stopping, and giving cues through conducting in class. Elementary study of the score as to form and harmonic content will be discussed. Prerequisite: CONSVTY 222A or CONSVTY 222B.

2 hrs

[back to top](#)

CONSVTY 381 Basic Conducting - Instrumental

A study of the basic techniques of all rhythms, patterns, subdivision of beats, dynamics, starting, stopping, and giving cues through conducting in class. Elementary study of the score as to form and harmonic intent will be discussed. Prerequisite: CONSVTY 222A or CONSVTY 222B.

2 hrs

[back to top](#)

CONSVTY 382 Choral Conducting

A study of choral techniques including voice tryouts, placement, attack, release, blend, vocal development, diction, and rehearsal techniques through actual experience of conducting in class. Prerequisite: CONSVTY 380. Mus. Ed.-Choral majors must take concurrently with CONSVTY 387.

2 hrs

[back to top](#)

CONSVTY 383 Instrumental Conducting

A study of instrumental conducting techniques through actual conducting situations in instrumental groups. Primary objective will be the study of instrumental rehearsal techniques. Prerequisite: CONSVTY 381. Mus. Ed.-Instrumental majors must take concurrently with CONSVTY 386.

2 hrs

[back to top](#)

CONSVTY 385 Elementary Music Methods For Music Majors

Basic principles of curriculum planning for music education, investigation of current methods and approaches, and practical teaching experience in laboratory setting. For music majors and non-majors who have extensive musical backgrounds. Prerequisite: CONSVTY 222A or CONSVTY 222B.

3 hrs

[back to top](#)

CONSVTY 386 Secondary Music Methods - Instrumental

The organization, scheduling and feeder-system techniques of beginning band and orchestral programs through high-school level instruction. Areas of study will include curriculum, pedagogical techniques, library facilities, bidding procedures, basic instrument techniques. To be taken concurrently with CONSVTY 383.

2 hrs

[back to top](#)

CONSVTY 387 Secondary Music Methods - Choral

The organization of junior and senior high school choral classes to include methods, materials and program building. To be taken concurrently with CONSVTY 382.

2 hrs

[back to top](#)

CONSVTY 391 Basic Piano Technology

Introduces the art of tuning by ear, including the discussion of historical temperaments that preceded equal temperament: explores the action mechanism and its influence on the production of musical tone. Prerequisite: CONSVTY. 122 or consent of the instructor.

3 hrs

[back to top](#)

CONSVTY 404 Jazz Improvisation Iv

This class is a continuation of Jazz Improvisation III. This course features in-depth analyses of the blues and free improvisation focusing on rhythm changes and bi-tonal/polytonal chords. Course includes an in-depth analysis of styles from Dixieland to contemporary jazz. A strong emphasis is places on solo construction and development of individual styles. Prerequisite: CONSVTY 304 Jazz Improvisation III or consent of the instructor.

2 hrs

[back to top](#)

CONSVTY 405 Introductory Foundations In The Arts

The course will concentrate on the development of a philosophical, historical and social model to assist in understanding the complexities, strengths and problems of the arts in the context of present day education.

3 hrs

[back to top](#)

CONSVTY 406 Influence Of Music On Behavior

Explores the physiological, psychological and social influences of music on behavior. Although for music therapy practice it may also be of interest to other music majors and/or allied health professionals. Prerequisite: Completion of applied music 202 (2 hours) required of music majors. Completion of CONSVTY 128, CONSVTY 130 & CONSVTY 180 for music therapy majors or consent of the instructor.

3 hrs

[back to top](#)

CONSVTY 407 Audio Intern Program

Practical recording experience interning with Conservatory recording and music production labs with one lecture weekly. Prerequisite: consent of the instructor.

1-3 hrs

[back to top](#)

CONSVTY 408 Music In Therapy:Adults

Lecture and clinical demonstration of theory and practice of music therapy with adult clients. Prerequisites: Must take concurrently with CONSVTY 210E, Clinical Experience V.

3 hrs

[back to top](#)

CONSVTY 409 Music In Therapy: Children

Lecture and clinical demonstrations of theory and practice of music therapy with children. Prerequisites: Must take concurrently with CONSVTY 210F, Clinical Experience VI.

3 hrs

[back to top](#)

CONSVTY 410 Internship

1040 hours of supervised clinical experience at a site approved by the American Music Therapy Association, to be taken after all other course work for the music therapy degree is completed.

1-4 hrs

[back to top](#)

CONSVTY 411 A Field Experience In Music

To introduce music students to a critical examination of the complex nature of teaching, learning, children, and the music classroom/ensemble setting. Students will be expected to spend 30 hours observing, participating, planning and teaching in an assigned music classroom environment during the semester. Prerequisite: Permission of faculty

1 hr

[back to top](#)

CONSVTY 411 B Field Experience In Music

To introduce music students to secondary school settings and further develop observation, planning and teaching skills. Students will be expected to spend 30 hours in a middle/ junior high school music classroom and 30 hours in a high school music classroom for a total of 60 hours during the semester. To be taken concurrently with CONSVTY 386 OR CONSVTY 387. Prerequisites: CONSVTY 411A or permission of faculty

1 hr

[back to top](#)

CONSVTY 411 C Field Experience In Music

To introduce music students to elementary school music settings and continue to refine observation, planning and teaching skills in secondary school music settings. Students will be expected to spend 30 hours in an elementary school music classroom and 30 hours in either a middle school/junior high or high school music classroom. To be taken concurrently with CONSVTY 385. Prerequisites: CONSVTY 411B or permission of faculty

1 hr

[back to top](#)

CONSVTY 412 A Student Teaching Music In Elementary School

Observation, planning and teaching in an elementary music classroom setting. Students will be expected to spend a minimum of seven weeks teaching full-time under supervision. Prerequisite: CONSVTY 411C

4-12 hrs

[back to top](#)

CONSVTY 412 B Student Teaching Music In Secondary School

Observation, planning and teaching in a middle school/junior high or high school music classroom setting. Students will be expected to spend a minimum of seven weeks teaching full-time under supervision. Prerequisite: CONSVTY 411C

4-12 hrs

[back to top](#)

CONSVTY 417 Opera Workshop

Introduction to opera and opera performance techniques. Class will include performance of opera scenes. Prerequisite: consent of the instructor. May be repeated for credit.

2 hrs

[back to top](#)

CONSVTY 417 A Singing/Acting Training for Music Theatre

Specific training especially tailored for incoming undergraduate BA in Music/Theatre Concentration students and others interested in Introductory acting and singing/acting techniques. Recommended for Freshman or Sophomore performance track students. Prerequisite: Admission into the BA in Music/Theatre Concentration program OR permission of Instructor. An audition may be required.

2 hrs

[back to top](#)

CONSVTY 417 B Singing/Acting Training for Opera

Specific training especially tailored for undergraduate Vocal Performance majors and others interested in introduction Singing/Acting techniques for opera. Recommended for singers in their sophomore or junior years. This course IS NOT OPEN to Freshmen. Prerequisite: Admission into the BM vocal performance degree program OR permission of Instructor. An audition may be required.

2 hrs

[back to top](#)

CONSVTY 417 C Community Engagement Opera

Preparation, rehearsal and performance of an outreach opera. Offerings range from a work specifically for children, a cut-down version of a full-length opera, and occasional full-length operas in areas of repertoire not featured in the main-stage opera season. Performed off campus in conjunction with the student opera-lovers organization, Bravi. Prerequisite: Audition (Generally held during the first two weeks of the fall Semester).

2 hrs

[back to top](#)

CONSVTY 417 D Music Theatre Review/Scenes

Preparation, rehearsal and performance of an existing or original review and/or scene work. Productions will vary from year to year. Existing works may be performed if and only if the music theatre budget allows for proper licensing, rights and rentals. Performances of final production projects may occur off campus. Prerequisite: Successful completion of CONSVTY 417A Singer/Actor Techniques for Music Theatre or permission of instructor. (Audition may be required.)

2 hrs

[back to top](#)

CONSVTY 417 Scene Study

Preparation, rehearsal and performance of scenes from opera, operetta and music theatre. Scenes will be determined and assigned based on student's needs and development. One-act operas may also occasionally be produced in this class. Prerequisite: Permission of Instructor. Audition may be required.

2 hrs

[back to top](#)

CONSVTY 417 F Advanced Opera Workshop

Singer/Actor techniques, dramatic preparation of arias, audition techniques, recitative and role study. Prerequisite: Undergraduates: Successful completion of CONSVTY 417B and permission of Voice teacher highly recommended, as several areas and a role study project will be required for work in class.

2 hrs

[back to top](#)

CONSVTY 421 A Music Theory Review For Graduate Students

An intensive review with emphasis placed on analysis. Open to graduate students only. MAY NOT BE USED ON A PLANNED PROGRAM.

1-3 hrs

[back to top](#)

CONSVTY 421 B Ear Training And Solfege For Graduate Students

An intensive review of ear training and sight singing. Open to graduate students only. MAY NOT BE USED ON A PLANNED PROGRAM.

1-3 hrs

[back to top](#)

CONSVTY 423 Business Jazz And Commercial Music

An introduction to the various elements of the music industry, including production, marketing, unions, contracts, broadcasting, licensing agreements and copyrights.

3 hrs

[back to top](#)

CONSVTY 424 Acoustics

Study of the propagation of sound, the psychology and physiology of hearing, the acoustics of instruments, and of rooms, and tuning systems. Available for graduate credit.

3 hrs

[back to top](#)

CONSVTY 425 A Arranging For Choral Groups

Practice in transcribing vocal music of the current pop idiom. Analysis and writing in contemporary harmonic idioms. Stylistic analysis of solo and choral writing in operettas and musical plays. Scoring for mixed voices, men's voices, and women's voices. Prerequisite: CONSVTY 222A or CONSVTY 222B.

2 hrs

[back to top](#)

CONSVTY 425 B Arranging Instrumental

Prerequisite: CONSVTY 222 or CONSVTY 222B or recommendation of an instructor of Music Theory I-IV.

2 hrs

[back to top](#)

CONSVTY 426 B Jazz Arranging For Small Ensembles

This course will teach the art of Calligraphy as well as the techniques of arranging and orchestration for small jazz ensembles for up to five horns. The course will also include an in-dept study of basic voicings, instrumental sonorities, and some extended forms using intensive listening and score study. UMKC combos, or top Kansas City professionals, will perform final assignments. Prerequisite: CONSVTY 222 Music Theory IV or consent of the instructor.

2 hrs

[back to top](#)

CONSVTY 426 D Jazz Arranging For Big Bands

This course is a continuation of Jazz Arranging for small ensembles. It will cover the basics of arranging and orchestration techniques for big bands. It includes an in-depth study of basic voicing and instrumental sonorities using intensive listening and score study. The students will have a chance to hear their final arrangements performed at the end of the semester by the Concert Jazz Band. Prerequisite: CONSVTY 426B

2 hrs

[back to top](#)

CONSVTY 427 18Th Century Counterpoint I

Analysis and writing in 18th century style and forms including canon, invention and fugue. Prerequisite: CONSVTY 222 or CONSVTY 222B or recommendation of an instructor of Music Theory I-IV.

2 hrs

[back to top](#)

CONSVTY 428 Contemporary Harmonic/Contrapuntal Style

Analysis and writing in contemporary styles. Prerequisite: CONSVTY 222 or recommendation of an instructor of Music Theory I-IV

3 hrs

[back to top](#)

CONSVTY 431 Orchestration III

A course for composition majors. A detailed study of the scores of Debussy, Ravel, Bartok, Stravinsky, Berg, and others, with their application. Combining the full orchestral forces with voices, solo and choral. May be repeated for credit. Prerequisite: CONSVTY 331A or consent of the instructor.

2 hrs

[back to top](#)

CONSVTY 433 Composition Recital

Preparation and performance of the student's original compositions at one or more concerts sponsored by UMKC Conservatory of Music, with a total of 50 to 60 minutes performance time. Prerequisite: 6 hours of CONSVTY 333, approval of major status by the Composition Division, and consent of the instructor.

3 hrs

[back to top](#)

CONSVTY 434 CC The Practice and Study of Creativity

A team-taught, multidisciplinary cluster course for undergraduate students that fosters awareness of the nature and power of students' creativity. Approximately one third of the class covers current literature on the creative process in general and in the arts. The remainder of the class utilizes the arts as a catalyst for students to design and implement creative group and individual projects that foster communication, remove barriers to creativity and combine creativity with discipline toward a common result. There are neither prerequisites nor expectations of arts-related abilities. The ideal class consists of 4-6 students from each of 3 areas - Arts; Science/Social Science/Business/Law; and Humanities/Education/General Studies.

3 hrs

[back to top](#)

CONSVTY 435 Psychological Foundations Of Music

The study of the psychological aspects of music including perception, cognition, affect, and preference. An introduction measurement and experimental research including statistical techniques. Prerequisite: CONSVTY 260 or permission of instructor

3 hrs

[back to top](#)

CONSVTY 437 Computer Literacy For Music Teachers

Computing skills for the music teacher. Study of the computer as a tool for music majors who will teach in public school music classes, direct ensembles, or teach at the college or university level. Hands-on practice with file creation and editing, graphics and character set generation, data analysis, preparation of computer based instruction, and data retrieval. for upper level undergraduate and graduate students.

3 hrs

[back to top](#)

CONSVTY 440 Jazz Keyboard Techniques I

Class piano study of accompanying in basic jazz styles; technique (arpeggiated seventh chords, major, minor and diminished); scales (pentatonic, dorian, phrygian, lydian, mixolydian); advanced harmonizations and resolutions in all major keys; modulations from full diminished seventh chords; introduction to American song literature for sight reading and performance (Arlen, Ellington, Gershwin, etc.); harmonization at sight from chord sheets. Prerequisite: Completion of piano proficiency or consent of instructor.

2 hrs

[back to top](#)

CONSVTY 441 Jazz Keyboard Techniques II

A continuation of CONSVTY 440. Prerequisite: CONSVTY 440 or consent of the instructor.

2 hrs

[back to top](#)

CONSVTY 449 Introduction To Arts Administration

This course is designed to be an overview of topics of importance to arts organizations including organizational culture, leadership, marketing, media relations, fundraising, facilities management, and audience building. Students will review current literature in this area and develop a project related to their particular area of interest.

2 hrs

[back to top](#)

CONSVTY 449 A Arts Administration Practicum

This course is designed to give practical experience for students in the Introduction to Arts Administration class. The student will receive a placement with an arts organization to be determined by the instructor.

1 hr

[back to top](#)

CONSVTY 457 Vocal Literature I

Literature for the solo voice. A course covering the literature from 1600 to present times, illustrated by recordings and members of the class and the instructor. Prerequisite: upper division standing and consent of the instructor. Requirement for B.M. voice majors.

2 hrs

[back to top](#)

CONSVTY 458 Vocal Literature II

A continuation of CONSVTY 457.

2 hrs

[back to top](#)

CONSVTY 459 Advanced Choral Literature

A survey of choral literature including the music of all periods, both sacred and secular, in both small and large forms. May be repeated for credit.

3 hrs

[back to top](#)

CONSVTY 461 Piano Literature III (Romantic)

A survey through analysis, reading, listening, and performance of piano repertoire during the Romantic Period, culmination in the early 20th Century.

2 hrs

[back to top](#)

CONSVTY 462 Piano Literature IV (Post-Romantic)

A survey through analysis, reading, listening, and performance of piano repertoire from the early 20th Century to the present day.

2 hrs

[back to top](#)

CONSVTY 464 A Wind And Percussion Literature Percussion

A study of solo and ensemble literature for percussion.

2 hrs

[back to top](#)

CONSVTY 469 Organ Literature II

A survey of organ music from 1750 to the present.

2 hrs

[back to top](#)

CONSVTY 470 A Introduction To Pedagogy And Literature Woodwinds

A study of teaching techniques and materials and of solo and ensemble literature. Senior status required.

3 hrs

[back to top](#)

CONSVTY 470 B Introduction To Pedagogy And Literature Brass

A study of teaching techniques and materials and of solo and ensemble literature. Senior status required.

3 hrs

[back to top](#)

CONSVTY 470 C Introduction To Pedagogy And Literature Percussion

A study of teaching techniques and materials and of solo and ensemble literature. Senior status required.

3 hrs

[back to top](#)

CONSVTY 470 D Introduction To String Literature And Pedagogy

A study of teaching techniques and materials and solo and ensemble literature. Senior status required.

3 hrs

[back to top](#)

CONSVTY 471 Jazz/Commercial Music Pedagogy

This course is designed to develop skills in the teaching of jazz and commercial music. Students will be exposed to a variety of materials, techniques and philosophies and trained in various techniques of rehearsing and conducting jazz ensembles, including the study of scores and recordings of different styles and rehearsal of the Conservatory's jazz ensembles. Includes an emphasis on structuring jazz and studio music curriculum at the College level. Prerequisite: CONSVTY 381 Basic Conducting.

2 hrs

[back to top](#)

CONSVTY 476 Accompanying III

A course for piano majors designed to give experience in accompanying vocal and instrumental soloist and choral groups. One-hour class sessions and two hours of assigned accompanying per week.

1 hr

[back to top](#)

CONSVTY 477 Accompanying Iv

Continuation of CONSVTY 476.

1 hr

[back to top](#)

CONSVTY 483 Advanced Instrumental Conducting

A review of techniques and musical styles of literature for all levels and all media through conducting in class.

2 hrs

[back to top](#)

CONSVTY 490 Independent Study

Intensive reading, research projects, creative work, or special performance in the student's major field, selected by the student in consultation with the appropriate faculty. Prerequisite: Consent of the instructor.

1-3 hrs

[back to top](#)

CONSVTY 491 B Pedagogical Practices I Voice

2 hrs

[back to top](#)

CONSVTY 491 C Pedagogical Practices I Organ

2 hrs

Continuation of CONSVTY 140A.

1 hr

[back to top](#)

DANCE 141 B Ballet Technique And Theory I

Fundamentals of classical ballet including beginning pointe work. Non-Majors by audition.

3 hrs

[back to top](#)

DANCE 141 M Modern Dance Technique And Theory I

Techniques of Contemporary dance. Non-Majors by audition.

3 hrs

[back to top](#)

DANCE 142 B Ballet Technique And Theory II

Continuation of DANCE 141B.

3 hrs

[back to top](#)

DANCE 142 M Modern Dance Technique And Theory II

Techniques of Contemporary dance. Non-Majors by audition.

3 hrs

[back to top](#)

DANCE 213 C Men's Class I

This course is designed to meet the needs of the male dancer and will focus on developing the technique, strength, and agility needed for a professional career.

1 hr

[back to top](#)

DANCE 213 D Men's Class II

Continuation of DANCE 213A.

1 hr

[back to top](#)

DANCE 217 A Improvisation I

An introduction to the use of Improvisation as a method of discovering through problem-solving a kinesthetic body language through immediate and logical motile responses to given problems involving a body or bodies as they relate to time, space, energy, and force. For Dance majors.

1 hr

[back to top](#)

DANCE 217 B Improvisation II

The continued study of the use of improvisation as a learned skill which can be used as a vehicle for finding precompositional movement material used in making dances. For Dance majors.

1 hr

[back to top](#)

DANCE 218 A Composition I

An introduction to the fundamentals of choreography, including the development of dance compositions through the exploration and definition of specific studies, including floor design, shape design, motion design, and time design. For Dance majors.

2 hrs

[back to top](#)

DANCE 218 B Composition II

The continued exploration of the fundamentals of choreography including locomotion studies, categories of motion, axial movement and sequential and non-sequeter movement. Prerequisite: DANCE 218A.

2 hrs

[back to top](#)

DANCE 241 B Ballet Technique And Theory III

Continuation of DANCE 141B, DANCE 142B on the intermediate level including Beginning Pas de Deux.

3 hrs

[back to top](#)

DANCE 241 M Modern Dance Technique And Theory III

Continuation of DANCE 141M, on the intermediate level.

3 hrs

[back to top](#)

DANCE 242 B Ballet Technique And Theory Iv

Continuation of DANCE. 141B, DANCE 142B on the intermediate level including Beginning Pas de Deux.

3 hrs

[back to top](#)

DANCE 242 M Modern Technique And Theory Iv

Continuation of DANCE 142M, on the intermediate level.

3 hrs

[back to top](#)

DANCE 250 Labanotation I

An introduction to basic theory and elementary skills of labanotation.

2 hrs

[back to top](#)

DANCE 260 Jazz I

A study of Western Theatrical Dance focusing on Jazz and Musical Theater dance forms.

1 hr

[back to top](#)

DANCE 261 Jazz II

The continued study of Western Theatrical Dance focusing on Jazz and Musical Theater dance forms.

1 hr

[back to top](#)

DANCE 301 Advanced Movement Analysis For Dancers

A study of the body which relates specifically to the needs of dancers. Emphasis is placed upon an understanding of the skeletal system, the muscular system, their specific importance to dance technique, and dance injuries and prevention. Three hours lecture per week. Prerequisites: Dance major.

3 hrs

[back to top](#)

DANCE 302 Fundamentals Of Body Alignment

An introduction to the fundamentals of body alignment, including therapeutic exercises which focus on muscular imbalances and injury prevention. Emphasis is placed upon developing total body strength and flexibility. Required for dance majors or by permission of instructor. Prerequisite(s) DANCE 301 Advanced Movement Analysis for Dancers.

1 hr

[back to top](#)

DANCE 303 Pilates

A non-impact body conditioning method based on principles of abdominal and scapular stabilization. Introduction to the essential and intermediate mat work, which consists of non-weight bearing exercises. Designed to give the student an understanding of the principles and muscular emphasis behind the pilates method. Proper alignment, full range of motion, and patterned breathing will be emphasized. Prerequisite: DANCE 301 and DANCE 302

1 hr

[back to top](#)

DANCE 305 History Of Dance I

A study of the development of Western Theatrical Dance from the Renaissance Court Dances to 20th Century contemporary ballet. Outside reading and written reports required. Offered: Fall.

3 hrs

[back to top](#)

DANCE 306 History Of Dance II

A study of the development of Modern Dance from the late 19th Century through the 20th Century. Outside reading and written reports required. Offered: Winter.

3 hrs

[back to top](#)

DANCE 309 B Company

A repertory company comprised of dance majors, selected guest artists and dance faculty for the preparation and public performance of choreographic works, concerts and lecture/ demonstrations directed by resident faculty and guest choreographers.

1 hr

[back to top](#)

DANCE 310 A Pirouette Class I

This course is designed to teach and develop the technical skills needed for turns. It will be offered for 200-400 level dance students and will focus on intermediate and advanced turns and turn combinations. This specialized class will allow the student to focus and work on turning techniques and identify problem areas such as spotting, balance, force and control. Prerequisites: DANCE 241B (ballet) or DANCE 241M (modern) or higher

1 hr

[back to top](#)

DANCE 310 B Pirouette Class II

Continuation of DANCE 310A. Prerequisites: DANCE241B (ballet) or DANCE 241M (modern) or higher.

1 hr

[back to top](#)

DANCE 313 A Partnering/Pas De Deux I

This course is designed to meet the needs of the 300 level ballet student and will teach the elementary skills of partnering such as turns, lifts, promenades, and balances. Prerequisites: DANCE 341B Ballet Technique and Theory V or higher.

1 hr

[back to top](#)

DANCE 313 B Partnering/Pas De Deux II

Continuation of DANCE 313A. Prerequisites: DANCE 341B Ballet Technique and Theory V or higher.

1 hr

[back to top](#)

DANCE 316 A Performance Techniques I

A four-semester class rotation focusing on performance techniques of folk and character dances of various countries, traditional vocabulary of pantomime gestures, and theatrical dance forms including tap and jazz styles.

1 hr

[back to top](#)

DANCE 316 B Performance Techniques II

A four-semester class rotation focusing on performance techniques of folk and character dances of various countries, traditional vocabulary of pantomime gestures, and theatrical dance forms including tap and jazz styles.

1 hr

[back to top](#)

DANCE 319 A Composition III

An intermediate course in Dance Composition focusing on choreographing works through the exploration of movement such as theme and variation, gesture, chance dance, poetry and narration, costume and musical forms as structural frameworks for making dances. Prerequisite: DANCE 218B.

2 hrs

[back to top](#)

DANCE 319 B Composition IV

A continuation of the intermediate course in Dance Composition focusing on choreographing solo and group works in the Ballet and Modern idioms, as well as preparation of works for the senior recital. Prerequisite: DANCE 319A.

2 hrs

[back to top](#)

DANCE 341 B Ballet Technique And Theory V

Continuation of DANCE 242B on the advanced level. (Modern emphasis students - minimum of 3 classes weekly required (MWF) (2 hrs.).

3 hrs

[back to top](#)

DANCE 341 M Modern Dance Technique And Theory V

Continuation of DANCE 242M on the advanced level. (Ballet emphasis students - minimum of 3 classes weekly required (MWF) 2 hrs.)

3 hrs

[back to top](#)

DANCE 342 B Ballet Technique And Theory Vi

Continuation of DANCE 341B.

3 hrs

[back to top](#)

DANCE 342 M Modern Dance Technique And Theory Vi

Continuation of DANCE 341M.

3 hrs

[back to top](#)

DANCE 403 A Modern Technique For Non-Majors

1 hr

[back to top](#)

DANCE 404 A Ballet Technique Non-Majors I

The applied and theoretical study of ballet including ballet pedagogy, analysis of movement and traditional ballet vocabulary. Outside reading and written reports required.

1 hr

[back to top](#)

DANCE 404 B Ballet Technique For Non-Majors II

The applied and theoretical study of ballet, including ballet pedagogy, analysis of movement, and traditional ballet vocabulary. Outside reading and written reports required.

1 hr

[back to top](#)

DANCE 405 A Modern Dance Repertory I

Modern Dance Repertory is an advanced course for modern dance majors to study and perform the repertoire and works of renowned contemporary choreographers. It is a parallel to the Ballet Variations course which teaches the repertoire of ballet master works. Prerequisites: DANCE 341M Modern Dance Technique and Theory V or higher

1 hr

[back to top](#)

DANCE 405 B Modern Dance Repertory II

Continuation of DANCE 405A. Prerequisites: DANCE 341M Modern Dance Technique and Theory V or higher.

1 hr

[back to top](#)

DANCE 405 C Modern Dance Repertory III

Continuation of DANCE 405B. Prerequisite(s): DANCE 341M Modern Dance Technique and Theory V or higher.

1 hr

[back to top](#)

DANCE 405 D Modern Dance Repertory IV

Continuation of DANCE 405C. Prerequisite(s): DANCE 341M Modern Dance Technique and Theory V or higher.

1 hr

[back to top](#)

DANCE 413 A Advanced Pas De Deux I

This course is designed to meet the needs of the 400 level ballet student and will teach advanced pas de deux skills. The students will have opportunity to learn pas de deux from great ballets which will give students a hands-on experience, perfecting their partnering skills. Prerequisites: DANCE 441B Ballet Technique and Theory VII or higher.

1 hr

[back to top](#)

DANCE 413 B Advanced Pas De Deux II

Continuation of DANCE413A. Prerequisites: DANCE 441B Ballet Technique and Theory VII or higher.

1 hr

[back to top](#)

DANCE 414 A Men's Variations I

Men's Variations is designed for 400 level male ballet dancers. Students will have the opportunity to learn and perform renowned variations from the Romantic, Classical, and Neo-Classical periods of ballet. This class will give the male student a true professional coaching experience in their training as they prepare for stage. Prerequisite: DANCE 342B Ballet Techniques and Theory VI

1 hr

[back to top](#)

DANCE 414 B Men's Variations II

Continuation of DANCE 414A Prerequisite: DANCE 342B Ballet Techniques and Theory VI

1 hr

[back to top](#)

DANCE 415 A Variations I

Variations is designed for the 400 level ballet student. The course will teach female variations to the advanced students and the students will have the opportunity to learn and perform renowned variations from Romantic, Classical and Neo-Classical periods of ballet. The students will also work each class in traditional tutus in order to give them a true professional experience in their training as they prepare for the stage. Prerequisites: DANCE 342B Ballet Technique and Theory VI

1 hr

[back to top](#)

DANCE 415 B Variations II

Continuation of DANCE 415A. Prerequisites: DANCE 342B Ballet Technique and Theory IV

1 hr

[back to top](#)

DANCE 415 C Variations III

Continuation of DANCE 415B. Prerequisite(s): DANCE 342B Ballet Technique and Theory VI or consent of instructor.

1 hr

[back to top](#)

DANCE 415 D Variations IV

Continuation of DANCE415C.Prerequisite(s): DANCE 342B Ballet Technique and Theory VI or consent of instructor.

1 hr

[back to top](#)

DANCE 416 A Performance Techniques III

A four-semester class rotation focusing on performance techniques of folk and character dances of various countries, traditional vocabulary of pantomime gestures, and theatrical dance forms including tap and jazz styles.

1 hr

[back to top](#)

School of Dentistry

School of Dentistry Courses Dentistry (DENT) Dental Hygiene (DENHY)

DENT-HYG 3000 Dental Morphology And Occlusion

This course is designed to provide the dental hygiene student with a sound knowledge base in dental morphology and occlusion through discussion and laboratory experiences. Students will learn to identify anatomical structures of each tooth and be able to communicate these findings effectively with colleagues and patients in both verbal and written forms. Throughout the course, the clinical application and relevance of dental morphology in the practice of dental hygiene will be emphasized. Special consideration will be given to root morphology as it relates to periodontal instrumentation. Activities will include: identification of extracted teeth, terminology exercises, dental charting experiences and identifying classifications of occlusion.

2 hrs

[back to top](#)

DENT-HYG 3020 Dental Radiology

Lecture and clinical practice of dental radiographic procedures. Topics included are radiation hygiene, taking and developing radiographs, processing and mounting films, and radiographic interpretation. Clinical experience is required throughout the remaining semesters.

2 hrs

[back to top](#)

DENT-HYG 3080 Introduction To The Preventive Practice Of Dental Hygiene

This course will introduce theories and rationales for basic clinical dental hygiene care (infection control, oral examination and fundamentals of instrumentation). In diverse populations. Practical application of specific clinical skills will be introduced in the classroom and applied in the clinical setting, DENT-HYG H3080L.

4 hrs

[back to top](#)

DENT-HYG 3080 L Preclinical Dental Hygiene

Practical application of the fundamental concepts and principles of patient care in a diverse society discussed in DENT-HYG H3080. Emphasis is placed on patient assessment and techniques of instrumentation for examination and dental hygiene treatment. After the student has mastered basic skills, he/she will begin to provide direct dental hygiene services.

2 hrs

[back to top](#)

DENT-HYG 3200 Histopathology

An introduction to the principles of general pathology and organ system pathology including inflammation, immunity and diseases of immune origin, genetic diseases, neoplasia with emphasis on oral cancer, and diseases of selected organ systems including pulmonary, cardiovascular, hematopoietic, endocrine, skeletal, gastrointestinal, hepatic, pancreatic and other systems as time permits.

3 hrs

[back to top](#)

DENT-HYG 3210 Applied Biochemistry

This course is designed to build upon previous knowledge of chemistry, biology, and physiology as a basis for understanding principles in biochemistry. Presented through a self-paced online format, course content is selected to provide the foundation knowledge in biochemistry needed for subsequent courses in nutrition, pathology, and other health related topics.

2 hrs

[back to top](#)

DENT-HYG 3220 Dental Biomaterials

This course is designed to provide the dental hygiene student with a sound knowledge base in the science and manipulation of dental biomaterials. Through lectures and laboratory session, the student's ability to make clinical judgments regarding the application of dental biomaterials and the ways in which materials react to the oral environment will be enhanced.

2 hrs

[back to top](#)

DENT-HYG 3260 Principles Of Periodontics

This course in Periodontics will cover the biological and clinical aspects of periodontal health and pathology. An introduction to the supporting structures of the teeth will provide the foundation of understanding pathogenesis, histopathology and subsequent therapeutic treatment of periodontal diseases. The dental hygienist's role in recognition, prevention and treatment of periodontal diseases and maintenance of periodontal health is examined.

3 hrs

[back to top](#)

DENT-HYG 3280 C Dental Hygiene Clinic I

Students will further develop clinical skills and techniques learned in DENT-HYG 3080L and previous courses by providing services to patients.

3 hrs

[back to top](#)

DENT-HYG 3285 Seminar In Dental Hygiene I

This course expands on theory and background presented in DENT-HYG 3080. Topics include expanding dental hygiene skills required for the care of patients and continued development of problem solving abilities and critical thinking skills as they relate to the provision of dental hygiene care. Provide students with a more insightful view of the role of the dental hygienist in the delivery of comprehensive patient care. Offered: Winter

2-3 hrs

[back to top](#)

DENT-HYG 3300 Radiographic Interpretation

The purpose of the course is to introduce interpretation of radiographic anomalies and pathology just prior to your clinical experience. Since there was little time for an emphasis on radiographic interpretation during your second year radiology course, this lecture and participation course supplement clinic instruction in diagnosis of the patient's oral needs and formulation of a treatment plan. Upon completion of this course, you should be able to recognize simple pathology and radiographic anomalies. Offered: Winter

0.5 hrs

[back to top](#)

DENT-HYG 3320 Oral Health Education

The purpose of this course is to prepare the beginning dental hygiene student to effectively fulfill the role of a dental health educator and initiator of preventive oral health programs for individuals of diverse backgrounds and needs. The steps involved in the development of an individual oral health program will be presented, as well as information on varying oral health products. The student will then have the opportunity to apply course concepts in the clinical setting.

2 hrs

[back to top](#)

DENT-HYG 3340 Principles Of Public Health

This course introduces the student to principles of public health, the field of epidemiology, health care delivery systems, public health terminology and teaching methodologies to use in culturally diverse community settings. Students will have the opportunity to assess a target population, plan, implement and evaluate appropriate programs. Students will also apply theories and skills of communication and education while preparing and presenting oral health education programs for various population groups. The material presented in this course will extend to the subsequent course DH 4220 (Community Oral Health field Experiences).

2 hrs

[back to top](#)

DENT-HYG 4020 Local Anesthesia And Pain Control

This course is designed to prepare dental hygiene students for the safe, effective administration of local anesthesia and nitrous oxide sedation. Included are content areas in anatomy, physiology, pharmacology, and emergency management as they relate to the administration of local anesthetics, nitrous oxide, and pain control. Laboratory sessions are structured to develop actual experiences in administration of local anesthetics and nitrous oxide. Various mechanisms for pain control are also covered. Methods of presentation include lecture, large group discussion, laboratory and clinical participation.

3 hrs

[back to top](#)

DENT-HYG 4040 Introduction To Research And Instruction

Introduction to research and instruction. The student will be introduced to the idea of scientific inquiry and the research process, in particular as it relates to securing content for teaching. Students will evaluate the usefulness of various databases as well as conduct productive database literature searches. Instructional topics will focus on current technologies such as: production of electronic presentations and handout materials, exporting images for inclusion in print and electronic educational presentation, and development of presentation skills to effectively conduct an educational session.

1-2 hrs

[back to top](#)

DENT-HYG 4050 Peridontics II

This course in Periodontics will provide an introduction to Phase II and III therapy. Periodontal decision making will be emphasized. The dental hygienists' role in recognition, prevention and treatment of periodontal diseases and maintenance of periodontal health is further examined. Prerequisite: DENT-HYG 3620 Principles of Periodontics. Offered: Winter

2 hrs

[back to top](#)

DENT-HYG 4060 C Dental Hygiene Clinic II

The student will continue to develop competency in basic dental hygiene skills. Principles of periodontal techniques, such as non-surgical periodontal therapy, supportive treatment procedures and comprehensive patient care will be emphasized. The student will be asked to demonstrate professional management skills and productivity.

2 hrs

[back to top](#)

DENT-HYG 4065 Seminar In Dental Hygiene II

This seminar course is offered in conjunction with DH 4060C, Dental Hygiene Clinic II and is part of the clinical education continuum. Emphasis will be placed on developing advanced clinical techniques, instrument sharpening, intra-oral imaging, adjunctive dental hygiene treatment, and increased problem-solving in the clinical setting.

1 hr

[back to top](#)

DENT-HYG 4080 Introduction To Research Design

This is a lecture/discussion course with assigned exercises in the research process and evaluating scientific studies. Students will apply basic principles of research design and methodology to the critical analysis of contemporary health related literature focusing on the review and evaluation of literature as it relates to the practice and profession of dentistry with the intent of utilizing an evidence-based approach to care.

2 hrs

[back to top](#)

DENT-HYG 4100 Pharmacology

Discussion of pharmacotherapeutic drugs, their classification, applications, administration, adverse effects, and interactions.

3 hrs

[back to top](#)

DENT-HYG 4120 Seminar In Dental Hygiene

This course is offered in conjunction with DENT-HYG 4120C Preventive Dentistry Clinic III, and is a part of the clinical education continuum. Major content emphasis includes developing problem solving abilities, managing patients with special needs and diverse backgrounds (oncology, gerontology and physical disabilities), and managing emergencies in the dental office. Skills in preventive treatment program planning and evaluation of patient care will be reinforced through community experiences and self reflection.

2 hrs

[back to top](#)

DENT-HYG 4120 C Dental Hygiene Clinic III

The student will continue to develop competency in intermediate dental hygiene skills. Principles of periodontal techniques, such as root planning, pain control and supportive techniques will be stressed. Comprehensive treatment planning and implementation of comprehensive care to a diverse patient population will be the focus of this course. Continued development of professionalism, management and critical thinking skills will be emphasized.

4 hrs

[back to top](#)

DENT-HYG 4210 Practice Management

Current relevant issues impacting dental hygiene practice are discussed. Dental practice economics, communicating and management in a diverse society are included. Also included in this course is the study of jurisprudence as it relates to the practice of dental hygiene.

3 hrs

[back to top](#)

DENT-HYG 4220 Community Oral Health Field Experiences

In this course the student will participate in service learning activities which require application of dental public health principles. Students will have the opportunity to work with a variety of diverse populations. Projects will engage the students in assessing a target population, planning, implementing and evaluating appropriate programs. Students will also apply theories and skills of communication and education while preparing and presenting oral health education programs for various diverse population groups.

2 hrs

[back to top](#)

DENT-HYG 4230 Principles Of Public Health

This course introduces the student to principles of public health, the field of epidemiology, health care delivery systems, public health terminology and teaching methodologies to use in culturally diverse community settings. Students will have the opportunity to assess a target population, plan, implement and evaluate appropriate programs. Students will also apply theories and skills of communication and education while preparing and presenting oral health education programs for various population groups. The material presented in this course will extend to the subsequent course DH 4220 (Community Oral Health field Experiences).

2 hrs

[back to top](#)

DENT-HYG 4240 Ethics In Professional Practice

Study of ethics and ethical issue related to the practice of dental hygiene within a diverse society. Includes application of ethical principles to real-life situations.

1 hr

[back to top](#)

DENT-HYG 4260 Senior Seminar

This course serves as a means of synthesizing information from all courses in the dental hygiene curriculum and applying content to patient cases and practice management issues. Case-based learning (CBL) will be utilized to review significant content areas as well as to introduce subjects not previously encountered during previous clinical experiences. Case based/problems based learning (PBL) with faculty facilitation will assist students in managing patient cases. This course is also designed to assist in preparing senior dental hygiene students for the written and clinical examinations required for licensure.

2 hrs

[back to top](#)

DENT-HYG 4260 C Dental Hygiene Clinic Iv

The student will have the opportunity to reach competency in all clinical skills. Emphasis will be placed on decision-making, problem-solving, critical thinking, appointment and time management. The course will focus on comprehensive dental hygiene care to a diverse population.

4 hrs

[back to top](#)

DENT-HYG 4320 Special Patient Care Practicum

Through outside agency affiliation, students will have the opportunity of applying the course content from Principles of Public Health, Dental Health Education and DHE-Practicum. Sites for participation include hospitals, nursing homes, and residential and day activity centers for developmentally disabled. Offered: TBA

2-4 hrs

[back to top](#)

DENT-HYG 4330 Introduction To Oncology And Practicum

Field experience designed to provide the student with personal observation of oncology patients undergoing therapy; chemotherapy for various cancers and surgical treatment and/or radiation therapy for head and neck cancers. A limited opportunity will be provided to assist in treatment planning for oral/dental needs, oral hygiene education, and observation of a head and neck cancer surgery. Laboratory experience will include construction of custom fluoride carriers, demonstration of oral hygiene products and an overview of hospital administration, procedures and in-patient charts, basic oncologic principles and the psychological ramifications of cancer, therapy and rehabilitation. Offered: TBA

2-4 hrs

[back to top](#)

DENT-HYG 4340 Community Dentistry Practicum

The community dentistry practicum provides the student with an opportunity for personal exploration of the many settings of community dentistry. These experiences may lead the student into clinical activities or design and implementation of dental health educational programs. The student will have the opportunity to work with various community health professionals in the Kansas City area. The student will need reliable transportation and should expect some experiences to require travel. Possibilities for practicum experiences are broad and will be defined after an initial assessment of the student's interest and goals. An individual learning contract will be written following the assessment. The student will be required to meet as a group periodically throughout the semester.

2-4 hrs

[back to top](#)

DENT-HYG 4350 Periodontal Therapy Practicum

This course is designed for the dental hygiene student who desires increased experience with periodontal skills. The course involves practical experience in the graduate periodontics clinic working with a periodontology resident. Two clinic sessions per week; one seminar scheduled weekly. Offered: Winter Semester online, onsite TBA

1-4 hrs

[back to top](#)

DENT-HYG 4360 Practice Management Practicum

Current relevant issues impacting dental hygiene practice are discussed. Dental practices, economics, communication and management are included. Practical application of course would include the development of a dental office operating manual. Offered: TBA

3 hrs

[back to top](#)

DENT-HYG 4380 Research Practicum

This course provides an opportunity to apply the content in the previous course Introduction to Research Design. The protocol identified may be a basic science, clinical or community dental hygiene problem. The field experience may deal with a basic or applied, descriptive or explanatory research question. Offered: TBA

2-4 hrs

[back to top](#)

DENT-HYG 4500 Seminar On Issues In Higher Education For Health Professionals

This course is designed to introduce the student to issues encountered in higher education. Topics included are curriculum vitae and resume writing, interviewing skills, accreditation, promotion and tenure, portfolios and outcomes assessment, dental hygiene theory development, and various other topic areas. Offered: Winter Semester

2-4 hrs

[back to top](#)

DENT-HYG 4600 Advanced Clinic Concepts And Practicum

This course is designed for the graduate and degree completion dental hygiene student. It will expand on the student's basic knowledge of the dental hygiene process of care. Current scientific literature related to the topic in dental hygiene and oral health will be examined to enhance background knowledge related to the dental hygiene process and foster an attitude of critical analysis and life long learning.

2-4 hrs

[back to top](#)

DENT-HYG 4620 Principles In Dental Hygiene Education

Through individualized instruction, the student will have an introduction to educational concepts in preparation for student teaching. Topics included are goals and objectives, curriculum and course design, development of course syllabi, teaching/learning strategies, use of technology in teaching, basic principles of testing, micro-teaching demonstration, and student and self evaluation. It is recommended that this course be taken in the same semester as DENT-HYG 4680. Offered: Fall semester on-line only.

3 hrs

[back to top](#)

DENT-HYG 4625 Dental Hygiene Administration

This course is designed for the post-certificate dental hygiene student. Major topic areas include accreditation of dental hygiene programs, the impact of National and State Board examinations on curriculum planning, selective admissions policies and procedures, faculty evaluation, promotion and tenure and students'rights. Offered: TBA

2 hrs

[back to top](#)

DENT-HYG 4630 Practicum In Dental Hygiene Administration

Under the supervision of the Director of Dental Hygiene, the student will gain actual experiences in the daily administration of a dental hygiene program. The student may contract for responsibilities such as admissions, budget preparations, course scheduling, report writing and student academic counseling. Offered: TBA

2-4 hrs

[back to top](#)

DENT-HYG 4635 Practicum In Clinical Supervision

Under the supervision and permission of the Dental Hygiene Clinical Supervisor, the student will gain actual experience in the duties involved in coordinating the clinical education of a dental hygiene student. The student may contract for responsibilities such as, coordinating mock board examinations, maintaining student clinical records, developing faculty and student clinic schedules and report writing. Offered: TBA

2-4 hrs

[back to top](#)

DENT-HYG 4640 Student Teaching And Conference I

Under the direction of a supervising professor, the student may select teaching experience in the classroom areas of their choice. The student develops behavioral course objectives, comprehensive lesson plans, test and examination items, classroom presentations, and prepares student evaluations in the selected classroom teaching areas. The student may select teaching assignments in one of the developed externship student teaching programs. Conferences will be held in conjunction with the course. Students must complete DENT-HYG 4620 prior to enrolling in this course.

2-4 hrs

[back to top](#)

DENT-HYG 4650 Student Teaching And Conference II

The student will continue to develop teaching skills in laboratory and/or classroom areas as selected by the student under the direction of a supervising professor. Students must complete DENT-HYG 4640 prior to enrolling in this course. Offered: TBA, on-line and on-site

2-4 hrs

[back to top](#)

DENT-HYG 4660 Independent Study In Dental Hygiene

This course is designed for the dental hygiene student who desires independent study of a particular problem or area of interest in dental hygiene education. The student must have prior approval of the Director of Dental Hygiene before enrolling in this course. Offered: Fall, winter, summer.

1-4 hrs

[back to top](#)

DENT-HYG 4680 Dental Hygiene Clinical Instruction I

Students must complete DENT-HYG 4640 prior to enrolling in this course. Continued development of competency as a clinical instructor under the supervision of the dental hygiene faculty. Requires a half-day in clinic student instructor. Offered: Fall on-line, on-site TBA

2-4 hrs

[back to top](#)

DENT-HYG 4685 Dental Hygiene Clinical Instruction II

A continuation of DENT-HYG 4680 Dental Hygiene Clinical Instruction I. Under the supervision of the dental hygiene faculty, students may continue to develop skills as a dental hygiene clinical instructor. Students must complete DENT-HYG 4680 prior to enrolling in this course. Offered: TBA

1-4 hrs

[back to top](#)

DENT-HYG 4750 Geriatric Oral Health Promotion And Education

This course is designed to enhance knowledge, attitudes, behavior and clinical care directed at geriatric oral health promotion and education. It is designed for dental hygienists and other health care providers who work with the older adult. Teaching methods include seminar, self-instructional modules and a community-based practicum. Offered: Fall Semester

1-5 hrs

[back to top](#)

School of Education

School of Education Courses Counseling Psychology and Counselor Education (CPCE)

CPCE 420 Counseling Techniques For Educators & Other Human Services Personnel

Principles of effective communication and their evaluation. Techniques of listening, verbal and non-verbal communication and empathy will be emphasized, as well as crisis intervention.

3 hrs

[back to top](#)

Curriculum and Instruction (EDCI)

EDUC-C&I 497 Individual Study

Guided study of a selected topic in curriculum and instruction. Prerequisite: Permission of instructor.

Methods of administering first aid in case of accident or sudden illness; bandaging; resuscitation; and caring for wounds and injuries. Safety in schools will be stressed. (Elective).

1 hr[back to top](#)**PHYS-ED 207 Outdoor And Leisure Pursuits**

Designed to acquaint students with opportunities for leisure and recreational activity in the outdoors. Emphasizes safety measures and planning skills as well as development of particular movement skills and knowledge about associated wildlife.

2 hrs[back to top](#)**PHYS-ED 212 Self Defense**

Study in the theory of self defense. Content focuses on: technique for eliminating dangers from daily living, methods for recognizing and avoiding dangers, and skills and strategies for employing physical defense when necessary.

1 hr[back to top](#)**PHYS-ED 312 Physical Education For The Elementary Schools**

This course identifies the physical education needs of the elementary school child in relation to his total development with emphasis on methods and materials. Must be taken concurrently with PHYS-ED 312L. Prerequisite: Elementary Education Major Required.

2 hrs[back to top](#)

PHYS-ED 312 L Laboratory Experiences In Physical Educ For The Elementary School

This course consists of laboratory teaching experiences, with skill theme combinations of games, gymnastics, dance & fitness. Must be taken concurrently with PHYS-ED 312.

1 hr

[back to top](#)

PHYS-ED 323 Nutrition For Fitness And Sport

This course examines the role nutrition, complemented by exercise, may play in the enhancement of fitness and sport performance. Considerable attention will be devoted to the use of nutritional ergogenic aids with reference to athletic performance. Prerequisite: LS-PHYSICS 117, LS- ANATO 118, LS-ANATO 118L or permission of instructor. Offered: Fall and Winter.

3 hrs

[back to top](#)

PHYS-ED 361 WI Sociology Of Sport And Exercise

The critical examination of the function of sport in the American culture, in an interdisciplinary fashion, with a focus on the contemporary scene. The work of the course will include readings on sociological issues of sport and exercise, the writing of mini-research papers, and a long paper with a presentation. Prerequisite: Introduction course in sociology Offered: MW 1pm-2:15 (Winter)

3 hrs

[back to top](#)

PHYS-ED 389 Special Topics In Health And Physical Education

This course is designed to offer a topic which is not available in the regular course offerings. Topics, instructors and prerequisites to be listed in the semester bulletin.

1-3 hrs

[back to top](#)

PHYS-ED 401 Health Teaching In The Schools

Study of school health programs with emphasis on methods and materials for health and safety instruction in grades K-8. Must be taken concurrently with PE 401L. Prerequisites: Elementary or Physical Education Teaching major.

2 hrs

[back to top](#)

PHYS-ED 401 L Health Teaching In The Schools Lab

Students will attain beginning level competence in skills related to teaching health in schools, including planning, preparation and presentation skills. Computer skills will be used to search internet, e-mail, and develop a computer generated presentation.

1 hr

[back to top](#)

PHYS-ED 499 Internship

Extensive experience in a practical situation under supervision of university faculty and on-site personnel. Breadth and intensity of involvement will depend on student ability. Prerequisites: Upper Division Major; consent of instructor.

3-6 hrs

[back to top](#)

Special Education (EDSP)

EDUC-SP 407 Educating Exceptional Children And Youth

An introductory course in special education concerning issues, theories, and practices for educating the exceptional student in both general and special classrooms or settings; identification and educational intervention procedures for children and adolescents with exceptionalities, including behavior disordered; learning disabled, mentally retarded, speech impaired; visually impaired, physically impaired, hearing impaired, multihandicapped and gifted.

3 hrs

[back to top](#)

Teacher Education (TE)

TCH-ED 130 Number Systems And Related Topics

This course is designed for elementary perservice teachers to meet certification requirements for a course in number theory. The course provides a constructive development of the real number system, introduces concepts from elementary number theory and applies this knowledge of quantitative systems to solve various types of problems. Prerequisites: High School Algebra and Geometry Offered: Fall Semesters

3 hrs

[back to top](#)

TCH-ED 140 Geometry For Elementary Teachers

This course is designed for elementary perservice teachers to meet certification requirements for a course in geometry. It provides a constructive development of axiomatic geometry and introduces concepts from transformation geometry. Elements of spatial sense and measurement are included and an emphasis is placed on applying this knowledge to solve various types of problems. Prerequisites: High School Algebra and Geometry Offered: Winter Semesters

3 hrs

[back to top](#)

TCH-ED 150 Foundations of Urban Education

This course is designed to introduce students to the social and philosophical issues in urban education and will include an emphasis on culture, race, class, and ethnicity as they relate to schooling in urban America. Prerequisite: Students must be accepted to the Institute for Urban Education.

3 hrs

[back to top](#)

TCH-ED 151 Introduction to Urban Education Field Experience

Introduction to Urban Education Field Experience. The field experience is intended to give students an opportunity to see the application of learning theory in authentic classroom situations. Students are encouraged to become involved in the learning of the classroom and "provide a helping hand" to the teacher. Prerequisite: Students must be admitted to the Institute for Urban Education

2 hrs

[back to top](#)

TCH-ED 152 Urban Education Seminar 1: Social Justice

Introductory seminar to the field of urban education. This seminar aligns with the other fall semester experiences and allows students an opportunity to dialogue about the possible application of their experience work as it applies to teaching in an urban school. Students will be introduced to current topics in education and society; identify, develop and enhance study strategies; observe, listen and think critically, sharpen writing skills; and work effectively in groups.

2 hrs

[back to top](#)

TCH-ED 153 Math Methods for Urban Education teachers: Number Systems

designed for elementary school teacher. A constructive development of the real number system beginning with the system of whole number, concepts from the elementary number theory; applications of quantitative systems to problems in discrete mathematics. Prerequisites: High School Algebra or College Algebra with at least a C

2 hrs

[back to top](#)

TCH-ED 201 Children's Literature

Survey of books for children. Attention given to standard aids for selection, criteria for evaluating different types of literature and creating an environment for response to literature. A primary focus on multicultural literature for children. Fall

3 hrs

[back to top](#)

TCH-ED 251 Child and Adolescent Development for Urban Educators

This course is designed to provide students with the information they will use as educators to design developmentally appropriate practices for the children they will work in the classroom setting, thus discussions about how the information is translated into the classroom will be applied. To be taken concurrently with TE 252

3 hrs

[back to top](#)

TCH-ED 252 Field Exp: Child/Adolescent Development

This field experience is designed in conjunction with TE 251 Child Development for Urban Teachers to provide students with real-world interactions to study the development of children from birth to adolescence. Field experience settings have been arranged to provide students with an opportunity to observe and interact with children as they study the four stages of development.

1 hr

[back to top](#)

TCH-ED 253 Urban Education Seminar II: Social Justice

This seminar aligns with the other semester experiences and allows students an opportunity to dialogue about the possible application of their experience work as it applies to teaching in an urban school. Students will be introduced to current topics in urban education and society; identify, develop and enhance study strategies; observe, listen and think critically, sharpen writing skills; and work effectively in groups as they explore social justice and the relationship between society and schools. Prerequisite: Students must be admitted to the Institute for Urban Education

1 hr

[back to top](#)

TCH-ED 254 Math Methods for Urban Teachers: Geometry

Designed for elementary school teachers. A constructive development of geometry and concepts from elementary teacher education; applications will be made to connect with elementary curriculums. Prerequisite: High School Algebra and Geometry or College Algebra with at least a C.

2 hrs

[back to top](#)

TCH-ED 255 Intergrated Music and Visual Arts

Basic principals of creativity and their application in the multicultural teaching of art, creative dance and musical and rhythmic interpretation will be explored. An emphasis is placed on interrelationship of these disciplines and their integration into the curriculum. Special emphasis will be placed on helping students to develop a wider and more respectful understanding of our nation's cultural diversity as reflected in all art forms. Students will be exposed to the literature, poetry, theater, visual art and music contributed by African-Americans, Hispanic Americans and Native Americans among other. To be taken concurrently with TE 256. Prerequisite: Must be admitted to the Institute for Urban Education.

3 hrs

[back to top](#)

TCH-ED 256 Field Experience: Music and Visual Arts

The field experience is intended to give students an opportunity to see the application of learning theory and integration of the arts in authentic classroom situations. To be taken concurrently with TE 255 Prerequisite: Must be admitted to the Institute for Urban Education.

1 hr

[back to top](#)

TCH-ED 258 Math Methods for Urban Teachers: Probability and Statistics

Designed for Elementary and Middle School Teachers. This course is designed to provide undergraduate students in elementary and middle school mathematics with the foundational knowledge of the teaching of probability and statistics and how to use the elements of statistics to interpret and solve problems in elementary and middle school classrooms.

Prerequisite: High School Algebra and Geometry or College Algebra with at least a C.

2 hrs

[back to top](#)

TCH-ED 259 Introduction to Urban Teaching

This course is designed to introduce students to the sociopolitical context of urban education, schooling, teaching and learning. It will provide an overview of education in a multicultural democracy, mostly African Americans, Latino Americans, and other racial/ethnic groups and immigrants. Specifically, it will introduce students to the notion of teaching for social justice, the social justice teacher and the social empowerment. Opportunities will be provided for students to review research, debunk stereotypes, negative views, and to recognize urban learners as capable, motivated, and resilient. The ultimate goal of this course is to facilitate experiences that will enable students to develop the knowledge, skills and dispositions needed to learning in urban schools. To be taken concurrently with TE 265 Prerequisite: Must be admitted to the Institute for Urban Education.

3 hrs

[back to top](#)

TCH-ED 265 Field Experience: Urban Teaching

As a CO-requisite to Introduction to Urban Teaching, students will spend 60 hours in urban schools working with diverse student populations, specifically; students will work with African Americans, Latino Americans, and English Language Learners grades K-8. Reflection and discussion of clinical experiences will occur during the urban education seminar and Introduction to urban education classes. Students will keep a reflective journal of their experiences working with diverse learners. To be taken concurrently with TE 259 Prerequisite: Must be admitted to the Institute for Urban Education Restrictions: CO-Requisite: Urban Education Seminar IV

1 hr

[back to top](#)

TCH-ED 266 Urban Education IV: Classroom Management

This course will present the foundations for developing expertise in classroom management. Theory and activities will introduce students to strategies and procedures to manage student's behavior as well as keep them on task throughout the school day. The intent of this course is to provide the prospective teacher with the skills and the expertise necessary for you to manage the classroom behavior of your students effectively while creating a caring and supportive atmosphere.

Prerequisite: Must be admitted to the Institute for Urban Education. CO-Requisite: Field experience: Urban Teaching

1 hr

[back to top](#)

TCH-ED 300 Summer Community Experience

This course provides an in-depth examination into both the evolution of ghetto communities and dynamics of community building in inner cities, with special emphasis on Kansas City, Missouri. In addition, theories of educational psychology as well as child and adolescent behavior will be infused to assist participants in developing age appropriate mentoring/teaching strategies and activities. Prerequisite: Must be admitted to the Institute for Urban Education.

3 hrs

[back to top](#)

TCH-ED 350 Multi-Media Production For The Classroom

An introductory course in the media production techniques involving knowledge and practical use of computers, scanners, digital video, digital audio and graphics to create professional multimedia for use in the classroom. The class is designed for prospective and current classroom teachers.

1 hr

[back to top](#)

TCH-ED 351 Literature for A Lifetime

This course will provide students with an encompassing survey of fiction and non-fiction literature appropriate for all age ranges from the young child to adult. Lectures and discussions will focus on the value of literature as a tool for thinking, as a way of illuminating modern life, as a means of understanding history and human behavior, and as a source of aesthetic pleasure and lifelong enjoyment. Students will learn how to select and critique both the media used in illustrated books and the literacy techniques and forms of the many genre of literature. In this course special emphasis will be placed on literature that reflects life in many cultures and periods of history, in particular from those racial and ethnic sources that make modern America such a pluralistic and diverse society. There will also be an emphasis on the universal themes that run through literature of the societies. Prerequisite: Must be admitted to the Institute for Urban Education.

6 hrs

[back to top](#)

TCH-ED 366 Field Experience: Literacy

Students will spend 100 hours working in an urban school classroom. Students will have the opportunity to apply learning and lessons designed in the semester's pedagogical courses, particularly Integrated Instruction: Language Arts and Social Studies. Students will work with their seminar leader, having the opportunity to be observed and conference about their teaching.

1 hr

[back to top](#)

TCH-ED 385 Teaching and Learning with Technology

This is an introductory course that covers the fundamentals of standard educational computer applications in addition to providing basic concepts regarding classroom hardware and software integration. This course familiarizes students with the National Educational Technology Standards for Teachers and Students. Because of the computer's increasing importance in all phases of education, hands-on experiences are required throughout the course.

3 hrs

[back to top](#)

TCH-ED 400 Child Development

Intellectual and social development from birth through middle childhood and their implications for the educative process.

3 hrs

[back to top](#)

TCH-ED 402 Creative Activities

Basic principles of creativity and their application in the multicultural teaching of art, creative dramatics, creative movement and musical rhythmic interpretation will be explored. An emphasis will be placed on the interrelationship of these disciplines and integration into the curriculum.

3 hrs

[back to top](#)

TCH-ED 403 Educational Psychology

This course will provide an introductory examination of psychological research and theory which have implications for, and applications to learning and instruction in interactive social contexts, such as classrooms.

3 hrs

[back to top](#)

TCH-ED 404 Education Of The Exceptional Child And Youth

Students will be introduced to identification and educational intervention procedures for educating exceptional children and adolescents in mainstream classroom situations. Fall and Winter.

3 hrs

[back to top](#)

TCH-ED 405 Practicum I

Taken in conjunction with elementary and middle school methods courses. Students are expected to spend 60 ours at classroom sites during the semester.

1 hr

[back to top](#)

TCH-ED 406 Practicum II: Elementary

Taken in conjunction with elementary courses. Students are expected to spend 60 hours at classroom sites during the semester.

1 hr

[back to top](#)

TCH-ED 407 Practicum III - Elementary

This course will be taken in conjunction with the elementary and middle school methods courses. Students will be expected to spend 60 hours at classroom sites during the semester.

0 hrs

[back to top](#)

TCH-ED 408 WI Advanced Foundations

The course will concentrate on the development of a philosophical, historical and social model to assist in understanding the complexities, strengths and problems of present day education. Prerequisite: Admission to the Teacher Education program as an undergraduate student Offered: Fall

3 hrs

[back to top](#)

TCH-ED 409 Curriculum and Assessment

Curriculum and Assessment is the first of a three-part course sequence designed to assist the preservice teacher in acquiring the knowledge and skills to become an effective practitioner in a world of constant change. The preservice teacher in turn will become a professional educator and facilitator of learning by developing an understanding of the varied roles and relationships that are an integral part of the teaching/learning process. This course focuses on the meaning of curriculum, the role of standards in curriculum design and implementation, the role of assessment is used t effectively enhance instruction and student learning.Restrictions: You must be admitted to the Teacher Education program in Elementary or Middle School Education or the IUE to take this course.

3 hrs

[back to top](#)

TCH-ED 410 Teacher in the Classroom

Teacher in the Classroom is the second of a three-part sequence designed to assist the preservice teacher in acquiring the knowledge and skills to become an effective practitioner in a world of constant change. The preservice teacher in turn will become a professional educator and facilitator of learning by developing an understanding of the varied roles and relationships that are an integral part of the teaching/learning process. It is designed to assist preservice teachers in not only make the transformation from to student to professional educator, but also in developing the knowledge, management, and reflective skills to implement a well-planned and effective curriculum that meets the needs, interests challenges and lives of students who live in and will function in an increasingly culturally diverse, democratic society in an interdependent world.Restrictions: You must be admitted to the Teacher Education program in Elementary or Middle School Education or the IUE to take this course

2 hrs

[back to top](#)

TCH-ED 412 Language Arts In The Elementary And Middle School

Provides instruction in planning, implementing and assessing language arts activities. Critical analysis in classroom settings is emphasized. Other issues discussed include: literature-based instruction, multicultural perspectives, special needs students and professional behaviors. Fall.

3 hrs

[back to top](#)

TCH-ED 413 Mathematics in the Elementary School

Mathematics-specific pedagogy. Methods, techniques, tools and materials for the effective teaching of mathematics. Emphasis on problem solving and reasoning skills in applying mathematics and on teaching in the context of diverse student backgrounds. Four contact hours per week include a two-hour laboratory. Fall.

3 hrs

[back to top](#)

TCH-ED 414 General Methods Elementary And Middle - 3

To summarize and synthesize the pre-service educational experience. To become knowledgeable about the realities of a school life in a "real" classroom. Winter.

2 hrs

[back to top](#)

TCH-ED 415 Reading 1: Intro to Literacy and Reading Instruction

This course introduces concepts about literacy processes; i.e., social, cultural, cognitive and linguistic foundations of reading and writing processes. The major focus of the course is on learning components of a comprehensive reading curriculum, and a range of instructional approaches and methods appropriate for learners at different stages of literacy development.

4 hrs

[back to top](#)

TCH-ED 416 Reading II: Assessing and Teaching Diverse Learners

This course focuses on understanding the major components of reading processes (phonemic awareness, word identification and phonics, vocabulary and background knowledge, fluency, comprehension strategies, and motivation) and how they are integrated in fluent reading for individual students at different stages of literacy development. The major project for the course involves assessing and teaching an individual student of the course of the semester. Teacher candidates should also assess and teach small groups of readers. Prerequisites: TCH-ED 415 Restrictions: Students admitted to teacher education program. Offered: Winter

4 hrs

[back to top](#)

TCH-ED 417 Science Methods In The Elementary School

The course prepares pre-service teachers to teach science from a constructivist, inquiry-oriented perspective.

3 hrs

[back to top](#)

TCH-ED 418 Social Studies Methods In The Elementary And Middle Schools

A critical analysis of current practices, teaching methods, materials and the relationship of the social sciences to social studies. Emphasis is on understanding cultural diversity and cultural influences on learning. The planning, implementation and evaluation of an interdisciplinary social studies unit of instruction, focusing on competencies and skills needed for the 21st Century. Fall.

3 hrs

[back to top](#)

TCH-ED 419 Student Teaching In Elementary School

Observation and student teaching under supervision in an elementary school. Elementary majors must enroll in 12.0 credit hours. Music education majors enroll in 3.0 or 7.0 hours; art education and foreign language education majors enroll in 7.0 hours. Prerequisite: Formal approval by faculty Offered: Winter

3-12 hrs

[back to top](#)

TCH-ED 420 Adolescent Development

Various aspects of physiological, emotional, cognitive, social and moral development in adolescence will be considered. Attention is focused on a conception of adolescence that is grounded on current research and theory. Fall.

3 hrs

[back to top](#)

TCH-ED 422 Practicum II Middle and Secondary

A continuation of practicum 1. Further development of observation, interview and analytic skills. Teaching experiences such as teacher aid and/or tutor will be included. Students will be expected to spend 60 hours at classroom sites during the semester.

0 hrs

[back to top](#)

TCH-ED 423 Practicum II Middle and Secondary

A continuation of Practicum II. Further development of observation, interview and analytic skills. Teaching experiences such as teacher aide and/or tutor will be included. Students will be expected to spend 60 hours at classroom sites during the semester. Prerequisites: TCH ED 405 and TCH ED 422 Offered: Fall

0 hrs

[back to top](#)

TCH-ED 424 General Methods - Secondary 1

Basic principles of teaching at the secondary level. This course is to be based on significant research in the area and will encourage a reflective style of teaching. Winter.

2 hrs

[back to top](#)

TCH-ED 425 General Methods - Secondary 2

The intent of this course is to prepare pre-service teachers to be effective managers of instruction who are skillful in interpersonal communication. Course activities include opportunities for applying techniques based upon a variety of management/discipline models. Field experiences permit on-site observation of various management styles. Winter.

2 hrs

[back to top](#)

TCH-ED 427 Reading In The Secondary School

An examination of the reading process and study of methods and materials used by the secondary school classroom teacher in assessing student reading ability, determining the readability of content area materials and teaching students of all reading levels how to comprehend their textbooks and other printed instructional materials in various content area subjects. Winter.

3 hrs

[back to top](#)

TCH-ED 432 Special Methods Of Teaching English to Middle School and High School Students

This course stresses the understanding, skills and information pertinent to teaching English/language arts in middle schools and junior and senior high schools. Fall.

3 hrs

[back to top](#)

TCH-ED 433 Special Methods Of Teaching Middle and Secondary Mathematics

Provides students the opportunity to develop and present lessons in various high school mathematics topics. The emphasis is on modeling the concepts introduced and on using strategies that enable students to discover generalizations for themselves. Fall.

3 hrs

[back to top](#)

TCH-ED 436 Special Methods Of Teaching Social Studies to Middle/Secondary School Students

The primary goal of this course is to enable preservice social studies teachers to reflect critically on curriculum and pedagogy in secondary social studies. Students will be introduced to current practices and issues in secondary school social studies. Fall.

3 hrs

[back to top](#)

TCH-ED 437 Student Teaching In Secondary School

Observation and student teaching under supervision in a secondary school. Secondary majors not specifically listed here must enroll in 12.0 credit hours. Music education majors enroll in 3.0 or 7.0 hours; art education and foreign language education majors must enroll in 7.0 hours. Prerequisite: Formal approval by faculty Offered: Winter

3-12 hrs

[back to top](#)

TCH-ED 438 Cultural Responsive Strategies for Working With Diverse Student Populations

This course is designed to move students from cultural awareness to the application of culturally responsive practice. Specifically, this course will heighten students' understanding of cultural characteristics and their relationships to teaching and learning. Prerequisite: Admission to Teacher Education Program.

3 hrs

[back to top](#)

TCH-ED 440 Introduction To Early Childhood Education

Introduction to the field of early childhood care and education, birth to age 8. Designed to familiarize future practitioners with the unique characteristics of early childhood education and its practice.

3 hrs

[back to top](#)

TCH-ED 441 Literacy Development I

An introduction to how language is acquired and how to facilitate oral language expression in early childhood classrooms.

3 hrs

[back to top](#)

TCH-ED 442 Observation, Assessment & Screening In Early Childhood Classrooms

This course is designed to identify developmentally appropriate ways to measure and evaluate child growth and development.

3 hrs

[back to top](#)

TCH-ED 444 Mathematics In Early Childhood And Elementary Schools

The course prepares teachers who can create a learning environment in which mathematical concepts are drawn from and modeled within the child's active investigation of his or her own surroundings and views of the world. The emphasis is upon mathematics as a sense-making tool through which observation, action, classification, ordering, seeking patterns and common features, and testing of ideas come together to organize experiences and solve problems in the immediate environment. Stress is placed on methods and materials to make mathematics learning active and hands-on. A variety of materials, physical models, and tools are studied in terms of the way they can be used to help children explore, develop and test ideas, construct meaning, and communicate ideas.

3 hrs

[back to top](#)

TCH-ED 445 Science In Early Childhood And Elementary Schools

Focus on ways of involving young children in science activities and experiences designed to promote curiosity, investigation and self-awareness as they explore their world.

3 hrs

[back to top](#)

TCH-ED 447 Social Studies In Early Childhood & Elementary Schools

This course is designed to help students understand basic social studies concepts and pedagogy for young learners.

3 hrs

[back to top](#)

TCH-ED 450 Integrating The Curriculum In Early Childhood Education

A culminating curriculum course for early childhood students. The overall goal is to help students become more aware, skilled and informed about developmentally and educationally appropriate practice and curriculum for children during early childhood. Its focus is on constructing an integrated curriculum. A field-based experience is included.

3-4 hrs

[back to top](#)

TCH-ED 451 Child Guidance Within The Classroom

Designed to help students examine and evaluate guidance techniques and teaching strategies used in classrooms for young children. Preventive measures in classroom management will be stressed.

3 hrs

[back to top](#)

TCH-ED 452 Family And Program Relationships In Early Childhood Education

Provides insight into the challenge of parenting, knowledge about the development and implementation of parent education and support programs, and the significance of school-family relationships. In addition, this course seeks to facilitate students' understanding of and sensitivity to parents' perspectives regarding the care and education of their young children. (Concurrent enrollment in TCH-ED 452, Learning from Parents, required).

4 hrs

[back to top](#)

TCH-ED 453 Learning From Parents

Designed to provide students with direct interactions with parents whose children are participating in early childhood programs, birth to age 8. Emphasis is placed upon students' understanding of, and sensitivity to, parents' perspectives regarding the care and education of their young children and recognition of parents as significant informants about their children. (Concurrent enrollment in TCH-ED 452, Family and Program Relationships, required).

2 hrs

[back to top](#)

TCH-ED 454 Human Relations In The Early Childhood Classroom

Students will analyze the connections between an effective helping relationship and effective teaching in the early childhood classroom. Effective interpersonal communication skills will be identified and practiced. The development of self-concept will be discussed.

3 hrs

[back to top](#)

TCH-ED 455 Student Teaching In Preschool

Observation and student teaching under supervision in a preschool setting.

6-10 hrs

[back to top](#)

TCH-ED 456 Student Teaching In Elementary, K Through 3

Observation and student teaching under supervision in an elementary school, grades K through 3.

6-12 hrs

[back to top](#)

TCH-ED 457 Infant And Toddler Care And Education

In this course, students will investigate infant and toddler care and education theories and practices. Students will learn about appropriate curriculum and teaching methods, visit infant and toddler programs, learn about state regulations and national standards for quality, and complete an environment rating scale.

3 hrs

[back to top](#)

TCH-ED 458 Practicum For Learning About Infants And Toddlers

The purpose of this course is to learn about child care and education practices in various centers. We will discuss how practices are influenced or constrained by human biology and developmental stages, as they are by ecological and environment pressures such as mothers' work roles. The central themes of the course can be summarized by the phrases "purposeful care practices" and the "optimal practices for infants and toddlers."

1 hr

[back to top](#)

TCH-ED 459 Early Childhood Program Management And Advocacy

Students will begin to explore basic early childhood program components. Different types of advocacy will be presented, discussed, and implemented. Prerequisite: TCH-ED 440

2 hrs

[back to top](#)

TCH-ED 460 Middle School Curriculum

This course offers the pre-service teachers an overview of middle school goals, basic principles, and organizations. The course explores interdisciplinary teaming, flexible scheduling, exploratory and advisory programs, and other aspects of the organization within the context of middle school goals and practices. Offered: Summer/Fall

2 hrs

[back to top](#)

TCH-ED 461 Student Teaching In Middle School

Observation and student teaching under supervision in a middle school setting.

6-12 hrs

[back to top](#)

TCH-ED 462 Middle School Principles And Organization

This course offers the pre-service teachers an overview of middle school goals, basic principles, and organizations. The course explores interdisciplinary teaming flexible scheduling, exploratory and advisory programs, and other aspects of the organization within the context of middle school goals and practices Offered: Summer/Fall

2 hrs

[back to top](#)

TCH-ED 464 Math Methods for Urban Teachers

Mathematics-specific pedagogy for urban teachers. Methods, techniques, tools and materials for the effective teaching of mathematics. Emphasis on problem solving and reasoning skills in applying mathematics and on teaching in the context of diverse student backgrounds. Portions of this course will occur in urban school classrooms. Students will apply learning to urban classrooms. Prerequisite: Must be admitted to the Institute for Urban Education.

3 hrs

[back to top](#)

TCH-ED 465 Urban Education VI: Teaching Diverse Students

This interactive course will investigate and examine the principals of teaching diverse students and factors influencing effectiveness of instruction, including empowering African American males, teaching student from diverse populations and working with students with special needs. Some of the class sessions will be taught electronically and work will be submitted electronically. Prerequisite: Must be admitted to the Institute of Urban Education.

1 hr

[back to top](#)

TCH-ED 466 Field Experience: Diverse Learners

Students will spend a minimum of 90 hours in an urban school classroom. Students will have the opportunity to apply learning and lessons designed in the semester's pedagogical courses, particularly Best Practices for Teaching Math, Science, and strategies for working with diverse learners. Students will work with their seminar leader, having the opportunity to be observed and conference about their teaching. To be taken concurrently with TE 465 Prerequisite: Must be admitted to the Institute for Urban Education.

1 hr

[back to top](#)

TCH-ED 470 Philosophy And History Of Science And Technology

This course uses an historical survey to introduce the main philosophical interpretations of the nature and structure of both science and technology. Core concepts such as prediction, explanation, progress, truth, and utility will be examined in light of various philosophical perspectives. Following this, case study methodology will be used to examine interactions among science, technology, and society. Although the major focus will be upon modern Western culture, some attention will be paid to earlier and non-Western cultures. Case studies to be examined include: under the topic of Risk: Perception and Estimation, nuclear power and pesticides; the impact of high technology upon medicine; and the estimated cost/benefit of computer-mediated communications, for example, the Internet. Offered: Fall Semester.

3 hrs

[back to top](#)

TCH-ED 475 Working with Families and Communities

This course provides an in-depth examination of research and theory relative to children, family, and community which have implications for and application to learning and instruction, Emphasis will be placed on the exploration and critical examination of and insights into the challenge or parenting, knowledge about the development and support programs, and the significance of school-family relationships. In addition, this course seeks to facilitate students' understanding of and sensitivity to families' perspectives regarding the care and education of their children and adolescents. The course is for students in the elementary education program and Institute for Urban Education, This course is offered fall semester only. Prerequisites: must be admitted to Teacher Education or IUE.

3 hrs

TCH-ED 480 Practicum I Early Childhood

Early Childhood students will participate in observation, assessment, and screening activities as they explore the complex nature of primary school settings. This course is taken in conjunction with TCH-ED 442. Students will be expected to spend 60 hours at classroom sites during the semester.

1 hr

[back to top](#)

TCH-ED 481 Practicum II Early Childhood

Early Childhood students will participate in classroom management and guidance practices as they explore the complex nature of pre-kindergarten settings. This course is taken in conjunction with TCH-ED 451. Students will be expected to spend 60 hours at classroom sites during the semester. Prerequisite: TCH-ED 480 Restrictions: Students must be admitted to teacher education program

1 hr

[back to top](#)

TCH-ED 483 Early Childhood Reading I: Introduction to Literacy and Reading Education

This course introduces concepts about literacy processes: i.e., social, cultural, cognitive and linguistic foundations of reading and writing processes. The major focus of the course is on learning components of comprehensive reading curriculum and a range of instructional approaches and methods appropriate for early childhood learners at different stages of literacy development.

4 hrs

[back to top](#)

TCH-ED 484 Early Childhood Reading II: Assessing and Teaching Diverse Learners

This course introduces focuses on understanding the major components of reading processes (Phonemic awareness, word identification and phonics, vocabulary and background knowledge, fluency, comprehension strategies, and motivation) and how they are integrated in fluent reading for individual students at different stages of literacy development. The major projects for the course involves assessing and teaching an individual student over the course of the semester. Teacher candidates should also assess and teach in small groups of readers. Prerequisite: Students must be admitted to the teacher education program

4 hrs

[back to top](#)

TCH-ED 485 Language Arts in the Early Childhood Classroom

This course provides instruction in planning, implementing, and assessing early childhood (birth through third-grade) language arts activities. Critical analysis in classroom settings is emphasized. Other issues discussed include: literature-based instruction, multicultural perspectives, special needs students and professional behaviors.

3 hrs

[back to top](#)

TCH-ED 492 Integrated Instruction: Language Arts and Social Studies

This course will focus on teaching Language Arts and Social Studies in the Urban Elementary School. Methods, techniques, tools and materials for the effective teaching will be observed and practiced. Students will work closely with in-service teachers and their university instructor. There will be emphasis on balanced literacy, readers' and writers' workshops, literacy development, assessment techniques and the integration of social studies and language arts. Curriculum mapping and unit planning will be introduced and practiced in this course. This course will focus on school and classroom organization and management, detailed lesson planning, use of instructional materials and media in the teaching of language arts and social studies. Prerequisite: Must be admitted to the Institute of Urban Education.

0 hrs

[back to top](#)

TCH-ED 497 Introduction to Teaching Internship

The teaching of this course will occur at urban elementary school sites. The focus will be on basic curriculum development, developing and understanding of teaching/learning styles and varied instructional methodologies. The utilization of technology as an instructional aid, the purpose and creation of varied assessments, for instructional use will be addressed. Continued emphasis will be placed on reflective thinking through class discussion, modeling activities and written assignments. Students will prepare units of study and long range plans for their student teaching internship. Students will have opportunities to apply their learning to urban classrooms. Students will spend a minimum of 300 hours in their teaching internship classroom. Prerequisite: Must be admitted to the Institute for Urban Education.

3 hrs

[back to top](#)

TCH-ED 498 Urban Education Seminar VII

This seminar meets weekly for 2 hours and is led by a clinical professor who serves as a mentor for the students throughout their program. Students will work closely with mentor teachers in the application and integration of social justice and the elementary school curriculum. A critical analysis of current practices, teaching methods, materials and how social justice manifests in curriculum and instruction. Emphasis is on understanding cultural diversity and cultural influences on learning. Concepts of a classroom community, parental relations and democratic classroom processes will be addressed. Students will have opportunities to apply their learning to urban classrooms. Prerequisite: Must be admitted to the Institute for Urban Education.

1 hr

[back to top](#)

TCH-ED 499 Capstone

This seminar is designed to complement the student teaching experience through the discussion and analysis of school-based issues. It is intended to help further develop a reflective, critical and analytical approach to pedagogical decision making through supportive collaboration.

2 hrs

[back to top](#)

TCH-ED H400 Child Development

Intellectual and social development from birth through middle childhood and their implications for the educative process.

3 hrs

[back to top](#)

TCH-ED H408 WI Advanced Foundations

The course will concentrate on the development of a philosophical, historical and social model to assist in understanding the complexities, strengths and problems of present day education. Prerequisite: Admission to the Teacher Education program as an undergraduate student Offered: Fall

3 hrs

[back to top](#)

TCH-ED H415 Reading 1: Intro to Literacy and Reading Instruction

This course introduces concepts about literacy processes; i.e., social, cultural, cognitive and linguistic foundations of reading and writing processes. The major focus of the course is on learning components of a comprehensive reading curriculum, and a range of instructional approaches and methods appropriate for learners at different stages of literacy development.

NURSE 101 Introduction To Nursing

This introductory two-hour course is designed to facilitate role socialization into professional nursing. Beginning with a brief historical overview of professional nursing, nursing is defined and the philosophical and practice standards of the profession are discussed. The student explores nursing's image and power bases in relationship to professional accountabilities and roles. The value and tenets of evidence-based care are emphasized and integrated with use of nursing process in professional, reflective decision-making. A review of educational paths in professional nursing leads the student into a comprehensive survey of the multiple roles, responsibilities, and requisite skills of the professional nurse today and in the future. Prerequisites: None

2 hrs

[back to top](#)

NURSE 120 Anatomy & Physiology I

This course examines the structure of the human body from the molecular to the organismal level as they interact among all body systems across the life span. CO-requisite laboratory exercises provide practical application of theoretical concepts. In this first of two-term course, molecular biology, biochemistry, cellular biology, and histology are studied as well as the integumentary, musculoskeletal, and nervous systems. Prerequisite: Pre-nursing students or consent of instructor Offered: Fall

4 hrs

[back to top](#)

NURSE 125 Medical Terminology

This course is designed to introduce the student to medical terminology. The major foci of this course are to acquaint the student in how medical terms are formed; how medical terms are applied to organs, body systems and pathological conditions; how common medical abbreviations are used; and how medical terminology is integrated into the medical record. Prerequisite: None Restrictions: None Offered: Fall/Winter

1 hr

[back to top](#)

NURSE 127 Drug Calculations

The drug calculation course is designed to introduce the student to methods of drug dosage calculation needed for medication administration in the health care setting. This course will review basic mathematical concepts, introduce medication specific terminology, discuss interpretation of medication orders, identify key elements of the medication label and enable the student to calculate appropriate and accurate drug dosages. Prerequisite: None Restrictions: None Offered: Fall/Spring

1 hr

[back to top](#)

NURSE 132 A Introduction To Holistic Health Care: Medicinal Plants and Herbs

This course provides a hands on introduction to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non traditional healing modalities. Relevant to all health care providers and health care consumers, the content will cover medicinal plants and herbs and related topics.

1 hr

[back to top](#)

NURSE 132 B Introduction To Holistic Health Care: Energy Medicine

This course provides an introduction to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and nontraditional healing modalities. Relevant to all health care providers and health care consumers, the content will include Energy Medicine and related topics.

1 hr

[back to top](#)

NURSE 132 C Introduction To Holistic Health Care: Relaxation Techniques

This course provides an hands on introduction to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non-traditional healing modalities. Relevant to all health care providers and health care consumers, the content will include Relaxation Techniques and related topics.

1 hr

[back to top](#)

NURSE 132 D Introduction to Holistic Health Care: Chinese Medicine and Hypnosis

This course provides a hands on introduction to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non traditional healing modalities. Relevant to all health care providers and health care consumers, the content will include Chinese Medicine, Hypnosis and other related topics.

1 hr

[back to top](#)

NURSE 134 A Introduction To The History Of Nursing: Beginning to 1880's

This course designed to give an introductory examination of the rich and unique development of nursing as a discipline, profession, art, and science from a historical perspective. Past and present nursing issues will be identified and discussed. The social, philosophical, and political forces which have impacted the course of nursing history from Hippocrates and Florence Nightingale to the 1880's will be examined.

1 hr

[back to top](#)

NURSE 134 B Introduction To The History Of Nursing: 1880's to 1930's

This course is designed to give an introductory examination of the rich and unique development of nursing as a discipline, profession, art, and science from a historical perspective. Past and present nursing issues will be identified and discussed. The social, philosophical, and political forces which have impacted the course of nursing history from the Spanish-American War and World War I to the 1930's will be examined. Semester Offered: Spring

1 hr

[back to top](#)

NURSE 134 C Introduction To The History Of Nursing: 1930's to the 1950's

This course is designed to give an introductory examination of the rich and unique development of nursing as a discipline, profession, art, and science from a historical perspective. Past and present nursing issues will be identified and discussed. The social, philosophical, and political forces which have impacted the course of nursing history from the 1930's, Public Health Nursing, World War II, to 1950 will be examined.

1 hr

[back to top](#)

NURSE 134 D Introduction to the History of Nursing: 1950 to Future

This course is designed to give an introductory examination of the rich and unique development of nursing as a discipline, profession, art, and science from a historical perspective. Past and present nursing issues will be identified and discussed. The social, philosophical, and political forces which have impacted the course of nursing history from 1950 to the present and into the future will be examined.

NURSE 160 Anatomy And Physiology II

This course is a continuation of NURSE 120. CO-requisite laboratory exercises provide practical application of theoretical concepts. Physiologic systems including endocrine, cardiovascular, immune, respiratory, digestive, renal, urinary and reproductive are studied as well as embryology and genetics. Prerequisite: NURSE 120

4 hrs

[back to top](#)

NURSE 220 Fundamental Concepts & Skills

This course focuses on fundamental concepts, skills, and techniques that provide a foundation for clinical practice. The beginning student will identify factors that may influence the human system and applies the nursing process in health care setting using basic nursing interventions. This six credit hour course consists of four credit hours of didactic/discussion and two hours of clinical laboratory/lab. Prerequisite: Acceptance into Clinical Nursing Program.

6 hrs

[back to top](#)

NURSE 230 Health Issues In Aging

This course focuses on the role of the nurse in promoting and maintaining the health of the older adult population. Evidence based nursing care of the older adult that includes: physiological, psychological, pharmacological, and nutritional considerations as affected by theories on aging, socio-cultural influences, legal and ethical issues, and health care resources are explored. Nursing assessment, diagnoses, interventions, and outcomes specific to the older adult population are discussed. Opportunities are provided for interaction with this population. Prerequisite: Admission into the BSN Program
Offered: Fall

2 hrs

[back to top](#)

NURSE 250 Health Assessment For Nursing Practice

This course is designed to provide a systematic approach to the physiological, psychological sociocultural, and developmental assessment of individuals emphasizing findings considered to be within normal limits. The health history is emphasized as a tool for assessing mental and physical status. This course is designed for the pre-licensure student. This course consists of three hours of supervised practice per week. Prerequisites: Admitted into BSN program or consent of the instructor.

