The Entrepreneurship and Innovation Club, also known as the EI Club, is an organization for students, run by students, facilitating the growth of entrepreneurship and innovation across the entire UMKC campus and the Kansas City metropolitan area. The EI club offers seminars with renowned speakers based in the Kansas City-area, networking opportunities, and entrepreneurial and innovation advising.

Financial Management Association

The Financial Management Association UMKC Student Chapter (FMA-UMKC) is affiliated with the Financial Management Association International (FMA), a premier global leader in developing and disseminating knowledge about financial decision making for academics, practitioners and students. Our members include UMKC students as well as FMA members in the Kansas City area. We are leaders in providing financial literacy related to financial decision-making and encouraging as well as developing college students' financial interests through investment competitions, community projects, an active speaker program, corporate tours, a business career fair and newsletters. Also, we aspire to excellence as an organization.

Public Administration Student Association

The Public Administration Student Association (PASA) is made up of MPA and I.Ph.D. students who are interested in networking and socializing with students, faculty and professionals outside the classroom to enrich their experience at UMKC. PASA's purpose is to engage students academically, professionally, and socially in the study and practice of public administration.

Students in Free Enterprise

SIFE is one of the largest student organizations in the world with teams on more than 1,600 college and university campuses in the United States and in more than 40 countries throughout the world. Working together as a team, SIFE students apply their classroom experiences to

develop and implement educational outreach programs that educate individuals in their communities about the principles of market economics, success skills, environmental sustainability, entrepreneurship, financial literacy and business ethics. At the end of the year, teams present their year's efforts and compete at regional competitions, with the winners going on to national and international competitions. The UMKC SIFE team has been very successful in these competitions, winning awards and receiving national attention.

Doctor of Philosophy

The Bloch School participates in the Interdisciplinary Ph.D. program through the Department of Public Affairs (co-discipline in Public Affairs and Administration only) and through the Department of Global Entrepreneurship and Innovation. The Department of Global Entrepreneurship and Innovation also offers a stand-alone Ph.D. program. Information about discipline-specific admission and program requirements may be found in the School of Graduate Studies section of this catalog. Those interested in doctoral study in entrepreneurship and innovation should visit the Department of Global Entrepreneurship and Innovation website.

Master of Business Administration

The Bloch School MBA graduate will develop a professional perspective for a career in business, and will be able to:

- Define, analyze, and evaluate business decisions in a global setting through an integrated analysis using tools found in the major business disciplines.
- Effectively demonstrate critical thinking skills in inference, analysis, and evaluation.
- Demonstrate the ability to work in teams.
- Conceptualize a complex issue into a coherent written statement and/or oral presentation.
- Demonstrate mastery of fundamental quantitative tools by successfully using those tools to interpret and evaluate quantitative information and synthesize that information with relevant non-quantitative information in order to arrive at a business decision.

The Bloch School offers a master of business administration (MBA) and an executive master of business administration (EMBA). Students enrolling in the MBA program have the option of choosing among eight emphasis areas, and their programs will consist of 42 credit hours. Most MBA students attend evening courses on a part-time basis and admission is available in the fall and spring semesters. EMBA students enter a cohort-based, lockstep program that offers an integrated curriculum with the themes of leadership, strategic thinking, and innovation woven throughout the program. This full-time program meets three times per month, (one Friday/Saturday and one additional Saturday) over a 21-month period, with admission taking place in the fall.

MBA core courses stress the knowledge and skills needed to deal with an organization and its personnel. The functional courses (accounting, finance, operations, economics and marketing) develop specialized knowledge and skills. In addition, the MBA program stresses leadership, innovation and the related social and public responsibilities for those in business.

The MBA Curriculum

The MBA degree is a 42 credit hour program. The curriculum is comprised of two distinct stages: core classes and classes taken beyond the core. Previous college work in business is not required, though students with no preparation in mathematics and computer applications must complete MATH 110 and MIS 202.

All coursework is offered in the evening to accommodate students working while enrolled. Students may be admitted to the program in the fall or spring semesters. There is no admission during the summer semester.

The program has the following unique features that are combined to develop graduates that are broadly educated, socially responsible, and knowledgeable managers.

1. A 24 credit hour core curriculum that provides an integrative business foundation for decision-making.
2. An ecosystem integrated learning environment; this component is not for credit.

3. A fifteen credit hour emphasis/elective component that allows the student the flexibility to design a program that uniquely fits their needs including the option to complete 12 hours toward a specific emphasis area.
4. A three credit hour capstone experience.

The MBA Core (24 credit hours)

The MBA degree consists of a 24 credit hour core. The core must be taken by all students enrolled in the program and is designed to provide graduates with a unique educational experience. Each course in the core is 1.5 credit hours. As part of the core, each of the first two years begins with an immersion course that requires the students to meet each evening Monday-Friday and all day Saturday. The immersion course is held the week before normal classes begin. These courses allow students to work in teams and immerse themselves into an integrative business environment. Other than the two immersion courses, each core course is taught as an eight-week class. The core is designed to provide all students with a critical business foundation. Core courses should be taken in sequence and include the following:

Management in Context (Immersion)
Leadership in Organizations
Financial Performance and Assessment
Corporate Financial Management
Introduction to Entrepreneurship
Management Information Systems
Managerial Economics
Global Macroeconomics
International Business
Legal and Ethical Management (Immersion)
Marketing Management
Strategic Financial Management
Human Capital Management
Decision Sciences
Operations and Supply Chain Management
Strategic Management

Ecosystem Integrated Learning Program (noncredit)

A critical part of being a successful leader is ecosystem awareness. In addition to ecosystem integration throughout the MBA coursework, the MBA degree program has a specific ecosystem-integrated learning component. Strong technical skills are not sufficient to be an effective manager. The success of our graduates also depends on their personal and professional growth while in our program. As part of the MBA program, students are provided with a number of weekend seminars, workshops, and professional experiences designed to offer opportunities that enhance their professional and personal capabilities.

Students may attend as many of the programs as they want; however, they are required to earn a minimum of 12 contact hours spread over at least 3 events during the program. Examples of programs include:

- Business Plan Competition
- Business Writing Do's and Don'ts
- Excel Tips and Tricks

- Independent Movie Making
- Job Search Strategies
- Personal Financial Planning
- Personal and Professional Selling
- Principles of Business Innovation
- Social Media Opportunities
- Resume Workshop

Students can earn hours toward the Ecosystem Integrated Learning Program through employer-sponsored training as well. Students should contact the MBA Program Director upon attending such training in order to receive credit.

Students can also earn up to 4 hours through leadership involvement in community service activities. To receive credit for such involvement, contact the MBA Program Director.

Electives (15 credit hours)

To complete for-credit course requirements for the degree, students take 15 credit hours of electives. Normally, these electives are selected from among graduate-level courses offered by the Bloch School. These courses should be selected according to the student's needs and interests. Students have the option of taking 12 credit hours in a single area to complete an emphasis area. Available emphasis areas are described below.

Capstone Course (3 credit hours)

After finishing the core, students are required to take a real-world problem solving capstone course. This requirement is designed to challenge the student to resolve an integrative issue. Students are allowed to select from specific classes providing different types of faculty/business leader supervised experiences. Students may take more than one capstone course, using the additional course as an elective.

Actual capstone course offerings will vary from semester to semester, but will be announced in advance to facilitate students' planning. Capstone courses may be taken no earlier than the final core course (Strategic Management). Students must take one of the 3 credit hour courses listed below.

- Business Plan for a Startup Company
- Global Management Consultancy
- Leading and Managing Change
- The Capstone Consulting Project
- Developing and Maintaining a Customer Centric Organization Culture

Emphasis Areas

The MBA program allows students the flexibility of using 15 credit hours to meet their unique needs. Electives may be used to obtain a business emphasis or specialization. An emphasis requires 12 credit hours. To focus your education and develop your expertise in specific areas for your career, the Bloch School offers the following eight emphasis areas (all are 12 credit hours):

- Entrepreneurship
- Finance

- General Management
- Global Business
- Leading and Managing People
- Management Information Systems
- Marketing
- Supply Chain & Operations Management

Please note that only 12 credit hours from any one emphasis area can be counted toward the degree program. Students are not required to complete an emphasis area. Each emphasis area is comprised of 12 hours. No more than 12 hours from any one area (beyond the core) can be used toward the MBA.

Students can, with the consent of appropriate faculty, select any other Bloch courses that might fit within the emphasis areas listed below (courses outside the Bloch School require special approval). Students are strongly encouraged to work closely with an adviser in planning their programs so that the courses they choose will be of interest and benefit to them while fulfilling the requirements of the degree. Not all classes are offered each semester. Emphasis areas follow.

Entrepreneurship

Four courses selected from the following:

- ENT 5515 Entrepreneurship & Innovation Boot Camp
- ENT 5525 Entrepreneurship: Managing Creativity and Innovation
- ENT 5535 Small Business Management and Entrepreneurship
- ENT 5541 Personal Entrepreneurial Strategy
- ENT 5542 Technology & New Ventures I
- ENT 5543 Technology & New Ventures II
- ENT 5545 Entrepreneurship and New Venture Creation
- ENT 5571 *Advanced Real Estate Planning
- ENT 5573 *Real Estate Market Analysis Feasibility Study
- ENT 5576 *Real Estate Property Management
- ENT 5578 *Legal Context of Real Estate Decision Making
- ENT 5585 Venture Capital Finance and Investment
- ENT 5587 Seminar in Entrepreneurship
- ENT 5591 Small Business Management Practicum
- ENT 5597 Independent Research in Entrepreneurship
- Or any other course approved by Entrepreneurship faculty.

****Only two of these courses can count in the Entrepreneurship emphasis area.***

***Entrepreneurship with a Real Estate Concentration**

Required

- ENT 5515 Entrepreneurship & Innovation Boot Camp
- ENT 5545 Entrepreneurship & New Venture Creation

Plus any two classes (6 hours) selected from the following:

- ENT 5571 Advanced Real Estate Finance
- ENT 5573 Real Estate Market Analysis Feasibility Study

- ENT 5576 Real Estate Property Management
- ENT 5578 Legal Context of Real Estate Decision Making

**Note: The Real Estate Concentration does not appear on the diploma or transcript.*

Finance

Required

- FIN 5550 Advanced Financial Management Theory and Policies

Plus nine hours selected from the following:

- FIN 5551 International Financial Management
- FIN 5552 Global Financial Markets and Institutions
- FIN 5553 Investment Analysis
- FIN 5556 Management of Financial Intermediaries
- FIN 5557 Derivative Securities
- FIN 5559 Strategic Financial Management
- FIN 5560 Financial Modeling
- FIN 5561 Financial Statement Analysis
- FIN 5562 Fixed Income Analysis
- FIN 5563 Valuation/Mergers and Acquisitions
- FIN 5564 Portfolio Management
- FIN 5565 Alternative Investments
- FIN 5582 Seminar in Finance
- RL-EST 5571 *Advanced Real Estate Finance
- RL-EST 5573 *Real Estate Market Analysis and Feasibility Study

**Students may use only one real estate course for credit in the Finance emphasis.*

General Management

At least one course from four of the five areas:

- **Entrepreneurship:** see emphasis area listing
- **Global Business:** see emphasis area listing
- **Law & Society:** MGT 5506, MGT 5508
- **Leading and Managing People:** see emphasis area listing
- **Strategy & Planning:** MGT 5513

Global Business

Required:

- MGT 5545 International Management

Four courses selected from the following:

- DSOM 5544 Global Supply Chain and Logistics Management
- FIN 5551 International Financial Management
- FIN 5552 Global Financial Markets and Institutions
- MGT 5546 Seminar in International Management
- MGT 5552 International Study in Business

- MKT 5555 International Marketing

Leading and Managing People

Twelve hours selected from the following:

- MGT 5516 Leading Teams
- MGT 5517 Leading Through Influence and Persuasion
- MGT 5518 Leadership and Motivation
- MGT 5519 Conflict Management and Negotiation Strategies
- MGT 5520 Strategic Benefits Management (1.5 credit hours)
- MGT 5521 Building Human Capital (1.5 credit hours)
- MGT 5533 Leadership and Change in Organizations
- MGT 5560 Strategic Human Resources
- MGT 5566 Strategic Staffing (1.5 credit hours)
- MGT 5567 Total Rewards Management (1.5 credit hours)
- PUB-ADM 5548 Leadership for Public Service

Management of Information Systems

Four courses selected from the following:

- ACCTNG 5565 Advanced Accounting Systems
- ACCTNG 5567 Information Systems Control and Audit
- MIS 5529 Decision Support & Expert Systems
- MIS 5552 Data Base Management
- MIS 5554 Systems Analysis, Design and Engineering
- MIS 5558 Management and Economics of Computing
- MIS 5580 Seminar in Information Systems

Additional elective courses may be selected from the following:

- DSOM 5542 ERP - Enterprise Resource Planning Systems
- DSOM 5543 Project Management

Marketing

Required

- MKT 5575 Advanced Marketing Strategy

Plus nine hours selected from the following:

- MKT 5539 Management in Direct Marketing
- MKT 5560 Buyer Behavior
- MKT 5561 Promotional Strategies in Marketing
- MKT 5562 Marketing Research
- MKT 5555 International Marketing

Additional elective courses may be selected from the following:

- MIS 5552 Data Base Management
- DSOM 5514 Forecasting Theory and Applications

Supply Chain and Operations Management

Required:

- DSOM 5540 Service Operations Management

- DSOM 5542 ERP - Enterprise Resource Planning Systems
- DSOM 5543 Project Management
- DSOM 5544 Global Supply Chain and Logistics Management

Note: Students should ensure that prerequisites are taken in the proper sequence.

Executive MBA Program

<http://www.bloch.umkc.edu/graduate/emba/index.aspx>

The Bloch Executive MBA (EMBA) is a highly-selective degree program for experienced professionals. The program offers a comprehensive integrated curriculum, field experiences, and four residencies. It is distinguished by an emphasis on cohort-learning, teamwork, hands-on projects, leadership coaching and development, and learning activities that contribute substantial value to participants, employers, and the larger community.

Students are admitted each year to a new EMBA cohort through a special application process. Students begin coursework in mid-August, and program completion requires 21 months. The program is composed of 16 semester-long, graduate-level courses and of four week-long immersion residencies that are focused on leadership, innovation, public policy, and the global marketplace. A variety of teaching formats are employed, including case studies, group projects, simulations and role playing, fieldwork, interactive discussions, and renowned guest lecturers.

Daylong classes meet three days per month (one Friday/ Saturday and one additional Saturday). Classes do not meet in June and July. To ensure that all students are up to speed on academic and business basics, the program starts with required self-paced tutorials in key subject areas, such as finance, accounting, and statistics.

Student Learning Outcomes

Graduates of the Bloch School's EMBA program will gain the business knowledge skills needed to excel as executives, entrepreneurs, and leaders. The EMBA graduate will:

- Define, analyze and evaluate decisions through an integrated analysis by using tools from the major business disciplines.
- Devise solutions for a variety of business problems and issues by using cohesive and logical reasoning patterns.
- Conceptualize a complex issue into a coherent written statement and oral presentation.
- Develop capacities to participate effectively in teams and exert effective team leadership.
- Have exposure to public sector leaders and processes and learn to work effectively in public policy teams to understand the forces and personalities that shape and impact American business policy.
- Integrate leadership theories and insights from coursework and apply these to complex leadership scenarios.
- Show greater awareness of their own leadership strengths and areas for development and commitment to engage in the lifelong process of taking action to strengthen their leadership competencies.

Admissions Requirements

The EMBA is designed for experienced professionals who typically possess a minimum of 8 years of work experience with growing responsibilities for managing people, projects, and/or

budgets. Admissions decisions are based on a combination of a solid academic record, demonstrated professional achievement, and evidence of a strong commitment to learning and to career and professional development. Further information on the Bloch EMBA program is available at (816) 235-2370 or at the program's web site <http://www.bloch.umkc.edu/graduate/emba/index.aspx>.

The Curriculum

Leadership Residency introduces students to fundamentals of business, organizational behavior, leadership, and teamwork.

Semester 1

- **Leadership and Organizations** focuses on how organizations work and how leaders can set direction, marshal resources, and build support to move initiatives forward.
- **Managerial Economics** studies the relationship between the economic theory and system as a whole and the ways in which both are affected by the behavior of the interdependent sectors of which they are composed.
- **Marketing Management** examines the role of marketing in driving profitable revenue growth in companies.
- **Financial Reporting Systems** introduces generally accepted accounting principles and concepts along with the preparation and analysis of financial statements.

Semester 2

- **Organizational Finance** gives students a thorough introduction to financial management that blends appropriate amounts of relevant theory with practical application.
- **Influence, Persuasion and Change** presents ideas, strategies and tools for leading change in complex organizations and for defining an ethical approach to leading, influencing, and persuading others.
- **Public Policy Context for Business Decisions** provides intensive exposure to the forces, practices, and personalities in Washington that shape America's business policy. The course includes the required 5 day *Washington, D.C. Residency* to expand student understandings of the role of social leadership in the development of business policies, practices and processes.
- **Applied Statistical Methods** investigates the use of detailed sample data for purposes of estimating, predicting, forecasting, and explaining correlations among varied observations.

Innovation Residency

- **Entrepreneurship and Innovation Immersion** is a 5-day, required, off-campus residency that gives students grounded understanding of how to identify and evaluate business opportunities. An engaging, true-to-life business simulation serves as an evolving "case" where students experience the opportunities and challenges in the day-to-day decisions and competitive worlds of the entrepreneur and of the general manager.

Semester 3

- **Leadership Accountability and the Legal Implications** highlights the full meaning of leadership accountability and of the legal challenges leaders face in a rapidly changing global world.
- **Strategic Management** examines the principles essential for the formulation and evaluation of strategy including industry analysis, strategic positioning, and the boundaries of the firm. The course also addresses the capacity of executive leadership to innovate and to create new or added values, as well as their responsibility for developing and communicating a clear vision and direction for a company's future.
- **Operations Management for World Class Competitiveness** explores the basic principles and strategic use of managing the production and distribution of goods and services.
- **Information Technology as a Strategic Tool** examines the critical linkage among an organization's business, culture, and information technology strategies and provides essential knowledge and frameworks for enhancing the IT role in innovation, change, and continuous organizational learning.

Semester 4

- **Leadership, Strategy and Human Resources** focuses on the leader as a catalyst in developing high-performance, market-based cultures and as a human resources strategist in marshalling the workforce toward productive ends.
- **Global Initiatives in Management** explores key, contemporary international business issues for leaders and for organizations in today's global economy and includes a required, 11 day, international residency experience in a major business center abroad.
- **Integrated Business Strategies - Capstone Course** explores critical factors involved in effective decision making, in organizational governance, and in developing the broad enterprise leadership perspective needed for effective executive planning and action.

The fourth course in the final semester is a student's choice from among two electives:

- **Innovation and Entrepreneurship** explores the creative, entrepreneurial, and managerial processes involved in moving from a concept to the development of a new business and provides students hands-on opportunities to convert a dream into a high-growth business. *-or-*
- **Advanced Topics in Finance** builds on the previous finance course in the program and delves deeper into topics such as valuation, enterprise risk management, securities and investments, regulatory frameworks, and corporate governance.

Combined J.D./MBA Program

The Bloch School and UMKC School of Law offer the combined J.D. and MBA program. Students must satisfy the admission and degree requirements for each school. For further information, contact the School of Law or consult the Bloch School Web site at <http://www.bloch.umkc.edu/graduate/mba/jd-mba-joint-program/index.aspx>.

Master of Entrepreneurial Real Estate

Graduates of the Master of Entrepreneurial Real Estate degree program will:

- Have an understanding of advanced real estate investment theories and methods from ownership issues, financing commercial real estate and analyzing a commercial real estate investment through the after tax cash flow model for real estate analysis.
- Have an understanding of practical and successful techniques for a proactive approach to managing, marketing and leasing commercial properties.
- Have an advanced working knowledge of the essential steps in conducting a market analysis that will enable the student to obtain relevant data from the market and utilize the various metrics to measure the supply and demand for a particular type of real estate use.
- Have an understanding of key business and legal concepts in architectural and general construction contract negotiations; issues in buying, leasing and selling properties including due diligence, representations and default concepts; brokerage agreements; governmental issues, including zoning, entitlements and condemnation.

The master of entrepreneurial real estate (MERE) is designed for students interested in all aspects of real estate who have decided their career paths require an advanced level of knowledge. The Lewis White Real Estate Center works in partnership with the Bloch School of Management's Institute for Entrepreneurship and Innovation which provides a global and entrepreneurial focus to the program.

The MERE program fulfills a vital need for graduate real estate education not offered by any university in the region. Enabling real estate entrepreneurs to keep up with today's ever-changing environment, the program addresses real estate trends such as the global shift in attitude towards eco-friendly developments, reducing carbon footprints and the expansion of green technology in new construction. The knowledge gained will allow participants to make real estate decisions that require mastery of complex, interdisciplinary skills and an ability to manage teams of professionals with expertise in various fields.

Curriculum

The MERE is a 36-credit hour program that is offered over a 2-year period, with students taking 3-6 hours each semester. Core courses include the following:

- Urban Planning
- Entrepreneurial Real Estate
- Legal Contexts of Real Estate Decisions
- Market Analysis and Feasibility Studies
- Advanced Real Estate Finance
- Property Management
- Valuation
- Capital Markets
- Corporate Real Estate
- Construction Means and Methods
- Real Estate Taxation

International Real Estate

Executive MERE

The executive format of the MERE is an accelerated program designed for experienced real estate professionals who have a minimum of five years of experience in a real estate or related field and is tailored to reflect the student's level of real estate industry experience. This is a 14-month program with instruction by Ph.D.'s, attorneys, CCIM instructors and local experts in specialized areas. One week of international travel is included where the class will be introduced to real estate professionals in other countries in order to build their international networks while learning about global real estate issues.

Master of Public Administration

Graduates of the Master of Public Administration have the knowledge and skills necessary to effectively and ethically lead and manage dynamic public service organizations. Specifically, the students will:

- Engage in sophisticated decision making, grounded in disciplined analytical and critical thought, to effectively address the long term needs and interests of communities, organizations, and their stakeholders.
- Understand the process as well as content dimensions of problem analysis and resolution and make effective use of state-of-the-art administrative and management practices and methods, including the effective use of technology.
- Communicate effectively, verbally and in writing.
- Exhibit competence in understanding and addressing the ethical dimensions of public service leadership and management.
- Understand the wide variation that exists in the principles, cultures, and practices of organizations and communities from different parts of the world, and the implications of this variation for effective public service leadership.
- Understand the value of diversity and inclusion and exhibit competence in ethical, effective, culturally competent leadership and management.
- Demonstrate self-confidence and capacity to deal with dynamics, complex, and ambiguous community problems and issues.
- Have the capacity to work effectively in collaboration with others through teams, alliances, and networks to achieve results.

Public service offers a career filled with excitement, challenge, and significance. Opportunities are numerous, ranging from positions in local, state, national and international agencies to those in health institutions and nonprofit organizations. There has never been a greater opportunity for public service leaders and executives who can apply their knowledge and skills to solving the most important leadership and community challenges facing these organizations in an increasingly complex and changing world. The master of public administration degree program is offered through the Department of Public Affairs.

The Curriculum

The M.P.A. degree will be awarded on completion of 36 semester hours, consisting of 21 hours of required core courses, 9 to 12 hours in a selected emphasis area and up to 6 hours of electives. An internship is recommended for any student without substantial work experience in public, nonprofit or health administration. Individual courses may be waived if a student presents evidence of adequate undergraduate study, but other courses for graduate credit must be substituted to meet the minimum of 36 hours. **Note:** Students who repeat courses that have been waived from their program may not count the repeated course toward their degree.

Core Curriculum (21 hours)

The following courses are required for each student:

- PUB-ADM 5510 Research Methods in Public Administration
- PUB-ADM 5526 The Politics of Administration
- PUB-ADM 5548 Leadership for Public Service
- MGT 5513 Economic Policy and Managerial Control
- or-
- FIN 5501 Economics for Administration
- PUB-ADM 5525 Financial Accountability and Policy Development
- PUB-ADM 5544 Program Evaluation and Analysis
- PUB-ADM 5530 Capstone Seminar in Public Administration

Students selecting the health services administration emphasis have the following core requirements:

- PUB-ADM 5510 Research Methods in Public Administration
- PUB-ADM 5526 The Politics of Administration
- PUB-ADM 5548 Leadership for Public Service
- HLTH-ADM 5580 Economics of Health and Medicine
- or-
- MGT 5513
- or-
- FIN 5501
- HLTH-ADM 5571 Financial Management Issues: Health & Human Services Organizations
- or-
- PUB-ADM 5525
- HLTH-ADM 5578 The Evaluation and Control of Health Services
- or-
- PUB-ADM 5544
- PUB-ADM 5530 Capstone Seminar in Public Administration

Electives (Up to 6 hours)

Elective courses may be selected from public administration, including courses in the student's chosen emphasis area. Courses may also be selected from political science, economics, psychology, sociology, as well as from other graduate fields with approval of the faculty adviser.

Emphasis Areas (9-12 hours)

Students seeking the master of public administration degree may specialize in three emphasis areas:

- Health Services Administration
- Nonprofit Management
- Urban Administration

A student may also tailor a general or specific program in order to meet individual talents, needs or job requirements. Such a program must be developed in consultation with a faculty adviser. Each course is worth three credits unless otherwise noted.

Health Services Administration (9 hours)

- HLTH-ADM 5571 Financial Management Issues in Health and Human Service Organizations
- HLTH-ADM 5577 Health Service Administration and the Health Professions
- HLTH-ADM 5578 The Evaluation and Control of Health Services
- HLTH-ADM 5580 Economics of Health and Medicine
- HLTH-ADM 5581 Health Policy in the United States
- HLTH-ADM 5586 Supervised Research in Health Services Administration (independent study or internship)

Nonprofit Management (12 hours)

- PUB-ADM 455 Nonprofit Leadership Issues (1 hour)
- PUB-ADM 495 Volunteerism, Philanthropy and the Nonprofit Sector in the United States (1 hour)
- PUB-ADM 5551 Strategic Management in Nonprofit Organizations
- PUB-ADM 5552 Community Organizations and Public Policy
- PUB-ADM 5553 Legal Framework and Financial Management in Nonprofit Organizations
- PUB-ADM 5555 Topics in Nonprofit Fundraising (1-2 hours each)
- PUB-ADM 5556 Innovation in Nonprofit Management and Leadership
- PUB-ADM 5585 Seminar: Social Entrepreneurship (1-3 hours)
- PUB-ADM 5598A Supervised Research in Nonprofit Management
- HLTH-ADM 5571 Financial Management Issues in Health and Human Services Organizations

Students choosing the nonprofit emphasis should choose **at least six** of their twelve emphasis area credit hours from among the following courses: PUB-ADM 495, PUB-ADM 5551, PUB-ADM 5552, PUB-ADM 5553, and PUB-ADM 5556.

Urban Administration (9 hours)

Required:

- PUB-ADM 5535 Urban Policy and Administration

Two courses selected from the following:

- PUB-ADM 5536 Managing Urban Economic Development
- PUB-ADM 5538 Comparative Urban Administration

- PUB-ADM 5539 Urban and Regional Planning for Urban Administrators
- PUB-ADM 5552 Community Organizations and Public Policy
- PUB-ADM 5565 Topics in Community Economic Development (1 credit hour each)
- PUB-ADM 5581 Seminar in Urban Administration
- PUB-ADM 5595 Internship*

* Students choosing the urban administration emphasis are allowed no more than three hours of internship to fulfill the emphasis area. Additional internship hours will count as electives.

Note: Students should ensure that prerequisites are taken in the proper sequence.

The Executive M.P.A. Program

Students with at least five years of increasingly-responsible career and leadership experience may apply for the Executive M.P.A. degree program. This 23-month cohort program is designed to prepare high-potential professionals and managers for executive and community leadership roles in government, nonprofit and health care organizations. The EMPA curriculum includes a number of unique learning and professional development experiences and resources, including executive coaching, immersion courses, and issue-oriented residencies in locations such as Washington D.C. and Cape Town, South Africa. For more information about this option, please visit www.umkc.edu/empa.

The B.A. (Urban Affairs)/M.P.A. Program

Students obtaining a B.A. in Urban Affairs in the College of Arts and Sciences may pursue early admission to the master's degree program in public administration and obtain a master's degree in one additional year. The program allows students to utilize some of the M.P.A. courses to satisfy urban affairs requirements, thereby reducing the number of courses needed to complete both degrees. Contact the Bloch School Student Services Office for more information on this program option.

The B.B.A./M.P.A. Program

Students completing the bachelor of business administration may complete their M.P.A. degree in one additional year at UMKC (three semesters) if they meet entrance requirements for the public administration graduate program. For more information about this option, contact the Bloch School Student Services Office.

Combined J.D./M.P.A. Program

The Bloch School and the UMKC School of Law offer a combined J.D. and M.P.A. program. Students must satisfy the admission and degree requirements for each school. Students *fully admitted* to the School of Law are exempt from the GRE requirement for admission to the M.P.A. program. For further information, contact the School of Law or consult the Bloch School Web site at <http://www.bloch.umkc.edu/graduate/mpa/jd-mpa-joint-program/index.aspx>.

Master of Science in Accounting

Graduates of the Master of Science in Accounting degree program will:

- Meet the Missouri statutory educational requirements to sit for the Uniform CPA exam.
- Define, analyze and devise solutions for structured and unstructured problems and issues by using cohesive and logical reasoning patterns for evaluating information, materials, and data.
- Recognize and analyze ethical problems and choose and defend resolutions for practical situations that occur in accounting in accordance with the accountant's professional responsibility.
- Conceptualize a complex issue into a coherent written statement and oral presentation.

The Curriculum

The master of science in accounting program encompasses advanced analysis in a variety of areas. The total hours required are dependent on the focus of the student's undergraduate coursework. Students may be exempt from certain course requirements based on prior business and accounting coursework and grades earned, with exemptions determined at the time of initial advising and enrollment. Students with no preparation in mathematics and computer applications must complete MATH 110 and MIS 202. **Note:** Students who repeat courses that have been waived from their program may not count the repeated course for credit toward their degree.

M.S. in Accounting - Non-Accounting Undergraduates

This program is designed for students with little or no undergraduate accounting coursework. It provides comprehensive coverage of accounting topics necessary for a professional career in the field. Completion of the program also qualifies students for the various examinations leading to professional certification. Stage One identifies prerequisite accounting and business courses that provide the foundation for the Stage Two courses required for the M.S. in accounting degree. Stage One courses may be waived based on equivalent undergraduate coursework taken as part of a bachelor of business administration degree from UMKC or equivalent program. This program is outlined below.

Stage One

- ACCTNG 5556 Cost Management
- ACCTNG 5558 Financial Accounting Theory
- ACCTNG 5550 Accounting Systems and Controls
- ACCTNG 5517 Survey of Accounting
- DSOM 5505 Decision Sciences
- DSOM 5507 Operations/Supply Chain Management
- FIN 325 Financial Management
- FIN 5504 Managerial Economics
- FIN 5505 Global Macroeconomics
- Business Law Course
- MKT 5501 Marketing Management
- ENT 5502 Introduction to Entrepreneurship **OR** MGT 5509 Strategic Management
- Pick two of the following: MGT 5501, MGT 5502 and MGT 5507

Stage Two

(30 credit hours beyond Stage One)

- ACCTNG 311 Intermediate Accounting II
- ACCTNG 409 Advanced Taxation

-or-

ACCTNG 5557 Introduction to Income Taxation (see advisor to determine which course best fits in your degree program)

- ACCTNG 421 Governmental/Not-for-Profit Accounting
- ACCTNG 5559 Advanced Financial Accounting Theory
- ACCTNG 5560 Introduction to Auditing
- ACCTNG 5560 (or higher) level course in Managerial Accounting
- ACCTNG 5560 (or higher) level course in Financial Accounting
- ACCTNG 5560 (or higher) level course in Auditing
- ACCTNG 5570 (or higher) level course in Tax
- Approved Accounting elective, 5561 or higher

M.S. in Accounting - Accounting Undergraduate

Students with an undergraduate degree in accounting may complete the M.S. in accounting program in a minimum of 30 semester hours. Examples of focus areas which students may select follow:

Accounting/Audit Focus (30 hours)

ACCTNG 5560 (or higher) level in managerial accounting, tax, auditing, and financial accounting (12 hours)

Approved electives in audit or financial accounting (6 hours)

Approved electives (up to 12 hours)

Taxation Focus (30 hours)

ACCTNG 5571, ACCTNG 5572, ACCTNG 5573, ACCTNG 5574, ACCTNG 5576 (15 hours)

ACCTNG 5560 (or higher) level in financial accounting, managerial accounting and audit (9 hours)

Approved electives (6 hours)

Note: Students should ensure that prerequisites are taken in the proper sequence.

Master of Science in Finance

The Bloch School M.S.F. graduate will

- Analyze financial statements.
- Utilize financial statement information to make investment decisions.
- Value business entities (both public and private).
- Utilize financial modeling techniques to reach financial decisions.
- Understand the interconnectivity of global financial markets.
- Understand how to manage risks.
- Understand how to utilize various asset classes to achieve portfolio objectives.
- Understand how to value a variety of financial securities.

The master of science in finance (M.S.F.) is for students and executives seeking specialized training in finance in preparation for financial certifications such as the Chartered Financial Analyst (CFA) and Certified Financial Planner (CFP), as well as for acquiring career advancement skills in a variety of financial fields.

Our nationally and globally diverse faculty is comprised of experienced educators and recognized scholars who combine theory with practice to provide a balanced learning experience.

The Curriculum

The M.S.F. is a 33 hour program and courses are offered in fall, spring, summer and intersessions. Students entering the program must meet prerequisites in accounting, economics, finance and statistics. Courses are offered in the evening and students can pursue the degree part-time or full-time.

Course Content

Course content in the M.S.F. includes the following:

- Financial Management
- Valuation/Mergers and Acquisitions
- Financial Statement Analysis
- Financial Modeling
- Portfolio Management
- Financial Services Management
- International Finance
- Investments
- Alternative Investments
- Global Financial Markets and Institutions
- Derivative Securities
- Fixed Income

Designated electives can be chosen from accounting, marketing, entrepreneurship, human resources, management information systems, computer science, math, statistics, economics, law and other related disciplines.

Undergraduate General Education Requirements for The Bloch School

General Education Requirements

The following courses (Preparatory and Basic Skills Requirements) should be completed prior to entering the junior/senior portion of the bachelor of business administration (B.B.A.) and bachelor of science in accounting (B.S. in accounting) programs. These courses should be taken during the freshman and sophomore years. Differences in requirements between the two undergraduate programs are noted.

Preparatory and Basic Skills Requirements

Humanities (12 hours)

COMM-ST 110	Fund. of Eff. Speaking & Listening	3
ENGLISH 110	English I: introduction to Academic Prose	3
ENGLISH 225	Intermediate Academic Prose	3
PHILOS 210	Foundations of Philosophy or classroom-based Foreign Language	3

(AP, CLEP, & department credit by exam accepted)

Natural Sciences (8 hours)

Students may choose courses from astronomy, biology, chemistry, earth science, environmental science, geology, physical geography, physical science and physics. A laboratory component is required.

Social Sciences (6 hours)

Courses may be selected from American studies, anthropology, criminal justice and criminology, geography, history, political science, psychology and sociology. As part of the six hours, and as required by state law, all students must study the United States and Missouri constitutions.

Fine Arts (3 hours)

Students may select a course from art, art history, conservatory or theater.

Basic Skills (27

ACCTNG 210 / ACCTNG 210L	Introduction to Financial Accounting	3
ACCTNG 211	Introduction to Managerial Accounting	3
MIS 202	Computer Applications in Management	3
ECON 201	Introduction to Economics I	3
ECON 202	Introduction to Economics II	3
MATH 110	College Algebra	3
MATH 206	Brief Calculus and Matrix Algebra	3
STAT 235	Elementary Statistics	3
* MGT 301	Effective Business Communication	3
* MGT 301 counts as part of the in-major GPA		

General Education Requirements for Students Transferring from Other Missouri Institutions with a Certified 42-Hour Core Curriculum

Students transferring into the Bloch School of Management with a certified 42-hour block of general education credit from another Missouri institution must complete additional coursework for baccalaureate degrees from the Bloch School. These courses include:

ACCTNG 210 / ACCTNG 210L	Introduction to Financial Accounting	3
ACCTNG 211	Introduction to Managerial Accounting	3
MIS 202	Computer Applications in Management	3
ECON 201	Introduction to Economics I	3
ECON 202	Introduction to Economics II	3
MATH 110	College Algebra	3
MATH 206	Brief Calculus and Matrix Algebra	3
STAT 235	Elementary Statistics	3
* MGT 301	Effective Business Communication	3

Written English Proficiency Test (WEPT)

The preceding requirements can be satisfied by equivalent courses from other institutions. Additionally, some of the courses may satisfy general education requirements in the 42-hour core. Check with individual institutions for more information.

UMKC's 42-Credit Hour Certified General Education Core for Students Transferring to Another Missouri Institution

Bloch School students wishing to complete the 42-hour core should also consult with an academic adviser in the Student Services Office, room 115 of the Bloch School.

Bachelor of Business Administration

Upon graduation from the B.B.A. program, a student will be able to:

- Demonstrate technical competence in domestic and global business through the study of major disciplines within the fields of business.
- Define, analyze and devise solutions for structured and unstructured business problems and issues by using cohesive and logical reasoning patterns for evaluating information, materials and data.
- Conceptualize a complex issue into a coherent written statement and oral presentation.
- Exhibit competence in the uses of technology in modern organizational operations.

- Demonstrate the fundamentals of creating and managing innovation, new business development and high-growth potential entities.

Courses for the B.B.A. program are listed below. All students must complete the core curriculum and choose one of four emphasis areas:

- Enterprise Management
- Entrepreneurship
- Finance
- Marketing

Prior to enrolling in any course, students must ensure they have completed the necessary prerequisites. Seniors in the B.B.A. program may begin work on the MBA degree if pre-approved by the Bloch School based on their formal application to the MBA program.

Core B.B.A. Curriculum (36 hours)

- DSOM 309 Intermediate Business Statistics
- DSOM 326 Production/Operations Management
- ECON 302 Microeconomic Analysis
- ENT 460 Creating the Enterprise
- FIN 325 Financial Management
- MGT 306 Legal, Ethical and Regulatory Environment of Business
- MGT 330 Understanding the Individual in the Organization
- MGT 355 Organizational Effectiveness and Leadership
- MGT 370 International Management
- or-
- MGT 470 International Study in Business
- MGT 471 Strategic Management
- MIS 402 Information Management
- MKT 324 Marketing Concepts

General Electives (16 hours)

A maximum of two hours of PE activity is accepted as elective credit. Applied or military science and vocational courses may not be taken for elective credit.

Emphasis Areas (15 hours)

Enterprise Management

Required Courses

- DSOM 346 Management Analysis
- MGT 337 Managing Human Capital

Plus three courses selected from the following:

- DSOM 431 Quality and Process Improvement
- ENT 364 Entrepreneurial Management
- FIN 419 Financial Statement Analysis

- *MGT 470 International Study in Business
- or-
- *MGT 370 International Management
- MIS 415 Managing the Information Systems Resource
- MKT 348 Market Analysis

****The course taken to meet the Business Core requirement may not count toward the required electives in Enterprise Management***

Entrepreneurship

Required Courses

- ENT 215 Introduction to Entrepreneurship (also listed as ENT 315)
- or-
- ENT 201 Entrepreneurship Immersion (also listed as ENT 301)
- ENT 327 Creating the New Venture: Experiential Learning
- or-
- ENT 328 Creating the E-Business: Experiential Learning
- ENT 332 Managing the New Venture: Experiential Learning

In addition, students must select two of the following electives:

- ENT 321 Real Estate Principles
- ENT 341 Technology Entrepreneurship
- ENT 361 New Product Development
- ENT 364 Entrepreneurial Management
- ENT 412 Entrepreneurial Finance and Venture Capital Investment
- ENT 421 Real Estate Finance Fundamentals
- ENT 425 Corporate Entrepreneurship
- ENT 432 Entrepreneurial Marketing and Selling
- ENT 446 Entrepreneurial Selling and Sales Force Management
- ENT 491 Entrepreneurial Consulting

Students in the Entrepreneurship emphasis replace the Bloch School capstone course, ENT 460, with a 300- or 400-level Bloch School elective.

***Entrepreneurship with a Real Estate Concentration**

Required Courses

- ENT 215 Introduction to Entrepreneurship (also listed as ENT 315)
- or-
- ENT 201 Entrepreneurship Immersion (also listed as ENT 301)
- ENT 327 Creating the New Venture: Experiential Learning
- or-
- ENT 328 Creating the E-Business: Experiential Learning
- ENT 332 Managing the New Venture: Experiential Learning
- ENT 321 Real Estate Principles
- ENT 421 Real Estate Finance Fundamentals

***Note: The Real Estate concentration does not appear on the diploma or transcript.**

Finance

Required Courses

- FIN 340 Global Financial Markets and Institutions
- FIN 345 Investments
- FIN 435 Advanced Corporate Finance

Plus two courses selected from the following:

- FIN 419 Financial Statement Analysis
- FIN 427 Debt Instruments and Markets
- FIN 428 Commercial Bank Management
- *ENT 412 Entrepreneurial Finance and Venture Capital Investment
- *RL-EST 321 Real Estate Principles
- *RL-EST 421 Real Estate Finance Fundamentals

***Note: Only one of these courses can be used in the Finance emphasis.**

Marketing

Required Courses

- MKT 335 Consumer Behavior
- MKT 348 Market Analysis
- MKT 480 Marketing Strategy

Plus two courses selected from the following:

- ENT 361 New Product Development
- MKT 418 Sales and Promotion Strategies
- MKT 442 Internet/Direct Marketing
- MKT 476 Services Marketing

Note: Students should ensure that prerequisites are taken in the proper sequence.

Bachelor of Science in Accounting

Upon graduation from the B.S. in accounting program, a student will be able to:

- Demonstrate entry-level technical competence in financial accounting, taxation, cost/managerial and auditing. The competency level is not sufficient to meet the technical requirements for professional certification but will serve as the technical foundation for graduate education.
- Demonstrate technical competence in domestic and global business through the study of major disciplines within the fields of business.
- Define, analyze and devise solutions for structured and unstructured business problems and issues by using cohesive and logical reasoning patterns for evaluating information, materials and data.
- Recognize and apply the AICPA code of professional conduct to ethical problems that occur in accounting practice.
- Conceptualize a complex issue into a coherent written statement and oral presentation.

- Exhibit competence in the uses of technology in modern organizational operations.
- Demonstrate the fundamentals of creating and managing innovation, new business development and high-growth potential entities.

Upon graduation from the B.S. in accounting program, a student will have the skill set and professional mindset needed to perform in entry-level financial accounting, taxation, cost management and auditing positions.

Sophomore Year - Second Semester

ACCTNG 211 Introduction to Managerial Accounting
 ACCTNG 310 Intermediate Accounting 1

Junior Year - First Semester

ACCTNG 307 Cost Management
 ACCTNG 350 Accounting Systems and Controls
 DSOM 309 Intermediate Business Statistics
 Economics Elective (ECON 301, ECON 302 or ECON 331)

Junior Year - Second Semester

ACCTNG 311 Intermediate Accounting II
 MKT 324 Marketing Concepts
 DSOM 326 Production/Operations Management
 MGT 330 Understanding the Individual
 in the Organization
 MGT 370 International Management
-or-
 MGT 470 International Study in Business

Senior Year - First Semester

ACCTNG 405 Auditing
 ACCTNG 408 Federal Income Taxation
 FIN 325 Financial Management
 MGT 306 Legal, Ethical and Regulatory
 Environment of Business
 ACCTNG 420 Advanced Accounting

Senior Year - Second Semester

ACCTNG 409 Advanced Tax
 ACCTNG 421 Governmental/Not-for-Profit Accounting
 MGT 320 Law of Commercial Transactions
 MGT 471 Strategic Management
 ENT 460 Creating the Enterprise
 Approved Finance Elective (FIN 340, FIN 345, FIN 419, FIN 427, FIN 428, FIN 435)

Note: Students should ensure that prerequisites are taken in the proper sequence.

Business Administration Minors

Students interested in business may complete a minor in either business administration or entrepreneurship. The minors are open to degree-seeking undergraduate students, with the exception of students pursuing a degree in programs that do not recognize minors. Additionally, students pursuing a degree in business or accounting are not eligible for the minor in Business Administration.

Students must achieve a minimum GPA of 2.25 in all Bloch School courses. Transfer students with equivalent course credit will be required to take a more advanced course in that same area. Students are limited to 30 hours of coursework in the Bloch School. All coursework toward the minors must be completed at UMKC.

Students interested in the Business Administration or Entrepreneurship minors should contact staff in the Bloch School Student Services Office, room 115.

Business Administration Minor

The minor consists of the following coursework and is subject to the student satisfying all applicable prerequisites.

Required for admission to the Business minor:

MIS 202 Computer Applications in Management

ACCTNG 210/ACCTNG 210L Introduction to Financial Accounting

Required courses:

MKT 324 Marketing Concepts

FIN 325 Financial Management

MGT 330 Understanding the Individual in the Organization

Business elective:

One 300/400 level course **-or-** ENT 215/ENT 315 Introduction to Entrepreneurship (preferred) -
or- ENT 201/ENT 301 Entrepreneurship Immersion

Total hours for Business Administration minor: 18

Entrepreneurship Minor

The Entrepreneurship minor is designed to help students acquire and refine their entrepreneurial skills. The minor is intended both for Bloch School students and for students outside of the Bloch School who would like to bring an entrepreneurial perspective to their major field of study.

Required courses:

ENT 215/ENT 315 Introduction to Entrepreneurship (preferred for Bloch School students) **-or-**
ENT 201/ENT 301 Entrepreneurship Immersion

ENT 327 Creating the New Venture: Experiential Learning **-or-** ENT 328 Creating the E-Business: Experiential Learning

Entrepreneurship electives:

Students must also complete four additional entrepreneurship electives from the following list:

ENT 332 Managing the New Venture: Experiential Learning

ENT 341 Technology Entrepreneurship

ENT 361 New Product Development
ENT 364 Entrepreneurial Management
ENT 412 Entrepreneurial Finance and Venture Capital Investment
ENT 432 Entrepreneurial Marketing and Selling

Students have the option of replacing up to two entrepreneurship electives noted above with two discipline-related electives that are consistent with their entrepreneurial focus. These classes must be pre-approved by the Bloch.

Total hours for Entrepreneurship minor: 18

Special Programs and Centers

Bloch Executive Education Center

Bloch School Bloch Executive Education Center 5110 Cherry, Suite 305 (816) 235-6071
<http://www.bloch.umkc.edu/execed>

Bloch Executive Education is the Kansas City area's university partner for management seminars and custom corporate programs that support innovation and leadership development. The Center's programs are designed to engage business, government, and non-profit leaders in learning application of concepts and practices that affect growth locally and abroad. Custom programs are designed in concert with clients to meet a specific need of the organization. Management seminars are available to executives and aspiring leaders based on personal and professional competency needs. Our nationally-recognized faculty provokes thought and challenge perspectives through relevant curricula that feature innovative thought, research insights, and business best practices.

Center for Global Management Studies

Bloch School
5110 Cherry St.

<http://www.bloch.umkc.edu/centers-institutes/center-for-international-business/index.aspx>

The Center for Global Management Studies at the Bloch School promotes and supports academic study and research in global management issues. The objectives of the Center include: (1) developing and maintaining global course offerings that support the Bloch School Strategic Plan; (2) supporting faculty research activities that are closely related to global management issues; (3) promoting and supporting Bloch School faculty and student involvement in academic exchange programs with partner universities throughout the world; and (4) engaging in liaison and outreach activities with UMKC, Kansas City, national and international organizations involved in global management activities.

Cookingham Institute of Urban Affairs

Bloch School 5110 Cherry St. (816) 235-2894 <http://www.bloch.umkc.edu/centers-institutes/lpcookingham/index.aspx>

The mission of the L.P. Cookingham Institute is to promote urban civic engagement and social entrepreneurship on critical issues of local and regional impact through research, educational programs, and community engagement. The Institute partners with government, business, and nonprofit entities to identify problems, develop solutions, and bring cutting-edge practices to

Kansas City. The Cookingham Institute also contributes to promoting dialogue within UMKC on urban core issues through grants, contracts, and a variety of other programs.

Institute for Entrepreneurship and Innovation

Bloch School 5110 Cherry Street Kansas City, MO 64110-2499 P: (816) 235-6200 F: (816)-235-6529 <http://www.entrepreneurship.bloch.umkc.edu/>

The Princeton Review ranks the Institute for Entrepreneurship and Innovation at the UMKC Bloch School among the top 25 graduate entrepreneurship programs in the nation, beating out 2,300 other schools. The mission of the Institute for Entrepreneurship and Innovation is to inspire and nurture entrepreneurs and innovators through transformational education and research and the Institute's vision is to be a global leader in creating and disseminating knowledge to advance entrepreneurship and innovation. As a unique differentiator, the Institute distinguishes itself across 5 key elements: research, faculty, education, programs, and results. The Institute's goal is that experiential learning will be the basis for all curriculum and programs. By delivering a curriculum designed specifically for aspiring entrepreneurs and progressive student programs, our students acquire first-hand knowledge in creating and managing high-growth potential enterprises. The Institute strives to prepare students to create new businesses and develop innovations for established companies. All students are expected to create and manage a new venture before graduation. And entrepreneurship education isn't limited to just business students. We welcome students from every discipline on campus who want to learn how to spark ideas and create businesses.

Lewis White Real Estate Center

Bloch School 5110 Cherry St. #319 (816) 235-6288/5188
<http://www.umkc.edu/whitecenter/>

The Lewis White Real Estate Center (The White Center) is a center that focuses on developing students to become real estate leaders in Kansas City and beyond, as well as enabling the experienced professional to take their real estate career to the next level. Faculty of the Center conduct state-of-the-art research in the field of real estate and provide an educational resource for the community. The newly established degree in Entrepreneurial Real Estate provides a comprehensive body of real estate knowledge essential for anyone involved in making decisions about real estate including wealth creation, location choices for business, financing, valuing or managing. It provides a thorough understanding of the financial risks and rewards of real estate development, particularly in an urban context, as well as the relationship between public policy and urban development.

Midwest Center for Nonprofit Leadership

Bloch School 5110 Cherry St. (816) 235-2305 <http://www.mcnl.org>

The Midwest Center for Nonprofit Leadership is the Bloch School research and education center that prepares and supports the work of leaders and managers of nonprofit public service organizations throughout the Midwest. The Center enhances the performance and effectiveness of nonprofit organizations and their leaders through high quality community-oriented education, research and facilitation services. Center faculty, fellows and students support nonprofit organizations as educators, advisers and facilitators in areas such as governing board development, management development, strategic planning, strategic organizational and

financial management, and the leadership of major change initiatives. The Center also operates a Nonprofit Resource Center that is open to students and all members of the community.

History

The University of Missouri opened a medical school on the UMKC campus in 1971. Using an alternative approach to medical education from that of the traditional four-year school, the School of Medicine has as its primary mission the training of physicians able to meet the health-care needs of Missouri and the nation.

The approach used at this school is to grant admission to medical school directly from high school in a curriculum spread over six or more calendar years. By providing students with early and continuous patient-care experience, the curriculum fully integrates the teaching of liberal arts/humanities, basic sciences and clinical medicine. The environment for learning created at this institution de-emphasizes competition and encourages learning through close faculty-student interaction and student partnerships.

All medical schools are reviewed and accredited by the Liaison Committee on Medical Education, a national body representing the Association of American Medical Colleges and the American Medical Association. The academic philosophy and plan have been endorsed by this committee, and the school is fully accredited.

Philosophy

The fundamental purpose of medical schools is to educate physicians. The prime objective of all professionals, physicians included, is to apply a sophisticated body of knowledge and skills to the solution of problems faced by people. In doing so, the individual will follow standards of the profession for competence, ethics and communication and will demonstrate commitment to the principles of professionalism - altruism, humanism, excellence and accountability.

The school does not separate the several obligations of a medical school: to educate the student, the house officer and the physician; to attract new talent to the health-care field and to ensure that talent remain active and prepared; to maintain maximum standards of ethics and care; to have concern equally for the individual and for the community; and to foster inquiry, to find answers and to apply those answers.

Library and Information Services

Information services, including periodicals, computer literature searching and a full range of innovative reference services, are available through the Health Sciences Library. For more information, see the section on Library Services.

Medical Education Media Center

The MedicalEducationMediaCenter is a learning resources facility that offers over 3,000 anatomical and physical exam models, audiovisual programs and instructional software. Collection development is primarily in support of the School of Medicine curriculum for classroom instruction and self-study. However, additional services provide a collection of audiovisual CME, USMLE study/review titles and a subscription to the online testing bank Exam Master. Exam Master provides over 17,000 board type questions for USMLE Steps 1-3 and medical specialty boards (UMKC SOM user ID/password required).

The facility offers a computer lab with Internet access, open tables for model usage and an audiovisual viewing room equip with DVD and video players for small groups. Our quarterly newsletter, "MultiMedia Memo," may be found at: www.med.umkc.edu/news/
For access to our online catalog, Exam Master or general information, go to our web site: www.med.umkc.edu/memc .

Location: UMKCSchool of Medicine, 2nd floor, room M2-C04A Phone: 816-235-1832; 816-235-1864 Hours: Monday – Friday, 8:00 a.m. to 8 p.m.

Information Services

Information Services are maintained by the department of Evaluation and Computer Resources (ECR).

ECR provides all computer-related support for all Faculty/Staff/Students and various research groups within the School of Medicine.

In addition to providing support and many other services, including the School of Medicine's official web site, it also maintains computer and printing resources for student use which are accessible **24/7** in the building, with additions to follow in the future.

ECR also maintains a Digital Signage Network that allows the creation and delivery of targeted messages (i.e. Text/Image/Audio/Video) that timely inform and educate the audience of relevant news, events, and other happenings, in high-traffic areas throughout the School of Medicine. Current resources include:

38 - Dell/Windows XP workstations that are found in all Student Unit areas on the 4th/5th floors. Each of the 8 Student Unit areas also incorporates a conference room workstation with a large monitor setup for presentations, etc.

18 - Dell/Windows XP workstations located in the Technical Learning Center (TLC) on the 3rd floor. **Note:**Currently, use of lab is by reservation only.

4 – Dell XPS One/Windows Vista Kiosk workstations located in the Theater A lobby on the 1st floor.

3 - Apple iMac/Windows XP Kiosk workstations located in the main lobby on the 1st floor.

2 - Dell/Windows XP Kiosk workstations located in the Canteen/Vending area on the 1st floor.

2 - Dell/Windows XP Kiosk workstations located outside the Health Sciences Library on the 2nd floor.

2 - Dell/Windows XP Kiosk workstations located next to the TrumanMedicalCenter entrance on the 4th floor.

The School of Medicine also incorporates a secured, wireless network that virtually covers the entire building. Additionally, much of the UMKC Volker and Hospital Hill campus buildings have additional wireless access coverage areas for your convenience. For more information on wireless locations and details, please visit: www.umkc.edu/medicine/wireless

Student Services

The School of Medicine's Office of Student Affairs coordinates a variety of support services that are available to all medical students and are in line with the competencies expected of a UMKC School of Medicine graduate. These services include but are not limited to academic and career counseling, financial planning, personal support, enrichment activities, students events and student organizations and activities.

The Council on Selection; the Minority Recruitment and Retention Committee; the associate dean for cultural diversity and minority programs; the associate dean of the Office of Medical Education and Research; the assistant dean for admission and recruitment; and the manager for student affairs work together in recruitment and retention of students, including minority students.

The School of Medicine has at least 25 student organizations and a number of traditions and activities. Students may also participate fully in the services and activities provided to all UMKC students through the Office of the Vice Chancellor for Student Affairs. The Office of Student Involvement, Life, located in the University Center, located at the Student Union coordinates the cultural, social and recreational programs of the campus. Also located on the Volker campus are the Center for Academic Development; the Women's Center; the Counseling, Health and Testing Center; and Career Services.

School of Medicine staff regularly meet with students individually, in class meetings and in multiple orientation settings to discuss relevant and timely policies, processes and resources.

Academic Advising

The School of Medicine has a number of personal and academic support systems in place to assist students at all levels of the program. There are two education team coordinators with offices on the Volker campus who help the first- and second-year students in curriculum planning and who are available to counsel them on problems.

Each group of 10-13 students has a physician-scholar (or docent) who instructs the students in medical coursework during the first two years and who also serves as a role model and personal counselor. Additionally 10-12 Year 2 students are selected as peer mentors to the Year 1 class. These students are selected because of their past academic performance and their success in integrating themselves into life at UMKC and the School of Medicine.

From year 3 through year 6, each student is a member of a 12-student team assigned to a docent who teaches and counsels throughout these years of the curriculum. Teams are assigned an education team coordinator to advise about course selection and personal problems in consultation with the docent. In their third and fourth years, students are partnered with older

students who serve as senior partners. Additional campus resources are available to students in the areas of counseling and support including the UMKC Counseling and Testing Center.

Career Advising

The School of Medicine's career advising staff provide medicine specific guidance to students by meeting with students individually as they develop Curricula Vitae and Personal Statements; advise on career choice, residency selection and interviewing process and maintaining a database of physician specialists in the Kansas City area and elsewhere who are willing to mentor students in their specialty exploration and choice. They provide presentations on how to assess compatibility and 'fit' with different career paths; explore specialty options and make an informed choice; construct curricula vitae and personal statements; research residency programs and prepare to be a competitive applicants; as well as interview skillfully and follow up properly.

Academic Support Services

The School of Medicine provides academic support to all its students. The curriculum provides challenging coursework, and students should explore all opportunities for alternative study methods. Students have the responsibility to become life-long learners and to meet their own and the school's learning goals. The following services are offered:

Support for Basic Science Courses

During the first years the students take several basic science courses and are given as much support as possible. A course called, Learning Basic Medical Sciences is designed to give all students in their first year at the Medical School a core of learning strategies to prevent academic difficulty and to improve higher-order cognitive skills. Course topics surround discussions of learning styles, efficient study techniques and current basic science coursework. Study groups are available in the core basic science courses of the school curriculum. The groups consist of three to five students and a group facilitator/tutor, meeting once or twice a week. Test performance has consistently been enhanced for students actively participating in these groups. Therefore, all medical students are encouraged to participate fully. Study-group leaders are selected on the basis of their own performance in the course, their abilities to communicate course content and the recommendations of course professors.

Lecturers in the School of Medicine provide several support sessions and open office-hours during the week as well as individual appointments for students to attain their learning goals. For many classes the school provides successful senior medical students as tutors. Tutors set meeting times and agenda according to students' needs. Students are also encouraged to take advantage of Supplemental Instruction for courses in which it is offered.

Additional Assistance

Individual assistance is available to medical students through a variety of means. Students may receive individual analysis of their study techniques, including reading comprehension; time management; short- and long-term retention techniques; and test-taking abilities. Analysis of a student's basic science knowledge is available through several computer-assisted programs. If required, individual tutoring may be available to supplement the assistance offered through study-group programs. Counseling support also is available to students with personal issues that may hinder their academic performance.

United States Medical Licensing Exam Step 1 Preparation

Students preparing for Step 1 of the USMLE are offered a variety of programs to supplement their individual review of the basic sciences. These programs consist of discussion groups, interactive video review sessions, individual test-taking analysis and a Step 1 mock exam. Some of the programs are free to all students and other involve enrollment in fee-based programming. In addition to academic preparation support, resources are available to help students manage the stress related to their preparation for the exam.

Financial Support

The School of Medicine has a full-time Counselor of Student Finances to assist students and parents in understanding the financing of medical school. This individual provides ongoing financial literacy programming to the student body and can assist students one-on-one with the budget planning process.

Students at the UMKC School of Medicine have access to the resources of the UMKC Financial Aid and Scholarship Office. Additionally, that office has a designated health science specialist with an office on Hospital Hill. A variety of need-based and merit-based scholarships are offered to School of Medicine students in conjunction with scholarships and aid available through institutional and external sources.

For the latest information on financial aid programs at UMKC see <http://www.sfa.umkc.edu> .

Wellness Program

The School of Medicine has a full-time Wellness Program Coordinator who coaches students and serves as a point of referral. In addition to Wellness Planning and Coaching, the UMKC School of Medicine Wellness Program offers a variety of workshops throughout the year.

The School of Medicine provides academic support to all its students. The curriculum provides challenging coursework, and students should explore all opportunities for alternative study methods. Students have the responsibility to become life-long learners and to meet their own and the school's learning goals. The following services are offered:

Support for Basic Science Courses

During the first years the students take several basic science courses and are given as much support as possible. A course called, Learning Basic Medical Sciences is designed to give all students in their first year at the Medical School a core of learning strategies to prevent academic difficulty and to improve higher-order cognitive skills. Medical Student Organizations, Publications and Awards

Alpha Omega Alpha

The Delta Chapter of the Alpha Omega Alpha Honor Society is an organization open to the no more than 1/6th of the graduating class. In accordance with the national constitution, scholastic achievement should be the primary but not sole basis for election of a student. Leadership capabilities, ethical standards, fairness in dealing with colleagues, potential for achievement in medicine, integrity, compassion, professionalism, conscientiousness, and a record of service to the school and community at large should be criteria considered in addition to the academic record. Memberships are also granted each year to a faculty member, an alum of the school, and a member of the housestaff or fellow each year.

American Medical Association - Medical Student Section

Dedicated to representing medical students, improving medical education, developing leadership and promoting activism for the health of America.

American Medical Student Association

The primary goal of AMSA is the initiation of student-organized projects for the benefit of medical students and the community on local, state and national levels. The development of hypertension clinics, presentations about venereal disease to area high schools, AIDS awareness programs and a drug-replacement program represent some of AMSA's projects in past years.

American Medical Women's Association

The AMWA promotes an understanding of the individual in medicine. Its membership is open to all interested men and women. AMWA's programs include speakers on special topics, field trips, social projects and other activities of benefit to all students.

Association of American Medical Colleges - Organization of Student Representatives

The OSR is the student branch of the Association of American Medical Colleges (AAMC). The OSR is charged with the representation of the undergraduate medical student body of the United States to the academic medical community.

Asian Pacific American Medical Students' Association

The goals of APAMSA are to educate all medical students about health-care needs specific to the Asian Pacific community and to address issues important to Asian Pacific American medical students.

Christian Medical/Dental Society

This group is open to students of all faiths. The organization fosters greater understanding of spiritual concerns in relationship to health and well-being.

Global Medicine Relief Program

GMRP's mission is to promote quality health care in under-served communities around the world by working with local doctors and health care professionals and by providing medical supplies and equipment; to provide dental, hygiene and basic health care supplies in areas of natural disaster; to promote human rights in developing regions by improving health infrastructure; to participate in a global community of organizations which are similarly dedicated to providing health care in developing regions; and to organize student groups at all educational levels in these humanitarian efforts. GMRP especially seeks to touch the lives of the most vulnerable people in any population and believes in the importance of assisting both internally and externally displaced refugees.

Gold Humanism Society

The Gold Humanism Society is sponsored by the Arnold P. Gold Foundation and is closely linked to the Sirridge Office of Medical Humanities.

Medical Student Advisory Council

The MSAC serves as the student government body in the School of Medicine and is comprised of student-elected representatives who focus on promoting student interests, keeping the administration informed of student opinion and organizing social activities. MSAC serves as an umbrella organization for student interest groups in the areas of Anesthesiology, Emergency Medicine, Family Medicine, Geriatric Medicine, Internal Medicine, International Medicine, Med/Peds, Obstetrics/Gynecology, Physical Medicine and Rehabilitation, Psychiatry, Spanish in Medicine, and Surgery

Sojourner Clinic

The Sojourner Health Clinic is a free clinic developed and managed by UMKC Medical Students to provide outpatient care to the homeless and underprivileged population served by Grand Avenue United Methodist Temple. On Sunday afternoons, the students, with faculty supervision, provide acute and chronic medical care to the Sojourners of downtown Kansas City, many of whom also are served a free hot lunch at Grand Avenue Temple.

Student National Medical Association

The promotion of the interests of minority students is the foundation of the SNMA. Leadership development, social awareness, service to humanity and excellence as physicians are the major objectives of this group

Student Wellness Council

The Student Wellness Council promotes healthy habits and wellness amongst UMKC School of Medicine students

Publications

A monthly publication of the school, P.R.N., provides information on school programs, policies and student activities and is distributed online to School of Medicine students, their families and faculty. A quarterly magazine, Panorama, is primarily distributed to alumni, affiliated hospitals and friends of the school and is available throughout the school.

Six Year Program Description

The fundamental objective of the School of Medicine is to graduate physicians able to meet the health care needs of Missouri and the nation.

Classes begin in the fall of year 1. By using 35 weeks of study the first year and 48 weeks every year after that, each student will have the opportunity to earn the credits necessary for both a baccalaureate and a medical degree. This six-year continuum does not make an arbitrary separation between liberal arts and professional education.

The first two years of the six-year curriculum are arranged for the student to blend three-fourths of the time in liberal arts coursework and one-fourth of the time in introduction to medicine coursework. This initial two-year period allows students adequate time to determine whether they are motivated enough to continue in medicine. At the same time, the faculty will have adequate opportunity to judge whether each student has the characteristics and capabilities necessary for a career in medicine.

The introduction to medicine courses during the first two years are designed to provide just that - an introduction to medicine. Special attention is given to the effect of illness on the patient, the family and the community. There is emphasis on the coordination of effort, the team approach, to the solution of medical and health care problems. The year 1 and 2 curriculum has been further enhanced with the addition of a geriatrics program which pairs students with aging mentors. The courses will integrate patient interviews and examinations with branches of science fundamental to clinical medicine, including anatomy, physiology, biochemistry, psychology and sociology.

These courses have certain coordinated objectives, each of which represents an important component in the general concept of medicine as applied to human biology. The objectives are to help students understand and learn about the following:

- The language and vocabulary of medicine.
- The effects of illness on individuals, families and communities.
- The background setting of illness and health care, including the importance of social, psychological and economic factors.
- The history of medicine and its present state.
- The roles and responsibilities of physicians and other personnel involved in health care.
- Selected content information from anatomy, physiology, chemistry, psychology, sociology and other sciences fundamental to medicine, together with the continuing importance of such information in the reasoning of the physician.
- The logic, rationale and process of clinical reasoning.

An important feature of the School of Medicine program is the early and continuing contact of the student with a team of scholars called docents. Each docent is a full-time physician responsible for the education of a small group of students. The docent serves as a role model for students as well as a guide and mentor. At year 3, students are assigned to a docent team, a group composed of students from each of year 3 through year 6 classes. Beginning in year 4, students spend two months each year on docent rotation, an internal medicine clerkship. During this time in particular, and throughout the rest of the academic year, the docents guide their students through the experiences necessary to acquire a strong foundation of clinical competence.

Students in their third and fourth years are partnered with their fifth- and sixth-year peers on the docent unit.

The School of Medicine program in years 3 to 6 of the combined degree program has several features:

- The core educational program is designed and directed by physicians who are primarily concerned with medical student education and who have patient care responsibilities;
- Since the curriculum core content is based on clinical experiences, the medical student's education will be problem-centered. Faculty from many University disciplines participate in teaching medical students, and education in the clinical sciences takes place in affiliated hospitals. These hospitals provide a communitywide model for patient care;
- The curriculum integrates liberal arts, basic sciences and clinical medicine. It uses planned repetition, reinforcement and relevancy to enable students to acquire the requisite attitudes, knowledge and skills expected of a Medical School graduate;
- Students may have an extended program by taking extra time;
- During the third through sixth years, students are required to return to the Volker campus at least two times, usually in years 3 and 4, to take liberal arts coursework. Students are also required to enroll in a medical humanities course in year 5 or year 6.

Typical Six-Year Program of Study

Year 1

Medicine

Fall Medical Terminology
Learning Basic Medical Sciences
Fundamentals of Medical Practice I
Spring Fundamentals of Medical Practice II

Arts & Sciences

Fall Human Biology I (Anatomy) w/Lab
General Chemistry I w/Lab
Psychology
Courses for B.A. Degree*
Spring Human Biology III (Microbiology) w/Lab
General Chemistry II w/Lab
Sociology

Year 2

Medicine

Summer Hospital Team Experience
Fall Fundamentals of Medical Practice III
Spring Fundamentals of Medical Practice IV

Arts & Sciences

Summer Organic Chemistry w/Lab
Cell Biology
Fall Human Biochemistry
Sociology - Life Cycles
Genetics
Courses for B.A. Degree*
Spring Structure/Function I, II, III
Courses for B.A. Degree*

Year 3

Medicine

History of Medicine
Clinical Correlations
Clinical Skills
Introduction to Pharmacology (Independent Study)
CUES (Communication, Understanding, Education and Self-Awareness)
Pathology I & II
Medical Microbiology
Medical Neurosciences
Continuing Ambulatory Care Clinic

Arts & Sciences

Structure/Function IV

Year 4

Medicine

Pharmacology
Behavioral Sciences in Medicine
Docent Rotation
Family Medicine
Ambulatory Care Pharmacology (Indep Study)
Continuing Ambulatory Care Clinic
Patients, Physicians, and Society I and II

Arts & Sciences

Courses for B.A. Degree*

Year 5

Medicine

Psychiatry
Prescribing for Special Populations (Indep Study)
Obstetrics/Gynecology
Pediatrics
Family Medicine Preceptorship
Surgery
Elective
Docent Rotation
Emergency Medicine(may be taken in Year 6)

Arts and Sciences

Medical Humanities (may be taken in Year 6)

Year 6

Medicine

Docent Rotation
Emergency Medicine(may be taken in Year 5)
Rational & Safe Drug Prescribing (Indep Study)
Electives
Continuing Ambulatory Care Clinic

Arts & Sciences

Medical Humanities (may be taken in Year 5)

All students are required to take three clinical electives as graduation requirement. Three individual clinical electives must be selected from designated nine required general categories. One of the three electives must be a Critical Care elective.

Admission Requirements

Current High School Students

The School of Medicine offers a six-year B.A./M.D. program that requires students to complete both a baccalaureate degree and doctor of medicine degree. Admission to the B.A./M.D. program is highly competitive, and admitted students are challenged by a demanding curriculum scheduled for 35 weeks in the first year and 48 weeks in each of the remaining five years. Applicants for admission to Year 1 of the six-year medical program must first be accepted by the University of Missouri – Kansas City. Admission to the university is determined by a combination of ACT score and class rank, as well as graduation from an accredited U.S. high school with completion of the following high school curriculum.

- Four units of English
- Four units of Mathematics (Algebra 1 or higher)
- Three units of science (including one unit of Biology and one unit of Chemistry)
- Three units of social studies
- Two units of a single foreign language
- One unit of fine arts (visual arts, music, dance, or theater).

For more information about UMKC admission requirements and/or the application procedures, please contact the UMKC Office of Admissions at:

Office of Admissions
University of Missouri – Kansas City
120 Administrative Center
5100 Rockhill Road
Kansas City, MO 64110-2499

In addition, School of Medicine applicants are also required to submit a supplemental application and additional supporting documents, consisting of the following:

- Personal statement (500 words or less)
- Short answer responses
- Listing of all health-related and co-curricular activities (high school only)
- References (minimum 3, must be provided on official School of Medicine Reference Forms)

The School of Medicine strongly encourages prospective students to earn credit through Advanced Placement (AP) courses, if available, in math, English, European history, or American history.

Students whose high school does not offer biology, chemistry, and/or foreign language are encouraged to contact the Council on Selection at the School of Medicine.

Students are selected to interview based on the information provided in a complete application. Once interviews are complete, the Council on Selection will convene to determine which

students will be offered admission to the program. Most applicants to the combined degree program display outstanding academic credentials and backgrounds and strong leadership and involvement. The applicant pool is extremely competitive, and no one component of the application guarantees an offer of admission.

Current College Students

Students with 24 college credit hours or less:

Students with 24 hours or less of post high school graduation college credit at the time of application are eligible to apply for admission to the 6-year B.A./M.D. program. These applicants will be reviewed with the same criteria as freshman applicants.

If the applicant is currently enrolled in college in the semester in which they apply to the six-year program, the number of hours accumulated at the end of that semester must not exceed the 24-hour credit limit. While the application is being processed, applicants may continue taking college courses during the next semester.

Applicants must have earned a 3.0 GPA or higher at the end of the fall semester in order to be considered for admission. Official college transcripts must be submitted along with other application materials. Grades for courses completed in the fall semester in which the applicant applied must also be submitted upon completion of the semester. A current ACT test within the last three years is also required.

Students with more than 24 college credit hours

Students who have completed more than 24 post high school college credit hours and have not yet received a Bachelor's degree are not eligible to apply to the School of Medicine.

Students who have earned, or will be earning in the year of application, a Bachelor's degree

Students who have completed more than 24 post high school college credit hours and have earned, or will soon earn, a Bachelor's degree are eligible to apply to the M.D. Program.

A limited number of positions are available for students who have completed their baccalaureate degree. For admission requirements for entrance as an M.D. Program student, please contact the Council on Selection in the School of Medicine.

For more information about the combined B.A./M.D. program, please contact the Council on Selection at:

UMKC School of Medicine
Council on Selection
2411 Holmes
Kansas City, MO 64108

Application Deadlines

Completed application materials will be accepted during the following period:

- Earliest date - Aug. 1 of the year preceding the fall semester for which applying.
- Latest date - Nov. 1 of the year preceding the fall semester for which applying.

All applications must be complete with supporting documents by November 1. Late applications will be considered on a space available basis. Incomplete applications will not be considered. (Applicants are urged to apply as soon after Aug. 1 as possible.)

High school students wishing to enter this program should recognize that many other well-qualified high school students with strong science backgrounds also will be applying. Because this is a state-assisted university, primary consideration is given to Missouri residents with over fifty percent of the incoming class from the state of Missouri.

Criminal background checks will be performed on combined-degree students and M.D. Program students before matriculation into the program.

Application Fee

Applicants are strongly advised to apply online. A \$35 non-refundable application fee is required.

These fees are for students applying with the online application only. Paper applications may be assessed a higher fee.

Student Learning Outcomes for Six Year B.A.-M.D. Program

Years 1-2

Effective Communication

- The student demonstrates competence in written communications such as laboratory reports, term papers and other classroom writing assignments.
- The student demonstrates competence in oral communications in a one-on-one setting, such as introducing and beginning a history with an individual patient. History-taking skills at this level will be very basic and straightforward.
- The student demonstrates effective listening skills with faculty members, other students and patients.

Clinical Skills

- The student is able to perform the basic elements of a history. The student will have observed a physical examination and observed some of the routine clinical procedures.

Using Basic Science in the Practice of Medicine

- The student has an introductory and very general understanding of anatomy and microbiology.
- The student has a more advanced understanding and an ability to apply some information to a few clinical situations in biochemistry and physiology.

Diagnosis, Management and Prevention

- The student has an introductory understanding of principles of diagnosis, management and prevention.
- The student is able to identify general, rather than specific approaches to management, but is usually not expected to carry them out in real settings.

Lifelong Learning in Medicine, Basic Sciences, the Social Sciences and the Humanities

- The student is proficient in framing a question, utilizing modern information searching modalities, organizing data, compiling and using information to answer the question in the context of a structured setting, such as an undergraduate course.
- The student has an introductory knowledge of the humanities and social science. Enough information is learned at this level to stimulate the student to desire further learning in medicine, humanities and social sciences.

Self-awareness, Self-care, Personal Growth and Professional Behavior

- The student exhibits behaviors indicative of personal self-awareness through a process of self reflection. Students are able to identify potential areas of weakness and are able to conceive of potential options for addressing these areas.
- The student is able to identify areas of strength and is able to build on these strengths.
- The student is able to set goals for a self-study plan.
- The student is aware of his/her personal growth in regards to age specific developmental tasks.
- The student knows the elements of professional behavior and can explain the meaning of each element.
- The student can cite an example of how each of the elements applies in Year 1 and Year 2 coursework for the baccalaureate and M.D. degree.
- The student shows courteous regard for other students and faculty and acknowledges the views of others. The student shows courteous regard for his/her mentor on aging and for the patients they meet in their docent group experiences. The student interacts with patients they meet in their docent group experiences in an appropriately compassionate fashion. The student expresses empathy for his/her mentor on aging as appropriate.
- The student puts the legitimate needs of his/her mentor on aging, patients, docent group members and study group members first before his/her own needs.
- The student demonstrates academic honesty in all aspects of his/her coursework for the baccalaureate-M.D. degree.
- The student carries through on assignments and other responsibilities; arrives promptly for meetings or classes; accepts personal responsibility for group projects; and completes course evaluations in a timely and thoughtful fashion.
- The student searches out opportunities to learn and tries to excel in their coursework.

Diversity and the Social and Community Contexts of Health Care

- The student appreciates some of the non-biological factors that influence health, disease, disability and access to care.
- The student attributes proper importance to identifying non-biological factors.
- The student is aware of different value systems and life styles.

Moral Reasoning and Ethical Judgment

- The student can identify and apply ethical considerations relating to professional behavior and student conduct as a forerunner to professional behavior.
- The student develops an introductory understanding of ethical choices related to a few controversial medical issues.

Problem-Solving Skills

- The student displays competence in basic problem-solving skills as applied to basic science courses or simple, straightforward medical problems.

Years 3-4

Effective Communication

- The student develops and demonstrates competency in using the written language effectively by:
 - Medical record documentation in the continuing care clinic and on docent rotation.
 - Writing papers for courses and rotations.
 - Essay examinations in medical ethics.
- The student develops and demonstrates competency in using oral language and listening effectively by:
 - Communicating with patients and families in the continuing care clinic and on docent rotation.
 - Communicating with senior partners, peers and faculty.
 - Functioning as an effective junior partner.

Clinical Skills

- The student is able to perform a comprehensive history and physical examination of patients in the outpatient setting and the general medical wards, excluding critical care settings.
- The student is competent in performing venipuncture and basic CPR.
- The student is able to perform a gram-stain, vaginal smear wet prep, stool occult blood, urinalysis, urine pregnancy test, finger stick glucose determination and peak expiratory flow rate.
- The student has observed and is familiar with some of the more complex or specialized lab and diagnostic tests.
- The student knows the basics in the interpretation of plain x-ray studies; chest x-ray, abdominal x-ray.

Using Basic Science in the Practice of Medicine

- The student applies knowledge in the areas of behavioral science, anatomy, pathology, biochemistry, physiology, microbiology and immunology, and pharmacology to the overall care of patients.

Diagnosis, Management, Continuing Care and Prevention

- The student is able to interpret standard diagnostic studies and history and physical examination data. From these data, the student is able to state the most likely diagnosis when presented with straightforward presentations of common problems in general internal medicine. The student is expected to carry out management plans in those situations that are relatively straightforward and uncomplicated.

Lifelong Learning in Medicine, Basic Sciences, the Social Sciences and the Humanities

- The student is able to do a computerized literature search as it applies to patient problems.
- The student is able to comprehend the medical literature and understand basic statistics and the scientific method.
- The student is continually motivated by an awareness of the limits of his/her personal knowledge and experience.

Self-awareness, Self-care, Personal Growth and Professional Behavior

- The student is reflective about him or herself in a group context.
- He or she is able to confront his/her own values as they relate to the practice of medicine.

- The student is able to identify real situations of stress and his/her response to these situations.
- The student is able to practice personal techniques for relaxation and time management and can modify behavior and respond to constructive criticism.
- The student is able to identify learning needs, plan a program to meet those needs and determine how well they have met them and what further learning issues they need to address.
- The student identifies the elements of professional behavior and can explain the meaning of each element: respect, compassion and empathy, altruism, honesty, responsibility, and excellence. The student can give an example of how each of the elements of professionalism applies to Year 3 and Year 4 coursework for the baccalaureate and MD degrees and actively demonstrates them by behavior.
- The student shows courteous regard for patients, students, faculty, and members of the health care team and acknowledges their views.
- The student interacts with patients, patients' families, and members of the health care team in an appropriately empathic and compassionate fashion.
- The student contributes to the docent team and other small groups by sharing knowledge and skills, expressing positive attitudes and accepting help from others to address his/her deficiencies.
- The student recognizes how potential conflicts between his/her own needs and the legitimate needs of patients, docent group members, and study group members might be resolved and can discuss a rationale for alternative resolutions.
- The student is honest in all aspects of coursework for the baccalaureate-MD degree and takes responsibility for his/her errors in the patient care setting after discussion with supervisors.
- The student carries through on assignments and other responsibilities; arrives promptly for meetings, classes, rounds and clinics; accepts personal responsibility for group projects and for assigned patients; and completes course evaluations in a timely and thoughtful fashion.
- The student searches out opportunities to learn, demonstrates lifelong learning skills, and tries to excel in coursework and scholarship.

Diversity and the Social and Community Contexts of Health Care

- The student elicits and identifies non-biological factors as part of the routine history taking and includes those issues, as appropriate, in the problem list formulations and management plans.
- The student takes personal responsibility for discussing these issues with patients, assessing their needs and matching them to appropriate community resources.
- The student works with his/her individual patients and families to enhance their total well-being.

Moral Reasoning and Ethical Judgment

- The student is able to employ ethical concepts and reasoning when presented with typical ethical cases in medicine, and is able to recognize ethical issues in medical practice.

Problem-Solving Skills

- The student displays competence in problem-solving skills with common clinical problems utilizing a limited knowledge base.

Years 5-6

Effective Communication

- The student develops and demonstrates competency in using the written language effectively by:
 - medical record documentation on clinical rotations.
 - preparing written patient education material.
 - writing clinical papers.
 - journals, short stories, papers or poetry during medical humanities and social science courses.
- The student develops and demonstrates competency in using oral language and listening effectively by:
 - communicating with patients and families in the continuing care clinic and clinical rotations.
 - presenting new patients to faculty in continuing care clinic and clinical rotations.
 - delivering lectures on clinical rotations utilizing slides and handouts.
 - communicating with student partners, peers, faculty and the health care providers.
 - oral examinations.
- The student develops and demonstrates competency in respecting patients and sharing information effectively with patients, families and health care team members by:
 - interacting with the individuals on clinical rotations and the continuing care clinic.
 - working as an integral part of the docent team and teams on other clinical rotations.
 - functioning as an effective senior student partner.

Clinical Skills

- The student is able to perform the basic and emergency elements of a history and physical examination smoothly and efficiently in the outpatient setting, inpatient setting, critical care setting and emergency department settings.
- The student is able to perform and interpret basic clinical procedures, laboratory and diagnostic tests smoothly and efficiently as listed.
- The student is able to describe the procedural steps necessary to carry out advanced clinical procedures as listed.
- The student observes and is able to state the indications, complications, and limitations of advanced clinical procedures as listed.
- The student is aware of the indications, complications and limitations of and interpret from the written reports complex and specialized laboratory and diagnostic tests as listed.

Using Basic Science in the Practice of Medicine

- The student is able to explain a multi-system health problem in terms of pathogenesis, mechanisms of system-to-system interactions and potential complications. The student is able to present therapeutic goals and interventions aimed at the multiple pathophysiological forces in motion.
- The student is able to exhibit clinical decision analysis that weighs the pros and cons of proposed interventions, taking into consideration such factors as drug-drug interactions and the trade-off of proposed drug interventions in the context of multi-system problems.

Diagnosis, Management, and Prevention

- The student is able to state the most likely diagnosis and management plan when presented with presentations of common problems in any of the major disciplines.

- The student is able to integrate the approach of care to individuals, families and communities, taking advantage of opportunities for prevention and education in addition to the immediate physical care.
- The student through his/her experiences in the continuing care clinic is able to provide continuing care and management for both chronic and acute medical problems and provide appropriate plans for prevention.

Lifelong Learning in Medicine, Basic Sciences, the Social Sciences and the Humanities

- The student begins to explore new opportunities for intellectual growth and professional enlightenment in medicine, the social sciences and humanities.
- The student attends a continuing medical education course.
- The student continues to recognize his/her limits of knowledge and experience.
- The student is able to recognize the significance of valid scientific discoveries reported in medical journals and recognize unsubstantiated, inaccurate or poorly performed studies and conclusions.

Self-awareness, Self-care, Personal Growth and Professional Behavior

- The student utilizes skill in coping with stress during clinical rotations.
- The student develops and demonstrates appropriate personal values and beliefs relevant to his/her practice of medicine.
- The student identifies the elements of professional behavior and can explain the meaning each element: respect, compassion and empathy, altruism, honesty, responsibility, and excellence.
- The student gives examples of how each of the elements of professionalism applies to Year 5 and Year 6 coursework for the baccalaureate and MD degrees and actively demonstrates them by behavior. He/she teaches these elements of professional behavior to junior students by explicit role modeling.
- The student shows courteous regard for patients, student, faculty and health care team members, and acknowledges their views. He/she teaches respect for other people to junior students by explicit role modeling.
- The student interacts with patients, patient families and members of the health care team in an appropriately empathic and compassionate fashion. He/she teaches compassion and empathy to junior students by explicit role modeling.
- The student contributes to the docent team and other small groups by exercising effective leadership and active teaching of teamwork.
- The student resolves potential conflicts between his/her own needs and the legitimate needs of his/her patients or health care team members appropriately and can discuss a credible rationale for the resolution.
- The student is honest in all aspects of coursework for the baccalaureate-MD degree and takes responsibility for his/her errors in the patient care setting after discussion with little or no supervision.
- The student carries through on assignments and other responsibilities; arrives promptly for meetings, classes, rounds and clinics; accepts personal responsibility for group projects and for assigned patients; and completes course evaluations in a timely and thoughtful fashion. He/she teaches junior students about responsibility through explicit role modeling.

- The student searches out opportunities to learn, demonstrates lifelong learning skills, and endeavors to excel in coursework and scholarship. He/she teaches junior students about life learning.

Diversity and the Social and Community Contexts of Health Care

- The student is able to identify and propose solutions for non-biological factors that influence health, disease, disability and access to care.
- The student is able to utilize resources in the community that may provide assistance to his or her patients.
- The student is an advocate for better health for the patients and the community.
- The student demonstrates knowledge of practice management, utilization review, quality improvement and economic and cultural issues in health care.

Moral Reasoning and Ethical Judgment

- The student is able to identify patient care and health policy ethical issues and choices in his or her own clinical experience; to evaluate critically alternative ethical courses of action by analyzing and articulating reasons for the relative importance of the different ethical considerations bearing on each choice; to select and ethically defend a course of action.
- The student recognizes the importance of the ethical treatment of research subjects and the functions of an Institutional Review Board.

Problem Solving

- The student displays competence in more advanced clinical problem solving using a comprehensive knowledge base.
- The student can effectively utilize a team approach in solving clinical problems.

Requirements for Graduation in the B.A. - M.D. Combined Program

Graduation Requirements for students in the Combined Baccalaureate/MD Program:

1. Minimum of 90 credit hours from the College of Arts and Sciences acceptable to the School of Medicine.
2. Three returns back to the College of Arts and Sciences.
3. Satisfactory completion, certified by the UMKC registrar, of requirements for the baccalaureate degree.
4. Satisfactory completion of all required medical curriculum.
5. Cumulative GPA of 2.7 to 4.0.
6. 38 months medical curriculum credit.
7. Passing scores on USMLE Steps 1 and 2 (Clinical Knowledge and Clinical Skills).
8. 3 clinical electives which must be selected from 9 separate categories.
9. Docent certification of clinical competence.
10. 48 months of enrollment in the School of Medicine, years 3 to 6.
11. Current certification in Advanced Cardiac Life Support.
12. Evidence of adherence to the Fee Policies.
13. Evidence of Financial Aid Exit Interview.
14. Year 6 Year-End Docent Interview.

Graduation Requirements for students in the MD Program:

1. Satisfactory completion of all required medical curriculum.
2. Cumulative GPA of 2.7 to 4.0.
3. 34 months medical curriculum credit.
4. Passing scores on USMLE Steps 1 and 2 (Clinical Knowledge and Clinical Skills).
5. 3 clinical electives which must be selected from 9 separate categories.
6. Docent certification of clinical competence.
7. 48 months of enrollment in the School of Medicine.
8. Current certification in Advanced Cardiac Life Support.
9. Evidence of adherence to the Fee Policies.
10. Evidence of Financial Aid Exit Interview.
11. Year 6 Year-End Docent Interview.

Graduation Requirements for students in the Advanced Standing/Transfer Program:

1. Satisfactory completion of all required medical curriculum.
2. 23 months of enrollment in the School of Medicine, years 5 and 6.
3. Passing scores on USMLE Step 2 (Clinical Knowledge and Clinical Skills).
4. 4 clinical electives, 3 of which must be selected from 9 separate categories.
5. Docent certification of clinical competence.
6. 22 months earned UMKC medical school credit plus at least 12 months earned medical school credit from another US-accredited osteopathic or allopathic school of medicine.
7. Current certification in Advanced Cardiac Life Support.
8. Evidence of adherence to the Fee Policies.
9. Evidence of Financial Aid Exit Interview.
10. Year 6 Year-End Docent Interview.

Master of Science in Anesthesia Program

The Master of Science in Anesthesia Program will graduate highly skilled and competent Anesthesiologist Assistants (AAs). AA's are physician extenders licensed to work as anesthesiologists under the supervision of anesthesiologists. AA's provide various services in hospitals, surgery centers, and other health care environments

For application deadline and other information regarding the 27 month program and the AA profession please go to the UMKC MSA program website: www.med.umkc.edu/msa

Requirements for Graduation in the Master of Science in Anesthesia Program

Student Learning Outcomes

Graduates of the M.S.A. Program will be able to:

1. Communicate Effectively
 - Demonstrate good listening, writing and verbal communication skills
 - Professionally interact with patients, families and health care team members
 - Use health information technology

2. Demonstrate competency in clinical anesthesia skills under the direction of an anesthesiologist
 - Obtain a comprehensive patient history, perform relevant elements of a physical exam
 - Pre test and calibrate anesthesia delivery systems and obtain and interpret information from the systems and monitors
 - Apply and interpret routine and advanced monitoring modalities
 - Establish basic and advanced airway interventions, including intubation of the trachea and performing ventilatory support
 - Administer induction agents, maintain and alter anesthesia levels, administer adjunctive treatments and provide continuity of anesthetic care in the post-operative period
 - perform epidural anesthetic procedures, spinal anesthetic procedures, and other regional anesthetic techniques
 - Administer blood, blood products, and supportive fluids
 - Provide assistance to cardiopulmonary resuscitation team in response to a life-threatening situation
3. Use basic science in the practice of anesthetic care
 - Explain a multi-system anesthesia related problem in terms of pathogenesis, mechanisms of system-to-system interactions and potential complications
 - Exhibit clinical decision analysis that weighs the pros and cons of proposed interventions, taking into consideration such factors as drug-drug interactions and the trade-off of proposed drug interventions in the context of multi-system problems
4. Demonstrate competency in lifelong learning
 - Explore new opportunities for intellectual growth and professional enlightenment
 - Attend continuing education courses
 - Recognize his/her limits of knowledge and experience
 - Able to draw valid conclusions after weight evidence, facts, and ideas
5. Posses self-awareness, self-care, personal growth and professional behavior
 - Cope with stress during clinical situations
 - Posses appropriate personal values and beliefs relevant to his/her practice of anesthesia care
 - Display professional behavior in all functions: respect, compassion and empathy, altruism, honesty, responsibility, and excellence
 - Display effective leadership and teamwork
 - Resolve potential conflicts between his/her own needs and the legitimate needs of his/her patients or health care team members
 - Seek opportunities to learn, demonstrate lifelong learning skills, and endeavors to excel in scholarship
6. Incorporate diversity and the social and community contexts of health care
 - Identify and propose solutions for non-biological factors that influence health, disease, disability and access to care
 - Advocate for better health for the patients and the community
 - Demonstrate knowledge of practice management, utilization review, quality improvement and economic and cultural issues in health care

7. Demonstrate moral reasoning and ethical judgment
 - Identify patient care and health policy ethical issues and choices in his or her own clinical experience
 - Select and ethically defend a course of action
8. Problem Solving
 - Display competence in advanced clinical problem solving using a comprehensive knowledge base
 - Effectively utilize a team approach in solving clinical problems

Program Requirements

The MSA Program is a nationally accredited 27-month (7 semester) program. Students enrolled in the program must complete the required courses and 2000 clinical hours (obtained during Anesthesia Clinical Experience courses).