3 hrs

[back to top](#)

NURSE 252 Human Growth And Development

This course provides a basic introduction to the theory for human growth and development across the lifespan. Emphasis is placed upon the biological and the psychosocial aspects of growth and development. Content is organized in a modified chronological order dividing information into major stages of growth and development across the lifespan. Prerequisite: None
Restrictions: None Offered: Spring

3 hrs

[back to top](#)

NURSE 256 Pharmacology

This is a course in pharmacology that builds on prior knowledge of anatomy, physiology, chemistry, microbiology and pathophysiology. The major focus of the course is the basic and clinical concepts of pharmacology in evidence-based care. This course covers drug knowledge in the areas of pharmacotherapeutics, pharmacodynamics, pharmacokinetics, adverse reactions and contraindications, therapeutics indications and nursing implications. Prerequisites: NURSE 127, 220, 230, 250, 395. Offered: Spring

3 hrs

[back to top](#)

NURSE 262 Management Of Adult Health I

This medical-surgical course focuses on utilization of the nursing process to the specific illnesses of the adult client in the the acute care setting. High volume disease processes with associated nursing care are emphasized. The effects on the individual as a holistic system are explored. Skills are developed in caring for persons with biological, psychological and social system alterations to facilitate optimal client outcomes. This five credit hours course consists of three hours of didactic/discussion and two hours clinical/ lab (120 hours). Prerequisites: NURSE 120, 220, 230, 250, 395. Corequisite: NURSE 256

5 hrs

[back to top](#)

NURSE 342 Legal & Ethical Issues

This course is designed to investigate medical-legal issues an explore the implications that legal intervention and interpretation as well as litigation have on the scope of nursing practice and the delivery of patient care. It allows the student an opportunity to learn about ethical decision making with the introduction of various ethical systems, concepts, and principles explored. Prerequisites: Admission to the Nursing Major or BSN Completion Program Offered: Fall

2 hrs

[back to top](#)

NURSE 345 Quantitative Analysis In The Health Sciences

This course focuses upon the skills required for the utilization of scientific findings in evidence-based care. The conceptual basis of descriptive and the inferential statistics found in the properties of the normal distribution, comprise the core of these skills. Using the normal distribution as a structure for understanding descriptive and inferential procedures, the course presents information necessary to the selection, computation and interpretation of basic statistics relevant to evidence based-care in the health sciences. Discussions of variables, measurement and tabular and graphic presentation of data precede the development of computation skills.

3 hrs

[back to top](#)

NURSE 346 Women's Health in the Community

This two credit hour undergraduate elective course will introduce students to the social and personal concerns of women. The class will meet a two hour session once a week. Arrangements are possible for students to take the class for three credit hours with permission os the instructor; .

2-3 hrs

[back to top](#)

NURSE 356 Spanish for Health Care Pre-Professionals

This course will focus on conversational Spanish, medical terminology in Spanish and written/read Spanish. This course will provide the student with basic knowledge that will allow basic communication with patients who speak/read/write Spanish. This is a fast paced course and will require practice of the language outside of the classroom in order to master the material presented. Prerequisite: Permission of Instructor Offered: All Semesters

3 hrs

[back to top](#)

NURSE 359 Introduction To International Health Care

This course is designed to introduce students to the health care issues found in other countries with a focus on low-and middle-income countries. Students will study philosophical, system and cultural aspects of health care and will be expected to compare health care in the United States with other nations. Core concepts include-globalization; health care care reform; organization and management of health systems; community, public and primary health care; humanitarian assistance and refugee health; international nutrition; vaccine development and policy; disease prevention and control; and social and behavioral interventions. Each year course faculty will choose 1-2 countries outside of the United States for in-depth study. Students wishing to earn 3 credits will travel to this country and learn about the health issues through observations and participation. Prerequisites: At least second year student in the UMKC School of Nursing or permission of instructor. Offered: Winter

2-3 hrs

[back to top](#)

NURSE 360 Management Of Mental Health

This course is designed to introduce the student to psychiatric mental health nursing through the study of sound psychiatric nursing theory, therapeutic and clinical applications across the treatment continuum and the lifespan. This course will focus on the dynamics of the nursing process framework, the establishment and maintenance of a therapeutic nurse-client relationship and the dignity of each person. Emphasis will be placed on assessment, therapeutic communication, neurobiological theory, pharmacology and the individual as a whole person. Nursing interventions will focus on all aspects of client care, communication, client/family teaching, and community resources and their practical application in a variety of clinical settings. Content will be arranged around the major categories identified in the DSM-IV-TR and current social and emotional concerns including mental health settings, e.g. grief and loss, anger and aggression, abuse and violence. This four credit hour course consists of two hours of didactic/discussion and two hours of clinical/lab. Prerequisites: NURSE 342, 344, 366.

4 hrs

[back to top](#)

NURSE 362 Management Of Adult Health II

This medical-surgical course focuses on application of the nursing process to the delivery and the management of adult clients across the care continuum. This course builds on Adult Health I content to include high risk disease processes with associated nursing care. Emphasis is placed on the interaction between the client, family, nursing and the environment to result in optimal client outcomes. This five hour credit course consists of three hours of didactic/ discussion and two hours of clinical lab. Prerequisites: NURSE 342, NURSE 364, NURSE 366

5 hrs

[back to top](#)

NURSE 364 Management Of Maternal & Family Health

This course focuses on the application of the nursing process in the adaptation of the childbearing family. Emphasis is placed on adaptation during pregnancy, labor, birth and postpartum period. Key concepts to be addressed include maternal, fetal, neonatal and family adaptation throughout the maternity cycle, common alterations during the cycle and culturally sensitive, family-centered nursing care. Maternal, fetal and neonatal physiology, pathophysiology and pharmacology will be addressed. Two credit hours didactic and two credit hours for clinical practice (120 clinical hours) are required. Prerequisites: NURSE 256 and NURSE 262

4 hrs

[back to top](#)

NURSE 366 Management Of Child & Adolescent Health

This course focuses on the application of the nursing process in the care of the pediatric client. Emphasis is placed on providing development appropriate care to healthy, acutely ill and chronically ill pediatric clients holistically within the context of a family system. Key concepts to be explored include age appropriate anatomy, physiology, pathophysiology, and pharmacology and their application to the nursing strategies of health assessment, health promotion, disease prevention, pain management, family centered and culturally sensitive care. Two credit hours for didactic /discussion and two credit hours for clinical /lab/ (120 hours) Prerequisites: NURSE 262

4 hrs

[back to top](#)

NURSE 395 Pathophysiology

This course will focus on alterations in biologic processes that affect the body's internal homeostasis. A conceptual approach will be used to emphasize general principles of pathophysiology. The etiology, pathogenesis, clinical manifestations, and sequelae of various alterations of human structure and function will be examined. Knowledge from the basic and clinical sciences will be integrated. Prerequisites: Admission to the Nursing major or special permission from instructor.

3 hrs

[back to top](#)

NURSE 398 Clinical Applications Of Pathophysiology

This nursing elective is designed to guide students through self-directed and in-depth analysis of selected diagnoses that are common to clinical practice and represent major concepts of pathophysiology, evaluation, and management that can be applied to many other illnesses. With faculty guidance, students will work in small groups to comprehensively review and analyze a selected clinical case for presentation and discussion with peers. One case from each of the following major body systems will be presented by student groups: cardiovascular pulmonary, cancer, endocrine, hematologic, immunologic, digestive, neurological, musculoskeletal, and genitourinary. Students are expected to attend and actively participate in all of the case presentations through completion of assigned readings, preparatory review of current literature, active listening, and comprehensive peer evaluation. Students will present and facilitate discussion within the large group of selected current literature following each case presentation. Prerequisite: 200 level Nursing courses; NURSE 395 Pathophysiology Offered: Varies

2 hrs

[back to top](#)

NURSE 401 Health Assessment For Clinical Practice

This course is designed to provide a systematic approach to the physiological, psychological, socio-cultural and developmental assessment of individuals emphasizing findings considered to be within normal limits. The health history is emphasized as a tool for assessing mental and physical status. This course is designed for students with previous health care education, including knowledge of biochemical functions of systems and concepts of normal. This course consists of guided self-study and on-site clinical practicum. Prerequisites : Admitted into RN-BSN program or permission of instructor. Offered: Fall/Spring

3 hrs

[back to top](#)

NURSE 430 A Experience Of Health In Aging: Physiological & Cognitive Aspects

This one-credit hour course is designed for students interested in understanding the role of health in the aging population. The 430A course will focus primarily on physiologic and cognitive functioning of the older adult. Theoretical, empirical and applied knowledge of the aging process is presented. This knowledge is utilized in assessing and interpreting the physiological and psychological influences on health. This knowledge may also be used in developing strategies for the promotion, restoration, and maintenance of health in the aging population. Offered: Winter

1 hr

[back to top](#)

NURSE 430 B The Experience Of Health In Aging: Relationships & The Environment

This one-credit hour course is designed for students interested in understanding the role of health, relationships in the aging population. the N430B course will focus primarily on loss/grief and relationships environment and as these relate to the older adult. theoretical, empirical and applied knowledge of the aging process is presented. This knowledge is utilized in assessing and interpreting the influences of relationships, intimacy, loss, grief, and dying on health. This knowledge may also be used in developing strategies for the promotion, restoration, and maintenance of health in the aging population. Offered: Winter

1 hr

[back to top](#)

NURSE 430 C The Experience Hlth In Aging:Community, Systems & Service Delivery

This one-credit hour course is designed for students interested in understanding the role of health, community, systems and service delivery in the aging population. Selected special issues (such as fluid and continence, medication use, pain and comfort, bone/joint problems) will also be discussed. The N430C course will focus primarily on community, health systems and service delivery as these relate to the older adult. Theoretical, empirical and applied knowledge on aging and the health system and delivery process is presented. This knowledge is utilized in assessing and interpreting the influences of the community and health care delivery systems on health. This knowledge may also be used in developing strategies for the promotion, restoration, and maintenance of health in the aging population.

NURSE 434 C History Of Nursing: 1930's to 1950's

This course is designed to examine, in depth, the rich and unique development of nursing as a discipline, profession, art and science from a historical perspective. Past and present nursing issues will be identified and discussed. The social, philosophical, and political forces which have impacted the course of nursing history from the 1930's, Public Health Nursing, World War II, to 1950 will be examined. Offered: Spring

1 hr

[back to top](#)

NURSE 434 D History of Nursing: 1950 to Future

This course is designed to examine, in depth, the rich and unique development of nursing as a discipline, profession, art, and science from a historical perspective. Past and present nursing issues will be identified and discussed. The social, philosophical and political forces which have impacted the course of nursing history from 1950 to the present and into the future will be examined. Offered: Spring

1 hr

[back to top](#)

NURSE 462 Special Topics

This course is designed to explore current issues and trends influencing nursing practice. Economical, political, social and cultural issues are analyzed as they relate to interdisciplinary healthcare topics. Special Topics is aimed at preparing nursing students for immediate and long term milestones in their practice, which includes NCLEX licensure study, current clinical and practice issues, and exposure to advance nursing roles in practice and research. Prerequisites: NURSE 465 and NURSE 467

2 hrs

[back to top](#)

NURSE 465 Management Of Community Health Nursing

This course focuses on applying the nursing process to the care of target community population and the individual. Emphasis is placed on health promotion and disease prevention, Discussion will include epidemiological, social, political, economic and cultural factors that influence the health of a population. The clinical components will consist of application of the nursing process to identify, prioritize, and meet the health needs of aggregates across the lifespan. The four hour course consists of two hours of didactic/discussion and two hours of clinical/lab. (120 hours) Prerequisites: NURSE 360 and NURSE 362. Offered: Fall

4 hrs

[back to top](#)

NURSE 467 Management Of Critical & Emergent Care

This course focuses on applying the nursing process to the care of critically ill clients. Key concepts are assumption, integration, and prioritization of information to take decisive client-focused action. Students will manage appropriately the interface between client and technology so that a safe, respectful, and caring environment is established and maintained. Nursing knowledge of cardiovascular/ hemodynamic monitoring and acute management of pulmonary, neurological, renal, gastrointestinal, shock and traumatic emergencies is included. This five hour course consist of three hours didactic/ discussion and two hours clinical/lab. Prerequisites: NURSE 360 and NURSE 362

5 hrs

[back to top](#)

NURSE 468 Effectiveness In Complex Health Systems

This leadership course focuses on effectiveness in complex health systems, by building upon acquired personal and interpersonal knowledge, skills and effectiveness in health outcomes. Organizational culture and systems, leadership and management theories, internal and external politics, and the impact of future managerial and societal paradigm changes on health care and health care delivery systems are presented. Knowledge of budgeting and health care finance, use of the legislative system, quality management, customer service, and leadership and management styles are explored. This five hour course consists of four hours of didactic/ discussion and one hour of clinical/ lab. Prerequisites; NURSE 467 and NURSE 465 Restrictions: Minimum grade of "C" in all courses

5 hrs

[back to top](#)

NURSE 472 Clinical Internship

This is the final application course designed to complement didactic content from the core-nursing component of the pre-licensure baccalaureate program. Within this course the student will integrate and apply knowledge acquired in didactic course work and from previous clinical experiences. Students will integrate an increasingly complex knowledge base with an emphasis on developing effectiveness: a) personally; b) interpersonally, and c) in the health management of clients within the complexity of the hospital system. In collaboration with preceptors from the clinical unit, the students will manage direct care for clients in the hospital setting. Five credit hours of clinical practice (300 hours) are required. Prerequisites: NURSE 465 and NURSE 467 Co-requisite: NURSE 468 Offered: Spring

5 hrs

[back to top](#)

NURSE 476 Scientific Inquiry

This course focuses upon the development of those skills necessary to apply research finding to the evidence-based care of nursing. This application requires that students develop the skills to intelligently and critically read and utilize current research literature. The specific steps in the research process. Including ethical issues, are presented and discussed with emphasis upon the identification of quality research through critical analysis of research reports. Prerequisite: Pre-licensure students; Completion of 14 hours of clinical coursework, e.g. NURSE 262, NURSE 364, NURSE 366 CO-Requisite: NURSE 345 or equivalent. Offered: Spring

3 hrs

[back to top](#)

NURSE 481 Block I: Tools For Personal Effectiveness

This is the first in the four-course sequence. The student will discover that the foundation for professional nursing practice is personal effectiveness. Personal effectiveness is contingent upon an understanding of the historical roots of the profession, the meaning of professionalism, image and power bases, professional standards, moral development, political role socialization and professional values. Personal effectiveness is enhanced through valuing and use of theory and research, critical thinking and decision-making, informatics' technology, the ability to manage time and stress, and the use of a career plan and informatics. Prerequisite: ENGLISH 225

6 hrs

[back to top](#)

NURSE 482 Block II: Tools For Interpersonal Effectiveness

This is the second in the four-course sequence. The student will discover that interpersonal effectiveness is a prerequisite to effective management of the care of humans and teams. Interpersonal effectiveness is contingent in an understanding of professional care and caring, ethics in health care, legalities of practice, communication theories and the dynamics of groups and teams. Interpersonal effectiveness is enhanced through the use of such skills as conflict resolution and negotiation, managing change, marketing, team membership, group management, political awareness, technology utilization and communication techniques. Content appropriate to these areas will be covered within this course. Prerequisites: NURSE 481

6 hrs

[back to top](#)

NURSE 483 Block III: Effectiveness In Human Health Outcomes

This is the third in the four-course sequence. It builds upon the personal and interpersonal skills acquired in the first two block courses and focuses on effectiveness in human health outcomes. The student will discover that effectiveness in human health outcomes is a primary goal in the delivery of an optimum continuum of health care that encompasses health promotion, disease prevention and illness care across the lifespan. Achieving effectiveness in human health outcomes across the wellness-illness continuum and the individual-to-community continuum is contingent on acquiring an understanding of epidemiology, levels of care, communicable disease control, case management, theories applicable to aggregate populations, cultural competence, evidence-based care and information technology. Prerequisites: NURSE 482

6 hrs

[back to top](#)

NURSE 484 Block IV: Effectiveness In Complex Health Systems

This is the final course in the four-course sequence. Students will build upon the knowledge and skills acquired in the prior three course in order to examine the essentials of structure and designs, behavior and culture, synergy, workplace diversity, health care finance, and power and politics within complex health systems. Organizational theories, leadership, management and nursing's social responsibility in an emerging global health care environment will also be explored. Prerequisite: NURSE 483

6 hrs

[back to top](#)

NURSE 485 Application To Practice I

This course is the first of two clinical application courses designed to complement didactic content from the four-course block sequence (NURSE 481-NURSE 484). The student will discover that the knowledge they are acquiring in didactic course work can be immediately applied to practice. The students will integrate an increasingly complex knowledge base with an emphasis on developing effectiveness: a) personally; b) interpersonally and ; c) in the health management of populations if clients within the complexity of community based organization, practice settings, and communities. Student cohort group-in collaboration with preceptors from community based organizations and faculty identify field experiences, projects, and direct care experiences based on real need. The processes and outcomes of those experiences will be collective and provide solutions for the health care community. Projects and experiences may therefore be complex, extending across two semesters. Prerequisites: NURSE 481, NURSE 482, Pre-or CO-requisite: NURSE 483 Offered: Fall

3 hrs

[back to top](#)

NURSE 486 Application To Practice

This course is the second of two clinical application courses designed to complement didactic content from the four-course block sequence (NURSE 481-NURSE 484) Working in cohort teams, the students will apply new skills and knowledge to real issues and problems in the delivery of nursing care with an emphasis on teamwork performance and action plan implementation, evaluation, and revision. The students will integrate an increasingly complex knowledge base with an emphasis on developing effectiveness: a) personally; b) interpersonally; and c) in the health management of populations of clients within complex community based organizations and faculty will further develop and/or implement the approved NURSE 485 plan of action. The processes and outcomes of those experiences will be collective and provide solutions for the health care community. Prerequisites: NURSE 483, NURSE 485. CO-Requisite: NURSE 484 Offered: Winter

2 hrs

[back to top](#)

NURSE 488 Special Topics for Professional Nursing

This course is designed to explore current issues and trends influencing nursing practice. The Integrated Value Based Learning and Development Model for Accountability-based Practice is used as a framework for review, analyses of cultural, economic, ethical, political, professional, organizational, research-based, social, technological, and/or value issue as they relate to interdisciplinary practice. Prerequisite: NURSE 483

1 hr

[back to top](#)

NURSE 490 Special Topics

A course of study in a special area of interest in nursing under individual faculty direction. Prerequisite: Consent of instructor.

School of Pharmacy

School of Pharmacy Courses Pharmacy (PHARM)

PHARM 7100 A Introductory Topics In Pharmacy I

Discussion of the system of pharmacy, role of pharmacist as provider of health care, their education and professional organizations. Class meets for two hours once per month. Prerequisite: Admission restricted to provisionally admitted students in the School of Pharmacy. Credit/no credit. Offered: Fall Restrictions: AU 50

0.5 hrs

[back to top](#)

PHARM 7100 B Introductory Topics In Pharmacy II

Continuation of PHARM 100A. Credit/No credit. Offered: Winter Restrictions: AU 50 Prerequisite: PHARM 100A

0.5 hrs

[back to top](#)

PHARM 7101 Professional Skills Development I

This course introduces students to the profession of pharmacy and professional responsibilities and roles of a pharmacist. Students will complete and present a group project solving a community-based health issue as part of this course. This is the first of three courses with an integrated curriculum focused on professional skills development. Prerequisites: Admission to the Pharm. D program. Restrictions: AU 52 Offered: Fall Two 1-hour class sessions are held per week.

2 hrs

[back to top](#)

PHARM 7104 Professional Skills Development III

This course provides instruction in performing the necessary calculations involved with the practice of pharmacy including, but not limited to, calculations, involved with dosing patients by body weight and body surface area, preparing iso-osmotic preparations, and the extemporaneous compounding of pharmaceutical formulations. In addition, professional skills are developed with traditional dispensing of pre-manufactured prescription drugs, extemporaneous compounding, preparing intravenous products, and instruction in the acquisition and interpretation of clinical laboratory data associated with several disease states. Prerequisite: PHARM 414

2 hrs

[back to top](#)

PHARM 7110 Pharmacy Calculations

This course provides instruction in performing the necessary calculations involved in the practice of pharmacy and the dispensing, manufacturing and preparation of dosage forms. Topics covered include but are not limited to: fundamentals of pharmaceutical calculations (numbers,numerals,exponents,ratios,percentages,proportions and fractions); International System of Units; pharmaceutical measurements; interpretations of medication orders and prescriptions; density,specific gravity and specific volume;patient specific parameters involved in dosing(surface area,weight and age); isotonicity and buffer solutions; milliequivalents,millimoles and milliosmoles;dilution,concentration and alligation;and,reducing and enlarging formulas. The ability to apply principles and formulas to solve pharmaceutically relevant problems related to the above listed topics is an outcome for this course. Students must have an understanding of mathematical principles to include algebra and calculus. Prerequisite: MATH 210 Offered: Winter Semester. Restrictions: AU 51&52

2 hrs

[back to top](#)

PHARM 7125 Medical Terminology

This course will provide the necessary information towards proficiency in reading and understanding the meaning of common medical terminology. This ability will provide a foundation for student learning in courses that rely on medical terminology to explain physiologic and clinical processes. Prerequisite: Admission to the Pharm D program. Offered: Fall Restrictions: AU 52

1 hr

[back to top](#)

PHARM 7151 Introduction To Pharmacy Law

This course will provide an introduction to the federal and state laws that pertain to the practice of pharmacy. One hour of lecture per week. Offered: Fall Restrictions: AU 52

1 hr

[back to top](#)

PHARM 7202 Pharmaceutics I

Physicochemical properties of drug systems with consideration of incompatibilities and stabilization of pharmaceutical dosage forms, and physicochemical properties affecting drug action, degradation and bio availability. Three hours lecture and three hours laboratory a week. Prerequisite: PHARM 110 & PHARM104 Offered: Fall Restrictions: AU 51 & 52 (Second Year Professional Standing)

4 hrs

[back to top](#)

PHARM 7203 Pharmaceutics II

Discussion of pharmaceutical processes, equipment and material used in drug delivery systems and the preparation and evaluation of solid delivery systems and parenteral products. Three hours lecture and three hours laboratory a week. Prerequisite: PHARM 202. Restrictions: AU 51 & 52 (Second Year Professional Standing)

3 hrs

[back to top](#)

PHARM 7203 L Pharmaceutics II Lab

In this lab course students will perform hands on pharmaceutical processes, use manufacturing equipment, and prepare formulations in which selected dosage forms are manufactured and evaluated. This is a required lab for BS in Pharmaceutical Science students and a professional elective option for Pharm.D. students. Prerequisite: PHARM 202 Co-requisite: PHARM 203 (AU 51 students only)

1 hr

[back to top](#)

PHARM 7233 U.S. Health Care System and Marketing

U.S. Health Care System and Marketing is a required course for the doctor of Pharmacy degree program at The University of Missouri -Kansas City School of Pharmacy. It consists of two modules: U.S. Health Care System and Medication Safety (Module 1) , and Health Care Marketing (Module 2). The goals of the course are to (1) understand U.S. health care system at the macro level, (2) discuss medication errors and management within U.S. health care system, and (3) learn about marketing process for healthcare products and services. This course provides the context and builds the knowledge base for future required courses such as Pharmacy Practice Management.

3 hrs

[back to top](#)

PHARM 7245 Top 200 I

This course requires the student to commit basic information about the Top 200 most prescribed drugs to memory. Prerequisite: Successful completion of Pharm D courses through semester 4. Offered: Fall and Winter Restrictions: AU 52 Level A

0.5 hrs

[back to top](#)

PHARM 7266 Medical & Medication Error Evaluation & Management

A course designed to discuss the current body of evidence with respect to medical quality, medication errors, and strategies used to improve quality & minimize error rates. At the completion of the course, the student should be able to (1) review and synthesize evidence within the literature; (2) describe the policy framework designed to improve health care quality; (3) describe characteristics and factors that enable & encourage providers to improve the quality of care; (4) describe common causes of medication errors; (5) differentiate strategies to prevent errors; (6) correlate medication errors and specific disease states. Prerequisite: None Offered: Winter Restrictions: AU 52 Level B

1 hr

[back to top](#)

PHARM 7303 Pharmacokinetics And Biopharmaceutics

Study of pharmacokinetic models and equations; the concepts of the rate processes associated with, and the physical and physiological factors affecting absorption, distribution, and elimination of dosage forms. The concepts of bioavailability will be presented so as to prepare the student to evaluate bioavailability data. Three hours lecture and one two-hour discussion period per week. Winter. Restrictions: AU 51 & 52 Level A

4 hrs

[back to top](#)

PHARM 7310 Academic Service Learning I

Students will be assigned to KC area service organization as a part of the Center for the City's Health Ambassadors program. A minimum of 30 contact hours must be completed during the assigned semester. Health education will be the primary focus. Prerequisite: Successful completion of Pharm D courses through semester 4. Offered: Fall/Winter semester
Restrictions: AU 52

1 hr

[back to top](#)

PHARM 7313 Career Planning

This course enables students to engage in the study of career opportunities in the areas of industry, hospital/clinic practice, retail and managed care settings. Pharmacy opportunities are explored through lecture and discussion, guest speakers in the various areas and student exploration with business contacts and research. Topics include understanding career opportunities, achieving one's professional goals, compensation packages and negotiations, and designing a path to accomplish career objectives. Offered: Fall Restrictions: AU 52 Level A&B

1 hr

[back to top](#)

PHARM 7325 Professional Communications in Pharmacy

The goal of PHARM 7325 is to develop verbal and written professional communication skills. PHARM 7325 lays the groundwork for skills students will use later in the curriculum and when they enter practice. Students will learn business, technical and patient-oriented writing skills and how to design and deliver a formal presentation. The class is a mix of didactic instruction and individual and small group activities.

3 hrs

[back to top](#)

PHARM 7326 Evidence Based Medicine

Pharmacists, if they are to assume the role of "medication expert" must have the ability to evaluate the medical literature and use the results of this evaluation to make evidence-based patient care decisions. To do this, pharmacists will need to assimilate existing information, create and assimilate information or create new information. The disciplined approach that evidence-based practice requires will assure the highest quality of problem solving and decision making possible by the pharmacist for patients, consumers and other healthcare providers. This course provides students with tools to evaluate the literature in a critical manner. The student will learn how to integrate information from multiple sources to make more complex healthcare-related decisions. A key aspect of the course is to provide confidence and ability in assimilating existing information into recommendations/decisions. Less emphasis will be placed on the creating of new information. Throughout the course, the student will observe and participate in applying these tools for evidence-based practice to real pharmacy issues in order to make individual patient care and population-based decisions. Prerequisite: PHARM 7420 and PHARM 7325
Co-requisite: PHARM 7485P

5 hrs

[back to top](#)

PHARM 7341 Medicinal Chemistry I

This course is the study of medicinally active substances, both natural and synthetic, which describes their chemical properties, their mode of action, their structure-activity relationships and their metabolic rate. Starting with their origin, it is shown how drugs in a series are developed by chemical modification, quantitative structure activity relationships and receptor theory. The chemical properties of a drug are described and explained. The mode of action of the drug is explained on a biochemical basis whenever possible. Once a drug has had its medicinal effect, it is excreted or metabolized. Reasons for excretion or metabolism are explained. Three hours lecture per week. Prerequisite: CHEM 322R. Corequisite LS-BIOC 365G. Offered: Fall.

3 hrs

[back to top](#)

PHARM 7344 Medicinal Chemistry II

This course is a continuation of PHARM 341. It will focus on classifying drugs based on chemical and/or pharmacological properties. The pharmacophore concept and structure-activity relationships will be emphasized. We will also examine the influence of organic functional groups on physicochemical properties of drugs and eventually their pharmacological activities. Syntheses and metabolism of drugs will also be discussed. The metabolism will focus on organic functional group transformations. Three hours lecture per week. Prerequisite(s): PHARM 341 & LS-BIOC 365G. Corequisite: LS-BIOC 366G. Offered: Winter.

3 hrs

[back to top](#)

PHARM 7345 Top 200 II

Same as Top 200 I, however additional information must be committed to memory building on what was learned in the prerequisite course. Prerequisite: Successful Completion of Top 200 I Offered: Fall and Winter Restrictions: AU 52 Level B

0.5 hrs

[back to top](#)

PHARM 7361 Pharmacology I

Study of the pharmacology of medicinals with emphasis on basic principles, the autonomic nervous system and drugs affecting the cardiovascular and renal systems. Four hours lecture per week. Prerequisites: LS-PHYSICS 400 and LS-BIOC 366 Restrictions: AU 51 & AU 52 Level A

4 hrs

[back to top](#)

PHARM 7362 Pharmacology II

The study of the pharmacology of medicinals with emphasis on drugs affecting the central nervous system, chemotherapy, anti-microbial agents, and drugs used to treat endocrine disorders. Five hours lecture per week. Prerequisite: PHARM 361 or permission of instructor. Winter. Restrictions: AU 51 & AU 52 Level A

5 hrs

[back to top](#)

PHARM 7366 Oncology and Hematology Pharmacotherapy

Oncology and Hematology Pharmacotherapy provides disease-oriented and pharmacy-oriented insight into the pathophysiology, diagnosis, and rational drug treatment of malignancy. The pharmacist's role in selecting drug products, individualizing dosages, supportive care, and monitoring patients is emphasized, with additional emphasis on safety and handling. Prerequisites: Pharmacology I & Pharmacotherapy II. Offered: Spring

3 hrs

[back to top](#)

PHARM 7377 Principles Of Nutrition Support

This course will introduce the student to the fundamentals of nutrition support and prepare him/her for future involvement in this important practice area. It teaches practical skills, including assessment of the patient's nutritional status, estimation of calorie and protein requirements and how to recommend an appropriate formulation to meet these requirements. The student will learn indications for parenteral and enteral nutrition and how to select the most appropriate feeding. The student is taught how parenteral and enteral nutrition is safely administered, will learn the major complications, as well as methods to prevent or treat these problems. Topics covered include venous access, care of venous access devices, central vs. peripheral parenteral nutrition, fluid and electrolyte management, admixture compatibility and stability, and management of the nutrition support patient in various disease states. Restrictions: AU 52 Level A & B

2 hrs

[back to top](#)

PHARM 7378 Introduction to Community Pharmacy Practice

Students will provide patient-centered care in a community pharmacy practice setting. This experience will emphasize application of knowledge gained in didactic course work at the student's level in the curriculum. Activities focus on the delivery of patient care rather than relying on a product-centered model of practice. Prerequisite: Pharm.D. credit and non-credit requirements completed through semester six. Required documentation as noted on the Pharmacy Experiential Programs website. Offered: Summer

2 hrs

[back to top](#)

PHARM 7389 Advances In Drug Therapy

Study of the advances in drug delivery and therapy; the concepts of advanced and novel drug delivery systems, modern drug analysis tools, role of efflux protein in drug kinetics, and transporter/receptor mediated drug delivery. Prerequisites: PHARM 303 Co-Req: PHARM 420 Restrictions: AU 52 Level B Offered: Fall

2 hrs

[back to top](#)

PHARM 7397 Home Health Care

Anything a patient does in the home concerning their healthcare is considered Home Health Care. All aspects of Home Health Care are covered in this class. Diabetic & Ostomy products & care, Durable Medical Equipment (Wheelchair, cane, crutches, etc.), home Renal Dialysis, Wound Care, Respiratory Therapy, IV accesses, Home Infusion Therapy, Hospice Care, and Enteral Nutrition are presented and discussed. Reimbursement issues are not discussed due to constantly changing regulations. This is a "hands on" class with participation in, for example, ostomy fitting, crutches fitting, enteral nutrition taste testing, and a tour of a Home Infusion Pharmacy. Prerequisite: Familiarity with IV Admixtures. PHARM 362 & PHARM 405 Offered: Fall Restrictions: AU 52 Level A & B Co-Req: PHARM 420

2 hrs

[back to top](#)

PHARM 7398 Comprehensive Diabetes Management

The purpose of the course is to provide the student with a multidisciplinary foundation in the principles of diabetes management. The student will develop their knowledge and ability to assess, manage, educate and monitor patients with diabetes. The faculty are comprised of a multidisciplinary team of experts for the online lecturers. The in class discussion will be lead by a faculty member who specializes in diabetes management. Prerequisites: Pathophysiology, Advanced NURSE 548, Pharmacology I, PHARM 361 Restrictions AU52 I Levels A,B,C

4 hrs

[back to top](#)

PHARM 7399 Required Enrollment

Required enrollment for international students in pharmacy training sites.

1 hr

[back to top](#)

PHARM 7404 P Drug Information Clerkship

The candidate will spend one month providing service in the Drug Information Center. Activities are designed to enhance the candidate's skills in retrieval and critical evaluation of the drug literature. Candidates will participate in answering drug information questions and preparation of documents for pharmacy and therapeutics committees and service contracts of the Drug Information Center. Required rotations.

4 hrs

[back to top](#)

PHARM 7405 Pharmacotherapy I

Pharmacotherapy I integrates the fundamentals of pathophysiology and pharmacology to develop the student's ability to provide pharmaceutical care. The course promotes the development and application of problem-solving strategies in self-limiting illnesses. In general, two hours of lecture and two hours of small group discussion per week. Prerequisite: NURSE 548, PHARM 325, PHARM 361, PHARM 414 Offered: Winter

3 hrs

[back to top](#)

PHARM 7406 P General Medicine I

The candidate will spend two semester in a medical service at an affiliate institution. Emphasis of study will be on the care of adults with commonly seen illnesses. Candidates will take part in cnat review conferences, rounds and consultations as directed by the supervising faculty. Successful completion of all coursework through semester 6. Restrictions AU 52 Level B, Prerequisites: PHARM 325 concurrent enrollment in PHARM 420 (Fall) and PHARM 485P (Winter) Offered: Fall/Winter

4 hrs

[back to top](#)

PHARM 7407 P General Medicine II (Ambulatory Care)

The candidate will spend eight weeks in a patient-care service which is dedicated to the care of the ambulatory patient. Emphasis of study will be on pharmacotherapy in adult patients. Candidates are expected to become involved in the provision of primary care, medication maintenance activities and improvement of rationale drug therapy in the practice environment. Strong emphasis is placed on patient counseling and interviewing skills. Required rotation. Prerequisite: Successful completion of all coursework through semester 8. Restrictions: AU 52 Level C Offered: Fall/Winter

8 hrs

[back to top](#)

PHARM 7409 P Health Systems Clerkship

The candidate will spend one month assigned to a health system site. Emphasis of study will be on the organizational, technical and administrative aspects of providing comprehensive pharmaceutical services in a health system. Clinical responsibilities will be maintained throughout the rotation. Candidates will take part in department activities to enhance understanding of the integration of all aspects of pharmaceutical care within the department and other services in the facility (i.e. departmental planning, committee activities, drug distribution, staff supervision and quality assurance programs, formulary management.) Restrictions: AU 52 Level C Offered: Fall & Winter

4 hrs

[back to top](#)

PHARM 7410 P General Medicine III

Continuation of Required General Medicine series. Required rotation. Offered: Fall/Winter Restrictions: AU52 Level C

4 hrs

[back to top](#)

PHARM 7412 P Community Pharmacy Practice Clerkship

The candidate will spend one month assigned to a faculty member whose practice is based in a community setting. Emphasis of study will be on the organizational, technical and administrative aspects of providing comprehensive pharmaceutical services to patients in a community practice. Clinical responsibilities will be maintained throughout the rotation. Candidates will take part in all aspects of pharmaceutical care within the practice (i.e., distribution, counseling, provision of drug information, operations management and practice development). Required rotation. Offered: Fall & Winter Restrictions: AU 52 Level C

4 hrs

[back to top](#)

PHARM 7414 Professional Skills Development II

Students will apply communication skills from prerequisite course work and develop new skills that allow them to provide pharmaceutical care to their patients. Emphasis of study includes: patient interviewing, profile review, counseling, ethical challenge in patient care, communication dilemmas and communicating with other health-care providers and patients with special needs. Additionally, students will be assessed on writing and presentation skills from a range of assignments. One 2 hour lecture and 1.5 hour small group discussion are held per week. Prerequisites: PHARM 101 and COMM-ST 110. Offered: Winter

3 hrs

[back to top](#)

PHARM 7418 P Elective Clerkship I

Elective experiences are an essential element to the candidates' training designed to develop areas of personal interest and to expand their understanding of professional opportunities. These rotations revolve around areas of basic science, clinical practice, research and administration. Candidates may repeat required rotations as electives or may approach faculty to tailor an elective experience to develop an area of interest. Required rotation. Prerequisites: Successful completion of all coursework through semester 8 Offered: Fall/Winter Restrictions: AU 52, Level C

4 hrs

[back to top](#)

PHARM 7419 P General Medicine IV

Continuation of General Medicine series. Required rotation. Prerequisites: Successful completion of all coursework through semester 8

4 hrs

[back to top](#)

PHARM 7420 Health Assessment & Pharmacotherapy II

This course is designed to foster the student's ability to provide pharmaceutical care. Patient assessment is an integral part of the pharmaceutical care process. Students are expected to continue developing and applying problem-solving strategies to complex disease states commonly encountered in pharmacy practice. UP to seven hours of lecture and two hours of small group discussion can occur per week. Evaluation of skills necessary to assess patients will occur throughout the semester. Students are also expected to complete four examinations during the course. Prerequisite: PHARM 303, PHARM 405, PHARM 362 and NURSE 548. Concurrent enrollment in PHARM 406P required. Offered: Fall

7 hrs

[back to top](#)

PHARM 7420 P Elective Clerkship II -Required

Elective experiences are an essential element to the candidates training designed to develop areas of personal interest and to expand their understanding of professional opportunities. These rotations revolve around areas of basic science, clinical practice, research and administration. Candidates may repeat required rotations as electives or may approach faculty to tailor an elective experience to develop an area of interest. Prerequisite: Successful completion of semesters 1-8 didactic coursework. Restrictions: Pharm D Professional level 3&2

4 hrs

[back to top](#)

PHARM 7421 P Elective Clerkship III

Elective experiences are an essential element to the candidates training designed to develop areas of personal interest and to expand their understanding of professional opportunities. These rotations revolve around areas of basic science, clinical practice, research and administration. Candidates may repeat required rotations as electives or may approach faculty to tailor an elective experience to develop an area of interest. Optional rotation.

4 hrs

[back to top](#)

PHARM 7424 Introduction To Dietary Supplement Therapeutics

The course is intended to provide students with an awareness of important issues about dietary supplements to consider when providing pharmaceutical care to patients. Students will learn communication skills specific to discussing supplement use with patients, basic clinical knowledge to avoid or minimize the risk of harm with common dietary supplements, and the skills to retrieve and interpret reliable information to be able to make decisions about new or unfamiliar supplements.

Prerequisite: Fourth Prof Year CO-Requisite: PHARM 420 Restrictions: AU 52 Level B Offered: Fall

2 hrs

[back to top](#)

PHARM 7427 Hospital Pharmacy

Methods utilized by hospitals to distribute medication, as well as the fiscal and administrative aspects of such systems. Students who enroll in this course are to spend at least one four-week portion of the Pharmacy Externship in a general hospital setting unless excused by instructor. Elective. Offered: Winter Restrictions: AU 52 Level B

2 hrs

[back to top](#)

PHARM 7428 Veterinary Pharmacology

Pharmaceutical preparations used in veterinary medicine. Elective.

3 hrs

[back to top](#)

PHARM 7439 Pediatric Pharmacotherapy

Pediatric Pharmacotherapy provides disease-oriented and pharmacy-oriented insight into the pathophysiology, diagnosis, and rational drug treatment of diseases primarily encountered in the pediatric population. The pharmacist's role in selecting drug products, individualizing dosages, and monitoring patients is emphasized. Two hours lecture and 1 hour case discussion per week. Prerequisite(s): 7361,7362 Pharmacology I & II; Pharmacotherapy II Offered: Spring

3 hrs

[back to top](#)

PHARM 7449 Clinical Economics & Medical Decision-Making

This three-hour course is a critical review and evaluation of the economic analysis of medical decision-making. An emphasis will be placed on the critical evaluation of recent literature assessing medical decision-making through the use of such tools as cost-benefit analysis, cost-effectiveness analysis, cost-minimization, markov modeling, bayesian statistics. Prerequisite: Third Yr or Graduate Restrictions: Au 52 or AU 68 91 Level A & B only or instructor consent Offered: Fall

3 hrs

[back to top](#)

PHARM 7451 Pharmacy Law And Ethics

Laws and ethics which affect the practice of pharmacy. Two hours lecture and/or discussion per week. Prerequisite: Completion of all required courses through Sem 6 Offered: Fall Restrictions: AU 52 Level B

2 hrs

[back to top](#)

PHARM 7463 Toxicology

Fundamentals of toxicology, including discussion of the general classes of poisonous substances, their physiological effects, and methods of treatment. Prerequisite: PHARM 361 Offered: Winter Restrictions: AU 51 & AU 52 Level A

2 hrs

[back to top](#)

PHARM 7465 Economics Of Health & Medicine

An economic analysis of the development of the medical market; organized medicine and the structure of existing health delivery systems. The problems of the medical market will be analyzed; the role of insurance will be investigated and alternative public policies will be studied. Prerequisites: Upper level or permission of instructor Restrictions: AU 52 Offered: Fall

3 hrs

[back to top](#)

PHARM 7466 Pharmacy Practice Management

Pharmacy Practice Management is a required course for the Doctor of Pharmacy degree program at the University of Missouri-Kansas City School of Pharmacy. The goal of the course is to build the necessary foundation for basic management skills needed as a professional in pharmacy regardless of practice setting. Management activities include management of self, operations, people, finances, goods, and services. This course does not aim to produce management experts in any one particular facet of pharmacy, but rather to equip students with the fundamental concepts to apply management and economic principals in a variety of situations or settings. Prerequisites: Economics of Health and Medicine

3 hrs

[back to top](#)

PHARM 7467 Religion, Culture And Health

This course addresses the impact of religious beliefs, education, and cultural practices on health and healthcare issues pertinent to various segments of our society. Restrictions: Instructor consent required. Offered: Fall

3 hrs

[back to top](#)

PHARM 7485 P Health Assessment & Pharmacotherapy III

This course is designed to foster the student's ability to provide pharmaceutical care. Patient assessment is an integral part of the pharmaceutical care process. Students are expected to continue developing and applying problem-solving strategies to complex disease states commonly encountered in pharmacy practice. Up to seven hours of lecture and two hours of small group discussion can occur per week. Evaluation of skills necessary to assess patients will occur throughout the semester. Students are also expected to complete four examinations during the course. Prerequisite: PHARM 420. Concurrent enrollment in PHARM 326 and PHARM 406P required. Offered: Winter

PHARM 7746 Pharmacy Practice Management

Pharmacy Practice Management is a required course for the Doctor of Pharmacy degree program at the University of Missouri-Kansas City School of Pharmacy. The goal of the course is to build the necessary foundation for basic management skills needed as a professional in pharmacy regardless of practice setting. Management activities include management of self, operations, people, finances, goods, and services. This course does not aim to produce management experts in any one particular facet of pharmacy, but rather to equip students with the fundamental concepts to apply management and economic principles in a variety of situations or settings. Prerequisite: Economics of Health and Medicine
Restrictions: Pharm D. Professional Level 2

Graduate Courses

Graduate Course Index

College of Arts & Sciences Courses Anthropology

ANTHRO 5530 Anthropology Of Gender

This class explores theories of the social construction of gender in cross-cultural contexts. It will also explore global issues of diversity, local and international politics, the economy and work, education, etc.

3 hrs

[back to top](#)

ANTHRO 5531 Feminist Theories

This class introduces the major feminist theories and their primary authors over the last 200 years. The class takes both an historical (we begin with two millennia of male-centered theories about women) and a conceptual approach (theories are grouped by common ground) and familiarizes the student with both the historical processes that necessitate feminist theories as well as with the breadth of the historically and currently available scholarship. Graduate students are expected to fulfill all undergraduate requirements at graduate-level quality, including independent research components; in addition, graduate students are required to be prepared to lead class discussions. Prerequisites: Introduction to Women's Studies
Offered: Every Winter

3 hrs

[back to top](#)

ANTHRO 5537 Anthropology of Religion

This course explores the ways anthropologists have gone about studying religion from the opening decades of the 20th century to present. The course introduces students to the diversity of human religious expression and experience through anthropological literature and to the diversity of anthropological expression especially as it has been revealed in social scientific studies of religious life. The course is designed to generate a critical dialogue about the special role that religion has played in the ongoing anthropological engagement with "other" societies and cultures over time.

3 hrs

[back to top](#)

ANTHRO 5558 Cultures Of The African Diaspora

The course will explore the cultures of African people and their descendents who settled in Europe, the Caribbean or the Americas due primarily to the impact of the Trans-Atlantic trade in human beings. The focus will be comparative, with emphasis on cultural adaptation, kinship systems, music and religion

3 hrs

[back to top](#)

ANTHRO 5573 Latin American Immigrants and Refugees in the U.S.

This course is the study of history, culture and societies of immigrants and US citizens of Latin American heritage living in the U.S.

3 hrs

[back to top](#)

ANTHRO 5580 Special Studies In Anthropology

An opportunity to explore in depth topics not included in usual course offerings. One or more topics will be announced in advance of registration.

Art and Art History

ART 5501 Scope And Methods Of Art History

A history of the discipline, bibliography, procedures and methods, and similar topics essential to graduate-level work in art history. Every winter.

3 hrs

[back to top](#)

ART 5505 Graduate Technical Colloquium

An advanced study of technical matters pertinent to the production and study of art. Demonstration projects are required. Prerequisite: Permission of the department. Every fall.

3 hrs

[back to top](#)

ART 5506 Graduate Photography

Photography on the graduate level with individual selection of media and technique. Permission of the department is required. May be repeated up to a total of 15 hours.

3-6 hrs

[back to top](#)

ART 5510 Graduate Painting

Painting on the graduate level with individual selection of medium and technique. Permission of the department is required. May be repeated up to a total of 15 hours.

3-6 hrs

[back to top](#)

ART 5513 Graduate Graphic Design

Graphic design on the graduate level with individual selection of medium and technique. Permission of the department is required. May be repeated up to a total of 15 hours.

3-6 hrs

[back to top](#)

ART 5515 Graduate Drawing

Drawing on the graduate level with individual selection of media and technique. Student may pursue selected projects on a group or individual basis. May be repeated up to a total of 15 hours.

3-6 hrs

[back to top](#)

ART 5520 Graduate Printmaking

Printmaking on the graduate level with individual selection of medium and technique. Permission of the department is required. May be repeated up to a total of 15 hours.

3-6 hrs

ART 5565 Seminar In American Art

Graduate-level seminar dealing with an announced area in American art. May be repeated once, provided there is a change in the area of concentration. Permission of the department is required.

3 hrs

[back to top](#)

ART 5566 Seminar In 19Th-Century Art

Graduate-level seminar dealing with an announced area in 19th-century art. May be repeated once, provided there is a change in the area of concentration. Permission of the department is required.

3 hrs

[back to top](#)

ART 5567 Seminar In 20Th-Century Art

Graduate-level seminar dealing with an announced area in 20th-century art. May be repeated once, provided there is a change in the area of concentration. Permission of the department is required.

3 hrs

[back to top](#)

ART 5570 Seminar In Renaissance Art

Graduate-level seminar dealing with an announced area in Renaissance art. May be repeated once, provided there is a change in the area of concentration. Permission of the department is required.

3 hrs

[back to top](#)

ART 5571 Seminar In Art Of Africa, Oceania And New World Cultures

Seminar in art of Africa, oceania and new world cultures. May be repeated once, provided there is a change in the area of concentration. Permission of the department is required.

3 hrs

[back to top](#)

ART 5572 Seminar In Asian Art

Seminar dealing with an announced area in Asian Art. May be repeated once, provided there is a change in the area of concentration. Permission of the department is required.

3 hrs

[back to top](#)

ART 5573 Visual Arts Administration

This course on professional arts administration includes assignments in: copyright laws, database management, ethics issues, evaluation design, gallery museum management, grant writing and budgeting, public relations, resume design, tax laws, and website design and management. Students are required to learn relevant computer programs. This course is also open to music and theatre majors. Research requirements for graduate credit are more comprehensive and professional.

3 hrs

[back to top](#)

ART 5575 Seminar In Baroque Art

Graduate-level seminar dealing with an announced area in Baroque art. May be repeated once, provided there is a change in the area of concentration. Permission of the department is required.

3 hrs

[back to top](#)

ART 5590 Directed Studies In Art History

Individually directed studies or research in selected topics or problems in art history. Permission of the department is required. May be repeated up to a total of six hours applicable to a degree program.

1-6 hrs

[back to top](#)

ART 5591 Directed Technical Studies

Individually directed studies or research in selected projects of a technical nature in studio art. Permission of the department is required. May be repeated up to a total of six hours applicable to a degree program.

2-4 hrs

[back to top](#)

ART 5599 Research And Thesis

Production and/or writing of thesis. Usually taken in the last term of candidacy. Permission of the department is required.

Arts and Sciences

A&S 5500 Interdisciplinary Colloquium On Aging

This course will introduce students to gerontology as a field of study and as a profession. The context for the emergence of the field is set in important demographic transitions of the 20th century. Identification and understanding of major issues and controversies in the field will help locate the contributions of a range of disciplines to aging studies. The connection of these issues with the development of social policies will be discussed.

A&S 5502 Introduction To African American Studies

This course provides an introduction to the contexts, theories, and methodologies that undergird African American studies. In addition to substantial time spent covering particular research skills and resources, students will also be introduced to African American culture and the issues related to African studies from several perspectives: history, literature, sociology, communication studies, and the like. Influences and perspectives from Africa, the Caribbean, and South America will also be covered. The course will thus provide a broad background in African American culture and history, an introduction to the methodologies of several disciplines, and discussion of particular contemporary and historical issues such as slavery, segregation and integration, the Civil Rights Movement, Pan-Africanism, Afrocentrism, and current political debates.

3 hrs

[back to top](#)

A&S 5505 Career Education And Transition In Special Education

This course is designed to increase awareness and knowledge about current disabilities legislation, vocational education, vocational rehabilitation, quality transition programs, school to work, self advocacy, workplace accommodations and comprehensive life skills learning. Prerequisites: EDUP-SP 407 or equivalent. Offered: On demand.

3 hrs

[back to top](#)

A&S 5509 Methods Of Inq: Research Issues And Methods In The Liberal Arts

This seminar is required of all first semester participations in the Master of Arts in the Liberal Studies program. Must be taken concurrent with either A&S 5510, A&S 5511, A&S 5512 or A&S 5513. This course serves as an introduction to various methods of inquiry and research in the humanities, social sciences, and sciences. Offered during four week-ends, the course is taught in conjunction with the week-day class offered that term (A&S 5510 through A&S 5513). This course includes graduate level instruction in library research use of computer generated research tools and a strong emphasis on academic writing. Offered fall and winter semesters.

3 hrs

[back to top](#)

A&S 5510 Method Of Inquiry: An Interdisciplinary Study Of The 1930S

This course is one of a series in the Master of Arts in Liberal Studies program which studies American culture, history, and science by examining major decades of the 20th-century. This seminar offers an in-depth study of America's Great Depression during the 1930s and how the problems of this country related to events across the globe. Readings, lectures, and discussions focus on historical, economic, political, and cultural issues in the face of national conflict. Sessions cover such topics as the emergence of Regionalist artists in the Midwest, the contributions of Kansas City jazz to the creation of a new art form, African-American writers, the role of women in the Depression, economic causes of the Depression, the Pendergast Machine, and scientific developments between the two World Wars. Offered: every fourth semester or on demand.

3 hrs

[back to top](#)

A&S 5511 Methods Of Inquiry: An Interdisciplinary History Of The 1940S

This course examines a decade, in this case the 1940s, from a variety of perspectives. The second world war stimulated profound changes in science, ethics, government, economics, social structures, and cultural constructions of race, class, and gender. In essence, this course will examine how America in the 1940s became increasingly "modern" and assesses the impact of those changes on the nation and the world.

3 hrs

[back to top](#)

A&S 5512 Method Of Inquiry: An Interdisciplinary History Of The 1950S

This course examines a decade, in this case the 1950s, from a variety of perspectives. This course has three major themes: Domestic Politics, Foreign Relations and Scientific Development. Within these three major themes, a broad spectrum of human activity in the arts and sciences will be examined.

3 hrs

[back to top](#)

A&S 5513 Methods Of Inquiry: An Interdisciplinary Study Of The 1960S

As part of the Master of Arts in Liberal Studies series, this course examines a decade, in this case the 1960s, from a variety of perspectives. The Vietnam War stands as a turning point in the ways in which Americans, especially young Americans, viewed their country, the world, and, most importantly, themselves. This decade was crucial to the history of the civil rights movement, the women's liberation movement and American judicial process.

3 hrs

[back to top](#)

A&S 5514 Critical Choices: Methods Of Inquiry In Science

The course surveys current scientific developments and how these developments influence our society, whose citizens must make major policy decisions in areas with significant scientific content. Offered: On Demand

3 hrs

[back to top](#)

A&S 5520 Critical Choices: Final Research Project And Capstone Seminar

This seminar is designed as a capstone experience for students in the last semester of their studies in the Master of Arts in Liberal Studies program. Working with three faculty members of the graduate faculty (one member each from the humanities, the social sciences, and the sciences), each student defines a final research project, spends the semester developing it, and presents his or her findings to the seminar at the conclusion of the course. Each project is intended to be thought-provoking and to be researched from an interdisciplinary point of view.

3 hrs

[back to top](#)

A&S 5535 Directed Studies In Liberal Arts

Open to students in the Master of Arts in Liberal Studies Program, this course offers students the opportunity to pursue independent work at the graduate level on selected topics of an interdisciplinary nature, working with faculty members from at least two different departments. The course may not be repeated beyond a total of three credit hours. Permissions of the MALS Programs Director required.

1-3 hrs

[back to top](#)

A&S 5540 Liberal Arts Thesis

Open to students in the Masters of Arts in Liberal Studies Program who wish to include a written thesis in their program of studies. The course may not be repeated beyond a total of three credit hours. Permission of the MALS Program Director required.

1-3 hrs

[back to top](#)

A&S 5550 Seminar In Social Science Perspectives Study Of Community

3 hrs

[back to top](#)

A&S 5571 A Seminar In The Social Sciences

This is a designated Arts and Sciences course which gives all departments in the College the flexibility to offer, on demand and as the need arises, a graduate level seminar in a particular area of specialization in any discipline in the college. The individual departments determine the content of the course in any given term in the same manner as any seminar is currently handled. The departments are responsible for approving individuals or groups for the course and determine whether or not the course will be included as a part of post baccalaureate degree in their disciplines.

1-6 hrs

[back to top](#)

A&S 5572 Seminar In Philosophy Of Science I

3 hrs

[back to top](#)

A&S 5581 Practicum Seminar In Aging

This practicum experience is for students who already have substantial experience working in the aging services network. Students, faculty and service providers to the elderly from the community will discuss a work on solutions to practical problems and issues confronted in agencies serving the elderly. The student will complete a written project and related oral examination on a problem pertinent to his/her work experience.

3 hrs

[back to top](#)

A&S 5591 Practicum In Community Social Science Research

3 hrs

[back to top](#)

A&S 5592 Field Practicum In Aging

Students spend 180-480 hours in a field placement with the supervision in a community agency or organization which services or advocated for older persons and keep a journal documenting and reflecting on the practicum activities and experiences, particularly as related to gerontological theory and research. Students will study a particular subject relevant to their placement and describe this in a written project.

[back to top](#)

A&S 5899 Required Graduate Enrollment

1 hr

[back to top](#)

Chemistry

CHEM 5511 Laboratory Safety And Health I

An introduction to laboratory safety and health. Topics to be discussed include good laboratory practice; laboratory hazards; safe chemical handling; storage and disposal; first aid; protective equipment; and federal regulations.

1 hr

[back to top](#)

CHEM 5520 R Survey Of Organic Chemistry

An intensive advanced survey of the structure, synthesis and reactions of organic compounds. Three hours lecture a week.

3 hrs

[back to top](#)

CHEM 5521 R Mechanisms Of Organic Reactions

A comprehensive course in which the mechanisms of organic reactions are discussed in light of modern chemical principles. Prerequisites: CHEM 322R and CHEM 432. Three hours lecture a week.

3 hrs

[back to top](#)

CHEM 5522 Synthetic Organic Chemistry

A critical approach to the synthesis and modification of organic molecules; newer methods will be emphasized. Prerequisites: CHEM 322R and CHEM 432. Three hours lecture a week.

3 hrs

[back to top](#)

CHEM 5529 Selected Topics In Organic Chemistry

Selected topics from the chemistry and theories of organic structures with particular attention to recent developments. Three hours lecture a week.

3 hrs

[back to top](#)

CHEM 5530 Systematic Physical Chemistry

An intensive and comprehensive review of the principles of physical chemistry. This course may either emphasize thermodynamics with an introduction to principles of quantum mechanics or emphasize quantum mechanical description of atoms and molecules, molecular spectroscopy, statistical mechanics and kinetics. Three hours lecture a week.

3 hrs

[back to top](#)

CHEM 5531 Classical Thermodynamics

A rigorous treatment of the laws of thermodynamics and their application to ideal and non-ideal equilibrium systems. Three hours lecture a week.

3 hrs

[back to top](#)

CHEM 5532 Chemical Kinetics

Empirical analysis of chemical reaction rates. Theories of unimolecular and bimolecular reactions, reactions in solution and complex reactions. Review of modern and classical techniques used to study chemical kinetics. Three hours lecture a week.

3 hrs

[back to top](#)

CHEM 5533 Quantum Chemistry

Application of quantum mechanical methods to the study of systems of chemical interest. Exact solutions and approximate methods will be discussed. Three hours lecture per week.

3 hrs

[back to top](#)

CHEM 5534 Molecular Spectroscopy

A theoretical introduction to molecular spectroscopy and its relation to structure. Electronic, vibrational and rotational spectra of chemical systems will be discussed.

3 hrs

[back to top](#)

CHEM 5535 Statistical Thermodynamics

A rigorous treatment of the fundamental concepts of statistical thermodynamics, with applications to specific systems that reflect the interests of students participating in the course.

3 hrs

[back to top](#)

CHEM 5539 Selected Topics In Physical Chemistry

Selected topics and recent developments in physical chemistry. Prerequisite: CHEM 5530 or consent of instructor. Three hours lecture a week.

3 hrs

[back to top](#)

CHEM 5541 R Advanced Analytical Chemistry

An intensive review of modern concepts of analytical chemistry. Prerequisite: CHEM 432. Three hours lecture a week.

3 hrs

[back to top](#)

CHEM 5549 R Selected Topics In Analytical Chemistry

Selected topics and recent developments in analytical chemistry, including modern instrumental methods, electrochemical methods and separation methods. Topics vary from year to year. Prerequisite: CHEM 442 or CHEM 5541R.

3 hrs

[back to top](#)

CHEM 5551 R Advanced Inorganic Chemistry I

A systematic treatment of bonding, structure, reactions and reaction mechanisms of inorganic compounds, with emphasis on classical transition metal compounds and organometallic compounds. Prerequisite: CHEM 451 or equivalent.

3 hrs

[back to top](#)

CHEM 5553 R Organometallic Chemistry

A survey of the synthesis, structure and reactions of organometallic compounds. Prerequisite: CHEM 5551R or consent of instructor. Three lecture hours each week.

3 hrs

[back to top](#)

CHEM 5559 Selected Topics In Inorganic Chemistry

Various special topics in the inorganic area to be offered in different semesters. Prerequisite: CHEM 5551R or consent of instructor. Three hours lecture a week.

3 hrs

[back to top](#)

CHEM 5567 Advanced Bioorganic Chemistry

This course examines the organic chemistry and laboratory synthesis of the major biopolymers and organic chemistry related to biological systems. Emphasis is on literature and library research and natural product and solid phase organic synthesis, combinatorial synthesis, bioconjugates and applied bioorganic chemistry.

3 hrs

[back to top](#)

CHEM 5571 R Introduction To Polymer Chemistry

Survey of organic and inorganic monomers and polymers; the occurrence, synthesis, structures and properties of natural and synthetic polymers; discussion of general properties of plastics, elastomers, fibers, resins and plasticizers. Prerequisite: CHEM 432. Three lecture hours a week.

3 hrs

[back to top](#)

CHEM 5579 R Selected Topics In Polymer Chemistry

Selected topics and recent developments in specialized fields of polymer chemistry. Presented at intervals, topics vary from year to year.

3 hrs

[back to top](#)

CHEM 5580 R Computer Applications To Chemical Problems

An intense course in FORTRAN programming and its uses in chemical problems related to theory and experimentation. Emphasis will be placed on the mathematical structures of the chemical problems and the coding of these problems into Fortran. No previous programming experience is required.

3 hrs

[back to top](#)

CHEM 5587 Environmental Chemistry I

A survey of how chemical principles can be applied to the environment. Included will be topics in aquatic chemistry, atmospheric chemistry and chemistry of the geosphere and soil.

3 hrs

[back to top](#)

CHEM 5588 Environmental Chemistry II

Discussion of selected topics in advanced environmental chemistry, such as environmental toxicology, environmental risk, the chemistry of hazardous wastes and their treatment, and environmental analytical chemistry.

3 hrs

[back to top](#)

CHEM 5590 Directed Studies

Intensive readings and/or research in an area selected by the graduate student in consultation with the instructor.

1-3 hrs

[back to top](#)

CHEM 5598 Research Methodology Conference

Student will meet on an individual basis with two faculty members who are involved in research. The student's adviser will coordinate this course.

3 hrs

[back to top](#)

CHEM 5599 Research And Thesis

Research for thesis.

1-9 hrs

[back to top](#)

CHEM 5611 Chemistry Seminar

Presentation and discussion of topics currently appearing in United States and foreign literature. One hour each week.

1 hr

[back to top](#)

CHEM 5699 Research And Dissertation

Research for dissertation.

1-16 hrs

[back to top](#)

Communication Studies

COMM-ST 5554 Advanced Screenwriting

This course provides students with advanced theory in narrative screenwriting, training in industry standard script analysis (called "coverage") and short story editing. Students will be required to draft, revise and workshop a short film or screenplay or will focus on a feature screenplay, delivering a draft and revision of the first act and a detailed outline for the rest of the script. Students will workshop feature screenplays in small groups, emphasizing the art of constructive story editing. Prerequisite: CommSt 240; Intro to Screenwriting Offered: Spring

3 hrs

[back to top](#)

COMM-ST 5597 Directed Graduate Studies: Readings

Special Projects on the graduate level.

1-6 hrs

[back to top](#)

COMM-ST 5598 Directed Graduate Studies: Non-Thesis Research

Special projects on the graduate level.

1-6 hrs

[back to top](#)

Criminal Justice and Criminology

CJC 5500 Sociology Of Law

A sociological study of the legal system with focus on organizational analyses of the legal profession, courts as a social system, the bureaucratization of the legal process, stratification and the allocation of legal services and careers.

3 hrs

[back to top](#)

CJC 5501 Proseminar To The Criminal Justice System

This course is designed to address issues affecting the entire criminal justice system. The course addresses aspects of policing, courts and court administration, and the state of American correctional practices.

3 hrs

[back to top](#)

CJC 5510 Sociological Methods I

A survey of methods used by sociologists: selection and formulation of problem, research design, survey research, participant observation, sampling, reliability and validity, and use of scales, and data analysis. Crosslisted with SOCIOL 510. Offered: Fall. Prerequisites: CJC 483 or equivalent

3 hrs

[back to top](#)

CJC 5511 Sociological Methods II

Quantitative research is the primary focus of the course; emphasis is placed on problem formulation; research design; sampling procedures, questionnaire construction and interviewing techniques; data collection; problems of scaling, computer statistical programs; linking appropriate statistical analyses with data analysis; and report writing. Cross listed with SOCIOL 511. Prerequisite: CJC 483 or equivalent.

3 hrs

[back to top](#)

CJC 5516 Intermediate Statistics

A systematic development of the logic and practice of selected statistical methods used in sociological research. Included are analysis of variance and covariance, regression analysis, multiple contingency, and non-parametric tests. Prerequisite: CJC 363 or equivalent. Crosslisted with SOCIOL 516.

3 hrs

[back to top](#)

CJC 5518 Advanced Criminological Theory

This course provides an understanding of past as well as present criminological theories by examining each criminological tradition (beginning in the 18th century and continuing into the present.) The primary aim of the course is to determine the root causes of deviant and criminal behaviors. Moreover, this course offers special attention to how society has historically reacted and responded to crime and deviant behavior. Furthermore, by examining crime and deviant behavior from a historical context, the students are able to determine how criminological theories have influenced public policies designed to reduce and control criminal behavior. In the final analysis, students will examine the rationales that society use to justify efforts toward punishment and treatment. Prerequisite: CJC 319 or equivalent.

3 hrs

[back to top](#)

CJC 5520 Juvenile Justice

This course provides a historical and contemporary overview of the juvenile justice system via a critical examination of the function of this system and theories explaining delinquency in adolescence. We will explore special topics within juvenile justice and proposals for juvenile justice reform.

3 hrs

[back to top](#)

CJC 5551 Seminar In Policing

This course addresses the important topics related to the institution of policing. Through readings and class discussions, students will gain a better understanding of both historical aspects of policing as well as the future of policing. Topics include selection, training and socialization, police management, deviance and corruption, use of force, community oriented policing.

3 hrs

[back to top](#)

CJC 5565 Seminar In Crime Prevention

This seminar examines variations in methods to reduce crime in America, including strategies from the criminal justice system as well as other institutions. Building on established criminological theory, this seminar will evaluate the best practices to prevent crime across a variety of social contexts.

3 hrs

[back to top](#)

CJC 5570 Contemporary Corrections And Correctional Policy

Present-day correctional alternatives are considered regarding the correctional policy that is, or potentially can be, carried out within the various programs. Prisons, probation, parole community-based programs are evaluated as to the theory of punishment demonstrated within these programs. Emphasis is placed on what constitutes a rational and workable corrections policy and the form of correctional programs needed to realize such policy.

3 hrs

[back to top](#)

CJC 5571 Legal Aspects Of Criminal Justice Professionals

This course is designed to acquaint students with the powers that correctional administrators enjoy. In the final analysis, the course addresses the legal liabilities that administrators face if they infringe on the rights of people in the places of confinement.

3 hrs

[back to top](#)

CJC 5575 Correctional Rehabilitation And Treatment

This course will begin with a thorough examination of the rise, fall, and recent resurrection of "rehabilitation and treatment" in American Correctional strategies. Both past and current treatment strategies will be studied regarding their effectiveness in reducing recidivism. This will be done through a survey of the quantitative literature base. There will be some emphasis on treating special needs offenders (e.g., sex offenders, juvenile offenders, offenders with developmental disabilities or mental illnesses).

3 hrs

[back to top](#)

CJC 5576 Seminar In Criminal Justice And Criminology Issues

This course is an advanced exploration of the relationship between the criminal justice system and criminal behavior from at least one of the following perspectives: psychological, sociological, economic, legal, political or administration/ management. Will include discussions and analysis of contemporary readings and on-going research in the selected perspective.

3 hrs

[back to top](#)

CJC 5580 Seminar: Policy And Decision Making In Criminal Justice

The focus of the course is the nature and scope of policy and decision-making processes in legal institutions and law enforcement bureaucracies.

3 hrs

[back to top](#)

CJC 5590 Directed Studies In Criminal Justice And Criminology

Individual research and study in the student's field of interest as approved and directed by major professors. The work involves examination and reporting of selected problems affecting the various agencies of our legal system. A. Law Enforcement B. Court Operations and Administration C. Corrections D. Legal Theory and Philosophy E. Criminological Theory F. Sociology of Law

1-3 hrs

[back to top](#)

CJC 5592 Advanced Gis For Crime Analysis

This course provides an overview of crime mapping as it relates to the spatial and temporal analysis of crime. Utilizing theory related to criminal offending, this course will provide students with hands-on experience in geographic profiling and crime prevention strategies. Prerequisites: GEOG 203 or equivalent

3 hrs

[back to top](#)

CJC 5595 Crime Analysis Internship

This experience involves working with crime analysts in the field. Students will learn and hone practical skills while being supervised by department faculty or staff. Prerequisite: CJC 592

3 hrs

[back to top](#)

CJC 5599 Research And Thesis

Directed specialized research. Before writing a thesis, the student must clear the topic and research design with the Supervisory Committee.

1-6 hrs

[back to top](#)

CJC 5699 Dissertation Research

Individual directed research leading to preparation and completion of doctoral dissertation. Prerequisites: PH.D course requirements completed. Offered: Every Fall, Every Winter, Every Summer.

1-12 hrs

[back to top](#)

CJC 5899 Required Graduate Enrollment

1 hr

[back to top](#)

Economics

ECON 5501 Advanced Macroeconomic Analysis

Basic theoretical concepts of national income and statistical tools utilized in its measurement. Aggregate demand and supply as problems of economic dynamics. The course includes examination of the primary competing theoretical approaches: neoclassical, Keynesian, new classical, real business cycle, new keynesian supply side, Austrian, and Post Keynesian. Topics covered include growth, money, labor markets consumption, investment, expectations formation, role of time and uncertainty, equilibrium and disequilibrium analysis, exchanges rates, international trade. and optimal currency areas. Policy implications of the various macroeconomic theories are explored. Prerequisites: ECON 301 and ECON 302, or their equivalent. Offered: Fall 2001.

3 hrs

[back to top](#)

ECON 5502 Advanced Microeconomic Analysis

The course first provides a critical survey of neoclassical microeconomic theory, including methodology, demand theory, production and cost theory, theory of competitive and non-competitive markets, distribution, welfare, and general equilibrium. It then introduces heterodox microeconomic theory, covering its historical origins, methodology, structural organization of economic activity, in-put-output models, flow of funds, agency and institutions, and the business enterprise. Prerequisites: ECON 302, ECON 521

3 hrs

[back to top](#)

ECON 5504 R American Economic History Since 1865

The course deals with the emergence of Industrial America since 1865. It will cover the rise to dominance of the large modern corporation, with the problem of economic and social instability and stability, with the rise of trade associations, cartels, and government regulation in an unstable economy, and with the evolution of American economic policy and national economic planning. The course is the same as HISTORY 566R.

3 hrs

[back to top](#)

ECON 5504 RR American Labor History

This course examines the history of work and the working class in the U.S. from 1750 to the present. We will focus on the transformation of the workplace, the rise of the union movement, the nature of cultural and political organizations, workers' relationships with other social groups, and the role played by gender, race, and ethnicity in uniting or dividing the working class. Also cross-listed with HISTORY 566RR. Prerequisites: graduate standing

3 hrs

[back to top](#)

ECON 5505 Advanced Comparative Economic Systems

Contents vary depending upon the instructor's design for the course. Prerequisite: ECON 301, ECON 302.

3 hrs

[back to top](#)

ECON 5506 Advanced History Of Economic Thought

This seminar uses issues raised in the reading of two 'classic' primary texts, Adam Smith's *An Inquiry into the Nature and Causes of the Wealth of Nations* (1776) and John Maynard Keynes's *The General Theory of Employment, Interest and Money* (1936), as points of departure for the examination of a series of topics in the history and development of economics and alternative paradigms in the discipline. These investigations will lead us to the study of a number of other seminal articles, representing alternative approaches in the field. Topics include competition, accumulation, path dependence and endogenous technical change, cumulative causation, the laws of return, money and credit, capital theory, and more. Prerequisites: ECON 301, ECON 302

3 hrs

[back to top](#)

ECON 5508 Controversial Issues In Recent Economic Literature

This course will focus on theoretical and policy-oriented controversies that have occurred in economic in the 20th century. The type of controversies covered include, but are not restricted to, money, unemployment, business cycles and economic growth, pricing and administered prices, capital controversy, labor theory of value controversy, and free trade vs. protectionism. While the course concentrates on recent debates, it identifies the origins of the modern disputes in earlier controversies. For each controversy, its real world importance and policy implications are discussed.

3 hrs

[back to top](#)

ECON 5512 Advanced Economic Development

Contents vary depending upon the instructor's design. Prerequisite: ECON 301, ECON 302.

3 hrs

[back to top](#)

ECON 5513 Economic Cycles And Growth

A critical review and evaluation of economic analysis and the forces of economic fluctuation and growth; and analysis of statics, dynamics, monopolistic competition, the role of the interrelationships of the market structure and other institutional forces as they relate to fluctuations and growth. An emphasis will be made on the critical evaluation of recent literature in the field of economic analysis related to fluctuations, growth, statics, dynamics, market structure and the reinterpretation of economic fluctuations, growth, forecasting and overall economic behavior. An analysis of the technological, monetary, and fiscal policy implied by economic trends and growth will also be discussed. Prerequisite: ECON 501 or its equivalent or by special permission of the instructor.

3 hrs

[back to top](#)

ECON 5516 L Law And Economics

This course will examine the use of economic principles in the analysis and applications of public and private law. Emphasis will be given to the efficiencies of laws in meeting social objectives, how laws can be modified to become more economically efficient, and the uses of economics in the actual practice of the law. Issues covered will include proofs of liability in antitrust, contracts and employment law using statistical and economic analysis, and the calculation of economic damages in commercial, employment and personal injury/death litigation.. Graduate students will be assigned a specific research paper.. Prerequisites: ECON 302 or consent of instructor.

3 hrs

[back to top](#)

ECON 5521 Mathematical Economics

An introduction to mathematical methods as applied to the questions addressed by economists. The principal methods to be applied are matrix algebra and differential calculus in the context of optimization. Other topics may include integral calculus, differential equations, difference equations or linear and nonlinear programming. Prerequisites: ECON 301, ECON 302 and MATH 110 or equivalent

3 hrs

[back to top](#)

ECON 5525 Econometric Methods

Continuation of ECON 425. The major problems encountered in building and testing economic models are treated and alternative solutions to these problems are discussed. Major topics include corrections for heteroscedasticity and autocorrelation, maximum likelihood and BLUE estimation, simultaneous equations methods, probit and logit analysis and distributed lags. Other topics may include ARIMA or other series analytic methods, three stage least squares and dynamic multipliers or simulation. Work with econometric software is stressed. No programming experience necessary. Prerequisite: ECON 425 or equivalent and ECON 521

3 hrs

[back to top](#)

ECON 5529 Readings In Quantitative Economics

Readings from the economic literature which stress advanced mathematical or econometric tools. A general subject matter is selected by the student with the consent of the instructor. Prerequisites: ECON 521, ECON 525

3 hrs

[back to top](#)

ECON 5531 Monetary Theory And Policy

A study of the nature and functions of money and the financial system, with emphasis on monetary theory and its application to current banking and financial problems; recent contributions to monetary theory and current literature. Prerequisite: ECON 301.

3 hrs

[back to top](#)

ECON 5535 Theory Of Public Finance

An inquiry into the scope and nature of economics with emphasis on the nature of the public sector including a brief study of welfare criteria along with the study of ability to pay, benefit theory of taxation, and expenditure theories.

3 hrs

[back to top](#)

ECON 5537 State And Local Government Finance

This course investigates the role, problems and relative importance of municipal governments in the United States. Such areas as the demand for public services, tax and expenditure policies, and intergovernmental fiscal relations will be explored in detail. Case studies of state and local governments will be introduced to emphasize the problems and proposed solutions arising in modern municipal governments. Prerequisite: ECON 302.

3 hrs

[back to top](#)

ECON 5538 Economic Policy

Analysis of the confluence of political and economic behavior, the economics of collective action. Prerequisites: ECON 301 and ECON 302

3 hrs

[back to top](#)

ECON 5540 Advanced International Trade

This course emphasizes the global allocation of resources and distribution of income under various commodity market conditions and government trade policies. Major topics include: comparative advantage; terms of trade; the distribution of gains and losses from trade; perfect vs. imperfect competition; tariffs, quotas and other barriers to trade; exchange rates and the balance of payments; preferential trading arrangements; international factor movements and multinational corporations. Prerequisites: ECON 302, or equivalent; graduate status.

3 hrs

[back to top](#)

ECON 5542 Advanced International Finance

This course emphasizes the global activity and balance of payments implications of government taxation, expenditure and monetary policies under various capital market conditions. Major topics include: exchange rates and the balance of payments; national income determination in an open economy; integrated and non-integrated capital markets; economic growth, stabilization policies and the quest for global economic stability.

3 hrs

[back to top](#)

ECON 5548 Advanced Socialist Economic Systems

The course will deal with the theoretical analysis of socialist economic theory, Marxian and non-Marxian, and/or of socialist economics systems such as those of Eastern Europe, the Chinese mainland and elsewhere. The emphasis of the course will vary depending upon the instructor's design for the course. Prerequisite: ECON 301 and ECON 302.

3 hrs

[back to top](#)

ECON 5550 Regional Economics

The economics of spatial relations, emphasizing basic location and land utilization theory and the role of transport will be considered at the micro-level. Keynesian and neoclassical growth theories and contemporary policy approaches to regional growth and decline are analyzed. Prerequisite: ECON 302.

3 hrs

[back to top](#)

ECON 5551 Advanced Institutional Theory

Evolution, organization and allocation functions of the modern industrial economy. Contributions and limitations of conventional economic concepts. Philosophical and theoretical interpretations of the economy in light of modern developments in philosophy and social science. Prerequisite: ECON 451

3 hrs

[back to top](#)

ECON 5558 Advanced Urban Economics

The study of the city as a dynamic system of interrelated and interdependent markets. Significant markets in cities include land, housing, labor, transportation and public services.

3 hrs

[back to top](#)

ECON 5560 Industrial Organization

The structure, conduct and performance of American industry. Historical evolution of American industry; alternative industrial systems, antitrust policies and their alternatives. Technological change and industrial performance. Prerequisite: ECON 301, ECON 302.

3 hrs

[back to top](#)

ECON 5565 Advanced Health Economics

This course is a critical review and evaluation of the economic analysis of medical markets. An emphasis will be placed on the critical evaluation of recent literature assessing health care systems and institutions, medical care spending, demand estimations for various types of medical services, demand estimation for medical insurance, analysis of medical care productions and costs, analysis of government policy for the deployment of health care resources. Prerequisites: ECON 465 or equivalent. Offered: Every Other Winter on Demand.

3 hrs

[back to top](#)

ECON 5583 Racial Inequality & Public Policy

This course will provoke open debate and discourse about public policy responses to racial inequality. The emphasis is on stimulating participants to think about and to analyze critically the range of strategies offered for reducing racism and racial economic inequality. Offered: On demand

3 hrs

[back to top](#)

ECON 5587 Human Resource Economics

An analysis of the factors determining the productivity of human resource: education, nutrition, job training and work environment. An analysis of work patterns, wage patterns, and the impact of automation. This course will be taught at the same time as ECON 487, the undergraduate Human Resource Economics. Graduate students will be assigned a specific research paper on a topic to be decided with the instructor. Prerequisite: ECON 302

3 hrs

[back to top](#)

ECON 5588 Advanced Political Economy

This course gives students a comprehensive introduction to the history and modern practice of political economy, with particular emphasis on Marxian and Classical political economy. Topics include: value theory, class theory, economic reproduction, economic crisis, the theory of history, and methodology, Course offered on demand. Course may be taken concurrently with ECON 521 Prerequisites: ECON 521 or permission of instructor

3 hrs

[back to top](#)

ECON 5589 Graduate Seminar In Labor Economics

Content of seminar will vary from semester to semester depending upon the instructor's design for the course. Prerequisite: ECON 486.

3 hrs

[back to top](#)

ECON 5590 Special Topics

Selected topics in theoretical and applied economics. Prerequisite: Consent of instructor.

1-3 hrs

[back to top](#)

ECON 5590 A Special Topics

1-3 hrs

[back to top](#)

ECON 5590 B Special Topics

1-3 hrs

[back to top](#)

ECON 5590 C Special Topics

1-3 hrs

[back to top](#)

ECON 5591 Research And Planning Seminar

The objective of this research seminar is to apply the quantitative techniques and theoretical constructs of economics to an urban-regional problem. Students are required to formulate and evaluate present economic models, and then complete a research project. Prerequisites: ECON 502 and ECON 521

3 hrs

[back to top](#)

ECON 5599 Research And Thesis

Directed specialized research.

1-6 hrs

[back to top](#)

ECON 5601 Colloquium In Advanced Macroeconomics

The course will deal with analyses of topics in Macroeconomic analysis and Macroeconomic policies and investigation of current literature in divers areas of Macroeconomic analysis. A written report(s) will be made upon the selected assignment (s). Prerequisite: ECON 501 or equivalent.

3 hrs

[back to top](#)

ECON 5602 Colloquium In Advanced Microeconomics

As a continuation of ECON 502, this course deals with the business enterprises-including production, costs, pricing, and investment-markets, market demand, market governance, general price-quantity models of the economy, microfoundations of the heterodox macroeconomics, and social welfare. Prerequisite: ECON 502

3 hrs

[back to top](#)

ECON 5608 Topics In Economic Theory

This course deals with advanced topics in Institutional, Post Keynesian, and other heterodox economic theory. May be repeated with different topic. Offered on a 2 year cycle or on demand.

3 hrs

[back to top](#)

ECON 5616 History Of Economics In The 20Th Century

The history of 20th century economics is concerned with a number of interdependent issues, including the institutional organization of economics at universities; the historical development of the structures and social networks that make-up the economic paradigms of neoclassical economics, Marxian economics, Post Keynesian economics, and other heterodox economics; and the role of institutional and state power to maintain the dominance of the neoclassical paradigm. The aim of the course is to introduce students to this institutional/organizational history.

3 hrs

[back to top](#)

ECON 5625 Colloquium In Econometrics

This course treats advanced topics in econometrics such as non-linear estimation techniques, model development, simultaneous equation estimation techniques, and simulation. Topics are developed from theoretical and application perspectives. Familiarity with personal computer is necessary. Prerequisite: ECON 521, Mathematical Economics or equivalent, ECON 525, Econometrics, or equivalent, ECON 501, Advanced Macro-economics or equivalent, ECON 502, Advanced Micro-economics or equivalent.

3 hrs

[back to top](#)

ECON 5645 Financial Macroeconomics

This course will introduce the student to the central role of financial analysis in macroeconomic analysis and to theories of macroeconomics instability based on the integration of finance and macroeconomics. It will examine modern finance theory and modern approaches to financial analysis, paying particular attention to the contributions made by Fisher and Keynes. Offered: Fall 2000

3 hrs

[back to top](#)

ECON 5660 Evolution Of American Industrial Society

Drawing on economic and organizational theory, the course will concentrate on the evolution of American industrial technology, the American business enterprise, and the organization of American industries and markets since 1870.

3 hrs

[back to top](#)

ECON 5665 Colloquim In Advanced Health Economics

This course is designed as a seminar with a special emphasis on analysis of econometric methods to assess issues in health care. The topics are developed from a theoretical and applied perspective. Familiarity with personal computers is necessary. Special emphasis will be given in the selection of course topics to the interests and backgrounds of participants. Prerequisites: ECON 565, ECON 521, and ECON 525 or their equivalents. Offered: Every other Winter on demand.

3 hrs

[back to top](#)

ECON 5680 Teaching Methods And Course Design

This course is designed to prepare students for the challenge of teaching economics. Students will be taught how to write a syllabus; how to prepare for class; how to plan learning activities; how to become skillful in leading discussion; how to present an effective lecture; how to test and assess student learning; how to develop effective group projects; how to motivate their students for lifelong learning. Students will be required to design a course to be taught at the 200-, 300or 400-level. It would be possible for the student to design an entirely new course, but it is hoped that the student will choose an existing course, which could then be taught as part of the ECON 681/682 requirement. The student will prepare a complete set of course materials, including a lecture outline, a list of require readings, useful handouts, course materials, including a lecture outline, a list of require readings, useful handouts, course assignments, exams, etc. The course should incorporate an interdisciplinary approach and should emphasize an "active learning" component, designed to promote a "rich learning experience." The student will work closely with an appropriate member of the faculty. Prerequisite: Must have completed/passed Comprehensive Exams Offered: Every Fall

3 hrs

[back to top](#)

ECON 5688 Colloquium On Political Economy

This course is designed as a seminar and will take into account theory and policy analysis from alternative perspectives. The topics covered will include philosophical foundations of contemporary theory and policy, the organization of production information and finance, resource and environment, wealth and income distribution, public and private policy and planning. Stress is placed on contemporary research and students are expected to become involved in research projects.

3 hrs

[back to top](#)

ECON 5690 Special Doctoral Readings In Economics

Special research topics in Economics at the Doctoral level.

1-3 hrs

English

ENGLISH 5500 Introduction To Graduate Study In English

An introduction to historical and contemporary methods of research and scholarship related to English Studies. The course uses a wide spectrum of print and digital materials, library facilities (including archives and Special Collections), Databases, and other resources such as microfilm, to explore English studies as an academic discipline.

3 hrs

[back to top](#)

ENGLISH 5500 P Special Topics

3 hrs

[back to top](#)

ENGLISH 5501 Magazine Editing

A course combining academic study of editorial management, publishing operations and language skills, with "hands on" experience in article evaluation, editing, magazine production and legal matters such as copy right and libel. Class work concentrates on authentic and effective language use, with attention given to copy editing, grammar, typography, printing processes, financing and distribution, for commercial and small-press publications.

3 hrs

[back to top](#)

ENGLISH 5502 Magazine Nonfiction

This course emphasizes the origination and execution of nonfiction magazine articles for a variety of publications. Special attention is given to successful queries, and the various writing techniques required for different kinds or articles. Students learn re-structuring and revision and the legalities affecting writers. Students are expected to complete three publishable articles.

3 hrs

[back to top](#)

ENGLISH 5503 Old English

This course is a study of Old English, its grammar, its poetic style, and its literature, both poetry and prose.

3 hrs

[back to top](#)

ENGLISH 5504 Radio And Television Writing

A course in how to write scripts, both dramatic and comic, for radio and television. Special emphasis is placed on the genesis and continuation of the radio and television series. Principles of dramaturgy for broadcast media are also stressed. Students are expected to write at least one broadcast play, and the pilots for at least three series. Attention will also be given to the marketing of broadcast scripts and to local production of their writing.

3 hrs

[back to top](#)

ENGLISH 5508 Harlem Renaissance

This course examines the period from 1920 to 1940, known as the Harlem Renaissance, a time of unprecedented literary and cultural creativity by Black artists. This course explores a variety of cultural productions, not only traditional forms of literature such as novels, short stories, plays and poetry, but also nonliterary objects of study such as painting, sculpture, and music. Offered: On demand

3 hrs

[back to top](#)

ENGLISH 5510 Black Women Writers

This course explores the writings of African American Women Writers. The course examines how these writers have interacted with and often revised stereotypical representations of African American womanhood typically found within canonical and African American male literatures. The course will examine literature (which might include fiction, poetry, autobiography, and drama) of the nineteenth and twentieth centuries; the majority of the works will be by modern and contemporary authors such as Nella Larsen, Zora Neale Hurston, Toni Morrison, and Terry McMillan. By placing the works in this sort of cultural and historical context, it will be possible to examine the unique tradition of African American women's writings as well as individual texts.

3 hrs

[back to top](#)

ENGLISH 5512 Chaucer

Readings from Chaucer's most important works, especially "The Canterbury Tales" and "Troilus and Criseyde" with emphasis on them as types of medieval genres and on the Middle English language. Students will make in-class presentations and submit papers requiring research and bibliographical work.

3 hrs

[back to top](#)

ENGLISH 5513 Renaissance Literature I

English literature from the time of Wyatt and Surrey to the beginning of the 17th century, including the works of Spenser, Marlowe, Sidney, Shakespeare and others. Students will make in-class presentations and submit papers requiring research and bibliographical work.

3 hrs

[back to top](#)

ENGLISH 5514 Milton

A study of Milton's prose and poetry, with special attention to "Paradise Lost". Students will make in-class presentations and submit papers requiring research and bibliographical work.

3 hrs

[back to top](#)

ENGLISH 5515 Restoration And Early 18Th-Century British Literature

British literature from the late 17th century to the mid 18th century. Selected writers may include Addison and Steele, Behn, Congreve, Defoe, Dryden, Finch, Pope, Rochester, Swift, and Wortley Montagu.

3 hrs

[back to top](#)

ENGLISH 5516 The Romantic Period

An extensive study of selected writers (such as Austen, Barbauld, Byron, Coleridge, Hazlitt, Hemans, Keats, Gilpin, the Shelleys, Wollstonecraft, and Wordsworth) organized around literary themes and/or cultural issues important to the Romantic period. Prerequisite: ENGLISH 327 or permission of the instructor. This prerequisite applies only to undergraduate students.

3 hrs

[back to top](#)

ENGLISH 5517 Modern Poetry

Study of works by modernist poets such as Hopkins, Yeats, Frost, Stevens, Williams, Moore, Pound, H.D., Eliot, Millay, Hughes. Students will make in class presentations and submit papers requiring research and bibliographic work.

3 hrs

[back to top](#)

ENGLISH 5518 19Th-Century American Literature

An intensive study of either selected major American writers in the 19th Century or of 19th-Century literary movements. Students will make in class presentations and submit papers requiring research and bibliographical work.

3 hrs

[back to top](#)

ENGLISH 5519 Teaching Writing: Theories, Histories, Contexts, Practices

This course focuses on issues related to the teaching of English at the high school and college levels, with an emphasis on the teaching of writing. Issues addressed may include assignment design, teaching invention and revision, response to and evaluation of writing, collaborative learning, relationships between reading and writing, classroom uses of electronic media, and institutional contexts within which teachers work. The course is required of Teaching Assistants in the UMKC Composition Program, to be taken either prior to or concurrently with their first semester of teaching. Secondary English teachers and others interested in English teaching are also welcome.

3 hrs

[back to top](#)

ENGLISH 5520 Greater Kansas City Writing Project

Studies in methods and objectives for the teaching of English with special attention to secondary school teaching.

3 hrs

[back to top](#)

ENGLISH 5522 Medieval Literature

Western religious and secular verse and prose, to the 15th-century. Late Middle English works are read in the original; all other selections in translation. Students will make in-class presentations and submit papers requiring research and bibliographical work.

3 hrs

[back to top](#)

ENGLISH 5523 Renaissance Literature II

English literature from 1600 to the beginning of the Restoration, including the works of Donne, Jonson, Milton, and other contemporaries. Students will make in-class presentations and submit papers requiring research and bibliographical work.

3 hrs

[back to top](#)

ENGLISH 5526 The Victorian Period

An intensive study of selected writers (such as Arnold, Braddon, the Brontes, the Brownings, Dickens, Darwin, Eliot, Gaskell, Hardy, Ruskin, and the Rossettis) organized around literary themes and/or cultural issues important to the Victorian period. Prerequisite: ENGLISH 327 or permission of the instructor. This prerequisite applies only to undergraduate students.

3 hrs

[back to top](#)

ENGLISH 5527 Contemporary Poetry

Study of works by contemporary poets (post World War II), such as Auden, Bishop, Hayden, Berryman, Rukeyser, Larkin, Rich, Plath, Heaney, Boland, Komunyakaa. Students will make in class presentations and submit papers requiring research and bibliographic work.

3 hrs

[back to top](#)

ENGLISH 5528 20Th Century American Literature

Major American writers or literary movements of the 20th-century. Students will make in-class presentations and submit papers requiring research and bibliographical work.

3 hrs

[back to top](#)

ENGLISH 5529 Screenwriting II

This advanced screenwriting course should allow students to complete a rough draft of a screenplay that they have begun in another course or on their own. It can also be used as a course in which a play or short story is transformed into a screenplay. Students are expected to be familiar with screenwriting techniques and formats and with cinematic concepts before they enroll in this course. Prerequisite: ENGLISH 429 or permission of instructor.

3 hrs

[back to top](#)

ENGLISH 5531 Late 18Th-Century British Literature

British literature from the mid to late 18th century. Selected writers may include Blake, Burney, Collins, Equiano, Fielding, Gray, Johnson, Sheridan, and Wollstonecraft.

3 hrs

[back to top](#)

ENGLISH 5532 Advanced Creative Writing: Fiction

A course for advanced students of fiction writing. The class will proceed through analysis of models, discussion of general principles, critique of student work. Students will simultaneously be encouraged to experiment and to refine the form and subjects best suited to their talents. Emphasis will remain on the short story, though there may be units in other forms-- novella, film script, the non-fiction essay. May be repeated once for credit. Prerequisite: Graduate Standing Offered: Every Year

3 hrs

[back to top](#)

ENGLISH 5533 Histories Of Writing, Reading, And Publishing

A study of selected topics concerning the material practices of writing, reading, and publishing within specific cultural and historical contexts. Issues examined may include authorship, education, information technologies, libraries, literacy, periodicals, popular literature, publishers, and communities of readers. Offered: On Demand

3 hrs

[back to top](#)

ENGLISH 5534 Postcolonial Literature

An exploration of postcolonialism through the study of literary and theoretical texts created by or representing peoples whose historical experience has been decisively shaped by the experience or legacies of colonialism. Texts will be drawn from a variety of genres and from several countries. The course will consider several definitions of postcolonialism and related terms such as cosmopolitanism, hybridity, diaspora, and nationalism. Prerequisite: None Offered: On Demand

3 hrs

[back to top](#)

ENGLISH 5535 Advanced Creative Writing: Poetry

An advanced poetry workshop that includes intensive reading of contemporary poetry and aims at each student creating a portfolio of publishable poems. The focus of the course will vary to address a variety of topics such as metaphor and closure; imitation and the line; form and voice. May be repeated once for credit. Offered: Every Year Prerequisite: Graduate Standing

3 hrs

[back to top](#)

ENGLISH 5536 Poetic Forms

An advanced creative writing course that focuses on intensive study of and practice in metrics and traditional and nonce forms. May be repeated once for credit. Prerequisite: ENGLISH 315 or its equivalent

3 hrs

[back to top](#)

ENGLISH 5537 Prose Forms

This course covers techniques for planning and drafting major prose forms. Students will learn how to use content as a guide to inventing new forms (i.e. novella, novel, linked-story collection, episodic novel, essay novel, and creative nonfiction book. Prerequisites: ENGLISH 432 ENGLISH 435 Adv CW Prose/Poetry Offered: Winter

3 hrs

[back to top](#)

ENGLISH 5540 American Culture

Texts that offer perspectives on key historical themes of American culture. Texts may be grouped around any culturally significant principle (e.g. region, race, gender, class, ethnicity, religion) or theme (e.g. the mythology of the frontier, marriage and domesticity, the American Dream). Students will make in-class presentations and submit papers requiring research and bibliographical work. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 5541 Girls And Print Culture

This course deals with girl's relationships to the continually evolving print culture. Students will examine various literary representations of girlhood by adult writers, explore texts directed at girls (e.g., conduct books, periodicals, textbooks), and study the writing and reading practices of girls themselves. Offered: On demand

3 hrs

[back to top](#)

ENGLISH 5545 History And Principles Of Rhetoric

A study of selected writings of ancient and modern rhetoricians illustrating key issues in the development of Western discourse theory and practice. Issues examined include the relationships between rhetoric and knowledge, orality and literacy, and rhetoric and poetics. Attention will also be given to the implications of rhetorical theory for modern language instruction. Students will make in-class presentations and submit papers requiring research and bibliographical work.

3 hrs

[back to top](#)

ENGLISH 5547 Introduction To Literary Criticism

An introduction to major schools or methods of literary criticism. The first third of the course is an historical overview of criticism from Aristotle to Northrop Frye. The remainder of the semester is devoted to a study of genetic, formalist, mimetic, affective, intertextual, and deconstructionist approaches. Students will make in-class presentations and submit papers requiring research and bibliographical work.

3 hrs

[back to top](#)

ENGLISH 5550 Graduate Seminar

Authors, works and intellectual currents which form the basis of these seminars may vary from semester to semester, depending upon the instructor's design for the course. May be repeated for credit. Composition & Rhetoric Course 550 covers the first halves of periods which naturally fall in two parts. Continued in ENGLISH 555.

3 hrs

[back to top](#)

ENGLISH 5550 P Graduate Seminar: Sociolinguistics And Dialectology

Seminar focusing on the role of social factors in language use, and on the origin and development of regional and urban dialects in English. Special attention will be paid to sociolinguistic motivations for change, variation and merger in dialects and languages in contact, and Black English. Offered: On demand.

3 hrs

[back to top](#)

ENGLISH 5551 Shakespeare Comedies And Histories

A study of Shakespeare's major comedies and history plays with special emphasis on his dramatic works before 1600. Students will make in-class presentations and submit papers requiring research and bibliographical work.

3 hrs

[back to top](#)

ENGLISH 5552 Early English Drama

English religious and secular drama prior to Shakespeare. Mystery and morality plays are studied with emphasis on their literary and social backgrounds. Close readings of such works as "Everyman", "The Wakefield Second Shepherd's Play" and "The Spanish Tragedy." Students will make in-class presentations and submit papers requiring research and bibliographical work.

3 hrs

[back to top](#)

ENGLISH 5553 Modern Drama 1880-1945

A study of modern drama: Continental, British, and American, including history and development, critical theory, and literary evaluation. This course will focus on the earlier modern playwrights from Ibsen and Shaw, with special attention to naturalism. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5556 Studies In The Novel 1740-1900

An intensive study of no more than three major novelists of the eighteenth or nineteenth century. The content of the course will change, depending on the instructor. Students will make in-class presentations and submit papers requiring research and bibliographical work.

3 hrs

[back to top](#)

ENGLISH 5560 Special Topics

The professor who gives this course determines what its content shall be. All aspects of English studies are within its possible range.

1-4 hrs

[back to top](#)

ENGLISH 5561 Shakespeare-Tragedies And Romances

A study of Shakespeare's major tragedies and late romances with special emphasis on his dramatic literature after 1600. Students will make in-class presentations and submit papers requiring research and bibliographical work.

3 hrs

[back to top](#)

ENGLISH 5562 Restoration And 18Th Century Drama

The drama after the restoration of the monarchy and the reopening of the theatres through the 18th-century. Special emphasis is placed on the comedy of manners and the heroic drama in the Restoration and the sentimental comedy in the 18th-century. Includes such playwrights as Dryden, Congreve, Etherege, Wycherley, Steele, Lillo, Cumberland, Sheridan, and Goldsmith. Students will make in-class presentations and submit papers requiring research and bibliographical work.

3 hrs

[back to top](#)

ENGLISH 5563 Contemporary Drama

A study of contemporary drama: Continental, British, and American, including history and development, critical theory and literary evaluation. This course will focus on the more recent writers, including the absurdist, with special attention to experimental drama. This course is a continuation of ENGLISH 453. Students will make in-class presentations and submit papers requiring research and bibliographical work.

3 hrs

[back to top](#)

ENGLISH 5565 Studies In Modern Novel

An intensive study of no more than three major twentieth century novelists. The content of the course will change depending on the instructor. Students will make in-class presentations and submit papers requiring research and bibliographical work.

French

FRENCH 5500 CF Courts and Culture in the Middle Ages

This cluster course offers an interdisciplinary approach to the study of the Middle Ages, focusing on medieval cultures in Europe. Arranged around a series of themes, the cluster will read a variety of documentary and literary texts to investigate not only the "high culture" of the courts but also the interaction of people from various social backgrounds in Western Europe. Prerequisites: admission to the graduate program in Romance Languages or permission of the instructor.

3 hrs

[back to top](#)

FRENCH 5512 17th-century French Literature

Selected readings in the literature of the 17th century, with an emphasis on non-dramatic works. Also offered as FRENCH 412. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5513 18th-century French Literature

Emphasis on philosophical and social significance. Authors may include Marivaux, Beaumarchais, LeSage, L'Abbe Prevost, Montesquieu, Rousseau, Diderot. Also offered as FRENCH 413. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5514 Medieval Literature

Selected readings in various genres including epic, romance, theater and lyric. Emphasis will be placed on the intertextual relations and the cultural and historical context surrounding text production in the Middle Ages. Also offered as FRENCH 414. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5517 16th-century French Literature

Selected readings in prose and poetry from Marot through Astree. Authors may include Rabelais, Ronsard, du Bellay, Montaigne, Marguerite de Navarre. Also offered as FRENCH 417

3 hrs

[back to top](#)

FRENCH 5520 Non-Dramatic 17th-century French Literature

Evaluation and reading of the works of Malherbe and contemporaries, of Descartes and Pascal and contemporaries, and of the great authors at the height of the classical period.

3 hrs

[back to top](#)

FRENCH 5524 19th-century French Literature

Selected readings in various genres from Romanticism through symbolism. Also offered as FRENCH 424.

3 hrs

[back to top](#)

FRENCH 5526 20th-century French Literature

Selected readings from the Belle Epoque to the contemporary period. Also offered as FRENCH 426.

3 hrs

[back to top](#)

FRENCH 5540 Medieval Romance

The various movements of French medieval romance from the 12th through 15th centuries with an emphasis on the 12th and 13th centuries. Analysis of literary technique and socio-historical context will be stressed. No knowledge of Old French is assumed. Also offered as FRENCH 440. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5544 Renaissance Poetry

French Poetry from the Grand Rhetoriqueurs through the Pleiade. Study of poetic forms, major poets and schools, and different approaches to analyzing poetry. Also offered as FRENCH 444. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5545 Epistolarity and the Novel

Explorations of the genre through the analysis of 17th- and 18th- century French novels. Introduced by a theoretical review. Also offered as FRENCH 445. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5546 17th-century French Drama

The classical period: Emphasis on Corneille, Racine and Moliere. Also offered as FRENCH 446. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5547 19th-century French Poetry

The study of the poetry and dominant poetic movements of the 19th century, with special attention given to different approaches to its analysis. Also offered as FRENCH 447. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5548 20th century French Theater

Analysis of major currents of French theater of the 20th Century, with emphasis upon the postwar period and its movements. Also offered as FRENCH 448.

3 hrs

[back to top](#)

FRENCH 5552 Medieval Poetry

A study of medieval poetry including religious and secular poetry, Provençal and Old French lyric, the influence of poetry in other genres such as romance and theater, later medieval poetry of the 14th and 15th centuries, as well as a discussion of the origins of the lyric. Also offered as FRENCH 452. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5554 The Intellectual Origins of the French Revolution

Study of philosophical and political texts by Montesquieu, Rousseau, Voltaire, Diderot, etc. on government, society, language, freedom and equality. Critical study of the Enlightenment. Also offered as FRENCH 454. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5555 Fin-De-Siecle and Belle Epoque

Study of the literary, cultural and historical context of this time period in French history, for example: Symbolism, Decadence, and the years 1900-1914. Also offered as FRENCH 455. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5556 20th-century French Poetry

The study of 20th-century poetry with special consideration given to different approaches to its analysis. Also offered as FRENCH 456. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5561 20th century French Narrative

The analysis of major currents in French 20th-century narrative, especially fiction and film. Courses will be organized around narrative themes or historical events and will include social and cultural components. Also offered as FRENCH 461. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5563 19th-century French Fiction

Studies in the birth, development, and variation of French Romanticism. Readings include de Stael, Senancour, Constant, Hugo, Stendhal and Merimee. The advent of realism and naturalism in France. Readings include Balzac, Flaubert, Daudet, De Maupassant, and Zola. Also offered as FRENCH 463. On demand.

3 hrs

[back to top](#)

FRENCH 5570 Studies in Critical Thought

Various currents of 20th-century literary criticism and their political and historical contexts. Also offered as FRENCH 470. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5571 Autobiography

Analysis of autobiographies and autobiographical texts such as diaries and memoirs together with theoretical texts on the genre. The concentration of different periods or issues may change from semester to semester, i.e. the art of autobiography as practiced by 20th-century writers, especially women. Also offered as FRENCH 471. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5572 Francophone Studies

Study of different national Francophone literatures. Reading may include writers from Quebec, Haiti, Africa, Louisiana, Vietnam, the French Indies, etc. Also offered as FRENCH 472. Prerequisites: Admission to M.A. in Romance Languages and Literature program or permission of instructor.

3 hrs

[back to top](#)

FRENCH 5580 Special Topics

Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes. Prerequisite: Permission of the instructor. On demand.

1-3 hrs

[back to top](#)

FRENCH 5590 Directed Studies in French Literature

Intensive readings in a field or literary figure to be selected by the student in consultation with the instructor. Available by permission of graduate adviser or instructor, as appropriate, only when student cannot take regularly scheduled courses.

1-3 hrs

[back to top](#)

Geography

GEOG 5502 Environmental Remote Sensing And Digital Image Analysis

This course will provide students with innovative techniques for landscape-level environmental analysis, geographic and geological studies, earth science research, and environmental resources management using remotely sensed data including satellite images. Students will be taught basic remote sensing concepts and technical skills, including energy radiative transfer processes, in remote sensing, sensors and resolutions, computer-based image processing and classification, and remote sensing/GIS integration. Prerequisite: GEOG 203 or permission of instructor

4 hrs

[back to top](#)

GEOG 5503 WI History And Philosophy Of Geoscience

A survey of geoscientific thought since antiquity. The substance of geography will be sought primarily in scholarly treatises, formal analytical systems, and cartography, but the course also addresses geographical principles emerging from the history of such matters as government, law economy, religion, and material culture. Readings, lectures, discussions, research, writing. Prerequisite: Baccalaureate degree or permission of the instructor. On demand. Also offered as GEOG 403WI. Prerequisites: Baccalaureate degree or permission of instructor

3 hrs

[back to top](#)

GEOG 5504 Biogeography And Landscape Ecology

Principles and applications of biogeography and landscape ecology, emphasizing distribution of major ecosystems and related plants and animal species on earth, biodiversity, landscape patterns and processes, and physical, biological, and human interactions. The course explores ecosystem and landscape analyses using advanced GIS, remote sensing, and spatial modeling methods for real problem solving in environmental and biological research, ecosystem conservation, and urban planning and studies. Prerequisites: GEOG 203, GEOG 402 / GEOG 5502, or permission of instructor.

3 hrs

[back to top](#)

GEOG 5506 Global Environmental Change

This course will examine the current rates of global environmental change and potential causes in the context of Earth's natural climate variability. The course will follow a seminar format. Students will read and discuss published articles on current and emerging theories of forcing mechanisms in the Earth's systems. Additional in-depth research and written evaluation are required for graduate credit. Prerequisites: None

3 hrs

[back to top](#)

GEOG 5507 Advanced Geographic Information Science

Prerequisite: GEOG 203 or permission of instructor Offered: On Demand

4 hrs

[back to top](#)

GEOG 5508 Archaeological Field Survey Methods

This class offers instruction in the basic skills required to conduct field surveys in archaeology and other geosciences disciplines. In the classroom, students learn about the development of archaeology as a scientific discipline and how to recognize some of the basic field data sought by archaeologists. Students learn about mapping and land navigation techniques. The field phase of instruction includes visits to archaeological sites in the region.

3 hrs

[back to top](#)

GEOG 5509 Urban Geography

Historical development, morphology and functions of urban places, including intercity relationships and the relationship between cities and their hinterlands; emphasis on American cities. Students will complete a series of reports and a term paper. Offered: On Demand

3 hrs

[back to top](#)

GEOG 5510 Landscape, Language, Literature, And Law

An examination of the geographic underpinnings and implications of languages, literatures, and jurisprudence. The course explores languages' historic rootedness in the interactions between human beings and their surroundings; the varying geographic expressiveness and discrimination of languages; the effect and significance of literary evocations of landscapes; and the cultural and environmental geographic content of the language of law. Readings, lectures, discussions, writing. Prerequisite: Permission of the instructor. Offered: On demand. Also offered as GEOG 410.

3 hrs

[back to top](#)

GEOG 5515 History And Philosophy Of Cartography

An examination of the techniques, assumptions, psychology, and cultural implications of mapping from the Stone Age to the age of satellites and the computerized Geographic Information System. Readings, lectures, discussions, writing. Prerequisite: Baccalaureate degree or permission of the instructor. Offered: On demand. Also offered as GEOG 415.

3 hrs

[back to top](#)

GEOG 5526 Paleoecology: Microfossils And Climate Change

Paleoecology will focus on questions addressing past environments and past climates based on the ecology of microfossils. Micro-organisms are very sensitive to a wide variety of environmental conditions including temperature, precipitation, hydrology, water chemistry, salinity, habitat, and pollution. The fossil remains of these organisms are used as proxy indicators for reconstructing past environmental conditions, climate change, vegetation dynamics, and human impacts. Students will have the opportunity to process microfossils and make interpretations based on analysis of data. Offered: Every other Fall Prerequisite: Permission of Instructor

3 hrs

[back to top](#)

GEOG 5530 Location Theory

An analysis and evaluation of the basic theories that have been developed to account for the spatial arrangements of economic activity. Emphasis on urban areas as nodes of economic interaction. Three hours lecture and discussion per week. Prerequisite: GEOG 311 and six hours in economics or urban studies. On demand.

3 hrs

[back to top](#)

GEOG 5535 Geoarchaeology

This course examines geomorphological and archaeological methods used in reconstructing sites, settlement patterns, and paleo-environments; evaluating archeological site integrity; and assessing the impact of development, with the emphasis on geomorphological evidence. Prerequisite: Physical Geography/ Earth Science; Geomorphology; or permission of instructor. No archaeological background necessary. On demand. Also offered as GEOG 435.

3 hrs

[back to top](#)

GEOG 5537 Population Geography

An analysis of human population: how they grow, their changing compositions, and how and why people migrate from one place to another. Basic demographic processes-mortality, fertility, and migrate- and theory and techniques for their study are discussed. The relationships between population growth and population planning, immigration, urbanization and cities, and the environment.

3 hrs

[back to top](#)

GEOG 5542 Quaternary Environments

This course reviews earth climatic history and focuses on major mechanisms for global and regional climate change. Methods of paleoclimatic reconstruction are examined, including analysis of proxy data and climate modeling. Application of these methods toward prediction of future climate change is also explored. Prerequisites: GEOG 215; Geograpy 314 or GEOLOGY 314; or permission of instructor. On demand. Also offered as GEOG 442.

3 hrs

[back to top](#)

GEOG 5544 Spatial Data Analysis

This course will focus on advanced computation methods for the analysis and modeling of complex and often non-deterministic processes in the spatial and environmental sciences. Students will be introduced to innovative techniques for analyzing large datasets with attribute spaces of very high dimensionality, including hyper-spectral remote sensing data. Prerequisites: GEOG 402 or permission of instructor.

3 hrs

[back to top](#)

GEOG 5548 Satellite Climatology

Use of satellite observations to study the climate system. Discussions consider the development of satellite climatology, sensors, platforms and methodologies use to estimate climate variables from radiance measurements. Aspects of climate that are emphasized include cloud climatologies, cloud systems, atmospheric moisture, radiation budget, and land-surface conditions. Prerequisites: GEOG 315 or permission of instructor. Offered: Every other Fall

3 hrs

[back to top](#)

GEOG 5595 Graduate Seminar In Geosciences I

An introduction to graduate research in the Dept. of Geosciences. Students will attend lectures by faculty and become familiar with research techniques, equipment, and thesis opportunities. Prerequisites: Baccalaureate Offered: Every Fall

1 hr

[back to top](#)

GEOG 5597 Graduate Seminar In Geosciences II

Graduate students in the Geosciences Department will explore the different components of a research project through readings, lectures, writing, and oral presentations. Offered: Winter

1-3 hrs

[back to top](#)

GEOG 5598 Special Topics In Geography

Advanced independent research in Cultural or Physical Geography. Prerequisite: Baccalaureate. By arrangement with instructor.

1-3 hrs

[back to top](#)

GEOG 5598 A Special Topics In Cultural Geography

Advanced independent research in Cultural Geography. Prerequisite: Baccalaureate. By arrangement with instructor.

1-3 hrs

[back to top](#)

GEOG 5598 B Special Topics In Physical Geography

Advanced independent research in Physical Geography. Prerequisite: Baccalaureate. By arrangement with instructor.

1-3 hrs

[back to top](#)

GEOG 5598 D Special Topics In Advanced Gis And Remote Sensing

Advanced independent reserch in geographic information science (GIS) and remote sensing. Offered: On Demand
Prerequisite: Permission of instructor

1-3 hrs

[back to top](#)

GEOG 5598 F Special Topics: Geostatistics And Modeling

Advanced independent research in geostatistics and modeling techniques. Offered: On Demand Prerequisites: Permission of instructor

1-3 hrs

[back to top](#)

GEOG 5598 K Issues In Waste Management

This course focuses on the critical problems of managing the waste materials generated in our society. The course includes discussion of various types of waste-municipal solid waste, hazardous (industrial) waste, nuclear and medical wastes. Sources, handling, storage, transportation, treatment and disposal of these wastes are reviewed. Experts from government and the waste management industry give guest lectures. Prerequisites: None. Offered: Fall & Winter.

1 hr

[back to top](#)

GEOG 5599 Research And Thesis Geography

Students will conduct research and writing in support of a thesis topic, which will have been approved in advance by the appropriate graduate advisory committee. Credit load will also be approved in advance by the student's graduate advisor. Offered: On Demand Prerequisite: Baccalaureate

1-9 hrs

[back to top](#)

GEOG 5690 Special Research Topics

Student will produce a major research paper suitable for publication under the direction of their instructor.

1-3 hrs

[back to top](#)

GEOG 5699 R Research And Dissertation

Research for dissertation in partial fulfillment of the Geosciences requirements for the Ph.D. degree.

1-10 hrs

[back to top](#)

Geology

GEOLOGY 5507 Public Archaeology: Issues in Archeological Resources

This class examines contemporary issues managing archaeological resources. This class is intended for students seeking work in Cultural Resources Management (CRM); those already working CRM, or student anthropology, environmental studies, geology, geography, public administration and other fields likely to deal with archaeological and historical research or employment setting. This class does not require a background in archaeology.

3 hrs

[back to top](#)

GEOLOGY 5508 Archaeological Field Survey Methods

this class offers instruction in the basic skills required to conduct field surveys in archaeology and other geosciences disciplines. In the classroom, students learn about the development of archaeology as a scientific discipline and how to recognize some of the basic field data sought by archaeologists. Students learn about mapping and land navigation techniques. The field phase of instruction includes visits to archaeological sites in the region.

3 hrs

[back to top](#)

GEOLOGY 5509 Field Study in Archaeology

This class offers students an opportunity to attend a field school in archaeology. Students will be taught how to: design archaeological research, set-up excavation, keep a wide range of excavation records, make maps and drawings, take photographs related to excavation problems, identify and recover a broad spectrum of artifact and faunal remains, collect samples for specialized analyses and use a wide range of excavation tools. This course will also introduce students to recording and analyzing excavated materials in the archaeological laboratory. Prerequisite: Consent of instructor.

1-5 hrs

[back to top](#)

GEOLOGY 5512 Geology And Hazardous Waste Management

Nature, sources and characterization of hazardous waste; collection, transportation and disposal of hazardous wastes. Fundamentals of toxicology and risk assessment. Application of geologic principles and methods in the assessments and remediation of abandoned hazardous waste sites and contaminated aquifers. Review of selected case histories. Experts from government and private organizations will be invited to deliver guest lectures. An out-of-town field trip to a hazardous waste site is required. A term paper based on library research or an approved experimental project is required for graduate credit. Pre-requisites: GEOLOGY 325, GEOLOGY342 & GEOLOGY 350 or permission of the instructor.

3 hrs

[back to top](#)

GEOLOGY 5521 Advanced Methods for Earth and Environmental Science

This course will provide students with an inquiry-based learning experience that focuses on the application of field methods for understanding surface and subsurface earth processes and environmental issues. Students will collect field data at off campus site, conduct periodic monitoring, and analyze samples using departmental instrumentation. Prerequisite: GEOLOGY 220, GEOLOGY 220L or ENV-SCI 110R and ENV-SCI 110L

3 hrs

[back to top](#)

GEOLOGY 5525 Quaternary Geology

The study of Quaternary processes, surficial deposits, and land forms. Course content will cover both the glaciated and nonglaciated portions of the United States as well as the interrelations between Quaternary geology and urbanization. Three hour lecture. Field trips. Prerequisite: GEOLOGY 314, baccalaureate degree in geology or permission of the instructor.

3 hrs

[back to top](#)

GEOLOGY 5531 X-Ray Diffraction And Fluorescence Methods: X-Ray Mthds Geol/Anly

Theory and practical application of x-ray diffraction and fluorescence methods in characterizing geologic materials. Prerequisite: GEOLOGY 312 or consent of instructor. Two hours lecture and one 2-hour lab per week for 8 weeks.

2 hrs

[back to top](#)

GEOLOGY 5532 Icpms Applications In Geology

Theory and practical application of Inductively-Coupled Plasma Mass Spectrometry in the geosciences and environmental sciences. Prerequisite: GEOLOGY 312 or consent of instructor. Two hours lecture and discussion, and one 2-hour lab per week for 8 weeks.

2 hrs

[back to top](#)

GEOLOGY 5534 Hazardous Waste Operation Management

Overview of federal regulations dealing with hazardous waste management, toxicology, hazard communication, site management, air monitoring, operating procedures, and health and safety. The course includes hands-on training on spill control, equipment use and emergency use and emergency response. Practical training involves physical stress and participants must be in good physical health. This course satisfies OSHA's 40 hour training requirement for hazardous waste personel. Prerequisites: GEOG 335 / GEOLOGY 335 or permission of instructor. Offered: Every Summer

2 hrs

[back to top](#)

GEOLOGY 5535 Aqueous Geochemistry

This course is directed to two objectives. First it will equip the students with a basic understanding of the geochemical principles and calculations which are directly related to environmental problems and second, it will provide the student with a basic understanding of specific problem areas in environmental geochemistry. Prerequisites: CHEM 211 and CHEM 212 or equivalents. Baccalaureate degree in geology or permission of the instructor. Offered: On demand.

3 hrs

[back to top](#)

GEOLOGY 5541 Environmental Geophysics

Fundamental theory and near-surface applications of the geophysical methods including seismic methods, potential methods, and electrical methods. Emphasis will be placed on the use of these methods in environmental and engineering investigations, addressing such issues as water resources, contaminant transport, geotechnical properties, and archaeological protection. course will include a field component illustrating application of selected techniques to a local environmental problem, Prerequisites: Baccalaureate degree in Geology or permission of instructor.

3 hrs

[back to top](#)

GEOLOGY 5542 Electrical Methods In Environmental Geophysics

(3) Fundamental theory and near-surface applications of the electrical geophysical methods; (1) electrical resistivity, (2) electromagnetics, (3) ground penetrating radar, and (4) induced polarization. Emphasis will be placed on the use of these methods in environmental and engineering investigations, addressing such issues as water resources, contaminant transport, geotechnical properties and archaeological protection. Course will include a field component illustrating application of selected techniques to a local environmental problem. Prerequisites: Baccalaureate degree in Geology or permission of instructor.

3 hrs

[back to top](#)

GEOLOGY 5551 Geotechnics

Integration of the basic principles and concepts from material sciences, rock and soil mechanics, and civil engineering. Mechanical properties, geologic aspects and engineering classifications of earth materials and the effects of physical forces on their engineering behavior will be emphasized. Three hours of lecture and two hours of laboratory each week. Field trips. Prerequisite: PHYSICS 210, PHYSICS 220, PHYSICS 230, GEOLOGY 350 or permission of the instructor.

4 hrs

[back to top](#)

GEOLOGY 5555 Environmental Impact Analysis

A systematic analysis of the spectrum of environmental changes related to human use and occupancy in urban settings. Study of the nature of activities such as industrialization, mining, urbanization and transportation, and their effect on the specific site and general region. Methods of measuring aesthetic and economic quality of the urban areas will be explored in an attempt to facilitate writing environmental impact statements. Prerequisites: Baccalaureate degree in geology or permission of the instructor.

3 hrs

[back to top](#)

GEOLOGY 5559 Inquiry-Based Field Studies For Teachers

Inquiry-based studies in environmental science, environmental chemistry and geology involving collaborations between course participants, practicing scientists and professional educators. The course is designed especially for pre- and in-service teachers of all levels and contact areas to enhance critical thinking, problem solving and process skills as defined by state and national standards. Projects will balance field and lab studies with analysis and presentation of results through electronic, oral and written means. Prerequisites: Permission of instructor. Offered: On demand

3-6 hrs

[back to top](#)

GEOLOGY 5561 Geologic Mapping

Analysis of the stratigraphic section in the greater Kansas City area by field investigation. Compilation of descriptive data and the construction of detailed geologic maps. Practical problems to determine the most beneficial use of the land in an area that is rapidly becoming urbanized. Prerequisite: Baccalaureate degree in geology or permission of the instructor. Previous field mapping experience highly recommended.

3 hrs

[back to top](#)

GEOLOGY 5570 Hydrogeology

Geology and hydrologic factors controlling the occurrence, movement, quality, recovery and development of water supply and distribution. Problems relating to urbanization of flood plains. Prerequisite: Baccalaureate degree in Geology or permission of the instructor.

3 hrs

[back to top](#)

GEOLOGY 5571 Tectonics

A detailed inquiry into plate tectonics and the geophysical and geological data that define the motion of lithospheric plates. Global examples of divergent, convergent, and transform plate boundaries will be studied through lectures, discussions, problem sets, and term papers. Prerequisite: GEOLOGY 325 and GEOLOGY350. Offered: On demand.

3 hrs

[back to top](#)

GEOLOGY 5572 Earthquake Geology

This course is detailed inquiry into the study of present and past earthquakes as they are preserved in the seismological, geophysical, and geological record. Global examples of earthquakes will be studied through lectures, discussions, problem sets, term papers, field trips and field projects. Prerequisite: GEOLOGY 350 or permission of the instructor. Offered: On demand.

3 hrs

[back to top](#)

GEOLOGY 5595 Graduate Seminar In Geosciences I

An introduction to graduate research in the Dept. of Geosciences. Students will attend lectures by faculty and become familiar with research techniques, equipment, and thesis opportunities. Offered: Every Fall Prerequisite: Bacalaureate

1 hr

[back to top](#)

GEOLOGY 5597 Graduate Seminar In Geosciences II

Graduate students in the Geosciences Department will explore the different components of a research project through readings, lectures, writing, and oral presentations. Offered: Winter Semester Prerequisites: Bacalaureate

1-3 hrs

[back to top](#)

GEOLOGY 5598 Special Topics In Urban Environmental Geology

Individual research into practical geoscience problems in the urban environment. Provides opportunity for individual research in applied geology. Topic and method to be established by student and academic supervisor prior to enrollment. Instructor: By arrangement.

HISTORY 5501 A Religion In America

An in-depth examination of selected aspects of the history of religions in America from the colonial period to the present. Special emphasis will be given to methodological issues in the study of American religious history. Offered: On Demand

3 hrs

[back to top](#)

HISTORY 5502 America,1000-1763: The Formative Era

Early American history encompasses the formative era of many institutions and attitudes which still persist in present-day America. A study of how these patterns and policies emerged will enlighten us as to our current ways our society seeks to adapt to change.

3 hrs

[back to top](#)

HISTORY 5503 America, 1763-1783: The Revolutionary Heritage

The American Revolution created American history by creating a new nation. What the American Revolution was depends to a large extent upon what Americans think they are or ought to be. The goals of this course, therefore, are twofold: (1) to probe the nature, causes and consequences of the American Revolution; (2) to assess the intentions and behavior of both the Framers of the Constitution in 1763-1783 and the inheritors of modern America.

3 hrs

HISTORY 5512 A Medieval Women & Children

This course explores the roles of women in the social, economic, political, and cultural environments of medieval and early modern Europe. We examine the lives of women in all areas of life, from the ordinary to the extraordinary, in urban and rural environments, from the centers of religious and political power to the margins of society. Focus will be on the world of work for urban and peasant women and on the social and legal institutions of marriage, kinship, and the family. The course makes extensive use of primary source by and about women during this period.

3 hrs

[back to top](#)

HISTORY 5512 B The Black Death And Late Medieval Society

This course examines all aspects of late medieval and early Renaissance society in Western Europe. The Black Death of 1348/1349 serves as the entry point into the historical study of the economy, demography, and culture during this transitional period.

3 hrs

HISTORY 5515 B 17Th And 18Th Century European History

This course is designed to present the upper-division undergraduate with a firm grasp of the major intellectual, cultural, political and economic development of 17th and 18th century Europe. It considers the bitter Thirty Years War in Century Europe, the rise of the Netherlands, the fall of Italy and Spain, the rise of constitutional and absolutist styles of government, the scientific revolution, the colonization by Europeans of the Pacific and Indian Ocean Basins, Enlightenment political philosophy, the Agricultural Revolution, and the French Revolution. Also offered for undergraduates as 415B. Graduate students will be held to a higher standard in terms of additional, in-depth historiographic research, writing, and discussion.

3 hrs

[back to top](#)

HISTORY 5516 The French Revolution And Napoleon

See course description HISTORY 416R. Fall.

3 hrs

[back to top](#)

HISTORY 5517 19Th Century European History

This upper-division course will survey significant trends in warfare, politics, economics, social relations and culture in 19th century Europe, paying particular attention to the rise of modern ideologies and identities, world hegemony, and the social technologies of dehumanization that foreshadowed the unprecedented imhumanities of the 20th century. Also offered for undergraduates as HISTORY 417R. Graduates will be held to a higher standard in terms of additional, in-depth historiographic research, writing, and discussion.

3 hrs

[back to top](#)

HISTORY 5518 20Th Century European History

This upper-division course traces the history of Europe in the 20th century. It will survey significant trends in warfare, politics, economics, social relations and culture, paying particular attention to the issues of modernity and postmodernity, imperialism and decolonization, dehumanization and genocide as well as the role of ordinary people in these systems of mass destruction. Also offered for undergraduates as HISTORY 418R. Graduate students will be held to a higher standard in terms of additional, in-depth historiographic research, writing, and discussion.

3 hrs

[back to top](#)

HISTORY 5519 Contemporary European History: 1950-2000

This upper-division course traces the history of Europe in the period of living memory. It will survey significant trends in warfare, politics, economics social relations and culture, paying particular attention to the rise of globalization and the condition of postmodernity, decolonization and neo-colonization, European unification and everyday life. Also offered for undergraduates as HISTORY 419R. Graduate students will be held to a higher standard in terms of additional, in-depth historiographic research, writing, and discussion.

3 hrs

[back to top](#)

HISTORY 5523 Social History Of Recent America

See course description HISTORY 323R.

3 hrs

[back to top](#)

HISTORY 5525 R European Criminal Justice History, 500-1900

This course will survey European crime, criminal procedure, policing and punishment between 500 and 1900. Particular attention will be given to changing methods of proof (oaths, ordeals, juries); changing type of criminal activity (banditry, vagrancy, witchcraft, professional theft) and changing penal strategies (the stocks, breaking on the wheel, the workhouse, the prison, the penitentiary). English experiences are emphasized.

3 hrs

[back to top](#)

HISTORY 5526 Modern Latin America

This course studies social, political, economic and cultural trends in Latin America in the nineteenth and twentieth centuries. Discussion topics include nation building after Independence with an emphasis on gender and race in the creation of national identities and new forms of social stratification; integration of national economies into the world economic system; the expansion of political participation and citizenship; immigration (national and transnational) and the tensions caused by the forces of modernization and tradition. Although the purpose of the course is to provide a general background for a large and diverse region (more than 20 countries), case studies from Argentina, Mexico and Brazil will illustrate the above-mentioned themes and will provide the basis for a comparative regional perspective.

3 hrs

3 hrs

[back to top](#)

HISTORY 5528 A History Of The Body

This advanced course will explore the new field of the history of the body, with particular attention to sexuality and gender. Topics will include the history of sexualities, the body and society, body disciplines, medical practices and representations of illness, beauty, and fashion, and the relationship between sexualities and nationalisms.

3 hrs

[back to top](#)

HISTORY 5528 B Women & Medicine:Patients & Practitioners From Antiquity-Present

This course explores, in a selective fashion, the role of women in Western Medicine both as health care providers and patients. The subject of the history of medicine is too broad to be covered comprehensively in a semester, and so we will focus on diseases or physical conditions which were believed to be limited to women-childbirth, certain mental health conditions, reproductive health, breast cancer-as well as the increasing marginalization of women within the profession of health care providers to those branches concerned primarily with "women's problems."

3 hrs

[back to top](#)

HISTORY 5530 The Ordeal Of Total War Europe,1900- 1950

This upper-division course traces the history of Europe-on its own and in its relations to the rest of the world from its use of genocide "beyond" its shores to its systematic application in Europe. It will survey significant trends in warfare, politics, economics, social relations and culture, paying particular attention to the causes for war and the expansion of violence, modernization and modernity, democracy and totalitarianism, colonization and resistance, mass destruction and everyday life. Also offered for undergraduates as 43.0. Graduate students will be held to a higher standard in terms of additional, in-depth historiographic research, writing, and discussion.

3 hrs

[back to top](#)

HISTORY 5531 Medieval England, 1066 To 1485

See course description HISTORY 431R.

3 hrs

[back to top](#)

HISTORY 5532 Tudor-England, 1485-1688

This course covers the history of England from the accession of Henry VII in 1485 to the crowning of William and Mary in the Glorious Revolution. Its main emphasis is the Tudor dynasty 1485-1603 with special reference to the transformation of England into a modern state, Re-Reformation, the role of Parliament, etc. The course concludes with the major characteristics of the early Stuart period.

3 hrs

[back to top](#)

HISTORY 5533 Modern Britain, 1603-Present

This course examines the rise and fall of the Stuart dynasty and the effects of civil war, rebellion, and religious turmoil on the peoples of Britain. Next, the establishment of Cabinet government in the eighteenth century, and the loss of the American colonies will be discussed. The dramatic transformation of Britain from a largely isolated and agricultural society to an urban and the industrial one, will be analyzed with particular reference to class, race, and gender. Finally, the role of Britain in both world wars will be considered along with the institution of the welfare state and the transformation of Britain from a world power to a member of the European community of states.

3 hrs

[back to top](#)

HISTORY 5535 R Early Modern German History: 1640-1890

This course traces the emergence specific, centralized nationstates and empires as well as a particular, industrial society in the 250 years since the Thirty-year's War. It introduces students to the national histories of Germany in order to help them think critically about national historiography in general. We will compare the many variations within Central Europe: Prussia/Austria/the Third Germany, city/town/village, state/ society, as well as differences of caste/class/gender/ sexuality/religion. All assigned readings will be in English; a background knowledge of European history is recommended. This course will be followed by HISTORY 536: the contents and assignments will be coordinated, but the former course is not a prerequisite for the latter.

3 hrs

[back to top](#)

HISTORY 5536 Modern German History: 1890-1990

This course traces history of Central Europe from the fall of Bismarck to the reunification of Germany one century later. It will ask students to think critically about the relationship between state and society, elites and 'ordinary' Germans, in the various German-speaking regimes that existed over the course of this era: two empires, two interwar republics, two fascist dictatorships, and three post-fascist republics. All assigned readings will be in English; a background knowledge of European history is recommended. This course follows from HISTORY 435 HISTORY 535; the contents and assignments will be coordinated, but the former course is not a prerequisite for the latter.

3 hrs

[back to top](#)

HISTORY 5566 R American Economic History Since 1865

The course deals with the emergence of Industrial America since 1865. It will cover the rise to dominance of the large modern corporation, with the problem of economic and social instability and stability, with the rise of trade associations, cartels, and government regulation in an unstable economy, and with the evolution of American economic policy and national economic planning. This course is the same as ECON 540r.

3 hrs

[back to top](#)

HISTORY 5566 RR American Labor History

This course examines the history of work and the working class in the U.S. from 1750 to the present. We will focus on the transformation of the workplace, the rise of the union movement, the nature of cultural and political organizations, workers' relationships with other social groups, and the role played by gender, race, and ethnicity in uniting or dividing the working class. Offered: On demand.

3 hrs

[back to top](#)

HISTORY 5567 RS Myth And Ritual

"Myth" and "ritual" have long been fundamental categories in the study of religion. This course will briefly survey some of the major theories and approaches to the study of myth and ritual from the Enlightenment to the present. Will not only trace the shifting meanings of "myth" and "ritual," but will critically evaluate the utility of diverse approaches to the study of religious phenomena designated by these terms. Reading will include theoretical works, as well as selected case studies.

An introduction to a variety of research tools and techniques including such topics as evidence, critical method, verification, bibliography, book review, computers, statistics, and archival methods.

3 hrs

[back to top](#)

HISTORY 5581 How To - History I

This foundational course in the doing of history will use the "great books" of historical scholarship to introduce graduate students to historical questions, methods, theories, and rhetorical strategies. The goal of the course is for the student to learn how to engage in historical criticism and formulate historical questions for themselves. This required course must be taken in the first year of graduate study in history.

3 hrs

[back to top](#)

HISTORY 5582 Colloquium In American History I

These courses are designed to acquaint the graduate student with the writings and theories of major American historians. Faculty lectures are combined with student bibliographical essays and the reading of important historical works in order to prepare the student for the final examination taken upon completion of M.A. course work. Books read in the course compose a large proportion of the departmental reading list. M.A. candidates in American history are required to take both courses. HISTORY 582 covers American history to 1865; HISTORY 583 covers the period since that date.

3 hrs

[back to top](#)

HISTORY 5582 How To - History II

This foundational course in the doing of history will introduce graduate students to professional obligations and research methodologies of academic historians. Pragmatic in focus, it will prepare students for all stages of research and teaching through all aspects of an historical career from graduate school to full professorship or other directions. This required course must be taken in the first year of graduate study in history and it fulfills the SGS recommendation for ethical instruction. Prerequisites: HISTORY 5581GR.

3 hrs

[back to top](#)

HISTORY 5583 Colloquium In American History II

These courses are designed to acquaint the graduate student with the writings and theories of major American historians. Faculty lectures are combined with student bibliographical essays and the reading of important historical works in order to prepare the student for the final examination taken upon completion of M.A. course work. Books read in the course compose a large proportion of the departmental reading list. M.A. candidates in American History are required to take both courses. HISTORY 582 covers American History to 1865; HISTORY 583 covers the period since that date.

3 hrs

[back to top](#)

HISTORY 5583 Medieval Methods & Paleography

This course examines the methodology and historiography of Medieval and Renaissance Studies. Through an introduction to paleography, the study of handwritings, it prepares students for advanced work in these fields. Using an interdisciplinary approach, this course examines the historical and cultural settings for texts, their physical form and production, as well as the tradition of textual transmission in the medieval and early modern world. In addition to gaining familiarity with many different types of primary sources, such as literary, artistic, legal, and notarial sources, students will be exposed to methods for archival work in various European nations. Prerequisite: Permission of instructor

3 hrs

[back to top](#)

HISTORY 5584 Philosophy Of History

Reflecting the instructor's interests and familiarity with the subject, this course will treat the philosophy of history under two relatable forms: (1) the speculative systems of interpretation of world history from Voltaire, through Hegel and Marx to Spengler and Toynbee; and (2) the newer, critical approaches to history and historiography by historicist, analytic, and Marxist philosophers and historians of this past century, from Dilthey, through Collingwood and Ortega to Skinner and Braudel. Depending upon whether the instructor happens to be a specialist in European or in American History the emphasis of content during the course will be altered accordingly.

3 hrs

[back to top](#)

HISTORY 5585 Colloquium In European History II

The European History Colloquium II will examine some of the crucial problems or watersheds in European history from the Reformation through the 20th century. The course seeks to provide an in-depth study of specific topics and of the associated bibliography.

3 hrs

[back to top](#)

HISTORY 5585 Colloquium in U.S. History

Students read broadly in the historiography of a particular historical problem, place, period, or specialization in U.S. History in order to master the relevant literature and hone their skills of historical criticism. Prerequisites: HISTORY 5581GR or concurrent enrollment in HISTORY 5581GR.

3 hrs

HISTORY 5586 Colloquium In World History

Students read broadly in the historiography of a particular historical problem, place, period, or specialization in world history in order to master the relevant literature and hone their skills of historical criticism. Prerequisite; Concurrent enrollment/ successful completion of 5581GR

3 hrs

[back to top](#)

HISTORY 5587 R Research Seminar

Students in this course will produce a major research paper under the direction of the instructor: a self-contained thesis chapter, an article for publication or the equivalent.

[back to top](#)

HISTORY 5587 RB Research Seminar**3 hrs**[back to top](#)**HISTORY 5591 Archival Methods****3 hrs**[back to top](#)**HISTORY 5592 Archival Internship****1-3 hrs**[back to top](#)**HISTORY 5593 Museum Studies**

This course is designed to acquaint students with specific careers in museums and historical agencies; to introduce students to the wide range of operating issues facing those working in the museum profession on a day-to-day basis; and to familiarize students with the organizations, reference works and resources available to develop the skills and training required for those who choose to make this their profession.

3 hrs[back to top](#)**HISTORY 5597 Non-Thesis Research/Reading**

Individual direction of student reading or research by selected, consenting faculty. This course can be taken only when faculty supervision is unavailable in colloquia or seminars.

1-6 hrs[back to top](#)**HISTORY 5599 R Thesis**

A contribution to knowledge based upon extensive research and reflective of careful analysis. Before writing a thesis, the student must clear the topic and research design with the Supervisory committee.

1-6 hrs[back to top](#)**HISTORY 5680 Doctoral Colloquium**

This course will examine the writings and theories of major historians in a particular field of history. The authors, works and intellectual currents which form the basis of the colloquium will vary from semester to semester, depending upon the professor's expertise and design for the course.

3 hrs[back to top](#)**HISTORY 5687 Doctoral Research Seminar**

Students in this course will produce a major research paper under the direction of the instructor. This shall consist of a self-contained chapter of the dissertation or a work of publishable quality. May be repeated for credit.

3 hrs[back to top](#)**HISTORY 5687 RA Doctoral Research Seminar**

Students in this course will produce a major research paper under the direction of the instructor. This shall consist of a self-contained chapter of the dissertation or a work of publishable quality. May be repeated for credit.

HISTORY 5899 Required Graduate Enrollment

1 hr

[back to top](#)

Mathematics

MATH 5509 General Algebra I

Groups, rings, modules, homology, fields and Galois theory, valuations, matrices, and multilinear algebra. Prerequisite: MATH 410 or equivalent. Note: Continued in MATH 5519.

3 hrs

[back to top](#)

MATH 5510 Complex Variables I

The group of linear fractional transformations, complex integration, Cauchy's theorem, the maximum modulus theorem, analytic continuation, Riemann surfaces. Note: Continued in MATH 5520. Prerequisite: MATH 402 and MATH 407, or consent of instructor.

3 hrs

[back to top](#)

MATH 5513 Real Variables I

Theory of measure with applications to analysis. Riemann and Lebesgue integration. Note: Continued in MATH 5523. Prerequisite: MATH 402.

3 hrs

[back to top](#)

MATH 5514 Mathematics For Secondary Teachers: Algebra And Analysis

Designed for secondary-school teachers. Examine high school mathematics from a higher point of view. Real and complex numbers, functions, algebraic structures of equations, integers and polynomials, number system structures; analyses of alternate approaches, extensions and applications of mathematical ideas, discussion of historical contexts and connections between ideas that may have been studied separately in different courses, relationships of ideas studied in secondary-school to those students may encounter in later study. When taken for graduate credit as MATH 5514, an extra project is required. Prerequisites: MATH 220, MATH 301, and one of MATH 402 or MATH 410 Offered: Every Winter

3 hrs

[back to top](#)

MATH 5517 Matrix Theory I

Unitary matrices, normal matrices, Jordan canonical form, nonnegative matrices and their applications, the symmetric eigenvalue problem. Prerequisites: MATH 402 and MATH 420, or consent of the instructor

3 hrs

[back to top](#)

MATH 5519 General Algebra II

Continuation of MATH 5509.

3 hrs

[back to top](#)

MATH 5520 Complex Variables II

Continuation of MATH 5510.

3 hrs

[back to top](#)

MATH 5521 Differential Equations

This course offers an introduction to the qualitative theory and applications of ordinary differential equations (ODE). The presentation of the course will be a blend of fundamental theory and examples. The basic results will be proved rigorously and more advanced results will be only illustrated by examples that demonstrate when and how they may be applied.

Prerequisites: MATH 345, MATH 412 and MATH 420, or consent of the instructor.

3 hrs

[back to top](#)

MATH 5523 Real Variables II

Continuation of MATH 5513.

3 hrs

[back to top](#)

MATH 5524 Mathematics For Secondary Teachers: Geometry

Designed for secondary-school teachers. Examine high school mathematics from a higher point of view. Congruence, distance and similarity, trigonometry, area and volume, axiomatics and Euclidean geometry; analyses of alternate approaches, extensions, and applications of mathematical ideas, discussion of historical contexts and connections between ideas that may have been studied separately in different courses, relationships of ideas studied in secondary-school to those students may encounter in later study. When taken for graduate credit as MATH 5524, an extra project is required.

Prerequisites: MATH 220, MATH 301, and one of MATH 402 or MATH 410 Offered: Every Fall on Demand

3 hrs

[back to top](#)

MATH 5530 Axiomatic Set Theory

Zermelo-Fraenkel set theory, transfinite induction equivalents of the axiom of choice, cardinal and ordinal arithmetic, the generalized continuum hypothesis, inaccessible cardinals.

3 hrs

[back to top](#)

MATH 5532 Advanced Numerical Analysis I

Error Analysis, Solving Systems of Linear Equations, Solutions of Nonlinear Equations, the Least-Squares Problems, and Approximating functions. Prerequisite: MATH 402 and MATH 420 or consent of instructor. Note: Continued in MATH 5542.

3 hrs

[back to top](#)

MATH 5542 Advanced Numerical Analysis II

Eigenvalues and Eigenvectors, Linear Programming, Optimization, Numerical Differentiation and Integration, Numerical Solution of Ordinary and Partial Differential Equations. Prerequisite: MATH 532 or consent of instructor. Note: Continuation of MATH 5532.

3 hrs

[back to top](#)

MATH 5545 Mathematical Methods In Science And Engineering

This course offers applied linear algebra and Fourier analysis which are indispensable tools in science and engineering. It is designed for beginning graduate students with moderate background in linear algebra and real analysis. Many of the results that are presented in the course will be proved rigorously from mathematical point of view. Prerequisites: MATH 402 and MATH 420

3 hrs

[back to top](#)

MATH 5552 General Topology

Topological spaces, continuity, metric spaces, topological products, connectedness, compactness, separation axioms, convergence, metrization theorems, Tychynoff's Theorem. Other topics may include: homotopy, fundamental group, function spaces. Prerequisites: MATH 402, or consent of instructor

3 hrs

[back to top](#)

MATH 5557 Functional Analysis

Hilbert spaces, linear operators, compact operators, Banach spaces, the Hahn-Banach theorem, the open mapping and closed graph theorems, the principle of uniform boundedness, locally convex spaces. Prerequisites: MATH 402 and MATH 420

3 hrs

[back to top](#)

MATH 5590 Special Topics

Selected topics in various fields of mathematics. May be repeated for credit when the topic varies. Prerequisite: Consent of instructor.

1-3 hrs

[back to top](#)

MATH 5699 Research And Thesis

Doctoral dissertation.

1-16 hrs

[back to top](#)

MATH 5899 Required Graduate Enrollment

1 hr

[back to top](#)

Philosophy

PHILOS 5521 Managerial And Administrative Decision Making And Ethical Values

Methods of problem definition and decision making in ethics are presented with the goal of providing the student with a matrix for case review. A series of cases is offered that serve to integrate approaches to ethical reflection with management and administrative decision making. Cases are chosen on the basis of topical, curricular and conceptual relevance.

3 hrs

[back to top](#)

PHILOS 5540 Seminar On Philosophy And Law

An examination from a philosophical perspective of the historical and conceptual relationships present in the evolution, development and analysis of law. Among the systems of analysis examined will be natural law theory, legal positivism and legal realism. Ordinarily the seminar will focus on a specific area of controversy in the law.

2 hrs

[back to top](#)

PHILOS 5546 Ethics And Government

An examination of ethical issues related to government, with the primary focus on national and local governmental bodies in the United States. Ethics in the executive, legislative and judicial branches are examined. Ethical standards for elected officials and appointed public servants are reviewed. Attempts to "legislate morality" are considered. The course includes a historical review of ethics and government and an analysis of the legal implications of legislation regarding ethics in the executive branch.

3 hrs

[back to top](#)

PHILOS 5620 Descartes To Hume

3 hrs

[back to top](#)

PHILOS 5625 Aesthetics

PHILOS 5638 Philosophy Of Biology

3 hrs

[back to top](#)

PHILOS 5640 Philosophy Of Law

3 hrs

[back to top](#)

PHILOS 5690 Research In Selected Fields: Graduate Studies

Intensive research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies.

1-3 hrs

[back to top](#)

Physics

PHYSICS 5500 Methods Of Mathematical Physics I

Intended to provide the student with the advanced mathematical techniques needed for beginning graduate studies in the physical sciences. Content includes real variables, infinite series, complex analysis, linear algebra and partial differential equations. Offered: Fall.

3 hrs

[back to top](#)

PHYSICS 5501 Methods Of Mathematical Physics II

A continuation of PHYSICS 500 which includes Sturm-Liouville operators, special functions, Fourier transforms, distributions and Green functions, Laplace transforms, linear groups and tensor analysis. Offered: Winter.

3 hrs

[back to top](#)

PHYSICS 5505 Survey Of Recent Development In Physics

Specifically designed to help high school and junior college science teachers keep pace with current developments in various subdivisions of physics and their impact on society and technology. (Not applicable for graduate degree in Physics). Prerequisite: Baccalaureate degree and one year science teaching experience. Offered: On Demand.

3 hrs

[back to top](#)

PHYSICS 5510 Theoretical Mechanics I

A review of undergraduate mechanics precedes the study of generalized classical mechanics in this course. Topics include variational principles, Lagrangian and Hamilton methods, conservation laws and Hamilton-Jacobi theory. Offered: Fall.

3 hrs

[back to top](#)

PHYSICS 5511 Theoretical Mechanics II

A continuation of PHYSICS 510, this course covers topics such as normal coordinates, small oscillations, continuum mechanics and special/general relativity. Offered: On Demand.

3 hrs

[back to top](#)

PHYSICS 5520 Electromagnetic Theory And Applications I

Electrostatics, magnetostatics and various approaches in solving boundary value problems of electromagnetism, Green's functions, conformal transformations and polynomial expansions, Maxwell's equations and waves. Offered: Fall Even years

3 hrs

[back to top](#)

PHYSICS 5521 Electromagnetic Theory And Applications II

Waveguides, fiberoptics, radiation systems and antenna for wireless communications, scattering and diffraction of electromagnetic waves, multipole fields, special relativity and relativistic particle dynamics and radiation. Offered: Winter Odd years

3 hrs

[back to top](#)

PHYSICS 5530 Quantum Mechanics I

Review of elementary methods, formal preliminaries, axioms, commuting operators, angular momentum, static perturbation theory, Wigner-Eckart theorem. Offered: Fall Odd years

3 hrs

[back to top](#)

PHYSICS 5531 Quantum Mechanics II

Time dependent perturbation theory, scattering, applications to atoms, molecules and nuclei, reactions, relativistic methods. Offered: Winter even years

3 hrs

[back to top](#)

PHYSICS 5535 Optical Properties Of Matter

Maxwell's equations and the dielectric function, absorption and dispersion, free-electron metals, interband transitions, dispersion relations and sum rules, self-consistent field approximation, current-current correlations and the fluctuation-dissipation theorem, plasmons and characteristic energy loss. Prerequisites: PHYSICS 450,PHYSICS 460, PHYSICS 461, PHYSICS 471, PHYSICS 472,PHYSICS 500. Offered: Fall Even Years.

3 hrs

[back to top](#)

PHYSICS 5540 Statistical Physics I

Statistical mechanics as a basis for thermodynamics; classical distribution functions; quantum statistical mechanics, kinetic theory, transport phenomena; application to systems of interacting particles. Prerequisites: PHYSICS 410, PHYSICS 471, PHYSICS 472. Offered: Fall Even Years.

3 hrs

[back to top](#)

PHYSICS 5541 Statistical Physics II

Special topics in advanced statistical physics including: second quantization, modern many body theory, interacting Fermi and Bose systems, superfluidity and superconductivity, renormalization group and computer simulation techniques. Prerequisite: PHYSICS 540. Offered: On Demand.

3 hrs

[back to top](#)

PHYSICS 5550 Atomic And Molecular Structure

Experimental results and theoretical models by quantum mechanics. Special emphasis on the interaction between radiation and matter. Offered: On Demand.

3 hrs

[back to top](#)

PHYSICS 5560 Nuclear Physics

Fundamental properties of the atomic nucleus discussed in terms of experimental results and theoretical models. Quantum and statistical mechanics are used where appropriate. Offered: On Demand.

3 hrs

[back to top](#)

PHYSICS 5570 Quantum Theory Of Solids I

Lattice dynamics and thermal conductivity. Neutron scattering. Symmetry principles in crystals and consequences. Point group, space group and irreducible representations. Energy band theory and methods of band calculation. Elementary Theory of Magnetism. Spin wave theory. Offered: Winter Odd Years.

3 hrs

[back to top](#)

PHYSICS 5571 Quantum Theory Of Solids II

Topics will include crystal imperfections, impurities and defects, optical properties of metals and semiconductors, electron-lattice interaction and transport theory, superconductivity and theory of disordered systems. Offered: On Demand.

3 hrs

[back to top](#)

PHYSICS 5580 Physics Seminar

Contemporary publications and research.

1 hr

[back to top](#)

PHYSICS 5590 Topics In Physics

Contemporary publications and research.

1-3 hrs

[back to top](#)

PHYSICS 5590 A Topics In Physics

Contemporary publications and research.

1-3 hrs

[back to top](#)

PHYSICS 5590 B Special Topics

1-3 hrs

[back to top](#)

PHYSICS 5595 L Computer Interfacing Laboratory

An introduction to computer interfacing through the use of serial and parallel ports and digital-to-analog and analog-to-digital converters. The course also introduces digital filtering techniques, data analysis techniques, and graphical presentation of data. The programming techniques are taught using high level programming languages currently used in research and development labs. Offered: Fall Even Years.

3 hrs

[back to top](#)

PHYSICS 5599 Research And Thesis

Research for thesis in partial fulfillment of the master's degree in physics.

1-9 hrs

[back to top](#)

PHYSICS 5630 Advanced Quantum Theory

Scattering theory and reactions, relativistic quantum mechanics and quantum field theory, many-body problems and Green functions. Prerequisites: PHYSICS 530-PHYSICS 531 or consent of instructor. Offered: Alternate Years Fall.

3 hrs

[back to top](#)

PHYSICS 5680 Research Seminar

Seminars on current research topics of research programs in the department and those of external distinguished scientists. (Must be taken by Physics Ph.D. students). Offered: Fall and Spring.

1-2 hrs

[back to top](#)

PHYSICS 5690 Special Research Topics

A lecture course presenting advanced research-level topics. Prerequisite: Ph.D. candidacy or consent of instructor. Offered: On Demand. This course is intended to allow faculty and visiting scholars to offer special courses in selected research areas.

1-3 hrs

[back to top](#)

PHYSICS 5699 Research And Dissertation

Research for dissertation in partial fulfillment of the Ph.D. degree requirements in physics.

1-9 hrs

[back to top](#)

PHYSICS 5899 Required Graduate Enrollment

1 hr

[back to top](#)

Political Science

POL-SCI 5505 Scope And Methods Of Political Science

This seminar surveys the various descriptive and quantitative approaches to the study of politics, government and public policy. It covers the methods used in various sub-disciplines and the models employed in political analysis.

3 hrs

[back to top](#)

POL-SCI 5513 Comparative Politics: Asia, Africa, And Latin America

A comparison of politics in selected countries from one or more of these regions, with an emphasis on how and why processes differ and change.

3 hrs

[back to top](#)

POL-SCI 5521 Judicial Politics

This course addresses broad trends of current research in the area of the judicial process based on empirical studies and the various methodological tools currently used by researchers. Case studies may be used to illustrate in depth the institutional aspects of the judicial process. Biographies may also be used to emphasize the personal and environmental factors which affect judicial decision making.

3 hrs

[back to top](#)

POL-SCI 5522 Seminar In The Presidency

Critical examination of the American presidency, with in-depth research into selected themes and presidents. Prerequisites: POL-SCI 406 or permission.

3 hrs

[back to top](#)

POL-SCI 5524 Urban Politics

A seminar on politics and government in urban areas with special attention to community leadership, power structures, interest group and party activity, political behavior, and movements toward local government reform.

3 hrs

[back to top](#)

POL-SCI 5530 International Relations

This course examines major schools of thought that attempt to explain contemporary and historical international politics. Topics discussed include international systems, the balance of power, collective security, and international political economy, morality, and law.

3 hrs

[back to top](#)

POL-SCI 5541 American Political Thought

This course will focus on intellectual reactions to the major periods in American history (the movement for independence, the writing of the constitution, the Jacksonian period, the civil war debate, the growth of big business, the rise of the positive state and contemporary America). Contemporary theorists will be included along with Jefferson, Madison, Hamilton and Marshall.

3 hrs

[back to top](#)

POL-SCI 5542 Constitutional Interpretation

This course will provide an in-depth treatment of selected areas of constitutional development, related to various aspects of public policy developed under the Constitution through judicial interpretation, including federalism, equality, fundamental rights and freedom of expression.

3 hrs

[back to top](#)

POL-SCI 5570 The Politics Of Social Security

This course will concentrate upon the principles of social insurance in general, and of the American Social Security system in particular. It will consider the system in relation to the history and traditions of American society. It will analyze popular misconceptions and will pay special attention to the political, economic, and demographic issues relevant to Social Security's current operation and to the program's future.

3 hrs

[back to top](#)

POL-SCI 5575 Political Ideologies

Consideration of political ideologies and their effects, with in-depth research into selected topics.

3 hrs

[back to top](#)

POL-SCI 5580 Government And Politics Seminar

Offered as a special seminar in the individual faculty member's area of research specialization. The seminar may be repeated for credit when the topic varies. The topic and instructor will be announced in advance.

3 hrs

[back to top](#)

POL-SCI 5590 Directed Studies And Research

Under the direction of the instructor, students in this course will produce a major research paper: a self-contained thesis chapter, an article for publication or the equivalent. May be repeated for credit.

1-6 hrs

[back to top](#)

POL-SCI 5599 Thesis

Directed specialized research.

1-6 hrs

[back to top](#)

POL-SCI 5680 Traditions, Theories, And Trends In Political Science

This intensive survey of political science provides an opportunity for integration of the study of political values, behavior, and institutions with other social sciences.

3 hrs

[back to top](#)

POL-SCI 5688 Doctoral Research Seminar

Students will produce a major research paper under the direction of the instructor. The research project will consist of a self-contained chapter of the dissertation or a work of publishable quality. May be repeated for credit.

3 hrs

[back to top](#)

POL-SCI 5697 Doctoral-Level Independent Readings

Individual readings under the supervision of members of the Political Science Graduate or Doctoral Faculty in the specified topic or topics. May be repeated. May not be taken during an academic year in which a graduate course or seminar is offered on the topic.

3 hrs

[back to top](#)

Psychology

PSYCH 5504 Contemporary Issues In Learning

A discussion and analysis of recent research and theoretical papers in learning. Prerequisite: PSYCH 304 or equivalent. The student will have to demonstrate undergraduate competence in learning in the first few weeks of this course in order to remain enrolled.

3 hrs

[back to top](#)

PSYCH 5505 Motivation

The definition of the concept of motivation is explored. Emphasis is placed upon integration of the concept of motivation into comprehensive theoretical explanations of phenomena. Students should have in their background a foundation in Learning Theory (or at least Theory Construction) and Experimental (Scientific Method). Previous laboratory experiences are desired.

3 hrs

[back to top](#)

PSYCH 5507 Cognitive Psychology

An overview of the cognitive approach to the study of human behavior. Recent research and theoretical issues in the areas of perception, memory, and concept formation are emphasized.

3 hrs

[back to top](#)

PSYCH 5509 Assessment 1: Intellectual And Cognitive Assessment

This course is designed to provide students with a foundation in the use of intellectual and cognitive assessment instruments in clinical evaluation. The course covers theoretical issues pertinent to intellectual and cognitive assessment, as well as basic assessment skills including administration, scoring, interpretation, and communication of results for commonly used measures. Prerequisites: Consent of instructor.

3 hrs

[back to top](#)

PSYCH 5510 Assessment Methods In Professional Counseling

This course provides an understanding of assesment process and assessment techniques. Skills and practice in selection, administration, and interpretation of representative assessment instruments. Two semester hours lecture, two semester hours lab experience per week. Cross-listed: CPCE 515. Prerequisite: Course on assessment of intellectual functioning

3 hrs

[back to top](#)

PSYCH 5511 Principles Of Assessment In Psychology

This will be a field practicum course in which test batteries will be used to assess and evaluate the intelligence, personality, and aptitude of the individual. Prerequisite: PSYCH 510 and consent of the instructor.

3 hrs

[back to top](#)

PSYCH 5512 Contemporary Issues In Social Psychology

A critical survey of the recent literature in social psychology with emphasis on experimental investigations. Prerequisite: PSYCH 312.

3 hrs

[back to top](#)

PSYCH 5515 Advanced Systems And History Of Psychology

In depth review of the major theoretical systems of psychology in terms of historical assumptions, methodologies and developments with the goal of enabling the student to better evaluate current theories and assumptions in psychology. Prerequisite: PSYCH 415 or equivalent.

3 hrs

[back to top](#)

PSYCH 5516 Quant Analysis 1: Regression And Analysis Of Variance

This graduate level statistics course for students in education and the behavioral sciences provides a strong conceptual understanding of two major statistical procedures with the context of the general linear model: multiple regression and numerous analysis of variance (ANOVA) models. Students will learn to select appropriate statistical techniques, tests the assumptions of the techniques, analyze data using statistical software, and report the results of their analyses in the format of the American Psychological Association (APA, 2002). Prerequisites: An introductory inferential statistics course (EDUC-R&P 505, PSYCH 316) and basic knowledge of research design (EDUC-R&P 505, PSYCH 302). Cross-listed: EDUC-R&P 605. Offered: FALL.

3 hrs

[back to top](#)

PSYCH 5517 Quantitative Analysis II: Advanced Topics In Regression And Mda

This graduate level statistics course for students in the behavioral sciences and education provides a strong conceptual understanding of advanced topics in regression (interaction effects, logistic regression, path analysis) and various multivariate techniques (MANOVA, canonical correlation, factor analysis). Students will complete a series of data based projects that allow them to demonstrate their skills in analysis, reporting and interpretation of findings. Prerequisites: EDUC-R&P 605/ PSYCH 516 and basic knowledge of SPSS or SAS software and research design (EDUC-R&P 505, PSYCH 302). Cross-listed: EDUC-R&P 606. Offered: Winter.

3 hrs

[back to top](#)

PSYCH 5518 Advanced Biopsychology

This course assumes that the student has mastered the basics of biopsychology, and deals with this topic in greater depth and scope than PSYCH 418. It will begin with a brief review and update of basic materials of neuroanatomy, neuronal conduction, and synaptic transmission but will quickly turn to an emphasis on biological influences on human psychology, in particular those biological factors that are of practical significance in the lives of patient and non-patient populations. Prerequisite: PSYCH 418 or equivalent.

3 hrs

[back to top](#)

PSYCH 5521 Advanced Social Psychology

The study of the individual in a social context. How social structure and interaction influence the behavior of an individual. Several contemporary systematic positions will be compared. Prerequisite: PSYCH 312.

3 hrs

[back to top](#)

PSYCH 5522 Contemporary Issues In Developmental Psychology

A discussion of recent research literature in developmental psychology leading to an individual research project in this area. Prerequisite: PSYCH 322.

3 hrs

[back to top](#)

PSYCH 5523 Seminar Personality Theory And Methodology

A study of the social-cultural, trait, learning, perceptual, motivational, and field theories of personality with special emphasis on research studies and the methodology of personality research. Prerequisite: PSYCH 323.

3 hrs

[back to top](#)

PSYCH 5533 Psychopathology

A review of the experimental-clinical literature concerning the behavior disorders with special reference to their classification and etiology. Prerequisites: Consent of instructor required. Course generally will be restricted to students enrolled in license-eligible specialties who have had an undergraduate course in abnormal psychology.

3 hrs

[back to top](#)

PSYCH 5538 Development And Evaluation Of Assessment Tools

This survey course examines test theories, construction, and measurement theories. Within the context of a variety of conceptual frameworks and examples, students become knowledgeable about the various purposes, approaches, and computer software tools for measurement. Prerequisites: PSYCH 516 and PSYCH 517 Offered: Every Winter

3 hrs

[back to top](#)

PSYCH 5540 The Psychology Of Aging

This course will identify major issues concerning psychology related to aging. The major influences on the behavior, cognitive functioning and emotions of older adults will be examined. Consideration will be given to individual, group and environmental influences. Possible interventions will be identified. Cross-sectional and longitudinal research will be reviewed in order to examine the changes in individuals due to aging and the differences between cohort groups. Three major areas of information will be the focus: concepts, theory and methods in psychology of aging; biological and social influences on behavior; and behavioral processes. There will be a review of current literature.

3 hrs

[back to top](#)

PSYCH 5543 Adult Development And Aging

This course will identify major themes and issues of mid-life and older adults. It will examine major developmental theories of adult development and aging. A contextual approach is stressed, including research and theory on the impact of cohort, gender, race/ethnicity, socioeconomic status, and culture on development. Application to real life is integrated throughout the course. There will be a review of current literature.

3 hrs

[back to top](#)

PSYCH 5550 Field Practicum

Provides supervised experience working in community agencies/ organizations which address various human and social problems. Students receive training in community service oriented skills and approaches, e.g., advocacy, community organizing, program assessment, development and evaluation, outreach, and applied research. Ten hours per week at practicum site and class attendance are required. Prerequisite: Consent of instructor. Offered: Fall and winter.

4 hrs

[back to top](#)

PSYCH 5575 Professional Issues And Ethics In Psychology

Ethical and legal problems of research and practice will be discussed. Professional organizations in psychology and their publications will be reviewed.

3 hrs

[back to top](#)

PSYCH 5575 A Professional Issues & Ethics

3 hrs

[back to top](#)

PSYCH 5580 Special Topics

1-3 hrs

[back to top](#)

PSYCH 5580 AD Special Topics**1-3 hrs**[back to top](#)**PSYCH 5580 SM Special Topics****1-3 hrs**[back to top](#)**PSYCH 5582 Community Mental Health**

A review of current theory and research. The emphasis is on prevention rather than treatment of mental health problems. The assets and liabilities of neighborhood communities for mental health problems will be discussed. Recent methods in crisis intervention are reviewed. Each student will be required to become familiar with a neighborhood with a high incidence of application for mental health care.

3 hrs[back to top](#)**PSYCH 5586 Theory, Research And Practice Of Consultation**

Theory and research on community, mental health, organizational and agency consultation. Entry, process, outcome and ethical issues surrounding each model of intervention will be explored. Each student will be expected to conduct and report on a consultation project.

3 hrs[back to top](#)**PSYCH 5590 Directed Research****1-6 hrs**[back to top](#)**PSYCH 5597 Directed Readings In Psychology**

Intensive readings in areas of joint interest to the enrolled student and the cooperating faculty. Prerequisite: Consent of instructor. Offered: Every Semester

3 hrs[back to top](#)**PSYCH 5599 Research And Thesis****1-9 hrs**[back to top](#)**PSYCH 5601 Experimental Methods In Design And Analysis I**

An examination of multifactor and multilevel designs and interactions. Topics covered will include randomized block designs. Latin square designs, complex trend analysis designs, covariance designs and multiple comparison of treatment means.

3 hrs[back to top](#)**PSYCH 5604 Field Practicum In Community Psychology**

Supervised experience in health care, social welfare, correctional, political, ethnic, and neighborhood agencies. May be repeated six times for up to 18 credit hours. Each semester.

3 hrs[back to top](#)

PSYCH 5611 Theories & Methods Of Assessment & Intervention/Community Psych

Review of the assessment and intervention literature in social situations will be conducted. Students will design and carry out an assessment and an intervention project.

3 hrs

[back to top](#)

PSYCH 5612 Program Evaluation And Research Dissemination

A study of the area of applied research in which process and outcome characteristics of programs are related explicitly to a set of values, such as program goals, objectives and costs.

3 hrs

[back to top](#)

PSYCH 5614 Prevention Science I: Theories, Principles And Methods

Course provides a comprehensive overview of the field of prevention emphasizing basic concepts, conceptual models, and approaches associated with prevention in the field of psychology. The goal is to provide knowledge that will allow students to critically evaluate prevention programs in their communities. Students apply their learning by conducting a critical analysis of an existing community prevention and/or health promotion initiative. Prerequisite: none Offered: Every winter

3 hrs

[back to top](#)

PSYCH 5615 Prevention Science II: Applications

This advanced seminar is the follow-up course to Prevention Science I. Emphasis is placed on the application of prevention science to specific content areas (e. g., substance abuse, violence in schools physical or sexual abuse, AIDS/HIV infection, infant mortality, cardiovascular disease, promoting social competence.) A semester project involves an in-depth review of prevention efforts in the chosen area of interest, resulting in a comprehensive research proposal and/or public policy analysis. Prerequisite: PSYCH 614 (Prevention Science I) Offered: Even years, fall semester, beginning 2000

3 hrs

[back to top](#)

PSYCH 5622 Theoretical And Ethical Issues In Professional Psychology

This course is designed to introduce first year doctoral students to the fundamental concepts and methods of psychology conceived as the application of scientific and ethical reasoning to human problems. It will provide an in-depth examination of the American Psychological Association code of ethics and its application to the conduct of psychologists. Critical and analytical thinking will be emphasized in all aspects of the course. The course will cover broad models of clinical and counseling psychology and their historical and scientific foundations, issues in diagnosis, cross-cultural applications and professional problems in light of ethical principles, professional standards, scientific data & multi-cultural contexts. Prerequisite: consent of the instructor. Offered: Fall.

3 hrs

[back to top](#)

PSYCH 5623 Methods Of Counseling In Professional Psychology

This course is designed to introduce students to the fundamental concepts and methods of counseling in professional psychology. Students will apply ethical and multicultural principles to the helping relationship while learning the basic methods of humanistic, psychodynamic, and cognitive behavioral approaches as they related to the helping process. A main focus of this course is the acquisition of basic helping skills. Students will also become familiar with counseling outcome research and will increase their level of counselor self-awareness. Prerequisite: PSYCH 622. Cross-listed: CPCE 530 Offered: Winter.

3 hrs

[back to top](#)

PSYCH 5625 Health Research Methods: Intro To Epidemiology & Clinical Trials

This course will introduce graduate students in health-related disciplines to research methods utilized in understanding disease and health risk in humans and conducting intervention trials. Students will learn about how epidemiology contributes to: 1) identifying factors that cause diseases; 2) assessing the public health importance of diseases; 3) describing the natural history of diseases; and 4) evaluating procedures for preventing or treating diseases. After completing this course, students should be able to read and summarize epidemiological research papers and answer questions about a study's purpose, design, methods of procedure, results, and major strengths and weaknesses. Prerequisites: Admission to graduate standing; PSYCH 601, or equivalent. Offered: Every Winter

3 hrs

[back to top](#)

PSYCH 5631 Theoretical Foundations Of Health Psychology

This course will introduce students to the theoretical foundations of health psychology, including the Biopsychosocial model, individual and systems level theories of behavior change, stress and coping, disease prevention and health promotion, as well as adherence and relapse models. Upon completion of this course students will possess a broad understanding of how cognitive, behavioral, and social factors interact with biological parameters in influencing morbidity and mortality. In addition, students will become familiar with several substantive areas (e.g., chronic pain, HIV/AIDS, cancer, sleep disorders, cardiovascular risk reduction), research methods, and multicultural and ethical issues in health psychology.

3 hrs

[back to top](#)

PSYCH 5632 Health Psychology Interventions

This course will introduce students to a wide range of psychological assessment and intervention strategies that can be used in health care settings. Individual, group, community and policy interventions will be discussed. This course may be used for credit in the Health Psychology Discipline of the Interdisciplinary Ph.D. Program. Prerequisite: PSYCH 631 and consent of instructor. Offered: Every Winter

3 hrs

[back to top](#)

PSYCH 5638 Seminar In Health Care Leadership

This course is designed to offer an educational experience that fosters both the knowledge and skills needed for leaders of healthcare in the future. The instructors will guide students through the process of generating new thinking, creating new knowledge, and enhancing interpersonal and professional effectiveness. Course topics will include what creates health and quality of life, social capital and health, healthcare policy, collaborative problem-solving, and transformational leadership and systems thinking.

3 hrs

[back to top](#)

PSYCH 5650 Clinical Practicum

Advanced supervised assessment and psychotherapy with individuals and groups in applied settings. Preregistration by application to instructor at least 60 days prior to the beginning of the semester. Approval by Psychology Director of Clinical training required. Prerequisite: PSYCH 623 and consent of instructor and Director of Clinical Training.

1-6 hrs

[back to top](#)

PSYCH 5660 Clinical Health Psychology Internship

Planned sequence of training experiences in an organized program designed to prepare students for the practice of professional psychology. Prerequisite: Consent of instructor

1-6 hrs

[back to top](#)

PSYCH 5696 Pre-Dissertation

Individualized research experiences to prepare students for the conduct of the dissertation. Pre-requisite: consent of instructor. Offered: continuous Every semester.

RELIG-ST 5501 A Religion In America

An in-depth examination of selected aspects of the history of religions in America from the colonial period to the present. Special emphasis will be given to methodological issues in the study of American religious history. Offered: On Demand

3 hrs

[back to top](#)

RELIG-ST 5502 Religion & Colonialism in Latin America

The study of selected aspects of the history of religions in the Americas. Primary focus is on the complex ways that European, Native American Africans religions helped to structure and negotiate the experiences and the significance of cultural contact and colonialism through lived worlds of meaning.

3 hrs

[back to top](#)

RELIG-ST 5503 Visions, Dreams, and Prophecies as Religious Phenomena

This course explores the way visions, dreams, and prophecies have acquired religious significance in Western and non-western contexts from the ancient to the present.

3 hrs

[back to top](#)

RELIG-ST 5504 Gender and Religion

Cross-cultural and comparative study of how religious groups create and transmit gender roles and expectations.

3 hrs

[back to top](#)

RELIG-ST 5506 The History of Christianity though the Middle Ages

This course examines the historical and theological development of Christianity from its origins to the the High Middle Ages. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major social, institutional and intellectual force with a focus on patterns of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship. Cross-listed as HISTORY 5506A

3 hrs

[back to top](#)

RELIG-ST 5507 The History of Christianity from the Middle Ages to the Present

This course examines the historical and theological development of Christianity from the High Middle Ages to the present. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major social, institutional and intellectual force with a focus on patterns of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship. Cross-listed as HISTORY 5507A

3 hrs

[back to top](#)

RELIG-ST 5508 Anthropology of Religion

This course explores the ways anthropologists have gone about studying religion from the opening decades of the 20th century to present. The course introduces students to the diversity of human religious expression and experience through anthropological literature and to the diversity of anthropological expression especially as it has been revealed in social scientific studies of religious life. The course is designed to generate a critical dialogue about the special role that religion has played in the ongoing anthropological engagement with "other" societies and cultures over time.

3 hrs

[back to top](#)

RELIG-ST 5510 Religions Of The World

This course is designed to introduce graduate students to the major religions of the world, as well as to selected small-group religions. Our goal will be to learn to appreciate the similarities and differences in the structure and history of these religions. A primary focus will be on using the categories of the history of religions to examine and analyze the various dimensions of religion (e.g., historical, sociological, ritual, mythological, aesthetic). In addition, methodological issues of comparison will be addressed.

3 hrs

[back to top](#)

RELIG-ST 5567 Myth and Ritual

"Myth" and "ritual" have long been fundamental categories in the study of religion. This course will briefly survey some of the major theories and approaches to the study of myth and ritual from the Enlightenment to the present. Will not only trace the shifting meanings of "myth" and "ritual," but will critically evaluate the utility of diverse approaches to the study of religious phenomena designated by these terms. Reading will include theoretical works, as well as selected case studies.

3 hrs

[back to top](#)

RELIG-ST 5584 RS Sacred Narratives And Texts

This course will study the "social lives" of sacred narratives and texts as they circulate within religious communities. Among the topics to be studied are methods of exegesis in different religious traditions, orality and literacy (including the reoralization of written texts), the canonization process, the emergence of interpretive specialists, text as amulets, reading and meditative practices and techniques, and narratives and the arts. The course is comparative, cross-cultural, and interdisciplinary in nature.