Required Courses: Credit Hours

Semester 1(January to May) (18.5 credit hours)

ANESTH 5575 – Pharmacology for Anesthesiologist Assistants I 3

ANESTH 5505 - Anatomy for Anesthesiologist Assistants 3

ANESTH 5540 – Patient Monitoring and Instrumentation 2

ANESTH 5556 – Physiology for Anesthesiologist Assistants I 3

ANESTH 5560 – Introduction to Anesthesia 2

ANESTH 5561 – Orientation to Clinical Experience and Model-based Simulation 4

ANESTH 5580 – Fundamentals of Anesthetic Sciences I 1

ANESTH 5518 – Professionalism for Anesthesiologist Assistants I 0.5

Semester 2 (May to August) (14.5 credit hours)

ANESTH 5558 – Anesthesia and Coexisting Disease I 2

ANESTH 5576 – Pharmacology for Anesthesiologist Assistants II 2

ANESTH 5563 – Anesthesia Clinical Experience I 4

ANESTH 5585 – Physiological Model-based Simulation I	2
ANESTH 5541 – Methods of Anesthesia I	2
ANESTH 5503 – Physics for Anesthesiologist Assistants	1
ANESTH 5581 – Fundamentals of Anesthetic Sciences II	1
ANESTH 5528 – Professionalism for Anesthesiologist Assistants I	0.5
Semester 3 (August to December)	(19.5 credit hours)
ANESTH 5557 - Physiology for Anesthesiologist Assistants II	3
ANESTH 5559 - Anesthesia and Coexisting Disease II	2
ANESTH 5565 – Anesthesia Clinical Experience II	8
ANESTH 5577 – Methods of Anesthesia II	2
ANESTH 5562 – Anesthesia Clinical Correlation I	1
ANESTH 5582 – Fundamentals of Anesthetic Sciences III	1
ANESTH 5586 – Physiological Model-based Simulation II	2
ANESTH 5538 – Professionalism for Anesthesiologist Assistants I	0.5
Semester 4(January to May)	(17 credit hours)
ANESTH 5564 – Anesthesia Clinical Correlation II	1
ANESTH 5567 – Anesthesia Clinical Experience III	16
Semester 5 (May to August)	(12 credit hours)
ANESTH 5569 – Anesthesia Clinical Experience IV	12

Semester 6 (August to December)	(17 credit hours)
ANESTH 5568 – Anesthesia Clinical Correlation III	1
ANESTH 5571 – Anesthesia Clinical Experience V	16
Semester 7 (January to May)	(17 credit hours)
ANESTH 5570 – Anesthesia Clinical Correlation IV	1
ANESTH 5573 – Anesthesia Clinical Experience VI	16
Total program credit hours	115.5

Graduation Requirements:

- A 3.0 grade point average
- Successful completion of 115.5 credit hours of required coursework
- Successful completion of a minimum of 2000 clinical hours experiential education

The Master of Science in Anesthesia Program will graduate highly skilled and competent Anesthesiologist Assistants (AAs). AA's are physician extenders licensed to work as anesthesiologists under the supervision of anesthesiologists. AA's provide various services in hospitals, surgery centers, and other health care environments

For application deadline and other information regarding the 27 month program and the AA profession please go to the UMKC MSA program website: www.med.umkc.edu/msa

Requirements for Graduation in the Master of Science Program in Bioinformatics

Student Learning Outcomes

Graduates of the M.S. in Bioinformatics Program will be able to:

1. Demonstrate lifelong learning skills by continually setting learning goals, pursuing them, and applying the knowledge to their profession
2. Recognize and use bioinformatic factors/data to influence health, disease, disability, and access to care
3. Establish productive collaborations with academia, industry, and government agencies
4. Communicate effectively with diverse groups of professionals
5. Demonstrate commitment to the principles of responsible research: honesty, efficiency, accuracy, and objectivity
6. Apply necessary skills to work constructively for the advancement of health sciences, including:
 - Design databases, plan new clinical trials, and conduct decision analyses based on existing clinical data
 - Implement electronic health record systems
 - Research and publish on the role of biomedical informatics in genetic research
 - Work across disciplines such as engineering, computer science, and health care
 - Contribute to advances in biomedical informatics

Program Requirements:

The Master of Science in Bioinformatics program has three areas of emphasis.

1. Computational: Emphasizes the development and use of the next generation of bioinformatics tools and software.
2. Clinical Research: Emphasizes the creation and understanding of data generated by patient care and clinical studies and on the statistical methodology needed for clinical research and improved bedside care.
3. Genomics: Emphasizes the use of existing software for biological analysis and the analysis of a diverse set of biological data.

Required Courses:

All students must take four core courses:

- Biostatistics 1 (MEDB 5101)
- Biostatistics 2 (MEDB 5102)
- Clinical Research Methods (MEDB 5110)
- Responsible Conduct of Research (SGS 5550A/B/C)

Additional required courses:

Computational Emphasis:

- Database Design/Management (COMP-SCI 470 OR COMP-SCI 471)
- Introduction to Bioinformatics (COMP-SCI 5566)
- Medical Informatics (MEDB 5120), and

- Machine Learning in Bioinformatics (COMP-SCI 5567)

Clinical Research Emphasis:

- Clinical Epidemiology (MEDB 5111)
- Clinical Trials (MEDB 5112)
- Overview of Health Services Research (MEDB 5113)
- Medical Informatics (MEDB 5120)

Genomic Emphasis:

- Cell and Molecular Biology I (LS-CBB 5530)
- Biochemistry I (LS-MBB 5561)
- Cell and Molecular Biology II (LS-CBB 5520)
- Biochemistry II (LS-MBB 5562)
- Evolution (BIOLOGY 5519)
- Database Design/Management (COMP-SCI 470 or COMP-SCI 471)
- Bioinformatics and Data Analysis (BIOLOGY 5525)

Other requirements:

6 credit hour thesis plus 2 electives (required for Genomic, option for Computational and Clinical Research)

3 credit hour practicum plus 1 elective (option for Computational and Clinical Research)

Suggested electives:

Computational Emphasis:

- Advanced Software Engineering (COMP-SCI 5551)
- Knowledge Discovery & Management (COMP-SCI 5560)
- Foundations of Computational Intelligence (COMP-SCI 5590CI)
- Neural and Adaptive Systems (E&C-ENGR 5590NN)
- Advanced Biomedical Signal Processing (E&C-ENGR 5590BP)
- Biomedical Image Processing (E&C-ENGR 5590B)
- Pattern Recognition (E&C-ENGR 5590PR)
- Design and Analysis of Algorithms (COMP-SCI 5592)
- Architecture of Database Management Systems (COMP-SCI 5570)
- Large Scale XML Data Management (COMP-SCI 5590LD)
- Clinical Epidemiology (MEDB 5111)
- Evolution (BIOLOGY 5519)
- Bioinformatics and Data Analysis (BIOLOGY 5525)

Clinical Research Emphasis:

- Qualitative Methods in Nursing Research (NURSE 5557)
- Qualitative Research Methods (NURSE 5670)
- Project Management (DSOM 5543)
- Human Genome Epidemiology (MEDB 5114)

Genomic Emphasis:

- Mammalian Physiology (BIOLOGY 5534)
- Neurobiology (BIOLOGY 5542)
- Graduate Biophysical Principles (LS-CBB 5501)
- Graduate Virology (LS-CBB 5504)

Membrane Biochemistry and Biophysics (LS-CBB 5566)
Developmental Biology (LS-MBB 5509)
Structure and Function of Proteins (LS-MBB 5565)

Graduation Requirements:

- A 3.0 grade point average
- Successful completion of 36 credit hours
 - 30 hours with 6 hour thesis (required for Genomic emphasis, option for Computational and Clinical Research emphases).
 - 33 hours with 3 hour practicum (option for Computational and Clinical Research emphases)
- All other requirements for graduation as stated in the General Graduate Academic Regulations and Information section of this catalog

Additional information and admission requirements may be obtained at the bioinformatics web site at <http://www.med.umkc.edu/msb/>

Graduate Certificate in Clinical Research

Student Learning Outcomes

Upon completion of the Graduate Certificate in Clinical Research students will be able to:

- Create and understand data generated by patient care and clinical studies.
- Integrate theory and research into advanced clinical practice.
- Apply scientific findings to clinical settings, evaluate outcomes and develop public health policy.
- Advance research in the biostatistics, public health sciences, health services delivery, preventive medicine and public health practice.
- Pose a researchable question, develop hypotheses, collect evidence, analyze and interpret data.
- Organize quantitative information and utilize it effectively.
- Draw conclusions after weighing evidence, facts and ideas.
- Convey findings through written and oral communication.

Certificate Requirements:

The Graduate Certificate in Clinical Research curriculum includes 15 credit hours of required coursework. Students concurrently completing a clinical training program must provide documentation of approval from their clinical program director each semester.

The courses are:

Biostatistics I (MEDB 5101)
Clinical Research Methods (MEDB 5110)
Clinical Epidemiology (MEDB 5111)
Clinical Trials (MEDB 5112)
Overview of Health Services Research (MEDB 5113)

Completion Requirements:

- Students must maintain a 3.0 GPA while enrolled.
- The minimum acceptable grade for the required courses is B-.

Music and Dance, Conservatory of

Conservatory of Music and Dance

Performing Arts Center

- Graduate Courses

History

The Conservatory is an active participant in mid-America's most important cultural center, Kansas City. This geographical setting provides students with the opportunity to hear and work with the Conservatory's own talented artist-faculty and internationally known artists who perform in the area.

The Conservatory of Music and Dance traces its lineage to a merger of two early Kansas City conservatories, the Kansas City Conservatory of Music and the Horner Institute of Fine Arts. A second merger in 1959 joined the Conservatory with the University of Kansas City. In 1963, the private University of Kansas City became a part of the state university system as UMKC, with the Conservatory as a component college.

Accreditation

The Conservatory's degree programs are accredited by the National Association of Schools of Music (1933), the National Association of Schools of Dance (2008), and the National Council for Accreditation of Teacher Education (1961).

Advising

All undergraduate and graduate students should be advised by the appropriate student services coordinator or associate dean prior to any registration. All music education or therapy students should see a faculty member in music education/therapy for advising.

Barr Institute for American Composition Studies

The UMKC Conservatory's Barr Institute for American Composition Studies was formed through the generosity of Howard and Patricia Barr for the purpose of:

1. Supporting the acquisition, care, preservation, use and promotion of existing materials related to the period of American composition between 1890 and thereafter, excluding the art of jazz and its derivatives.
2. Promoting individual research initiatives related to the historical and theoretical underpinnings of post-1890 American Classical Music.
3. Supporting new composition efforts including commissions, theses and dissertations by composition students.
4. Supporting collaborative and interactive efforts to study new music.

Ensembles

The Conservatory offers students the opportunity to participate in a variety of ensembles that perform throughout the year. More than 20 ensembles are open by audition to all University students who can qualify. The ensembles include:

- Conservatory Orchestra
- Chamber Orchestra
- Percussion Ensemble
- Jazz Orchestra
- Jazz Ensemble
- Wind Symphony
- Wind Ensemble
- Bella Voce
- Conservatory Concert Choir
- Conservatory Singers
- Canticum Novum
- Musica Nova
- Conservatory Opera

Professional Organizations

The Conservatory sustains chapters of national professional and honor fraternities, including Sigma Alpha Iota and Mu Phi Epsilon, and the national honor society, Pi Kappa Lambda.

The Conservatory maintains an affiliation with the National Federation of Music Clubs, Collegiate Music Educators National Conference, and student chapters of the American Choral Directors Association and the International Trumpet Guild.

Community Music and Dance Academy

The Conservatory's Community Music and Dance Academy has the mission of bridging the national reputation and excellence of the UMKC Conservatory of Music and Dance with the local musical needs of the Kansas City community. The Academy currently offers private and group instruction to 600 area musicians and dancers; coordinates camps and festivals for the Kansas City area and provides professional development through workshops and in-service to area educators and therapists.

The instructors in the Community Music and Dance Academy are professional educators, therapists, musicians and dancers. Many have advanced degrees or are current graduate students or professors at the University of Missouri-Kansas City Conservatory of Music and Dance. Academy faculty have trained with professional musicians within and outside the Conservatory and regularly perform as soloists or with ensembles locally, nationally and internationally. Some have even published and recorded their work. Most are active members of professional music organizations at the local, state and national levels.

Scholarships or Special Awards

Scholarships are available to Conservatory students and are awarded on the basis of ability (demonstrated at the audition) and academic standing. Scholarships are awarded for one year but can be renewed annually, provided students maintain the appropriate grade level, continue

satisfactory performance in the major performance area, and participate in major ensembles as prescribed.

Applicants for Conservatory scholarships must complete all regular admissions procedures in order to be considered.

In accordance with the code of ethics of the National Association of Schools of Music, the acceptance of financial aid by a candidate is considered a declaration of intent to attend the institution, and each candidate will be so informed. The code further declares that such a student may not consider any other offer from an institutional member of the NASM except with the written consent of the music executive of the first institution. Similarly, a transfer applicant cannot be considered for financial aid without the written recommendation of the head of the music department from which the transfer is being made.

Undergraduate Programs

The Conservatory of Music and Dance offers the bachelor of fine arts in dance, bachelor of arts, bachelor of music and bachelor of music education degrees. The specific degrees and their requirements are listed on the following pages.

Admissions: New Students

New students must meet the general requirements for admission to the University. Additionally, a 10-minute audition is required in the applicant's major performance field to determine proficiency and placement in the appropriate applied level for music majors. Dance auditions consist of participation in a ballet class and a modern class.

Auditions serve as criteria for admission and for scholarships and are held during the late fall and early winter. Auditions are advisory in nature regarding performance level. It is preferred that auditions take place at the Conservatory. In cases of extreme distance or scheduling problems, a recorded audition may be submitted by the applicant.

Admissions: Transfer Students

All undergraduate transfer students must:

1. Be admitted to the University and the Conservatory.
2. Present complete official transcripts.
3. Audition for applied placement.
4. Take a theory examination for validation of theory level (Music majors only).

Requirements for Placing Students in Applied Music Courses

Placement

1. All new students (including transfers) must audition before the appropriate faculty for advisement and placement. The final determination of course number and hours of credit is made at the first jury. (This placement could range from a non-credit program to the 402 applied level.)
2. All readmitted students will be assigned a level (major or secondary), a course number and the appropriate hours credit based on their last jury at UMKC. Any students who

have interrupted their applied studies at UMKC for two or more consecutive semesters (not counting the summer session) must re-audition before the appropriate faculty.

Juries

1. Periodically, as required by the performance divisions, all students taking lessons for credit will perform before a jury composed of the appropriate faculty, with the exception of levels 100B and 100C. If a jury is not required in a given semester, the grade will be assigned by the applied teacher. Students who have presented a degree-plan recital (an evaluated recital) for the current semester will be assigned a recital grade without a jury. Recital and jury grades are assigned according to the average of the teacher's grade (50 percent) and the jury committee's grade (50 percent).
2. Final approval for advancement is subject to the action of the appropriate jury. If the jury decides that students have not made satisfactory progress, the students will be required to repeat a level, even though they might receive a passing grade.
3. Upon completion of the 202 applied level, all students must have applied jury approval to move on to the 301 applied level of study. All students seeking a bachelor of music degree in performance must petition the appropriate applied jury for permission to continue in the degree program at the junior level.

Levels

1. Students can request a change of level from secondary to major, or from major to secondary, for the next term but not the current term. In any case, students must complete the total number of hours required for the degree in applied music. Credit hours in major applied-music studies earned at another institution will be validated according to the approval of the appropriate jury.
2. Skipping a class number is not allowed. Students advance either by satisfactory performance at a regular jury or by credit obtained through examination. The UMKC Registration Office should be contacted for details and actual registration for receiving credit through examination.

Specific degree requirements regarding applied music

1. Bachelor of Music. All bachelor of music students, except composition majors, must complete Applied Music Studies 402. A graded public recital is required. Music Theory majors must complete Applied Studies 402 (2 credit hours), with participation in CONSVTY 498 required in lieu of the graded public recital.
2. Bachelor of Music in Music Composition. All freshman and transfer students who are applying for admission as composition majors must take an applied audition as part of the application and admissions process. Results of the audition will be communicated to the composition coordinator, and will be used as part of the overall decision-making process, together with the student's portfolio, transcripts and supporting documents. In cases where the audition is not acceptable or where there is no room for that student in a given applied studio, the composition faculty may elect, if the other portions of the application are sufficiently strong, to recommend admission for the student on a provisional basis. The student must re-audition after a maximum of two semesters of study; if the situation is not resolved by the end of the first year, the student may then be denied composition major status and/or music major status.

3. All bachelor of music education students must complete Applied Music Studies 401 (secondary). A studio recital is required.
4. All bachelor of music education-therapy students must complete Applied Music Studies 301 (secondary).
5. All bachelor of arts music students must complete Applied Music Studies 301 (secondary).

Missed lesson and tardy policy

Students who are late for lessons, or who miss them, do so at their own loss. Lessons missed for personal reasons of the instructor will be made up. Lessons missed because of students' illness will be made up at the discretion of the instructor.

Recital Requirements

1. Performance majors are required to perform in at least one Conservatory student recital each semester. Non-performance majors are expected to participate in student recitals at the request of the applied music teacher. A public senior recital at least 55 minutes long is required of all undergraduate performance majors. This recital will be in lieu of the jury examination for that semester.
2. Bachelor of music education majors with choral emphasis or instrumental emphasis are required to perform a studio recital at least 30 minutes long. Students may petition their division if they want to give a public recital. The public recital may be graded at the option of students and the division. This grade will be in lieu of the jury at the option of the division.
3. Students must give the required recital during a semester that they are enrolled in a 400-level applied music studies course.
4. Bachelor of music majors with a jazz and studio music emphasis are required to present a public senior recital at least 50-minutes in length during the 402J semester. The program will include works arranged or composed by the student, chosen from a portfolio submitted to the appropriate jazz/studio music and composition faculty for approval. The student will perform works from the jazz repertoire on his or her major instrument.
5. For dance requirements, see Bachelor of Fine Arts in Dance page.

Ensemble Requirements

1. Participation in at least one ensemble is required each semester that students are enrolled full-time (12 hours or more) on campus, as required by the students' degree programs, except composition majors (see music composition programs for required courses).
2. Student participation in Conservatory ensemble rehearsals and performances shall take precedence over non-Conservatory presentations.
3. A minimum of eight semesters of ensemble credit is required for graduation on any degree plan, except for the music education degree with emphasis in music therapy, which requires six semesters.
4. All undergraduate students enrolled in applied lessons on orchestral instruments must be enrolled in a major instrumental ensemble each semester, except composition majors (see music composition program for required courses), and music education students during the student-teaching semester.

5. All undergraduate Conservatory students whose major instruments are orchestral and who are enrolled in six or more hours must be enrolled in a major instrumental ensemble. This applies to all degree programs.
6. Bachelor of music majors with jazz and studio emphasis must participate in either Jazz Orchestra or Jazz Ensemble each semester in residence. These students also will be required to participate in a major ensemble as stated in numbers 1-5 of Recital Requirements.

Recital and Concert Attendance

Undergraduate Conservatory students in BA Music, BM Jazz, BM Organ Performance, BM Theory and BME Choral are required to register for CONSVTY 154 and to be an audience member at 12 live performances, lectures or master classes in the performing arts each semester until degree requirements are met. Four of these must be Conservatory events, four must be approved by faculty of the student's major division, and four may be chosen at the student's discretion. Events chosen at the student's discretion may include concerts/lectures needed to fulfill the requirements of a Conservatory academic course. A part-time Conservatory student may spend two semesters of an academic year in completing one credit hour.

Degree Program Prerequisites

1. The student should be able to qualify for CONSVTY 101, Applied Music Studies for Freshmen, for two hours credit, in the major performance area. The student also should have some familiarity with a keyboard instrument.
2. Previous experience in music, such as high school band, orchestra or chorus, is desirable.
3. Interest in a field of study outside of music is desirable.

Certification Procedures

Upon completion of the bachelor of music education degree, students must initiate the application for Missouri and Kansas certification in the Student Services Office of the School of Education. Applications should be filed during the student teaching semester. Certification is not automatic.

Elementary and secondary student teaching are required for the K-12 certificate. All prospective teachers must take and receive a satisfactory score on the following tests for state certification: For Missouri certification, students must receive a satisfactory score on the Praxis II professional knowledge.

For Kansas certification, students must receive satisfactory scores on the Pre-Professional Skills Test (PPST) in reading, writing and mathematics, and the Praxis II core test.

Graduate Programs

The Conservatory of Music and Dance offers graduate programs leading to the following degrees: master of arts in music; master of arts in music -- music therapy; master of music in music composition, conducting, musicology, music theory and performance; master of music education; and doctorate of musical arts in music composition, conducting and performance. The Conservatory participates in the Interdisciplinary Ph.D. program for students who desire music education as their coordinating discipline and education as a co-discipline. Graduate students in the Conservatory are also subject to the regulations, listed in the General Graduate Academic Regulations and Information section of this catalog.

Interdisciplinary Ph.D. study in Music Education

The Conservatory participates in the Interdisciplinary Ph.D. Program for students who desire music education as their coordinating discipline and curriculum and instruction as a co-discipline. Students with a background in music therapy can elect music education as their coordinating discipline and choose from possible co-discipline options in consultation with the music therapy faculty.

Application is made through the School of Graduate Studies.

Graduate Academic Regulations

Admission to the Conservatory of Music and Dance does not constitute an approval of major. Graduate students attending the Conservatory of Music and Dance do not have a major until divisional requirements are met and an approved planned program of study is filed.

Requirements for Admission

All students applying for admission must:

- Complete an application for admission.
- Submit transcripts of all prior work.
- Possess a minimum overall grade-point average of 3.0 for all prior coursework.
- Perform an applied audition, the purpose of which is diagnostic only, except as indicated in certain divisional standards.

Meet admission standards listed below:

- Choral Conducting
 - Master's and doctoral degrees: live interview/choral conducting students are required to audition before enrolling in applied lessons, but may be admitted without an applied audition.
- Orchestral/Wind Conducting
 - Master's and doctoral degrees: live interview/applied audition.
- Master of Arts
 - Achieve Conservatory 302 at the audition or submit area of concentration approval form.
- Music Composition
 - Master's and doctoral degrees: submit portfolio of compositions for evaluation.

- Music Education
 - Master's degree: document completion of a bachelor's degree in music education or the equivalent/have an acceptable interview with faculty from this discipline/provide evidence of musical proficiencies applicable to music education settings.
- Musicology
 - Master's degree:
 - a. Possess a bachelor's degree in music.
 - b. Possess a minimum grade-point average of 3.0 in undergraduate music history courses.
 - c. Submit examples of writing. (The writing sample should be either 1) a research paper on some aspect of the major field - can be an earlier term paper from the baccalaureate degree or 2) a senior project from the baccalaureate degree.)
 - d. Possess reading knowledge in at least one language other than English.
- Music Theory
 - Master's degree:
 - a. Possess a bachelor's degree in music theory or the equivalent.
 - b. Possess a minimum grade-point average of 3.0 in undergraduate music theory courses.
 - c. Perform a keyboard proficiency examination.
 - d. Submit examples of writing.
 - e. Translate a selection into English from either French or German using a dictionary.
- Music Therapy
 - Master's degree:
 - a. (a) Possess a bachelor's degree in music therapy from an NASM-accredited institution or the equivalent. (b) Possess a bachelor's degree in music or music education from an NASM-accredited institution or the equivalent. Students who do not have the appropriate music therapy professional status must pursue a music therapy equivalency program of study that is inclusive of all undergraduate music therapy requirements before being admitted to the master's program. Provisional admission to the master of arts in music-music therapy degree may be granted by the music therapy faculty.
 - b. Have an acceptable interview with one or more members of the music therapy faculty.
 - c. Demonstrate leadership ability and music skills through a successful music therapy clinical presentation in a music therapy setting. This demonstration may consist of a live presentation observed by UMKC music therapy faculty, or a videotape of a session submitted to the music therapy faculty.
- Performance
 - Master's degree: achieve Conservatory 5501 (Graduate Masters Performance) at the audition.
 - M.M. in Performance: Voice Emphasis, Opera Track: achieve Conservatory 5501 (Graduate Masters Performance) at the audition; audition must include four arias in four different languages and styles.

- Doctoral degree: achieve Conservatory 5601 (Graduate Doctoral Performance) at the audition.
- Performer's Certificate
 1. Possess a bachelor's degree in music.
 2. Achieve Conservatory 5501 at the audition.
 3. Interview with faculty/coaches in the applied area.
 4. Submit a standard resume including performance experiences.
- Artist's Certificate
 1. Possess a master's degree in music or the appropriate equivalent as determined by applied faculty in the area.
 2. Achieve Conservatory 5601 at the audition.
 3. Interview with faculty/coaches in the applied area.
 4. Submit a standard resume including performance experiences.

Matriculation Examination

The matriculation exam applies to all students whose degree program requires a 5500-level music history and/or music theory class. The matriculation examination in dictation, music theory and music history must be completed by students before enrolling for the term of admission. Students must pass all sections of the exam *or* complete review courses (421A/B, 497JA/B with a grade of B- or higher) before enrolling in 5500-level theory and history courses.

Students in the MM in Performance: Vocal Emphasis (including Opera Track) must demonstrate proficiency in Italian, German, and French lyric diction.

Graduate assistantships are available with stipends varying for the academic year depending upon assignment. Assistantships are available in accompanying, assessment, conducting, instrumental ensembles, jazz and studio music, keyboard skills, music appreciation, music composition, music education, musicology, music theory, percussion, pep band, piano, saxophone, recording/lighting, stage management and voice. Recipients are expected to devote 10 hours a week in assigned duties. Applicants for assistantships should have and maintain a minimum 3.0 (B) grade-point average.

Students who wish to apply for assistantships or fellowships should visit Conservatory Admissions for application materials and a list of current positions. Applications must be submitted by March 1. Awards will be made by April 1, and a letter of acceptance or rejection sent to the applicant by April 15. Awarding a graduate assistantship is contingent upon admission.

For information concerning assistantships, fellowships and other forms of student financial aid and scholarships, contact the
Conservatory Admissions Office

General Graduate Degree Requirements

RETENTION AND MINIMUM GRADES

Conservatory graduate students must maintain a 3.0 graduate grade-point average in order to remain in good standing. A maximum of two courses not exceeding three hours of credit in each course at the 5500 or 5600 level in which C's are received shall be acceptable for the planned program of any advanced degree. No grade lower than a 3.0 (B) is acceptable in the major field.

All graduate students in the master of music and doctor of musical arts performance degree programs must enroll in Conservatory Wind Ensemble, Conservatory Wind Symphony or Conservatory Orchestra for a minimum of two semesters if their major instrument is an orchestral instrument. Master of music students in vocal performance must participate in Bella Voce, Conservatory Concert Choir or Conservatory Singers for a minimum of two semesters.

All graduate students in the doctor of musical arts conducting degree program are required to participate in at least one major ensemble, as advised by the conducting faculty, during each term of enrollment as a full-time student.

Master's students in musicology and theory, as well as doctoral students in composition, conducting and performance must satisfy language requirements for the degree.

For all M.M. students in Musicology, a grade of B- (2.7) or better in a first-semester, sophomore-level foreign language course is required. Students must study French, German or Italian unless the substitution of another language is approved by the supervisory committee. A language proficiency test may be substituted for course requirements, provided it documents language capabilities equivalent to the completion of a first-semester, sophomore-level, course. This must be approved in advance by the supervisory committee. In such cases, a letter describing the process and results must be forwarded to the chair of the supervisory committee, the musicology area coordinator, and the Conservatory Associate Dean for Graduate Studies and Curriculum. For master's students in theory as well as doctoral students in conducting and performance *who speak English as their first language*, a grade of B- (2.7) or better in a first-semester, sophomore-level foreign language course or C (2.0) work or better in each of two junior-level courses or in one senior-level literature or civilization course is viewed as an adequate demonstration of

foreign language skills. Students must study French, German or Italian unless the substitution of another language is approved by a minimum of two-thirds of the supervisory committee. A language proficiency test, if provided by language instructors or departments, may be substituted for course requirements provided it documents language capabilities equivalent to the previously described courses. In such cases, a letter from the university language professor, describing the process and results, must be forwarded to the Conservatory Associate Dean for Graduate Studies and Curriculum. Doctoral students in conducting or performance *who speak English as a second language* must achieve a score of 600 on the TOEFL exam. If students have not completed a TOEFL exam with a score greater than 600 before arriving at UMKC, they must complete a language test in English provided by UMKC's Applied Language Institute. All courses recommended by ALI must be successfully completed and a score of 600 on the TOEFL, or the equivalent as determined by ALI must be achieved. This policy applies to all ESL students regardless of the number of years they have studied in the United States.

The DMA in Music Composition program does not have a foreign language requirement.

Master's Degrees

The master of arts, master of music and master of music education degree programs require a minimum of 30 semester hours; at least 18 hours must be numbered 5500 or above. No 300- or 400-level courses may be included in a master's program if required in the comparable baccalaureate degree at the Conservatory of Music and Dance. CONSVTY 5599 (Thesis), CONSVTY 5598 (Research Problems) or CONSVTY 5589 (Academic Portfolio) is required on all degree programs except performance. With the approval of the supervisory committee and the principal graduate adviser, students can transfer hours equal to 20 percent of the planned program from an accredited institution other than UMKC, but any such transfer credit must be less than seven years old at the time the degree is awarded. The official time limit for the completion of the master's degree is seven years.

STUDENT LEARNING OUTCOMES

The Conservatory of Music and Dance aims to meet or exceed the educational standards set by the National Association of Schools of Music (NASM) for the training of master's level music students. To that end, the Conservatory endorses the development of

- Individual talents, interests and philosophies which can be used creatively both to preserve and extend our cultural heritage.
- Professional competence in such disciplines as composition and performance interpretation and the evaluation of knowledge.
- Scholarly competence in the organization, interpretation and evaluation of knowledge.
- Professional competence in the communication and dissemination of knowledge.
- Individuals with the potential to solve contemporary problems in various aspects of music.
-

COMPREHENSIVE EXAMINATION

The comprehensive examination must be taken during or after the last term of coursework. It is designed to last a total of eight hours and the content is at the discretion of the supervisory committee. The examination is offered during the fifth week of fall and spring semesters and may be scheduled during a summer session with the approval of the supervisory committee. If

taken in the summer, the questions may not be graded until the Fall Semester. students must be enrolled during the term the comprehensive examination is administered.

Student Learning Outcomes

The Conservatory of Music and Dance aims to meet or exceed the educational standards set by the National Association of Schools of Music (NASM) for the training of master's level music students. To that end, the Conservatory endorses the development of

- Individual talents, interests and philosophies which can be used creatively both to preserve and extend our cultural heritage.
- Professional competence in such disciplines as composition and performance interpretation and the evaluation of knowledge.
- Scholarly competence in the organization, interpretation and evaluation of knowledge.
- Professional competence in the communication and dissemination of knowledge.
- Individuals with the potential to solve contemporary problems in various aspects of music.

Doctor of Musical Arts

Ordinarily, doctor of musical arts candidates will be expected to show from 75 to 90 hours of approved coursework beyond the bachelor's degree (including the master's degree) on their planned programs. Approximately 80 percent of the coursework on the planned program must be at the graduate level (5500-5600).

If it is of acceptable quality and appropriate to the student's program, graduate credit not to exceed more than one-half the total credit earned beyond the bachelor's degree may be transferred from another institution to a doctoral program. Except for courses included in the earned master's degree, work done at institutions other than UMKC must have been completed within nine years of the awarding of the degree. A D.M.A. or Ph.D. student must take and pass the doctoral comprehensive examination and advance to candidacy within five years from the beginning of doctoral coursework (within four years if entering with a master's degree in the same or closely related field). After the establishment of degree candidacy, a maximum of five years will be allowed for completion of degree requirements. All D.M.A. students must demonstrate proficiency in one foreign language and satisfy the residency requirement.

Residency for the D.M.A. cannot begin until the first term of enrollment as a D.M.A. student at the Conservatory. The residency requirement for the D.M.A. may be satisfied in any one of the following ways: 1) two adjacent semesters with a minimum of nine hours each, or 2) one semester with a minimum of nine hours and two summer sessions with a minimum of five hours each, provided that the full-time semester is adjacent to one of the summer sessions [it is expected that the summer sessions will be consecutive], or 3) completion of 24 hours within 18 consecutive months.

Student Learning Outcomes

The Conservatory of Music and Dance aims to meet or exceed the educational standards set by the National Association of Schools of Music (NASM) for the training of doctoral level music students. To that end, the Conservatory endorses the development of

- Intellectual awareness and curiosity sufficient to predict continued growth and contribution to the discipline.
- Significant accomplishment in performance, composition, scholarship, music education or conducting.
- A knowledge of the techniques of music theory sufficient to perform advanced analysis.
- A knowledge of representative literature and composers of each major period of music history.
- A knowledge of general bibliographic resources in music.
- Considerable depth of knowledge in some aspect of music, such as historical period, an aspect of theory, performance practice or compositional styles.
- Sufficient writing and speaking skills to communicate clearly and effectively to members of the scholarly community and to the wider community.
- A reading knowledge of one or more foreign languages, or other appropriate research skills.

The Supervisory Committee

The supervisory committee for students seeking the doctor of musical arts shall consist of three faculty members who will approve the planned program of study and the doctoral research plan, and agree to serve as the three faculty responsible for writing and grading the major portion of the doctoral comprehensive examination.

Comprehensive Examination (for students entering before fall 2011)

Before taking the written comprehensive examination, the planned program, residency, language requirement, coursework, doctoral research plan and other divisional requirements must be completed. The student must be enrolled during the term the comprehensive examination is administered and 30 consecutive days are allowed for its completion. This examination of 24 hours consists of 18 hours of in-depth scrutiny of the major field, prepared and graded by the supervisory committee, and an objective examination covering music history and music theory, prepared and graded by faculty from the Musicology and Music Theory areas. The integrated music history-music theory examination consists of a research essay to be completed over the sixth weekend and a proctored component administered on the seventh Saturday of the fall and winter semesters. **ALL** parts of the comprehensive examination **MUST** be taken at UMKC. The integrated music history-music theory exam affects students who enter the DMA program beginning in fall 2006. Each section of the music theory and music history examinations must be passed with a grade of B- or better. If a student does not achieve a B- or better on any section of these exams, he or she must retake that section. The comprehensive examination must be completed successfully before the dissertation topic is approved. Performance students must also successfully complete their comprehensive exams before the final recital is given. Students selecting doctoral research options (CONSVTY 5697 and CONSVTY 5698) instead of the dissertation must complete at least one project after comprehensive exams are passed.

The comprehensive examination committee for students seeking the doctor of musical arts shall consist of three faculty members of the supervisory committee and any other faculty who have contributed and graded questions.

Comprehensive Examinations (for students entering fall 2011 or later)

First Exam Procedures

The First Exam focuses on Music History and Theory and is designed to assess students' foundational knowledge for advanced study. The exams will be given the seventh Saturday of the spring semester and students will take the exam in their second full year of coursework. The exams will consist of two three-hour exams that cover an integrated application of ideas from music history and music theory and will be designed, proctored, and graded by all fulltime faculty members in those two areas. Based on the collective recommendation of the faculty, students will be assigned a grade of high pass, pass, or fail for each section of the exam.

Students who fail to pass any portion of the exam will be given feedback as to the recommended courses needed to make up any deficiencies in their third year of coursework and will be allowed to retake those portions the following year. Students must fully pass the First Exam to be eligible to take the Second Exam and continue to candidacy.

Second Exam Procedures

The Second Exam tests students' understanding of their chosen field of study and are required for advancement to candidacy. These exams are held the fifth week of both the Fall and Winter/Spring semesters and must be taken after the end of coursework and before work begins on doctoral projects. Students wishing to take the exams should notify their committee chair of their intentions and submit a complete Comprehensive Exam Request Form to the graduate advising office by at least the last week of classes the semester before they take the exam.

Testing is proctored from 9:00 until 5:00 each day of that week, and students are responsible for arranging their schedules and signing up for the times in which they plan to take the test.

The Second Exam is administered by a D.M.A Committee made up of a faculty chair and two other faculty members. Students are responsible for selecting their chairs, who normally will be the principle instructor or director of research, and then the remainder of their committee in consultation with the chair. The committee members are communicated to the advising office through signatures on the Comprehensive Exam Request Form.

Each D.M.A. student is given eight hours in which to answer questions submitted by the three members of his or her committee. Each member of the committee must contribute to the Second Exam, and while the number of hours for questions given to each member is at the chair's discretion, typical practice is four hours for the chair and two hours for each member (Each "hour" of questions should take approximately one hour to complete). Committee members must submit their questions to the chair by the Wednesday of the third week of the semester.

The chair then submits the entire exam to the Comprehensive Exam Coordinator by the end of the third week of the semester. It is the chair's responsibility in consultation with the committee to ensure that there are no overlaps in questions and that the exam adequately examines the field of study. Content of the examination questions should reflect the content of study specific to each student's degree. Members of the D.M.A. Committee are responsible for determining the appropriate focus for questions. Those questions should not function as a retesting of course

information, but as an assessment of a student's understanding and ability to connect and apply course content more broadly.

Grading for the Second Exam

Once a student has completed the exam, the Comprehensive Exam Coordinator distributes written responses to the faculty responsible for each question. That faculty member grades the responses and relays their recommendation of high pass, pass, or fail to the committee chair and the Comprehensive Exam Coordinator. Students must receive a grade of pass or high pass on each question to pass the Second Exam and advance to candidacy. Students are allowed to retake portions of the exam they failed one time, and the format of that retest is at the discretion of the committee member responsible for the question.

The Comprehensive Examinations consist of three separate exams.

Third Exam Procedures

At the conclusion of all doctoral points needed for the D.M.A. degree and contingent upon successful completion of the Second Exam, members of the student's D.M.A. Committee will reconvene for a two-hour oral defense of the work done during candidacy for the degree. In the case of areas that require dissertations, the dissertation defense acts as the Third Exam. For all other areas, the Third Exam is expected to consist of questions synthesizing the student's work in all areas of study in their doctoral documents and/or performances. The Committee Chair will schedule the Third Exam, which may be postponed at the Chair's discretion. The Third Exam is the last step in the conferral of D.M.A degrees.

Master of Music in Music Composition Required Courses

CONSVTY 5500- 5600	CONSVTY Music History	3
CONSVTY 5500- 5600	CONSVTY Music Theory	3
CONSVTY 5531	Advanced Orchestration	3
CONSVTY 5533	Advanced Composition (three courses)	9
CONSVTY 5593	Introduction to Research and Bibliography in Music	3
CONSVTY 5599	Thesis (a)	4
	Area of Concentration (b)	5
	Electives	2
	Total hours (minimum)	3
		2

(a) An appropriate composition. A score must be filed in the Conservatory Library.

(b) The Area of Concentration is developed by the student with guidance and approval of the supervisory committee as a part of the planned program. Examples include Applied Music/Ensemble Performance, Music Scholarship, Conducting (Choral and/or Instrumental), Music Technology and interdisciplinary courses.

Master of Music in Conducting Required Courses

CONSVTY 5582	Advanced Choral Conducting (two semesters)	4
-and-		
CONSVTY 5587	Seminar in Choral Literature (two semesters)	
-or-		
CONSVTY 5583	Advanced Instrumental Conducting (any two from 5583 ABCD)	4
-and-		
CONSVTY 5586B	Seminar in Wind/Band Literature	
-or-		
CONSVTY 5583	Advanced Instrumental Conducting (any two from 5583 ABCD)	4
CONSVTY 5582	Advanced Choral Conducting	2
-and-		
CONSVTY 5586A	Seminar in Orchestral Literature	4

And the following:

CONSVTY 400-5500A	Applied Music (a)	2- 6
CONSVTY 5500-5600	Music History	3
CONSVTY 5500-5600	Music Theory	3
CONSVTY 5593	Introduction to Research and Bibliography in Music	3
CONSVTY 5597A	Master's Conducting Performance (b)	4
CONSVTY 5598	Research Problems	2
Electives		1- 5

Total hours (minimum) 30

(a) (Choral Track Voice Requirement) The applicant must enroll in applied voice the first term of registration as a full-time, degree-seeking student. Progress will be measured by the following:

1. If the applicant qualifies for applied voice at the 5500A level, a minimum of two credit hours is required.
2. If the applicant does not qualify for applied voice at the 5500A level, the student must enroll in applied voice for three terms or until completion of the 5500A level.

(a) (Instrumental Track Applied Requirement) The applicant must enroll in applied music the first term of registration as a full-time, degree-seeking student. Progress will be measured by the following:

1. If the applicant qualifies for applied music at the 401 level, a minimum of two credit hours is required.
2. If the applicant does not qualify for applied music at the 401 level, the student must enroll in applied music for a minimum of two terms, until completion of the 401 level, or until graduation.
3. In addition, instrumental conducting majors will be required to enroll in two terms of applied music on other appropriate instruments, as advised by the conducting faculty.

(b) One public performance is required. One rehearsal or lecture demonstration is required.

Master of Music Education Required Courses

CONSVTY 5500, CONSVTY 5600 Music History or Theory	3
CONSVTY 5574 History and Philosophy of Music Education	3
CONSVTY 5589 Academic Portfolio	3
-or-	
CONSVTY 5599 Thesis	3
CONSVTY 5594A Introduction to Descriptive and Experimental Research in Music	3
Applied Musicianship(a)	2
Methods/Materials Advanced Courses (e.g., Conservatory 5540x, 5582x, 5583x, 5586x, 5587x, Summer Workshops)	6
Electives	10
Total hours (minimum)	30

(a) MME students wishing to satisfy the applied musicianship requirement by taking lessons in their undergraduate applied area will be required to perform an applied audition prior to enrolling in the first term. Typically, these lessons will occur on a TBA arrangement with applied faculty during the fall or spring semesters. These students must complete a semester of applied lessons at no lower than the 402-2 level. Other students who wish to refine applied skills through pedagogy study (e.g., CONSVTY 491/ CONSVTY 5591 or summer workshops) or through applied study on other instruments (e.g., CONSVTY 5500C) will not be required to audition.

Master of Music in Musicology Required Courses

CONSVTY 5500A	Applied Music (or three terms in the same performing medium at any level) (a)	2
CONSVTY 5500-5600	Music History (four courses, two periods and two of choice)	12
CONSVTY 5500-5600	Music Theory	3
CONSVTY 5591K	Pedagogy of Music History	3
CONSVTY 5593	Introduction to Research and Bibliography in Music	3
CONSVTY 5693	Advanced Research and Bibliography in Music	3
CONSVTY 5598	Research Problems	2
CONSVTY 5599	Thesis	6
Electives		1-3
Total hours (minimum)		35

(a) Elective credit may be substituted if CONSVTY 5500A (Applied Music) is achieved at the audition.

Language Requirements: For all M.M. students in Musicology, a grade of B- (2.7) or better in a first-semester, sophomore-level foreign language course. Students must study French, German or Italian unless the substitution of another language is approved by the supervisory committee. A language proficiency test may be substituted for course requirements, provided it documents language capabilities equivalent to the completion of a first-semester, sophomore-level course. This must be approved in advance by the supervisory committee. In such cases, a letter describing the process and results must be forwarded to the chair of the supervisory committee, the musicology area coordinator and the Conservatory Associate Dean for Academic Studies.

Supervisory Committee: The Supervisory Committee, which consists of at least two musicology faculty plus one other member, is assigned to approve the planned program and prepare and grade the comprehensive examination. The committee must be selected before the student completes two terms of enrollment.

Graduate Approval of Major: Complete CONSVTY 5593 (Introduction to Research and Bibliography in Music) with a grade of A; complete one graduate-level music theory course and one graduate-level music history course with a grade of A in each course; and present a scholarly paper before a public forum on a topic agreed to in advance by the musicology faculty (the duration of the presentation is to be at least 20 minutes).

Master of Music in Performance: Keyboard Emphasis

CONSVTY 5500-5600 Music History	3
CONSVTY 5500-5600 Music Theory	3
CONSVTY 5501 Applied Study(a)	4
CONSVTY 5593 Introduction to Research and Bibliography in Music	3
CONSVTY 5591E Advanced Pedagogy I – Piano	3
CONSVTY 5597 Master's Recital (two required) (c)	8
CONSVTY 305G Principles of Chamber Music	2
Electives(b)	10

Total hours (minimum)36

(a) A minimum of one semester of applied music (5501) is required before the first recital.

CONSVTY 5501 or CONSVTY 5597 is required each semester of enrollment until the recital requirement is met.

(b) A maximum of four elective credits may be in the performance area.

(c) Piano students are required to present two public recitals and two collaborative recitals. The collaborative recital requirement is part of the applied piano lesson - no extra credit is received.

Master of Music in Performance: Orchestral Instruments and Guitar Emphasis Areas

CONSVTY 5500-5600 Music History	3
CONSVTY 5500-5600 Music Theory	3
CONSVTY 5501 Applied Study (a)	4
CONSVTY 5593 Introduction to Research and Bibliography in Music	3
CONSVTY 5597 Master's Recital (two required)	8
CONSVTY 305 Principles of Chamber Music	4
Electives (Non-applied music courses)	3
Electives	8
Total hours (minimum)	36

(a) A minimum of one semester of applied music (5501) is required before the first recital. CONSVTY 5501 or CONSVTY 5597 is required each semester of enrollment until the recital requirement is met

Notes: All students whose major is an orchestral instrument must be enrolled in Conservatory Wind Symphony, Wind Ensemble or Conservatory Orchestra for a minimum of two semesters. Not more than one half the total hours counted toward the planned program may be in applied music and recitals.

A maximum of two semesters of an ensemble can be counted on any master's planned program of study.

Master of Music in Performance: Voice Emphasis

CONSVTY 5500-5600	Music History	3
CONSVTY 5500-5600	Music Theory	3
CONSVTY 5501	Applied Study (a)	4
CONSVTY 5547	History of Opera	3
CONSVTY 5548	Opera Literature	2
CONSVTY 5566 (A, B, C, D)	Vocal Literature (one required)	2
CONSVTY 5593	Introduction to Research and Bibliography in Music	3
CONSVTY 5597	Master's Recital (two required)	8
Electives		6
	Total:	34 hours

(a) A minimum of one semester of applied music (5501) is usually required before the first solo recital. However, Voice Performance majors, with the approval of the Vocal Studies Division, may enroll in 5597 (Master's Recital) any semester to receive credit for a major UMKC opera role.

Notes: Not more than one-half the total hours counted toward the planned program may be in applied music and recitals.

Participation for two semesters in a major choral ensemble is required.

The diction proficiency test for French, German and Italian must be passed.

VOICE 5500A	Applied Study (4 semesters)	8
CONSVTY 5517	Advanced Opera Workshop	2
CONSVTY 5547	History of Opera	3
CONSVTY 5548	Opera Literature	2
CONSVTY 5590	Special Topics (Adv. Opera Scene Study)	2
CONSVTY 5593	Introduction to Research and Bibliography in Music	3
VOICE 5597	Recital (Opera Role, 2 semesters)	8
DANCE 403A or DANCE 404A	Dance for Non-Majors (a)	1
THEATRE 300	Acting 1	3
	Non-vocal performance electives (b)	2
	Total:	34 hours

(a) A movement class may be substituted.

(b) Recommended courses include vocal literature, music history, music theory, applied piano, and vocal pedagogy.

LANGUAGE REQUIREMENT

Must attain a grade of B- (2.7) or better in a second semester, freshmen-level, foreign language course in all three languages - French, German and Italian.

ENSEMBLE REQUIREMENT

Students must satisfactorily participate in one major choral/orchestral work during their two years of study, either as soloists or members of the chorus. Assignment for participation is at the discretion of the Director of Choral Activities.

The following two requirements also apply to all students in the M.M. in Performance: Voice Emphasis, Opera Track.

Language requirement. Must attain a grade of B- (2.7) or better in a second semester, freshmen-level, foreign language course in all three languages - French, German and Italian.

Ensemble requirement. Students must satisfactorily participate in one major choral/orchestral work during their two years of study, either as soloists or members of the chorus. Assignment for participation is at the discretion of the Director of Choral Activities.

Master of Music in Performance: Woodwind Emphasis

Note: The five instruments covered in this degree shall be flute, oboe, clarinet, saxophone and bassoon.

CONSVTY 5501 Applied Music (Instrument #1)(a)	4
CONSVTY 5500A Applied (Instrument #2)(b)	2
CONSVTY 5500A Applied (Instrument #3)(b)	2
CONSVTY 5500-5600 Music Theory	3
CONSVTY 5500-5600 Music History	3
CONSVTY 5591,5592 Advanced Pedagogy	4
CONSVTY 5593 Introduction to Research and Bibliography in Music	3
CONSVTY 5597 Master's Recital	8
Ensemble(c)/Electives	5
Total hours (minimum)	34

(a) A minimum of one semester of applied music is required before the recital. Not more than one-half of the total hours counted toward the planned program may be in applied music and recitals.

(b) A graded half recital during the second semester of study on instruments #2 and #3 is required.

(c) Two semesters of participation in a major ensemble are required on instrument #1. One semester of ensemble participation each is required on instruments #2 and #3.

Note: Jury approval of the 101(2) applied level on instruments #4 and #5 is required before graduation.

Master of Music in Music Theory Required Courses

CONSVTY 5593 Introduction to Research and Bibliography in Music	3
CONSVTY 5524B Advanced Analysis II - Common Practice Period	3
CONSVTY 5524C Advanced Analysis III - Contemporary Period	3
CONSVTY 5526A Introduction to Schenkerian Theory and Analysis	3
CONSVTY 5526B Schenkerian Analysis	3
CONSVTY 5591G Pedagogy of Music Theory I	3
Music History (Graduate Level)	3
CONSVTY 5598 Research Problems	2
CONSVTY 5599 Thesis	6
Electives	6
Total hours (minimum)	35

Piano Proficiency Requirement:

The Conservatory's undergraduate piano proficiency requirement must be met.

Applied Music Requirement:

Successful completion of one of the following is required:

- If the student qualifies for applied music at the 302 level, then no applied study is required.
- If the student does not qualify through audition for applied music at the 302 level, then the student must enroll for applied study for three semesters or until the 301 jury is passed.

Foreign Language Requirement:

For all masters students in Music Theory, a grade of B- (2.7) or better in a first-semester, sophomore-level foreign language course or C (2.0) work or better in each of two junior-level courses or in one senior-level literature or civilization course is viewed as an adequate demonstration of foreign language skills. Students must study French, German, Italian or Latin unless the substitution of another language is approved by a minimum of two-thirds of the supervisory committee. A language proficiency test, if provided by language instructors or departments, may be substituted for course requirements provided it documents language capabilities equivalent to the previously described courses. In such cases, a letter from the university language professor, describing the process and results, must be forwarded to the Conservatory Associate Dean for Academic Affairs.

Master of Arts in Music Required Courses

Area of Concentration(a)	9
CONSVTY 5500-5600 Music Theory(b)	3
CONSVTY 5500-5600 Music History(c)	3
CONSVTY 5593 Introduction to Research and Bibliography in Music	3
-or-	
CONSVTY 5594A Introduction to Descriptive and Experimental Research in Music	3
CONSVTY 5598 Research Problems	2
CONSVTY 302 Applied Music(d)	2
Electives	8
Total hours (minimum)	30

(a) The area of concentration is developed by the student with guidance and approval of the supervisory committee as part of the planned program. Nine hours of work in one discipline must be completed. Examples of concentration areas include (but are not limited to): Arts Administration, Composition, Conducting, Education, Musicology, Jazz and Studio Music, Performance, Theory and Therapy (equivalency).

All students applying for the Master of Arts in Music with an area of concentration in Jazz and Studio Music must audition on their applied instrument for the jazz studies faculty. No other audition is required. Applied lesson requirements will be fulfilled within the jazz department during the student's course of study.

(b) Elective credit may be substituted for students pursuing an area of concentration in music theory.

(c) Elective credit may be substituted for students pursuing an area of concentration in music history.

(d) If the applicant qualifies for applied lessons at the 302 level, a minimum of two credit hours is required. If the applicant does not qualify for applied lessons at the 302 level, the student must enroll in applied lessons for three terms or until completion of the 302 level. Students who chose a performance area of concentration must complete a minimum of one semester of 5500A. A total of nine hours of lessons/ensembles is required for an applied area of concentration.

<i>Master of Arts in Music - Music Therapy</i>	
CONSVTY 5544 Advanced Clinical Experience	2
CONSVTY 5545 Seminar in Music Therapy	2
CONSVTY 5594A Introduction to Descriptive and Experimental Research in Music	3
CONSVTY 5599 Thesis	3
Select one course from the following four:	3
CONSVTY 5573 Administration of Music Education/Music Therapy	
CONSVTY 5596 Theories of Learning Music	
EDUC-R&P 5505 Statistical Methods I	
EDUC-R&P 5502 Advanced Educational Psychology	
Special Interest Areas (suggested options):	16
Gerontology Certificate program	
Health Services Administration	
Gerontology Administration	
Counseling Psychology and Counselor Education Education	
Sociology	
Electives (5500 level music courses)	6
Total hours (minimum)	35

Notes: Students seeking this degree are not required to take the matriculation exams unless coursework in musicology and theory is required.

<i>Performer's Certificate Required Courses</i>	
Lessons and Recitals (Solo Experiences)(a)	16
Chamber and Ensemble Work (Collaborative Experiences) and/or Prescribed Electives	8
Music Literature/Pedagogy(b)	3-5
Total hours (minimum)	27-29

Note: Voice students must pass the diction proficiency test in French, German and Italian.

(a) Instrumental and keyboard students: four hours of lessons and 12 hours of recitals. Piano students are required to present three public recitals and two collaborative recitals. The collaborative recital requirement is part of the applied piano lesson - no extra credit is received. Voice students: eight hours of lessons and eight hours of recitals.

(b) Instrumental students, three hours; keyboard students, five hours; voice students, four hours.

Student Learning Outcomes

The Conservatory of Music and Dance aims to meet or exceed the educational standards set by the National Association of Schools of Music (NASM) for the training of doctoral level music students. To that end, the Conservatory endorses the development of

- Intellectual awareness and curiosity sufficient to predict continued growth and contribution to the discipline.
- Significant accomplishment in performance, composition, scholarship, music education or conducting.

- A knowledge of the techniques of music theory sufficient to perform advanced analysis.
- A knowledge of representative literature and composers of each major period of music history.
- A knowledge of general bibliographic resources in music.
- Considerable depth of knowledge in some aspect of music, such as historical period, an aspect of theory, performance practice or compositional styles.
- Sufficient writing and speaking skills to communicate clearly and effectively to members of the scholarly community and to the wider community.
- A reading knowledge of one or more foreign languages, or other appropriate research skills.

Doctor of Musical Arts in Music Composition Required Courses

Conservatory 5500-5600	Music Theory (three courses)	9
Conservatory 5500-5600	Music History (three courses) (a)	9
CONSVTY 5533	Advanced Composition (three classes)	9
CONSVTY 5533 -or- CONSVTY 5534	Advanced Composition (one additional -or- Advanced Electronic Music Composition	3
CONSVTY 5593	Introduction to Research and Bibliography in Music	3
CONSVTY 5699	Dissertation Research (b)	6
	Area of Concentration (c)	11
	Electives	3

(a) All doctoral students are required to complete three graduate music history courses. One must be a period course (CONSVTY 5555 - CONSVTY 5559), one must be a seminar course, and the remaining course may be either. Any substitutions must be approved by the music history faculty.

(b) An extended work in a format approved by the composition faculty. Two copies of the full score must be placed in the Conservatory Library.

(c) The area of concentration is developed by the student with guidance and approval of the supervisory committee as part of the planned program. Examples include Applied Music/Ensemble Performance, Music Scholarship, Conducting (Choral and/or Instrumental), Music Technology and interdisciplinary courses.

Doctor of Musical Arts in Conducting Required Courses

CONSVTY 5582	Advanced Choral Conducting (three semesters)	6
CONSVTY 5583D	Advanced Instrumental Conducting for Choral Majors	2
CONSVTY 5587	Seminar in Choral Literature	8

-or-

CONSVTY 5583	Advanced Instrumental Conducting (three from CONSVTY ABCD)	6
CONSVTY 5586A	Seminar in Orchestral Literature	6
CONSVTY 5582	Advanced Choral Conducting	2

-or-

CONSVTY 5583	Advanced instrumental Conducting (three from CONSVTY ABCD)	6
CONSVTY 5586B	Seminar in Wind/Band Literature	8

And the following:

CONSVTY 5500A	Applied Music (a)	2
CONSVTY 5500-5600	Music History (b) (three required)	9
CONSVTY 5500-5600	Music Theory (three required)	9
CONSVTY 5593	Introduction to Research and Bibliography in Music	3
CONSVTY 5697B	Doctoral Conducting Performance (c) (Two public performances with supporting documents)	8
CONSVTY 5697 / CONSVTY 5698 / CONSVTY 5699	(d) Doctoral Research	4

(a) Each doctor of musical arts conducting major must enroll in applied music the first term of registration as a full-time, degree-seeking student. If the applicant qualifies for applied music at the 5500A level, a minimum of two credit hours is required. If the applicant does not qualify for applied music at the 5500A level, then the student must enroll in applied music until completion of the 5500A level or until graduation.

1. Choral conducting majors whose major applied music is not voice will be required to take three terms of applied voice at any level.
2. Instrumental conducting majors will be further required to enroll in two additional semesters of two different instruments at the 5500B level as advised by the conducting faculty.

(b) All doctoral students are required to complete three graduate music history courses. One must be a period course (CONSVTY 5555- CONSVTY 5559), one must be a seminar course, and the remaining course may be either. Any substitutions must be approved by the music history faculty.

(c) Conducting recitals may be done with the approval of the major adviser at any time after

successful completion of the Graduate Approval of Major.

(d) A minimum of one doctoral research project, exhibiting the highest level of independence, must be finished after comprehensive examinations are successfully completed. Two rehearsal/lecture demonstrations must be completed. Participation in at least one major ensemble, as advised by the conducting faculty, during each term of enrollment as a full-time student is required.

Language Requirement: A proficiency in one foreign language is required. See this section of the catalog for options.

Doctor of Musical Arts in Performance Required Courses

CONSVTY 5500-5600 Music History (three required)(a)	9
CONSVTY 5500-5600 Music Theory (three required)	9
CONSVTY 5591 Advanced Pedagogy	2(3)
CONSVTY 5593 Introduction to Research and Bibliography in Music	3
CONSVTY 5601 Applied Study(b)	4
CONSVTY 5697 Doctoral Recital (three required)(c)	12
CONSVTY 5697A Doctoral Lecture Recital	4
CONSVTY 5697/5698/5699(d) Doctoral Research	4

(a) All doctoral students are required to complete three graduate music history courses. One must be a period course (Conservatory 5555-5559), one must be a seminar course, and the remaining course may be either. Any substitutions must be approved by the music history faculty.

(b) A minimum of one semester of CONSVTY 5601, Applied Music, is required before the first solo recital. Voice performance majors, with the approval of the Vocal Studies Division, may enroll in CONSVTY 5697 (Doctoral Recital) any semester to receive credit for a major UMKC opera role (one time only).

(c) Performance majors must enroll in CONSVTY 5601, Applied Music; CONSVTY 5697, Doctoral Recital; or CONSVTY 5697A, Doctoral Lecture Recital, each semester of registration until the recital requirement has been fulfilled.

(d) A minimum of one doctoral research project, exhibiting the highest level of independence, must be finished after comprehensive examinations are successfully completed.

Language Requirement: A proficiency in one foreign language is required. See this section of the catalog for options.

Notes:

Voice majors:

Must enroll in CONSVTY 5547, History of Opera (3 hours), and one from CONSVTY 5566A, CONSVTY 5566B, CONSVTY 5566C, CONSVTY 5566D, Vocal Literature, or CONSVTY 5548 Opera Literature (2 hours). Voice majors must pass the diction proficiency test in French, German and Italian.

Instrumentalists:

All students whose major is an orchestral instrument must be enrolled in Conservatory Wind Symphony, Wind Ensemble or Conservatory Orchestra for a minimum of two semesters. A maximum of three semesters of an ensemble can be counted on any D.M.A. planned program of study.

Must include three major works of chamber music in the recital component of the degree as determined in consultation with students' applied professor. These works may be performed on one program, or spread among the three recitals.

Keyboard:

Piano majors must enroll for a total of two credits in chamber music. One of the three recitals (CONSVTY 5697) must include at least one major chamber work. In addition to the three recitals, three collaborative recitals must be completed. The collaborative recital requirement is part of the applied piano lesson-no extra credit is received.

Artist's Certificate Required Courses

Lessons and Recitals (Solo Experiences)(a)	16
Electives(b)	13
Total hours (minimum)	29

(a) Instrumental Students - Lessons = 4 hours, recitals = 12 hours; Piano Students - Lessons = 4 hours, recitals = 12 hours. One recital must include a complete concerto accompanied by second piano, and one recital must include at least one major chamber work. In addition to the three recitals, two collaborative recitals are required. The collaborative recital requirement is part of the applied piano lesson - no extra credit is received; Voice Students - Lessons = four hours, recitals, opera roles, and/or oratorio roles =12 hours.

(b) Instrumental Students - Students must participate or enroll in four large ensembles and two chamber ensembles; Keyboard Students - Chamber music, literature and pedagogy courses are recommended; Voice Students - Opera workshop, vocal literature, history of opera, vocal pedagogy, related arts courses in theater and art, as well as independent study experiences in language and performance are recommended.

Note: Voice students must pass the diction proficiency test in French, German and Italian.

Conservatory General Education Requirements

1. All Conservatory students must meet the requirements as covered in the
2. General Undergraduate Academic Regulations and Information section of this catalog.
3. Students enrolling in Music Theory I-IV and Ear Training and Solfege I-IV must receive a C- grade or better to progress to the next appropriate class level.
4. Students enrolling in Keyboard Skills I-IV must receive a B- grade or better to progress to the next appropriate class level.

Minimum Foreign Language Requirements for B.M. Degrees

The following foreign language requirements for the various bachelor of music degrees may be met by high-school equivalency courses, or by taking college-level foreign language courses. High-school foreign language coursework must be evaluated by the Conservatory to determine applicability toward a degree.

- Composition: Any foreign language 110 & 120, 10 hours
- Guitar: Any foreign language 110 & 120, 10 hours
- Organ: French or German 110 & 120, 10 hours
- Piano: French or German 110 & 120, 10 hours
- Piano Pedagogy: French or German 110 & 120, 10 hours
- String Instrument: Any foreign language 110 & 120, 10 hours
- Theory: Any foreign language 110 & 120, 10 hours
- Voice: French, German or Italian 110, 120, 211 & 221, sixteen (16) hours*
- Wind and Percussion: Any foreign language 110 & 120, 10 hours

* Two years of foreign language (French, German or Italian) are required. If two years of one of the required languages have been completed at the high-school level, then the language selected will be one of the other

Bachelor of Music in Music Composition

Major status for the B.M. Music Composition degree is determined for new students (freshmen and transfer students) by the faculty through the standard admissions process. Students currently enrolled at UMKC who were accepted as majors in other programs, or students accepted into the composition class sequence as prospective composition majors, must petition the composition faculty for major status. The petition will include:

1. A portfolio of 2-3 representative scores and/or tape recordings of original work.
2. A complete list of original compositions by the petitioner.

3. Transcripts and other academic credentials.
4. A personal interview (at the discretion of the composition faculty).

Students may petition more than once, but the semester of the student's second 333 enrollment will be the last permissible attempt. Students denied admission after this semester may not petition again. Undergraduate students without composition major status are welcome to take composition classes as often as they wish, though in rare cases of full enrollment, preference may need to go to majors.

Normally, petitions will be considered during the spring semester as a part of the admissions review process for the coming year.

Maintenance of major status is required for eligibility for composition scholarships and fellowships. In order to maintain major status, two conditions must be met:

- 1) A minimum of a B- average in Music Theory classes (CONSVTY 121, CONSVTY 129A, CONSVTY 122, CONSVTY 129B, CONSVTY 221, CONSVTY 229A, CONSVTY 222A, CONSVTY 229B) must be maintained.
- 2) No grade below a B- may be received in any Composition class (CONSVTY 133, CONSVTY 134, CONSVTY 233, CONSVTY 234, CONSVTY 333, CONSVTY 433).

A student who fails to meet either or both of these conditions is considered to be on probation, and must retake classes or raise the average within one year to avoid loss of major status. If major status is revoked, it may only be reinstated by petition (as described above).

Required Courses:

See minimum core requirements

In addition to core classes, the following courses are required for the B.M. in Music Composition.

Any foreign language 110 & 120, 10 hours

Electives 6

Notes:

(a) Students majoring in composition must complete level 301 secondary in any applied area.

(b) Ensemble: Participation as a performer by enrollment in a major ensemble (other ensembles may be substituted for a major ensemble only by petition) for a minimum of four semesters is required. Four additional semesters (not necessarily major ensembles) must be fulfilled either through additional enrollment as a performer or through enrollment in CONSVTY 301G Ensemble for Composers, though a minimum of two semesters of CONSVTY 301G must be taken. It is expected that students enrolling for CONSVTY 301G more than once will observe a different ensemble or ensembles each time they enroll.

Participating ensembles include: Conservatory Orchestra, Conservatory Wind Ensemble, Conservatory Wind Symphony, Men's Chorus, Women's Chorus, Heritage Chorale, Jazz Band, Jazz Orchestra, Jazz Workshops, Canticum Novum, Musica Nova, Percussion Ensemble and Zephyr Quintet. (Others may be added as the course develops.) Course enrollment is done through the appropriate student services coordinator in the Conservatory Academic Affairs Office, but assignment of students to particular ensembles will be done by the composition faculty in consultation with ensemble directors.

Composition faculty will be responsible for communicating with conductors regarding upcoming repertoire.

(c) Successful completion of CONSVTY 310, Keyboard Skills IV, with a grade of B- or better is required.

(d) The Area of Concentration is developed by the student before the end of the freshman year (or before the end of the first semester of CONSVTY study for transfer students) with guidance and approval of the composition faculty as a part of the planned program.

Student Learning Outcomes

The Conservatory of Music and Dance aims to meet or exceed the educational standards set by the National Association of Schools of Music (NASM) for the training of undergraduate music students. To that end the Conservatory endorses the acquisition of skills in musicianship and general studies.

Musicianship:

Every musician functions to some extent as:

- Performer
- Listener
- Historian
- Composer
- Theorist
- Teacher

Therefore students are required to be exposed to and develop basic competencies in all of these areas. The content of this area includes:

- Sight-singing
- Ear-training
- Harmony
- Keyboard skills
- Counterpoint
- Orchestration/arranging
- Conducting
- Music literature
- Performance practice

Undergraduate musicianship studies focus on:

1. Conceptual understanding of musical components and processes.
2. Continued practice in creating, interpreting, presenting, analyzing and evaluating music.
3. Increasing understanding of various musical cultures and historical periods.
4. Acquiring capacities to integrate musical knowledge and skills.
5. Accumulating capabilities for independent work in the music professions.

General Studies:

Studies in other areas of human achievement are important in the education of musicians. As a result students are required to develop an awareness of basic ideas and concepts in:

- Natural and physical sciences
- Social sciences and communication
- Other areas of the arts and humanities

Students are encouraged to view the combination of musicianship and general studies as a means of developing a broad foundation for future artistic and intellectual development.

Bachelor of Music in Performance

Students seeking degrees in this program may select an emphasis area in:

- Guitar
- Organ
- Piano
- Piano pedagogy
- Jazz and studio music
- String instruments (cello, string bass, viola, and violin)
- Voice
- Wind and percussion instruments (bassoon, clarinet, euphonium, flute, horn, oboe, percussion, saxophone, trombone, trumpet, and tuba)

Guitar

1. Students must show demonstrable knowledge of all major and minor scales and arpeggios in two and three octaves.
2. Students should be able to perform selections in contrasting styles at the level of Sor, Giuliani, Carulli, etc.
3. Students must be able to sight read single-line melodies in all positions.

Jazz and Studio Music

1. Students must show demonstrable knowledge of all major and minor scales and arpeggios, in one or two octaves, etudes and solos from standard literature of the instrument, including one jazz selection from memory.
2. Membership in high school orchestra, band or jazz band is desirable.
3. Sight reading will be required.
4. An interview with the appropriate jazz faculty is required.

Organ

1. Students must show demonstrable knowledge of all major and minor scales and arpeggios at moderate tempo.
2. Students should be able to perform Bach Two-Part Inventions or the Bach Little Preludes and Fugues for Organ and a contrasting work of comparable difficulty.

Piano

1. Students must show demonstrable knowledge in all major and minor scales and tonic arpeggios, parallel motion, and four octaves in moderately rapid tempo.
2. Students should be able to perform Bach Two- and Three-Part Inventions; compositions corresponding in difficulty to Beethoven Sonata, Opus 14, No. 1; Mozart Fantasia in D Minor; Chopin Nocturne, Opus 44, No. 1; Schubert Impromptu, Opus 90, No. 4; and Debussy Arabesques.

Piano Pedagogy

1. Students must show demonstrable knowledge of all major and minor scales and tonic arpeggios, parallel motion and four octaves in moderately rapid tempo.
2. Students should be able to perform Bach Two- and Three-Part Inventions; compositions corresponding in difficulty to Beethoven Sonata, Opus 14, No. 1; Mozart Fantasia in D Minor; Chopin Nocturne, Opus 44, No. 1; Schubert Impromptu, Opus 90, No. 4; Debussy Arabesques.

Strings

1. Students must show demonstrable knowledge of all major and minor scales and arpeggios, in one or two octaves, etudes and solos from standard literature of the instrument. One piece must be performed from memory.
2. Membership in high school orchestra or band is desirable.

Voice

1. Students must be able to sing standard songs in English on pitch and with satisfactory phrasing and musical intelligence.
2. Students must demonstrate ability to read a simple song at sight and should have completed the equivalent of PIANO 123.

Winds and Percussion

1. Students must show demonstrable knowledge of all major and minor scales and arpeggios in one or two octaves, etudes and solos from standard literature of the instrument.
2. Membership in high school orchestra or band is desirable.

Bachelor of Music

The bachelor of music program is a professional baccalaureate degree program offered in performance, music composition or music theory.

Bachelor of Fine Arts

The Conservatory of Music offers a bachelor of fine arts in dance.

Student Learning Outcomes

The Conservatory of Music aims to meet or exceed the educational standards set by the National Association of Schools of Dance (NASD) for the training of undergraduate dance students. To that end students must

1. Demonstrate a basic ability in, and theoretical foundation for, ballet.
2. Demonstrate a basic ability in, and theoretical foundation for, modern dance.
3. Demonstrate basic knowledge of choreography.
4. Meet general studies requirements for the purpose of broadening their outlook on the world.

Students are encouraged to view the combination of dance and general studies as a means of developing a broad foundation for future artistic and intellectual development.

Bachelor of Fine Arts in Dance

The Dance Division curriculum reflects the career goals and employment opportunities of the undergraduate dance students. Students will be admitted to the dance program on the basis of a successful audition before the dance faculty, and a positive evaluation of their academic credentials and physical fitness. Student progress in the dance program will be evaluated by the dance faculty each semester during training.

Students are admitted provisionally until they are approved for their major, based on the evaluation and recommendation of the dance faculty.

Eligibility and Assessment Criteria

1. Students auditioning for acceptance at the freshman level must demonstrate a basic ability in, and theoretical foundation for, dance training.
2. At the completion of the second semester of the freshman year, students may advance to the next technical level in ballet and/or modern dance on the basis of a juried examination and assessment by the dance faculty.
3. Students not advancing to the next technical level in ballet and/or modern dance will be required to repeat their present level. This is only inclusive of the 100 technique level and the 200 technique level in ballet and modern. Students are allowed to repeat a technical level for one year or two semesters. If unsuccessful advancement occurs, students will be advised to change their major.
4. When a student has met the proficiency standards at the completion of the sophomore year through a juried examination and at the recommendation of the dance faculty, the student may petition for declaration of a major and minor area of emphasis in ballet or modern dance.

5. Following acceptance by the dance faculty, a student will be expected to achieve a fourth-year level of technical proficiency in the major area of emphasis and achieve a third-year level of technical proficiency in the minor area of emphasis.
6. Dance majors must maintain a B average in all dance technique classes and an overall combined 3.0 GPA in all dance courses.
7. All BFA candidates must perform in at least one main stage dance concert during the four years of study with the Dance Division. There are two main stage concerts per year - the Fall Dance Concert and the Spring Dance Concert. This does not include senior recitals. A program of one main stage concert shall be submitted by the candidate to the Conservatory dance advisor for record.
8. Upon completion of all degree requirements, and a satisfactory evaluation by the dance faculty of the senior recital, a student may submit application for graduation.
- 9.

Program Prerequisites

1. Students applying for the dance program must have previous training in ballet and/or modern dance.
2. Applicants will be admitted, upon approval of the dance faculty, following mandatory auditions by the students.

* A senior recital is required. The recital must consist of two different dance forms studied in the four years of coursework, including one solo and one group work choreographed by the student. Further senior recital requirements are contained in the CONSVTY dance student handbook. Throughout their programs of study, all dancers are expected to maintain general physical fitness and dance aesthetic as prescribed by the dance faculty. Health and dance aesthetic requirements, and many other details, are contained in the Conservatory Dance Student Handbook that is furnished to all dance students.

Bachelor of Arts in Music

The bachelor of arts in music degree program recognizes students' diverse interests and the shifting vocational market. This program of study offers students great flexibility in designing programs that emphasize their musical strengths, as well as their abilities in other fields. The Conservatory's bachelor of arts in music degree requires a minimum of 129 credit hours of study. Fifty-four credit hours will be in music, including music theory and history, applied music, ensemble, listening laboratory and electives. There are approximately 48 credit hours required in the field of biological, physical and social sciences, and the humanities. A secondary specialty area, known as an area of concentration, requires approximately 15-18 credit hours from a block of 27 credit hours of electives.

Students accepted into the Conservatory's bachelor of arts music program have great freedom in designing individual programs of study around their musical training. They may take courses in such areas as business, communications, English, theater, computer science, foreign languages and music therapy, which may lead to a double-major degree.

Student Learning Outcomes

The Conservatory of Music and Dance aims to meet or exceed the educational standards set by the National Association of Schools of Music (NASM) for the training of undergraduate music students. To that end the Conservatory endorses the acquisition of skills in musicianship and general studies.

Musicianship:

Every musician functions to some extent as:

- Performer
- Listener
- Historian

- Composer
- Theorist
- Teacher

Therefore students are required to be exposed to and develop basic competencies in all of these areas. The content of this area includes:

- Sight-singing
- Ear-training
- Harmony
- Keyboard skills
- Counterpoint
- Orchestration/arranging
- Conducting
- Music literature
- Performance practice

Undergraduate musicianship studies focus on:

1. Conceptual understanding of musical components and processes.
2. Continued practice in creating, interpreting, presenting, analyzing, and evaluating music.
3. Increasing understanding of various musical cultures and historical periods.
4. Acquiring capacities to integrate musical knowledge and skills.
5. Accumulating capabilities for independent work in the music professions.

General Studies:

Studies in other areas of human achievement are important in the education of musicians. As a result students are required to develop an awareness of basic ideas and concepts in:

- Natural and physical sciences
- Social sciences and communication
- Other areas of the arts and humanities

Students are encouraged to view the combination of musicianship and general studies as a means of developing a broad foundation for future artistic and intellectual development. While broadly interacting with general studies courses, students in this degree program are encouraged to develop an "area of concentration" which represents a deeper knowledge of an area outside of music.

Total Hours	75

Music Therapy Emphasis Area Prerequisites

Additional Admission Criteria

1. Students should be able to qualify for CONSVTY 101, Applied Study for Freshman, for two hours of credit in their major performance area.
2. Students should have enough proficiency at the piano to play popular songs and church hymns, and to harmonize simple folk songs. The ability to play by ear is useful.
3. Emotional stability and good physical stamina are also essential for a music therapist.
4. Applicants are required to complete an interview with a music therapy faculty member prior to admission.

Retention

In order to continue in the B.A. in music therapy degree program, a minimum 3.0 cumulative average in CONSVTY 128, CONSVTY 180 and CONSVTY 130 is required by the end of the student's first year as a music therapy major. A student who fails to do so is considered to be on probation, and must retake the class or classes that caused the GPA to be under 3.0. The grade from the second taking of a class will supersede the grade for the first taking of a class when figuring the 3.0 minimum requirement.

Licensure

Graduates may apply for membership by contacting the American Music Therapy Association (AMTA). For Board Certification, graduates may contact the Certification Board for Music Therapy (CBMT). All coursework must be completed before beginning CONSVTY 410 Conservatory Experience. Therapy students are required to enroll in a professional liability insurance program.

Bachelor of Music Education

Completion of the bachelor of music education (BME) degree at UMKC fulfills the course requirements to teach music in grades K-12 (elementary general music and secondary vocal or instrumental music) in both Missouri and Kansas.

Following the adopted guidelines of the recognized accrediting agencies in music (NASM) and teacher education (NCATE), the BME program of study prepares future music educators. The faculty of the Music Education/Music Therapy Division believes that the best preparation for teaching is the completion of all courses in the undergraduate music education curriculum. Therefore, all students seeking UMKC endorsement for teacher certification through the Conservatory of Music and Dance must satisfy the course requirements of the bachelor of music education degree. Before being provisionally admitted into the music teacher education course sequence, students must:

1. Pass the C-BASE examination and
2. Submit an acceptable application to the School of Education by the end of the sophomore year.

The Conservatory of Music and Dance offers a bachelor of music education degree with an emphasis in choral music, instrumental music or music therapy.

Application and Audition Requirements

Music Education majors are expected to display those personal characteristics and professional qualities possessed by effective teachers. Applicants audition in their applied performance area and are interviewed by the music education faculty to determine their admission to this program. Applications for admission to the UMKC Conservatory of Music and Dance are reviewed by both the Applied and the Music Education faculties. Applicants must demonstrate facility in their applied performance area and a strong academic record in addition to well-defined attitudes and goals toward music in elementary and secondary education (see fitness-to-teach).

1. Students must have an ACT score of 21 or higher, or be at the 50 percentile or higher in the high school class rank, or have a high school grade-point average of 2.5 or better
2. Applicants should complete an interview with a music education faculty member prior to admission.
3. Students who do not achieve these standards (listed above) may be considered for admission, but must meet the standards listed below to progress through the degree.

Expectations for Degree Progression and Retention

Complete 201 and be admitted into 202 in the applied area of study.

Complete CONSVTY 223 or complete CONSVTY 310, Keyboard Skills IV, with a grade of B- or better.

Compile a GPA of at least 2.8 overall and/or 3.0 GPA in music.

Must maintain a combined GPA of at least 2.75 in music theory and ear training classes.

Before the student teaching semester the student:

Must complete a 30-minute public recital and 401.

Must complete CONSVTY 310, Keyboard Skills IV, with a grade of B- or better.

Must maintain an overall GPA of at least 2.8 with a 3.0 in music and a 3.0 in music methods (128, 385 and 386/387).

The Music Education faculty expects music education students to exhibit those characteristics appropriate for effective teaching throughout the program and to make satisfactory progress toward the degree.

Other specific retention criteria are as follows:

1. Be in good standing, free from academic, disciplinary, or music probation;
2. Maintain the following grade point averages:
 - a. Minimum cumulative GPA for all coursework is 2.80.
 - b. Minimum cumulative GPA for all music coursework is 3.00.
 - c. All required music courses must be completed with C or better.

Evaluation of student progress occurs each semester through an audit and advising system in the Music Education Division. In addition, the progress of all students is reviewed at the completion of the sophomore year by the entire Music Education faculty in order to determine admission to the teacher education track.

Fitness to Teach

Upon being admitted to the teacher education track, the Conservatory and the School of Education have a process in place to assure that all teacher candidates will be assessed throughout their program according to “Fitness to Teach” criteria (the Fitness to Teach Checklist/Referral Form is available from the Music Education Faculty). Additional criteria include:

1. Completed criminal background history review.
2. Meeting academic requirements, including scholastic integrity and good communication skills.
3. Exhibiting personal and professional behaviors, such as appropriate social and interpersonal skills and appropriate dress for professional contexts.
4. Demonstrating appropriate cultural and social attitudes and behavior, including respect for diversity and acceptance of and accommodations for exceptional learners
5. Demonstrating appropriate emotional and cognitive dispositions, such as sound judgment and reflective and analytical thinking.

All teacher candidates will be reviewed semi-annually in the form of aggregated Fitness to Teach Checklist/Referral Form data. Patterns of concern identified in the review may result in a formal review process. Additionally, faculty may choose to refer a teacher education candidate for review at any time by completing the Fitness to Teach Checklist/Referral Form. The review process may result in remediation or removal from the Teacher Education program.

Candidates referred for review are expected to participate in the process. Refusal to participate will not terminate the process and may result in removal from the program.

Any teacher candidate referred for review is afforded due process throughout the review proceedings. After all stages of review, a letter of appeal may be submitted to the dean for consideration. The dean’s decision is final

Field Experience and Student Teaching

Undergraduates begin their final field placement during the fall semester of their final year. Students are assigned to an elementary and secondary school with a cooperating teacher who supervises and mentors them. Students continue in these placements for student teaching during their final semester of the degree. Students are assigned to a school with a master teacher who supervises and mentors them throughout a complete quarter of teaching.

Student teaching, under the guidance of a cooperating teacher and a university supervisor, is the culmination of this program. To be eligible for a student teaching assignment, students must meet the following requirements:

1. Satisfy the retention criteria described above.
2. Have removed all unsatisfactory grades from their records (I, F, etc.).
3. Have successfully passed the Piano Proficiency Examination.
4. Have completed all required course work except student teaching.
5. Have passing scores for Praxis examinations (as specified by Missouri and Kansas).

A student will not be recommended for graduation who has, in the opinion of the Music Education faculty, failed to demonstrate acceptable characteristics and competencies. Upon successful completion of the Music Education program, students are eligible for preK-12 music certification in Missouri and Kansas.

Double Majors

A student who is approved by the faculty for the major in Performance will complete the requirements in both Music Education and Performance. This program is a composite of both programs of study, and may require an additional year of study.

Student Learning Outcomes

The Conservatory of Music and Dance aims to meet or exceed the educational standards set by the National Association of Schools of Music (NASM) and the National Council for the Accreditation of Teacher Education (NCATE) for the training of undergraduate music students. To that end the Conservatory endorses the acquisition of skills in musicianship, education, and general studies.

Musicianship:

Every musician functions to some extent as:

- Performer
- Listener
- Historian
- Composer
- Theorist
- Teacher

Therefore students are required to be exposed to and develop basic competencies in all of these areas. The content of this area includes:

- Sight-singing
- Ear-training

- Harmony
- Keyboard skills
- Counterpoint
- Orchestration/arranging
- Conducting
- Music literature
- Performance practice

Undergraduate musicianship studies focus on:

1. Conceptual understanding of musical components and processes.
2. Continued practice in creating, interpreting, presenting, analyzing, and evaluating music.
3. Increasing understanding of various musical cultures and historical periods.
4. Acquiring capacities to integrate musical knowledge and skills.
5. Accumulating capabilities for independent work in the music professions.

Education:

The UMKC Teacher Preparation program seeks to prepare teachers who:

- Have a strong liberal arts education and who are well-grounded in their content field(s).
- Demonstrate the development of pedagogic skills.
- Possess a professional and caring commitment to education.

Program goals are based on a set of key principles and express knowledge, skills and dispositions. These goals reflect the current knowledge base of teacher education as well as a commitment to the preparation of teachers who will be able to practice in schools as they are, and schools as they might be.

Program Goals:

1. The beginning teacher understands the discipline(s) he or she will teach and can create learning experiences that make these aspects of the subject matter meaningful to students.
2. The beginning teacher is able to engage in long range planning and curriculum development and evaluation based upon district, state and national performance standards.
3. The beginning teacher understands how children learn and develop, and can provide opportunities that support their intellectual, social and personal development.
4. The beginning teacher understands and respects students' differences and creates instructional opportunities that are adapted to diverse learners.
5. The beginning teacher is able to use a variety of instructional strategies to encourage learners' development of critical thinking, problem solving and process skills.
6. The beginning teacher creates a productive learning environment through the use of individual and group motivation that encourages positive social interaction, active engagement in learning, and self-motivation.
7. The beginning teacher models effective communication techniques (verbal, non-verbal, media, etc.) and facilitates student communication, collaboration and supportive interaction in the classroom.
8. The beginning teacher understands and uses formal and informal assessment strategies to evaluate and ensure the continuous intellectual, social, emotional and physical development of the learner

9. The beginning teacher is a reflective practitioner who continually evaluates the effects of his/her choices and actions on others and actively seeks opportunities to grow professionally.
10. The beginning teacher fosters relationships with school colleagues, parents and educational partners in the larger community to support student learning and wellbeing.
11. The beginning teacher understands theories and applications of technology in educational settings and has adequate technological skills to create meaningful learning opportunities for all students.

General Studies:

Studies in other areas of human achievement are important in the education of musicians. As a result, students are required to develop an awareness of basic ideas and concepts in:

- Natural and physical sciences
- Social sciences and communication
- Other areas of the arts and humanities

Students are encouraged to view the combination of musicianship and general studies as a means of developing a broad foundation for future artistic and intellectual development.

Bachelor of Music Education Emphasis Areas

The Conservatory of Music and Dance offers a bachelor of music education degree with an emphasis in choral music, instrumental music or music therapy.

Bachelor of Music Education - Choral and Instrumental Emphasis Areas

Students pursuing a BME with an Instrumental or Choral Emphasis may also receive an additional state certificate in their non-primary area by completing the following requirements:

Instrumental BME with Choral Certificate

a. Instrumental Music K12 Certificate	
b. Choral Arranging	2
c. Applied Voice	4
d. Choral Techniques	2
e. Advanced Choral Conducting	2
f. Choral Literature	2
g. Choral Ensemble	2
Minimum Total Hours	14

Choral BME with Instrumental Certificate

a. Choral Music K2 Certificate	
b. Methods/Techniques (strings, bass, woodwinds, percussion)	6
c. Applied Major Instrument	2
d. Instrumental Ensemble	2

e. Advanced Instrumental Conducting	2
f. Instrumentation/Arranging	2
Minimum Total Hours	14

CONSVTY 412A/ CONSVTY 412B Student Teaching Music (d)

Required General Studies Courses ENGLISH 110 and ENGLISH 225 COMM-ST 110 Biology with lab Physical Science or Acoustics CONSVTY 424

MATH 110 OR MATH 116 HISTORY 101 OR HISTORY 102 POL-SCI 210 PSYCH 210 TCH-ED 427 TCH-ED 403 TCH-ED 404 TCH-ED 420 TCH-ED 419 / TCH-ED 437

(a) A 30-minute recital is required. Applied studies requirement: the performance area may be in any area which carries applied music study numbers through 401. Those students majoring in a performing area other than an orchestral instrument must complete 202 level on an orchestral instrument and be admissible to band or orchestra.

(b) String students must complete seven semesters of major ensemble. Wind and percussion students must complete six semesters of major ensemble.

(c) Wind and Percussion students will complete a semester each of the following: woodwind, brass, percussion, and CONSVTY 373P Survey of String Instruments. String students will

complete a semester of the following: woodwind, brass, percussion, and CONSVTY 373A String Techniques Lab plus two more hours at the 101 level (minimum) on the other instrument in their specialty area (i.e.: violin students take viola, cello students take double bass).

(d) Two seven-credit-hour experiences divided between the Conservatory and School of Education provide certification in Music K-12.

Bachelor of Music Education - Music Therapy Emphasis

This program is currently on inactive status.

Teacher Certification:

(see Bachelor of Music Education procedures)

Therapy Certification:

Graduates may apply for membership by writing to the American Music Therapy Association (AMTA). For Board Certification, graduates may write to the Certification Board For Music Therapy (CBMT). All coursework must be completed before beginning CONSVTY 410 Clinical Experience. Therapy students are required to enroll in a professional liability insurance program.

- Prerequisites
Students must have an ACT score of 21 or higher, or be at the 50th percentile or higher in the high school class rank, or have a high school grade-point average of 2.5 or better.
-
- Applicants should complete an interview with a music therapy faculty member prior to admission.
-
- Students who do not achieve these standards (listed above) may be considered for admission, but must meet the standards listed below to progress through the degree.
Retention

Before starting the junior year:

Complete 201 and be admitted into 202 in the applied area of study.

Complete CONSVTY 223 or complete CONSVTY 310, Keyboard Skills IV, with a grade of B- or better.

Compile a GPA of at least 2.8 overall and/or 3.0 GPA in music.

Complete CONSVTY 260, Clinical Foundations of Music Therapy.

Maintain a combined GPA of at least 2.75 in music theory and ear training classes.

Before the student teaching/internship year the student must:

Maintain an overall GPA of at least 2.8, with a 3.0 in music and a 3.0 in music methods classes (128, 385, 386/387) and therapy core classes (CONSVTY 130, CONSVTY 180, CONSVTY 210, CONSVTY 260, CONSVTY 406, CONSVTY 408, CONSVTY 409).

Complete CONSVTY 310, Keyboard Skills IV, with a grade of B- or better.

(a) A 30-minute recital is required. Applied study requirement (choose one): 1. Voice, 14 hours; 2. Piano, 14 hours; voice (must complete at least 202), eight hours. 3. Organ or guitar, 14 hours; voice (must complete at least 202) eight hours.

- (b) All students whose applied area is voice are required to participate satisfactorily in two opera productions as assigned by the choral faculty in consultation with voice and opera faculty.
- (c) Two seven-credit-hour experiences divided between the CONSVTY and School of Education provide certification in Music K-12.

Bachelor of Music Certification Procedures
Certification Procedures

Upon completion of the bachelor of music education degree, students must initiate the application for Missouri and Kansas certification in the Student Services Office of the School of Education. Applications should be filed during the student teaching semester. Certification is not automatic. Elementary and secondary student teaching are required for the K-12 certificate. All prospective teachers must take and receive a satisfactory score on the following tests for state certification:

For Missouri certification, students must receive a satisfactory score on the Praxis II professional knowledge. For Kansas certification, students must receive satisfactory scores on the Pre-Professional Skills Test (PPST) in reading, writing and mathematics, and the Praxis II core test.

History

In 1973-74, a graduate nursing program was started under the aegis of the School of Graduate Studies. On Nov. 16, 1979, the Board of Curators approved a proposal to establish a school of nursing at the University of Missouri-Kansas City. In 1981, following a developmental period, two new curricula were implemented. These were an upper-division baccalaureate degree for registered nurses and a revised master's degree program for clinical nurse specialists. In 1992, the Board of Curators approved the offering of an inter-campus, cooperative doctoral program in nursing (Ph.D. N.D.). The doctoral curricula was implemented on the Kansas City campus in the Fall Semester of 1995. In 2000, the Board of Curators approved the offering of a pre-licensure baccalaureate degree program beginning in the Fall Semester of 2001. The Board of Curators approved the Doctoral of Nursing Practice (DNP) program which began in 2007 and graduated its first post-master's class in December 2008. The newest program in the School of Nursing is the Bachelor of Health Sciences (BHS), which received final approval and began enrolling students in the fall of 2011.

Accreditation

The baccalaureate, master's, and DNP programs at UMKC are accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Academic Programs Offered

Please visit the School of Nursing's website at www.umkc.edu/nursing for more specific program information and plans of study for the following programs.

Bachelor of Science in Nursing

- Accelerated Track (for students with a previous bachelor's degree) (72 credit hours)
- Pre-licensure Track (128 credit hours)
- RN-BSN Track (120 credit hours)

Master of Science in Nursing

- Adult Nurse Practitioner (42 credit hours)
- Family Nurse Practitioner (42 credit hours)
- Neonatal Nurse Practitioner (43 credit hours)
- Nurse Educator (41 credit hours)
- Pediatric Nurse Practitioner (43 credit hours)
- Women's Health Nurse Practitioner (42 credit hours)

BSN to DNP (74 credit hours) Beginning Summer Semester 2013, the ANP, FNP, PNP and WHNP will move from the Master of Science in Nursing to the Doctorate of Nursing Practice degree. Visit our website for specific information and applications will be due for this program January 15th of each year.

BSN to PhD (73 credit hours)

Nurse Educator Post Master's Certificate Program (12 credit hours)

Doctorate in Nursing Practice (post master's) (31 credit hours)

PhD in Nursing (61 credit hours)

Facilities

The University of Missouri-Kansas City has extensive educational facilities on the Volker campus combined with the health care educational facilities and main office on the Hospital Hill campus. These include libraries, resource centers, audiovisual resources, data processing and science information specialists. The affiliated clinical facilities include Truman Medical Center, Children's Mercy Hospital and nearly 100 community-wide facilities in the Kansas City metro area.

Admissions

The Office of Admissions is located in room 120, Administrative Center, 5115 Oak St. All applicants should complete the UMKC application for admission. Applications and transcripts should be mailed to the UMKC Office of Admissions, 120 Administrative Center, 5100 Rockhill Road, Kansas City, MO 64110-2499. Go to <http://www.umkc.edu/admissions/>

The School of Nursing recommends that applicants check the School of Nursing website, specifically undergraduate and graduate degree programs, to access supplemental materials

requested for application and to look at application deadline dates. Deadlines mean that all application materials should have been received. Applications received after these dates may or may not be reviewed depending on available space.

Once admitted, all official University communication is conducted via UMKC e-mail.

Financial Assistance

The School of Nursing offers a range of scholarships, traineeships and other funds for both full- and part-time graduate and undergraduate nursing students. Students who complete the Free Application for Federal Student Aid (FAFSA) are eligible for the following:

- Brisley Phillips Scholarship
- Chuck and Glo Curtis Scholarship
- Claudene L. Iwig Scholarship
- General Hospital Memorial Scholarship
- Goppert Scholarship
- Helen Blond Scholarship
- John S. Waggoner Memorial Nursing Scholarship
- Laura Larkin Dexter Scholarship
- RN - BSN Scholarship
- Susie Sinton Scholarship

Other funds may be available for students demonstrating financial need. Applications for nursing scholarships are considered after submission of the FAFSA. Priority deadline for that submission is March 1. Further information about applications and qualifications for any of these funds may be obtained from the School of Nursing Student Services Office, room 1410, 2464 Charlotte Street, Kansas City, MO 64108-2718.

International Students

The School of Nursing coordinates recruitment, retention and continuing advisement for nursing students from abroad in cooperation with the University's Office of International Student Affairs. In addition to the English proficiency examination (TOEFL), all graduates of foreign schools of nursing must complete the Commission on Graduates of Foreign Nursing Schools (CGFNS) qualifying examinations. This will enable registered nurses applying to the School of Nursing to take the National Council Licensure Examinations (NCLEX) for licensure as a registered nurse in Missouri. Students who are registered nurses must also send official transcripts to the CGFNS to determine degree equivalencies. Information about specific requirements for admission and progression may be obtained from the School of Nursing Student Services Office. The School of Nursing retains the right to assess the level of current clinical skills prior to enrollment in clinical coursework.

Organizations

Student Nurses Association

Membership in the Student Nurses Association (SNA) is automatic for all students admitted to and enrolled in the School of Nursing's degree programs. Students admitted into pre-nursing are encouraged to attend all meetings. Officers and representatives to the school's standing committees are elected annually. Council meetings and special events are held periodically throughout the academic year.

Sigma Theta Tau International, Lambda Phi Chapter

This international nursing honor organization is designed to recognize and encourage superior scholarship and leadership achievements in nursing. Students are eligible for consideration as junior and senior undergraduate students and as continuing graduate students. Membership, based on integrity and scholarship, is by invitation only. The induction of new members is held each spring.

Nursing Alumni Association

All students at the School of Nursing qualify for membership in the Nursing Alumni Association. Objectives of the alumni association are to provide mentoring to the student body and garner support for the school. Meetings are held periodically and officers are elected each spring by the Nursing Alumni Board.

Program Changes

The School of Nursing reserves the right to make changes in courses, degree requirements and course schedules without notice.