3 hrs

[back to top](#)

RELIG-ST 5586 RS Methodological Approaches To The Study Of Religion

This course examines the various disciplines that undertook the critical, objective study of religion beginning in the second half of the nineteenth century and continuing into the present. The course examines how the disciplines of the social sciences and humanities emerged in the last century and how the study of religion emerged from its roots in Jewish scholarship and Christian theology to be included under the umbrella of the humanities and social sciences. The historical development of religious studies as a historical and intellectual contexts.

3 hrs

[back to top](#)

RELIG-ST 5587 RS Research Seminar

Students in this course will produce a major research paper under the direction of the instructor: a self-contained thesis chapter, an article for publication or the equivalent.

3 hrs

[back to top](#)

RELIG-ST 5592 Cults Sects, And New Religious Movements

In this course, students will experience: (a) a variety of methods for analyzing and understanding new religious movements in society: sociological, historical, and textual; (b) an introduction to the broad spectrum of religious beliefs which exist (and flourish) outside the cultural mainstream; and (c) an introduction to some of the means by which dominant religious and secular culture has confronted the presence of NRMs-e.g., deprogramming exit counseling, and theologically oriented countermovement. Offered: On demand

3 hrs

[back to top](#)

RELIG-ST 5593 Sex And Religion

The course is designed to highlight issues related to the various ways in which religions of the world have integrated, embraced, or repressed one of the basic human experiences sexual expression. This is an elective course designed for graduate students with Religious Studies either as their coordinating or co-discipline. This is an advanced seminar, and as such does assume a certain measure of theoretical familiarity and background of study. Offered: On demand

3 hrs

[back to top](#)

RELIG-ST 5594 RS Death In The History Of Religions

As a biological "fact," death would appear to be a human universal. Yet, human beings have imagined--and, thus experienced--the meaning of death in many diverse ways in different cultures and over time. This course explores the conceptualization and representation of death and dying, as well as the ritual activities surrounding death, found in selected religious communities. The goals are to gain insight into how people have sought to (re) create a world of meaning in the face of death and to gain a critical perspective on our own contemporary situation.

3 hrs

[back to top](#)

RELIG-ST 5595 RS Time And Space In The History Of Religions

Time and space are essential components of the lived worlds of human beings, yet the cultural and historical constructions of these are remarkably diverse and, moreover, are subject to change. This course is a cross-cultural, interdisciplinary, and comparative exploration of the constructions and experiences of time and space found in selected religious communities and historical periods. In addition, it investigates the pivotal role the categories of "sacred and profane time and space" have played in theorizing religion and in the study of religious myths and rituals in the modern period. Time and space are essential components of the lived worlds of human beings, yet the cultural and historical constructions of these are remarkably diverse and, moreover, are subject to change. This course is a cross-cultural, interdisciplinary, and comparative exploration of the constructions and experiences of time and space found in selected religious communities and historical periods. In addition, it investigates the pivotal role the categories of "sacred and profane time and space" have played in theorizing religion and in the study of religious myths and rituals in the modern period.

3 hrs

[back to top](#)

RELIG-ST 5596 RS Body In The History Of Religions

The human body is the site of extensive imaginal and ritual activities in all religious traditions. This course explores some of the diverse ways religious communities have imagined and experienced the human body, as well as how the body had been manipulated and worked on in an effort to transform the human situation in the world.

3 hrs

[back to top](#)

RELIG-ST 5597 RS Non-Thesis Research/Reading

Individual direction of student reading or research by selected, consenting faculty. This course can be taken only when faculty supervision is unavailable in colloquia or seminars.

1-6 hrs

[back to top](#)

RELIG-ST 5598 RS Seminar In The History Of Religions

Advanced graduate seminar on a selected topic or problem in the History of Religion. Topic varies, but the seminar will have a methodical or theoretical focus. May be repeated for credit when topic is different.

3 hrs

[back to top](#)

RELIG-ST 5680 RS Doctoral Colloquium

This course will examine the writings and theories of major scholars in a particular area of Religious Studies. The authors, works and intellectual currents which form the basis of the colloquium will vary from semester to semester depending upon the professor's expertise and design for the course.

3 hrs

[back to top](#)

RELIG-ST 5687 RS Doctoral Research Seminar

Students in this course will produce a major research paper under the direction of the instructor. This shall consist of a self-contained chapter of the dissertation or a work of publishable quality. May be repeated for credit.

3 hrs

[back to top](#)

RELIG-ST 5697 RS Doctoral-Level Independent Readings

Individual reading under the supervision of members of the Religious Studies Doctoral faculty and adjuncts in preparation for the Comprehensive Examination for the Ph.D.

1-6 hrs

[back to top](#)

RELIG-ST 5699 RS Dissertation

Course credits in dissertation.

Social Science

SOC-SCI 5610 Philosophy Of Social Science

This course examines the development of the philosophy of science since the end of the 19th century. In this regard, Positivism, Conventionalism, and Realism as the three major conceptions of science will be studied and their significance as philosophical foundations of the social sciences will be assessed. Particular attention will be given to the emerging philosophy of science (i.e., Scientific Realism) which has profoundly challenged the more established Positivism.

3 hrs

[back to top](#)

SOC-SCI 5621 Consensus Social Theory

This course explicates the connections between mainstream (or orthodox) approaches in the various social sciences, which can be collectively viewed as Capitalist interdisciplinary social theory. Explication entails positivist philosophy of science, classic liberal political philosophy, neo-classical economics, pluralist political science, human ecology and functionalist sociology. Prerequisite: SOC-SCI 5610

3 hrs

[back to top](#)

SOC-SCI 5622 Pragmatism & Evolutionary Social Theory

Drawing on the classical pragmatism of Peirce and Dewey as the philosophical framework for inquiry, and the institutional economics of Veblen, Commons, Mitchell, and Ayres, this course develops Evolutionary Social Theory as a paradigm for interdisciplinary social science.

3 hrs

[back to top](#)

SOC-SCI 5630 Seminar in Research Methodology

This course assists students with the establishment of a framework for their dissertation research that represents a substantive integration of their coordination discipline with the SSC program. The ultimate goal of the seminar is a defensible dissertation proposal for each student. Includes opportunity for participation by supervisory committee members. Prerequisite: SocSci 5610, SocSci 5621, and 1 Critical Theory course

Social Work

SOC-WK 5510 Foundation Field Practicum I

Students spend 16-hours weekly in a generalist field practicum setting under MSW supervision. Participation in a 12-hour integrated field seminar on campus led by faculty is required. Must take one human behavior course (SOC-WK 5530 or SOC-WK 5531) prior to entering or concurrently with field placement. Must take SOC-WK 5532 concurrently.

3 hrs[back to top](#)**SOC-WK 5511 Foundation Field Practicum II**

Students continue the field practicum experience from SOC-WK 5510 and participation in the integrated seminar on campus. Focus on generalist knowledge, values, and skills. Prerequisite: Completion of SOC-WK 5510 and SOC-WK 5532. Must take SOC-WK 5533 concurrently.

3 hrs[back to top](#)**SOC-WK 5512 Advanced Field Practicum I**

Students are placed in a field setting in their chosen field-of-practice concentration approximately 16 hours per week under the supervision of an MSW field instructor. SOC-WK 5540 must be taken concurrently. One concentration seminar must be taken prior to or concurrently with entering this field placement.

3 hrs[back to top](#)**SOC-WK 5513 Advanced Field Practicum II**

Students complete a final semester in their field-of-practice concentration agency setting approximately 16 hours weekly under MSW supervision. SOC-WK 5541 must be taken concurrently.

3 hrs[back to top](#)**SOC-WK 5530 Human Behavior: Individuals In The Social Environment**

This theory course focuses on the interactional context of human behavior essential to all social work practice. A variety of perspectives are considered in the understanding of the individual; developmental, ecosystemic, biopsychosocial, traditional, and alternative. Diversity and resiliency are the key course concepts.

3 hrs[back to top](#)

SOC-WK 5531 Human Behavior: Families, Groups, Organizations, And Communities

This theory course applies social work's ecosystemic framework to the understanding of human behavior in families, groups, organizations, and communities. Knowledge and applied theories and paradigms are examined that honor social justice, human diversity, strengths/assets, and community-building to enhance effective social work practice. Prerequisite: SOC-WK 5530

3 hrs

[back to top](#)

SOC-WK 5532 Foundations Of Social Work Practice I

This course examines the fundamental knowledge, values, and skills of generalist social work practice with a focus on person-in-environment. Course topics include values and ethics, collaborative approaches to helping, stages of the helping process, and beginning practice skills with at-risk populations. Concurrent enrollment in SOC-WK 5510 is required.

3 hrs

[back to top](#)

SOC-WK 5533 Foundations Of Social Work Practice II

This second generalist social work practice course examines effective helping approaches with diverse families, small groups, and communities of identify and/or place. The course also introduces values and working styles for professional practice in organizations. Pre-requisite: SOC-WK 5532 and SOC-WK 5510. Concurrent enrollment in SOC-WK 5511 is required.

3 hrs

[back to top](#)

SOC-WK 5534 Social Welfare Programs And Policies

This course examines social policies that direct current social service trends at local, state, and federal levels. Students learn a model of analysis that examines the context in which policy decisions are made and the effects that social service programs and policies have on people's lives.

3 hrs

[back to top](#)

SOC-WK 5535 Social Welfare Policy Practice

This course prepares students with a social justice/empowerment orientation and the knowledge, skills and values needed to become an effective policy advocate, particularly with people who experience the effects of poverty, discrimination, exclusion, and oppression. Pre-requisite: SOC-WK 5534

3 hrs

[back to top](#)

SOC-WK 5536 Social Work Research Methods

This course introduces students to the fundamental knowledge and skills of social work research such as practice evaluation, program planning, and other facets of professional social work practice. Emphasis on application of social research methods in actual practice situations will be used to assist students in skill development.

3 hrs

[back to top](#)

SOC-WK 5537 Quantitative Social Work Research Methods

This course is designed to prepare graduate level students to develop a comprehensive understanding of statistical method application to social work research. Students will gain a basic understanding of the research and statistical procedure that are needed for clinicians/researcher to operate within the field today. Students will become proficient in reading analyzing and assessing the results of social work publications. Prerequisite: SOC-WK 5536 Social Work Research Method

3 hrs

[back to top](#)

SOC-WK 5538 Advanced Standing Seminar: Contemp Trends In Social Work Practice

This required seminar is designed for BSW's entering the Advanced Standing Program and serves to update and integrate social work practice approaches with contemporary perspectives of human behavior in the social environment. Restriction: Restricted to Advanced Standing Students.

3 hrs

[back to top](#)

SOC-WK 5539 Adv Standing Sem: Emerging Iss In Soc Welfare Policy And Research

This required seminar in the Advanced Standing Program examines emerging policy issues and research developments in the field. Students prepare to choose a field-of-practice concentration and to enter the Advanced-level year of study. Restriction: Restricted to Advanced Standing Students.

3 hrs

[back to top](#)

SOC-WK 5540 Advanced Social Work Practice I

This course prepares students with an advanced generalist social work perspective and to evaluate and integrate theory, values, and skills for assessment and direct practice with complex case situations in a rapidly changing service environment. Must Be taken concurrently with SOC-WK 5512. Prerequisite: Completion of foundation year.

3 hrs

[back to top](#)

SOC-WK 5541 Advanced Social Work Practice II

This course extends the advanced generalist model of social work practice to working with challenging families and small groups. The course introduces leadership, organizational, and management competencies for professional practice in social service agencies and skills for coalition-building and collaboration in communities. Must be taken concurrently with SOC-WK 5513. Prerequisite: Completion of foundation year.

3 hrs

[back to top](#)

SOC-WK 5542 Social Services With Older Adults

This course provides an overview of social service practice with older adults. Students examine population demographics, identify normal and abnormal aspects of aging, and examine methods, paradigms, and approaches to effective advanced generalist practice in treatment and community settings. Prerequisite: Completion of foundation year.

3 hrs

[back to top](#)

SOC-WK 5544 Families, Communities and Child Welfare

This course examines child centered, family centered and neighborhood based approaches to child welfare. Prerequisites: Completion of Social Work Foundation Sequence

3 hrs

[back to top](#)

SOC-WK 5546 Mental Health and Substance Abuse in Social Work Practice

This course examines current practice approaches and policy/research issues in mental health and in the dually diagnosed. Students focus on service delivery systems of care with a variety of adult populations from an empowerment perspective. Prerequisite: Completion of foundation year.

3 hrs

[back to top](#)

SOC-WK 5550 Program Evaluation and Management

this course is designed to train students in evaluation of direct practice, community needs and underserved populations. Students develop a new or enhanced model of service delivery to address needs. Strategic planning, management in theories and grant writing and major components of this course. Prerequisites: Completion of foundation year.

3 hrs

[back to top](#)

SOC-WK 5560 Psychopathology: A Competency Based Assessment Model in Social Work Practice

The DSM will be used in conjunction with a competency-based assessment model that includes an ecological approach and systems theory to determine what biopsychosocial factors have contributed to the client's problem. The multi-axial system become a tool to gather information, that supports the competency-based assessment. Prerequisites: Foundation Coursework
Offered: Every Fall

3 hrs

[back to top](#)

SOC-WK 5562 Family Organization and Development: Multi-systems Interventions

This course examines developmental, structural, systemic family therapy and multi-system interventions. Prerequisites: Completion of Social Work Foundation

3 hrs

[back to top](#)

SOC-WK 5563 Life Span Issues in Developmental Disabilities

The need for interdisciplinary process in the human services sector, which supports inclusiveness and quality of life of individuals, is covered. The course covers cultural competence, person-centered and community-based application of services for their implications in planning and delivery of services. Cross-listed with PSYCH 5541
PREREQUISITES: Completion of Social Work Foundation Sequence

3 hrs

[back to top](#)

SOC-WK 5564 Advanced Group Interventions in Social Work

This course provides both a didactic and experiential introduction to advanced group therapy for social work practice, explores the therapeutic factors, norms and their creation, the role of leader and termination as a group experience. Offered: On Demand

3 hrs

[back to top](#)

SOC-WK 5565 Systemic Oppression and Social Justice Advocacy

This course presents theoretical concepts of oppression, privilege, and social justice advocacy. Students will examine their social principles and their personal experiences. Social work's core values of social practice will be critically analyzed. Prerequisites: Completion of Social Work Foundation Sequence.

3 hrs

[back to top](#)

SOC-WK 5566 Family and Community Violence

Students will consider the sources of interpersonal violence. The causes and forms of community and family violence will be examined in relationship to the impact of individuals, families and communities. Prevention and intervention models will be studied and developed. Prerequisites: Completion of Social Work Foundation Sequence

3 hrs

[back to top](#)

SOC-WK 5568 School Social Work Practice

Students will learn the knowledge and skills required for performing roles and functions of school social work in K-12 settings. They will apply social systems and the strengths perspectives within the context of school as organizations interconnected to community environments. Offered: On Demand

3 hrs

[back to top](#)

SOC-WK 5575 Advanced Generalist Community Practice

This seminar covers community social work practice at the advanced level addressing values, knowledge and skills essential for community social change. Models of community practice are addressed to facilitate student skill applicant in social planning, community development, and community collaboration strategies. Each model requires knowledge of large systems practice. Prerequisites: Completion of 30 crs or Required Foundation Curriculum Offered: Every Winter on Demand

3 hrs

[back to top](#)

SOC-WK 5579 Integration Seminar In Advanced Generalist Practice

This course, taken in the last semester, serves as a final integration of advanced generalist competencies in direct practice, organization/mangagement, social action/community building and advocacy, research/evaluation and leadership skills. Students prepare a major project for presentation.

3 hrs

[back to top](#)

SOC-WK 5580 Special Topics In Social Work

These seminars are designed to examine relevant and innovative areas emerging in social work practice which are not available in the regular course offerings. Topics, instructors, and prerequisites are listed in the semester bulletin. Prerequisite: Completion of foundation year.

1-3 hrs

[back to top](#)

SOC-WK 5590 Readings And Investigations In Social Work

Under the direction of a faculty member, individual students may pursue an in-depth area of study in generalist social work practice, including a research project of the student's choice. Prerequisite: Permission of Director and Curriculum Committee.

1-3 hrs

[back to top](#)

Sociology

SOCIOL 5501 Social Theory I

Examines the development of social theory in Europe up to the beginning of the twentieth century, with a focus on its intellectual precursors of social theory, debates over the nature of society, and controversies over the distinct features of sociology as an emerging academic discipline. The major perspectives covered include the intellectual origins of sociological thought in Great Britain, France, and Germany, and the debates as reflected in the writings of Karl Marx, Emile Durkheim, Max Weber, and Georg Simmel. Prerequisite: undergraduate course in Sociological Theory. Offered: Fall.

3 hrs

[back to top](#)

SOCIOL 5502 Social Theory II

Examines the major sociological theories developed during the twentieth century and contemporary debates over the nature of society and the nature of our knowledge about society. Theories to be examined include behaviorism, symbolic interactionism, structural functionalism, phenomenology, conflict theory, postmodernism, those that attempt to integrate social agency and structure, and feminist theory. Prerequisite: SOCIOL 501. Offered: Winter.

3 hrs

[back to top](#)

SOCIOL 5503 Controversies In Contemporary Social Theory And Practice

This course critically examines central issues in contemporary debates among social theorists over the nature of society and how it should be studied. Offered: Fall

3 hrs

[back to top](#)

SOCIOL 5506 Colloquium: Research And Dissertation Project

A colloquium of Ph.D. students to be taken during the Fall semester of their second year in the program. Students will be guided to develop their dissertation proposal under faculty direction and exchange their experience. The focus of the seminar is on students developing and refining a research agenda that will eventually result in their dissertation proposal. Issues to be addressed include how to state the research question, how to identify and evaluate theoretical perspectives, how to review the literature, how to determine the methodology to be used as well as the options for data collection, and how to put all of this information into a readable and operational research proposal. Note: Fall.

3 hrs

[back to top](#)

SOCIOL 5510 Sociological Methods I

A survey of methods used by sociologists: selection and formulation of problem, research design, survey research, participant observation, sampling, reliability and validity, use of scales, and data analysis. Crosslisted with CJC 510. Offered: Fall Prerequisite: SOCIOL 362 or equivalent.

3 hrs

[back to top](#)

SOCIOL 5511 Sociological Methods II

Quantitative research is the primary focus of the course; emphasis is placed on problem formulation; research design; sampling procedures; questionnaire construction and interviewing techniques; data collection; problems of scaling, validity and reliability; uses of secondary data sets; data analyses and report writing. Crosslisted with CJC 511. Prerequisite: SOCIOL 362 or equivalent. Offered: Winter.

3 hrs

[back to top](#)

SOCIOL 5512 Qualitative Methodology

Experience in field research and participant observation methodology with focus on the research process including the role of the researcher, data collection and analysis, ethical issues, and the value and limitation of qualitative methodologies. Prerequisite: One semester of research methods.

3 hrs

[back to top](#)

SOCIOL 5516 Intermediate Statistics

A systematic development of the logic and practice of selected statistical methods used in sociological research. Included are analysis of variance and covariance, regression analysis, multiple contingency, and non-parametric tests. Prerequisite: SOCIOL 363 or equivalent. Crosslisted with CJC 516.

3 hrs

[back to top](#)

SOCIOL 5523 Sociology Of Deviance

A seminar devoted to a critical examination of the predominant studies on the subject as well as to a discussion of some of the major forms of deviance in contemporary American society.

3 hrs

[back to top](#)

SOCIOL 5525 Complex Organizations

Examination of the more important studies and theories concerning organizations such as business, factories, governmental bureaus, churches and universities. The communication-decision process, status system, socialization, legitimization of power, and the interrelationships of formal structures.

3 hrs

[back to top](#)

SOCIOL 5530 Anthropology Of Gender

This class explores theories of the social construction of gender in cross-cultural contexts. It will also explore global issues of diversity, local and international politics, the economy and work, education, etc.

3 hrs

[back to top](#)

SOCIOL 5531 Feminist Theories

This class introduces the major feminist theories and their primary authors over the last 200 years. The class takes both an historical (we begin with two millennia of male-centered theories about women) and a conceptual approach (theories are grouped by common ground) and familiarizes the student with both the historical processes that necessitate feminist theories as well as with the breadth of the historically and currently available scholarship. Graduate students are expected to fulfill all undergraduate requirements at graduate-level quality, including independent research components; in addition, graduate students are required to be prepared to lead class discussions. Prerequisites: Introduction of Women's Studies
Offered: Every Winter

3 hrs

[back to top](#)

SOCIOL 5537 Anthropology of Religion

This course explores the ways anthropologists have gone about studying religion from the opening decades of the 20th century to present. The course introduces students to the diversity of human religious expression and experience through anthropological literature and to the diversity of anthropological expression especially as it has been revealed in social scientific studies of religious life. The course is designed to generate a critical dialogue about the special role that religion has played in the ongoing anthropological engagement with "other" societies and cultures over time.

3 hrs

[back to top](#)

SOCIOL 5538 Gender, Work And Social Change

This course examines the role of gendered work and consumption in global social change. Drawing from sociological perspectives on gender and work, this course foregrounds a global comparative analysis of societal development and working contexts, including tourism employment, sex work, domestic work, and agricultural, garment, and informatics production. Graduate students are required to carry out independent research or complete work in the area of public sociology and academic-service learning. Students will write a conference paper or journal quality article from this research.
Offered: Every Winter

3 hrs

[back to top](#)

SOCIOL 5540 Urban Social Structure

An examination of the social structure of the American city with special reference to the historical development of American cities. Attention will be focused on the role of social institutions as they have changed in relation to urban problems.

3 hrs

[back to top](#)

SOCIOL 5550 Sociology Of Aging

A seminar in which theoretical orientations, methodologies, and findings from crosscultural and community research in gerontology are systematically reviewed, within a social change framework.

3 hrs

[back to top](#)

SOCIOL 5554 Sociology Of The Aging Woman

An exploration of the intersection of gender and aging issues with special attention to cultural images of women, the development of self-concept and identity in mid-life and beyond, caring roles in the family, work and retirement, and health and mental health issues. These issues are examined within the context of social class, race, and ethnicity. Implications for community programs and social policy are considered. Graduate students will be expected to carry out a research project and to lead a class session.

3 hrs

[back to top](#)

SOCIOL 5556 Aging And Developmental Disabilities

This course explores the experience of aging with a developmental disability or mental retardation within the context or normative aging. Among the comparisons made between older persons with and without developmental disabilities are their demographic characteristics, physical and cognitive functioning, role transitions and losses, identities and self-concepts, and family and caregiving issues. Policies, programs, and emerging concepts of best practices are considered within the context of quality of life, ethical, and community inclusion bases.

2 hrs

[back to top](#)

SOCIOL 5557 Practicum In Aging And Developmental Disabilities

Students gain experience in working with and defining issues of older persons with developmental disabilities through placements in sheltered workshops, senior centers, residential group homes, and other community-based programs. Students must be simultaneously enrolled in SOCIOL 556.

1 hr

[back to top](#)

SOCIOL 5558 Cultures Of The African Diaspora

The course will explore the cultures of African people and their descendents who settled in Europe, the Caribbean or the Americas due primarily to the impact of the Trans-Atlantic trade in human beings. The focus will be comparative, with emphasis on cultural adaptation, kinship systems, music and religion

3 hrs

[back to top](#)

SOCIOL 5560 Sociology Of Death And Dying

This course examines attitudes, behaviors, and institutions related to death and dying in contemporary American society. Topics include the meanings of death in American society, social settings for dying, interaction with the dying, customs and practices surrounding death, role transitions of survivors, and suicide. Special attention is given to issues of aging and dying.

3 hrs

[back to top](#)

SOCIOL 5573 Latin American Immigrants and Refugees in the U.S.

This course is the study of history, culture and societies of immigrants and US citizens of Latin American heritage living in the U.S.

3 hrs

[back to top](#)

SOCIOL 5580 Special Studies In Sociology

An opportunity to explore in depth topics not included in usual course offerings. One or more topics will be announced in advance of registration.

1-3 hrs

[back to top](#)

SOCIOL 5580 A Special Studies In Sociology

1-3 hrs

1-3 hrs

[back to top](#)

SOCIOL 5595 Directed Research Experience

Research project supervised by faculty.

3 hrs

[back to top](#)

SOCIOL 5597 Independent Readings

Intensive readings in an area selected by the student with prior consultation with the instructor.

1-3 hrs

[back to top](#)

SOCIOL 5599 Thesis And Research

Directed specialized research. Before writing a thesis, the student must clear the topic and research design with the Supervisory Committee. The course also involves the writing of the thesis.

1-6 hrs

[back to top](#)

SOCIOL 5699 Dissertation Research

Individual directed research leading to preparation and completion of doctoral dissertation.

1-12 hrs

[back to top](#)

SOCIOL 5899 Required Graduate Enrollment

1 hr

[back to top](#)

Spanish

SPANISH 5514 The Generation of 1898

An examination of the intellectual, critical, historical and social problems as reflected in the writings of Ganivet, Unamuno, Valle-Inclan, Baroja, Azorin, and others.

3 hrs

[back to top](#)

SPANISH 5516 Medieval Spanish Literature

A study of selected medieval masterpieces in their Old Spanish form, with special emphasis on Romances, the Cantar de Mio Cid La Celestina, El Corbacho, Libro del buen amor, etc. Includes a short history of the Spanish language.

3 hrs

[back to top](#)

SPANISH 5519 Federico Garcia Lorca

A study in depth of the poetry and drama of Federico Garcia Lorca.

3 hrs

[back to top](#)

SPANISH 5520 Cervantes' Don Quixote, Part 1

An intensive reading of the first part of Cervantes' novel, Don Quixote.

3 hrs

[back to top](#)

SPANISH 5521 Cervantes' Don Quixote, Part II

An intensive reading of the second part of Cervantes' novel, Don Quixote. Part One is not a prerequisite. Offered: On Demand

3 hrs

[back to top](#)

SPANISH 5526 Golden Age Drama

A study in depth of the creation of national theater by Lope de Vega and his followers.

3 hrs

[back to top](#)

SPANISH 5527 Pre-Columbian and Spanish Colonial Literature

A study of pre-Columbian works in drama, narrative, and poetry (Popol Vuh, Apu-Ollantay, Incan and Aztec poetry) along with a survey of Spanish-American colonial literature.

3 hrs

[back to top](#)

SPANISH 5528 Contemporary Spanish Poetry

A comprehensive and intensive study of 20th-century Spanish poetry. The poets and their poetry will be studied in the light of literary movements, foreign influences, political tendencies and philosophical ideas.

3 hrs

[back to top](#)

SPANISH 5529 Novel of the Mexican Revolution

The revolution as the principal focus of 20th-century Mexican fiction. The course will examine both the evolving understanding of the event/process and the sophistication of narrative technique employed in its presentation. Among the writers to be studied are Azuela, Guzman, Lopez y Fuentes, Yanez, Revueltas, Rulfo and Fuentes.

3 hrs

[back to top](#)

SPANISH 5530 Spanish Mysticism

An examination of the development of mysticism in Oriental and Occidental civilizations, with emphasis on the great periods of mystic experience as reflected in the literary production of the Spanish Golden Age. Readings could include the works of Fray Luis de Granada, Fray Luis de Leon, Saint John of the Cross and Saint Teresa of Avila. Offered: On demand

3 hrs

[back to top](#)

SPANISH 5531 The Golden Age Novel

A study of major prose works of the Golden Age. Possible topics include authorship, innovative narrative techniques, textual strategies and metafiction issues. Readings could include works by Alfonso Martinez de Toledo, Diego de San Pedro, Fernando de Rojas, Francisco Delicado, Cervantes, and Lope de Vega. Offered: On demand

3 hrs

[back to top](#)

SPANISH 5532 Pastoral Literature

A study of the development of pastoral literature during the Spanish Golden Age. Possible texts: Juan del Encina's Eclogues, Montemayor's Los siete libros de la Diana and Cervantes' Galatea. These works will be examined within their historical and cultural context. Offered: On demand

3 hrs

[back to top](#)

SPANISH 5533 Cervantes' Exemplary Novels

A study of Cervantes' Exemplary Novels within the context of 17th Century Spain. Attention will be paid to interpretive possibilities and how knowledge of historical contexts might influence readings of this rich and varied cultural output.

3 hrs

[back to top](#)

SPANISH 5534 The Picaresque Novel

A study of the development of picaresque fiction during the Spanish Golden Age. The course deals with novelists principally active during the Baroque period such as Mateo Aleman, Francisco Lopez de Ubeda, Miguel de Cervantes, and Francisco de Quevedo.

3 hrs

[back to top](#)

SPANISH 5550 Modern Classics of Latin American Literature

The goal of the course is to familiarize the student with the principal Latin American writers of the modern period. The focus will be dual: the progressive sophistication of literary technique, and the refinement of social conscience. Among the authors to be studied are: Asturias, Borges, Carpentier, Cortazar, Donoso, Fuentes, Garcia Marques, Paz, Rulfo, and Vargas Llosa. Also offered as SPANISH 450.

3 hrs

[back to top](#)

SPANISH 5553 Spanish-American Short Story

A study of Spanish-American short stories from Romanticism to the present. On demand.

3 hrs

[back to top](#)

SPANISH 5580 Special Topics

Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes. Prerequisite: Permission of the instructor. On demand.

1-3 hrs

[back to top](#)

SPANISH 5580 D Special Topics

1-3 hrs

[back to top](#)

SPANISH 5590 Directed Studies in Spanish & Latin American Literature

Intensive readings in a field or literary figure to be selected by the student in consultation with the instructor. Available by permission of graduate advisor or instructor, as appropriate, only when student cannot take regularly scheduled courses.

1-3 hrs

[back to top](#)

Statistics

STAT 5501 Statistical Design Of Experiments

This course is designed to present a variety of experimental design techniques to students with moderate mathematical and statistical background. The course includes three major components: efficient factorial designs, linear and quadratic process optimization of the location parameter, and variability reduction. Students will be trained to use the SPSS statistical software package. Prerequisite: STAT 436 or consent of instructor

3 hrs

[back to top](#)

STAT 5537 Mathematical Statistics I

Probability theory, distribution functions, sampling, statistical inference, topics in advanced applied statistics. Prerequisite: MATH 402 or consent of the instructor. Note: Continued in STAT 5547.

3 hrs

[back to top](#)

STAT 5547 Mathematical Statistics II

Continuation of STAT 5537.

3 hrs

[back to top](#)

STAT 5551 Applied Statistical Analysis

Methods for analyzing data from experiments and observational studies; design-based and model-based inferences; model assessment; ANOVA; power analysis; SAS procedures. Prerequisites: STAT 436 or consent of instructor Offered: Every other Winter

3 hrs

[back to top](#)

STAT 5561 Time Series Analysis

This course is intended to present the basis knowledge (including models, methods and concepts) of time series analysis to students with a good background in intermediate mathematical statistics. Some elementary knowledge of basic linear regression analysis would be helpful but not necessary. The presentation will be balanced between theory and data analysis, with sufficient theory to understand the basis of methods and a broad variety of models and many real data examples. Case studies will be drawn from business and economics, network traffic and meteorology, and data will be analyzed by students using existing computer programs (SAS, Minitab and R). Students are also expected to understand proper use and limits of time series models. Prerequisites: STAT 441 or consent of instructor note: This course will be offered every other winter.

3 hrs

[back to top](#)

STAT 5565 Regression Analysis

Simple linear regression; multiple linear regression; correlation analysis; model selections; checking assumptions; regression diagnostics; combating multi-collinearity; nonlinear regression. Prerequisites: STAT 436 or consent of instructor Offered: On Demand

3 hrs

[back to top](#)

STAT 5572 Multivariate Analysis

Random vectors; multivariate normal distributions; Hotelling's T-square distribution; Wishart distribution; inferences on one mean vector; MANOVA; inferences on covariance matrices; profile analysis. Prerequisites: MATH 420 or consent of instructor Offered: Every other Fall

3 hrs

[back to top](#)

STAT 5576 Probability

Existence and extension of measure, random variable, expectation and its properties, types of convergence, law of large numbers, weak convergence, central limit theorem, and martingale. Prerequisites: STAT 436 and MATH 412 Offered: Every Fall

3 hrs

[back to top](#)

STAT 5578 Advanced Mathematical Statistics

Exponential and location families, principles of data reduction, asymptotic distributions, advanced theory of estimation and hypothesis testing.

3 hrs

[back to top](#)

STAT 5590 Special Topics

Selected topics in various fields of mathematics. May be repeated for credit when the topic varies. Prerequisite: Consent of instructor.

1-3 hrs

[back to top](#)

Theatre

THEATRE 5500 RA Theatre Collaboration

A course for M.F.A. students exploring the collaboration/ communication process in preparing a production. Must be elected by all students assigned to design, direct, technical direct or stage manage within the current or the following semester. Maximum of 8 hours applicable towards degree.

1-2 hrs

[back to top](#)

THEATRE 5501 R Voice Training

(A,B,C,D) Training for the speaking and singing voice, development of skills in vocal dynamics, physical control, and relaxation for the actor, dialects and verse structure. Four semesters required for acting emphasis.

2 hrs

[back to top](#)

THEATRE 5506 RR French Drama And Theatre

Study of significant plays and production methods in France from medieval times to the present. Particular emphasis will be given to the plays of Moliere, Racine, and Corneille, and to internationally renowned contemporary directors.

3 hrs

[back to top](#)

THEATRE 5507 19Th-Century Continental Theatre

Production of significant French, German, Russian, Spanish, and Scandinavian plays and playwriting of the 19th century. Particular emphasis will be given to plays representative of romanticism, realism, naturalism, fin-de-siecle decadence, and intensive study of production history.

3 hrs

[back to top](#)

THEATRE 5508 20Th-Century Continental Theatre

Study of the production of significant plays of Continental Europe from Strindberg to the present. Dramatic literature will be related to artistic currents such as expressionism, surrealism, the absurd, and where applicable, to political currents.

3 hrs

[back to top](#)

THEATRE 5509 Russian Drama And Theatre

Study of the production of Russian and Soviet plays with reference to the development of theatre art from the Christianization of Russia to contemporary post-Soviet drama.

3 hrs

[back to top](#)

THEATRE 5510 History Of The American Theatre I

An exploration of the trends in and the development of the American theatre from Colonial times to 1900.

3 hrs

[back to top](#)

THEATRE 5511 History Of The American Theatre II

An exploration of the trends in and the development of the American theatre for 1900 to the present.

3 hrs

[back to top](#)

THEATRE 5512 R History Of The English Stage I

The English stage and its arts, crafts and literature from the medieval cycles through the Restoration.

3 hrs

[back to top](#)

THEATRE 5513 History Of The English Stage II

Development of English and Irish theatre art and dramatic literature from the 18th century to the present.

3 hrs

[back to top](#)

THEATRE 5514 History of Design And Technology I

The study of period style and scenic, costume, lighting, and technical production practices from the ancient world through the 17th century. The course will emphasize the application of research toward the presentation of period plays and contemporary production.

3 hrs

[back to top](#)

THEATRE 5515 R History of Design And Technology II

The study of period style and scenic, costume, lighting, and technical production practices from the 18th century to the present. The course will emphasize the application of research toward the presentation of period plays and contemporary production.

3 hrs

[back to top](#)

THEATRE 5516 A Technical Production for The Practitioner

The course is an in-depth review of technologies in scenery, lighting and stage operations, expansion of that knowledge, and application of it to the individual class member's particular theatre. Classroom material is augmented by hands-on experience in a controlled laboratory situation. Students should have a prerequisite of a basic technical theatre course or considerable practical experience. This course can be repeated for credit.

3 hrs

[back to top](#)

THEATRE 5516 B Technical Production for The Practitioner

See course description for THEATRE 5516A.

3 hrs

[back to top](#)

THEATRE 5520 Individual Performance Studies

(A,B,C) Private instruction for the advanced student. Prerequisite: Permission of the faculty member with whom the student will be studying.

1-2 hrs

[back to top](#)

THEATRE 5520 L Individual Performance Studies

1-2 hrs

[back to top](#)

THEATRE 5521 A Professional Sound Design

Professional Sound Design is a series of four courses constructed to develop the designer's skills from research and initial sound collection, into interpretation, collaboration and idea development, concluding with the production of finished designs for the MFA productions. Each section deals with problems of increasing complexity beginning with "found" design material for early production and leading to indigenous designs created and layered for complex production support. The course may be taken once or twice for non-sound designers with the full cycle being required for the sound design emphasis.

3 hrs

[back to top](#)

THEATRE 5521 B Professional Sound Design

3 hrs

[back to top](#)

THEATRE 5521 C Professional Sound Design

Professional Sound Design is a series of four courses constructed to develop the designer's skills from research and initial sound collection, into interpretation, collaboration and idea development, concluding with the production of finished designs for the MFA productions. Each section deals with problems of increasing complexity beginning with "found" design material for early production and leading to indigenous designs created and layered for complex production support. The course may be taken once or twice for non-sound designers with the full cycle being required for the sound design emphasis.

3 hrs

[back to top](#)

THEATRE 5521 D Professional Sound Design

Professional Sound Design is a series of four courses constructed to develop the designer's skills from research and initial sound collection, into interpretation, collaboration and idea development, concluding with the production of finished designs for the MFA productions. Each section deals with problems of increasing complexity beginning with "found" design material for early production and leading to indigenous designs created and layered for complex production support. The course may be taken once or twice for non-sound designers with the full cycle being required for the sound design emphasis.

3 hrs

[back to top](#)

THEATRE 5530 Drafting for The Theatre

Practical laboratory course in drafting for the theatre encompassing floor plans, sections, designer's evaluations, front and rear elevations, working drawings, and problems in communicating design ideas. Fall semester.

3 hrs

[back to top](#)

THEATRE 5531 R Rendering Techniques for the Theatre Designer II

Continuation of Rendering Techniques with the introduction of color, pastels, watercolor and gouache. Skills are applied in developing projects for design in the theatre.

3 hrs

[back to top](#)

THEATRE 5532 Professional Costume Design

(A, B, C, D) The courses in Professional Costume Design are intended to develop the costume designer's skills in research, rendering and drawing. Each section will deal with specific problems of design, such as period, line, silhouette, color and texture. Specific problems in design from realistic to stylized productions will be worked on by the students. The course may be taken once or twice by non-costume designers with the full cycle being required for costume emphasis.

3 hrs

[back to top](#)

THEATRE 5534 Costume Construction I

(A,B,C) Research and methodology into one or more of the following areas of costume construction for the stage: period pattern and tailoring adaptation, work with non-woven materials, and the cutting and finishing of costumes for the stage. May be repeated up to six hours with content change and permission of instructor.

3 hrs

[back to top](#)

THEATRE 5535 Technical Studies In Costuming And Makeup

(A,B,C) Concentration in one or more of the arts and crafts necessary to costume design. Areas to be chosen from include: fabric dyeing and painting, millinery, wig design and construction, latex prosthetic, and decorative accessories for the stage. May be repeated up to six hours with content change and permission of instructor.

3 hrs

[back to top](#)

THEATRE 5536 Professional Scene Design

(A,B,C,D) Professional Scene Design is a series of courses constructed to develop the designer's skills from research and initial sketches to finished renderings, models and working drawings. Each successive section deals with problems of increasing complexity beginning with one-set realistic productions through unit-settings, stylization and multiple setting problems. The course may be taken once or twice for non-set designers with the full cycle being required for the scene design emphasis.

3 hrs

[back to top](#)

THEATRE 5538 Scene Painting

A practicum course in scene painting techniques and execution. Introduction to painting equipment and supplies, priming and preparation of surfaces and materials, standard techniques for painting ornament.

3 hrs

[back to top](#)

THEATRE 5539 Scene Painting II

A practicum course in scene painting techniques with emphasis on painting interior drops, exterior landscapes and three-dimensional pieces.

3 hrs

[back to top](#)

THEATRE 5540 Pattern Drafting And Cutting

Theory and laboratory study of the techniques and methods employed in drafting patterns for the professional stage.

3 hrs

[back to top](#)

THEATRE 5545 Professional Acting Techniques I

Theatre games, exercises, mask work, and some scene study to develop the first year acting/directing class into a training ensemble, instill a clear and uniform vocabulary, heighten awareness, and begin concentrated skill work. The semester will culminate in a class project.

3 hrs

[back to top](#)

THEATRE 5546 Professional Acting Techniques II

Continuation of THEATRE 5545 with emphasis on the application of the first semester's work through scene study of contemporary plays and monologues.

3 hrs

[back to top](#)

THEATRE 5547 Professional Acting Techniques III

Concentration on non-naturalistic styles. Work on scenes from Shakespeare and other classical playwrights.

3 hrs

[back to top](#)

THEATRE 5548 Professional Acting Techniques Iv

Work on audition material and further scene work dealing with specific individual acting problems.

3 hrs

[back to top](#)

THEATRE 5549 Master Class In Acting

(A,B,C,D) Class in advanced studies in acting. May be repeated for credit up to eight hours as content and guest artist change. Permission of instructor or head of area required. Required for third year graduate acting students in the fall semester and may be repeated subsequently as elective.

2 hrs

[back to top](#)

THEATRE 5551 Rendering Techniques for the Theatre Designer III

Developing techniques for rendering in realistic settings: interiors, landscapes, fabric and furnishings.

3 hrs

[back to top](#)

THEATRE 5552 R Rendering Techniques for the Theatre Designer Iv

Developing techniques for rendering in non-realistic styles with the emphasis on imaginative designs, light and air, created textures, etc.

3 hrs

[back to top](#)

THEATRE 5557 Theatre History I

Development of theatre art-including dramatic literature, staging, and performance styles-from the beginning through the 17th century. This course also looks at Asian theatre forms. Students read approximately 20 plays. Prerequisite: Graduate Status Offered: Every Fall

3 hrs

[back to top](#)

THEATRE 5560 Theatre History II

Development of western theatre art-including dramatic literature, staging, and performance styles-from the 18th century to the present. Students will read approximately 24 plays Prerequisite: Graduate status Offered: Every winter

3 hrs

[back to top](#)

THEATRE 5562 Actor Practicum

A contemporary scene study class for actors. Actors test their acquired process skills with major emphasis placed on characterization.

3 hrs

[back to top](#)

THEATRE 5563 Text Analysis I

Linear analysis of selected prose dramas with concentration on character delineation, images and motivation for actors and directors.

3 hrs

[back to top](#)

THEATRE 5564 Text Analysis II

Continuation of THEATRE 5563 with emphasis on verse plays. Selected playwrights from the Greek and Elizabethan periods will be included along with modern verse dramatists.

3 hrs

[back to top](#)

THEATRE 5565 Introduction To Professional Directing

The first part of the class is devoted to an intensive study of various and diverse concepts related to the dramatic experience by dramatists, critics, and directors. The class also examines current production methods and practices for today's functioning professional director. Systems related to stage management and actors are investigated.

3 hrs

[back to top](#)

THEATRE 5567 Professional Directing Practicum

This class will move from concept to production. Work will revolve around the presentation of production concept statements in which the director will select, organize and articulate the theatrical substance in support of his or her chosen concept. Intensive analysis will lead to the development of an image/metaphor for production. Term will include presentation of a full book justifying concept choices for scenic, costume, music and dance, and, finally, full production.

3 hrs

[back to top](#)

THEATRE 5568 Seminar In Dramaturgy

Critical analysis of dramatic structure and techniques, with special reference to modern and contemporary drama.

3 hrs

[back to top](#)

THEATRE 5569 Master Class in Directing

(A,B,C,D) Class in advanced studies in directing. May be repeated for credit up to eight hours as new material and guest artist change. Permission of instructor or head of area required. Graduate students elect THEATRE 5569.

2 hrs

[back to top](#)

THEATRE 5570 Professional Lighting Design

(A, B, C, D) Professional Lighting Design is a series of courses concerned with the study of light as a design element. Projects to implement design theory are primarily selected from the areas of dramatic, musical and opera theatre, and dance. Emphasis is on the design process with each successive section dealing with problems of increasing complexity. Areas of study and projects are chosen on the basis of individual levels of development. When elected by non-lighting designers the course may be elected for a maximum of two semesters.

3 hrs

[back to top](#)

THEATRE 5572 Stage Lighting Equipment

A comprehensive study of contemporary technical equipment and its usage to actualize a lighting design. Areas of emphasis include instruments, color and color theory, lighting control systems, projection, and optical special effects.

2 hrs

[back to top](#)

THEATRE 5573 Professional Technical Production

Detailed study and experimentation with recent scenic materials, scenery construction, rigging systems, use of metal and special effects.

3 hrs

[back to top](#)

THEATRE 5574 Theatre Regulations, Laws and Safety

Survey of fire, city and Equity codes, and insurance, liability, health rules and regulations related to theater operation. Union and legal contracts, philosophy and relations with theatre facilities and operations.

1 hr

[back to top](#)

THEATRE 5575 R Property Construction

Construction techniques and materials used to make and modify set and hand properties and set dressing.

3 hrs

[back to top](#)

THEATRE 5577 Advanced Materials

(A,B,C,D) The theatre technician and designer are dependent on a wide range of materials in the creation of their art. Each semester the student will pursue detailed study of a material area (i.e., wood, metal, plastics, textiles), the processes of its usage and its related process-products (i.e., adhesives, paints, dyes, etc.). Field trips and hands-on laboratory work are integral to the course.

3 hrs

[back to top](#)

THEATRE 5578 Professional Theatre Administration

Theories, problems and techniques preparing the student for effective interaction with professional theater administration, offering a foundation for potential theatre administrators as well as enrichment for students of directing, design, technical and stage management.

3 hrs

[back to top](#)

THEATRE 5579 R Master Class In Design

(A,B,C,D) Class in advanced studies in design. May be repeated for credit up to eight hours as content and guest artist change. Permission of instructor or head of area required. Graduate students elect THEATRE 5579.

2 hrs

[back to top](#)

THEATRE 5580 R Graduate Technical Student Seminar

(A,B,C,D,E,F) Required in every semester for Design/Tech M.F.A. candidates choosing a technology emphasis. This continuing seminar course serves as a forum for all graduate technical students to analyze and discuss problems and solutions on current academic and KCREp productions. The course develops collaborative skills through the sharing of ideas and experiences. In addition, topics of general interest to the technician will be studied through guest lecturers and/or individual projects prepared by the faculty and students and presented to the class.

2 hrs

[back to top](#)

THEATRE 5583 Seminar on Technical Production Management

Seminar involving shop organization, scheduling, purchasing, lending and borrowing, rentals, personnel, job description, organizing structure, etc. Emphasis upon organization and techniques for repertory theatre operation.

2 hrs

[back to top](#)

THEATRE 5584 Master Class In Technology

(A,B,C,D) Class in advanced studies in technology. May be repeated for credit up to eight hours as content and guest artist change. Permission of instructor or head of area required.

2 hrs

[back to top](#)

THEATRE 5585 Advanced Technical Drafting

An intensive drafting course required for Design/Tech M.F.A. candidates with emphasis in technology. The course aims to equip the student to prepare clear shop working drawings from designer elevations. Topics include both conceptual planning techniques and developing mechanical drawing skills. One hour lecture, four lab hours, and extensive outside preparation. Previous completion of THEATRE 430 strongly suggested.

3 hrs

[back to top](#)

THEATRE 5586 Structural Design for the Stage

A course in the structural design of scenic elements. The student learns to work within the visual restrictions imposed by the designer to build structures that will bear given load requirements with a minimum of deflection. Basic engineering and load analysis principles are studied and applied in the design procedure to find the best possible solutions in terms of strength, weight, safety and cost.

3 hrs

[back to top](#)

THEATRE 5587 Stage II

This course is designed to give an introduction to the physics behind structural design and to guide the student through the process of designing safe, effective structural scenery for the theatre. Prerequisite: THEATRE 5586

3 hrs

[back to top](#)

THEATRE 5590 Directed Graduate Studies

Individual projects on the graduate level. No more than three hours with any one instructor. Prerequisite: Consent of the instructor. Only one 590 each semester.

MFA student stage managers meet one hour a week with the Production Manager of of both Kansas City Reprertory Theatre and Department of Theatre (and head of stage management training) to discuss current management problems and solutions for productions in progress. The seventeen productions mounted each year by the Department and the Rep will be examined. Students will become aware of problem solving procedures in both the professional and the academic theatre. Prerequisite: None, except to be a Graduate Stage Management Student. Offered: Fall and Winter Semesters

1 hr

[back to top](#)

THEATRE 5597 Repertory Theatre: Internship

Assignments available in the following areas: directing, design, carpentry, lighting, costume, props, acting, stage management. Technical interns will be assigned by the appropriate heads of those areas. Acting interns may understudy and/or play roles with the Kansas City Repertory Theatre on the Spencer stage or in showcase productions. Also, interns will have some responsibility in technical areas such as change-over, props, costume, running crew, and stage management. Directing interns may assist director or assistant stage manager. Prerequisite: Selection by chairman of department.

3-6 hrs

[back to top](#)

THEATRE 5598 R Research And Performance

Primarily for the M.F.A. student. Permission of the graduate faculty.

1-6 hrs

[back to top](#)

THEATRE 5599 Research And Thesis

1-6 hrs

[back to top](#)

THEATRE 5697 Repertory Theatre: Residency

The residency consists of authorized participation with the Kansas City Repertory Theatre, the Department of Theatre, or an approved outside professional company, and is arranged under departmental advisement, with the chairman of the department, and in consultation with the artistic director of KCRep. The assignment will be determined by matching interest and degree emphasis with available production assignments.

UPD 5630 Quantitive Planning Methods I

This course introduces graduate students to quantitative methods in urban planning analysis. Topics include relating built form to function, demographic forecasting, economic impact analysis, trip generation, and housing market dynamics.
Prerequisite: Statistics

3 hrs

[back to top](#)

UPD 5740 Advanced GIS for Urban Planning

This advanced level GIS course is designed to expose graduate students to high level GIS techniques and geospatial analysis in the urban planning context. Students will learn data management skills in GIS and advanced geoprocessing tools with hand-on experiences. Students will also have an opportunity to work on a real world GIS project as part of course requirements. Prerequisites: UPD 203 or UPD 5203 GIS for urban planning or an equivalent introductory level GIS course.

3 hrs

[back to top](#)

UPD 5742 Transportation Planning

This course provides fundamental theories, methods, and contemporary issues in transportation planning. The topics covered in this course include the transportation planning process, transportation systems, travel demand analysis, and policy issues such as the linkage between land use and transportation and environmental impacts, and traffic congestion.

3 hrs

[back to top](#)

UPD 5746 Urban Environmental Planning

Urban environmental planning examines ecological change due to urbanization. It looks at ways to measure and demonstrate ecological change at the site, neighborhood, and regional scales. Students incorporate environmental ideas and policies into plans developed for a client.

3 hrs

[back to top](#)

UPD 5747 Urban Redevelopment

This course examines techniques of urban redevelopment within urban planning and real estate. Graduate students learn about the development process, real estate markets, techniques of development finance and local policy approaches to urban redevelopment incentives.

3 hrs

[back to top](#)

School of Biological Sciences

School of Biological Sciences Courses Biology

BIOLOGY 5519 Principles Of Evolution

Synthesis of the modern concepts of evolution. Discussion of the biological processes that produce organic diversity through phyletic change. Discussed are variation, mutation, population genetics, natural selection and adaptation. Three hours lecture a week. Prerequisites: BIOLOGY 206 or consent of instructor.

3 hrs

[back to top](#)

BIOLOGY 5525 Bioinformatics And Data Analysis

Methods and procedures for the storage, retrieval and analysis of information in biomolecular and biological databases. Emphasis will be given to the use of database information in biological research and to recent developments in genomics and proteomics. Offered: Every Winter Prerequisites: LS-BIOC 341, LS-BIOC 360, upper level undergraduate biochemistry or molecular genetics course, or permission of instructor.

3 hrs

[back to top](#)

BIOLOGY 5534 Cardiovascular Pulmonary Physiology

Function of the cardiovascular and pulmonary systems at the cellular, tissue, and system levels with particular emphasis on regulation, maintainancy of homeostasis and integration with other systems. Consent number required. Restricted to SBS graduate students and interdisciplinary Ph.D students. Prerequisites: LS-PHYSICS 316 or equivalent.

3 hrs

[back to top](#)

BIOLOGY 5539 Mammalian Physiology

Study of the physiological functions and controls in human and related mammalian systems, with emphasis on fundamental processes that underlie normal and abnormal clinical conditions. Prerequisites: LS-PHYSICS 316 or equivalent. Restricted to SBS graduate students and interdisciplinary Ph.D students. Consent required. Offered: Every Fall

4 hrs

[back to top](#)

BIOLOGY 5542 Neurobiology

Neurobiology will consist of the presentation of theory and data concerning cellular and molecular fundamentals of the nervous system, synaptic mechanisms, sensor-motor systems, and higher-order functions of the nervous system. Three hours of lecture per week. Consent number required Restricted to SBS graduate students and interdisciplinary PhD students. Prerequisites: LS-BIOC 304

3 hrs

[back to top](#)

BIOLOGY 5591 Directed Individual Studies

Intensive readings and/or research in an area selected by the graduate student in consultation with the instructor. Not to be identified with thesis research. Restricted to SBS graduate students and Interdisciplinary Ph.D. students.

1-6 hrs

[back to top](#)

BIOLOGY 5592 Master Of Arts Topics In Biology

Special problems and topics in biology specifically intended to satisfy the project or report requirement for the master of arts degree in biology. Enrollment is restricted to persons having satisfactorily completed at least nine hours of graduate work in Biology. Restricted to SBS graduate students.

1-6 hrs

[back to top](#)

BIOLOGY 5593 Master Of Science Topics

Investigation of problems and topics to satisfy the M.S. topics requirement for the master of science degree in Cellular and Molecular Biology. Restricted to SBS graduate students. Prerequisites: LS-MBB 5561 and LS-MBB 5562.

1-4 hrs

Life Sciences

LIFE-SCI 5899 Required Graduate Enrollment

1 hr

[back to top](#)

Life Sciences- Cellular Biology and Biophysics

LS-CBB 5501 Graduate Biophysical Principles

The focus of Biophysical Principles 5501 is on the theoretical principles underlying the biophysical methods used by a wide range of biological chemists. The approaches covered include thermodynamics, chemical kinetics, molecular interactions, transport properties, quantum mechanics, optical spectroscopy, and molecular structural approaches involving nuclear magnetic resonance spectroscopy, X-ray diffraction, and Mass spectrometry. There are two lectures per week (T, TH) of 80 minutes each.

3 hrs

[back to top](#)

LS-CBB 5504 Graduate Virology

Survey of the molecular biology of animal, plant, and bacterial viruses. The course will emphasize the molecular mechanisms of virus replication, viral pathogenesis, and the use of virus as model systems to study mammalian cells. Three lecture hours per week.

3 hrs

[back to top](#)

LS-CBB 5505 Molecular And Cellular Neurobiology

The molecular basis of chemical and electrical communication between nerve cells. Topics will include: neurotransmitters, neuropeptides, receptors, channels, second messengers, cytoskeleton, cell adhesion, development, neuronal plasticity and psychopharmacology. Prerequisite or corequisite: LS-MBB 5561 and LS-MBB 5562.

3 hrs

[back to top](#)

LS-CBB 5520 Cell and Molecular Biology II

A presentation of the cellular and subcellular organization and function of eukaryotic cells. Discussions will emphasize basic concepts by which structure and functions are integrated. Prerequisite or co-requisite: LS-MBB 5561 and LS-MBB 5562.

3 hrs

[back to top](#)

LS-CBB 5530 Cell and Molecular Biology I

Molecular aspects of gene structure and function in prokaryotic and eukaryotic organisms and their viruses. Emphasis in genome structure and organization and regulation of gene expression. Prerequisite or corequisite: LS-MBB 5561 .

3 hrs

[back to top](#)

LS-CBB 5538 Molecular Recognition In Cellular Biology

Graduate Research Seminar. Studies of the latest development leading to an increased understanding of cellular biology processes when the experimental tools for structure biology analysis and molecular genetics are applied. Prerequisites: LS-MBB 5561 as co-or pre-requisite, or permission of SBS graduate advisor. Offered: Fall

2 hrs

[back to top](#)

LS-CBB 5566 Membrane Biochemistry And Biophysics

Structure and function of biological membranes including architecture, dynamics, models, biochemical compartmentation, energy transduction, transport mechanisms, membrane protein structures, and cell surface receptors. Prerequisite or corequisite: LS-MBB 5561 and LS-MBB 5562.

3 hrs

[back to top](#)

LS-CBB 5569 Structural Biology, Methods And Strategies

Analysis of strategies and methodologies such as X-ray crystallography, nuclear magnetic resonance and advanced microscopy procedures including imaging analysis for the study of relationships of higher order macromolecular structures to biological functions. Prerequisites: LS-MBB 5561 AND LS-MBB 5562. Restrictions: Restricted to AU 60 and 73 students.

3 hrs

[back to top](#)

LS-CBB 5583 Current Topics In Cell Biology And Biophysics

Current topics and recent developments in cell biology and biophysics with emphasis on rapidly developing research areas. Prerequisite or co-requisite: LS-MBB 5561 and LS-MBB 5562. Restricted to SBS graduate students and Interdisciplinary Ph. D. students.

1-3 hrs

[back to top](#)

LS-CBB 5591 Directed Individual Studies In Cell Biology And Biophysics

Intensive reading and/or research in an area selected by the graduate student in consultation with the instructor. Prerequisites: Prerequisite or corequisite: LS-MBB 5561 and LS-MBB 5562. Restricted to SBS graduate students and Interdisciplinary Ph.D. students.

1-6 hrs

[back to top](#)

LS-CBB 5596 Advanced Experimental Cell Biology I

Structured laboratory work with individual tutorial sessions designed to familiarize first year Interdisciplinary Ph.D. students with concepts and techniques of modern cell biology research. 1-2 hr/wk tutorial and 15-20 hr/wk of laboratory work. Prerequisite or co-requisite: LS-MBB 5561. Restricted to Interdisciplinary Ph.D. students with CBB or MBB as coordinating unit.

2 hrs

[back to top](#)

LS-CBB 5597 Advanced Experimental Cell Biology II

Continuation of LS-CBB 5596. Prerequisite or corequisite: LS-MBB 5561 and LS-MBB 5562. Restricted to Interdisciplinary Ph.D. students with CBB or MBB as coordinating unit.

2 hrs

[back to top](#)

LS-CBB 5599 Thesis Research In Cell Biology And Biophysics

Research and thesis preparation for M.S. degree candidates. Prerequisite or co-requisites: LS-MBB 5561 and LS-MBB 5562. Restricted to School of Biological Sciences graduate students and Interdisciplinary Ph.D. students.

1-12 hrs

[back to top](#)

LS-CBB 5612 Seminar In Cell Biology And Biophysics

Presentation and discussion of selected areas in cell biology and biophysics. This course may be repeated by doctoral students for a maximum of 3 credit hours. Prerequisite or corequisite: LS-MBB 5561 and LS-MBB 5562.

1 hr

[back to top](#)

LS-CBB 5690 Analytical Methods In Cell Biology And Biophysics

A course that emphasizes the development of skills in experimental design, analytical methods and instrumentation as applied to problems of interest to modern cell biology and biophysics, and analysis of results. Can be repeated up to a maximum of eight hours total. Prerequisites: LS-MBB 5561 and LSMBB 5562; admission in I.Ph.D program with CBB as coordinating or co-discipline; can only be taken prior to reaching candidacy.

1-4 hrs

[back to top](#)

LS-CBB 5699 Dissertation Research In Cell Biology And Biophysics

Research and dissertation preparation for interdisciplinary Ph.D. degree students who have Cell Biology and Biophysics as a discipline. Prerequisite or corequisite: LS-MBB 5561 and LS-MBB 5562. Restricted to SBS graduate students and Interdisciplinary Ph.D. students.

1-12 hrs

[back to top](#)

Life Sciences- Molecular Biology and Biochemistry

LS-MBB 5503 Eukaryotic Molecular Biology

Molecular aspects of gene structure and function in eukaryotic organisms and their viruses. Emphasis on genome structure and organization, gene expression and regulation and the molecular basis of growth and development. Prerequisite or Co-requisite: LS-MBB 5561 and LS-MBB 5562.

3 hrs

[back to top](#)

LS-MBB 5509 Graduate Developmental Biology

Principles of development and differentiation of structure during embryology in animals. Molecular, cellular and organismal level concepts and mechanism will be considered. Three hours lecture per week.

3 hrs

[back to top](#)

LS-MBB 5538 Molecular Recognition In Molecular Biology

Graduate Research Seminar. Analysis of the impact of most recent developments in molecular genetics and structural biology as related to fundamental molecular recognition events. Prerequisites: LS-MBB 5561 as co-or pre-requisite, or permission of SBS graduate advisor. Offered: Winter

2 hrs

[back to top](#)

LS-MBB 5561 General Biochemistry I

The first semester of a two-semester sequence in general biochemistry. This course will emphasize the structure of biological molecules, thermodynamics and kinetics of biological reactions, and selected aspects of energy metabolism and metabolic pathways. Prerequisite: CHEM 322R.

4 hrs

[back to top](#)

LS-MBB 5562 General Biochemistry II

The second semester of a two-semester sequence in general biochemistry. This course will emphasize selected aspects of the biochemistry of metabolism and macromolecular assemblies. The molecular basis of genetic and metabolic regulation will be discussed. Prerequisite: LS-MBB 5561.

4 hrs

[back to top](#)

LS-MBB 5565 Structure And Function Of Proteins

This course will discuss structure-function relationships of proteins. Topics will include: methods of structure-function analysis, catalytic mechanisms, and regulation of enzyme activity. Prerequisite or corequisite: LS-MBB 5561 and LS-MBB 5562.

3 hrs

[back to top](#)

LS-MBB 5567 Physical Biochemistry

Application of physical and chemical principles to elucidate structure and function of biochemical systems. The various modes of interactions between biologically important molecules and the specificity of their interaction will be examined through selected literature examples. Prerequisite or co-requisite: LS MBB 5561 and LS-MBB 5562.

3 hrs

[back to top](#)

LS-MBB 5569 Current Topics In Molecular Biology And Biochemistry

Current topics and recent developments in biochemistry and molecular biology with emphasis on rapidly developing research areas. Prerequisite or co-requisite: LS-MBB 5561 and LS-MBB 5562. Restricted to SBS graduate students and Interdisciplinary Ph.D. students.

1-3 hrs

[back to top](#)

LS-MBB 5591 Directed Individual Studies In Molecular Biology And Biochemistry

Intensive readings and/or research in an area selected by the graduate student in consultation with the instructor. Prerequisite or co-requisite: LS-MBB 5561 and LS-MBB 5562. Restricted to SBS graduate students and Interdisciplinary Ph.D. students.

1-6 hrs

[back to top](#)

LS-MBB 5596 Advanced Experimental Molecular Biology I

Structured laboratory work with individual tutorial sessions designed to familiarize first year Interdisciplinary Ph.D. students with concepts and techniques of modern molecular biology research. 1-2 hr/wk tutorial and 15-20 hr/wk of laboratory work. Prerequisite or co-requisite: LS-MBB 5561. Restricted to Interdisciplinary Ph.D. students with CBB or MBB as coordinating unit.

2 hrs

[back to top](#)

LS-MBB 5597 Advanced Experimental Molecular Biology II

Continuation of LS-MBB 5596. Prerequisite or co-requisite: LS-MBB 5561 and LS-MBB 5562. Restricted to Interdisciplinary Ph.D. students with CBB or MBB as coordinating unit.

2 hrs

[back to top](#)

LS-MBB 5599 Thesis Research In Molecular Biology And Biochemistry

Research and thesis preparation for M.S. degree candidates. Prerequisite or co-requisite: LS-MBB 5561 and LS-MBB 5562. Restricted to School of Biological Sciences graduate students and Interdisciplinary Ph.D. students.

1-12 hrs

[back to top](#)

LS-MBB 5611 Seminar In Molecular Biology And Biochemistry

Presentation and discussion of selected areas in biochemistry and molecular biology. This course may be repeated by doctoral students for a maximum of 3 credit hours. Prerequisite or co-requisite: LS-MBB 5561 and LS-MBB 5562.

1 hr

[back to top](#)

LS-MBB 5690 Analytical Methods In Molecular Biology And Biochemistry

A course that emphasizes the development of skills in experimental design, analytical methods and instrumentation as applied to problems of interest to modern molecular biology and biochemistry, and analysis of results. Can be repeated up to a maximum of eight hours total. Prerequisites: LS-MBB 5561 and LS-MBB 5562; admission into I.Ph.D. program with MBB as coordination or co-discipline; can only be taken prior to reaching candidacy.

1-4 hrs

[back to top](#)

LS-MBB 5699 Dissertation Research In Molecular Biology And Biochemistry

Research and dissertation preparation for interdisciplinary Ph.D. program students who have Molecular Biology and Biochemistry as a discipline. Prerequisite or co-requisite: LS-MBB 5561 and LS-MBB 5562. Restricted to SBS graduate and Interdisciplinary Ph.D. students.

Henry W. Bloch School of Business and Public Administration

Henry W. Bloch School of Business and

Public Administration Courses Accounting

ACCTNG 5517 Survey Of Accounting

An overview of financial and managerial accounting. The course introduces the various reports that are used by stockholders, creditors, and managers to assess company performance and evaluate financial health. In addition, techniques are presented that assist firm managers in planning, control, and decision-making activities.

3 hrs

[back to top](#)

ACCTNG 5539 Accounting Information For Management Planning & Control

This course covers the use of financial information in management decision-making. Topics include profitability and performance measurement issues, and activity-based management and decision support. Prerequisites: Admission to Executive MBA program

2 hrs

[back to top](#)

ACCTNG 5556 Cost Management

A study of the principles and techniques of cost accounting with emphasis on the structure of cost accounting systems and the processing, summarizing, and reporting of cost information. Topics include various issues relevant for manufacturing and service organizations, and introduction of situations that requires the application of cost information to managerial settings. Prerequisite: ACCTNG 5517 or equivalent. NOT open to students who have completed ACCTNG 307 or equivalent.

3 hrs

[back to top](#)

ACCTNG 5557 Introduction To Income Taxation

An investigation of the structure of federal, state, and local taxation, along with an examination of the impact of taxes on the management decision process. Prerequisite: ACCTNG 5517 or equivalent. NOT open to students who have completed ACCTNG 408 or equivalent.

3 hrs

[back to top](#)

ACCTNG 5558 Financial Accounting Theory

A study of the theory and practice of financial accounting with emphasis upon financial statement preparation and analysis of asset, liability, and equity measurement. Prerequisite: ACCTNG 5517 or equivalent. NOT open to students who have completed ACCTNG 310 or equivalent.

3 hrs

[back to top](#)

ACCTNG 5559 Advanced Financial Accounting Theory

A study of advanced topics in financial accounting. Topics include business combinations and financial statement consolidation theory and practice. Prerequisite: ACCTNG 311 or equivalent.

3 hrs

[back to top](#)

ACCTNG 5560 Introduction To Auditing And Accounting Systems

Fundamentals underlying the design of accounting systems and the processing of accounting data. Current auditing standards and procedures are extensively investigated, with emphasis on the nature of internal control, audit evidence, and audit reports. Prerequisites: ACCTNG 5558 or eqiovalent. Not open to students who have completed ACCTNG 405 or equivalent.

3 hrs

[back to top](#)

ACCTNG 5561 Personal Financial Planning

A study of the personal financial planning process and environment, with the goal of training participants to prepare integrated financial plans. Topics addressed include an overview of insurance, retirement, investments, debt management, tax issues, estate planning and professional ethics. Prerequisite: ACCTNG 5517 or equivalent.

3 hrs

[back to top](#)

ACCTNG 5562 Financial Statement Analysis

A look at financial statements prepared by corporations for external use. The course provides students with the ability to organize, summarize, and understand corporate financial data for use in decision making. The subject matter should be especially useful for students considering careers in accounting, finance and financial services, and law. Prerequisite: ACCTNG 5517 or equivalent.

3 hrs

[back to top](#)

ACCTNG 5565 Advanced Accounting Systems

An in-depth analysis of various contemporary issues in accounting information systems. Prerequisite: ACCTNG 350 or its equivalent or permission of instructor.

3 hrs

[back to top](#)

ACCTNG 5567 Information Systems Control And Audit

A study of the theory and practices employed to provide a secure computing environment. Potential threats to information systems as well as controls designed to counter those threats are emphasized. Prerequisite: One previous graduate course in accounting systems, management information systems, or computer science, or permission of the instructor.

3 hrs

[back to top](#)

ACCTNG 5569 Information Systems Consulting

An application of systems concepts to the evaluation of information systems of local organizations. Student teams will analyze, document and make recommendations for the improvement of these systems, and will communicate their findings via written reports and oral presentations. Prerequisite: One graduate information systems course or permission of instructor.

3 hrs

[back to top](#)

ACCTNG 5571 Individual Tax Problems

A study of substantive issues relating to individual taxation using the Internal Revenue Code and Regulations as sources. Topics include a detailed study of current issues such as alternative minimum tax, passive losses, and employee business expenses. Prerequisite: ACCTNG 5557 or equivalent or concurrent enrollment in ACCTNG 409.

3 hrs

[back to top](#)

ACCTNG 5572 Tax Theory And Business Applications

A study of substantive issues relating to the taxation of business entities including multi-jurisdictional considerations. Topics include business formation and dissolution, business valuation, selection of business entity, compensation of employees, sales or exchanges of business property, and business tax credits. Prerequisite: ACCTNG 409 or ACCTNG 5557 or equivalents.

3 hrs

[back to top](#)

ACCTNG 5573 Taxation Of Estates, Gifts, And Trusts

A study of substantive issues in the income taxation of estates and trusts and the taxation of estates and gifts using the Internal Revenue Code and Regulations as sources. Emphasis will be placed on lifetime and post-mortem planning techniques as well as compliance requirements. Prerequisite: ACCTNG 409 or ACCTNG 5557 (or equivalents) or concurrent enrollment in ACCTNG 409.

3 hrs

[back to top](#)

ACCTNG 5574 Tax Accounting

A study of substantive issues relating to the accounting aspects of federal income taxation. Topics include methods of income and expense reporting, adoption of and change in accounting periods and methods, and annual accounting and transactional concepts. Prerequisite: ACCTNG 409 or ACCTNG 5557 (or equivalents) or concurrent enrollment in ACCTNG 409.

3 hrs

[back to top](#)

ACCTNG 5575 Managerial Accounting: Issues, Tools And Analysis

A look at various tools used to assist in the planning, control, performance evaluation, and decision-making activities of managers. Contemporary issues that confront management are introduced where appropriate. Prerequisite: ACCTNG 307 or ACCTNG 5556 or equivalent.

3 hrs

[back to top](#)

ACCTNG 5576 Tax Research, Procedure And Practice

An introduction to research sources and methods with an emphasis on analysis and communication of conclusions. Administrative procedures of the Internal Revenue Service and the professional responsibilities of tax practitioners will also be addressed. Prerequisite: ACCTNG 409 or ACCTNG 5557 or concurrent enrollment in ACCTNG 409.

3 hrs

[back to top](#)

ACCTNG 5577 Advanced Auditing

An analysis of real-world cases of audit problems with emphasis on red flags, pressures auditors face, and serious implications of audit failure (both perceived and real). Prerequisite: ACCTNG 405 or equivalent

3 hrs

[back to top](#)

ACCTNG 5578 Current Problems In Accounting

This course will focus on an in-depth exploration of specific problems including, but not confined to those accounting problems which have resulted in official positions being published or considered by the accounting profession. Prerequisite: ACCTNG 420 or equivalent or concurrent enrollment in ACCTNG 420.

3 hrs

[back to top](#)

ACCTNG 5579 Theory Of Income Determination

This course will consider the historical and cultural development of accounting principles and the relationship of those principles to economic concepts of profit and cost. Consideration of the economic aspects of accounting measurements will provide a vehicle for exploring accounting problem areas in terms of both internal and external reporting needs. Pertinent literature in the field will be explored as a basis for both oral and written reports. Prerequisites: ACCTNG 420 or equivalent, or concurrent enrollment in ACCTNG 420.

3 hrs

[back to top](#)

ACCTNG 5580 Financial Reporting Systems

Introduces generally accepted accounting principles and concepts along with the preparation and analysis of financial statements. Prerequisite: Admission to Executive MBA Program.

2 hrs

[back to top](#)

ACCTNG 5587 Special Topics

This course is designed to facilitate one of two purposes: an initial offering of a new course (prior to formal approval) or an initial and possible only offering of new topics. Prerequisite: Consent of the instructor

3 hrs

[back to top](#)

ACCTNG 5595 Internship

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Prerequisite: Admission only by prior approval and consent of instructor.

1 hr

[back to top](#)

ACCTNG 5597 Independent Study

Independent study and research in areas of special interest under individual faculty direction. Prerequisite: Preregistration consent of instructor.

1-6 hrs

[back to top](#)

ACCTNG 5597 B Special Topics In Accounting:Cost/Managerial Accounting Theory

1-3 hrs

[back to top](#)

ACCTNG 5597 G Special Topics In Accounting:Personal Financial Planning

1-3 hrs

[back to top](#)

ACCTNG 5899 Required Graduate Enrollment

Business Management and Administration Decision Science and Operations Management

DSOM 5508 Statistical Analysis In Business

Data analysis and statistical inference in the context of business management. Communication of analysis and conclusions using text, numbers, and graphics is emphasized. Understanding the conceptual framework of probability and statistics as it relates to statistical tests and procedures is emphasized more than computational methods. Most of the work will be done using a computer spreadsheet. The course includes the topics of estimation, tests of hypotheses, analysis of variance, and multiple regression.

3 hrs

[back to top](#)

DSOM 5509 Applied Statistical Methods

Investigates the use of detailed sample data for purposes of estimating, predicting, forecasting, and explaining correlations among varied observations. Students will apply the concepts of probability theory, central tendency, sampling, inference, modeling, and forecasting to help solve managerial problems and support decision processes. Prerequisite: Admission to Executive MBA Program

2 hrs

[back to top](#)

DSOM 5514 Forecasting Theory And Applications

A study of the essential concepts, theoretical basis and applications of alternative forecasting methods. Typical methods included are smoothing and decomposition time-series methods, regression methods, econometric models, single and multiple series autoregressive/moving average methods (ARIMA methods of Box-Jenkins). Prerequisite: BDS 5508 or DSOM 5508, or equivalent.

3 hrs

[back to top](#)

DSOM 5516 Multivariate Statistical Methods

Theory and managerial applications of multiple regression analysis, multivariate analysis of variance, discriminant analysis, factor analysis and canonical correlation. Computations via statistical software and spreadsheets. Prerequisite: BDS 5508 or DSOM 5508 or equivalent.

3 hrs

[back to top](#)

DSOM 5519 Supply Chain and Operations Management

An integrating study that focuses on the models, methods, and computer-based systems of supply chain and operations management (SCOM). Managerial approaches to planning, scheduling, and controlling cost, time, quality, production, inventory, services, and supply chains are studied. This survey course exposes students to supply chain management, ERP systems, lean/just-in-time, six sigma, total quality management, e-commerce, and other contemporary SCOM topics in both product and service-oriented organizations. Prerequisites: BDS 5508 or DSOM 5508, FIN 5501, ACCTNG 5517

3 hrs

[back to top](#)

DSOM 5540 Service Operations Management

This course focuses on the increasing importance and role of service in our economy. Topics studied are: the role of services in an economy, the nature of services, service strategy, the service delivery system, service facility location, the service encounter, service quality, productivity and quality improvement. Methods of process analysis in service organizations, methods improvement procedures, and work measurement techniques are developed to provide the basis for analyses of processes, layouts, and job design in a service organization. Prerequisites: BUS-ADM 5519 or DSOM 5519 or equivalent or consent of the instructor.

3 hrs

[back to top](#)

DSOM 5541 Total Quality Management

An in-depth study of managing an effective system of quality in organizations. Coverage includes the key TQM concepts developed by Demming, Juran, and Crosby, and others, a quality process model, primary considerations in planning and implementing a quality process, and familiarization with the tools used to plan and manage quality throughout the organization. Prerequisite: BUS-ADM 5519 DSOM 5519

3 hrs

[back to top](#)

DSOM 5542 ERP-Enterprise Resource Planning Systems

Discusses the design and implementation of Advanced Manufacturing Technologies (AMT). This includes just-in-time (JIT) systems, cellular and flexible manufacturing systems (CM & FMS), computer integrated manufacturing (CIM), and enterprise resource Planning (ERP) systems. It also explores the role that manufacturing plays in product development efforts and cross-functional teams. Other topics such as manufacturing strategy, maintenance, set-up and lot size reductions, group technology and focused factories, production and operations scheduling and control techniques, and the design of work systems are presented as well. Case Studies and group projects/presentations are used for instructional purposes. Students are also required to use the MAX software to perform an ERP system analysis. Prerequisites: BUS-ADM 5519 or DSOM 5519.

3 hrs

[back to top](#)

DSOM 5543 Project Management

Planning and control of projects, to include network models, risk analysis, time reduction, resource scheduling, leadership, and evaluation. Prerequisite: BUS-ADM 5519 or DSOM 5519 or equivalent.

3 hrs

[back to top](#)

DSOM 5544 Global Supply Chain and Logistics Management

A study of integrated global supply chain management and logistics. Topics include integrating global ERP and forecasting systems, inventory management, distribution requirements planning, supply chain management, purchasing and supplier/vendor networks, logistics, transportation networks, and E-operations. ERP systems and network optimization are studied relative to both production and service operations. Prerequisites: DSOM 5519 (or equivalent), or consent

3 hrs

[back to top](#)

DSOM 5566 Operations Management for World Class Competitiveness

An examination of the basic principles and strategic used to manage the production and distribution of goods and services. This course position operations management (OM) as an important tool for achieving strategic leadership through competitive advantage, and illustrates how the managerial integration of OM functions with cooperate strategy provides frameworks and tolls for dramatically improving business processes. Prerequisite: Admission to the Executive MBA program

2 hrs

[back to top](#)

DSOM 5569 Managing Quality & Suppliers for Competitive Advantage

The development and integration of quality improvement programs such as total quality management, Six Sigma and supply chain management as essential strategic tools for competitive advantage. Major principles, techniques and systems are presented as tools to stimulate product/service improvements and innovations and as means of achieving strategic market leadership. Prerequisite: Admission to the Executive MBA Program

2 hrs

[back to top](#)

DSOM 5587 Special Topics

This course is designed to facilitate one of two purposes: an initial offering of a new course (prior to formal approval) or an initial and possible only offering of new topics. Prerequisite: Consent of the instructor

3 hrs

[back to top](#)

DSOM 5595 Internship

An opportunity for students to integrate their academics studies via employment with a business/organization in the community. Prerequisite: admission only by prior approval and consent of instructor.

1-3 hrs

[back to top](#)

DSOM 5597 Independent Study

Independent study and research in areas of special interest under individual faculty direction. Prerequisite: Preregistration consent of the instructor.

1-6 hrs

[back to top](#)

DSOM 5681 Multivariate Statistical Methods II

Theoretical and research applications of MANOVA, canonical correlation, multi-discrimination analysis, factor analysis, and introduction to structural equation modeling using appropriate software. Students are expected to undertake a major research project during this class and to apply appropriate multivariate statistical analysis to their chosen academic research topic. Prerequisite: BDS 5548 or DSOM 5516 or equivalent.

3 hrs

[back to top](#)

DSOM 5899 Required Graduate Enrollment

1 hr

[back to top](#)

Entrepreneurship

ENT 5515 Entrepreneurship Boot Camp

This course is designed to provide students with an understanding of the process for identifying and evaluating entrepreneurial opportunities. Students will also learn how strategy, marketing, financial, legal matters, and cash flow impact opportunities in terms of execution and growth and how to position a new firm for success. The course will encourage students to reflect on their own entrepreneurial potential and to evaluate entrepreneurship as a potential career path. Even those who do not feel that they are entrepreneurs will benefit by discovering how to function more effectively in entrepreneur-led organizations. Furthermore, those responsible for technical innovation and business development within existing organizations should find this course helpful. This course is open to all UMKC graduate students.

3 hrs

[back to top](#)

ENT 5525 Entrepreneurship: Managing Creativity And Innovation

The course examines the nature of creativity and innovation and how entrepreneurship involves the ability to identify market opportunity based on new ideas. Detailed attention is given to the entrepreneurial process: the concepts, skills, know-how and know-who, information, attitudes, alternatives and resources that entrepreneurs need to manage creativity in the process of creating something with tangible economic value.

3 hrs

[back to top](#)

ENT 5535 Small Business Management And Entrepreneurship

This course focuses on the nature of the entrepreneurial organization; its volatility and flux, where standard operating procedures are lacking and organizational structure, culture and leadership style are created anew each day. Successful small business management requires that a series of developmental challenges be identified and addressed if the venture is to succeed.

3 hrs

[back to top](#)

ENT 5541 Personal Entrepreneurial Strategy

This course is a cooperative offering between UMKC, University of Kansas, and Rockhurst University and is taught at Kauffman Legacy Park. The course applies the case method to allow the student to learn about the entrepreneur and the entrepreneurial process, understand the sacrifices and benefits of being an entrepreneur, and develop professional skills relevant to entrepreneurial activity. Prior approval required for enrollment. Prerequisites: BUS-ADM 5531 or MKT 5531, BUS-ADM 5532 or FIN 5532, BMA 5506 MGT 5506 or equivalents.

3 hrs

[back to top](#)

ENT 5542 Technology and New Ventures I

This course will build skills needed to create successful, high-value enterprises with technology. Emphasis will be on markets for technology, and venture capital. Case studies will emphasize the information technologies and energy/environmental technologies.

3 hrs

[back to top](#)

ENT 5543 Technology And New Ventures II

This course will draw upon the skills developed in ENT 5542 to enable student teams to prepare business plans for new ventures they might actually like to start. The information technologies and energy/environment will be emphasized, but students are welcome to propose any technologies. Prerequisites: ENT 5542 or equivalent

3 hrs

[back to top](#)

ENT 5545 Entrepreneurship And New Venture Creation

The objectives of this course are: (1) to build personal appreciation for the challenges and rewards of entrepreneurship in an independent mode by examining/simulating its environment; (2) to present and examine, through the use of complex case studies and high level guest/lectures, economic, legal and managerial mechanisms proven useful in creating new wealth; and (3) to foster continued development of venture ideas, suitable as career entry options or for investments, using a tutorial approach to business plan development, presentation and evaluation.

3 hrs

[back to top](#)

ENT 5546 Innovation & Entrepreneurship I

This course, the first of a two-course sequence, covers the entrepreneurial and innovation process from conception to birth of the new business. It looks at both process and people involved in assessing ideas, exploiting opportunities, and converting concepts into high-growth businesses. Application of the processes will be extended to both start-ups and well as new business groups within existing organizations, with an emphasis on nurturing a climate of innovation. Students will identify opportunities for high-growth potential new enterprises, develop a business plan, and present their plans to a panel of potential investors and/or senior managers. Prerequisite: Admission to the Executive MBA program

2 hrs

[back to top](#)

ENT 5547 Innovation & Entrepreneurship II

This course, the second of a two-course sequence, covers the entrepreneurial and innovation process from conception to birth of a new business. It looks at both process and people involved in assessing ideas, exploiting opportunities, and converting concepts into high-growth businesses. Application of these processes will be extended to both start-ups and well as new business groups without existing organizations, with an emphasis on nurturing a climate of innovation. Students will identify opportunities for high-growth potential new enterprises, develop a business plans, and present their plans to a panel of potential investors and/or senior managers. Prerequisite: Admission to the Executive MBA Program, ENT 5546

2 hrs

[back to top](#)

ENT 5561 New Venture Creation and Product Innovation

This course covers the first part of a two-course sequence and brings together several disciplines students have encountered in the first year of the Executive MBA program curriculum. Students will gain experience in new venture creation and product innovation management. A management simulation will serve as a continuing, evolving "case" in which course participants working in teams assume "CEO" roles. Prerequisites: Admission to Executive MBA program

1 hr

[back to top](#)

ENT 5562 Managing a High-Growth Business

This course covers the second part of a two-course sequence and brings together several disciplines students have encountered in the first year of the Executive MBA program curriculum. Students will gain experience in new venture creation and product innovation management. A management simulation will serve as a continuing, evolving "case" in which course participants working in teams assume "CEO" roles. Prerequisites: Admission to the Executive MBA program

1 hr

[back to top](#)

ENT 5585 Venture Capital Finance And Investment

This course is designed for students who wish to learn about or become involved in the venture capital market as investors or intermediaries in emerging growth companies seeking capital. With this goal, the course will define the venture capital market and where it fits relative to other sources of capital; examine how private equity funds are raised and structured, how investments are sourced; selected; and negotiated; and the role of the value-added investor through investment to liquidity. The course presents and provides applications for various frameworks of valuing and structuring investment opportunities. Suggested Prerequisites: BUS-ADM 5532 or FIN 5532 and one of the following ENT 5515, ENT 5525, ENT 5535, ENT 5541, or ENT 5545 (or equivalents)

3 hrs

[back to top](#)

ENT 5587 Seminar In Entrepreneurship

A course on advanced and/or new topics. This course is designed to facilitate at least one of two purposes: an initial offering of a new course (prior to formal approval) or an initial and possibly final offering of new topics. New topics include those that are contemporary, cutting edge, or advanced topics that are not currently covered by existing courses. Prerequisite: Various, including permission of instructor.

1-6 hrs

[back to top](#)

ENT 5591 Small Business Management Practicum

An integrated management course designed to examine the principles of business management applicable to solving the problems of small and medium size businesses and assisting in their development. Prerequisite: Completion of core requirements.

3 hrs

[back to top](#)

ENT 5595 Internship

An opportunity for students to integrate their academics studies via employment with a business/organization in the community. Prerequisite: admission only by prior approval and consent of instructor.

1-3 hrs

[back to top](#)

ENT 5597 Independent Study

Independent study and research in areas of special interest under individual faculty direction. Prerequisite: Preregistration consent of instructor

1-6 hrs

[back to top](#)

ENT 5681 Multivariate Statistical Methods-II

Theoretical and research applications of MANOVA, canonical correlation, multi-discrimination analysis, factor analysis, and introduction to structural equation modeling using appropriate software. Students are expected to undertake a major research project during this class and to apply appropriate multivariate statistical analysis to their chosen academic research topic. Prerequisite: BDS 5548 or DSOM 5516, or equivalent

3 hrs

[back to top](#)

ENT 5682 Structural Equation Modeling

This course presents structural equation modeling (SEM) including a review of regression and the study of path analysis, including model specification, methods of estimation, recursive and non-recursive models; direct, indirect, and total effects methods of estimation; single and multi-group analyses; moderators; mediators; structural equation model specification; identification, methods of estimation, second-order factor analysis, and the assessment of casual structure. Students are expected to continue a research project started in ENT 5681. Prerequisite: ENT 5681

3 hrs

[back to top](#)

ENT 5683 Mathematical Models For Entrepreneurship

The purpose of this course is to provide an introduction to mathematical models in entrepreneurship and related disciplines. Classes will focus on the use of mathematical models to characterize the nature of various entrepreneurship-related decisions in complex environments. For each topic considered (e.g., R&D investment decisions in new product entry, diffusion, and marketing mix variables), a few articles have been chosen. Presentations and discussions are designed to help students understand and critique existing models and to stimulate the development of new theoretical viewpoints. Prerequisite: Doctoral standing or with instructor's permission.

3 hrs

[back to top](#)

ENT 5691 Doctoral Seminar In Theoretical Foundations Of Entrepreneurship I

ENT 5691 is designed as a broad survey of major topics in the field of entrepreneurship. Its objective is to familiarize students with some of the primary theoretical underpinnings of the field as well as some of the common and/or promising methodological approaches to the study of entrepreneurial phenomena. Topics covered in the course include a theoretical overview, entrepreneurs, environment and organizational founding. Prerequisite: Doctoral standing

3 hrs

[back to top](#)

ENT 5692 Foundations Entrepreneurship

ENT 5692 is designed as a continuation of ENT 5691, providing a broad survey of major topics in the field of entrepreneurship. Its objective is to familiarize the student with some of the primary theoretical underpinnings of the field as well as some of the common and/or promising methodological approaches to the study of entrepreneurial phenomena. Topics covered in the course include: entrepreneurship's links with other disciplines, venture capital and venture capitalists, new venture strategy, new venture performance, growth processes and challenges, and entrepreneurial networks and alliances. Prerequisite: IEI 691

3 hrs

[back to top](#)

ENT 5693 Technology, Innovation, And Entrepreneurship

This seminar will explore academic literature of technology, innovation, and entrepreneurship. Specific topics include emerging technologies, evolutionary theory, building capabilities based on networks, organizational learning, technological innovation, institutional economics, network externalities, knowledge transfer, technological trajectories and path dependencies. Prerequisite: Doctoral standing

3 hrs

[back to top](#)

ENT 5694 Doctoral Seminar In Theories Of The Firm And Strategy

In this course, students will become familiar with and develop an in-depth understanding of the concepts, models, and paradigms that collectively form the foundation for strategic thinking. Students will develop the ability to critically integrate findings from strategic research programs. Employing an appreciation for the interdisciplinary nature of strategic marketing and management, the purpose is to develop a keen awareness of major gaps that exist in the strategic literature. Students will strengthen the skills needed to conduct original strategic marketing research that can be published in the leading academic journals. Prerequisite: Doctoral Standing

3 hrs

[back to top](#)

ENT 5899 Required Graduate Enrollment

1 hr

[back to top](#)

Finance

FIN 5501 Economics For Administration

This course is designed for graduate students in the School of Business and Public Administration. Topics include the theory and determination of national income, fiscal policy, monetary theory and policy, production and cost theory, and market structure.

3 hrs

[back to top](#)

FIN 5503 Economic Analysis For Management

A study of relationships between economic theory and management of the firm in a market economy. Demand, revenue, and cost interrelationships are examined in the context of various market structures encountered in the American economy. The theoretical framework developed is used further to analyze economic problems involving the firm and the public interest. Prerequisites: BUS-ADM 5501, or FIN 5501 or equivalent.

3 hrs

[back to top](#)

FIN 5506 Aggregate Economics Analysis and National Policy

The study of national and global economic activity. The course focuses on the interaction of fiscal and monetary policies with private sector and international forces, and the effects on GNP, interest rates, unemployment and inflation. Prerequisite: Admission to the Executive MBA Program

2 hrs

[back to top](#)

FIN 5508 Financial Decisions And Societal Goals

Deals with the application of financial theory to cases in financial decision-making and relies upon the practical application of corporate financial models. Students will explore agency and signaling theories and their implications for organizational leaders and will come to understand the importance of corporate communications and its impact on firm value. Prerequisites: Admission to Executive MBA Program

2 hrs

[back to top](#)

FIN 5515 Managerial Economics

This course studies the relationships between the economic theory and system as a whole and the ways in which their functioning is affected by the behavior of the interdependent sectors of which they are composed. Students will explore the major factors and determinants of economic prospects relevant to profit-maximizing production and pricing decisions for the firm. Prerequisite: Admission to executive MBA program.

2 hrs

[back to top](#)

FIN 5532 Financial Management

An introduction to the role of financial management through the development of a conceptual framework appropriate for financial decision making. Generally, financial management is charged with the responsibility for obtaining and effectively utilizing the funds necessary for the operation of an enterprise. As such, the conceptual framework includes elements of financial planning (financial analysis, cash budgeting and profit planning), capital budgeting (rate of return and cost of capital), and basic considerations of alternative sources of funds. Prerequisites: ACCTNG 5517, BDS 5508 or DSOM 5508, BUS-ADM 5501 or FIN 5501 or equivalents.

3 hrs

[back to top](#)

FIN 5550 Advanced Financial Management Theory And Policies

Advanced financial management covering topics such as working capital, financial structure, cost of capital, dividend policy and valuation. Discussions include both financial theory as well as financial policy. Includes exposure to literature central to the development of finance theory. Prerequisite: Six hours of finance coursework beyond BUS-ADM 5532 or FIN 5532 or equivalent.

3 hrs

[back to top](#)

FIN 5551 International Financial Management

This course analyzes present and future international financial market conditions and extends the decision-making tasks of financial management into the context of problems of the international and foreign financial systems. The financial constraints of the international business environment and their effect on standard concepts of financial management are studied along with international currency flows, capital structure problems, working capital management, foreign investment, and international banking practices. Prerequisite: BUS-ADM 5532 or FIN 5532 or equivalent.

3 hrs

[back to top](#)

FIN 5552 Global Financial Markets and Institutions

Students are introduced to global financial markets and institutions. Topics include equity, debt, commodity, housing, and foreign exchange markets both in the U.S. and globally. The course explores the effects of monetary and fiscal policy, with emphasis on past and current global financial crises, financial restructuring and reforms, as well as the interrelationships between financial and real economies. Prerequisites: FIN 5532 or BA 5532 or equivalent.

3 hrs

[back to top](#)

FIN 5553 Investment Analysis

Development of a theoretical framework applicable to the solution of problems related to creation and management of the investment portfolio. Consideration is given to the analysis of risk, functions of security markets, sources of information, evaluation of securities, and measurement of investment return. Prerequisite: BUS-ADM 5532 or FIN 5532 or equivalent.

3 hrs

[back to top](#)

FIN 5556 Management Of Financial Intermediaries

This course addresses the management operations of selected financial intermediaries including commercial banks and thrift institutions. Attention is given to asset-liability structure, the development and delivery of financial services, institutional structure, legal and regulatory factors, and the dynamics of the competitive environment. Prerequisite: BUS-ADM 5532 or FIN 5532 or equivalent.

3 hrs

[back to top](#)

FIN 5557 Derivative Securities

This course is designed to introduce students to the basic principles of financial risk management. The student should develop a working knowledge of issues regarding both the theoretical valuation and application of derivative securities. Applications will focus on techniques designed to manage financial risks in the corporate environment. Specifically, the course will focus on using futures, options, and swaps to hedge financial risks. Valuation issues will be explored to identify theoretical pricing fundamentals that can be applied toward valuing newly developed securities. Prerequisites: BUS-ADM 5501 or FIN 5501, BUS-ADM 5532 or FIN 5532, BDS 5508 or DSOM 5508, AND ACCTNG 517 or equivalents.

3 hrs

[back to top](#)

FIN 5559 Strategic Financial Management

This non-quantitative, readings-based course seeks to impart the latest concepts in strategic financial theory and rational economic thought. Major financial and economic developments such as signaling theory and agency are applied to a wide variety of contemporary problems facing businesses, governments, and individuals. Prerequisites: BUS-ADM 5532 or FIN 5532 or equivalent.

3 hrs

[back to top](#)

FIN 5568 Organizational Finance

Gives students a thorough introduction to financial management that blends appropriate amounts of relevant theory with practical application. Topics include discounting techniques and applications, evaluating capital expenditures, estimating cost of capital, and valuing stocks and bonds. Prerequisite: Admission to the Executive MBA program.

2 hrs

[back to top](#)

FIN 5569 Advanced Organizational Finance

This course systematically examines three recurring financial challenges: what resources to acquire or sell, how to finance a business, and how much cash to distribute to owners in the form of dividends or share repurchases. Each topic is viewed on the practical level of how each affects accounting measures of performance and on the conceptual level of whether each creates or destroys value. Prerequisites: Admission to the Executive MBA program.

2 hrs

[back to top](#)

FIN 5580 Organizational Valuation & Financial Modeling I

This course will cover the concept of risk and reward and that to eliminate risk is to eliminate reward. We will delve into how management considers the entity's risk appetite in evaluating strategic alternatives, setting related objectives and developing mechanisms to manage related risks. Prerequisites: Admission to Executive MBA program.

2 hrs

[back to top](#)

FIN 5587 Special Topics

This course is designed to facilitate one of two purposes: an initial offering of a new course (prior to formal approval) or an initial and possible only offering of new topics. Prerequisite: Consent of the instructor

3 hrs

[back to top](#)

FIN 5595 Internship

An opportunity for students to integrate their academics studies via employment with a business/organization in the community. Prerequisite: admission only by prior approval and consent of instructor.

1-3 hrs

[back to top](#)

FIN 5597 Independent Study

Independent study and research in areas of special interest under individual faculty direction. Prerequisite: Preregistration consent of the instructor.

1-6 hrs

[back to top](#)

FIN 5899 Required Graduate Enrollment

1 hr

[back to top](#)

Health Administration

HLTH-ADM 5571 Financial Management Issues: Health & Human Services Organizations

This course is intended to provide an overview of the financial management problems of health and human services organizations. A broad range of topics is examined: financial statements, ratio analysis, cost accounting, reimbursement and pricing, management of working capital, budgeting and programming, capital financing, and cash management.

3 hrs

[back to top](#)

HLTH-ADM 5575 Long-Term Care Policy & Administration

This course provides an overview of long-term care policy and administration, both for institutional and community-based services. Topics include public and private financing, regulatory systems, organization and management of care, and quality assurance. The course also emphasizes new developments in the field, such as managed long-term care systems, capitation and case mix reimbursement, and technologies for quality monitoring and assessment.

3 hrs

[back to top](#)

HLTH-ADM 5577 Health Service Administration And The Health Professions

The development of the health professions and occupations is examined as their internal and external relationships influence the structure of health care organizations and the services provided to clients. The focus of the course is on problems that administrators may encounter as they attempt to negotiate services for clients, build professional coalitions, and provide leadership within or outside health care institutions.

3 hrs

[back to top](#)

HLTH-ADM 5578 The Evaluation And Control Of Health Services

This course focuses on developing evaluative skills associated with controlling the level and costs of health services. Epidemiologic concepts are introduced using clinical and community health examples. The concepts of "at-risk" clients and populations are reviewed, and various attempts to measure risk are assessed. Issues relating to quality assurance are discussed, along with several examples of cost-effectiveness analysis.

3 hrs

[back to top](#)

HLTH-ADM 5580 Economics of Health and Med

A course designed to discuss economic analysis of the development of the medical market, organized medicine and the structure of the health delivery systems. The problems of the medical market will be analyzed, the role of insurance will be investigated and alternative public policies will be studied.

3 hrs

[back to top](#)

HLTH-ADM 5581 Health Policy in the United States

This course helps students develop an understanding of the determinants of health, major current health policy issues, and health policy making in the United States. The public policy process and its effects on the organization, financing, and delivery of health care are examined in detail. The roles of key players in health policy formulation and the public policy responses to current health policy are also examined.

3 hrs

[back to top](#)

HLTH-ADM 5586 Independent Study

Independent study and research in areas of special interest under individual faculty direction. Prerequisite: Consent of instructor

1-6 hrs

[back to top](#)

HLTH-ADM 5587 Special Topics

This course is designed to facilitate one of two purposes: an initial offering of a new course (prior to formal approval) or an initial and possible only offering of new topics. Prerequisite: Consent of the instructor

3 hrs

[back to top](#)

HLTH-ADM 5595 Internship

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Prerequisite: Admission only by prior approval and consent to the instructor.

1-3 hrs

[back to top](#)

Management

MGT 5503 Leadership Residency

: This course introduces students to fundamentals of business and effective leadership practice by looking at two different academic areas. Team and Community Building focuses on the fundamentals of collaborative teamwork and basic concepts in the program's leadership curriculum. The other area, Financial Decisions and Societal Goals, overviews approaches to management strategy rooted in financial modeling and analysis. Prerequisite: Admission to Executive MBA Program

3 hrs

[back to top](#)

MGT 5505 Organizational Behavior

A study of individual, group, and organizational behavior and processes.. This course examines social and behavioral sciences methods and theories which apply to the understanding of administrative social systems. Classroom activities will utilize lectures, laboratory training, and clinical cases.

3 hrs

[back to top](#)

MGT 5506 Contract Negotiation And Dispute Resolution

This course surveys the conceptual framework for negotiating legally binding contracts and examines contemporary institutions and processes for resolving contractual disputes. Particular attention will be given to identifying and appreciating strategies, practices, and specific rules by which binding contractual rights and duties are determined in the United States and in international jurisdictions. Working independently and in teams, students will assimilate the legal rules and negotiation strategies and apply them to common business transactions and disputes.

3 hrs

[back to top](#)

MGT 5508 Law Of Business Associations

Working individually and in teams, students study the legal rules that govern most common business relationships. These include the rules for creating and managing agency and partner relationships, LLC and other new joint ventures, as well as public and closely-held corporations. Student teams follow local public companies as they prepare and conduct their annual meetings and conduct mock negotiations to form a new business venture.

3 hrs

[back to top](#)

MGT 5510 Legal And International Environment Of Business

This course provides an essential introduction to the domestic and international environment of business. Particular attention is given to the comparative historical development, cultural, economic, legal and political context for the conduct of business in the U.S. and abroad. Topics include international trade; international management; alternative modes of international operations; international finance and exchange rates; international marketing; international human resources; international business strategy and protection of property interest, including worldwide protection of intellectual property, private contracts, multilateral agreements, dispute resolution systems and the influence of government trade.

3 hrs

[back to top](#)

MGT 5511 Legal Issues for Today's Leaders

The course will provide the necessary knowledge and tools to avoid creating liability for the employee and/or employer. More specifically, coverage will include a working knowledge of contracts and commercial law, torts, employer/employee rights, affiliate relationships, and government regulation. Participants will also gain the ability to recognize potential issues involving antitrust and fair trade, intellectual property, securities regulation, international law and environmental law. Prerequisites: Admission to the Executive MBA Program

2 hrs

[back to top](#)

MGT 5513 Economic Policy And Managerial Control

Students will study the analysis of the industrial foundations and economic institutions of modern times; the politics of industrial control, including power relationships in economic nationalization and planning and theory of managerial industrialism and business enterprise.

3 hrs

[back to top](#)

MGT 5516 Leading Teams

This course is designed to increase the student's understanding of team processes in organizational settings and to contribute to the student's ability to build and lead high-performing teams. The class will be utilized as a laboratory for the exploration of team leadership theory and research. Prerequisite: BMA 5505 or MGT 5505 or equivalent.

3 hrs

[back to top](#)

MGT 5531 Leadership, Strategy and Human resources

Focuses on the leader as a catalyst in developing high-performance, market -based cultures and as a human resource strategist in marshalling the workforce. Geared to the general manager, the course presents ideas and tools for building, bonding, and linking the workforce to accomplish the organization's mission. Topics include ideas and tools for identifying, recruiting, and retaining talent, developing and coaching subordinates, appraising and rewarding performance, and delegating to balance control and risk. Prerequisites: Admission to Executive MBA program

2 hrs

[back to top](#)

MGT 5533 Leadership And Change In Organizations

Study of the dynamics of leadership and change in organizational contexts with attention to both theory and practice. Classroom activities can include lectures, case discussions, group presentations, and experiential activities. Prerequisite: BMA 5505 or MGT 5505, PUB-ADM 5548(or equivalents) or consent of instructor.

3 hrs

[back to top](#)

MGT 5537 Competitive Strategies

Study of the processes of formulating and implementing competitive management strategies. Analytical techniques appropriate to the firm, the market or the industry will be emphasized. Major individual and/or group papers analyzing existing organizations will be required. Prerequisites: Must be taken in the student's final semester of the program.

3 hrs

[back to top](#)

MGT 5538 Strategic Management

The study of economic principles for the formulation and evaluation of strategy, including industry analysis, strategic positioning and the boundaries of the firm. Students address the capacity of executive leadership to create and communicate a clear direction for a company's future. Prerequisites: Admission to the Executive MBA Program

1-3 hrs

[back to top](#)

MGT 5545 International Management

Examination of the management of contemporary international business organizations through a study of the political, economic, social and technological factors and their relationship and impact upon the administrative activities and strategies of the international firm.

3 hrs

[back to top](#)

MGT 5547 Global Initiatives in Management

Examines the management of contemporary international business organizations in the global economy. The course overviews the interrelationship and impact of political, economic, social, and technological factors, together with the complex challenges of strategy and execution in the global companies. Prerequisite: Admission to the Executive MBA program

1-6 hrs

[back to top](#)

MGT 5550 The Operation Of International Business

The course reviews the basic decision-making and operations taking place within international business. Attention will be given to export/import activities of firms including global marketing & sourcing, transportation, finance, customs clearance, & legal issues such as intellectual property rights & agent/distributor agreements. Prerequisite: BMA 5510 or MGT 5510 or equivalent.

3 hrs

[back to top](#)

MGT 5552 International Study in Business

This course is designed to provide a study-abroad experience for the student. The course involves three components: study of international business through on-campus lectures and discussions; travel to a foreign country for visitations to business firms, government organizations, and cultural sites; and critique sessions of the international learning experience after travel completion. Restrictions: Special application and selection process prior to enrollment.

3 hrs

[back to top](#)

MGT 5557 Leadership And Organizations

Focuses on how organizations work and how leaders can set direction, marshal resources, and build support to move initiatives forward. The course provides tools and tactics for assessing organizations needs and constraints through multiple lenses, and assessing one's own leadership strengths and weaknesses for development and alignment with organization needs. Prerequisite: Admission to Executive MBA Program

2 hrs

[back to top](#)

MGT 5558 Managing People for Strategic Advantage: Design, Staffing And Development

This course focuses on managing human resources in the execution of strategy and the development of market-based cultures. Geared to the general manager, the course includes ideas and tools for identifying and recruiting talent, developing and coaching subordinates, appraising and rewarding performance, and delegating to balance control and risk. Prerequisites: Admission to the Executive MBA Program

1-3 hrs

[back to top](#)

MGT 5560 Strategic Human Resources

This course will provide an overview of the theory, research and practices used to strategically align human resource policies and practices with the overall goals and objectives of organizations. The course will highlight ways in which HR policies and practices affect and are affected by organizations' environments and culture. Emphasis will be placed on high performance and innovative work practices. Particular attention will be given to assessing internal and external conditions and contexts in which HR policies and practices maximize effectiveness.

3 hrs

[back to top](#)

MGT 5566 Strategic Staffing

This course presents theoretical frameworks and practical applications for determining optimal person-organization fit and person-job fit within organizations. Emphasis will be placed on integrating recruitment and selection strategies and practices with overall business strategies. The importance of strategically planning and implementing recruitment and selection processes will be addressed as it relates to various organizational contexts, including environmental threats and opportunities, organizational size, structure, and climate.

3 hrs

[back to top](#)

MGT 5567 Total Rewards Management

This course presents both theory and practice for designing effective rewards systems within organizations. Compensation (including base pay and incentives), benefits and performance management will be covered from a strategic perspective. Characteristics of the work environment, such as recognition, work/life balance, and culture will also be considered in terms of their contribution to the total rewards systems.

3 hrs

[back to top](#)

MGT 5569 Leadership Accountability and the Legal Implications

Highlights the accountabilities of leaders and the challenges they face in the rapidly changing business environment. The course studies the political, social, ethical, and global environment in which American business organizations operate and the impact on today's leaders. Topics include creating and maintaining affiliate relationships and joint ventures, as well as prohibitions in anti-competitive behavior, protection of intellectual property, operating within a regulated environment, and securities law. Prerequisite: Admission to Executive MBA Program.

2 hrs

[back to top](#)

MGT 5571 Influence, Persuasion and Change

Presents ideas, strategies, and tools for leading change in complex organizations. This course challenges students to think about the execution of change strategies through assessment of organizational power dynamics and appropriate influence styles for achieving results. Emphasis is placed on analyzing these attributes and skills most critical for building influence, especially in change initiatives, and on defining an ethical approach to leading, influencing, and persuading others.

Prerequisites: Admission to the Executive MBA program.

2 hrs

[back to top](#)

MGT 5573 Strategic Management I

Strategic Management I is the first course in a two-part series entitled, "The EMBA Project", and is intended to provide opportunity to (a) sensitively develop an agreement with the client based on EMBA curriculum/concepts, client needs, and team interests; (b) undertake a project that fits those parameters; and (c) assist the client company in implementation (or planning thereof) of the project findings. The projects are intended to provide opportunity for the EMBA students to develop strategic, organizational, and operation insights. Prerequisites: Admission to the Executive MBA program.

1 hr

[back to top](#)

MGT 5582 Managing People For Strategy Execution

The focus of this course is producing, for an organization, a sustainable competitive advantage through the effective management of people-the human resources of the organization. Prerequisite: Admission to Executive MBA program

2 hrs

[back to top](#)

MGT 5587 Special Topics

The study of a contemporary management topic of interest. This course is designed to facilitate one of two purposes; an initial offering of a new course (prior to formal approval) or an initial and possible only offering of new topics. Prerequisite: consent of instructor.

3 hrs

[back to top](#)

MGT 5595 Internship

An opportunity for students to integrate their academics studies via employment with a business/organization in the community. Prerequisite: admission only by prior approval and consent of instructor.

1-3 hrs

[back to top](#)

MGT 5597 Independent Study

Independent study and research in areas of special interest under individual faculty direction. Prerequisite: Preregistration consent of the instructor.

1-6 hrs

[back to top](#)

MGT 5899 Required Graduate Enrollment

1 hr

[back to top](#)

Management Information Systems

MIS 5502 Elements of Management Information Systems

Fundamental concepts of hardware, software, networking, system life cycle, enterprise systems, and strategic systems in a business context. The course includes an overview of techniques in programming and web publishing.

3 hrs

[back to top](#)

MIS 5529 Decision Support Systems

Information systems to support decision makers in organizations. This course focuses on influences of cognitive biases and group think on decision makers. Identification of both potential uses of information technology to support decision makers and potential effects of information technology on the decision making processes, and may include a number of computer-oriented assignments.

3 hrs

[back to top](#)

MIS 5540 Information Technology as a Strategic Tool

This course examines the critical linkage between an organization's business, cultural, and information technology (IT) strategies. In organizations today, information technology has become a key component in accomplishing strategic and operational goals. The course provides concepts and a framework for understanding and enhancing the role IT can play in innovation, change, and continuous organizational learning. Prerequisite: Admission to the Executive MBA program.

2 hrs

[back to top](#)

MIS 5552 Data Base Management

Data administration, including theory of relational databases and projects using relational data management packages. The course looks at data modeling and information engineering, entity-relationship modeling, database design, normalization, data dictionaries, distributed databases, database servers, data quality assurance, data integrity, SQL, and may include a number of computer-oriented assignments.

3 hrs

[back to top](#)

MIS 5554 Systems Analysis, Design And Engineering

This course introduces tools for documenting information system requirements and design and implementation methods; organization of software projects; system specifications, documentation and diagramming standards; programming languages and methodology; costs and schedule estimation, project management; program verification, and internal control issues.

3 hrs

[back to top](#)

MIS 5558 Management And Economics Of Computing

Topics to be covered include procurement and management of computer systems, economics of hardware and software, software acquisition, RFQs, RFPs, contract terms and conditions, end-user computing; capacity planning, contribution of computing to business objectives, control, audit, and security of information technology; legal and ethical perspectives; and international issues.

3 hrs

[back to top](#)

MIS 5569 Information Systems Consulting

An application of systems concepts to the evaluation and implementation of information system. Student teams will analyze, document and make recommendations for the improvement of these systems, and will communicate their findings via written reports and oral presentation. Project management concepts will be covered as well. Course content might be actual projects for local organizations, or it might be a simulation of a consulting engagement. Prerequisites: Instructor Permission

3 hrs

[back to top](#)

MIS 5580 Seminar In Information Systems

This seminar is provided for students interested in exploring advanced MIS topics not covered in the regularly offered courses. The content of this seminar may change from one offering to the next.

Marketing

MKT 5531 Contemporary Marketing Management

An advanced survey course that emphasizes the core marketing decision variables: product, price, place, and promotion. The emphasis is on the interface between an organization's objectives, capabilities, resources and marketplace needs and opportunities. The subject matter is applicable to firms that produce and/or services, and for-profit and non-profit organizations. Topics include market-oriented problem solving, consumer behavior, marketing ethics, competitive strategy, and product management in domestic and global environments.

3 hrs

[back to top](#)

MKT 5539 Management In Direct Marketing

The organization, planning and control of direct marketing efforts as an integral part of an institution's total marketing program. This course synthesizes direct marketing efforts with the institution's other major functional areas in order to achieve efficiently overall organizational objectives. Prerequisite: BUS-ADM 5531 or MKT 5531, or equivalent.

3 hrs

[back to top](#)

MKT 5555 International Marketing

This course focuses on marketing problems confronting international business managers and the ways they may be analyzed and resolved. The course content includes concepts and techniques useful in international marketing; effects of national differences on marketing practices; organization for international marketing; and strategy formulation for international markets. Prerequisites: BUS-ADM 5531 or MGT 5531 and BMA 5510 or MGT 5510 or equivalents.

3 hrs

[back to top](#)

MKT 5560 Buyer Behavior

A review of behavioral science concepts applicable to an understanding of constituent decision making. Special emphasis is placed on applications of these concepts, by the student, to problems of offer planning, pricing, distribution and promotion. Prerequisites: BUS-ADM 5531 or MKT 5531 pr equivalent.

3 hrs

[back to top](#)

MKT 5561 Promotional Strategies In Marketing

Emphasis will be placed on the organization's persuasive communications to customers and prospective customers within a framework of the system of distribution. The central focus concerns how marketing management allocates the promotional mix within the organization's total marketing program. Topics will include the following: 1) promotional mix, 2) campaign strategies, 3) campaign coordination and 4) follow-up control of promotional programs. Prerequisite: BUS-ADM 5531 or MKT 5531 or equivalent.

3 hrs

[back to top](#)

MKT 5562 Marketing Research

This course acquaints the student with the special problems of understanding and applying various measurement techniques to marketing problems. Specific topics to be investigated will depend upon the instructor and the students' areas of interest and specific competencies. Prerequisites: BUS-ADM 5531 or MKT 5531, BDS 5508 or DSOM 5508 or equivalents.

3 hrs

[back to top](#)

MKT 5565 Marketing Management

Examines the role of marketing in driving profitable revenue growth in companies The focus is placed on tools and approaches to analyzing and understanding customer needs- including the roles of market research and brand equity- and the development of integrated marketing plans to deliver to those needs. Prerequisite: Admission to Executive MBA Program.

2 hrs

[back to top](#)

MKT 5575 Advanced Marketing Strategy

This course focuses on advanced marketing skills and practical techniques for defining and meeting the needs of the chosen market. The emphasis is on key drivers of marketing effectiveness, including creating a market-oriented culture, customer-focused information systems, the relationship of various components of marketing, and the response to marketing variables. A variety of pedagogical approaches, including applied projects, may be employed. Prerequisites: BUS-ADM 5531 or MKT 5531 or equivalent.

3 hrs

[back to top](#)

MKT 5576 Strategic Marketing

This course examines those market-based issues that have broad implications for strategy, such as market sizing, brand and competitive set, and product life cycles. Among strategies and business models discussed will be those tailored to start-ups and growing businesses, as well as businesses in mature and declining markets, with special emphasis on the challenges of differentiation in highly competitive industries. Prerequisite: Admission to the Executive MBA program

2 hrs

[back to top](#)

Public Administration

PUB-ADM 5510 Research Methods In Public Administration

This introductory course focuses on quantitative empirical research design and statistical analyses in relation to public administration issues and concerns.

3 hrs

[back to top](#)

PUB-ADM 5523 Public Policy Context for Business Decisions

This course is designed to provide intensive exposure to the forces and personalities in Washington, D.C. that shape America's business policy. EMBA participants learn how to understand and anticipate the impact of public policy on their businesses and how to become more effective participants in the national decision-making process. Prerequisites: Admission to the Executive MBA program. Offered: Winter

2 hrs

[back to top](#)

PUB-ADM 5525 Financial Accountability And Policy Development

Modern fiscal policy and its administrative implications to planning, budgeting, revenue administration, accounting and appraisal, and the process for assuring accountability in the development, timing, and execution of public programs. Prerequisite: PUB-ADM 5510 or equivalent.

3 hrs

[back to top](#)

PUB-ADM 5526 The Politics Of Administration

This course will introduce the subject of public administration from a political perspective. Special attention will be given to an examination of the administrative branch of government. More specifically, the course will focus on the demands directed to administrators from various sectors of the political system, ways in which administrators respond to those demands, and methods available for the analysis of public policies that help us assess the impacts that flow from administrators' actions.

3 hrs

[back to top](#)

PUB-ADM 5530 Capstone Seminar In Public Administration

This course examines theories of public organizational design, structure and change, including various issues in the administration of public organizations. Questions of professional ethics and management in the public interest are also considered. This is the final course in the MPA core curriculum. Prerequisites: PUB-ADM 5525, PUB-ADM 5526, PUB-ADM 5544, PUB-ADM 5548 (or equivalents), or concurrent enrollment; for health services students: HLTH-ADM 5571, PUB-ADM 5526, HLTH-ADMN 5578, PUB-ADM 5548, HLTH-ADMN 5580 (or equivalents), or concurrent enrollment

3 hrs

[back to top](#)

PUB-ADM 5535 Urban Policy And Administration

An examination of the formulation and administration of policies by urban governments. The course examines (a) the historical and intergovernmental contexts for decision making by urban governments, (b) the governmental forms and political processes employed in making these decisions, and (c) the various urban problems and service delivery issues which require decisions in the contemporary city.

3 hrs

[back to top](#)

PUB-ADM 5536 Managing Urban Economic Development

This course explores what managers in the public, nonprofit and private sectors need to know about urban economic development. Topics include (a) theories of urban economic development, (b) varying forms of development (e.g., attraction of new industries, central business district development, neighborhood economic development), (c) policy managerial tools for stimulating development, and (d) issues of equity in economic development.

3 hrs

[back to top](#)

PUB-ADM 5538 Comparative Urban Administration

An analysis of urban administration and planning in different comparative political, economic, and cultural settings. Analytical techniques will be applied to case studies of selected urban administrative processes involving American and other cities.

3 hrs

[back to top](#)

PUB-ADM 5539 Urban And Regional Planning For Urban Administrators

This course is designed to provide students in urban administration with a comprehensive overview of the planning process. Course topics include a review of planning and the problems of effective planning implementation.

3 hrs

[back to top](#)

PUB-ADM 5544 Public Policy Evaluation and Analysis

Survey of the tools and procedures for evaluating and analyzing policies and programs in the public sector, including nonprofit and human services organizations. Consideration of such topics as definition of goals, developing measures of effectiveness, evaluation research designs, benefit-cost analysis, and the special problems of rational analysis in a political environment. Prerequisite: PUB-ADM 5510 or equivalent.

3 hrs

[back to top](#)

PUB-ADM 5548 Leadership For Public Service

The two core purposes of this course are for students to learn about effective and ethical leadership, and for students to understand and develop their own capacity for leadership. The course is organized around three general themes: 1) leadership as relations with subordinates, including issues of work motivation; 2) leadership as lateral relations, including organizational politics and conflict management and resolution; and 3) leadership as influence in the organization's environment.

3 hrs

[back to top](#)

PUB-ADM 5551 Strategic Management In Nonprofit Organizations

This is an advanced course in the nonprofit management emphasis. Following review of the legal and economic uniqueness of private, nonprofit organizations, the course helps students develop a strategic framework and apply the key concepts to the management of nonprofit entities. Recommended prerequisites: PUB-ADM 495 and PUB-ADM 5548 or equivalent.

3 hrs

[back to top](#)

PUB-ADM 5552 Community Organizations And Public Policy

This course includes examination of both neighborhood organizations and organizations intended to promote other communities of interest. In relation to neighborhood organizations, topics considered include the varieties of neighborhoods, the role of neighborhood organizations in local politics, the use of neighborhoods in administrative and political decentralization, and federal policy toward neighborhood issues. In relation to other community organizations, topics considered include the basis of such organizations, their roles in public affairs and their effects on policy processes.

3 hrs

[back to top](#)

PUB-ADM 5553 Legal Framework & Financial Management Of Nonprofit Organizations

Utilizing a comparative approach the course examines the legal basis and tax treatment of private, nonprofit organizations in the U.S. Related topics also considered include concepts of fund and cost accounting, budgeting processes, earned income strategies, employee compensation and benefits practices, laws and regulations affecting lobbying, competition with business and unrelated business income tax.

3 hrs

[back to top](#)

PUB-ADM 5555 Topics In Nonprofit Fundraising

In order to flexibly treat the variety of strategies and techniques of charitable fundraising, these courses will usually be offered in variable credit hour segments, covering traditional and emerging fundraising topics. Each semester, two two-credit-hour segments and two one credit-hour segments will be offered. The two credit hour courses - "Organizing for Successful Fund Raising" and "Creating and Implementing the Annual Development Plan" - cover the basics of fund raising. The one-credit hour courses allow students to explore several different issues related to fund raising such as direct marketing and planned giving. These courses are recommended for nonprofit management students.

Subjects include such topics as: Cultural History and Political Systems of China, Organization of the Chinese Legal System, Chinese Contract Law, Civil Law, Trial Practice & Rules of Evidence, Criminal Law & Procedure, Family Law, Human Rights Issues, Business Organizations, Taxation, Intellectual Property Law, Banking and Finance, Real Estate Law, Investment Law & Practice in China, and Alternative Dispute Resolution.

4.5 hrs

[back to top](#)

LAW 8521 Civil Procedure I

Pleading; joinder of parties and claims; pre-trial motions; discovery; summary judgment; pre-trial and trial procedure; post trial motions.

3 hrs

[back to top](#)

LAW 8522 Civil Procedure II

Court systems; personal jurisdiction and venue; federal jurisdiction; choice of law; preclusion; appellate procedure

2-3 hrs

[back to top](#)

LAW 8791 Civil Rights

Elements of a Section 1983 case, enforceable rights and available defenses; procedural aspects of civil rights cases; suits against federal and state governments. Prerequisites: Constitutional Law I.

2-3 hrs

[back to top](#)

LAW 8721 Commercial Transactions

Law of negotiable instruments; bank collections; Articles 3 and 4 of the Uniform Commercial Code; electronic funds transfers.

3 hrs

[back to top](#)

LAW 8743 L Comparative Health Law

An examination of how the legal systems of several other nations address particular aspects of health law. Specifically, the focus of this course is on patent rights with respect to the health care they receive. This will include, for example, consideration of patient rights when the care received has caused injury due to professional negligence. If time permits, it will also look at how other legal systems address the controversial issues surrounding the "right to die" as well as assisted suicide and euthanasia.

1 hr

[back to top](#)

LAW 8706 Complex Litigation

As related to litigation of complex cases, study of special issues of party joinder and intervention, class action requirements and limitations, discovery, case management, and estoppel by verdict or judgment. Prerequisites: Civil Procedure I and II.

2-3 hrs

[back to top](#)

LAW 8702 Conflict Of Laws

Domicile; jurisdiction and limitations on the exercise of jurisdiction; judgments; full faith and credit; choice of law; conflicts problems in federal and international settings; conflicts problems in selected areas. Prerequisite: Civil Procedure.

2-3 hrs

[back to top](#)

LAW 8631 Constitutional Law I - The Supreme Court And The Bill Of Rights

The origin and nature of judicial review, substantive due process in regard to regulation of economic affairs, retroactive legislation, inviolability of the person, freedom of expression and assembly, freedom of religion, equal protection of the laws, the electoral process, nationality and citizenship.

3 hrs

[back to top](#)

LAW 8632 Constitutional Law II - Powers Of Government

State and Federal constitutions; separation of powers; executive powers, legislative powers; the federal system; powers of Congress, residual powers of the states; relations between the States including extradition and interstate commerce.

2-3 hrs

[back to top](#)

LAW 8898 Construction Law

The Construction Law course would emphasize state and federal construction law and would provide the students with practical experience in drafting contracts, negotiating disputes, and conducting a mock arbitration. The course would cover the contract responsibilities and remedies of contractors, subcontractors, design professionals, sureties and owners, including the United States Government. The course would emphasize the controlling state and federal statutes and regulations, as well as case law which illustrates the application of the statutes and other areas of law not covered by statute. The classroom sessions will include discussion of the practical aspects of legal practice in the construction industry, with instruction and examples regarding the drafting of documents and contracts, negotiation of disputes, and decision-making regarding the type of dispute resolution forum to recommend to a client.

2 hrs

[back to top](#)

LAW 8880 Consumer Bankruptcy

Comprehensive analysis of the options available to consumer debtors under chapters 7 and 13 of the Bankruptcy Code. While the primary focus will be on the debtor's options, creditor strategies will also be considered. Recommended: DebtorCreditor Rights.

2 hrs

[back to top](#)

LAW 8858 Consumer Protection

Protection of consumers from false advertising, unfair sales practices, and consumer credit and debt collection abuse. Topics which may be covered are Truth-in-Lending Act, Uniform Consumer Credit Code, Fair Debt Collection Practices Act; Interstate Land Sales Disclosure Act, Federal Trade Commission and Missouri Attorney General activity, Missouri consumer credit legislation, consumer warranties, consumer class actions, abusive collection practices.

2-3 hrs

[back to top](#)

Formation and performance of simple contracts; consideration; express and constructive conditions, excuse of conditions; remedies for breach; contracts for benefit of third parties; assignment; impossibility of performance and discharge.

3 hrs

[back to top](#)

LAW 8502 Contracts II

Continuation of LAW 8501.

3 hrs

[back to top](#)

LAW 8798 Copyright Law

Protection extended to works of authorship including literacy works, computer programs, works of applied art, sound recordings, photographs, etc. under U.S. copyright law. How protection for works is achieved, the nature of rights protected, transfer of rights, and infringement actions. Related common law rights that may exist under doctrines such as implied contract, unfair competition, right of privacy, and right of publicity. (Consent of the instructor is required for students who have taken Copyright, Patent, and Trademark Law).

2-3 hrs

[back to top](#)

LAW 8886 Corporate Taxation I

Tax treatment of corporations and shareholders with respect to formation, non-liquidating distributions, stock dividends, redemptions and liquidations. The course will also cover the personal holding company tax, the accumulated earnings tax, collapsible corporations, multiple corporations and an overview of S corporations.

2-3 hrs

[back to top](#)

LAW 8887 Corporate Taxation II

Tax consequences of corporate reorganizations; survival of tax attributes; acquisition of loss corporations; and a survey of consolidated return reporting. Prerequisite: Corporate Taxation or Instructor's permission.

3 hrs

[back to top](#)

LAW 8634 Criminal Law

Introduction to substantive criminal law, its role and purpose in our society; principles of liability, common law and statutory offenses; defenses; punishment.

3 hrs

[back to top](#)

LAW 8635 Criminal Procedure I

Introduction to the administration of criminal justice; constitutional rights of the accused; due process; privilege against self-incrimination; right to counsel; arrest, search, and seizure; wire-tapping; police interrogation and confessions; pre-trial identification procedures.

3 hrs

[back to top](#)

LAW 8636 Criminal Procedure II

Continuation of the study of the administration of criminal justice; exclusionary rules; bail; prosecutor's discretion; grand jury; preliminary hearing; jurisdiction, venue; joinder and severance of offenses and defendants; right to speedy trial; pleas of guilty; discovery; trial by jury; publicity; double jeopardy.

2-3 hrs

[back to top](#)

LAW 8820 Criminal Trial Techniques

Strategy and tactics in handling a criminal case; effective representation of the accused at various stages of the criminal process; securing pre-trial release; plea bargaining; motion practice; discovery; voir dire; opening and closing statements; examination of witnesses; use of the expert; sentencing; appeal; collateral attack.

2 hrs

[back to top](#)

LAW 8716 Cyberlaw And The Infosphere

Survey of the areas of the law with existing or potential application to computers (such as contract law, intellectual property law, criminal law, tort law and constitutional law) highlighting the legal issues involved in the areas studied.

2-3 hrs

[back to top](#)

LAW 8713 Death Penalty Clinic

The post-conviction process of collateral review in death penalty cases; training in legal representation of the postconviction petitioner. Pre-or Co-requisite: Problems and Issues in the Death Penalty.

1-2 hrs

[back to top](#)

LAW 8736 Debtor-Creditor Rights

Creditors' remedies and debtors' rights; provisional remedies; secured transactions (Article 9 of the Uniform Commercial Code); liens and exemptions; overview of bankruptcy law.

2-3 hrs

[back to top](#)

LAW 8513 Defamation, Privacy, Relational & Emotional Torts

A focus on word torts, emotional injuries, and torts stemming from relational duties of care. Defamation topics covered will include private and public official and public figure plaintiffs, as well as tactical aspects of defamation actions and privileges. Privacy torts explored will be false light, public disclosure of private facts, intrusion and seclusion, and appropriation of name or likeness. The majority of the course will involve coverage of special or limited duties of care arising from contractual or professional relationships (such as medical and legal malpractice), landowner liability, sexual harassment in employment, familial and governmental immunities, prenatal injuries, negligent infliction of emotional distress, as well as theories of vicarious liability for the torts of others.

2-3 hrs

[back to top](#)

LAW 8845 Deferred Compensation

Problem-method study of deferred compensation arrangements; qualified pension and profit sharing plans; individual retirement accounts; qualified stock option plans; other methods of deferred compensation.

2-3 hrs

[back to top](#)

LAW 8768 R Department Of Labor Clinic

Students work with the solicitor's Office of the United States Department of Labor assisting attorneys enforcing federal labor statutes, including the Fair Labor Standards Act, OSHA, ERISA, and the Davis-Bacon Act. Under the supervision of the Deputy Regional Solicitor, students perform legal research relating to enforcement actions, draft discovery requests review documents, participate in client and staff conferences, and assist in the investigation of violations. Clinic participants maintain a log of their activities and have bi-weekly conferences with the faculty supervisor to review and evaluate their clinic experiences and research work product.

2-3 hrs

[back to top](#)

LAW 8815 R Disabilities And The Law

An interdisciplinary study of the law relating to disabled persons in the areas of employment, education, and access to transportation, health, welfare and social services to provide an understanding of how the law affects individuals with disabilities and public and private entities. Legislation considered include the American with Disabilities Act, Section 504 of the Rehabilitation Act of 1973, the individuals with Disabilities Education Act, the Family and Medical leave Act, the Fair Housing Act, the Voting Accessibility for the Elderly and Handicapped Act, and the Title VII of the Civil Rights Act of 1964. The enrollment of graduate students from other disciplines, such as education, business, and health sciences is encouraged to allow for interdisciplinary discussion of the topics involved.

2-3 hrs

[back to top](#)

LAW 8601 R Doing Business In Ireland

A comparative study of the business entity laws of the United States and the Republic of Ireland. In addition, the course will examine the competition laws of the United States and the European Union and corporate taxation of multinational companies operating in the Republic of Ireland.

1-5 hrs

[back to top](#)

LAW 8796 Economics And The Law

Tools of economic analysis which have particular application in the law; equity and efficiency are weighed in regulation, pollution, discrimination, monopoly, financial markets, human resources and government expenditure and taxation policy. Principles will be introduced and expanded upon using both lecture and case study techniques.

2-3 hrs

[back to top](#)

LAW 8870 R Education Law: Government & Legal Aspects Of Education

This course is designed to give students an introduction to the major legal doctrines that affect K-12 schools, as well as the policies that underlie or are changing those doctrines. Students should gain a working understanding of the impact of federal and state law on the operation of schools, the rights and responsibilities of teachers and administrators, and the rights of the students who attend those schools.

2-3 hrs

[back to top](#)

LAW 8733 Elder Law

A course providing a basic foundation for legal practice with older persons, including the following substantive topics: The Older Americans Act, the delivery of legal services to the elderly, ethical considerations, consumer protection, discrimination, Social Security and Supplementary Security Income, Medicare, Medicaid, capacity issues, guardianship and alternatives to guardianship, elder abuse and neglect, adult protective services, nursing homes, long term care, housing, healthcare decisions, end-of-life decisions, estate planning and grand parents' rights.

2-3 hrs

[back to top](#)

LAW 8617 R Elder Law For Estate Planners

An examination of the legal tools available for the elderly client for decision-making, both health care and financial, in the event of incapacity, and asset preservation, including Medicare and Medicaid qualification. The course will cover the use of trust; durable powers of attorney, and advance directives for health care and living wills and the relationship to court guardianship.

1 hr

[back to top](#)

LAW 8813 Employment Discrimination Law

Substantive and procedural aspects of Equal Employment Opportunity Act and related matters.

2 hrs

[back to top](#)

LAW 8814 R Employment Law

Survey of legal doctrines regulating the employment relationship, including the regulation of wages, hours and benefits; privacy in the workplace; workers' compensation; suits for unjust dismissal; drug and polygraph testing; and sexual harassment. May be offered as a seminar.

2-3 hrs

[back to top](#)

LAW 8890 R Entertainment Law

An examination of the legal issues affecting the print and broadcast media. Topics covered may include copyright, antitrust, spectrum allocation, right of privacy, first amendment issues (prior restraint, obscenity, commercial speech, defamation and access to both information and judicial proceedings), licensing and new technologies including and beyond cable television.

2-3 hrs

[back to top](#)

LAW 8757 R Entrepreneurial Law & Practice Clinic

Under faculty supervision, students will counsel start-up companies and their owners and implement business planning advice by drafting articles of incorporation and organization, by-laws, partnership agreements and other business contracts. Other business-related matters ranging from regulatory, consumer, licensing, and taxation requirements; copyrights, trademark, and patent creation; and 501(C)(3) applications for non-profits may also be covered in this course. Clinic students will also receive classroom instruction in the areas of client counseling and business planning and drafting of business documents. Prerequisites: Business Organizations, Commercial Transactions, Professional Responsibility (or concurrent enrollment). Missouri Supreme Court Rule 13 certification required for in-court representation.

2-3 hrs

[back to top](#)

LAW 8638 R Entrepreneurial Lawyering: Solo And Small Firm Practice

Course will focus on law practice management for solo and small firms. Topics include organizational structure, firm management, fee setting and allocation, and effective and ethical marketing. Course includes attendance at the Missouri Bar Solo and Small Firm Conference.

2-3 hrs

[back to top](#)

LAW 8757 N Entrepreneurship & New Venture Creation

Jointly-taught by Law School and Bloch (Business) School faculty, this interdisciplinary course provides education in entrepreneurship to a combined class of students from law, business, engineering and perhaps other graduate-level disciplines. Using a combination of readings lectures, electronic blackboard discussions, team business planning projects and presentations, and individual presentations on selected topics, the Course is designed, from a law student's perspective, to both (1) familiarize the student with substantive knowledge of issues from multiple disciplines involved in creating a new venture to commercialize technology and (2) train law students in techniques designed to effectively communicate and resolve legal issues inherent in such projects in a collaborative manner with clients and their advisors from other disciplines.

3 hrs

[back to top](#)

LAW 8773 T Environmental & Toxic Torts

An advanced torts course about compensation for damages caused by toxic contamination. It will address advanced theories of nuisance, trespass, negligence and strict liability. Particular emphasis will be given to proof and causation problems, and to novel and evolving legal theories for recovery. The course will also consider the problems posed by multiple parties, vicarious liability, and the interaction between common law and statutory remedies. The content will be tailored to supplement the environmental law curriculum. Offered: Winter Semester 2001

2-3 hrs

[back to top](#)

LAW 8773 Environmental Law

This course covers law developed to control pollution and to protect our country's physical environment. The course provides introductions to ecological theories and to early common law efforts to protect the environment. But the course mainly focuses on current environmental statutes (for instance, the Superfund Act, the Resource Conservation and Recovery Act, the Clean Air Act, and the Clean Water Act) and on current federal constitutional issues involving the environment. (Priorities in this mix may vary from year to year, depending on current events and related course offerings). Enforcement policies, citizen activism the needs of private industry, and the administrative process are also considered. No prerequisites.

2-3 hrs

[back to top](#)

LAW 8773 R Environmental Law Clinic

Student(s) perform clinic activities at the United States Army Environmental Office, including performing legal research, writing position papers, attending state and federal regulatory hearings, participating in planning conferences and assisting with litigation. Students are supervised by the Central Regional Environmental Chief Coordinating Attorney and attend regular conferences with a faculty supervisor who reviews copies of all clinic written work that may be so reviewed under the United States Army Environmental Office rules. Prerequisites; Environmental Law or Administrative Law. Ungraded. Pass/Fail.

2-3 hrs

[back to top](#)

LAW 8614 Estate Planning And Drafting

Continuation of Estates & Trusts I using problems and cases as a basis for class discussion. Working in teams, students engage in the planning of estates for actual clients, proceeding through the entire process and culminating in the execution of wills, trusts or other appropriate instruments. Course is not open to students who have taken Estate Planning. Prerequisite: Estates & Trusts I.

3-4 hrs

[back to top](#)

LAW 8615 Estate Planning And Practice

Tax-oriented examination of contemporary estate planning problems for the larger estates, with emphasis on issues of direct concern to practitioners. This course is designed for LL.M. students. Others may take the course with permission of the Associate Dean.

3-4 hrs

[back to top](#)

LAW 8615 R Estate Planning For Charitable Giving

Survey of federal income tax and transfer tax laws governing gifts to charitable organizations, charitable remainder trusts and charitable lead trusts; procedural requirements to assure deductibility; and planning and drafting considerations.

1 hr

[back to top](#)

LAW 8614 R Estate Planning For Retirement Plan Benefits

The income, gift, estate and generation-skipping transfer tax consequences and rules related to the ownership, distribution and withdrawal of retirement plan benefits, including minimum required distributions, designating beneficiaries, spousal rights and rollover options

1 hr

[back to top](#)

LAW 8611 Estates And Trusts

Intestate succession; testamentary dispositions; execution, modification, and revocation of wills; will contests; advancements, ademption, and exoneration; family allowances; rights of estate creditors; express, implied, resulting, and constructive trusts; basic tax aspects of estates and trusts; rule against perpetuities; will substitutes.

3-4 hrs

[back to top](#)

LAW 8609 Ethical Issues In Family Law Representation

Advanced study of the ethical obligations of public and private attorneys in estate, family, and juvenile law representation. Topics may include identification of the client, ethical and legal obligations of confidentiality and disclosure, competence and client communication, respect for third persons (particularly obligations toward children of clients) and other related subjects. Paper and presentation required. Pre-requisite: Professional Responsibility. Pre or co-requisites: Estates and Trust and Family Law. Limited Enrollment.

1-2 hrs

[back to top](#)

LAW 8621 Evidence

General principles relating to proof of facts in civil and criminal trials; presumptions; order of proof; relevancy; judicial notice; real and demonstrative evidence; authentication; best evidence rule; hearsay; competency; impeachment; rehabilitation.

3 hrs

[back to top](#)

LAW 8662 F Family Court Clerkship

Second or third-year students will serve as law clerks to judges and commissioners in the family court of Jackson County. Students work at least 80 hours at the court and attend review conferences over the course of the semester. Pass/Fail.

2-3 hrs

[back to top](#)

LAW 8751 Family Law

Pre-marital contracts; marriage; annulment; paternity; parent and child; divorce; alimony; division of property; separation agreements; adoption.

2-3 hrs

[back to top](#)

LAW 8751 F Family Law & Film

An exploration of the function of family law and lawyers in society by examining legal decisions, statutes and legal commentaries in the context of films, including classic, contemporary mainstream, foreign, documentary and independent films. The seminar entails participants viewing a film followed by discussion. During the discussion session students will critique the film in light of assigned reading materials. Using films as analytical tools, the seminar examines the ways in which pop culture products (such as film and television) both reflect and change the social views about family law and lawyers. A pass/fail course.

1 hr

[back to top](#)

LAW 8752 R Family Law Practice

A practical skills course in family law in which students participate in all phases of family law practice, including the initial client interview; the drafting of questionnaires, pleadings, motions custody and discovery plans, support and maintenance proposals, orders and other documents; negotiation, and preparation for litigation. Students work in teams and perform exercises which simulate "real world" situations. Prerequisite: Family Law.

2 hrs

[back to top](#)

LAW 8751 S Family Violence

An in-depth examination of family violence from a legal perspective. Course topics will include interdisciplinary study of the dynamics and psychology of family violence, of historical and social policies, specialized problems of family violence (including intimate partner violence, child abuse and neglect, gay and lesbian battering, and elder abuse) and legal responses. Students will receive practical training in safety planning, intake, review of community resources, case logistics, and advocacy for temporary orders.

2-3 hrs

[back to top](#)

LAW 8757 F Franchising Law

A consideration of the origins of franchising, compliance standards, franchise relationships, dispute resolution mechanisms and enforceability problems, including State and federal disclosure requirements applicable to the offer of franchises; State laws governing relationship issues between franchisor and franchisee; a review of forms of franchise agreement; and the negotiation of effect and enforceability of standard provisions. The course will emphasize, among other things, the claims of both franchisor and franchisee regarding issues typically litigated under franchise agreements, including rights to terminate the agreements, and available remedies for breach or wrongful termination.

2-3 hrs

[back to top](#)

LAW 8662 Federal Court Internship

Second or third-year students with a GPA of at least 3.0 serve in a clerkship with a judge or magistrate of the U.S. District Court for the Western District of Missouri, or the U.S. Court of Appeals for the Eighth Circuit. Students work at least 70 hours at the court, and attend review conferences over the course of the semester. Ungraded. Pass/Fail.

2-3 hrs

[back to top](#)

LAW 8843 Federal Income Taxation Of Estates And Trusts

Income tax problems of the fiduciary; grantor's trusts; income, estate, and gift tax problems relating to optional or discretionary acts of the fiduciary in retention and/or distribution of income or corpus.

2 hrs

[back to top](#)

LAW 8765 Federal Jurisdiction

Federal court system and jurisdiction of the federal courts; diversity of citizenship; removal of cases from state to federal courts; conflicts between state and federal judicial systems; original and appellate jurisdiction of the Supreme Court. Prerequisite: Civil Procedure.

2-3 hrs

[back to top](#)

LAW 8656 F Federal Public Defender Externship Clinic

Up to three students will be assigned to work in the Federal Public Defender's Office. Under the supervision of the Federal Public Defender, a student will prepare pleadings and represent federal indigent criminal defendants. Students will be expected to perform legal research, to write memoranda, motions and briefs, to observe and to appropriately participate in trials, pre-trial hearings, motion hearings and, in general, to assist in litigation. Students must meet eligibility requirements and be certified in compliance with the Local Federal Rules of Court. Student will work a pre-approved schedule totaling 6 hours a week for 14 weeks with a minimum of 80 hours a semester for two academic credit hours and to attend regular conference with their Supervising Attorney and with their Faculty Supervisor. Students must have completed three semesters of law school and must be in the upper half of their class. Ungraded. Pass/Fail.

2-3 hrs

[back to top](#)

LAW 8783 Federal Public Land & Resource Law

Exploitation and conservation of natural resources; management of federal lands; water law; energy law; federal wildlife preservation; resolution of disputes involving use of natural resources.

2-3 hrs

[back to top](#)

LAW 8552 Federal Taxation

Theory, history, and principles of federal income taxation; basic concepts of income, classification of income and deductions.

3 hrs

[back to top](#)

LAW 8633 First Amendment Law

Basic themes and advanced problems relating to the law of the First Amendment to the United States Constitution, including exploration of the values behind the protection, subversive advocacy, regulation of speech in the public forum, access to the media, regulation of the press, symbolic expression, libel, obscenity, commercial speech, picketing, right of association, loyalty oaths, legislative investigations and government demands for information, separation of church and state, free exercise of religion, state aid to the religious schools, regulation of religion-based conduct.

2-3 hrs

[back to top](#)

LAW 8764 D Food, Drug & Biotechnology Law

This course will focus primarily upon the regulation of food, drugs and the products of biotechnology, such as biologic drugs and genetically modified plants and animals. Much of the course will pertain to FDA law, but will also consider the roles of other regulatory agencies such as the EPA and USDA, and the interaction of state and federal law. This area of the law provides an interesting vehicle for exploring the adoption of interpretation of statutory law, the notice and comment rule-making process, administrative law and judicial review of administrative decisions, and the interplay of science, policy and the law.

2-3 hrs

[back to top](#)

LAW 8714 Gender And Justice

Students will examine and discuss legal issues of special importance to women. Topics will include (among others) sexual discrimination, sexual harassment, domestic violence, reproductive autonomy, and pornography. The course seeks to present each topic in its social context by supplementing legal readings with materials drawn from the social sciences, literature, and film. Paper required. Enrollment limited to fifteen students. Recommended: Constitutional Law I.

2-3 hrs

[back to top](#)

LAW 8714 G Gender, Race, Sexual Orientation, Religion & Film

A focus on the ways in which facets of identity (e.g., gender, race, sexual orientation and religious beliefs) are illuminated in films and other popular media that have implications for law and public policy, including how public sentiments are influenced by movies and other media and how movie portrayals of these identity characteristics shape popular conceptions of what the law should be in relation to them. Readings and discussions illuminate the ways various media both feed, and at times test, societal assumptions about identity characteristics.

1 hr

[back to top](#)

LAW 8743 Global Legal Systems

A study of different legal traditions and systems, mainly within the Civil and the Common Law traditions, focusing on each tradition's history, legal structures, legal actors, procedures, and sources of law. Non-Western Legal traditions such as Islamic, Jewish, Hindu and Indigenous Law may also be considered, time permitting.

1-3 hrs

[back to top](#)

LAW 8752 G Guardian Ad Litem Workshop

Advanced study of guardian ad litem practice. (GAL). Topics may include adult and child orders of protection, requirements for guardian ad litem appointments, role of the GAL, ethical considerations, working with social workers and other professionals, and best practices in investigation, recommendation, and representation. Students will partner with volunteer attorneys to act as guardians ad litem in order of protection cases. Prerequisites: Rule 13 eligible. Limited Enrollment, Instructor approval required.

1-2 hrs

[back to top](#)

LAW 8743 Humanity, Emotion & the Law

A consideration of how human emotions (including pride, loyalty, stubbornness, anger, passion, ethno-centrism, irrationality, compassion, jealousy and love) influence the creation of rules of law, responses to those rules and how they are perceived, handled, adjudicated and enforced.

1 hr

[back to top](#)

LAW 531 I INTRODUCTION TO LAW & LAWYERING PROCESSES FOR LL.M. INTERNATIONAL STUDENTS

Introduction to legal reasoning; case analysis and synthesis; case research; structure and style in legal writing with emphasis on expository writing, including office memoranda

1-3 hrs

[back to top](#)

LAW 8738 V Immigration Law & The Violence Against Women Act

A practical lawyering skills course in which students learn how to help abused immigrant women and children to apply for permanent residence in the United States, and how to help victims of violent crimes to apply for legal status. The course includes a short overview of the applicable immigration law and instructs in such matters as client interviewing; analysis of cases; working with victim advocates and experts; drafting affidavits, evidence indexes, petitions, motions and supporting documents; preparation of checklists for clients, case flowcharts, and case timelines; the review and development of evidence; and the drafting of letters to clients and the government.

1 hr

[back to top](#)

LAW 8738 Immigration Law And Process

Admission, exclusion, deportation, and naturalization of aliens; structure and powers of relevant federal agencies; categories of immigrant and non-immigrant visas and visa application procedures; asylum, extradition, and refugee status; rights of aliens; public policy issues and proposals for reform; practical problems in immigration.

2-3 hrs

[back to top](#)

LAW 8738 P Immigration Law and Policy

A focus on the historical development of immigration law in the United States and fundamental questions of immigration policy. Immigration bills in Congress have been the subject of heated debate, particularly in recent years. This course provides a historical, statutory, and theoretical background for evaluating such proposals. Students will evaluate proposed federal and state legislation across the country and immigration reforms in foreign countries. Particular emphasis will be placed on post-9/11 reforms and the relationship between immigration law and the war on terrorism. The subject matter is useful for the student who intends to practice immigration law, as well as for the non-specialist interested in immigration law as a policy matter.

2-3 hrs

[back to top](#)

LAW 8746 R Independent Study

Independent study, including research and writing projects, under faculty supervision.

0.5-3 hrs

[back to top](#)

LAW 8713 P Innocence Project

Students, under supervision, provide investigate and legal assistance to prisoners with persuasive actual innocence claims. Students meet weekly with the director of the program for training and evaluation. Assigned tasks depend on the needs of the Innocence Project, and may include interviewing potential clients, gathering records, investigating actual innocence claims, consulting with experts, drafting post-conviction and/or clemency pleadings, and appearing at court hearings. Clinical students work in conjunction with law and journalism students enrolled at the University of Missouri-Columbia and are required to work 240 hours a semester or roughly eighteen (18) hours a week on their clinic cases. Limited enrollment (normally, 8 students). Prerequisites: Criminal Law, Criminal Procedure I and Wrongful Convictions. Pass/Fail.

4 hrs

[back to top](#)

LAW 8760 Insurance

Life, fire, accident, and liability insurance; nature of insurance; nature of insurance contract; special rules of construction; standard policy provisions; regulation of insurance industry.

2 hrs

[back to top](#)

LAW 8808 Intellectual Property Law

Substantive and procedural law of intellectual property. Coverage includes copyrights and patents and other areas at the option of the instructor.

2-3 hrs

[back to top](#)

LAW 8754 International Business Transactions

Legal problems encountered in international business; jurisdiction and choice of law; enforcement of judgments; methods of protecting foreign investments; extra-territorial application of United States regulations, e.g. anti-trust law.

2-3 hrs

[back to top](#)

LAW 8831 R International Human Rights Law

Study of the law protecting individuals and groups against governmental violations of internationally guaranteed rights; historical antecedents and theoretical underpinnings; human rights in national law (the United States); post World War II developments; principal international human rights instruments; regional human rights arrangements; human rights of women, refugees, ethnic minorities; implementation of rights; international obligations of the United States; selected civil, political, economic and social rights.

1-3 hrs

[back to top](#)

LAW 8753 International Law

Survey of international legal studies; nature and role of international law, its effectiveness in dealing with international problems and its application in domestic jurisdictions.

2-3 hrs

[back to top](#)

LAW 8889 International Taxation

An introduction to the taxation of income of U.S. citizens, residents and corporations from foreign sources and the income of foreign residents and non-residents from U.S. sources. Topics may include sources of income rules, foreign tax credit provisions, the earned income exclusion for foreign source income, income tax treaties and a survey of the tax treatment of U.S. investments made offshore.

2-3 hrs

[back to top](#)

LAW 8746 I Internship

3 hrs

[back to top](#)

In-depth examination of the role that race plays in American society as a whole and in judicial decision-making in particular. Course will examine the effect of race on representative democracy, employment, education, housing, hate crimes, the legal profession, sex, popular culture, and other aspects of the law. Research paper.

1-3 hrs

[back to top](#)

LAW 8861 Real Estate Finance

Real estate investment and development; basic financing instruments (e.g., mortgages, deeds of trusts, contracts for deed); foreclosure remedies; home finance, national housing market; financing of commercial and industrial properties; construction financing; mechanic's liens; priority disputes; bankruptcy issues affecting real estate security interests.

2-4 hrs

[back to top](#)

LAW 8875 Real Estate Transactions

Practice-oriented course, including the development of drafting skills, in which questions involving basic residential and commercial real estate sales and civil and leasing transactions are considered, such as title, title insurance, contract conditions, contract remedies, commercial leasing (office and shopping center issues) and issues concerning and confronting brokers; special emphasis on Missouri and Kansas law.

2-3 hrs

[back to top](#)

LAW 8711 Remedies

Remedies for violation of legally protected interests; history and development of equity jurisdiction and modern equity practice; injunctions; declaratory judgments; rescission; reformation; restitution; contempt; damages. Prerequisite: Civil Procedure.

2-3 hrs

[back to top](#)

LAW 8746 Research & Writing Requirement

Completion of a paper of publishable quality, demonstrating intensive research and analysis under faculty supervision.

2 hrs

[back to top](#)

LAW 8720 Secured Transactions

Secured Transactions in personal property under Article 9 of the Uniform Commercial Code, function and form of a security agreement, process of perfecting a security interest, priority among unsecured parties; secured sales of goods under Article 2 of the Uniform Commercial Code.

3 hrs

[back to top](#)

LAW 8758 S Securities Regulation

Problem and policy method study of the Securities Act of 1933 and selected aspects of the Securities Exchange Act of 1934; financing of an enterprise; reorganizations; tender offers; proxy regulation; and securities fraud claims.

2-3 hrs

[back to top](#)

LAW 8826 Seminar In Constitutional Interpretation

Current issues in constitutional law. Paper required. Prerequisites: Constitutional Law I.

2-3 hrs

[back to top](#)

LAW 8735 Seminar In Famous Trials

Historical and jurisprudential issues involved in a number of "political trials."

2-3 hrs

[back to top](#)

LAW 8897 Seminar In Legal Education

Pedagogical philosophy of legal education; common themes in first-year legal education; techniques of cooperative learning of legal materials. Students may act as study group leaders for various first-year course subjects. Ungraded.

1-2 hrs

[back to top](#)

LAW 8883 Seminar In National Security Law

Consideration of lawyer involvement in the formulation and execution of national security policy. Concentration will be upon the practice of law in the public sector. In an interdisciplinary undertaking, this course will define national security and examine its historic and theoretical roots. Domestically, Constitutional principles and rules will be studied. Use of force will be explored from the vantage point of ethics, international law, and the law of war. Legal issues surrounding problems of control of international terrorism, low intensity conflict, planning and using rules of engagement, and supporting international peace-keeping and peace-making missions will be discussed.

2-3 hrs

[back to top](#)

LAW 8885 Seminar In Philosophy And Law

An examination from a philosophical perspective of the historical and conceptual relationships present in the evolution, development and analysis of law, including natural law theory, legal positivism and legal realism, and focusing on a specific area of controversy in the law.

2 hrs

[back to top](#)

LAW 8792 S Seminar On Gun Law & Policy

This course examines legal and public policy issues relating to firearms and the role they play in the United States, with a particular emphasis on debates about the meaning of the Second Amendment and attempts to hold gun manufacturers and sellers liable under tort law. Research paper required. No prerequisite courses.

1-3 hrs

[back to top](#)

LAW 8881 Seminar On The Supreme Court

Students simulate the work of the Supreme Court on nine cases presently pending before that court. The student justices study the briefs and related material filed in each case, discuss and vote on the cases, and write majority and dissenting opinions. Enrollment in the seminar is limited-fittingly--to nine justices.

3 hrs

[back to top](#)

LAW 8735 P Seminar in Pre-Twentieth Century Famous Trials

This seminar will explore six or seven of the most famous trials from ancient times to the end of the nineteenth century. The trials covered will vary from year to year, but will be taken from a list that includes the trials of Socrates, Jesus, Joan of Arc, Sir Thomas More, Galileo, the Salem witches, John Peter Zenger, the British soldiers charged in connection with the Boston Massacre, Aaron Burr, the slaves of the Amistad, John Brown, the Lincoln Assassination conspirators, Susan B. Anthony, the Haymarket rioters, Lizzie Borden, and Oscar Wilde. Each trial will be examined from many perspectives, both with an eye to deepening students' appreciation for history and their understanding of the tactical and ethical questions faced by attorneys involved in these famous cases. Materials for the seminar can be found on the Famous Trials website. Grades for the seminar will be based both on an in-class objective examination and a short paper addressing an issue raised in a famous pre-twentieth century trial.

1 hr

[back to top](#)

LAW 8714 S Sexuality and the Law

An examination of sexual orientation, sexuality, and the law. This course will introduce students to existing and emerging jurisprudence in these areas by examining case law with an eye toward how holdings in specific cases can be expanded or restricted in future litigation. The five-day course will examine the manner in which constructions of sexuality and sexual orientation have impacted the development of law in the areas of constitutional law (including speech and the right to privacy), employment, marriage, parenting, violence and military service.

1 hr

[back to top](#)

LAW 8867 R Social Security Administration Law Clinic

Students assist an Administrative Law Judge in performing duties handled by the Social Security Administration, including reviewing files of pending cases; conducting legal research; attending hearings and participating in conferences, as assigned; preparing recommendations for the disposition of motions and for on the record decisions; and preparing draft decisions. Students are supervised by an attorney advisor and attend regular conferences with a supervising faculty member who reviews copies of all clinic written work that may be so reviewed under Social Security Administration rules. Prerequisite: Administrative Law. Ungraded. Pass/Fail.

2-3 hrs

[back to top](#)

LAW 8757 L Special Topics In Entrepreneurial Lawyering

Examination of issues related to ethical and effective management and marketing of law practice, emphasizing solo and small firm practice. Topics will vary from year to year, but will generally address issues such as forms of practice, dissolution of practice, practice management systems (including technology assistance), human resources management, advertisement and solicitation, insurance and malpractice.

1-2 hrs

[back to top](#)

LAW 8757 S Special Topics in Business Law Practice

Specialized course of study in the following areas relating to transactional practice: conducting research in special areas of business and tax law, with related exercises; application of ethical rules to issues commonly arising in business/tax practice fact patterns; overview of deferred compensation techniques with which business and tax lawyers should be at least generally familiar; selected issues in corporate finance and venture capital, with emphasis on advanced/hybrid financial instruments not covered in detail in the Business Organizations course; and negotiation skills training, including a lecture on negotiation rules, etc., and review and critique a tape of negotiators in action. Completion of this course will satisfy both the advanced research and ethics requirements of the Business & Entrepreneurial Law Emphasis.

1 hr

[back to top](#)

LAW 8890 A Sports Law I, Amateur Sports Law

Coverage of various amateur sports law issues with a focus on the regulation of interscholastic, intercollegiate sports, Olympic and international sports, and sports broadcasting; including such topics as constitutional law, tort law, contract law, and Title IX gender discrimination; and a consideration of federal disability discrimination laws, the status of collegiate athletes who participate in big time sports programs, the regulatory authority of the National Collegiate Athletics Association, The National High School Athletic Association, international and Olympic sports organizations.

2-3 hrs

[back to top](#)

LAW 8890 B Sports Law II, Professional Sports Law

A focus upon the multitude of legal issues and unique relationships in the sports industry, including, among other issues, professional team sports, other professional sports, facilities management in professional sports, legal implications and the practical realities of the unique labor-management relationships in professional sports. The most significant areas to be studied in the context are antitrust, labor, communications, taxation, contracts law, and intellectual property law.

2-3 hrs

[back to top](#)

LAW 8770 State And Local Government Law

Structure, powers, and divisions of local governments in metropolitan areas; role and powers of cities, counties, towns, school and special districts; decentralized and neighborhood governmental units and other local governmental units; legislative, home-rule, and constitutional sources of power; sovereign immunity; boundary adjustments; public employee relations; citizen participation; reapportionment; licensing and permits; ethics and public access to records; regional governance; intergovernmental cooperation; interstate compacts and authorities; function of local government with reference to solution of problems created by urban growth; role of judicial, administrative, and political processes.

2-3 hrs

[back to top](#)

LAW 8848 R State And Local Taxation

State and local taxation of income, sales and property, including the apportionment of tax obligations to multiple states. Restrictions imposed by constitutional doctrines such as the uniformity and equality requirement and the prohibition on interfering with interstate commerce.

2-3 hrs

[back to top](#)

LAW 8834 R Tax Clinic

Students counsel clients in federal, state and local tax controversy matters in the Kansas City Tax clinic, under the supervision and direction of tax faculty, clinic director, and volunteer attorneys. Classroom instruction in the area of tax controversy procedure and client counseling. Prerequisite: Federal Income Tax and Tax procedure (or concurrent enrollment). Method of grading: Pass/Fail.

2-4 hrs

[back to top](#)

LAW 8838 R Tax Practicum I

Practical skills training in the sources and methods of tax research (including electronic database sources) using problem method approaches; analytical and planning skills are developed through in-depth case study research.

1-3 hrs

[back to top](#)

LAW 8834 Tax Procedure

Problem-method study of procedures and taxpayers' rights when deficiencies are assessed by the Internal Revenue Service; tax liens; commencement of litigation in Tax Court, Federal District Court, and Court of Claims.

2 hrs

[back to top](#)

LAW 8874 Tax-Exempt Organizations

An in-depth examination of the state and federal laws that govern the formation and operation of tax-exempt organizations, with emphasis on Sec. 501 (c) (3) charities; criteria for tax-exempt status; IRS application and reporting procedures; unrealized business income tax issues.

2 hrs

[back to top](#)

LAW 8603 Taxation Of Business Organization

Survey course of the taxation of business enterprises, particularly partnerships, corporations and subchapter S corporations. Prerequisites: Federal Taxation and Business Organizations.

2-3 hrs

[back to top](#)

LAW 8892 R Taxation Of Estates, Gifts And Trusts

Problem method study of estate, gift and generation skipping transfer taxes and the income taxation of estates and trusts. Emphasis on lifetime and post-mortem planning as well as compliance requirements.

2-3 hrs

[back to top](#)

LAW 8893 R Taxation Of Property Transactions

Income taxation of property transactions. Detailed study of capital gains and losses, passive losses, the at-risk rules, and the alternative minimum tax.

2-3 hrs

[back to top](#)

LAW 8895 The Jury: Practice And Perspectives

Examination of the American jury from both practical and theoretical perspectives; Constitutional issues relating to jury representativeness, use of peremptories, and alleged jury bias; jury selection techniques; juror information processing and the dynamics of jury deliberations; jury competence; jury size; juror misconduct; jury "nullification"; proposals for reform of the jury system.

2 hrs

[back to top](#)

LAW 8740 C The Missouri Supreme Court & Constitution

In four of the five sessions, students will study a single case that is currently pending before the Missouri Supreme Court or has very recently been decided by it. Each case will be selected because it raises important issues under the Missouri Constitution or because it illustrates an important aspects of the Supreme Court's function in our judicial system. The students will read the briefs and (in some cases) a small amount of related material before the class session. The class will discuss the issues raised by the briefs and listen to the actual oral argument of the case. As part of the discussion, students will be introduced to the way the Supreme Court functions. One session will ordinarily consist of a trip to the Supreme Court in Jefferson City to observe the Court (if it is in session) and to meet with one or more its members. This session will be scheduled on whichever day best fits with the Court's schedule.

1 hr

[back to top](#)

LAW 8885 H The Quest for a Satisfying Career in Law

An examination of what research suggests about the likelihood that a career in law will prove satisfying, including an exploration of the specific types of firms and work environments that are most likely to produce happy lawyers; a consideration of what studies from the fields of neuroscience and psychology suggest about steps that lawyers, law firms, and law schools can take to improve prospects for career satisfaction; and a consideration of how high happiness should rank among life's goals.

1 hr

[back to top](#)

LAW 8511 Torts

Wrongs to the person and to property; legal remedies through which compensation or other relief may be obtained.

3 hrs

[back to top](#)

LAW 8753 L Transnational Litigation & Arbitration

Legal issues involved when litigation crosses international borders, including such issues as: International service of process, international discovery, extraterritoriality, sovereign defenses and foreign legal environments (courts, lawyers, clients, laws).

2-3 hrs

[back to top](#)

LAW 8700 Trial Advocacy I

A practical skills course in advocacy which introduces students to the fundamental components of a typical civil and criminal trial and requires students to perform exercises involving each component and try a mock civil or criminal case from provided problem materials. The course is graded on a pass/fail basis. Prerequisite or corequisite: Evidence.

2 hrs

[back to top](#)

LAW 8703 Trial Advocacy II

A practical skills course in the art of trial advocacy with an emphasis on technique, style, and methods of persuasion. During class sessions, students perform exercises involving the various stages of a law suit, and are critiqued on their performances. Following performance of the exercises, students are divided into teams and try a mock case in a trial competition, from which the Law School's National Trial Competition Teams are selected. The trials are evaluated by trial lawyers and federal or state judges. The course is graded on a pass/fail basis. Limited enrollment. Prerequisite: Trial Advocacy I

2 hrs

[back to top](#)

LAW 8705 Trial Advocacy III

Students, under the supervision of trial advocacy faculty, participate in trial competitions. Enrollment by invitation only. The course is graded on a pass/fail basis. Prerequisite: Trial Advocacy I and II.

2 hrs

[back to top](#)

LAW 8868 Trusts: Planning, Drafting, Administering & Litigating

Focus on advanced planning and drafting of inter vivos private express trusts for individuals, including proper use of readily available forms (tax-related drafting limited to marital and charitable deduction forms), consideration of trustee's duties, powers and liabilities pursuant to the Missouri Trust Code and related cases, and special emphasis on the recently-adopted Uniform Investor Act and the significant changes it has introduced to Missouri trust investment law. Estates & Trusts is a prerequisite to this course, and concurrent enrollment in Estate Planning & Drafting is advised.

2-3 hrs

[back to top](#)

LAW 8637 R U.S. Attorney's Office Law Clinic

Up to four students, under supervision of an Assistant United States Attorney, are selected as interns to work in the United States Attorney's Office for the Western District of Missouri with members of the Strike Force, Narcotic Unit, General Crimes Unit or Civil Division. Activities include, legal research and writing, consisting of memoranda, motions and briefs; observations and participation in trials, pre-trial hearings and motions, as appropriate; and assistance with litigation. Students are expected to work a pre-approved schedule of six hours a week for fourteen weeks with a minimum of eighty hours a semester and to attend regular conferences with their supervising attorney and faculty supervisor. Prerequisites: Three semesters of law school and attainment of at least a B+ cumulative grade point average. Eligible interested students are screened and selected. Ungraded. Pass/Fail.

2-3 hrs

[back to top](#)

LAW 8782 R U.S. Environment Protection Agency Law Clinic National Agricultural Compliance Assistance Center

students will be assigned to work with EPA's National Agriculture Compliance Assistance Center (AG Center). Under the supervision of an attorney with the Ag Center, a student will be expected to perform legal research, write memoranda, develop compliance assistance materials, respond to inquiries from the regulated community, and participate as appropriate in meetings, conferences, and training sessions with EPA, other federal agencies, trade associations, etc., and, in general, assist in the activities of the Ag Center. Students must have completed three semesters of law school. Preference will be given to students who have completed Environmental Law or administrative Law. Eligible interested students will then be screened and selected. Ungraded. Pass/Fail.

2-3 hrs

[back to top](#)

LAW 8782 S U.S. Environmental Protection Agency Clinic, Region VII

Students will be assigned to work at the EPA's Region VII Headquarters in Kansas City, Ks. Under the supervision of an EPA attorney, students will be expected to perform legal research, write memoranda, develop compliance assistance materials, respond to inquiries from the regulated community, and participate as appropriate in meetings, conferences, and training sessions with the EPA. Students will attend regular conferences with their Supervising Attorney and Faculty Supervisor, and will produce a final written project based on their experience. Students must have completed two semesters of law school. Preference will be given to students who have completed an environmental course at the Law School. Eligible students will be screened and selected. Positions limited. Ungraded, pass/fail.

2-3 hrs

[back to top](#)

LAW 8750 B Urban Lawyer Board

Members of the Urban lawyer Editorial Board, articles that are submitted and coordinates student written case digests and comments for publication in The Urban lawyer. The members of the board ensure the articles and student pieces conform to publication standards and work the articles through the production process. Board members must take at least one credit in the fall semester and can carry over the remaining allocated credits to the winter semester. Ungraded.

1-5 hrs

[back to top](#)

LAW 8750 Urban Lawyer Staff

Staff members of the Urban Lawyer receive credit for writing case notes, annotations, and statutory developments, for editing articles, for editing comments and book reviews, and for participation in urban legal conferences. Research Editors of the Urban Lawyer receive additional credit for writing a major article or comment for publication in the journal. Ungraded.

1 hr

[back to top](#)

LAW 8725 Water Law

Private acquisition of water rights through riparian ownership and prior appropriation; public rights to water existent in bed ownership easements and trusts; ground water management; water distribution organizations; federal allocation and control of water resources; interstate allocation.

2-3 hrs

[back to top](#)

LAW 8884 White Collar Crime

Examines substantive federal law in the areas of fraud, public corruption, financial crimes and conspiracy; it also includes examination of procedural and policy issues related to business and white-collar investigations. Prerequisites: Criminal Law and Criminal Procedure I.

2-3 hrs

[back to top](#)

LAW 8778 Workshop On Current Issues In Family Law

Under direction of professor, students provide editorial assistance in publishing Journal of the American Academy of Matrimonial Lawyers, write a paper on selected topics and prepare summaries and bibliography of current works. Limited enrollment. Prerequisite: Family Law.

2 hrs

[back to top](#)

LAW 8635 S Wrongful Convictions

An examination of the causes of wrongful convictions, a consideration of systemic reforms that might minimize convicting the innocent and a focus on recurring ethical issues that confront prosecutors and criminal defense lawyers. Students also will work with The Midwestern Innocence Project on cases of possible actual innocence. This course provides an insider's look into the operation of the criminal justice system and is designed to help students gain insight into features of the criminal justice system that have a tendency to produce wrongful convictions. It should be of particular interest to any student interested in working in a prosecutor's office, public defender's office or for a firm doing defense work. It is a prerequisite for any student wishing to enroll in the Innocence Project clinic. Limited enrollment (normally, up to 16 students)

2-3 hrs

[back to top](#)

LAW 8635 T Wrongful Convictions II

A follow-up class to Wrongful Convictions I, open only to students who have completed Wrongful Convictions I. The course will involve "hands on" work with cases that have passed through the first level of screening in Wrongful Convictions I with students receiving the transcripts and case documents in addition to the briefs and opinion in the case. Students will receive these documents and report on the likelihood that an inmate is innocent and the strategies available for pursuing the claim of innocence.

2-3 hrs

[back to top](#)

School of Computing & Engineering

School of Computing & Engineering Courses

Civil Engineering

CIV-ENGR 5500 Problems

Supervised investigation in civil engineering to be presented in the form of a report. Prerequisite: Graduate standing.

1-6 hrs

[back to top](#)

CIV-ENGR 5501 Advanced Topics In Civil Engineering

Current technical developments in civil engineering.

1-3 hrs

[back to top](#)

CIV-ENGR 5501 G Advanced Topics In Civil Engineering

1-3 hrs

[back to top](#)

CIV-ENGR 5501 J Advanced Topics In Civil Engineering

1-3 hrs

[back to top](#)

CIV-ENGR 5501 L Advanced Topics In Civil Engineering

1-3 hrs

[back to top](#)

CIV-ENGR 5501 S Advanced Topics In Civil Engineering

1-3 hrs

[back to top](#)

CIV-ENGR 5525 Advanced Reinforced Concrete Design

Designed of eccentric and combine footings, retaining walls, two way floorslabs, design and analysis of multistory building frames, and introduction of prestressed concrete. Prerequisite: CIV-ENGR 422

3 hrs

[back to top](#)

CIV-ENGR 5536 Advanced Soil Mechanics

Theoretical soil mechanics as applied to solution of specific engineering problems. Prerequisite: CIV-ENGR 335.

3 hrs

[back to top](#)

CIV-ENGR 5544 Unit process Laboratory for Water and Wastewater Treatment

Typical chemical and physical relationships are applied to unit processes of water and wastewater. Troubleshooting for operation problems is emphasized. The class has significant laboratory/field component. Prerequisite: CIV-ENGR 342

3 hrs

[back to top](#)

CIV-ENGR 5545 Environmental Engineering Microbiology

Theory and application of fundamental principles of microbiology, toxicology, ecology, and aquatic biology of the microorganisms of importance to environmental engineers.

3 hrs

[back to top](#)

CIV-ENGR 5545 Environmental Engineering Microbiology

Theory and application of fundamental principles of microbiology, toxicology, ecology, and aquatic biology of the microorganisms of importance to environmental engineers.

3 hrs

[back to top](#)

CIV-ENGR 5546 Limnology

A survey of the physical, biological, and chemical issues important in surface fresh waters. Includes carbonate chemistry, algal assay and Thermocline analysis. Prerequisites: CHEM 211 and MATH 345

3 hrs

[back to top](#)

CIV-ENGR 5552 Hydraulics of Open Channels

The fundamentals of free surface flow are investigated. This includes the study of the principles of continuity, Momentum and Energy; Specific Energy, Discharge and Force; Steady-Gradually varied and Steady, Rapidly Varied Flow; Hydraulic Structures; and, the derivation of, and general methods for solution of the 1-dimensional, unsteady St. Venant Equations. Prerequisite: CIV-ENGR 351

3 hrs

[back to top](#)

CIV-ENGR 5553 Hydraulics and Variability of Rivers

This course investigates the fundamental concepts of alluvial channel behavior including stream channel evolution and change due to natural and man-induced modifications to streams and watersheds. Numerous case studies of river behavior and studied from the perspective of hydraulics, geomorphology and sediment transport. Prerequisite: CIV-ENGR 355

3 hrs

[back to top](#)

CIV-ENGR 5554 River Stability and Scour

With over 500,000 bridge over water, a significant number are damaged or destroyed by floods annually. This is a study of the theory of and fundamentals methods and procedures recommended to evaluate and analyze stream stability and scour at bridges. Specific topics include Bridge hydraulics; stream stability bridge piers and abutments; hydraulic modeling of floods; and, countermeasures for protection of bridge infrastructure. Prerequisite: CIV-ENGR 355 or instructor approval.