Academic Regulations in the School of Nursing

Nursing students are expected to be familiar with policies and procedures specific to their level of study and to review these each semester for updates and changes. These can be found in the UMKC General Catalog and in the School of Nursing's Policies and Procedures manual, which can be found at <http://nursing.umkc.edu/documents/our-school/policy-procedure.pdf>. Students must also be familiar with the Nursing Honor Code found at <http://nursing.umkc.edu/documents/our-school/honor-code.pdf>.

Academic and Professional Behavior

Students in the School of Nursing abide by the University of Missouri Student Conduct Code (listed in the appendices of this catalog) and by the School of Nursing Honor Code . The Standards of Professional and Ethical Behavior detailed in the honor code have been developed to guide students who are enrolled at all levels with the UMKC-SON, including undergraduate and graduate students, and are designed to assure accountability for the professional and ethical standards of the nursing profession. /

Nurse Educator Certificate

This post-master's professional certificate program will prepare nurse educators to employ cutting-edge teaching strategies in the didactic and clinical setting, synthesize teaching/learning theories, and acquire skills in curriculum development. Clinical Practicum objectives include the student's ability to provide didactic and clinical instruction within the academic setting. Hands-on experience in objective writing, teaching, clinical instructing, test writing and student management are offered through educational experiences provided by master educators.

Completion of the program meets the educational requirements to be eligible for the NLN CNE Certification Exam. There are four courses required for the program with a total of 12 credit hours. All courses must be completed within three years.

Note: Students are responsible for arranging their clinical preceptor and site for the Practicum course. It is the student's responsibility to maintain clinical eligibility to practice during the program. It is recommended that the student become comfortable in the clinical setting in preparation for Practicum.

Program Admission Requirements

In addition to the admission requirements for UMKC, the requirements for admission into the NEC program are:

- MSN from an accredited nursing program
- Submission of current resume or curricula vitae
- Copy of current licensure as a registered nurse with licensure in the jurisdiction where clinical study is to be conducted

The Post-Master's NE Certificate Program Courses

- NURSE 5515NE Preparing Nurse Educators (3 credit hours)
- NURSE 5516 Curriculum Development (3 credit hours)
- NURSE 5517 Teaching Strategies (3 credit hours)
- NURSE 5572NE Synthesis Practicum for Nurse Educators (3 credit hours - Preceptorship Course)

Master of Science in Nursing (M.S.N.)

Graduates of the M.S.N. Program will be prepared to:

1. Demonstrate advanced knowledge, values and skills in a selected area of nursing.
2. Demonstrate advanced knowledge, collaboration values and skills in a selected functional role.
3. Apply the process of systematic inquiry (research) to validate and expand nursing practice.
4. Integrate theory and research into advanced nursing practice.

Students have the option to attend full-time or part-time. Nurse practitioner students choosing to attend full-time must begin in a summer semester.

Core Courses required of all students:

NURSE 5526 Health Promotion (3)
NURSE 5527 Cultural Diversity & Ethics (3)
NURSE 5528 Policy, Politics & Professional Ethics in Healthcare (3)
NURSE 5550 Theoretical Foundations In Nursing (3)
NURSE 5555 Nursing Research: Evidence-based Practice (3)
NURSE 5598 Directed Research (3)

Additional Courses required for specific tracks:

Adult, Family, Family Psychiatric Mental Health, and Women's Health Nurse Practitioner Tracks:

NURSE 5548 Advanced Pathophysiology (3)
NURSE 5549 Pharmacology for Advanced Nursing Practice (3)
NURSE 5546 Foundations of Family Psychiatric Nursing Advanced Practice (2)
NURSE 5547 Diagnostic Reasoning/Advanced Assessment (4)
NURSE 5564 Primary Care I Courses (5)
NURSE 5566 Primary Care II Courses (4)
NURSE 5572 Advanced Nursing Practice: Synthesis Practicum (5)

Neonatal Nurse Practitioner Track:

NURSE 5548N Physiology/Pathophysiology of the Neonate (3)
NURSE 5549N Pharmacology for the Neonate (3)
NURSE 5547N Advanced Assessment of the Neonate (3)
NURSE 5564N Neonatal Nursing I (3)
NURSE 5566N Neonatal Nursing II (3)
NURSE 5572NI Preceptorship I (5)
NURSE 5572II Preceptorship II (5)

Pediatric Nurse Practitioner Track:

NURSE 5508 Advanced Growth & Development (1)
NURSE 5509 Technology Foundations of Advanced Practice (1)
NURSE 5547C Diagnostic Reasoning/Advanced Assessment (4)
NURSE 5548C Advanced Pediatric Pathophysiology (3)

NURSE 5549C Pediatric Pharmacology for Advanced Nursing Practice (3)
NURSE 5564C Primary Care of Children (4)
NURSE 5566C Chronic Child Health Care (4)
NURSE 5572 Advanced Nursing Practice: Synthesis Practicum (5)

Nurse Educator Track:

NURSE 5515NE Preparing Nurse Educators (3)
NURSE 5516 Curriculum Development (3)
NURSE 5517 Teaching Strategies (3)
NURSE 5547NE Health Assessment & Clinical Reasoning for Nurse Educators (3)
NURSE 5548 Advanced Pathophysiology (3)
NURSE 5564NE Clinical for Nurse Educators (5)
NURSE 5572NE Synthesis Practicum for Nurse Educators (3)

Doctor of Nursing Practice Program

Student Learning Outcomes

Graduates of the DNP program will be prepared to:

1. serve as leaders in nursing and health care.
2. demonstrate advanced knowledge, values, and skills in a selected area of nursing.
3. demonstrate advanced knowledge, values, and skills in a selected functional role.
4. synthesize theory, research knowledge and methods to create, implement, and evaluate
 - a. practice interventions,
 - b. health delivery systems,
 - c. clinical teaching.

Program Requirements

Pre-Requisite Coursework:

NURSE 5550 Theoretical Foundations in Nursing (3)

NURSE 5555 Nursing Research: Evidence-Based Practice (3)

NURSE 5612 Statistics I or Graduate Level Statistics Course (3)

Core Coursework:

Summer I

NURSE 5602 Healthcare Systems & Leadership (3) and four days on-site

Fall I

NURSE 5608 Theory I (3)

NURSE 5664 Concepts & Approaches of Epidemiology

Spring I

NURSE 5606 Policy & Advocacy (3)

NURSE 5611 Healthcare Economics & Quality (3)

NURSE 5613 Application of Evidence-based Practice (3)

Summer II

NURSE 5617 Application of Evidence-Based Practice II - DNP Clinical and a 2-4 day site visit

Fall II

NURSE 5620 Advanced Practice V (5) - DNP Clinical

Spring II

NURSE 5624 Clinical Capstone (5)

Ph.D. in Nursing

Program Objectives

The nurse scholars prepared in this program will:

- Serve as leaders in nursing and health care.
- Function as nurse scientists to advance the body of knowledge that guides the practice of nursing and contributes to interdisciplinary knowledge.

Program Requirements

BSN-PhD/Pre-requisite Coursework:

NURSE 5527 Cultural Diversity & Values (3)

NURSE 5528 Policy, Politics & Ethics (e)

NURSE 5550 Theoretical Foundations in Nursing (3)

NURSE 5555 Nursing Research: Evidence-based Practice (3)

Core Coursework:

NURSE 5603 Research Institute I (2)

NURSE 5604 Research Institute II (2)

NURSE 5608 Theory Development I (3)

NURSE 5610 Theory Development II (3)

NURSE 5612 Statistics I (3)

NURSE 5622 Statistics II (3)

NURSE 5631 Substantive Seminar: Health Promotion (3)

NURSE 5662 Psychometrics (3)

NURSE 5668 Quantitative Research Methods (3)

NURSE 5664 Concepts & Approaches of Epidemiology & Statistics in Research (3)

NURSE 5670 Qualitative Research (3)

NURSE 5666 Designing Research (3)

NURSE 5697B Ethics/Responsible Conduct of Research (3 one-hour courses)

Collateral Coursework (12)

NURSE 5699 Dissertation (12)

Bachelor of Science in Nursing

Upon graduation the B.S.N. student will:

1. incorporate knowledge from arts, humanities and sciences in the planning and provision of professional nursing care.
2. demonstrate Personal Effectiveness as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Critical Thinking, Professional Valuing/Caring, and Professional Role Development.
3. demonstrate Interpersonal Effectiveness as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Communication, Teaching/Learning, and Technology Utilization.
4. demonstrate Effectiveness in Human Health Outcomes as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Health Promotion and Disease Prevention and Evidence-Based Care.
5. demonstrate Effectiveness Within Complex Health Systems as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Leadership/Management, Global Perspectives, and Health Care Systems and Policy.

Baccalaureate Nursing Education

Baccalaureate nursing education is designed to prepare a nurse generalist who demonstrates responsibility, accountability and critical thinking. The nurse generalist uses a comprehensive approach to health care and can meet diversified health concerns of individuals, families and communities at all stages of development. The University of Missouri-Kansas City offers an innovative program in the management of health. There are three tracks available to complete a Bachelor of Science in Nursing: Pre-licensure track, Accelerated track (for students who already have a bachelor's degree), and RN-BSN track (for students who are already RN's and want to get their B.S.N.).

Pre-Licensure Program Requirements

A sample course of study for a full-time pre-licensure track B.S.N. student is listed below. Students must maintain a minimum grade of C in all nursing coursework as well as carry a minimum semester GPA of 2.75. See specific course requirements at the School of Nursing website.

Fall Semester Year 1 (18 hours)

A&S 100 Methodologies for Pre-Health (3)
NURSE 101 Introduction to Nursing (2)
NURSE 120 Anatomy and Physiology I (4)
ENGLISH 110 English I (3)
MATH 110 College Algebra (3)
LS-MCRB 112 Microbiology and Man (3)

Spring Semester Year 1 (18 hours)

Apply to Clinical Major

CHEM 115 Chemistry (4)

CHEM 115L Chemistry Lab (1)

NURSE 160 Anatomy and Physiology II (4)

PSYCH 210 General Psychology (3)

POL-SCI 210 American Government (3)

ENGLISH 225 English II (3)

Complete WEPT (or complete Summer Year 1)

Fall Semester Year 2 (18 hours)

Fine Arts Humanities Elective (3)

NURSE 127 Drug Calculations (1)

NURSE 230 Health Issues in Aging (2)

NURSE 220 Fundamental Concepts and Skills (6)

NURSE 250 Health Assessment (3)

NURSE 395 Pathophysiology (3)

Spring Semester Year 2 (17 hours)

CHEM 206 Nutrition (3)

NURSE 252 Human Growth and Development (3)

NURSE 256 Pharmacology (3)

NURSE 262 Management of Adult Health (5)

Writing Intensive Course (3)

Fall Semester Year 3 (16 hours)

PHILOS 210 OR PHILOS 221 or PHILOS 222 (3)

NURSE 342 Legal and Ethical Issues (2)

NURSE 345 Quantitative Analysis in the Health Sciences (3)

NURSE 364 Management of Maternal and Family Health (eight weeks) (4)

NURSE 366 Management of Child and Adolescent Health (eight weeks)(4)

Spring Semester Year 3 (15 hours)

NURSE 356 Applied Spanish for Health Care Pre-Professionals (3)

NURSE 360 Management of Mental Health (4)

NURSE 362 Management of Adult Health II (5)

NURSE 476 Scientific Inquiry (3)

Fall Semester Year 4 (14 hours)

Social-Political Elective (3)

Nursing Elective (2)

NURSE 465 Management of Community Health Nursing (4)

NURSE 467 Management of Critical and Emergent Care (5)

Spring Semester Year 4 (12 hours)

NURSE 462 Special Topics in Health Care (2)
NURSE 468 Effectiveness in Complex Health Systems II (5)
NURSE 472 Clinical Internship (5)

Accelerated Program Requirements

Students in this track must already have a bachelor's degree. A sample course of study for a full-time accelerated B.S.N. student is listed below. Students must maintain a minimum grade of C in all nursing coursework as well as carry a minimum semester GPA of 2.75. See specific course requirements at the School of Nursing website.

Pre-requisite Coursework (22 hours) (Sciences must be no more than five years old at program start in a fall semester)

NURSE 120 Anatomy and Physiology I (4)
NURSE 160 Anatomy and Physiology II (4)
LS-MCRB 112 Microbiology and Man (3)
CHEM 206 Nutrition (3)
CHEM 115 Chemistry (4)
CHEM 115L Chemistry Lab (1)
NURSE 252 Human Growth and Development (3)

Fall Semester Year 1 (16 hours)

NURSE 127 Drug Calculations (1)
NURSE 220 Fundamental Concepts and Skills (6)
NURSE 250 Health Assessment (3)
NURSE 345 Quantitative Analysis in the Health Sciences (3)
NURSE 395 Pathophysiology (3)

Spring Semester Year 1 (16 hours)

NURSE 262 Management of Adult Health (5)
NURSE 256 Pharmacology (3)
NURSE 364 Management of Maternal and Family Health (eight weeks) (4)
NURSE 366 Management of Child and Adolescent Health (eight weeks)(4)

Summer Semester Year 1 (12 hours)

NURSE 360 Management of Mental Health (4)
NURSE 362 Management of Adult Health II (5)
NURSE 476 Scientific Inquiry (3)

Fall Semester Year 2 (13 hours)

NURSE 230 Health Issues in Aging (2)
NURSE 342 Legal and Ethical Issues (2)
NURSE 465 Management of Community Health Nursing (4)
NURSE 467 Management of Critical and Emergent Care (5)

Spring Semester Year 2 (12)

NURSE 462 Special Topics in Health Care (2)

NURSE 468 Effectiveness in Complex Health Systems II (5)

NURSE 472 Clinical Internship (5)

RN-BSN Program Requirements

Students in the online RN-BSN track must already be registered nurses seeking their B.S.N. Students must also reside in the United States and all fees are assessed at the in-state rate. Students must maintain a minimum grade of C in all nursing coursework as well as carry a minimum semester GPA of 2.75. See specific course requirements at the School of Nursing website.

General Education Requirements

Students complete 56 credit hours in general education coursework that may include the humanities, mathematics and social, behavioral and natural sciences.

The University requires that all students complete a three-hour constitution course. UMKC courses that currently satisfy this requirement include: HISTORY 101, HISTORY 102, or HISTORY 360R **or**- POL-SCI 210. In addition, students must complete the following, or an equivalent course:

- ENGLISH 110
- ENGLISH 225
- Philosophy Course
- NURSE 345 Statistics (upper-division)
- NURSE 395 Pathophysiology (upper-division)

Nursing Education Requirements

Twenty-eight hours of lower-division nursing credits may be obtained by:

- Direct transfer from a National League for Nursing Accrediting Commission (NLNAC) associate degree program.
- Completion of specific coursework for graduates of diploma programs and non-NLNAC associate degree programs.

Thirty-six hours of upper-division nursing credits are required. The UMKC School of Nursing has developed an innovative program where students, as a cohort group, progress through four "blocks" of coursework. Rather than traditional, individual courses, the curriculum is integrated and based on concepts integral to successful nursing in the changing health care system. Both full- and part-time plans are available.

The nursing curriculum consists of:

NURSE 401 Health Assessment (3)

NURSE 476 Scientific Inquiry (3)

NURSE 481 Tools for Personal Effectiveness (6)

- Introduction to Manuscript for Publication
- Introduction to Theory
- Professionalism
- Historical Roots of Health Professions
- Power Bases and Image
- Time and Stress Management
- Career Mapping
- Scope and Standards of Practice

- Moral Development and Values
- Critical Thinking and Decision Making
- Introduction to Research/Evidence-based Practice
- Ethics
- Introduction to Informatics
- Diversity in the Work Force

NURSE 482 Tools for Interpersonal Effectiveness (6)

- Conflict Resolution and Negotiation
- Communication Skills and Theories
- Leading and Managing Change
- Professional Ethics
- Groups and Teams
- Legalities of Health Care
- Marketing
- Informatics
- Nursing, and Public Policy
- Cultural Diversity in Health Care
- Manuscript for Publication Assignment

NURSE 483 Effectiveness in Human Health Outcomes (6)

- Theories Used in Care of Humans
- Cultural Competence
- Case Management
- Community Based Care/Public Health
- Epidemiology
- Health Promotion and Restoration
- Health Care Policy
- Precede - Proceed Model
- Bioterrorism Preparedness
- Human Patient Simulation
- Electronic Health Record
- Economics in Health Care
- Health & Inequality
- Vulnerable Populations
- Social Justice in Nursing

NURSE 484 Effectiveness in Complex Health Systems (6)

- Managing Quality and Risk
- Systems Theory
- Health Care Delivery and Financing
- Organizational Theories and Culture
- Politics, Use of Legislative System
- Leadership Styles and Theories
- Managing Costs and Budgets
- Magnet Recognition Program
- Health Care Policy Issues

- Staffing, Scheduling & Evaluating Staff
- Practice Issues Related to Technology
- Conducting Nursing Research
- Delegation & Managing Personal/Personnel Problems
- Leading Through Professional Organizations

NURSE 485 Application to Practice I (clinical practicum) (3)

- Team-building concepts
- Applied leadership principles
- Applied research and writing skills
- Technology application for project management
- Business communication
- Conflict management

NURSE 486 Application to Practice II (clinical practicum) (3)

- Team-building concepts
- Applied leadership principles
- Applied research and writing skills
- Technology application for project management
- Business communication
- Conflict management

Bachelor of Health Sciences

Health Sciences Building

History

In 1973-74, a graduate nursing program was started under the aegis of the School of Graduate Studies. On Nov. 16, 1979, the Board of Curators approved a proposal to establish a school of nursing at the University of Missouri-Kansas City. In 1981, following a developmental period, two new curricula were implemented. These were an upper-division baccalaureate degree for registered nurses and a revised master's degree program for clinical nurse specialists. In 1992, the Board of Curators approved the offering of an inter-campus, cooperative doctoral program in nursing (Ph.D. N.D.). The doctoral curricula was implemented on the Kansas City campus in the Fall Semester of 1995. In 2000, the Board of Curators approved the offering of a pre-licensure baccalaureate degree program beginning in the Fall Semester of 2001. The Board of Curators approved Doctoral of Nursing Practice (DNP) program began in 2007 and graduated its first post-masters class in December 2008. The newest program in the School of Nursing is the Bachelor of Health Sciences (BHS), which received final approval and began enrolling students in the fall of 2011.

Facilities

The University of Missouri-Kansas City has extensive educational facilities on the Volker campus combined with the health care educational facilities and main office on the Hospital Hill campus. These include libraries, resource centers, Financial Aid Office, Health Science book store, audiovisual resources, data processing and science information specialists.

Program Outcomes

- **Interdisciplinary processes health teams:**

Students will be exposed to interdisciplinary approaches to health and will learn how interdisciplinary services are related to improved health outcomes. Through writing, discussion, team projects, and service-learning, students will demonstrate an understanding of the importance of professional collaboration, effective communication, and team planning.

- **Science of health and life span development:** Students will have fundamental knowledge of the factors contributing to health and health issues across the life span.

- **Health services in multicultural settings:** Students will identify the key components of cultural competency and will understand the unique challenges of health in urban settings and underserved populations.

- **Health policy and ethics:** Students will have a strong foundation in health economics, policy, and social issues. Graduates will also learn about professional standards and ethical behavior, especially as pertinent to health.

- **Research Methods:** Students will become familiar with the application of research methods to improve health. Students will understand the components of evidence-based health services.
- **Effective Communications:** Students will demonstrate professional conduct and interpersonal skills when interacting with other health professionals and the public.
- **Leadership:** Students will demonstrate leadership skills through completion of a leadership project in the capstone course.
- **Technology:** Students will be familiar with the use of technology in health, both at a personal and institutional level.

What is a Bachelor of Health Sciences?

Building on a sound liberal arts education, the BHS includes a basic science component combined with coursework in health sciences. The UMKC BHS Degree Program offers a comprehensive curriculum designed to prepare students for a wide variety of health-related careers or to pursue post-graduate health education. The UMKC BHS Degree Program, offered through the UMKC School of Nursing, includes coursework in the physical, biological, behavioral, business and social aspects of health.

What can I do with a Bachelor of Health Sciences?

The UMKC BHS Degree Program is the perfect choice for students who are interested in a career in health focusing on health prevention, health promotion, population health, and health behavior change. UMKC is offering the new BHS Degree in response to the growing workforce demand for health professionals in a variety of areas including, personal health and wellness, social determinants of health, occupational health and safety, community health, and environmental health. Graduates may find career options in government settings, non-for profit organizations, community health centers, workplace health and wellness companies, and health promotion organizations.

Bachelor of Health Sciences Program Requirements

A sample course of study for a full-time BHS student is listed below. Students must earn a minimum grade of C in all HLSC and science coursework and a minimum grade of D in all other courses. To remain academically eligible, a minimum semester GPA of 2.00 must be maintained.

Fall Semester Year 1 (16 hours)

HLSC 101 Introduction to Health Sciences (3)
 HLSC 120 Anatomy and Physiology I (4)
 ENGLISH 110 English I (3)
 COMM-ST 110 Fundamentals of Effective Speaking & Listening (3)
 ART-HIST 100 OR CONSVTY 120 OR THEATRE 130 OR THEATRE 120 (3)

Spring Semester Year 1 (15 hours)

MATH 110 College Algebra (3)
 HLSC 160 Anatomy and Physiology II (4)
 HLSC 230 Health Issues in Aging (2)
 POL-SCI 210 or HISTORY 101 OR HISTORY 102 Am. Govt./Constitution (3)
 ENGLISH 225 English II (3)

Fall Semester Year 2 (17 hours)

PSYCH 210 General Psychology (3)
Foreign Language I (5)
HLSC 110 Personal Wellness (3)
PHILOS 210 OR PHILOS 221 or PHILOS 222 (3)
SOCIO 101 Introduction to Sociology (3)

Spring Semester Year 2 (15 hours)

HLSC 252 Human Growth & Development (3)
HLSC 280 Medical Terminology/Health Records (3)
HLSC 356 or Foreign Language 2 (3) or (5)
CHEM 206 Nutrition (3)
Elective (3)

Fall Semester Year 3 (15 hours)

HLSC 345 Quantitative Analysis in the Health Sciences (3)
HLSC 300 Diversity in Health (3)
HLSC 310 Healthcare Systems (3)
Elective (3)
Elective (3)

Spring Semester Year 3 (15 hours)

HLSC 476 Scientific Inquiry (3)
HLSC 410 Epidemiology (3)
HLSC 430 Health Program Mgmt (3)
HLSC 440 Policy & Ethics in Health (3)
Elective (3)

Fall Semester Year 4 (15 hours)

HLSC 450 Urban Health (3)
HLSC 460 Global Health (3)
HLSC 470 Technology, Marketing, & Media in Health (3)
HLSC 480 Leadership & Management in Health Professions(3)
Elective (3)

Spring Semester Year 4 (12 hours)

HLSC 492 Health Science Specialty Course (3)
HLSC 494 Health Science Capstone (6)
Elective (3)

General Information

History

Originally organized in 1885 as the Pharmaceutical Department of the University of Kansas City, the school was reorganized and reincorporated in 1898 as the Kansas City College of Pharmacy and Natural Science. In 1943, this forerunner of the present school joined the University of Kansas City as its third professional school.

When the University of Kansas City was incorporated into the University of Missouri System in 1963, the School of Pharmacy became the only state-supported pharmacy school in Missouri. In October 1985, the school observed its centennial celebration, commemorating 100 years of progress in pharmaceutical education, research and service.

The School of Pharmacy is a member of the American Association of Colleges of Pharmacy (AACP). The doctor of pharmacy program is accredited by the Accreditation Council for Pharmacy Education (ACPE). Information about ACPE can be found at <http://www.acpe-accredit.org>.

Degrees Offered

The School of Pharmacy offers the advanced professional degree of doctor of pharmacy. In addition, the School of Pharmacy participates in the School of Graduate Studies Interdisciplinary Ph.D. program with emphasis areas in pharmaceutical sciences and pharmacology and toxicology. Students pursuing Interdisciplinary Ph.D. study should consult the School of Graduate Studies section of this catalog for degree requirements and other academic regulations applicable to the degree program.

The UMKC School of Pharmacy offers a Pharm.D. program on the University of Missouri-Columbia (MU) campus in conjunction with the School of Health Professions. The traditional program location (UMKC campus) and the program offered on the MU campus encompass four years of professional study after completion of the required pre-pharmacy coursework. Although Pharm.D. students enrolled at MU are physically located in Columbia, these students are considered UMKC students. Students accepted into the UMKC Pharm.D. program at MU will complete the same basic science and some elective courses in traditional classroom settings on the Columbia campus, whereas students accepted to the traditional program will complete coursework on the UMKC campus. The majority of the pharmacy specific courses offered on the UMKC campus are transmitted via distance education technology from UMKC specialized classrooms to specialized classrooms at MU. Students and instructors at both campus locations are able to interact during lecture/discussions. Students accepted to the UMKC Pharm.D. program at MU cannot, however, be dually enrolled in separate degree programs on the MU campus.

Career Applications

The Ph.D. degree is the highest academic degree offered in any American university. It is a research degree. Merely attaining high grades in didactic coursework and passing examinations is insufficient demonstration of merit for this degree. Obtaining the Ph.D. degree requires demonstration of the highest order of scholarship; diligent and inventive pursuit of a research program; and defense of a dissertation based upon original research.

The Ph.D. is usually a requirement for obtaining tenure track appointment to university faculties or to senior-level appointments in research and development in pharmaceutical and related industries, research institutes and in government.

Advising System

Student Support -Academic and Professional Development Advising

Upon entry into the doctor of pharmacy program, each student is assigned a professional development adviser (PDA). The PDA is a faculty member who serves as a mentor during the program. If students are experiencing difficulties, whether academic or personal, or if seeking more in-depth information about the curriculum or career paths, they should seek counsel from their PDA. It is important that students keep in contact with their PDA throughout the program. Academic Advisers in the Pharmacy Student Services Office also work closely with pre-pharmacy and current pharmacy students to provide assistance during the application and admission process, ensuring proper admission requirements and matriculation procedures are met. After entry, academic advisers assist students through subsequent enrollment and progression requirements and through final graduation completion. Academic advisers act as liaisons to various campus services and departments of the campus community and can link students with resources to address any academic or personal issues.

Both the academic advisers and the PDAs are familiar with sources of assistance and will help students seek the best solution to their problems. Building a strong relationship with both advisers is strongly encouraged. Students that encounter academic difficulty during the program, may be required to meet with their advisers.

The School of Pharmacy offers a variety of services to assist students in support of the academic experience. For more information: <http://pharmacy.umkc.edu/student-affairs/> and <http://pharmacy.umkc.edu/current-students>

Libraries

The University Libraries provide the full spectrum of information services to support study and research in pharmacy. For additional information, consult the University Libraries section of this catalog.

Student Services

The School of Pharmacy offers a variety of services to assist students in support of the academic experience.

The School of Pharmacy offers a variety of services to assist students in support of the academic experience. For more information: <http://pharmacy.umkc.edu/student-affairs/> and <http://pharmacy.umkc.edu/current-students>

Student services, which are available not only through the School of Pharmacy, but throughout the University, are outlined in the Division of Student Affairs section of this catalog.

Student Life

Student Government

The student body annually elects an Executive Pharmacy Student Council from each campus, which consists of the presidential officers, secretary, historian, treasurer and student pharmacy advocacy representative of the student chapter of the American Pharmacists Association, the Academy of Student Pharmacists (APhA-ASP), one Student Government Association representative and two representatives from each class. This group supervises the annual student activities budget process and recommends students to represent the student body on various campus committees.

The Script

A student-administered, student-oriented newsletter, *The Script*, is published several times each semester by the American Pharmacists Association Academy of Student Pharmacists (APhA-ASP) at UMKC. Its purpose is to inform the student body, as well as the faculty and staff of student activities and achievements, announce available opportunities and report on developments affecting student life. It is a primary vehicle of communication within the school. Articles are welcomed from any student, student organization, faculty or staff member.

Student Organizations

The UMKC School of Pharmacy hosts a number of very active pharmacy student organizations. The following organizations are recognized by the UMKC Student Involvement Office. UMKC students routinely win local, regional and national awards for their outstanding community service and commitment to patient care. General descriptions of each organization can be found at <http://pharmacy.umkc.edu/current-students/>.

- **Academy of Managed Care Pharmacy (AMCP)**
- **American Association of Pharmaceutical Scientists (AAPS)**
- **American Pharmacists Association Academy of Student Pharmacists (APhA-ASP)**
- **Kappa Epsilon**
- **Kappa Psi**
- **National Community Pharmacists Association (NCPA)**
- **Pharmaceutical Sciences Graduate Student Association**
- **Phi Lambda Sigma**
- **Pre-Pharmacy Society**
- **Public Health Organization**
- **Rho Chi**
- **Student College of Clinical Pharmacy (SCCP)**
- **Student Society of Health-System Pharmacists (SSHP)**

Scholarships, Special Awards and Financial Assistance

The Dean's List

At the end of each semester, the names of full-time doctor of pharmacy students whose term GPA is 3.5 or higher are placed on the dean's list. These students receive a letter of congratulations and a notation is placed on their permanent records. Students must complete a minimum full-time program of 12 graded hours to qualify for the dean's list. The credit/no credit option may not be used as part of the 12 hours.

Degrees With Honors

Students who meet the academic standards prescribed by the faculty will be graduated "with honors." The criteria for Latin honors eligibility is as follows:

Doctor of Pharmacy (Pharm.D.) Students

Summa Cum Laude

- Pharmacy GPA* greater than or equal to 3.750.
- No periods of probation.
- No incidents of unprofessional behavior.

No more than 5% of the graduating class will be awarded Summa Cum Laude honors. If more than 5% of the class qualifies under the criteria above, the GPA criteria will be raised and students below the revised GPA will be awarded their degrees with Magna Cum Laude honors.

Magna Cum Laude

- Pharmacy GPA* greater than or equal to 3.600.
- No periods of probation.
- No incidents of unprofessional behavior.

No more than 5% of the graduating class will be awarded Magna Cum Laude honors. If more than 5% of the class qualifies under the criteria above, the GPA criteria will be raised and students below the revised GPA will be awarded their degrees with Cum Laude honors.

Cum Laude

- Pharmacy GPA* greater than or equal to 3.500.
- No periods of probation.
- No incidents of unprofessional behavior.

No more than 10% of the graduating class will be awarded Cum Laude honors. If more than 10% of the class qualifies under the criteria above, the GPA criteria will be raised and students below the revised GPA will be awarded their degrees without Latin honors.

* GPA for Latin honors is the School of Pharmacy GPA on all courses completed at UMKC through the end of the 9th semester of the professional program.

Graduation Awards

At the annual spring pharmacy commencement ceremony, seniors receiving graduation awards are recognized. At that time, recognition is given to graduating students for superior academic achievement, leadership, and service. Selection of the recipients, except where noted otherwise, is made by vote of the pharmacy faculty in conjunction with the scholarship and awards committee.

Achievers of Excellence Awards Ceremony

Each fall an awards ceremony is held to recognize those students in the School of Pharmacy who receive scholarships or awards from the school, the university or the school's constituent groups. Most of these awards are competitive and are confirmed by the scholarship and awards committee.

Student Leadership Recognition

Annually, student leaders are recognized for their efforts on behalf of the school and the university.

Doctor of Pharmacy Graduation Awards

Douglas Adcock Memorial Award

An annual cash award established in memory of Douglas Adcock, a 1977 graduate of the School of Pharmacy, is presented to a student who plans a career in the public health service or who exhibits the ability to overcome adversity with professionalism.

Pharmacy Alumni Association Award

The Alumni Association of the School of Pharmacy gives an engraved plaque to the graduate who has exhibited outstanding leadership in school affairs. Selection is made by the board of directors of the Pharmacy Alumni Association in conjunction with the scholarship and financial aid committee.

The American College of Apothecaries Award

The graduating student who intends to practice in an independent community pharmacy after graduation and who has shown outstanding scholastic achievement and participation in school activities receives an engraved silver bowl from the American College of Apothecaries

American Pharmacists Association Service Award

A certificate is presented by the American Pharmacists Association-Academy of Student Pharmacists (APhA-ASP) to the graduating student who has done the most for the student branch of the association. Selection is made by the APhA-ASP Executive Board.

First DataBank Medical Writing Award

An *Evaluations of Drug Interactions* loose leaf edition is presented to a graduating doctor of pharmacy student who has demonstrated excellence in medical writing.

Mitzi McGee Memorial Award

An annual cash award established in memory of Mitzi McGee, a 1977 graduate of the School of Pharmacy, is presented to a female member of the graduating class who, while in school, has been active in professional pharmacy affairs, especially those which affect the status of women in pharmacy. Preference will be given to a married student.

Merck Awards

Merck & Company Inc. of Rahway, N.J., presents a Merck Manual and Merck Index to graduating students for noteworthy academic achievement in the area of pharmaceutical chemistry.

Mylan Pharmaceutical Excellence in Pharmacy Award

Mylan Pharmaceuticals Inc. of Birmingham, Ala., presents a plaque and a limited edition lithograph to a graduate in the top 20 percent of the class who exhibits exceptional skills in the area of drug information dissemination.

The Natural Medicines Comprehensive Database Award

Recognition is presented to the senior student who has shown an interest in the use of natural medicines. The recipient also must have proven academic and extracurricular activities demonstrating outstanding promise in the assessment, evaluation and delivery of patient care related to the use of natural medicines. The recipient receives a copy of the natural medicines comprehensive database, a subscription to the Natural Medicines Continuing Education series and a certificate.

Pharmacists Mutual Award

One year of pharmacists liability insurance is presented by the Pharmacists Mutual Insurance Co. of Algona, Iowa, to a graduate, based on academic achievement and professional pharmacy outlook.

Pharmacy Student Organization Awards

Honors are presented to graduating students based on a combination of scholastic achievement, strength of character, dedication and leadership evidenced during residency in the School of Pharmacy as a member of a university recognized pharmacy student organization. Selection is made by the respective pharmacy student organization officers.

TEVA Outstanding Student Award

A personalized plaque and cash award are presented by TEVA Pharmaceuticals of Sellersville, Pa., to a graduate. The criteria are scholastic achievement, professional pharmacy outlook and participation in school activities.

United States Public Health Service Excellence in Public Health Pharmacy Practice Award

A framed certificate and book award is presented to a graduate whose public and community service efforts are recognized.

Fall Awards

Grace Hoelzel Albano Scholarship

This scholarship is awarded to a doctor of pharmacy student who is in good academic standing. Preference is given to a female student who is in the second or third year of school. Consideration is also given for involvement in pharmacy student or alumni activities and programs.

Fred Angle Scholarship

This scholarship is awarded to a professional pharmacy student in their third, fourth or fifth year, with a minimum 3.0 grade point average. Preference is given to a student who indicates as their first choice a career with a community pharmacy and who has preferably served an internship with a community pharmacy.

Baptist-Trinity Lutheran Legacy Foundation Scholarship

This scholarship is awarded to a fifth-year professional pharmacy student with a minimum 3.0 grade point average. Preference is given to a student who indicates as their first choice a career with a hospital pharmacy following graduation and who plans to stay in the Kansas City metropolitan area following graduation.

Wright V. and Gladys A. Bartholomew Scholarship

This scholarship is awarded competitively to a Pharm.D. student entering the third semester of the professional program in the School of Pharmacy. The student must have expressed interest in entering community pharmacy practice after graduation. Pending satisfactory academic performance, this scholarship can be renewed for a maximum of four additional semesters.

Mary and Francis "Bud" Bisceglia Memorial Scholarship

This memorial scholarship is awarded to a second- or third-year Pharm.D. student interested in community pharmacy practice.

Dennis R. Bond Scholarship

This scholarship is awarded to a professional pharmacy student in their third, fourth or fifth year, with a minimum 2.5 grade point average. Preference is given to a student who indicates as their first choice a career with an independent or independent chain pharmacy following graduation and who has served an internship with an independent pharmacy.

Lewis Bratt Scholarship

This scholarship will be awarded to a student who has an interest in independent community pharmacy. Financial need will be taken into consideration.

Donald R. Brown Scholarship

This scholarship is awarded to a professional pharmacy student who is eligible to receive financial aid and is in good standing academically. Preference is given to an applicant who is a direct descendant of Robert C. and Belva A. Brown, or Forrest and Eloise Walker. Without an available applicant who is a direct descendant of the Browns or Walkers, preference is given to a student from the southwest Missouri area. Additional consideration is given to an applicant seeking a pharmacy career in a Missouri community with a population of less than 40,000.

Burch and Sabo Scholarship

This scholarship is awarded to a professional pharmacy student in their third, fourth or fifth year, with a minimum 2.5 grade point average and a strong performance as a leader within the School of Pharmacy and community. Preference is given to a student who indicates as their first choice a career in the pharmacy industry following graduation and who has preferably served an internship with a pharmaceutical industry organization.

Isaac Butler "Not Can, But How" Scholarship

This scholarship is awarded to a professional pharmacy student in their 3rd, 4th, or 5th year with a minimum 3.0 GPA. Preference shall be given first to a multi-cultural pharmacy student and then secondarily to a pharmacy student with a demonstrated interest in a career in managed care or other related area of pharmacy with plans to practice in Missouri following graduation. A letter of reference for each student applicant from a pharmacist will be required as part of the student's scholarship application with preference that the letter be written by Dr. Isaac Butler or his designee.

Century Club Grants

The UMKC Pharmacy Foundation awards these grants to third-year Pharm.D. students who intend to practice in a hospital or other clinical setting.

Class of 1975 Scholarship

This scholarship shall be awarded to a professional pharmacy student in their 2nd, 3rd, 4th or 5th year with a minimum 2.5 GPA. Preference shall be given to a student who has demonstrated volunteerism, leadership, or other involvement with the Pharmacy Foundation, the Pharmacy Alumni Association, or the UMKC School of Pharmacy.

Class of 1982 Scholarship

This scholarship is awarded to a professional pharmacy student in their third, fourth or fifth year, with a minimum 2.5 grade point average. Preference is given to a student who has demonstrated volunteerism, leadership or other involvement with the Pharmacy Foundation, the Pharmacy Alumni Association or the School of Pharmacy.

CVS Pharmacy Community Scholarships

CVS awards scholarships to four Pharm.D. students entering the second professional year who plan to practice community pharmacy after graduation.

D & H Prescription Drug Store Scholarship

This scholarship will be awarded to a student in the UMKC School of Pharmacy satellite program located on the campus of the University of Missouri Columbia with the following criteria:

1. Student is a high school graduate of Audrain, Boone, Cole, Cooper or Callaway counties in the State of Missouri
2. Student is a current Missouri resident
3. Student indicates a preference for a career in an independent pharmacy following graduation
4. Student is in the high need category for financial aid

Students may fit more than one of these criteria; if so, they are added together. Example: the student is from Boone County, Missouri and indicates a preference for a career in an independent pharmacy, they would then qualify for criteria (a) and (c) listed above.

Glenn and Adele Eberhart Scholarship

Scholarship Criteria Pending

Leslie Eisenbrandt Scholarship

A stipend is awarded to a student in years three through five of the professional pharmacy program who is excelling academically and qualifies for financial aid.

Erickson Family Scholarship

Preference for this award will be given to a student who is a direct descendant of J. Stephen Erickson and/or K. Clydean Erickson and/or their brothers or sisters; employed by The Drug Store of Cameron, Missouri and from a town of less than 20,000 in population or is employed by a privately held (independent) pharmacy company. Applicants must have a letter of

recommendation from a currently employed pharmacist of The Drug Store of Cameron, Missouri.

Mary and Tim Euler Student Mentor Award

This award is given to a professional pharmacy student in their fourth or fifth year, with a minimum 2.5 grade point average. Preference is given to a student who has sustained leadership on behalf of the School of Pharmacy; who has served as a role model and mentor to other students aspiring to leadership positions, and shows care and concern for his/her peers.

Fendler Family Scholarship

One scholarship will be disbursed each year to a student in the School of Pharmacy who is eligible to receive financial aid and is in good standing academically. Preference will be made to a minority applicant who is an entering first year professional degree student with demonstrated leadership experience and significant financial need.

Kathy McClary Fife Memorial Scholarship

This scholarship is awarded to a student who applies for admission to and attends the University of Utah School on Alcoholism and Other Drug Dependencies summer program, to help defray the expenses of attending the program. The recipient is selected by Mr. Bert McClary and the executive director of the Pharmacy Foundation.

Spencer S. Glenn Memorial Scholarship

This scholarship recognizes the superior pursuits of a doctor of pharmacy student with a record of clinical research abilities and academic achievement was established. Selection preference is given to married students who are U.S. citizens and Missouri residents.

Glenski Family Scholarship

An award is presented to a doctor of pharmacy student in years three through five of the professional pharmacy curriculum who has maintained a cumulative School of Pharmacy GPA of 3.0. The student must be involved in extracurricular activities with a community service emphasis. Preference will be given to a student who has a family member who is either in a health-care profession or is a UMKC alumnus.

Good Neighbor Pharmacy Community Scholarship

Eight student scholarships will be disbursed to students within the School of Pharmacy who are eligible to receive financial aid and are in good standing academically. Preference will be made to applicants in their 4th and 5th years of Pharmacy School with a demonstrated interest in community pharmacy and plans to practice in either Missouri or Kansas following graduation. A letter of reference for each student applicant from a local community or independent pharmacist will be required as a part of the student's scholarship application.

Travis and Maqual Graham Scholarship

One student scholarship will be disbursed each year to a fourth or fifth year Pharm.D. student interested in obtaining clinical post-doctoral training, who is in good academic standing, and is involved in community healthcare initiatives. The recipient must also be eligible to receive financial aid in the current academic year.

Greater Kansas City Society of Health-System Pharmacists (GKCSHP) Book Scholarship

This scholarship is awarded by the GKCSHP to a second-year doctor of pharmacy student who plans to pursue a career in hospital pharmacy.

Donald W. Grove Scholarship

This scholarship is awarded to doctor of pharmacy students in their third, fourth, or fifth year with a minimum 2.5 grade point average. Preference is given to students who indicate as their first choice a career in independent/community pharmacy and who have served an internship with an independent pharmacy.

George Guastello Scholarship

This scholarship recognizes a deserving fourth or fifth year pharmacy student interested in practicing in a community pharmacy setting. Applicants' financial need will be considered.

Harvey H. Haynes Scholarship

This scholarship shall be awarded to a third-year pharmacy student planning to work in an independent pharmacy in a rural area with a population less than 10,000. Financial need is not a consideration.

Judith Hemberger Graduate Scholarship

This scholarship shall be awarded to a female graduate student enrolled in the UMKC School of Pharmacy's Division of Pharmacology and Toxicology or Pharmaceutical Sciences, with a minimum grade point average of 3.0. Preference is given to United States citizens. The scholarship recipient shall be chosen by the UMKC School of Pharmacy Scholarship and Awards Committee.

Bruce J. "Bud" Huber Memorial Scholarship

This is scholarship for a Pharm.D. student in years two through five who has a minimum cumulative GPA of 3.0 and documented involvement in extracurricular activities in the area of service. Priority should be given to a pharmacy technician or intern of Express Pharmacy, or to an older, returning student. Financial need is considered.

Richard D. Johnson Undergraduate Pharmaceutical Sciences Award

This award is given to undergraduate and professional students in the last year of the program who are engaged in graduate-level laboratory research projects. Financial need is not to be considered. The dean and donor or his designee shall select the recipient.

Dr. Debbie and Paul Kavanaugh Scholarship

This scholarship shall be awarded to a doctor of pharmacy student based on evidence of financial need.

Kappa Epsilon Community Services Scholarship

This scholarship shall be awarded to a professional pharmacy student in their 2nd, 3rd, 4th or 5th year with a minimum 3.0 GPA. Preference shall be given to a pharmacy student who is a member of Kappa Epsilon in good standing. A letter of reference for each applicant from a

pharmacist is required as part of the student's scholarship application. Scholarship award recipients will be determined by the dean of the School of Pharmacy and his/her assigned committee with selection input from the Kappa Epsilon chapter advisor.

Kilgore's Medical Pharmacy Scholarship

The recipient of this scholarship must be in the high category for financial aid. The recipient must be enrolled in the Pharm.D. satellite program on the University of Missouri-Columbia campus. Preference shall be given to students who graduated from a high school in Boone, Cole, Moniteau, Cooper, Howard, Randolph, Audrain, or Callaway counties in Missouri.

Robert C. Lanman Pharmacology Scholarship

Eligible students must be fully admitted to the Interdisciplinary Ph.D. program with pharmacology as their emphasis area and have successfully completed no less than two semesters of full-time course work. Applicants must have an earned cumulative grade point average of no less than 3.0 and proof of financial need.

Rocky and Laurie Levell Scholarships

These scholarships shall be awarded to two Pharm.D. students who are eligible to receive financial aid and are in good standing academically. Each student should demonstrate a compassionate attitude toward others and be involved in extracurricular activities in the community. Preference will be given to students with an interest in geriatric care who plan to practice in an independent or community pharmacy upon graduation.

Lindman-Gershman Scholarship

A scholarship for a student in the doctor of pharmacy program with financial need.

Monica E. Manasseh Scholarship

This scholarship shall be awarded to a pharmacy student in their 3rd, 4th, or 5th year (P4, P5 or P6) in good academic standing. Preference shall be given to a minority student who is an active member of the Academy of Managed Care Pharmacists (AMCP) chapter with a demonstrated interest in a career in managed care or hospital pharmacy following graduation. A letter of reference for each student applicant from a pharmacist will be required as part of the student's scholarship application with preference that the letter be written by Dr. Fredrick Manasseh or his designee.

Alexander and Mary Margolis and Bernard A. Margolis Perpetual Memorial Scholarship

This scholarship is awarded to a pharmacy student enrolled in years one through five of the professional program who has financial need.

Wes McIntire Scholarship

This scholarship is awarded to a fifth-year professional year student who is a Kappa Psi Brother and who has been actively involved throughout their membership. This brother must have been either a Kappa Psi officer or organized the Wes McIntire Volley for Charity event held annually in the spring. The scholarship recipient is selected by the Kappa Psi members.

J. Leo McMahon Grant

A stipend is awarded to a second professional year student who represents the caring and professional attitudes of Leo McMahon.

Joe McNerney Pharmacy Leadership Scholarship

This award is given to any female or minority doctor of pharmacy student or pre-pharmacy student with anticipated entry into the Pharm.D. program who has demonstrated leadership abilities. Financial need should be taken into consideration.

Medicine Shoppe International Scholarship

Doctor of pharmacy students with an interest in community pharmacy or community oriented extracurricular activities may receive this scholarship. This award is not given every year.

Stephanie and Russell Melchert Scholarship

This scholarship will be awarded annually to a doctor of pharmacy student who is in good standing academically. Preference will be made to an applicant who has demonstrated leadership through extracurricular pharmacy programs or volunteer work. Additional consideration shall be given to a student seeking a career in higher education or pharmacy academia. Scholarship award recipients will be determined by the dean of the School of Pharmacy or his/her assigned committee.

Mid-Missouri Society of Health-System Pharmacists Scholarship

This scholarship will be awarded to a student in the UMKC School of Pharmacy satellite program located on the University of Missouri-Columbia campus based on a point system. Points are assigned by the following criteria: a student who is a member of the Missouri Society of Health-Systems Pharmacists; student is presently employed by a health-systems pharmacy; student is a high school graduate of Boone, Cole, Cooper or Callaway counties in the state of Missouri; student is currently a Missouri resident and student should be in the high need category for financial aid. Student may re-apply and receive the award for more than one year.

Missouri Pharmacy Foundation Scholarship

The Missouri Pharmacy Foundation provides a scholarship to a third year Pharm.D. student who is a Missouri resident. The recipient should be on track with his or her class and have maintained a minimum cumulative 2.5 GPA during the first two years of the pharmacy program. The recipient should be planning on a career in Missouri and have demonstrated involvement in his or her community.

Tim Mitchell Scholarship

This scholarship shall be awarded to an active UMKC National Community Pharmacists Association student member in their third, fourth, or fifth professional year in the Pharm.D. program. The student must be in good standing.

Timothy G. Mitchell Scholarship

This scholarship is awarded to one Pharm.D. student in the second through fifth year in good academic and professional standing. The student must have a stated career interest in community pharmacy, with preference given to those with interest in independent pharmacy.

National Association of Chain Drug Stores (NACDS) Scholarship

Awarded to a Pharm.D. student who intends to pursue a career in chain community pharmacy practice after graduation. Financial need is taken into consideration.

NCPA/William E. Osborn Scholarship

This scholarship shall be awarded to a professional pharmacy student in their 2nd, 3rd, 4th or 5th year with a minimum 2.5 GPA. Preference shall be given to a student seeking a career with an independent pharmacy following graduation and with plans to practice in either Missouri or Kansas.

Jim Newman Memorial Scholarship

A stipend is awarded to a doctor of pharmacy student in years 3-5 who has financial need. Preference is given to a student from Joplin or Southwest Missouri.

Noel O. Nuessle Scholarship

This scholarship is awarded to a professional pharmacy student in their 2nd, 3rd, 4th or 5th year with a minimum 2.5 GPA. Preference shall be given to a student with serious financial needs that could impact their ability to remain in school.

Nyberg Pharmacy Independent Pharmacy Scholarship

An award is made available to a doctor of pharmacy student, regardless of practice interests or year in school, who maintains a minimum 2.5 GPA and is a Missouri resident. Financial need is considered. This award not given every year.

Robert W. Piepho Scholarship

This scholarship shall be awarded to a professional pharmacy student in their third, fourth or fifth year who demonstrates extraordinary leadership qualities. Preference shall be given to a student who has held an elected office while in pharmacy school or has developed an innovative service project. Financial need should be taken into consideration.

PBA Health / TrueCare Pharmacy Scholarship

This scholarship is awarded annually to deserving doctor of pharmacy students in the last three years of the curriculum. Students must have a minimum of 500 intern hours in independent pharmacy and a minimum 2.5 GPA.

Pharmacists Mutual Scholarship Award

This scholarship is awarded annually to a second-year doctor of pharmacy student who intends to practice pharmacy in a community setting after graduation.

Plattsburg Clinic Pharmacy Scholarship

This scholarship is awarded to a doctor of pharmacy student in their first through fifth year with a minimum 2.5 grade point average. Preference is given to a student who indicates as their first choice a career in independent/community pharmacy and to residents of Plattsburg, Lathrop, or Gower, Missouri, or Clinton county in Missouri.

Powers Family Scholarship

This scholarship shall be awarded to a professional pharmacy student in their 3rd, 4th or 5th (P4, P5 or P6) with a minimum 2.5 GPA. Preferences shall be given to a student who indicates as their first choice a career in independent/community pharmacy and who has served an internship with an independent pharmacy. It is also requested that the student applicant's letter of reference come from an independent pharmacist.

Prescription Solutions Scholarship

Two student scholarships will be disbursed to students in the UMKC School of Pharmacy who are eligible to receive financial aid and are in good standing academically. Preference will be made to applicants in their 4th and 5th years in the School of Pharmacy with a demonstrated interest in a career with a mail order pharmacy and managed care with plans to practice in either Missouri or Kansas following graduation. A letter of reference for each student applicant from a pharmacist will be required as part of the student's scholarship application.

RAN Institute Award

Awarded to a female pharmacy student who has demonstrated an interest in and documented activities of strong entrepreneurial ambitions, active involvement in UMKC athletic programs and financial need.

Red Cross Pharmacy Scholarship

Preference for this award will be given to a student who is: a direct descendant of Benjamin R. Hartwig, employed by Red Cross Pharmacy and/or from a Red Cross Pharmacy market area, from a town of less than 20,000 in population, or is employed by a privately held (independent) pharmacy company. Each applicant must have a letter of recommendation from a currently employed pharmacist of Red Cross Pharmacy.

Stanley M. Reinhaus Family Foundation Scholarship

Second-year doctor of pharmacy students with a minimum 2.75 GPA may apply for this award. Applicants must be interested in hospital or community pharmacy, be a Missouri resident and plan to work in Missouri after graduation with no plans of pursuing an advanced degree. Applicants must have financial need. The award is renewable.

Thomas D. Ross Memorial Graduate Scholarship

This scholarship shall be awarded to a graduate student majoring in Pharmacology. Selection preference will be given to those applicants who meet the following criteria: United States citizen, Missouri resident, and married. The scholarship recipient shall be chosen by the UMKC School of Pharmacy Scholarship and Awards Committee, with recommendations from the School's Graduate Programs Committee.

Toni Sena Memorial Scholarship

This scholarship shall be awarded to a student in the Pharm.D. program with a minimum 2.5 GPA and to a student who shows evidence of an earnest pursuit of a pharmacy degree.

Joseph G. Shalinsky Scholarship

The scholarship recipient must have achieved academic success (minimum 3.0 cumulative GPA), and an interest in practicing in a community pharmacy setting after graduation. Applicants' significant financial need should be demonstrated.

Leo Shalinsky Scholarship

The recipient of the award should be a second- or third-year Pharm.D. pharmacy student interested in practicing in a retail pharmacy. The applicant must have a minimum 2.5 GPA average, be involved in extracurricular activities and have a financial need.

Morris R. Shlensky Award

The Morris R. Shlensky award was originally made available through officers of the Katz Drug Co., (now CVS), specifically for professional pharmacy students. Financial need or high scholastic achievement should be demonstrated. The award is renewable for one additional semester.

William and Carole Sitland Scholarship

One student scholarship will be disbursed each year to a third, fourth or fifth year student at the UMKC School of Pharmacy is eligible to receive financial aid and is in good standing academically. Preference will be made to students who demonstrate the personal characteristics of integrity, a strong work ethic, generosity of spirit and a commitment to quality in all that they do for the profession of pharmacy. Special consideration will be given to students who also demonstrate excellent verbal and written communication skills.

Smock Family Scholarship

This scholarship shall be awarded to a third, fourth or fifth year student that currently is in good standing, currently obtains the bulk of his/her academic funding through financial aid programs, and who has an interest in community or independent pharmacy practice.

Andrea and Dale Smith Scholarship

This scholarship shall be awarded to doctor of pharmacy students in their 2nd, 3rd or 4th year who are in good standing academically. Preference will be made to applicants with demonstrated leadership experience and significant financial need. Secondary preference will be made to applicants seeking a post-graduate career in independent pharmacy. A letter of reference for each student applicant from a local community or independent pharmacist will be required as a part of the student's scholarship application.

Anthony J. Spalitto, Sr. Scholarship

Awarded to a doctor of pharmacy student in years two through four who has a minimum 2.5 GPA and has expressed interest in independent community pharmacy. Financial need will be taken into consideration.

Spalitto Pharmacy Scholarship

This scholarship is awarded to a professional pharmacy student in their third, fourth or fifth year, with a minimum 2.5 grade point average. Preference is given to a student who indicates as their

first choice a career with an independent or independent chain pharmacy and who has preferably served an internship with an independent pharmacy.

Bruce and Shirley Stocker Scholarship

The applicant for this scholarship must be either a Missouri or Kansas full-time resident in years one through five of the professional pharmacy program. The applicant must have maintained a minimum 3.0 GPA, have expressed an interest in pursuing a career in institutional pharmacy and be or planning to be involved in the appropriate professional pharmacy organizations (i.e., MSHP, KSHP, ASHP). Financial need will be taken into consideration.

David A. Strauch Scholarship

One or two student scholarship(s) will be disbursed each year to a 1st through 4th year student(s) in the UMKC School of Pharmacy who demonstrates financial need, who is in good academic standing and shows evidence of leadership experience. Preference will be given to a student wishing to pursue a career with an independent pharmacy and/or in a community of less than 10,000 people following graduation. The student must be eligible to receive financial aid in the current academic year.

Evelyn F. Suffecool/Esther C. Plank Scholarships

Preference for these awards is given to students entering the first professional year and/or the provisional program with evidenced financial need.

Harry N. Tishk Scholarship

Awarded to a first year doctor of pharmacy student with evidence of financial need. The student must have been a provisional student the year prior to receiving the award.

Fred Tonnies Scholarship

This scholarship shall be awarded to a doctor of pharmacy student based on a point system. Points are assigned by the following criteria: a student who is a graduate of a high school in Boone County, Mo., is a past or current employee at the University of Missouri-Columbia Hospitals & Clinics, minimum cumulative 3.6 GPA and financial need.

Phyllis Vaughn Scholarship

This scholarship will be awarded to a doctor of pharmacy student in the second through fifth year of the professional pharmacy program who expresses a caring and friendly attitude toward others. Preference will be given to a student who exemplifies this attitude through involvement in extracurricular activities helping people. Financial need will be taken into consideration.

Walgreens Student Scholarship

This is an annual award to a pharmacy student entering their final professional year. The student should have demonstrated outstanding leadership and communication skills and have an interest in community pharmacy practice.

Wal-Mart Scholarship

This scholarship is awarded to a fourth- or fifth-year Pharm.D. student who has an interest in pursuing a career in community pharmacy and who has demonstrated leadership qualities and high scholastic standing. Financial need should be considered.

Marcus and Missy Wilson Family Scholarship

This scholarship supports pharmacy students participating in an international rotation. The recipients are selected by Marcus and Missy Wilson.

Mathew W. "Bill" Wilson Scholarship

This scholarship is awarded to a third-year professional student whose integrity and professionalism matches that of Bill Wilson.

Kathleen Tonnies Scholarship

This scholarship shall be awarded to a doctor of pharmacy student based on a point system. Points are assigned by the following criteria: a student who is a graduate of a high school in Boone County, Mo., is a past or current employee at the University of Missouri-Columbia Hospitals & Clinics, minimum cumulative 3.6 GPA and financial need.

Lawrence G. Windmoeller/Mid-Missouri Society of Health-System Pharmacists Scholarship

This scholarship will be awarded to a student in UMKC School of Pharmacy satellite program with the following criteria:

- a. Student is a member of the Missouri Society of Health-Systems Pharmacists
- b. Student is presently employed by a health-systems pharmacy
- c. Student is a high school graduate of Boone, Cole, Cooper or Callaway counties in the state of Missouri
- d. Student is currently a Missouri resident
- e. The student should be in the high need category for financial aid.

Students may fit more than one of these criteria; if so, they are then added together. Example: the student is from Columbia, Mo., works at a health-system pharmacy, and is a member of MSHP; they would then qualify for criteria (a), (b) and (c) listed above.

Robert L. Wolf Memorial Scholarship

This scholarship is awarded to a professional pharmacy student in their third, fourth or fifth year, with a minimum 2.5 grade point average. Preference is given to a student who indicates as their first choice a career with either an independent or independent chain pharmacy, or a career in the Public Health Service as a pharmacist. Preference is given to a student who has served an internship with an independent pharmacy or the Public Health Service.

Other Financial Assistance and Awards**Gracia Bremer Loan Fund**

An endowment through the unitrust of Gracia Bremer and Mercantile Bank was established in 1996 for pharmacy students enrolled in years one through five of the first professional program who need additional financial support while pursuing a pharmacy degree.

George H. Hargrave Pharmacy Student Loan Fund

An endowment through the unitrust of George H. and Edith L. Hargrave was established in 1994 for pharmacy students enrolled in years one through five of the first professional program who need additional financial support while pursuing a pharmacy degree.

State Licensure Requirements

Students planning to practice the profession of pharmacy are required to satisfy the licensure requirements of the state in which they intend to practice. Licensure requirements vary, therefore, information concerning these requirements should be obtained by contacting the board of pharmacy of the state concerned.

Students accepted and enrolled in the doctor of pharmacy curriculum are required to obtain a valid Pharmacist Intern License issued by the Missouri Board of Pharmacy or provide proof of application submission for a license in order to fully participate/continue in the curriculum. The Missouri Pharmacist Intern License must remain valid through the last Advanced Pharmacy Practice Experience. Successful completion of all portions of the curriculum, both credit and non-credit requirements, are necessary for a student to meet graduation requirements and accrue sufficient internship hours toward pharmacist licensure eligibility.

The state of Missouri requires that an applicant for pharmacist licensure be 21 years of age, a graduate of an accredited school of pharmacy approved by the state's board of pharmacy and have on file with the board proof of 1,500 hours of internship experience in a retail/community or hospital pharmacy under the supervision of a registered pharmacist/preceptor. Students attending a pharmacy school in the state of Missouri must complete three rotations through the school's externship program of at least 160 hours each, for a total of 480 hours which will satisfy the internship requirements. Refer to the Missouri Board of Pharmacy website for the most up-to-date information as requirements can change at any time. Kansas internship requirements are presently 1,500 hours also.

Career Applications

Pharmacy Careers

A number of graduates choose to practice in community and hospital pharmacies, but a wide variety of career possibilities in the pharmacy profession are available. Pharmacists have a wide spectrum of practice environments to choose from in which their professional skills can be applied. Career information can be found through a variety of pharmacy professional associations. For information about these, see <http://pharmacy.umkc.edu/admissions/pharmd/faq/>. The doctor of pharmacy program also provides an appropriate academic base for students wishing to enter graduate study in the pharmaceutical sciences, chemistry and biology. Others have gone on to pursue degrees in medicine, dentistry and law.

Postgraduate training in the form of a residency and optional fellowship is recommended for all doctor of pharmacy graduates seeking advanced career opportunities in industry or academia.

Interdisciplinary Ph.D. Degree Requirements in Pharmaceutical Sciences and Pharmacology

See discipline-specific requirements for the Interdisciplinary Ph.D. program in Pharmaceutical Sciences and Pharmacology.

Academic Regulations and Requirements

Class Attendance

Regular attendance at classes is strongly recommended for students to progress satisfactorily through the pharmacy curriculum. Required attendance, however, is left to the discretion of the individual instructor and course coordinator. Students are responsible for familiarizing themselves with all course requirements and assignments.

Students are to report absences to the course coordinator as outlined in individual course policies (e.g., syllabus, course outline). Absences for official school or University activities will be handled through the course coordinator. The course coordinator must be notified prior to the event or activity. In either event, any notice sent to the course coordinator is for purposes of information only and does not relieve students of any responsibilities for completing work missed in their absence or non-adherence to individual course policies.

Absences from Scheduled Examinations

Unless specified otherwise on the course syllabus, students may be excused from a scheduled examination if they notify the course coordinator of their absence in advance of the examination and present a statement from their private physician confirming their illness on their return. The manner in which a justified absence from an examination will be made up will be determined by the course coordinator. Instructors do reserve the right to hold examinations outside of regularly scheduled class times. Such examinations will be noted in the School of Pharmacy schedule of classes.

Students may not be given an opportunity to make up an unexcused absence from an examination, and their scores shall be recorded as zero for a numerically scored exam and F for a letter-graded examination.

The only exceptions to this rule shall be when the student's absence is traumatic in nature (e.g., automobile accident, sudden death in family, etc.) or when prior arrangements have been made with the course coordinator.

Academic Loads

All coursework in the pharmacy curriculum is sequential and success depends upon the instruction and content from the previous semester and builds upon knowledge needed for subsequent semesters. Pharmacy students must enroll for the total program as outlined for each semester in the most current version of the curriculum.

Exceptions to Pharmacy Curriculum

Students are expected to satisfactorily complete all required courses and noncredit requirements in the pharmacy curriculum. Any exception to the normal curriculum must be approved by the school's Committee on Admissions and Academic Requirements. Petitions for Exception must

be submitted to the committee for its consideration at least one month prior to the start of the semester for which the exception is being requested.

Concurrent Enrollment

A pharmacy student may not enroll at another institution while also enrolled at UMKC unless prior approval has been obtained from the Committee on Admissions and Academic Requirements. Approval requires completion of a petition for exception or a Kansas City Area Student Exchange Program (KCASE) form. KCASE applications are available from the Registrar's Office.

Grading System

Refer to the grade-point system listed in the General Undergraduate Academic Regulations and Information section of this catalog and to the individual course syllabi. Note: Letter grade changes must be made no later than four weeks from the beginning of the next semester, to include summers, unless a shorter time frame be affixed by a course coordinator. This policy applies to School of Pharmacy division courses only and does not apply to incomplete grades. Doctor of Pharmacy students are not eligible for GPA Adjustment through the UMKC repeated courses policy.

Academic Standing for Doctor of Pharmacy Students

A student's academic standing is determined by their academic performance while progressing through the curriculum.

Terms and Definitions Associated with Academic Standing:

1. **Good Academic Standing:** A student not on academic probation nor on a readmission contract.
2. **Academic Concern:** Less than a C grade on a test or major assignment. Students meeting criteria for Academic Concern will be monitored through the Student Success Program.
3. **Academic Probation:** Less than a 2.00 term grade point average (GPA), with no grades of D, F, WF, or NC, **or** less than a 2.00 cumulative GPA in any **one** semester.
4. **Academic Dismissal:** Dismissal occurs for any of the following circumstances:
 - Receipt of a D, F, WF, or a NC grade in any coursework in a single semester
 - Receipt of less than a 2.0 term GPA while on academic probation
 - Placement on Academic Probation **two** consecutive semesters
 - Placement on Academic Probation **more than two** non-consecutive semesters

Students who withdraw from required coursework are ineligible to continue in the regular curriculum unless approved course equivalents can be successfully completed during the subsequent term.

5. Readmission on Academic Contract: A student who is academically dismissed can apply for readmission to the Doctor of Pharmacy program. If a student is readmitted, they are placed on an academic contract and must meet the conditions of their contract throughout the rest of their time as a UMKC pharmacy student. A student **will not be readmitted** if:

- They were dismissed for a second time after failing to meet the terms of their academic contract. A second dismissal causes the student to be irrevocably dismissed from the Doctor of Pharmacy program.

- They were a first year student who become academically ineligible to continue at the end of their first semester. Those students must reapply to the Doctor of Pharmacy program through the regular admission process if wishing to seek re-entry.

Leave of Absence:

Pharmacy students can petition for a leave of absence under the following stipulations:

- Student is eligible for reentry into the program.
- Petition must be initiated during the current term no later than the 12th week of class. Petitions for leaves due to catastrophic events will be given an exception.
- Petition includes a personal statement detailing reason for leave.
- Documentation from a health care professional is required supporting reason for leave if reason for leave is medical.
- Documentation from Department of Defense if leave is for military departure

Pharmacy students approved for leave of absence:

- Will be withdrawn from all courses as per University policy.
- Are approved for up to one year leave only. An extension may be requested if needed and well documented; the request for an extension cannot extend more than one year . Students who do not return by the date noted on their approved leave and who are not granted an approved extension will be required to reapply for admission.
- Will not be enrolled for pharmacy coursework in the subsequent semester(s) and must notify the Board of Pharmacy and their current pharmacy employer of the change in status as they are ineligible to maintain any current pharmacy intern license.

A student on a leave of absence will **not**:

- Be eligible for any financial aid disbursements during the semester(s) while on a leave of absence. A student on a leave of absence will be reported to lenders and loan service agencies as “non-attending” and will need to contact his/her lenders for information on possible repayment requirements, deferments and forbearances.
- Have access to campus computing labs, Student Health and Wellness Services, or any campus or university services available only to currently enrolled students. Students on a leave will be able to maintain their UMKC exchange email account, however.

Reasons for the Policy

The UMKC School of Pharmacy recognizes that students admitted to professional studies occasionally encounter academic difficulty. The reasons for encountering academic difficulty are diverse and may include financial pressure, inadequate study skills and personal situations. The School of Pharmacy has established policies designed to give all students an opportunity to be reinstated following withdrawal or poor academic performance.

Procedures for Students Placed on Academic Probation

All cases of probation will be reviewed by the Committee for Academic Requirements to determine the reasons for the unsatisfactory progress. Following review, the chair of the Academic Requirements Committee will notify the student of the Academic Probation status by letter. In order to be removed from Academic Probation status, the student must:

- Receive no less than a 2.00 term GPA in the next academic semester;
- Raise their cumulative GPA above 2.00 in the next academic semester.

Procedures for Students Eligible for Readmission

1. a. Readmission Post Leave of Absence

Petitions for readmission after a leave of absence will be reviewed by the Admissions Committee. Re-entry is contingent on their eligibility to continue, results of a new Criminal Background Check and space available in the class the student seeks to re-enter. Pharmacy students returning from a leave of absence must:

- Submit the petition for re-entry at least two months prior to the beginning of the term applying for re-entry. Upon re-entry will continue under the student's same academic standing status that was in place at the time the leave of absence began.
- Be held under the policies and procedures in place at the time of their re-entry.
- Complete a Criminal Background Check
- Supply a letter from a health professional and/or other entity verifying that the student can return to full-time, collegiate work.
- Provide any additional documentation from other entities as required by the School to assess readiness for readmission.
- Incorporate any curricular or policy changes into plan of study. Program and graduation requirements may change during a student's leave of absence. It is at the discretion of the School to define the program and graduation requirements once the student has been approved to return from a leave of absence.

1. Readmission of Eligible Students Post Academic Dismissal

Any student who is dismissed from the Doctor of Pharmacy program is notified in writing by the Chair of the Committee for Academic Requirements. Any student dismissed because of academic deficiencies cannot continue until the Dean or designee has rendered a decision on their petition for re-entry.

The following steps must be followed in order for an eligible student to be readmitted:

1. Prepare the petition:

- Meet with their Professional Development Adviser (PDA) to discuss their current situation and develop a petition for re-entry into the Doctor of Pharmacy Program. (See School of Pharmacy website at

<http://pharmacy.umkc.edu/docs/stuser/Petition.pdf> for petition form). Student prints and signs the petition form. The petition must also be reviewed and signed by the student's PDA.

- The objective section of the petition must state the student's intent. Options may include:
 - Immediate re-entry into the Doctor of Pharmacy program to complete professional elective coursework only and restart required coursework the subsequent year.

- Immediate re-entry into the Doctor of Pharmacy program to complete pharmacy coursework with their original class upon entry (this option is only possible if there is a remedial course that can be completed or student can complete their prerequisites before moving the next semester
- Change of major and complete coursework not associated with the Doctor of Pharmacy program for a semester, but that counts towards an alternate degree with plans to reapply during a subsequent term to a different class year. Students who wish to petition for re-entry and are eligible must submit a petition no later than one year after dismissal occurred.
- The petition must also include:
 - How they are better prepared for a professional program
 - A curricular plan based on coursework in need of completion and academic readiness
 - Corrective measures taken by the student since her/his dismissal. Corrective measures may include reduction in work hours, additional tutoring, decreasing commitments to student organization, or support through the Counseling Center.
 - Plans to repeat any course in which a grade of less than C was achieved as well as complete related coursework in a single semester for a minimum of 12 credit hours.

Note: Any student who is eligible for readmission works with their PDA to prepare the petition. A student who is not eligible for readmission can work the Associate Dean for Student Affairs or the Director of Student Affairs regarding options for their academic career beyond pharmacy and with an Academic Advisor from Student Services regarding logistics of transferring to another major. PDA's cannot advise students who are academically ineligible to continue in the program and should refer them to the Associate Dean for Student Affairs or the Director of Student Affairs.

1. Submit the petition to the Office of Student Services at least one week prior to the start of the semester for which the exception or request is being made. Any deviation from this deadline must be approved by the Associate Dean for Student Affairs. Petitions will not be accepted unless the petition has been reviewed and signed by the PDA or their designee.
2. Petitions are reviewed by the School of Pharmacy Dean or designee to determine the reason for unsatisfactory progress. The dean or designee will consider petitions based on:
 - Performance in previous course work completed by the student and other circumstances surrounding their dismissal
 - Corrective measures taken by the student to address academic readiness, financial problems, personal matters, and/or course work deficiencies,
 - Availability of space in the professional class the student seeks to enter
 - Successful completion of all required course work prior to the semester the student seeks to enter.
1. Petition is accepted, denied, or modified by the Dean or designee. The student will be notified in writing as to the decision. If granted, a written contract containing the terms of readmission is generated by the Dean or their designee. Terms of a readmission contract

are determined on a case by case basis. The student may be assigned to their original campus location or to an alternative campus location based upon space availability. This written contract is signed by the student and placed in their academic file.

Conditions of readmission include, but are not limited to:

- The student remains on academic contract and continues to meet the terms of their contract for the duration of their tenure in the Doctor of Pharmacy program.
- The student meets with their PDA as set forth in the readmission contract.
- The student does not receive any grades of NC, D, F or WF in any course during the remainder of their tenure in the Doctor of Pharmacy program.
- The student successfully completes sequence I before sequence II of courses that carry the I and II designation

Noncredit Requirements

All doctor of pharmacy students are expected to actively participate in professional activities offered or required by the School of Pharmacy. These activities mirror those expected in professional practice and are intended to better prepare the student for professional life. The following are requirements for all Pharm.D. students. Students will be notified if additional certifications or requirements apply.

The following requirements apply to Doctor of Pharmacy students (as defined for each item), unless a waiver is obtained from the appropriate school official:

Career Fair

All students must attend and participate at the Pharmacy Career Enhancement and Professional Preparation Day during their senior year unless previously excused, in writing, in advance of the event by the Dean or designee.

Certifications in Basic Cardiac Life Support/Cardio Pulmonary Resuscitation (BCLS/CPR) for Health Professionals and First Aid Training

All students must complete BCLS/CPR and First Aid. Certification must be uploaded in E-Value prior to enrollment in summer Introductory Pharmacy Practice Experiences [IPPE] or in Academic Service Learning. The certification must be valid through the last Advanced Pharmacy Practice Experiential [APPE] rotation.

Criminal Background Checks (CBCs)

The University, on behalf of the School of Pharmacy, agrees to inform students that as a condition of full admission to the Doctor of Pharmacy program and for participating in any affiliated institution or site [academic service learning and/or introductory and advanced pharmacy practice experiential rotations], they must obtain and provide verification of a current, criminal background check prior to that student's assignment at an affiliated hospital/institution/practice site. The affiliated hospital/institution/practice site hereby understands and agrees that the decision to permit a student to participate at that affiliated hospital/institution/practice site on the basis of the result of any criminal background check remains solely with the affiliated hospital/institution and not the University. Failure on the

student's part to submit to criminal background checks will delay progression or render a student unable to complete the professional degree program.

Drug Screens

Pharmacy students may be subject to random drug screens as a condition of participation in experiential education and patient care activities. The drug screen will be collected as per the policy and procedures of the site requesting the information. If the school is made aware of the results of any positive findings, they will be shared with the Associate Dean for Student Affairs for further evaluation.

Students may be required to complete random drug screens as part of compliance with the UMKC School of Pharmacy Alcohol and Drug Use Policy.

HIPAA

Students must successfully complete the University of Missouri online HIPAA tutorial **annually** starting prior to summer IPPE's.

- <http://www.muhealth.org/~compliance/modules.shtml>
- Select "HIPAA Online Education Module"

Note: completing the online HIPAA course does not relieve students from having to complete additional training as required by any individual practice site.

Intern Pharmacist Licensure

Students enrolled in the Doctor of Pharmacy curriculum at UMKC are required to obtain a valid Intern Pharmacist License issued by the Missouri Board of Pharmacy or provide proof of application submission for a license **by the start of semester three** in order to fully participate in the curriculum. The Missouri Intern Pharmacist License must remain valid through the last Advanced Pharmacy Practice Experience.

In order to apply and maintain a valid Missouri Intern Pharmacist License the following rules apply:

- Doctor of Pharmacy students must successfully complete [grade of C- or higher] all curricular requirements in semester one and two in order to apply for a Missouri Intern Pharmacist License.
- Pharmacist Intern License applications and renewals can take up to four to six weeks to be processed by the Missouri Board of Pharmacy so students should plan accordingly.
- Photocopies of all documentation (initial application and all accompanying materials) must be submitted by the student to the School of Pharmacy Student Services Office.
- Restrictions placed on any state Pharmacy Intern License by disciplinary action of a State Board of Pharmacy are reviewed by the Committee on Admissions and Academic Requirements on a case-by-case basis to evaluate if the student may participate in the curriculum. A student who holds any state Pharmacy Intern License with restrictions will be referred to the UMKC School of Pharmacy Honor Council for appropriate action.
- Disciplinary actions by any State Board of Pharmacy must be reported by the student to the Assistant/Associate Dean of Student Affairs within 30 days. Photocopies of all

disciplinary actions must be provided by the student. Failure to report disciplinary actions on a Pharmacy Intern License within 30 days will be considered academic dishonesty and all such cases will be referred to the UMKC School of Pharmacy Honor Council for appropriate action.

- Loss of a valid Pharmacy Intern License by disciplinary action of a State Board of Pharmacy renders the student ineligible to continue in the Doctor of Pharmacy curriculum.
- A student not eligible to continue in the Doctor of Pharmacy curriculum for any reason must notify the Missouri Board of Pharmacy and their current pharmacy employer if working in a pharmacy regarding the change in academic status.
- Successful completion of all portions of the curriculum, both credit and non-credit requirements, are necessary for a student to meet graduation requirements and accrue sufficient Internship hours toward pharmacist licensure eligibility.
- For more information and directions go to

http://pharmacy.umkc.edu/docs/stuser/Pharmacy_Internship_Information_12.pdf

Intern Pharmacist Liability

Students must provide proof of liability insurance prior to enrollment in Academic Service Learning (ASL) and IPPE. The insurance must remain valid through the last APPE rotation.

- http://pharmacy.umkc.edu/docs/Exp_Prog_Policy_9_Required_Documentation.pdf

Laptop/Tablet Requirements

All School of Pharmacy students are **required** to have a wireless capable mobile device (i.e., laptop computer, netbook, tablet device) as equipment to perform assignments and class activities. The MU **Tiger Tech** program through the MU Bookstore and the UMKC **RooTech** program through the UMKC Bookstore offer a selection of hardware and software, financing options and services at educational prices. **There is no required brand or model.** The mobile device must meet the following minimum capabilities and software requirements.

Functional Capabilities:

Wireless capable

Internet Browser (Internet Explorer, Mozilla Firefox, Safari, Google Chrome, etc.)

Word Processing capable (view, edit, create Word documents)

- Microsoft Office suites available at discounted student prices at bookstore

Internal/external video camera

Internal/external microphone

Software Requirements:

Virus Protection Software (McAfee, Norton, Microsoft Security Essentials, etc.)

Adobe Acrobat Reader (Free)

Tablet Applications:

Citrix Receiver™ application for Android/iOS (free application)

Tegrity application for Android/iOS (free application)

Missouri Family Care Registry List

All students must register prior to enrollment in their summer IPPE. See E-Value for instructions.

Immunization Requirements

Health care providers (HCP) are at risk for contracting and transmitting infectious diseases as a result of contact with their patients. All students must adhere to the UMKC Doctor of Pharmacy Student immunization requirements for their own protection and the protection of their patients. Submission of immunization certificates are a condition of acceptance and must be on file in the Office of Experiential Programs and remain current through out students tenure in the Pharm.D. program according to the following requirements:

- <http://pharmacy.umkc.edu/docs/stuser/StudentImmunFinal10-14-11.pdf>.

Pharm.D. Orientation

All entering students must attend and participate in all sessions of the Doctor of Pharmacy orientation prior to full matriculation into the First Professional Year unless they are excused, in writing, in advance of the event by the Dean or designee.

Professionalism Policies

Students must adhere to the all Professionalism Standards

Standards of Professional and Ethical Conduct and Honor Council Procedures

All students entering the Doctor of Pharmacy program receive a copy of the school's Honor Council Procedures and Standards of Professional and Ethical Behavior. These policies and procedures provide peer and faculty review to ensure these standards are upheld by each pharmacy student. In all cases of academic dishonesty, the instructor shall make an academic assessment about the student's grade on that work and in that course.

- http://pharmacy.umkc.edu/docs/stuser/Honor_Council_%20Procedures.pdf
- http://pharmacy.umkc.edu/docs/stuser/Course_Policy-Professional_Ethical_Behavior.pdf

Standards of Professional Attire and Classroom Behavior

Upon acceptance and entry into the School of Pharmacy, students begin a process of developing the knowledge, skills and attitudes that creates the fundamental core of the profession of pharmacy. The development of these competencies to a practitioner's level takes several years, but early initiation of these professional behaviors promotes the development of professionalism. In order to provide students direction to this end, upon entering the Doctor of Pharmacy program all students receive a copy of the school's Standards of Professional Attire and Classroom Etiquette and must abide by these standards.

- http://pharmacy.umkc.edu/docs/stuser/Course_Policy-Professional_Atire-Classroom_Etiquette.pdf

Safety Training

All pharmacy students are required to attend and complete required safety training and receive certification beginning with the First Professional Year and maintain certifications on an annual basis to include, but not limited to, Blood Borne Pathogens, Fire Hazard, Chemical Management, and Hazard Communication.

University of Missouri Code of Conduct Online Tutorial

The tutorial is completed by all Columbia-based students prior to enrollment in their summer IPPE and then retaken annually. Kansas City students will also complete the tutorial if they complete a rotation within the University Healthcare System.

- <http://muhealth.org/body.cfm?id=475>

White Coat Ceremony

All students are expected to attend and participate in the School of Pharmacy Professional Dedication Ceremony during the appropriate semester, unless previously excused, in writing, in advance of the event by the Dean or designee.

Note: The School of Pharmacy reserves the right to add other noncredit requirements as deemed necessary to protect the health and safety of the students or to further their education.

Directed Individual Study

The opportunity to undertake independent study is offered through Pharmacy 7497 courses. These courses may satisfy part of the professional elective requirement. Generally, the student receives the individual attention of a professor in the chosen field of study, and the project may involve any topic considered appropriate to the academic needs of the student. Once the student and instructor have agreed on a project, a permission-to-enroll form that includes an outline of the proposed course of study signed by the instructor must be reviewed and approved for credit by the school's curriculum committee. This must be done at least one month prior to the start of the term in which the coursework is to commence. Pharmacy 7497 requests that are part of a national, regional, or local competitive proposal or any part of a student organizational initiative may not be used for Directed Individual Study proposals.

No more than five credit hours of Pharmacy 7497 courses may be counted toward the degree requirements. Pharmacy 7497 courses are offered on a credit/no credit basis only.

Off-campus Learning Experiences

All Pharm.D. students are required to participate in experiential learning rotations. All of the experiential learning courses are conducted in actual practice settings (e.g., community, hospitals, nursing homes, etc.) under the supervision of licensed pharmacy practitioners— instructors who serve as exemplary role models in their particular types of pharmacy practice. Students are expected to provide their own transportation to sites assigned for the experiential learning.

Experiential sites may be located outside the Kansas City area. During the Introductory and Advanced Pharmacy Practice Experiential rotations, living and travel expenses are the responsibility of the student. Other expenses may apply.

Outside Employment

Because of the intensity of the professional curriculum, students are strongly urged to limit outside employment to no more than 10 hours per week while enrolled in the school. Students

experiencing academic difficulties as a result of commitments to outside employment may be asked by the school's committee on admissions and academic requirements to stop outside work until their academic difficulties are resolved.

Additional Policies and Stipulations

Students should refer to the UMKC School of Pharmacy website for additional policies and required forms.

Note: Program requirements and course descriptions are subject to change without notice after publication of this catalog. Pharmacy students are encouraged to remain in contact with their professional development adviser and professional staff in the Pharmacy Student Services Office to stay apprised of current program requirements in effect.

Doctor of Pharmacy

Doctor of Pharmacy Program

A pharmacist is a medication expert whose obligation is to deliver pharmaceutical care. Pharmaceutical care is "the responsible provision of drug therapy for the purpose of achieving a definite outcome that improves a patient's quality of life" (Hepler and Strand). A pharmacist's functions include but are not limited to:

- Identifying, preventing and/or resolving drug-related problems.
- Preventing disease and promoting good health practices through rational drug therapy.
- Providing drug information to the public.
- Educating other health care professionals about appropriate drug therapies.
- Collaborating with other health care professionals to improve health outcomes, especially as they relate to the appropriate use of medications.
- Ensuring that medications are delivered to the patient in a safe manner.

Many practice areas are covered by these responsibilities. The curriculum is designed to develop the competencies of graduates, allowing them to assume these responsibilities as well as the all of the current curricular outcomes expected of Doctor of Pharmacy graduates detailed on the School of Pharmacy Current Students website <http://pharmacy.umkc.edu/current-students>.

Curricular Outcomes Expected of Doctor of Pharmacy Graduates

Doctor of Pharmacy graduates must possess the basic knowledge, skills, attitudes, and values to practice pharmacy independently at the time of graduation. These Curricular Outcomes expectations are located on the UMKC School of Pharmacy website at <http://pharmacy.umkc.edu/current-students/>.

Admission Requirements

The doctor of pharmacy (Pharm.D.) degree provides minimum and advanced level competencies necessary for the graduate to assume a pharmacist's professional responsibilities and qualify for national and state licensure examinations. The program of study emphasizes clinical sciences and

training experiences. The training of doctor of pharmacy students concentrates on rational drug therapy decision-making within the inter-professional health care team.

Doctor of Pharmacy Minimum Course Requirements

A minimum of 56 credit hours of college level coursework, including the specified pre-professional requirements listed below, must be successfully completed, with a grade of C or higher, prior to admission to the professional pharmacy program of study. In addition, an overall cumulative grade-point average of 2.75, on a 4.0 scale and a science/math grade-point average of 2.5 on a 4.0 scale must be achieved on all college-level work completed through the end of the fall term preceding the year of entry to meet minimum eligibility requirements. Applicants should note that admission is competitive and that meeting the minimum requirements is not a guarantee of admission.

Equivalent, pre-pharmacy courses must be completed at UMKC or any regionally accredited college or university. Applicants should contact the UMKC Pharmacy Student Services Office to insure proper course equivalents have been met. Second year college pre-pharmacy courses, listed below, must be successfully completed within five years prior to admission entry date.

First Year College Pre-Pharmacy Courses / Minimum Semester Hours

General Chemistry I & II with Labs 8.0

*Calculus with Analytical Geometry 4.0

#General Biology I & II 6.0

**Physics with Lab 4.0

English Composition I & II 6.0

Public Speaking 3.0

American History I or II or Introduction to Political Science course covering U.S. Constitution 3.0

~Second Year College Pre-Pharmacy Courses / Minimum Semester Hours

Organic Chemistry I & II with Labs 8.0

Cell Biology 3.0

###Human Anatomy with Lab 4.0

Microbiology with Lab 4.0

Medical Terminology 1.0

~NOTE: Second year college pre-pharmacy courses must be successfully completed within five years prior to admission entry date.

*Calculus courses that are less than 4.0 credit hours or that do not include analytical geometry will not meet the minimum requirement.

#Preparatory or introductory biology courses will not meet the minimum requirement.

**Physics courses must be at least algebra and trigonometry based.

###Successful completion of two semesters of Human Anatomy and Physiology with labs will meet the Human Anatomy requirement.

NOTE: Successful completion of Human Biochemistry I & II within five years prior to admission entry date is encouraged as part of the pre-requisite requirement, but not required.

Pre-pharmacy coursework must total a minimum of 56 credit hours. General CLEP credits will not be used to fulfill the mathematics, biology, physics, or chemistry requirements. Advanced Placement Program scores through the College Board are accepted for some pre-pharmacy courses. Check acceptable scores and courses at <http://www.umkc.edu/registrar/transfer-credit/default.asp>. Contact an academic advisor in the School of Pharmacy regarding minimum score requirements and course transferability. Official scores from the College Board must be sent to UMKC for evaluation.

Additional information regarding degree program and admission requirements is located on the UMKC School of Pharmacy Prospective Students webpage located at <http://pharmacy.umkc.edu/admissions/pharmd/>. Applicants with questions regarding admission should contact the

UMKC School of Pharmacy

Student Services Office

2464 Charlotte Street / Kansas City, MO / 64108

(816) 235-1613 / Fax (816) 235-5562

pharmacy@umkc.edu

Application Procedures

Applications for the doctor of pharmacy program are accepted between June 15 through February 1 for consideration for admission to the class entering the following fall. Admission to the Doctor of Pharmacy program is competitive. Applicants who meet the minimum requirements for admission may not be accepted due to space availability restrictions. New students are admitted to the doctor of pharmacy program only in the fall of each year. As part of the process for application to the Doctor of Pharmacy program, all of the application steps and instructions located within the applications must be adhered to carefully and all required documents must be submitted no later than the February 1st deadline, unless otherwise stated.

1. Applicants must complete and submit the PharmCAS application with all supporting and required documentation and fee. The PharmCAS application is located at <http://www.pharmcas.org/>. Official transcripts(s) from each college and/or university attended showing all coursework attempted and completed through the Fall term prior to admission entry date must be submitted to PharmCAS. Applicants must submit recent, official scores from the Pharmacy College Admission Test (PCAT) to PharmCAS and an electronic PharmCAS reference from only specified categories as noted on the UMKC Doctor of Pharmacy application.
2. Applicants must complete and submit a UMKC Doctor of Pharmacy Application for Admission, to include supplemental materials and application fee. Pharm.D. Application for Admission is located at <http://pharmacy.umkc.edu/admissions/pharmd/apply> under Application Instructions.
3. Candidates for admission must meet and adhere to the *UMKC School of Pharmacy Minimal Technical Standards for Admission, Matriculation and Graduation* as part of the Pharm.D. Application. The Standards are listed on the application, as well as at <http://pharmacy.umkc.edu/current-students> under "Additional Policies". Students admitted to the Pharm.D. program must continue to meet and adhere to these standards throughout their tenure in the Pharm.D. program.
4. Students whose native language is not English must follow the UMKC English Proficiency Requirements for International Students. The minimum TOEFL score required is 220 computer score or 560 paper version.
5. Selected applicants must complete a formal, structured interview at the School of Pharmacy on the UMKC campus as a factor for admission. Applicants are notified by e-mail before their scheduled interview. Applicants should note that meeting minimum eligibility requirements does not automatically qualify an applicant for an interview. Based on the academic and application credentials of the applicant and the applicant pool, the school will select candidates for an interview. Students who do not qualify for the interview will also receive written notice.

Notification of Acceptance

Students will receive written notification of the school's decision concerning their applications.

Official supplementary college transcripts must be submitted to the Pharmacy Student Services Office upon completion of winter/spring and summer coursework. Final acceptance is contingent on submission and clearance of a criminal background check, good academic and behavioral standing, successful completion (grade of C or higher) of the specified minimum hours of required pre-pharmacy courses and any other coursework completed during the winter/spring and/or summer term prior to admission. Those applicants approved for admission will be required to confirm their acceptance and submit an advance deposit to guarantee their place in the entering class. This deposit is applied to the first term's educational fees and is not refundable.

Curricular Requirements

NOTE: Prior to 2012, Pharm.D. students completed one year of pre-requisite coursework and after entry into the Pharm.D. program were required to successfully earn passing grades in five years of required basic science and pharmacy specific coursework.

Beginning with the entering doctor of pharmacy class Fall 2012, the program requires four years of study after successful completion of a minimum two years of specified, pre-requisite coursework. For more information about the organization of coursework and curriculum requirements for the upcoming year, contact the UMKC School of Pharmacy Student Services Office.

The doctor of pharmacy degree program provides broad and general preparation in professional areas of practice with the intent that, on completion, graduates will be able to practice at a level sufficient to perform the established functions of a pharmacist. In addition, the Pharm.D. program prepares the student for advanced levels of professional practice. The major emphasis is on the clinical sciences and drug-related patient care.

This program is designed to provide advanced education and training in clinical pharmacy and drug information with particular emphasis on interprofessional team participation in the delivery of health care. To enable students to concentrate solely on this advanced professional coursework, those entering the doctor of pharmacy program are strongly encouraged to limit their work and/or intern hours during the academic year.

During the early portion of the curriculum, students complete their upper level basic science foundation courses, courses in pharmaceutical sciences, as well as introductory-level pharmacy courses and begin the professional skills development series.

As students progress, they engage in advanced lecture and laboratory coursework in the pharmaceutical and pharmacological sciences, introductory clinical sciences, and finish the professional development series in preparation for the Introductory Pharmacy Practice Experiences. In addition, students select professional electives designed to reinforce the pharmacy career track.

In the later stages of the curriculum Pharm.D. students pursue advanced coursework in the clinical sciences to include pharmacotherapeutics, evidence based medicine, pharmacy law, and pharmacy practice management. During this period, students also finish professional electives. Each student will complete Introductory Pharmacy Practice Experiences (IPPE) during the curriculum. The IPPE's allow students to take knowledge gained in the didactic curriculum and apply these skills in a variety of practice settings creating a foundation from which to build. The IPPE coursework will be interspersed throughout the didactic curriculum and must be completed before the Advanced Pharmacy Practice Experiences (APPE) occurring in the final year of the program. IPPE opportunities may occur in simulated practice settings, community pharmacies, and health systems.

The final two semesters encompass the APPEs. Drug literature evaluation, instruction, and practice will be an integral part of the APPEs. Each student will be exposed to a core number of required and elective APPEs.

Doctor of Pharmacy APPEs are a series of required and elective experiences designed to complete the student's education through supervised participation in pharmacy practice in a variety of settings. Candidates are expected to learn by assuming the pharmaceutical care responsibilities of a pharmacist under the direct supervision of a faculty preceptor. Experiences will include direct interaction with diverse patient populations in a variety of practice settings and involve collaboration with other health care professionals. The emphasis of the candidate's activities will be the management of pharmacotherapy in patients at the assigned practice site. Candidates will also be engaged in ongoing drug utilization, patient and healthcare provider education programs and other pertinent patient care and clinical research activities involved in the provision of patient care. Clinical responsibilities are expected during all pharmacy practice experiences however, there are experiences in which the primary focus may be different. In these, the emphasis may be on the organization, technical and administrative aspects of providing pharmaceutical care.

IPPE and APPE prerequisites include satisfactory completion of all degree requirements prior to the respective term of the professional curriculum that these experiences take place. Candidates must also complete and submit all required documentation for the Office of Pharmacy Experiential Programs as they are notified. All immunizations and specified required documents must be on file with the Office of Experiential Programs before IPPEs and APPEs begin and must remain current through the last experiential rotation. Students enrolled in pharmacy practice experiences may not enroll in didactic courses outside of the required Pharm.D. curriculum without prior approval of the Director of Experiential Learning.

Because pharmacy is a profession undergoing rapid change, the curriculum is subject to continual review and modification. As society's needs for specific types of pharmaceutical service change, the curriculum will change as well. To assure the best pharmacy education for its students, the School of Pharmacy reserves the right of making judicious changes and improvements in course sequence, course content, or other program requirements at any time that must be completed and adhered to in order to meet graduation degree requirements.