3 hrs

[back to top](#)

CIV-ENGR 5555 Highway Hydraulics and Sediment Transport

The study of sediment transport in rivers, specifically in the vicinity of highway and railroad bridge encroachments. The understanding of the relationship between sediment transport and the fundamentals of fluvial geomorphology. Computation of sediment transport and sediment transport modeling. Prerequisite: CIV-ENGR 355

3 hrs

[back to top](#)

CIV-ENGR 5582 Advanced Traffic Engineering

This course covers the review of traffic flow characteristics, the field survey practices and studies, traffic signal designs, freeway operation, and the introduction to Intelligent Traffic Systems (ITS) Prerequisites: CIV-ENGR 481 and CIV-ENGR 319

3 hrs

[back to top](#)

CIV-ENGR 5585 Freight Transportation Analysis

CE585 Freight Transportation Analysis (3) This course provides a better understanding of freight transportation and its issues, as well as the techniques of system analysis. Prerequisite: CE481

3 hrs

[back to top](#)

CIV-ENGR 5599 Thesis Research

Independent investigation in the field of civil engineering to be presented in the form of a thesis.

1-6 hrs

[back to top](#)

CIV-ENGR 5601 Doctoral Topics In Civil Engineering

Current technical developments in civil engineering.

1-3 hrs

[back to top](#)

CIV-ENGR 5601 B Advanced Topics In Civil Engineering

1-3 hrs

[back to top](#)

CIV-ENGR 5601 G Advanced Topics In Civil Engineering

1-3 hrs

[back to top](#)

CIV-ENGR 5601 X Advanced Topics In Civil Engineering

1-3 hrs

[back to top](#)

CIV-ENGR 5602 Directed Reading In Civil Engineering

Faculty supervised readings course. Prerequisite: Graduate standing. Offered: Fall and winter.

1-3 hrs

[back to top](#)

CIV-ENGR 5607 Numerical Methods In Engineering

Classification and numerical solution of engineering problems--ordinary and partial differential equations, algebraic equations. Includes initial, boundary, eigen-# and characteristic-value problems. Prerequisite: MATH 345.

3 hrs

[back to top](#)

CIV-ENGR 5621 Continuum Mechanics

Introductory course in the mechanics of continuous media. Basic concepts of stress, strain, constitutive relationships; conservation laws are treated using Cartesian tensor notation. Examples from both solid and fluid mechanics investigated. (Same as MEC-ENGR 621) Prerequisites: CIV-ENGR 351, MATH 345, and CIV-ENGR 276

3 hrs

[back to top](#)

CIV-ENGR 5622 Theory Of Elasticity

Stress and strain at a point. General equations of elasticity. Plane stress, plain strain problems; torsion of prismatic bars. Energy methods. (Same as ME 622) Prerequisite: CIV-ENGR 621

3 hrs

[back to top](#)

CIV-ENGR 5623 Theory Of Plates And Shells

Bending of plates with various loading and boundary conditions. Deformations, stresses in thin shells. (Same as ME 623) Prerequisite: CIV-ENGR 621

3 hrs

[back to top](#)

CIV-ENGR 5624 Theory Of Elastic Stability

Buckling of columns, beams, rings, curved bars, thin plates, shells. (Same as MEC-ENGR 624) Prerequisite: CIV-ENGR 621

3 hrs

[back to top](#)

CIV-ENGR 5645 Water Quality Modeling

Derivation and application of models for describing oxygen budget, nutrient exchange, and biological productivity in streams, lakes and estuaries. Prerequisite: CIV-ENGR 342.

3 hrs

[back to top](#)

CIV-ENGR 5646 Physiochemical Treatment Processes

Fundamental principles, analysis and modeling of physical and chemical processes for water and wastewater treatment. Prerequisite: CIV-ENGR 342.

3 hrs

[back to top](#)

CIV-ENGR 5647 Biochemical Treatment Processes

Biochemical principles, kinetic models and energy considerations in the design of biological wastewater treatment processes. Prerequisite: CIV-ENGR 342.

3 hrs

[back to top](#)

CIV-ENGR 5648 Environmental Engineering Practicum

Numerical water quality modeling of actual site data for wasteload allocation.

3 hrs

[back to top](#)

CIV-ENGR 5649 Design Of Water And Wastewater Treatment Facilities

Development of design criteria and their application to the design of water and wastewater treatment facilities. Prerequisite: CIV-ENGR 342.

3 hrs

[back to top](#)

CIV-ENGR 5651 Fundamentals Of Fluid Mechanics

Fundamentals of fluid motion, lecture and laboratory. Instrumentation, technique and analysis for experimental studies in fluid mechanics.

3 hrs

[back to top](#)

CIV-ENGR 5656 Advanced Hydraulic Engineering

Rapidly varied flow and design of transition structures. Hydraulic design of spillways, reservoirs and related structures.

3 hrs

[back to top](#)

CIV-ENGR 5676 Finite Element Methods

The concepts and fundamentals of the finite element method with applications to problems in solid and fluid mechanics. Prerequisite: MEC-ENGR 486 or CIV-ENGR 421.

3 hrs

[back to top](#)

CIV-ENGR 5679 Dynamics Of Structures

Study of the dynamic behavior of structures. Analysis of equivalent lumped parameter systems for the design of structures in a dynamic environment. (Same as MEC-ENGR 679) Prerequisites: MEC-ENGR 484 and CIV-ENGR 276, or CIV-ENGR 421, MATH 345, and MEC-ENGR 285

3 hrs

[back to top](#)

CIV-ENGR 5681 Traffic Flow Theory

CE681 (3) Traffic Flow Theory This course covers the review of macroscopic and microscopic traffic flow characteristics, the traffic flow models, and the traffic simulation applications. Prerequisite: CE481 and CE319

3 hrs

[back to top](#)

CIV-ENGR 5682 Transportation Network Modeling

This course is about modeling, solving, and understanding network flow problems, especially in the transportation discipline. This course covers equilibrium traffic assignment, network design, fleet assignment, fleet routing, and crew scheduling. Prerequisites: CE 481 and CE 319

3 hrs

[back to top](#)

CIV-ENGR 5699 Research And Dissertation

Doctoral dissertation research.

1-9 hrs

[back to top](#)

Computer Science

COMP-SCI 524 Protocol Design

Protocols as formal algorithms, architectural definition, protocol specification languages and models and their translation to implementation languages, overview of verification methods, symbolic execution. Prerequisite: CS 421.

3 hrs

[back to top](#)

COMP-SCI 532 Discrete Event Simulation

Review of statistical distributions, generation of pseudorandom variates and stochastic processes, basic queueing systems such as M/M/m and Jackson Networks, simulation project. Prerequisite: CS 594.

3 hrs

[back to top](#)

COMP-SCI 5510 Information Theory

Representation, transmission and transformation of information, information compression and protection, generation, storage, processing and transmission of information. Prerequisite: BS in Computer Science, Engineering, or Mathematics.

3 hrs

[back to top](#)

COMP-SCI 5511 Advanced Telecommunications Networks

Efficient source coding and channel coding techniques, principles of switching, digital transmission over microwave, copper and optical media, T-carrier and SONET systems, traffic consideration in telecommunications networks, network synchronization, control and management, ATM concepts. Prerequisite(s): COMP-SCI 394R and COMP-SCI 411.

3 hrs

[back to top](#)

COMP-SCI 5513 Digital Cellular Communications

Principles of microwave communications, performance metrics, mobile communications and cellular topology, co-channel and adjacent channel interference, fading and shadowing, various types of diversity, TDMA, FDMA and CDMA and other techniques for channel assignment, cellular network architectures, design considerations, PCN concepts. Prerequisite COMP-SCI 411.

3 hrs

[back to top](#)

COMP-SCI 5514 Optical Fiber Communications

Fiber optic cable and its characteristics, optical sources and transmitters, optical detectors and receivers, optical components such as couplers and connectors, WDM and OFDM techniques, modulation and transmission of information over optical fibers, design of optical networks, single and multihop fiber LANs, optical carrier systems. Prerequisite: COMP-SCI 411.

3 hrs

[back to top](#)

COMP-SCI 5514 A Optical Networking

Components of optical networks such as OADM, OXC, optical switches, DWDM, and their functions and interactions. Design, analysis and routing over all-optical networks to include waveband, wavelength and lightpath routing. Prerequisite: COMP-SCI 411

3 hrs

[back to top](#)

COMP-SCI 5517 Digital Switching: Techniques And Architectures

Integration of transmission and switching, single and multistage switching principles, space and time division switching, conventional switch architectures such as 4ESS, integration of circuit and packet switching, ATM switching and design considerations, ATM switch architectures, evaluation and comparison, future trends. Prerequisite(s): COMP-SCI 394R and COMP-SCI 411.

3 hrs

[back to top](#)

COMP-SCI 5520 Network Architecture I

Principles, protocols, and architectures of data networks, internetworking, routing, layering, and addressing, with specific investigation of the Internet Protocol (IP), Mobile IP, Multiprotocol Label Switching (MPLS), IP over Asynchronous Transfer Mode (ATM) networks, and virtual private networks. Prerequisite: COMP-SCI 420 or COMP-SCI 421, COMP-SCI 431.

3 hrs

[back to top](#)

COMP-SCI 5521 Network Architecture II

Principles, protocols and architectural issues of computer networks for transport layer and above, with specific emphasis on TCP/IP for best-effort services as well as for emerging multi-media services. Prerequisite: COMP-SCI 520

3 hrs

[back to top](#)

COMP-SCI 5522 Computer Network Design And Analysis

Topological design, capacity and flow assignment problem-modeling and algorithms, and their analysis, issues in network control. Prerequisite(s): CS 352, COMP-SCI 394R, COMP-SCI 421.

3 hrs

[back to top](#)

COMP-SCI 5526 Network Routing

Algorithms, protocols and analysis for network routing. Routing in different networks such as circuit-switched networks, Internet, broadband networks, and transmission networks are covered. Prerequisites: COMP-SCI 520 and COMP-SCI S522.

3 hrs

[back to top](#)

COMP-SCI 5528 Local Area Networks: Analysis And Design

Definition of local area networks (LAN), LAN architecture and protocols, topology, transmission media, channel access protocols, modeling, simulation and performance evaluation of LANs, considerations in design and implementation, examples. Prerequisite: COMP-SCI 421 and COMP-SCI 494R.

3 hrs

[back to top](#)

COMP-SCI 5531 Advanced Operating Systems

Components of an operating system, scheduling/routing mechanisms, process control blocks, design and test various operating system components. Prerequisite: COMP-SCI 431.

3 hrs

[back to top](#)

COMP-SCI 5551 Advanced Software Engineering

Current concepts in software architecture and design, comparative analysis for design, object-oriented software design, software quality criteria for evaluation of software design. Introduction to metrics, project management and managerial ethics. Prerequisite: COMP-SCI 451.

3 hrs

[back to top](#)

COMP-SCI 5552 Advanced Data Structures

Formal modeling including specification and deviation of abstract data types, completeness issues in the design of data types and data structures, implementation of data structures from a formal data type specification, verification of abstract to concrete data mapping. Prerequisite(s): COMP-SCI 291 and COMP-SCI 352.

3 hrs

[back to top](#)

COMP-SCI 5552 A Formal Software Specification

Formal modeling including specification and deviation of abstract data types, completeness issues in the design of data types and data structures, implementation of data structures from a formal data type specification, verification of abstract to concrete data mapping. Prerequisite(s): CS291 and CS 352.

3 hrs

[back to top](#)

COMP-SCI 5554 Software Tools And Programming Environments

Taxonomy of software tools and environments, generic software tool architecture, interface techniques for users, intra-system and stand-alone systems, integration of heterogeneous systems components. Prerequisite: COMP-SCI 451.

3 hrs

[back to top](#)

COMP-SCI 556 Human Factors In Computer Systems

Design of "user friendly" man-machine interface, survey of recent psychological studies in man-machine interaction, user interface design, instrumentation and testing, analytic models of man-machine interaction. Prerequisite: CS 451.

3 hrs

[back to top](#)

COMP-SCI 5560 Knowledge Discovery And Management

This course teaches students fundamental theory and practice in the field of knowledge discovery and management and also provides them with hands-on experience through application development. Prerequisites: COMP-SCI 5551, and either COMP-SCI 461 or COMP-SCI 464 Offered: Every Winter

3 hrs

[back to top](#)

COMP-SCI 5566 Introduction To Bioinformatics

This course introduces students to the field of Bioinformatics with a focus on understanding the motivation and computer science behind existing Bioinformatic resources, as well as learning the skills to design and implement new ideas. Offered: Every Fall Prerequisites: COMP-SCI 352 and a course/background in Biology (Genomics or etaModels preferred.)

3 hrs

[back to top](#)

COMP-SCI 5567 Machine Learning In Bioinformatics

This course introduces students to the field of Machine Learning algorithms that are used in Bioinformatics, illustrated by several examples of applications to various problems. Offered: Every Winter Prerequisites: COMP-SCI 352, COMP-SCI 394R and a course/background in Biology (Genomics or MetaModels preferred.)

3 hrs

[back to top](#)

COMP-SCI 5570 Architecture Of Database Management Systems

Covers in detail, architecture of centralized database systems, database processing, management of concurrent transactions, query processing, query optimization, data models, database recovery, datawarehousing, workflow, World Wide Web and Database performance, and reviews the architecture of some commercial centralized database systems. Prerequisites: COMP-SCI 470 and COMP-SCI 431, or consent of instructor.

3 hrs

[back to top](#)

COMP-SCI 5572 Mobile Computing

This course covers in detail the architecture of mobile and wireless network. It discusses and develops relevant concepts and algorithms for building mobile database systems (MDS), which is necessary for managing information on the air and E-commerce. This course is offered once a year. Prerequisite: COMP-SCI 5570 Offered: Every Fall

3 hrs

[back to top](#)

COMP-SCI 5590 Special Topics

Selected topics in specific areas of computer science. May be repeated for credit when the topic varies.

COMP-SCI 5592 Design And Analysis Of Algorithms

Combinatorial analysis, searching and sorting, shortest path algorithms, spanning trees, search and traversal techniques, backtracking, branch and bound, heuristics, algebraic simplification and transformation. Prerequisite: COMP-SCI 352.

3 hrs

[back to top](#)

COMP-SCI 5594 Introduction To Queueing Theory

Review of statistics and probability, stochastic processes, Markov Processes, the basic Poisson process, equilibrium conditions, M/M/1 system with variations local and global balance in networks of queues, open and closed networks. Prerequisite: COMP-SCI 494R.

3 hrs

[back to top](#)

COMP-SCI 5595 Mathematical Foundations Of Computer Science

Study of the theory, and algorithmic techniques, of the fields of graph theory, combinatorics and number theory, as they relate to their application in the field of computer science. Prerequisite: COMP-SCI 352 and COMP-SCI 494R, or Consent of Instructor.

3 hrs

[back to top](#)

COMP-SCI 5596 A Computer Security I: Cryptology

Study of theory, and algorithmic techniques, of the fields of number theory and cryptology, as they are applied in the general area of computer and network security. Prerequisites: COMP-SCI 291.

3 hrs

[back to top](#)

COMP-SCI 5596 B Computer Security II: Applications

Application of the algorithmic techniques learned in CS 596A to provide suitable security countermeasures to the variety of security threats across the spectrum of computing. Prerequisite: COMP-SCI 596A.

3 hrs

[back to top](#)

COMP-SCI 5597 Directed Readings

Readings in an area selected by the graduate student in consultation with a faculty member. Arrangements must be made prior to registration.

1-3 hrs

[back to top](#)

COMP-SCI 5598 Research Seminar

Graduate research based on intensive readings from the current research literature under the direction of a faculty member. Arrangements must be made prior to registration.

1-3 hrs

[back to top](#)

COMP-SCI 5599 Research And Thesis

A project investigation leading to a thesis, or written report under the direction of a faculty member. A prospectus must be accepted prior to registration.

1-6 hrs

[back to top](#)

COMP-SCI 561 Advanced Artificial Intelligence

AI systems and their languages, implementations and applications, case studies of various expert systems, current research topics in AI, logic programming using PROLOG. Prerequisite: CS 461.

3 hrs

[back to top](#)

COMP-SCI 564 Inference Techniques And Knowledge Representation

Inference Techniques is an in-depth course of logic and automatic theorem proving, intended for Computer Science graduate students, with particular importance to those students interested in Artificial Intelligence. The main areas of study will be concerned with the principals and techniques used for automatic theorem proving. An overview of the representation of knowledge and logic, a detailed appreciation of theorem proving methods, and implementation techniques will be provided in the course. The course will provide background for further study in varying fields of A.I. Prerequisite: CS 461 or consent of instructor.

3 hrs

[back to top](#)

COMP-SCI 5670 Architecture Of Distributed Database Systems

Detailed study of distributed database systems architecture, in-depth study of distributed transaction management, distributed concurrency control and recovery algorithms, database distribution, distributed query optimization and analysis of database system design, and intelligent network databases. Prerequisites: COMP-SCI 5570 or consent of instructor.

3 hrs

[back to top](#)

COMP-SCI 5690 Advanced Special Topics

A lecture course presenting advanced research level topics. Prerequisite: Ph.D candidacy or consent of instructor. On demand. This course is intended to allow faculty and visiting scholars to offer special courses in selected research areas.

1-3 hrs

[back to top](#)

COMP-SCI 5694 Advanced Queueing Theory

Non-Markovian systems such as M/G/1, G/M/1 and G/G/1, solutions of networks of non-Markovian nodes, queueing network approximate solution techniques. Prerequisite: COMP-SCI 5594.

3 hrs

[back to top](#)

COMP-SCI 5697 Directed Readings

Readings in an area selected by the doctoral student in consultation with a doctoral faculty member. Arrangements must be made prior to registration.

1-3 hrs

[back to top](#)

COMP-SCI 5698 Advanced Research Seminar

Advanced research by a group of doctoral students based on intensive readings from the current research literature under the direction of one or more doctoral faculty. Original research results of each student are exchanged by presentations and group discussion. Arrangements must be made prior to registration.

1-3 hrs

[back to top](#)

COMP-SCI 5699 A Research And Dissertation Research In Computer Science

Doctoral research in computer science.

1-12 hrs

[back to top](#)

COMP-SCI 575 Advanced Computer Graphics

Review of transformations, 3D viewing, curve fitting in 3D, generation of surfaces, hidden surface elimination, scan-line coherence, rigid solid representation, shading, color theory. Prerequisite: CS 475.

3 hrs

[back to top](#)

COMP-SCI 581 Parallel Computer Architecture I

Parallelism in computer architecture, pipelined processors, array processors and multi-processor systems, algorithms for SISD, SIMD, MISD and MIMD organizations, vectorization, pipelining algorithms. Prerequisite: CS 481.

3 hrs

[back to top](#)

[back to top](#)

COMP-SCI 591 Concurrency Models

Concurrency control constructs, P/V primitives, cobegin/coend, monitors, message transmission, rendezvous systems, underlying mathematics of concurrent systems, Petri Nets, liveness (deadlock), reachability, boundedness, invariants, system modeling. Prerequisite: CS 431 and 493.

3 hrs

[back to top](#)

COMP-SCI 622 Advanced Network Analysis

Design and analysis of data networks, comparative analysis of capacity and flow strategies, time-delay/cost trade offs, concentration and buffering in store and forward networks, random access techniques, pure, slotted and reservation type Aloha schemes, carrier sense multiple access. Prerequisite: CS 522.

3 hrs

[back to top](#)

COMP-SCI 623 Network Simulation And Modeling

Simulation and modeling of network topologies and protocols, evaluation of the physical layer, data-link layer, network layer routing algorithms, local and long-haul networks. Prerequisite: CS 522 and 532.

3 hrs

[back to top](#)

COMP-SCI 651 Distributed Computing For Software Systems

Formal descriptions of problems encountered in distributed computing for architecture. Parameters to formal requirements, operating system support, communications support, process synchronization, and system verification, distinctions between real time and concurrent time. The nature of life cycles, project organization and use of automated tools. Prerequisites: CS551, CS531 OR CS570.

3 hrs

[back to top](#)

1-4 hrs

[back to top](#)

E&C-ENGR 5501 NN Special Topics In Electrical Engineering

1-4 hrs

[back to top](#)

E&C-ENGR 5512 Microwave Remote Sensing

Basic principles of remote sensing including scattering, absorption, transmission, and reflection of microwave energy. Basic radiative transfer theory. Microwave remote sensing systems including altimeters, scatterometers, radiometers, & synthetic-aperture systems. Principle applications of remote sensing systems including imaging, atmospheric sounding, oceanographic monitoring, ice-sheet dynamics, etc. Prerequisite: E&C-ENGR 414.

3 hrs

[back to top](#)

E&C-ENGR 5516 Computer Networks

Concepts and goals of computer networking, structure of computer networks, OSI model and layers, network control, analysis, design and management, data communication techniques including fiber optics, WAN, MAN and LAN architecture and protocols, internetworking, case studies and hand-on studying the performance by analytic modeling and computer simulation. Prerequisite: E&C-ENGR 424 or instructor's consent.

3 hrs

[back to top](#)

E&C-ENGR 5528 Digital Hardware Systems Design

Characteristics and parameters of various hardware subsystem including main memory, auxiliary memory, arithmetic units, card equipment, etc., and principles of organization into efficient system. Prerequisite: E&C-ENGR 428.

3 hrs

[back to top](#)

E&C-ENGR 5530 Digital Electronics

Electronic hardware aspects of digital systems. Includes state-of-the-art information on integrated-circuit logic devices and their applications. Prerequisite: E&C-ENGR 435 or instructor's consent.

3 hrs

[back to top](#)

E&C-ENGR 5532 Biomedical Instrumentation

Biomedical objectives, physical and engineering principles; optimal equipment design and actual performance of biomedical instrumentation; considers practical instrumentation problem solutions and unsolved problems. Prerequisite: E&C-ENGR 330 and instructor's consent.

3 hrs

[back to top](#)

E&C-ENGR 5535 Hdl-Based Digital Systems Design

This course covers hardware design techniques using a Hardware Description Language (HDL). It also discusses several digital system design methodologies, including structural specifications of hardware, HDL-based simulations and testbenches. Courses focus on the synthesis methodologies for use-defined primitives (UPD), data types, operators, Verilog constructs multiplexed datapaths, buses, bus drivers, FSMs, assignments, case, functions, tasks, named events and rapid prototyping techniques with Verilog HDL, ASICs and FPGAs. Prerequisites: E&C-ENGR 226 (Logic Design) or consent of instructor.

3 hrs

[back to top](#)

E&C-ENGR 5536 Power Electronics II

Circuit concepts and analysis techniques for transistor switching regulators, thyristor choppers, transistor inverters, self-commutated thyristor inverters and cycloconverters. Prerequisite: E&C-ENGR 436.

3 hrs

[back to top](#)

E&C-ENGR 5568 Economics Of Power Systems

Transmission loss formula coefficients, incremental costs and losses, economic scheduling of generation, and applications. Prerequisite: E&C-ENGR 466 and E&C-ENGR 467.

3 hrs

[back to top](#)

E&C-ENGR 5572 Antennas & Propagation For Wireless Systems

This course introduces the mathematical aspects of the basic antenna parameters such as vector potential, gain, directivity, impedance, radiation patterns, and develops a comprehensive theory of antenna arrays including the effects of mutual coupling. In-depth modeling studies for wire, aperture and microstrip antennas, is presented; diffraction of plane electromagnetic (TE and TM) waves by perfectly conducting half-planes and wedges- applications to site-specific propagation path modeling in wireless systems. Prerequisites: E&C-ENGR 412 and E&C-ENGR 341 (or their equivalents) and written communication skills; must have a knowledge of MATLAB, C or C++ for computational work. Recommended: Prior or concurrent enrollment in PHYSICS 5500.

3 hrs

[back to top](#)

E&C-ENGR 5579 Digital Signal Processing In Telecommunications

Applications of digital signal processing in telecommunications systems; oversampling and quantization, Delta-Sigma modulation, linear predictive speech coding, adaptive filtering, echo canceller, adaptive receivers and equalizers for wireless communication, digital cellular, CDMA. Prerequisites: E&C-ENGR 474 and E&C-ENGR 480.

3 hrs

[back to top](#)

E&C-ENGR 5580 Advanced Digital Signal Processing

Topics in digital signal analysis and filtering, including hardware implementation, speech synthesis and recognition, multi-dimensional transforms, random-signal concepts, design methods and computer aids to analysis and design. Prerequisite: E&C-ENGR 480.

3 hrs

[back to top](#)

E&C-ENGR 5586 Pattern Recognition

Decision functions, distance measures, minimum distance classifiers, hard clustering methods, fuzzy clustering methods, statistical pattern recognition methods, Bayesian classifiers, error probabilities, estimation of density functions, perceptrons, least-mean-square algorithms, feature selection, dimensionality reduction and syntactic pattern recognition. Prerequisites: COMP-SCI 394R or MATH 436, course in high-level programming language, some matrix theory and linear algebra or instructor's consent.

3 hrs

[back to top](#)

E&C-ENGR 5588 Communication Theory I

Generalized communication systems, signal processing, signals as random processes, optimum receivers. Prerequisite: A statistics course, E&C-ENGR 478, and COMP-SCI 394R

2-5 hrs[back to top](#)

E&C-ENGR 5606 Electromagnetic Scattering And Antenna Theory

Dyadic analysis; integral equations and Green's functions; field theorems-uniqueness, induction equivalence, reciprocity; image and Babinet's Principles; applications to antennas; method of stationary phase and applications to aperture antennas; array antennas and mutual coupling analysis; method of moments; asymptotic techniques and applications to EM scattering from wedges, cylinders, and spheres; RF propagation path loss modeling and conformal antennas. Prerequisite: E&C-ENGR 412 is required and PHYSICS 500 is recommended.

3 hrs

[back to top](#)

E&C-ENGR 5616 Parallel And Distributed Processing

Covers the fundamental issues involved in designing and writing programs for simultaneous execution. Semaphores and monitor constructs are covered to provide a basis for critical section programming. Expansion of these concepts provide a basis for the analysis and design of control systems for multiprocessor devices and computer networks. Prerequisites: A suitable systems programming course or instructor's consent.

3 hrs

[back to top](#)

E&C-ENGR 5617 Neural Network Based Computing System

The course will consider computing systems based on neural networks and learning models, along with implementations and applications of such systems. Prerequisite: Instructor's consent.

3 hrs

[back to top](#)

E&C-ENGR 5618 Artificial Intelligence

Concepts, theories, and models pertaining to neural nets, pattern recognition, learning systems, and programmed problem solving. Prerequisite: Instructor's consent.

3 hrs

[back to top](#)

E&C-ENGR 5619 Theory Of Automata

Sequential machines: Turing machines; deterministic and stochastic automata; applications of automata. Prerequisite: instructor's consent.

3 hrs

[back to top](#)

E&C-ENGR 5624 Digital Software Systems Design

Characteristics and parameters of various software subsystem including assemblers, compilers, utility programs, special programming packages, interpreters, and operating systems; and principles of organization into efficient systems. Prerequisite: E&C-ENGR 524.

3 hrs

[back to top](#)

E&C-ENGR 5635 Vlsi Systems Design

Course discuss design of the MOSFETs (nFETs and pFETs), and high speed CMOS cascades in VLSI. It also covers the design of various arithmetic circuits, different fast adders, memories, and chip-level physical designs requirements in the VLSI subsystems are also the focus of this course. It uses Verilog HDL/VHDL as a tool to design VLSI systems. Prerequisites: E&C-ENGR 535 or knowledge of VHDL or instructor's consents

3 hrs

[back to top](#)

E&C-ENGR 5642 Advanced Integrated Circuits

Fundamentals of advanced integrated circuit design; diffusion, ion implantation and epitaxy; MOS and bipolar techniques; survey of current LSI design, fabrication and testing.

3 hrs

[back to top](#)

E&C-ENGR 5644 Liapunov And Related Nonlinear Methods In Automatic Control

A study of nonlinear methods in automatic control including phase plane analysis, describing function techniques, basic definitions and theorems of Liapunov, methods of generating Liapunov functions, applications of Liapunov's methods, and Popov's methods. Prerequisite: E&C-ENGR 544.

3 hrs

[back to top](#)

E&C-ENGR 5645 Optimal Control Theory

Analysis and design of dynamic systems using optimal control theory parameter optimization, dynamic optimization, computational methods, differential games. Prerequisite: E&C-ENGR 544.

3 hrs

[back to top](#)

E&C-ENGR 5646 Stochastic Optimal Estimation And Control

Surveys random process theory; stochastic control and optimization; estimation and filtering based on Kalman-Bucy techniques; stochastic stability; adaptive and learning control systems. Prerequisite: E&C-ENGR 544.

3 hrs

[back to top](#)

E&C-ENGR 5660 Power-Systems Stability

Performance of synchronous machines under transient conditions, power system stability, system fault computations using symmetrical components; computer solutions of power system problems.

3 hrs

[back to top](#)

E&C-ENGR 5661 Solid State Energy Conversion

Solid state direct energy conversion; and design of thermoelectric generators and heat pumps.

3 hrs

[back to top](#)

E&C-ENGR 5662 Power Electronic Drives

Advanced study of dc and ac motor drives controlled by power electronic methods, including phase controlled rectifier de chopper, cycloconverter, variable frequency inverters. Prerequisite: ECE 536 or consent of instructor. Recommended: E&C-ENGR 544 and E&C-ENGR 562.

3 hrs

[back to top](#)

E&C-ENGR 5664 Lightning And Switching Surges In Power Systems

Overvoltage, switching surge and lightning effects of a power system. Use of grounding and lightning arresters. Effects of surges off and on machines. Prerequisites: ECE 466 and ECE 467, or equivalent.

3 hrs

[back to top](#)

E&C-ENGR 5668 Advanced Computer Methods In Power System Analysis

Power system matrices. Sparse matrix methods. Advanced load flow analysis techniques and concepts. Contingency analysis. State estimation. Prerequisites: E&C-ENGR 466K and strong background in FORTRAN or C.

3 hrs

[back to top](#)

E&C-ENGR 5670 Direct Current Power Systems

Characteristic and performance analysis of DC transmission lines and associated conversion systems.

3 hrs

[back to top](#)

E&C-ENGR 5672 Power Systems Relaying

Theory of relaying systems for power system protection, improvement of power system stability. Relay coordination; performance of relays during transient swings and out-of-step conditions. Prerequisite: E&C-ENGR 466.

3 hrs

[back to top](#)

E&C-ENGR 5674 Machine Intelligence

Formal languages in relation to natural language processing; formal languages, graphs, and image processing; formal logic and automated theorem proving; natural language processing; aspects of problem solving and heuristic programming.

3 hrs

[back to top](#)

E&C-ENGR 5675 Introduction To The Modeling And Management Of Uncertainty

Theoretical and practical issues in the modeling and management of uncertainty. Topics include probabilistic uncertainty, belief theory and fuzzy set theory. Applications to computer vision, pattern recognition and expert systems.

3 hrs

[back to top](#)

E&C-ENGR 5676 Advanced Electric Circuit Analysis

Specialized study of mathematical analysis as applied to solutions of circuit networks with fixed and variable parameters.

3 hrs

[back to top](#)

E&C-ENGR 5677 Network Synthesis

Surveys linear active and nonreciprocal circuit elements, realizability conditions, methods for synthesizing active networks, and practical applications. Prerequisite: E&C-ENGR 676.

3 hrs

[back to top](#)

E&C-ENGR 5680 Digital And Sample-Data Systems

Introduces sampling and quantization, design of digital and sample-data systems, digital filters, adaptive sampling and quantization. Prerequisite: E&C-ENGR 480.

3 hrs

[back to top](#)

E&C-ENGR 5681 Applications Of Transforms

Applications of Laplace and other transform methods of solution of circuit and field problems.

3 hrs

[back to top](#)

E&C-ENGR 5682 Coding Theory II

Further study of error-correcting codes; ring and cyclic codes, linear switching circuits, burst error codes, codes for arithmetic units, etc. Prerequisite: E&C-ENGR 579.

3 hrs

[back to top](#)

E&C-ENGR 5684 Computer Vision

Image processing methods for segmentation, object representation, scene description and scene interpretation. Prerequisite: E&C-ENGR 484 or consent of instructor.

3 hrs

[back to top](#)

E&C-ENGR 5688 Communication Theory II

Probability theory of analog and digital communication in the presence of random process noise. Encoding systems, detection systems, optimum receivers. Prerequisite: E&C-ENGR 472.

3 hrs

[back to top](#)

E&C-ENGR 5690 Advanced Topics In Electrical And Computer Engineering

1-4 hrs

[back to top](#)

E&C-ENGR 5690 EM Advanced Topics In Electrical And Computer Engineering

1-4 hrs

[back to top](#)

E&C-ENGR 5690 ET Advanced Topics In Electrical And Computer Engineering

1-4 hrs

[back to top](#)

E&C-ENGR 5697 Advanced Directed Readings

Advanced readings in an electrical and computer engineering area selected by the graduate student in consultation with a faculty member. Arrangements must be made prior to registration. Prerequisite: Permission of instructor Offered: Every semester

1-5 hrs

[back to top](#)

E&C-ENGR 5698 Advanced Research Seminar

Advanced Graduate research and/or readings in an electrical and computer engineering area selected by the doctoral student in consultation with a faculty member. Arrangements must be made prior to registration. Prerequisite: Permission of instructor Offered: Every semester

1-5 hrs

[back to top](#)

E&C-ENGR 5699 Dissertation Research

Doctoral Dissertation

1-9 hrs

[back to top](#)

Mechanical Engineering

MEC-ENGR 5500 Problems

Supervised investigation in mechanical engineering to be presented in the form of a report.

1-6 hrs

[back to top](#)

MEC-ENGR 5501 Advanced Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5501 AC Advanced Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5501 Advanced Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5501 H Advanced Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5501 HP Advanced Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5501 J Advanced Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5501 L Advanced Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5501 M Advanced Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5501 N Advanced Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5501 P Advanced Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5501 PL Advanced Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5501 R Advanced Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5501 T Advanced Topics In Mechanical Engineering

1-3 hrs

[back to top](#)

MEC-ENGR 5501 Z Advanced Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5504 Advanced Metallurgy Principles

Advanced treatment of physical metallurgy principles to provide a theoretical understanding of engineering materials. Prerequisite: MEC-ENGR 324.

3 hrs

[back to top](#)

MEC-ENGR 5505 Imaging Techniques In Materials Science

Introduction to imaging techniques, including x-rays, neutron beams, electron beams and acoustic energy, to study material properties and structure. Prerequisite: MEC-ENGR 324

3 hrs

[back to top](#)

MEC-ENGR 5533 Statistical Thermodynamics

Statistical methods of evaluating thermodynamic properties. Elements of quantum mechanics, statistical mechanics and kinetic theory applied to topics of engineering thermodynamics. Prerequisites: MEC-ENGR 360 and MEC-ENGR 399

3 hrs

[back to top](#)

MEC-ENGR 5534 Fracture Mechanics I

Mechanics of flawed structure. Concepts include Griffith theory, Barenblatt's theory, Irwin analysis, energy analysis of cracked bodies, fracture toughness testing, plane strain, plane stress, transition temperature concepts, subcritical flaw growth. Prerequisite: MEC-ENGR 324.

3 hrs

[back to top](#)

MEC-ENGR 5535 Heat Transfer-Conduction

Techniques for determining temperature distribution and temperature history within solids. Prerequisite: MEC-ENGR 399.

3 hrs

[back to top](#)

MEC-ENGR 5542 Introduction To Computational Fluid Dynamics And Heat Transfer

Introduction to the principles and development of the finite-difference approximations to the governing differential equations of viscous and inviscid fluid flow, as well as heat transfer. Introduction to discretization methods and the calculation of flow fields, convection, diffusion and conduction. Prerequisites: MEC-ENGR 399 and MEC-ENGR 441

3 hrs

[back to top](#)

MEC-ENGR 5545 Instrumentation Theory

Applied theory of dynamical and energizing systems for analyzing, computing, control devices. Prerequisite: MEC-ENGR 362

3 hrs

[back to top](#)

MEC-ENGR 5558 Dynamical Theory

Engineering principles and application in mathematical expression of energy, force, inertia system. Prerequisite: MEC-ENGR 485 and MATH 345.

3 hrs

[back to top](#)

MEC-ENGR 5595 Microscale Heat Transfer

Review of existing models. Concept of thermal lagging and the second-law admissibility. Applications to low temperatures, thermal processing of thin-film devices; amorphous materials; advanced composites. Prerequisites: MEC-ENGR 399.

3 hrs

[back to top](#)

MEC-ENGR 5599 Research

Independent investigation in field of mechanical engineering to be presented as a thesis.

1-99 hrs

[back to top](#)

MEC-ENGR 5601 Doctoral Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5601 A Doctoral Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5601 AC Doctoral Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5601 C Doctoral Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5601 Doctoral Topics in Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5601 F Doctoral Topics in Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5601 G Doctoral Topics In Mechanical Engineering

3 hrs

[back to top](#)

MEC-ENGR 5601 H Doctoral Topics In Mechanical Engineering**3 hrs**[back to top](#)**MEC-ENGR 5601 J Doctoral Topics in Mechanical Engineering****3 hrs**[back to top](#)**MEC-ENGR 5601 R Doctoral Topics In Mechanical Engineering****3 hrs**[back to top](#)**MEC-ENGR 5601 S Doctoral Topics In Mechanical Engineering****3 hrs**[back to top](#)**MEC-ENGR 5601 SA Doctoral Topics In Mechanical Engineering****3 hrs**[back to top](#)**MEC-ENGR 5603 Directed Readings In Mechanical Engineering**

Faculty supervised readings course. Prerequisite: Graduate Standing

1-3 hrs[back to top](#)**MEC-ENGR 5610 Seminar**

Review recent investigations, projects of major importance in mechanical engineering.

1 hr[back to top](#)**MEC-ENGR 5616 Theory Of Plasticity**

Plastic yield conditions and stress-strain relations. Behavior of elastic-perfectly plastic members. Plain strain in plastic members. Prerequisite: MEC-ENGR 621; and MEC-ENGR 622 or instructor's consent

3 hrs[back to top](#)**MEC-ENGR 5618 Advanced Dynamics**

Fundamental principles of advanced rigid body dynamics with applications. Special mathematical techniques including Lagrangian and Hamiltonian methods.

3 hrs[back to top](#)**MEC-ENGR 5621 Continuum Mechanics**

Introductory course in the mechanics of continuous media. Basic concepts of stress, strain, constitutive relationships; conservation laws are treated using Cartesian tensor notation. Examples from both solid and fluid mechanics investigated. Prerequisite: MEC-ENGR 351, MATH 345 and CIV-ENGR 276. Same as CIV-ENGR 621

3 hrs[back to top](#)

MEC-ENGR 5622 Theory Of Elasticity

Stress and strain at a point. General equations of elasticity. Plane stress, plain strain problems; torsion of prismatic bars. Energy methods. Same as CIV-ENGR 622. Prerequisite: MEC-ENGR 621

3 hrs

[back to top](#)

MEC-ENGR 5623 Theory Of Plates And Shells

Bending of plates with various loading and boundary conditions. Deformations, stresses in thin shells. Same as CIV-ENGR 623. Prerequisite: MEC-ENGR 621

3 hrs

[back to top](#)

MEC-ENGR 5624 Theory Of Elastic Stability

Buckling of columns, beams, rings, curved bars, thin plates, shells. Same as CIV-ENGR 624. Prerequisite: MEC-ENGR 621

3 hrs

[back to top](#)

MEC-ENGR 5627 Dynamics Of Machinery

Dynamic balancing of rotating and reciprocating components of turbo-machinery and internal combustion engines. Gas torque analysis, vibration stress analysis and equivalent systems. Numerical and graphical techniques. Prerequisite: MEC-ENGR 484.

3 hrs

[back to top](#)

MEC-ENGR 5630 Boundary Layer Theory

Fluid motion at high Reynolds Number. Derivation of Navier-Stokes equations and boundary layer equations. Methods of solution. Transition to turbulent flow. Completely developed turbulent flow. Prerequisite: MEC-ENGR 441.

3 hrs

[back to top](#)

MEC-ENGR 5636 Heat Transfer-Convection

Principles of heat transfer by convection, review of boundary layer theory, laminar and turbulent heat transfer, temperature-dependent fluid properties, high velocity heat transfer and an introduction to mass transfer. Prerequisites: MEC-ENGR 399 and MEC-ENGR 630.

3 hrs

[back to top](#)

MEC-ENGR 5637 Heat Transfer-Radiation

Advanced study of engineering radiation heat transfer. Concepts of electromagnetic theory. Development of thermal radiation laws from thermodynamic laws. Analysis of grey and non-grey systems with intervening gases. Study of recent literature. Prerequisites: MEC-ENGR 399.

3 hrs

[back to top](#)

MEC-ENGR 5638 Introduction To Turbulence

Introduction to the physical phenomena of turbulence, supported by mathematical and statistical descriptions. Especially appropriate for engineers involved in research aspects of momentum, heat, and mass transport. Prerequisite: MEC-ENGR 441

3 hrs

[back to top](#)

MEC-ENGR 5639 Introduction To Two Phase Flow

An introduction to the analysis of the mechanics and transport processes in two phase flows. Prerequisite: MEC-ENGR 441.

3 hrs

[back to top](#)

MEC-ENGR 5644 Fracture And Fatigue Prevention In Engineering Practice

Practical design problems. Introduction to retrofit design, maintenance, product improvement and new design from a fatigue and fracture prevention philosophy. Fail safe and safe life designs are presented. Prerequisite: MEC-ENGR 534.

3 hrs

[back to top](#)

MEC-ENGR 5651 Computational Fluid Dynamics

Principles and development of the finite-difference approximations to the governing differential equations of viscous and inviscid fluid flow. Application to selected model equations. Introduction to boundary layer and Navier-Stokes codes, and to grid generation. Prerequisite: MEC-ENGR 542.

3 hrs

[back to top](#)

MEC-ENGR 5660 Combustion

Study of advanced topics in flames and combustion. Detonation and deflagrations, supersonic combustion, air pollution. Prerequisite: MEC-ENGR 441.

3 hrs

[back to top](#)

MEC-ENGR 5676 Finite Element Methods

The concepts and fundamentals of the finite element method with applications to problems in solid and fluid mechanics. Prerequisite: MEC-ENGR 486 or CIV-ENGR 421. Same as CIV-ENGR 676

3 hrs

[back to top](#)

MEC-ENGR 5679 Dynamics Of Structures

Study of the dynamic behavior of structures. Analysis of equivalent lumped parameter systems for the design of structures in a dynamic environment. Prerequisites: MEC-ENGR 484 and CIV-ENGR 276; or CIV-ENGR 421, MATH 345, and MEC-ENGR 285

3 hrs

[back to top](#)

MEC-ENGR 5685 Advanced Vibration Analysis

Advanced topics in vibration theory and its application to Mechanical systems. Topics include vibration analysis of multi-degree of freedom, distributed and nonlinear systems, random vibration analysis, and vibration control. Prerequisite: MEC-ENGR 484 or instructor's consent.

3 hrs

[back to top](#)

MEC-ENGR 5699 Research And Dissertation

Doctoral dissertation research.

1-9 hrs

Conservatory of Music & Dance

Conservatory of Music & Dance Courses Bassoon

BASSOON 5500 A Graduate Bassoon-Secondary

2 hrs

[back to top](#)

BASSOON 5500 B Special Applied Studies

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit. Consent of the instructor required.

2 hrs

[back to top](#)

BASSOON 5500 C Applied Study Of A Second Instrument

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required. Consent of the instructor.

1 hr

[back to top](#)

BASSOON 5501 Graduate Bassoon - Masters Performance

Conservatory of Music

CONSVTY 5517 Advanced Opera Workshop

2 hrs

[back to top](#)

CONSVTY 5523 Analytical Procedures

An introduction to recent methods of stylistic and formal analysis including twelve-tone, Schenkerian and set theoretic approaches.

3 hrs

[back to top](#)

CONSVTY 5524 B Advanced Analysis II - Common Practice Period

Theory and analysis of selected works from the 17th through the mid-19th century. Prerequisite: CONSVTY 5523 or consent of the instructor.

3 hrs

[back to top](#)

CONSVTY 5524 C Advanced Analysis III - Contemporary Period

Theory and analysis of selected works from the late 19th century to the present. Prerequisite: CONSVTY 5523 or consent of the instructor.

3 hrs

[back to top](#)

CONSVTY 5526 A Introduction To Schenkerian Theory And Analysis

An introduction to the theories and analytic methodology of Heinrich Schenker (1868-1935). Prerequisite: Passing theory matriculation score or completion of CONSVTY 421.

3 hrs

[back to top](#)

CONSVTY 5526 B Schenkerian Analysis

Continuation of 5526A emphasizing the acquisition of advanced skills in Schenkerian analysis. Prerequisite: CONSVTY 5526A and consent of the instructor.

3 hrs

[back to top](#)

CONSVTY 5527 Advanced Counterpoint

Analysis and writing in 18th century style and forms including canon, invention and fugue.

3 hrs

[back to top](#)

CONSVTY 5528 Contemporary Harmonic/Contrapuntal Styles

Analysis and writing in contemporary styles. Prerequisite: CONSVTY 428 or consent of the instructor.

3 hrs

[back to top](#)

CONSVTY 5529 Aspects Of Time And Music

A course offering a broad-based, multi-disciplinary exploration of the natures of time preparatory to an in-depth study of some of music's primary temporal aspects; these focus on complex treatments of rhythm and meter in tonal music.

Prerequisite: CONSVTY 5523, CONSVTY 5591G, or permission of instructor. Offered: Winter 2002

3 hrs

[back to top](#)

CONSVTY 5531 Advanced Orchestration

A study of the scoring techniques of such composers as Debussy, Ravel, Schoenberg, Bartok, and Stravinsky, and the application of these techniques by the student in scoring works for small and large ensembles. In the case of the composition major, detailed work in orchestrating original compositions will be required. Prerequisite: CONSVTY 431 or consent of the instructor. May be repeated for credit.

3 hrs

[back to top](#)

CONSVTY 5533 Advanced Composition

Intensive work in advanced composition in the large forms for various vocal and instrumental ensembles and orchestra. May be repeated for credit. Prerequisite: Consent of the instructor.

3 hrs

[back to top](#)

CONSVTY 5534 Advanced Electronic Music Composition

Creative, original composition of music in diverse styles utilizing the full range of equipment and techniques available. May be repeated for credit. Prerequisite: Consent of the instructor.

3 hrs

[back to top](#)

CONSVTY 5534 B Advanced Computer Music Language Study

This course is designed to fulfill the computer language option of the foreign language requirement for DMA students in composition. Focus will be on development and mastery of skills in computer languages specifically related to musical composition, such as MAX or Csound, or in compositional uses of more general languages such as html, C, and Lingo. Prerequisite: CONSVTY 335 or consent of instructor.

3 hrs

[back to top](#)

CONSVTY 5534 C Electroacoustic Music Aesthetics And Analysis

An overview of the context and practice of electroacoustic music in two parts: 1) new aesthetic parameters of sonic composition made possible by technology; and 2) creating a cogent analysis of a work by developing individual, personalized analytical tools. Offered in rotation with CONSVTY 5534 (Advanced Electronic Composition) and CONSVTY 5534b (Computer Programming for Musicians). Prerequisite: None Offered: Every 3rd semester

3 hrs

[back to top](#)

CONSVTY 5540 A Seminar In Adv Music Education Methods For Elementary Teachers

A seminar in the design of music materials for K-6 students, preparation of elementary music teachers, and a review of elementary music literature and materials.

2 hrs

[back to top](#)

CONSVTY 5540 B Advanced Methods In Instrumental Music

Organizational and rehearsal techniques for programs from the beginning bands and orchestras through high school and college ensembles. Includes information regarding methods, materials and program building.

2 hrs

[back to top](#)

CONSVTY 5540 C Advanced Methods In Choral Music

Addresses the organization of secondary and college choral classes and ensembles. Areas of study include methods, materials and program building.

2 hrs

[back to top](#)

CONSVTY 5543 Psychology Of Music

The study of psychological aspects of music including acoustical phenomena and factors affecting musical preference, perception and taste. A review of related literature and basic methodology for experimental investigation and quantification of related variables will be included. Prerequisite: None

3 hrs

[back to top](#)

CONSVTY 5544 Advanced Clinical Experience

Music Therapy practicum in a clinical area. Includes review of literature of that clinical area and presentation of materials and techniques used with clients.

2 hrs

[back to top](#)

CONSVTY 5545 Seminar In Music Therapy

Discussion of current trends in music therapy.

2 hrs

[back to top](#)

CONSVTY 5547 History Of Opera I

A survey of opera from its origins to 1800. Prerequisite: Consent of the instructor.

3 hrs

[back to top](#)

CONSVTY 5551 History Of The Oratorio

A study of the oratorio from its beginning through contemporary works.

3 hrs

[back to top](#)

CONSVTY 5554 Music Of The Medieval Era

Seminar in the music of the Middle Ages, from 800 to 1400. Prerequisite: CONSVTY 5593

3 hrs

[back to top](#)

CONSVTY 5555 Music Of The Renaissance

Seminar in the music of the Renaissance, from 1400 to 1600.

3 hrs

[back to top](#)

CONSVTY 5556 Music Of The Baroque Era

Seminar in the music of the Baroque era, from 1600 to 1750. Prerequisite: CONSVTY 5593

3 hrs

[back to top](#)

CONSVTY 5557 Music Of The Classical Era

Seminar in the music of the Classical era, from 1750 to 1828. Prerequisite: CONSVTY 5593.

3 hrs

[back to top](#)

CONSVTY 5558 Music Of The Romantic Era

Seminar in the music of the Romantic era from 1828 to 1914. Prerequisite: CONSVTY 5593.

3 hrs

[back to top](#)

CONSVTY 5559 A Music Since 1900: 1900-1945

Seminar in music from 1900 to 1945. Prerequisite: CONSVTY 5593

3 hrs

[back to top](#)

CONSVTY 5559 B Music Since 1900: 1945 To The Present

Seminar in music since 1945. Prerequisite: CONSVTY 5593

3 hrs

[back to top](#)

CONSVTY 5560 A Seminar: History Of Russian Vocal Music**3 hrs**[back to top](#)**CONSVTY 5560 B Seminar: Nineteenth-Century Nationalism In Music****3 hrs**[back to top](#)**CONSVTY 5560 C Seminar: History Of American Music****3 hrs**[back to top](#)**CONSVTY 5561 Advanced Music Literature**

Survey of the literature of the appropriate instrument. May be repeated for credit. Prerequisite: Consent of the instructor.

1-3 hrs[back to top](#)**CONSVTY 5566 A Advanced Vocal Literature: French Melodies**

In-depth study of the French melodies of Duparc, Faure, Debussy, Ravel, and Poulenc.

2 hrs[back to top](#)**CONSVTY 5566 B Advanced Vocal Literature: German Lieder**

In-depth study of the German lieder of Schubert, Schumann, Brahms, Wolf, Mahler, and Strauss.

2 hrs[back to top](#)**CONSVTY 5566 C Advanced Vocal Literature: Nationalistic Art Songs**

In-depth study of Nationalistic art songs of Russia, Scandinavia, Spain, and Middle Europe.

2 hrs[back to top](#)**CONSVTY 5566 D Advanced Vocal Literature: 20Th Century Amer & Engl Art Songs**

In-depth study of the 20th Century American and English art songs.

2 hrs[back to top](#)**CONSVTY 5570 Music Education In The College Environment**

A preparation for entering and functioning in the college Music Education teaching environment. Course serves as a review and examination of missions and philosophies of Music Education programs in U.S. colleges and universities and an analysis of job responsibilities for college Music Education instructors.

3 hrs[back to top](#)**CONSVTY 5574 History And Philosophy Of Music Education**

An overview of the history of music education in this country from the beginning of the seventeenth century to the present. Also includes a discussion of the major philosophical models used to justify the study of music.

3 hrs[back to top](#)

CONSVTY 5576 Professional Aspects Of College Teaching

Designed for graduate students planning a career in college teaching. Covers preparation of job application materials; presentation of a master class; interviews with a search committee and dean; faculty loads and evaluation procedures; tenure and rank, and relationships with students, colleagues and administrators.

2 hrs

[back to top](#)

CONSVTY 5577 Advanced Vocal Diction

This course is designed to review and hone diction skills in Italian, French and German on the level of professional opera, recital and oratorio performance; the vocal literature is approached through the text with both reading and singing practice. It is limited to graduate vocal majors. Prerequisites: CONSVTY 171, CONSVTY 172 or its equivalent. Offered: Every other Winter

2 hrs

[back to top](#)

CONSVTY 5582 A Advanced Choral Conducting - Technique

An introductory study of the techniques of choral conducting. An overview of conducting topics, including score preparation, rehearsal techniques and performance problems. May be repeated for credit.

2 hrs

[back to top](#)

CONSVTY 5582 B Advanced Choral Conducting - Style

A study of conducting problems of music of the Renaissance, Baroque, Classic, Romantic and Twentieth century; further examination of performance problems associated with choral performances of madrigals, chamber music, a cappella works and music utilizing advanced compositional techniques. May be repeated for credit.

2 hrs

[back to top](#)

CONSVTY 5582 C Advanced Choral Conducting-Rehearsal Techniques

An advanced study of methods and rehearsal procedures in the development and organization of choral performance; includes concepts of tone quality, diction, programming, and development of communication skills. May be repeated for credit.

2 hrs

[back to top](#)

CONSVTY 5583 A Advanced Instrumental Conducting

An introductory study of the techniques of instrumental conducting. An overview of conducting topics, including score preparation, rehearsal techniques and performance problems.

2 hrs

[back to top](#)

CONSVTY 5583 B Advanced Instrumental Conducting - Orchestra

A further study of the techniques of instrumental conducting, including such topics as string techniques, performance practice, baton technique and the art of accompaniment. Prerequisite: CONSVTY 5583A. May be repeated for credit.

2 hrs

[back to top](#)

CONSVTY 5583 C Advanced Instrumental Conducting - Band

A further study of the technique of band conducting, including such topics as wind/percussion techniques, performance practice, baton technique, and contemporary wind chamber repertoire. Prerequisite: CONSVTY 5583A. May be repeated for credit.

2 hrs

[back to top](#)

CONSVTY 5586 A Seminar In Orchestral Literature

Advanced study of a variety of styles, periods, and analytical procedures encountered by orchestral conductors. Content will vary from semester to semester. May be repeated for credit.

2 hrs

[back to top](#)

CONSVTY 5586 B Seminar In Wind/Band Literature

Advanced study of a variety of styles, periods, and analytical procedures encountered by instrumental conductors of wind ensembles/bands. Content will vary from semester to semester. May be repeated for credit.

2 hrs

[back to top](#)

CONSVTY 5587 A Seminar In Choral Literature-Middle Ages & Renaissance

Each seminar is concerned with the conductor's viewpoint of a segment of the literature from the specified historical periods and deals with analysis, interpretation, vocal problems, conducting problems, etc., of that literature. Prerequisite: Consent of the instructor.

2 hrs

[back to top](#)

CONSVTY 5587 B Seminar In Choral Literature-Baroque And Classical

Each seminar is concerned with the conductor's viewpoint of a segment of the literature from the specified historical periods and deals with analysis, interpretation, vocal problems, conducting problems, etc., of that literature. Prerequisite: Consent of the instructor.

2 hrs

[back to top](#)

CONSVTY 5587 C Seminar In Choral Literature-Twentieth Century

Each seminar is concerned with the conductor's viewpoint of a segment of the literature from the specified historical periods and deals with analysis, interpretation, vocal problems, conducting problems, etc., of that literature. PREREQUISITE: Consent of the instructor.

2 hrs

[back to top](#)

CONSVTY 5587 D Seminar In Choral Literature-Large Forms Orchestral Accomp

Each seminar is concerned with the conductor's viewpoint of a segment of the literature from the specified historical periods and deals with analysis, interpretation, vocal problems, conducting problems, etc., of that literature. Prerequisite: Consent of the instructor.

2 hrs

[back to top](#)

CONSVTY 5587 Seminar In Choral Literature - Sacred

Each seminar is concerned with the conductor's viewpoint of a segment of the literature from the specified historical periods and deals with analysis, interpretation, vocal problems, conducting problems, etc., of that literature. Prerequisite: Consent of the instructor.

2 hrs

[back to top](#)

CONSVTY 5589 Academic Portfolio

Creative synthesis of coursework or clinical experience resulting in original products such as research documents, pedagogical materials, technology applications, music compositions or arrangements, and musical improvisation applications. Portfolio item may not include materials used to meet admission requirements. May be repeated for credit.

1 hr

[back to top](#)

CONSVTY 5589 A Academic Portfolio II

Additional coursework or clinical experience resulting in original products. Open only to students concurrently enrolled in CONSVTY 5589.

1 hr

[back to top](#)

CONSVTY 5590 Special Topics

A seminar in selected topics in various fields and idioms of music. May be repeated for credit when the topic varies. Prerequisite: Consent of the instructor.

School of Dentistry

School of Dentistry Courses Dental Hygiene

DENT-HYG 5500 Introduction To Educational Methodology

Through individualized instruction, the student will have an introduction to educational concepts in preparation for student teaching, community presentations and teaching in any venue. Topics included are goals and objectives, curriculum and course design, development of course syllabi, teaching/learning strategies, use of technology in teaching, basic principles of testing, micro-teaching demonstration, and student and self-evaluation. Offered: Fall Semester on-line only.

3 hrs

[back to top](#)

DENT-HYG 5510 Student Teaching And Conference I

Student teaching experience in classroom areas as selected by the student under the direction of a supervising professor. The student develops behavioral course objectives, test and examination items, classroom presentations, and prepares student evaluations in the selected classroom teaching areas. The student may select teaching assignments in one of the developed externship student teaching programs. Conferences will be held in conjunction with the course. Offered: Every semester Prerequisite: DENT-HYG 5500 and DENT-HYG 4040

2-4 hrs

[back to top](#)

DENT-HYG 5512 Student Teaching And Conference II

This course is designed to provide the graduate dental hygiene student with additional experience in classroom teaching. Student teaching experiences will be selected by the student under the direction of and in conference with a supervising professor. Offered: Every semester

2-4 hrs

[back to top](#)

DENT-HYG 5516 Special Issues In Higher Education For Health Professional

This course is designed to introduce the student to issues encountered in higher education. Weekly classroom sessions will address subjects such as: grantsmanship, accreditation, promotion and tenure, faculty governance, outcomes assessment, use of theory to guide practice, and case-based learning. Offered: Spring Semester on-line only.

3 hrs

[back to top](#)

DENT-HYG 5520 Independent Study In Hospital Dentistry

An introduction to the role of the dental hygienist in one or more clinical settings within the hospital environment. The settings may include the operating room, surgical wards, prenatal clinics, post-partum area, medical docent teams, medical clinics, specialty clinics and other areas of special interest. Specific student experiences are to be arranged in consultation with and under the direction of the hospital dental hygiene faculty member. Offered: TBA

2-4 hrs

[back to top](#)

DENT-HYG 5530 Clinical Instruction And Conference I

Students will actively participate in clinical instruction under the supervision of a dental hygiene faculty member. Topics relative to clinical teaching will be discussed in weekly seminars. Students will be encouraged to apply knowledge gained in DHGR 5500 (Intro to Educational Methods) during clinical instructional experiences. Additionally the student must participate in at least 1/2 day of clinic per week to equal credit hour of course work. Offered: Fall Semester on-line only.

2-4 hrs

[back to top](#)

DENT-HYG 5532 Clinical Instruction And Conference II

This course is a continuation of DHGR 5530 Dental Hygiene Clinical Instruction I. Under the supervision of the dental hygiene faculty, the student will continue to develop skills as a dental hygiene clinical instructor. Offered every semester on-line only. Prerequisite: DENT-HYG 5530

2-4 hrs

[back to top](#)

DENT-HYG 5553 Seminar In Advanced Clinical Techniques And Methodologies

This course will expand on the student's basic knowledge of the dental hygiene process of care. Current scientific literature related to topics in dental hygiene and oral health will be examined to enhance background knowledge related to the dental hygiene process of care and foster an attitude of life-long learning. Offered: Winter Semester on-line only.

2-4 hrs

[back to top](#)

DENT-HYG 5560 Practicum In Clinical Supervision And Management

Practical experience in functioning as a Clinic Supervisor. Clinical managerial projects will be assigned according to students' interests and goals by agreement between student and instructor. Offered: TBA

2-4 hrs

[back to top](#)

DENT-HYG 5565 Advanced Special Patient Care Practicum I

This course is designed to familiarize the student with general principles of cancer therapy and the role of the dental team in the multidisciplinary care of patients undergoing oncology treatments. Special emphasis will be placed on the treatment of the patient with head and neck cancer, and preventive and palliative dental interventions for control of the oral complications associated with all cancer therapies. Cancer prevention issues and the psychosocial and economic impact of cancer diagnosis will also be discussed. Offered: TBA

1-4 hrs

[back to top](#)

DENT-HYG 5566 Advanced Special Patient Care Practicum II

This course will provide the graduate dental hygiene student with the opportunity to explore the relationship of an oncology dental program to medical health care facilities. Offered: TBA

1-4 hrs

[back to top](#)

DENT-HYG 5570 Administrative Practicum

Practical experience in administration. The student selects areas of responsibility based on their goals and interests in administration. Possible areas of involvement are: recruitment, admissions, curriculum and course development, course scheduling, grant and report writing and student advising. Offered: TBA

1-4 hrs

[back to top](#)

DENT-HYG 5580 Special Topics In Dental Hygiene-Expanded Duties

Theoretical and clinical experience in expanded duties for the dental hygienist in the areas of local anesthesia and restorative dentistry. Offered: TBA

3 hrs

[back to top](#)

DENT-HYG 5590 Independent Study

Independent study of a particular topic or area of interest to the student in dental hygiene/dentistry and/or higher education. Offered: TBA

1-4 hrs

[back to top](#)

DENT-HYG 5595 Writing In Science

This seminar course is designed to provide advanced education students in the health professions the skills necessary to write and communicate in science. Course activities and topics include: critical analysis of the literature, literature summary tables, structure and organization of documents, style and usage, drafting, revising and finishing. Participants will practice the craft of scientific writing not only as the writer but also as the reader providing correction and reorganization where appropriate. While this course examines many writing tasks, exercise culminate with the development of a research protocol or scientific article. Offered: Winter Semester, on-line only

1-2 hrs

[back to top](#)

DENT-HYG 5599 Research And Thesis

This course is designed to support the research process from protocol development through data collection and report of results. Research committee chairperson typically serves as the course director.

1-6 hrs

[back to top](#)

Dentistry- Biological Sciences

BIO-SCI 3210 Applied Biochemistry

This course is designed to build upon previous knowledge of chemistry, biology, and physiology as a basis for understanding principles in biochemistry. Presented through a self-paced online format, course content is selected to provide the foundation knowledge in biochemistry needed for subsequent courses in nutrition, pathology, and other health related topics.

2 hrs

[back to top](#)

BIO-SCI 5700 Biomaterials Teaching

Through this course, students will acquire teaching experience in graduate and undergraduate biomaterials.

2 hrs

[back to top](#)

BIO-SCI 5701 Engineering Principles Of Dental Materials

The application of engineering principles to a description and understanding of the structure and properties of dental materials. Identification of engineering principles which are appropriate in the examination of the function of dental materials. Basic information, as well as current materials research will be discussed.

2 hrs

[back to top](#)

BIO-SCI 5704 Temporomandibular Disorders: Evaluation And Management

Lecture and seminar course on the temporomandibular disorders, evaluation and management in light of behavioral, biological and environmental factors.

2 hrs

[back to top](#)

BIO-SCI 5706 Growth And Development I

A course designed to teach the general principles of normal and abnormal physical, psychological and social growth and development of children and adolescents. The growth and development of the craniofacial structures is emphasized. The diagnosis of malocclusions is stressed. Consideration is given to possible approaches to their treatment.

1 hr

[back to top](#)

BIO-SCI 5707 Growth And Development II

A comprehensive study of the genetical aspects of growth and development with special analysis of the molecular control of these processes by both intrinsic and epigenetic factors. Prerequisite: Growth and Development I.

1-2 hrs

[back to top](#)

BIO-SCI 5710 Molecular Genetics And Biochemistry Of Cranial Facial Biology

Biochemistry of oral structures and the effect of oral diseases on these structures. This course may not be used to satisfy Cell Biology and Biophysics or Molecular Biology and Biochemistry discipline-specific requirements for the Interdisciplinary Ph. D. programs.

2 hrs

[back to top](#)

BIO-SCI 5711 Biochemical Endocrinology

An advanced study of the chemistry, metabolism, and mechanisms of hormone actions on molecular processes. Each hormone will be studied with respect to its site of origin, chemical properties, metabolism, disease entities, and mechanism of action on molecular processes. Prerequisite: BISC 5710. This course may not be used to satisfy Cell Biology and Biophysics or Molecular Biology and Biochemistry discipline-specific requirements for the Interdisciplinary Ph.D. program. Prerequisite(s): LS-BIOC 5710.

2 hrs

[back to top](#)

BIO-SCI 5730 Oral Microbiology

The course will focus on rapidly developing areas of oral microbiology especially the etiology, prevention and treatment of oral disease. Topics will be selected by the instructor to reflect recent advances in research and to provide a critical examination of the current literature. Two hours lecture per week. This course may not be used to satisfy Cell Biology and Biophysics or Molecular Biology and Biochemistry disciplinespecific requirements for the Interdisciplinary Ph.D. program.

2 hrs

[back to top](#)

BIO-SCI 5735 Advanced Immunology

This seminar course will focus on rapidly developing areas of modern immunology relevant to the health professions. Topics will be selected by the instructor to reflect recent advances in immunology and provide a critical examination of the current literature. Two hours lecture per week. This course may not be used to satisfy Cell Biology and Biophysics or Molecular Biology and Biochemistry discipline-specific requirements for the Interdisciplinary Ph.D. program.

2 hrs

[back to top](#)

BIO-SCI 5739 Dental Biomaterials For The Dental Specialist

Discussion of basic biomaterials principles and terminology including explanation of physical, mechanical and surface chemical properties, metallurgy, polymer chemistry, ceramics and composites. Clinical examples of how these principles apply to Prosthodontics, Endodontics and Orthodontics will be presented. Students cannot take both this course and BIO-SCI 5742 for credit.

1 hr

[back to top](#)

BIO-SCI 5740 Oral Pathology I

A study of the clinical and histopathologic features of oral diseases, including inflammatory, degenerative, metabolic, and neoplastic diseases and developmental disturbances.

2 hrs

[back to top](#)

BIO-SCI 5741 Oral Pathology II

A continuation of BIO-SCI 5740.

2 hrs

[back to top](#)

BIO-SCI 5742 Dental Biomaterials For The Restorative And General Dentist

A thorough discussion of basic biomaterials principles and how they apply to the practice of general and restorative dentistry. Students cannot take both this course and BIO-SCI 5739 for credit.

2 hrs

[back to top](#)

BIO-SCI 5743 Advanced Seminar In Dental Biomaterials

The use and behavior of dental biomaterials in Pediatric Dentistry, Prosthodontics, Orthodontics, and Restorative Dentistry will be discussed in depth. Current basic and clinical literature related to these areas will be discussed and research information to improve dental practice will be presented. Prerequisite: BIO-SCI 5739 or BIO-SCI 5742 and permission of instructor.

1-2 hrs

[back to top](#)

BIO-SCI 5747 Research Instrumentation Used In Dental Biomaterials

A discussion and laboratory use of instrumentation employed in dental biomaterials research. Practical hands-on experience will include calibration and use of specific research equipment including the Instron, metallurgical mounting and polishing equipment, measuring microscope, metallograph, and contact angle gonemeter. Prerequisite: Permission of instructor.

2-4 hrs

[back to top](#)

BIO-SCI 5749 Special Problems In Oral Pathology

The student will review surgical cases and literature pertinent to those cases under the guidance of faculty members of the department.

1-2 hrs

[back to top](#)

BIO-SCI 5750 Special Problems In Dental Biomaterials

The student will select or be assigned a special research problem including appropriate literature reviews of a special topic in dental biomaterials. Emphasis will be placed on the correlation between basic and clinical research. The design and conduct of clinical research will be discussed. Prerequisite: Permission of instructor.

2-4 hrs

[back to top](#)

BIO-SCI 5751 Elements Of The Scientific Method

Elements Of The Scientific Method-001 (MS Students) - Through individualized instruction with thesis committee chair, student will conduct a literature review in preparation for developing a research question leading to the thesis research proposal. Elements Of The Scientific Method-002 (Ph.D. Students) - Students will select and rotate through a minimum of four laboratories in the Department of Oral Biology conducting a short research project in each. At the end of the semester, a report is required reviewing the research project and the instrumentation in each laboratory. Students are also required to attend the weekly Department of Oral Biology Seminar Series and the monthly Professional Development Seminar Series. Research presentations cover a variety of biological, engineering and psychological disciplines relevant to oral science education and the oral health care profession. Presentations will be by faculty, students, and invited guest lecturers.

1 hr

[back to top](#)

BIO-SCI 5752 Research Methods In Oral Biology

BIO-SCI 5752-001 Research Methods In Oral Biology- MS students- Student will write the thesis research proposal in consultation with committee chair and members plus obtain appropriate IRB and/or IACUC approvals. For the MS degree qualifying exam, the student will write the research proposal, present the research proposal at a committee meeting, and answer related questions. Following the successful completion of the qualifying exam, the research proposal is the basis of the MS thesis project. BIO-SCI 5752-002 Research Methods In Oral Biology- I.Ph.D students- As the student identifies a research focus for the dissertation project, they will begin reviewing the literature and relevant instrumentation in conjunction with a selected advisor.

1-5 hrs

[back to top](#)

BIO-SCI 5759 Special Problems In Pharmacology

Pharmacologic and therapeutic problems of special interest in the practice of dentistry.

2 hrs

[back to top](#)

BIO-SCI 5760 Physiology Of Oral Hard Tissues

A study of the physiology of the oral hard tissues with emphasis on the mechanisms of the growth, remodeling, and healing of maxillomandibular bones and on the mechanism of dentinogenesis. This course may not be used to satisfy Cell Biology and Biophysics or Molecular Biology and Biochemistry discipline-specific requirements for the Interdisciplinary Ph.D. program.

2 hrs

[back to top](#)

BIO-SCI 5780 Teaching Of Dentistry

A consideration of the problems of teaching in dental schools. Each department of the School of Dentistry will report on its teaching methods. The student will observe lectures and laboratory teaching in each department.

1-2 hrs

[back to top](#)

BIO-SCI 5781 Clinical Student Teaching I

This course is designed to give the student teaching experience in conducting and supervising predoctoral students in their clinical practice. Diagnosis and treatment planning in each specialty field will be emphasized.

1-2 hrs

[back to top](#)

BIO-SCI 5782 Clinical Student Teaching II

A continuation of BIO-SCI 5781.

1-2 hrs

[back to top](#)

BIO-SCI 5790 Directed Research In Oral Biology

Student utilizes beginning research skills to design, conduct and report an individual research project under the direction of the faculty.

1-6 hrs

[back to top](#)

BIO-SCI 5799 Research And Thesis

The satisfactory completion of an original research project. Results of the research and critical review of the pertinent literature are incorporated into a thesis. Credit is awarded after the student's thesis is successfully defended and accepted by the School of Graduate Studies.

1-9 hrs

[back to top](#)

BIO-SCI 5801 Readings In Immunology

A detailed study of special topics in immunology. Specific topics to be arranged with the instructor. This course may be repeated by doctoral students for a maximum of 3 credit hours. Prerequisite: LIFE-SCI 435.

1-3 hrs

[back to top](#)

BIO-SCI 5802 Immunopathology

A detailed study of selected topics in immunopathology with emphasis on physicochemical barriers such as cutaneous and mucosal immune systems. Prerequisite: LIFE-SCI 435.

2 hrs

[back to top](#)

BIO-SCI 5805 Molecular Biology Of Oral Microflora

Lecture and discussion. The course will provide an overview of the ecology of oral microbial flora and its role in oral health and disease. Students will examine the taxonomy and ecology of normal and pathogenic oral microbial flora, acquisition of the oral microbiota and the formation of dental plaque as a biofilm. The course will also explore other aspects of microbial biology, such as; bacterial virulence factors and pathogenesis; host defense mechanisms; systemic complications of periodontal disease; antibiotics and antibiotic resistance. The second part of the course will review the effect of recent advances in molecular biology and protein biochemistry on oral diagnosis and treatment.

2-3 hrs

[back to top](#)

BIO-SCI 5830 Structural Characterization Of Dental Biomaterials

A detailed study of the techniques commonly used to determine the composition and structure of dental biomaterials. Surface and near-surface characterization techniques will be emphasized. The student will be expected to complete laboratory projects on the scanning and transmission electron microscopies available in the School of Dentistry. Two hours lecture and two to six hours laboratory per week. Prerequisite: BIO-SCI 5701.

3 hrs

[back to top](#)

BIO-SCI 5899 Required Graduate Enrollment

1 hr

[back to top](#)

Dentistry- Professional Courses

DENT 6305 Operative Dentistry I Lecture

An introduction to the prevention and principles of the restorative treatment of dental caries.

1 hr

[back to top](#)

DENT 6305 L Operative Dentistry I Laboratory

Restorative procedures discussed in DENT 6305 are performed on laboratory manikins.

2 hrs

[back to top](#)

DENT 6306 Introduction To Ethics And Professionalism

An introduction to basic concepts in the analysis of ethics, morals and values. Systems of ethical analysis are introduced and explored using contemporary issues from medicine and dentistry. Students will explore their own ethical values and apply this knowledge to issues in professional education.

1 hr

[back to top](#)

DENT 6310 C Clinical Assisting

The student will first learn the principles and techniques of chairside dental assisting with the aid of lectures, demonstrations, and visual aids. The student will then assist third and fourth year students in the clinic. Offered: Fall

3 hrs

[back to top](#)

DENT 6312 Dental Behavioral Science I

An introduction to the basic principles of behavioral science as they relate to dentistry. Topics include basic principles of human behavior, compliance and dental self-care behavior, fear and anxiety behavior, pain behavior and stress related to dental practice.

1-2 hrs

[back to top](#)

DENT 6314 C Introduction To Oral Diagnosis

A combined lecture/clinic course in which the student will be introduced to the techniques of Oral Diagnosis and the studies of patient history taking, patient examination, patient diagnostic techniques, radiographic techniques, and radiation hygiene. Personal oral hygiene and patient education will be stressed.

3 hrs

[back to top](#)

DENT 6315 C Preventive Periodontics

This course introduces preventive theory and the instrumentation skills necessary to provide patient care. Students are introduced to fundamental clinical procedures including plaque control, gingival assessment, and periodontal probing. Basic periodontal instrumentation skills are introduced.

3 hrs

[back to top](#)

DENT 6316 Dental Morphology

This lecture/laboratory course introduces the student to dental terminology, then continues with the study of masticatory biomechanics and occlusion. The students' knowledge of dental morphology and occlusion are then reinforced by having them construct wax models of the human succedaneous and permanent dentition.

3 hrs

[back to top](#)

DENT 6317 Dental Occlusion

This lecture/laboratory series covers the judicious use of gnathologic instruments in dental reconstruction and occlusal therapy. Provides an introduction to temporomandibular disorders with special emphasis upon pathologies caused by the occlusion. The practical application of gnathologic instruments is demonstrated in the laboratory, followed by various occlusal treatments useful in the management of temporomandibular disorders. Offered: Winter Semester.

3 hrs

[back to top](#)

DENT 6318 Dental Biomaterials Lecture

An introduction to the study of common dental materials and their manipulation as used in modern dentistry.

1 hr

[back to top](#)

DENT 6328 Clinical Decision Making in Denistry

An experiential course that uses current controversies in to facilitate development of skills needed for making valid decision in clinical dentistry. Students will apply basic principles of database searching, research design and methodology to the critical analysis of contemporary dental literature. DENT 325 is a one-hour course that will: 1) Provide you with sufficient information to perform week on the portions of the national boards that deal with research design and methodology; and , 2) give you skills sufficient to search for, locate, and evaluate valid information related to clinical questions in contemporary dentistry.

1-2 hrs

[back to top](#)

DENT 6335 Applied Neuroscience

This course serves as an introduction to nervous system function and its relation to the practice of dentistry. Primary focus is on synapses, with applications to the innervation of the oral cavity and patient management. Appropriate content and principles from the basic sciences and neurology will be integrated into a unit readily applicable to clinical practice.

2 hrs

[back to top](#)

DENT 6350 Introduction To The Histopathology Of Oral Tissues

A comparison of the microscopic anatomy of healthy and diseased oral tissues.

2.5 hrs

[back to top](#)

DENT 6390 Dental Research Experience

This independent study course focuses upon experience gained in both an area of dental research as well as the process of research in working with an established dental researcher.

1 hr

[back to top](#)

DENT 6410 Operative Dentistry II Lecture

A continuation of DENT 6305. Principles of cavity preparation, materials and techniques are stressed.

1 hr

[back to top](#)

DENT 6410 L Operative Dentistry II Laboratory

A continuation of DENT 6305L. Restorative procedures are performed on laboratory manikins and extracted teeth.

2 hrs

[back to top](#)

DENT 6411 Operative Dentistry III Lecture

A continuation of DENT 6410.

1 hr

[back to top](#)

DENT 6412 Anesthesiology I Lecture

Infiltration and regional anesthesia; technique of injections; complications of local anesthesia; a brief overview of conscious sedation.

1 hr

[back to top](#)

DENT 6414 Pathology I Lecture

The general etiology of disease; circulatory and metabolic disorders; degenerative processes; inflammation; infection and immunity; tumors; and organ system pathology.

4 hrs

[back to top](#)

DENT 6415 Pathology II

A study of developmental defects, inflammatory diseases, and neoplasia of the oral region.

2 hrs

[back to top](#)

DENT 6416 Complete Removable Prosthodontics I Lecture

A study of the edentulous patient, pre-extraction records, mouth preparation for dentures, impression making, jaw relations, the arrangement of teeth and processing.

1 hr

[back to top](#)

DENT 6416 L Complete Removable Prosthodontics I Laboratory

Complete dentures are constructed. Procedures used in the clinic are followed and a manikin serves as the patient.

2 hrs

[back to top](#)

DENT 6417 Removable Partial Prosthodontics Lecture

3 hrs

[back to top](#)

DENT 6420 Periodontics I

It is the scope of this course to introduce the basic disease mechanisms involved in the evolution of the inflammatory periodontal lesion; i.e., the interaction of the host tissues with the oral microbial flora. The course will cover the entire range of possible periodontal diseases, ranging from simple marginal gingivitis to AIDS related necrotizing ulcerative periodontitis. Further, the course will continually reinforce the science of periodontology and its overwhelming relationship to the clinical practice of periodontics.

2 hrs

[back to top](#)

DENT 6422 Fixed Prosthodontics I Lecture

This course is designed to provide the foundation knowledge needed by the novice to formulate clinical judgments in the areas of treatment planning, tooth preparation, and the selection and use of dental biomaterials for the restoration of single teeth with fixed prosthodontic restorations. The topics covered also include provisional restorations, impressions materials and technique, dental cements, and laboratory aspects involved in the fabrication of cast gold crowns.

1 hr

[back to top](#)

DENT 6422 L Fixed Prosthodontics I Laboratory

The second course in the fixed prosthodontic curriculum is designed to provide foundation knowledge needed by the novice to formulate clinical judgments in the areas of treatment planning, tooth preparation, and the selection and use of dental biomaterials for the restoration of missing teeth with fixed partial dentures and implants. Offered: Fall

2 hrs

[back to top](#)

DENT 6423 Fixed Prosthodontics II Lecture

The second course in the fixed prosthodontic curriculum is designed to provide foundation knowledge needed by the novice to formulate clinical judgments in the areas of treatment planning, tooth preparation, and the selection and use of dental biomaterials for the restoration of missing teeth with fixed partial dentures and implants. Offered: Spring.

1 hr

[back to top](#)

DENT 6423 L Fixed Prosthodontics II Laboratory

The second laboratory course in fixed prosthodontics is focused on the replacement of missing teeth with fixed partial dentures and implant restoration. Projects build the skills to begin development of clinical competence in fixed partial dentures and implant restorations. Offered; Spring

2 hrs

[back to top](#)

DENT 6424 Oral Diagnosis And Oral Medicine

Includes presentation of the principles of history taking and examination of the patient, the signs and symptoms of diseases and the medical management of patients with illness. The dental management of patients with systemic disease is stressed.

1-2 hrs

[back to top](#)

DENT 6426 Oral Radiology Lecture

Radiation physics, radiation biology, quality assurance, imaging principles, radiation hygiene, radiographic interpretation and techniques of intra-oral survey are presented.

2 hrs

[back to top](#)

DENT 6429 Dental Behavioral Science II

An in depth study of the processes of effective dentist-patient communication.

1 hr

[back to top](#)

DENT 6431 Pediatric Dentistry I Lecture

The student is introduced to techniques used in treating the child patient; including examination, diagnosis, interpretation of intra-and extra-oral radiographs, treatment planning and preventive dentistry.

1 hr

[back to top](#)

DENT 6435 Endodontics I Lecture

An introductory course in endodontics emphasizing pulpal biology, endodontic diagnosis and treatment planning.

1 hr

[back to top](#)

DENT 6436 Orthodontics: Growth And Development

Certain malocclusions and dental deformities can occur due variations in growth and normal developmental process. In order to treat and understand these problems, an in-depth and through understanding of craniofacial growth and development is necessary. Understanding how and when the face and head is actively growing will enable the clinician to redirect facial growth to reduce the severity of forming skeletal/ dental malocclusions. Since orthodontic treatment may involve the modification and/or manipulation of skeletal growth, it is important not only to understand dental development but also physical, physiologic and psychosocial development. This course is designed to address these needs.

1 hr

[back to top](#)

DENT 6439 Medical Emergencies In The Dental Office

1 hr

[back to top](#)

DENT 6440 Oral Surgery I

An introduction to the basic principles of oral surgery.

1 hr

[back to top](#)

DENT 6441 C Treatment Planning

The student is introduced to comprehensive treatment planning in dentistry using lectures, cases, and class discussions.

Offered: Winter

2 hrs

[back to top](#)

DENT 6442 Endodontics II Lecture

A continuation of the study of endodontics emphasizing non-surgical endodontics, surgical endodontics and post-endodontic treatment.

1 hr

[back to top](#)

DENT 6442 L Endodontics Laboratory

The preparation and filling of root canals of extracted teeth in the laboratory setting.

2 hrs

[back to top](#)

DENT 6460 C Review Of Pre-Clinical Dentistry

A combination of lecture, selected readings and independent study designed to reinforce and integrate concepts contained in the pre-clinical dental curriculum. The course will meet for 3 hours each week for the first 7 weeks of the term, with an additional 11 hours of independent computer-aided study required during this period. Offered: Summer Semester.

2 hrs

[back to top](#)

DENT 6501 C Intro To Comprehensive Patient Care

The purpose of this course is to introduce the student to the clinical environment and to familiarize him/her with comprehensive patient care. In addition, it allows the student to develop and interpret basic diagnostic aids that enable him/her to arrive at a diagnosis and treatment outline, the beginning steps of comprehensive care. Patient care is provided following the outlined treatment plan. The student will apply the principles/concepts of patient care. Students begin treatment of a "family" of patients under faculty supervision. Prerequisite: first and second year courses.

1-10 hrs

[back to top](#)

DENT 6502 Grand Rounds I

Students prepare to develop and present oral reports typically given at professional meetings such as case presentations, table clinics, research reports or presentations of new techniques (such as in Table Clinic requirements or Senior Grand Rounds). This course will expand on the student's basic knowledge of critical review of scientific literature and information literacy. Cases and problems in dentistry and oral health will be the context for identification and application of current valid scientific literature. This course seeks to foster an attitude of critical analysis and commitment to life-long learning.

1 hr

[back to top](#)

DENT 6507 C Pediatric Clinical Dentistry II

Clinical application of those principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6509 C Comprehensive Patient Care I

Third and fourth year dental students will spend the majority of their curriculum time mastering the competencies required of a general dentist. This includes the ability to complete a dental diagnosis and treatment plan, present the case to the patient, implement and evaluate the dental care delivered. Comprehensive patient care courses foster development of skills through daily evaluation in technique, patient management, and diagnostic ability, supplemented by periodic mentor and team faculty evaluation. Semester evaluation will also take into account clinical productivity using a time unit system. Offered: Fall Third and fourth year dental students will spend the majority of their curriculum time mastering the competencies required of a general dentist. This includes the ability to complete a dental diagnosis and treatment plan, present the case to the patient, implement and evaluate the dental care delivered. Comprehensive patient care courses foster development of skills through daily evaluation in technique, patient management, and diagnostic ability, supplemented by periodic mentor and team faculty evaluation. Semester evaluation will also take into account clinical productivity using a time unit system. Offered: Winter

1-10 hrs

[back to top](#)

DENT 6510 C Comprehensive Patient Care II

Third and fourth year dental students will spend the majority of their curriculum time mastering the competencies required of a general dentist. This includes the ability to complete a dental diagnosis and treatment plan, present the case to the patient, implement and evaluate the dental care delivered. Comprehensive patient care courses foster development of skills through daily evaluation in technique, patient management, and diagnostic ability, supplemented by periodic mentor and team faculty evaluation. Semester evaluation will also take into account clinical productivity using a time unit system. Offered: Winter

1-10 hrs

[back to top](#)

DENT 6514 Pathology III Lecture

Continued study of pathological conditions of the oral region with emphasis on clinical signs and symptoms.

1 hr

[back to top](#)

DENT 6515 Periodontics II

The overall goal of this course is to help the pre-doctoral students to recognize periodontal disease and treatment plan the needed periodontal therapy. Specific goals are to enhance the student's knowledge of the surgical aspects of periodontal therapy, and the relationship of periodontal disease and its treatment to the overall dental treatment plan.

1 hr

[back to top](#)

DENT 6517 International Outreach

Students in predoctoral dental education or advanced education in the dental school will have the opportunity to apply knowledge and skills while delivering care in a international setting. The long range goal is a practitioner who is sensitive to diverse community needs.

1 hr

[back to top](#)

DENT 6519 Advanced Dental Materials

This course is a review of dental materials in general, an introduction of new materials and uses.

0.5 hrs

[back to top](#)

DENT 6521 Oral Surgery II Lecture

The diagnosis and treatment planning of fractures, cysts, neoplasms, and other problems in oral pathology of the mandible and maxilla and associated anatomical structures.

1 hr

[back to top](#)

DENT 6522 Oral Surgery Lecture III

A continuation of DENT 6521.

1 hr

[back to top](#)

DENT 6522 C Periodontics Clinical II

Clinical application of those principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6524 Principles Of Medicine And Physical Diagnosis

Includes presentation of the principles of history-taking and examination of the patient, the signs and symptoms of diseases and the medical management of patients with illness. The dental management of patients with systemic disease is stressed.