Pharm.D. Graduation Requirements

To graduate, Pharm.D. candidates that entered the program prior to Fall 2012 must meet the following course requirements in addition to the 31 credit hour prerequisite requirements:

Semester One

PHARM 7101 Professional Skills I: The Profession of Pharmacy 2

PHARM 7125 Medical Terminology (a) 1

PHARM 7151 Introduction to Pharmacy Law 1

LS-ANATO 119 Human Anatomy 3

LS-ANATO 119L Human Anatomy Lab 1

CHEM 321 Organic Chemistry I 3

CHEM 321L Organic Chemistry I Lab 1

BIOLOGY 202 Cell Biology 3

COMM-ST 110 Fund. of Eff. Speaking and Listening 3

Total 18 Semester Hours

Semester Two

PHARM 7110 Professional Skills II: Pharmacy Calculations 2

PHARM 7125 Medical Terminology (a) 1

PHARM 7233 U.S. Health Care System 3

CHEM 322R Organic Chemistry II 3

CHEM 322L Organic Chemistry II Lab 1

LS-MCRB 121 Microbiology 3

LS-MCRB 121L Microbiology Lab 1

Course covering the U.S. Constitution 3

HISTORY 101 American History to 1877,

HISTORY 102 American History Since 1877 or

POL-SCI 210 American Government

Total 16 Semester Hours

(a) PHARM 7125 must be successfully completed during either the fall or spring semester.

Semester Three

PHARM 7202 Pharmaceutics I 4

PHARM 7341 Medicinal Chemistry I 3

LS-BIOC 365 Human Biochemistry I 3

LS-PHYS 399 Pharmacy Physiology I 3

Total 13 Semester Hours

Semester Four

PHARM 7203 Pharmaceutics II 3

PHARM 7344 Medicinal Chemistry II 3

PHARM 7414 Professional Skills Development III: Patient-Centered Communication and Ethical Practice 3

LS-BIOC 366 Human Biochemistry II 3

LS-PHYS 400 Pharmacy Physiology II 3

Total 15 Semester Hours

Semester Five

PHARM 7245 Top 200 Drugs I (b) .5

PHARM 7307 Advanced Pathophysiology 4

PHARM 7361 Pharmacology I 4

PHARM 7325 Professional Skills V: Professional and Patient Communications 3

PHARM 7465 Economics of Health and Medicine 3

Professional Electives (c) 2

PHARM 7434 Professional Skills IV: Pharmacy Preparations and Practice 3

PHARM 7199 Pharmacy Grand Rounds (*) .25

Total(a)19.75 Semester Hours

(*)Pharmacy Grand Rounds is a continuous course completed over two semesters worth .25 credit hours. If successfully completed, students will receive an incomplete at the end of the fall semester which is converted to a grade at the end of the Spring semester upon successful completion. Re-enrollment through Pathway during the Spring semester is not required.

Semester Six

PHARM 7245 Top 200 Drugs I (b).5

PHARM 7303 Pharmacokinetics & Biopharmaceutics 4

Professional Elective (c) 2

PHARM 7362 Pharmacology II 5

PHARM 7405 Pharmacotherapy I 3

PHARM 7463 Toxicology 2

PHARM 7334 Pharmacy Based Immunization Delivery 2

PHARM 7279 Aseptic Technique and Sterile Product Preparation .5

Total(a)19

(b) PHARM 7245 must be successfully completed during either the fall or spring semester.

Summer Semester

PHARM 7378 Introduction to Community Pharmacy Practice 2

PHARM 7379 Introduction to Health-Systems Pharmacy Practice 2

Semester Seven

PHARM 7389 Advances in Drug Therapy 2
PHARM 7345 Top 200 Drugs II(d).5
PHARM 7406P General Medicine I(e) 4
PHARM 7420 Health Assessment & Pharmacotherapy II 7
PHARM 7451 Pharmacy Law 2
Professional Elective(s)(c) 4
PHARM 7199 Pharmacy Grand Rounds (*) .25
Total(d)19.75 Semester Hours

Semester Eight

PHARM 7326 Evidence Based Medicine 5
PHARM 7345 Top 200 Drugs II(d).5
PHARM 7485P Health Assessment & Pharmacotherapy III 7
PHARM 7466 Pharmacy Practice Management 3
Professional Elective (c) 2

Total(d)17.5 Semester Hours

(c) A minimum of 10 credit hours of professional elective coursework must be completed while enrolled in the School of Pharmacy. No more than five credit hours of the 10 hours can come from courses outside the School of Pharmacy. Coursework completed before entry in the professional program will not transfer as professional elective credit. General and professional elective courses cannot be double counted.

The following is a partial list of courses approved to satisfy professional electives. A current list of approved professional electives is available on the School of Pharmacy home page at <http://pharmacy.umkc.edu/> under the Current Students section.

- Principles of Nutritional Support
- Nuclear Pharmacy and Medicine
- Hospital Pharmacy
- Investigative Toxicology
- Zoonotic Illnesses
- The Pharmacists Role in Global Health
- Islam and Modern Practice of Medicine and Pharmacy
- Academic Service Learning
- Pediatric Pharmacotherapy
- Comprehensive Diabetes Management
- Career Planning
- Pharmacy in the 21st Century - Technology for Improved Patient Care
- Introduction to Dietary Supplement Therapeutics
- Oncology and Hematology Pharmacotherapy
- Concepts & Approaches of Epidemiology & Statistics in Research
- Pharmacy Seminar
- Directed Individual Study

(d) PHARM 7345 must be successfully completed during either the fall or spring semester.

(e) Students enroll in General Medicine I during the fall semester for 4.0 credit hours. Half of the General Medicine I course is completed during the fall and the remainder of the course during the spring semester. Spring re-enrollment is not required.

Semester Nine

Advanced Pharmacy Practice Experiential Rotations Hours vary
PHARM 7199 Pharmacy Grand Rounds (*) .25

Semester Ten

Advanced Pharmacy Practice Experiential Rotations Hours vary
Refer to the School of Pharmacy Office of Experiential Programs for Introductory and Advanced Pharmacy Practice Experiential course requirements and policies.

Graduation Requirements

To graduate, students must successfully complete all credit and non-credit requirements as listed. The curriculum includes a minimum of 200 hours (including the 31-hour pre-professional coursework requirement) and all non-credit requirements in effect at the time of completion. Prior to graduation, students also must demonstrate proficiency in English through completion of the Written English Proficiency Test. Within the 200 hours, the following minimums must be met:

Mathematics/Basic Science coursework 53 hours

Pharmacy Didactic coursework 81 hours

Professional Electives 10 hours

IPPE and APPE Experiential Learning 44 hours

Humanities and social science course requirements (including pre-pharmacy coursework):

English Composition 6 hours

Fundamentals of Effective Speaking & Listening 3 hours

U.S. Constitution course 3 hours

2 - 4 Doctor of Pharmacy Curriculum Academic Year 2012-forward
Approved 12/1/2010; Revised 11/2011

Pharm.D. Admission Prerequisites			
Pre-Pharmacy		Pre-Pharmacy	
CHEM 211 / CHEM 211L General Chemistry I w/lab	5.0	CHEM 212 / CHEM 212L General Chemistry II w/lab	5.0
MATH 210 Calculus I	4.0	PHYSICS 210 General Physics w/lab	4.0

PHARM 7199 Pharmacy Grand Rounds	.25		

Notes:

- Pharmacy 7199 Pharmacy Grand Rounds is a continuous course completed over two semesters worth .25 credit hours. If successfully completed, students will receive an incomplete at the end of the Fall semesters which is converted into a Credit grade at the end of the Spring semesters upon successful completion of course requirements. Re-enrollment in the course during the Spring semesters is not required.
- Students must provide all required documentation as listed on the Experiential Programs website at <http://pharmacy.umkc.edu/academic-divisions/experiential-programs> no later than the beginning of any Introductory Pharmacy practice Experience [IPPE], unless stated otherwise, and these credentials and requirements must remain current through the end of the last Advanced Pharmacy Practice Experience [APPE].
- Eight credit hours of professional elective course work must be successfully completed prior to enrollment in Advanced Pharmacy Practice experiences. Visit <http://pharmacy.umkc.edu/current-students/> for a list of approved professional elective offerings.

Students must refer and adhere to the Policies regarding IPPE and APPE completion and enrollment on the Office of Experiential Programs (OEP) website at <http://pharmacy.umkc.edu/academic-divisions/experiential-programs/>

- Pharmacy 7406P General Medicine I is a continuous introductory pharmacy practice experience completed over Semester 5 and 6 worth 4 credit hours. If successfully completed, students will receive an incomplete at the end of Semester 5 which is converted to a grade at the end of Semester 6 upon successful completion. Re-enrollment during Semester 6 in Pharmacy 7406P is not required.

- Students must complete 36 credit hours of Advanced Pharmacy Practice Experiences [APPE] over Semesters 6a-8. APPE prerequisites include satisfactory completion of all credit and non-credit degree and course requirements prior to Semester 6a of the professional curriculum in addition to meeting the policies as stated on the Experiential Programs web site at <http://pharmacy.umkc.edu/academic-divisions/experiential-programs/> .
- Because pharmacy is a profession undergoing rapid change, the curriculum is subject to continual review and modification. As society's needs for specific types of pharmaceutical service change, the curriculum will change as well. To assure the best pharmacy education for its students, the School of Pharmacy reserve the right of making judicious changes and improvement in course sequence, course content, or other program requirements at any time that must be completed and adhered to in order to meet graduation requirements.

Prospective Applicants are encouraged to:

- Visit <http://pharmacy.umkc.edu> to see equivalency sheets for schools in Missouri and Kansas to see how prerequisites will transfer to UMKC.
- Visit <http://www.umkc.edu/registrar/transfer-credit/default.asp> to see how UMKC views AP & IB course work.

Pre-Medicine/Pre-Health

Description

Choosing an Undergraduate Major

Pre-Medicine/Dentistry

Advising

College of Arts and Sciences Track

School of Biological Sciences Track

Honors Program

Student Organizations

Description

Among the fastest-growing career areas are the health-related professions and this trend is likely to continue in the 21st century, according to the U.S. Department of Labor. These employment opportunities require specialized training and one to four years of college-level studies in the appropriate pre-professional curricula. The pre-medicine/pre-health tracks are designed to help prepare students for future careers in the health arena and guide them through the process of applying to the various professional programs in health care.

The pre-medicine/pre-health tracks designed by the College of Arts and Sciences and the School of Biological Sciences assist students following a traditional path toward ultimately earning a professional degree in a medical or health care field. Most students first earn a bachelor's degree, followed by training in a professional program such as a four-year medical or dental school. These tracks are distinctly different from the unique six-year programs offered by UMKC in medicine and pharmacy described elsewhere in this catalog. For information about dentistry please see the UMKC Dental Program in the Graduate Catalog.

Some of the pre-professional programs in health care include:

Pre-Dental Hygiene

Pre-Dentistry

Pre-Health, which includes advising for careers in:

- Chiropractic
- Clinical Perfusion
- Health Administration
- Health Information Management
- Nutrition/Dietetics
- Occupational Therapy
- Optometry
- Physical Therapy
- Podiatry
- Respiratory Therapy
- Veterinary Medicine

Pre-Medicine (allopathic and osteopathic)

Pre-Nursing

Pre-Pharmacy

Medical Technology (see section under School of Biological Sciences)

Choosing an Undergraduate Major

Following the pre-medicine or pre-health track means taking specific courses that professional programs require for admission, but "pre-medicine" or "pre-health" **are not actual degrees**. Students need to choose a major field of study to combine with one of these tracks. Students can choose to follow these tracks through the College of Arts and Sciences or the School of Biological Sciences, depending on the major selected. Professional schools accept individuals from a variety of educational backgrounds and majors. When choosing a major, it is wise for students to consider their personal interests and strengths as well as possible alternative career goals.

The School of Biological Sciences offers degrees in biology, including a bachelor of science in biology with an emphasis in the cellular and molecular basis of health and disease for pre-medicine students, and a pre-dentistry concentration for pre-dentistry students. Undergraduate students in the biological sciences also have the opportunity to work with faculty mentors in life sciences research.

The College of Arts and Sciences offers degree choices and medically related undergraduate research in areas spanning the sciences, social sciences and humanities. Popular majors to combine with pre-medicine and pre-health include psychology, chemistry, communication studies, physics, English, Spanish, and philosophy. Many other combinations in the 18 academic departments are possible, and advisers in the tracks will help students apply their interests to design the right combination.

Pre-Medicine/Dentistry

The purpose of the pre-medicine/dentistry curriculum is to prepare the student for application to medical/dental schools. Students may complete the pre-medicine/dentistry curriculum within any major.

The courses recommended in the pre-medicine/dentistry curriculum do not constitute an academic major but are the courses required for entrance into the majority of medical/dental schools in the United States and Canada. They also provide students with the information needed to obtain top scores on the Medical College Admission Test (MCAT) and Dental Admissions Test (DAT), which are required for entrance into medical and dental schools.

In addition to gaining a strong foundation in the sciences, pre-medicine/dentistry students also will receive support services to help them best prepare for application to medical or dental school.

For students considering other health professions or seeking admission to specific programs with additional prerequisite courses, the curriculum may be tailored to meet these requirements.

Medical/Dental School Admission Requirements

A. Two semesters (eight semester hours) of general biology with corresponding laboratories:

- BIOLOGY 108 General Biology I
- BIOLOGY 108L General Biology I Lab
- BIOLOGY 109 General Biology II
- BIOLOGY 109L General Biology II Lab

B. Two semesters (10 semester hours) of general chemistry with corresponding laboratories:

- CHEM 211 General Chemistry I
- CHEM 211L General Chemistry I Lab
- CHEM 212R General Chemistry II
- CHEM 212LR General Chemistry II Lab

C. Two semesters (eight semester hours) of organic chemistry with corresponding laboratories:

- CHEM 321 Organic Chemistry I
- CHEM 321L Organic Chemistry I Lab
- CHEM 322R Organic Chemistry II
- CHEM 322L Organic Chemistry II Lab

D. Two semesters (eight semester hours) of physics including laboratories:

- PHYSICS 210 General Physics I
- PHYSICS 220 General Physics II

E. Two semesters (six semester hours) of English composition:

- ENGLISH 110 English I: Introduction To Academic Prose
- ENGLISH 225 English II: Intermediate Academic Prose

In addition to the admission requirements listed above, most medical and dental schools recommend more advanced courses in biology, such as cell biology, genetics and biochemistry, and/or additional chemistry courses. Students should also take upper-level courses that demonstrate the requisite intellectual discipline and analytical and problem solving skills necessary to succeed in medical or dental school. Students are strongly encouraged to balance their work in the sciences with courses in communication studies, computer science, English literature, philosophy, psychology and sociology. A broad understanding of health care and medicine is also expected and work and/or volunteer experiences, including physician shadowing, in settings such as health care agencies, hospitals and physician offices is recommended.

UMKC School of Medicine MD Completion program

While the UMKC School of Medicine is primarily a combined-degree (BA/MD) program, it annually accepts a limited number of MD-only students who have completed their pre-medical studies and baccalaureate degrees. Students completing their pre-medical studies at UMKC and applying to the School of Medicine have the advantage of taking courses with medical students, interacting with faculty who also teach at the medical school and securing recommendations from individuals familiar with the School of Medicine's curriculum and faculty. For more information about this program or to request an application, contact the Admissions Office at the School of Medicine.

UMKC School of Dentistry Reserved Admission Program

The Reserved Admission Program for the Doctor of Dental Surgery (DDS) degree at the UMKC School of Dentistry enables highly motivated, ambitious, talented students to pursue their dream of becoming a dentist. Because admission to the Reserved Admission Program is very competitive, qualified reserved admission program students will have a reserved seat in a future UMKC School of Dentistry DDS Program class of their choosing, and they will not have to compete further for admission into the UMKC dental school. Entry into the program is available to students from Missouri and Kansas.

To be eligible to apply for Reserved Admission you must have completed a minimum of but not more than four semesters of college credit while being continuously enrolled in full-time course loads (a minimum of 15-18 credit hours per semester). Your science grade point average must be at least 3.60 in a degree-seeking program including prerequisite courses.

For more information about this program or to request an application, contact the Office of Student Programs at the School of Dentistry, 816-235-2080.

Advising

Experienced advisers in the College of Arts and Sciences and the School of Biological Sciences are knowledgeable about the professional school admission processes.

Advisers guide students in:

- Choice of majors
- Choice of courses
- Volunteer and shadowing opportunities
- Undergraduate research options
- Other health care professions
- Career alternatives

Advisers also give students invaluable help with:

- The professional school application process
- Preparation for professional school admission tests (MCAT, DAT, OAT, VCAT, etc.)
- Letters of recommendation
- Writing the personal statement
- Successful interview strategies

College of Arts and Sciences Track

Students following the pre-medicine/pre-health track can enhance their preparation for health care careers through any major in the College of Arts and Sciences. While the relationship to majors such as chemistry or physics is clear, students may be surprised to discover how their interests in other majors within the College of Arts and Sciences will strengthen their abilities as future health care providers. For example:

Students combining a major in psychology with the pre-medical/pre-health track will learn how psychology influences health and wellness, the prevention of disease and the healing process. Students majoring in communication studies will learn the critical importance of communication in health care, from the doctor-patient relationship to the interpersonal communication between members of a health care team to the power and politics of mass media.

Philosophy majors will apply bioethical principles to "real world" dilemmas such as physician-assisted suicide.

Pre-medical and pre-health students can easily combine any major within the College of Arts and Sciences with the prerequisites for medical, dental or other health professions schools. The College also offers:

The pre-medical/pre-dental curriculum which may be combined with any major within the College of Arts and Sciences. This allows students the opportunity to complete the necessary prerequisite courses for admission to medical/dental schools in the United States and Canada.

A freshman seminar for pre-health/pre-medicine students. Guest speakers discuss getting into medical school, and students investigate medical case studies and explore important issues such as "Is health care a right or a privilege?"

Interdisciplinary courses that examine the complicated nature of health care. Topics include the doctor-patient relationship, other aspects of health communication, health promotion and prevention and controversial issues in bioethics.

Medically related research projects in such areas as clinical health psychology, chemistry, and physics. Current topics include disease prevention, psychological and communication barriers to adherence, and factors linking obesity, smoking, alcohol abuse, diet and exercise with cancer, cardiovascular disease and HIV/AIDS. Research partners include the Mid-America Heart

Institute, Saint Luke's Hospital, UMKC Schools of Dentistry and Medicine and the Kansas City Free Health Clinic.

Dental-related research projects which investigate topics such as pain management, disease prevention, psychological barriers in the healing process and the use of chemistry and physics to identify and construct new polymers for use as posterior restorations.

The Gerontology Certificate allows students to explore relevant medical and social issues of the new millennium as people live longer, our population ages, and "care" becomes as important as "cure."

The Healing and Humanities Minor. Faculty from the College of Arts and Sciences offer courses that enhance an student's ability to understand the complicated world of health care and the relationship of healthcare with the humanities and social sciences. Students can combine the healing and humanities minor with any major in the College of Arts and Sciences or the School of Biological Sciences. Through courses for the healing and humanities minor, students may strengthen their preparation for health careers by improving their communication skills, their appreciation of diversity and the arts, their understanding of bioethical dilemmas and their knowledge of the values, economics, and politics of health care. See the Healing and Humanities Minor for more information.

jordan@umkc.edu

Students interested in the scientific aspects of medicine or dentistry may find the School of Biological Sciences to be the right place for them. A major in biology incorporates courses in biology, chemistry and physics with a broad foundation in the social sciences and humanities. By meeting the degree requirements for the bachelor of science in biology with the cellular and molecular basis of health and disease emphasis, students will automatically fulfill all of the prerequisites and the upper-level biology courses which are highly recommended by most medical schools. The bachelor of science in biology with the pre-dentistry concentration allows students to complete all of the prerequisites and upper-level biology courses strongly suggested by most dental schools. More information about this can be found in the School of Biological Sciences section of this catalog.

Investigate the molecular basis of disease. Courses such as genetics, cell biology, biochemistry and molecular biology examine the essential elements of modern biological sciences. Electives like neurobiology, endocrinology, immunology and virology emphasize experimental approaches that lay the foundation for the treatment and prevention of disease.

Perform hands-on experiments with cells and tissues in facilities equipped with cutting-edge technology. Laboratory courses such as microbiology and histology bring textbook topics to life and allow students to learn the basics of research.

Discover and create new knowledge. In cooperation with faculty, students apply powerful techniques like automated DNA sequencing, robotic genomic analysis and electron and confocal microscopy, to current biomedical problems. Students electing to do their own research may open many doors for their future.

Pursue personal interests in biology. From the study of plants to the study of insects, students can explore practical applications like drug discovery and disease control by selecting from a variety of courses. Field trips and outings allow students to observe biological principles in action.

Honors Program

The College of Arts and Sciences and the School of Biological Sciences both offer Honors Programs for students with exemplary academic performance. The College of Arts and Sciences' program uses an interdisciplinary approach that encompasses studies in the sciences, humanities and social sciences, and engages students in a weekly Honors Colloquium and honors-designated courses.

The School of Biological Sciences' program combines a requirement for high levels of academic achievement with an undergraduate experimental research project and enrichment activities like study trips and seminar attendance.

Student Organizations

There are more than 200 active student organizations (including Greek) at UMKC that promote student leadership, volunteerism, community service and socialization. Some of the popular organizations among pre-health students include:

Pre-Medical Society

This is a university-wide student organization that provides various extracurricular opportunities for students to learn about the health care professions and to network with other like-minded students. Previous meetings have included discussions on Bioethics, HMOs, organ donation, complementary medicine, genetics and gene therapy, cloning, HIV/AIDS and taking patient histories. The society regularly hosts recruiters from medical schools as well as representatives from volunteer opportunities in the community.

Pre-Dental Society

This is a university-wide student organization that provides various extracurricular opportunities for students to learn about dental-related professions and to network with other like-minded students. Previous meetings have focused on the application process for dental schools, preparation for the DAT, and volunteer opportunities in the community. Guest speakers include current dental students, practicing dentists, and dental school admission representatives.

Pre-Dental Hygiene Society

This newly formed student organizations allows pre-dental hygiene students to network together and learn about the profession of dental hygiene. Meeting topics include tours of the UMKC School of Dentistry and how to prepare for entry into dental hygiene programs. Guest speakers include dental hygiene faculty, students, and current practitioners.

Biological Sciences Student Government (BSSG)

The BSSG plans informational and social activities for students. Past activities include guest speakers from the Kansas City Police Department Forensics Unit, Children's Mercy Hospital and the Missouri Department of Natural Resources, picnics and group ice-skating. Pre-medical students can participate in the School of Biological Sciences' annual hosting of distinguished biomedical scientists, including Nobel Prize winners and National Academy of Sciences members, addressing frontier issues in biomedicine.

Arts and Sciences Student Council

The council aims to provide an interdisciplinary body in which Arts and Sciences students can provide input on decisions and policies of the College. The council works to enhance student-faculty interaction and communication, allocate its authorized budget and insure that Arts and Sciences students' needs, desires and attitudes are correctly represented to the administration.

Alpha Eta Chapter of Alpha Phi Omega

This organization carries out service programs aimed at serving the chapter, campus, community and nation with emphasis on serving primarily the UMKC campus and the Kansas City area.

Institute for Leadership and Service

This university-wide organization focuses their mission on meeting community needs, improving participant's lives, strengthening communities, and building partnerships. Through ILS activities, participants hone their leadership skills and community service experiences to complement their dedication to service in the health professions. Since health professional schools value these experiences, pre-health students can benefit from being involved with the ILS program.

Psychology - For the most current listing, see the Department of Psychology website.

Robin K. Aupperle; assistant professor of psychology; B.A. (Oklahoma State University); M.A., Ph.D. (University of Kansas)

#*Kymberley K. Bennett; assistant professor of psychology; B.A. (University of Redlands); Ph.D. (University of Nevada, Reno)

#*Jannette Berkley-Patton; assistant professor of psychology; B.S., M.A., Ph.D.(University of Kansas)

#*Amanda S. Bruce ; assistant professor of psychology; B.A. (University of Kansas); M.S., Ph.D. (Pennsylvania State University).

#*Jared M. Bruce ; director, undergraduate psychology program and assistant professor of psychology; B.A. (University of Maine); M.S., Ph.D. (Pennsylvania State University).

***Carl Calkins** ; director, UMKC institute for human development and professor of psychology; B.A. (State University of New York); M.A. (Southern Connecticut State College); Ph.D. (Vanderbilt University).

#*Delwyn Catley ; professor of psychology; Bachelor of Commerce (University of the Witwatersrand, Johannesburg, South Africa); M.S. (Purdue University); Ph.D. (State University of NY at Stony Brook).

#*Diane L. Filion ; associate dean, college of arts and science and professor of psychology; B.A. (Eastern Washington University); M.A., Ph.D. (University of Southern California).

Leah K. Gensheimer ; associate professor of psychology; B.S. (University of New Haven); M.A. (Adelphia University); Ph.D. (Michigan State University).

#*Kathleen J. Goggin ; associate professor of psychology; B.A. (California State University, Dominguez Hills); Ph.D. (San Diego State University/University of California, San Diego).

Seng-Lark Lim; assistant professor of psychology; **B.A., M.A. (Korea University); Ph.D. (Indiana University).**

Megan Littrell-Baez;director of undergraduate program advising office and assistant teaching professor; B.S. (Louisiana State University); M.a., Ph.D. (Colorado State University).

#* Jennifer Lundgren ; chair, department of psychology and associate professor of psychology; B.S. (Oklahoma State University); M.A., Ph.D. (University at Albany, State University of New York).

Joan M. McDowd; [director, Ph.D. program: experimental health psychology track and professor of psychology; B.A. \(Washington University\); M.A., Ph.D. \(University of Toronto\).](#)

***Tamera Burton Murdock** ; professor of psychology; B.A., M.S. (University of Pennsylvania); Ph.D. (University of Delaware).

***Melisa Rempfer** ; director, Ph.D. program; clinical psychology (health emphasis) track and associate professor of psychology; B.S. (University of Iowa); M.A., Ph.D. (University of Kansas).

***Lisa Terre** ; director of the ma in psychology program and associate professor of psychology and medicine; B.A. (Rutgers University); M.A. (Roosevelt University); Ph.D. (Auburn University).

Retired Faculty

Jim Collins, associate professor emeritus of psychology.

Jay Hewitt, associate professor emeritus of psychology.

Joseph B. Hughey, ; professor emeritus of psychology; B.A., M.A. (Wichita State University); Ph.D. (University of Tennessee).

Charles L. Sheridan, professor emeritus of psychology.

Social Work

@ Associate or Adjunct Graduate Faculty

*** Members of UMKC Graduate Faculty**

Members of UMKC Doctoral Faculty

+ Located at UM-St. Louis campus

Graduate Social Work

Gloria Anderson; Clinical Instructor School of Social Work; B.A. (Dallas Baptist University); M.S.W. (University of Missouri-Kansas City).

Rosalyn M. Bertram ; Associate Professor of Social Work; B.A. (San Francisco State University); M.S.W. (San Francisco University); Ph.D. (University of South Florida).

Betty Blackmon ; Assistant Professor of Social Work; B.A. (Northeastern State University); M.S.W., J.D. (University of Kansas).

J. Larry Dyer ; Clinical Instructor School of Social Work; B.A. (University of Texas); M.A. (North Texas State University); M.S.W. (University of Kansas); Ph.D. (University of Kansas).

***Monica Nandan** ; Chair, Program Director and Associate Professor of Social Work; B.Com. (University of Poona, India); MBA (Augusta University); M.S.W., Ph.D. (Florida State University).

Bob Prue; Assistant Professor of Social Work; M.S.W., Ph.D. (University of Kansas)

Lee Rathbone-McCuan ; Professor of Social Work; B.A. (University of Kentucky); M.S.W., Ph.D. (University of Pittsburg).

Patricia Scott; Assistant Professor of Social Work; M.S.W., Ph.D.(University of Wisconsin).

Elaine Spencer-Carver ; Director of Field Education School of Social Work; B.S. (Stephen F. Austin State University in Nacogdoches, Texas); M.S.W. (University of Kansas); Ph.D. (Kansas State University).

Rhonda J. Weimer ; Clinical Instructor School of Social Work; B.A. (University of Colorado); M.S.W. (University of Kansas); L.C.S.W. (Missouri); L.S.C.W. (Kansas).

Sociology

*** Members of UMKC Graduate Faculty**

Members of UMKC Doctoral Faculty

+ Located at UM-St. Louis campus

Sociology

****Jeffrey S. Bennett** ; assistant professor of anthropology and religious studies; B.A. (University of Washington); M.A., Ph.D. (University of Chicago).

****Linda M. Breytspraak** ; chair, department of sociology, and associate professor of sociology and medicine; B.A. (Colorado College); M.A., Ph.D. (Duke University).

****Miguel A. Carranza** ; professor of sociology and latina/latino studies program; B.A. (Kearney State College); M.A., Ph.D. (University of Notre Dame).

Thomas E. Carroll ; associate professor emeritus of sociology; B.A. (Indiana University); M.A., Ph.D. (University of Minnesota).

***Marc Garcelon** ; associate professor of sociology; B.A. (University of Washington); M.A., Ph.D. (University of California at Berkeley).

***Burton Halpert** ; associate professor emeritus of sociology and medicine; B.A. (Drake University); M.A. (University of Manitoba); Ph.D. (University of Minnesota).

Jessica Hardie ; assistant professor of sociology; B.A. (Wellesley College); M.S.T. (Pace University); M.A., Ph.D. (University of North Carolina-Chapel Hill).

****Jennifer Huberman** ; assistant professor of anthropology; B.A. (Boston University); M.A., Ph.D. (University of Chicago).

****Shannon Jackson** ; associate professor of anthropology; B.A., M.A. (University of Connecticut); Ph.D. (University of Chicago).

***Ricardo Marte** ; assistant teaching professor of sociology; B.A. (State University of New York at Binghamton); M.A., Ph.D. (University of Nevada, Reno).

****Sookhee Oh** ; assistant professor of sociology; B.A. (Ewha Woman's University, Korea); M.C.P. (Seoul National University, Korea); Ph.D. (Milano Graduate School of Management and Urban Policy, The New School).

****Philip G. Olson** ; professor emeritus of sociology; B.A., M.A. (University of Arizona); Ph.D. (Purdue University).

****Clovis Semmes** ; professor of sociology and black studies; director of black studies program; B.A., Ph.D. (Northwestern University); M.A. (University of Illinois, Chicago).

****Peter M. Singlemann**; professor emeritus of sociology; B.A. (University of Hamburg-Germany); Ph.D. (University of Texas).

****Deborah Smith** ; associate professor of sociology and director of family studies; B.S., Ph.D. (Cornell University); M.A. (University of Minnesota).

****Theresa L. Torres** ; assistant professor of sociology and anthropology; B.A. (Benedictine College); M.A. (Boston College); O.S.B. (Order of St. Benedict); Ph.D. (Catholic University of America).

***Ann Wood**> ; assistant teaching professor of sociology; B.A. (Grinnell College); M.A., Ph.D. (University of Kansas).

Theatre

@ Associate or Adjunct Graduate Faculty

*** Members of UMKC Graduate Faculty**

Members of UMKC Doctoral Faculty

+ Located at UM-St. Louis campus

Theatre

***Erika Bailey** ;; assistant professor of theatre; B.A. (Williams College); M.F.A. (Brandeis University); M.A. (Central School of Speech and Drama).

Charles (Chaz) Bell ;; teaching assistant professor of technical theatre; B.A. (Southwest Baptist University); M.F.A. (University of Missouri-Kansas City).

Lindsay Davis;; associate professor of theatre; B.A. (Harvard College); M.F.A. (New York University-Tisch School of the Arts).

Jeff Dreisbach; adjunct associate professor of theatre; B.F.A. (Wayne State University).

***John Ezell** ; Hall Family Foundation Professor of Design; B.F.A. (Washington University); M.F.A. (Yale University).

***Gene Friedman** ; associate professor of theatre.

@Charles Hayes ; teaching professor of theatre; B.A. (Augustana College); M.F.A. (University of Iowa).

Ricardo Khan ; visiting professor of theatre (director, new project development); honorary doctorate (Rutgers University).

***Barry Kyle** ; professor of theatre arts; M.A. (University of Birmingham-U.K.).

##Felicia Londré ; curators' professor of theatre; B.A. (University of Montana); M.A. (University of Washington-Seattle); Ph.D. (University of Wisconsin-Madison).

Greg Mackender ; teaching assistant professor of theatre sound.

***Tom Mardikes** ; chair, department of theatre, and professor of theatre; B.A., M.F.A. (University of Missouri-Kansas City).

##Jennifer K. Martin ; Hall Family Foundation Professor of Movement; B.S. (Bowling Green State University); M.F.A. (University of North Carolina-Greensboro); Ph.D. (University of Michigan).

Patricia A. McCorkle; adjunct professor of theatre; B.A. (Douglass College-Rutgers University); M.A. (New York University).

Carla Noack ;; assistant professor of theatre; B.A. (College of St. Benedict); M.F.A. (University of Missouri-Kansas City).

Sarah M. Oliver ; teaching assistant professor of theatre; B.F.A. (Kansas City Art Institute); M.F.A. (University of Missouri-Kansas City).

***Stephanie Roberts** ; assistant professor of theatre; B.F.A. in acting (Cornish University); M.F.A. in ensemble-based physical theatre (Dell' Arte International School of Physical Theatre).

@Ronald Lee Schaeffer ; teaching professor of theatre; B.S. (Bradley University); M.A. (University of Missouri-Kansas City).

Scott Stackhouse ;; teaching assistant professor of theatre in acting; B.A. (University of Missouri-Kansas City); M.F.A. (University of California-Los Angeles).

***Theodore Swetz** ; The Patricia McIlrath Endowed Professor of Theatre Arts in Acting; B.A. (Lehman College of the City University of New York).

***Victor Tan** ; professor of theatre.

Jacques Burdick; professor emeritus of theatre.

Cal Pritner; professor emeritus of theatre.
Vincent Scassellati; associate professor emeritus of theatre.
Douglas C. Taylor; professor emeritus of theatre.

School of Biological Sciences

@ Associate or Adjunct Graduate Faculty

*** Members of UMKC Graduate Faculty**

Members of UMKC Doctoral Faculty

+ Located at UM-St. Louis campus

#*Karen J. Bame ; graduate programs officer and associate professor of biological sciences; B.S. (University of California-Santa Barbara); Ph.D. (University of California-Los Angeles).

James M. Benevides ; research assistant professor of biological sciences; B.S. (University of Massachusetts); M.S., Ph.D. (University of Rhode Island).

Donald J. Black ; research instructor in biological sciences; B.S. (Fresno State University); Ph.D. (Ohio State University).

***Samuel Bouyain** ; assistant professor of biological sciences; Diploma of Engineer (École Nationale Supérieure de Chimie de Paris); D.Phil. (University of Oxford).

Raymond L. Burich ; associate professor emeritus of biological sciences; B.S., M.S. (Kent State University); Ph.D. (Iowa State University).

Gerald M. Carlson; adjunct professor of biological sciences; B.S. (Washington State University); Ph.D. (Iowa State University).

#*Julia Chekonova ; assistant professor of biological sciences; M.S. (Moscow State University); Ph.D. (USSR Academy of Sciences, Moscow).

#*Leonard L. Dobens, Jr. ; associate professor of biological sciences; B.S. (Boston College), Ph.D. (Dartmouth College).

#*Lawrence A. Dreyfus ; dean, school of biological sciences, and professor of biological sciences; B.A. (University of Kansas); M.S. (Michigan State University); Ph.D. (University of Kansas).

Alfred F. Esser ; professor emeritus; M.S., Ph.D. (J.W. Goethe University, Germany).

@Mark T. Fisher; adjunct professor of biological sciences; Ph.D. (University of Illinois-Urbana).

David R. Garris ; teaching associate professor of biological sciences; B.S. (Eastern Michigan University); Ph.D. (Wayne State University).

#*Brian V. Geisbrecht ; associate professor of biological sciences; B.S. (St. Vincent College); Ph.D. (The Johns Hopkins University School of Medicine).

Erika R. Geisbrecht; assistant professor of biological sciences; B.S. (University of Wisconsin-Madison); Ph.D. (The Johns Hopkins University School of Medicine).

#*Edward P. Gogol ; associate professor of biological sciences; A.B. (Cornell University); M. Phil., Ph.D. (Yale University).

Regina R. Grindstaff; teaching assistant professor of biological sciences; B.S. (Missouri Southern State University); Ph.D. (University of Missouri-Columbia).

R. Scott Hawley; adjunct professor of biological sciences; Ph.D. (University of Washington).

#*Saul M. Honigberg ; associate professor of biological sciences; B.S. (University of Georgia), Ph.D. (Yale University).

#*Chi-Ming Huang ; associate professor of biological sciences; B.S. (National Taiwan University, Taiwan); M.S., Ph.D. (University of California-Los Angeles).

#*Alexander Idnurm; assistant professor of biological sciences; B.S., Ph.D. (University of Melbourne).

Ana J. Iriarte ; associate professor emeritus of biological sciences; M.S., Ph.D. (University of Navarre, Spain).

Chris L. Jordan ; research instructor in biological sciences; B.S. (Central Missouri State University), M.S. (Purdue University); Ed.S. (University of Missouri-Kansas City).

Tamas Kapros ; teaching associate professor of biological sciences; B.S., Doctor Universitatis in Genetics, Ph.D. (Jozsef Attila University of Sciences, Szeged, Hungary).

J. Andrew Keightley ; research associate professor of biological sciences; B.S., Ph.D. (University of New Mexico-Albuquerque).

Peter Koulen; adjunct professor of biological sciences; m.s., ph.D. (Johnnes Gutenberg University, Germany).

#*John H. Laity ; associate professor of biological sciences; B.A. (Rutgers University), M.S. (Columbia and Cornell Universities), Ph.D. (Cornell University).

Douglas Law ; teaching associate professor of biological sciences; B.S., Ph.D. (Duke University).

Lee Likins ; research instructor in biological sciences; B.S. (University of West Florida-Pensacola); M.A. (University of Kansas).

Ronald A. MacQuarrie ;professor emeritus of biological sciences; B.S. (University of California-Berkeley); Ph.D. (University of Oregon).

Marino Martinez-Carrion; professor and dean emeritus of biological sciences; B.A., M.A., Ph.D. (University of California-Berkeley).

Joseph R. Mattingly, Jr. ; teaching assistant professor of biological sciences; B.A. (Bellarmine College); Ph.D. (University of Notre Dame).

Malcolm McCallum ; assistant teaching professor of biological sciences; B.s. (Illinois State University); M.S. (Eastern Illinois University); Ph.D. (Arkansas State University).

Kevin McCluskey ; research associate professor in biological sciences; B.S., M.S. (Stanford University); Ph.D. (Oregon State University).

Denis Medeiros ; professor of biological sciences; B.S. (Central Connecticut State University); M.S. (Illionnis State University); Ph,D, (Clemson University).

#*Thomas M. Menees ; associate professor of biological sciences; B.S., M.S. (University of California Irvine); Ph.D. (Yale University).

#*Henry M. Mizioro ; head, molecular biology and biochemistry division, Marion-Merrell-Dow Missouri professor and professor of biological sciences; B.S. (St. Joseph's University); Ph.D. (University of Pennsylvania).

William T. Morgan; professor emeritus of biological sciences; B.S. (University of Pittsburgh); Ph.D. (University of California-Santa Barbara).

#*Michael O'Connor ; associate professor of biological sciences; B.A. (Trinity College Dublin); Ph.D. (National University of Ireland).

#*Anthony Persechini ; professor of biological sciences; B.A. (University of New Hampshire), Ph.D. (Carnegie-Mellon University).

Lynda S. Plamann ; associate dean for academic affairs and associate professor of biological sciences; B.A. (Augustana College); Ph.D. (University of Iowa).

#*Michael Plamann ; associate professor of biological sciences; B.S. (University of Wisconsin); Ph.D. (University of Iowa).

#*Jeffrey L. Price ; associate professor of biological sciences; B.S. (College of William and Mary), Ph.D. (Johns Hopkins University).

#*G. Sullivan Read ; professor of biological sciences; B.A. (Williams College); M.S. (Yale University); Ph.D. (Pennsylvania State University).

Aaron Reed; research assistant professor of biological sciences; B.S. (Kansas State University); M.S. (University of Memphis); Ph.D. (Kansas State University).

Garth E. Resch ; associate professor of biological sciences; B.A., M.A., Ph.D. (University of Missouri-Columbia).

#*Ann Smith ; professor of biological sciences; B.Sc. (University of Hull, England); Ph.D. (University of London, England).

Salvatore L. Stella ; adjunct assistant professor of biological sciences; B.S (University of Nebraska Medical Center); Ph.D. (San Diego State University).

#*George J. Thomas, Jr. ; professor emeritus; B.S. (Boston College); Ph.D. (Massachusetts Institute of Technology).

#*Jakob H. Waterborg ; associate professor of biological sciences; B.S., M.S., Ph.D. (Katholieke Universiteit Nijmegen, The Netherlands).

Tammy S. Welchert ; student services coordinator in biological sciences; B.S., M.S. (Southwest Missouri State University); Ed.S. (University of Missouri-Kansas City).

Theodore C. White; head, cell biology and biophysics division, Marion Merrell Dow professor in biological sciences; B.S. (Cornell University); Ph.D. (University of Michigan).

#*Gerald J. Wyckoff ; associate professor of biological sciences; B.S. (Cornell University); Ph.D. (University of Chicago).

#*Xiaolan Yao; assistant professor of biological sciences; B.S., M.S. (Zhengzhou University, China); Ph.D. (Iowa State University).

@Lynwood R. Yarbrough; adjunct professor of biological sciences; Ph.D. (Purdue University).

#*Marilyn Yoder ; associate professor of biological sciences; B.S. (University of Kentucky); Ph.D. (University of California-Riverside).

#*Yu, Xiao-Qiang(Sean) ; associate professor of biological sciences; Ph.D. (Kansas State University).

Henry W. Bloch School of Management

*** Members of UMKC Graduate Faculty**

Members of UMKC Doctoral Faculty

#*Arif Ahmed ; assistant professor of health administration; B.D.S. (Dhaka Dental College); M.S.P.A., Ph.D. (University of Illinois - Urbana-Champaign).

Latheff N. Ahmed; professor emeritus of public administration; B.A. (University of Mysore); M.A., Ph.D. (University of Kansas).

Richard J. Arend ; associate professor of entrepreneurship and innovation; B.A.Sc. (University of Toronto); M.B.A. (York University); Ph.D. (University of British Columbia); P.E..

#*Rajinder Arora ; Schutte Professor of Marketing and chair, Department of Marketing and Supply Chain Management; B.S., M.S. (University of Southern California); Ph.D. (Claremont Graduate School).

Roy E. Baker; professor emeritus of accounting; B.S., M.B.A. (University of Kansas); D.B.A. (Harvard University); C.P.A.

Brian L. Belt; professor emeritus of business and public administration; B.I.E, M.S.I.E (Ohio State University); M.B.A. (Texas Christian University); Ph.D. (University of North Texas).

Eric Gottman; clinical associate professor; D.D.S. (University of Missouri-Kansas City); Certificate, Prosthodontics (University of Missouri-Kansas City).

Carrie Hanson; clinical assistant professor; B.S.D.H., M.A., (Northern Arizona University).

Patrick K. Hardman ; professor emeritus; B.S. (Fort Hays State University); D.D.S., M.S., Certificate, Oral Diagnosis/Oral Medicine (University of Missouri-Kansas City).

Terrance B. Harris; associate professor emeritus; B.S. (University of Kansas); D.D.S., M.S., Certificate, Oral Diagnosis/Oral Medicine (University of Missouri-Kansas City).

John I. Haynes ; professor; B.S., D.D.S., M.A. (University of Missouri-Kansas City).

James K. Hocott; associate professor emeritus; B.S. (Kansas State University); D.D.S. (University of Missouri-Kansas City).

Tamara Jan Hoffman, fellow; B.S.D.H. (University of Missouri-Kansas City).

Lyndal G. Holmes; associate professor emeritus; B.S. (Drury College); D.D.S., M.S., Certificate, Periodontics (University of Missouri-Kansas City).

Lori Holt ; associate professor; B.S., M.S. (University of Missouri-Kansas City).

Gregory C. Houston ; clinical assistant professor; B.S. (University of Missouri); D.D.S. (University of Missouri-Kansas City).

Shirley H. Hung ; associate professor; D.D.S. (National Taiwan University); M.S. (University of Missouri-Kansas City); D.D.S. (University of Southern California-Los Angeles).

##Laura R. Iwasaki ; Leo Rogers Chair and professor; B.Sc., (University of Alberta, Edmonton, Alberta); Certificate - Orthodontics, M.S., Ph.D. (University of Manitoba, Winnipeg, Manitoba).

Gregory Johnson ; clinical associate professor; B.S. (Fort Hays State University); D.D.S. (University of Missouri-Kansas City); M.A. (Antioch University).

##Mark Johnson ; professor; B.S. (University of Minnesota-Minneapolis); Ph.D. Biochemistry (University of Minnesota Mayo Graduate School of Medicine-Rochester).

Ryan Johnson ; clinical assistant professor; B.A. (Drury College); D.D.S. (University Missouri-Kansas City).

Jay J. Jones ; clinical associate professor; B.S., D.D.S. (University of Missouri-Kansas City).

***Jerald O. Katz** ; associate professor; B.S. (Albright University); D.M.D. (University of Pittsburgh); M.S. (University of Texas).

***Nancy Keselyak** ; associate professor; B.S. (University of Maryland); M.A. (Simon Fraser University).

Beheshteh Khodakhast; clinical assistant professor; B.D.S. (Vokkaligara Sangha Dental School, Bangalore, India); certificate prosthodontics, M.S. (Medical College of Georgia, August, GA).

John W. Killip ; associate dean for student programs and clinical professor; B.S. (Northern Arizona University); D.D.S. (University of Missouri-Kansas City).

William J. Killoy; professor emeritus; D.D.S. (Creighton University); M.S. (University of Texas-Houston).

Marvin Kramer ; clinical associate professor; D.D.S. (Creighton University).

***James C. Kulild** ; professor; D.D.S. (University of Missouri-Kansas City); M.S. (George Washington University).

Amit Kumar ; clinical assistant professor; B.D.S. (College of Dental Surgery, Manipal, India), M.D.S. (Annamalai University, Nagar, India), Information Science M.S. (University of N. Carolina – Chapel Hill).

***Vandana Kumar**; assistant professor; B.S.D. (Rotak, India), M.S. Conservative Dentistry (Punjab Government Dental College, India), M.S. oral and Maxillofacial Radiology (University of North Carolina-Chapel Hill).

Charley C. Lee; associate professor; D.D.S. (Hubei Dental School); M.S. (Beijing University); M.S. (New Jersey University of Medicine and Dentistry); D.D.S. (University of Missouri-Kansas City).

Jodie Wing Lee; clinical assistant professor; B.S. (University of CA-Los Angeles); D.M.D. (Howard School of Dental Medicine, Washington, DC); Certificate, general Practice Residency (Lutheran Medical Center, Brooklyn, NY).

Ruohong Liu ; assistant professor; D.D.S. (University of Missouri-Kansas City); Certificate - Prosthodontics, M.S. (Ohio State University).

##**Ying F. Liu**; clinical assistant professor

Alison Louie; clinical assistant professor; B.S., (University of California-Los Angeles), D.D.S., (University of Pacific School of Dentistry-San Francisco)

James W. Lowe; professor emeritus; A.B. (William Jewell College); D.D.S., M.S. (University of Missouri-Kansas City).

***Simon R. MacNeill** ; associate professor; B.D.S. (King's College, London); D.D.S. (University of Missouri-Kansas City); Certificates, General Dentistry, General Practice, Periodontics (Louisiana State University).

William E. Mayberry; professor emeritus; A.B. (Washington University); M.S. (Southern Illinois University); Ph.D. (University of Illinois).

##**Carole P. McArthur** ; professor; B.Sc., Ph.D. (University of Otago); M.D. (University of Missouri-Kansas City).

***Michael D. McCunniff** ; associate professor; B.S. (Creighton University); M.S. (University of Iowa); D.D.S. (University of Missouri-Kansas City).

Susan D. McMillen ; clinical associate professor; B.S. (Central Missouri State University); D.D.S. (University of Missouri-Kansas City); M.S. (University of Kansas).

Gary D. McReynolds ; clinical assistant professor; B.S., D.D.S. (University of Missouri-Kansas City).

***Tanya V. Mitchell** ; associate professor; B.S., M.S. (University of Missouri-Kansas City).

@**Behjat K.H. Moghadam** ; professor; D.D.S. (Tehran University); D.S.D., Certificate, Advanced Graduate Study in Oral Medicine (Boston University); D.D.S. (University of Missouri-Kansas City).

David L. Moore; professor emeritus; B.S. (Oklahoma State University); D.D.S., M.A., M.S. (University of Missouri-Kansas City).

Dorsey J. Moore; HGB Robinson professor emeritus; D.D.S. (University of Missouri-Kansas City).

***Pamela R. Overman** ; associate dean for academic affairs and professor; B.S.D.H., M.S. (University of Missouri-Kansas City); Ed. D. (University of Kansas).

****Jeffrey C. Nickel** ; professor; D.M.D., M.S., Certificate - Orthodontics, Ph.D. (University of Manitoba, Winnipeg, Manitoba).

Tressa Parkinson ; clinical associate professor; D.D.S. (University of Missouri-Kansas City); GPR (VA Leavenworth, KS).

James L. Parrott ; clinical associate professor; B.S. (Devry Institute & Central Missouri State); D.D.S. (University of Missouri-Kansas City).

Douglas A. Pearson ; b.a. (University of KS); D.D.S. (University of Missouri-Kansas City); Certificate, General Practice Residency (Veteran's Administration, Kansas City, MO).

@Cynthia S. Petrie ; associate professor; D.D.S. (Athens, Greece); D.D.S., M.S., Certificate, Prosthodontics (University of Missouri-Kansas City).

David J. Pippin ; associate professor emeritus; B.S., D.D.S., M.S., Certificate, Periodontics (University of Missouri-Kansas City).

Richard G. Prine ; clinical assistant professor; B.S., D.D.S. (University of Missouri-Kansas City).

****John H. Purk** ; professor; B.A. (University of Missouri-St. Louis); D.D.S., M.S., Ph.D. (University of Missouri-Kansas City).

Marsha A. Pyle, dean and professor; D.D.S., (Case Western Reserve University); Certificate General Practice Residency, (Veterans Administration Medical Center, Cleveland, OH); M.Ed., (Cleveland State University).

***John W. Rapley** ; professor; B.A. (University of Missouri-Columbia); D.D.S. (University of Missouri-Kansas City); M.S. (University of Texas-Houston); Certificate, Periodontics (Wilford Hall Air Force Medical Center).

Cornelius F. Reardon, Jr.; associate professor emeritus; B.S. (John Carroll University); D.D.S. (University of Detroit).

G. Juliana Redford; clinical assistant professor; D.D.S. (Universidad Santo Tomas De Aquino); Certificate, Pediatric Dentistry (Bogota, Columbia)

Ingrid Reed; clinical assistant professor; D.D.S., certificate orthodontics, M.S. (SUNY-Buffalo).

Michael J. Reed ; professor and dean emeritus; B.Sc. Hons. (University of Durham); B.D.S. (University of Newcastle-upon-Tyne); Ph.D. (State University of New York at Buffalo).

Richard L. Reiff ; associate professor emeritus; B.A. (William Jewell College); D.D.S., M.S. (University of Missouri-Kansas City).

Christopher D. Rice ; associate professor; B.S., D.D.S. (Creighton University); M.A. (University of Missouri-Kansas City).

Ronald Riley ; clinical assistant professor; B.A. (Wichita State); D.D.S. (University of Missouri-Kansas City).

Mabel Salas, clinical assistant professor, D.D.S. (San Marcos University, Lima, Peru) certificate periodontology, M.S. (Ohio State University, Columbus, OH).

***Keerthana Sathesh** ; clinical associate professor; B.D.S. (Sharavathi Dental School, Kuvemp University, Shimoga, India); D.D.S. (University of Missouri-Kansas City), M.S. (University of Minnesota).

Catherine Saylor ; assistant professor; B.S.D.H., M.S. (University of Missouri - Kansas City).

Sasha Schubert ; clinical assistant professor; B.A. (University of South FL-Tampa); D.M.D. (Boston University); M.D. (Saba University, Sabba, Netherlands, Antilles0; Certificates, Oral and Maxillofacial Surgery and Family Medicine (University of Missouri-Kansas City).

Rudane E. Shultz ; professor emeritus; B.S., D.D.S. (University of Pittsburgh); Certificate, Oral and Maxillofacial Surgery (Walter Reed Army Medical Center).

Becky Smith ; clinical assistant professor; B.A., D.D.S. (University of Missouri - Kansas City).

Anton P. Soldan-Els, Jr.; associate professor emeritus; B.S., D.D.S. (University of Missouri-Kansas City).

#Paulette Spencer ; curators' professor emerita; D.D.S., Ph.D. (University of Missouri-Kansas City); M.S. (Rensselaer Polytechnic Institute).

Austin E. Stiles, Jr.; associate professor emeritus; B.A. (Gettysburg College); D.D.S. (Temple University).

John A. Stone, clinical assistant professor; D.D.S. (University of Missouri-Kansas City).

Timothy S. Taylor ; associate professor; B.A. (University of Missouri-Columbia); D.D.S. (University of Missouri-Kansas City).

David J. Thein ; clinical assistant professor; B.A. (Southern Methodist University); D.D.S. (University of Missouri-Kansas City); Certificate, General Practice (Hennepin County Medical Center); M.S.D. (Baylor University).

Frank C. Theisen; associate professor emeritus; D.D.S. (The Ohio State University); Certificate, Oral and Maxillofacial Surgery (Walter Reed Army Medical Center).

John W. Thurmond ; associate professor; D.D.S. (Creighton University); M.S. (University of Texas-Houston).

Daniel E. Tira; professor emeritus; B.S. (Benedictine University); Ph.D. (The Ohio State University).

Maxine N. Tishk; professor emerita; A.S. (State University of New York-Farmingdale); B.S.(Boston University); M.S.D.H.E. (University of Michigan).

James Trotter; clinical assistant professor; D.D.S. (University of Missouri – Kansas City).

Yesim Tunkuc, clinical assistant professor, B.D.S. (Istanbul University, Istanbul, Turkey); certificate prosthodontics, M.S. clinical research (New York University College of Dentistry, NYC, NY).

##Yasuyoshi Ueki; assistant professor; M.D., Molecular Biology and Human Molecular Genetics, Ph.D. (Okayama University Medical School, Japan)

Christopher J. Van Ness ; research assistant professor; B.S. (Missouri Western State University), M.A., certificate clinical research (University of Missouri-Kansas City), Ph.D. General Psychology (Capella University, Minneapolis, MN).

***Marsha Voelker**; assistant professor; B.S.D.H., M.S. (University of North Carolina-Chapel Hill).

Thomas A. Vopat ; clinical associate professor; B.S. (Fort Hays State University); D.D.S. (Creighton University).

##Mary P. Walker ; associate dean for research and graduate programs and professor; M.S., (North Dakota State); D.D.S. (University of Nebraska); Ph.D. (University of Missouri-Kansas City).

Charles Walthall; professor emeritus; D.D.S. (University of Missouri-Kansas City).

##Yong Wang ; professor; M.S. Polymer Materials Science (University of Science and Technology Chengdu, China); Ph.D. Polymer Science (Sichuan University, China).

W. Kirk Weber ; clinical assistant professor; D.D.S. (University of Missouri-Kansas City).

Linda M. Wells, associate dean for clinical programs and clinical associate professor, B.A. biology, D.M.D. (Temple University School of Dentistry, Philadelphia, PA); certificate general

practice residency (Cleveland Metro-Health Center, OH); M.B.A. management (Yale University School of Management, New Haven, CT).

Connie L. White ; associate professor; B.A., D.D.S., Certificate, Oral Diagnosis/Oral Medicine (University of Missouri-Kansas City).

***J. Craig Whitt** ; professor; D.D.S. (Virginia Commonwealth University); M.S.,(Bowie State University); MBA-Finance (Webster University); Certificate, Oral Pathology (National Naval Dental Center).

Brian J. Williams ; clinical assistant professor; B.S. (Loyola Marymount University); D.D.S. (University of Missouri-Kansas City).

Derek R. Williams ; clinical associate professor; B.S. (Rockhurst College); D.D.S. (University of Missouri-Kansas City); M.S. (University of Iowa).

Terry C. Williams ; clinical assistant professor; D.D.S. (University of Missouri-Kansas City).

Robert M. Wilson ; clinical assistant professor; B.S. (Kansas State University), D.D.S. (University of Missouri – Kansas City).

Gerald D. Woolsey ; professor; B.S. (University of Texas); D.D.S. (Baylor College of Dentistry); M.S. (University of Michigan); Certificate, Fixed Prosthodontics (Broke Army Medical Center).

Joy Wylie-Matthews ; clinical associate professor; B.A. (Kansas State University); D.D.S. (University of Missouri-Kansas City).

Ling Ye ; assistant professor; D.D.S., Ph.D. Orthodontics (West China University of Medical Sciences, P.R.China).

Leslie Young, Jr.; associate professor emeritus; D.D.S. (University of Iowa); M.S. (University of Missouri-Kansas City).

##Anne B. DeLaunay ; associate professor of music (voice, music/opera literature); B.M., M.M., D.M.A. (Louisiana State University).

Eph Ehly; professor emeritus of music (choral music, conducting); B.A. (Kearney State College); M.A. (George Peabody College for Teachers); D.M.A. (University of Colorado).

@Beth Loeber Elswick ; assistant teaching professor of music (music theory); B.A. (Southwest Missouri State University); B.M. (University of Arizona); M.S.Ed. (Southwest Missouri State University); D.M.A. (University of Missouri-Kansas City).

##Carter Enyeart ; Rose Ann Carr Millsap/Missouri Endowed Professor in Cello; B.M. (Eastman School of Music); M.M. (Carnegie-Mellon University).

##William Everett ; professor of music (musicology); B.M. (Texas Tech University); M.M. (Southern Methodist University); Ph.D. (University of Kansas).

Raymond Feener ; associate professor of music (voice); B.M., M.M. (Ohio University); D.M. (Florida State University).

##Hali Fieldman ; associate professor of music (music theory); B.M. (Peabody Conservatory of Music); M.A.M., M.M. (Eastman School of Music); Ph.D. (University of Michigan).

##Mara Gibson ; program director and adjunct assistant professor (composition); B.A. (Bennington College); M.M., Ph.D. (SUNY-Buffalo).

##Andrew Granade ; assistant professor of music (musicology); B.M. (Ouachita Baptist University); M.M., Ph.D. (University of Illinois).

##Robert W. Groene II ; associate professor of music (music therapy) and director of music therapy; B.S., M.A., Ph.D. (University of Minnesota).

Gustavo R. Halley ; associate professor emeritus of music (voice); B.A. (Jacksonville University); M.M., D.M. (Florida State University).

Alexander W. Hamilton; associate professor emeritus of music (music education); B.S.E., M.Ed. (University of Arkansas); D.M.A. (University of Texas at Austin).

#*Deanna Hanson-Abromeit ; associate professor of music (music therapy); B.M., M.A. (University of Iowa); Ph.D. (University of Kansas).

Linda Ross Happy ; associate professor emeritus of music (class piano); B.M.E. (University of Nebraska); M.M. (Northwestern University); D.M.A. (University of Colorado).

@Paul Hatton ; adjunct assistant professor of music (violin); (Juilliard School); (North Carolina School of the Arts).

Milton G. Hehr; associate professor emeritus of music (music theory, music history and literature); B.M. (Jordan College of Fine Arts of Butler University); M.M., Ph.D. (Boston University).

Mary Pat Henry ; professor of dance (ballet); B.F.A. (University of Utah); M.F.A. (Florida State University).

Dee Anna Hielt; assistant professor of dance

Patricia Higdon ; teaching assistant, collaborative pianist (piano sight reading); B.M. (Houghton College); M.M. (Cleveland Institute of Music).

Mary Lou Jones; adjunct associate professor of music (music education); Ph.D. (University of Missouri-Kansas City)

Jeffrey Kail; adjunct professor of music (string bass); B.M. (Indiana University)

***Benny Kim** ; associate professor of music (violin); B.M., M.M. (Juilliard School).

Tiberius Klausner; professor emeritus of music (violin); Diploma (National Academy of Music, Budapest); Premier Prix (Conservatoire National de Musique, Paris); Diploma (The Juilliard School). Member of Volker String Quartet.

Richard C. Knoll; professor emeritus of music (voice); (University of Denver); (Northwestern University); Chicago Lyric Opera; Lyric Opera of Kansas City.

@Karen Kushner ; adjunct associate professor of music (piano); B.M. (Northwestern University); M.M. (Juilliard School).

Wanda Lathom-Radocy; professor emeritus of music (music therapy); B.M.E., M.M.E, Ph.D. (University of Kansas).

#*Scott Lee ; associate professor of music (viola); B. M. (The Juilliard School); M.M. (Mannes College of Music).

John R. Leisenring; professor emeritus of music (trombone/jazz studies); B.M., M.M. (University of Wisconsin-Madison); D.M.A. (University of Illinois).

@Kenneth Lidge ; assistant teaching professor of music (music theory); B.M. E. (University of Wisconsin-Eau Claire); M.M. (University of Illinois-Champaign); D.M.A. (University of Missouri-Kansas City).

@Mary Jo Lorek ; assistant teaching professor of music (music theory); B.M. (University of North Carolina); M.M. (University of Kentucky); Ph.D. (Florida State University).

Sabrina Madison-Cannon ; associate professor of dance (modern); B.F.A. (National Academy of Arts); M.F.A. (University of Iowa).

Christopher McLaurin; adjunct professor of music (percussion); B.M. (San Jose State University); graduate diploma (Juilliard School).

#*John McIntyre ; professor of music (piano); Artist Diploma (University of Toronto); M.M. (Boston University); Graduate study (Paris Conservatory).

#*James Mobberley ; curators' professor of music (composition); B.A., M.M. (University of North Carolina at Chapel Hill); D.M.A. (Cleveland Institute of music).

#*Dale Morehouse ; associate professor of music (voice, opera); B.A. (University of Central Florida); M.M. (Binghamton University).

Laura New ; assistant teaching professor of music (music theory); B.A. (Delta State University); M.M. (New Mexico State University).

***Douglas Niedt** ; associate professor of music (guitar); B.M. (University of Missouri-Kansas City); (Studied with Segovia, Ghiglia, Yepes, Morel and Parkening. Records with Antigua Records.)

Ryan Oldham; adjunct assistant professor of music (music appreciation); B.A. (Indiana University of Pennsylvania); M.M. (University of Louisville); D.M.A. (University of Missouri-Kansas City)

****Robert Olson** ; professor of music (conducting, orchestra); B.M. (Northern Illinois University); M.M. (Michigan State University); D.M.A. (University of Washington).

****Joseph Parisi** ; associate professor of music (music education, instrumental music); B.M. (State University College of New York at Potsdam); M.M. (Florida State University); Ph.D. (Florida State University).

Marian F. Petersen; professor emeritus of music (theory); B.A. (San Francisco State University); M.M., Ph.D. (University of Utah).

****Diane Petrella**; assistant professor of music (piano, piano pedagogy); B.M. (Eastern Illinois University); M.M. (University of Wisconsin-Madison); D.M.A. (University of North Texas).

@Nicholas Petrella; adjunct assistant professor of music (percussion); B.S. (Pennsylvania State University); M.M. (University of Michigan); D.M.A. (University of Iowa)

****Mary Posses** ; associate professor of music (flute); B.A., M.M., M.M.A., D.M.A. (Yale University).

Ruth Anne Rich; professor emeritus of music (piano); B.M. (Florida State University); M.M. (Peabody Conservatory of Music); D.M.A. (Eastman School of Music); Diplome de Virtuosite (Schola Cantorum, Paris); License d'Enseignement (L'Ecole Normale de Musique, Paris); Licentiatehip in Piano Performance (Royal Academy of Music, London).

Natalia Rivera ; assistant teaching professor of music, vocal coach/accompanist, (foreign language for singing); B.M. (New England Conservatory); M.A. (University of Minnesota); D.M.A. (University of Kansas).

****Charles R. Robinson** ; professor of music (music education, choral music); B.M.E., Ph.D. (Florida State University); M.A. (California State University, Long Beach).

****Paul Rudy** ; professor of music (composition); B.A. (Bethel College); M.M. (University of Colorado, Boulder, Co); D.M.A. (The University of Texas at Austin).

Merton Shatzkin; professor emeritus of music (music theory); Diploma (The Juilliard School); M.M., Ph.D. (Eastman School of Music).

****Rebecca Sherburn** ; associate professor of music (voice); B.M. (California State University, Los Angeles); M.M. (University of Southern California); D.M.A. (University of Southern California).

****Reynold Simpson** ; associate professor of music (music theory); B.M. (The Peabody Conservatory of The Johns Hopkins University); M.F.A. (Princeton University); M.M., D.M.A. (The Juilliard School).

****James Snell** ; associate professor of music (percussion); B.M. (University of Illinois); M.M. (Southern Methodist University); D.M.A. (University of Missouri-Kansas City).

****Aidan Soder**; assistant professor of music (voice); B.M. (University of Nebraska at Omaha); M.M., D.M.A. (Rice University)

#*Jane Solose ; associate professor of music (piano/harpsichord); B.M. (University of Toronto); M.M., D.M.A. (Eastman School of Music).

Joan Sommers ; professor emeritus of music (accordion); Associate Diploma and Licentiate Diploma (Accordion Institute of America in conjunction with the British College of Accordionists).

Paul Sommers; professor emeritus of music (voice); D.M.A. (University of Illinois).

#*Thomas Stein ; associate professor of music (tuba, euphonium); B.M., M.M. (University of Michigan, Ann Arbor). (Member of Missouri Brass Quintet.)

Kent Swafford ; teaching assistant (piano technician); (University of Kansas); (Registered piano technician).

Ronald Tice; assistant professor of dance; B.F.A. (University of Minnesota).

***Timothy Timmons** ; associate professor of music (saxophone); B.M. (University of Tulsa); M.M. (Northwestern University).

#*Sarah Tyrrell ; assistant teaching professor of music (musicology); B.A. (Kansas State University); M.M. (New England Conservatory of Music); Ph.D (University of Kansas).

***Robert Watson** ; William and Mary Grant/Missouri Endowed Professor in Jazz Studies; B.M. (University of Miami).

Paula B. Weber ; professor of dance (ballet); B.A. (Butler University); M.F.A. (Smith College).

#*Robert Weirich ; Jack Strandberg/Missouri Endowed Chair in Piano, professor of music (piano); B.M. (Oberlin Conservatory of Music); D.M.A. (Yale University).

Bram Wijnands; adjunct instructor of music (jazz studies); B.M. equivalent (Hilversum Conservatory, Netherlands).

#*Lindsey R. Williams; assistant professor of music (music education); B.M.E., M.M.E., University of Kansas; Ph.D. (Florida State University)

@Richard Lee Williams ; assistant professor of music (coach-accompanist, foreign language for singing); B.A., B.M. (University of Akron); M.M. (University of Illinois).

Peter T. Witte; professor of music (instrumental conducting); B.M., M.M., M.M. (University of Michigan)

#*Zhou Long; distinguished professor of music (composition); B.A. (Central Conservatory of Music, Beijing); D.M.A. (Columbia University).

School of Nursing

*** Members of UMKC Graduate Faculty**

Members of UMKC Doctoral Faculty

Eduardo Abreu ; visiting assistant professor of nursing; B.S., M.S. (Federal University Rio de Janeiro); M.D. (State University Rio de Janeiro); D.Eng. (Cleveland State University).

Marti Anselmo; clinical instructor of nursing; B.S.N. (Central Missouri State University); M.S.N. (University of Missouri-Kansas City).

Obie Austin ; clinical instructor of nursing; B.S.N. (Missouri Western State University); M.S.N. (University of Missouri-Kansas City).

Susan E. Bennett ; clinical instructor of nursing; B.S.N. (University of Missouri-Columbia); M.S.N. (Texas A&M).

Margaret Brommelsiek; instructor; B.A. (Eckerd College); M.S., Ph.D. (Florida State University).

#*Marco Brotto ; associate professor medicine and nursing and director of muscle biology group; B.S.N. (Federal University, Brazil); M.S. Pharmacology (Federal University, Brazil); PhD. (Trinity college, UK).

#*An-Lin Cheng ; assistant professor of nursing; M.S., Ph.D. (University of Georgia).

Janis Ellis-Claypool; teaching assistant professor; B.S.Ed. (University of Kansas); M.S. (York University).

Erin Ellington; clinical assistant professor; B.A. (Western Kentucky University); M.S.N. (Vanderbilt University); D.N.P. (University of Missouri-Kansas City).

Darla C. Engelbrecht ; clinical instructor of nursing; B.S.N. (Missouri Southern State University); M.S.N. (University of Phoenix).

Kara Flowers ; clinical instructor of nursing; B.S.N., M.S.N. (Graceland University).

Martha Goodwin ; clinical instructor of nursing; B.S.N. (University of Kansas); M.S.N. (University of Colorado).

Melinda Gould ; clinical instructor of nursing; B.S.N. (University of Phoenix); M.S.N. (University of Utah).

Mary E. Hertach ; clinical instructor of nursing; B.S.N., M.S.N. (Newman University).

Judy Willis Hileman ; clinical assistant professor of nursing; B.S.N., M.N., Ph.D. (University of Kansas).

Kim Hunter ;clinical instructor of nursing; B.S.N., M.S.N. (University of Kansas); M.S.N. (University of Missouri-Kansas City).

#*Jennifer Hunter ; associate professor of nursing; B.S.N. (University of Tulsa); M.S.N., Ph.D. (University of Kansas).

#*Patricia Kelly ; Ph.D. program director and professor of nursing; B.A. (SUNY-Albany); M.S.N. (Pace University); M.P.H. (Columbia University); Ph.D. (University of Illinois).

Susan J. Kimble ; M.S.N. and D.N.P. program director and clinical associate professor of nursing; B.S.W. (University of Nebraska); B.S.N., M.S.N., D.N.P. (University of Missouri-Kansas City).

Diana B. King ; clinical instructor of nursing; B.S.N. (Missouri Western State University); M.S.N. (University of Missouri-Kansas City).

JoAnn G. Klaassen ; clinical assistant professor of nursing; B.A. (Tabor College); B.S.N., M.N. (Wichita State University); J.D. (University of Missouri-Kansas City).

Steve Krantz ; associate professor of nursing/education; B.A., M.S. (University of Utah); Ph.D. (Utah State University).

Lora Lacey-Haun ; dean, school of nursing, and professor of nursing; B.S.N., M.S.N. (University of Alabama-Birmingham); Ph.D. (University of Missouri-Kansas City).

Wm. David LaFevers ; clinical instructor of nursing; B.S.N. (Southwest Baptist University); M.S.N., D.N.P. (University of Missouri-Kansas City).

Sarah Landram ; clinical instructor of nursing; B.S.N. (William Jewell College); M.S.N.(University of Missouri-Kansas City).

Kristin C. Lee ; clinical assistant professor of nursing; B.S.N. (Purdue University); M.S.N. (University of Missouri-Kansas City).

Lyla Lindholm ; clinical assistant professor of nursing; B.S.N. (Washburn University); M.N. (University of Kansas); D.N.P. (University of Missouri-Kansas City).

Martha Lofgreen ; clinical assistant professor of nursing; B.S.N. (University of Kansas); M.S.N. (University of Missouri-Kansas City).

Jolene Lynn ; pre-licensure and accelerated B.S.N. program director and clinical assistant professor of nursing; B.S.N. (Pittsburg State University); M.A. (Webster University); M.S.N. (University of Missouri-Kansas City).

Ronalda V. Manney clinical assistant professor of nursing; B.S.N. (Central Missouri State University); M.S.N. (University of Missouri-Kansas City).

Loretta J. North ; clinical instructor of nursing; B.S.N. (Dillard University); M.S.N. (University of South Alabama).

Ginny Nyberg ; clinical instructor of nursing; B.S.N. (Avila University); M.S.N. (Webster University).

***#Jane Anthony Peterson** ; assistant professor of nursing; B.S. (Kearney State College); M.S.N. (Texas Woman's University); Ph.D. (University of Nebraska Medical Center).

***Mary A. O'Connor** ; assistant professor of nursing; B.S.N. (St. Louis University); M.S. (Webster University); Ph.D. (University of Kansas).

Lynn M. Rasmussen ; assistant clinical professor of nursing; B.S.N., M.S.N. (University of Kansas); Ph.D. (University of Missouri-Kansas City).

Daphne A. Reavey; clinical instructor of nursing; B.S.N. (University of Kansas); M.S.N., Ph.D. (University of Missouri-Kansas City).

Cristine A. Roberts ; assistant professor; B.S.N. (University of Kansas); M.S.N. (University of Utah); Ph.D. (University of Missouri-Kansas City).

Melissa Joy Roberts ; assistant dean for student affairs and assistant professor of nursing; B.S.N., M.S.N. (University of Missouri-Columbia); J.D. (University of Missouri-Kansas City).

Judi M. Roling; assistant clinical instructor of nursing; B.S.N. (Columbia Union College); M.S.N. (The Catholic University of America).

Carol E. Schmer; clinical instructor of nursing; B.S.N., M.S.N., Ph.D. (University of Missouri-Kansas City).

Anita J. Skarbek ; R.N.-B.S.N. program director and clinical assistant instructor of nursing; B.S.N., M.S.N. (University of Missouri-Kansas City).

***#Katharine (Kit) V. Smith** ; associate professor and assistant dean for program evaluation, school of nursing; B.A. (University of Missouri-Columbia); B.S.N. (Graceland College); M.N., Ph.D. (University of Kansas).

Melissa Smith ; clinical instructor of nursing; B.S.N. (East Carolina University); M.S.N. (University of Tennessee-Memphis); D.N.P. (University of Missouri-Kansas City).

Leah C. Stanley ; clinical assistant professor of nursing; B.S.N. (Webster University); M.S.N. (Webster University).

Ellen Tappero ; clinical instructor of nursing; B.S.N. (University of South Carolina); M.N. (University of California-Los Angeles); D.N.P. (Arizona State University).

Carol W. Trotter ; clinical assistant professor of nursing; B.S.N., M.P.H. (University of Minnesota); Ph.D. (University of Missouri-St. Louis).

Lyn E. Vargo ; clinical assistant professor of nursing; B.S. (Purdue University); B.S.N., M.S.N. (St. Louis University); Ph.D. (University of Missouri-St. Louis).

Brenda G. Walker-Williams ; clinical instructor in nursing; B.S.N., M.S.N. (Webster University).

***#Peggy Ward-Smith** ; associate professor of nursing; B.S.N. (Rush University); M.S.N. (St. Xavier University); M.S. (Avila University); Ph.D. (University of Missouri-Kansas City).

Nancy Willis-Smith ; clinical instructor of nursing; B.S.N. (Pittsburg State University); M.S.N. (University of Kansas); D.N.P. (University of Missouri-Kansas City).

#*Thad Wilson ; associate dean, school of nursing, and associate professor of nursing; B.S.N. (Graceland College); M.S. (University of Utah); Ph.D. (University of Kansas).

Jacquelyn S. Witt ; clinical associate professor of nursing; B.S.N. (Central Missouri State University); M.S.N., J.D. (University of Missouri-Kansas City).

Pamela S. Young ; clinical instructor of nursing; B.S.N. and M.S.N. (Allen College, Iowa).

Shawn L. Zembles ; clinical assistant professor of nursing; B.S.N. (Graceland University); M.S.N., D.N.P. (University of Missouri-Kansas City).

Christine M. Zimmerman ; clinical instructor of nursing; B.S.N. (Creighton University); M.S.N. (University of Missouri-Kansas City).

School of Pharmacy

@ Associate or Adjunct Graduate Faculty

*** Members of UMKC Graduate Faculty**

Members of UMKC Doctoral Faculty

+ Located at UM-St. Louis campus

Daniel Aistrope; ; clinical assistant professor of pharmacy practice and administration; Pharm.D. (Creighton University School of Pharmacy and Health Professions).

Lynn E. Anliker; ; clinical assistant professor of pharmacy practice and administration; Pharm.D. (Drake University).

#*Mostafa Z. Badr ; professor of pharmacology and toxicology; B.S., M.S. (Cairo University, Egypt); Ph.D. (University of Louisville).

#*Hari Bhat; associate professor of pharmacology and toxicology; B.S., M.S. (University of Kashmir, India); Ph.D. (University of Texas Medical Branch-Galveston).

Wayne M. Brown ; associate professor of pharmacy practice and administration; B.S. (Medical College of South Carolina); M.S., Ph.D. (University of Mississippi).

Angela Brownfield; ; clinical assistant professor of pharmacy practice and administration and assistant director, experiential programs; Pharm.D. (St. Louis College of Pharmacy).

Patrick J. Bryant ; clinical professor of pharmacy practice and administration and director, UMKC Drug Information Center; Pharm.D. (University of Nebraska Medical Center).

Andrew S. Bzowycky; ; clinical assistant professor of pharmacy practice and administration; B.S., Pharm.D. (University of Connecticut).

Frank Caligiuri ; clinical assistant professor of pharmacy practice and administration; Pharm.D. (Drake University College of Pharmacy & Health Sciences).

Lester Chafetz; professor emeritus of pharmaceutical science; B.S. (University of Rhode Island); M.S., Ph.D. (University of Wisconsin).

#*Kun Cheng; ; assistant professor of pharmaceutical science; B.S., M.S. (China Pharmaceutical University, China); M.S. (National University of Singapore, Singapore); Ph.D. (University of Tennessee).

Kelly Cochran; ; clinical assistant professor of pharmacy practice and administration; Pharm.D. (Butler University).

Kristen DiDonato; ; clinical assistant professor of pharmacy practice and administration; B.A. (Wittenberg University); Pharm.D. (The Ohio State University).

Glenn H. Eberhart; professor emeritus of pharmacology and toxicology; B.S. (University of Denver); M.S., Ph.D. (University of California).

Jack E. Fincham ; professor of pharmacy practice and administration; B.S. (University of Nebraska); Ph.D. (University of Minnesota).

##Simon H. Friedman ; associate professor of pharmaceutical science; B.S. (Massachusetts Institute of Technology); Ph.D. (University of California, San Francisco).

##Linda S. Garavalia ; associate dean, school of pharmacy, and professor of pharmacy practice and administration; B.A. (Clemson University); M.A., Ph.D. (University of South Carolina).

Maqual Graham ; associate professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

##William G. Gutheil ; associate professor of pharmaceutical science; B.S. (California Polytechnic State University); Ph.D. (University of Southern California).

Jeremy P. Hampton; clinical assistant professor of pharmacy practice and administration; B.S. (Rockhurst University); Pharm.D. (University of Missouri-Kansas City).

Karen L. Hardinger ; clinical associate professor of pharmacy practice and administration; Pharm.D. (University of Kansas).

##Orisa J. Igwe ; associate professor of pharmacology and toxicology; B.S. (Northeast Louisiana University); M.S. (University of Kentucky); Ph.D. (University of Cincinnati).

Marcus B. Iszard ; teaching associate professor of pharmacology and toxicology; B.S., M.S., Ph.D. (Florida A&M University).

##Thomas P. Johnston ; professor of pharmaceutical sciences; B.S., Ph.D. (University of Minnesota).

Maureen E. Knell ; clinical associate professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Peggy G. Kuehl ; clinical associate professor of pharmacy practice and administration; B.S. (South Dakota State University); Pharm.D. (University of Minnesota).

##Anil Kumar ; professor of pharmacology and toxicology and chair, Division of Pharmacology and Toxicology; B.S., M.S. (Lucknow University, India); Ph.D. (Kanpur University, India).

##Santosh Kumar; assistant professor of pharmacology and toxicology; B.S. (University of Delhi, India); M.S., Ph.D. (Indian Institute of Technology, India).

Robert C. Lanman; professor emeritus of pharmacology and toxicology, School of Pharmacy; B.S., Ph.D. (University of Minnesota).

##Chi H. Lee ; professor of pharmaceutical science; B.S. (Seoul National University, South Korea); M.S. (University of Washington); Ph.D. (Rutgers University).

Cameron C. Lindsey ; professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Yifei Liu; assistant professor of pharmacy practice and administration; B.S. (West China University of Medical Sciences, China); M.S., Ph.D. (University of Iowa).

Patricia A. Marken ; associate dean, school of pharmacy, and professor of pharmacy practice and administration; B.S. (Dalhousie University, Canada); Pharm.D. (Medical University of South Carolina).

William D. Mason; professor emeritus of pharmaceutical science, School of Pharmacy and School of Medicine; B.S., M.S., Ph.D. (Ohio State University).

Cydney McQueen ; clinical associate professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Tatum Mead; clinical assistant professor of pharmacy practice and administration; Pharm.D. (University of Iowa); B.A. (University of Northern Iowa).

Russell B. Melchert; dean, school of pharmacy, and professor of pharmacology and toxicology; B.S., Ph.D. (The University of Oklahoma Health Sciences Center).

Srikumaran K. Melethil; professor emeritus of pharmaceutical science; B.Pharm., M.Pharm. (Andhra University, India); Ph.D. (State University of New York at Buffalo).

#*Ashim K. Mitra; vice provost for interdisciplinary research, co-director of Vision Research Center, curators professor of pharmaceutical science and chair, Division of Pharmaceutical Science; B.S., M.S. (Jadavpur University, India); M.S., Ph.D. (University of Kansas).

#*Mridul Mukherji; assistant professor of pharmaceutical science; B.S. (University of Allahabad, India); M.S. (University of Calicut, India); Ph.D. (University of Oxford, United Kingdom).

Leigh Anne Nelson; assistant professor of pharmacy practice and administration; B.S., Pharm.D. (University of Missouri-Kansas City).

Noel O. Nuessle; professor emeritus of pharmaceutical science; B.S. (St. Louis College of Pharmacy and Allied Sciences); M.S., Ph.D. (University of Florida).

Lauren Odum; clinical assistant professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Erica Ottis; clinical assistant professor of pharmacy practice and administration; Pharm.D. (St. Louis College of Pharmacy).

Heather A. Pace; clinical assistant professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Mark Patterson; assistant professor of pharmacy practice and administration; B.A. (Bowdoin College); M.P.H. (Yale University); Ph.D. (University of North Carolina-Chapel Hill School of Pharmacy).

Robert W. Piepho; dean emeritus and professor of pharmacology and toxicology; B.S. (University of Illinois); Ph.D. (Loyola University).

David Phillips; clinical assistant professor of pharmacy practice and administration; Pharm.D. (Ohio Northern University Raabe College of Pharmacy).

#*Rafia S. Rasu; associate professor of pharmacy practice and administration; B.S., M.S., M.B.A. (Dhaka University, Dhaka, Bangladesh); Ph.D. (University of Texas).

William J. Rost; professor emeritus of pharmaceutical science; B.S., Ph.D. (University of Minnesota).

Valerie L. Ruehter; clinical assistant professor of pharmacy practice and administration and director, experiential programs; B.S., Pharm.D. (University of Missouri-Kansas City).

Jennifer A. Santee; clinical associate professor of pharmacy practice and administration; Pharm.D. (University of Iowa).

Stephanie Schauner; clinical assistant professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Andrew Smith; clinical assistant professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Kathleen A. Snella; associate dean, school of pharmacy, and clinical associate professor of pharmacy practice and administration; B.S. (University of Iowa); Pharm.D. (The University of Texas at Austin and The University of Texas Health Science Center at San Antonio).

Roger W. Sommi, Jr.; professor of pharmacy practice and administration; B.S. (University of Wisconsin-Madison); Pharm.D. (University of Utah).

Morgan Sperry; clinical assistant professor of pharmacy practice and administration; Pharm.D. (Creighton University).

Steven Stoner ; clinical professor of pharmacy practice and administration and chair, Division of Pharmacy Practice and Administration; Pharm.D. (University of Nebraska).

##Jianping Wang ; assistant professor of pharmacology and toxicology; M.D., M.S. (Second Military Medical University); Ph.D. (Louisiana State University of Health Sciences Center).

Elizabeth Winans; clinical associate professor of pharmacy practice and administration; B.S. (Kansas State University); B.S., Pharm.D. (University of Oklahoma College of Pharmacy).

Eric Wombwell; clinical assistant professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

##Bi-Botti C. Youan ; associate professor of pharmaceutical science; Pharm.D. (University of Cote, Abidjan); MBA (United Business Institutes, Belgium); M.Sc., Ph.D. (Catholic University of Louvain, Belgium).

David M. Yourtee ; professor emeritus of pharmacology and toxicology, School of Pharmacy and School of Medicine; B.S. (University of Missouri-Columbia); Ph.D. (University of Missouri-Kansas City).

Undergraduate Courses

College of Arts & Sciences Courses

American Studies (AMER-ST)

AMER-ST 250 Introduction To American Studies I

This course is the first half of the year long, required introductory course in American Studies. It is also open to all undergraduates. It focuses on works and authors, from the turn-of-the century to the present, who are generally considered part of the American Studies canon and emphasizes understanding what America is/was according to these writers. The course is grounded in questions of citizenship, civic responsibility, ethics, character, progress and westward expansion. It will also look at the place of distinct disciplines (political science, English, anthropology, history, sociology, communication studies) in grappling with many of these questions. The course will introduce students to American Studies as an area of study and interdisciplinary scholarship as a methodological tool. Offered: Fall Semester.

AMER-ST 251 Introduction To American Studies II

This course is the second half of the year long, required introductory course in American Studies. It is also open to all undergraduates. Students will be expected to locate themselves within American Studies as an area of study and will be pushed to think critically about the field by looking at the work of scholars in Cultural History, Media Studies, Regional Studies, Black Studies, Public History, Critical Legal Studies, Women's Studies and American Studies in an international context. Students will also be encouraged to place this scholarship in dialogue with that from the first semester in order to look at the boundaries of a field that is constantly changing. Prerequisite: A&S 250 Offered: Winter Semester.

AMER-ST 300CD American Social Film: Silver Screen And The American Dream

This course will combine American social history and American film history. Using Hollywood entertainment films, the course will look at Hollywood as an indicator of social, political and economic conditions in the United States from the early 1900s to the late 1950s. The main topics are war and the threat of war, poverty and affluence, racial tensions, censorship, and political zealotry. A paper is required and a social history textbook, a film history textbook, a play by Arthur Miller, and a collection of articles constitute core readings. This course is offered as a cluster with COMM- ST 402CD and ENGLISH 300cd

AMER-ST 301 American Stds: Is/Tutorial: Themes In The American Popular Arts

This course uses the popular arts as an entree to the examination of stereotypes in American life, to a better understanding of challenges to tradition, and to assessing the consequences of conflict that have resulted from cultural pluralism. This is a modified independent study course. Students are exposed to some of America's best-known literature, films and music. Instructional audio tapes and traditional literature about American Culture show the relevance of examples of popular art to broader themes. Prerequisites: Concurrent enrollment in AMER-ST 302P and AMER-ST 303PW. Offered: On demand.

AMER-ST 301 American Stds: Is/Tutorial: Themes In The American Popular Arts

This course uses the popular arts as an entree to the examination of stereotypes in American life, to a better understanding of challenges to tradition, and to assessing the consequences of conflict that have resulted from cultural pluralism. This is a modified independent study course. Students are exposed to some of America's best-known literature, films and music. Instructional audio tapes and traditional literature about American Culture show the relevance of examples of popular art to broader themes. Prerequisites: Concurrent enrollment in AMER-ST 302P and AMER-ST 303PW. Offered: On demand.

AMER-ST 301P American Studies:Is/Tutorial:Themes In The American Popular Arts

This course uses the popular arts as an entree to the examination of stereotypes in American life, to a better understanding of challenges to tradition, and to assessing the consequences of conflict that have resulted from cultural pluralism. This is a modified independent study course. Students are exposed to some of America's best-known literature, films and music. Instructional audio tapes and traditional literature about American Culture show the relevance of examples of popular art to broader themes. Prerequisites: Concurrent enrollment in AMER-ST 302P and AMER-ST 303PW. Offered: On demand.

AMER-ST 302 Survey Of American Studies

This course offers a look at changes and continuities in American life from the era of British colonization to the present. It emphasizes philosophical, scientific and creative ideas that have had lasting effects, changing social structure, the factors that determine lifestyle, and the consequences of the national preoccupation with pluralism and consensus. The course also covers the main features of American political history. Prerequisite: Concurrent enrollment in AMER-ST 303PW. Offered: On demand.

AMER-ST 302 Survey Of American Studies

This course offers a look at changes and continuities in American life from the era of British colonization to the present. It emphasizes philosophical, scientific and creative ideas that have had lasting effects, changing social structure, the factors that determine lifestyle, and the consequences of the national preoccupation with pluralism and consensus. The course also covers the main features of American political history. Prerequisite: Concurrent enrollment in AMER-ST 303PW. Offered: On demand.

AMER-ST 302P Survey Of American Studies

This course offers a look at changes and continuities in American life from the era of British colonization to the present. It emphasizes philosophical, scientific and creative ideas that have had lasting effects, changing social structure, the factors that determine lifestyle, and the consequences of the national preoccupation with pluralism and consensus. The course also covers the main features of American political history. Prerequisite: Concurrent enrollment in AMER-ST 303PW. Offered: On demand.

AMER-ST 302P Survey Of American Studies

This course offers a look at changes and continuities in American life from the era of British colonization to the present. It emphasizes philosophical, scientific and creative ideas that have had lasting effects, changing social structure, the factors that determine lifestyle, and the consequences of the national preoccupation with pluralism and consensus. The course also covers the main features of American political history. Prerequisite: Concurrent enrollment in AMER-ST 303PW. Offered: On demand.

AMER-ST 303PW Methods & Problems In American Studies

This course examines four topics that are important in American culture; each topic is approached from a different methodological perspective. The topics (problems) are related to cultural resources in the Kansas City area (such as a museum exhibit or a library research collection) and may change from semester to semester. Methods of problem solving are determined by the topic; however, students should expect to participate in oral history, interpretation of material culture, and traditional archival research and document analysis. Prerequisite: Concurrent enrollment in AMER-ST 302P. Offered: On demand.

AMER-ST 303WI Methods & Problems In American Studies

This course examines four topics that are important in American culture; each topic is approached from a different methodological perspective. The topics (problems) are related to cultural resources in the Kansas City area and may change from semester to semester. Methods of problem solving are determined by the topic; however, students should expect to participate in oral history, interpretation of material culture, and traditional archival research and document analysis.

AMER-ST 340 Seminar: Critical Issues In American Culture

An interdisciplinary seminar which will examine various cultural topics relevant to understanding contemporary issues in American society. Students will write individual research papers as well as offer critiques of each other's work. Prerequisites: None. Offered: Every Fall semester.

AMER-ST 340 Seminar: Critical Issues In American Culture

An interdisciplinary seminar which will examine various cultural topics relevant to understanding contemporary issues in American society. Students will write individual research papers as well as offer critiques of each other's work. Prerequisites: None. Offered: Every Fall semester.

AMER-ST 340P American Material Culture: The 20th Century

This course will focus on the material culture of modern and post-modern America. This is an area of inquiry particularly well-suited to the examination of material culture resources. Students will be required to write a term paper or do a material culture project. Offered: Fall

AMER-ST 340PP American Material Culture: The 1950s

This course will focus on the period of American culture from demobilization after World War II to the end of the 1950s--an era particularly well-suited to employing material culture resources as evidence. Students will be required to write a term paper or do a material culture project.

AMER-ST 340PP American Material Culture: The 1950s

This course will focus on the period of American culture from demobilization after World War II to the end of the 1950s--an era particularly well-suited to employing material culture resources as evidence. Students will be required to write a term paper or do a material culture project.

AMER-ST 341 American Material Culture: Objects And Images

This course will examine American cultural and social history from earliest times to the present, with a special emphasis on the ways artifacts and visual images can provide information and insight about the American experience. Offered: Fall

AMER-ST 341 American Material Culture: Objects And Images

This course will examine American cultural and social history from earliest times to the present, with a special emphasis on the ways artifacts and visual images can provide information and insight about the American experience. Offered: Fall

AMER-ST 341P American Material Culture: Objects And Images

This course will examine American cultural and social history from earliest times to present, with a special emphasis on the ways artifacts and visual images can provide information and insight about the American experience.

AMER-ST 342 American Material Culture: Museums

This course will focus on local institutions that use material culture in their presentation of history and the American experience. Offered: Fall

AMER-ST 342 American Material Culture: Museums

This course will focus on local institutions that use material culture in their presentation of history and the American experience. Offered: Fall

AMER-ST 342P American Material Culture: Museums

This course will focus on local institutions that use material culture in their presentation of history and the American experience.

AMER-ST 375 Censorship And Popular Culture In America

The First Amendment to the Constitution states that ""Congress shall make no law ... abridging the freedom of speech or the press."" The American experience, however, is that controversial books, radio and television programs, motion pictures, and, most recently, the Internet have been subjected to various types of censorship. This course will study the censorship of popular culture in America.

AMER-ST 380 Decade Of Dissent: The 1960S

The social movements and conflicts that developed during the 1960s continue to define American culture in the 1990s. Questions of racial and gender equity, a greater willingness to challenge authority, concerns about the environment, and a new openness about issues of sexuality all developed during the Sixties and remain as arenas of debate today. This course will examine the origins, contexts, and major themes of these social and cultural movements.

AMER-ST 400 Special Studies

Pertinent courses from academic units throughout campus may be cross-listed with this course and applied to the major's requirements in American Studies. Prerequisite: None. Offered: Fall, Winter, Summer.

AMER-ST 400A Special Studies

AMER-ST 400B Special Studies

AMER-ST 400C Special Studies

AMER-ST 400CW Cc: Critical Issues in Women's & Gender Studies

What does it mean to grow up a female in America? How does being female influence the body, the mind, identity? This course is an interdisciplinary exploration of the issues that have shaped the lives of American women throughout the life cycle and across the timeline. This course examines the role that culture and society have played in shaping and defining what it means to be an American girl and woman. This course is cross-listed as ANTHRO 300CL, ANTHRO 5580CL, SOCIOL 303CW, and SOCIOL 5580CL.

Pertinent courses from academic units throughout campus may be cross-listed with this course and applied to the major's requirements in American Studies. Prerequisite: None. Offered: Fall, Winter, Summer.

AMER-ST 400W Special Studies

AMER-ST 410P The American Conception Of Evil: Historical And Cultural Contexts

This interdisciplinary course may focus on time periods in American history where the concept of evil has played a crucial role in determining public attitudes and policy, as well as the Western European roots of those attitudes. The course may focus on several broad time periods and topics: Western Europe before Columbus and during the initial years of contact between Europeans and Native Americans; Puritan New England, including the Salem witch trials; indentured servitude and slavery among Africans and other racial minorities; the Progressive Era; World War II, especially the experiences of American liberators of the concentration camps, the Japanese American internment experience, and the decision to use the atomic bomb; and Post WWII, especially the Cold War, the Vietnam War, 9/11, and contemporary hate groups.

AMER-ST 411P The American Conception Of Evil: Readings In Primary Sources

This interdisciplinary course is a companion to American Studies 410P and may focus on understanding documents from the listed time periods in light of their original contexts, as well as developing an understanding of the roots of contemporary definitions of evil. Selections may include Puritan captivity narratives, diary entries, sermons, fiction, poetry, oral histories, WPA interviews with former slaves, films, television shows, and other appropriate materials.

AMER-ST 430 American Studies Internship

Internship opportunities for advanced students involved in community and campus activities. Students must receive approval of the Director or Assistant director of American Studies prior to enrollment. No more than 6 credit hours can be taken. Prerequisites: None. Offered: Fall, Winter, Summer.

AMER-ST 440WI Senior Seminar

Students enrolling in this course will produce an interdisciplinary research paper under the direction of the instructor in cooperation with other American Studies faculty. and peer review with other American Studies students. Prerequisite: AMER-ST 400 Offered: Fall/Winter/Summer

Anthropology (ANTHRO)

ANTHRO 103 Introduction To Cultural Anthropology

An introduction to culture and the basic concepts of anthropology. Topics include kinship, language, and cultural change. Also offered as SOCIOL 103. Offered: Fall/Winter.

ANTHRO 202R Social Organization

This course focuses on the principles of social organization that undergird all human societies: social groups; age and gender differences; the institutions of family, economy, religion and polity; power; community and other units of residence; and social differentiation based on such factors as wealth and/or prestige. The focus of analysis is on the maintenance of social order, social

change, and integration of society. Crosslisted with SOCIOL 202R. Prerequisite: SOCIOL 101. Offered: Every semester.

ANTHRO 205 The Social Life of Things

This course examines the ways anthropologists have studied the connections between people and things. It explores how social relationships are created and changed through the use and exchange of objects, and how objects themselves take on particular meanings and histories in these processes. In questioning the relationship between material culture and human sociality, the course will expose students to a range of ethnographic and historical case studies, as well as introduce them to some core theoretical perspectives and debates within anthropology

ANTHRO 207 Writing Culture: The Craft of Ethnography

This course will explore the contexts in which powerful social groups learn, talk, and write about less powerful groups. The course material will explore how the identities and biases of anthropologists condition how they perceive, analyze, and represent others. Students will compare changes in ethnographic methods, theories, and styles across time and geography.

ANTHRO 212 Global Health

This course will use the lens of critical medical anthropology to analyze the sources of poor health outcomes, health disparities, and the global impacts of health policy. Students will explore the connections between population health and other aspects of social life, such as power, inequality, war, and economics, exploring the ways in which globalization and the privatization of health creates conditions that facilitate disease.

ANTHRO 300AF Special Topics In Anthropology

ANTHRO 300B Special Topics In Anthropology

Each time this course is offered, a different area of anthropology, to be announced, will be examined. Crosslisted with SOC 300R. Prerequisite(s); None. Offered: On demand.

ANTHRO 300CL Cluster Course: Introduction To Women'S Studies

ANTHRO 300CL Cluster Course: Introduction To Women'S Studies

ANTHRO 300CS Spec Topics Anthropology

Each time this course is offered, a different area of anthropology, to be announced, will be examined.

ANTHRO 300R Special Topics In Anthropology

Each time this course is offered, a different area of anthropology, to be announced, will be examined. Also offered as SOCIOL 300R.

ANTHRO 300RE Special Topics In Anthropology

ANTHRO 300RF Special Topics In Anthropology

ANTHRO 300RV Special Topics In Anthropology

ANTHRO 300RV Special Topics In Anthropology

ANTHRO 300SR Special Topics in Anthropology

ANTHRO 300YS Special Topics In Anthropology

ANTHRO 302 Social Stratification

The distribution of power, privileges and prestige are examined in a historical and comparative perspective. The process whereby distribution systems develop, become institutionalized, and become transformed are analyzed. Also offered as SOCIOL 302.

Offered: Fall

ANTHRO 303CN Cluster Course: Terrorism, Civil War and Trauma

This interdisciplinary course examines the modern experience of terrorism and civil war in the light of art, film, history, literature, and philosophy. It explores a number of traumatic events, historic and contemporary, challenging us to think about such contemporary issues as violence and identity formation, civil rights and state-sponsored terrorism, pacifism and patriotism, resistance and collaboration, fundamentalism and fascism, neo-colonialism and anti-imperialism. Cross-listed with English 300CN.

ANTHRO 305 Language and Culture

This course is designed to familiarize students with the basic objects, aims, and methods of linguistic anthropology. Students will acquire this familiarity by studying both theoretical and ethnographic articles that focus on some of the major areas of concern within the field including: the evolution of human language, linguistic particularity and universality, the relationship of language to thought, structuralism and semiotics, trope theory, language and emotion, sociolinguistics, the development of writing systems, and language conservation and change.

ANTHRO 306 Culture, Emotion, and Identity

This course introduces students to some of the key theoretical perspectives and debates within the field of psychological anthropology. By drawing upon cross-cultural studies of emotion, personhood, sexuality, illness, and consciousness it seeks to understand some of the ways that culture and society influence human psychology and experience.

ANTHRO 314 Anthropology of Gender

This class explores theories of the social construction of gender in cross-cultural contexts. It will also explore global issues of local and international politics, the economy, work and education as these relate to gender.

ANTHRO 322 Race And Ethnic Relations

The nature, origin and dynamics of ethnic and race relations in the U. S. and other societies. Specific attention will be given to the historical and contemporary contexts of prejudice, discrimination and confrontation. Also offered as Soc 322. Offered: Fall/Winter.

ANTHRO 324 Diversity And You

This course will examine diversity from the perspectives of race, ethnicity, class and gender. Emphasis will be placed on the impact of racism, classism and sexism on interpersonal relationships and strategies to encourage diversity in schools, neighborhoods, and the work place. Students may also enroll in "directed research" in conjunction with his course.

ANTHRO 327 Us Government's Indian Policies: Practices Of A Colonizing Nation

This class will convey information about the implementation of US Government policies, from treaty making, establishing reservations, removing, confronting tribes militarily, and abolishing reservations through allotment resulted in consequences detrimental to tribal welfare. The colonization process created ramifications and consequences that Indian people contend with to this day. This class will provide a historical overview of the consequences associated with political, social, and economic processes that divested Indian people of control over their lives and land they originally lived on. Also cross listed as SOCIOL 323.

ANTHRO 328 Body and Society

Body and Society is an interdisciplinary and comparative approach to the study of the body as the subject and object of social processes. Interdisciplinary approaches to topics such as meaning, ritual, performance, and practice will provide a framework for classical as well as contemporary explorations of bodily representation and experiences across a variety of cultural contexts. Prerequisite: Introduction to Cultural Anthropology

ANTHRO 328 Body and Society

Body and Society is an interdisciplinary and comparative approach to the study of the body as the subject and object of social processes. Interdisciplinary approaches to topics such as meaning, ritual, performance, and practice will provide a framework for classical as well as contemporary explorations of bodily representation and experiences across a variety of cultural contexts. Prerequisite: Introduction to Cultural Anthropology

ANTHRO 329 The Imagery Of The American Indian In Film

This course will trace the imagery of the American Indian used by film makers through the years and how this has played a role in reinforcing certain inaccurate perceptions of American Indian cultural, social, and economic life. The course examines the sociological implications created by persistently showing misrepresented images of American Indians. The goal is to measure and compare the reality of American Indian life (values, traditions, and beliefs) with the images created by film makers from the early years of the 20th century to the present. Also cross listed as SOCIOL 325

ANTHRO 331 Urban Anthropology

A course designed to apply anthropological methods to the study of various urban environments. The approach to the subject is comparative, seeking to spell out those features of the urban setting which vary from culture to culture as well as those which are common to all.

ANTHRO 331 Urban Anthropology

A course designed to apply anthropological methods to the study of various urban environments. The approach to the subject is comparative, seeking to spell out those features of the urban setting which vary from culture to culture as well as those which are common to all.

ANTHRO 331 Urban Anthropology

A course designed to apply anthropological methods to the study of various urban environments. The approach to the subject is comparative, seeking to spell out those features of the urban setting which vary from culture to culture as well as those which are common to all.

ANTHRO 339 American Indian Leaders: Past And Present

This course will examine the definition of leadership as it relates to American Indian issues. Consideration will be given to the nuances of leadership by examining the social, cultural, economic, and political situations that gave cause for particular individuals to assume roles of leadership. The course will compare and contrast the notions of leadership within American Indian ranks with those practiced by non-Indian leaders. It will trace the evolving nature of leadership within tribal nations and American Indian communities from past to present, as well as looking at Indian leadership roles in time of war and peace. Lives of the major characters of American Indian historical record will be reviewed, such as Geronimo, Crazy Horse, Sitting Bull, Osceola, Tecumseh, Pontiac, Black Hawk, Quannah Parker, and Captain Jack. Also cross listed as SOCIOL 326

ANTHRO 340R Social Change

Examines the key dimensions that bring about change in societies, including revolutions and evolutionary processes. Attention is given to the global context of social change, as well as the role of social actors and social movements. Crosslisted with (ANTH 340R or SOC 340R).

ANTHRO 341R The Anthropology Of Economic Institutions

Examines in a comparative perspective the social, cultural and political framework of economic activities. Emphasis is placed on socioeconomic systems and the contradictions they generate. Crosslisted with SOCIOL 341R.

ANTHRO 343 Societies And Cultures Of Latin America

A survey of emerging cultures and societies in Latin America; pre-history and geography; the Mayan, the Aztec and Incan civilizations; contemporary Indian, peasant and urban subcultures; the impact of forces such as migration, urbanization, peasant mobilization, and agrarian reform. Also offered as SOCIOL 343.

ANTHRO 346 Cultures Of The African Diaspora

This course will explore the cultures of African people and their descendants who settled in Europe, the Caribbean or the Americas due primarily to the impact of the Trans-Atlantic trade in human beings. The focus will be comparative, with emphasis on cultural adaptation, kinship systems, music and religion.

ANTHRO 347 The American Indian Image: Stereotype Vs. Reality

This class will take a historical, sociological, and cultural approach to review how society at large views American Indians. The course will trace the origin and continued use of American Indian stereotyped views, and assess the sociological and psychological complications that result when judging Indians solely on stereotyped imagery. The course will review the historical content of American Indian life as portrayed in early plays, films, and newspaper accounts and compare these stereotyped images with the reality of American Indian life by providing a depiction of a series of historical events that will offer a more balanced and accurate consideration for American Indian life past and present. Also cross listed as SOCIOL 324.

ANTHRO 348 Latin American Immigrants & Refugees in the U.S.

The course is an introduction to the study of the culture and societies of U.S. citizens and immigrants of Latin American heritage living in the U.S. The course emphasizes recent anthropological as well as historical and cultural studies. Topics covered: ethnohistory, kinship, labor, intergenerational relations, gender transnationalism and immigration and cultural diffusion over successive generations.

ANTHRO 373 Anthropology of Religion

This course explores the ways anthropologists have gone about studying religion from the opening decades of the 20th century to present. The course introduces students to the diversity of human religious expression and experience through anthropological literature and to the diversity of anthropological expression especially as it has been revealed in social scientific studies of religious life. The course is designed to generate a critical dialogue about the special role that religion has played in the ongoing

anthropological engagement with "other" societies and cultures over time.

ANTHRO 374 Anthropology of Childhood

This course explores how children's lives are shaped by cultural, economic, and political forces and relations. Drawing upon a range of case studies and disciplinary perspectives it will consider how and why children emerge as sites of contestation and debate, and it will examine the various ways in which the category and experience of childhood unfold in different socio-historical contexts. The main objective of the course is to better understand the social construction of childhood and use the study of childhood as a privileged window for exploring the articulation of cultural, economic and political relations within the context of contemporary global society.

ANTHRO 381 Archaeological Resources Management

This class examines contemporary issues managing archaeological resources. The class is intended for students seeking work in Cultural Resources Management (CRM); those already working CRM, or student anthropology, environmental studies, geology, geography, public administration and other fields likely to deal with archaeological and historical resources in a research or employment setting. This class does not require a background in archaeology. Cross-listed with Geology 407.

ANTHRO 382 Archaeological Field Survey Methods

This class offers instruction in the basic skills required to conduct field surveys in archaeology and other geosciences disciplines. In the classroom, students learn about the development of archaeology as a scientific discipline and how to recognize some of the basic field data sought by archaeologists. Students learn about mapping and land navigation techniques. The field phase of instruction includes visits to archaeological sites in the region. Cross-listed with Geology 408.

ANTHRO 383 Field School in Archaeology

This class offers students an opportunity to attend a field school in archaeology. Students will be taught how to: design archaeological research, set-up excavation, keep a wide range of excavation records, make maps and drawings, take photographs related to excavation problems, identify and receive a broad spectrum of artifact and faunal remains, collect samples for specialized analysis and use a wide range of excavations tools. This course will also introduce students to recording and analyzing excavated materials in the archaeological laboratory. Cross-listed with Geology 409.

ANTHRO 384 North American Prehistory

This class offers instruction in the archaeological survey of prehistoric North America from the Arctic to northern Mexico. The course outlines cultural developments within this region from the peopling of the Americas near the end of the last Ice Age to the arrival of Europeans over 10,000 years later. The diversification of Native American societies across this time span is examined in relation to social and environmental challenges, including the transformation of hunter-gatherer groups into chiefdoms and complex agricultural societies. Cross-listed with GEOG 457. Offered: On Demand.

ANTHRO 385 Archaeology as Anthropology: The Development of Human Societies

This class examines the development of archaeology as a distinctive branch of anthropology, and archaeology's role in a centuries-long debate about the causes of cultural variation and the development of human societies. This class examines how the Enlightenment, colonialism, the geological discovery of 'Deep Time' and the Darwinian Revolution not only give rise to anthropology and archaeology, but launched an enduring debate about how and why we study cultural behavior. Cross-listed with Classics 370.

ANTHRO 386 Introduction to Prehistoric and Classical Archaeology

An introduction to archaeological research methods that traces human origins and cultural development from the earliest fossil evidence to the threshold of written history and civilization. This class emphasizes the evolutionary and cultural developments that allowed our ancestors to colonize the continents and develop lifeways involving hunting and gathering, farming and urbanism. Also cross-listed with HIST 400C and CLAS 360.

ANTHRO 397 Independent Readings in Anthropology

Intensive readings in an area selected by the student with prior consultation with instructor. Prerequisite: Twelve hours of anthropology. On demand.

ANTHRO 414 Feminist Theories

This class introduces the major feminist theories and their primary authors over the last 200 years. The class takes both a historical view (beginning with two millennia of male-centered theories about women) and a conceptual approach (theories are grouped by common ground) and familiarizes the student with both the historical processes that necessitate feminist theories as well as with the breadth and depth of the historically and currently available scholarship. Prerequisite: Introduction to Women's Studies Offered: Winter Semester

ANTHRO 441 Globalization and Development

Focuses on issues of economic development, social stratification, political institutions, and political mobilization in societies

where colonialism provided the context for their long-term disadvantages in the international economic order. Specific attention is paid to the intersection of the international components that define the options and limits for societal development (e.g., market shifts, international institutions and contracts, foreign policies, and migration) and the distinct social, political and cultural implications of these factors for developing societies. Crosslisted with ANTHRO or SOCIOL 441.

ANTHRO 441 Globalization and Development

Focuses on issues of economic development, social stratification, political institutions, and political mobilization in societies where colonialism provided the context for their long-term disadvantages in the international economic order. Specific attention is paid to the intersection of the international components that define the options and limits for societal development (e.g., market shifts, international institutions and contracts, foreign policies, and migration) and the distinct social, political and cultural implications of these factors for developing societies. Crosslisted with ANTHRO or SOCIOL 441.

Arabic (ARABIC)

ARABIC 110 Elementary Arabic I

Fundamentals of the language, essentials of conversation, grammar, practical vocabulary, useful phrases, and the ability to understand, read and write simple classical Arabic. Fall.

ARABIC 120 Elementary Arabic II

Continuation of Arabic 110. Winter. Prerequisite(s): Arabic 110 or equivalent.

ARABIC 211 Second Year Arabic I

Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language. Prerequisite: Arabic 120. Fall.

ARABIC 221 Second Year Arabic II

Continuation of Arabic 211.

ARABIC 221 Second Year Arabic II

Continuation of Arabic 211.

ARABIC 280 Special Intermediate Arabic Topics I

Instruction of Arabic on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit. Prerequisite: Elementary I and II college-level courses or equivalent. As needed. Restrictions: Permission of chair required

ARABIC 290 Special Intermediate Arabic Topics II

Continuation of Arabic 280. May not be repeated for credit. As needed. Restrictions: Permission of chair required

Architectural Studies (ENV-DSN)

ENV-DSN 110 The Meaning Of Architecture

Architecture is a visual and physical expression of civilization. This course will introduce to the student an understanding and appreciation of architecture and our built environment through a broad examination of cultural and aesthetic paradigms. The student will be informed of the historic legacy and value of architecture; how it impacts our society today and our daily lives. This course will employ slides, lectures, and text to familiarize the student with a select group of significant works of architecture of the western world. Local site visits may be required therefore transportation will be the student's responsibility.

ENV-DSN 248 Fundamentals of Architectural Technology

Instruction in the fundamentals of architectural technology with emphasis on the concepts and principles necessary for developing an integrated approach to building design. Permission of the department required.

ENV-DSN 248 Fundamentals of Architectural Technology

Instruction in the fundamentals of architectural technology with emphasis on the concepts and principles necessary for developing an integrated approach to building design. Permission of the department required.

ENV-DSN 250 History Of The Designed Environment I

This course will present an overview of the developments in architectural, urban, landscape and interior design which have had an impact on the physical environment from ancient times through the medieval up to the gothic period. A central objective of the course is to gain an understanding of why these developments occurred and how the needs and aspirations of a given time were manifested in physical form. Offered: Winter

ENV-DSN 250 History Of The Designed Environment I

This course will present an overview of the developments in architectural, urban, landscape and interior design which have had an impact on the physical environment from ancient times through the medieval up to the gothic period. A central objective of the course is to gain an understanding of why these developments occurred and how the needs and aspirations of a given time were manifested in physical form. Offered: Winter

ENV-DSN 251 History Of The Designed Environment II

This course will present an overview of the developments in architectural, urban, landscape and interior design which have had a consequential impact on the physical environment of the Western world from the Italian Renaissance (starting in the 15th century) up to the present day. Offered: Fall

ENV-DSN 251 History Of The Designed Environment II

This course will present an overview of the developments in architectural, urban, landscape and interior design which have had a consequential impact on the physical environment of the Western world from the Italian Renaissance (starting in the 15th

century) up to the present day. Offered: Fall

ENV-DSN 252 History Of The Designed Environment III

The history of the designed environment from the mid-18th century to the present. Offered: Fall semester

ENV-DSN 252 History Of The Designed Environment III

The history of the designed environment from the mid-18th century to the present. Offered: Fall semester

ENV-DSN 301 Architectural Design Studio I

Instruction in architectural design focusing on the application of elements and principles of form and space in design. Instruction in the use of techniques for visually representing design ideas. Prerequisites: ENV-DSN 202 Offered: Fall.

ENV-DSN 302 Architectural Design Studio II

Instruction in architectural design focusing on the synthesis of basic social, functional, technical, and aesthetic factors in design. Continued instruction in techniques for visually representing ideas. Prerequisite: ENV-DSN 301 Offered: Winter semester.

ENV-DSN 347 Structural Systems In Architecture I

Introduction to structure as a building system. Overview of contemporary structural systems and their components, including wood, timber, steel, concrete, masonry, and hybrid structures. Discussion of building code requirements for structure, general guidelines for building structures, including appropriate application, and methods for schematic estimation of structural member sizing. Basic understanding of how gravity and lateral forces are propagated through a structural frame from load to building foundation. Prerequisites: MATH 110 & PHYSICS 210. Offered: Spring

ENV-DSN 348 Structural Systems In Architecture I

Introduction to statics: force analysis and the study of forces in equilibrium; principles of statics as applied to the study of simple elemental structures; the origin, the nature and the action of loads on structural systems. Instruction in the use of statics in the preliminary stages of building design. Prerequisites: MATH 110 & PHYSICS 210. Offered: Fall semester.

ENV-DSN 413 Environmental Systems In Architecture I

Instruction in bioclimatic and ecological design principles as a basis for architectural and landscape design: emphasis on passive solar heating and cooling and daylighting. Offered: Winter semester.

ENV-DSN 413 Environmental Systems In Architecture I

Instruction in bioclimatic and ecological design principles as a basis for architectural and landscape design: emphasis on passive solar heating and cooling and daylighting. Offered: Winter semester.

ENV-DSN 449 Structural Systems In Architecture II

Instruction in strength of materials focusing on the behavior of building materials under loading: their ability to resist deformation and failure. Instruction in sizing simple structural elements. Prerequisite: ENV-DSN 348. Offered: Winter semester.

Art (ART)

ART 101 Topical Studies In Studio Art

(A,B,C,D) This course provides students with an opportunity to explore offerings in a variety of fine arts media. No prerequisite. Does not meet baccalaureate requirements in the fine arts. Different sections of the course may be repeated.

ART 101 Topical Studies In Studio Art

(A,B,C,D) This course provides students with an opportunity to explore offerings in a variety of fine arts media. No prerequisite. Does not meet baccalaureate requirements in the fine arts. Different sections of the course may be repeated.

ART 105 Introduction To Photography

An introduction to the general practice of photography. This course is intended for non-majors. The course centers on the basic technical and aesthetic aspects of the medium. A fully adjustable digital camera is required.

ART 105 Introduction To Photography

An introduction to the general practice of photography. This course is intended for non-majors. The course centers on the basic technical and aesthetic aspects of the medium. A fully adjustable digital camera is required.

ART 105 Introduction To Photography

An introduction to the general practice of photography. This course is intended for non-majors. The course centers on the basic technical and aesthetic aspects of the medium. A fully adjustable digital camera is required.

ART 112 Foundation Drawing

This course focuses on developing skills and techniques of observational drawing. No previous drawing experience required.

ART 114 Foundation Digital Design

This introductory course on techniques and practical applications for digital arts, graphic design, and computer multimedia. Fulfills the College of Arts and Sciences computer competency requirement.

ART 114 Foundation Digital Design

This introductory course on techniques and practical applications for digital arts, graphic design, and computer multimedia. Fulfills the College of Arts and Sciences computer competency requirement.

ART 116 Computer Animation

General techniques and practical application for computer animation. This course is intended for both studio majors and non-majors. It does not serve as a prerequisite for any advanced electronic art courses. Lectures, demonstrations, readings, discussions and application sessions.

ART 121 Foundation 2D Design

The principles of visual thinking with emphasis on color theory and perception of form and space. Prerequisite: None

ART 121 Foundation 2D Design

The principles of visual thinking with emphasis on color theory and perception of form and space. Prerequisite: None

ART 131 Foundation 3D Design

Introductory study in three-dimensional formal principles with emphasis on the aesthetic properties. Prerequisite: None

ART 131 Foundation 3D Design

Introductory study in three-dimensional formal principles with emphasis on the aesthetic properties. Prerequisite: None

ART 203 Introduction To Typography

The formal and applied aspects of typography are studied in the context of the design process, involving basic concepts of copyfitting, specification of type, layout, and the use of computer assisted design software. Prerequisites: Art 114 and Art 121 or permission of the instructor

ART 204 Digital Video and Motion Design I

This introductory digital video and motion design course is intended for studio majors. General techniques and practical application of animation, video, text and sound in the digital arts and graphic design fields are addressed. Lectures, demonstrations, readings, discussions and application sessions. Prerequisite: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 204 Digital Video and Motion Design I

This introductory digital video and motion design course is intended for studio majors. General techniques and practical application of animation, video, text and sound in the digital arts and graphic design fields are addressed. Lectures, demonstrations, readings, discussions and application sessions. Prerequisite: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 204 Digital Video and Motion Design I

This introductory digital video and motion design course is intended for studio majors. General techniques and practical application of animation, video, text and sound in the digital arts and graphic design fields are addressed. Lectures, demonstrations, readings, discussions and application sessions. Prerequisite: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 206 Photography I

An introduction to photography as a means of creative self-expression. The course centers on the technical and aesthetic aspects of the medium. A fully adjustable digital camera is required. Prerequisites: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 206 Photography I

An introduction to photography as a means of creative self-expression. The course centers on the technical and aesthetic aspects of the medium. A fully adjustable digital camera is required. Prerequisites: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 206 Photography I

An introduction to photography as a means of creative self-expression. The course centers on the technical and aesthetic aspects of the medium. A fully adjustable digital camera is required. Prerequisites: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 212 Intermediate Drawing

Continuation of foundation drawing. Emphasis is on gaining technical facility with various drawing mediums and expanding conceptual approaches. Prerequisites: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 212 Intermediate Drawing

Continuation of foundation drawing. Emphasis is on gaining technical facility with various drawing mediums and expanding conceptual approaches. Prerequisites: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 218 Graphic Design I

A beginning level introduction to Graphic Design principles, such as layout, design, concept, basis design theory, graphic design production, and use of industry-level design software and tools. Prerequisites: Art 112, 114, 121, and 131 or permission of instructor

ART 221 Painting I

Exploration of the visual language in paint with continued emphasis on color and design. Prerequisites: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 221 Painting I

Exploration of the visual language in paint with continued emphasis on color and design. Prerequisites: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 221 Painting I

Exploration of the visual language in paint with continued emphasis on color and design. Prerequisites: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 224 Introductory Printmaking

An introduction to the process and technique of printmaking centering on metalplate printing. Prerequisites: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 224 Introductory Printmaking

An introduction to the process and technique of printmaking centering on metalplate printing. Prerequisites: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 235 Digital Imaging I

This is an introductory course to the computer as a creative tool for the visual artist. Images will be digitized, enhanced and altered. Practical and ethical issues regarding digital image processing are explored. Various input and output options will be discussed. Prerequisites: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 235 Digital Imaging I

This is an introductory course to the computer as a creative tool for the visual artist. Images will be digitized, enhanced and altered. Practical and ethical issues regarding digital image processing are explored. Various input and output options will be discussed. Prerequisites: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 244 Visual Tools For The Computer

Specific training in using software programs (such as Adobe Photoshop, Adobe Illustrator, Quark Express, etc.) for artists, architects, and graphic designers. Each section deals with a different program and thus the course may be repeated if the student signs up for a different section. Prerequisite: None.

ART 245 Digital Applications

This is an introductory class to software that has graphic and desktop applications. The course will deal principally with digital graphic software that is currently considered the industry standard. The class will also touch on other software that can have an impact on future computer applications pertaining to applied design. Through a variety of class projects/exercises, students will learn various software and how they interrelate. The class is open to all art students and general students. It will be a prerequisite for studio art students with a graphic design emphasis before entering advanced graphic design classes. (Course replaces visual tools, ART 244A, ART 244B, ART 244C which is a series of three one hour classes.)

ART 246 Digital Applications

This is an introductory class to software that has graphic and desktop applications. The course will deal principally with digital graphic software that is currently considered the industry standard. The class will also touch on other software that can have an impact on future computer applications pertaining to applied design. Through a variety of class projects/exercises, students will learn various software and how they interrelate. The class is open to all art students and general students. It will be a prerequisite for studio art students with a graphic design emphasis before entering advanced graphic design classes. (Courses replaces visual tools, ART 244A, ART 244B, ART 244C, which is a series of three one hour classes).

ART 300 Interdisciplinary Studies:Cluster Course Offerings I**ART 300CO** Cluster Course: Nature And The Environment: Art And Aesthetics**ART 305** Photography II

An advanced course in which students develop a deeper understanding of personal interests, sensibilities and goals as they relate to producing and appreciating creative photography. A fully adjustable digital camera is required. Prerequisites: Art 206 or permission of art advisor.

ART 305 Photography II

An advanced course in which students develop a deeper understanding of personal interests, sensibilities and goals as they relate to producing and appreciating creative photography. A fully adjustable digital camera is required. Prerequisites: Art 206 or permission of art advisor.

ART 305 Photography II

An advanced course in which students develop a deeper understanding of personal interests, sensibilities and goals as they relate to producing and appreciating creative photography. A fully adjustable digital camera is required. Prerequisites: Art 206 or permission of art advisor.

ART 308 Lithography

Study of stone lithographic process. Prerequisite: ART 224.

ART 309 Intaglio

Advanced study of intaglio printing processes. Prerequisite: ART 224.

ART 310 Digital Video and Motion Design II

This intermediate to advanced level digital video and motion design course is a continuation of Art 204. This course is intended for studio majors; it addresses advanced techniques of video post-production and motion graphic design. Lectures, demonstrations, readings, discussions, and application sessions. Prerequisites: ART 204 or permission of art advisor. Art 206 and Art 235 recommended.

ART 310 Digital Video and Motion Design II

This intermediate to advanced level digital video and motion design course is a continuation of Art 204. This course is intended for studio majors; it addresses advanced techniques of video post-production and motion graphic design. Lectures, demonstrations, readings, discussions, and application sessions. Prerequisites: ART 204 or permission of art advisor. Art 206 and Art 235 recommended.

ART 310 Digital Video and Motion Design II

This intermediate to advanced level digital video and motion design course is a continuation of Art 204. This course is intended for studio majors; it addresses advanced techniques of video post-production and motion graphic design. Lectures, demonstrations, readings, discussions, and application sessions. Prerequisites: ART 204 or permission of art advisor. Art 206 and Art 235 recommended.

ART 311 Painting II

Painting in oil or acrylic on the intermediate level with continued emphasis on color. Prerequisites: Art 221.

ART 312 Figure Drawing I

A study of the structure of the human figure with emphasis on the dynamics of figure movement. Prerequisite: ART 212.

ART 313 Graphic Design I

Intermediate study of graphic design methodology and techniques, stressing a visual approach to problem solving in design, image making techniques, materials, and production processes standard to the industry. Prerequisites: Art 114, Art 121, and Art

203 or permission of the instructor.

ART 314 Graphic Design Production

Study of the Mechanical procedures and techniques used for the realization of graphic design production. Prerequisite: Instructor's permission.

ART 322 Advanced Drawing

Further development of technique and content. Emphasis is on forming and clarifying a personal voice. Prerequisite: ART 212

ART 330 Fiber Art

Introductory study in the history, techniques, and production of fiber art. Prerequisite: Art 231.

ART 335A Digital Imaging II

This class will strengthen the competence and knowledge of digital imaging techniques. Research, conceptual and verbal abilities within digital image making will be explored. Students will apply new techniques to their personal interests in the studio arts.

Prerequisite: Art 235 or permission of art advisor

ART 335A Digital Imaging II

This class will strengthen the competence and knowledge of digital imaging techniques. Research, conceptual and verbal abilities within digital image making will be explored. Students will apply new techniques to their personal interests in the studio arts.

Prerequisite: Art 235 or permission of art advisor

ART 338 Graphic Design II

Intermediate study of graphic design theory, methodology and techniques, stressing a visual approach to problem solving in design, image making techniques, materials, and production processes standard to the industry. Prerequisite: ART 218, 348, or permission of the instructor.

ART 348 Introduction To Typography

This course explores the formal and applied aspects of typography as tools for design and artistic expression. Focus is on how type relates to art, layout, and design. Both hand produced typography and computer assisted design software will be incorporated. Prerequisites: ART 112, ART 114, ART 121 AND ART 131, or permission of art advisor.

ART 403 Advanced Typography

A continuation of Art 348 Typography, this course looks at more sophisticated typographic practice, typographic design theory, and both traditional methods of typographic design and practice such as letterpress and hand type and computer/digital based typography including motion-and time-based media such as web-sites and multimedia. Prerequisite: ART 218, 348, and 338, which may be taken concurrently, or consent of instructor.

ART 403 Advanced Typography

A continuation of Art 348 Typography, this course looks at more sophisticated typographic practice, typographic design theory, and both traditional methods of typographic design and practice such as letterpress and hand type and computer/digital based typography including motion-and time-based media such as web-sites and multimedia. Prerequisite: ART 218, 348, and 338, which may be taken concurrently, or consent of instructor.

ART 403 Advanced Typography

A continuation of Art 348 Typography, this course looks at more sophisticated typographic practice, typographic design theory, and both traditional methods of typographic design and practice such as letterpress and hand type and computer/digital based typography including motion-and time-based media such as web-sites and multimedia. Prerequisite: ART 218, 348, and 338, which may be taken concurrently, or consent of instructor.

ART 404 Digital Portfolio

Digital portfolio production and marketing course for senior studio art majors. Lectures, demonstrations, readings, discussions, and application sessions. Prerequisites: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 404 Digital Portfolio

Digital portfolio production and marketing course for senior studio art majors. Lectures, demonstrations, readings, discussions, and application sessions. Prerequisites: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 404 Digital Portfolio

Digital portfolio production and marketing course for senior studio art majors. Lectures, demonstrations, readings, discussions, and application sessions. Prerequisites: Art 112, Art 114, Art 121 and Art 131, or permission of art advisor.

ART 405 Art In Secondary School

An introduction to the special problems, procedures and materials associated with the art curriculum in the public schools. This course meets certification requirements in "Special Methods of Teaching Field." Prerequisites: The equivalent of senior standing in art plus permission of the instructor.

ART 406 Advanced Problems In Photography

This course provides students a forum in which the issues and techniques of contemporary photography can be investigated on a rather esoteric level. The format of the course allows for a mutual decision by the instructor and students, dictating which investigations will be pursued during that particular semester. Possible areas of investigation would include, but are not limited to, color photographic theory and practice, non-silver photographic techniques (e.g. Kwikprint, gum bichromate, cyanotype, Van Dyke Brown, etc.), hand coloring techniques, photo-collage, etc. Prerequisite: ART 305, or permission of instructor.

ART 411 Painting III

Painting on the intermediate level with a focus on experimentation and developing a personal visual language and expression. Prerequisites: Art 311.

ART 412 Figure Drawing II

A continuation of Figure Drawing I, Art 312. Drawing on the advanced level with study of the figure in environmental context. Prerequisite: ART 312 or ART 322.

ART 413 Graphic Design II

Advanced study in graphic design methodology and techniques, involving more intense project problem solving. Projects include visual communication strategies of a more advanced nature including newsletter, brochures, annual report, book, magazine and journalism spreads. Prerequisite: ART 313.

ART 421 Painting IV

Painting on the advanced level with supervised individual selection of technique and subject matter. Prerequisites: Art 411

ART 422 Advanced Drawing II

Continuation of Art 322. Prerequisite: Art 312 or 322.

ART 423WI Design Seminar

Capstone course for studio art majors with a focus on graphic design. Pertinent issues in practice, theory and history of design will be examined through selected readings, slide presentations and invited speakers. A research paper/presentation on a topic evolving from the discussions will be required. The course will also address resume and portfolio preparation for the design profession. This course is writing intensive. Successful completion of the WEPT test required prior to enrolling. Prerequisites: ART 313, ART 413 or permission of art advisor. Offered: Winter Semester Annually

ART 423WI Design Seminar

Capstone course for studio art majors with a focus on graphic design. Pertinent issues in practice, theory and history of design will be examined through selected readings, slide presentations and invited speakers. A research paper/presentation on a topic evolving from the discussions will be required. The course will also address resume and portfolio preparation for the design profession. This course is writing intensive. Successful completion of the WEPT test required prior to enrolling. Prerequisites: ART 313, ART 413 or permission of art advisor. Offered: Winter Semester Annually

ART 430 Graphic Design III

Advanced application of graphic design techniques to complex design problems. The course will stress individualized assignments and portfolio preparation. Prerequisite: ART 338, which may be taken concurrently, or consent of instructor.

ART 430 Graphic Design III

Advanced application of graphic design techniques to complex design problems. The course will stress individualized assignments and portfolio preparation. Prerequisite: ART 338, which may be taken concurrently, or consent of instructor.

ART 435P Visual Culture: logos, images, symbols, and advertising

In this guided self-study students will examine visual culture through imagery, objects, advertising, logos, and other symbols. The main objective of the course is to further the projects initiated in ART 436P. Students will implement ideas for real-life situations for logos, the web, and print design. Restrictions: Does not count towards Studio Art requirements. Concurrent enrollment in ART 436P is required.

ART 436P Introduction to Graphic Design and Desktop Publishing

Students will gain a basic understanding of two dimensional design, typography, and graphic design. Introductory skills in industry standard computer design software will be offered. Issues and techniques related to the field of graphic design will be

discussed. Restrictions: Does not count towards Studio Art major requirements

ART 437P Introduction to Digital Imaging and Computer Multimedia

Students will acquire a basic understanding of lens- based image creation using still and video cameras. Introductory skills in industry standard multimedia software will be used. Issues and techniques related to the field of electronic media will be discussed. Restrictions: Does not count towards Studio Art major requirements

ART 438P First Fridays: Guided Self-Study

Students will be exposed to contemporary issues in art through readings discussions, and audio-visual presentations. Various types of art will be viewed and experienced in professional art venues galleries, museums, alternative spaces). Independent visual and written projects related to lectures and visits will be required. Restrictions: Does not count towards Studio Art requirements. Concurrent enrollment in ART 437P is required. Restrictions: Does not count towards Studio Art major requirements.

ART 495 Technical Studies In Art

With the permission of the department, an advanced student may pursue a technical investigation on a seminar or individual basis.

ART 495A Technical Studies In Art: Papermaking

ART 498A Special Problems In Drawing

With permission of the department, an advanced student may pursue selected projects on a group or individual basis. Acceptable for graduate credit with approval.

ART 498A Special Problems In Drawing

With permission of the department, an advanced student may pursue selected projects on a group or individual basis. Acceptable for graduate credit with approval.

ART 498B Special Problems In Painting

With permission of the department, an advanced student may pursue a selected subject in oil, acrylic, or watercolor painting on a group or individual basis. Acceptable for graduate credit with approval. May be repeated for credit.

ART 498B Special Problems In Painting

With permission of the department, an advanced student may pursue a selected subject in oil, acrylic, or watercolor painting on a group or individual basis. Acceptable for graduate credit with approval. May be repeated for credit.

ART 498E Special Problems In Graphic Design

With permission of the department, an advanced student may pursue selected projects on a group or individual basis. Acceptable for graduate credit with approval.

ART 498E Special Problems In Graphic Design

With permission of the department, an advanced student may pursue selected projects on a group or individual basis. Acceptable for graduate credit with approval.

ART 498I Advanced Problems In Lithography

With permission of the department, an advanced student may pursue selected projects on a group or individual basis. Acceptable for graduate credit with approval. .

ART 498I Advanced Problems In Lithography

With permission of the department, an advanced student may pursue selected projects on a group or individual basis. Acceptable for graduate credit with approval. .

ART 498J Advanced Problems In Intaglio

With permission of the department, an advanced student may pursue selected projects on a group or individual basis. Acceptable for graduate credit with approval.

ART 498J Advanced Problems In Intaglio

With permission of the department, an advanced student may pursue selected projects on a group or individual basis. Acceptable for graduate credit with approval.

ART 498L Special Problems In Photography

With permission of the department, an advanced student may pursue selected projects on a group or individual basis. Acceptable

for graduate credit with approval.

ART 498L Special Problems In Photography

With permission of the department, an advanced student may pursue selected projects on a group or individual basis. Acceptable for graduate credit with approval.

ART 498M Special Problems In Electronic/Media

With permission of the Department, an advanced student may pursue selected projects in electronic media on a group or individual basis. Acceptable for graduate credit with approval. Prerequisites: Permission of Instructor.

ART 498M Special Problems In Electronic/Media

With permission of the Department, an advanced student may pursue selected projects in electronic media on a group or individual basis. Acceptable for graduate credit with approval. Prerequisites: Permission of Instructor.

ART 498O Special Problems In Graphic Design Internship

Advanced students are accepted into the production studios of participating graphic design companies in the metropolitan region as a training experience. Prerequisite: Permission of the department.

ART 498O Special Problems In Graphic Design Internship

Advanced students are accepted into the production studios of participating graphic design companies in the metropolitan region as a training experience. Prerequisite: Permission of the department.

ART 498Q Special Studies in Art: Internship

Advanced students gain invaluable practical experience in a professional setting in the field of art.

ART 498Q Special Studies in Art: Internship

Advanced students gain invaluable practical experience in a professional setting in the field of art.

ART 499WI Senior Seminar

Capstone course for studio majors in all media. Course addresses contemporary theoretical and practical issues in studio art practice, and prepares students for graduation. Multiple papers, class presentations, and a portfolio preparation are required. This course is writing intensive. Successful completion of the WEPT test required prior to enrolling. Prerequisites: Permission of art advisor. Offered: Winter Semester Annually

ART 499WI Senior Seminar

Capstone course for studio majors in all media. Course addresses contemporary theoretical and practical issues in studio art practice, and prepares students for graduation. Multiple papers, class presentations, and a portfolio preparation are required. This course is writing intensive. Successful completion of the WEPT test required prior to enrolling. Prerequisites: Permission of art advisor. Offered: Winter Semester Annually

Prerequisites: Permission of art advisor. Offered: Winter Semester Annually

Art History (ART-HIST)

ART-HIST 100 Topical Studies In Art History

This course consists of a series of lectures on selected subjects of European, American and Oriental art. No prerequisite. Does not meet baccalaureate requirements in fine arts. Does not meet departmental requirements for art or art history majors.

ART-HIST 110 Introduction to the History of Visual Arts

This is an introduction to the history of art, with in-depth discussions of painting, sculpture, prints, and architecture. Students will be introduced to significant works from major historical periods; their cultural roles, style and composition, and the artistic processes involved in their creation. Emphasis is placed upon Western art history, with attention paid to important interactions with other world traditions, including the arts of Islam, Japan, and Africa. The comprehensive collections of the Nelson-Atkins Museum of Art contribute an important component to the course. ART-HIST 110 meets the college fine arts requirement. It does not count toward the art history requirement for departmental majors.

ART-HIST 253 History Of The Designed Environment I, Ancient And Medieval

An overview of developments in architectural, urban, land and interior design which have shaped the physical environment of the

Western world from prehistory through the period known as the "Romanesque." Emphasis will be given to relationships between institutions, values and needs of different societies and the architectural forms produced by those societies. Prerequisite: None.

ART-HIST 254 History Of The Designed Environment II, Late Medieval To Modern

An overview of developments in architectural, urban, land and interior design which have had an impact on the physical environment of the Western World from the Gothic era to the beginning of the modern era. A central objective of the course is to gain an understanding of why these developments occurred and how the needs and aspirations of a given time were manifested in physical form. Prerequisite: None.

ART-HIST 255 History Of The Designed Environment III, Modern (1750 To Present)

An overview of developments in architectural, urban, land and interior design which have shaped the physical environment of the Western world during the Modern period. Issues to be explored include renewed interest in archaeology during the eighteenth century, shifts in patronage, the impact of new industrial materials and techniques, demands for an array of new building types, and dilemmas of expression throughout the modern era. Our concerns will broaden and become more global in scope when we examine the twentieth century. Prerequisite: None.

ART-HIST 300CD Cluster Course: The African Diaspora In The Arts And Culture

This new cluster course examines aspects of African culture in the Diaspora: Africa, the Caribbean and certain parts of South and North America. Attention will be on charms, painting, sculpture, secret scripts, textiles, as well as religions and spirituality. Understanding African Diaspora culture also involves an analysis of historical and sociological movements, the interpretation of written culture, and the effects of Africa's response to colonialism. The transmission and transformation of African cultures will be addressed by a close investigation of visual and material culture, and the cosmological constructions of African peoples. Methodologies are from the Art History, Literature and Religious Studies. Restrictions: Sophomore or above.

ART-HIST 300CF Cluster Course: African/African American Women And Creativity

ART-HIST 300CJ Cluster Course: Aestheticism In The Arts

This cluster course will deal with aesthetic problems in the arts illustrated with specific examples in music, literature and the visual arts.

ART-HIST 301 Survey Of Western Art: I

A survey of ancient and medieval Western art. The course will begin with the great civilizations of the Mediterranean basin and consider the changes wrought by the introduction of Christianity and Islam. Study of the medieval era will include Romanesque and Gothic architecture through the 15th century, but will not include the beginnings of panel painting nor of independent sculpture. This course meets the college fine arts requirement.

ART-HIST 302 Survey Of Western Art II

A survey of late medieval, Renaissance and Baroque art in Europe. The course will start with the beginnings of panel painting, independent sculpture and the graphic arts in late medieval Europe, trace the coming of the Renaissance in architecture and the figurative arts, and conclude with the Baroque tradition. This course meets the college fine arts requirement.

ART-HIST 303 Survey Of Western Art III

A survey of European and American art and architecture, beginning with the origins of the Romantic movement in the 18th century and concluding with contemporary work. This course meets the college Fine Arts requirement.

ART-HIST 315 The Arts Of African and New World Cultures

This historical survey of ethnographic arts includes two diasporas: 1) African art and the influences of Africans on the arts of new world cultures (in Brazil, Surinam, Cuba, Haiti, and the United States); and 2) Meso-American art and the influence of Meso-Americans on the arts of the Native North American cultures. Emphasis is placed on interdisciplinary theoretical approaches drawn from Art History, Anthropology, and folklore, as well as the importance of geography and trade. These ethnographic arts are examined from aesthetic, political, religious, and economic perspectives, in comparison with arts made in these countries in Western European traditions, including the cross-cultural impact that these various art traditions have on each other. This course satisfies the College requirement for a course in cultural perspectives. Cross-listed with Black Studies 315

This course satisfies the College requirement for a course in cultural perspectives. Cross-listed with Black Studies 315

ART-HIST 319 Asian Art

The survey will emphasize the philosophical and cultural context of the arts of India, Southeast Asia, China, Korea and Japan. The course will stress the elements that give an underlying unity to the arts as well as those qualities which distinguish the art of each country as unique.

ART-HIST 402CC CC: Making the Modern in France: Dance, Art, Music, and Literature

This cluster course will take an interdisciplinary approach to understand the way modernism developed within the arts, with a focus on late-19th, early 20th-century France. Developments in literature, art, dance, and music and their interconnectedness to cultural and historical events will be highlighted and explored. Cross-listed with Foreign Languages 402CC and Conservatory 402CC.

ART-HIST 415WI Romanticism

Art of the Romantic Era, principally in Europe, from c. 1790 to c. 1860. Consideration is given to the problems of patronage, criticism and stylistic influences. Prerequisite: ART-HIST 303 or permission of instructor and successful completion of the WEPT (effective FS93).

ART-HIST 416WI Later 19Th Century Painting And Sculpture

From Realism through Post-Impressionism. A study of art, principally in Europe, from c. 1850 to c. 1905, with consideration given to factors influencing stylistic changes during this period. May be taken independently of ART 415. Prerequisite: ART-HIST 303 or permission of instructor and successful completion of the WEPT (effective FS93).

ART-HIST 424 Early 20Th Century European Painting And Sculpture

A study of European painting and sculpture from c. 1900 to c. 1940. Prerequisite: ART-HIST 303 or permission of instructor.

ART-HIST 426 Twentieth Century Painting

A study of major artists and stylistic changes in painting, beginning c. 1905. Consideration also given to the role of media and to drawings and prints during this period. Prerequisite: ART-HIST 303 or permission of instructor.

ART-HIST 429WI American Painting And Sculpture

A study of the history of painting and sculpture, and other figurative arts, from earliest colonial times to the present. Emphasis will be placed on those artists who illuminate the major achievements in American art, and also the ongoing role played by European training and tradition. Prerequisite: ART-HIST 303 or permission of the instructor and successful completion of the WEPT (effective FS93).

ART-HIST 439 Paris in the Age of the Rococo

In the early 18th century, Paris overtook Rome as the artistic center of Europe. We explore all of the visual arts during the vibrant "Rococo," the age of Watteau, Chardin, and Boucher. Prerequisites: Art-Hist 302 or permission of the instructor. Offered Spring.

ART-HIST 440WI French Art: Renaissance And Baroque

A history of French art from the time of Louis XII through the Age of Louis XIV, with emphasis on painting and architecture. Prerequisite: ART-HIST 302 or permission of instructor and successful completion of the WEPT (effective FS93).

ART-HIST 441WI Northern Baroque: The Age Of Rubens, Rembrandt And Wren

The arts of England and the Low Countries in the 17th and early 18th centuries. Emphasis on painting and the graphic arts in the Spanish and Dutch Netherlands and on architecture in England. Prerequisite: ART-HIST 302 or permission of instructor and successful completion of the WEPT (effective FS93).

ART-HIST 443 Meso-American Art

The course will discuss 2500 years of the arts of ancient Mexico and Guatemala. Included is the rise of such important cultures as

the Olmec, Maya, and Aztec. Equal emphasis will be placed on the development of elaborate ceremonial centers such as Monte Alban and the Teotihuacan, as well as the ceramic traditions of the West and East coasts of Mexico. Prerequisite: ART-HIST 315 or permission of instructor.

ART-HIST 445 Northern European Art: 15Th And 16Th Centuries

A study of panel painting, sculpture and manuscript illumination in Flanders, France, Germany, and Spain from the Hundred Years' War through the Reformation. Special emphasis will be placed upon the stylistic and iconographic innovations of such major Northern artists as Claus Sluter, Jan van Eyck, Jerome Bosch, Pieter Bruegel, Jean Fouquet and Albrecht Durer. Artistic developments will be presented within the context of changing economic, political, religious and social institutions of the period. Prerequisite: ART-HIST 302 or permission of instructor.

ART-HIST 447WI Italian Baroque: The Age Of Caravaggio, Bernini And Borromini

Painting, sculpture and architecture in Italy from the creation of the Baroque style in the late 16th century to the beginnings of the Barochetto era. Prerequisite: ART-HIST 302 or permission of instructor and successful completion of the WEPT (effective FS93).

ART-HIST 448WI Spanish Art: El Greco To Goya

A history of Spanish art from the later fifteenth century to the Napoleonic invasion. Prerequisite: ART-HIST 302 or permission of instructor and successful completion of the WEPT (effective FS93).

ART-HIST 450 15Th Century Italian Art And Architecture

An examination of the visual arts from the International Style and the Early Renaissance to the beginnings of the High Renaissance. Problems of patronage, artistic theory, the Antique, the role of art in humanist circles, and the effect of religious, political and economic developments on the arts will also be discussed. Prerequisite: ART-HIST 110 or ART-HIST 302 or permission of instructor.

ART-HIST 452 Greek Art And Architecture

A survey of Greek sculpture, vase painting, and architecture from the third millennium to the first-century B.C. Emphasis will be placed on the relationship of Minoan and Helladic aesthetics, and the connections between late Helladic and Geometric forms, and the nature and development of the classical and baroque styles. Prerequisite: ART-HIST110 or ART-HIST 301 or permission of instructor.

ART-HIST 455 History Of Photography

A survey of the history of photography as a pictorial art; technical developments and the interaction of photography with other arts will be included. Prerequisite: ART-HIST 303 or permission of instructor.

ART-HIST 456 The Painting And Sculpture Of China

Jade sculptures of the 14th-century B.C., the terra cotta army of the first emperor of China, Buddhist and secular sculptures from the Han through the Sung dynasties will be covered. The study of Chinese painting will include important new discoveries of paintings on silk dating from the third century B.C.; figure and landscape scrolls, and wall paintings from the fourth through 20th centuries A.D. The masterpieces in the Nelson-Atkins Museum will be examined in detail.

ART-HIST 461 Traditional and Contemporary Native American Arts

This course covers the history of traditional and contemporary Native North American arts, by examining cultural and aesthetic continuities between Meso-American and Native North American Arts. We also explore how Native American arts reflect the history of North America, including influences from Europeans, and conclude with contemporary Native American artists and their incorporation of various global influences. Prerequisites: ART-HIST 315 or consent of the instructor.

ART-HIST 462 History of Modern Design

This course examines innovations in design, beginning with the Arts and Crafts movement in the 19th century, surveying all the major design trends of the twentieth century, and concluding with contemporary developments in the age of the computer. Prerequisite: ART-HIST 303 or permission of the instructor

ART-HIST 463 Primitivism and Its Aftermath

This course explores one of the seminal movements of the modern era and its ramifications for the visual arts today. Class discussions will consider the complexities and contradictions of primitivism of its rejection of modernity. We will look at European artists' attempts at deliberate regression through their appropriations from archaic, folk, and non-western art traditions, from 1800-on, while also situating these creative endeavors within the cultural and political contexts of the period. Prerequisite: ART-HIST 303 or permission of the instructor

ART-HIST 464 Modern Art & the Grotesque

This course explores how the grotesque shaped the history, practice and theory of art in the nineteenth and twentieth centuries.

The grotesque plays a major role in many modern styles, and its expressive possibilities encompass the capriccio, the carnivalesque and burlesque, the fantastic, and the abject and uncanny. Artists have incorporated the grotesque as a means to push beyond established boundaries, explore alternate modes of experience, and to challenge cultural and aesthetic conventions. Prerequisite: ART-HIST 303 or permission of the instructor.

ART-HIST 473 Visual Arts Administration

This course on professional arts administration includes assignments in: copyright laws, database management, ethics issues, evaluation design, gallery museum management, grant writing and budgeting, public relations, resume design, tax laws, and website design and management. Students are required to learn relevant computer programs. This course is also open to music and theatre majors. Prerequisite: permission of instructor.

ART-HIST 477 Contemporary Artists of the African Diaspora

This course examines cultural and aesthetic continuities between traditional and contemporary arts and artists in Africa and in the Americas, including the study of contemporary Africans whose cultures had the greatest influence in the Americas as well as contemporary African-American artists in Brazil, Cuba, Haiti, and the United States. Prerequisites: Art-Hist 315 or permission of the instructor.

ART-HIST 479 From the Parthenon to the Altar of Peace

The course centers on the many different styles of Greek and Roman art from the fifth century B.C. to the early first century A.D. Attention is also paid to the political and literary forces behind its imagery. Three monuments serve as the pillars upon which the course rests: the Parthenon, Pergamon Altar, and the Ara Pacis. The lessons learned about style, the interaction of politics, literature, and art and the foibles of scholarship are intended to be applied to other fields of art history. Cross-listed with CLAS 479. Prerequisite: ART-HIST 301, CLAS 301 or permission of instructor

ART-HIST 480 Art Since 1945

An inquiry into the range and purpose of the visual arts since 1945. Taught in a seminar format. Prerequisite: Permission of Department Advisor or instructor of the course.

ART-HIST 482 Scope & Methods Of Art History

An exploration of the discipline of art history, including theoretical issues, guiding questions and problems, diverse approaches (historical and current), and research tools. The undergraduate capstone course for art history majors. Prerequisites: Senior standing and permission of undergraduate adviser.

ART-HIST 497A Special Studies In Medieval/Renaissance Art

With the permission of the department, an advanced student may pursue a selected subject on a seminar or tutorial basis. Acceptable for graduate credit with approval.

ART-HIST 497B Special Studies In Baroque/Rococo Art

With the permission of the department, an advanced student may pursue a selected subject on a seminar or tutorial basis. Acceptable for graduate credit with approval.

ART-HIST 497C Special Studies In 19Th- And 20Th-Century Art

With the permission of the department, an advanced student may pursue a selected subject on a seminar or tutorial basis. Acceptable for graduate credit with approval.

ART-HIST 497D Special Studies In American Art And Architecture

With the permission of the department, an advanced student may pursue a selected subject on a seminar or individual basis. Acceptable for graduate credit with approval.

ART-HIST 497E Special Studies In Art Museum

Selections from the permanent collections and loan exhibitions in the Nelson-Atkins Museum are studied with attention to historical, aesthetic and technical considerations. Prerequisites: Junior standing and at least nine hours of art history.

ART-HIST 497F Special Topics In Asian Art

With the permission of the department, an advanced student may pursue a selected subject on a seminar or individual basis. Acceptable for graduate credit with approval. Prerequisite: ART-HIST 319 or permission of instructor.

ART-HIST 497H Sp St In The Art Of African, Oceanic, And New World Cultures

With permission of the department, an advanced student many pursue a selected subject on a seminar or tutorial basis. Acceptable for graduate credit with approval.

ART-HIST 497I Special Studies In Ancient Art

An advanced student may pursue a selected subject on seminar or tutorial basis. Acceptable for graduate credit with approval.
Prerequisite: Permission of Department.

ART-HIST 497J Special Studies In Art**ART-HIST 497Q** Special Studies in Art History: Internship

Advanced art history students gain invaluable practical experience in a professional setting in the field of art. Prerequisite:
Permission of the department

ART-HIST 497Q Special Studies in Art History: Internship

Advanced art history students gain invaluable practical experience in a professional setting in the field of art. Prerequisite:
Permission of the department

Arts & Sciences (A&S)**A&S 100** Methodologies In Liberal Arts & Sciences: Theories & Application

This three hour course is designed for freshmen and transfer students, to be taken during their first semester of study at UMKC. The curriculum provides students an introduction to the major disciplines and methodologies of the liberal arts and sciences (the humanities, social sciences, and sciences), including sessions on choosing majors and careers. Additional emphases will include learning to use the library, writing and computational skills, oral presentations, cultural diversity, stress management, and study strategies.

A&S 103A Critical Thinking In The Arts And Humanities

This 3 hour course is designed to be taken in conjunction with entry level courses in Arts and Sciences disciplines. The course is designed to enhance students' critical thinking and intellectual capacity, communication skills, and life long learning strategies. Assignments and problem solving activities in the course focus on developing thinking in the disciplines through interactive class sessions, experiments, and problem solving applications. The course is intended to be taught concurrently with a departmental course offered in the Video Supplemental Instruction model. Numerous additional assignments and activities enable students to both succeed in the departmental course and develop transferable cognitive skills at the same time. Credit and grades for the Arts and Sciences 103 course are based on a series of separate assignments specifically designed to enable students to succeed academically in the current and subsequent semesters. A&S 103 assignments would vary according to the discipline course it is linked with, but would include numerous supplemental readings, writing and problem solving activities done individually and in groups/teams. Class attendance and participation are required. Only one of the A&S 103 abc sequence may apply toward graduation requirements. Offered: Every Semester.

A&S 103B Critical Thinking In The Social Sciences

This 3 hour course is designed to be taken in conjunction with entry level courses in Arts and Sciences disciplines. The course is designed to enhance students' critical thinking and intellectual capacity, communication skills, and life long learning strategies. Assignments and problem solving activities in the course focus on developing thinking in the disciplines through interactive class sessions, experiments, and problem solving applications. The course is intended to be taught concurrently with a departmental course offered in the Video Supplemental Instruction model. Numerous additional assignments and activities enable students to both succeed in the departmental course and develop transferable cognitive skills at the same time. Credit and grades for the Arts and Sciences 103 course are based on a series of separate assignments specifically designed to enable students to succeed academically in the current and subsequent semesters. A&S 103 assignments would vary according to the discipline course it is linked with, but would include numerous supplemental readings, writing and problem solving activities done individually and in groups/teams. Class attendance and participation are required. Only one of the A&S 103 abc sequence may apply toward graduation requirements. Offered: Every Semester.

A&S 103C Critical Thinking In The Natural Sciences And Mathematics

This three hour course is designed to be taken in conjunction with entry level courses in Arts & Sciences disciplines. The course is designed to enhance students' critical thinking and intellectual capacity, communication skills, and life long learning strategies. Assignments and problem solving activities in the course focus on developing thinking in the disciplines through interactive class sessions, experiments, and problem solving applications. The course is intended to be taught concurrently with a departmental course offered in the Video Supplemental Instruction model. Numerous additional assignments and activities enable students to both succeed in the departmental course and develop transferable cognitive skills at the same time. Credit and grades for the Arts and Sciences 103 course are based on a series of separate assignments specifically designed to enable students to succeed academically in the current and subsequent semesters. A&S 103 assignments would vary according to the discipline course it is linked with, but would include numerous supplemental readings, writing and problem solving activities done individually and in groups/teams. Class attendance and participation are required. Only one of the A&S 103 abc sequence may apply toward

graduation requirements. Offered: Every Semester.

A&S 110 Successful Research: Making Sense Of The World Of Information

Do you know what you don't know? Find out in this course as we learn and discuss many of the common things you are expected to know to succeed in college, including the importance of discovering, understanding, analyzing, and using ideas and information in order to achieve academic success and genuine learning. You will learn how to ask meaningful questions, understand the structure and content of information resources, evaluate information, and use information resources as learning tools. The course is not geared to any specific discipline, but is core to success in any discipline. The course is open to all students, but is most beneficial when taken early in a student's academic career.

A&S 110 Successful Research: Making Sense Of The World Of Information

Do you know what you don't know? Find out in this course as we learn and discuss many of the common things you are expected to know to succeed in college, including the importance of discovering, understanding, analyzing, and using ideas and information in order to achieve academic success and genuine learning. You will learn how to ask meaningful questions, understand the structure and content of information resources, evaluate information, and use information resources as learning tools. The course is not geared to any specific discipline, but is core to success in any discipline. The course is open to all students, but is most beneficial when taken early in a student's academic career.

A&S 160 Wine And Civilization

Geography of wine growing; the anatomy and physiology of the grapevine; the sociological forces of alcohol in American culture; wine and classical culture; economic aspects of wine and wine growing.

A&S 170 Special Topics

An undergraduate course designed to deal with a topic which is not available in the regular course offerings.

A&S 170C Special Topics

An undergraduate course designed to deal with a topic which is not available in the regular course offerings.

A&S 200 British Life And Culture

A survey of British history and culture from Roman times to the present day. The course includes such topics as British education, the legal system, the economic system, the Common Market, the development of working class movements such as Trade Union Councils, pictorial arts in Britain, dramatic arts, British music, and contemporary communications. The course is taught with lectures from British authorities in the various fields, discussions with lecturers and local faculty, and field trips to places associated with the weekly lectures. Grade for the course is determined by a combination of papers and exams. Offered under the Missouri-London Program in London. Each semester.

A&S 205 Contemporary Europe

An examination of selected political, cultural, economic and social forces shaping Europe today and of how they are related to Europe's past. The course is taught in Europe and employs field trips, lectures by European authorities on the various topics and lectures by the accompanying faculty member. Grades determined by a combination of papers and exams. Summers or Interim.

A&S 206 Contemporary Asia

An examination of selected political, cultural, economic and social forces shaping Asia today and of how they are related to Asia's past. The course is taught in Asia and employs field trips, lectures by Asian authorities on the various topics and lectures by the accompanying faculty member. Grades determined by a combination of papers and exams. Summers or Interim.

A&S 207 Contemporary Latin America

An examination of selected political, cultural, economic and social forces shaping Latin America today, and of how they are related to Latin America's past. The course is taught in Latin America and employs field trips, lectures by Latin American authorities on the various topics, and lectures by the accompanying faculty member. Grades determined by a combination of papers and exams. Offered: Summers or Interim.

A&S 208 Contemporary World Cultures

An examination of societies and cultures around the world. Students visit one or more countries, where they go on field trips, meet with local experts and students, and learn by studying and doing. Grades are determined by written assignments and practical performance. Offered: Summers or Interim

A&S 210 Cross-Cultural Interaction: Experience & Understanding

This course focuses on the social and cultural context of interactional patterns. U.S. and international students are paired in academic activities to encourage mutual understanding and self-awareness. They will draw on a variety of resources and learning modalities to examine aspects of their own and one another's societies, cultures, religions, and family relations. Making use of intercultural theories, students will reflect upon and explore cultural myths and stereotypes and develop a general understanding

of cultural similarities and differences. Offered: Fall, Winter

A&S 210 Cross-Cultural Interaction: Experience & Understanding

This course focuses on the social and cultural context of interactional patterns. U.S. and international students are paired in academic activities to encourage mutual understanding and self-awareness. They will draw on a variety of resources and learning modalities to examine aspects of their own and one another's societies, cultures, religions, and family relations. Making use of intercultural theories, students will reflect upon and explore cultural myths and stereotypes and develop a general understanding of cultural similarities and differences. Offered: Fall, Winter

A&S 240 Analysis Of Medical Terminology

Analyze the structure of medical words and apply this to basic anatomy, physiology and disease processes of the human body, stressing spelling and pronunciation. Offered: Fall and Winter

A&S 280A Special Topics

An undergraduate course designed to deal with a topic which is not available in the regular course offerings.

A&S 280P Special Topics

An undergraduate course designed to deal with a topic which is not available in the regular course offerings.

A&S 300CF Cluster Course: African/African American Women And Creativity

A&S 304CM Cluster Course: Body Images In Medicine And The Arts

Open to all students, this course focuses on the human body as an object of study in the history and practice of medicine. The class identifies a number of key issues which affect the attitudes that contemporary physicians often have about their patients based upon prevalent attitudes toward the human body in our society. Societal values which shape our ideas about gender, physical appearance, cosmetic surgery, obesity, and genetic abnormalities will be the focus of determining the extent to which these issues may actually affect the education of physicians and choices of medical treatment. The course examines the evolution of these values historically through works of art and recurring themes in literature. The course is interdisciplinary, involving lectures in contemporary medicine, the history of medicine, the history of art, and literature. It satisfies current baccalaureate requirements for interdisciplinary coursework in the humanities. The course will not count toward required courses for the major in art, art history, literature or history. Prerequisite: Junior standing. Offered: Summer 1994.

A&S 305 Ethics In America: The View From The Heartland

This interdisciplinary course brings national and local specialists together through the media of television case study and personal dialogues for an exploration of the ethical issues facing Americans today. Problems of the corporate world, of academe, of law, of medicine, of media and of the military will be subjected to analysis. With the assistance of experts from the faculty and the community, students will create a paradigm for ethical decision making. Prerequisites: PHILOS 210, PHILOS 222 or consent of the instructor or Foundations of Social Science. Offered: On demand.

A&S 310 Cross-Cultural Interaction II: Social Relations

This course will match international students with U.S. students to prepare them to interact more effectively in multilingual and/or intercultural settings. Students learn through readings on cultural theory and cultural relations, in-class small group activities, discussions and lectures, how issues of identity, such as age, sexual orientation, and ethnicity; impact cross-cultural interaction. Papers written for this course will help students integrate theory with previous experience, leading to an understanding of oppression in cross-cultural interaction. This course is a continuation of A&S 210: Cross-Cultural Interaction: Experience and Understanding, which is a prerequisite. Prerequisite: A&S 210 Offered: Fall, Winter

A&S 334 Introduction To African American Studies

This course provides an introduction to the contexts, theories, and methodologies that undergird African American studies. In addition to substantial time spent covering particular research skills and resources, students will also be introduced to African American culture and the issues related to African American studies from several perspectives: history, literature, sociology, communication studies, and the like. Influences and perspectives from Africa, the Caribbean and South America will also be covered. The course will thus provide a broad background in African American culture and history, an introduction to the methodologies of several disciplines, and discussion of particular contemporary and historical issues such as slavery, segregation and integration, the Civil Rights Movement, Pan-Africanism, Afrocentrism, and current political debates. Prerequisite: None. Offered: Once a year.

A&S 341 Union Leadership and Administration

This course focuses on the roles and challenges of union leadership in a changing environment. Topics include the union leaders' role as a representative, organizer and educator as well as administrative responsibilities within the union and the relationship with enterprise management in both adversarial and participatory situations. Options for leadership styles and organizational

models will be discussed and explored in both theory and practice. Leaders will develop their skills of motivation, speaking, strategic planning and managing complex campaigns and diverse organizations. This course is part of the Certificate Program in Labor Studies and is offered on the University of Missouri Interactive Video Network at UMKC, UMSL, and UMC.

A&S 350 Special Topics

An undergraduate course designed to deal with a topic which is not available in the regular course offerings. Offered: Every Semester

A&S 350 Special Topics

An undergraduate course designed to deal with a topic which is not available in the regular course offerings. Offered: Every Semester

A&S 350A Special Topics

An undergraduate course designed to deal with a topic which is not available in the regular course offerings. Offered: Every Semester

A&S 350E Special Topics

An undergraduate course designed to deal with a topic which is not available in the regular course offerings. Offered: Every Semester

A&S 350K Special Topics

A&S 350L Special Topics

An undergraduate course designed to deal with a topic which is not available in the regular course offerings. Offered: Every Semester

A&S 350S Special Topics

An undergraduate course designed to deal with a topic which is not available in the regular course offerings. Offered: Every Semester

A&S 365P Introduction To Substance Abuse Counseling: Theory And Practice

This course will introduce the student to the problems of substance abuse and the methods/techniques used in treatment. The course will explore theories of personality and belief systems of the chemically dependent or alcoholic individual. The course will also review the impact of the disease on the family system

A&S 405 Contemporary Europe

An in-depth examination of selected political, cultural, economic and social forces shaping Europe today and of how they are related to Europe's past. The course is taught in Europe and employs field trips, lectures by European authorities on the various topics and lectures by the accompanying faculty member. Grades determined by a combination of papers and exams.

Prerequisite: Upper level or consent of instructor. Offered: Summers or Interim.

A&S 406 Contemporary Asia

An in-depth examination of selected political, cultural, economic and social forces shaping Asia today and of how they are

related to Asia's past. The course is taught in Asia and employs field trips, lectures by Asian authorities on the various topics and lectures by the accompanying faculty member. Grades determined by a combination of papers and exams. Prerequisite: Upper level or consent of instructor. Offered: Summers or Interim.

A&S 407 Contemporary Latin America

An in-depth examination of selected political, cultural, economic and social forces shaping Latin America today and of how they are related to Latin America's past. The course is taught in Latin America and employs field trips, lectures by Latin American authorities on the various topics and lectures by accompanying faculty member. Grades determined by a combination of papers and exams. Prerequisite: Upper level or consent of instructor. Offered: Summers or Interim.

A&S 419 Natural Sciences For Elementary Schools I

Selected topics from the natural sciences, their development and application for teaching in elementary school. Lectures, demonstrations, experiments and discussions. Intended for teachers in elementary schools. (This course will not be accepted for satisfaction of the Natural Science Area requirement of the Arts and Science general degree requirements).

A&S 420 Literature: A Healing Art

The course provides an opportunity for students to read and learn about literature, both prose and poetry, which demonstrates the importance of life stories in fostering communication between people. Through this study literature will come to be viewed as a healing art: healing physicians, patients and writers alike. Prerequisite: Junior standing. Offered: For one month, twice each year: September, March.

A&S 429 Natural Sciences For Elementary Schools II

Selected topics from the natural sciences, their development and application for teaching in elementary school. Lectures, demonstration, experiments and discussions. Intended for teachers in elementary schools. (This course will not be accepted for satisfaction of the Natural Science Area requirement of the Arts and Science general degree requirements). Fall.

A&S 439 Natural Sciences For Elementary Schools III

Selected topics from the natural sciences, their development and application for teaching in elementary schools. Lectures, demonstrations, experiments and discussions. Intended for teachers in elementary school. (This course will not be accepted for satisfaction of the Natural Science Area requirement of the Arts and Science general degree requirements). Winter.

A&S 452 Images Of The Family In Art And Literature

An application of the skills and knowledge gained from the companion weekend and/or weekday courses in this block by means of instructor-approved and guided independent study projects of the student's own individual or small group choice, focusing on images of the family in literature and art. Each student must select and present four projects (one on each of following faith cultures—Christianity/Judaism, Islam, and one on a topic of their choice) in written, oral and/or audio-visual media. Students meet in groups and individual sessions with the instructors of this block.

A&S 490L Special Topics

A&S 490P Special Topics

A&S 490PA Special Topics

Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only.

A&S 490PB Special Topics

Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only.

A&S 490SA Special Topics

A&S 490SB Special Topics

A&S 490W Special Topics

A&S 491 International Internship

Students may participate in structured international internships under the joint supervision of employer and faculty member. They must carry out significant professional responsibilities and whatever additional assignments are determined by the faculty supervisor. The number of credit hours varies with the length of the professional experience. Prerequisite: Junior level or above or consent of instructor. Offered: Every semester.

A&S 492 Field Practicum In Aging

Students spend 180-480 contact hours in a field placement with supervision in a community agency or organization which services or advocates for older persons, and keep a journal documenting and reflecting on the practicum activities and experiences particularly as they relate to gerontological theory and research. Offered: WS, SS, FS Restrictions: Written consent of instructor required.

A&S H100 Methodologies In The Liberal Arts & Sciences: Theories & Apps

This three hour course is designed for freshmen and transfer students, to be taken during their first semester of study at UMKC. The curriculum provides students an introduction to the major disciplines and methodologies of the liberal arts and sciences (the humanities, social sciences, and sciences), including sessions on choosing majors and careers. Additional emphases will include learning to use the library, writing and computational skills, oral presentations, cultural diversity, stress management, and study strategies.

Black Studies (BLKS)

BLKS 101 Introduction to Urban Studies

Introduction to Urban Studies is a lecture and discussion course that provides the undergraduate student with an overview of the interdisciplinary field of urban studies. The student who successfully completes this course will have a broad understanding of the major issues, theories, key concepts and vocabulary, basic methods, and prominent scholars in urban studies. We will explore current events of relevance, including the opportunities and problems facing major cities in the United States, especially Kansas City and New Orleans.

BLKS 201 Global Systems and the Origins of Black American Culture and Institutions

This multi-disciplinary course examines global capitalism, European contact with Africa, the development of the African Diaspora, and the origins of Black American institutions and culture. Applying a Black studies perspective, the course explores such themes as cultural and gendered oppression, institutional destabilization, economic dislocation, liberation struggles, and creative impulses and aesthetics.

BLKS 302 Conceptual and Theoretical foundations in African American Studies

This course will provide an in-depth examination of the theoretical and conceptual parameters of African American studies. We will study the evolution of the field, key scholars and creative intellectuals, and seminal categories of thought.

BLKS 315 The Arts of African and New World Culture

The historical survey of ethnographic arts includes two diasporas: 1) African art and the influences of Africans on the arts of new world cultures (in Brazil, Surinam, Cuba, Haiti, and the United States); and 2) Meso-American art and the influence of Meso-Americans on the arts of the Native North American cultures. Emphasis is placed on interdisciplinary theoretical approaches drawn from Art History, Anthropology, and folklore, as well as the importance of geography and trade. These ethnographic arts are examined from aesthetic, political, religious, and economic perspectives, in comparison with arts made in these countries in

Western European traditions, including the cross-cultural impact that these various art traditions have on each other. This course satisfies the College requirement for a course in cultural perspectives. Cross-listed with Art-Hist 315.

BLKS 320 Critical Health Issues in Black Communities

Beginning with the African context and the opposition of chattel slavery, this course examines social, cultural, and historical factors affecting the health status of African Americans to the present era. It explores a variety of health-related issues including the interplay between environment, biology, and culture; folk and popular health practices; structured inequality and oppression; lifestyle, beliefs and values; and the organization and delivery of health care. Moreover, this course moves well beyond the idea that medical care—its presence, absence, or quality—is the singular or most critical factor determining the health of a people, community, or society. It reveals the importance of social phenomena in disease resistance and health promotion. Historical shifts from the prominence of infectious to chronic diseases; the implications to health of chattel slavery, sharecropping, segregation, poverty, and structured inequality; the relationship between psychosocial factors and disease, i.e. destabilized social settings that compromise resistance to disease; environmental racism; and the health status of African Americans as it relates to the organization of work, family structure and function, religious beliefs, the organization of medical care, lifestyle, consumer manipulation, and post-industrial society are major issues addressed by the course.

BLKS 321 The Black Family and Male-Female Relationships

This course examines the historical evolution and current status of the African American family in the United States. Utilizing the African experience as its starting point the course conveys a broad understanding of the role of the family in human survival and progress. We investigate such issues as male-female relationships, sexual practices, dating, marriage, single parenting, the education and socialization of children, and so on. We also examine an array of social and economic issues, including institutionalized inequality, that affects the viability of today's African American family.

BLKS 325 African American Business Development

This course investigates the various challenges to African American business development and entrepreneurship on the United States. We study the lives of successful, pioneering African American businesswomen and men in order to assess how they managed to transcend the barriers of racism and structured inequality. We explore why certain kinds of enterprises emerged among African Americans and why others did not, and we scrutinize the traditional business problems for African Americans of capitalization distribution market penetration, and wealth creation.

BLKS 331 African American Literature I

This course provides a survey of African American literature from its beginnings to the Harlem Renaissance of the 1920s and 1930s. Areas of interest will include abolitionist literature (especially Slave Narratives), turn-of-the-century literature and the Harlem Renaissance. This course will examine any or all of the following literary forms: fiction, poetry, drama, autobiography and essay. It will view African American literature in its historical and cultural contexts. Cross-listed with English 331.

BLKS 332WI African American Novel

This course will examine the African American novel in the 19th and 20th centuries; the emphasis will be on the period from the 1920s to the present. The novels will be examined in their historical and cultural contexts. Cross-listed with English 332WI.

BLKS 333 African American Literature II

A survey of African American literature from its beginnings to World War I. This course will cover a range of authors, several genres, and culture forms, which may include fiction, poetry, drama, autobiography, essay, oral, contra and/or slave narratives, folklore, and songs. Cross-listed with English 333.

BLKS 334 From Field Shout to Hip Hop: African American Poetic Traditions

This course examines the development of African American poetry from its early forms as field shouts, ballads, and blues to present forms including spoken word and hip hop. Includes authors such as Phillis Wheatley, Paul Lawrence Dunbar, Langston Hughes, Gwendolyn Brooks, Tupac Shakur, and Jessica Care Moore.

BLKS 335 Stages Toward Freedom: African American Dramatic Traditions

This course explores the development of African American dramatic traditions from the eighteenth century through the Harlem Renaissance Black Arts Movement, to current postmodernism. Includes authors such as W.W. Brown, Zoran N. Hurston, Amiri Baraka, Sonia Sanchez, August Wilson, Suzan-Lori Parks.

BLKS 337 The Civil Rights Movement in African American Literature

This course examines how African American literature shaped ideas about freedom, rights, citizenship and race in the civil rights movement. It draws on a variety of literary forms—speeches, essays, autobiographies, fiction, drama, poetry and film—to explore the movement's impact on communities and cultures as well as its various debates and competing visions.

BLKS 403WI Writing for African American Studies

This course instructs students in how to produce advanced knowledge in the field of African American studies. It provides

training in the construction of quality research papers for graduate, scholarly, and professional work and exposes students to a wide array of scholarly journals, databases, and authoritative resources in African American studies. Each time the courses taught, students will develop their research around a specific topic defined by the instructor.

BLKS 404 Research Seminar

This course introduces the logic, theory, and techniques of empirical research and applies them to African American Studies. It exposes students to a variety of research approaches in order to examine their utility for producing knowledge within the field.

BLKS 480 Special Topics/Seminar

In-depth exploration of special topics in Black Studies. When available, topics will be announced prior to registration. Course may be repeated for up to six credit hours. Offered: On Demand

BLKS 490 Directed Study/Research

Individual research and learning projects supervised by a faculty member. Course may be repeated for up to six credit hours. Offered: On Demand

BLKS 490 Directed Study/Research

Individual research and learning projects supervised by a faculty member. Course may be repeated for up to six credit hours. Offered: On Demand

Chemistry (CHEM)

CHEM 111 Physical Basis Of Chemistry

An introductory course in the basic principles applicable to chemistry for students who intend to take but are not adequately prepared to take Chemistry 211. The emphasis is on quantitative relationships and problem solving.

CHEM 115 Elements Of Chemistry I

A one-term course in general chemistry with special emphasis on organic chemistry and biochemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course. Corequisite: CHEM 115L. Three hours of lecture each week, one hour of discussion each week. Fall, Winter.

CHEM 115L Elements Of Chemistry, Laboratory I

A one-term course in general chemistry with special emphasis on organic chemistry and biochemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course. Corequisite: CHEM 115. One three hour laboratory period each week. Fall, Winter.

CHEM 160 Chemistry, Society, And The Environment

This course is intended to offer a survey of chemical and scientific concepts surrounding current issues. The emphasis will be on the application of fundamental chemical knowledge to allow a full understanding of these issues in the context of currently known facts and theories. Through classroom discussion and application of the scientific method, the ramifications of the issues will be examined. Topics will include pollution, the importance of the chemical industry, its responsibilities to society, and other items of current scientific and environmental interest.

CHEM 160 Chemistry, Society, And The Environment

This course is intended to offer a survey of chemical and scientific concepts surrounding current issues. The emphasis will be on the application of fundamental chemical knowledge to allow a full understanding of these issues in the context of currently known facts and theories. Through classroom discussion and application of the scientific method, the ramifications of the issues will be examined. Topics will include pollution, the importance of the chemical industry, its responsibilities to society, and other items of current scientific and environmental interest.

CHEM 160L Laboratory For Chemistry, Society, And The Environment

This course is offered in support of CHEM 160. It will consist of field activities, experiments, and demonstrations to reinforce the concepts and ideas presented in that course.

CHEM 180P Basic Chemistry

A one-semester survey of basic chemistry including: atomic structure, the periodic table, chemical bonding, chemical reactions, and selected topics from organic, polymer and biochemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course. Corequisite: CHEM 181P. Prerequisite: College Algebra or equivalent. This course is equivalent to CHEM 115.

CHEM 181P Experimental Basic Chemistry

A demonstration/laboratory course designed to support and illustrate the concepts presented in Chemistry 180P. A terminal

course that does not meet requirements as a prerequisite for any higher level chemistry course. Corequisite: CHEM 180P. Prerequisite: College Algebra or equivalent. This course is equivalent to CHEM 115L.

CHEM 182P Special Projects In Chemistry

An independent study course consisting of library work and field work designed to exemplify various applied aspects of chemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course. Corequisite: CHEM 180P. Prerequisite: College Algebra or equivalent.

CHEM 206 Human Nutrition

Introduction to nutrition for health and wellness and the use of chemical energy in the breakdown and synthesis of biomolecules. Nutrition as it applies to a variety of life situations from infancy to older adults. Learning encompasses elements of anatomy and physiology related to nutrition and health.

CHEM 211 General Chemistry I

Stoichiometry, gas laws, thermochemistry, atomic structure, molecular shapes and bonding theories. Prerequisites: or corequisite Math 110 or equivalent Restrictions: corequisite CHEM 211L Offered: Each Term

CHEM 211 General Chemistry I

Stoichiometry, gas laws, thermochemistry, atomic structure, molecular shapes and bonding theories. Prerequisites: or corequisite Math 110 or equivalent Restrictions: corequisite CHEM 211L Offered: Each Term

CHEM 211L Experimental General Chemistry I

Introduction to the laboratory techniques used in studying the chemical properties of substances. Some quantitative techniques are included. Prerequisites: Math 110 or equivalent Restrictions: corequisite CHEM 211 Offered: Each Term

CHEM 211L Experimental General Chemistry I

Introduction to the laboratory techniques used in studying the chemical properties of substances. Some quantitative techniques are included. Prerequisites: Math 110 or equivalent Restrictions: corequisite CHEM 211 Offered: Each Term

CHEM 212LR Experimental General Chemistry II

Introduction to analysis and synthesis. Descriptive chemistry of the more common elements. Three hours per week. Prerequisites: CHEM 211 and CHEM 211L or equivalent (each with a C-or better) Restrictions: corequisite CHEM 212R Offered: Each Term

CHEM 212R General Chemistry II

Liquids and solids, solutions, equilibrium, kinetics, electrochemistry and thermodynamics. Introductory course to all advanced work in chemistry. Prerequisites: CHEM 211 and CHEM 211L or equivalent (each with a C-or better) Restrictions: corequisite CHEM 212LR Offered: Each Term

CHEM 311 Laboratory Safety And Health I

An introduction to laboratory safety and health. Topics to be discussed include good laboratory practice; laboratory hazards; safe chemical handling, storage and disposal; first aid; protective equipment; and federal regulations. Prerequisite: Chemistry 320 or CHEM 321, or equivalent. Fall.

CHEM 320 Elementary Organic Chemistry

A one-semester course covering both aliphatic and aromatic fields designed to satisfy requirements for dental schools, medical technology programs, six-year medical programs, pharmacy schools, biology majors. Prerequisite: CHEM 211 CHEM 211L and CHEM 212 CHEM 212L or their equivalents (each with a C-or better). Restrictions: corequisite CHEM 320L Offered: Winter, Summer

CHEM 320L Experimental Organic Chemistry

Elementary organic chemistry experiments to teach basic laboratory operations. Three hours of laboratory a week. Prerequisite: CHEM 211 CHEM 211L and CHEM 212 CHEM 212L or their equivalents (each with a C-or better). Restrictions: corequisite CHEM 320 Offered: Winter, Summer

CHEM 321 Organic Chemistry I

The two terms (CHEM 321, CHEM 322R) constitute an integrated unit in which the chemistry of aliphatic, aromatic, and some heterocyclic compounds are studied. The study begins with simple monofunctional compounds and ends with polyfunctional natural products. Prerequisites: CHEM 211 CHEM 211L and CHEM 212 CHEM 212L or their equivalents (each with a C-or better). Restrictions: corequisite CHEM 321L Offered: Each Term

CHEM 321L Organic Chemistry Laboratory I

CHEM 321L introduces the student to basic techniques and procedures in isolation, purification, and characterization of organic

compounds and simple reactions used in the organic chemistry laboratory. The student will also be trained in the proper way to write a scientific laboratory report. Prerequisite: CHEM 211 CHEM 211L and CHEM 212 CHEM 212L or their equivalents (each with a C-or better) Restrictions: corequisite CHEM 321 Offered: Each Term

CHEM 322L Organic Chemistry Laboratory II

CHEM 322L is an extension of CHEM 321L. CHEM 322L builds from the basic techniques, procedures, and writing to more advanced organic operations. Prerequisite: CHEM 321 and CHEM 321L or equivalent (each with a C-or better) Restrictions: corequisite CHEM 322R Offered: Each Term

CHEM 322R Organic Chemistry II

Continuation of Chemistry 321. Prerequisites: CHEM 211/211L, CHEM 212/212L and CHEM 321/321L or their equivalents. (each with a C-or better) Restrictions: corequisite CHEM 322L Offered: Each Term

CHEM 330 Elementary Physical Chemistry

An introductory course in the principles of physical chemistry for students who have not had calculus. Prerequisites: CHEM 320, CHEM 322R or CHEM H322R, college physics, and a good background in algebra and trigonometry. Three lecture hours a week. Fall.

CHEM 341 Analytical Chemistry I: Quantitative Analysis

Principles of gravimetric, volumetric, electrolytic, and other methods of analysis. Prerequisites: CHEM 212R or CHEM H214, and Math 120. Two lectures and six laboratory hours a week. Offered: Every Fall; Winter term in odd years.

CHEM 341WI Analytical Chemistry I: Quantitative Analysis

Principles of gravimetric, volumetric, electrolytic, and other methods of analysis. Satisfies writing intensive requirement for the B.A. degree in Chemistry. Prerequisites: CHEM 211 CHEM 211L, CHEM 212 CHEM 212L, and MATH 120 or their equivalents (each with a C-or better). Restrictions: Has passed the WEPT Offered: Each Term

CHEM 345R Instrumental Analysis

An introductory course on the use of instruments for chemical analysis with particular reference to applications of interest to medical technologists and other students in the sciences. Emphasis will be placed on optical, electrochemical and separation methods. Prerequisites: CHEM 320, CHEM 341, or their equivalents. (Does not meet requirements for an A.C.S. certified degree). Two lectures and three laboratory hours each week.

CHEM 345R Instrumental Analysis

An introductory course on the use of instruments for chemical analysis with particular reference to applications of interest to medical technologists and other students in the sciences. Emphasis will be placed on optical, electrochemical and separation methods. Prerequisites: CHEM 320, CHEM 341, or their equivalents. (Does not meet requirements for an A.C.S. certified degree). Two lectures and three laboratory hours each week.

CHEM 367 Bioorganic Chemistry

An examination into the current topics at the interface between chemistry and biology. Emphasis will be on the current literature and will include such topics as nucleic acid chemistry, protein chemistry, and carbohydrate chemistry. Prerequisites: CHEM 321 CHEM 321L and CHEM 322 CHEM 322L or their equivalents_ (each with a C-or better) Offered: Fall

CHEM 382 Inorganic And Organic Synthesis

A number of inorganic, organic, and organometallic compounds will be prepared using a variety of synthetic techniques. Prerequisites: CHEM 321 CHEM 321L and CHEM 322 CHEM 322L or their equivalents. (each with a C-or better Offered: Fall

CHEM 387 Environmental Chemistry I

A survey of how chemical principles can be applied to the environment. Included will be topics in aquatic chemistry, atmospheric chemistry and chemistry of the geosphere and soil. Prerequisites: CHEM 320 OR CHEM 322. Offered: Winter Semester.

CHEM 387 Environmental Chemistry I

A survey of how chemical principles can be applied to the environment. Included will be topics in aquatic chemistry, atmospheric chemistry and chemistry of the geosphere and soil. Prerequisites: CHEM 320 OR CHEM 322. Offered: Winter Semester.

CHEM 390 Special Topics In Chemistry

This course will focus on an area of chemistry of contemporary significance. The amount of credit is to be determined by arrangement with the department. May be repeated for credit when the topic varies but no more than three hours of credit may be applied to major course requirements. Prerequisites: Consent of instructor and either Chemistry 320, 322R or H322R. On demand.

CHEM 390PT Special Topics In Chemistry

CHEM 395 Directed Readings In Chemistry

Intensive readings in areas of joint interest to the enrolled student and the cooperating faculty member. Readings may not duplicate or substitute for current course offerings. Prerequisites: CHEM 320 CHEM 320L or CHEM 321 CHEM 321L and CHEM 322/322L or their equivalents. (each with a C-or better). Restrictions: permission of supervising faculty member Offered: By Arrangement

CHEM 399 Intro To Research

Special problems to introduce undergraduate chemistry majors to research methods. A comprehensive written report is required and a copy of the report is to be retained in the chemistry office. May be taken only after consultation with a member of the chemistry staff. Prerequisite: CHEM 212R or CHEM H214. Semester offered: Every semester

CHEM 399 Intro To Research

Special problems to introduce undergraduate chemistry majors to research methods. A comprehensive written report is required and a copy of the report is to be retained in the chemistry office. May be taken only after consultation with a member of the chemistry staff. Prerequisite: CHEM 212R or CHEM H214. Semester offered: Every semester

CHEM 410 Chemical Literature

A systematic introduction to the efficient use of the chemical literature. Topics will include both classical search methods and computer search methods. Prerequisites: CHEM 320 CHEM 320L or CHEM 321 CHEM 321L and CHEM 322 CHEM 322L or their equivalents. (each with a C-or better). Offered: Fall

CHEM 431 Physical Chemistry I

A first course in physical chemistry having a calculus base. This course emphasizes thermodynamics with an introduction to the basic principles of quantum mechanics. Prerequisites: Math 210 and Math 220; and Physics 220 or preferable Physics 250 Restrictions: Prerequisite or corequisite Math 250 Offered: Fall

CHEM 432 Physical Chemistry II

A second course in physical chemistry having a calculus base. This course emphasizes the quantum mechanics description of atoms and molecules, molecular spectroscopy, statistical mechanics, and kinetics. Prerequisites: Math 210, Math 220 and Math 250; and Physics 220 or preferably Physics 250; and Chem 431 (each with a C-or better). Restrictions: corequisite CHEM 437WI Offered: Winter

CHEM 434 Molecular Spectroscopy

A theoretical introduction to molecular spectroscopy and its relation to structure. Electronic, vibrational and rotational spectra of chemical systems will be discussed. Prerequisite: CHEM 432 or consent of instructor. Offered: Fall term.

CHEM 437WI Experimental Physical Chemistry I

Experimental methods in physical chemistry. One hour lecture and six hours laboratory each week. Satisfies writing intensive requirements for the B.A. or B.S. degree. Prerequisites: Math 210, Math 220 and Math 250; and Physics 220 or preferably Physics 250; and CHEM 431 (each with a C-or better). Restrictions: Corequisite CHEM 432 and has passed the WEPT prior to enrollment Offered: Winter

CHEM 442R Analytical Chemistry II: Instrumental Analysis

A continuation of CHEM 341. The experimental and theoretical aspects of optical and electrochemical, chromatographic and other physicochemical methods of analysis. Prerequisite: CHEM 341. Prerequisite or corequisite: CHEM 432. Two lectures and four hours laboratory a week. Winter.

CHEM 442R Analytical Chemistry II: Instrumental Analysis

A continuation of CHEM 341. The experimental and theoretical aspects of optical and electrochemical, chromatographic and other physicochemical methods of analysis. Prerequisite: CHEM 341. Prerequisite or corequisite: CHEM 432. Two lectures and four hours laboratory a week. Winter.

CHEM 451R Inorganic Chemistry

Modern concepts and theories of inorganic chemistry. Prerequisite or corequisite: CHEM 432. Three lecture hours each week. Winter.

CHEM 471 Introduction To Polymer Chemistry

Survey of organic and inorganic monomers and polymers; the occurrence, synthesis, structures and properties of natural and synthetic polymers; discussion of general properties of plastics, elastomers, fibers, resins, and plasticizers. Three lecture hours a

week. Prerequisites: CHEM 432 (C-or better) Offered: Fall

CHEM 480 Computer Applications To Chemical Problems

An intense course in Fortran programming and its uses in chemical problems related to theory and experimentation. Emphasis will be placed on the mathematical structures of chemical problems and the coding of those problems into Fortran. No previous programming experience is required. Prerequisites: CHEM 320 or CHEM 322R.

CHEM 490 Special Topics In Chemistry

This course will focus on an area of chemistry of contemporary significance. The amount of credit is to be determined by arrangement with the department. May be repeated for credit when the topic varies but no more than three hours of credit may be applied to major course requirements. Prerequisites: Consent of instructor. Prerequisite or corequisite. CHEM 431. On demand.