2 hrs

[back to top](#)

DENT 6526 Orthodontics I

Orthodontics I is a course designed to introduce the student to the field of orthodontics. The lecture will introduce the student to basic orthodontic terminology, description, diagnosis, and mechanotherapy. This course will prepare the student for the clinical treatment of patients needing limited tooth movement. Offered: Winter

1 hr

[back to top](#)

DENT 6526 C Preventive Dentistry Clinical

Clinical application of those principles taught in preceding terms.

1 hr

[back to top](#)

DENT 6526 L Orthodontics I Laboratory

Orthodontics I is a course designed to introduce the student to the field of orthodontics. The laboratory enables the student to master the materials of orthodontics in order to complete diagnostic records, to construct fixed and removable appliances, and to be familiar with tooth movement mechanics. This course will prepare the student for clinical treatment of patients needing limited tooth movement. Offered: Winter

2 hrs

[back to top](#)

DENT 6527 Therapeutics

Therapeutic use of drugs in dental practice.

2 hrs

[back to top](#)

DENT 6531 Complete Removable Prosthodontics II Lecture

Advanced principles of complete denture construction are stressed and emphasis on their clinical application is included. Additional clinical approaches to the partial and completely edentulous patient are explored.

1 hr

[back to top](#)

DENT 6532 C Oral Diagnosis Clinical II

Clinical application of those principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6534 Advanced Predoctoral Prosthodontics

This course reviews advanced principals in Fixed and Removable Prosthodontics. Using evidenced based concepts, information will be presented to aid the student clinician make well informed clinical choices which will help prepare them for the use of prosthodontic techniques in the practice of general dentistry. A variety of materials, devices, and concepts will be presented. Making intelligent choices in the selection and use of these restorative materials and concepts will be a focus.

1 hr

[back to top](#)

DENT 6537 Oral Oncology

A lecture course on oral oncology will deal with the biologic aspects of cancer; the detection of oral cancer and the different modalities of treatment of cancer; the dental aspects both from surgical reconstruction and prosthetic reconstruction following cancer surgery; and management of the patient prior to, during, and following radiation therapy to the head and neck and during chemotherapy for systemic cancer.

0.5 hrs

[back to top](#)

DENT 6538 Orthodontics II

This course will present a variety of topics related to orthodontics, such as: normal development, abnormal occlusal deviations during the developing permanent dentition, diagnosis and treatment planning of orthodontic problems, biomechanical principles in orthodontics, adolescent vs. adult orthodontics, periodontal health during orthodontic treatment, complications associated with orthodontic treatment and controversial aspect of orthodontics. You should also be able to recognize which kind of cases exceed the scope of limited treatment and may require intervention by a specialist. Offered: Fall

1 hr

[back to top](#)

DENT 6542 C Operative Dentistry Clinical II

Clinical application of those principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6551 CR Oral Surgery Clinical

Clinical application of those principles taught in preceding terms.

2 hrs

[back to top](#)

DENT 6556 Radiographic Interpretation

This is a comprehensive multidisciplinary course in radiologic interpretation of normal anatomy, anomalies, dental caries, periodontal disease, periapical pathology and infections of the maxilla and mandible.

0.5 hrs

[back to top](#)

DENT 6558 Radiographic Interpretation II

This is a continuation of radiographic interpretation in which the students continue to deepen their knowledge in radiologic interpretation of normal anatomy, anomalies, dental caries, periodontal disease, periapical pathology and infections of the maxilla and mandible. Offered: Winter

0.5 hrs

[back to top](#)

DENT 6559 Diagnosis And Management Of Orofacial Pain

Essential conceptual, clinical and technical information and skills necessary in the diagnosis and treatment of Orofacial Pain States. Diagnostic protocols and radiographic procedures and their integration as it relates to painful head and neck conditions are presented in depth. Differential diagnosis and special diagnostic techniques are also addressed. Behavioral factors associated with the development of chronic pain and complicating the management of pain states are identified and discussed.

1 hr

[back to top](#)

DENT 6562 C Removable Prosthodontics Clinical II

Clinical application of those principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6564 Dental Pharmacology

This course presents an introduction into the mechanisms of action, pharmacodynamics, adverse-effects, dosage forms, relevant pharmacokinetics, for the most common outpatient drugs prescribed and used by patients seen by the dentist. This self-study course represents a more independent approach to the teaching of second year dental school pharmacology. The online format will methodically guide the student through the textbook, providing goals and additional references that allow for the self-study of pharmacology. The online course substitutes for the lecture by highlighting important areas of pharmacology that need particular attention and helps focus the dental student's time. By removing the lecture component of the course, the student is allowed to study at times and places of their preference. This allows more flexibility with time, but requires more self-discipline and time management skills from the student. It is not self-paced: Specific chapters and tests must be completed weekly to proceed through the course. Meeting these goals requires more student responsibility than a traditional course. Offered: Spring

2 hrs

[back to top](#)

DENT 6566 Bridge Course

This course is designed as a lecture and clinical course to provide a transition into the clinical phase of the dental curriculum for the third year dental student. Offered: Summer.

2 hrs

[back to top](#)

DENT 6591 C Professional Development I

Clinical application of those principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6592 C Professional Development II

Clinical application of those principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6593 C Professional Development III

Clinical application of those principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6595 Introduction To Implant Dentistry

To provide the undergraduate student with a solid background into the role of implant dentistry in their profession. Advances in technique and materials which are responsible for improved predictability will be presented. Emphasis will be on patient selection, treatment planning and basic restorative techniques. The student will be able to initiate uncomplicated dental implant procedures with this information and will be prepared to enter into more advanced continuing education and graduate programs in this subject.

1 hr

[back to top](#)

DENT 6600 Review Of Clinical Dentistry

A summative review of the basic areas of clinical dentistry.

1-2 hrs

[back to top](#)

DENT 6601 C Endodontics Clinical

Clinical application of principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6602 Grand Rounds II

This course is a continuation of Grand Rounds I and its aim is similar to Grand Rounds I: expand on the dental student's basic knowledge of critical review of scientific literature and information literacy. Students will present a Table Clinic at Midwest Dental Conference and prepare a proposal for their senior Grand Rounds presentation.

1 hr

[back to top](#)

DENT 6603 Grand Rounds III

A continuation of DENT 6602.

1 hr

[back to top](#)

DENT 6604 Grand Rounds Iv

A continuation of DENT 6603.

1 hr

[back to top](#)

DENT 6605 Review Of Clinical Dentistry II

A review of foundation knowledge for clinical dentistry.

1-2 hrs

[back to top](#)

DENT 6606 C Pediatric Dentistry Clinical I

Clinical application of those principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6607 C Pediatric Dentistry Clinical Iv

Clinical application of those principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6609 C Comprehensive Patient Care III

Third and fourth year dental students will spend the majority of their curriculum time mastering the competencies required of a general dentist. This includes the ability to complete a dental diagnosis and treatment plan, present the case to the patient, implement and evaluate the dental care delivered. Comprehensive patient care courses foster development of skills through daily evaluation in technique, patient management, and diagnostic ability, supplemented by periodic mentor and team faculty evaluation. Semester evaluation will also take into account clinical productivity using a time unit system. Offered: Winter

1-10 hrs

[back to top](#)

DENT 6610 Anxiety And Pain Control In Dentistry

Techniques of selecting, administering and evaluating inhalation and intravenous sedation agents. An introduction to general anesthesia will also be included. Clinical experience in inhalation and intravenous sedation is highly desirable.

1 hr

[back to top](#)

DENT 6610 C Comprehensive Patient Care Iv

Third and fourth year dental students will spend the majority of their curriculum time mastering the competencies required of a general dentist. This includes the ability to complete a dental diagnosis and treatment plan, present the case to the patient, implement and evaluate the dental care delivered. Comprehensive patient care courses foster development of skill through daily evaluation in technique, patient management, and diagnostic ability, supplemented by periodic mentor and team faculty evaluation. Semester evaluation will also take into account clinical productivity using a time unit system.

Offered: Fall

1-10 hrs

[back to top](#)

DENT 6611 C Fixed Prosthodontics Clinical I

Clinical application of principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6613 Periodontal Treatment Planning

1 hr

[back to top](#)

DENT 6614 Dentistry For The Special Patient

The purpose of this course is to acquaint the student with the dental treatment of three populations of patients who you may encounter in your dental career (and often have trouble finding adequate care). They include patients who are developmentally disabled, the elderly, and the medically-compromised. The course will present management techniques for in-office treatment and appropriate referral of those patients best treated in another setting. This course builds upon the skills and knowledge gained in previous courses in many disciplines, to provide an interdisciplinary experience with special patient populations. A required rotation at the Regional Center for the Developmentally Disabled gives practical experience to topics covered in lecture.

1-2 hrs

[back to top](#)

DENT 6614 C Comprehensive Patient Care V

Third and fourth year dental students will spend the majority of their curriculum time mastering the competencies required of a general dentist. This includes the ability to complete a dental diagnosis and treatment plan, present the case to the patient, implement and evaluate the dental care delivered. Comprehensive patient care courses foster development of skill through daily evaluation in technique, patient management, and diagnostic ability, supplemented by periodic mentor and team faculty evaluation. Semester evaluation will also take into account clinical productivity using a time unit system.

Offered: Winter

1-10 hrs

[back to top](#)

DENT 6617 Pediatric Dentistry Seminar

This course is designed to follow and build on the concepts presented in D431. Using a seminar format, students will review pediatric dentistry concepts with emphasis on clinical application. The course is intended for fourth year dental students who have had some initial clinical experience with pediatric patients. Offered: Fall

0.5 hrs

[back to top](#)

DENT 6618 Dental Jurisprudence And Ethics

Legal aspects of dentistry to include dentist-patient and dentist-state relationships. Principles of ethics and the Missouri State Dental Laws are also covered.

1 hr

[back to top](#)

DENT 6622 C Periodontics Clinical Iv

Clinical application of those principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6626 Clinical Treatment Planning

This course builds on the didactic courses and clinical experiences in treatment planning. Each student will demonstrate competency in comprehensive treatment planning to earn credit in the course. Offered: Fall

1 hr

[back to top](#)

DENT 6630 Practice Management I

A consideration and evaluation of the various economic factors and managerial practices that affect the operational aspects of the practice of dentistry.

1 hr

[back to top](#)

DENT 6631 Practice Management II

A lecture course which provides a working knowledge of basic practice management topics which will help future practitioners avoid many common mistakes. Specific business systems for managing a dental practice will be presented in a forum which encourages questions and dispels many common practice myths. A profitable private practice model will be presented that is designed to keep the fun in dentistry and minimize burn-out. Each student will then have the opportunity to build their own personal mode, or Personal Practice Blueprint, that will serve as their roadmap when creating their own practice. Upon completion, students should feel competent in running the business side of their practice and maintaining control over their business life. Resources for further study and ongoing support are also provided.

1 hr

[back to top](#)

DENT 6632 C Oral Diagnosis Clinical IV

Clinical application of those principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6633 Introduction To Dental Public Health

Discussion of contemporary issues in community health and community oral health with emphasis on preparing students for their roles as professional members of their communities.

1 hr

[back to top](#)

DENT 6634 Extramural Clinical Rotations (ERC) I

The purpose of this course is to expose third and fourth year dental students to alternative methods of dental care delivery to populations at high risk for dental disease. Specifically the course places junior and senior students in an existing network of community health centers and rural outreach sites where they deliver dental care while serving on multi-disciplinary teams that meet the primary health care needs of large segments of underserved populations. The long range goal is a practitioner who is sensitive to diverse community needs. Prerequisite: Completion of Third Year Offered: Winter Semester Restrictions: Not eligible until completion of two clinical semesters-summer and fall of junior year.

1 hr

[back to top](#)

DENT 6635 Extramural Clinical Rotations (ERC) II

A continuation of community-based dental education I (D-634). Prerequisite: Completion of Third Year Offered: Summer/Fall Semester Restrictions: Not eligible until completion of clinical requirements for the third year.

1 hr

[back to top](#)

DENT 6636 C Oral Radiology Clinical

Clinical application of those principles taught in preceding terms with emphasis on use of a variety of film holding devices. Radiographic quality assurance and darkroom maintenance will be reviewed during this course.

2 hrs

[back to top](#)

DENT 6641 CR Operative Dentistry Clinical I

Clinical application of principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6642 C Operative Dentistry Clinical Iv

Clinical application of those principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6650 Applied Ethics

Four or five case studies will be used during seminars. Basic ethical principles from the D-6306 course will be applied to the case studies. Two of the cases will involve ethical issues, and one of the cases will add community dentistry issues. Other cases will be used as generated or suggested by each seminar group.

0.5 hrs

[back to top](#)

DENT 6656 C Orthodontic Clinical I

The purpose of this course is to allow each student to develop the skills, knowledge and values to diagnose potential or actual malocclusions and manage patient who need orthodontic intervention. Offered: Fall

1 hr

[back to top](#)

DENT 6657 C Orthodontic Clinical II

A continuation of DENT 6656C.

0.5 hrs

[back to top](#)

DENT 6690 Independent Study In Dentistry

This course provides students the opportunity to undertake independent study projects in specific areas of dentistry. Prior consent of instructor required. Course may be repeated.

1-6 hrs

[back to top](#)

DENT 6691 C Professional Development Iv

Clinical application of those principles taught in preceding terms.

0.5-3 hrs

[back to top](#)

DENT 6692 C Professional Development V

Clinical application of those principles taught in preceding terms.

1-2 hrs

[back to top](#)

DENT 6899 Required Graduate Enrollment

1 hr

[back to top](#)

Endodontics

ENDO 5701 Endodontology 1

This course is designed to introduce the first year endodontic postgraduate student to the field of advanced endodontics. It will provide introductory information and guidance which will serve as a basis for follow on course work in ENDO 5702 through ENDO 5706. Prerequisite: None

1-6 hrs

[back to top](#)

ENDO 5702 Endodontology 2

This course is designed to continue the transition of the general dentist into a first year endodontic postgraduate student in the field of advanced endodontics. It will build upon material taught in previous courses of instruction as well as introduce completely new material to the resident. Prerequisite: None

1-6 hrs

[back to top](#)

ENDO 5703 Endodontology 3

This course is designed to complete the transition of the general dentist into a first year endodontic postgraduate student in the field of advanced endodontics. It will build upon material taught in previous courses of instruction as well as introduce completely new material to the resident. Prerequisites: ENDO 5701 & ENDO 5702 Offered: On demand

1-6 hrs

[back to top](#)

ENDO 5704 Endodontology 4

This course is designed to transition the first year into a second year postgraduate student in the field of advanced endodontics. It will build upon material taught in previous courses of instruction as well as introduce completely new material to the resident. Prerequisites: ENDO 5701, ENDO 5702, ENDO 5703.

1-6 hrs

[back to top](#)

ENDO 5705 Endodontology 5

This course is designed to continue the transition of the general dentist into a more proficient second year postgraduate student in the field of advanced endodontics. It will build upon material taught in previous courses of instruction as well as introduce completely new material to the resident. Prerequisites: ENDO 5701, ENDO 5702, ENDO 5703, ENDO 5704

1-6 hrs

[back to top](#)

ENDO 5706 Endodontology 6

This course is designed to complete the transition of the general dentist into a fully independently practicing endodontist. It will build upon material taught in previous courses of instruction as well as introduce completely new material to the resident. Prerequisite: ENDO 5701, ENDO 5702, ENDO 5703, ENDO 5704, ENDO 5705

1-6 hrs

[back to top](#)

General Practice

G-PRAC 5710 Principles Of Pedodontics For General Practice

A lecture course presenting the basic concepts of diagnosis and treatment of the child in a general dental practice.

2 hrs

[back to top](#)

G-PRAC 5716 Special Problems In General Practice Dentistry I

Courses designed to provide the student with opportunities to work with consultants and specialists on the faculty of the dental school on cases which require the attention of a specialist.

1-6 hrs

[back to top](#)

G-PRAC 5717 Special Problems In General Practice Dentistry II

A continuation of G-PRAC 5716.

1-6 hrs

[back to top](#)

G-PRAC 5718 Special Problems In General Practice Dentistry III

A continuation of G-PRAC 5717.

1-6 hrs

[back to top](#)

G-PRAC 5721 General Practice Clinic I

1-10 hrs

[back to top](#)

G-PRAC 5722 General Practice Clinic II

1-10 hrs

[back to top](#)

G-PRAC 5723 General Practice Clinic III

1-10 hrs

[back to top](#)

G-PRAC 5724 Hospital Residency In General Practice Iv

2 hrs

[back to top](#)

G-PRAC 5725 Hospital Residency In General Practice V

4 hrs

[back to top](#)

G-PRAC 5726 Hospital Residency In General Practice Vi

4 hrs

[back to top](#)

G-PRAC 5727 General Practice Clinical Pedodontics

Clinical training in treating normal and handicapped children at Children's Mercy Hospital. Training includes providing treatment under general anesthesia at the hospital.

1 hr

[back to top](#)

G-PRAC 5728 Dental Implantology

The course is designed to include the following topics: history of implantology, implant materials and designs, fibroosseous and osseointegration theories, bioinert and bioactive retention, indication and case selection, technique methodology, anatomical considerations and reasons for failure, prosthetic considerations using several systems and necessary radiographic aids, surgical stent and laboratory with simulated insertion of an implant.

1 hr

[back to top](#)

G-PRAC 5729 Oral Endosteal Implantology II

A continuation of G-PRAC 5728.

2 hrs

[back to top](#)

G-PRAC 5730 Introduction To Periodontology

This course is designed to introduce graduate students who are not enrolled in the periodontics program to various current philosophies and clinical applications of Periodontics including etiology, diagnosis, pathogenesis and various treatment modalities in current use.

1-2 hrs

[back to top](#)

G-PRAC 5731 Principles Of Minor Tooth Movement

This lecture and laboratory course gives the non-orthodontic student an introduction to craniofacial growth and development physiology of the stomatognathic system, to etiology, incidence, recognition and unfavorable sequelae of malocclusion, and to the fabrication of removable and fixedbanded appliances necessary for the correction of minor irregularities.

2 hrs

[back to top](#)

G-PRAC 5732 Intravenous And Inhalation Sedation

A comprehensive study of nitrous oxide and valium sedation combining lectures and clinical problems.

2 hrs

[back to top](#)

G-PRAC 5740 Interdisciplinary Seminar I

The integration of common areas of concern in the clinical disciplines of Oral and Maxillofacial Surgery, Orthodontics, Pediatric Dentistry, Periodontics and Prosthodontics as they relate to patient cases. Cases are presented that present problems in at least two clinical disciplines in the areas of Diagnosis, Treatment Programming or Therapy. The current literature is reviewed and the case discussed.

1 hr

[back to top](#)

G-PRAC 5741 Interdisciplinary Seminar II

A continuation of G-PRAC 5740.

1 hr

[back to top](#)

G-PRAC 5742 Interdisciplinary Seminar III

A continuation of G-PRAC 5741.

1 hr

[back to top](#)

G-PRAC 5743 Interdisciplinary Seminar Iv

A continuation of G-PRAC 5742.

1 hr

[back to top](#)

G-PRAC 5799 Research And Thesis

The satisfactory completion of an original research project. Results of the research and critical review of the pertinent literature are incorporated into a thesis.

1-6 hrs

[back to top](#)

G-PRAC 5899 Required Graduate Enrollment

1 hr

[back to top](#)

Oral Biology

OR-BIO 5699 Dissertation Research

Ph.D. dissertation research.

1-12 hrs

[back to top](#)

OR-BIO 5807 Structure And Properties Of Calcified Tissues

An introduction to the development of calcified tissues as hierarchical structural/material systems. Starting at the cellular level, bone modeling, remodeling and mechanisms of mineralization will be introduced to be followed by analyzing bone's structural hierarchy and its effects on anisotropic material properties. Fracture mechanisms, viscoelastic and composite properties also will be studied. Experimental techniques measuring various material properties of these tissues will be introduced and/or demonstrated where appropriate. Prerequisite: Consent of instructor.

2 hrs

[back to top](#)

OR-BIO 5899 Required Graduate Enrollment

1 hr

[back to top](#)

Oral Radiology

OR-RAD 5704 Oral Radiology Residency I

Clinical and didactic study of oral radiology.

1-5 hrs

[back to top](#)

OR-RAD 5705 Oral Radiology Residency II

Clinical and didactic study of oral radiology.

1-5 hrs

[back to top](#)

OR-RAD 5706 Oral Radiology Residency III

Clinical and didactic study of oral radiology.

1-5 hrs

[back to top](#)

OR-RAD 5707 Oral Radiology Residency Iv

Clinical and didactic study of oral radiology.

1-5 hrs

[back to top](#)

OR-RAD 5708 Oral Radiology Residency V

Clinical and didactic study of oral radiology.

1-5 hrs

[back to top](#)

OR-RAD 5709 Oral Radiology Residency Vi

Clinical and didactic study of oral radiology.

1-5 hrs

[back to top](#)

OR-RAD 5716 Special Problems Oral Radiology I

Assigned technical problems in oral radiology.

1 hr

[back to top](#)

OR-RAD 5720 Advanced Radiographic Anatomy

Correlation between normal anatomic structures of the head and neck region and the radiographic appearance of these structures on intraoral, panoramic, skull and conventional tomographic projections.

1 hr

[back to top](#)

OR-RAD 5721 Advanced Radiographic Interpretation

Radiographic interpretation of normal and pathologic processes of the oral and maxillofacial region. Developmental, degenerative, inflammatory, neoplastic, and metabolic conditions of the oral and maxillofacial complex are covered, including conditions involving the temporomandibular joint and paranasal sinuses.

2 hrs

[back to top](#)

OR-RAD 5722 Radiation Physics

Basic principles of radiation physics in relation to medical and dental diagnostic radiology are presented. Topics such as the nature of radiation, x-rays and their production, interaction of x-rays with matter, measurement of x-rays, x-ray film and intensifying screens, and image characteristics are presented.

2 hrs

[back to top](#)

OR-RAD 5723 Radiation Biology

This course covers the basic principles of radiation biology, as well as radiation safety and protection. Topics such as theories of radiation action, radiation chemistry, molecular, cellular and tissue effects, early and late effects of radiation, effects of radiation therapy on the oral cavity, and concepts of radiation protection and risk assessment are presented. Satisfactory completion of a project in the area of radiation biology is required for the additional credit hour.

2 hrs

[back to top](#)

OR-RAD 5724 Advanced Imaging Modalities

This course will cover basic principles and interpretation of advanced imaging modalities, such as computed tomography, digital radiography, magnetic resonance imaging, nuclear medicine and ultrasound. Applications of these imaging modalities to dentistry will be addressed. Prerequisite: OR RAD 722.

2 hrs

[back to top](#)

Oral Surgery

OR-SURG 5700 Principles Of Oral Surgery I

A conference on diagnosis, treatment planning, surgical technique.

1 hr

[back to top](#)

OR-SURG 5701 Principles Of Oral Surgery II

A continuation of OR-SURG. 5700.

1 hr

[back to top](#)

OR-SURG 5702 Principles Of Oral Surgery III

A continuation of OR-SURG 5701.

A continuation of PERIO 5717.

1 hr

[back to top](#)

PERIO 5719 Implantology

This 2 credit hour seminar is designed for a student in the Advanced Education Program in Periodontology to develop in-depth knowledge of the concepts and theories of implant dentistry as they relate to periodontist. It will provide basic and advanced information and guidance which will serve to complement course work in PERIO 5702 through PERIO 5709, and the clinical implant dentistry experience offered in the program, at a minimum to a level of competency.

2 hrs

[back to top](#)

PERIO 5720 General Anesthesia

A rotation to the Department of Anesthesiology of K.C. Veterans Administration Medical Center. Students become familiar with operating room procedures, medical emergencies, venipuncture, airway maintenance and pharmacology of sedative, analgesic and anesthetic agents as well as drug interactions.

1 hr

[back to top](#)

PERIO 5727 Introduction To Internal Medicine And Diagnosis I

A seminar on internal medicine, physical diagnosis, laboratory medicine, dermatology and allergy. This course is designed to give the resident a broad knowledge of the above.

1 hr

[back to top](#)

PERIO 5728 Introduction To Internal Medicine And Diagnosis II

A continuation of PERIO. 5727.

1 hr

[back to top](#)

PERIO 5729 Children's Periodontics

Children's periodontal disorders, etiology, diagnosis, and treatment. Emphasis is placed on preventive periodontics and on education of parents and children in oral physiotherapy.

2 hrs

[back to top](#)

PERIO 5730 Biology Of The Periodontium

Biology of the Periodontium covers the embryology, histology, ultrastructure and biochemistry of stratified squamous epithelium, fibrous connective tissue, bone and cementum. These four tissues are studied in health and during inflammatory disease and healing of surgical wounds. Major emphasis is placed on immune system interactions with bone and fibrous connective tissue components during inflammatory periodontal disease.

1-2 hrs

[back to top](#)

PERIO 5751 Seminar In Periodontics I

A discussion of the classic and pertinent periodontal literature.

2 hrs

[back to top](#)

PERIO 5752 Seminar In Periodontics II

A continuation of PERIO 5751.

2 hrs

[back to top](#)

Research Methodology- Dentistry

RES-ME 5700 Introduction To Research Methodology

This lecture/discussion course will facilitate student's understanding of terminology and key concepts of research methodology and design. Assigned exercises are designed to demonstrate application of research design principles, and to increase advanced education students' competency in evaluating and planning scientific studies. This knowledge is indispensable for conducting meaningful research in advanced education certificate, masters of doctoral level programs.

2-3 hrs

[back to top](#)

RES-ME 5701 Topics In Advanced Research Methodology

A lecture/seminar course on selected advanced research methodology topics which are to be determined in conjunction with participants. Such topics may include advanced experimental designs in the literature, etc. Prerequisite: Permission of instructor.

2-4 hrs

[back to top](#)

RES-ME 5702 Special Problems In Research Methodology

A student will work with a faculty member on methodological aspects of a research proposal or project. Prerequisite: Permission of instructor.

2-4 hrs

[back to top](#)

RES-ME 5703 Thesis Writing

The methods of preparing, organizing, and presenting research findings using scientific writing format will be reviewed for completing a thesis. This course is required for the Master of Science degrees in Oral Biology and Dental Hygiene Education.

1 hr

[back to top](#)

RES-ME 5704 Introduction To Biostatistics

A lecture/seminar course required for students pursuing a master's degree. This course focuses on an in-depth coverage of statistical designs commonly found in dental research, statistical techniques associated with these designs, application to them via the use of a computer based statistical software analysis package, and the interpretation of statistical tests. Prerequisite(s): RES-ME 5700.

2-3 hrs

[back to top](#)

RES-ME 5705 A Design Of Clinical Research Studies

Students enrolled in this course will learn the elements of a good clinical research study. Additionally, students will develop a draft protocol for a clinical research project, estimate time and budget needs for the project, and be sensitive to ethical issues in the conduct of clinical research.

2 hrs

[back to top](#)

RES-ME 5705 B Statistical Analysis For Clinical Research

Techniques for analyzing complex clinical research designs are a major focus of this course. Students will also learn analytic techniques for estimating failure in biomaterials as well as epidemiologic techniques.

2 hrs

[back to top](#)

RES-ME 5705 C Introduction To Statistical Software

Students enrolled in this course obtain hands-on experience with comprehensive statistical analysis programs, including SPSS and SAS. Students will learn to establish and verify data files, generate program files, and develop strategies for documenting files for improved accountability and reproducibility.

2 hrs

[back to top](#)

RES-ME 5706 Dissertation Writing

Scientific writing format appropriate for preparing a dissertation will be reviewed. This course is required for the Interdisciplinary Ph.D. degree in Oral Biology.

1 hr

[back to top](#)

School of Education

School of Education Courses Counseling Psychology and Counselor Education

CPCE 5500 Introduction To Professional Counseling

Introduction to counseling and counseling psychology as professions practiced in a variety of settings. Basic concepts of mental health, client problems, history of the profession, ethics and standards, counseling in a multicultural and pluralistic society and credentialing. Includes use of professional journals and library investigation. May be taken prior to admission. For Mental Health and Couples and Families emphases only.

3 hrs

[back to top](#)

CPCE 5502 Fndtns Of Elementary & Secondary School Counseling & Guidance

The course will present an overview of theory and practice in the field of school counseling and will examine the roles and functions of guidance counselors. May be taken prior to admission. For School Counseling Emphasis only.

3 hrs

[back to top](#)

CPCE 5503 Psychopathology: Diagnoses And Classification

This course is designed to provide students with an opportunity to study psychopathological patterns, mental disorders, and other reactions in client behavior, which are encountered by therapists, counselors, and psychologists in contemporary psychological service systems. The major focus of the course will be on learning current diagnostic criteria and making differential diagnoses. Attention will also be given to the etiology, development, dynamics, and treatment of psychopathology. In addition, the influence of culture on behavior and treatment will also be discussed. Prereq/Coreq: CPCE 5500

3 hrs

[back to top](#)

CPCE 5504 School Guidance Programs

CPCE 5504 will provide knowledge and skills in the development and management of school guidance programs, including program planning, implementing and evaluation.

3 hrs

[back to top](#)

CPCE 5505 Career Development I

Theories of career development and vocational choice and their implications in counseling. Emphasizes knowledge of occupational and career information sources and use of these data by counselors and counseling psychologists. Open to any student who has been admitted to an advanced degree program.

3 hrs

[back to top](#)

CPCE 5515 Assessment Methods In Professional Counseling

This course provides an understanding of assessment process and assessment techniques. Students will develop skills in selection, administration, and interpretation of representative assessment instruments. Prerequisites: Crosslisted: PSYCH 5510

3 hrs

[back to top](#)

CPCE 5520 Theories Of Counseling

Theoretical positions in counseling; significance of these theories in professional practice. To be taken prior to or concurrent with CPCE 5530 (Methods of Counseling), both of which must be taken prior to Counseling Practicum I, CPCE 5531. Co/Prerequisite: CPCE 5500.

3 hrs

[back to top](#)

CPCE 5521 Special Counseling Methods - Substance Abuse

Theories and methods of counseling as applied to clients with substance abuse problems. Includes assessment, treatment strategies, and evaluation. Skills practice in implementing methods.

3 hrs

[back to top](#)

CPCE 5527 Theory And Methods Of Sexual Counseling

The focus is on sexual development and the acquisition of therapeutic skills to work with problems relating to human sexual functioning and sexual dysfunctions. Co/Prerequisite: CPCE 5520.

3 hrs

[back to top](#)

CPCE 5530 Methods Of Counseling

This course is designed to introduce students to the fundamental concepts and methods of counseling. Students will apply ethical and multicultural principles to the helping relationship while learning the basic methods of humanistic, psychodynamic, and cognitive behavioral approaches as they relate to the helping process. A main focus of this course is the acquisition of basic helping skills. Students will also become familiar with counseling outcome research and will increase their level of counselor self-awareness. Prerequisite: PSYCH 5622 or Co/pre-requisite: CPCE 5520 Offered: Fall, Winter, Summer

3 hrs

[back to top](#)

CPCE 5531 Counseling Practicum I

Closely supervised therapeutic counseling with individuals; translation of theory into practice; clinical and professional techniques and issues. Preregistration by application at least 60 days prior to beginning of semester. Approval by the Counseling Psychology and Counselor Education Practicum Coordinator required. Co/Prerequisites: CPCE 5553

3 hrs

[back to top](#)

CPCE 5532 Counseling Practicum II

Supervised therapeutic counseling with individuals and consultation in professional settings. Preregistration by application at least 60 days prior to beginning of semester. Approval by the Counseling Psychology and Counselor Education Practicum Coordinator required. Prerequisites: CPCE 5531

3 hrs

[back to top](#)

CPCE 5533 Couples And Family Therapy Practicum

Supervised application of theories and methods of family therapy with individuals, couples and families. Preregistration by application at least 60 days prior to beginning of semester. Approval by the Division of Counseling Psychology and Counselor Education required. Prerequisite: CPCE 5532 and CPCE 5542. Co-requisite: CPCE 5541

3-6 hrs

[back to top](#)

CPCE 5534 Practicum For The Assessment Of Children And Adolescents

The practicum for assessment of children and adolescents covers the facilitation of psychological evaluations for this population and includes maintaining a caseload of assessment evaluations to complete through the CCS Assessment Center. Specialized assessment evaluations and conceptualization issues are covered in the second half of the course, with evaluations for ADHD and learning disorders emphasized. Special topics will be discussed at the end of the course. Prerequisite: CPCE 5515

3 hrs

[back to top](#)

CPCE 5539 Continuing Counseling Practicum

Supervised therapeutic counseling with individuals. Preregistration by application at least 60 days prior to beginning of semester. Approval by the Counseling Psychology and Counselor Education Practicum Coordinator required. Prerequisites: CPCE 5532.

1-6 hrs

[back to top](#)

CPCE 5540 Theories And Methods In Group Counseling

Theories and research in group counseling as related to the work of the counselor and counseling psychologist; establishing and maintaining a counseling group; qualifications of the group leader; goals for group counseling; therapeutic and anti-therapeutic forces in groups; special techniques. Three semester hours of lecture and one semester hour of laboratory experience. The two hours per week in laboratory experience is to practice group techniques. Prerequisite: CPCE 5531.

3 hrs

[back to top](#)

CPCE 5541 Couples And Family Therapy

Introduction to and overview of couples and family therapy. Discussion of major theoretical positions, demonstrations of therapy strategies, role playing and case study examples.

3 hrs

[back to top](#)

CPCE 5542 Theories And Techniques Of Family Systems Therapy

A study of major family systems theories and their applied practices in family therapy. Students will develop skills in family assessment techniques and family therapy processes.

3 hrs

[back to top](#)

CPCE 5550 Organization And Administration Of Counseling Programs

Organization, administration, and planning of counseling programs with emphasis on their practical aspect; counseling practice in schools and agencies; intraprofessional relationships; legal and ethical considerations. Course to be taken near completion of the master's program.

3 hrs

[back to top](#)

CPCE 5551 Counseling In A Pluralistic Society

Addresses the needs of diverse populations served by counselors and addresses developing intervention methods of working with these populations. Focuses on advocacy and change agent roles of counselors. Prerequisite: CPCE 5520.

3 hrs

[back to top](#)

CPCE 5553 Ethics And Professional Issues In Counseling

CPCE 553, Ethics and Professional Issues in Counseling, is designed to examine the major ethical and professional issues within the counseling profession. More specific, ethical dilemmas and professional issues relevant to the practice of mental health, marriage and family, school and substance abuse counseling are the major foci of this course. In addition, instruction is designed to enhance student understanding of the ethical standards such that students can effectively apply the critical thinking necessary to practice ethical behavior with clients, professional colleagues, consultees, and the communities in which they work.

3 hrs

[back to top](#)

CPCE 5575 Internship In Counseling

Applied experiences in a planned, supervised program. Seminar accompanies internship experiences. The following areas of specialization are available: a) Marriage and Family, b) Mental Health, c) School, and d) Substance Abuse. Preregistration by application at least 60 days prior to beginning of semester. Approval by the Division of Counseling Psychology and Counselor Education required. Prerequisite: CPCE 5532 and consent of adviser.

3-16 hrs

[back to top](#)

CPCE 5575 C Internship In Counseling

This is a 2-semester applied experience in a planned, supervised program. For each semester, students spend 17.5 hours per week at an off-site agency or school participating in a variety of activities (e.g., individual and group counseling, administration) and attend a 3-hour weekly intern class. Students are expected to select internship sites to match their areas of emphasis (Marriage and Family, Mental Health, School Counseling, and Substance Abuse). Preregistration by application at least 60 days prior to beginning of semester. Approval by the Counseling Psychology and Counselor Education Internship Coordinator required. Prerequisites: CPCE 5532 and consent of adviser

3-16 hrs

Discussion and evaluation of literature in Counseling Psychology and Counselor Education.

3 hrs[back to top](#)**CPCE 5590 CF Seminar**

This is a final seminar for students in the couples and family emphasis area. It is an advanced study of couples and family counseling and related research with a focus on current issues and problems in the profession. Prerequisite: CPCE 5541

3 hrs[back to top](#)**CPCE 5590 MH Seminar: Seminar In Mental Health Counseling**

This final seminar is designed to familiarize students with current topics of interest in the mental health field, while preparing them to provide mental health services to a variety of clients. This course should be taken toward the end of student's program of study. Prerequisites: CPCE 520 w/grade B or better.

3 hrs[back to top](#)**CPCE 5598 Individual Studies**

Review of the research and trends relative to selected problems. By prior arrangement with instructor.

1-6 hrs[back to top](#)**CPCE 5599 Research And Thesis**

By arrangement.

1-9 hrs[back to top](#)

CPCE 5600 Introduction To Counseling Psychology

Introduction to the science and practice of professional counseling psychology. Orientation to University of Missouri-Kansas City and the Counseling Psychology Program

1 hr

[back to top](#)

CPCE 5605 Career Development II

Major theories and research in vocational psychology and career development and implications for the work of the counseling psychologist and counselor. Prerequisite: CPCE 5505.

3 hrs

[back to top](#)

CPCE 5609 Assessment II: Intellectual And Cognitive Assessment

This course is designed to provide students with a foundation in the use of intellectual and cognitive assessment instruments in clinical evaluation. The course covers theoretical issues pertinent to intellectual and cognitive assessment as well as basic assessment skills including administration, scoring, interpretation, and communication of results for commonly used measures. Cross-listed with PSYCH 5509. Prerequisites: Admission to the Ph.D Program in Counseling Psychology

3 hrs

[back to top](#)

CPCE 5610 Theoretical And Professional Issues In Counseling Psychology

This course is designed to introduce first year doctoral students to the fundamental concepts and methods of psychology conceived as the application of scientific and ethical reasoning to human problems. It will provide an in-depth examination of the American Psychological Association code of ethics and its application to the conduct of psychologists. Critical and analytical thinking will be emphasized in all aspects of the course. The course will cover broad models of clinical and counseling psychology and their historical and scientific foundations, issues in diagnosis, cross-cultural applications and professional problems in light of ethical principles, professional standards, scientific data & multi-cultural contexts. Prerequisite: consent of the instructor. Offered: Fall

3 hrs

[back to top](#)

CPCE 5611 Objective Personality Assessment

This course is designed to help students develop knowledge and skills related to the selection, administration, and interpretation of some representative objective personality assessment instruments used in counseling/clinical settings. Students will also learn to integrate data obtained from an assessment battery to write comprehensive psychological reports.

3 hrs

[back to top](#)

CPCE 5615 Survey Of Research In Counseling Psychology

Survey of significant research in counseling psychology. Critical evaluation of research procedures, instrumentation, and clinical application of results. Prerequisites: EDRP 5605 and EDRP 5608.

3 hrs

[back to top](#)

CPCE 5620 Advanced Theories And Methods Of Counseling

Personality and learning theories and their implications for professional practice in counseling psychology. Emphasis on critical evaluation of assumptions, methods, comprehensiveness and usefulness of the theories, with reference to related research. Prerequisite: CPCE 5532

3 hrs

[back to top](#)

CPCE 5631 Advanced Counseling Practicum

Advanced supervised therapeutic counseling with individuals and supervised consultation in clinical settings. Preregistration by application at least 60 days prior to beginning of semester. (Credit/No Credit) Approval by the Division of Counseling Psychology and Counselor Education required. Prerequisite: Completion of CPCE 5532 and CPCE 5620 with grades of B or better.

3 hrs

[back to top](#)

CPCE 5632 Practicum In Group Counseling

Leading groups under supervision. Focus on problems and experiences of counselors and counseling psychologists when leading groups. Prerequisites: Completion of M.A. in Counseling; CPCE 5540. Preregistration by application at least 60 days prior to beginning of semester. Approval by the Division of Counseling Psychology and Counselor Education required.

3 hrs

[back to top](#)

CPCE 5633 Advanced Couples & Family Practicum

Advanced supervised application of theories and methods of family therapy with individuals, couples and families. Preregistration by application at least 60 days prior to beginning of semester. Approval by the Division of Counseling Psychology and Counselor Education required. Prerequisite: CPCE 5542.

3 hrs

[back to top](#)

CPCE 5634 Practicum For The Assessment Of Children And Adolescents

The practicum for assessment of children and adolescents covers the facilitation of psychological evaluations for this population and includes maintaining a caseload of assessment evaluations to complete through the CCS Assessment Center. Specialized assessment evaluations and conceptualization issues are covered in the second half of the course, with evaluations for ADHD and learning disorders emphasized. Special topics will be discussed at the end of the course. Prerequisite: CPCE 5515

3 hrs

[back to top](#)

CPCE 5639 Continuing Advanced Counseling Practicum

Supervised therapeutic counseling with individuals, beyond the advanced level. Preregistration by application at least 60 days prior to beginning of semester. Approval by the Division of Counseling Psychology and Counselor Education required. Prerequisite: CPCE 5631

1-6 hrs

[back to top](#)

CPCE 5640 Theories And Methods Of Counseling Supervision

This course offers an overview of counseling supervision theories and models, exposure to recent research and information about the supervision process, supervisory tasks and roles as well as ethical responsibilities. Admission to the doctoral or education specialist programs in the Division of Counseling, Educational Psychology and Exercise Science is required. Prerequisite: CPCE 5631

2 hrs

[back to top](#)

CPCE 5641 Supervision Practicum

This course is designed to provide students with an opportunity to practice supervision. Students will be assigned 2 to 3 counselors-in-training from a CPCE 5531/5532 practicum class to supervise over the course of a semester. The practicum instructor will provide weekly supervision. Offered: Every Fall Prerequisite: CPCE 5640

1 hr

[back to top](#)

CPCE 5645 Projective Testing

Course focuses on the diagnostic use of projective assessment techniques, with a special focus on the Rorschach Inkblot Test. Prerequisites: Enrolled in Doctoral Psych. Program, Completed CPCE 5515 and Measurement of Intelligence or Cognitive Assessment course.

3 hrs

[back to top](#)

CPCE 5650 Seminar In Current Issues In Counseling Psychology

Professional issues related to counseling psychology and counseling programs. Special emphasis on ethical and legal issues and other professional concerns of counseling psychologists and counselors.

3 hrs

[back to top](#)

CPCE 5675 Internship In Counseling Psychology

Applied experiences in a professional setting under supervision of licensed psychologists.

1-16 hrs

[back to top](#)

CPCE 5690 Special Problems

Individual studies; thesis exploration; special reading.

1-6 hrs

[back to top](#)

CPCE 5699 Research And Dissertation

By arrangement.

1-16 hrs

[back to top](#)

Curriculum and Instruction

EDUC-C&I 5504 Social Studies In the Schools

Trends and curricular developments in social studies. Focus on the development of social studies concepts, the development of critical thinking skills, and analysis of values.

3 hrs

[back to top](#)

EDUC-C&I 5505 Introduction To Curriculum Theory

An introduction to curriculum theory with the recognition that knowledge, power, ideology and schooling are connected to patterns of complexity and contradictions. Emphasis will be placed on curricula that cultivate theoretical discourses about the quality and purpose of schooling and human life.

3 hrs

[back to top](#)

EDUC-C&I 5506 Curriculum Design

This course is designed to enhance educators' skills in the areas of curriculum design and interpretation. Students will apply and adapt strategies for curriculum development as well as for interpreting and adapting existing curricula.

3 hrs

[back to top](#)

EDUC-C&I 5508 Curriculum And Methods For Teaching The Non-Motivated Learner

Analysis of materials relevant to reluctant learners; student-teacher prepared consumable materials; current research; methods for presenting material.

3 hrs

[back to top](#)

EDUC-C&I 5509 Reducing Risk Factors For Students In Educational & Community Stn

The course offers an overview of current research and of special programs that deal with students who are likely to fail at school or in life. The roles of the larger society in helping create such problems will be considered. There will be an emphasis on early identification of such students and a consideration and evaluation of a number of programs designed to help them. The course will also present descriptions of the roles that educators can implement in programs designed for prevention and intervention.

3 hrs

[back to top](#)

EDUC-C&I 5511 Developing Multidisciplinary Problem Solving Skills

Development of heuristic strategies in problem analysis, information processing, modeling and logical thinking. Study of methods and materials for teaching problem solving strategies, with applications from several school curriculum areas and instructional settings. Use of microcomputers to develop skills.

3 hrs

[back to top](#)

EDUC-C&I 5512 Strategies For Effective Classroom Management

The course presents several current approaches to classroom management and how they might be applied to the classroom. The approaches are evaluated in terms of psychological theory and research. Direct experiences with discipline problems are offered through simulation and role-playing.

3 hrs

[back to top](#)

EDUC-C&I 5513 Effective Communication In The Classroom

This course will emphasize the relationship between communication and classroom climate, and the influence of communication on motivation and student behavior. Communication with large groups, small groups, and individuals is studied and practiced.

3 hrs

[back to top](#)

EDUC-C&I 5515 Integrated Arts As A Model For Classroom Instruction

This course provides background on theory, research and practice in arts education. Students will learn to integrate the arts across the curriculum and explore the value of the arts as conveyors of information, powerful tools of communication and bridges to the broader culture. This course will also give the students the opportunity to create, study and experience the arts as a model for classroom instruction.

3 hrs

[back to top](#)

EDUC-C&I 5517 Teaching Methods And Practices

This course is designed to present and evaluate basic instructional methods and techniques and to determine the ways in which instruction is affected by the social and cultural context of the school. Offered: Every Fall

3 hrs

[back to top](#)

EDUC-C&I 5520 English Curriculum In The Middle And High School

Advanced study of contemporary programs and procedures in specialized sectors of the secondary school curriculum. Examination of program objectives, teaching methods, and instructional materials in English. Prerequisites: A valid, regular teaching certificate; undergraduate special methods or equivalent; teaching experience or consent of the instructor.

3 hrs

[back to top](#)

EDUC-C&I 5522 Language Arts Curriculum In The Elementary And Middle School

Consideration of language concepts as they relate to the teaching of the Language Arts in Grades K through 8. Significant research and its application to current trends in teaching the language arts will be explored. Prerequisite: an undergraduate course in Language Arts or reading or consent of the instructor.

3 hrs

[back to top](#)

EDUC-C&I 5523 Advanced Literature For Children

History of children's books. Less well-known works of high quality from countries other than Europe, bilingual, and recent translations of books. Prerequisite: TCH-ED 201 or equivalent.

3 hrs

[back to top](#)

EDUC-C&I 5531 Diagnosis And Remediation Of Mathematics Learning Problems

This course addresses the problems of children, youth and adults in basic education, in learning mathematics, whether in the regular classroom or in special environments. Attention is given to the skill of identification of mathematical conceptual levels and to specific difficulties impeding normal progress. There is a focus on methods and materials of remediation in basic skills and concept development. Relevant research literature is examined.

3 hrs

[back to top](#)

EDUC-C&I 5536 Specialized Secondary School Curriculum Mathematics

Advanced study of contemporary programs and procedures in specialized sectors of the secondary school curriculum. Examinations of program objectives, teaching methods and instructional materials in Mathematics. Prerequisites: A valid, regular teaching certificate; undergraduate (Special Methods) or equivalent; teaching experience or consent of the instructor.

3 hrs

[back to top](#)

EDUC-C&I 5539 Mathematics Curriculum Development

Application of principles of curriculum development to the mathematics content and instructions. Development of a rationale for objectives and content selection and for evaluation. Study and evaluation of current programs, trends and experiments.

3 hrs

[back to top](#)

EDUC-C&I 5540 Evaluation Of Computer Software

The goals of the course are to provide students with a systematic evaluation process which analyzes the hardware resources and application needs of various user groups. This course provides the student with both an academic understanding of evaluation and requirement analysis for educational user groups. The course includes a practicum activity for application projects.

3 hrs

[back to top](#)

EDUC-C&I 5541 Teaching Mathematics With Computer

The use of a variety of technologies and the appropriate software in teaching secondary mathematics will be investigated and the resulting impact on curriculum will be covered. Prerequisite: Mathematics teaching certificate or the equivalent of an undergraduate degree in mathematics.

3 hrs

[back to top](#)

EDUC-C&I 5543 English Grammar for ESOL Teachers

This course is about teaching English grammar and methods of teaching grammar for graduates, prospective and current teachers of English to speakers of other languages. It includes analysis of the major grammatical structures of American English, discussion of the role of teaching grammar, effective classroom methods and techniques for the English as a second/foreign language classroom.

3 hrs

[back to top](#)

EDUC-C&I 5544 Theory and Research in Second Language Teaching and Learning

This course covers both second language learning theories and second language research and design. It will also contain a survey of both qualitative and quantitative research literature.

3 hrs

[back to top](#)

EDUC-C&I 5545 Linguistics for ESOL Teachers

This course is an introduction to linguistic theories focusing on topics that are particularly relevant to ESOL teachers in culturally and linguistically diverse settings. It also covers applying these theories to practice in ESOL classrooms. The contents include basic practical knowledge in phonetics, phonology, morphology, syntax, pragmatics and semantics.

3 hrs

[back to top](#)

EDUC-C&I 5546 Intercultural communication

This course serves as an introduction to the background of English language learners (ELL) from many countries of the world. It also serves to facilitate ESOL students' success in ELL and mainstream classrooms. The course will introduce culture in general at first and then focus on how to better understand the ELL students' cultures. Class participants will learn to develop lessons that enhance intercultural communication and understanding among all students.

3 hrs

[back to top](#)

EDUC-C&I 5547 Second Language Acquisition

The course focuses on the foundations of second language learning and teaching. Major theoretical approaches to second language acquisition and second language learning will be discussed. The course is also one of the requirements for an endorsement to teach in English as a second language classroom.

3 hrs

[back to top](#)

EDUC-C&I 5548 English As A Second Language In Content Areas

Theoretical perspectives of teaching, learning and researching literacy development. The focus of this course will be on content based English as a second language instruction. The course is one of the requirements for an endorsement to teach in an English as a second language classroom.

3 hrs

[back to top](#)

EDUC-C&I 5549 Practicum In English As A Second Language

A four-week practicum for teachers and researchers in the field of second language learning and teaching. Students will have the opportunity to develop their own teaching plan of action according to the curriculum guidelines of the program in which they participate. Students will develop a portfolio and reflection piece about their own learning in the practicum.

3 hrs

[back to top](#)

EDUC-C&I 5551 Science Curriculum In The Middle And High School

Advanced study of contemporary programs and procedures in specialized sectors of the secondary school curriculum. Examination of program objectives, teaching methods and instructional materials in Natural Sciences. Prerequisites: A valid, regular teaching certificate; undergraduate special methods or equivalent; teaching experience or consent of the instructor.

3 hrs

[back to top](#)

EDUC-C&I 5553 Curriculum And Instruction In Science

Advanced study of contemporary programs and practices in science education at all instructional levels. Examination of program objectives and teaching methods and development of instructional materials for classroom use. Prerequisites: A science teaching methods course and teaching experience, or consent of instructor.

3 hrs

[back to top](#)

EDUC-C&I 5554 Assessment In Science Education

Advanced study of science education assessment with option for elementary or secondary emphasis.

3 hrs

[back to top](#)

EDUC-C&I 5560 Teaching And Learning In The Urban Classroom

Emphasis will be placed on examining beliefs, assumptions, values and their influence on the processes of teaching, perception of the urban learner, understanding the characteristics of the urban learner, and processes for transforming pedagogical practices, including fostering collaboration between home and school. Prerequisites: Foundations EDUL5525, 5526, 5527, or 5528 and Instructor Approval.

3 hrs

[back to top](#)

EDUC-C&I 5561 Teaching Diverse Populations In Today's Classrooms

This course focuses on culturally responsive pedagogies for meeting the academic needs and learning styles of culturally diverse students. Emphasis will be placed on critical investigation of the role of socio-cultural dynamics on learning and teaching, and design of curriculum, materials, and pedagogical and disciplinary practices that affirm student's culture. The ultimate goal of the course is to examine ways in which a culture-based curricular perspective provides powerful scaffolding for enabling and empowering educational experiences for diverse students. Prerequisites: Foundations EDUL 5525, 5526, 5527, or 5528 and Instructor Approval.

3 hrs

[back to top](#)

EDUC-C&I 5562 Teaching For Equity And Social Justice

This course examines a systems approach to the design, development, assessment, and implementation of school practices that support equity and social justice for all students. It investigates issues of educational inequities and educational empowerment. Practitioners will develop the knowledge, skills and dispositions needed for empowering self and students. Emphasis will be placed on social action learning, empowerment and agency. Prerequisites: EDUC-UL 5525, EDUC-UL 5526, or EDUC-UL 5528 and EDUC-CI 5560 or EDUC-CI 5561 or EDUC-CI 5562 and Instructor approval. Offered: Summer

3 hrs

[back to top](#)

EDUC-C&I 5563 Multicultural Perspectives In Education

This course provides an opportunity for students to engage in a critical and in-depth study of multicultural education. Students will examine current theoretical, conceptual, ideological, and political positions that help frame the multicultural education debate. The ultimate goal of the course is to help students develop critical and multiple perspectives about education in a democratic society with the aim of transforming curricular and pedagogical practice. Prerequisites: EDUC-UL 5525, EDUC-UL 5526, EDUC-UL 5527 or EDUC-UL 5528 and EDUC-CI 5560 or EDUC-CI 5561 and instructor approval.

3 hrs

[back to top](#)

EDUC-C&I 5565 Social Studies Curriculum Elementary Education

Trends and new curricular developments in elementary school social studies. Focus on integration of social science concepts, the development of critical thinking skills, and analysis of values.

3 hrs

[back to top](#)

EDUC-C&I 5566 Social Studies Curriculum In The Middle And High School

Advanced study of contemporary programs and procedures in specialized sectors of the secondary school curriculum. Examinations of program objectives, teaching methods, and instructional materials in Social Studies. Prerequisites: A valid, regular teaching certificate; undergraduate special methods or equivalent; teaching experience or consent of the instructor.

3 hrs

[back to top](#)

EDUC-C&I 5570 Curriculum And Instruction In Technology

Study of contemporary programs and practices of technology usage in education at all instructional levels. Examination and application of technologically enhanced teaching methods, assessment, and curriculum development for classroom use. Prerequisites: teaching methods or consent of instructor. Offered: On demand

3 hrs

[back to top](#)

EDUC-C&I 5571 Cognition & Technology

The purpose of this course is to respond to current research in the field of cognition and educational technology and design an evaluative research response to a local technology program. The educators will define the concepts concerning implementation of new technologies into learning environments and the mediational effects on the types and quality of learning that result from that process.

3 hrs

[back to top](#)

EDUC-C&I 5572 Assessing The Role Of Technology In Education

The purpose of the course is to develop an understanding of changing role of technology in education by reviewing current and historical articles on the topic. This includes a historical analysis of trends and expectations within educational settings and outside educational settings and defining the educator's understandings of the role of technology in educational settings, past, present and future. Prerequisites: None

3 hrs

[back to top](#)

EDUC-C&I 5573 Development Learning Tech Progs: Traditional & Non-Trad Settings

The purpose of this course is to develop understandings of currently implemented educational technologies including both software and hardware configurations. The educators will review current use of a variety of current technologies integrated into traditional settings and non-traditional settings and evaluate their effectiveness in developing standards-based learning outcomes and constructivist-based learning outcomes.

3 hrs

[back to top](#)

EDUC-C&I 5575 Internship - Early Childhood

Applied experiences in a planned, supervised curriculum program. Seminar accompanies internship experiences. Prerequisite: Consent of advisor.

3-16 hrs

[back to top](#)

EDUC-C&I 5576 Administration Of Early Childhood Programs

This course is designed to examine the administrative functions and decisions involved in effectively directing an Early Childhood Program. Students may plan their own Early Childhood Program incorporating philosophical values and beliefs.

3 hrs

[back to top](#)

EDUC-C&I 5577 Early Childhood Special Education Methods

EDUC-C&I 5577 provides an overview of the field of early childhood special education, with an emphasis on inclusive education for young children ages birth-third grade. This emphasis includes methods and practices for providing services for young children with special needs and their families and the adaptation of developmentally appropriate curriculum and the classroom environment. Historical, political, and theoretical contexts are provided as framework for the course.

3 hrs

[back to top](#)

EDUC-C&I 5578 Play In Early Childhood Education

The purpose of this course is to study the various play theories and developmental levels of play. Students plan play activities and participate in Early Childhood programs.

3 hrs

[back to top](#)

EDUC-C&I 5579 History, Theories, And Issues In Early Childhood Education

This course is designed to explore the historical and theoretical principles in early childhood education. Current issues in the field will be examined and discussed.

3 hrs

[back to top](#)

EDUC-C&I 5580 Curriculum In Early Childhood Education

The content of this course will include an exploration of appropriate curriculum and instruction of early childhood classrooms. Students will recognize, understand and analyze the differences and similarities between early childhood curriculum and instruction methods and elementary education instruction.

3 hrs

[back to top](#)

EDUC-C&I 5581 Infant-Toddler Programs: Research Theory And Practice

This course is designed to investigate the research relevant to infant and toddler programs, learn about the appropriate curriculum and teaching methods, and visit infant and toddler programs.

3 hrs

[back to top](#)

EDUC-C&I 5582 Program Models In Early Childhood Education

This course is designed to explore and analyze program models in early childhood education in terms of their theoretical and/or philosophical bases and their transformation into practice. During this process, students are encouraged to evaluate their own personal views and values concerning teaching/learning issues in early childhood education.

3 hrs

[back to top](#)

EDUC-C&I 5583 Supervision In Early Childhood Education

The purpose of this course is to study the process of effective supervision of staff in the diverse contexts of early childhood education. This course is designed to prepare students to supervise teachers, staff, paraeducators, or volunteers in early childhood education programs. Students will explore theories of adult development, the supervision process, professional development, and the evaluation process.

3 hrs

[back to top](#)

EDUC-C&I 5584 Early Childhood Culminating Project

This seminar is designed for graduate students to explore current issues and topics pertaining to the field of early childhood education. An in-depth investigation of ways to work with community agencies will be included.

1-6 hrs

[back to top](#)

EDUC-C&I 5585 Teaching and Learning with Techonolgy

This is an introductory course that covers the fundamental of standard educational computer applications in addition to providing the basic concepts regarding classroom hardware and software integration. This course familiarizes students with the National Educational Technology Standards For Teachers and Students. Because of the computer's increasing importance in all phases of education, hands-on experiences are required throughout the course.

3 hrs

[back to top](#)

EDUC-C&I 5589 Special Topics In Education

A course designed to deal with a curriculum topic which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed on the semester bulletin.

1-6 hrs[back to top](#)**EDUC-C&I 5590 Seminar**

Discussion and evaluation of literature in curriculum. Prerequisite: EDUC-CI 5505 or consent of instructor.

3 hrs[back to top](#)**EDUC-C&I 5591 Curriculum & Instruction For The 21St Century**

A seminar including critical examination of current issues affecting schools such as education for democracy and global interdependence in a diversified society, curriculum and instruction in a technological, post-industrial society; the changing demographics of the U.S. and the implications for curriculum and instruction; and the roles of teachers and administrators in the school of the future. Students will be actively involved in "research-in-action" study of both theory and practice.

3 hrs[back to top](#)**EDUC-C&I 5595 Action Research For Practitioners**

This course is designed to enable practitioners to engage in systematic inquiry on some aspect of their practice in order to find out more about that practice and eventually improve it. Participants in the course are expected to put their assumptions, ideas and practices to the test by gathering, analyzing and drawing conclusions from evidence.

3 hrs[back to top](#)

EDUC-C&I 5596 Classroom Assessment

This course is designed to help practitioners develop an understanding of the various roles of classroom assessment, strengthen their own assessment strategies & be able to better use data in the development of curriculum that is appropriate for all learners. Students will develop a more clear understanding of the relationship of curriculum, instruction & assessment & ways in which good assessments can help diverse learners.

3 hrs

[back to top](#)

EDUC-C&I 5598 Individual Studies

Review of the research and trends relative to curriculum in education. By prior arrangement with instructor.

1-6 hrs

[back to top](#)

EDUC-C&I 5618 Survey Of Research In Curriculum

Review and analysis of research in curriculum theory and methods.

3 hrs

[back to top](#)

EDUC-C&I 5619 Systemic Curriculum Evaluation and Review

This course focuses on current practices in systemic curriculum review at the grade, school, district or state level in order to better serve the needs of diverse learners. Emphasis will be placed on the processes of curriculum review, curriculum change, implementation, evaluation of changes, and on-going long-range curriculum planning and review.

3 hrs

[back to top](#)

EDUC-C&I 5620 Seminars In Theories Related To Curriculum

Study of major historical developments in curriculum and their influence on contemporary models and practices.

Prerequisite: EDUC-CI 5504 or EDUC-CI 5505.

3 hrs

[back to top](#)

EDUC-C&I 5640 Apprenticeship And Conference In College Training

Apprenticeship experience in preparing, conducting, and evaluating college teaching under the direction of and in conference with supervising professors. Some attention to student personnel and administration in higher education. By arrangement.

2-5 hrs

[back to top](#)

EDUC-C&I 5690 Special Problems

Basic theory and practice in reading instruction, with attention to individual needs. Prerequisite: EDUC 333 or equivalent to TECH-ED 415.

3 hrs

[back to top](#)

Research and Psychology

EDUC-R&P 5502 Advanced Educational Psychology

Critical examination of the contributions of psychological principles and findings to the field of education.

3 hrs

[back to top](#)

EDUC-R&P 5505 Statistical Methods I

Non-theoretical approach to statistical procedure, including introduction to simple analysis of variance.

3 hrs

[back to top](#)

EDUC-R&P 5508 Principles And Methods Of Research

Introduction to the analysis of research literature including types of research, methodology, design and data analysis.

3 hrs

[back to top](#)

EDUC-R&P 5510 Child Behavior And Development

Growth, maturation, and learning processes in children.

3 hrs

[back to top](#)

EDUC-R&P 5512 Adolescent Development And The School

An overview of adolescent development from preadolescence to adulthood, focusing on major theories and aspects of adolescent development, critical issues of adolescence today, and the role of professional educators in facilitating positive development.

3 hrs

[back to top](#)

EDUC-R&P 5513 Life Span Human Development

This course introduces students to the theories and research of biological, cognitive, social and personality development across the lifespan, within the layers of context of people's lives. Special attention is given to the role in development of social class, gender, ethnicity and culture. Offered: Every Winter

3 hrs

[back to top](#)

EDUC-R&P 5522 Principles Of Testing

Measurement theory, uses and limitation of assessment procedure.

3 hrs

[back to top](#)

EDUC-R&P 5575 Internship

Applied experiences in a planned, supervised program in research or educational psychology. Prerequisite: Consent of advisor.

3-16 hrs

[back to top](#)

EDUC-R&P 5576 Educational Technology

History of responsive technology in education, principles of learning and strategies in programming instructional materials, methods of evaluation, and current research methodologies in educational technology.

3 hrs

[back to top](#)

EDUC-R&P 5589 Special Topics In Education

A course designed to deal with a topic in educational research or educational psychology which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed on the semester bulletin.

1-6 hrs

[back to top](#)

EDUC-R&P 5589 AD Special Topics in Education

EDUC-R&P 5589 PR Special Topics In Education

1-6 hrs

[back to top](#)

EDUC-R&P 5589 SE Special Topics In Education

1-6 hrs

[back to top](#)

EDUC-R&P 5590 Individual Studies

Review of the research and trends relative to selected problems in educational research or psychology: By prior arrangement with instructor.

1-6 hrs

[back to top](#)

EDUC-R&P 5604 Cognitive Processes In Learning And Instruction

Examination of current research and theory in cognitive aspects of learning, thinking, comprehension and classroom processes, especially as they relate to classroom settings. Designed to present background essential for an understanding of much contemporary inquiry in many fields of educational thought and practice. Prerequisites: EDRP 5502, 5210 and 5512..

3 hrs

[back to top](#)

EDUC-R&P 5605 Quantitative Analysis I: Regression And Analysis Of Variance

This graduate level statistics course for students in education and the behavioral sciences provides a strong conceptual understanding of two major statistical procedures within the context of the general linear model: multiple regression and numerous analysis of variance (ANOVA) models. Students will learn to select appropriate statistical techniques, test the assumptions of the techniques, analyze data using statistical software, and report the results of their analyses in the format of the American Psychological Association (APA, 2002). Prerequisites: An introductory inferential statistics course (EDUC-RP 5505, PSYCH 316) and basic knowledge of research design (EDUC-RP 5505, PSYCH 302). Cross-listed: PSYCH 5516 Offered: Fall.

3 hrs

[back to top](#)

EDUC-R&P 5606 Quantitative Analysis II : Multivariate Data Analysis

This graduate level statistics course for students in the behavioral sciences and education provides a strong conceptual understanding of advanced topics in regression (interaction effects, logistic regression, path analysis) and various multivariate techniques (MANOVA, canonical correlation, factor analysis). Students will complete a series of data based projects that allow them to demonstrate their skills in analysis, reporting, and interpretation of findings. Prerequisites: EDRP 5605/PSY5516 and basic knowledge of and SPSS OR SAS software and research design (EDUC-RP 5505, PSYCH 302). Cross-listed: PSYCH 5517 Offered: Winter.

3 hrs

[back to top](#)

EDUC-R&P 5608 Introduction To Graduate Research

This course is an introduction to quantitative and qualitative research methods. Students in the course develop a research proposal on an approved topic of their choice.

3 hrs

[back to top](#)

EDUC-R&P 5610 Research Design & Methodology

An introduction of methodology and design in the behavioral and health sciences. The course will cover: (a) the key terms and concepts of design and methodology, (b) how to apply those concepts to the construction and criticism of designs., and (c) ethical issues for conducting human and animal research. Cross-listed with PSYCH 5601. Prerequisite: EDUC-RP 5605

3 hrs

[back to top](#)

EDUC-R&P 5611 Structural Equation Models

Students will learn core techniques in structural equation modeling, including; path analysis, confirmatory factor analysis, structural regression models; and be introduced to advanced topics like multi-group SEM and latent growth models. There will be multiple lab sessions using appropriate computer applications. Prerequisites: EDRP 5606/PSYCH 5517

3 hrs

[back to top](#)

EDUC-R&P 5615 Qualitative Research Theory & Design Educational Setting. Part 1

Students will be introduced to qualitative research theory and design. Prerequisite: EDUC-RP 5505 and EDUC-RP 5508

3 hrs

[back to top](#)

EDUC-R&P 5616 Qual Data Collection And Analysis In Educational Settings. Part 2

Students will gain experience in qualitative data collection and analysis. Prerequisite: EDUC-RP 5615

3 hrs

[back to top](#)

EDUC-R&P 5625 Program Evaluation For Education & Social

Program evaluation is an applied research area that focuses on providing summative and formative data about the progress of an organization or program. This doctoral seminar will focus on learning to identify the goals, objectives and assumptions inherent in a program, and on designing a methodology to assess progress towards the goals. All students will develop a comprehensive evaluation plan for a program of their choice. Prerequisites: EDUC-RP 5505, EDUC-RP 5522, and EDUC-RP 5508 or EDUC-RP 5608.

3 hrs

[back to top](#)

EDUC-R&P 5639 Educational Psychology: Focus On College Teaching

An introduction to theories and principles from educational psychology as they relate to learning, motivation, assessment, and instruction. Prerequisite: Doctoral Student Status

2-3 hrs

[back to top](#)

EDUC-R&P 5640 Apprenticeship And Conference In College Training

Apprenticeship experience in preparing, conducting, and evaluating college teaching under the direction of and in conference with supervising professors. By arrangement. Pre-requisites: EDUC-RP 5639

1-3 hrs

[back to top](#)

EDUC-R&P 5690 Special Problems

Individual studies; thesis exploration, special reading.

1-6 hrs

[back to top](#)

EDUC-R&P 5698 Dissertation In Educational Research & Psychology

By arrangement.

1-16 hrs

[back to top](#)

Special Education

EDUC-SP 5506 Iep, Transition, And The Law

This course provides a background in historical and legal issues related to the field of special education. The course will focus on issues and practices related to developing individualized programs including Individualized Family Service Plans (IFSP), Individual Education Programs (IEP), and Individual Transition Plans (ITP). Salient features of the Individuals with Disabilities in Education Act (IDEA) will be examined with respect to court cases, amendments, and reauthorization.

3 hrs

[back to top](#)

EDUC-SP 5507 Introduction To Mild/Moderate Cross-Categorical Disabilities

This is the initial foundations course in the master's degree sequence in special education of children and youth with mild/moderate disabilities including learning disabilities (LD), emotional/behavioral disorders (EBD), mental retardation (MR), and physical and other health impairments (POHI). It is designed to provide candidates who are new to the field of special education with a foundation for working with students who have exceptional learning needs.

3 hrs

[back to top](#)

EDUC-SP 5508 Evaluation Of Abilities & Achievement In Special Education

This is a foundations course in the master's degree sequence in special education of children and youth with mild/moderate disabilities. The purpose of this course is to provide understanding and practice in formal and informal evaluation. This course is applicable to candidates who plan to work either directly (special educators) or indirectly (special education administrators) with students with exceptional learning needs and to engage in critical analysis of assessment issues confronting the field of special education. Prerequisites: Intro to MM/CC Disabilities & Methods of Teaching Students with MM/CC Disabilities

3 hrs

[back to top](#)

EDUC-SP 5509 Cognition & Lang Dev In Mild/Mod Cross-Categorical Disabilities

This is a specialized methods course in the master's degree sequence in special education of children and youth with mild/moderate disabilities. This course examines normal and atypical development and cultural and linguistic diversity of students with exceptional learning needs. Candidates will practice collaborative and reflective decision-making and problem solving in areas such as: (a) developmentally sequenced activities, (b) receptive and expressive language, and (c) communication and augmentative communication skills. Prerequisites: Intro to MM/CC Disabilities & Methods of Teaching Students with MM/CC Disabilities

3 hrs

[back to top](#)

EDUC-SP 5510 Apprenticeship Teaching In M/M Cross-Categorical Disabilities

The purpose of this course is to provide a field-based experience in a setting with students with mild/moderate cross-categorical disabilities. This field experience affords candidates classroom experience either in their own instructional settings or under the tutelage of a master teacher. Placement sites reflect the multicultural diversity found in special education classrooms (K-12). Prerequisites: TCH-ED 404 and Introduction to MM/CC Disabilities.

1-4 hrs

[back to top](#)

EDUC-SP 5513 Methods Of Teaching Students M/M Cross-Categorical Disabilities

This is the initial methods course in the master's degree sequence in special education of children and youth with mild/moderate disabilities. The central purpose of this course is to present unit-wide academic and behavioral strategies from eclectic theoretical perspectives. Candidates will examine validated practices and learn to apply such practices to plan instruction, deliver instruction, and evaluate student and teacher performance.

3 hrs

[back to top](#)

EDUC-SP 5514 Soc & Affective Interventions M/M Cross-Categorical Disabilities

This is a specialized methods course in the master's degree sequence in special education of children and youth with mild/moderate disabilities. The purpose of this course is to provide candidates with behavioral assessment strategies and behavior management techniques. Candidates will learn validated practices for managing challenging behaviors, facilitating formal behavioral assessment, creating positive behavioral supports, conducting functional behavioral assessment, developing behavior intervention programs, and applications in social skills training.

3 hrs

[back to top](#)

EDUC-SP 5516 Philosophical & Family Issues In Special Education

This is a methods course in the master's degree sequence in special education of children and youth with mild/moderate disabilities. The course presents principles and procedures for fostering collaborative partnerships among family members, caregivers, educators, and human service personnel that lead to outcomes of individual and mutual empowerment. Candidates will engage in reflective thinking on their personal philosophical beliefs and interweave these beliefs with the skills needed to work with the multicultural issues facing families of children and youth with mild/moderate cross-categorical disabilities.

3 hrs

[back to top](#)

EDUC-SP 5517 Characteristics, Hist & Thrys: Emotional Disturbance In Children

An investigation of theories, classification, etiology, incidence, and characteristics of children with emotional/ behavioral disorders.

3 hrs

[back to top](#)

EDUC-SP 5570 Practicum In M/M Cross-Categorical Disabilities

This is the final clinical course in the master's degree sequence in special education of children and youth with mild/moderate disabilities. The purpose of this course is to provide a field-based experience in a setting where candidates will be fully responsible for designing curriculum and teaching students with mild/moderate cross-categorical disabilities. Placement sites reflect the multicultural diversity found in special education classrooms (K-12). This course requires candidates to apply content learned throughout the master's degree program in an authentic setting.

1-6 hrs

[back to top](#)

EDUC-SP 5589 Special Topics In Education

A course designed to deal with a special education topic which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed on the semester bulletin.

1-6 hrs

[back to top](#)

EDUC-SP 5598 Individual Studies

Review of the research and trends relative to selected problems in special education. By prior arrangement with instructor.

1-6 hrs

[back to top](#)

Teacher Education

TCH-ED 5404 Education Of The Exceptional Child And Youth

Students will be introduced to identification and educational intervention procedures for educating exceptional children and adolescents in mainstream classroom situations. Fall and Winter.

3 hrs

[back to top](#)

TCH-ED 5412 Language Arts In The Elementary And Middle School

Provides instruction in planning, implementing and assessing language arts activities. Critical analysis in classroom settings is emphasized. Other issues discussed include: literature-based instruction, multicultural perspectives, special needs students and professional behaviors. Fall.

3 hrs

[back to top](#)

TCH-ED 5413 Mathematics in the Elementary School

Mathematics-specific pedagogy. Methods, techniques, tools and materials for the effective teaching of mathematics. Emphasis on problem solving and reasoning skills in applying mathematics and on teaching in the context of diverse student backgrounds. Four contact hours per week include a two-hour laboratory. Fall.

3 hrs

[back to top](#)

TCH-ED 5417 Science Methods In The Elementary School

The course prepares pre-service teachers to teach science from a constructivist, inquiry-oriented perspective.

3 hrs

[back to top](#)

TCH-ED 5418 Social Studies Methods In The Elementary And Middle Schools

A critical analysis of current practices, teaching methods, materials and the relationship of the social sciences to social studies. Emphasis is on understanding cultural diversity and cultural influences on learning. The planning, implementation and evaluation of an interdisciplinary social studies unit of instruction, focusing on competencies and skills needed for the 21st Century. Fall.

3 hrs

[back to top](#)

TCH-ED 5420 Adolescent Development

Various aspects of physiological, emotional, cognitive, social and moral development in adolescence will be considered. Attention is focused on a conception of adolescence that is grounded on current research and theory. Fall.

3 hrs

[back to top](#)

TCH-ED 5427 Reading In The Secondary School

An examination of the reading process and study of methods and materials used by the secondary school classroom teacher in assessing student reading ability, determining the readability of content area materials and teaching students of all reading levels how to comprehend their textbooks and other printed instructional materials in various content area subjects. Winter.

3 hrs

[back to top](#)

TCH-ED 5432 Special Methods Of Teaching English to Middle School and High School Students

This course stresses the understanding, skills and information pertinent to teaching English/language arts in middle schools and junior and senior high schools. Fall.

3 hrs

[back to top](#)

TCH-ED 5433 Special Methods Of Teaching Middle and Secondary Mathematics

Provides students the opportunity to develop and present lessons in various high school mathematics topics. The emphasis is on modeling the concepts introduced and on using strategies that enable students to discover generalizations for themselves. Fall.

3 hrs

[back to top](#)

TCH-ED 5435 Special Methods Of Teaching Middle and Secondary Science

Provides an opportunity for future science teachers to refine their skills as science educators and at the same time to reflect upon the ways and whys of teaching science. Offered: Fall

3 hrs

[back to top](#)

TCH-ED 5436 Special Methods Of Teaching Social Studies to Middle/Secondary School Students

The primary goal of this course is to enable preservice social studies teachers to reflect critically on curriculum and pedagogy in secondary social studies. Students will be introduced to current practices and issues in secondary school social studies. Fall.

3 hrs

[back to top](#)

TCH-ED 5440 Introduction To Early Childhood Education

Introduction to the field of early childhood care and education, birth to age 8. Designed to familiarize future practitioners with the unique characteristics of early childhood education and its practice.

3 hrs

[back to top](#)

TCH-ED 5441 Literacy Development I

An introduction to how language is acquired and how to facilitate oral language expression in early childhood classrooms.

3 hrs

[back to top](#)

TCH-ED 5442 Observation, Assessment & Screening In Early Childhood Classrooms

This course is designed to identify developmentally appropriate ways to measure and evaluate child growth and development.

3 hrs

[back to top](#)

TCH-ED 5445 Science In Early Childhood And Elementary Schools

Focus on ways of involving young children in science activities and experiences designed to promote curiosity, investigation and self-awareness as they explore their world.

3 hrs

[back to top](#)

TCH-ED 5447 Social Studies In Early Childhood & Elementary Schools

This course is designed to help students understand basic social studies concepts and pedagogy for young learners.

3 hrs

[back to top](#)

TCH-ED 5450 Integrating The Curriculum In Early Childhood Education

A culminating curriculum course for early childhood students. The overall goal is to help students become more aware, skilled and informed about developmentally and educationally appropriate practice and curriculum for children during early childhood. Its focus is on constructing an integrated curriculum. A field-based experience is included.

3-4 hrs

[back to top](#)

TCH-ED 5451 Child Guidance Within The Classroom

Designed to help students examine and evaluate guidance techniques and teaching strategies used in classrooms for young children. Preventive measures in classroom management will be stressed.

3 hrs

[back to top](#)

TCH-ED 5452 Family And Program Relationships In Early Childhood Education

Provides insight into the challenge of parenting, knowledge about the development and implementation of parent education and support programs, and the significance of school-family relationships. In addition, this course seeks to facilitate students' understanding of and sensitivity to parents' perspectives regarding the care and education of their young children. (Concurrent enrollment in TCH-ED 452, Learning from Parents, required).

4 hrs

[back to top](#)

TCH-ED 5453 Learning From Parents

Designed to provide students with direct interactions with parents whose children are participating in early childhood programs, birth to age 8. Emphasis is placed upon students' understanding of, and sensitivity to, parents' perspectives regarding the care and education of their young children and recognition of parents as significant informants about their children. (Concurrent enrollment in TCH-ED 452, Family and Program Relationships, required).

2 hrs

[back to top](#)

TCH-ED 5454 Human Relations In The Early Childhood Classroom

Students will analyze the connections between an effective helping relationship and effective teaching in the early childhood classroom. Effective interpersonal communication skills will be identified and practiced. The development of self-concept will be discussed.

3 hrs

[back to top](#)

TCH-ED 5457 Infant And Toddler Care And Education

In this course, students will investigate infant and toddler care and education theories and practices. Students will learn about appropriate curriculum and teaching methods, visit infant and toddler programs, learn about state regulations and national standards for quality, and complete an environment rating scale.

3 hrs

[back to top](#)

TCH-ED 5458 Practicum For Learning About Infants And Toddlers

The purpose of this course is to learn about child care and education practices in various centers. We will discuss how practices are influenced or constrained by human biology and developmental stages, as they are by ecological and environment pressures such as mothers' work roles. The central themes of the course can be summarized by the phrases "purposeful care practices" and the "optimal practices for infants and toddlers."

1 hr

[back to top](#)

TCH-ED 5459 Early Childhood Program Management And Advocacy

Students will begin to explore basic early childhood program components. Different types of advocacy will be presented, discussed, and implemented. Prerequisite: TCH-ED 440

2 hrs

[back to top](#)

TCH-ED 5460 Middle School Curriculum

This course offers the pre-service teachers an overview of middle school goals, basic principles, and organizations. The course explores interdisciplinary teaming, flexible scheduling, exploratory and advisory programs, and other aspects of the organization within the context of middle school goals and practices. Offered: Summer/Fall

2 hrs

[back to top](#)

TCH-ED 5462 Middle School Principles And Organization

This course offers the pre-service teachers an overview of middle school goals, basic principles, and organizations. The course explores interdisciplinary teaming flexible scheduling, exploratory and advisory programs, and other aspects of the organization within the context of middle school goals and practices Offered: Summer/Fall

2 hrs

[back to top](#)

TCH-ED 5470 Philosophy And History Of Science And Technology

This course uses an historical survey to introduce the main philosophical interpretations of the nature and structure of both science and technology. Core concepts such as prediction, explanation, progress, truth, and utility will be examined in light of various philosophical perspectives. Following this, case study methodology will be used to examine interactions among science, technology, and society. Although the major focus will be upon modern Western culture, some attention will be paid to earlier and non-Western cultures. Case studies to be examined include: under the topic of Risk: Perception and Estimation, nuclear power and pesticides; the impact of high technology upon medicine; and the estimated cost/benefit of computer-mediated communications, for example, the Internet. Offered: Fall Semester.

3 hrs

[back to top](#)

Urban Leadership

EDUC-UL 5501 Foundations Of School Leadership & Organization

Participants will study as cohort team members actively engaged in clinical/practical endeavors in schools, concepts and theories focused: 1) to understand and apply modern leadership and organization development theory in relation to school organizational cultures; 2) to understand both the development of productive school relationships and the theoretical concepts of the legal responsibilities of schools in the society; 3) to develop a plan for principal certification based upon participant needs and experiences; and 4) to build school cultures that are collaborative, participative, reflective, and self renewing.

3 hrs

[back to top](#)

EDUC-UL 5502 Building Administration And Management

Participants will study and apply theories and concepts as members of a Cohort Team doing clinical work in schools designed to study, learn, and practice the management and administrative responsibilities of building level leaders including principal roles, personnel issues, school business management, community relations, supervision of staff, and to know the legal responsibilities relating to teachers, student and public rights. Prerequisite: EDUC-UL 5501

3 hrs

[back to top](#)

EDUC-UL 5503 Student, Staff And Organization Development

Participants will study as a member of a cohort team doing clinical work in school and developing the ability: 1) to gain knowledge of, and practice in developing "learning organizations"; 2) to assist teachers and other staff members of a school in structuring classrooms around the learning and development of all students; 3) to lead and develop urban schools that are culturally diverse where learner outcomes and performance are not related to race, class, or gender; and 4) to provide leadership related to developing school structures that are outcome oriented. Prerequisites: EDUC-UL 5501 and EDUC-UL 5502

3 hrs

[back to top](#)

EDUC-UL 5504 Elementary School Administration

Contemporary knowledge, understanding, and competencies for elementary administration. Focus on leadership, communication, group processes, organization, fiscal, and political areas. In addition, basic roles and responsibilities of the school principalship are addressed.

3 hrs

[back to top](#)

EDUC-UL 5505 Middle School Administration

Middle school goals, effective middle school leadership, change models for staff development, relevant curricula, auxiliary and support systems.

3 hrs

[back to top](#)

EDUC-UL 5506 Secondary School Administration

Organization and objectives of secondary education; curriculum trends; role analysis; principal-staff relations. Prerequisite: EDUC-UL 5501 or consent of advisor.

3 hrs

[back to top](#)

EDUC-UL 5507 Instructional Supervision

Principles of supervision, factors influencing effectiveness of instruction, including the evaluation of teachers.

3 hrs

[back to top](#)

EDUC-UL 5508 Special Education Administration

Provides special educators, special education and regular education administrators with knowledge and experience in the areas of special education process, policy development, data collection and funding, legal issues and program organization. Special emphasis is given to dealing with common problems which arise in public school special education programs.

3 hrs

[back to top](#)

EDUC-UL 5510 Planning Educational Facilities

Analysis of educational specifications; cooperative planning processes; analysis of trends in school facilities; financial considerations and construction research. Visitation of selected facilities included.

3 hrs

[back to top](#)

EDUC-UL 5511 Public School Business Administration

The business related aspects of administering a school district including budgeting and accounting, purchasing, transportation, insurance, and facilities management.

3 hrs

[back to top](#)

EDUC-UL 5512 School Finance

Sources of revenue for public education; distribution of monies for education; budget construction; accounting procedures; and theories for financing education.

3 hrs

[back to top](#)

EDUC-UL 5513 School Personnel Administration

Study of processes, policies and theory concerned with the personnel function in educational administration. Emphasizes the importance of human resources in developing effective educational systems.

3 hrs

[back to top](#)

EDUC-UL 5514 Public Relations In Education

Analysis of various public views on education; mass communications and social change; public relations programs.

3 hrs

[back to top](#)

EDUC-UL 5515 Governmental And Legal Aspects Of Education

Current and recent legislation affecting education; court cases related to education; emerging patterns of modern jurisprudence; administrators' responsibilities regarding legal decisions.

3 hrs

[back to top](#)

EDUC-UL 5516 Governmental And Legal Aspects Of Special Education

An examination of current and recent legislation affecting special education; emerging patterns of modern jurisprudence; and special education teacher and administrator legal responsibilities.

3 hrs

[back to top](#)

EDUC-UL 5520 School Administration In A Metropolitan Context

Sociological and philosophical study of school administration in metropolitan areas. Major trends: experimental projects conducted in urban school systems; organizational patterns and communication networks.

3 hrs

[back to top](#)

EDUC-UL 5522 School Organizational Culture As The Context Of Change

This course is designed to enable students to understand that schools as organizations develop cultures and that this culture establishes relationships and conditions in schools for students, teachers, and administrators. Students will develop an understanding of the culture of a school and its influence on efforts to achieve substantive change or reform.

3 hrs

[back to top](#)

EDUC-UL 5523 Administrative Roles For Instructional Leadership

This course meets a requirement for administrator certification in Missouri and Kansas in the area of school improvement and leadership. The course focuses upon leadership roles necessary for creating a supportive climate for change and for implementing improved instructional programs.

3 hrs

[back to top](#)

EDUC-UL 5524 Philosophical Inquiry And Education

An examination of issues, problems and controversies discussed in educational and related literature, utilizing criteria and techniques of logical and philosophical analysis. The focus is on the development of critical thinking abilities as applied to theories, positions and arguments in educational and related contexts.

3 hrs

[back to top](#)

EDUC-UL 5525 Cultural Foundations Of Education

Examines education and schooling as cultural phenomena. This course focuses on an analysis of education and schooling as both cultural transmission and cultural change and the practical implications. Also included is a philosophical/ theoretical examination of varying relationships between dominant and minority cultures.

3 hrs

[back to top](#)

EDUC-UL 5526 Philosophical Foundations Of Education

Introduction to the study of philosophical problems implicit in educational issues. Focuses on the application of a number of philosophical concepts and skills to a variety of controversies, policies, and theories in education.

3 hrs

[back to top](#)

EDUC-UL 5527 Historical Foundations Of Education

Study of the development of educational policy, practice, and theory in relation to changes in social institutions and thought. Focuses on the analysis of contemporary educational problems in the light of historical perspectives.

3 hrs

[back to top](#)

EDUC-UL 5528 Sociological Foundations Of Education

An analysis of issues involving the role of schools in society, the relationship between education and other social institutions, and contemporary social developments which have major implications.