CHEM 495 Directed Readings In Chemistry

Intensive readings in areas of joint interest to the enrolled student and the cooperating faculty member. Readings may not duplicate or substitute for current course offerings. Prerequisites: CHEM 432 and permission of the cooperating faculty member. By arrangement.

CHEM 499 Senior Research

The student is given an original research problem and will be held responsible for all previous experience in working toward its solution. A well-written, comprehensive, and well-documented research report is required, and a copy of the report is to be retained in the Chemistry department. Prerequisites: CHEM 432 and consent of a member of the Chemistry staff. Credit arranged. Semester offered: Every semester

CHEM H321 Honors: Organic Chemistry I

CHEM H321L Organic Chemistry Laboratory I - Honors

A more intense version of CHEM 321L. See course description for CHEM 321L for details. Offered: Winter term.

CHEM H322LR Organic Chemistry Laboratory II-Honors

A more intense version of Chemistry 322L. See course description for CHEM 322L. Prerequisite: CHEM 321L.

CHEM H322R Honors: Organic Chemistry II

CHEM H322R Honors: Organic Chemistry II

Chinese (CHINESE)

CHINESE 110 Elementary Chinese I

Introduction to the sound system of modern Chinese, aural comprehension, oral expression, basic structural patterns, writing systems. Fall.

CHINESE 120 Elementary Chinese II

Dialogue practice and conversation, reading of simple stories and essays, comparative study of Chinese and English grammar and syntax. Prerequisite: CHINESE 110. Winter.

CHINESE 211 Second Year Chinese I

Introductory readings of colloquial Chinese, literature, conversation, simple composition, and comparison between written and spoken styles in modern Chinese. Prerequisite: Chinese 120 or equivalent. Fall.

CHINESE 221 Second Year Chinese II

Readings of modern Chinese with emphasis on expository writings, analysis of syntactic structure, composition and translation. Prerequisite: CHINESE 211 or equivalent. Winter.

CHINESE 280 Special Intermediate Chinese Topics I

Instruction of Chinese on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit. Prerequisite: Elementary I and II college-level courses or equivalent. As needed.

CHINESE 290 Special Intermediate Chinese Topics II
Continuation of CHINESE 280. May not be repeated for credit. As needed.

CHINESE 380 Special Topics: Composition And Conversation
Treatment of a particular genre or area of literature in Chinese normally not offered through regular courses. May be repeated for credit when the topic changes. Prerequisite: Permission of the instructor. On demand.

Classical and Ancient Studies (CLASSICS)

CLASSICS 210 Foundations Of World Literature I

This course studies ancient world literature such as The Descent of Inanna, Egyptian love poetry, Hebrew Scriptures, the epics of Homer and Virgil, the Analects of Confucius, and the Oriental wisdom of Laozi. The course also considers ancient creation epics such as the cosmic battle between Marduk and Tiamat, the Metamorphosis of Ovid, and the great Indian epic The Ramayana. Also listed as WLD-LIT 210.

CLASSICS 210 Foundations Of World Literature I

This course studies ancient world literature such as The Descent of Inanna, Egyptian love poetry, Hebrew Scriptures, the epics of Homer and Virgil, the Analects of Confucius, and the Oriental wisdom of Laozi. The course also considers ancient creation epics such as the cosmic battle between Marduk and Tiamat, the Metamorphosis of Ovid, and the great Indian epic The Ramayana. Also listed as WLD-LIT 210.

CLASSICS 300 Special Topics

A course about a selected field, genre or individual figure from the ancient world that is not part of the program's regular offerings. May be repeated for credit.

CLASSICS 300A Special Topics

A course about a selected field, genre or individual figure from the ancient world that is not part of the program's regular offerings. May be repeated for credit.

CLASSICS 300CB Cc: Women In The Ancient World

This course focuses on the history, representation, literature, social lives, and political roles of women in ancient civilization including Egypt, Mesopotamia, the Biblical World, Greece, and Rome. It integrates methodologies from history, art history and archaeology, literary studies, and women's studies.

CLASSICS 300CR Roman Revolution: History And Culture From Gracchi To Augustus

The period of Roman history from the revolution initiated by the Gracchi to the demise of the Republic and the establishment of the Principate under the Augustus will be studied. The course begins with the Scipionic Circle under whose leadership foreign imperialism, domestic factionalism, and the influx of Greek culture increased. Political, social and cultural developments which culminated in the violent death of the old system will be traced. We will also show how Augustus kept the past alive to make his new government acceptable to the tradition-loving Romans. Students will read the works of such writers as Terence, Cato, Polybius, Cicero, Caesar, Sallust, Catullus, Horace, Virgil, and Ovid, whose works cover the important genres of Roman literature—new comedy, rhetoric, satire, history, epic, pastoral and lyric poetry.

CLASSICS 300CS Cc: Clio And The Other Muses

This course focuses on the history, art, architecture, literature, and culture of Athens in the 5th Century BCE. Course readings will include primary literary and historical sources such as lyric poetry, comedy and tragedy, philosophy, and historical writings.

CLASSICS 300CY Cc: Ancient World/Cinema

This course will explore the tradition of depicting the ancient Mediterranean world in film from the early silent era to the present. Topics to be covered include the ways that filmmakers respond to literary and historical sources from the ancient world, interact with the artistic tradition of films about the ancient world, the relation of these films to other works by the same creative personnel (directors, actors, writers, producers, etc.), and the political and cultural contexts in which the films were released.

CLASSICS 300CZ Cc: Archaeology Of Ancient Disasters

Remarkable human achievements are revealed by archaeological research, but the human past was frequently shaped as well by disasters of natural and human origin. Drawing on case studies that include data from the geosciences, archaeological excavations, and historical sources, this class examines how earth processes, the biosphere, and human cultural behavior were all sources of catastrophe. We begin with the geological context of disaster, including earthquakes, volcanic eruptions, climate change, and soil depletion. Next, we examine how ancient societies responded to disease, an ever present threat from the biological environment. Finally, we look at how ancient human groups were changed by stresses of cultural origin, including overpopulation, depletion of vital resources, and warfare. The study of ancient disasters not only gives us a wider understanding of human history, it may offer

lessons for coping with future catastrophes. Also cross listed as GEOL 326CZ. Offered: On Demand

CLASSICS 300D Special Topics

A course about a selected field, genre or individual figure from the ancient world that is not part of the program's regular offerings. May be repeated for credit.

CLASSICS 301 Survey of Western Art I

A survey of ancient and medieval Western art. The course will begin with the great civilizations of the Mediterranean basin and consider the changes wrought by the introduction of Christianity and Islam. Study of the medieval era will include Romanesque and Gothic architecture through the 15th century, but will not include the beginnings of panel painting nor of independent sculpture. This course meets the college fine arts requirement. Cross-listed with Art History 301.

CLASSICS 310WI Ancient Philosophy

A survey of the central figures of classical philosophy: the pre-Socratics, Socrates, Plato, Aristotle, the Stoics, the Epicureans and other philosophers of antiquity. The contributions of major philosophers to the development of science, religion, and social and political theories are studied. Also listed as PHILOS 310WI. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent and successful completion of the WEPT.

CLASSICS 318 Bible As Literature

A critical study of the major portions of the Old and New Testaments and the Apocrypha, with special attention to the development of literature from oral tradition, the literary genres, themes and archetypes represented in the collection, and the diction and style which have influenced later literature. Consideration also of the relation of Biblical literature to the historical, religious, and cultural milieu of the ancient Near East. Also listed as ENGLISH 318.

CLASSICS 319 Myth And Literature

A study of classical myth including readings from Homer to Ovid, analysis of selected myths in later literature, art, and music, and a study of contemporary definitions and approaches to myth. Also listed as ENGLISH 319.

CLASSICS 340AWI Classical Literature In Translation

Course covers readings from the literature of classical Greece and Rome, with emphasis on critical analysis and writing about texts in the context of ancient and modern debates about their meaning.

CLASSICS 369 Introduction To Prehistoric And Classical Archaeology

An introduction to archaeological research methods that traces human origins and cultural development from the earliest fossil evidence to the threshold of written history and civilization. This class emphasizes the evolutionary and cultural developments that allowed our ancestors to colonize the continents and develop lifeways involving hunting and gathering, farming and urbanism.

CLASSICS 370 Archaeology as Anthropology: The Development of Human Societies

This class examines the development of archaeology as a distinctive branch of anthropology, and archaeology's role in a centuries-long debate about the causes of cultural variation and the development of human societies. This class examines how the Enlightenment, colonialism, the geological discovery of 'Deep Time' and the Darwinian Revolution not only give rise to anthropology and archaeology, but launched an enduring debate about how and why we study cultural behavior. Cross-listed with Anthropology 385.

CLASSICS 376 Ancient Concepts of the Hero

This course traces the ancient concept of the hero by reading selected ancient works by authors such as Homer, Thucydides, Livy, Plutarch, Caesar, Tacitus, and Sallust. Students will also examine the impact of the ancient concept of the hero on modern literature and art. Also listed as ENGLISH 376

CLASSICS 430 Plato

Selected dialogues of Plato are studied with a view to understanding Plato's philosophy and its position in the world of Greece and antiquity. Plato's philosophy is also examined with reference to his place in the Western tradition and in modern philosophy. Also listed as PHILOS 430. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent

CLASSICS 431 Aristotle

Selected portions of Aristotle's works on logic, metaphysics, science, ethics, politics, and poetics are studied with a view to understanding Aristotle's philosophy and its position in the world of Greece and antiquity. Aristotle's philosophy is examined with reference to its place in the Western tradition and in modern philosophy. Also listed as PHILOS 431. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent

CLASSICS 467 Myth And Ritual

Myth and "ritual" have long been fundamental categories in the study of religion. This course will briefly survey some of the major theories and approaches to the study of myth and ritual from the Enlightenment to the present. Will not only trace the shifting meanings of "myth" and "ritual," but will critically evaluate the utility of diverse approaches to the study of religious phenomena designated by these terms. Reading will include theoretical works, as well as selected case studies. Also listed as HISTORY 467.

CLASSICS 469 Archaeology And Biblical History

An examination of ancient Israel as she emerges from the ruins of the past, both lapidary and literary. Through a study of the "mute documents," artifacts man-made (storied cities, household utensils, inscribed shards from Jericho to Jerusalem) we gain an insight indispensable for Biblical studies, for ancient Near Eastern history. Also listed as HISTORY 469.

CLASSICS 470 Ancient Egypt

This course describes the political, social and cultural evolution of ancient Egypt from pre-dynastic times, with major emphasis upon the Old, Middle, and new Kingdoms (especially the 18th dynasty and the reign of Akhenaton). Also listed as HISTORY 470.

CLASSICS 470P Ancient World: The Social History Of The Ancient World

The optional four-credit-hour component (modified independent study) will concern the social aspects of these civilizations, i.e., their daily lives. Readings and audiovisual aids will be used to help the student who will be expected to choose one aspect of each civilization, such as women, slavery, merchants, education, medicine, etc., and write a five-page paper about that topic for each period, i.e. Mesopotamia, Egypt, Greece and Rome. Also listed as HISTORY 470P.

CLASSICS 471 Ancient Greece

This course begins with a survey of the pre-classical Minoan and Mycenaean civilizations and then describes the rise of prominent Greek city-states (with particular emphasis upon the evolution of Sparta and the political, social and cultural contributions of Athens). The course concludes with the rise of Macedon and Alexander's conquests and significance. Also listed as HISTORY 471.

CLASSICS 471P Ancient World: The Political Structure Of The Ancient World

The four-hour lecture period on weeknights will emphasize the historical aspects of the ancient civilizations. The lectures will be chronologically organized to focus upon their evolution from their rise to their collapse. Also listed as HISTORY 471P.

CLASSICS 472 Ancient Rome

This course covers Roman history from its origins (including the Etruscans) to the decline of the imperial system. Particular emphasis is placed upon the political, social and economic developments in the Republic, the death of the Republic, the early Principate, and the factors that led to Rome's decline in the ancient world. Also listed as HISTORY 472.

CLASSICS 472P Ancient World: The Cultural & Intellectual Dimensions Ancient Civ

The four weekend periods will provide the students with a general picture of these civilizations: society, religion, economics, and culture (w.f., arts, literature, philosophy, science, etc.). Guest lecturers, slides, films and video cassettes will be used to introduce the varied aspects of these ancient peoples. Also listed as HISTORY 472P.

CLASSICS 475WI History Of Ancient Israel

Judaism has had a tremendous impact on our civilization and yet most Americans are only dimly aware of its origins and development. This course will trace the roots of the Jewish religion in its historical context from its beginnings through the formation of rabbinic culture. The rise of Christianity will be examined in its original Judaic context, and recent discoveries, particularly those pertaining to the Dead Sea Scrolls, will be interpreted. Also listed as HISTORY 475WI.

CLASSICS 479 From the Parthenon to the Altar of Peace

The course centers on the many different styles of Greek and Roman art from the fifth century B.C. to the early first century A.D. Attention is also paid to the political and literary forces behind its imagery. Three monuments serve as the pillars upon which the course rests: the Parthenon, Pergamon Altar, and the Ara Pacis. The lessons learned about style, the interaction of politics, literature, and art and the foibles of scholarship are intended to be applied to other fields of art history. Cross-listed with Art-History 479. Prerequisite: Art-Hist 301, Clas 301 or permission of instructor

CLASSICS 499 Senior Tutorial

A three-hour comprehensive reading and research tutorial leading to the writing of a senior paper. It consist of tutorial sessions and independent research leading to a major paper using original source materials. Prerequisite: Recommended for students wishing to pursue a graduate degree in Classical and Ancient Studies. Restrictions: Recommended for students wishing to pursue a graduate degree in Classical and Ancient Studies.

Communication Studies (COMM-ST)

COMM-ST 110 Fundamentals Of Effective Speaking And Listening

An introduction to the dimensions of effective platform speaking with special emphasis on developing critical listening skills. Lecture, performance, and discussion. Every semester.

COMM-ST 140 Principles Of Communication

An interdisciplinary introduction to the study of contemporary communication studies including a consideration of intrapersonal, interpersonal and public communication. Lecture. For non-majors only. Offered: Fall or winter.

COMM-ST 212 Argumentation And Debate

A study of the nature of logical discourse generated through the preparation and presentation of oral argument within the framework of the debate format. Lecture, performance and discussion. Offered: Fall and winter.

COMM-ST 213 Argumentation And Critical Thought

An introduction to the theory and application of argument construction. The course is designed to examine the fundamental strategies of critical thinking and to help understand the relationships among critical thought and argumentation development and refutation. This course is designed for application across many fields and is not specific to debate or oral argument. Lecture, discussion. Prerequisite: None. Offered: Fall.

COMM-ST 213 Argumentation And Critical Thought

An introduction to the theory and application of argument construction. The course is designed to examine the fundamental strategies of critical thinking and to help understand the relationships among critical thought and argumentation development and refutation. This course is designed for application across many fields and is not specific to debate or oral argument. Lecture, discussion. Prerequisite: None. Offered: Fall.

COMM-ST 220 Introduction: Modern Communications Media

A comprehensive survey of the content, structure and control of the communications media in American society--newspaper, motion pictures, radio and television; providing an informational frame of reference that will enable discerning students to formulate and apply useful critical concepts in evaluating America's media environment. Every semester.

COMM-ST 230 Introduction To Film Studies

The course is an introduction to the study of film as an art form and industrial practice. Students are introduced to the basic terms and concepts of film theory, including theories of film editing and mise-en-scene while becoming familiar with the basic "canon" of major films and directors that form the foundations for the academic field of film studies. Prerequisites: English 110. Offered: Spring and Fall

COMM-ST 250 Introduction To Film And Video Methods

This course is a comprehensive examination of film and video production methods and visual literacy. It is the foundation and prerequisite for all film, video, and new media production courses. It is also the professional media production overview course for advertising, public relations, and other creative, non-technical communications careers. Prerequisite: None Offered: Spring,Fall

COMM-ST 250 Introduction To Film And Video Methods

This course is a comprehensive examination of film and video production methods and visual literacy. It is the foundation and prerequisite for all film, video, and new media production courses. It is also the professional media production overview course for advertising, public relations, and other creative, non-technical communications careers. Prerequisite: None Offered: Spring,Fall

COMM-ST 254P Communication Competence: Theory And Practice

An introduction to the discipline of communication. A core set of issues is investigated in three major areas of the field: interpersonal communication, small group communication and public speaking. The course design is based on the premise that the development of communication skills involves two important factors: (1) understanding the theoretical principles underlying effective communication behavior and (2) practical application of those principles in various communicative exercises. Offered: Summer.

COMM-ST 260P Introduction To Web Communications

This four credit hour web-based multimedia course will examine the process of critically evaluating information delivered on the Internet. It is designed as an introduction for adults and students who use Internet information for work and/or school. The process of critically evaluating Internet information will be described in four modules: traditional evaluation techniques; searching and researching strategies; Internet evaluation techniques and Internet evaluation resources.

COMM-ST 265 Media Photoimaging

An introduction to the production and manipulation of photographic images as they are applied in the print publishing medium, multi-image, and multimedia communications. Photography will be examined as a fundamental medium for the study of visual communication and the techniques of creating specifically meaningful images. This course will provide an essential familiarity with the terminology, concepts, practices, and process variables involved in photographic direction and production supervision, and will also introduce the basics of image composition, manipulation, and quality control. Offered: On Demand.

COMM-ST 281 Animation

This course provides an introduction to animation production techniques and an overview of the history of American animation arts. We will address both stop-motion and computer animation using industry standard software.

COMM-ST 303WI Introduction To Journalism

Introduction to the styles and techniques of reporting and writing basic news through assignments in straight news, features and in-depth stories. Exposure to the history and principles of American journalism. Practical application in writing news and news feature articles. Also offered as ENGLISH 303WI.

COMM-ST 308 Introduction To The Study Of Human Communication

This course serves to introduce students to the basic theories, perspectives and methodologies used (historically and currently) in the study of speech, interpersonal and mass communication.

COMM-ST 308WI Introduction To The Study Of Human Communication

This course serves to introduce students to the basic theories, perspectives and methodologies used (historically and currently) in the study of speech, interpersonal and mass communication. Writing Intensive course.

COMM-ST 308WI Introduction To The Study Of Human Communication

This course serves to introduce students to the basic theories, perspectives and methodologies used (historically and currently) in the study of speech, interpersonal and mass communication. Writing Intensive course.

COMM-ST 311 Radio & Television Performance

A study of the specialized radio and television performing and operating situations and techniques simulated and evaluated in studio sessions. Lecture, discussion and performance. Prerequisite: None.

COMM-ST 312 Advanced Public Speaking

Advanced study of rhetorical theory and its application to the presentation and criticism of public discourse. Prerequisite: COMM-ST 110. Offered: Fall & Winter.

COMM-ST 312P Advanced Public Speaking

Advanced study of rhetorical theory and its application to the presentation and criticism of public discourse. Prerequisite: COMM-ST 110. Offered: Fall & Winter.

COMM-ST 314WI Reporting

A seminar of practical application in advanced reporting. Assignments to cover news events and to pursue in-depth news reports on the campus and off. Work is turned in on deadline and critiqued by the instructor. Also offered as ENGLISH 313. Prerequisite: ENGLISH 110, ENGLISH 225, and successful completion of the WEPT.

COMM-ST 317 Persuasion

A study of the rhetorical, psychological and ethical principles of influencing and controlling individuals and groups, and of the methods of adapting to various attitudes and audiences through the preparation, presentation and evaluation of persuasive speeches. Lecture, discussion and performance. Prerequisite: Communication Studies 110. Offered: On demand.

COMM-ST 320 Mass Media, Culture And Society

A critical exploration of the role of mass media (and its reception) in the social construction of reality. The course employs theoretical, analytical and empirical approaches derived from multidisciplinary sources, particularly "critical theory" semiology, post-structuralism, psychoanalysis and ethnography. Term paper required. Prerequisite: Offered: Every semester.

COMM-ST 322 Oral Performance In Speech Communication

This course is designed to develop and strengthen oral communication for students pursuing careers in pre-law, media, human resources, and education as well as increase the skills of potential professional speakers. The student will learn to develop emotional, vocal, physical, and non-verbal skills through an investigation of poetry, prose, and non-fiction literature. Through the process of reading, studying, investigating, rehearsing, and performing literary and nonliterary works, the students will learn to pay particular attention to the voice embodied in a given text and the cultural and social context within which that voice speaks.

Prerequisite: COMM-ST 110. Offered: Fall and Winter.

COMM-ST 330 Introduction To Film Studies

The course is an introduction to the study of film as an art form and industrial practice. Students are introduced to the basic terms and concepts of film theory, including theories of film editing and mise-en-scene while becoming familiar with the basic "canon" of major films and directors that form the foundations for the academic field of film studies. Prerequisites: English 110. Offered: Spring and Fall

COMM-ST 331WI Mass Media In America

Writing intensive. Social History of the development of mass media, radio, film and television, from Marconi's first experiments to the present. Emphasis placed on relationship of American culture and American media. Term paper required. Prerequisite: Successful completion of the WEPT. Offered: Fall.

COMM-ST 339 Film Theory And Criticism

The course serves to locate the film medium within the study of human communication while developing an understanding of the effects of film on the individual and society with an emphasis on understanding the film medium as both an art form and a reflection of a social system with national, cultural & sub-cultural components. Term paper required. Offered: Spring

COMM-ST 339 Film Theory And Criticism

The course serves to locate the film medium within the study of human communication while developing an understanding of the effects of film on the individual and society with an emphasis on understanding the film medium as both an art form and a reflection of a social system with national, cultural & sub-cultural components. Term paper required. Offered: Spring

COMM-ST 341 Rhetorical Theory And Criticism

An analysis of significant public discourse within the context of social protest and political rhetoric with attention to applying methods of communication criticism in evaluating the effectiveness of persuasive advocacy aimed at social change. Fall.

COMM-ST 341WI Rhetorical Theory And Criticism

Writing intensive. An analysis of significant public discourse within the context of social protest and political rhetoric with attention to applying methods of communication criticism in evaluating the effectiveness of persuasive advocacy aimed at social change. Prerequisite: Successful completion of the WEPT.

COMM-ST 343 Group Dynamics

A study of strategies and communication relationships unique to non-dyadic situations, with an emphasis on the integral structure of leadership, roles, norms and task functions. Discussion. Offered: On demand.

COMM-ST 344 Communication In Organizational Settings

An examination of the major elements of interpersonal, group, and oral communication competence essential to human interaction in organizational settings. The course focuses on developing communication competencies and increasing theoretical understanding of the communication process within the organizational context. COMM-ST 110 OR COM-ST 308. Offered: Fall/Winter.

COMM-ST 344WI Communication In Organizational Settings

An examination of the major elements of interpersonal, group, and oral communication competence essential to human interaction in organizational settings. The course focuses on developing communication competencies and increasing theoretical understanding. Prerequisite(s): COMM-ST 110 or COMM-ST 308 and WEPT.

COMM-ST 345P Communication In Organizational Settings

An examination of the major elements of interpersonal, group, and oral communication competence essential to human interaction in organizational settings. The course focuses on developing communication competencies and increasing theoretical understanding of the communication process within the organizational context. prerequisite(s): None.

COMM-ST 351WI Fundamentals Of Writing For The Media

Writing intensive. Analysis of individual differences and common characteristics of copy for eye and ear, with emphasis on the application of both verbal and visual imagery in the process of communicating the writer's ideas and intentions. Weekly written assignments and critical analysis of the student's work. Prerequisites: COMM-ST 110 and successful completion of the WEPT. Offered: Fall and winter.

COMM-ST 354 Introduction to Screenwriting

An introduction to the form and language of the motion picture screenplay. Students will learn to create a workable blueprint for a movie and undertake an in-depth examination of visual storytelling. This will include understanding the basics of dramatic structure, scene and sequence construction and the role of dialogue. Emphasis will be placed on students mastering the accepted

movie industry format of the screenplay. They will also adapt a short story and revise it after giving and receiving feedback in small groups. Prerequisites: CommSt 230. Offered: Fall

COMM-ST 361 Broadcast Management

An analysis of the trends, patterns and methods of radio and television operations. Prerequisite: COMM-ST 308. Offered: On demand.

COMM-ST 363 Radio Production I

A study of the techniques of producing audio material for use in radio, in concerts, on film, on television and in the recording studio. Lecture, discussion, and laboratory. Offered: Fall.

COMM-ST 371 Television Studio

A study of the principles and techniques of multi-camera television studio production, with emphasis on introducing and developing intermediate skills using professional broadcast equipment and real-time live production technologies. Lecture, discussion, and laboratory. Prerequisite: COMM-ST 250 or COMM-ST 270. Offered: Spring.

COMM-ST 373 Intermediate Media Production

Emphasis on digital production and non-sync 16mm film. Students produce, direct and edit a significant narrative, documentary or experimental project. Lecture, discussion and laboratory. Prerequisite: COMM-ST 250 Offered: Spring

COMM-ST 373 Intermediate Media Production

Emphasis on digital production and non-sync 16mm film. Students produce, direct and edit a significant narrative, documentary or experimental project. Lecture, discussion and laboratory. Prerequisite: COMM-ST 250 Offered: Spring

COMM-ST 376 History Of The Film Industry

A history of the development of the American film industry from 1900 to the end of the studio era. The course will stress such issues as studio production, censorship, the economics of production and the selling of mass culture through the film medium. Term paper required. On demand.

COMM-ST 377 Interpersonal Communication

An intensive analysis of the dimensions of intrapersonal and interpersonal communication designed to identify the philosophies and methods which underwrite effective human communication. Lecture and discussion. Offered: Fall and Spring.

COMM-ST 377WI Interpersonal Communication

Writing intensive. An intensive analysis of the dimensions of intrapersonal and interpersonal communication designed to identify the philosophies and methods which underwrite effective human communication. Lecture and discussion. Prerequisite: Successful completion of the WEPT (effective FS93). Offered: Fall and winter.

COMM-ST 378 Computer-Mediated Communication

Examination of the nature of human communication on the Internet. Design function, content innovations of computer mediated communication discussed, with emphasis on technology as a means of interpersonal communication. Research, essays, and participation in online environment required. Prerequisite: None Offered: On demand

COMM-ST 378WI Computer Mediated Communication

Examination of the nature of human communication on the internet. Design, function, content innovations of computer mediated communication discussed, with emphasis on technology as a means of interpersonal communication. Research, essays, and participation in online environment required. Prerequisite: Successful completion of the WEPT EXAM Restrictions: Writing Intensive. Successful completion of the WEPT Exam required. Offered: Fall 2003.

COMM-ST 379 African American Images in Film

This course examines the historical and social evolution of African Americans in film from the early 1900s to the present. The course will provide an overview of contributions from African Americans in cinema and trace their impact in Hollywood through critical analysis. Films show what a society accepts and rejects, therefore the course will consider major themes, historical movements, and how films capture societal issues. Most of the discussions will focus on images in front of the camera, although works from African Americans behind the camera may be explored as well. Offered: Fall & Winter.

COMM-ST 380 Contemporary Media Topics

COMM-ST 381 Film and Media Arts

This course covers the creative, technical, and practical aspects of short-form narrative film production. Prerequisites: Comm-St

250 and Comm-St 354. Offered: Spring.

COMM-ST 382 Advanced Media Topics

Variable content: Media Arts and Media Studies Topics will be addressed in this course including film/video production and post-production techniques, and analytical evaluation of recent trends in media. Prerequisite: Topic Dependent Restrictions: Approval of instructor Offered: Winter

COMM-ST 383 Cross-Cultural Journalism & Mass Media

Cross-Cultural Journalism & Mass Media provides journalistic tools for traditional and new media coverage of diverse ethnic, gender, ability and ideological groups inside and outside the United States. The critical role of diverse voices in a democracy will be discussed. Students at UMKC and the Missouri School of Journalism participate in joint lectures transmitted by UMKC and MU instructors from their respective campuses.

COMM-ST 384 Documentary Film

The purpose of this course is to familiarize students with the history, terminology, film making techniques, film makers and cultural/societal influences of documentary film. Five distinguishing characteristics will be examined in terms of 1) subjects, 2) purposes, points of view, or approaches, 3) forms, 4) production methods and techniques and 5) experiences they offer to audiences. Prerequisites: None. Offered: Every winter.

COMM-ST 385 Documentary Production

This course is designed to familiarize students with the basics of documentary production from an artistic, ethical, and practical results-oriented perspective. Prerequisite(s): COMM-ST 250 or Consent of Instructor. Offered: Fall

COMM-ST 388 Media Ethics

This course is designed to sensitize the ethical considerations that underlie the conventions and practices of print, broadcast, and internet media. By placing traditional and new media in a wider intellectual context than is generally possible under the daily demands of producing news, information, and entertainment, it seeks to produce a larger sense of media as industry and as a career choice.

COMM-ST 390 Forensic Activities

Participation in the intercollegiate forensic program. A practicum in debate, discussion, oratory and other forensic activities. Prerequisite: Consent of instructor. Offered: Summer, fall, winter.

COMM-ST 391 The World(S) Of Alfred Hitchcock

The course offers an historical study of the film art of Alfred Hitchcock. The course gives special attention to the director's work in the silent cinema of the U.K., Hitchcock's early major British sound films, his arrival in the United States, his major World War II propaganda films, the director maturing into a major influence on world cinema in the 1940s, and Hitchcock's "masterworks" of the 1950s-1960s. Offered: On Demand

COMM-ST 392 Great Directors Of Foreign Film

The course is an introduction to the major films and directors of the international cinema. Particular attention will be given to the influence of German Expressionism, Italian "Neo-Realism," the "French New Wave, the "New German Cinema" of the 1970s, post-Franco Spanish cinema, and the national cinemas of South America, India, China, and Japan. Offered: On Demand

COMM-ST 393 History Of The Hollywood Musicals

The course offers an historical survey of the development of the film musical as a major Hollywood film genre from the introduction of the sound film in 1927 to current manifestations of the genre. The course gives particular attention to the development of the studio musicals of the 1930s, the role of the musical during World War II, the "Golden Age" of the MGM musical in the 1950s-60s, and the effects on the traditional Hollywood musical of the Vietnam Era social upheavals. Offered: On Demand

COMM-ST 394 The World Of "Film Noir"

The course offers an historical survey of the development of "film noir" as a major film genre. The course examines the major characteristics that define "film noir" and offers an introduction to the historical roots of this genre in German Expressionism, as well as the social and political context for the development of "film noir" as a Hollywood studio genre in the late 1940s. Particular attention is given to the social/ political conditions of the 1950s that contributed to both the rise and decline in popularity of "film noir" during the Cold War, as well as the film genre's revival in the "neo-noirs" of the 1970s. Offered: On Demand

COMM-ST 400 Special Studies

(A-N) This is an upper-level course on a subject which is not a part of the regular department offering. The course results from one or more of the following: (1) the expressed desire of students (2) the broadened or refocused scholarship of a member of the

communication studies faculty (3) the temporary presence of a scholar whose specialization is not reflected in the department's regular offerings (4) the conclusion by the department that the course meets a community need (5) the effort of the Communication Studies faculty to provide an interdisciplinary approach to an era or topic. The course is experimental in the sense that it is a "one-time" offering with the potential of repetition or modification, depending upon student, faculty and community response. On demand.

COMM-ST 400CB Cc: The African Diaspora In The Arts And Culture

This new cluster course will examine the expression of certain aspects of African culture in the African Diaspora. Black culture in the area now popularly termed "The Black Atlantic," and in particular Western Africa, the Caribbean and certain parts of South and North America, will be examined. Special attention will be paid to visual and material culture, feminist and anti-apartheid literature, and religion and spirituality. African culture is a multi-layered and complex phenomenon. An understanding of African Diastolic culture involves an analysis of the effects of historical and sociological movements, the interpretation of written culture and the effects of Africa's response to colonial intrusion. Questions concerning the transmission and transformation of African cultures will be addressed by a close investigation of visual and material culture, literary texts, and cosmological constructions of African peoples. Students will be exposed to methodologies garnered from the Arts, Literature and Religious Studies. Offered: Fall Restrictions: Sophomore or above

COMM-ST 400CT Cluster Course: Healing And Cultural Diversity

COMM-ST 400G Special Studies In Communication Studies

COMM-ST 400M Special Studies In Communication Studies

COMM-ST 400N Special Studies

COMM-ST 400N Special Studies

COMM-ST 400Q Special Studies In Communication Studies

COMM-ST 400W Special Studies in Communication Studies

COMM-ST 400Z Special Studies

COMM-ST 402CD Cluster Course: American Social Film: Silver Screen & American Dream

This course will combine American social history and American film history. Using Hollywood entertainment films, the course will look at Hollywood as an indicator of social, political, and economic conditions in the U.S. from the early 1900s to the late 1950s. The main topics are war and the threat of war, poverty and affluence, racial tensions, censorship, and political zealotry. A paper is required, and a social history textbook, a film history textbook, a play by Arthur Miller and a collection of articles constitute core readings.

COMM-ST 403CE Cc: Radical Changes Since 1945

This cluster course will focus on modernism, post-modernism and expressionism in the visual arts and literature since World War II. Lectures address intellectual movements—such as existentialism and formalism—and cultural development—such as increased impact of technology and mass media—in contemporary society. By focusing on these movements, we hope to provide an integrated view of the literature and visual arts of the period and to draw upon analogous developments in contemporary architecture, music, philosophy and film. This course is offered as a cluster with ENGLISH 300CE.

COMM-ST 404CD World War I in Film: The World made Modern

This cluster course examines World War I and its legacy through the lenses of international history and film studies. It explores the origins and conduct of the "Great War," as it was called at the time, as well as its transforming effects on the modern international relations and the ongoing process of globalization. It also examines how the war spurred the growth of an infant motion picture industry, and how movies produced during the decades that followed helped shaping popular memories of the conflict—reflecting and shaping cultural discourses regarding the myth or reality of modern civilizational progress; the ethics of modern weaponry; the individual's placed in mass society; constructions of class, race, and gender; and the meaning of national

identify in a globalizing world. The class will draw on selected history texts and an array of films and film clips. Cross listed with History 420CC

COMM-ST 405CD Cluster Course: Race in American Film

This course examines representations of race and ethnicity in American film from the silent era onward in mainstream and countercultural traditions. It explores how social, political, and economic conditions contribute to constructions of race and ethnicity. This course is offered as a cluster course with English 300CQ and history 300CF.

COMM-ST 406CD CC: Film Adaptation

The class will explore the process of adapting both fiction and non-fiction literary works into motion pictures. Students will examine the original literary source, then the interim screenplay and finally the completed motion picture. Offered: On Demand

COMM-ST 421P Multimedia & New Media Streaming

This course is designed to teach students the technology of streaming multimedia on the web and analyze the components of interactivity on the web. Students will examine the process of streaming, as well as the various advantages and disadvantages of streaming. Students will study the hardware, software, and technology involved in the different types of streaming media. Prerequisites: COMM-ST 100, COMM-ST 105P or equivalent is recommended.

COMM-ST 422P New Media Writing For The Web

This course is designed to teach students new media writing and the technology of reporting for online publications. Students will analyze the components of online writing, including the design, creation, and transfer of online digital media. Students will be introduced to digital formats and production tools. Students will examine the technology of writing for the web and the particular needs of new media writing for users of the web, techniques to transfer writing electronically, and how to use resources on the web for online reporters. Prerequisites: COMM-ST 100, COMM-ST 105P or equivalent is recommended.

COMM-ST 423P Shooting Digital Video For The Web And New Media

This course is designed to teach students the fundamental concepts of digital video, with special consideration given to shooting the new media and the web. Students will learn the process of digital video, the types of file formats, technical considerations of displaying video on the web, and technical features of the digital video camera. This class will enable students to maximize the use of video in various new media digital formats (CD-ROM, DVD, etc.), as well as its use on the web. Prerequisites: COMM-ST 100 COMM ST 105P or equivalent is recommended.

COMM-ST 424P Web Radio

This course is designed to teach students the technology and underlying concepts in producing Web radio. A general overview of radio techniques and historical context, as well as practical and technical information will be given. Legal and copyright implications of making Web radio will be reviewed. Prerequisites: COMM-ST 100, COMM-ST 105P or equivalent is recommended.

COMM-ST 431 Colloquium In Interpersonal Dynamics

An examination of the practical application of communication principles and theories, with focus on one of the following: health, organizational, nonverbal, intrapersonal, conflict management, computer-mediated, or intercultural communication. Prerequisite: None Offered: On demand.

COMM-ST 432 Press, Politics And Public Policy

Undergraduate component of Comm Studies 532. An advanced course in the study of the press and political establishments in the formation of public policy. Lecture, discussion and research.

COMM-ST 444WI Intercultural Communication

A consideration of communication phenomena in multicultural settings. A study of the public forum with an emphasis on the interpersonal aspects of international, intercultural, and co-cultural communication. Lecture and discussion. On demand. Prerequisite: Successful completion of the WEPT.

COMM-ST 446 Principles Of Advertising

A survey of advertising as an industry and a career field, examining its history and development in America, and its application in mass and special media. Specific procedures are studies for linking the development of advertising strategies, messages and campaigns to the marketing process, and for evaluation and selection of appropriate media to carry the advertising message.

COMM-ST 447 Interactive and Social Media Advertising

This course examines advertising on the Internet as a form of interactive communication, with a special focus on social media and search engines. It addresses basic concepts, current issues, and the development of interactive advertising strategies and plans. The coverage includes interactivity, pricing models, online targeting strategies, search engine optimization and advertising,

social media advertising, and online video advertising.

COMM-ST 448 Principles Of Public Relations

An overview, presenting the function, purposes, procedures and practices of public relations, its role in society, industry, government and politics, and its potential as a career field. This is a survey course with primary emphasis on theory, supplemented with applied techniques.

COMM-ST 456 Electronic Journalism

A practical approach to the practices and principles of broadcasting news media, including preparing copy for microphone and camera, editing wire copy, reporting public affairs and public relations, and an intensive scrutiny of the concepts of freedom and responsibility as they apply to the press and current legislation. Prerequisite: COMM-ST 351. Fall and winter.

COMM-ST 457 Producing And Distributing Media

Survey of Contemporary practices used in the producing, funding and distribution of media for theatrical, broadcast, home video/dvd and web-based markets. Lectures, discussion and projects. Prerequisites: None

COMM-ST 458WI Publicity, Promotion And The Media

Writing intensive. A study of controlled and uncontrolled (public) media and their use to effect motivation of various target audiences, and alteration of attitudes, opinions, and beliefs in special publics; examination of the theory and nature of messages and materials generated by PR departments or counseling firms; analysis and practice in development of specialized communications materials, such as house organs, news releases, publicity and speeches to gain reaction and support from specialized groups. Prerequisite: COMM-ST 351 and successful completion of the WEPT. Offered: Fall.

COMM-ST 462 Public Broadcasting

A study of the development of public broadcasting, its position and responsibilities in the world of modern communications. Programming and operations concepts and philosophies of public broadcast facilities will be studied and analyzed. Prerequisite: COMM-ST 220. Offered: On demand.

COMM-ST 466 Advanced Electronic Journalism

An advanced study of television and Internet news gathering, field production and performance for electronic media. Prerequisite: COMM-ST 456 or consent of instructor. Offered: Spring

COMM-ST 466 Advanced Electronic Journalism

An advanced study of television and Internet news gathering, field production and performance for electronic media. Prerequisite: COMM-ST 456 or consent of instructor. Offered: Spring

COMM-ST 470 Directing

An advanced course in video techniques with emphasis on creating complex formats for broadcasting, recording and performance. Lecture, discussion, and laboratory. Prerequisite: COMM-ST 250. Offered: Spring.

COMM-ST 471 Advanced Media Production

An advanced course in media production techniques involving knowledge and practical use of video, film and sound equipment to create professionally competitive media productions. Lecture, discussion, laboratory and research. Prerequisites: COMM-ST 250, COMM-ST 373, and COMM-ST 354 or Instructor Consent. Offered: Fall

COMM-ST 473 Directing Actors and Scenes

This intensive workshop class seeks to deepen the student director's understanding of the acting process and provide ways of clearly and creatively communicating with actors. The course will deepen students' understanding of blocking scenes and designing camera coverage. It will explore the role of the director as a guiding creative force in the making of a film through collaboration and provide techniques for scene analysis and preparation. Students will cast, rehearse and present a live performance for their final project and design appropriate camera coverage. Prerequisites: Com Studies 250.

COMM-ST 478 Media Law

A comprehensive examination of the law as it pertains to advertising, public relations, journalism, commercial and electronic media, broadcast regulatory agencies, corporate speech and corporate participation in elections. Students will study topics that include the First Amendment, defamation and privacy. Court opinions and legislation will be the course's primary focus, however students will also examine contemporary and historic theory of free expression. Offered: On demand.

COMM-ST 483 Research Seminar In Communication Studies

This is the departmental capstone course and is required for majors in their last semester of their senior year. The course summarizes and extends student's theoretical and applied understanding of the role of communication competence in the work place and beyond. The course also focuses on refining student's research competencies and their appreciation of the cultural role

of modern communication methods. Offered: Fall and Spring.

COMM-ST 484 Communication Studies Activities

Internships opportunities for advanced students involved in community and campus activities. Student must receive approval of advising professor in semester prior to enrollment. No more than four hours with any one project. Fall, winter and summer.

COMM-ST 498 Special Problems In Communication Studies

Research and/or projects for advanced upper class students. Student must receive approval of advising professor in semester prior to enrollment. No more than three hours with any one instructor. Offered every semester.

Criminal Justice and Criminology (CJC)

CJC 101 Introduction To Criminal Justice

This introductory overview course is designed to familiarize students with the three main components of the adult criminal justice system: police, courts, and corrections. The course will investigate the viewpoints of offenders, victims, social scientists, the general public, and workers in the system on diverse issues of social control, criminal behavior, treatment and punishment.

CJC 101 Introduction To Criminal Justice

This introductory overview course is designed to familiarize students with the three main components of the adult criminal justice system: police, courts, and corrections. The course will investigate the viewpoints of offenders, victims, social scientists, the general public, and workers in the system on diverse issues of social control, criminal behavior, treatment and punishment.

CJC 101P Introduction To Criminal Justice

This introductory overview course is designed to familiarize students with the three main components of the adult criminal justice system: police, courts, and corrections. The course will investigate the viewpoints of offenders, victims, and social scientists, the general public, and workers in the system on diverse issues of social control, criminal behavior, treatment and punishment.

CJC 250 Introduction To Policing

A comparison of law enforcement and peace-keeping functions of the police provides a basic theme for the course, with examination of several topics related to police accomplishing these functions. Some of the topics covered include police discretion, police professionalism, the police officer as a bureaucratic agent, and police-community relations.

CJC 250 Introduction To Policing

A comparison of law enforcement and peace-keeping functions of the police provides a basic theme for the course, with examination of several topics related to police accomplishing these functions. Some of the topics covered include police discretion, police professionalism, the police officer as a bureaucratic agent, and police-community relations.

CJC 260 Principles & Practices of Criminal Courts

The course examines the American criminal judicial system, including the history, philosophy, and changing nature of criminal courts. The activities of lawyers, judges, and related professionals are emphasized, and current topics involving the criminal court are discussed.

CJC 265 Delinquency And Juvenile Justice

This course focuses on the nature, extent and theoretical explanations of delinquency and the history and philosophy behind the juvenile justice system in terms of the roles played by law enforcement, juvenile courts, and corrections. Juvenile groups such as status offenders, delinquents, gang members, victims, and juveniles adjudicated as adult criminals will also be examined.

CJC 265 Delinquency And Juvenile Justice

This course focuses on the nature, extent and theoretical explanations of delinquency and the history and philosophy behind the juvenile justice system in terms of the roles played by law enforcement, juvenile courts, and corrections. Juvenile groups such as status offenders, delinquents, gang members, victims, and juveniles adjudicated as adult criminals will also be examined.

CJC 265P Juvenile Justice System

A survey of the legal aspects of the juvenile justice system in America dealing with the history, philosophy, jurisprudence and treatment of delinquents, and neglected, abused, dependent and adoptive children. Pace class to meet one night a week from 6:00-10:00 p.m. and one weekend: Fri E6:00-10:00; Sat 8:00-5:00; Sun 1:00-5:30 for eight weeks in either fall or winter semester. Part of PACE Block -- Juvenile Justice and the Family.

CJC 270 Principles Of Corrections

This course explores adult institutional and community-based corrections in the United States. Major areas examined include the evolution of corrections, the process of correctional reform, adult offenders and prison culture, treatment and rehabilitation of

offenders, intermediate sanctions, and correctional workers.

CJC 270 Principles Of Corrections

This course explores adult institutional and community-based corrections in the United States. Major areas examined include the evolution of corrections, the process of correctional reform, adult offenders and prison culture, treatment and rehabilitation of offenders, intermediate sanctions, and correctional workers.

CJC 300 Structural Theories Of Crime

The impact of sociodemographic, geographic, economic, political variables and sex roles in the occurrence and distribution of crime.

CJC 300 Structural Theories Of Crime

The impact of sociodemographic, geographic, economic, political variables and sex roles in the occurrence and distribution of crime.

CJC 315 Crime, Criminals And Victims

This course addresses the study of crime, criminals and victims. It examines the relationship between victims and offenders. Special treatment is given to criminological as well as victimological theories. A segment of the course will address the sporadic nature of juvenile crime. The course will examine viable strategies to reduce levels of victimization. In the final analysis the course will offer crime prevention strategies.

CJC 315 Crime, Criminals And Victims

This course addresses the study of crime, criminals and victims. It examines the relationship between victims and offenders. Special treatment is given to criminological as well as victimological theories. A segment of the course will address the sporadic nature of juvenile crime. The course will examine viable strategies to reduce levels of victimization. In the final analysis the course will offer crime prevention strategies.

CJC 316 Race, Class and Justice

This course examines the intersection of race and class as it relates to crime and justice. Specifically, the course focuses on race and class in relation to criminological theory and the application of justice system practices and policies.

CJC 317 Policies Of Drug Use And Control

Utilizing both historical and contemporary information, this course provides an assessment of the "drug problem" in the U.S. and policies of control developed in response to the problem. Drug use criminalization, legalization, medical treatment, and prevention strategies and related issues are considered in regard to scientific knowledge related to the patterns, causes, and impact of substance abuse. Also offered as SOCIOL 317. Offered annually.

CJC 317 Policies Of Drug Use And Control

Utilizing both historical and contemporary information, this course provides an assessment of the "drug problem" in the U.S. and policies of control developed in response to the problem. Drug use criminalization, legalization, medical treatment, and prevention strategies and related issues are considered in regard to scientific knowledge related to the patterns, causes, and impact of substance abuse. Also offered as SOCIOL 317. Offered annually.

CJC 319 Theoretical Criminology

A comprehensive examination of the major criminology theories, their philosophical assumptions, and the socio-historical context in which they were articulated. Also offered as SOCIOL 319.

CJC 319 Theoretical Criminology

A comprehensive examination of the major criminology theories, their philosophical assumptions, and the socio-historical context in which they were articulated. Also offered as SOCIOL 319.

CJC 320 The Supreme Court And The Criminal Process

Course examines recent Supreme Court decisions on the constitutional aspects of the administration of justice. Topics include the nationalization of the Bill of Rights and jurisdiction with an emphasis on problems involving the Fourth, Fifth, Sixth, Eighth, and 14th Amendments.

CJC 320 The Supreme Court And The Criminal Process

Course examines recent Supreme Court decisions on the constitutional aspects of the administration of justice. Topics include the nationalization of the Bill of Rights and jurisdiction with an emphasis on problems involving the Fourth, Fifth, Sixth, Eighth, and 14th Amendments.

CJC 350 Social Deviance

The dominant sociological perspectives on deviance will be discussed with special attention given to the processes that define behavior and persons as deviant and the impact of such definitions on social relationships and identity. Also offered as Sociology 320.

CJC 350 Social Deviance

The dominant sociological perspectives on deviance will be discussed with special attention given to the processes that define behavior and persons as deviant and the impact of such definitions on social relationships and identity. Also offered as Sociology 320.

CJC 351 Policing In The Community

The purpose of this class is to introduce the student to police operations and the effectiveness of different police programs. The material discussed in class focuses on empirical evaluations of police effectiveness, and the role of the police in today's society. This class is divided into four broad areas: the nature and effectiveness of patrol; criminal investigations; special operations including crackdowns, responses to domestic assaults, and hot spot policing; and the latest crime prevention strategies, such as community oriented policing and problem solving.

CJC 351 Policing In The Community

The purpose of this class is to introduce the student to police operations and the effectiveness of different police programs. The material discussed in class focuses on empirical evaluations of police effectiveness, and the role of the police in today's society. This class is divided into four broad areas: the nature and effectiveness of patrol; criminal investigations; special operations including crackdowns, responses to domestic assaults, and hot spot policing; and the latest crime prevention strategies, such as community oriented policing and problem solving.

CJC 353 Ethical And Controversial Issues In Policing

This course covers various ethical and controversial issues confronting law enforcement agencies and examines ethical dilemmas involved in police decision-making with an emphasis on current controversial issues. Topics to be addressed include police misconduct; stop and frisk practices; search and seizure; racial profiling; use of excessive and deadly force; and vehicle pursuits.

CJC 353 Ethical And Controversial Issues In Policing

This course covers various ethical and controversial issues confronting law enforcement agencies and examines ethical dilemmas involved in police decision-making with an emphasis on current controversial issues. Topics to be addressed include police misconduct; stop and frisk practices; search and seizure; racial profiling; use of excessive and deadly force; and vehicle pursuits.

CJC 355 Crime And Public Policy

This course addresses how society has responded to the crime problem during changing social, historical, political and economic contexts. Special attention will be given to how society has reacted to crime (with liberal treatment and rehabilitation or conservative punitive approaches) from the 1920's to the present.

CJC 355 Crime And Public Policy

This course addresses how society has responded to the crime problem during changing social, historical, political and economic contexts. Special attention will be given to how society has reacted to crime (with liberal treatment and rehabilitation or conservative punitive approaches) from the 1920's to the present.

CJC 355P Crime And Public Policy

This course addresses how society has responded to the crime problem during changing social, historical, political and economic contexts. Special attention will be given to how society has reacted to crime (with liberal treatment and rehabilitation or conservative punitive approaches) from the 1920's to the present.

CJC 355P Crime And Public Policy

This course addresses how society has responded to the crime problem during changing social, historical, political and economic contexts. Special attention will be given to how society has reacted to crime (with liberal treatment and rehabilitation or conservative punitive approaches) from the 1920's to the present.

CJC 360 Criminal Behavior Systems

A first-hand account of typologies drawn from empirical studies of professional criminals, organized crime, white-collar offenders, political criminals and street-level offenders such as the burglar, thief, murderer, drug dealer, rapist, or armed robber.

CJC 360 Criminal Behavior Systems

A first-hand account of typologies drawn from empirical studies of professional criminals, organized crime, white-collar offenders, political criminals and street-level offenders such as the burglar, thief, murderer, drug dealer, rapist, or armed robber.

CJC 363 Introduction To Statistics In Sociology/Criminal Justice

A first course in the statistical analysis of quantitative data. Course emphasizes descriptive statistics, probability theory, parameter estimation, bivariate hypothesis testing, and computer applications. Prerequisites: MATH 110, MATH 116 or an equivalent. Offered: Fall

CJC 363 Introduction To Statistics In Sociology/Criminal Justice

A first course in the statistical analysis of quantitative data. Course emphasizes descriptive statistics, probability theory, parameter estimation, bivariate hypothesis testing, and computer applications. Prerequisites: MATH 110, MATH 116 or an equivalent. Offered: Fall

CJC 371 Community Corrections

This course will examine intermediate sanctions in the United States, such as probation, halfway houses, boot camps, among others. Specifically, the origin and proliferation of the use of corrections in the community will be explored in depth. The effectiveness of several major community correctional strategies will be explored through a review of the research literature base. Several issues will be highlighted including (but not limited to) ethical constraints, political problems, and treatment effectiveness in light of the use of community sanctions. Offered: One time every other year

CJC 371 Community Corrections

This course will examine intermediate sanctions in the United States, such as probation, halfway houses, boot camps, among others. Specifically, the origin and proliferation of the use of corrections in the community will be explored in depth. The effectiveness of several major community correctional strategies will be explored through a review of the research literature base. Several issues will be highlighted including (but not limited to) ethical constraints, political problems, and treatment effectiveness in light of the use of community sanctions. Offered: One time every other year

CJC 373 Institutional Corrections

This course will examine several aspects of the American Prison, specifically, current issues in the management and growth of the prison industry will be reviewed. These issues will include major constitutional applications, the management of special populations within the prison environment, and a general review of several aspects of day-to-day prison life. These issues and others will be explored through a review of the research literature base germane to prisons and institutions.

CJC 373 Institutional Corrections

This course will examine several aspects of the American Prison, specifically, current issues in the management and growth of the prison industry will be reviewed. These issues will include major constitutional applications, the management of special populations within the prison environment, and a general review of several aspects of day-to-day prison life. These issues and others will be explored through a review of the research literature base germane to prisons and institutions.

CJC 380 Psycho-Social Determinants of Crime & Delinquency

This course offers an interdisciplinary approach to the study of crime and delinquency outlining biological, developmental, psychological, social-psychological, and societal factors associated with criminal behavior. The course also focuses on ways in which these factors may be integrated to solve, explain, and prevent crimes.

CJC 390 New Dimensions In Criminal Justice

Examination of contemporary topics, issues or problems related to the development of justice and/or operations in response to criminal and related behaviors addressed by the justice system. May be repeated for credit. Prerequisites: None. Offered: Every semester.

CJC 390 New Dimensions In Criminal Justice

Examination of contemporary topics, issues or problems related to the development of justice and/or operations in response to criminal and related behaviors addressed by the justice system. May be repeated for credit. Prerequisites: None. Offered: Every semester.

CJC 401 Criminal Justice & Criminology in Popular Media

This course examines criminology and criminal justice as it is represented in popular film to explore critically the impact media has on the public's perception of the criminal justice system, the origin of criminal behavior, and the broad sociological constructs of criminology. A key focus is the media's power to shape criminal justice policy and practice.

CJC 421 Criminal Behavior In The United States

A description and causal analysis of complex forms of criminal behavior in contemporary American society; included for study will be organized and professional crime, white collar crime, homicide, street crime, and crimes against morals involving sex, alcohol, drugs and gambling.

CJC 421P Criminal Behavior In The United States

A description and casual analysis of complex forms of criminal behavior in contemporary American society; included for study will be organized and professional crime, white collar crime, homicide, street crime, and crimes against morals involving sex, alcohol, drugs and gambling.

CJC 421P Criminal Behavior In The United States

A description and casual analysis of complex forms of criminal behavior in contemporary American society; included for study will be organized and professional crime, white collar crime, homicide, street crime, and crimes against morals involving sex, alcohol, drugs and gambling.

CJC 424 The Death Penalty In America

This course takes a sociological look at the most extreme punishment currently in use in the United States. Society debates its value without giving much weight to the research which social science conducts. Indeed, the political domain frequently misrepresents the data that is available. The course evaluates the adequacy of the research and separates the strands of the debates in order to understand the role of the death penalty in our society. Prerequisite: CJC 101

CJC 429 Restorative Justice

This course is an introduction to the concept of restorative justice. The course examines the roots of the concept, its theoretical perspective, and its applications in juvenile justice, mediation and correctional settings.

CJC 429 Restorative Justice

This course is an introduction to the concept of restorative justice. The course examines the roots of the concept, its theoretical perspective, and its applications in juvenile justice, mediation and correctional settings.

CJC 435WI Gender And Law

This course examines the contemporary legal rights and obligations of women in light of the historical relationships between the social status of women and their legal status. Topics investigated include proprietary and contractual rights, family law, employment practices, educational opportunities, and women as victims and perpetrators of crime. Prerequisite: Successful Completion of the Wept Test

CJC 440 Hate & Bias Crimes

The purpose of this course is to examine the development and enforcement of hate crime law within our legal system. Discussion focuses on the causes and consequences of hate crimes, the constitutional issues associated with bias crime statutes, and the effectiveness of formal and informal social controls for eliminating hate and bias crimes.

CJC 450 Women, Crime And Criminal Justice

This course will focus on the experiences of women and girls with crime in America. The primary areas studied will be females as victims, offenders, and professionals in the criminal justice system. Various criminological theories and research will also be examined in light of gender.

CJC 450 Women, Crime And Criminal Justice

This course will focus on the experiences of women and girls with crime in America. The primary areas studied will be females as victims, offenders, and professionals in the criminal justice system. Various criminological theories and research will also be examined in light of gender.

CJC 470WI Capstone: Criminal Justice And Criminology

This course is designed to integrate student's program of study in the major of criminal justice and criminology. The class examines current conditions of the justice system with respect of race, gender and social class. This course satisfies the writing intensive requirement for the General Degree Requirements of the College. Prerequisites: WEPT, course taken in student's last semester. Semester offered: Fall/Winter

CJC 470WI Capstone: Criminal Justice And Criminology

This course is designed to integrate student's program of study in the major of criminal justice and criminology. The class examines current conditions of the justice system with respect of race, gender and social class. This course satisfies the writing intensive requirement for the General Degree Requirements of the College. Prerequisites: WEPT, course taken in student's last semester. Semester offered: Fall/Winter

CJC 475 White Collar Crime

This course examines activities variously called white-collar crimes, crimes of privilege, corporate and government crimes, and underworld crimes. The purposes of the course are (1) to describe, analyze, and assess social impact of these offenses, (2) to examine the capacity of existing theories in criminology and social deviance to account for those activities, (3) to describe the responsibilities, powers, and activities of those agencies which have jurisdiction over them, and (4) to assess the effectiveness of

various legal sanctions in controlling such activities and to review the problems involved in legislation intended to achieve that control.

CJC 475 White Collar Crime

This course examines activities variously called white-collar crimes, crimes of privilege, corporate and government crimes, and upperworld crimes. The purposes of the course are (1) to describe, analyze, and assess social impact of these offenses, (2) to examine the capacity of existing theories in criminology and social deviance to account for those activities, (3) to describe the responsibilities, powers, and activities of those agencies which have jurisdiction over them, and (4) to assess the effectiveness of various legal sanctions in controlling such activities and to review the problems involved in legislation intended to achieve that control.

CJC 475 White Collar Crime

This course examines activities variously called white-collar crimes, crimes of privilege, corporate and government crimes, and upperworld crimes. The purposes of the course are (1) to describe, analyze, and assess social impact of these offenses, (2) to examine the capacity of existing theories in criminology and social deviance to account for those activities, (3) to describe the responsibilities, powers, and activities of those agencies which have jurisdiction over them, and (4) to assess the effectiveness of various legal sanctions in controlling such activities and to review the problems involved in legislation intended to achieve that control.

CJC 475P White Collar Crime

This course examines activities variously called white-collar crimes, crimes of privilege, corporate and government crimes, and upperworld crimes. The purpose of the course are (1) to describe, analyze, and assess social impact of these offenses, (2) to examine the capacity of existing theories in criminology and social deviance to account for those activities, (3) to describe the responsibilities, powers, and activities of those agencies which have jurisdiction over them, and (4) to assess the effectiveness of various legal sanctions in controlling such activities and to review the problems involved in legislation intended to achieve that control. Part of PACE Block --Justice and Society. PACE class to meet one night a week from 6:00-10:00 p.m. and one weekend: Fri. E6:00-10:00; Sat 8:00-5:00; Sun 1:00-5:30 for eight weeks in either fall or winter semester.

CJC 475P White Collar Crime

This course examines activities variously called white-collar crimes, crimes of privilege, corporate and government crimes, and upperworld crimes. The purpose of the course are (1) to describe, analyze, and assess social impact of these offenses, (2) to examine the capacity of existing theories in criminology and social deviance to account for those activities, (3) to describe the responsibilities, powers, and activities of those agencies which have jurisdiction over them, and (4) to assess the effectiveness of various legal sanctions in controlling such activities and to review the problems involved in legislation intended to achieve that control. E6:00-10:00; Sat 8:00-5:00; Sun 1:00-5:30 for eight weeks in either fall or winter semester.

CJC 476 Seminar In Criminal Justice And Criminology Issues

This course is an advanced exploration of the relationship between the criminal justice system and criminal behavior from at least one of the following perspectives: psychological, sociological, economic, legal, political or administration/ management. Will include discussions and analysis of contemporary readings and on-going research in the selected perspective.

CJC 476 Seminar In Criminal Justice And Criminology Issues

This course is an advanced exploration of the relationship between the criminal justice system and criminal behavior from at least one of the following perspectives: psychological, sociological, economic, legal, political or administration/ management. Will include discussions and analysis of contemporary readings and on-going research in the selected perspective.

CJC 483 Methods Of Sociological Research

A seminar which explores the interrelationships between sociology theory, research methods and statistics. May focus on major contemporary issues building on and integrating knowledge obtained in previous courses. Also offered as SOCIOL 362.

CJC 483 Methods Of Sociological Research

A seminar which explores the interrelationships between sociology theory, research methods and statistics. May focus on major contemporary issues building on and integrating knowledge obtained in previous courses. Also offered as SOCIOL 362.

CJC 486 Methods Of Program Evaluation

This course focuses on applying research methodological techniques to evaluation of programs designed to respond to social problems and issues (e.g., drug use, crime, delinquency, indigent care). Topics of interest to those charged with designing and executing program evaluations are considered, including types of program evaluation assessment, use of time series models, special research issues for program evaluation, and generating and testing hypotheses from program objectives. Also offered as SOCIOL 486. Offered annually.

CJC 488 Mentoring Juvenile Justice System-Involved Youth

Youth mentoring experience in a juvenile justice setting with required training and classroom study. Prerequisites: successful background check completion. Offered: Annually

CJC 490 Directed Studies In Criminal Justice And Criminology

Individual research and study in the student's field of interest as approved and directed by major professors. The work involves examination and reporting of selected problems affecting the various agencies of our legal system. Only two of the 490 sequence courses can be applied to the major. A. Law Enforcement B. Court Operations and Administration C. Corrections D. Legal Theory and Philosophy E. Criminological Theory F. Sociology of Law.

CJC 490 Directed Studies In Criminal Justice And Criminology

Individual research and study in the student's field of interest as approved and directed by major professors. The work involves examination and reporting of selected problems affecting the various agencies of our legal system. Only two of the 490 sequence courses can be applied to the major. A. Law Enforcement B. Court Operations and Administration C. Corrections D. Legal Theory and Philosophy E. Criminological Theory F. Sociology of Law.

CJC 491 Internship In Criminal Justice

Intern experience under faculty supervision in local, state, federal or private agencies working with justice system involved offenders. Prerequisites: CJC 101, junior standing prior consent and arrangement. Offered: Every semester.

CJC 491 Internship In Criminal Justice

Intern experience under faculty supervision in local, state, federal or private agencies working with justice system involved offenders. Prerequisites: CJC 101, junior standing prior consent and arrangement. Offered: Every semester.

CJC 492 Topics In Criminal Justice

Specialized, short courses with focused examination of particular topics germane to the study of the justice system. May be repeated for credit. Prerequisites: None. Offered: Every semester.

CJC 492 Topics In Criminal Justice

Specialized, short courses with focused examination of particular topics germane to the study of the justice system. May be repeated for credit. Prerequisites: None. Offered: Every semester.

Economics (ECON)

ECON 100 Economics Explained

Everything you need to know about how the economy works and where it's going. This course simplifies and clarifies the vocabularies and concepts used to describe all the important economic phenomenon in our society today: unemployment, trade deficits, government budget deficits or surpluses, inflation, investments, and customer debt. It describes where we've been (economically) and assess the future of the economic system we call capitalism.

ECON 101 Essentials Of American Capitalism

This course represents an overview of the principles of economics and their relation to current economic events. It is designed to meet state requirements for elementary education certification as well as to provide a general introduction to economics for non-business, non-engineering, and non-economics majors. Both macroeconomic and microeconomic issues will be covered. Every semester.

ECON 150 Introduction To Labor Studies

This interdisciplinary course offered by The Institute for Labor Studies, covers the role of workers and the labor movement in society and the American political and economic system. Students will gain an overview, from a labor viewpoint, of the organization of work and workers, collective bargaining and representation, and labor's rights, roles, and strategies in a democracy and in the global economy. A particular focus will be the image of the working class and organized labor in the media and among public perception. Prerequisite: None Offered: Yearly

ECON 201 Introduction To Economics I

Economics I deals primarily with macroeconomic or national economic concepts, the economics of the determination of recession, inflation, maintenance of full employment and economic growth, with an emphasis upon the economics of modern Keynesian analyses. It further introduces the economics of Marx and Ayres and discusses relevant and current economic issues. Economics 201 and 202 are prerequisites for all other economics courses except with specific permission of the instructor. Every semester.

ECON 201 Introduction To Economics I

Economics I deals primarily with macroeconomic or national economic concepts, the economics of the determination of

recession, inflation, maintenance of full employment and economic growth, with an emphasis upon the economics of modern Keynesian analyses. It further introduces the economics of Marx and Ayres and discusses relevant and current economic issues. Economics 201 and 202 are prerequisites for all other economics courses except with specific permission of the instructor. Every semester.

ECON 201 Introduction To Economics I

It further introduces the economics of Marx and Ayres and discusses relevant and current economic issues. Economics 201 and 202 are prerequisites for all other economics courses except with specific permission of the instructor. Every semester.

ECON 202 Introduction To Economics II

Economics II deals primarily with microeconomics, firm analysis, the principles of demand, supply, elasticity, price determination, costs, income distribution, market structures, trade, and other related social, economic issues. ECON 201, ECON 202 are prerequisites for all other economics courses except with specific permission of the instructor. Every semester.

ECON 202 Introduction To Economics II

Economics II deals primarily with microeconomics, firm analysis, the principles of demand, supply, elasticity, price determination, costs, income distribution, market structures, trade, and other related social, economic issues. ECON 201, ECON 202 are prerequisites for all other economics courses except with specific permission of the instructor. Every semester.

ECON 202 Introduction To Economics II

Economics II deals primarily with microeconomics, firm analysis, the principles of demand, supply, elasticity, price determination, costs, income distribution, market structures, trade, and other related social, economic issues. ECON 201, ECON 202 are prerequisites for all other economics courses except with specific permission of the instructor. Every semester.

ECON 203 Current Economic Issues

Each of these one-hour courses will deal with one selected topic. Students enrolled should have some background in the social sciences. A maximum of three Economics 395 courses will apply towards the department's graduation requirements for a major.

ECON 204 The Economics Of Public Process And Private Choice I

This film/tape course and ECON 397B are specifically designed in the format of the PACE program. Regular majors in economics may count one of these two courses as meeting the 27 minimum required departmental hours. The J.K. Galbraith film series and text, *The Age of Uncertainty*, provide the central theme for this course.

ECON 204 The Economics Of Public Process And Private Choice I

This film/tape course and ECON 397B are specifically designed in the format of the PACE program. Regular majors in economics may count one of these two courses as meeting the 27 minimum required departmental hours. The J.K. Galbraith film series and text, *The Age of Uncertainty*, provide the central theme for this course.

ECON 205 The Economics Of Public Process And Private Choice II

This film/tape course and ECON 397A are specifically designed in the format of the PACE program. Regular majors in economics may count one of these two courses as meeting the 27 minimum required departmental hours. The Milton Friedman film series, *Free to Choose*, provides the central theme for this course.

ECON 206 Labor Economics

An examination of the theories of wage determination, the economic effects of wage determination upon the wage structure, the distribution of national income, employment, and an introduction to collective bargaining. Prerequisite: ECON 302. On request.

ECON 300CM Cluster Course: Mexico, Central America And The Human Condition

Faculty from at least two different departments (one of which must be a department in the Division of Humanities, including History) may determine the topic and syllabus, subject to the approval of the director of Integrated Studies and the program's advisory committee in addition to the approval of the departments involved. This special topics course will satisfy the interdisciplinary course requirement for the B.A.

ECON 300CS Cluster Course

Faculty from at least two different departments (one of which must be a department in the Division of Humanities, including History) may determine the topic and syllabus, subject to the approval of the director of Integrated Studies and the program's advisory committee in addition to the approval of the departments involved. This special topics course will satisfy the interdisciplinary course requirement for the B.A.

ECON 302 Macroeconomic Analysis

The economic system as a whole and the ways in which its functioning is affected by the behavior of the interdependent sectors of which it is composed. Major factors affecting national income; use of sectoral accounts in analyzing economic prospects. Offered: Every Semester Prerequisite: ECON 201 and ECON 202

ECON 302 Macroeconomic Analysis

The economic system as a whole and the ways in which its functioning is affected by the behavior of the interdependent sectors of which it is composed. Major factors affecting national income; use of sectoral accounts in analyzing economic prospects. Offered: Every Semester Prerequisite: ECON 201 and ECON 202

ECON 302 Macroeconomic Analysis

The economic system as a whole and the ways in which its functioning is affected by the behavior of the interdependent sectors of which it is composed. Major factors affecting national income; use of sectoral accounts in analyzing economic prospects. Offered: Every Semester Prerequisite: ECON 201 and ECON 202

ECON 303 Microeconomic Analysis

Functioning of the individual enterprise and households. Problems confronting business enterprises operating under different types of market situations; influence of the prices factors of production on methods of production; effects that changes in income levels and in relative prices have on sales of different types of goods and services. Every semester. Prerequisite: ECON 201 and ECON 202 Offered: Every Semester

ECON 303 Microeconomic Analysis

Functioning of the individual enterprise and households. Problems confronting business enterprises operating under different types of market situations; influence of the prices factors of production on methods of production; effects that changes in income levels and in relative prices have on sales of different types of goods and services. Every semester. Prerequisite: ECON 201 and ECON 202 Offered: Every Semester

ECON 303H Special Issues In Economic

Readings and discussions of selected economic topics. Content varies over time as economic conditions change. Designed for outstanding students in Principles of Economics. Prerequisites: ECON 202 and/or ECON 202. Semester offered: Fall

ECON 311 Economics for Nonprofit Managers

This course introduces microeconomics to aspiring nonprofit managers. After reviewing the nonprofit organization's role in the U.S. economy, students will learn a variety of tools they can use to weigh alternatives, examine risk, and make organizational decisions. With these tools and a solid introduction to microeconomics, students will be prepared to analyze economic events, predict outcomes, and make sound decisions. Offered: Spring

ECON 314 Race, Class And Gender: Theory, History, And Policy

Analyzes the ways in which race and gender discrimination result in differences in opportunities and outcomes in society. Begins with a historical overview of the origins of modern racism and patriarchy, and their relation to the rise and development of capitalism. Discursive and nondiscursive factors are investigated. Alternative theoretical approaches to understanding the intersections of race, class, and gender are evaluated. Policy debates on issues related to affirmative action, education, welfare, employment, and others are considered. Prerequisite: None Offered: On Demand

ECON 323P Administration In The Service Industry

Students will examine the nature of service and the scope of administration within the service industry. Additionally, the course will examine the development of service and the service economy. This course may not be used by students to fulfill requirements for the major in Economics or a Concentration in Commercial Economics. Prerequisites: None. Offered: Every Semester.

ECON 336 The Kansas City Economy

This course explores the Kansas City economy in depth from both a micro and macro perspective. The macro approach details how important the Kansas City economy is to the state of Missouri, to the US economy, and in the international arena. The micro approach details the contribution of the many different sectors of the KC area to the overall local economy. Prerequisite(s): ECON 100, ECON 201 or ECON 202 Offered: Winter Restrictions: None

ECON 341 Union Leadership and Administration

This course focuses on the roles and challenges of union leadership in a changing environment. Topics include the union leaders' role as a representative, organizer and educator as well as administrative responsibilities within the union and the relationship with enterprise management in both adversarial and participatory situations. Options for leadership styles and organizational models will be discussed and explored in both theory and practice. Leaders will develop their skills of motivation, speaking, strategic planning and managing complex campaigns and diverse organizations. This course is part of the Certificate Program in

Labor Studies and is offered on the University of Missouri Interactive Video Network at UMKC, UMSL, and UMC.

ECON 343P Resource Acquisition And Distribution In The Hospitality Industry

This course will examine economic policy that is the basis for materials acquisition policies and practices within the hospitality industry. Additionally, students will study materials flow from source to final user. Special emphasis will be placed on policies and procedures that maximize resource usage. this course may not be used by students to fulfill requirements for the major in Economics or a Concentration in Commercial Economics. Prerequisites: None. Offered: Fall.

ECON 353 Financial Analysis And The Economy

This course examines techniques of financial evaluation used by individuals, corporate managers, and portfolio analysts. Focus of the course will be on the interaction of the mechanics of analytical methods and economic activity. Topics covered will include individual portfolio building, asset evaluation, and financial market theory. Prerequisites: ECON 201 and ECON 202. Offered: Winter odd years.

ECON 395A Economic Issues

ECON 395B The Economics Of Law

ECON 395B The Economics Of Law

ECON 395C The Economics Of Energy

ECON 395D Economic Issues

ECON 395E The Economics Of Aging

ECON 395F The Economics Of Minorities

ECON 395G The Economics Of Poverty

ECON 395H The Economics Of The Arts

An analysis of the past and present policies regarding the financing of the Arts.

ECON 395I Views Of A Good Society

This course looks at different views of a good society from the perspective of Utopian economics. The materials dealt with in the course will be drawn from Utopian books, supplemented with material drawn from cartoons, art, literature, poetry, film, and music. Prerequisite: None Offered: On Demand

ECON 397A The Economics Of Public Process And Private Choice I

This film/tape course and ECON 397B are specifically designed in the format of the PACE program. Regular majors in economics may count one of these two courses as meeting the 27 minimum required departmental hours. The J.K. Galbraith film series and text, The Age of Uncertainty, provide the central theme for this course.

ECON 397B The Economics Of Public Process And Private Choice II

This film/tape course and ECON 397A are specifically designed in the format of the PACE program. Regular majors in economics may count one of these two courses as meeting the 27 minimum required departmental hours. The Milton Friedman film series, Free to Choose, provides the central theme for this course.

ECON 402 Labor and the Global Political Economy

This course will examine current issues, trends, and developments which are shaping labor in today's global economy. Students will analyze the shifting balance of power between labor and capital, the role of government, and evaluate the strategic options for workers and unions operating in a global environment.

ECON 404R American Economic History Since 1865

The course deals with the emergence of Industrial American since 1865. It covers the rise to dominance of the large modern corporation, the problem of economic and social instability and stability, the rise of trade associations, cartels, and government regulation in an unstable economy, and the evolution of American economic policy and national economic planning. Offered: On demand. Prerequisites: ECON 201 and ECON 202

This course examines history of work and the working class in the U.S. from 1750 to the present. We will focus on the transformation of the workplace, the rise of the union movement, the nature of cultural and political organizations, workers' relationships with other social groups, and the role played by gender, race, and ethnicity in uniting or dividing the working class. Also cross-listed with History 366RR. Prerequisite: ECON 201 and ECON 202

ECON 406WI History Of Economic Thought

Analysis of basic concepts of economic thought, their historical sources and significance. Prerequisite: Successful completion of WEPT Test. Offered: Every semester.

ECON 412 International Trade And Development

This course emphasizes the global allocation of resources and distribution of income in the analysis of economic development and international trade. Major topics include various theories of economic development, comparative advantage, terms of trade, tariffs, quotas, economic integration and the use of trade to foster economic development. Prerequisite: ECON 100

ECON 412 International Trade And Development

This course emphasizes the global allocation of resources and distribution of income in the analysis of economic development and international trade. Major topics include various theories of economic development, comparative advantage, terms of trade, tariffs, quotas, economic integration and the use of trade to foster economic development. Prerequisite: ECON 100

ECON 420 Environment, Resources And Economic Growth

This course focuses on the theory and policy issues involved in resource reation and depletion; environmental destruction, preservation and reeaction; and the interrelation of these problems of and prospects for economic growth. Prerequisite: ECON 202 Offered: On request

ECON 420 Environment, Resources And Economic Growth

This course focuses on the theory and policy issues involved in resource reation and depletion; environmental destruction, preservation and reeaction; and the interrelation of these problems of and prospects for economic growth. Prerequisite: ECON 202 Offered: On request

ECON 421 Mathematical Economics

An introduction to mathematical methods as applied to the questions addressed by economists. The principal methods to be applied are matrix algebra and differential calculus in the context of optimization. Other topics may include integral calculus, differential equations, difference equations, or linear and non-linear programming. Prerequisites: ECON 301, ECON 302 and MATH 210

ECON 423P Legal & Social Issues Of The Hospitality Industry

This course will investigate societal and economic issues that have influenced the development of significant industry legal issues. Additionally, students will examine laws pertinent to the hospitality industry and investigate the relationship of these legal issues to historical and current societal issues. This course may not be used by students to fulfill requirements for the major in Economics or a Concentration in Commercial Economics. Prerequisites: None. Offered: Winter.

ECON 433P Commercial Economics Aspects Of The Hospitality Industry

This course will examine economic policies that are the basis for accounting and financial practices within the hospitality industry. Additionally, students will explore managerial accounting essentials and examine their use in planning, controlling, and developing budgets within the hospitality industry. This course may not be used by students to fulfill requirements for the major in Economics or a Concentration in Commercial Economics. Prerequisites: None. Offered: Winter.

ECON 435 Public Finance

Problems of public and private sector decision making of revenue-expenditure policies and an examination of the actual legal, political and economic policies for revenues and expenditures of federal, state and local governments. Prerequisite: ECON 302. On request.

ECON 435 Public Finance

Problems of public and private sector decision making of revenue-expenditure policies and an examination of the actual legal, political and economic policies for revenues and expenditures of federal, state and local governments. Prerequisite: ECON 302.

On request.

ECON 437 State And Local Government Finance

This course investigates the role, problems and relative importance of municipal governments in the United States. Such areas as the demand for public services, tax and expenditure policies, and intergovernmental fiscal relations will be explored in detail. Case studies of state and local governments will be introduced to emphasize the problems and proposed solutions arising in modern municipal governments. Prerequisite: ECON 302. On request.

ECON 437 State And Local Government Finance

This course investigates the role, problems and relative importance of municipal governments in the United States. Such areas as the demand for public services, tax and expenditure policies, and intergovernmental fiscal relations will be explored in detail. Case studies of state and local governments will be introduced to emphasize the problems and proposed solutions arising in modern municipal governments. Prerequisite: ECON 302. On request.

ECON 450R Regional Economics

Contemporary policy approaches to regional growth and decline are analyzed in this course. Prerequisite: ECON 302 Semester offered: On request

ECON 450R Regional Economics

Contemporary policy approaches to regional growth and decline are analyzed in this course. Prerequisite: ECON 302 Semester offered: On request

ECON 458 Urban Economics

An inquiry into the economics of location decisions and the influence of these on urban growth and on the real estate market; the evaluation of urban transportation and other public services; an examination of economic development of ghetto neighborhoods. Prerequisite: ECON 302 or its equivalent, or by special permission of the instructor. On request.

ECON 458 Urban Economics

An inquiry into the economics of location decisions and the influence of these on urban growth and on the real estate market; the evaluation of urban transportation and other public services; an examination of economic development of ghetto neighborhoods. Prerequisite: ECON 302 or its equivalent, or by special permission of the instructor. On request.

ECON 475 Economics Institutions and Policies

This course focuses on the economic system analysis of labor market phenomena in the context of historical-institutional development and labor market policies, this course is offered winter semester only. Prerequisites: Econ 201 and Econ 202 or consent of instructor.

ECON 475 Economics Institutions and Policies

This course focuses on the economic system analysis of labor market phenomena in the context of historical-institutional development and labor market policies, this course is offered winter semester only. Prerequisites: Econ 201 and Econ 202 or consent of instructor.

ECON 487 History Of Labor Movements

This course is concerned with the early formation and the transformation of labor unions given the changing American industrial climate. Study will include early union structures, forerunners of modern unions, such as the Knights of Labor, development of the current unions and the potential for union survival in the post-industrial era.

ECON 487H Human Resource Economics

An analysis of the factors determining the productivity of human resources: education, nutrition, job training and work environment. An analysis of work patterns, wage patterns and the impact of automation. Prerequisite: ECON 302 Semester Offered: Fall, every other year.

ECON 499WI Capstone Colloquim

This course provides a common intellectual experience for all economics majors while recognizing the diversity of experiences students bring with them to their final semester before graduation. A series of lectures, reading assignments, and writing assignments help students to synthesize their knowledge of the broad areas of study within (and outside) the field of economics. Guest lecturers provide a critical summary of and synthesis of major areas of study. Each student will also assess their own development by critically examining their individual portfolio of work (containing papers, essay exams, and term papers written during their undergraduate career), and of the department's program. Prerequisite: Successful completion of WEPT. Offered: Winter

Prerequisite: Successful completion of WEPT. Offered: Winter

ECON 855 Socialist Economic Systems**ECON 964** The Economics Of Health And Medicine

An economic analysis of the development of the medical market; organized medicine and the structure of existing health delivery systems. The problems of the medical market will be analyzed; the role of insurance will be investigated and alternative public policies will be studied. Prerequisite: Advanced standing or consent of the instructor. On request.

English (ENGLISH)**ENGLISH 100** Introduction to Reading and Writing

The study and practice of rhetorical principles and strategies of academic reading and writing. Frequent reading and writing exercises develop critical engagement with texts, with an emphasis on thesis, organization and grammar. This optional course prepares students to take English 110.

ENGLISH 100B Basic Speaking and Listening For Non-Native Speakers

The study and practice of speaking and listening for survival-level social functions in English. Frequent exercises focus on the production of isolated words and phrases in areas of need, and on the development of survival level oral/aural skills for beginning ESL students. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer.

ENGLISH 100B Basic Speaking and Listening For Non-Native Speakers

The study and practice of speaking and listening for survival-level social functions in English. Frequent exercises focus on the production of isolated words and phrases in areas of need, and on the development of survival level oral/aural skills for beginning ESL students. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer.

ENGLISH 100C Basic Reading for Non-Native Speakers

The study and practice of survival-level reading English vocabulary in context. Frequent exercises focus on basic reading comprehension related to familiar topics and situations, and the introduction of dictionary skills. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer.

ENGLISH 100C Basic Reading for Non-Native Speakers

The study and practice of survival-level reading English vocabulary in context. Frequent exercises focus on basic reading comprehension related to familiar topics and situations, and the introduction of dictionary skills. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer.

ENGLISH 100D Basic Writing For Non-Native Speakers

The study and practice of survival level writing skills including spelling, capitalization and some punctuation. Introduction of basic sentence structures and completion of simple standard forms of written English. Frequent exercises focus on survival level writing such as words and basic phrases in the present tense. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer.

ENGLISH 100D Basic Writing For Non-Native Speakers

The study and practice of survival level writing skills including spelling, capitalization and some punctuation. Introduction of basic sentence structures and completion of simple standard forms of written English. Frequent exercises focus on survival level writing such as words and basic phrases in the present tense. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer.

ENGLISH 100G Basic Grammar For Non-Native Speakers

The study and practice of survival level sentence structures and words. Frequent exercises focus on basic level sentences,

questions, directions, and descriptions in the present tense that relate to students' immediate surroundings and some life skills areas. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisite: Applied Language Institute approval. Offered: Fall/Winter/Summer

ENGLISH 100G Basic Grammar For Non-Native Speakers

The study and practice of survival level sentence structures and words. Frequent exercises focus on basic level sentences, questions, directions, and descriptions in the present tense that relate to students' immediate surroundings and some life skills areas. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisite: Applied Language Institute approval. Offered: Fall/Winter/Summer

ENGLISH 100S Special Topics In English As A Second Language

A course designed to address the specific needs of an individual student or group of students studying English as a Second Language. In addition to targeting English skills, the course may address topics or skills which are not covered in the standard Academic English curriculum of the Applied Language Institute. This course will accommodate individual students or groups of students studying at the Institute for periods of time other than the standard semester length. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisite: ALI Approval Offered: Fall/Winter/Summer

ENGLISH 100T TOEFL Preparation

This course will prepare students to take the TOEFL (Test of English as a Foreign Language), in either the Paper(PBT) or Computer-based (CBT) form, and/or to improve their scores from previous attempts. Exercises focus on developing the skills and strategies necessary for navigating TOEFL questions while continuing to develop the general English language skills that support success on the TOEFL. The course will provide students with a personal awareness of strengths and weaknesses so they may focus their test preparation work in and outside of class. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisite: Applied Language Institute approval Offered: Every semester

ENGLISH 100T TOEFL Preparation

This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisite: Applied Language Institute approval Offered: Every semester

ENGLISH 101B Academic Speaking & Listening For Non-Native Speakers I

The study and practice of speaking and listening for basic social functions in English. Exercises include the practice of basic descriptions and the development of oral/aural skills for beginning ESL students. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 101B Academic Speaking & Listening For Non-Native Speakers I

The study and practice of speaking and listening for basic social functions in English. Exercises include the practice of basic descriptions and the development of oral/aural skills for beginning ESL students. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 101C Academic Reading & Vocabulary For Non-Native Speakers I

The study and practice of reading with basic English vocabulary in context. Exercises focus on reading comprehension, identifying the topics of short readings, and the introduction of basic dictionary skills. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 101C Academic Reading & Vocabulary For Non-Native Speakers I

The study and practice of reading with basic English vocabulary in context. Exercises focus on reading comprehension, identifying the topics of short readings, and the introduction of basic dictionary skills. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 101D Academic Writing For Non-Native Speakers I

The study and practice of basic writing skills including handwriting, spelling, capitalization and punctuation. Frequent short exercises emphasize basic sentence structure, biographical description, and completion of standard forms. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval Offered:

Fall/Winter/Summer Letter grade assigned.

ENGLISH 101D Academic Writing For Non-Native Speakers I

The study and practice of basic writing skills including handwriting, spelling, capitalization and punctuation. Frequent short exercises emphasize basic sentence structure, biographical description, and completion of standard forms. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 101G Academic Grammar For Non-Native Speakers I

The study and practical application of basic sentence structure and word parts. Frequent exercises emphasize use and understanding of simple sentences, questions, directions, and descriptions in the present and past tenses. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute Approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 101G Academic Grammar For Non-Native Speakers I

The study and practical application of basic sentence structure and word parts. Frequent exercises emphasize use and understanding of simple sentences, questions, directions, and descriptions in the present and past tenses. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute Approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 102B Academic Speaking & Listening For Non-Native Speakers II

The study and practice of speech in environments such as the classroom, work, and simple social occasions. Exercises focus on student's ability to distinguish sounds and to produce them correctly in the context of a sentence and to listen for specific information. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 102B Academic Speaking & Listening For Non-Native Speakers II

The study and practice of speech in environments such as the classroom, work, and simple social occasions. Exercises focus on student's ability to distinguish sounds and to produce them correctly in the context of a sentence and to listen for specific information. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 102C Academic Reading & Vocabulary For Non-Native Speakers II

The study and practice of reading narrative and expository texts and standard forms. Exercises focus on the development of vocabulary and introduction of reading techniques such as identification of topics and main ideas, skimming, scanning, prediction, and inference. This course carries no credit toward graduation in the College of Arts and Science. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 102C Academic Reading & Vocabulary For Non-Native Speakers II

The study and practice of reading narrative and expository texts and standard forms. Exercises focus on the development of vocabulary and introduction of reading techniques such as identification of topics and main ideas, skimming, scanning, prediction, and inference. This course carries no credit toward graduation in the College of Arts and Science. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 102D Academic Writing For Non-Native Speakers II

The study and practice of techniques for writing short paragraphs in English. Frequent exercises emphasize various forms of paragraph organization and the improvement of punctuation and mechanical skills in writing. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 102D Academic Writing For Non-Native Speakers II

The study and practice of techniques for writing short paragraphs in English. Frequent exercises emphasize various forms of paragraph organization and the improvement of punctuation and mechanical skills in writing. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 102G Academic Grammar For Non-Native Speakers II

The study and practical application of basic sentence structures, including future and irregular past tense constructions. Frequent exercises emphasize use and understanding of comparatives, questions, and compound nouns and verbs. This course carried no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer

ENGLISH 102G Academic Grammar For Non-Native Speakers II

The study and practical application of basic sentence structures, including future and irregular past tense constructions. Frequent exercises emphasize use and understanding of comparatives, questions, and compound nouns and verbs. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer

ENGLISH 103B Academic Speaking & Listening For Non-Native Speakers III

The study and practice of listening for and producing speech in the past, present and future tenses. Exercises introduce note-taking techniques and focus on the ability to hear and express abstract ideas. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 103B Academic Speaking & Listening For Non-Native Speakers III

The study and practice of listening for and producing speech in the past, present and future tenses. Exercises introduce note-taking techniques and focus on the ability to hear and express abstract ideas. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 103C Academic Reading & Vocabulary For Non-Native Speakers III

The study and practice of longer reading passages of various rhetorical styles. Exercises focus on improvement of reading speed and the development of vocabulary and comprehension through complex inferences. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 103C Academic Reading & Vocabulary For Non-Native Speakers III

The study and practice of longer reading passages of various rhetorical styles. Exercises focus on improvement of reading speed and the development of vocabulary and comprehension through complex inferences. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 103D Academic Writing For Non-Native Speakers III

The study and practice of writing multi-paragraph academic essays. Frequent exercises emphasize point-of-view, process writing, and a variety of rhetorical styles. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 103D Academic Writing For Non-Native Speakers III

The study and practice of writing multi-paragraph academic essays. Frequent exercises emphasize point-of-view, process writing, and a variety of rhetorical styles. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 103G Academic Grammar For Non-Native Speakers III

The study and practical application of complex sentence structures, including perfect and perfect progressive tenses. Frequent exercises emphasize use and understanding of passive voice, gerunds and infinitives, articles, conditionals, and modals. The course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 103G Academic Grammar For Non-Native Speakers III

The study and practical application of complex sentence structures, including perfect and perfect progressive tenses. Frequent exercises emphasize use and understanding of passive voice, gerunds and infinitives, articles, conditionals, and modals. The course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 104B Academic Speaking & Listening For Non-Native Speakers IV

The study and practice of standard English, particularly in the college classroom. Exercises include training in academic lecture comprehension and note-taking as well as formal (classroom presentation) and informal (conversation) English speaking. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Lang. Inst. approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 104B Academic Speaking & Listening For Non-Native Speakers IV

The study and practice of standard English, particularly in the college classroom. Exercises include training in academic lecture comprehension and note-taking as well as formal (classroom presentation) and informal (conversation) English speaking. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Lang. Inst. approval.

Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 104C Advanced Academic English Reading For Non-Native Speakers IV

This course focuses on preparing students to deal effectively with sophisticated academic reading materials by guiding them in the development of a conscious and reflective approach toward reading. It emphasizes advanced reading skills of interpretation, inference, critical analysis, evaluation and application. There will be frequent exercises addressing the acquisition and practice of study skills and collaborative academic work. Prerequisites: Completion of ENGLISH 103C with a grade of B or better or Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 104C Advanced Academic English Reading For Non-Native Speakers IV

This course focuses on preparing students to deal effectively with sophisticated academic reading materials by guiding them in the development of a conscious and reflective approach toward reading. It emphasizes advanced reading skills of interpretation, inference, critical analysis, evaluation and application. There will be frequent exercises addressing the acquisition and practice of study skills and collaborative academic work. Prerequisites: Completion of ENGLISH 103C with a grade of B or better or Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 104D Academic Writing For Non-Native Speakers IV

The study and practice of rhetorical principles in standard English prose. Frequent writing exercises emphasize critical thinking and research skills as well as fluency and accuracy in academic writing. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Lang. Inst. approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 104D Academic Writing For Non-Native Speakers IV

The study and practice of rhetorical principles in standard English prose. Frequent writing exercises emphasize critical thinking and research skills as well as fluency and accuracy in academic writing. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Lang. Inst. approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 104G Advanced Academic English Grammar For Non-Native Speakers IV

This course focuses on the analytical understanding and application of English grammar. Students will be expected to observe usage patterns of the English language in a combination of both normative and prescriptive grammars appropriate for academic English application. There will be frequent exercises emphasizing mastery of complex grammar structures including all verb tenses, dependent clauses, modals, and unreal conditionals, and of the relationship between ideas and the construction of sentences in academic discourse. Prerequisites: Completion of ENGLISH 103G with a grade of B or better or Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 104G Advanced Academic English Grammar For Non-Native Speakers IV

This course focuses on the analytical understanding and application of English grammar. Students will be expected to observe usage patterns of the English language in a combination of both normative and prescriptive grammars appropriate for academic English application. There will be frequent exercises emphasizing mastery of complex grammar structures including all verb tenses, dependent clauses, modals, and unreal conditionals, and of the relationship between ideas and the construction of sentences in academic discourse. Prerequisites: Completion of ENGLISH 103G with a grade of B or better or Applied Language Institute approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 105A Advanced Academic English (Multiskills) For Non-Native Speakers V

The comprehensive study and practice of standard English skills for advanced students of English as a second language. level readings focusing on current issues serve as the basis for frequent writing exercises and for classroom discussions and presentations. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Inst. approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 105A Advanced Academic English (Multiskills) For Non-Native Speakers V

The comprehensive study and practice of standard English skills for advanced students of English as a second language. level readings focusing on current issues serve as the basis for frequent writing exercises and for classroom discussions and presentations. This course carries no credit toward graduation in the College of Arts and Sciences. Prerequisites: Applied Language Inst. approval. Offered: Fall/Winter/Summer Letter grade assigned.

ENGLISH 105B Advance Speaking and Listening Topics for Non-Native Speakers

This course focuses on developing high-level fluency in English listening and speaking through critical awareness of social language use. Students will work toward greater speaking and listening fluency and adaptability through the practice of skills involving purpose, audience, speech norms and context. Prerequisite: Applied Language Institute approval. Offered: Fall/Winter/Summer

ENGLISH 105C Advanced Reading Topics for Non-Native Speakers

In this course, advanced ESL readers will develop the core critical reading skills required for success in academics by examining

and applying those skills in the context of authentic college-level readings representing a wide variety of genres and modes. Readings will include extensive college textbook passages, newspaper articles, opinion sections, academic essays and interpretive reading of literature. Prerequisite: Applied Language Institute Approval. Offered: Fall/Winter/Summer.

ENGLISH 105D Advanced Writing Topics for Non-Native Speakers

This course engages advanced ESL and EFL writers to develop greater dexterity of expression in composition. In addition to reinforcing core rhetorical skills, grammar and writing mechanics, students will explore new rhetorical styles such as personal responses, autobiographical essays, and writing about literature. Extensive reading complements the writing discussion and practice with pieces including personal and academic essays, narrative, magazine journalism and fiction. Prerequisite: Applied Language Institute approval. Offered: Fall/Winter/Summer.

ENGLISH 105G Advanced Grammar Topics for Non-Native Speakers

In this course, students will pursue an in-depth comprehension of English grammar, with a strong focus on increasing fluency in the English language through a critical analysis of connotation and pragmatics and their role in language fluency. Contextual readings, film and native conversation passages will complement the grammar discussions and practice, engaging students to move beyond a literal understanding based on syntax and semantics to a more contextual awareness of English form and function. Prerequisite: Applied Language Institute approval. Offered: Fall/Winter/Summer.

ENGLISH 110 English I: Introduction To Academic Prose

This course introduces students to college-level reading, writing, and discourse analysis: it engages students in the analysis and creation of texts that reveal multiple perspectives about specific rhetorical situations and cultural issues. In addition to learning how to revise by analyzing their own writing, students will learn to edit their own work and use proper academic documentation. Offered: Every Semester

ENGLISH 110 English I: Introduction To Academic Prose

This course introduces students to college-level reading, writing, and discourse analysis: it engages students in the analysis and creation of texts that reveal multiple perspectives about specific rhetorical situations and cultural issues. In addition to learning how to revise by analyzing their own writing, students will learn to edit their own work and use proper academic documentation. Offered: Every Semester

ENGLISH 110A Freshman English I For Non-Native Speakers

The study and practice of analytical and critical reading. The study of basic rhetorical principles and the practice of those principles in frequent short papers; close reading of prose. Prerequisites: Applied Language Institute approval. Offered: Fall/Winter/Summer.

ENGLISH 200 Introduction To Undergraduate Study In English

An investigation of reading, writing, and research practices associated with studies in English. Students will learn about multiple forms, genres, and critical approaches, as well as encounter texts from various historical periods and places. Required of all English majors before enrolling in 400-level English courses.

ENGLISH 204 Writing About Literature

This course is designed to be taken either prior to or concurrent with a student's first literature course. It introduces students to literary criticism in its broadest, most generic sense, as a stylized response to reading. Students in the course will be introduced to different approaches to writing about literature, to methods of generating ideas, and focusing and developing a topic. Prerequisite: ENGLISH 110 or its equivalent.

ENGLISH 205 Popular Literature

The course focuses on writing in English by a range of popular authors from a variety of periods and places, historic and contemporary. The course may include popular stories, songs and ballads, the scripts of blockbuster plays and films, best-selling novels, and widely distributed nonfictional prose.

ENGLISH 207 World Literature in English

This course introduces students to World Literature using texts originally written in English and translated into English from other languages. Course texts include a variety of genres and engage students with a wide range of global experiences and cultures outside the Western tradition.

ENGLISH 213 Introduction To Drama

Beginning with an intensive study of a few plays analyzed to elicit general principles, the course moves on to consider several representative examples of each of the major periods and types of Western drama, from the Greeks to the present. The two-hour version of this course will be offered only off-campus.

ENGLISH 214 Introduction To Fiction

Emphasis in this course is on critical reading of short stories and the novel selected from all periods of English, American, and European literatures. The course will introduce the systematic study of fiction as a literary genre and will equip students for more advanced work in literature or creative writing. Writing assignments are designed to aid in the understanding of the structure and content of the material covered. Every semester

ENGLISH 215 Introduction To Poetry

An introduction to the study of poetry for students desiring a basic course either to develop a greater appreciation of poetry or to prepare for more advanced courses in literature or creative writing. Class discussions will focus on close readings of poems and analysis of poetic techniques. Writing assignments will complement reading and class discussion and will enable students to develop their own critical and creative skills.

ENGLISH 215 Introduction To Poetry

An introduction to the study of poetry for students desiring a basic course either to develop a greater appreciation of poetry or to prepare for more advanced courses in literature or creative writing. Class discussions will focus on close readings of poems and analysis of poetic techniques. Writing assignments will complement reading and class discussion and will enable students to develop their own critical and creative skills.

ENGLISH 225 English II: Intermediate Academic Prose

This course extends the work of English 110 with an additional emphasis on research. Each section of ENGLISH 225 uses a combination of book-length and shorter texts on focus on specific historical and/or cultural issues. As they learn to participate in scholarly conversations, students will find and evaluate library and internet sources. As with English 110, this course emphasizes revision, editing, and proper academic documentation. Satisfactory completion of ENGLISH 110 and sophomore standing are prerequisites for ENGLISH 225. Every semester. Note: ENGLISH 225 or its equivalent is a prerequisite for all 300- and 400-level English courses.

ENGLISH 225 English II: Intermediate Academic Prose

This course extends the work of English 110 with an additional emphasis on research. Each section of ENGLISH 225 uses a combination of book-length and shorter texts on focus on specific historical and/or cultural issues. As they learn to participate in scholarly conversations, students will find and evaluate library and internet sources. As with English 110, this course emphasizes revision, editing, and proper academic documentation. Satisfactory completion of ENGLISH 110 and sophomore standing are prerequisites for ENGLISH 225. Every semester. Note: ENGLISH 225 or its equivalent is a prerequisite for all 300- and 400-level English courses.

ENGLISH 225A English II For Non-Native Speakers

The study and practice of expository writing and analytical and critical reading geared to the needs of students for whom English is not the first language. The course emphasizes the development and integration of all areas of language comprehension and production. The writing focus is on kinds of organization, diction, style, etc. used in academic writing in the United States. Frequent research papers. Prerequisite: Satisfactory completion of ENGLISH 110 or ENGLISH 110A and sophomore standing. Applied Language Institute approval. Offered: Fall/Winter/Summer.

ENGLISH 241 Women And Literary Culture: Introduction

The course offers an introduction to women as producers and consumers of literature. Students will become acquainted with women writers, explore women's reading practices, and interrogate the issues that have surrounded women's participation in cultural arenas.

ENGLISH 245 Advanced English Pronunciation for Non-Native Speakers

This course will help students recognize, understand, and produce features of the American English sound system that result in comprehensible and meaningful communication. Course attendees will reconsider what they understand about the language, expand their awareness of what they hear and what they say, and explore how certain sounds in certain environments appear, disappear, combine, or modify to create predictable patterns in American English. Prerequisite: Applied Language Institute Approval. Offered: All Semesters.

ENGLISH 250 Introduction To Language Acquisition And Diversity

Investigation of the basic principles of first and second language acquisition. Topics addressed include language competency, socio-cultural factors in language, dialects, acquisitional principles, and language diversity. Students will take part in monitored classroom observations in public schools, and will critically analyze how the topics addressed in class apply to real life and to teaching situations. A service learning component is included.

ENGLISH 270 Writing Tutor Training Seminar

This course covers the basics of serving as a tutor for writers. Students acquire hands-on experience in consulting with writers at all stages of the writing process, including invention work, drafting, revising, documenting, and editing. Students will also

become conversant in theories of peer tutoring and research on Writing Centers. Prerequisites: Satisfactory completion of English 110 or instructor approval.

ENGLISH 299 Form And Structure Of Writing

This course is required for students who have twice failed the Written English Proficiency Test (WEPT) and is open only to students who have failed the test at least once. The class will cover the basic conventions of successful expository and academic writing. Emphasis will be placed on methods of development and on strategies for organization. This course satisfies neither the college humanities requirement nor the junior-level writing requirement. Completion of the course with a grade of C or better does fulfill the WEPT requirement for graduation, however, and renders students eligible to enroll in courses designated Writing Intensive (WI). Does not count toward graduation.

ENGLISH 300 Interdisciplinary Studies: Cluster Course Offerings

ENGLISH 300CB Cluster Course: Women In The Ancient World

This course focuses on the history, representation, literature, social lives, and political roles of women in ancient civilization including Egypt, Mesopotamia, the Biblical World, Greece, and Rome. It integrates methodologies from history, art history and archaeology, literary studies, and women's studies. Cross-listed with Classics 300CB.

ENGLISH 300CD Cluster Course: American Social Film: Silver Screen & American Dream

This course will combine American social history and film history in the sound era. Using Hollywood entertainment films, the course will look at Hollywood as an indicator of social, political and economic conditions in the United States since the 1930s. The main topics are representations of the American dream and nightmare, poverty and affluence, success and failure. This course is offered as a cluster with COMM-ST 402CD, HISTORY 400CP, and AMER-ST 300CD.

ENGLISH 300CE Cluster Course: Radical Changes Since 1945

This cluster will focus on modernism, post-modernism and expressionism in the visual arts and literature since World War II. Common lectures will address intellectual movements--such as existentialism and formalism--and cultural development--such as the increased impact of technology and mass media--in contemporary society. By focusing on these movements, the cluster course hopes to provide an integrated view of the literature and visual arts of the period and to draw upon analogous developments in contemporary architecture, music, philosophy and film.

ENGLISH 300CN Cluster Course: Terrorism, Civil War And Trauma

This interdisciplinary course examines the modern experience of terrorism and civil war in the light of art, film, history, literature, and philosophy. It explores a number of traumatic events, historic and contemporary, challenging us to think about such contemporary issues as violence and identity formation, civil rights and state-sponsored terrorism, pacifism and patriotism, resistance and collaboration, fundamentalism and fascism, neo-colonialism and anti-imperialism.

ENGLISH 300CQ Cluster Course: Race in American Film

This course examines representations of race and ethnicity in American film from the silent era onward in mainstream and countercultural traditions. It explores how social, political, and economic conditions contribute to constructions of race and ethnicity. This course is offered as a cluster course with Comm-St 405CD and History 300CF.

ENGLISH 300CR CC: Roman Revolution: History & Culture From The Gracchi To Augustus

The period of Roman history from the revolution initiated by the Gracchi to the demise of the Republic & the establishment of the Principate under Augustus will be studied. The course begins with the Scipionic Circle under whose leadership foreign imperialism, domestic factionalism, and the influx of Greek culture increased. Political, social and cultural developments which culminated in the violent death of the old system will be traced. We will also show how Augustus kept the past alive to make his new government acceptable to the tradition-loving Romans. Students will read the words of such writers as Terence, Cato, Polybius, Cicero, Caesar, Sallust, Catullus, Horace, Virgil, and Ovid, whose works cover the important genres of Roman literature--new comedy, rhetoric, satire, history, epic, pastoral, and lyric poetry.

ENGLISH 300CS Cluster Course: Clio And The Other Muses

This course focuses on the history, art, architecture, literature, and culture of Athens in the 5th Century BCE. Course readings will include primary literary and historical sources such as lyric poetry, comedy and tragedy, philosophy, and historical writings. Cross-listed with Classics 300CS.

ENGLISH 300CW Critical Issues in Women's & Gender Studies

This class is an interdisciplinary upper-level course that will examine critical issues in women's and gender studies by focusing on the intersections of gender, race, class, sexuality, and social context. Through their study of these intersections, students will be more sensitive to the impact of social structures on gender and the experiences of women and men. This course may be cross-

listed with CC SOC 300CW.

ENGLISH 300CW Critical Issues in Women's & Gender Studies

This class is an interdisciplinary upper-level course that will examine critical issues in women's and gender studies by focusing on the intersections of gender, race, class, sexuality, and social context. Through their study of these intersections, students will be more sensitive to the impact of social structures on gender and the experiences of women and men. This course may be cross-listed with CC SOC 300CW.

ENGLISH 300CY Cluster Course: Ancient World/Cinema

This course will explore the tradition of depicting the ancient mediterranean world film from the early silent era to the present. Topics to be covered include the ways that filmmakers respond to literary and historical sources from the ancient world, interact with the artistic tradition of films about the ancient world, the relation of these films to other works by the same creative personnel (directors, actors, writers, producers, etc.), and the political and cultural contexts in which the films were released. This course is cross-listed with HISTORY 400CY.

ENGLISH 300F SS:Academic English/International Grad Teaching Assistants

The study and practice of standard spoken English combined with the study and practice of classroom teaching techniques. Exercises focusing on improvement of pronunciation, and formal (classroom presentation) and informal (conversation) English speaking are combined with techniques for lecture organization, strategies for clear content presentation, and with analysis of the American post-secondary educational culture. This course is designed for prospective International Graduate Teaching Assistants who need to improve their English communication skills and obtain an understanding of American educational culture. Prerequisite: ALI approval

ENGLISH 301WI Writing And The Academy

This course examines social and ethical issues raised by academic reading and writing. While some attention is paid to the formal aspects of academic prose within specific disciplines, the main emphasis of the course is on the cultural consequences of the different ways that academic knowledge is created and taught. In addition to studying the language and structure of academic reading and writing, the course explores the various rhetorics of the academy in terms of a broad range of subjects including economics, gender, education, history, and myth. This course satisfies the junior-level writing requirement and counts towards the writing minor. Prerequisites: ENGLISH 110, ENGLISH 225 and successful completion of the WEPT. Offered every semester.

ENGLISH 301WI Writing And The Academy

This course examines social and ethical issues raised by academic reading and writing. While some attention is paid to the formal aspects of academic prose within specific disciplines, the main emphasis of the course is on the cultural consequences of the different ways that academic knowledge is created and taught. In addition to studying the language and structure of academic reading and writing, the course explores the various rhetorics of the academy in terms of a broad range of subjects including economics, gender, education, history, and myth. This course satisfies the junior-level writing requirement and counts towards the writing minor. Prerequisites: ENGLISH 110, ENGLISH 225 and successful completion of the WEPT. Offered every semester.

ENGLISH 303WI Introduction To Journalism

Introduction to the styles and techniques of reporting and writing basic news through assignments in straight news, features and in-depth stories. Exposure to the history and principles of American journalism. Practical application in writing news and news feature articles. Also offered as COMM-ST 303WI.

ENGLISH 304WI Writing And Technology

This course takes a student-centered approach to writing about and with technology. The course examines the reciprocity of culture and technology in intersecting local and global contexts. Course materials will vary depending on the instructor, but all sections will use genres of technical writing to explore the relationships between specific institutional and professional environments and such broader issues as economics, gender, history, myth, and nature. Prerequisites: ENGLISH 110, ENGLISH 225 and pass on WEPT. Offered: Every semester.

ENGLISH 304WI Writing And Technology

This course takes a student-centered approach to writing about and with technology. The course examines the reciprocity of culture and technology in intersecting local and global contexts. Course materials will vary depending on the instructor, but all sections will use genres of technical writing to explore the relationships between specific institutional and professional environments and such broader issues as economics, gender, history, myth, and nature. Prerequisites: ENGLISH 110, ENGLISH 225 and pass on WEPT. Offered: Every semester.

ENGLISH 305WI Theory And Practice Of Composition

A course in expository writing that will include reading on composition theory and the nature of literacy. Frequent short essays

and a long paper. Prerequisites: ENGLISH 110, ENGLISH 225, and successful completion of the WEPT.

ENGLISH 306WI Advanced Composition

(Formerly English 202). Further study of writing for those who wish to continue the study beyond the two semesters of composition. Emphasis will be placed on translating critical thinking into effective writing. (NOTE: Students may not receive credit for more than one of the following: 305, 306, 403). Required of business and public administration majors. Prerequisites: English 110, 225, and successful completion of the WEPT. Offered: Every semester.

ENGLISH 307WI Language, Literacy, Power

This course uses discourse analysis to investigate language and literacy. Students will explore how the discourses of institutional and cultural identities act as instruments of power and legitimacy. Prerequisites: English 110 and English 225 or equivalent and successful completion of the WEPT.

ENGLISH 308 Rhetorics of New Media

This course will focus on the rhetorical study of new media texts (such as hypertext, networked multimedia, multimedia art and performance, virtual spaces, and so on) and theories of new media. The course will consider the rhetorical possibilities and constraints of new media and critically examine their impact on democratic discourse and literacy in the public sphere. Specialized knowledge of multimedia equipment and software is neither expected nor required. Prerequisites Eng. 110 & 225, or equivalent.

ENGLISH 309WI Rhetorics of Public Memory

This course explores how museums and other cultural institutions function as rhetorical agents in creating and preserving public memory. Students will explore how processes of collection, arrangement, and visual display operate as modes of persuasion and make arguments about civic identities and community values. Prerequisites: Completion of the WEPT exam.

ENGLISH 310 Introduction To Linguistics/Language Science

This course is a comprehensive introduction to the theory, methodology, and applications of the science of language. It examines properties of human language, covers all branches of language science, and provides a foundation for a critical understanding of language issues. Required for ENGLISH 470; recommended for ENGLISH 320 and ENGLISH 330.

ENGLISH 310 Introduction To Linguistics/Language Science

This course is a comprehensive introduction to the theory, methodology, and applications of the science of language. It examines properties of human language, covers all branches of language science, and provides a foundation for a critical understanding of language issues. Required for ENGLISH 470; recommended for ENGLISH 320 and ENGLISH 330.

ENGLISH 311 American Literature I

A survey of American literature and culture from its beginnings to 1865. This course will cover a range of authors, several genres, and culture forms, which may include fiction, poetry, drama, autobiography, oral, contact and/or slave narratives, folklore, and songs.

ENGLISH 312 Creative Writing I Fiction

A course centered on the short story. Emphasis is placed on three areas: general principles governing the writing of fiction; practice in short fiction (primarily the short story, but including the novella); criticism; and technical skills (including editing and rewriting). Prerequisite: Concurrent enrollment in or completion of ENGLISH 213 or ENGLISH 214 or instructor's permission.

ENGLISH 313WI Reporting

A seminar of practical application in advanced reporting. Assignments to cover news events and to pursue in-depth news reports on the campus and off. Work is turned in on deadline and critiqued by the instructor. Prerequisites: ENGLISH 110, ENGLISH 225, and successful completion of the WEPT.

ENGLISH 315 Creative Writing Poetry

Writing and rewriting poems, with discussion of techniques needed to produce desired effects. Analysis and evaluation of student work. Examination of technical means utilized in selected poems by accomplished poets. Offered: Winter. Prerequisites: Concurrent enrollment in or completion of ENGLISH 215 or instructor's permission.

ENGLISH 316WI Literary Nonfiction

Literary Nonfiction is a writing intensive course in the reading and writing of nonfiction prose as a literary art. We'll survey the historical development of literary nonfiction (especially the essay), sample contemporary authors of the genre, write critical commentary on works we read, and compose personal essays of our own. The course is not exclusively a literary seminar nor a creative writing workshop, but seeks to mix and make connections between these modes, in the tradition of the essay itself. Prerequisites are ENGLISH 110, ENGLISH 225, and completion of the WEPT.

ENGLISH 317 British Literature I

A survey of British Literature and culture from its beginnings to the 18th century, including works by Chaucer and Milton.

ENGLISH 318 Bible As Literature

A critical study of the major portions of the Old and New Testaments and the Apocrypha, with special attention to the development of literature from oral tradition, the literary genres, themes and archetypes represented in the collection, and the diction and style which have influenced later literature. Consideration also of the relation of Biblical literature to the historical, religious, and cultural milieu of the ancient Near East.

ENGLISH 319 Myth And Literature

A study of classical myth including readings from Homer to Ovid, analysis of selected myths in later literature, art and music, and a study of contemporary definitions and approaches to myth.

ENGLISH 320 Structure Of English

Not a remedial grammar course. Methods of linguistic inquiry and grammatical description. Study of traditional and modern schools of syntax, especially transformational grammar. Practice describing the structure of sentences. Application to the teaching of grammar in high schools.

ENGLISH 321 American Literature II

A survey of American literature and culture from 1865 to the present. This course will cover a range of authors, several genres, and culture forms, which may include fiction, poetry, drama, autobiography, essay, lyrics, and film.

ENGLISH 323 Shakespeare

An intensive critical study of William Shakespeare's writings in various contexts (historical, social, political, literary, contemporary, for example). Readings will encompass at least eight plays and will include at least one comedy, history, tragedy, and romance. Required of all English majors.

ENGLISH 324 Introduction To British Literature II

A survey of British literature and culture of the Romantic, Victorian, and Modernist periods, this course will cover several genres including at least one novel from each period. Required of all English majors. Offered every semester.

ENGLISH 325 Arthurian Legends

Focusing on writers such as Marie de France, Chretien de Troyes, Sir Thomas Malory, Alfred, Lord Tennyson, Sara Teasdale, Bernard Malamud, and Marion Zimmer Bradley, this course examines the legend of King Arthur and his Round Table as a recurring myth, repeatedly manifested in time through literature, art, history, music, and film. Prerequisite: None

ENGLISH 326 Modern And Contemporary Irish Literature

This course examines a range of texts written by Irish-born writers from the end of the nineteenth century on. While it is likely the course will include texts by the most famous Irish writers, such as Yeats, Joyce, Beckett, O'Brien, Heaney, and Friel, course materials will vary from semester to semester and may focus on a specific genre, historical period, or area of interest. Offered: On Demand

ENGLISH 327 British Literature II

A survey of British Literature and culture from the late 18th century to the present. This course will cover a range of authors and genres, including at least one novel.

ENGLISH 329 Film As Art

An application and formulation of critical approaches to the major artistic achievements of the important creators of this modern aesthetic form -- D.W. Griffith, Chaplin, Hitchcock, Bergman, Einstein, Kubrick.

ENGLISH 330 History Of The English Language

The study of English beginning with the Indo-European language family up to and including varieties of English spoken around the world today. Both outer history and the inner history of phonology, morphology, syntax, and lexicon will be addressed.

ENGLISH 331 African American Literature I

This course provides a survey of African American literature from its beginnings to the Harlem Renaissance of the 1920s and 1930s. Areas of interest will include abolitionist literature (especially Slave Narratives), turn-of-the-century literature and the Harlem Renaissance. This course will examine any or all of the following literary forms: fiction, poetry, drama, autobiography and essay. It will view African American literature in its historical and cultural contexts. Cross-listed with Black Studies 331.

ENGLISH 332WI African American Novel

This course will examine the African American Novel in the 19th and 20th centuries; the emphasis will be on the period from

the 1920s to the present. The novels will be examined in their historical and cultural contexts. Cross-Listed with Black Studies 332WI.

ENGLISH 333 African American Literature II

A survey of African American literature from the end of the Harlem Renaissance to the present, covering a range of authors, texts, and contexts. Cross-listed with Black Studies 333.

ENGLISH 336 Contemporary American Literature

An intensive study of American literature since World War II, concentrating on the profound literary changes following that war, as a new kind of poetry, fiction and drama emerges which chronicles the simultaneous dissolution of old values and the efforts to establish new ones. Writers such as Lowell, Roethke, Ginsberg, Ellison, Salinger, Bellow, Mailer, Baldwin, Flannery O'Connor, Pynchon, Katherine Anne Porter, Heller, Richard Wright, Tennessee Williams, Arthur Miller, and Edward Albee will be considered along with others, as American writing develops in our time.

ENGLISH 339 Introduction to Screenwriting

An introduction to the form and language of the motion picture screenplays. Students create a blueprint for a movie and examine visual storytelling in-depth, including basic dramatic structure, scene and sequence construction and dialogue. Students will master the industry screenplay format, adapt a short story for the screen, and learn to receive feedback in small groups. Prerequisites: Comm Studies 230 or 250, or permission of instructor. Crosslisted with COMM-ST 354: Intro to Screenwriting.

ENGLISH 340A Classical Literature In Translation

This course will focus on representative authors and works from the Greek and Roman Classical periods, such as Homer, Sophocles, Euripides, Aeschylus, Aristophanes, Plato, the Greek Lyrics, Virgil, Horace, Juvenal, Ovid and Plautus.

ENGLISH 342WI Women And Rhetoric

A study of the position of women within the traditions of western rhetoric. Students will examine the rhetorical practices of women as they pursue both public and private goals. Christine de Pizan, Sor Juana Ines de la Cruz, Hannah More, Maria Stewart, Frances Willard, Ida Wells-Barnett, Meridel Le Sueur, and Gloria Anzaldua are among the female rhetorians who may be studied in this course. Prerequisite: Successful completion of the WEPT. Offered: On Demand

ENGLISH 344WI Women & Literary Culture: Genre Focus

A study of women writers that focuses on genre, i.e., texts that share a common set of conventions. The course will explore the conventions associated with a particular genre in various historical periods and consider the ways in which gender and genre intersect in shaping texts and their interpretation. Prerequisite: Successful completion of the WEPT Offered: On Demand Restrictions: None

ENGLISH 345WI Women And Literary Culture: Historical Focus

A study of women's literary culture in a specific historical period either as broadly defined as Medieval or Renaissance or as narrowly defined as a decade or movement (e.g., 1960s, abolitionist movement). This course includes women writers across multiple boundaries (e.g., national, generic, racial, sexual, socio-economic). Content will change depending on the instructor. Prerequisite: Successful completion of the WEPT.

ENGLISH 350 The 18th Century Novel

A detailed examination of the development of the novel in the 18th century. The course emphasizes the evolution of the novel from such predecessors as rogue literature, the picaresque story and the romance, due to changing social realities. The novelists studied may include Austen, Behn, Fielding, Godwin, Haywood, Richardson, Smollett, and Sterne. Prerequisite: None Restrictions: None.

ENGLISH 351 Special Readings

Readings in a period, genre or theme to be selected by the instructor with attention to the needs of students who are interested in literary topics not covered in regular offerings. Proposals for a course in such readings require the approval of the department.

ENGLISH 351A Special Readings: Detective Fiction

ENGLISH 352P Critical Approaches To The Short Story

In this course the student will explore the short story as a literary genre. Stories will range from the early masters such as Chekov, Kafka, and Hawthorne through contemporary offerings from Lessing, Mishima, and Achebe. Several critical approaches will be presented including formalism, New Historicism, and race/class/gender criticism. Students will keep a reading journal covering all material read for the course, and will be assessed on the basis of this journal, a mid-term and a final examination. Prerequisites: None.

ENGLISH 354P Masterpieces Of Fiction

The goal of this independent study is to provide the student with time and space to read and respond to 7-9 critically acclaimed and classic novels. Students will be allowed to choose the novels they wish to read from a list of 50 that will be provided by the instructors. This course must be taken in conjunction with at least one of the other two courses in this block in order to ensure that the student has exposure to literary theory. Students will be assessed on the basis of their response journal, casual oral examination, and a critical essay. Prerequisites: None.

ENGLISH 355 The Novel Before 1900

Intensive attention to novels in English written before 1900, which may include comparative or analytical studies of genre; critical reception of novels; serialization, gender issues; authors and editors; and valuation. Offered: On demand.

ENGLISH 356 Studies in Poetry

An intensive study of poetry through the examination of a specific topic or the works of particular poets, for instance: Love, Seduction, and Betrayal; Form and Change; Death, Grief, and Consolation; Whitman, Dickinson, and the Soul; Sacred Poetry; Poetry and Metaphysics; The Long Poem; The Comic Poem; Sonnet, Sonnet Sequence and the Lyric; The Voyage; Nature, Self, and the Romantic Poet.

ENGLISH 360 The Modern Novel

A study of the 20th-century novel, American, British and Continental, with attention to the development of fiction during this century. This course deals with novelists principally active before 1930, such as Conrad, James Joyce, Kafka, Hemingway, Lawrence, Woolf, Mann, Fitzgerald, and others. Offered: Fall.

ENGLISH 365 Contemporary Novel

This course focuses on selected novelists since 1945 and is organized around particular literary themes, sub-genres, or contemporary issues.

ENGLISH 365WI Contemporary Novel

This course focuses on selected novelists since 1945 and is organized around particular literary themes, sub-genres, or contemporary issues. Prerequisite: Successful completion of the WEPT.

ENGLISH 375 Colonial Literature

An exploration of colonialism through the study of a variety of texts, which may include literary, historical, and theoretical texts. These texts should represent the formation and elaboration of discourses surrounding colonialism. Texts will be drawn from more than one genre and from the metropole as well as multiple colonial contexts. The course will consider several definitions of colonialism and related terms such as empire, imperialism, and nationalism. Prerequisite: None

ENGLISH 376 Ancient Concepts of the Hero

This course traces the ancient concept of the hero by reading selected ancient works by authors such as Homer, Thucydides, Livy, Plutarch, Caesar, Tacitus, and Sallust. Students will also examine the impact of the ancient concept of the hero on modern literature and art. Also listed as CLASSICS 376.

ENGLISH 378 Asian American Literature

This course examines literary and cultural texts produced by Asian Americans from the nineteenth century to the present. Texts will be drawn from a variety of genres and from several Asian American groups in order to examine how Asian American literature engages, challenges, revises, and reinvents American literary traditions. The course will identify and explore specific cultural and political issues that have shaped the writings, including transnationalism, immigration, racial identity, group identity, and community. Authors may include Carlos Bulosan, Maxine Hong Kingston, John Okada, Bienvenido Santos, and Hisaye Yamamoto.

ENGLISH 400CA Cluster Course: Images Of The Human Body In Renaissance

Focusing on Renaissance conceptions of the human body, this cluster treats the following topics as they are reflected in Renaissance literature, art, astrology, astronomy, biology, anatomy, medicine and politics: A) The dignity of the human body B) Microcosm and macrocosm C) The human body and the heavens D) Stranger manifestations: freaks and beasts E) The humors F) Disorders of the human body G) The body politic H) The human body as an object of study.

ENGLISH 400CB England King's And Shakespeare's: Literature, History, Film

The aim of this cluster course is to study the historical and dramatic personae of selected English kings: John, Richard II, Henry IV, Henry V, Henry VI, Richard III, and Henry VIII. In common sessions History and English will alternate lectures. The English focus will be on Shakespeare's two tetralogies and individual histories, discussing significant themes, characters and performance elements. Students will also be asked to familiarize themselves with the critical commentaries on these plays, especially recent theoretical studies about politics and gender construction. Film versions of the plays will be shown to demonstrate how directorial interpretation influences an audience's perception of these kings and their worlds. In addition to two exams and shorter

written exercises, students will be required to write an interdisciplinary essay. Graduate students will be expected to write longer, more extensively researched papers.

ENGLISH 400CF Cluster Course: Courts And Culture In The Middle Ages

This cluster course offers an interdisciplinary approach to the study of the Middle Ages, focusing on medieval cultures in Europe. Arranged around a series of themes, the cluster will read a variety of documentary and literary texts to investigate not only the "high culture" of the courts but also the interactions of people from various social backgrounds in Western Europe. Cross listed with FRN-LNG 400CF and HISTORY 400CF.

ENGLISH 400CF Cluster Course: Courts And Culture In The Middle Ages

This cluster course offers an interdisciplinary approach to the study of the Middle Ages, focusing on medieval cultures in Europe. Arranged around a series of themes, the cluster will read a variety of documentary and literary texts to investigate not only the "high culture" of the courts but also the interactions of people from various social backgrounds in Western Europe. Cross listed with FRN-LNG 400CF and HISTORY 400CF.

ENGLISH 400CQ Cluster Course: Sinai And Olympus: Two Views Of Man And God

An examination of the two distinct views of the universe and the place of man and God in it as reflected in the literature of the Hebrews and the Greeks. A comparison of the various types of creative expression such as philosophy, historical writing, drama, rhetoric, and law. Readings are in English.

ENGLISH 404 Old English

This course is a study of Old English, its grammar, its poetic style, and its literature, both poetry and prose.

ENGLISH 405 Magazine Editing

A course combining academic study of editorial management, publishing operations and language skills, with "hands on" experience in article evaluation, editing, magazine production, and legal matters such as copyright and libel. Class work concentrates on authentic and effective language use, with attention given to copy editing, grammar, typography, printing processes, financing and distribution for commercial and small-press publications.

ENGLISH 406CD CC: Film Adaptation

The class will explore the process of adapting both fiction and non-fiction literary works into motion pictures. Students will examine the original literary source, then the interim screenplay and finally the completed motion picture. Offered: On Demand.

ENGLISH 408 Harlem Renaissance

This course examines the period from 1920 to 1940, known as the Harlem Renaissance, a time of unprecedented literary and cultural creativity by Black artists. This course explores a variety of cultural productions, not only traditional forms of literature such as novels, short stories, plays and poetry, but also nonliterary objects of study such as painting, sculpture, and music.

ENGLISH 408 Harlem Renaissance

This course examines the period from 1920 to 1940, known as the Harlem Renaissance, a time of unprecedented literary and cultural creativity by Black artists. This course explores a variety of cultural productions, not only traditional forms of literature such as novels, short stories, plays and poetry, but also nonliterary objects of study such as painting, sculpture, and music.

ENGLISH 410 Black Women Writers

This course explores the writings of African American Women Writers. The course examines how these writers have interacted with and often revised stereotypical representations of African American womanhood typically found within canonical and African American male literatures. The course will examine literature (which might include fiction, poetry, autobiography, and drama) of the nineteenth and twentieth centuries; the majority of the works will be by modern and contemporary authors such as Nella Larsen, Zora Neale Hurston, Toni Morrison, and Terry McMillan. By placing the works in this sort of cultural and historical context, it will be possible to examine the unique tradition of African American women's writing as well as individual texts. Prerequisite: None.

ENGLISH 412 Chaucer

Readings from Chaucer's most important works, especially "The Canterbury Tales" and "Troilus and Criseyde" with emphasis on them as types of medieval genres and on the Middle English language. Prerequisite: ENGLISH 317 or permission of the instructor. This prerequisite applies only to undergraduate students.

ENGLISH 413 Renaissance Literature I

English literature from the time of Wyatt and Surrey to the beginning of the 17th century, including the works of Spenser, Marlowe, Sidney, Shakespeare and others. Prerequisite: English 317 or permission of the instructor. This prerequisite applies only to undergraduate students.

ENGLISH 414 Milton

A study of Milton's prose and poetry, with special attention to "Paradise Lost". Prerequisite: English 317 or permission of the instructor. This prerequisite applies only to undergraduate students. Offered: On demand.

ENGLISH 415 Restoration And Early 18th-Century British Literature

British literature from the late 17th century to the mid 18th century. Selected writers may include Addison and Steele, Behn, Congreve, Defoe, Dryden, Finch, Milton, Pope, Rochester, Swift, and Wortley Montagu. Prerequisites: ENGLISH 317 or permission of instructor. Offered: On demand

ENGLISH 416 The Romantic Period

An extensive study of selected writers (such as Austen, Barbauld, Byron, Coleridge, Hazlitt, Hemans, Keats, Gilpin, the Shelleys, Wollstonecraft, and Wordsworth) organized around literary themes and/or cultural issues important to the Romantic period. Prerequisite: ENGLISH 327 or permission of the instructor. This prerequisite applies only to undergraduate students.

ENGLISH 417 Modern Poetry

Study of works by modernist poets such as Hopkins, Yeats, Frost, Stevens, Williams, Moore, Pound, H.D., Eliot, Millay, Hughes. Offered: On demand.

ENGLISH 418 19th-Century American Literature

An intensive study of either selected major American writers in the 19th century or of 19th -century literary movements. Prerequisite: English 311 or permission of instructor. This prerequisite applies only to undergraduate students.

ENGLISH 418 19th-Century American Literature

An intensive study of either selected major American writers in the 19th century or of 19th -century literary movements. Prerequisite: English 311 or permission of instructor. This prerequisite applies only to undergraduate students.

ENGLISH 422 Medieval Literature

Western religious and secular verse and prose to the 15th century. Late Middle English works are read in the original; all other selections in translation. Prerequisite: ENGLISH 317 or permission of the instructor. This prerequisite applies only to undergraduate students. Offered: On demand.

ENGLISH 423 Renaissance Literature II

English literature from 1600 to the beginning of the Restoration, including the works of Donne, Jonson, Milton and other contemporaries. Prerequisite: ENGLISH 317 or permission of the instructor. This prerequisite applies only to undergraduate students. Offered: On demand.

ENGLISH 425 18th-Century British Literature II

British literature in its critical and historical context from 1750 to 1798. The writers studied may include Blake, Burney, Collins, Johnson, and Gray. Prerequisite: ENGLISH 317 or permission of the instructor. This prerequisite applies only to undergraduate students. Offered: On demand.

ENGLISH 426 The Victorian Period

An intensive study of selected writers (such as Arnold, Braddon, the Brontes, the Brownings, Dickens, Darwin, Eliot, Gaskell, Hardy, Ruskin, and the Rossettis) organized around literary themes and/or cultural issues important to the Victorian period. Prerequisite: ENGLISH 327 or permission of the instructor. This prerequisite applies only to undergraduate students.

ENGLISH 427 Contemporary Poetry

Study of works by contemporary poets (post World War II), such as Auden, Bishop, Hayden, Berryman, Rukeyser, Larkin, Rich, Plath, Heaney, Boland, Komunyakaa. Offered: On demand.

ENGLISH 428 20th-Century American Literature

An intensive study of either selected major American writers in the 20th century or of 20th-century literary movements. Prerequisites: ENGLISH 321 or permission of instructor. This prerequisite applies only to undergraduates.

ENGLISH 428 20th-Century American Literature

An intensive study of either selected major American writers in the 20th century or of 20th-century literary movements. Prerequisites: ENGLISH 321 or permission of instructor. This prerequisite applies only to undergraduates.

ENGLISH 429B Advanced Screenwriting

A course in advanced theory in narrative screenwriting, industry script analysis (called "coverage") and story editing. Students complete the first act of a feature screenplay and a detailed beat sheet for the whole film. In addition, students will write and revise a short-film screenplay to be produced in the advanced production class. Or they will write a television series bible with

episode springboards and a pilot episode. Cross-listed with COMM-S 454 Advanced Screenwriting. Prerequisites: ENG 339/COMM-S 354 Introduction to Screenwriting or permission of instructor.

ENGLISH 430WI Advanced Technical Writing

This course is designed for those who plan to do or teach professional, business, or technical writing. Beginning with a brief background in the history of technical writing, the course will deal with current theories and methods of teaching technical and professional writing, and will cover such areas as business usage; technical linguistic problems and theories; the language of contracts, specifications, and other binding documents; and computer-oriented problems. Prerequisite: Successful completion of the WEPT. Offered: Every Semester.

ENGLISH 431 18th-Century British Literature

British literature from the mid to late 18th century. Selected writers may include Blake, Burney, Collins, Equiano, Fielding, Gray, Johnson, Sheridan, and Wollstonecraft.

ENGLISH 432WI Advanced Creative Writing Prose

A course for advanced students of fiction writing. Open to students who have taken English 312 or its equivalent. The class will proceed through analysis of models, discussion of general principles, critique of student work. Students will simultaneously be encouraged to experiment and to refine the form and subjects best suited to their talents. Emphasis will remain on the short story, though there may be units in other forms--novella, film script, the non-fiction essay.

ENGLISH 433 Histories Of Writing, Reading, And Publishing

A study of selected topics concerning the material practices of writing, reading, and publishing within specific cultural and historical contexts. Issues examined may include authorship, education, information technologies, libraries, literacy, periodicals, popular literature, publishers, and communities of readers. Prerequisite: One appropriate introductory course at the 300 level. Offered: On Demand.

ENGLISH 434 Postcolonial Literature

An exploration of postcolonialism through the study of literary and theoretical texts created by or representing peoples whose historical experience has been decisively shaped by the experience or legacies of colonialism. Texts will be drawn from a variety of genres and from several countries. The course will consider several definitions of postcolonialism and related terms such as cosmopolitanism, hybridity, diaspora, and nationalism. Cross-listed with ENGLISH 5534. Offered: On demand.

ENGLISH 434 Postcolonial Literature

An exploration of postcolonialism through the study of literary and theoretical texts created by or representing peoples whose historical experience has been decisively shaped by the experience or legacies of colonialism. Texts will be drawn from a variety of genres and from several countries. The course will consider several definitions of postcolonialism and related terms such as cosmopolitanism, hybridity, diaspora, and nationalism. Cross-listed with ENGLISH 5534. Offered: On demand.

ENGLISH 435WI Advanced Creative Writing Poetry

An advanced poetry workshop that includes intensive reading of contemporary poetry and aims at each student creating a portfolio of publishable poems. The focus of the course will vary to address a variety of topics such as metaphor and closure; imitation and the line; form and voice. May be repeated once for credit. Prerequisite: For Undergraduates Restrictions: ENGLISH 315 or equivalent. Offered: On demand.

ENGLISH 436WI Poetic Forms

An advanced creative writing course that focuses on intensive study of and practice in metrics and traditional and nonce forms. May be repeated once for credit. Prerequisite: For Undergraduates ; Restrictions: ENGLISH 315 or equivalent. Offered: On demand.

ENGLISH 437WI Prose Forms

The making of a work of prose requires expertise with the structure of the chosen form, and an understanding of the relationship of form to content. This class teaches the techniques for planning and drafting major prose forms which could include the very-short story, the story, novella, novel, linked-story collection, episodic novel, essay novel, the play, the creative nonfiction book, and others. Students will learn how to create particular prose forms and how to use content as a guide to inventing new forms. We will examine some of the best examples of both traditional and newly invented forms by writers such as Anton Chekhov, Katherine Anne Porter, Tim O'Brien, and Sandra Cisneros. Prerequisite: ENGLISH 312. Offered: Each year.

ENGLISH 438 The ""New Letters"" Writing Conference

An intensive weekend conference for creative writers of varying genres and levels of experience, published and unpublished -- fiction, poetry, nonfiction, stage and screen. The conference includes creative and interdisciplinary sessions on writing and publishing, genre-specific workshops, socializing and networking opportunities, and private manuscript consultations. The course of study for two-and three-credit students includes selected reading and post-weekend tutorial time conducted by accomplished,

working writers. The conference may be repeated once for credit. Two- and three-credit students need the instructor's consent and must have taken a 300-level creative-writing course in the focus genre prior to enrolling. Prerequisites: 2- and 3- credit students must have previous coursework at the 300 level in Creative Writing in the focus genre.

ENGLISH 439 Shakespeare and Film

Grounded in the close analysis of texts, this course examines film adaptations of Shakespeare's plays across the range of dramatic genres (history plays, tragedy, comedy, and romance). This course is open to seniors and graduate student only. Graduate students will be responsible for supplemental critical readings. Prerequisite: Eng 323

ENGLISH 440 American Culture

Texts that offer perspectives on key historical themes of American culture. Texts may be grouped around any culturally significant principle (e.g. region, race, gender, class, ethnicity, religion) or theme (e.g. the mythology of the frontier, marriage and domesticity, the American Dream). The course may be taken twice for credit, provided substantive changes in topic. Prerequisites: ENGLISH 311 and ENGLISH 321 or permission of the instructor. These prerequisites apply only to undergraduate students. Offered: On demand.

ENGLISH 441 Girls And Print Culture

This course deals with girls' relationships to the continually evolving print culture. Students will examine various literary representations of girlhood by adult writers, explore texts directed at girls (e.g., conduct books, periodicals, textbooks), and study the writing and reading practices of girls themselves.

ENGLISH 442 Playwriting I

Theory and practice of writing for the theatre with emphasis on the basic techniques.

ENGLISH 443 Playwriting II

Theory and practice of writing for the theatre with emphasis on advanced techniques.

ENGLISH 445 History And Principles Of Rhetoric

A study of selected writings of ancient, and modern rhetoricians illustrating key issues in the development of Western discourse theory and practice. Issues examined include the relationships between rhetoric and knowledge, orality and literacy, and rhetoric and poetics. Attention will also be given to the implications of rhetorical theory for modern language instruction. Prerequisites: None. Offered: on demand.

ENGLISH 447 Introduction To Literary Criticism

An introduction to major schools or methods of literary criticism. The first third of the course is an historical overview of criticism from Aristotle to Northrop Frye. The remainder of the semester is devoted to a study of genetic, formalist, mimetic, affective, intertextual, and deconstructionist approaches. Prerequisite: junior or senior status and six hours of literature.

ENGLISH 448 External Internship

Students may complete an external internship involving writing and editing with a publishing company, trade magazine, literary or academic journal, other print or electronic media organization, or with advertising, public relations, or non-profit firms. Internships are granted on a competitive basis. Students will compile a portfolio of their work under the direction of the internship supervisor to be submitted for evaluation by their chosen faculty mentor. Students will work 5 hours per week per credit hour.

ENGLISH 449A Publication Practicum

This course provides practical experience with New Letters magazine, New Letters on the Air, and BkMk Press in business analysis/reporting, copy-editing, manuscript evaluation, promotion/grant development, library research, market research, and other skills. The practicum is limited to three students per semester, to be chosen on the basis of demonstrated writing and organizational skills. References are required. May be taken for no more than three credit hours over a maximum of two semesters. Permission of the instructors required. Prerequisite: None.

ENGLISH 449B Publication Practicum

This course covers the basics of producing an issue of an academic journal. Students acquire hands-on experience at all stages of production. In addition to production work on essays for the journal, each student prepares a manuscript of his/her own (e.g. critical essay, creative piece, review or review essay) for submission to an appropriate journal or other venue. Restrictions: Consent of the instructor.

ENGLISH 449B Publication Practicum

This course covers the basics of producing an issue of an academic journal. Students acquire hands-on experience at all stages of production. In addition to production work on essays for the journal, each student prepares a manuscript of his/her own (e.g. critical essay, creative piece, review or review essay) for submission to an appropriate journal or other venue. Restrictions:

Consent of the instructor.

ENGLISH 450 Special Readings

Intensive individual readings in a field, genre, or individual figure to be selected by a student or a group of students in consultation with an instructor willing to direct the project. Generally limited to graduating seniors who have completed the majority of the work for their major. Not open to students in their first semester at UMKC. May be repeated for credit. No more than six hours of independent study (exclusive of ENGLISH 499) may be used to fulfill the 33-hour requirement for the English major. Offered: Every semester. Arrangements must be made prior to registration.

ENGLISH 450A Special Readings

ENGLISH 450B Special Reading Science Fiction

ENGLISH 450F Special Readings African Literature

ENGLISH 450H Special Readings Black Drama

ENGLISH 450I Special Reading Short Story Cycles

ENGLISH 451 Shakespeare Comedies And Histories

A study of Shakespeare's major comedies and history plays with special emphasis on his dramatic works before 1600. Prerequisites: ENGLISH 317 and ENGLISH 323 or permission of the instructor. These prerequisites apply only to undergraduate students.

ENGLISH 452 Early English Drama

English religious and secular drama prior to Shakespeare. Mystery and morality plays are studied, with emphasis on their literary and social backgrounds. Close reading of such works as "Everyman," "The Wakefield Second Shepherd's Play," and "The Spanish Tragedy." Prerequisites; ENGLISH 317 and ENGLISH 323 or permission of the instructor. These prerequisites apply only to undergraduate students. On demand.

ENGLISH 453 Modern Drama, 1880-1945

A study of modern drama: Continental, British, and American, including history and development, critical theory, and literary evaluation. This course will focus on the earlier modern playwrights from Ibsen and Shaw, with special attention to naturalism. Offered: On demand.

ENGLISH 455 Studies In The Novel 1740-1900

An intensive study of no more than three major novelists of the eighteenth or nineteenth century. The content of the course will change, depending on the instructor. Prerequisite: The completion of six hours of literature or permission of the instructor.

ENGLISH 460 Special Offerings

The visiting professor who gives this course determines what its content shall be. All aspects of literature and linguistics are within its possible range. On demand.

ENGLISH 460 Special Offerings

The visiting professor who gives this course determines what its content shall be. All aspects of literature and linguistics are within its possible range. On demand.

ENGLISH 460A Special Offerings

ENGLISH 460PW Written Discourse: Speaking, Writing, Composing

Prerequisite: Successful completion of the WEPT (effective FS93).

ENGLISH 461 Shakespeare Tragedies And Romances

A study of Shakespeare's major tragedies and late romances with special emphasis on his dramatic literature after 1600. Prerequisites: ENGLISH 317 and ENGLISH 323 or permission of the instructor. These prerequisites apply only to undergraduate

students. Offered: On demand.

ENGLISH 462 Restoration And 18th-Century Drama

The drama after the restoration of the monarchy and the reopening of the theaters through the 18th century. Special emphasis is placed on the comedy of manners and the heroic drama in the Restoration and the sentimental comedy in the 18th century. Includes such playwrights as Dryden, Congreve, Etherege, Wycherley, Steele, Lillo, Cumberland, Sheridan, and Goldsmith. Prerequisite: English 317 or permission of the instructor. This prerequisite applies only to undergraduate students. On demand.

ENGLISH 463 Contemporary Drama II

A study of contemporary drama: Continental, British, and American, including history and development, critical theory and literary evaluation. This course will focus on the more recent writers, including the absurdist, with special attention to experimental drama. This course is a continuation of ENGLISH 453. Offered: On demand.

ENGLISH 465 Studies In The Modern Novel

An intensive study of no more than three major 20th-century novelists. The content of the course will change, depending on the instructor. Prerequisite: The completion of six hours of literature or permission of the instructor.

ENGLISH 470 Introduction To Descriptive Linguistics

General introduction to linguistics science. Linguistic analysis, structures and change. Language families. Historical reconstruction. Generative grammar. Prerequisite: English 310 or permission of instructor. The prerequisite only applies to undergraduate students. Offered: On demand.

ENGLISH 475 Creative Nonfiction

This course emphasizes the study and crafting of creative nonfiction. special attention is given to developing the writing techniques required to shape publishable narratives out of experience. Prerequisites: English 312, 315, 316WI or instructor permission.

ENGLISH 482 European Literature: 18Th Century

The 18th-century course will focus on a representative sampling from authors such as Corneille, Racine, Moliere, Voltaire, Prevost, La Bruyere, La Rochefoucauld, Montesquieu, Diderot, Rousseau, Schiller, Goethe, and Grimmelshausen. Prerequisite: 6 hours of literature or permission of the instructor.

ENGLISH 483 European Literature: 19Th Century

The 19th century course will focus on representative works from authors such as Stendhal, Balzac, Flaubert, Zola, Lermontov, Gogol, Tolstoy, Dostoyevsky, Kleist, Hoffman, Hugo, and Monzoni. Prerequisite: 6 hours of literature or permission of the instructor.

ENGLISH 498 Senior Seminar On Writing In The Secondary Classroom

This course is intended to help students move from discussions of education & composition theory to classroom research and practice. Students will examine their own language uses, study current composition pedagogy, and undertake action research projects in cooperation with teachers affiliated with the Greater Kansas City Writing Project. In a culminating study, students will compile their action research data and prepare classroom resources based on their findings. English 498 is designed for English Secondary Education majors. Other education majors may enroll with instructor's permission. This course is offered fall semester only and cannot be taken for graduate credit. Prerequisite: None Offered: Fall Semester Only

ENGLISH 499 Senior Tutorial

A comprehensive tutorial for students who have a faculty-approved research project. The project will culminate in a critical study of 20-25 pages or a creative writing portfolio of similar length. This course is appropriate for students who intend to continue their studies at the graduate level. Restrictions: Students must have permission of the instructor and of the Director of Undergraduate Studies before enrolling in this course.

ENGLISH 499 Senior Tutorial

A comprehensive tutorial for students who have a faculty-approved research project. The project will culminate in a critical study of 20-25 pages or a creative writing portfolio of similar length. This course is appropriate for students who intend to continue their studies at the graduate level. Restrictions: Students must have permission of the instructor and of the Director of Undergraduate Studies before enrolling in this course.

Environmental Science (ENV-SCI)

ENV-SCI 110L Understanding The Earth Laboratory

Laboratory and field demonstration and exercises in environmental science. Weekly exercises or field trips. This lab should

preferably be taken in the same semester as ENV-SCI 110R. Prerequisite: None Offered: Each semester

ENV-SCI 110L Understanding The Earth Laboratory

Laboratory and field demonstration and exercises in environmental science. Weekly exercises or field trips. This lab should preferably be taken in the same semester as ENV-SCI 110R. Prerequisite: None Offered: Each semester

ENV-SCI 110R Understanding The Earth

This introductory course surveys the processes that shape our planet. Topics include: plate tectonics and mountain-building, rivers and oceans, atmospheric circulation, weather and climate, and the amazingly complex relationships between life on earth and the physical environment. Prerequisite: None Offered: Each semester

ENV-SCI 110R Understanding The Earth

This introductory course surveys the processes that shape our planet. Topics include: plate tectonics and mountain-building, rivers and oceans, atmospheric circulation, weather and climate, and the amazingly complex relationships between life on earth and the physical environment. Prerequisite: None Offered: Each semester

ENV-SCI 210 Issues In Environmental Science

Explores important environmental issues such as air and water pollution, water supply, climate change, agriculture and food supply, environmental health, ecosystem disruption, environmental management, environmental ethics, and energy resources. Topics may vary depending on current events. Offered: Fall and Winter

ENV-SCI 210 Issues In Environmental Science

Explores important environmental issues such as air and water pollution, water supply, climate change, agriculture and food supply, environmental health, ecosystem disruption, environmental management, environmental ethics, and energy resources. Topics may vary depending on current events. Offered: Fall and Winter

ENV-SCI 220 Ecosystem Science for Decision Makers

This course addresses the fundamentals of ecosystem science with an emphasis on human-induced change in natural systems, Course content characterizes the biological patterns found in nature emphasizing application of underlying principles, Scientific tools are provided to evaluate ecosystem concerns and make informed decisions.

ENV-SCI 310 Field Experience In Waste Management

This course provides an overview of waste management issues, including nature, classification and disposal of various wastes; and U.S. laws governing the management of solid, hazardous, biologic and nuclear waste. Lectures and discussions will be supplemented by visits to waste management facilities to study methods and technologies used for treatment and disposal of wastewater, solid, hazardous, and biologic wastes. This field-intensive course includes travel to neighboring states and includes an overnight out-of-town stay. Final report required. Prerequisites: Jr/Sr of instructor's consent. Offered: Summer.

ENV-SCI 310 Field Experience In Waste Management

This course provides an overview of waste management issues, including nature, classification and disposal of various wastes; and U.S. laws governing the management of solid, hazardous, biologic and nuclear waste. Lectures and discussions will be supplemented by visits to waste management facilities to study methods and technologies used for treatment and disposal of wastewater, solid, hazardous, and biologic wastes. This field-intensive course includes travel to neighboring states and includes an overnight out-of-town stay. Final report required. Prerequisites: Jr/Sr of instructor's consent. Offered: Summer.

ENV-SCI 332CZ Environmental Sustainability

This course will introduce the concept of sustainability and review how sustainability might work at the individual, neighborhood, state, nation and global scales. Students will participate in some form of community engagement on sustainability as well as reflect upon how their own practices impact the environment.

ENV-SCI 332CZ Environmental Sustainability

This course will introduce the concept of sustainability and review how sustainability might work at the individual, neighborhood, state, nation and global scales. Students will participate in some form of community engagement on sustainability as well as reflect upon how their own practices impact the environment.

ENV-SCI 449 Global Water and Sustainability

This course examines the physical characteristics of water and its role in Earth systems. The challenges facing societies in an era of rapidly changing climate are explored. Cross-listed with Geography 446.

ENV-SCI 449 Global Water and Sustainability

This course examines the physical characteristics of water and its role in Earth systems. The challenges facing societies in an era

of rapidly changing climate are explored. Cross-listed with Geography 446.

ENV-SCI 496 Environmental Internship

Students obtain practical experience working for local engineering and environmental firms, or governmental agencies. Specific duties and application requirements will vary depending on the funding organization's needs. Junior or senior standing required for undergraduates. Applicant (s) must be accepted for the position prior to enrollment. Prerequisite: Permission of instructor
Offered: Summer, Fall or Winter as available.

ENV-SCI 496 Environmental Internship

Students obtain practical experience working for local engineering and environmental firms, or governmental agencies. Specific duties and application requirements will vary depending on the funding organization's needs. Junior or senior standing required for undergraduates. Applicant (s) must be accepted for the position prior to enrollment. Prerequisite: Permission of instructor
Offered: Summer, Fall or Winter as available.

Environmental Studies (ENV-STDY)

ENV-STDY 325 Cultural Perspectives on the Environment

This course explores the history of conservation practices in American agriculture from the 1700s through the present. Additionally, the course examines the past and present legal implications of environmental statutes for minority farmers from a social and environmental justice perspective. This course is also offered as Geography 325.

ENV-STDY 325 Cultural Perspectives on the Environment

This course explores the history of conservation practices in American agriculture from the 1700s through the present. Additionally, the course examines the past and present legal implications of environmental statutes for minority farmers from a social and environmental justice perspective. This course is also offered as Geography 325.

ENV-STDY 334 Gender and the Environment

This course provides a survey of different ways women relate to nature. The objectives of the course are: to understand historical relationships between women and nature in the western world, to understand different theoretical approaches to studying women and nature, to explore the geography of women's activism on behalf of the environment, and to understand how women's health is linked to the environment. Cross-listed with Geography 334

This course provides a survey of different ways women relate to nature. The objectives of the course are: to understand historical relationships between women and nature in the western world, to understand different theoretical approaches to studying women and nature, to explore the geography of women's activism on behalf of the environment, and to understand how women's health is linked to the environment. Cross-listed with Geography 334

ENV-STDY 345 Animals and Society

This course explores the wide variety of cultural and ecological interactions that exist between people and animals whether wild or domesticated, aquatic, terrestrial, or avian. Utilitarian and ethical perspectives are used to study current patterns of use and abuse in animal keeping. Cross-listed with Geography 345.

ENV-STDY 345 Animals and Society

This course explores the wide variety of cultural and ecological interactions that exist between people and animals whether wild or domesticated, aquatic, terrestrial, or avian. Utilitarian and ethical perspectives are used to study current patterns of use and abuse in animal keeping. Cross-listed with Geography 345.

ENV-STDY 412 Global Tourism

This course is a regional survey of world tourism. Topics include the uniqueness of place, the marketing of tourist destinations, and the cultural, economic, and environmental impacts on host societies. This course is cross-listed with Geography 412.
Prerequisites: Geog 105, or Geog 200, or Geog 202, or permission of instructor.

ENV-STDY 430 Soil And Groundwater Remediation

Review of basic geoenvironmental concepts. Nature, cause, and occurrence of contaminated soil and groundwater. Principles of remediation, discussion of cleanup goals and various remediation alternatives and technologies. Design a remediation system: Project planning, data requirements, cost considerations, and implementation. A class project is required. Prerequisites: GEOLOGY 335 / GEOG 335 or permission of instructor Offered: Winter

ENV-STDY 430 Soil And Groundwater Remediation

Review of basic geoenvironmental concepts. Nature, cause, and occurrence of contaminated soil and groundwater. Principles of remediation, discussion of cleanup goals and various remediation alternatives and technologies. Design a remediation system:

Project planning, data requirements, cost considerations, and implementation. A class project is required. Prerequisites: GEOLOGY 335 / GEOG 335 or permission of instructor Offered: Winter

ENV-STDY 450 Ecotoxicology

This course addresses the fundamentals of ecotoxicology, integrating the sciences of ecology and toxicology. Students will learn the biological basis for pollutant effects on individuals and populations of plants and animals, how pollutant intensity varies as a function of bioavailability, the basics of risk assessment, and how pollutant effects are modified by ecological interactions within communities and ecosystems. The ultimate goal of ecotoxicology is to predict the effects of pollution within an ecological context. This course will be offered every other spring semester. Prerequisites: Chem 211/212, Biol 108, or permission of instructor.

ENV-STDY 499WI Environmental Studies Practicum

Students conduct research, participate in discussions, and prepare written reports on selected topics concerning the environment. Prerequisites: Senior standing and successful completion of the WEPT exam. Offered: Winter.

ENV-STDY 499WI Environmental Studies Practicum

Students conduct research, participate in discussions, and prepare written reports on selected topics concerning the environment. Prerequisites: Senior standing and successful completion of the WEPT exam. Offered: Winter.

Foreign Language (FRN-LNG)

FRN-LNG 180 Special Elementary Foreign Languages Topics I

Instruction in foreign languages at the elementary level. Essentials of grammar, basic conversation and reading, practical vocabulary. May include introduction of new methods of foreign language teaching, special texts, and languages not offered through regular courses. As needed.

FRN-LNG 190 Special Elementary Foreign Languages Topics II

Continuation of Foreign Languages and Literature 180. Prerequisite: Elementary I college-level course or equivalent. As needed.

FRN-LNG 280 Special Intermediate Foreign Languages Topics I

Instruction in foreign languages at the second-year intermediate level. Further development of comprehension and communicative skills. Readings of moderate difficulty and grammar review. May include introduction of new methods of foreign language teaching, special texts and topics, and new languages not offered through regular courses. Prerequisite: Elementary I & II college courses or equivalent. As needed.

FRN-LNG 290 Special Intermediate Foreign Languages Topics II

Continuation of Foreign Languages and Literature 280. Prerequisite: Third semester college level-courses or equivalent. As needed.

FRN-LNG 300CM Cluster Course: Mexico, Central America And The Human Condition

Faculty from at least two different departments (one of which must be a department in the Division of Humanities including history) may determine the topic and syllabus, subject to the approval of the director of Integrated Studies and the departments involved. This special topics course will satisfy the interdisciplinary course requirement for the B.A.

FRN-LNG 300CS Cluster Course: History Of Russian Culture

Faculty from at least two different departments (one of which must be a department in the Division of Humanities including history) may determine the topic and syllabus, subject to the approval of the director of Integrated Studies and the program's advisory committee in addition to the approval of the departments involved. This special topics course will satisfy the interdisciplinary course requirement for the B.A. Fall/winter.

FRN-LNG 380 Special Topics

Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes. Prerequisite: Permission of instructor. On demand.

FRN-LNG 400CF Courts and Culture in the Middle Ages

This cluster course offers an interdisciplinary approach to the study of the Middle Ages, focusing on medieval cultures in Europe. Arranged around a series of themes, the cluster will read a variety of documentary and literary texts to investigate not only the "high culture" of the courts but also the interactions of people from various social backgrounds in Western Europe. May be taken for French major with permission of instructor. Cross listed with ENGLISH 400CF and HISTORY 400CF.

FRN-LNG 400CI Cc:Culture,Kultur,Civilisation:Identity Formation In the Middle Classes

This cluster course will explore the dynamics of bourgeois class formation in Western Europe in the "long" 19th century (1750-

1920) from historical, thematic, and theoretical perspectives. It will focus on how this class-based identity developed and functioned in the context of historical and cultural changes and how the bourgeoisie defined themselves vis a vis nobles, peasants, workers, ""primitives,"" and criminals. Class assignments will include historical, literary, theatrical, anthropological, and cinemagraphic sources.

FRN-LNG 400CM Nazi-Occupied Europe & The Holocaust

With the collaboration of many other nations, Nazi Germany attempted a genocidal war to systematically colonize, relocate and annihilate entire social groups, most notably the Jews. Employing an intentionally cosmopolitan perspective, this interdisciplinary cluster-course will explore how ordinary Europeans behaved in these circumstances and the different ways that scholars have attempted to comprehend, analyze and represent those choices.

FRN-LNG 401 Linguistics And Language Teaching

A survey of issues in linguistics with particular emphasis on areas and applications pertaining to the teaching of foreign languages. Contrastive analysis of the history and structure of Germanic and Romance languages. Examination of social, cultural and biological aspects of language. Prerequisite: Two years of a foreign language at college level and junior/senior standing.

FRN-LNG 402CC CC: Making the Modern in France: Dance, Art, Music, and Literature

This cluster course will take an interdisciplinary approach to understand the way modernism developed within the arts, with a focus on late-19th, early 20th-century France. Developments in literature, art, dance, and music and their interconnectedness to cultural and historical events will be highlighted and explored. Cross-listed with Art-History 402CC and Conservatory 402CC.

FRN-LNG 470A Internship in Foreign Languages

Intern experience under faculty supervision involving the use of the appropriate foreign language with a local firm, non-profit organization, etc. students will compile a portfolio of their work under the direction of the internship supervisor to be submitted for evaluation by their chosen faculty mentor. Prerequisites: at least 9 hours prior FLL coursework in the appropriate language, junior standing, prior consent and arrangement.

FRN-LNG 470B School/Education Related Internship in Foreign Languages

Intern experience under faculty supervision involving the use of the appropriate foreign language at a local school. Students will keep a journal in the foreign language. Prerequisites: at least 9 hours of prior FLL coursework in the appropriate language, prior consent and arrangement.

FRN-LNG 480 Special Topics

Each time this course is offered a particular genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes. Permission of the department chairman required. On demand.

FRN-LNG 480 Special Topics

Each time this course is offered a particular genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes. Permission of the department chairman required. On demand.

FRN-LNG 480A Special Topics

Each time this course is offered a particular genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes. Permission of the department chairman required. On demand.

FRN-LNG 480A Special Topics

Each time this course is offered a particular genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes. Permission of the department chairman required. On demand.

FRN-LNG 480B Special Topics

Each time this course is offered a particular genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes. Permission of the department chairman required. On demand.

FRN-LNG 494 Methods Of Teaching Foreign Languages

Teaching methods and materials for beginning and advanced classes in French, German, and Spanish. Modern language teaching methodology and material will be evaluated and demonstrated, together with effective use of the Language Resource Center, tapes, slides, film strips, and other audio-visual materials. Prerequisite: A 3.0 grade average in the foreign language to be considered for practice teaching. Does not count toward a major in foreign language. Offered in conjunction with the School of Education.

FRN-LNG 494 Methods Of Teaching Foreign Languages

Teaching methods and materials for beginning and advanced classes in French, German, and Spanish. Modern language teaching methodology and material will be evaluated and demonstrated, together with effective use of the Language Resource Center,

tapes, slides, film strips, and other audio-visual materials. Prerequisite: A 3.0 grade average in the foreign language to be considered for practice teaching. Does not count toward a major in foreign language. Offered in conjunction with the School of Education.

FRN-LNG H400CM (HONORS) Nazi-Occupied Europe & The Holocaust

With the collaboration of many other nations, Nazi Germany attempted a genocidal war to systematically colonize, relocate and annihilate entire social groups, most notably the Jews. Employing an intentionally cosmopolitan perspective, this interdisciplinary cluster-course will explore how ordinary Europeans behaved in these circumstances and the different ways that scholars have attempted to comprehend, analyze and represent those choices.

French (FRENCH)

FRENCH 110 Elementary French I

The goals of this course are an ability to speak and to understand simple (spoken) French as well as to read and write simple prose. Every semester.

FRENCH 110 Elementary French I

The goals of this course are an ability to speak and to understand simple (spoken) French as well as to read and write simple prose. Every semester.

FRENCH 120 Elementary French II

Continuation of FRENCH 110. Every semester. Prerequisite(s): FRENCH 110 or equivalent. Semester Offered: Every Semester.

FRENCH 211 Second Year French I

Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language. Prerequisite: FRENCH 120. Every semester.

FRENCH 211 Second Year French I

Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language. Prerequisite: FRENCH 120. Every semester.

FRENCH 221 Second Year French II

Continuation of FRENCH 211. Winter.

FRENCH 250 Commercial French

Business practices in correspondence in the French language; special vocabulary of business, trade, banking and administration. Refinement of grammatical and stylistic skills. Subjects treated include price inquiries, quotations, offers, orders, complaints, administrative, banking, and diplomatic correspondence. Prerequisite: FRENCH 221 or equivalent.

FRENCH 280 Special Intermediate French Topics I

Instruction of French on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit. Prerequisite: Elementary I and II college-level courses or equivalent. As needed.

FRENCH 290 Special Intermediate French Topics II

Continuation of FRENCH 280. May not be repeated for credit. As needed.

FRENCH 301 Introduction To French Literature

An introduction to the study of different genres of French literature and techniques of criticism. Readings include representative works of major authors from various periods. Strongly recommended for all majors, to be taken before or concurrently with other literature courses. Taught in French. Spring.

FRENCH 301 Introduction To French Literature

An introduction to the study of different genres of French literature and techniques of criticism. Readings include representative works of major authors from various periods. Strongly recommended for all majors, to be taken before or concurrently with other literature courses. Taught in French. Spring.

FRENCH 303 Masterpieces Of French Literature I

An introduction to the history of French literature from the Middle Ages to 1800 stressing the historical context, the major literary movements, and the development of the various genres. Selected readings of the works of the major authors of the period.

Taught in French.

FRENCH 303 Masterpieces Of French Literature I

An introduction to the history of French literature from the Middle Ages to 1800 stressing the historical context, the major literary movements, and the development of the various genres. Selected readings of the works of the major authors of the period. Taught in French.

FRENCH 304 Masterpieces Of French Literature II

An introduction to the history of French literature from 1800 to the present stressing historical context, the major literary movements and the developments of the various genres. Selected readings of the works of major authors of the period. Taught in French.

FRENCH 304 Masterpieces Of French Literature II

An introduction to the history of French literature from 1800 to the present stressing historical context, the major literary movements and the developments of the various genres. Selected readings of the works of major authors of the period. Taught in French.

FRENCH 315 Intermediate Conversation And Composition I

Grammar review: practice in speaking and writing French; emphasis on idiomatic usage and practical vocabulary. Required for major. Prerequisite: FRENCH 221 or equivalent. Every fall.

FRENCH 325 Intermediate Conversation And Composition II

Continuation of FRENCH 315. Required for major. Prerequisite: FRENCH 315. Every winter.

FRENCH 340WI French Texts In Translation

Seminar on French texts in translation. Class will be conducted in English and no knowledge of French is necessary. May be taken for major credit upon prior consultation with the instructor. Prerequisites: ENGLISH 110, ENGLISH 225, and WEPT

FRENCH 350 French Civilization I

An historical introduction to French civilization and culture with emphasis on historical, social and cultural development. Prerequisites: FRENCH 221 or equivalent.

FRENCH 351 Introduction To French Phonetics

Drill and practice in pronunciation in class and in language laboratory. Prerequisite: FRENCH 221 or equivalent or permission of instructor.

FRENCH 352 French Civilization II: Contemporary French Civilization

An in-depth survey of contemporary French culture, including major historical events and movements that have shaped modern France, as well as geography, the political system, family life and education, economics, etc. Prerequisites: FRENCH 221 or the equivalent.

FRENCH 354 French Civilization III: Lyon, Crossroads Of France And Europe

An introduction to French culture and civilization through the history, geography, culture and arts of Lyon and its region. Offered during the Study Abroad Program in Lyon. Offered: Summer semester.

FRENCH 380 Special Topics

Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes. Prerequisite: Permission of the instructor. On demand.

FRENCH 400CF Courts and Culture in the Middle Ages

This cluster course offers an interdisciplinary approach to the study of the Middle Ages, focusing on medieval cultures in Europe. Arranged around a series of themes, the cluster will read a variety of documentary and literary texts to investigate not only the "high culture" of the courts but also the interactions of people from various social backgrounds in Western Europe. May be taken for French major with permission of instructor. Cross listed with ENG. 400CF and HIST 400CF.

FRENCH 400CF Courts and Culture in the Middle Ages

This cluster course offers an interdisciplinary approach to the study of the Middle Ages, focusing on medieval cultures in Europe. Arranged around a series of themes, the cluster will read a variety of documentary and literary texts to investigate not only the "high culture" of the courts but also the interactions of people from various social backgrounds in Western Europe. May be taken for French major with permission of instructor. Cross listed with ENG. 400CF and HIST 400CF.

FRENCH 412 17Th Century French Literature

Selected readings in the literature of the 17th century, with an emphasis on non-dramatic works. Also offered as FRENCH 5512.

FRENCH 412 17Th Century French Literature

Selected readings in the literature of the 17th century, with an emphasis on non-dramatic works. Also offered as FRENCH 5512.

FRENCH 413 18Th-Century French Literature

Emphasis on philosophical and social significance. Authors may include Marivaux, Beaumarchais, Le Sage, L'Abbe Prevost, Montesquieu, Rousseau, Diderot. Also offered as FRENCH 5513.

FRENCH 413 18Th-Century French Literature

Emphasis on philosophical and social significance. Authors may include Marivaux, Beaumarchais, Le Sage, L'Abbe Prevost, Montesquieu, Rousseau, Diderot. Also offered as FRENCH 5513.

FRENCH 414 Medieval Literature

Selected readings in various genres including epic, romance, theater and lyric. Emphasis will be placed on the intertextual relations and the cultural and historical context surrounding text production in the Middle Ages. Also offered as FRENCH 5514.

FRENCH 414 Medieval Literature

Selected readings in various genres including epic, romance, theater and lyric. Emphasis will be placed on the intertextual relations and the cultural and historical context surrounding text production in the Middle Ages. Also offered as FRENCH 5514.

FRENCH 415 Advanced Conversation And Composition I

Practice in speaking and writing French, with attention to the elements of style. Continued in FRENCH 425. First semester required of all majors and second semester recommended. Both semesters required of prospective high school teachers. Either or both semesters may be repeated with the consent of the instructor and the French section head. No more than six hours credit may be applied towards a degree. Prerequisite: FRENCH 325. Offered: Fall.

FRENCH 417 16Th-Century French Literature

Selected readings in prose and poetry from Marot through Astree. Authors may include Rabelais, Ronsard, du Bellay, Montaigne, Marguerite de Navarre. Also offered as FRENCH 5517.

FRENCH 417 16Th-Century French Literature

Selected readings in prose and poetry from Marot through Astree. Authors may include Rabelais, Ronsard, du Bellay, Montaigne, Marguerite de Navarre. Also offered as FRENCH 5517.

FRENCH 425 Advanced Conversation And Composition II

Continuation of FRENCH 415. See FRENCH 415. Required for teacher certification in French. Prerequisite: FRENCH 415. Winter.

FRENCH 426 20Th-Century French Literature

Selected readings from the Belle Epoque to the contemporary period. Also offered as French 5526.

FRENCH 426 20Th-Century French Literature

Selected readings from the Belle Epoque to the contemporary period. Also offered as French 5526.

FRENCH 435 Directed Discussions In Advanced French

Directed discussion on contemporary French culture. The discussions cover a wide range of topics on modern France: social, intellectual and cultural aspects. Students will participate and have the opportunity to observe and react within a cultural frame of reference. Open to advanced students of French and to teachers of the language for in-service training.

FRENCH 440 Medieval Romance

The various movements of French medieval romance from the 12th through 15th centuries with an emphasis on the 12th and 13th centuries. Analysis of literary technique and socio-historical context will be stressed. No knowledge of Old French is assumed. Also offered as FRENCH 5540.

FRENCH 440 Medieval Romance

The various movements of French medieval romance from the 12th through 15th centuries with an emphasis on the 12th and 13th centuries. Analysis of literary technique and socio-historical context will be stressed. No knowledge of Old French is assumed. Also offered as FRENCH 5540.

FRENCH 443 Early French Theater

An examination of the development of French theater from Late Antiquity through the Renaissance, including religious and secular drama. The focus is on literary analysis of the dramatic texts, with some consideration of theater history and dramaturgy. Also offered as French 5543. Prerequisites: French 221 or the equivalent, French 315 strongly recommended.

FRENCH 444 Renaissance Poetry

French poetry from the Grand Rhetoriqueurs through the Pleiade. Study of poetic forms, major poets and schools, and different approaches to analyzing poetry. Also offered as FRENCH 5544. Prerequisites: FRENCH 221 or the equivalent.

FRENCH 444 Renaissance Poetry

French poetry from the Grand Rhetoriqueurs through the Pleiade. Study of poetic forms, major poets and schools, and different approaches to analyzing poetry. Also offered as FRENCH 5544. Prerequisites: FRENCH 221 or the equivalent.

FRENCH 445 Epistolarity And The Novel

Explorations of the genre through the analysis of 17th-and 18-century French novels. Introduced by a theoretical review. Also offered as FRENCH 5545.

FRENCH 445 Epistolarity And The Novel

Explorations of the genre through the analysis of 17th-and 18-century French novels. Introduced by a theoretical review. Also offered as FRENCH 5545.

FRENCH 446 17Th-Century French Drama

The classical period: Emphasis on Corneille, Racine and Moliere. Also offered as FRENCH 5546.

FRENCH 446 17Th-Century French Drama

The classical period: Emphasis on Corneille, Racine and Moliere. Also offered as FRENCH 5546.

FRENCH 447 19Th-Century French Poetry

The study of the poetry and dominant poetic movements of the 19th-century, with special attention given to different approaches to its analysis. Also offered as FRENCH 5547.

FRENCH 447 19Th-Century French Poetry

The study of the poetry and dominant poetic movements of the 19th-century, with special attention given to different approaches to its analysis. Also offered as FRENCH 5547.

FRENCH 448 20Th Century French Theater

Analysis of major currents of French theater of the 20th-Century, with emphasis upon the postwar period and its movements. Also offered as FRENCH 5548.

FRENCH 448 20Th Century French Theater

Analysis of major currents of French theater of the 20th-Century, with emphasis upon the postwar period and its movements. Also offered as FRENCH 5548.

FRENCH 452 Medieval Poetry

A study of medieval poetry including religious and secular poetry, Provençal and Old French lyric, the influence of poetry in other genres such as romance and theater, later medieval poetry of the 14th and 15th centuries, as well as a discussion of the origins of the lyric. Also offered as FRENCH 5552. Prerequisites: FRENCH 221 or the equivalent.

FRENCH 452 Medieval Poetry

A study of medieval poetry including religious and secular poetry, Provençal and Old French lyric, the influence of poetry in other genres such as romance and theater, later medieval poetry of the 14th and 15th centuries, as well as a discussion of the origins of the lyric. Also offered as FRENCH 5552. Prerequisites: FRENCH 221 or the equivalent.

FRENCH 454 Intellectual Origins Of The French Revolution

Study of philosophical and political texts by Montesquieu, Rousseau, Voltaire, Diderot, etc. on government, society, language, freedom and equality. Critical study of the Enlightenment. Also offered as FRENCH 5554.

FRENCH 454 Intellectual Origins Of The French Revolution

Study of philosophical and political texts by Montesquieu, Rousseau, Voltaire, Diderot, etc. on government, society, language, freedom and equality. Critical study of the Enlightenment. Also offered as FRENCH 5554.

FRENCH 455 Fin-De-Siecle And Belle Epoque

Study of the literary, cultural and historical context of this time period in French history, for example: Symbolism, Decadence, and the years 1900-1914. Also offered as FRENCH 5555.

FRENCH 455 Fin-De-Siecle And Belle Epoque

Study of the literary, cultural and historical context of this time period in French history, for example: Symbolism, Decadence, and the years 1900-1914. Also offered as FRENCH 5555.

FRENCH 456 20Th Century French Poetry

The study of 20th-century poetry with special consideration given to different approaches to its analysis. Also offered as FRENCH 5556.

FRENCH 456 20Th Century French Poetry

The study of 20th-century poetry with special consideration given to different approaches to its analysis. Also offered as FRENCH 5556.

FRENCH 457 20Th Century French Narrative

The analysis of major currents in French 20th century narrative, especially fiction and film. Courses will be organized around narrative themes or historical events and will include social and cultural components. Also offered as FRENCH 5561.

FRENCH 463 19Th-Century French Fiction

Studies in the birth, development and variation of French Romanticism. Readings include de Stael, Senancour, Constant, Hugo, Stendhal and Merimee. The advent of realism and naturalism in France. Readings include Balzac, Flaubert, Daudet, De Maupassant, and Zola. Also offered as FRENCH 5563.

FRENCH 463 19Th-Century French Fiction

Studies in the birth, development and variation of French Romanticism. Readings include de Stael, Senancour, Constant, Hugo, Stendhal and Merimee. The advent of realism and naturalism in France. Readings include Balzac, Flaubert, Daudet, De Maupassant, and Zola. Also offered as FRENCH 5563.

FRENCH 470 Studies In Critical Thought

Various currents of 20th-century literary criticism and their political and historical contexts. Also offered as FRENCH 5570.

FRENCH 470 Studies In Critical Thought

Various currents of 20th-century literary criticism and their political and historical contexts. Also offered as FRENCH 5570.

FRENCH 471 Autobiography

Analysis of autobiographies and autobiographical texts such as diaries and memoirs together with theoretical texts on the genre. The concentration on different periods or issues may change from semester to semester, i.e. the art of autobiography as practiced by 20th-century writers, especially women. Also offered as FRENCH 5571.

FRENCH 471 Autobiography

Analysis of autobiographies and autobiographical texts such as diaries and memoirs together with theoretical texts on the genre. The concentration on different periods or issues may change from semester to semester, i.e. the art of autobiography as practiced by 20th-century writers, especially women. Also offered as FRENCH 5571.

FRENCH 472 Francophone Studies

Study of different national Francophone literatures. Reading may include writers from Quebec, Haiti, Africa, Louisiana, Vietnam, the French Indies, etc. Also offered as FRENCH 5572.

FRENCH 472 Francophone Studies

Study of different national Francophone literatures. Reading may include writers from Quebec, Haiti, Africa, Louisiana, Vietnam, the French Indies, etc. Also offered as FRENCH 5572.

FRENCH 480 Special Topics

Each time this course is offered a particular author, genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes. Offered: On demand.

FRENCH 490 Special Readings

Intensive readings in field or literary figure to be selected by the student in consultation with the instructor. Available, by permission only, to advanced students of French; available only when student cannot take regularly scheduled courses.

Prerequisite: 3.0 GPA. On demand.

FRENCH 499 Senior Seminar (Capstone)

Required for major. Covers seminal works of French literature in their historical and cultural context. Course content varies, but will include such elements as geography, politics, folklore, history of the language, architecture, art and music. To be taken during final Winter Semester of residence. Prerequisite: 21 hours beyond first year. Offered: Winter Semester.

FRENCH 499 Senior Seminar (Capstone)

Required for major. Covers seminal works of French literature in their historical and cultural context. Course content varies, but will include such elements as geography, politics, folklore, history of the language, architecture, art and music. To be taken during final Winter Semester of residence. Prerequisite: 21 hours beyond first year. Offered: Winter Semester.

Geography (GEOG)

GEOG 105 Introduction To The Elements Of Geography

A survey of major elements of physical and human geography, with a concise overview of the world's regions. Emphasis on global relationships and distributions, both environmental and cultural. Climates, natural vegetation, land forms, cultural origins and diffusions, economic patterns. Fall and winter.

GEOG 150 Introduction To Physical Geography

This course is an introduction to the study of the natural environmental systems of earth--the atmosphere, the hydrosphere, the biosphere, and the lithosphere. The primary objective of the course is to provide a broad overview of these systems at a global scale. This overview will entail descriptions of natural systems and the variations they exhibit both from place to place and through time. It will also entail explaining how natural systems operate and interact with each other, thereby providing a necessary foundation for understanding the tremendously diverse physical geography of earth. Applies to natural science requirement. Prerequisites: None. Offered: Fall semester.

GEOG 200 World Geography I

A survey of the physical and human geography of the regions and nations of Europe and the Americas, with Australia and New Zealand. The approach is strongly historical, emphasizing interconnections, shared colonial backgrounds and broader global contexts in the modern world. The course is aimed at non-specialists. See also Geography 202. Offered: Spring

GEOG 200 World Geography I

A survey of the physical and human geography of the regions and nations of Europe and the Americas, with Australia and New Zealand. The approach is strongly historical, emphasizing interconnections, shared colonial backgrounds and broader global contexts in the modern world. The course is aimed at non-specialists. See also Geography 202. Offered: Spring

The approach is strongly historical emphasizing interconnections shared colonial backgrounds, and broader global contexts in the modern world. The course is aimed at non-specialists. See also Geography 200. Offered: Fall semester.

GEOG 203 Introduction To Geographic Information Systems

An introductory course covering the basic principles of geographic information systems focusing on such software programs as

ARC-INFO and ARC-VIEW. Offered: Fall and Winter

GEOG 203 Introduction To Geographic Information Systems

An introductory course covering the basic principles of geographic information systems focusing on such software programs as ARC-INFO and ARC-VIEW. Offered: Fall and Winter

GEOG 210 Human Geography

A study of the geographical underpinnings and distribution of the main elements of culture, including population patterns, language, religion, political territorial organization, settlement, and economic livelihood. The environmental settings, geographic origins, diffusion, and geographic interrelationships of these culture traits are emphasized. Offered: On demand

GEOG 210 Human Geography

A study of the geographical underpinnings and distribution of the main elements of culture, including population patterns, language, religion, political territorial organization, settlement, and economic livelihood. The environmental settings, geographic origins, diffusion, and geographic interrelationships of these culture traits are emphasized. Offered: On demand

GEOG 215 Introduction To Weather And Climate

Overview of the basic components of the climate system. Emphasis is on the basic physical processes that determine global and regional climate and the linkages between components of the climate system. The theme throughout the course will be importance of climate as one of the major forcing mechanisms in environmental change. Both human-induced and natural climate variability will be covered. Three hours of lecture and two hours of laboratory per week. Offered: Fall

GEOG 215 Introduction To Weather And Climate

Overview of the basic components of the climate system. Emphasis is on the basic physical processes that determine global and regional climate and the linkages between components of the climate system. The theme throughout the course will be importance of climate as one of the major forcing mechanisms in environmental change. Both human-induced and natural climate variability will be covered. Three hours of lecture and two hours of laboratory per week. Offered: Fall

GEOG 300 Interdisciplinary Studies:Cluster Courses

GEOG 309 Urban Geography

Historical development, morphology and functions of urban places, including intercity relationships and the relationship between cities and their hinterlands; emphasis on American cities. Offered: On Demand.

GEOG 309 Urban Geography

Historical development, morphology and functions of urban places, including intercity relationships and the relationship between cities and their hinterlands; emphasis on American cities. Offered: On Demand.

GEOG 311 Economic Geography

A systematic study of the modern world economy that includes discussion of the location of production and consumption, the nature and role of multinational enterprises in trade, resource limitations to growth, and cultural responses to globalization. Three hours lecture, discussion a week. Offered: On demand

GEOG 311 Economic Geography

A systematic study of the modern world economy that includes discussion of the location of production and consumption, the nature and role of multinational enterprises in trade, resource limitations to growth, and cultural responses to globalization. Three hours lecture, discussion a week. Offered: On demand

GEOG 314 Principles Of Geomorphology

Explores the processes that shape the earth's surface. Focuses on the development and description of fluvial, glacial, eolian, and coastal landforms. Studies the influence of tectonic and climatic factors. Three hours lecture and two hours lab per week. Field trip. Prerequisite: ENV-SCI 111R or GEOLOGY 220; GEOLOGY 230 suggested. Offered: On demand.

GEOG 314 Principles Of Geomorphology

Explores the processes that shape the earth's surface. Focuses on the development and description of fluvial, glacial, eolian, and coastal landforms. Studies the influence of tectonic and climatic factors. Three hours lecture and two hours lab per week. Field trip. Prerequisite: ENV-SCI 111R or GEOLOGY 220; GEOLOGY 230 suggested. Offered: On demand.

GEOG 317 Cartography

Design and preparation, by hand and computer, of informative, effective, and attractive maps and other graphics for various geographical purposes, especially term papers, thesis, and public presentations. Lectures, discussion, and laboratory. Offered: On

demand.

GEOG 317 Cartography

Design and preparation, by hand and computer, of informative, effective, and attractive maps and other graphics for various geographical purposes, especially term papers, thesis, and public presentations. Lectures, discussion, and laboratory. Offered: On demand.

GEOG 319 Descriptive And Synoptic Meteorology

Synoptic weather observations, air mass analysis, analysis of frontal systems, weather disturbances, preparation of weather charts and diagrams used in synoptic meteorology and forecasting. Prerequisites: ENV-SCI 110R or GEOLOGY 215 Offered: On demand

GEOG 319 Descriptive And Synoptic Meteorology

Synoptic weather observations, air mass analysis, analysis of frontal systems, weather disturbances, preparation of weather charts and diagrams used in synoptic meteorology and forecasting. Prerequisites: ENV-SCI 110R or GEOLOGY 215 Offered: On demand

GEOG 325 Cultural Perspectives on the Environment

This course explores the history of conservation practices in American agriculture from the 1700s through the present. Additionally, the course examines the past and present legal implications of environmental statutes for minority farmers from a social and environmental justice perspective. This course is also offered as Environmental Studies 325.

GEOG 329 World Political Geography

An analysis of the influence of geographic factors (both physical and human) on the economic and political relationships of the nations of the world. Emphasis will be placed on population size and political viability of states, boundaries and frontiers as limits of national space, problems related to the spatial integration of states, and the independence and interdependence of states within the larger world political system. Offered: On demand

GEOG 329 World Political Geography

An analysis of the influence of geographic factors (both physical and human) on the economic and political relationships of the nations of the world. Emphasis will be placed on population size and political viability of states, boundaries and frontiers as limits of national space, problems related to the spatial integration of states, and the independence and interdependence of states within the larger world political system. Offered: On demand

GEOG 332 Cultural Geography

A study of the distribution and interpretation of cultural patterns throughout the world. Examined are material and non-material elements of culture such as settlement, land use, technology and belief systems. The geographic origins and diffusion of culture traits are emphasized. On demand.

GEOG 332 Cultural Geography

A study of the distribution and interpretation of cultural patterns throughout the world. Examined are material and non-material elements of culture such as settlement, land use, technology and belief systems. The geographic origins and diffusion of culture traits are emphasized. On demand.

GEOG 333 Geographic Elements Of Urban Planning

Analysis of the changing form and structure of urban places from a planning viewpoint. The focus will be on land-use trends on both the intraurban and interurban levels. Covered will be such topics as planning for urban transportation, new towns, land-use planning, urban renewal, and environmental planning. Offered: On demand

GEOG 333 Geographic Elements Of Urban Planning

Analysis of the changing form and structure of urban places from a planning viewpoint. The focus will be on land-use trends on both the intraurban and interurban levels. Covered will be such topics as planning for urban transportation, new towns, land-use planning, urban renewal, and environmental planning. Offered: On demand

GEOG 334 Gender and the Environment

This course provides a survey of different ways women relate to nature. The objectives of the course are: to understand historical relationships between women and nature in the western world, to understand different theoretical approaches to studying women and nature, to explore the geography of women's activism on behalf of the environment, and to understand how women's health is linked to the environment. Cross listed with ENV-STDY 334. Offered: Fall

GEOG 335 Introduction To Waste Management

Overview of issues in waste management. Nature and classification of waste. Municipal solid waste: disposal methods, design,

construction and maintenance of sanitary landfills. Nature and sources of hazardous waste, storage, transportation, treatment and disposal of hazardous waste. Types and sources of nuclear waste; disposal of high level and low level nuclear wastes. Sources, nature, handling and disposal of biologic waste. Pollution prevention, recycling and resource conservation. Prerequisites: ENV-SCI 110R; GEOLOGY 150, GEOLOGY 220 or instructor's permission. Offered: On demand.

GEOG 335 Introduction To Waste Management

Overview of issues in waste management. Nature and classification of waste. Municipal solid waste: disposal methods, design, construction and maintenance of sanitary landfills. Nature and sources of hazardous waste, storage, transportation, treatment and disposal of hazardous waste. Types and sources of nuclear waste; disposal of high level and low level nuclear wastes. Sources, nature, handling and disposal of biologic waste. Pollution prevention, recycling and resource conservation. Prerequisites: ENV-SCI 110R; GEOLOGY 150, GEOLOGY 220 or instructor's permission. Offered: On demand.

GEOG 336 Principles Of Soil Science

Study of genesis, evolution, distribution and classification of soils. Analysis of soil-forming materials and processes. Three hours lecture, discussion and laboratory a week. Prerequisites: ENV-SCI 110R; GEOLOGY 220 required; Offered: On demand
Restrictions: college chemistry recommended.

GEOG 340 Geography of the United States and Canada

A survey of the physical and human geography of the United States and Canada. The approach is strongly historical emphasizing interconnections, shared colonial backgrounds, and broader international contexts in the Americas and around the globe. This course is aimed at non-specialists. Offered: On demand.

GEOG 340 Geography of the United States and Canada

A survey of the physical and human geography of the United States and Canada. The approach is strongly historical emphasizing interconnections, shared colonial backgrounds, and broader international contexts in the Americas and around the globe. This course is aimed at non-specialists. Offered: On demand.

GEOG 340 Geography of the United States and Canada

A survey of the physical and human geography of the United States and Canada. The approach is strongly historical emphasizing interconnections, shared colonial backgrounds, and broader international contexts in the Americas and around the globe. This course is aimed at non-specialists. Offered: On demand.

GEOG 341 Geography Of South America

A study of the physical and human geography of South America, with an emphasis on cultural processes and the historical record. Contemporary issues such as economic development, trade, urbanization, and geopolitical conflicts are discussed. Offered: On demand

GEOG 341 Geography Of South America

A study of the physical and human geography of South America, with an emphasis on cultural processes and the historical record. Contemporary issues such as economic development, trade, urbanization, and geopolitical conflicts are discussed. Offered: On demand

GEOG 341 Geography Of South America

A study of the physical and human geography of South America, with an emphasis on cultural processes and the historical record. Contemporary issues such as economic development, trade, urbanization, and geopolitical conflicts are discussed. Offered: On demand

GEOG 342 Geography of Mexico, Central America and the Caribbean

A study of the physical and human geography of Middle America, with an emphasis on cultural processes and the historical record. Contemporary issues such as economic development, trade urbanization, and geopolitical conflicts are discussed. Offered: On demand

GEOG 342 Geography of Mexico, Central America and the Caribbean

A study of the physical and human geography of Middle America, with an emphasis on cultural processes and the historical record. Contemporary issues such as economic development, trade urbanization, and geopolitical conflicts are discussed. Offered: On demand

GEOG 342 Geography of Mexico, Central America and the Caribbean

A study of the physical and human geography of Middle America, with an emphasis on cultural processes and the historical record. Contemporary issues such as economic development, trade urbanization, and geopolitical conflicts are discussed. Offered: On demand

GEOG 350 Geography Of Europe

A survey of the physical and human geography of the regions and nations of Europe. The approach is strongly historical, emphasizing international interconnections and broad global contexts. The course is aimed at non-specialists. Offered: On demand.

GEOG 350 Geography Of Europe

A survey of the physical and human geography of the regions and nations of Europe. The approach is strongly historical, emphasizing international interconnections and broad global contexts. The course is aimed at non-specialists. Offered: On demand.

GEOG 350 Geography Of Europe

A survey of the physical and human geography of the regions and nations of Europe. The approach is strongly historical, emphasizing international interconnections and broad global contexts. The course is aimed at non-specialists. Offered: On demand.