3 hrs

[back to top](#)

EDUC-UL 5550 Organization And Administration Of Higher Education

Organizational patterns; administrative roles and procedures; establishment of policies, institutional development; and public and private financing of higher education.

3 hrs

[back to top](#)

EDUC-UL 5551 Student Affairs Administration In Higher Education

Study of the objectives, organizational structure, and current issues of student affairs administration as they relate to the academic program, the campus environment, and the needs of students; analysis of the functions of different services.

3 hrs

[back to top](#)

EDUC-UL 5555 Community College

Investigation of the purposes, programs, and the problems in the American community college movement; analysis of the structure, governance, and financial support of community colleges. Prerequisites: Doctoral status.

3 hrs

[back to top](#)

EDUC-UL 5556 The College Student

An examination of today's college students. Review and study of demographics, relationships of students and colleges, nature of student communities, new student populations and the impact of college on students and their educational development.

3 hrs

[back to top](#)

EDUC-UL 5557 Legal Aspects Of Higher Education

Study of legal issues within higher education. Focus is on state and federal law and regulations as they pertain to issues ranging from academic freedom to governance and administration. Focus on strategies for preventive law is a major component of the course.

3 hrs

[back to top](#)

EDUC-UL 5558 Advanced Student Development Theory

A focused and in-depth examination of developmental theories related to the college student. This course builds on information presented in EDUL 5556-The College Student. Offered: Winter. Prerequisite: EDUC-UL 5556

3 hrs

[back to top](#)

EDUC-UL 5559 Current Issues In Higher Education

A course responsive to the contemporary issues in college and university administration, addressing interesting and important topics that fall outside the scope of other courses in higher education curriculum. Students will have an overview of the organization of American higher education and will explore source materials available for higher education research.

3 hrs

[back to top](#)

EDUC-UL 5560 Leadership In Higher Education

Focus on leadership, connections among different approaches to leadership, different forms of power, and different leadership behaviors. A series of opportunities to think systematically about leadership and to increase a student's personal leadership capacities in higher education will be provided.

3 hrs

[back to top](#)

EDUC-UL 5562 Gender & Leadership In Educ: Implications For Prof. Effectiveness

This course is for women and men who want to understand better the unique challenges and opportunities facing leaders in today's educational organizations. Exploration of connections between gender and leadership is the focus of study. Students will probe linkages between gender and leadership for their own leadership and for organizational policy and practice.

3 hrs

[back to top](#)

EDUC-UL 5564 History Of Higher Education

Study of the evolution of the constituencies within different types of American higher education institutions. The development of professional, practical, and graduate education will be examined as will 20th century alternatives to the liberal arts colleges and research university models.

3 hrs

[back to top](#)

EDUC-UL 5566 Racial And Ethnic Diversity, And Cultural Understanding

An exploration of the ideological and historical construction of education for social equality, and subsequent issues of race, ethnicity, and class that influence colleges and universities in the U.S. today.

3 hrs

[back to top](#)

EDUC-UL 5567 Higher Education Capstone

This course will provide a culminating experience for students in the Higher Education Masters program. All aspects of higher education administration will be examined and synthesized to enhance student ability to understand and operate in a complex setting. Prerequisites: Final semester of enrollment

3 hrs

[back to top](#)

EDUC-UL 5570 Administrative Practicum Higher Education

Assigned administrative responsibilities under supervision of practicing higher educational administrator, seminar and written project accompany field experiences. Prerequisite: Consent of advisor.

3-6 hrs

[back to top](#)

EDUC-UL 5571 Internship In Higher Education

Applied experiences in a planned, supervised program. Seminar accompanies internship experiences. Prerequisite: Consent of advisor.

3-16 hrs

[back to top](#)

EDUC-UL 5572 Higher Education Administration: The Profession

A course to introduce the prospective or new student affairs professional to all facets of higher educational administration. The course provides a balance of presentations by student affairs professionals, participation and observation in a variety of higher education offices and individual research projects. It is anticipated that students will visit several institutions of higher education and will participate in a service-learning project.

3 hrs

[back to top](#)

EDUC-UL 5574 Administrative Practicum

Assigned administrative responsibilities under supervision of practicing educational administrators seminar and written project accompany field experiences. Prerequisite: Consent of advisor.

3-6 hrs

[back to top](#)

EDUC-UL 5575 Internship In Administration

Applied experiences in a planned, supervised educational administration program. Seminar accompanies internship experiences. Prerequisite: Consent of advisor.

3-16 hrs

EDUC-UL 5601 Research In Education Administration: Qualitative Theory & Design

First of two courses in advanced qualitative research in higher education and educational administration. Focus is on the theory and design of qualitative work. Students will become familiar with the various ontological, epistemological, and methodological assumptions that guide research in the social sciences and be able to make informed choices about inquiry techniques for dissertation and future research.

3 hrs

[back to top](#)

EDUC-UL 5602 Seminar In The History Of American Urban Education

A study of the historical development of American urban educational institutions and ideas and of how that development is embedded within the broader context of social, political, and economic change in the United States.

3 hrs

[back to top](#)

EDUC-UL 5603 Research In Education Administration: Qualitative Data & Analysis

Second of two courses in advanced qualitative research in higher education and educational administration. Focus is on data collection and analysis in qualitative work. Students will become familiar with various data gathering techniques and devices for interpreting qualitative data and drawing meaningful conclusions. This information will guide students in dissertation and future research. Prerequisite: EDUC-UL 5601, or permission of instructor.

3 hrs

[back to top](#)

EDUC-UL 5604 Introduction to Doctoral Study

This course is designed as an introductory course in the doctoral sequence for the EdD in Educational Administration with an emphasis in Higher Education. The course is designed to introduce students to the tasks and processes involved in the completion of the doctoral requirements. It is required for all entering doctoral students. Prerequisite: Admission to the doctoral program.

3 hrs

[back to top](#)

EDUC-UL 5616 Analysis Of Educational Theory Formation

Study and application of criteria for evaluating the adequacy of educational theories and evaluating the relevance to theories of research studies.

3 hrs

[back to top](#)

EDUC-UL 5626 Theory In Educational Administration

Leadership theories and research; bureaucracy and organizational processes; new directions in organizational analysis; sociological and psychological concepts in school administration. Prerequisites: EDUC-UL 501 or equivalent.

3 hrs

[back to top](#)

EDUC-UL 5627 Advanced Educational Supervision

Principles and concepts of educational supervision and implementation. Prerequisite: EDUC-UL 5507 or equivalent.

3 hrs

[back to top](#)

EDUC-UL 5628 The Superintendency

Analysis and overview of the nature, functions and activities of the public school superintendency including: historical and philosophical foundations; board-staff and other governing body relationships and functions; professional staff relations and management; public relations and communication; inter-governmental relations and responsibilities, and the functions of planning, direction and supervision of the instructional enterprise. Prerequisite: Consent of instructor.

3 hrs

[back to top](#)

EDUC-UL 5634 Faculty & Curricular Issues Higher Education

This course will explore different facets of college and university curricula. This course will include varying ways curriculum has been structured and the debates that have surrounded the structure and content. Faculty issues will be explored via the curriculum and will include a focus on workload policies and practices. Prerequisite: Admission to the doctoral program.

3 hrs

[back to top](#)

EDUC-UL 5635 Topics In Higher Education

Organization of higher education, public and private financing; accreditation; academic freedom; policy development; community relations; curricular patterns, selected current issues. Prerequisite: EDUC-UL 5550 or equivalent.

3 hrs

[back to top](#)

EDUC-UL 5636 Policy Issues in Higher Education

This course is intended for those whose roles as educational leaders requires them to participate in the analysis and development of policies associated with educational programs and practice. Students will be able to understand the characteristics of a well developed policy agenda, obstacles to policy implementation, and interpretations related to policy implementation. Concurrently, institutional, political, economic, social, and moral consequences of various policies will be explored. Prerequisite: Admission to the doctoral program.

3 hrs

[back to top](#)

EDUC-UL 5640 Apprenticeship And Conference In College Training

Apprenticeship experience in preparing, conducting, and evaluating college teaching under the direction of and in conference with supervising professors. Some attention to student personnel and administration in higher education. By arrangement.

2-5 hrs

[back to top](#)

EDUC-UL 5652 Financial Aspects Of Higher Education

This course is designed for graduate students with a basic understanding of the area of Higher Education Administration. The course examines basic concepts and principles of finance in higher education in the United States. Students are expected to: Develop an understanding of 1) the issues and fiscal problems of higher education, 2) the roles and responsibilities of financial officers in higher education, and 3) possible future trends in the financing of higher education. Prerequisites: Doctoral status.

3 hrs

[back to top](#)

EDUC-UL 5655 Studies In Philosophy Of Education

Study of special topics in the philosophy of education. Prerequisite: EDUC-UL 5523, EDUC-UL 5526 or permission of instructor.

3 hrs

[back to top](#)

EDUC-UL 5660 Effective Practices II

This course builds on the general understanding of leadership and professional practices developed in Leadership in Education Effective Practices I. The course addresses key leadership challenges and decision making in today's complex work world. The course uses reading on selected issues, case discussions, and role plays to move beyond theory and understanding to application and effectiveness.

3 hrs

[back to top](#)

EDUC-UL 5665 The Urban University

This course examines the development and unique aspects, characteristics and role of the urban university. In addition to an exploration of the historical relationship between urbanization in American society and university development and evolution, seminars will focus attention on undergraduate and graduate education, faculty development, community relations, and regional and economic development for urban institutions. Prerequisite: Doctoral status

3 hrs

[back to top](#)

EDUC-UL 5685 Problems And Issues In Education & Urban Leadership

This course serves as the capstone class for all doctoral students in education. The course requires analysis of successful dissertations in urban education and prepares students to write their own dissertation relative to urban study and education.

3 hrs

[back to top](#)

EDUC-UL 5690 Special Problems

Individual studies; thesis exploration, special reading.

SGS 5501 Disability And Community Support

SGS 501 Disability & Community Support is an academic service-learning course that will integrate 15 classroom contact hours with 60 service hours within a framework of Disability Studies. Offered: On Demand Prerequisites: LAW 815S or PSYCH 541 /SOC-WK 580B

3 hrs

[back to top](#)

SGS 5550 A Responsible Conduct of Research: An Introductory Overview

The aim of this course is to introduce its participants to the concept of the responsible conduct of research, its core elements, the emerging guidelines and the relevant institutional policies and procedures. It will also address how these concerns affect the researcher and the conduct of his/her/ day-to-day activities.

1 hr

[back to top](#)

SGS 5550 B Responsible Conduct of Research: Human Subjects Research

The involvement of human subjects in research is a basic feature of a wide range of academic disciplines, including research conducted within the bio-medical sciences, social/behavioral sciences, education, and the humanities. The aim of this one-credit course is to explore the responsibilities, commitments and obligations of the researcher who engages in research with human subjects.

1 hr

[back to top](#)

SGS 5550 C Responsible Conduct of Research: Research Involving Animals

The use of animals in research is characteristic of many academic disciplines, including but not limited to medicine, biological sciences, nursing, psychology, and pharmacy. The aim of this course is to explore the responsibilities, commitments and obligations of the researcher who engages in research with laboratory animals.

1 hr

[back to top](#)

SGS 5550 D Responsible Conduct of Research: Threats to Research Integrity-Conflicts of Interest and Scientific

The conduct of research requires that investigators maintain the trust, confidence and support of their peers, their funding sources, and the public at large. Failing to deal with conflicts of interest and scientific misconduct represent, perhaps, the greatest threat to the relationship of trust. This course address, from both a regulatory and process perspective, issues related the identification, prevention and management of conflicts of interest and the prevention and appropriate responses to allegations of scientific misconduct.

1 hr

[back to top](#)

SGS 5550 Responsible Conduct of Research: Conducting Research

This course addresses a variety of issues related to the initiation and management of research projects. Topics include the proper methods for the handling of the data; mentoring of research staff and trainees; collaboration amongst researchers, and the proper management of research funds.

1 hr

[back to top](#)

SGS 5550 F Responsible Conduct of Research: Reviewing and Reporting Research

This course addresses the topic of communication and dissemination of research results. Topics include the responsibility of researchers and scholars for assigning appropriate authorship, reviewing research studies for publication, grant application reviews and communication issues.

School of Medicine

School of Medicine Courses Anesthesia

ANESTH 5503 Physical Methods for Anesthesiologist Assistants

Basic concepts in electricity, gas/liquid interfaces, statistics and computer systems needed for subsequent work.

Prerequisites: Consent of the department

2 hrs[back to top](#)**ANESTH 5505 Anatomy for AAs**

Provides a specialized introduction to clinical human anatomy for students seeking a Masters of Science in Anesthesia, Clinical aspects for the anatomy with examples and case presentations will be included. Prerequisites: Acceptance to the MSA program

4 hrs[back to top](#)**ANESTH 5540 Patient Monitoring and Instrumentation I**

Students are taught the proper balance between circuits and engineering concepts and the clinical application of anesthesia instrumentation. Monitors and devices used in the operation room are studied with respect to principles of operation, calibration and interpretation of data. A hands-on laboratory is utilized to maximize direct contact to the instrumentation of the profession. Prerequisites: Consent of the department.

2 hrs[back to top](#)

ANESTH 5541 Patient Monitoring and Instrumentation II

ANES 5541 Patient Monitoring and Instrumentation II. Continuation of ANES 5540. Prerequisite: ANES 5540

2 hrs

[back to top](#)

ANESTH 5556 Physiology for Anesthesiologist Assistants I

Basic and applied human systems physiology with emphasis on topics and areas of special concern to the anesthetist.

Prerequisites: Consent of the department

3 hrs

[back to top](#)

ANESTH 5557 Physiology for Anesthesiologist Assistants II

Applied Physiology for Anesthesiologist Assistants II. Continuation of ANES 5556. Prerequisites: ANES 5503 and ANES 5556

3 hrs

[back to top](#)

ANESTH 5558 Anesthesia & Co-existing Disease I

The essential link from basic anatomy and physiology to anesthesia care. Prerequisite: ANES 5556

2 hrs

[back to top](#)

ANESTH 5559 Anesthesia & Co-existing Disease II

The essential link from basic anatomy and physiology to anesthesia care. Prerequisite: ANES 5558

2 hrs

[back to top](#)

ANESTH 5560 Introduction to Anesthesia

Introduction to basic concepts dealing with clinical anesthesia. Medical terminology, human anatomy, medical chart interpretation and drug dosage calculations. Prerequisites: Consent of the department.

2 hrs

[back to top](#)

ANESTH 5561 Orientation to Clinical Experience and Model-based Simulation

Introduction to experience in the operating room with emphasis on the fundamental procedures and techniques used in administering an anesthetic. Preoperative assessment, IV placement techniques, airway management, intraoperative patient care and postoperative management are all emphasized in this course. BLS (Basic Life Support) certification is required for course completion. Prerequisite: Consent of the department.

3 hrs

[back to top](#)

ANESTH 5562 Anesthesia Clinical Correlation I

A series of conferences presented by faculty and students that applies to anesthetic theory as it relates to the clinical experience. Specific anesthetic situations are emphasized. Prerequisite: ANESTH 5560.

1 hr

[back to top](#)

ANESTH 5563 Anesthesia Clinical Experience I

A continuation of the preparation, observation and hands-on learning format initiated in ANESTH 5561. Patient management and technical skills are refined with close attention to the didactic course work. A comprehensive clinical examination is administered at the end of the semester. ACLS (Advanced Cardiac Life Support) certification is required for course completion. Prerequisite: ANESTH 5561. BLS certification.

4 hrs

[back to top](#)

ANESTH 5564 Anesthesia Clinical Correlation II

A spectrum of case presentation conferences presented by the faculty and students dealing with basic and major problems in anesthesia management. Medical and surgical history of individual patients and the outcomes of anesthesia and surgery are emphasized. Journal Club and M&M conferences are included. Prerequisite: ANES 5562

1 hr

[back to top](#)

ANESTH 5565 Anesthesia Clinical Experience II

ANES 5565 Anesthesia Clinical Experience II (2)- An continuation of ANES 5563. A comprehensive examination is administered at the end of the semester. PALS (Pediatric Advanced Life Support) certification is required for course completion. Prerequisite: ANES 5563, BLS and ACLS certification.

8 hrs

[back to top](#)

ANESTH 5567 Anesthesia Clinical Experience III

ANES 5567 Anesthesia Clinical Experience III (4)- Extended exposure to all of the clinical subspecialties of anesthesiology (obstetrics, pediatrics, neurosurgery, cardiovascular, etc.). Students alternate through rotations at several hospitals. Prerequisite: ANES 5565; ACLS and PALS certification.

11 hrs

[back to top](#)

ANESTH 5568 Anesthesia Clinical Correlation III

Anes 5564 Anesthesia Clinical Correlation III (1)- The second year equivalent of ANES 5562. Prerequisite: ANES 5564

1 hr

[back to top](#)

ANESTH 5569 Anesthesia Clinical Experience IV

ANES 5569 Anesthesia Clinical Experience IV (8) A continuation of ANES 5567. A comprehensive clinical examination is administered at the end of the semester. Prerequisite: ANES 5567

15 hrs

[back to top](#)

ANESTH 5570 Anesthesia Clinical Correlation IV

ANES 5570 Anesthesia Clinical Correlation IV (1) The second year equivalent of ANES 5564. Prerequisite ANES 5568

1 hr

[back to top](#)

ANESTH 5571 Anesthesia Clinical Experience V

Anesthesia Clinical Experience V (8)- A continuation of ANES 5569. A comprehensive clinical examination is administered at the end of the semester. Prerequisite: ANES 5569

15 hrs

[back to top](#)

ANESTH 5573 Anesthesia Clinical Experience VI

This is a 15 credit hour clinical clerkship. Students are in the OR five days per week and will receive extended exposure to clinical subspecialties; i.e., obstetrics, pediatrics, cardiothoracic.

15 hrs

[back to top](#)

ANESTH 5575 Pharmacology for Anesthesiologist Assistants I

Basic concepts in pharmacology: principles of drug action, receptor theory, pharmacokinetics, pharmacodynamics and drug dose calculations. The course will emphasize the primary medications used to provide anesthesia and to support patients during the perioperative period.

3 hrs

[back to top](#)

ANESTH 5576 Pharmacology for Anesthesiologist Assistants II

Pharmacology for Anesthesiologist Assistants (2)- Principles of drug action, receptor theory, pharmacodynamics, and pharmacokinetics are taught. The course emphasizes those medication classes most commonly encountered within the practice of an anesthesiologist assistant. Special attention is given to anesthetic agents and adjunctive therapies. Prerequisite: Consent of the department.

2 hrs

[back to top](#)

ANESTH 5577 Cardiovascular Monitoring for Anesthesiologist Assistants

Diagnosis and practical applications of electrocardiography as monitoring techniques in the operating room. Prerequisites: Consent of the department.

2 hrs

[back to top](#)

ANESTH 5580 Fundamentals of Anesthetic Sciences I

This one hour course is a continuum of basic science conferences that cover a series of topics in basic medical science with special emphasis on the effect of anesthetics on normal physiology. They are presented by anesthesia clinical faculty, anesthesiology medical residents, and student anesthesiologist assistants.

1 hr

[back to top](#)

ANESTH 5581 Fundamentals of Anesthetic Science II

This one hour course is a continuum of basic science conferences that cover a series of topics in basic medical science with special emphasis on the effect of anesthetics on normal physiology. They are presented by anesthesia clinical faculty, anesthesiology medical residents, and student anesthesiologist assistants. Students begin this series during their third semester of the program.

1 hr

[back to top](#)

ANESTH 5582 Fundamentals of Anesthetic Science III

This one hour course is a continuum of basic science conferences that cover a series of topics in basic medical science with special emphasis on the effect of anesthetics on normal physiology. They are presented by anesthesia clinical faculty, anesthesiology medical residents, and student anesthesiologist assistants.

1 hr

[back to top](#)

ANESTH 5583 Fundamentals of Anesthetic Science IV

This one hour course is a continuum of basic science that covers a series of topics in basic medical science with special emphasis on the effects of anesthetics on normal physiology. They are presented by anesthesia clinical faculty, anesthesiology medical residents, and student anesthesiologist assistants.

1 hr

[back to top](#)

ANESTH 5585 Physiological Model-based Simulation I

ANES 5585 Physiological Model-based Simulation I- Introduction to physiological model-based simulation and procedure simulation with an emphasis on improving appropriate anesthesia-associated basic science knowledge, and manual skills in anesthesia machine checkout, anesthesia materials and equipment set up and performing anesthesia for uncomplicated surgical cases. Prerequisite: Consent of the department.

2 hrs

[back to top](#)

ANESTH 5586 Physiological Model-based Simulation II

ANES 5586 Physiological Model-based Simulation II (1) An extension of ANES 5585 with an emphasis on improving or exercising knowledge of anesthesia-appropriate basic science and the use of more advanced equipment and techniques for uncomplicated cases with an introduction to crisis management. Prerequisite: ANES 5585

2 hrs

[back to top](#)

ANESTH 5587 Model-based Critical Simulation Lab

ANES 5587 Physiological Model-based Simulation II (1) An extension of ANES 5586 emphasizing the physical techniques aspects of crisis management, team work and rescue in anesthesia, including support for and review of training in BLS and ACLS. Prerequisite: ANES 5586

2 hrs

[back to top](#)

ANESTH 5588 Ethic Law diversity for Anesth Student

ANES5588 Ethics, law and diversity for anesthesiologist assistant practice; 1) Psychological considerations in providing anesthesia care, 2) Legal obligations of anesthetists, and the rights of their patients, and 3) Ethical considerations in medicine. Grading consists of role playing, case analysis and comprehensive final exam. Prerequisite: Consent of the department

2 hrs

[back to top](#)

Basic Medical Science

BMS 9265 Human Biochemistry 1 - Medical

5 credit hours. Presents basic principles of human biochemistry. Addresses structure, function, biosynthesis, degradation and utilization of the major constituents of living systems. Employs an integrative approach to the basic science and clinical medicine aspects of normal and defective metabolism.

5 hrs

[back to top](#)

BMS 9296 Human Structure Function I

7 credit hours, (lecture, laboratory and case-based discussions). Part 1 of a 4 part series (January-February). Integrated course in anatomy, histology, embryology, physiology and biochemistry. All basic science lectures have clinical faculty to emphasize basic science concepts relevant to the practice of medicine. This unit covers introductory principles and the musculoskeletal system. This unit covers introductory principles and the musculoskeletal system

7 hrs

[back to top](#)

BMS 9297 Human Structure Function II

6 credit hours, (lecture, laboratory and case-based discussions). Part 2 of a 4 part series (February-April). Integrated course in anatomy, histology, embryology, physiology and biochemistry. All basic science lectures have clinical faculty to emphasize basic science concepts relevant to the practice of medicine. This unit covers cardiopulmonary and gastrointestinal systems.

6 hrs

[back to top](#)

BMS 9298 Human Structure Function III

5 credit hours, (lecture, laboratory and case-based discussions) Part 3 of a 4 part series (April-May). Integrated course in anatomy, histology, embryology, physiology and biochemistry. All basic science lectures have clinical faculty to emphasize basic science concepts relevant to the practice of medicine. This unit covers urinary and reproductive systems.

5 hrs

[back to top](#)

BMS 9310 Neurosciences

Fall Year Three. 9 credit hours/4 hours lecture plus laboratory sessions. Lecture-based course covering major neurological disorders and disease states. Specific neurologic diseases will be correlated to the didactic sessions by clinicians. Laboratory component is oriented around brain dissection sessions. Laboratory experience will demonstrate gross lesions and integrate the lesions with the clinical symptoms. A variety of supplemental audiovisual material also supports the class.

9 hrs

[back to top](#)

BMS 9311 Medical Microbiology

6 credit hours/6 hours lecture per week. Covers basic scientific principles of virology, bacterial physiology and genetics. Presents information relevant to the pathogenesis of human infections caused by viruses, bacteria, fungi, protozoa and helminthes. Provides a concise presentation of basic immunological principles and their clinical relevance. Provides a concise review of antimicrobial therapeutic regimens including mechanism of action and clinical settings in which specific agents might be used. Utilizes case presentations to illustrate the manner in which reasonable differential diagnoses are developed and a rational approach toward empiric antimicrobial usage.

6 hrs

[back to top](#)

BMS 9399 Human Structure Function IV

4 credit hours, (lecture, laboratory and case-based discussions) Part 4 of a 4 part series (June-July). Integrated course in anatomy, histology, embryology, physiology and biochemistry. All basic science lectures have clinical faculty to emphasize basic science concepts relevant to the practice of medicine. This unit covers the head and neck system. Includes a comprehensive examination for the Human Structure Function Series I-IV.

4 hrs

[back to top](#)

Medicine

MEDICINE 9110 Fundamentals Of Medical Practice I

5 credit hours each, 3 hours per week onsite, 2 hours lecture/small group/ other activities. Introduces students to professional values, attitudes and skills required to practice medicine competently. Develops student competence in basic communication, relationship-building and patient centered interviewing skills. Provides self-awareness and personal growth strategies that facilitate the acquisition of professional behavior affecting honesty and integrity, compassion and altruism, as well as the management of stress. Explores non-biological factors influencing health and the appreciation of different value systems and life styles. Promotes ethical considerations relating to professional behavior and student conduct as a forerunner to professional behavior. Emphasizes the team approach in solving medical problems through direct small group activities as part of weekly onsite docent experiences. Integrates patient interviews and examinations with sciences fundamental to clinical medicine, including anatomy, chemistry, psychology and sociology. Introduces the student to the normal processes of aging and incorporates onsite interactions with senior mentors. Involves students in a core curriculum that emphasizes issues related to adolescence.

5 hrs

[back to top](#)

MEDICINE 9115 Medical Terminology

1 credit hour/twice weekly each semester. Methodical introduction to the language of medicine and its usage in modern clinical documentation. Introduces word elements in a logical, graduated sequence correlated with laboratory practice. Encourages skills in etymological analysis based on the word elements presented to facilitate interpretation of composite medical terms.

1 hr

[back to top](#)

MEDICINE 9119 Learning Basic Medical Sciences

1 credit hour/1 hour per week. Provides students with an understanding of their own learning processes and those study strategies that promote maximum learning efficiency. Active participation in course increases achievement in both science and non-science courses, smoothes transition to college-level work, and further develops reasoning and thinking skills that apply to medical school

1 hr

[back to top](#)

MEDICINE 9120 Fundamentals Of Medical Practice II

5 credit hours each, 3 hours per week onsite, 2 hours lecture/small group/ other activities. Introduces students to professional values, attitudes and skills required to practice medicine competently. Develops student competence in basic communication, relationship-building and patient centered interviewing skills. Provides self-awareness and personal growth strategies that facilitate the acquisition of professional behavior affecting honesty and integrity, compassion and altruism, as well as the management of stress. Explores non-biological factors influencing health and the appreciation of different value systems and life styles. Promotes ethical considerations relating to professional behavior and student conduct as a forerunner to professional behavior. Emphasizes the team approach in solving medical problems through direct small group activities as part of weekly onsite docent experiences. Integrates patient interviews and examinations with sciences fundamental to clinical medicine, including anatomy, chemistry, psychology and sociology. Introduces the student to the normal processes of aging and incorporates onsite interactions with senior mentors. Involves students in a core curriculum that emphasizes issues related to aging.

5 hrs

[back to top](#)

MEDICINE 9210 Fundamentals Of Medical Practice III

5 credit hours, 3 hours per week onsite, 2 hours lecture. Reinforces important concepts in diversity and professionalism. Continues the team approach in solving medical problems through direct small group activities as part of weekly onsite docent experience.

5 hrs

[back to top](#)

MEDICINE 9220 Fundamentals Of Medical Practice IV

5 credit hours, 3 hours per week onsite, 2 hours lecture. Reinforces important concepts in diversity and professionalism. Continues the team approach in solving medical problems through direct small group activities as part of weekly onsite docent experiences. Integrates patient interviews and examinations with sciences fundamental to clinical medicine, including biochemistry, anatomy, physiology, biochemistry and social sciences. Exposes students to a series of interviews with seasoned professionals who address issues of professionalism and career development.

5 hrs

[back to top](#)

MEDICINE 9221 Hospital Team Experience

1 credit hour/2-week assignment in hospital. Teaches students to make good observations, interact appropriately with patients, family, and hospital staff, assist with non-physician duties, and perform technical skills appropriate to assigned departments. Facilitates understanding of allied health care personnel roles in patient care, communication among health care professionals and its influence on the delivery of health care and patient outcomes, and the hospital process and structure of authority within the hospital.

1 hr

[back to top](#)

MEDICINE 9310 History Of Medicine

In this course students will learn the ways disease has altered history and that conceptions of disease undergo constant change. Topics covered include diseases and their relationships to other medical sciences, as well as the historical and scientific developments which led to our present understanding of diseases and medicine. One hour lecture per week. Summer of Year 2.

1 hr

[back to top](#)

MEDICINE 9312 General/Clinical Pathology

Year 3 spring semester. 8 credit hours (January-February). Course consists of lectures, laboratories with case studies, special projects including integrated questions, clinical patient presentations, and examinations. Content areas emphasized include cytogenetics, infectious diseases and neoplasia.

8 hrs

[back to top](#)

MEDICINE 9313 Anatomic/Systemic Pathology

Year 3 Spring semester. 12 credit hours (March-May). Course consists of lectures, laboratories with case studies, special projects including integrated questions, clinical patient presentations, autopsy review with paper, and examinations. Content areas emphasized include cardiovascular, lymphatic, hematologic, gastrointestinal, renal, hepatic, and genitourinary systems.

12 hrs

[back to top](#)

MEDICINE 9380 Clinical Skills

5 credit hours/fallsemester. Challenges students to achieve competencies in patient history taking, physical examination, selected diagnostic studies and procedures, and other abilities. Statements of competencies in above areas specify the attitudes, knowledge and skills students will be expected to demonstrate

5 hrs

[back to top](#)

MEDICINE 9383 Continuing Care Clinic

5 credit hours /half-day per week except during vacation or out-of-town electives (beginning in Fall Semester, Year 3). Provides ambulatory and continuous care experience in general medicine clinics. The docent teams are assigned to a clinic in which students see and follow a panel of patients on a continuous basis for up to four years, where necessary, under the supervision of docents. Provides continuity of care from inpatient hospitalization to outpatient care, allowing longitudinal experience for the student and personalized care for the patients. Allows students to observe the natural progression of disease and experience the rewards and challenges of an ongoing doctor-patient relationship.

5 hrs

[back to top](#)

MEDICINE 9385 Introduction To Pharmacology

2 credit hours/independent study during Fall Semester of Year 3. Consists of self-paced, independent learning, computer-based instruction. Introductory principles of pharmacology are covered that provide students with basic knowledge and skills necessary for upcoming didactic and clinical curriculum. Students become familiar with drug information resources, pharmaceutical calculations, and prescription writing skills, and learn basic mechanisms of drug action, preventive therapeutics and pharmacokinetic principles.

2 hrs

[back to top](#)

MEDICINE 9386 An Interdisciplinary Approach to Patient Care: CUES to Healing

3 credit hours. CUES (Communication, Understanding, Education, and Self-care) is designed to enhance physician/patient communication skills. CUES increases the cultural competence of students, for example in providing care to older people and people from ethnically diverse populations.

3 hrs

[back to top](#)

MEDICINE 9390 Clinical Correlations

5 credit hours. Case-based discussions provided by clinicians that serve to reinforce basic science concepts provided during BMS 9296, 9297, 9298 and 9390.

5 hrs

[back to top](#)

MEDICINE 9401 Internal Medicine/Docent Instruction Yr 4

Students spend this two-month rotation on the medical wards at Truman Medical Center, each working as a integral member of a docent team that includes the docent, residents and attending health care staff. Year 3 and 5, and Year 4 and 6 students are paired together in a junior-senior partnership. Rounds, conference and consultations. Year 4.

5 hrs

[back to top](#)

MEDICINE 9408 Pharmacology

10 credit hours/2 months. Introduces the study of the interaction of drugs with biological systems. Provides the medical student with relevant basic pharmacology of the model drugs under clinical investigation and in use today. Includes extensive small group activities

10 hrs

[back to top](#)

MEDICINE 9471 Family Medicine

5 credit hours/1 month. Exposes students to the unique specialty that focuses on the family. Students experience the act of medicine as well as science, working with patients in the context of their family and community. Includes care of the child, the adolescent, pregnant women, young and middle aged adults, and the elderly. Addresses ambulatory medicine, prevention and health maintenance.

5 hrs

[back to top](#)

MEDICINE 9472 Behavioral Science In Medicine

5 credit hours/1 month. Teaches the basic taxonomy, assessment methods and treatment interventions of chemical dependence and major psychiatric disorders. Serves as preparation for the psychiatry rotation. Examines relevant ethical issues commonly faced in current medical practice. Utilizes case studies and a problem-centered approach in addition to clinical experience including home health care visits, supervised interviewing, and time on an inpatient chemical dependency unit. Challenges the student to achieve an integrated theoretical understanding of various approaches in behavioral sciences as a background for meeting patients needs. Teaches communication skills including education of older patients.

5 hrs

[back to top](#)

MEDICINE 9482 Patient, Physician, Society I

2 credit hours/Fall semester. Introduces students to a 7-week unit emphasizing medical decision making. Introduces students to a 6-week unit which focuses on public health. Activities include lecture, problem sets, small group projects.

2 hrs

[back to top](#)

MEDICINE 9483 Continuing Care Clinic

5 credit hours/half-day per week except during vacation or out-of-town electives. Provides ambulatory and continuous care experience in general medicine clinics. The docent teams are assigned to a clinic in which students see and follow a panel of patients on a continuous basis for up to four years, where necessary, under the supervision of docents. Provides continuity of care from inpatient hospitalization to outpatient care, allowing longitudinal experience for the student and personalized care for the patients. Allows students to observe the natural progression of disease and experience the rewards and challenges of an ongoing doctor-patient relationship.

5 hrs

[back to top](#)

MEDICINE 9484 Patient, Physician, Society II

2 credit hours/spring semester. Introduces students to a unit emphasizing medical ethics and palliative care. Activities include lecture, small group sessions, and assigned readings.

2 hrs

[back to top](#)

MEDICINE 9485 Ambulatory Care Pharmacology

2 credit hours/independent study during spring semester of Year 4. Consists of a self-paced, independent learning, computer-based instruction. Focuses on integration of patient-related data with basic science data. Students obtain skills in assessing patient risk or disease staging and selecting appropriate pharmacotherapy based on such information. The selected topics focus on outpatient pharmacotherapy of common disease states for which there are established treatment guidelines, such as hypertension, heart failure, diabetes mellitus, asthma, pain, and hyperlipidemia.

2 hrs

[back to top](#)

MEDICINE 9501 Internal Medicine/Docent Instruction Yr 5

Students spend this two-month rotation on the medical wards at Truman Medical Center, each working as an integral member of a docent team that includes the docent, residents and attending health care staff. Year 3 and 5, Year 4 and 6 students are paired together in the junior-senior partnership. Rounds, conference and consultations. Year 5.

5 hrs

[back to top](#)

MEDICINE 9503 Pediatrics Rotation

This two-month rotation is designed to help students master the skills necessary in assessing normal and abnormal development and behavioral variation in the newborn, infant and child in the outpatient clinical setting. History-taking and physical examination of infants, children and adolescents are emphasized. Year 4.

10 hrs

[back to top](#)

MEDICINE 9505 General Surgery Rotation

10 credit hours/2 months. Introduces students to the field of general surgery. Emphasizes the indications, contraindications, types of operative management, and the mortality and morbidity of various operations. Involves the student in several different kinds of learning experiences, such as preoperative and postoperative care, work in the operating room, outpatient clinic visits, night call, student conferences and resident conferences. Covers skills in surgical scrub, putting on gown and gloves, knot tying, vena puncture, proctoscopy, and suturing of the skin. Students assist in performing skills such as insertion of CVP catheters, insertion of a chest tube, thoracentesis, paracentesis and Swan-Ganz catheters.

10 hrs

[back to top](#)

MEDICINE 9506 Obstetrics-Gynecology Rotation

10 credit hours/2 months. Provides the student with an opportunity to gain basic competence in obstetrics and gynecology, including proficiency in the history and physical examination related to the obstetric and gynecologic patient. Emphasizes outpatient gynecology, family planning and techniques for early detection of gynecologic cancer. Provides basic information in reproductive physiology and endocrinology, infertility, gynecologic oncology, and the psychologic aspect of diseases of women. Covers concepts of prenatal care and fundamentals of normal labor and delivery, and pregnancy complications.

10 hrs

[back to top](#)

MEDICINE 9514 Medicine, War & the Arts

This course considers the continually evolving relationship between medicine, war, and the arts, from the slaughter of the American Civil War (1861-65) to today's conflicts in Iraq. Our focus is on the extraordinary difficult medical and ethical decisions faced by physicians in times of war, and the ways in which those experiences are reflected in the arts. Topics include the effects of disease on armies, biological warfare, the development of ambulance and hospital services in the Civil War, battlefield medicine, the diagnosis and treatment of shellshock victims in WWI, chemical warfare, the pioneering of plastic surgery, triage techniques in WWII, nuclear warfare, and the personal experiences of physicians in the Vietnam and Iraq wars.

5 hrs

[back to top](#)

MEDICINE 9515 Medicine and Music

This course will explore ways in which music and medicine interact, including the following topics: therapeutic applications of music (music therapy), current research on how the brain processes music, the treatment of medical themes (including illness and disease, patients, physicians, and human experimentation) in musical works, and how certain composers' medical conditions affected their creative output.

5 hrs

[back to top](#)

MEDICINE 9516 The Physician and the Patient in Film

Movies are narratives that record, instruct, motivate, entertain and transform. This course investigates the ways in which physicians, patients, and medical students have been portrayed in Hollywood films over the course of the twentieth and the early twenty-first centuries. Compassion, idealism, and heroism were common traits in early doctor movies but there was also a recurrent theme of the greedy callous doctor who valued research over patient welfare, and profits over ethics. We discuss how films reflected, changed, and molded perceptions of physicians and patients in the past, and examine what contemporary portrayals of the medical profession can tell us about the expectations and fears of patients today.

5 hrs

[back to top](#)

MEDICINE 9518 Medicine, Literature and Law

5 credit hours toward the M.D. degree. Lecture, discussion and writing about legal and ethical issues related to the practice of medicine. For students in Year 6, it not only fulfills the requirement for a Medical Humanities course in year 5 or 6 but also offers preparation for the assumption of the responsibilities of the M.D. degree.

5 hrs

[back to top](#)

MEDICINE 9570 Family Practice Preceptorship

5 credit hours/1 month. Provides work experience with a rural Missouri physician. Helps students understand the responsibilities and importance of family physicians in the provision of health care. Provides continuing emphasis on the need for and importance of family practice.

5 hrs

[back to top](#)

MEDICINE 9571 Psychiatry Rotation

5 credit hours/1 month. Gives each medical student a clinical assignment that involves responsibility for patient care under supervision on the adult inpatient service and experience in the clinic. Includes seminars in psychopathology, psychiatric syndromes, mechanisms of defense, psychopharmacology, drug and alcohol abuse and specific psychosocial assessment.

5 hrs

[back to top](#)

MEDICINE 9578 Healing and the Arts

5 credit hours toward the M.D. degree. Lecture, discussion.

5 hrs

[back to top](#)

MEDICINE 9583 Continuing Care Clinic

5 credit hours /half-day per week except during vacation or out-of-town electives. Provides ambulatory and continuous care experience in general medicine clinics. The docent teams are assigned to a clinic in which students see and follow a panel of patients on a continuous basis for up to four years, where necessary, under the supervision of docents. Provides continuity of care from inpatient hospitalization to outpatient care, allowing longitudinal experience for the student and personalized care for the patients. Allows students to observe the natural progression of disease and experience the rewards and challenges of an ongoing doctor-patient relationship.

5 hrs

[back to top](#)

MEDICINE 9585 Prescribing For Special Populations

2 credit hours/independent study during Year 5. Consists of a self-paced, independent learning, computer-based instruction. Teaches principles of prescribing for special populations. Students learn to recognize special patients and to assess risks and benefits and individualize drug therapy in special patient situations. The course addresses concepts of pharmacology in five commonly-encountered special populations: pediatrics, elderly, patients with liver or kidney disease, and pregnant or breast-feeding patients.

2 hrs

[back to top](#)

MEDICINE 9594 The Body Image in Medicine & the Arts

5 credit hours toward the M.D. degree. Lecture, discussion, writing about ethical issues related to death.

5 hrs

[back to top](#)

MEDICINE 9601 Internal Medicine/Docent Instruction Yr 6

Students spend this two-month rotation on the medical wards at Truman Medical Center, each working as an integral member of a docent team that includes the docent, residents and attending health care staff. Year 3 and 5, and Year 4 and 6 students are paired together in a junior-senior partnership. Rounds, conference and consultations. Year 6.

5 hrs

[back to top](#)

MEDICINE 9678 Emergency Medicine

5 credit hours/1 month. Based at Truman Medical Center Hospital Hill or Saint Luke's Hospital of Kansas City, the major affiliated adult hospitals for the School of Medicine. Emphasizes principles, concepts and skills necessary for the initial evaluation and care of medical and surgical emergencies. Teaches management of simple lacerations, burns, contusions, sprains, and infections, and recognition of life threatening emergencies and initiation of emergency care in response.

5 hrs

[back to top](#)

MEDICINE 9683 Continuing Care Clinic

5 credit hours/half-day per week except during vacation or out-of-town electives. Provides ambulatory and continuous care experience in general medicine clinics. The docent teams are assigned to a clinic in which students see and follow a panel of patients on a continuous basis for up to four years, where necessary, under the supervision of docents. Provides continuity of care from inpatient hospitalization to outpatient care, allowing longitudinal experience for the student and personalized care for the patients. Allows students to observe the natural progression of disease and experience the rewards and challenges of an ongoing doctor-patient relationship.

5 hrs

[back to top](#)

MEDICINE 9685 Rational And Safe Drug Prescribing

2 credit hours/independent study during fall Semester of Year 6. Consists of self-paced, independent learning, computer-based instruction. Teaches principles of clinical pharmacology that will assist the student in responsibly prescribing medications. Students develop skills in making informed clinical decisions through studying topics such as literature evaluation, medication errors, adverse drug reactions, drug allergies, drug interactions, overdose management, alternative therapies, and therapeutic drug monitoring.

NURSE 5515 NA Role Of The Nurse Administrator

This course builds upon the fundamentals of advanced practice nursing by focusing on the subrole of the nurse administrator. Content focuses on essential knowledge for today's senior and executive level manager in health care. Core content are principles of administration, resource management, managed care, budgeting, marketing, health care delivery system evaluation, and utilization of theory and research. This course consists of three hours of lecture/discussion per week. Due to the experiential learning activity associated with time spent with a nurse leader this class meets every OTHER week. Prerequisite: Admission to the MSN program or permission of instructor.

3 hrs

[back to top](#)

NURSE 5515 NE Preparing Nurse Educators

This course will explore the role of the nurse educator. Emphasis will be the development and evaluation of the nurse educator in the functional areas of community education, staff education, and academic education. In each of these areas topics such as role transition, productivity, job duties/responsibilities, and role enactment evaluation, will be discussed and compared one to the other. Core content includes: role theory, subroles of the nurse educator (leader, learning facilitator, collaborator/consultant, inquirer, and clinical expert), adult education philosophy, the effect of education research on nurse education and trends of nursing education. Prerequisite: Admission to the MSN program or permission from instructor.

3 hrs

[back to top](#)

NURSE 5516 Curriculum Development in Nursing

Examines theoretical foundations, principles, and issues in curriculum design. Explores systematic evaluation of curriculum at all levels. Prerequisites/Co-requisite: NURSE 5515NE or consent of Instructor.

3 hrs

[back to top](#)

NURSE 5517 Teaching Strategies in Nursing

Examines principles, issues, techniques, and evaluation methods in teaching nursing. Focuses on the development of a variety of teaching strategies and evaluation methods for didactic and clinical settings. Prerequisites/Co-requisite: NURSE 5515NE or consent of instructor.

3 hrs

[back to top](#)

NURSE 5526 Health Promotion Across The Lifespan

This course is designed to provide students with a strong knowledge base related to concepts of health promotion and health protection for clients across the life span. Clients are conceptualized as individuals, families and populations. An application of various developmental theories for the child, adult, older adult and family will provide the basis to individualize health-care needs for various age and family groups. Core concepts for the course include: theories of health and health promotion and protection, reasoned action, health belief model, epidemiology, disease and injury privation, health education, growth and development, nutrition, and family systems theory. Prerequisites/Co-Requisites: NURSE 5550 Theoretical Foundations in Nursing.

3 hrs

[back to top](#)

NURSE 5527 Cultural Diversity & Values

This course explores how each individual's life context and social, cultural, political, historical, and economic influences (that is, one's culture) shape or, "construct" that individual's values, beliefs and behaviors. Applying concepts and theory from anthropology, philosophy, sociology, and nursing, the course expands students' basic knowledge of cultural diversity, approaches to culture and cultural competency, values and ethics-related terminology, theories of moral development, culture and value assessment skills, and ethical decision-making models for clinical practice. The values inherent in the development of advanced practice nursing are explored, and students examine their own understanding of the moral nature of advanced practice nursing. Core concepts for the course include: cultural awareness, cultural knowledge, cultural skill, cultural encounter, values clarification, ethical analysis, conflict of interest, and conflict resolution strategies. Offered: Every Fall, Every Summer

3 hrs

[back to top](#)

NURSE 5528 Policy, Politics & Professional Ethics In Health Care

This course presents an overview of policy, politics, financing and professional ethics within the health care organizations and systems, with emphasis on current trends. Attention is given to the relationship between these issues and improving nursing health care delivery and outcomes. Offered: Every Winter & Every Summer

3 hrs

[back to top](#)

NURSE 5530 A The Experience Of Health In Aging: Physiological

This one-credit hour course is designed for students interested in understanding the role of health in the aging population. The 530A course will focus primarily on physiologic and psychological/cognitive functioning of the older adult. Theoretical, empirical and applied knowledge of the aging process is presented. This knowledge is utilized in assessing and interpreting the physiological and psychological influences of the aging on health. This knowledge may also be used in developing strategies for the promotion, restoration, and maintenance of health in the aging population. This course meets for five weeks. Additionally, a field experience encompasses assessment and written documentation of in-person interviews conducted with an older adult. Instructional class activities include lecture, group discussion, written reactions, dialogue with visiting speakers, and health assessment papers presented by students.

1 hr

[back to top](#)

NURSE 5530 B The Experience Of Health In Aging: Relationship

This one-credit hour course is designed for students interested in understanding the role of health, environment and relationships in the aging population. The N530B course will focus primarily on loss/grief and relationships as these relate to the older adult. Theoretical, empirical and applied knowledge of the aging process is presented. This knowledge is utilized in assessing and interpreting the influences of relationships, intimacy, loss, grief, and dying on health. This knowledge may also be used in developing strategies for the promotion, restoration, and maintenance of health in the aging population. This course meets for five weeks. Additionally, a field experience encompasses assessment and written documentation of in-person interviews conducted with an older adult. Instructional class activities include lecture, group discussion, written reactions, dialogue with visiting speakers, and health assessment papers presented by students. Offered: Every Winter

1 hr

[back to top](#)

NURSE 5530 C The Experience Of Health In Aging: Community

This one-credit hour course is designed for students interested in understanding the role of health, community, systems and service delivery in the aging population. The N530C course will focus primarily on community, health systems and service delivery as these relate to the older adult. Theoretical, empirical and applied knowledge of aging and the health system and delivery process is presented. This knowledge is utilized in assessing and interpreting the influence of the community and health care delivery systems on the health of older adults. This knowledge may also be used in developing strategies for the promotion, restoration, and maintenance of health in the aging population. This course meets for five weeks. Additionally, a field experience encompasses assessment and written documentation of in-person interviews conducted with an older adult. Instructional class activities include lecture, group discussion, written reactions, dialogue with visiting speakers, and health assessment papers presented by students. Offered: Every Winter

NURSE 5547 A Diagnostic Reasoning/Advanced Assessment

This course is designed to provide a systematic approach to the advanced assessment of physiological, psychological, sociocultural, developmental and spiritual assessment of individuals. The course builds on basic health assessment skills and emphasizes utilizing advanced assessment skills, lab work interpretation, validation, documentation and analysis of assessment findings. This course consists of 3 hours lecture/discussion and 1 hour of clinical/lab credit (75 clock hours). Prerequisites: Free-standing Health Assessment Course.

4 hrs

[back to top](#)

NURSE 5547 C Diagnostic Reasoning/Advanced Assessment

This course is designed to provide an evidence-based systematic approach to the advanced assessment of physiological, psychological, sociocultural, developmental and spiritual assessment of individuals. The course builds on basic health assessment skills and emphasizes advanced assessment skills, lab work interpretation, validation, documentation and analysis of assessment findings to further develop an evidence-based practice. This course consists of three hours of didactic discussion and 1 hour of clinical/lab credit. Prerequisites: Free-standing Health Assessment course.

4 hrs

[back to top](#)

NURSE 5547 F Diagnostic Reasoning/Advanced Assessment

This course is designed to provide a systematic approach to the advanced assessment of physiological, psychological, sociocultural, developmental and spiritual assessment of individuals. The course builds on basic health assessment skills and emphasizes utilizing advanced assessment skills, lab work interpretation, validation, documentation and analysis of assessment findings. This course consists of 3 hours lecture/discussion and 1 hour of clinical/lab credit (75 clock hours). Prerequisites: Free-standing Health Assessment Course.

4 hrs

NURSE 5547 N Advanced Assessment of The Neonate

This course is designed to provide a systematic approach to advanced assessment of physiological, psychological, sociocultural, developmental and spiritual assessment of the fetus, the mother during the prenatal period, and the neonate . This course builds on basic health assessment skills and emphasizes advanced assessment skills, diagnostic test interpretation, validation, documentation and analysis of prenatal, genetic and embryological factors impacting neonatal health and development. This three credit hour course consists of two hours of didactic / discussion per week and forty hours of clinical/lab per semester. Prerequisites: Admission to the MSN NNP program

3 hrs

[back to top](#)

NURSE 5547 NE Health Assessment & Clinical Reasoning for Nurse Educators

This course is designed to provide a systematic approach to teaching physiological, psychological, sociocultural, developmental and spiritual assessment. This course builds on basic health assessment skill and emphasizes 1) comprehensive assessment skills, interpretation of laboratory skills, validation of findings, documentation and analysis of assessment findings; and 2) teaching strategies- teaching methodologies, clinical application, and student evaluation. This course consists of 2 hours of lecture/discussion and 1 hour of lab credit (45 contact hours). Prerequisite: NURSE 401 or equivalent, NURSE 5548

3 hrs

[back to top](#)

NURSE 5547 PM Diagnostic Reasoning/Advanced Assessment

This course is designed to provide a systematic approach to the advanced assessment of physiological, psychological, sociocultural, development and spiritual assessment of individuals. The post-MSN student will build on previous advanced assessment skills and content with emphasis on adding advanced physical assessment skills, lab work interpretation, validation, documentation and analysis of assessment findings appropriate to their desired role area. Students will meet the same outcome standards of the track in which they are currently enrolled. This course consists of 1.5 hrs of lecture/discussion and .5 hours of clinical/lab credit (40 minimum clinical hours and approval of faculty. Prerequisites: Free-standing Health Assessment Course.

2 hrs

[back to top](#)

NURSE 5547 W Diagnostic Reasoning/Advanced Assessment

This course is designed to provide a systematic approach to the advanced assessment of physiological, psychological, sociocultural, developmental and spiritual assessment of individuals. The course builds on basic health assessment skills and emphasizes utilizing advanced assessment skills, lab work interpretation, validation, documentation and analysis of assessment findings. This course consists of 3 hours lecture/discussion and 1 hour of clinical/lab credit (75 clock hours). Prerequisites: Free-standing Health Assessment Course.

4 hrs

[back to top](#)

NURSE 5548 Advanced Pathophysiology

Advanced pathophysiology is the study of the alterations of normal physiological functioning in cellular, tissue, organ and organ systems. These alterations form the basis for understanding a variety of pathophysiological conditions and the manifestations and impact of abnormal physiological functioning on clients across the life-span. Advanced pathophysiology deals with both generalized processes and major organ system dysfunctions. This course consists of three hours of lecture/discussion per week.

3 hrs

[back to top](#)

NURSE 5548 C Advanced Pediatric Pathophysiology

In this course, embryology of the major organ systems, as well as specific physiologic and pathophysiologic processes relevant to the child from birth through age 21 years if age will be studied. This course focuses on the implications for advanced nursing practice that result from alterations of normal physiologic functioning in cellular, tissue, and organ systems. Emphasis is placed on the relationship between pathophysiology, decision-making, and evidence-based standards of advanced nursing practice.. Prerequisite: Admission to the PNP program or permission of the instructor.

3 hrs

[back to top](#)

NURSE 5548 N Physiology/Pathophysiology Of The Neonate

Concepts of embryology, neonatal physiology and pathophysiology are used to provide an in-depth study of normal functioning and alteration of normal physiological functioning in cellular, tissue, organ, and organ systems. Alterations form the basis for understanding a variety of pathophysiological conditions and the manifestations and impact of abnormal physiological functioning on neonates. Both generalized processes and major system dysfunctions are addressed. This three credit hours course consists of three hours of lecture and discussion each week. Prerequisites: Admission to the Neonatal Nurse Practitioner Track/Master of Science in Nursing or consent of the instructor

3 hrs

[back to top](#)

NURSE 5549 Pharmacology For Advanced Nursing Practice

This is a course in clinical pharmacotherapeutics that builds on prior knowledge of drug classification, actions, interactions and adverse drug reactions. The major focus of the course is the pharmacotherapeutic use of medications for primary health care management by advanced practice nurses. Emphasis is placed on the clinical critical thinking process used to prescribe drugs in the management of specific illnesses. The Missouri laws for advanced practice nurse prescriptive authority will be addressed. Core concepts include pharmacodynamics, pharmacokinetics, pharmacotherapeutics, health-related information, medication compliance and issues that pertain to the prescribing of medications in advanced nursing practice. This course consists of three hours of lecture/discussion/in-class clinical module work per week. Prerequisite: NURSE 5548

3 hrs

[back to top](#)

NURSE 5549 C Pediatric Pharmacology For Advanced Nursing Practice

This is a course in clinical pharmacotherapeutics that builds on prior knowledge of drug classifications, actions, interactions and adverse drug reactions. The major focus of the course is the pharmacotherapeutic use of medications for management of children from birth to 21 years of age by advanced practice nurses. Emphasis is placed on the clinical critical thinking process used to prescribe drugs in the evidence-based practice management of specific illnesses. Students will examine their own state law for advanced practice nurse prescriptive authority. Core concepts include pharmacodynamics, pharmacokinetics, pharmacotherapeutics, health-related information, medication compliance and issues that pertain to the prescribing of medications in advanced nursing practice. Prerequisite: NURSE 5548C Advanced Pathophysiology or permission of the instructor.

3 hrs

[back to top](#)

NURSE 5549 N Pharmacology for the Neonate

This course in clinical pharmacotherapeutics builds on prior knowledge of drug classifications, actions, interactions and adverse drug reactions in the neonatal population. The major focus of the course is the pharmacotherapeutic use of medications for management of neonates by advanced practice nurses. Emphasis is placed on the clinical critical thinking process used to prescribe drugs in the management of specific neonatal illnesses. Various state laws pertaining to prescriptive authority for advanced practice nurses will be addressed. Core concepts include: pharmacodynamics, pharmacokinetics, health related information and issues that pertain to the prescribing of medications in advanced nursing practice. Prerequisites: NURSE 5547N, NURSE 5548N or consent of the instructor.

3 hrs

[back to top](#)

NURSE 5550 Theoretical Foundations In Nursing

This course focuses on critical analysis of theory and the utilization of various levels of nursing and nursing related theories as a base for nursing at the graduate level. It further examines the inter-relationship of theory, research and practice in the development of the scientific body of nursing knowledge. Methods by which knowledge is gained and validated will be analyzed. Students will synthesize several different theories from which to form the basis of their practice. Relationships of theory, practice and research will be discussed. Prerequisite: Admission to the MSN or PhD Program

3 hrs

[back to top](#)

NURSE 5555 Nursing Research: Evidence Based Practice

This course is designed to prepare the student with the knowledge required to utilize research findings to provide high quality health care and improve nursing practice. This knowledge includes fundamentals of research methods, procedures for the evaluation of research and the application of research findings to clinical practice and organizational decision making. Prerequisites/Co-requisite NURSE 5550 Theoretical Foundations in Nursing & an upper division statistics course

3 hrs

[back to top](#)

NURSE 5556 Program Evaluation

This survey course is designed to introduce students to the philosophy, theory, and methodology of program evaluation. The end point of this course is that graduate students will be able to design, implement, and evaluate research, education and/or social programs within the context of their primary focus of study (i.e. clinical or role).

3 hrs

[back to top](#)

NURSE 5557 Qualitative Methods In Nursing Research

This course is designed to provide the student with the skills necessary to the understanding and conduct of qualitative research. Various methods, including ethnographic, phenomenologic, historic, grounded theory and aesthetic inquiry are presented and discussed. Emphasis is placed upon the appropriateness of each method for different research problems. This course consists of three hours of lecture/discussion per week. Prerequisites/requisites: NURSE 5550 and NURSE 5555.

3 hrs

[back to top](#)

NURSE 5558 Research Design

This course is designed to provide the student with experience in the development of a research proposal. Research skills acquired in previous courses will be synthesized to produce the components of a proposal. Prerequisite: NURSE 5555

3 hrs

[back to top](#)

NURSE 5564 A Primary Care Of Adults I

This course is designed to prepare nurse practitioner students to manage common health problems of adults. The focus is on developmentally appropriate preventive health care and management of common acute/episodic illnesses. Students will integrate role competencies, professional standards, and legal requirements essential to the NP role. Core content includes differential diagnosis, therapeutic management, adherence, anticipatory guidance, patient/family education, legal and professional issues, standards of practice, and advanced practice role competencies. This course consists of 3 credit hours of didactic and 2 credit hours of clinical (165 hours). Clinical practice and clinical seminar comprise the clinical experience. Prerequisites: NURSE 5526, 5547, 5548, 5550, and Co-requisites NURSE 5549, 5555.

5 hrs

[back to top](#)

NURSE 5564 C Primary Care of Children I

This course is designed to prepare nurse practitioner students to manage common pediatric health problems. The focus is on developmentally appropriate preventive health care and management of common acute/episodic illnesses. Students will integrate role competencies, professional standards, and legal requirements essential to the NP role. Core content includes differential diagnosis, therapeutic management, adherence, anticipatory guidance, patient/family education, legal and professional issues, standards of practice, and advanced practice role competencies. This course consists of 4 credit hours of didactic and 2 credit hours of clinical (165 hours). Clinical practice and clinical seminar comprise the clinical experience. Prerequisites: NURSE 5526, 5547, 5548, 5550, and Co-requisites NURSE 5549, 5555.

6 hrs

[back to top](#)

NURSE 5564 F Primary Care Of Families I

This course is designed to prepare nurse practitioner students to manage common health problems across the life span. The focus is on developmentally appropriate preventive health care and management of common acute/episodic illnesses. Students will integrate role competencies, professional standards, and legal requirements essential to the NP role. Core content includes differential diagnosis, therapeutic management, adherence, anticipatory guidance, patient/family education, legal and professional issues, standards of practice, and advanced practice role competencies. This five credit hour course consists of three didactic / discussion per week and 165 hours (two credit hours) of clinical/lab per semester. Prerequisites: NURSE 5526, NURSE 5547F, NURSE 5550 Corequisites: NURSE 5549, NURSE 5555

5 hrs

[back to top](#)

NURSE 5564 N Neonatal Nursing I

This course integrates the physiologic, pharmacological, and assessment skills and principals in determining appropriate care of the ill neonate. This course covers case management of the respiratory, cardiovascular and neurologic disorders while the concurrent course, NURSE 5566N, covers the gastrointestinal, renal, endocrine, hematologic, orthopedic, dermatologic and immune system disorders. Current research and evidence based practices are used as the course framework. The effects of clinical conditions on the growth and development of the neonate, including subsequent chronic health problems as well as the short and long term consequences to the child's family are emphasized. The use of specific interventions and diagnostic procedures are demonstrated and applied in laboratory / clinical settings during the forty hours of required clinical activities. This three credit hour course consists of two hours of didactic / discussion and one hour of clinical experience consisting of laboratory, clinical seminars, clinical observation and practice. Corequisite: NURSE 5566N

3 hrs

[back to top](#)

NURSE 5564 NE Clinical for Nurse Educators

This clinical course provides students an opportunity to develop advanced knowledge and clinical skills in a selected practice setting. Clinical practice hours will be spent in a variety of settings. The students demonstrate their clinical development by evaluating the process of nursing care (assessment, intervention/management, evaluation) from an evidence-based perspective. The course will include two hours of didactic and three hours of clinical practice. Prerequisites: All courses except NURSE 5572 and 5598/5599

5 hrs

[back to top](#)

NURSE 5564 PW Primary Health Care Of Women

This course will focus on the etiology, symptomatology, diagnosis and management of gynecologic and non-gynecologic primary health care problems in women, throughout the lifespan. Emphasis will be placed on caring for women within a holistic framework and recognizing how the changing roles of women in today's society can effect their lives and their health status. Concepts, theories and research related to health promotion, health maintenance and restoration and the prevention of illness and injury of epidemiologically significant problems and potential problems will be addressed. Through clinical experiences, students will integrate concepts of wellness and health promotion, illness prevention, and collaboration, as well as nursing and medical therapeutic modalities, to provide care to women in a comprehensive, interdisciplinary fashion. Core content: differential diagnosis; theories: stress/ adaption and crisis; therapeutic relationships; and advanced nursing skills. This course will consist of 2-3 credit hours of lecture/seminar plus 2 credit hours (165 clock hours) of clinical practice. Prerequisites: NURSE 5547W, NURSE 5548, NURESE 5550 Co-requisite: NURSE 5549

5 hrs

[back to top](#)

NURSE 5566 A Primary Care of Adults II

This course is designed to prepare adult nurse practitioner (NP) students in the care and management of adults and adult population with chronic health problems. The focus of the course is on the differentiation and therapeutic management of chronic health problems encountered by adult NP's in various health care setting. Emphasis is given to those chronic health issues most commonly encountered by adult NP's. Students will be expected to apply cumulative knowledge acquired from previous graduate courses. This course enables students to develop a research and theory based practice for disease state management of health care for adults. Core concepts: theories, grief and loss, chronicity and pain; and advanced nursing skills. This four credit hour course consists of two of didactic/discussion per week and 165 hours (2 credit hours) of clinical/lab semester. Prerequisites: NURSE 5564A, NURSE 5549

4 hrs

[back to top](#)

NURSE 5566 C Chronic Child Health Care (Clinical II)

This course is designed to provide students with the opportunity to apply knowledge and skill from advanced assessment, pathophysiology, pharmacology, health promotion, research and theory to advanced nursing care of patients and families experiencing complex or chronic health problems. Emphasis is placed on using models and theories that guide advanced practice and on determining the current research base on nursing assessment and management in several specific areas of knowledge. The organizing framework for this course is case management of chronic health states. Students will apply several theoretical models to acute and chronic health states of children at various developmental stages representing various socioeconomic and cultural groups, either in primary or specialized care settings. Core concepts are stress and coping, adaptation, pain management, grief and loss, nutritional support, ethical decision-making, case management, and symptom management. This four credit hour course will consist of two hours of didactic and two hours of clinical practice (165 hours). Prerequisites: NURSE 5564C

4 hrs

[back to top](#)

NURSE 5566 F Primary Care of Families III

This course is designed to provide students with the opportunity to apply knowledge from previous family nurse practitioner courses to advanced primary care nursing of individuals and families across the life span. The focus of the course is on the application of the nursing process in the differentiation and therapeutic management of stable chronic health problems encountered by family nurse practitioners in the primary health care setting. Emphasis is on the integration of advanced nursing concepts and pharmacokinetic principles in the care of individuals and families. Core content includes stress and coping, adaptation, pain management, and grief and loss. This course consists of two hours of didactic / discussion per week and 165 (2 credit hours) of clinical/lab per semester. Prerequisites: NURSE 5549 and NURSE 5564F

4 hrs

[back to top](#)

NURSE 5566 N Neonatal Nursing II

This course integrates the physiologic, pharmacological, and assessment skills and principals in determining appropriate care of the ill neonate. This course covers case management of the gastrointestinal, renal, endocrine, hematologic, orthopedic, dermatologic and immune system disorders while the concurrent course, NURSE 5566N, covers the respiratory, cardiovascular and neurologic disorders. Current research and evidence based practices are used as the course framework. The effects of clinical conditions on the growth and development of the neonate, including subsequent chronic health problems as well as the short and long term consequences to the child's family are emphasized. The use of specific interventions and diagnostic procedures are demonstrated and applied in laboratory / clinical settings during the forty hours of required clinical activities. This three credit hour course consists of two hours of didactic / discussion and one hour of clinical experience consisting of laboratory, clinical seminars, clinical observation and practice. Prerequisite: NURSE 5549N, Corequisite: NURSE 5566N

3 hrs

[back to top](#)

NURSE 5566 W Care Of The Childbearing Woman

This course will focus on normal adaptation and pathologic alterations throughout the childbearing period. Emphasis is placed on caring for women and families from preconception through the puerperium. Concepts, theories and research related to the biopsychosocial and cultural aspects of childbearing will be addressed. Utilization of models and theories that guide advanced nursing practice will be the organizing framework for the course. Core concepts include adaptation, stress and coping, grief and loss, pain and symptoms management. This course will consist of 2 credit hours of lecture/seminar plus 2 credit hours of clinical practice. Prerequisite: NURSE 5564PW -Primary Health Care of Women or Equivalent

4 hrs

[back to top](#)

NURSE 5572 Advanced Nursing Practice: Synthesis Practicum

This course is a concentrated, experiential, supervised clinical opportunity to function in an advanced practice nursing role. The focus of this intensive clinical practicum is on the synthesis and application of previous theory and clinical courses under the guidance of a preceptor. Students will be expected to apply advanced clinical decision making skills and evidence based practice guidelines to the assessment, management, and evaluation of complex healthcare problems. Core concepts include advanced nursing practice, functional role responsibilities, ethical, legal and health policy issues, and activities with the emphasis on their relationship to patient outcomes. The patient systems for this experience include individuals and families within the context of community. Students will obtain a minimum of 330 hours of clinical/conferences (4 hours) and one hour of didactic content for the semester. Prerequisites: All required courses except N 5598/5599 and electives.

5 hrs

[back to top](#)

NURSE 5572 II Preceptorship II

This course provides opportunities to apply knowledge and skills from advanced nursing role, theory, research and neonatal clinical courses to the advanced therapeutic management of high-risk neonates. This is the first of two preceptorship courses. The other course, NURSE 5572NI, can be taken concurrently or in consecutive semesters. Emphasis is placed on therapeutic measures within a conceptual framework or model applying findings from research relevant to comprehensive care of neonates. The client system will be the neonate and family. This course consists of five credit hours of clinical experiences consisting of a minimum of 300 hours of practice and clinical seminars. Pre or Co-requisites: NURSE 5572NI

5 hrs

[back to top](#)

NURSE 5572 NA Advanced Nursing Practice: Synthesis Practicum

This course is designed to afford the student a concentrated, experiential opportunity to function in the role she/he has chosen to pursue professionally. This course consists of nine hours of clinical experience per week and a conference every other week. Prerequisites: All courses except NURSE 5598 / NURSE 5599.

3 hrs

[back to top](#)

NURSE 5572 NE Advanced Nursing Practice: Synthesis Practicum

This course is designed to afford the student a concentrated, experiential opportunity to function in the role she/he has chosen to pursue professionally. This course consists of nine hours of clinical experience per week and a group conference every other week. Prerequisites: All courses except NURSE 5598 / NURSE 5599.

3 hrs

[back to top](#)

NURSE 5572 NI Preceptorship I

This course provides opportunities to apply knowledge and skills from advanced nursing role, theory, research and neonatal clinical courses to the advanced therapeutic management of high-risk neonates. This is the first of two preceptorships courses. The other course, NURSE 5572NII, can be taken concurrently or in consecutive semesters. Emphasis is placed on therapeutic measures within a conceptual framework or model applying findings from research relevant to comprehensive care of neonates. The client system will be the neonate and family. This course consists of five credit hours of clinical experiences consisting of a minimum of 300 hours of practice and clinical seminars. Prerequisites: NURSE 5564N, NURSE 5566N

5 hrs

[back to top](#)

NURSE 5587 Research Utilization In Nursing

This course will prepare nurses to implement a research utilization model to validate practice. The theoretical basis for research utilization and practical instances of its application in nursing will be examined. Opportunities will be provided to develop a research utilization plan to address a clinical area of practice. Prerequisites: NURSE 5550, NURSE 5555

3 hrs

[back to top](#)

NURSE 5597 A Independent Study In Nursing/Patient Care-Elective

Guided study of selected topics and/or areas in nursing and/or patient care. Prerequisites: NURSE 550 and permission of faculty.

1-6 hrs

[back to top](#)

NURSE 5597 B Independent Study In Nursing/Patient Care-Equivalent

Guided study of selected topics and/or areas in nursing and/or patient care. Prerequisites: NURSE 550 and permission of faculty.

1-6 hrs

Individual research project for students to utilize beginning research skills in designing and conducting independent studies under the direction of the faculty. Prerequisites: NURSE 550, NURSE 555 and permission of faculty.

1-6 hrs[back to top](#)**NURSE 5599 Research Thesis**

Individual study under the direction of a member of the faculty leading to the preparation and oral defense of a thesis. Prerequisites: NURSE 5550, NURSE 5555 and permission of faculty.

1-9 hrs[back to top](#)**NURSE 5602 Healthcare Systems & Leadership**

This course focuses on the DNP as leader within the complex health care industry. An in depth study of the socio-political, economic, cultural and historical background of the American health care system and the system of health professions will form the foundation for exploration of leadership needs and the DNP leadership role. Prerequisites: Admission to the DNP program

3 hrs[back to top](#)

NURSE 5603 Research Institute I

This course will provide a hands-on introduction to the process of becoming a research scientist. Content will include the responsible conduct of research, its core element, the emerging guideline, relevant UMKC policies and procedures, and the impact to the Researcher in his/her day-to-day activities. This course also includes literature reviews, scholarly writing, technology in the Research process, developing a program of scholarship and effective time management. Prerequisite: Admission to the PhD Nursing Program

2 hrs

[back to top](#)

NURSE 5604 Research Institute II

This course will provide interactive sessions to develop skills necessary for the synthesis of research findings, the identification of funding sources and the initiation of the grant writing process. Also included will be the opportunity to develop and present research findings in multiple venues. Prerequisites: Completion of NURSE 5603 and six credit hours of PhD. coursework.

2 hrs

[back to top](#)

NURSE 5606 Healthcare Policy & Advocacy

The focus of this course is the integral relationship between health care policy and advocacy as an advanced practice nurse. Prerequisites: Admission into DNP in Nursing program

3 hrs

[back to top](#)

NURSE 5608 Theory Development In Nursing I

Selected readings in philosophy of science will be used as the context for exploring the philosophical underpinnings of nursing and the rise of nursing science. Students will discuss how changes and shifts occur in paradigms, world views, and bodies of knowledge. The discipline of nursing and the relationship among nursing theory, research, and practice will be discussed. Integration of theory into the development of research-based nursing knowledge will be explored, with emphasis on empirical evidence, hypothesis development, study design, research design, and translation into clinical practice. Prerequisites: 12 credit hours of master's level coursework, including theory

3 hrs

[back to top](#)

NURSE 5610 Theory Development In Nursing II

Nursing and non-nursing models, frameworks and theories will be analyzed and critically evaluated using a variety of criteria. Students will identify the range of applicable theories for their area of research. Appropriate application of theories to independent and dependent variables, mediators, moderators, cofactors, correlates, and outcomes will be explored. Students will develop hypotheses, research goals and objectives that extend the implications and application of an identified theory in clinical nursing practice. Prerequisites: NURSE 5608

3 hrs

[back to top](#)

NURSE 5611 Healthcare Economics & Quality

This course focuses on the principles of , and complex relationship between cost efficiency and effectiveness and health care quality outcomes. Through out the course, issues regarding the inextricable link between cost and quality within the complex health care environment will be examined and addressed with emphasis on DNP nurse intervention and leadership. Prerequisites: NURSE 5602 Healthcare Systems and Leadership

3 hrs

[back to top](#)

NURSE 5612 Statistics I

This graduate statistics on-line course is designed for students in the PhD nursing program. The course provides a comprehensive understanding of: describing data, logic of sampling and test statistics; hypothesis testing, type 1 and 2 errors; power; one-way ANOVA (analysis of variance); planned comparison, post-hoc tests and trend analysis; factorial ANOVA; repeated measures designs and mixed randomized repeated designs; simple and multiple regression; ANCOVA (analysis of co-variance). Prerequisites: Upper division undergraduate basic statistics course (with grade of "B" or better)

3 hrs

[back to top](#)

NURSE 5613 Application of Evidence-based Practice

This course is designed to provide an analytic and systematic approach to evaluate evidence based on research used in clinical practice. The course builds on methods of evidence based practice, theoretical foundations, and statistical analysis. Prerequisite: NURSE 5602, 5606, 5608

3 hrs

[back to top](#)

NURSE 5614 Health Policy & Ethics

This course examines health policy and ethics as they intersect with other public policies. Legal, financial, and ethical issues associated with policy development and evaluation are critically examined. Prerequisites: Admission into the PhD in Nursing Program or permission of instructor.

2 hrs

[back to top](#)

NURSE 5620 Advanced Practice V - DNP Clinical

This course is designed to increase the clinical expertise of the student by fostering the development of a specific area of focus that will improve or enhance clinical expertise. It allows the student to investigate specific procedures, skills, or clinical knowledge that will be later utilized in the DNP practicum course. Prerequisite: NURSE 5572 Advanced Nursing Practice IV: Synthesis or by consent of instructor.

5 hrs

[back to top](#)

NURSE 5622 Statistics II

This graduate statistic on-line course is designed to provide a conceptual understanding of the statistical procedures with: advanced multiple regression; moderators and mediators in multiple regression; path analysis; MANCOVA; MANOVA; cluster analysis; and canonical correlation. Prerequisite: NURSE 5612

3 hrs

[back to top](#)

NURSE 5624 Advanced Practice VI -DNP Capstone

This course is designed to synthesize all previous coursework through the implementation and evaluation of a "tangible and deliverable academic product that is derived from the practice immersion experience and is reviewed and evaluated by an academic committee" (DNP essentials, pg20). Prerequisite: NURSE 5613 - Application to evidence-based Practice

5 hrs

[back to top](#)

NURSE 5630 Health Care Systems

This course is a guided, in-depth exploration, analysis and evaluation of selected health care systems literature. Other nursing literature will be reviewed as appropriate. Prerequisites: Admission into PhD in Nursing program or permission of instructor. Offered: Every Summer

3 hrs

[back to top](#)

NURSE 5631 Health Promotion & Protection

This course is a guided, in-depth exploration, analysis and evaluation of selected health promotion and protection literature. Other nursing literature will be reviewed as appropriate. Prerequisites: Admission into PhD in Nursing program or permission of instructor.

3 hrs

[back to top](#)

NURSE 5632 Health Restoration & Support

This course is a guided, in-depth exploration, analysis and evaluation of selected health restoration & support literature. Other nursing literature will be reviewed as appropriate. Prerequisites: Admission into PhD in Nursing program or permission of instructor Offered: Every Fall

3 hrs

[back to top](#)

NURSE 5662 Psychometrics

This course focuses on application of psychometric theories and practices related to instrumentation in nursing research. The basic methodologies and techniques for constructing, testing, and evaluating instruments will be discussed and applied by students. Content will focus on theoretical foundations of measurement, item construction, instrument design, item analysis, validity and reliability assessment. Criteria for evaluating existing instruments will also be discussed. Prerequisites: Permission of the instructor.

3 hrs

[back to top](#)

NURSE 5664 Concepts & Approaches of Epidemiology & Statistics in Research

This course introduces principles, concepts, and application of epidemiological and statistical methods in research. First part of the course will cover understanding the epidemiological principle & concepts, measuring the occurrence of disease, measures of disease association, types of study designs, interpretation and evaluation of epidemiologic research. Second part will provides hands on experience for students on developing skills to analyze research data using appropriate statistical methods by means of statistical software to calculate the measures of disease association. This course will help students to evaluate health care studies with respect to study design, statistical analysis, interpretation and evidences of association. During this course students will develop an epidemiologic study proposal using appropriate statistical methods. Students will learn to analyze and interpret the output of these analyses using Statistical Package for the Social Science (SPSS) and STATA. Prerequisites: NURSE 5612 or prior approval from course instructor.

3 hrs

[back to top](#)

NURSE 5666 Designing Nursing Research

This doctoral level course directs the student to develop research writing skills necessary for developing their dissertation and future program of research. Critical analyses of methodologies and design are accomplished. the strengths and weakness of various research designs (non-experimental, quasi-experimental, experimental and randomized clinical trial) are evaluated via in-depth discussions. Prerequisites: NURSE 5610, 5612, 5622, 5662, 5668, 5670.

3 hrs

[back to top](#)

NURSE 5668 Quantitative Research

Quantitative reserach methods used to build nursing's body of knowledge are explored. Experimental, quasi-experimental, and correlational designs and clinical trials are analyzed. Emphasis is placed on design, data generation, analysis, and dissemination of findings. Issues pertaining to the use of quantitative methods will also be explored. Prerequisites: PSYCH 5516 (or equivalent) NURSE 5610, or permission of instructor.

3 hrs

[back to top](#)

NURSE 5670 Qualitative Research Methods

Qualitative research methods used to build nursing's body of knowledge are explored in this seminar course. Emphasis is placed on design, data generation and analysis, and dissemination of findings. Issues regarding qualitative research are identified and analyzed. Prerequisite: Admission to the Doctor of Philosophy in Nursing program or permission of instructor.

3 hrs

[back to top](#)

NURSE 5697 A Special Topics Nursing Elective

NURSE 5899 Required Graduate Enrollment

1 hr

[back to top](#)

School of Pharmacy Courses Pharmacy

PHARM 5507 Basic Pharmacology

Basic pharmacological concepts and important classes of pharmacologic agents. Prerequisites: Human anatomy, physiology and biochemistry. Fall, each year.

3 hrs

[back to top](#)

PHARM 5509 Basic Toxicology

Principles of general toxicology and toxicology of industrial and household chemicals, agricultural agents, social poisons, and selected therapeutic agents. Prerequisites: Human Anatomy, Physiology, Biochemistry and PHARM 507 or PHARM 519. Offered: Fall, each year.

3 hrs

[back to top](#)

PHARM 5515 Drug Absorption, Distribution, Metabolism And Excretion

A course dealing with the absorption, physiologic distribution, metabolism and excretion of drugs and other organic compounds and factors which influence these events. Three hours lecture a week. Fall, odd year.

3 hrs

[back to top](#)

PHARM 5519 Pharmacology I

Pharmacology of medicinals with emphasis on basic concepts, the autonomic nervous system, and cardiovascular agents. Four hours lecture per week. Prerequisite: Human anatomy, physiology and biochemistry. Offered: Fall.

4 hrs

[back to top](#)

PHARM 5520 Pharmacology II

Pharmacology of medicinals with emphasis on chemotherapeutic agents, drugs acting on the renal system, and drugs for endocrine disorders. Four hours lecture per week. Prerequisite: PHARM 519. Offered: Winter.

5 hrs

[back to top](#)

PHARM 5521 Advanced Organic Medicinal Chemistry

Chemistry, physiochemical properties, mechanism of action and structure-activity relationships of organic drug molecules. Fall, odd years.

3 hrs

[back to top](#)

PHARM 5527 Analytical Methods

A detailed study of the methods used to detect, identify, and quantitate drugs, small molecules, enzymes, proteins, and biological molecules. The statistical foundation, core concepts, and practical implementation of analytical methods are areas of emphasis. State-of-the-art instrumentation and recent technological developments are also presented, including biotechnology based methods such as proteomics methods and quantitative PCR. Prerequisites: Two hours of lecture and three hour demonstration/laboratory a week. Offered: Fall

3 hrs

[back to top](#)

PHARM 5531 Physical Pharmacy Equilibria

Advanced principles of aqueous solutions, acid-base equilibria, solubility and complexation. Mathematical solutions and state-of-the-art research applications. Three hours lecture a week. Prerequisite: B.S. in Pharmacy Permissions of instructor. Winter, even years.

3 hrs

[back to top](#)

PHARM 5533 Biopharmaceutics And Pharmacokinetics

Study of (1) the kinetics of absorption, distribution, and elimination of drugs and the relationship of kinetic parameters to dosage form, biological factors, and dosage regimen; (2) the development of various models for pharmacodynamic-pharmacokinetic correlations Three hours lecture. Prerequisite: Must have enrolled in and received a grade of "B" or better in PHARM 7303 (PK for Pharm.D. students); MATH 345 (Ordinary Differential Equations) or equivalent is highly recommended. Fall, even years.

3 hrs

[back to top](#)

PHARM 5550 Stability Of Pharmaceuticals

The course provides instruction in the processes responsible for instability of pharmaceuticals. Course content includes, but is not limited to, instability due to light, oxygen, and metal ions; the effect of temperature on the rate of drug decomposition; the effect of dielectric constant and ionic strength on degradation; and physical and chemical instability of newer polypeptide drugs. In addition, practical strategies to prevent instability of the active compound and excipients used in pharmaceutical formulations is provided. Prerequisites: MATH Calculus (required) & Ordinary Differential Equations (recommended); Course Grade of "B" or better in both PHARM 202 and PHARM 203; Restriction: Consent of instructor Offered: Fall semester even-numbered year.

3 hrs

[back to top](#)

PHARM 5555 Religion, Culture And Health

This course addresses the impact of religious beliefs on the culture practices of contemporary society, and aims at examining the relationship between these beliefs, modern sciences and health. It will be offered to all students, in Fall semesters. No prerequisites. Offered: Every Fall

3 hrs

[back to top](#)

PHARM 5580 A Seminar In Pharmaceutical Sciences

Enrollment and participation required of all graduate students in the School of Pharmacy during each semester of graduate study. One hour each week. This course is graded on a credit/ no credit basis. Offered: Fall and winter.

1 hr

[back to top](#)

PHARM 5580 C Seminar In Pharmacology/Toxicology

Enrollment and participation required of all graduate students in the School of Pharmacy during each semester of graduate study. Credit/no credit. One hour each week. Fall & winter.

1 hr

[back to top](#)

PHARM 5590 A Special Topics Pharmacy

1-3 hrs

[back to top](#)

PHARM 5590 B Special Topics Pharmaceutical Chemistry

1-3 hrs

PHARM 5606 Biochemical Toxicology

Recent advances in organ-specific toxicity and the mechanisms of toxicity of drugs and environmental chemicals. Prerequisite: Consent of instructor. Winter, odd years.

3 hrs

[back to top](#)

PHARM 5615 Methods In Pharmacology And Toxicology

Exposure to some of the techniques employed in research in pharmacology and toxicology. One hour conference and six hours laboratory per week. Prerequisite: Permission of instructor.

3 hrs

[back to top](#)

PHARM 5616 Molecular Toxicology

Study of the molecular mechanisms of toxicity with emphasis on receptor theory and quantitative structure activity relationships. Three hours lecture or discussion a week. Prerequisites: PHARM 510 and PHARM 515 or permission of instructor. Winter, even years.*

3 hrs

[back to top](#)

PHARM 5625 Synthetic Medicinal Chemistry

Medicinal chemicals are considered as to their synthesis and structure-activity requirements as well as to current research and technology in the area. Offered on demand.*

3 hrs

[back to top](#)

PHARM 5631 Pharmaceutical Formulations I

Advanced theory and practice of Pharmaceutical formulations including classical and current research. This course will introduce the principles of biomaterial based drug delivery systems and unify knowledge from the fields of biology, materials science, and pharmaceuticals. Prerequisites: B.S in Pharmacy. Offered: Fall, odd years.*

3 hrs

[back to top](#)

PHARM 5632 Novel Drug Delivery Systems

The course offers up-to-date information about drug transport mechanisms and drug absorption processes across various absorptive membranes ie., buccal, nasal, dermal, corneal, pulmonary, and oral mucosae. The course material has been designed to provide current ideas and thinking about gene delivery, drug targeting to tumor cells and lipid and carrier mediated drug delivery. It provides unique information about cell culture models as a predictor of drug delivery as well as physical chemistry of surfaces in various microparticulates and lipid emulsion systems.

3 hrs

[back to top](#)

PHARM 5633 Receptor Pharmacology And Signal Transduction

Molecular characterization of drug receptors involving quantitative description of functional studies with agonists and antagonists and binding of ligands to receptors; the molecular structure of receptors and the signaling systems that couple receptors to their pharmacologic functions. Prerequisites: Biochemistry 561/562 and/or PHARM 519/ 520. Offered: Every other Winter Other: When we have enough students willing to take course on demand.

3 hrs

[back to top](#)

PHARM 5634 Protein and Nucleic Acid Drug Delivery

In the graduate course, the principle theories, techniques and strategies in developing protein and nucleic acid drugs will be discussed. The course material has been designed to provide up to date information in protein and nuclear acid drug delivery. It offers unique information on how to combine knowledge of chemistry, molecular biology and pharmaceutical sciences to achieve successful therapeutic application of protein and nucleic acid. Prerequisite: B.S. in Pharmacy/ Chemistry/ Biology/ Bioengineering/ Pharmacology

3 hrs

[back to top](#)

PHARM 5645 Cancer Biotechnology I

This course is designed to provide a basic understanding of tumor progression, molecular events and signaling mechanisms underlying tumor formation. Epidemiological approaches, etiology, and current methods of detection and diagnosis of cancer will be discussed. Current pharmacological management strategies of cancer and future therapeutic interventions will also be reviewed. Prerequisite: BIOLOGY 202 or equivalent. Fall, even years.

3 hrs

[back to top](#)

PHARM 5646 Cancer Biotechnology

Cancer Biotechnology II will focus on gene regulation of cancer cells with specific pharmaceutical agents. The course will target chemotherapeutic agents and examine current technology in gene therapy. Antisense and ribozyme DNA will also be discussed. Prerequisites: PHARM 645 and Cancer Biotechnology I. Winter, odd years.