GEOG 351 Regional Geography Of The Middle East

A study of human imprint upon the land through settlement patterns, institutions of land organization, and types of economy. Strategies for the economic development of various regions in the Middle East are discussed. Offered: On demand

GEOG 352 Geography Of Southeast Asia

A study of human imprint on the land through settlement patterns, institutions of land organization, and types of economy. Strategies for the economic development of various regions in Southeast Asia are discussed. Offered: On demand

GEOG 352 Geography Of Southeast Asia

A study of human imprint on the land through settlement patterns, institutions of land organization, and types of economy. Strategies for the economic development of various regions in Southeast Asia are discussed. Offered: On demand

GEOG 355 Geography Of Africa

A study of human imprint on the land through settlement patterns, institutions of land organization, and types of economy. Strategies for the economic development of various regions in Africa are discussed. Offered: On demand

GEOG 355 Geography Of Africa

A study of human imprint on the land through settlement patterns, institutions of land organization, and types of economy. Strategies for the economic development of various regions in Africa are discussed. Offered: On demand

GEOG 360 Principles Of Biogeography

This course is an introduction to biogeography that explores the patterns of plant and animal distributions from both ecological and historical perspectives. We examine past geologic and climatic conditions, as well as interactions between organisms and their environment to explain modern distributions of flora and fauna. Human interactions with plants and animals have increasingly profound consequences on distributions of flora and fauna from destruction to management. We explore the increasing importance of issues and strategies in conservation. The laboratory portion of the course builds on core ecological concepts and provides experiences of field observation, data collecting and data analysis. Prerequisite: ENV-SCI 110R or permission of instructor. Offered: On demand.

GEOG 398 Field Trip

Three-day field trip in March or April (at student's expense) for department majors. An opportunity to observe and study physical and cultural features and collect materials. Brief descriptive report of trip required. Prerequisite: 6-9 hours of upper level geography. Yearly.

GEOG 401 Advanced Geographic Information Science

This course is designed for the students knowledgeable in the fundamentals of geographic information systems, who wish to gain expertise in advanced topics and applications in geographic information systems, remote sensing, and related environmental informatics. Classes are organized to encourage active learning. Students are encouraged and guided to develop their research projects by integrating related techniques of geographic information science. Prerequisite: GEOG 203 Offered: On demand

GEOG 401 Advanced Geographic Information Science

This course is designed for the students knowledgeable in the fundamentals of geographic information systems, who wish to gain expertise in advanced topics and applications in geographic information systems, remote sensing, and related environmental informatics. Classes are organized to encourage active learning. Students are encouraged and guided to develop their research projects by integrating related techniques of geographic information science. Prerequisite: GEOG 203 Offered: On demand

GEOG 402 Environmental Remote Sensing And Digital Image Analysis

This course will provide students with innovative techniques for landscape-level environmental analysis, geographic and geological studies, earth science research, and environmental resources management using remotely sensed data including satellite images. Students will be taught basic remote sensing concepts and technical skills, including energy radiative transfer processes in remote sensing, sensors and resolutions, computer-based image processing and classification, and remote sensing/GIS integration. Prerequisite: GEOG 203 (formerly GEOG 401) or permission of instructor. Offered: On Demand

GEOG 402 Environmental Remote Sensing And Digital Image Analysis

This course will provide students with innovative techniques for landscape-level environmental analysis, geographic and geological studies, earth science research, and environmental resources management using remotely sensed data including satellite images. Students will be taught basic remote sensing concepts and technical skills, including energy radiative transfer processes in remote sensing, sensors and resolutions, computer-based image processing and classification, and remote sensing/GIS integration. Prerequisite: GEOG 203 (formerly GEOG 401) or permission of instructor. Offered: On Demand

GEOG 403WI History and Philosophy of Geoscience

A survey of geoscientific thought since antiquity. The substance of geography, geology, and environmental studies will be sought primarily in scholarly treatise and formal analytical systems including cartography, but the course also addresses geoscientific principles emerging from the history of environment, government, law, economy, religion, literature, and material culture. Readings, lectures, discussions, research, writing. Also offered as Geography 503wi. Offered: on demand

GEOG 403WI History and Philosophy of Geoscience

A survey of geoscientific thought since antiquity. The substance of geography, geology, and environmental studies will be sought primarily in scholarly treatise and formal analytical systems including cartography, but the course also addresses geoscientific principles emerging from the history of environment, government, law, economy, religion, literature, and material culture. Readings, lectures, discussions, research, writing. Also offered as Geography 503wi. Offered: on demand

GEOG 404 Biogeography And Landscape Ecology

Principles and applications of biogeography and landscape ecology, emphasizing distribution of major ecosystems and related plants and animal species on earth, biodiversity, landscape patterns and processes, and physical, biological, and human interactions. The course explores ecosystem and landscape analyses using advanced GIS, remote sensing, and spatial modeling methods for real problem solving in environmental and biological research, ecosystem conservation, and urban planning and studies. Prerequisites: GEOG 203, GEOG 402 / GEOG 5502 or permission of instructor. Offered: On demand

GEOG 404 Biogeography And Landscape Ecology

Principles and applications of biogeography and landscape ecology, emphasizing distribution of major ecosystems and related plants and animal species on earth, biodiversity, landscape patterns and processes, and physical, biological, and human interactions. The course explores ecosystem and landscape analyses using advanced GIS, remote sensing, and spatial modeling methods for real problem solving in environmental and biological research, ecosystem conservation, and urban planning and studies. Prerequisites: GEOG 203, GEOG 402 / GEOG 5502 or permission of instructor. Offered: On demand

GEOG 406 Global Environmental Change

This course will examine the current rates of global environmental change and potential causes in the context of Earth's natural climate variability. The course will follow a seminar format. Students will read and discuss published articles on current and emerging theories of forcing mechanisms in the Earth's systems.

GEOG 406 Global Environmental Change

This course will examine the current rates of global environmental change and potential causes in the context of Earth's natural climate variability. The course will follow a seminar format. Students will read and discuss published articles on current and emerging theories of forcing mechanisms in the Earth's systems.

GEOG 410 Landscape, Language, Literature, And Law

An examination of the geographic underpinnings and implications of languages, literatures, and jurisprudence. The course explores languages' historic rootedness in the interactions between human beings and their surroundings; the varying geographic expressiveness and discrimination of languages; the effect and significance of literary evocations of landscapes; and the cultural and environmental geographic content of the language of law. Readings, lectures, discussions, writing. Prerequisite: Permission of the instructor. Offered: On demand. Also offered as GEOG 5510.

GEOG 410 Landscape, Language, Literature, And Law

An examination of the geographic underpinnings and implications of languages, literatures, and jurisprudence. The course explores languages' historic rootedness in the interactions between human beings and their surroundings; the varying geographic expressiveness and discrimination of languages; the effect and significance of literary evocations of landscapes; and the cultural and environmental geographic content of the language of law. Readings, lectures, discussions, writing. Prerequisite: Permission of the instructor. Offered: On demand. Also offered as GEOG 5510.

GEOG 412 Global Tourism

This course is a regional survey of world tourism. Topics include the uniqueness of place, the marketing of tourist destinations, and the cultural, economic, and environmental impacts on host societies. This course is cross-listed with Environmental Studies 412. Prerequisites: Geog 105, or Geog 200, or Geog 202, or permission of instructor.

GEOG 415 History And Philosophy Of Cartography

An examination of the techniques, assumptions, psychology, and cultural implications of mapping from the Stone Age to the age of satellites and the computerized Geographic Information System. Readings, lectures, discussions, writing. Offered: On demand. Also offered as GEOG 5515.

GEOG 415 History And Philosophy Of Cartography

An examination of the techniques, assumptions, psychology, and cultural implications of mapping from the Stone Age to the age of satellites and the computerized Geographic Information System. Readings, lectures, discussions, writing. Offered: On demand. Also offered as GEOG 5515.

GEOG 417 Special Topics

Individual research and study of a selected topic in geography, meteorology or earth science. Prerequisites: Approval of instructor. On demand.

GEOG 426 Paleocology: Microfossils And Climate Change

Paleocology will focus on questions addressing past environments and past climates based on the ecology of microfossils. Micro-organisms are very sensitive to a wide variety of environmental conditions including temperature, precipitation, hydrology, water chemistry, salinity, habitat, and pollution. The fossil remains of these organisms are used as proxy indicators for reconstructing past environmental conditions, climate change, vegetation dynamics, and human impacts. Students will have the opportunity to process microfossils and make interpretations based on analysis data. Prerequisite: Permission of Instructor Offered: Every other Fall semester

GEOG 430 Energy Resources

This course covers the distribution, origin, and utilization of all types of energy. Topics include exploration, production, storage, transportation and conservation of carbon-based fuels, hydrologic, nuclear energy, and alternate energy sources such as solar, wind, geothermal, and hydrogen. Prerequisite: ENV-SCI 110R or GEOLOGY 220. Offered: Fall.

GEOG 430 Energy Resources

This course covers the distribution, origin, and utilization of all types of energy. Topics include exploration, production, storage, transportation and conservation of carbon-based fuels, hydrologic, nuclear energy, and alternate energy sources such as solar, wind, geothermal, and hydrogen. Prerequisite: ENV-SCI 110R or GEOLOGY 220. Offered: Fall.

GEOG 435 Geoarchaeology

This course examines geomorphological and archaeological methods used in reconstructing sites, settlement patterns, and paleoenvironments. Explores dating methods, soils, and stratigraphy as tools for studying landscape evolution and human occupation. Prerequisites: GEOG 314 or GEOLOGY 314, or permission of instructor. Offered: On demand

GEOG 435 Geoarchaeology

This course examines geomorphological and archaeological methods used in reconstructing sites, settlement patterns, and paleoenvironments. Explores dating methods, soils, and stratigraphy as tools for studying landscape evolution and human occupation. Prerequisites: GEOG 314 or GEOLOGY 314, or permission of instructor. Offered: On demand

GEOG 437 Population Geography

This course analyzes human populations: how they grow, how their compositions change, and how and why people migrate from one place to another. Students will study basic demographic processes- mortality, fertility, and migration- and underline theory and techniques. Students will also examine relationships between population growth and population planning, immigration, urbanization and cities, and the environment. Offered: On demand.

GEOG 437 Population Geography

This course analyzes human populations: how they grow, how their compositions change, and how and why people migrate from one place to another. Students will study basic demographic processes- mortality, fertility, and migration- and underline theory and techniques. Students will also examine relationships between population growth and population planning, immigration, urbanization and cities, and the environment. Offered: On demand.

GEOG 442 Quaternary Environments

This course reviews earth climatic history and focuses on major mechanisms for global and regional climate change. Methods of paleoclimatic reconstruction are examined, including analysis of proxy data and climate modeling. Application of these methods toward prediction of future climate change is also explored. Also offered as Geog 5542. Prerequisite(s): GEOG 314 or GEOLOGY 314, and GEOG 215, or permission of instructor. Offered: On demand.

GEOG 442 Quaternary Environments

This course reviews earth climatic history and focuses on major mechanisms for global and regional climate change. Methods of paleoclimatic reconstruction are examined, including analysis of proxy data and climate modeling. Application of these methods toward prediction of future climate change is also explored. Also offered as Geog 5542. Prerequisite(s): GEOG 314 or GEOLOGY 314, and GEOG 215, or permission of instructor. Offered: On demand.

GEOG 444 Spatial Data Analysis

Quantitative techniques and applications of spatial data analysis. The course will cover basic geospatial analysis techniques including hypothesis testing, kriging, variogram analysis, multivariate analysis and reliability analysis. Emphasis is on practical applications rather than theories. Intended for Geology, Geography, Environmental Studies, and relevant fields. Three hours lecture and computer lab per week. Prerequisites: Elementary statistics or permission of instructor Offered: On demand

GEOG 444 Spatial Data Analysis

Quantitative techniques and applications of spatial data analysis. The course will cover basic geospatial analysis techniques including hypothesis testing, kriging, variogram analysis, multivariate analysis and reliability analysis. Emphasis is on practical applications rather than theories. Intended for Geology, Geography, Environmental Studies, and relevant fields. Three hours lecture and computer lab per week. Prerequisites: Elementary statistics or permission of instructor Offered: On demand

GEOG 448 Satellite Climatology

Use of satellite observations to study the climate system. Discussions consider the development of satellite climatology, sensors, platforms and methodologies used to estimate climate variables from radiance measurements. Aspects of climate that are emphasized include cloud climatologies, cloud systems, atmospheric moisture, radiation budget, and land-surface conditions. Three hours lecture and one hour lab per week. Prerequisites: Geog 215 or Geog 219, or permission if instructor. Offered: Every other Spring.

GEOG 448 Satellite Climatology

Use of satellite observations to study the climate system. Discussions consider the development of satellite climatology, sensors, platforms and methodologies used to estimate climate variables from radiance measurements. Aspects of climate that are emphasized include cloud climatologies, cloud systems, atmospheric moisture, radiation budget, and land-surface conditions. Three hours lecture and one hour lab per week. Prerequisites: Geog 215 or Geog 219, or permission if instructor. Offered: Every other Spring.

GEOG 449 Global Water and Sustainability

This course examines the physical characteristics of water and its role in Earth systems. The challenges facing societies in as era of rapidly changing climate are explored. Cross-listed with Environmental Science 446.

GEOG 449 Global Water and Sustainability

This course examines the physical characteristics of water and its role in Earth systems. The challenges facing societies in as era

of rapidly changing climate are explored. Cross-listed with Environmental Science 446.

GEOG 450 Gis Fundamentals For Research Applications

This course will address the needs of upper level undergraduate and graduate students who desire to learn and apply fundamental Geographic Information Systems concepts and techniques for their research projects. This course will draw on the content of the Introductory GIS course offered by the department but will also be flexible such that the individual needs or interest of students can be met through guided reading and/or tailored laboratory sessions. The Department of Geosciences GIS computer laboratory, with a variety of GIS and Remote Sensing software, will be available for this course. Prerequisite: Permission by instructor
Offered: Winter Restrictions: Only for upper level undergraduate and graduate students

GEOG 450 Gis Fundamentals For Research Applications

This course will address the needs of upper level undergraduate and graduate students who desire to learn and apply fundamental Geographic Information Systems concepts and techniques for their research projects. This course will draw on the content of the Introductory GIS course offered by the department but will also be flexible such that the individual needs or interest of students can be met through guided reading and/or tailored laboratory sessions. The Department of Geosciences GIS computer laboratory, with a variety of GIS and Remote Sensing software, will be available for this course. Prerequisite: Permission by instructor
Offered: Winter Restrictions: Only for upper level undergraduate and graduate students

GEOG 457 North American Prehistory

This class offers instruction in the archaeological survey of prehistoric North America from the Arctic to northern Mexico. The course outlines cultural developments within this region from the peopling of the Americas near the end of the last Ice Age to the arrival of Europeans over 10,000 years later. The diversification of Native American societies across this time span is examined in relation to social and environmental challenges, including the transformation of hunter-gatherer groups into chiefdoms and complex agricultural societies. Cross-listed with Anthropology 384.

GEOG 460 Transportation Geography

Relation between transportation and spatial organization, selected analytical models dealing with traffic demand, network configuration, and allocation of transport facilities; application to specific problem areas including commuting. Seminar with discussions of briefs and term paper. Offered: On demand

GEOG 460 Transportation Geography

Relation between transportation and spatial organization, selected analytical models dealing with traffic demand, network configuration, and allocation of transport facilities; application to specific problem areas including commuting. Seminar with discussions of briefs and term paper. Offered: On demand

GEOG 489 Tutoring In Geography

Geography majors in their senior year may enroll for 1-3 hours tutoring for credit. This will entail working as a tutor, under the direction of the faculty, to students in the 100 to 200-level courses in the department who either have inadequate background preparation in environment studies and geography or are identified by the instructor as needing tutorial help. Tutoring will be on a credit/non-credit basis. Prerequisite: Permission of instructor Offered: On demand

GEOG 496 Geography Internship

Students obtain directed practical experience working with non-profits, governments, or private enterprises. Duties will vary based on contractual agreement between the student, host organization, and the professor. Students should have junior standing or higher, and the instructor's permission. Prerequisite: Permission of the instructor Offered: Summer, Fall, or Winter as available

GEOG 496 Geography Internship

Students obtain directed practical experience working with non-profits, governments, or private enterprises. Duties will vary based on contractual agreement between the student, host organization, and the professor. Students should have junior standing or higher, and the instructor's permission. Prerequisite: Permission of the instructor Offered: Summer, Fall, or Winter as available

GEOG 499WI Geography Seminar

Students critique geographic research and prepare a paper and an oral presentation on an approved topic. Prerequisite: Senior standing and successful completion of the WEPT Offered: Winter

GEOG 499WI Geography Seminar

Students critique geographic research and prepare a paper and an oral presentation on an approved topic. Prerequisite: Senior standing and successful completion of the WEPT Offered: Winter

Geology (GEOLOGY)

GEOLOGY 120 Energy Science

An introductory foundation course on energy in all its guises, the physical laws and factors which control it and the availability of energy for human use. Includes consideration of resources, reserves, conversion efficiencies, conservation, and other relevant factors. Conventional sources and nonconventional alternatives such as solar, wind, water, geothermal, biomass and fusion will be addressed. Lecture and discussions. No prerequisites. Offered: On demand

GEOLOGY 1YE Geology Elective Lecture

Transfer Credit

GEOLOGY 220 General Geology

Origin and composition of the primary earth materials; agents of erosion, transportation, sedimentation and metamorphism; modes of occurrence of common minerals and analysis of the common crustal structures. Field trips. Three hours lecture and discussion. Semester offered: Fall and Winter

GEOLOGY 220 General Geology

Origin and composition of the primary earth materials; agents of erosion, transportation, sedimentation and metamorphism; modes of occurrence of common minerals and analysis of the common crustal structures. Field trips. Three hours lecture and discussion. Semester offered: Fall and Winter

GEOLOGY 220L General Geology Laboratory

Laboratory and field investigations of principles of the geology designed to complement the topics covered in GEOLOGY 220 through the use of inquiry-based investigations in the laboratory and field. Prerequisite: Co-requisite or Prerequisite GEOLOGY 220. Semester offered: Fall and Winter

GEOLOGY 230 Historical Geology

An interpretation of the biological and physical history of the earth. Three hours lecture, discussion and two hours laboratory a week. Field trips. Prerequisites: GEOLOGY 220 or permission of instructor Offered: On demand

GEOLOGY 250L Field Methods In Earth And Environmental Science

A field-based course covering basic methods used by earth scientists for environmental, geographic, and geologic investigations. Students will collect field data at off-campus sites, conduct periodic monitoring, and analyze samples using departmental and personal instrumentation. Students will work on collaborative projects and will present their results. Class will meet weekly for four hours in the field. Prerequisite: GEOLOGY 101 and GEOLOGY 101L or ENV-SCI 111 and ENV-SCI 111L or GEOLOGY 220 and GEOLOGY 220L or ENV-SCI 110R and ENV-SCI 110L. Offered: Fall

GEOLOGY 250L Field Methods In Earth And Environmental Science

A field-based course covering basic methods used by earth scientists for environmental, geographic, and geologic investigations. Students will collect field data at off-campus sites, conduct periodic monitoring, and analyze samples using departmental and personal instrumentation. Students will work on collaborative projects and will present their results. Class will meet weekly for four hours in the field. Prerequisite: GEOLOGY 101 and GEOLOGY 101L or ENV-SCI 111 and ENV-SCI 111L or GEOLOGY 220 and GEOLOGY 220L or ENV-SCI 110R and ENV-SCI 110L. Offered: Fall

GEOLOGY 251 Field Methods in Earth and Environmental Science: Off-Campus

This course will provide students with an introductory, inquiry-based learning experience that focuses on the application of field methods for understanding surface and subsurface earth processes and environmental issues. Students will collect field data at off-campus sites, conduct periodic monitoring, and analyze samples using departmental Instrumentation. Students will work on collaborative projects and will present their results. Class will meet at an off campus location during break (added cost) plus have four on campus meetings. Prerequisites: GEOLOGY 220 and GEOLOGY 220L or ENV-SCI 110R and ENV-SCI 110L

GEOLOGY 251 Field Methods in Earth and Environmental Science: Off-Campus

This course will provide students with an introductory, inquiry-based learning experience that focuses on the application of field methods for understanding surface and subsurface earth processes and environmental issues. Students will collect field data at off-campus sites, conduct periodic monitoring, and analyze samples using departmental Instrumentation. Students will work on collaborative projects and will present their results. Class will meet at an off campus location during break (added cost) plus have four on campus meetings. Prerequisites: GEOLOGY 220 and GEOLOGY 220L or ENV-SCI 110R and ENV-SCI 110L

GEOLOGY 302 Environmental Geology

An introduction to the role and scope of geological processes in the light of contemporary urban society. Lecture and discussion periods include topics such as air and water pollution, earth movements, waste disposal, mineral, energy and water resources, construction engineering, and effects caused by human activities. Three hours lecture, discussion per week. Semester offered:

Fall and Winter

GEOLOGY 302 Environmental Geology

An introduction to the role and scope of geological processes in the light of contemporary urban society. Lecture and discussion periods include topics such as air and water pollution, earth movements, waste disposal, mineral, energy and water resources, construction engineering, and effects caused by human activities. Three hours lecture, discussion per week. Semester offered: Fall and Winter

GEOLOGY 312 Mineralogy

Introduction to crystallography, mineral chemistry and the systematic classification and identification of minerals. Prerequisites: GEOLOGY 220 and CHEM 212R. Three hour lecture and discussion with two hours laboratory a week. Fall.

GEOLOGY 312 Mineralogy

Introduction to crystallography, mineral chemistry and the systematic classification and identification of minerals. Prerequisites: GEOLOGY 220 and CHEM 212R. Three hour lecture and discussion with two hours laboratory a week. Fall.

GEOLOGY 313 Evolution And The Geologic Record

An introduction to the history of life by studying the geologic record. Students will examine major features of the fossil record including: invertebrates, vertebrates, and plants. Students explore what the fossil record tells us about geologic time, evolution, past environments and distributions of organisms. Three hours of lecture and two hours of laboratory a week. The course will include field trips to collect and interpret fossils and paleoenvironments. Prerequisites: None Offered: Winter

GEOLOGY 313 Evolution And The Geologic Record

An introduction to the history of life by studying the geologic record. Students will examine major features of the fossil record including: invertebrates, vertebrates, and plants. Students explore what the fossil record tells us about geologic time, evolution, past environments and distributions of organisms. Three hours of lecture and two hours of laboratory a week. The course will include field trips to collect and interpret fossils and paleoenvironments. Prerequisites: None Offered: Winter

GEOLOGY 314 Principles Of Geomorphology

Explores the processes that shape the earth's surface. Focuses on the development and description of fluvial, glacial, eolian, and coastal landforms. Studies the influence of tectonic and climatic factors. Three hours lecture and two hours lab per week. Field trip. Prerequisite(s): ENV-SCI 110R; or GEOLOGY 220; Offered: On demand.

GEOLOGY 314 Principles Of Geomorphology

Explores the processes that shape the earth's surface. Focuses on the development and description of fluvial, glacial, eolian, and coastal landforms. Studies the influence of tectonic and climatic factors. Three hours lecture and two hours lab per week. Field trip. Prerequisite(s): ENV-SCI 110R; or GEOLOGY 220; Offered: On demand.

GEOLOGY 325 Sedimentology/Stratigraphy

Study of sedimentary rocks with special emphasis given to hand specimen identification based on mineral composition and textural features. Characteristics of sediments, transportation and environment of sediment deposition. Principles of stratigraphy, facies analysis and interpretation. Measurement and description of stratified rocks. Three hours lecture and two hours lab per week. Field trips. Prerequisite: GEOLOGY 220 Offered: Fall

GEOLOGY 325 Sedimentology/Stratigraphy

Study of sedimentary rocks with special emphasis given to hand specimen identification based on mineral composition and textural features. Characteristics of sediments, transportation and environment of sediment deposition. Principles of stratigraphy, facies analysis and interpretation. Measurement and description of stratified rocks. Three hours lecture and two hours lab per week. Field trips. Prerequisite: GEOLOGY 220 Offered: Fall

GEOLOGY 326CZ Cc:Archaeology Of Ancient Disasters

Remarkable human achievements are revealed by archaeological research, but the human past was frequently shaped as well by disasters of natural and human origin. Drawing on case studies that include data from the geosciences, archaeological excavations, and historical sources, this class examines how earth processes, the biosphere, and human cultural behavior were all sources of catastrophe. We begin with the geological context of disaster, including earthquakes, volcanic eruptions, climate change, and soil depletion. Next, we examine how ancient societies responded to disease, an ever present threat from the biological environment. Finally, we look at how ancient human groups were changed by stresses of cultural origin, including overpopulation, depletion of vital resources, and warfare. The study of ancient disasters not only gives us a wider understanding of human history, it may offer lessons for coping with future catastrophes. Also cross listed as CLASSICS 300CZ. Offered: Winter Semester

GEOLOGY 326CZ Cc:Archaeology Of Ancient Disasters

Offered: Winter Semester

GEOLOGY 335 Introduction To Waste Management

Overview of issues in waste management. Nature and classification of waste. Municipal solid waste: disposal methods, design, construction and maintenance of sanitary landfills. Nature and sources of hazardous waste, storage, transportation, treatment and disposal of hazardous waste. Types and sources of nuclear waste; disposal of high level and low level nuclear wastes. Sources, nature, handling and disposal of biologic waste. Pollution prevention, recycling and resource conservation. Prerequisites: ENV-SCI110R, GEOG 150, GEOLOGY 220 or instructor's permission. Offered: On demand

GEOLOGY 335 Introduction To Waste Management

Overview of issues in waste management. Nature and classification of waste. Municipal solid waste: disposal methods, design, construction and maintenance of sanitary landfills. Nature and sources of hazardous waste, storage, transportation, treatment and disposal of hazardous waste. Types and sources of nuclear waste; disposal of high level and low level nuclear wastes. Sources, nature, handling and disposal of biologic waste. Pollution prevention, recycling and resource conservation. Prerequisites: ENV-SCI110R, GEOG 150, GEOLOGY 220 or instructor's permission. Offered: On demand

GEOLOGY 342 Igneous And Metamorphic Petrology

Introduction to the principles governing the classification, occurrence and origins of igneous and metamorphic rocks. Prerequisite: GEOLOGY 312. Three hours lecture and discussion with two hours laboratory a week. Winter.

GEOLOGY 342R Electrical Methods In Near Surface Geophysics

Fundamental theory and near-surface applications of the 'electrical' geophysical methods; (1) electrical resistivity, (2) electromagnetics, (3) ground penetrating radar, and (4) induced polarization. Emphasis will be placed on the use of these methods in environmental and engineering investigations, addressing such issues as water resources, contaminant transport, geotechnical properties and archaeological protection. Course will include a field component illustrating application of selected technique to a local environmental problem. Prerequisites: Permission of Instructor Offered: On demand

GEOLOGY 350 Earth Structures And Tectonics

This course is designed to teach students the basic techniques and approaches for problem solving in structural geology. The course will cover the fundamentals of crustal deformation and discuss joints, faulted and folded rocks in their plate tectonic context. Two hours of lectures and three hours of laboratory a week. Course will include local field trips and one weekend field trip. Prerequisite: GEOLOGY 220, PHYSICS 210 or PHYSICS 240. Offered: Winter

GEOLOGY 370R Hydrogeology

Geology and hydrologic factors controlling the occurrence, movement, quality, recovery and development of water supply and distribution. Problems relating to urbanization of flood plains. Prerequisites: Permission of instructor

GEOLOGY 398 Geology Midcontinent Field Trip

A study of a selected area of the midcontinent U.S. with emphasis on locations to be visited during a three-day field trip (at the student's expense). An opportunity to observe and study physical features and collect materials. Several scheduled one-hour meetings in addition to field trip. Lectures, discussion and reading assignments provide a background to place the area covered by the field trip into the overall geologic framework of the Midcontinent U.S. Descriptive report or written examination. Limited enrollment. Prerequisite: Junior or senior level. Fall.

GEOLOGY 404 Fluid Transport in Geologic Media

This course examines the processes governing the fate and transport of solutes and contaminants in the subsurface environment. This course will provide computational modeling skills, laboratory tests, and case studies of subsurface transport. Three hours lecture, discussion and laboratory a week. Prerequisites: Hydrogeology or permission of instructor.

GEOLOGY 404 Fluid Transport in Geologic Media

This course examines the processes governing the fate and transport of solutes and contaminants in the subsurface environment. This course will provide computational modeling skills, laboratory tests, and case studies of subsurface transport. Three hours

lecture, discussion and laboratory a week. Prerequisites: Hydrpgeology or permission of instructor.

GEOLOGY 408 Archaeological Field Survey Methods

This class offers instruction in the basic skills required to conduct field surveys in archaeology and other geosciences disciplines. In the classroom, students learn about the development of archaeology as a scientific discipline and how to recognize some of the basic field data sought by archaeologists. Students learn about mapping and land navigation techniques. The field phase of instruction includes visits to archaeological sites in the region.

GEOLOGY 409 Field School in Archaeology

This class offers students an opportunity to attend a field school in archaeology. Students will be taught how to: design archaeological research, set-up excavation, keep a wide range of excavation records, make maps and drawings, take photographs related to excavation problems, identify and receiver a broad spectrum if artifact and faunal remains, collect samples for specialized analysis and use a wide range of excavation tools. This course will also introduce students to recording and analyzing excavated materials in the archaeological laboratory. Prerequisite: Consent of the instructor. Restrictions: Class size limited to 20 students.

GEOLOGY 409 Field School in Archaeology

This class offers students an opportunity to attend a field school in archaeology. Students will be taught how to: design archaeological research, set-up excavation, keep a wide range of excavation records, make maps and drawings, take photographs related to excavation problems, identify and receiver a broad spectrum if artifact and faunal remains, collect samples for specialized analysis and use a wide range of excavation tools. This course will also introduce students to recording and analyzing excavated materials in the archaeological laboratory. Prerequisite: Consent of the instructor. Restrictions: Class size limited to 20 students.

GEOLOGY 411 Mineral Deposits

Distribution, origin and environmental implications of extractable resources including non-metallic deposits, ores, and selected energy resources. Prerequisite: Instructor's permission Offered: On Demand

GEOLOGY 411 Mineral Deposits

Distribution, origin and environmental implications of extractable resources including non-metallic deposits, ores, and selected energy resources. Prerequisite: Instructor's permission Offered: On Demand

GEOLOGY 412 Geology And Hazardous Waste Management

Nature sources and characterization of hazardous waste; collection, transportation and disposal of hazardous wastes. Fundamentals of toxicology and risk assessment. Application of geologic principles and methods in the assessments and remediation of abandoned hazardous waste sites and contaminated aquifers. Review of selected case histories. Experts from government and private organizations will be invited to deliver guest lectures. An out-of-town field trip to a hazardous waste site is required. Prerequisites: GEOLOGY 325, GEOLOGY 342, and GEOLOGY 350 or permission of the instructor.

GEOLOGY 412 Geology And Hazardous Waste Management

Nature sources and characterization of hazardous waste; collection, transportation and disposal of hazardous wastes. Fundamentals of toxicology and risk assessment. Application of geologic principles and methods in the assessments and remediation of abandoned hazardous waste sites and contaminated aquifers. Review of selected case histories. Experts from government and private organizations will be invited to deliver guest lectures. An out-of-town field trip to a hazardous waste site is required. Prerequisites: GEOLOGY 325, GEOLOGY 342, and GEOLOGY 350 or permission of the instructor.

GEOLOGY 417 Special Topics

Individual research and study of a selected topic in geology or earth science. Prerequisites: Approval of instructor and departmental sanction. On demand.

GEOLOGY 417A Special Topics: Common Rocks, Minerals & Fossils Of The K C Area

GEOLOGY 417C Special Topics

GEOLOGY 425 Engineering Geology

Review of engineering properties of rock and soils. Evaluation of geologic materials for civil engineering construction projects. Techniques of engineering geologic investigations; special problems in urban areas. Data evaluation, analyses, and preparation of engineering geologic reports. Application of geologic factors in design and construction of dams, tunnels, power plants, highways and waste disposal facilities. Review of engineering geologic case histories. A field trip is required. Prerequisite: GEOLOGY

325, GEOLOGY 342, and GEOLOGY 350, and permission of instructor. On demand.

GEOLOGY 434 Hazardous Waste Operations Management

Overview of federal regulations dealing with hazardous waste management, toxicology, hazard communication, site management, air monitoring, operating procedures, and health and safety. The course includes hands-on training on spill control, equipment use and emergency response. Practical training involves physical stress and participants must be in good physical health. This course satisfies OSHA's 40 hour training requirement for hazardous waste personnel. Prerequisite: Permission of instructor Offered: On demand

GEOLOGY 435 Hazardous Waste Operation Management

Review of federal regulations governing hazardous waste management, operations procedures, and health and safety issues. Hands-on training on spill control, equipment use, and emergency response will be included. The course satisfies OSHA's 40-hour training requirement for hazardous waste personnel. Practical training involves physical stress and participants must be in good health. Prerequisites: GEOLOGY 302, GEOLOGY / GEOG 335, GEOLOGY 412 or permission of instructor Restrictions: Must be in good health to withstand physical stress during training Offered: Winter

GEOLOGY 441 Environmental Geophysics

Fundamental theory and near-surface applications of the geophysical methods; (1) seismic refraction, (2) seismic reflection, (3) gravity, and (4) magnetics. Emphasis will be placed on the use of these methods in environmental and engineering investigations, addressing such issues as water resources, contaminant transport, geotechnical properties and archaeological protection. Course will include a field component illustrating application of selected techniques to local environmental problem. Prerequisites: Permission of instructor Offered: On demand

GEOLOGY 442R Optical Crystallography

Theory and practical application of polarized light microscopy in the identification and characterization of crystalline and non-crystalline materials. Special emphasis is given to use of refractive index oils and thin sections. Two hours of lecture and discussion, one 2-hour lab per week. Prerequisite: GEOLOGY 312, Mineralogy or consent of instructor Offered: Winter bi-annually

GEOLOGY 442R Optical Crystallography

Theory and practical application of polarized light microscopy in the identification and characterization of crystalline and non-crystalline materials. Special emphasis is given to use of refractive index oils and thin sections. Two hours of lecture and discussion, one 2-hour lab per week. Prerequisite: GEOLOGY 312, Mineralogy or consent of instructor Offered: Winter bi-annually

GEOLOGY 446 Petroleum Geology

Study of the origin, concentration, exploration for and recovery of petroleum. Prerequisite: Geology 220. On demand.

GEOLOGY 451 Geology's Role In Land Use Planning

Examination of principles and techniques of geology as related to land use planning. Lecture and discussion periods devoted to topics such as physical features of soils in an urban setting, geophysical surveying, photo interpretation, engineering geology, mineral and water resources, and multiple-tier planning. Lecture, discussion and laboratory. Prerequisite: GEOLOGY 220 or ENV-SCI 110R Offered: On demand.

GEOLOGY 460 Introduction To Geochemistry

Basic principles governing the origin, distribution and migration of the elements and the geochemical cycles operating in the earth's atmosphere, hydrosphere and lithosphere. Prerequisite: GEOLOGY 312, CHEM 212. On demand.

GEOLOGY 460 Introduction To Geochemistry

Basic principles governing the origin, distribution and migration of the elements and the geochemical cycles operating in the earth's atmosphere, hydrosphere and lithosphere. Prerequisite: GEOLOGY 312, CHEM 212. On demand.

GEOLOGY 470 Geological Development Of North America

A detailed inquiry into the stratigraphic framework of North America with special emphasis on orogenic and epirogenic events reflected in Phanerozoic rock associations. Through lectures, discussion and outside readings, the student is afforded a working knowledge of the continent's major tectonic provinces and their evolution. Prerequisite: Geology 325, 342, 350. On demand.

GEOLOGY 470 Geological Development Of North America

A detailed inquiry into the stratigraphic framework of North America with special emphasis on orogenic and epirogenic events reflected in Phanerozoic rock associations. Through lectures, discussion and outside readings, the student is afforded a working knowledge of the continent's major tectonic provinces and their evolution. Prerequisite: Geology 325, 342, 350. On demand.

GEOLOGY 471 Tectonics

A detailed inquiry into plate tectonics and the geophysical and geological data that define the motion of lithospheric plates. Global examples of divergent, convergent, and transform plate boundaries will be studied through lectures, discussions, problem sets, and term papers. Prerequisite: GEOLOGY 325 and GEOLOGY 350. Offered: On demand.

GEOLOGY 472 Earthquake Geology

A detailed inquiry into the study of present and past earthquakes as they are preserved in the seismological, geophysical, and geologic record. Global examples of earthquakes will be studied through lectures, discussions, problem sets, term papers, field trips and field projects.

GEOLOGY 490 Geology Field Camp

Study and practical involvement in the methods of geological mapping. The six-week course is conducted during the summer, partially in a field camp away from the Kansas City area. Students pay their own travel expenses to and from the field. Participation in the course involves individual mapping in the field area and field reports. Prerequisite: Permission of instructor. Summer.

GEOLOGY 496 Geology Internship

Students gain directed practical experience working with non-profits, governments, or private enterprises. Duties will vary based on contractual agreement between the student, host organization, and the professor. Students should have junior standing or higher, or the instructor's permission. Prerequisites: Permission of Instructor. Offered: Summer, Fall or Winter as available

GEOLOGY 496 Geology Internship

Students gain directed practical experience working with non-profits, governments, or private enterprises. Duties will vary based on contractual agreement between the student, host organization, and the professor. Students should have junior standing or higher, or the instructor's permission. Prerequisites: Permission of Instructor. Offered: Summer, Fall or Winter as available

GEOLOGY 498 Undergraduate Field Research

The student will collaborate with fellow students and instructors in collection of original field geologic data at a location remote from campus. Field research will be carried out during semester intersessions or summer semesters. Prerequisite: Permission of instructor Semester offered: On demand

GEOLOGY 499WI Geology Seminar

Students participate in discussions; present formal talks; and prepare written papers on selected topics. Prerequisite: Senior standing and successful completion of the WEPT Offered: Winter

German (GERMAN)**GERMAN 110** Elementary German I

The goals of this course are an ability to speak and to understand simple (spoken) German as well as to read and write simple prose.

GERMAN 111 Introduction To Business German I

The goals of this course are the development of essential language skills in order to communicate effectively in basic situations.

GERMAN 120 Elementary German II

Continuation of German 110. Prerequisite(s): German 110 or equivalent.

GERMAN 121 Introduction To Business German II

German 121 (5 Credits): Continuation of German 111. Every Semester. Prerequisites: GERMAN 110 or GERMAN 111 or equivalent.

GERMAN 121 Introduction To Business German II

German 121 (5 Credits): Continuation of German 111. Every Semester. Prerequisites: GERMAN 110 or GERMAN 111 or equivalent.

GERMAN 211 Second-Year German I

Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language. Prerequisite: GERMAN 120. Fall.

GERMAN 221 Second-Year German II

Continuation of GERMAN 211. Winter semester.

GERMAN 221 Second-Year German II
Continuation of GERMAN 211. Winter semester.

GERMAN 250 Commercial German
Business practices and correspondence in the German language; special vocabulary of business, trade, banking and administration. Refinement of grammatical and stylistic skills. Subjects treated include price inquiries, quotations, offers, orders, complaints, administrative, banking and diplomatic correspondence. Prerequisite: GERMAN 221 or equivalent.

GERMAN 280 Special Intermediate German Topics I
Instruction of German on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit. Prerequisite: Elementary I and II college-level courses or equivalent. As needed.

GERMAN 290 Special Intermediate German Topics II
Continuation of GERMAN 280. May not be repeated for credit. As needed.

GERMAN 300CZ CC: The Other Europe
This cluster course addresses a crucial, if often overlooked arena of history and culture: East-Central Europe. Open to all undergraduates, this course will explore the challenges of geopolitics, modernization, Western influences, multiethnic societies, and collective memory. Cross-listed with Hist 400cz.

GERMAN 301 Introduction To Literary Studies
An introduction to the study of the different genres of German literature and techniques of criticism. Readings include representative works of major authors from various periods. Strongly recommended for all majors. To be taken before or concurrently with other literature courses. Odd numbered years, Spring. Taught in German.

GERMAN 301 Introduction To Literary Studies
An introduction to the study of the different genres of German literature and techniques of criticism. Readings include representative works of major authors from various periods. Strongly recommended for all majors. To be taken before or concurrently with other literature courses. Odd numbered years, Spring. Taught in German.

GERMAN 305 Current Events In Germany
This course focuses on contemporary issues in Germany such as politics, the economy, foreign affairs, culture, science, education, etc. Various television news programs, news magazines, and newspapers will be the primary sources of information in this course. Prerequisites: GERMAN 221 or equivalent.

GERMAN 306 Aspects Of Contemporary German Culture (Conducted In German)
The goal of the course is to familiarize the student with various aspects of contemporary culture in the German-speaking countries (Germany, Switzerland, Austria). The class will be structured around lectures, guest lectures, audiovisual presentations and discussions, emphasizing crosscultural comparisons.

GERMAN 307 From The Middle Ages To The Baroque
The goal of this course is to introduce students to the history of German literature from the Middle Ages to the Baroque, emphasizing the historical and social context and the development of various genres. Prerequisite: GERMAN 221 or equivalent . Offered: On Demand.

GERMAN 308 From The Enlightenment Through The 19Th Century
The goal of this course is to introduce students to the history of German literature from the Enlightenment through the 19th century, emphasizing the historical and social context and the development of various genres. Prerequisite: GERMAN 221 or equivalent. Offered: On demand.

GERMAN 310 Classical Period Of German Literature
Readings in the late 18th and 19th centuries with emphasis on Goethe and Schiller.

GERMAN 313 CC: Intro to German Studies
This cluster course explores major themes in German culture, history, and philosophy from the medieval period to the present. Concentrating on primary sources in English translation also introduces students to the methodologies of German Studies. German language ability not required, but class can count toward German major for students who do the written work in German. Cross-listed as History 400GS. Prerequisites: English 110 or History 206.

GERMAN 315 Intermediate Conversation And Composition I
Practice in speaking and writing German; emphasis on idiomatic usage. Required for major. Prerequisite: GERMAN 221 or

equivalent. Fall semester.

GERMAN 315 Intermediate Conversation And Composition I

Practice in speaking and writing German; emphasis on idiomatic usage. Required for major. Prerequisite: GERMAN 221 or equivalent. Fall semester.

GERMAN 325 Intermediate Conversation And Composition II

Continuation of GERMAN 315. Required for major. Prerequisite: German 315. Winter semester.

GERMAN 325 Intermediate Conversation And Composition II

Continuation of GERMAN 315. Required for major. Prerequisite: German 315. Winter semester.

GERMAN 335 Commercial German

The class covers business practices and correspondence in the German language; special vocabulary of business, economics, banking, and their contextualization in the European Union. It will also include refinement of grammatical and stylistic skills. Prerequisite: German 221 or equivalent.

GERMAN 340 Society And Literature In 20Th-Century Germany

Conducted in English with English translations. Literary currents and figures in 20th-century Germany against their social and political background, from the turn of the century to the postwar period. Reading and discussion of major works by such authors as Thomas Mann, Hesse, Kafka, Rilke, Brecht, Boll, Grass, Hochhuth and Weiss. Open to students of all disciplines. (Not for major credit in German).

GERMAN 341 Survey Of German Film 1920-1980

Introduces students to the important contributions of German films to the development of movies as a unique literary art form. The class will cover important terms and concepts in film theory, the specifically German context of film, and important themes and periods in German film history. Taught in English with subtitled films.

GERMAN 342 Contemporary German Film 1980-

This course will introduce students to the important role film has played in the public discourse about German society immediately prior to reunification in the 1980's and during the turbulent social adjustments in unified Germany after 1990. Lectures and readings in the first week will cover important terms and concepts in film theory as well as provide background for the specific German context of film history. The class will treat film in the 1980's in terms of continuations of and liberations from the New German Cinema of the 1970's in West Germany, and in the context of state censorship and sponsorship of film in East Germany. We will approach movies from the 1990s and 2000's by accessing their depiction of historical and contemporary Germany through the lens of reunification, and we will examine issues of German identity especially as contextualized by reunification and multiculturalism. The course will be taught in English with subtitled films. Prerequisite: GERMAN 315 for German majors/minors

GERMAN 345 The Antifascist Tradition In Germany

This course examines the political and cultural roots of German fascism. It then discusses varieties of resistance to fascism as exemplified in works of fiction, drama, poetry and auto-biography, as well as in music and the visual arts.

GERMAN 360 Ingolstadt Study Abroad

Academic support and inquiry for GERMAN 361, Ingolstadt Internship. Provides cultural and language training as well as extended research into specific field of service learning internship during 4-week stay in the German city of Ingolstadt. Prerequisite: GERMAN 221 or equivalent. Restrictions: Must be taken with GERMAN 361. Only 2 students are guaranteed participation per summer. Offered: Summer semester.

GERMAN 360 Ingolstadt Study Abroad

Academic support and inquiry for GERMAN 361, Ingolstadt Internship. Provides cultural and language training as well as extended research into specific field of service learning internship during 4-week stay in the German city of Ingolstadt. Prerequisite: GERMAN 221 or equivalent. Restrictions: Must be taken with GERMAN 361. Only 2 students are guaranteed participation per summer. Offered: Summer semester.

GERMAN 361 Ingolstadt Practicum and Internship

Students will choose a service learning assignment from available internships during 4-week stay in the German city of Ingolstadt. Progress checks and support provided for in GERMAN 360, Ingolstadt Study Abroad. Students will also turn in a portfolio and/or journal and final report about their activities in German to the program director. Prerequisite: GERMAN 221 or equivalent. Restrictions: Must be taken with GERMAN 360. Only 2 students per summer are guaranteed participation. Offered: Summer semester.

GERMAN 361 Ingolstadt Practicum and Internship

Students will choose a service learning assignment from available internships during 4-week stay in the German city of Ingolstadt. Progress checks and support provided for in GERMAN 360, Ingolstadt Study Abroad. Students will also turn in a portfolio and/or journal and final report about their activities in German to the program director. Prerequisite: GERMAN 221 or equivalent. Restrictions: Must be taken with GERMAN 360. Only 2 students per summer are guaranteed participation. Offered: Summer semester.

GERMAN 400 Rainer Maria Rilke

The course examines the works of the Austrian poet Rainer Maria Rilke, emphasizing close readings of texts in their historical, cultural, biographical and psychological contexts. It examines Rilke both as a representative of his epoch, and as the poet who revolutionized German poetic language.

GERMAN 401 Bertolt Brecht

Covers major works by Brecht in their social and historical context. May focus on a specific genre or survey parts or all of Brecht's career. Discussions and readings in German. Prerequisite: GERMAN 315 or instructor's permission. Offered: On Demand

GERMAN 410 Music in German Culture

This course examines the role of music in German national self-definition from late 18th century to the present. The political and ideological role of music will be examined from 1789 to National Socialism, the GDR and reunification, including the gendering of music as feminine in Romanticism, and modernism. Music as it relates to the public and private, as well as collective and individual experiences will also be explored. Different genres and media will be discussed, from opera, art song, and cabaret to ballads and film; literary works thematizing music will be read. Prerequisites: German 315 or instructor's permission

GERMAN 410A Music in German Culture

This course examines the role of music in German national self-definition from late 18th century to the present. The political and ideological role of music will be examined from 1789 to National Socialism, the GDR and reunification, including the gendering of music as feminine in Romanticism, and modernism. Music as it relates to the public and private, as well as collective and individual experiences will also be explored. Different genres and media will be discussed, from opera, art song, and cabaret to ballads and film; literary works thematizing music will be read. All works available in English: no German required.

GERMAN 411 Romanticism

Main currents and authors from the Romantic school, 1780-1820.

GERMAN 412 The German Novelle

An examination of representative novellen of the 19th and 20th centuries. Special emphasis on the study of form.

GERMAN 414 German Lyric Poetry

Lyric poetry from its beginnings to the present. Emphasis on 19th and 20th centuries.

GERMAN 415 Advanced Conversation And Composition I

Practice in speaking and writing German, with attention to the elements of style. Continued in GERMAN 425. First semester required of all majors and second semester recommended. Both semesters required of prospective high school teachers. Either or both semesters may be repeated with the consent of the instructor and the German section head. No more than six hours credit may be applied towards a degree. Prerequisite: GERMAN 325.

GERMAN 420 German Enlightenment Drama

This course covers plays, dramatic theories and theater history in the German-speaking countries 1730-1780. Emphasis will be placed on the theater as a bourgeois instrument of public discourse. Prerequisites: German 315 or equivalent.

GERMAN 421 19Th-Century Drama

Kleist through Hauptmann.

GERMAN 422 Contemporary Drama

This course will provide students with a survey of the most important dramatic movements of the 20th century. It will proceed chronologically through Expressionism, the Brechtian theatre of alienation, documentary theater and post-modernist theater. Prerequisite: GERMAN 221

GERMAN 425 Advanced Conversation And Composition II

Continuation of GERMAN 415. See GERMAN 415. Required for teacher certification in German. Prerequisite: GERMAN 415.

GERMAN 426 20Th-Century German Literature
Selected readings from Neo-Romanticism to the present. On demand.

GERMAN 453 Women's Voices In Germany And Austria
The course focuses on the role of women in German and Austrian society from the Roman era to the present, primarily through the examination of literary texts by women. Prerequisite: GERMAN 221

GERMAN 480 Special Topics
Each time this course is offered a particular author, genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes. Offered: On demand.

GERMAN 480B Special Topics

GERMAN 490 Special Readings
Intensive readings in a field or literary figure to be selected by the student in consultation with the instructor. Available by permission only to advanced students of German; available only when student cannot take regularly scheduled courses. Prerequisite: 3.0 GPA. On demand.

GERMAN 499 Senior Seminar (Capstone)
Required for major. Covers seminal works of German literature in their historical and cultural context. Course content varies, but will include such elements as geography, politics, folklore, history of the language, architecture, art and music. To be taken during final Winter Semester of residence. Prerequisite: 21 hours beyond first year.

GERMAN 499 Senior Seminar (Capstone)
Required for major. Covers seminal works of German literature in their historical and cultural context. Course content varies, but will include such elements as geography, politics, folklore, history of the language, architecture, art and music. To be taken during final Winter Semester of residence. Prerequisite: 21 hours beyond first year.

Greek (GREEK)

GREEK 110 Elementary Ancient Greek I
The goal of this course is an ability to read classical Greek. The student will be introduced to the fundamentals of grammar and the basic vocabulary of the language and will do exercises in the reading and writing of sentences. Continuous passages of Greek will be presented by the end of the semester.

GREEK 110 Elementary Ancient Greek I
The goal of this course is an ability to read classical Greek. The student will be introduced to the fundamentals of grammar and the basic vocabulary of the language and will do exercises in the reading and writing of sentences. Continuous passages of Greek will be presented by the end of the semester.

GREEK 110 Elementary Ancient Greek I
The goal of this course is an ability to read classical Greek. The student will be introduced to the fundamentals of grammar and the basic vocabulary of the language and will do exercises in the reading and writing of sentences. Continuous passages of Greek will be presented by the end of the semester.

GREEK 120 Elementary Ancient Greek II
A continuation of the study of the grammar and vocabulary of classical Greek, with an increasing emphasis on developing skills in translation. By the middle of the semester students will be introduced to selections from Plato, Herodotus or Homer. Prerequisite(s) Greek 110 or consent of instructor

GREEK 120 Elementary Ancient Greek II
A continuation of the study of the grammar and vocabulary of classical Greek, with an increasing emphasis on developing skills in translation. By the middle of the semester students will be introduced to selections from Plato, Herodotus or Homer. Prerequisite(s) Greek 110 or consent of instructor

GREEK 211 Intermediate Ancient Greek I
Instruction of Greek on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit. Prerequisite: Greek 120 or consent of instructor

GREEK 221 Intermediate Ancient Greek II

Continuation of GREEK 280. May not be repeated for credit. As needed. Prerequisite: Greek 211 or consent of instructor

GREEK 280 Special Intermediate Greek Topics I

Instruction of Greek on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit. Prerequisite: Elementary I and II college-level courses or equivalent. As needed.

GREEK 290 Special Intermediate Greek Topics II

Continuation of GREEK 280. May not be repeated for credit. As needed.

GREEK 301 Herodotus

Selected readings in Ancient Greek from Herodotus' Histories. Prerequisite: Greek 211 or consent of the instructor.

GREEK 302 Homer

Selected readings in Ancient Greek from Homer's Iliad or Odyssey. Prerequisite: Greek 211 or consent of the instructor.

GREEK 310 Selected Readings in Ancient Greek and Rhetoric

Selected readings in Ancient Greek from works by Plato, Aristotle, or the Attic Orators. Prerequisite: Greek 211 or Consent of the instructor.

GREEK 311 Drama and Lyric Poetry

Selected readings in Ancient Greek from plays by Aeschylus, Sophocles, Euripides, or the Lyric Poets. Prerequisite: Greek 211 or consent of the instructor.

GREEK 312 Greek Narrative Prose

Selected readings in Ancient Greek from Herodotus, Thucydides, Xenophon, Lucian, etc. Prerequisite: Greek 211 or consent of the instructor.

GREEK 490 Special Readings In Greek

Intensive readings in period or genre or literary figure to be selected by the student in consultation with the instructor. Available only to advanced Greek students. On demand.

History (HISTORY)

HISTORY 101 American History To 1877

This course covers the evolution of American civilization from its colonial beginnings to Reconstruction. It is not a prerequisite for 102. Fall, winter, summer.

HISTORY 102 American History Since 1877

This covers American history from the end of Reconstruction to the present. HISTORY 101 is not a prerequisite for this course. Fall, winter, summer.

HISTORY 201 Western Civilization To 1600

This course surveys the political, social and cultural history of Europe from ancient times to 1600. Beginning with a brief description of the riverine civilizations of the ancient Near East, the course then examines the political and cultural evolution of classical Greco-Roman civilization, the medieval world, the rise of the national state, and the essential characteristics of the eras of the Renaissance and Reformation. Fall, Summer, Winter.

HISTORY 202 Western Civilization Since 1600

This course surveys the political, economic, social, intellectual, and cultural history of Europe from about 1600 to the present, through these major developments in those centuries: the origins of the modern sovereign state (absolutist and constitutional), the English revolutions; the European Enlightenment, the French Revolution, and Napoleonic Europe; Romanticism and Scientism in culture and thought, the Industrial Revolution and urban society, and nationalism and imperialism; the two world wars, the Russian Revolution, dictators and totalitarian states, and the current postwar world and culture. Fall, Summer, Winter.

HISTORY 206 World History To 1600

This course is a comparative history of the civilizations of the world from prehistory to the seventeenth century. From a global perspective, this course explores themes relevant to social, political, and cultural history, such as science and technology, women and social classes, religion, politics, and education. Images of art and examples of primary sources enrich the lectures and readings.

HISTORY 208 World Civilization Since 1600

This course surveys the social, economic, political and institutional history of the world from the 17th century to the present. It is designed to foster deeper understanding of the continuity between past and present and of the interdependence among nations in contemporary times.

HISTORY 208 World Civilization Since 1600

This course surveys the social, economic, political and institutional history of the world from the 17th century to the present. It is designed to foster deeper understanding of the continuity between past and present and of the interdependence among nations in contemporary times.

HISTORY 250 Introduction To American Studies

An introduction to the American Experience through the study of selected themes and issues that stress both continuity and change in America. Topics include community, family, ethnic groups, racial conflict, science and religion, the arts, sports, mass media, technological innovation and immigration and migration. The interdisciplinary nature of American Culture will be stressed. Prerequisite: None. Offered: Alternate Years.

HISTORY 300CF Cluster Course: Race in American Film

This course examines representations of race and ethnicity in American film from the silent era onward in mainstream and countercultural traditions. It explores how social, political, and economic conditions contribute to constructions of race and ethnicity. This course is offered as a cluster course with Comm-St 405CD and English 300CQ.

HISTORY 300CO CC:Women In the Ancient World

This focuses on the history, representation, literature, social lives, and political roles of women in ancient civilization including Egypt, Mesopotamia, the Biblical World, Greece, and Rome. It integrates methodologies from history, art history and archaeology, literary studies, and women's studies.

HISTORY 300WY Decade of Dissent: The 1960s

The social movements and conflicts that developed during the 1960s continue to define American culture. Questions of racial and gender equity, a greater willingness to challenge authority, concerns about the environment, and a new openness about issues of sexuality all developed during the sixties and remain as arenas of debate today. This course will examine the origins, contexts, and major themes of these social and cultural movements.

HISTORY 300WY Decade of Dissent: The 1960s

The social movements and conflicts that developed during the 1960s continue to define American culture. Questions of racial and gender equity, a greater willingness to challenge authority, concerns about the environment, and a new openness about issues of sexuality all developed during the sixties and remain as arenas of debate today. This course will examine the origins, contexts, and major themes of these social and cultural movements.

HISTORY 301WI Historiography And Method

This basic course is required of all history majors at the beginning of the junior year. Content includes: 1) what history is; 2) its value and usefulness; 3) the diversity of our fields, approaches, and methods; and 4) the techniques of preparing and writing history papers. Texts and reading are approved by the Department. (i.e.: Turabian for style). Although the emphasis is general instead of particular, the instructor will be assisted by other historians representing their main special interest areas. Prerequisite: Successful completion of the WEPT (effective FS93). Offered: Fall and winter.

HISTORY 302 America, 1000-1763: The Formative Era

Early American history encompasses the formative era of many institutions and attitudes which still persist in technetronic, post-modern America. A study of how these patterns and policies emerged will enlighten us as to our current ways society seeks to adapt to change. Semester offered: On demand

HISTORY 303 America, 1763-1783: The Revolutionary Heritage

The American Revolution created American history by creating a new nation. What the American Revolution was depends to a large extent upon what Americans think they are or ought to be. The goals of this course, therefore, are twofold: (1) to probe the nature, causes and consequences of the American Revolution; (2) to assess the intentions and behavior of both the Framers in 1763-1783 and of the inheritors of modern America. Also offered as HISTORY 503. Semester offered: On demand

HISTORY 303 America, 1763-1783: The Revolutionary Heritage

The American Revolution created American history by creating a new nation. What the American Revolution was depends to a

large extent upon what Americans think they are or ought to be. The goals of this course, therefore, are twofold: (1) to probe the nature, causes and consequences of the American Revolution; (2) to assess the intentions and behavior of both the Framers in 1763-1783 and of the inheritors of modern America. Also offered as HISTORY 503. Semester offered: On demand

HISTORY 304 America, 1783-1828: The National Experience

The two major threads of this course are the formation and implementation of the Constitution and the cultural adolescence of the new nation. Topics considered include the political bequest of the framers' generation, the growing pains of territorial expansion and industrialism, the paradoxical development of regionalism and nationalism. Also offered as HISTORY 504.

HISTORY 305 America, 1828-1852: The Jacksonian Period

An analysis of the political, social, economic, and intellectual factors in American society, 1828-1852. The period featured the presidency of Andrew Jackson, the shaping of a new democratic ideology, the culmination of manifest destiny, the quickening of the antislavery impulse, the Mexican War, the growing sectional split, and the Compromise of 1850. Also offered as HISTORY 505.

HISTORY 306 America, 1850-1877: Civil War And Reconstruction

A survey of the political, social and economic factors leading to the dissolution of the federal union is followed by a consideration of the major features and developments of the war period. This, in turn, leads to an analysis of the major factors and relationships involved in the "reconstruction" of the federal union. The course covers the years 1850 to 1877. Also offered as HISTORY 506.

HISTORY 306A History of Christianity to the Middle Ages

This course examines the historical and theological development of Christianity from its origins to the High Middle Ages. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major social, institutional, and intellectual force with a focus on patterns of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship. Cross listed as Religious Studies 306

HISTORY 307 America 1877-1917: Development Of Industrial America

This course deals with the reactions of different groups of Americans to the industrialization and urbanization of the United States from 1877 to 1917, using concepts associated with modernization upon the behavior of the business community, farmers, laborers, immigrants, professionals and major ethno-cultural groupings. Other contemporary proposals for the adjustment to industrialism are explained as well as the programs which each group eventually used to adjust to modern society. Also offered as HISTORY 507.

HISTORY 307A History of Christianity from the Middles Ages to Present

This course examines the historical and theological development of Christianity from the High Middle Ages to the present. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major social, institutional, and intellectual force with a focus on patterns of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship. cross-listed as Religious Studies 307

HISTORY 308A America: 1914-1945: The Era Of The World Wars

This course examines United States social, intellectual, economic, political and diplomatic history from the beginning of World War I to the end of World War II. Special emphasis is placed on the coexistence of realism and idealism in American foreign policy, the evolution of power shifts within the American federal system, and the causes and consequences of rapid urban growth and increased industrial sophistication. Students examine the material and social texture of life during the two world wars, the so-called "roaring 20s", and the Great Depression through contemporary art forms (especially novels) and historical monographs.

HISTORY 308B America: 1945-Present: Our Times

This course examines United States social, intellectual, economic, political, and diplomatic history from the end of World War II to the present. Given our focus on the recent past, special emphasis is placed upon the importance of the historical perspective to an understanding of contemporary affairs. Major themes include: America's rise to the world power, the development of the Keynesian welfare state, the concentration of corporate wealth and power, the persistence of poverty amidst plenty, and the changing status of American minority groups.

HISTORY 330PW The Works Of Western Man

In the period 1750-1987, the nations bordering the Atlantic Ocean, largely relying on their technological advances, became world powers. This course, relying on analysis of films plus required readings, will survey the energy sources employed, the tools developed, and the regimes of the workplace which led to this dominance. Grades will be assigned to three types of exercises: frequent quizzes, a mini-project in historical research and a book critique of a piece of fiction. Prerequisite: Successful completion of the WEPT (effective FS93).

HISTORY 330PW The Works Of Western Man

This course, relying on analysis of films plus required readings, will survey the energy sources employed, the tools developed, and the regimes of the workplace which led to this dominance. Grades will be assigned to three types of exercises: frequent quizzes, a mini-project in historical research and a book critique of a piece of fiction. Prerequisite: Successful completion of the WEPT (effective FS93).

HISTORY 331P America In The Machine Age

The United States has experienced repeated waves of technological advancements. This course will largely focus on industrialization in the 19th century as well as consumer society of our own era. How Americans produced goods and what were the dynamics of the market place are two central themes. Required readings will be complemented by films and presentations from resource persons throughout Kansas City. A research project and three tests are required.

HISTORY 331P America In The Machine Age

The United States has experienced repeated waves of technological advancements. This course will largely focus on industrialization in the 19th century as well as consumer society of our own era. How Americans produced goods and what were the dynamics of the market place are two central themes. Required readings will be complemented by films and presentations from resource persons throughout Kansas City. A research project and three tests are required.

HISTORY 332P The City: Past And Present

This course treats the built environment, especially the urban infrastructure. Both systems and structures of the cityscape are examined from a historical perspective, with three metropolises (Rome, Paris, New York) and Kansas City serving as case studies. The technical areas include shelter, public buildings, transportation, water supply, power, waste management, communications, and the like. Projects are included. Offered: Every 2 years.

HISTORY 333 Introduction to African American Studies

This course provides an introduction to the contexts, theories, and methodologies that undergird African American studies. In addition to substantial time spent covering particular research skills and resources, students will also be introduced to African American culture and the issues related to African American studies from several perspectives: history, literature, sociology, communication studies, and the like. Influences and perspectives from Africa, the Caribbean and South America will also be covered. The course will thus provide a broad background in African American culture and history, an introduction to the methodologies of several disciplines, and discussion of particular contemporary and historical issues such as slavery, segregation and integration, the Civil Rights Movement, Pan-Africanism, Afrocentrism, and current political debates.

HISTORY 352 Latin American History Through the Movies

This course explores the national cinemas and film industries of various regions in Latin America. Students analyze films both as artistic endeavors and as sociological documents that provide a window into the socio-historical context of the nation in question. This course will also examine the history of Latin American cinema from the beginnings of sound to the present.

HISTORY 354R Women In Modern America

This course traces the part women have played in the processes of industrialization and urbanization. It looks at the general demographic, economic and social changes affecting women of all classes, as well as the role of middle-class women in the progressive, prohibition and suffrage movements. The course will also study the impact of the two world wars and the Depression upon the roles of women. Also offered as HISTORY 554.

HISTORY 356 Rise Of The City In The U.S.

This course treats the background and major developments of the urbanization of the United States. Includes the American urban tradition, the scope of urbanization, colonial beginnings, urban rivalries, promotion, case studies of cities, the growth of urban services, the slum, problems of government, population trends, urban planning, and suburban growth. Consideration is also given to the methods and techniques of urban research and history of the development of this field. Also offered as HISTORY 556.

HISTORY 356 Rise Of The City In The U.S.

This course treats the background and major developments of the urbanization of the United States. Includes the American urban tradition, the scope of urbanization, colonial beginnings, urban rivalries, promotion, case studies of cities, the growth of urban services, the slum, problems of government, population trends, urban planning, and suburban growth. Consideration is also given to the methods and techniques of urban research and history of the development of this field. Also offered as HISTORY 556.

HISTORY 356R Kansas City: History Of A Regional Metropolis

This course uses Kansas City as an urban laboratory to help students better understand the dynamics of the urbanization process in America. It features lectures and discussions on such subjects as early settlement patterns, the battle for the first bridge over the Missouri River, the development of an economy based on agricultural pursuits, the City Beautiful Movement, the social fabric, the Pendergast Machine, and the impact of World War II and after. The course fits Kansas City into the larger framework

of the American urban mosaic. Also offered as HISTORY 556R.

HISTORY 356R Kansas City: History Of A Regional Metropolis

This course uses Kansas City as an urban laboratory to help students better understand the dynamics of the urbanization process in America. It features lectures and discussions on such subjects as early settlement patterns, the battle for the first bridge over the Missouri River, the development of an economy based on agricultural pursuits, the City Beautiful Movement, the social fabric, the Pendergast Machine, and the impact of World War II and after. The course fits Kansas City into the larger framework of the American urban mosaic. Also offered as HISTORY 556R.

HISTORY 357 The American West

This course deals with the relationship of the American West to the social and economic development of the United States. Major emphasis is placed on the role of the trans-Mississippi West in the economic growth of the national economy. Related cultural and political events are evaluated in the terms of the many Western frontiers. Emphasis will be placed on the Turner thesis, the Indian heritage, frontier violence, and the cow town experience. Also offered as HISTORY 557.

HISTORY 358 History Of The American South I

A study of the political, intellectual, cultural, economic, and social development of the American South up to and including the Civil War. Special topics discussed will be the plantation system, slavery, abolition, secession, the Confederacy, and the interaction of the region with the nation. On demand.* Also offered as History 5558.

HISTORY 360R Constitutional History Of The United States

The general question covered is: how does American society govern itself? Topics include the fusion of Anglo traditions and American environment, creation of the American republic under the Constitution of 1787, the struggle for sovereignty during the Marshall-Taney era, and the Supreme Court's utilization of the 14th Amendment to adapt the Constitution to modernity. Also offered as HISTORY 560R.

HISTORY 361 American Foreign Relations

Following a rapid survey of major principles and actions in American diplomatic affairs before 1900, this course analyzes developing principles, problems, methods and factors in American foreign relations since that date. Attention is given to the interrelationships of domestic factors and foreign relations with an attempt to discover principal influences that have shaped this area of American development. Also offered as HISTORY 561R.

HISTORY 364R Nature, Culture And The Human Experience

This course is an introduction to various interpretations of nature with a focus on American culture and society. We will consider ideas about nature from diverse perspectives including history, literature, philosophy and religion-in order to understand how human perceptions and uses shape relations with the natural world. Specific themes include such diverse topics as the aesthetic tradition, environmental thought, and environmental justice.

HISTORY 365A American Environmental History

This course examines the changing relationships between human beings and the natural world through time. The main argument of this course will be that American History looks very different through an environmental lens. Nature is an important category of historical analysis-as well as a topic worthy of historical study itself-and this course will examine themes as diverse as Native American ecology to the modern environment crusade.

HISTORY 365A American Environmental History

This course examines the changing relationships between human beings and the natural world through time. The main argument of this course will be that American History looks very different through an environmental lens. Nature is an important category of historical analysis-as well as a topic worthy of historical study itself-and this course will examine themes as diverse as Native American ecology to the modern environment crusade.

HISTORY 366RR American Labor History

This course examines the history of work and the working class in the U.S. from 1750 to the present. We will focus on the transformation of the workplace, the rise of the union movement, the nature of cultural and political organizations, workers' relationships with other social groups, and the role played by gender, race, and ethnicity in uniting or dividing the working class. Also offered as HISTORY 566RR.

HISTORY 368 Children and Youth in American History

This course-which brings a gendered perspective to the history of childhood and the study of youth-focuses on the changing construction of girlhood and boyhood from precontact to the present. We will examine the variety of forces that have scripted the lives of children and adolescents and explore the active role they have played in shaping their lives and American culture. We will make use of the scholarly literature on childhood and youth as well as examine such primary sources as childbearing

manuals, laws, literature, cartoons, and toys as material culture. Semester offered: On demand

HISTORY 369 Women And Work In Early America

Drawing upon more than two decades of outstanding scholarship that places women and gender at the center of investigation and interpretation, this course focuses on the ways in which gender, race, region and class have shaped the historical experiences of women in north America. We will trace the lives of American women from precontact to 1865 through an examination of a wide variety of social, cultural, economic, and political forces and factors including work and leisure, family life, political activities and organizations, and education Semester offered: On demand

HISTORY 370 Introduction To Material Culture

This course will consider the ways in which material culture contributes to our understanding of history. Scholars have increasingly recognized the significance of "the things they left behind," particularly as they provide insights to the lives of those who did not leave extensive written records. Students will consider all aspects of material culture, drawing largely on examples from American history: architecture, domestic utensils and furnishings, clothing, tools, and good agricultural practices. The courses will emphasize the process of handicraft technology as well as the product, and will consider the impact of modernization upon both process and product. Also offered as HISTORY 570.

HISTORY 391 Archival Methods

This combined discussion and research course will examine the research potential of primary-source materials in the custody of archival depositories and the methodology employed to utilize effectively these resources. An analysis of archival method, specifically in the areas of arrangement, description and preservation, will be emphasized during the discussion portion of the course. Most of the course will be devoted to independent research in various collections of the Regional Archives of the Kansas City Federal Records Center. The course will meet at such places as the Federal Records Center, 2306 Bannister Road, or the Truman Library for both the discussion and research segments. Also offered as HISTORY 591. Summer.

HISTORY 392A Archival Internship

Students work directly with professional archivists and other personnel at the Kansas City Federal Records Center, the Truman Library, Jackson County Historical Society, and similar facilities in the area. Emphasis will be given to areas of arrangement, description and preservation of archival materials. Each student must make individual arrangements through the department. Also offered as HISTORY 592. Prerequisites: None Offered: Fall, Winter, Summer Restriction: Approval of Department Chair

HISTORY 392A Archival Internship

Students work directly with professional archivists and other personnel at the Kansas City Federal Records Center, the Truman Library, Jackson County Historical Society, and similar facilities in the area. Emphasis will be given to areas of arrangement, description and preservation of archival materials. Each student must make individual arrangements through the department. Also offered as HISTORY 592. Prerequisites: None Offered: Fall, Winter, Summer Restriction: Approval of Department Chair

HISTORY 392B Public History Internship

Students work directly with public history and editorial personnel at the Kansas City Museum, the Kansas City Pitch Weekly, the Truman Library, and similar facilities in the area. Depending on the institutional affiliation, emphasis will be given to museum operations and displays, editing, fund-raising, historical research and writing. Each student must make individual arrangements through the department. Also offered as HISTORY 592B. Prerequisites: approval of the department chair.

HISTORY 392B Public History Internship

Students work directly with public history and editorial personnel at the Kansas City Museum, the Kansas City Pitch Weekly, the Truman Library, and similar facilities in the area. Depending on the institutional affiliation, emphasis will be given to museum operations and displays, editing, fund-raising, historical research and writing. Each student must make individual arrangements through the department. Also offered as HISTORY 592B. Prerequisites: approval of the department chair.

HISTORY 393 Museum Studies

This course is designed to acquaint students with specific careers in museums and historical agencies; to introduce students to the wide range of operating issues facing those working in the museum profession on a day-to-day basis; and to familiarize students with the organizations, reference works and resources available to develop the skills and training required for those who choose to make this their profession. Also offered as HISTORY 593. Offered: On demand.

HISTORY 394 African American History Before 1877

This course is a survey of the African American experience from Pre-Columbian exploration through reconstruction. The course focuses on the trans-Atlantic slave trade, slavery in the colonies as well as resistance and abolition movements. Prerequisite: None.

HISTORY 395 African American History Since 1877

This course is a survey of African Americans in the United States from 1877 to the present. The course explores the post-

reconstruction era, civil rights and black nationalistic movements; the concepts of racism, desegregation/integration and separation. Contemporary issues facing a multiracial and pluralistic society are also addressed. Prerequisite: None.

HISTORY 400 Special Studies

Courses on subjects which are not a part of the regular department offering. The courses result from one or more of the following: (1) The expressed desire of students; (2) the broadened or refocused scholarship of a member of the history faculty; (3) the temporary presence of a scholar whose specialization is not reflected in the department's regular offerings; (4) the conclusion by the department that the course meets a community need; (5) the effort of the history faculty to provide an interdisciplinary approach to an era or topic. The course is experimental in the sense that it is a one-time offering with the potential of repetition or modification--depending upon student, faculty and community response. Also offered as HISTORY 500R.

HISTORY 400CC Special Studies

HISTORY 400CF Cluster Course: Courts And Culture In The High Middle Ages

This course offers an interdisciplinary approach to the study of the High Middle Ages. In addition to the regularly scheduled meetings of this self-contained history class, there will be common sessions with students and faculty of English 400CF to look in dept at four royal courts from the 11th, 12th, and 13th centuries. We will focus on the courts of William the Conqueror, Henry II and Eleanor of Aquitaine, Louis IX, and Frederick II Hohenstaufen. Semester offered: On demand

HISTORY 400CL Special Studies

HISTORY 400CM Nazi Occupied Europe & The Holocaust

With the collaboration of many other nations, Nazi Germany attempted a genocidal war to systematically colonize, relocate and annihilate entire social groups, most notably the Jews. Employing an intentionally cosmopolitan perspective, this interdisciplinary cluster-course will explore how ordinary Europeans behaved in these circumstances and the different ways that scholars have attempted to comprehend, analyze and represent those choices.

HISTORY 400CP American Social Film: Silver Screen And The American Dream

This course will combine American social history and American film history. Using Hollywood entertainment films, the course will look at Hollywood as an indicator of social, political, and economic conditions in the U.S. from the early 1900s to the late 1950s. The main topics are war and the threat of war, poverty and affluence, racial tensions, censorship, and political zealotry. A paper is required, and a social history textbook, a film history textbook, a play by Arthur Miller and a collection of articles constitute core readings. This course is offered as a cluster with AMER-ST 300CD, COMM-ST 402CD and ENGLISH 300CD.

HISTORY 400CR Cc:Roman Revolution:History&Culture From The Gracchi To Augustus

In this course, the period of Roman history from the revolution initiated by the Gracchi to the demise of the Republic and the establishment of the Principate under Augustus will be discussed. Political, social and cultural developments will be traced which culminated in the violent death of the old system and a new government established by Augustus acceptable to the tradition-loving Romans. The events will be examined through the words of participants such as Terence, Cato, Polybius, Cicero, Caesar, Sallust, Catullus, Horace, Virgil, and Ovid. The disciplines of history and English will be treated together; therefore all sessions will be held in common. Grades will be based upon two examinations and assigned papers using both historical and English perspectives.

HISTORY 400CS Cluster Course:Clio&The Other Muses:Hist&Culture 5Th Cent Athens

HISTORY 400CW Cluster Course: Critical Issues in Women's & Gender Studies

What does it mean to grow up female in America? How does being female influence the body, the mind, identity? This course is an interdisciplinary exploration of the issues that have shaped the lives of American women throughout the life cycle and across the timeline. This course examines the role that culture and society have played in shaping and defining what it means to be an American girl and woman. May be cross-listed with CC ENG 300CW and/or SOC 300CW.

HISTORY 400CW Cluster Course: Critical Issues in Women's & Gender Studies

HISTORY 400CY Cluster Course: The Ancient World And The Cinema

This course will explore the tradition of depicting the ancient Mediterranean world in film from the early silent era to the present. Topics to be covered include the ways that filmmakers respond to literacy and historical sources from the ancient world, interact with the artistic tradition of films about the ancient world, the relation of these films to other works by the same creative personnel (directors, actors, writers, producers, etc.), and the political and cultural contexts in which the films were released.

HISTORY 400CZ CC: The Other Europe

This cluster course addresses a crucial, if often overlooked arena of history and culture: East-Central Europe. Open to all undergraduates, this course will explore the challenges of geopolitics, modernization, Western influences, multiethnic societies, and collective memory. Cross-listed with German 300 CZ.

HISTORY 401A Religion In America

An in-depth examination of selected aspects of the history of religions in America from the colonial period to the present. Special emphasis will be given to methodological issues in the study of American religious history. Offered: On demand

HISTORY 406 Modern Latin America

This course studies social, political, economic and cultural trends in Latin America in the nineteenth and twentieth centuries. Discussion topics include nation building after independence with an emphasis on gender and race in the creation of national identities and new forms of social stratification; integration of national economies into the world economic system; the expansion of political participation and citizenship; immigration (national and transnational) and the tensions caused by the forces of modernization and tradition. Although the purpose of the course is to provide a general background for a large and diverse region (more than 20 countries), case studies from Argentina, Mexico and Brazil will illustrate the above-mentioned themes and will provide the basis for a comparative regional perspective.

HISTORY 411A Medieval Civilization I

This course covers the period between the decline of the Roman Empire in the West and the Investiture Controversy. Topics include the rise of Christianity and early church-state relationships; the barbarian invasions and the various Germanic kingdoms; the age of Charlemagne; monasticism and feudalism. There will also be special sessions on the civilizations of Islam and Byzantium. Also offered as HISTORY 511.

HISTORY 411B Medieval Civilization II

See HISTORY 400CF / HISTORY 500CF for course description. Also offered as HISTORY 512.

HISTORY 412A Medieval Women & Children

This course explores the roles of women in the social, economic, political and cultural environments of medieval and early modern Europe. We examine the lives of women in all areas of life, from the ordinary to the extraordinary, in urban and rural environments, from the centers of religious and political power to the margins of society. Focus will be on the world of work for urban and peasant women and on the social and legal institutions of marriage, kinship and the family. The course makes extensive use of primary sources by and about women during this period.

HISTORY 412B The Black Death And Late Medieval Society

This course examines all aspects of late medieval and early Renaissance society in Western Europe. The Black Death of 1348/1349 serves as the entry point into the historical study of the economy, demography, and culture during this transitional period. Offered: On demand

HISTORY 413 Renaissance

Beginning with a definition and exploration of the Renaissance as a period of gradual transition between the Middle Ages and the beginning of modern culture, this course concerns itself primarily with the rise and spread of Humanism; the revival of interest in antiquity; the growth of individualism; and the rise of secularism, as well as with the artistic achievements of the period. Also

offered as HISTORY 513.

HISTORY 414 Reformation

Beginning with a description and analysis of the social, intellectual and political aspects of the later Middle Ages, the course continues with an examination of those profound religious, social and political changes which mark the 16th century as the end of the Middle Ages and the beginning of the modern secular era. Also offered as HISTORY 514.

HISTORY 415B 17Th And 18Th Century European History

this course is designed to present the upper-division undergraduate with a firm grasp of the major intellectual, cultural, political and economic developments of 17th and 18th century Europe. It considers the bitter Thirty Years War in Central Europe, the rise of the Netherlands, the fall of Italy and Spain, the rise of constitutional and absolutist styles of government, the scientific revolution, the colonization by European of the Pacific and Indian Ocean Basins, Enlightenment political philosophy, the Agricultural Revolution, and the French Revolution. Also offered for graduate students as HISTORY 515.

HISTORY 415B 17Th And 18Th Century European History

this course is designed to present the upper-division undergraduate with a firm grasp of the major intellectual, cultural, political and economic developments of 17th and 18th century Europe. It considers the bitter Thirty Years War in Central Europe, the rise of the Netherlands, the fall of Italy and Spain, the rise of constitutional and absolutist styles of government, the scientific revolution, the colonization by European of the Pacific and Indian Ocean Basins, Enlightenment political philosophy, the Agricultural Revolution, and the French Revolution. Also offered for graduate students as HISTORY 515.

HISTORY 416R The French Revolution And Napoleon

Narrative history concentrating on the explosive and colorful events and personalities in France, but also showing the European and Western context and impact of the revolution and Napoleon. Illustrated accounts cover such "great days" as the storming of the Bastille, the fall of Robespierre, and Napoleon's Coup of 18 Brumaire, and great battles. Main periods are: the origins of the revolution (economic, social, political, intellectual); revolution and reconstruction (1789-92); through terror to Thermidor (Jacobins and sans-culottes); Napoleon's wars and reconstruction (France and Europe). Cinema, slides and martial music periodically. Discussion of major authors and interpretations. Also offered as HISTORY 516.

HISTORY 417R Nations & Empires: 19th Century Europe

This upper-division course will survey significant trends in warfare, politics, economics, social relations and culture in 19th century Europe, paying particular attention to the rise of modern ideologies and identities, world hegemony, and the social technologies of dehumanization that foreshadowed the unprecedented inhumanities of the 20th century. Also offered for graduate students as HISTORY 5517.

HISTORY 418R The Age of Extremes 20th Century History

This upper-division course traces the history of Europe in the 20th century. It will survey significant trends in warfare, politics, economics, social relations and culture, paying particular attention to the issues of modernity and post modernity, imperialism and decolonization, dehumanization and genocide as well as the role of ordinary people in these systems of mass destruction. Also offered for graduate students as HISTORY 5518.

HISTORY 419R Contemporary Europe: 1930-2000

This upper-division course traces the history of Europe in the period of living memory. It will survey significant trends in warfare, politics, economics, social relations and culture, paying particular attention to the rise of globalization and the condition of postmodernity, decolonization and neocolonization, European unification and everyday life. Also offered for graduate students as HISTORY 5519.

HISTORY 420CC World War I in Film: The World made Modern

This cluster course examines World War I and its legacy through the lenses of international history and film studies. It explores the origins and conduct of the "Great War," as it was called at the time, as well as its transforming effects on the modern international relations and the ongoing process of globalization. It also examines how the war spurred the growth of an infant motion picture industry, and how movies produced during the decades that followed helped shaping popular memories of the conflict-reflecting and shaping cultural discourses regarding the myth or reality of modern civilizational progress; the ethics of modern weaponry; the individual's placed in mass society; constructions of class, race, and gender; and the meaning of national identity in a globalizing world. The class will draw on selected history texts and an array of films and film clips. Cross listed with Comm-St 404CD

HISTORY 425R European Criminal Justice History, 500-1900

This course will survey European crime, criminal procedure, policing and punishment between 500 and 1900. Particular attention will be given to changing methods of proof (oaths, ordeals, juries); changing type of criminal activity (banditry, vagrancy, witchcraft, professional theft) and changing penal strategies (the stocks, breaking on the wheel, the workhouse, the prison, the

penitentiary). English experiences are emphasized. Also offered as HISTORY 525R.

HISTORY 425R European Criminal Justice History, 500-1900

This course will survey European crime, criminal procedure, policing and punishment between 500 and 1900. Particular attention will be given to changing methods of proof (oaths, ordeals, juries); changing type of criminal activity (banditry, vagrancy, witchcraft, professional theft) and changing penal strategies (the stocks, breaking on the wheel, the workhouse, the prison, the penitentiary). English experiences are emphasized. Also offered as HISTORY 525R.

HISTORY 426R The Scientific Revolution, 1500-1700

An analysis of the intellectual and social currents which culminated in the Scientific Revolution. After presenting the Renaissance world view, the course will examine the influence of humanism, art, religion, and the voyages of discovery on science, as a prelude to understanding the achievements of Galileo, Harvey, Newton, and the scientific societies of the 17th century. Also offered as HISTORY 526R.

HISTORY 427R The Darwinian Revolution, 1650-1900

An inquiry into the intellectual background of Darwin's "Origin of Species." The course will examine 18th- and 19th-century attitudes toward time, species, change, race, the age of the earth, the nature of fossils, creation, and evolution, as background to understanding the achievement of Darwin and the reception of his work. Also offered as HISTORY 5527.

HISTORY 428A History Of The Body

This advanced course will explore the new field of the history of the body, with particular attention to sexuality and gender. Topics will include the history of sexualities, the body and society, body disciplines, medical practices and representations of illness, beauty and fashion, and the relationship between sexualities and nationalisms. Semester offered: On demand

HISTORY 428B Gender & Medicine: Patients & Practitioners From Antiquity To Present

This course explores, in a selective fashion, the role of women in Western medicine both as health care providers and patients. The subject of the history of medicine is too broad to be covered comprehensively in a semester, and so we will focus on diseases or physical conditions which were believed to be limited to women--childbirth, certain mental health conditions, reproductive health, breast cancer-- as well as the increasing marginalization of women within the profession of health care providers to those branches concerned primarily with "women's problems." Offered: On demand

HISTORY 430RA 'We Are The Dead': The Great War Experience Through its Artifacts

World War One was the "war to end all wars"; all previous wars were indeed eclipsed by its scale of destruction. And yet, it was a war that initiated a century of continual bloodshed and crimes against humanity. This course will explore the causes, nature and consequences of the Great War of 1914-18. It will be taught on different themes each Winter semester at the National World War One Memorial Museum at Liberty Memorial.

HISTORY 431R Medieval England, 1066 To 1485

Beginning with the Norman conquest of England in 1066, this course traces the history of Medieval England through the establishment of the Tudor dynasty. Covered will be such items as the rise of the Angevin Empire, the conflict between monarch & nobility, the evolution of Parliament, as well as the Anglo-French rivalry which culminated in the Hundred Years' War.

HISTORY 432R Tudor England, 1485-1603

This course covers England from the accession of Henry VII, the first Tudor, to the death of Elizabeth I in 1603 Topics to be covered are: transformation of England into a modern state, the Reformation, the role of Parliament, conflicts with European powers, especially Spain, etc. Also offered as HISTORY 5532.

HISTORY 433 Jacksonian Period

HISTORY 433R History of Britain 1603-1832

This course analyzes the rise and fall of the Stuart dynasty and the effects of civil war, rebellion, and religious turmoil on the peoples of Britain. The domination of politics and culture by the aristocracy in the eighteenth century is examined. The rise of the Navy due to constant warfare and the exploration of the Pacific are discussed. The monarchy of George III, the loss of the American colonies, and the wars with Napoleon are examined. Finally, the Agricultural and early Industrial Revolutions are considered through an analysis of the social changes they brought in Britain and the Empire

HISTORY 434 American Civil War And Reconstruction

HISTORY 434R History of Britain 1832-Present

This course surveys the history of the British Isles from the industrial revolution to the present day. Topics include Victorian

society, the rise of the class system, imperialism, the domestic impact of the two world wars, the reaction to the loss of the Empire, pop culture, and contemporary issues.

HISTORY 434R History of Britain 1832-Present

This course surveys the history of the British Isles from the industrial revolution to the present day. Topics include Victorian society, the rise of the class system, imperialism, the domestic impact of the two world wars, the reaction to the loss of the Empire, pop culture, and contemporary issues.

HISTORY 436R Modern German History

This course traces the history of Central Europe from the fall of Bismarck to the reunification of Germany one century later. It will ask students to think critically about the relationship between state and society, elites and 'ordinary' Germans, in the various German-speaking regimes that existed over the course of this era: two empires, two interwar republics, two fascist dictatorships, and three post-fascist republics. All assigned readings will be in English; a background knowledge of European history is recommended. This course follows from HISTORY 435 / HISTORY 535: the contents and assignments will be coordinated, but the former course is not a prerequisite for the latter.

HISTORY 437AWI Imperial Germanies, 1848-1918

This course traces the history of German-speaking Central Europe from the Revolutions of 1848 to the collapse of the Hohenzollern and Habsburg empires at the end of World War One. It will ask students to think critically about the relationship between state and society and the role played by 'elite' and 'ordinary' people in shaping German history. This reading and writing intensive course will be run as a seminar. Final grades will be based on a portfolio of assignments of which students will select what they consider to be the best examples of their work. Prerequisites: HISTORY 202, HISTORY 208 or equivalent

HISTORY 437BWI First German Republics, 1917-1935

This course traces the history of the two German Republics during the inter-war years--the First Austrian Republic and the so-called Weimar Republic--from the peace movements of the First World War to the solidification of fascist dictatorships. It will ask students to think critically about the relationship between state and society and the role played by 'elite' and 'ordinary' people in shaping German history. This reading-and writing-intensive course will be run as a seminar. Final grades will be based on a portfolio of assignment of which students will select what they consider to be the best portfolio of assignments of which students will select what they consider to be the best examples of their work. Prerequisites: HISTORY 202, HISTORY 208 or equivalent

HISTORY 437CWI The Third Reich, 1930-1950

This course traces the history of the Third Reich--its origins, nature, and crimes against humanity--from its first electoral successes in the Great Depression to the trials of its leaders for various war crimes. At its center stand the challenging questions of the ethical and historical responsibility for the Holocaust. It will ask students to think critically about the relationship between state and society and the roles played by 'elite' and 'ordinary' people in shaping this tragic era of German and European history. This reading- and writing-intensive course will be run as a seminar. Final grades will be based on a portfolio of assignments o which students will select what they consider to be the best examples of their work. Prerequisites: HISTORY 202, HISTORY 208 or equivalent

HISTORY 437DWI Cold War Germanies, 1941-1991

This course traces the history of the three postwar German Republics-- the Second Austrian Republic, the German Democratic Republic, and the Federal Republic of Germany -- from the initial plans of the Allies for postwar reconstruction to the Reunification of Germany in 1991. It will ask students to think critically about relationship between state and society and the role played by 'elite' and 'ordinary' people in shaping, and in the remembering, of German history. This reading-and writing-intensive course will be run as a seminar. Final grades will be based on a portfolio of assignments of which students will select what they consider to be the best examples of their work. Prerequisites: HISTORY 202, HISTORY 208 or equivalent

HISTORY 444R Islam And The Arabs: The Formative Period

The first semester of a three-semester sequence begins with a brief overview of the geography and topography of the Middle East. The course proceeds with a discussion of the conditions of pre-Islamic Arabia; the appearance of Muhammad and his mission; the rise and spread of Islam; the establishment and consolidation of the Arab dynasties in the Middle East, North Africa and Spain; Islamic institutions; and Islamic society and culture. The time span will be approximately 500 A.D. to the Mongol conquest of Baghdad in 1258. Also offered as HISTORY 544.

HISTORY 445 The Ottoman Empire In The Middle East To World War I

The second semester of a three-semester sequence covers the transition from Arab to Turkish hegemony in most of the Middle East as well as the restoration of native Persian dynasties in Iran and their subsequent development. The emphasis is on the rise and decline of the Ottoman Turkish Empire. Attention is given to the Ottoman provinces and to the national movements of subject peoples. The course ends with an overview of World War I and the peace treaties which marked the dissolution of the Ottoman Empire. HISTORY 444R is not a prerequisite. Also offered as HISTORY 545.

HISTORY 446R The Middle East From World War I To The Present

The third semester of a three-semester sequence deals with the emergence of the modern countries of the Middle East after World War I and their history and course of development to the present day. There will be a general survey of the government and politics, economic situation, and social and cultural characteristics of each important country in the area. In addition, special topics will be discussed such as the modernization process, ideological alternatives, relations with the great powers, the economics and politics of oil, and the Arab-Israeli conflict. HISTORY 444R and HISTORY 445 are not prerequisites. Also offered as HISTORY 546.

HISTORY 462J Japanese Civilization

A survey of Japanese civilization and cultural history from the prehistorical period to the present. Emphasis on the interplay between religion, the arts, politics, and social structure.

HISTORY 464 Medieval Methods and Paleography

This course examines the methodology and historiography of Medieval Studies. Through an introduction to paleography, the study of medieval handwritings, it prepares students for advanced work in Medieval and Renaissance studies. Using an interdisciplinary approach, this course will examine the historical and cultural settings for medieval texts, their physical form and production, as well as the tradition of textual transmission in the medieval world. In addition to gaining familiarity with the many different types of primary sources, such as literary, artistic, legal, and notarial sources, students will be exposed to methods for practical archival work in various European nations. Prerequisite: First Year Latin or permission from instructor. Offered: On Demand

HISTORY 468R Archaeology And The History Of Antiquity

This course will analyze the contributions of archaeology to the understanding of ancient history. It will cover archaeological excavations and their pertinence to classical civilization in the Near East and Greece. The techniques and methodology of field archaeologists will be discussed and demonstrated. Archaeological excavations relating to the Hittite capital, to the Ugaritic tablets, to the Minoan-Mycenaean civilization and its link to the Near East will be treated. Also offered as HISTORY 568R.

HISTORY 469 Archeology And Biblical History

An examination of ancient Israel as she emerges from the ruins of the past, both lapidary and literary. Through a study of the ""mute documents,"" artifacts man-made (storied cities, household utensils, inscribed shards from Jericho to Jerusalem) we gain an insight indispensable for Biblical studies, for ancient Near Eastern history. Also offered as HISTORY 569R.

HISTORY 470 Ancient Egypt

This course describes the political, social and cultural evolution of ancient Egypt from pre-dynastic times, with major emphasis upon the Old, Middle, and New Kingdoms (especially the 18th dynasty and the reign of Akhenaton). Also offered as HISTORY 570R.

HISTORY 470 Ancient Egypt

This course describes the political, social and cultural evolution of ancient Egypt from pre-dynastic times, with major emphasis upon the Old, Middle, and New Kingdoms (especially the 18th dynasty and the reign of Akhenaton). Also offered as HISTORY 570R.

HISTORY 470P Ancient World: The Social History Of The Ancient World

The optional four-credit-hour component (modified independent study) will concern the social aspects of these civilizations, i.e., their daily lives. Readings and audiovisual aids will be used to help the student who will be expected to choose one aspect of each civilization, such as women, slavery, merchants, education, medicine, etc., and write a five-page paper about that topic for each period, i.e., Mesopotamia, Egypt, Greece and Rome.

HISTORY 471 Ancient Greece

This course begins with a survey of the pre-classical Minoan and Mycenaean civilizations and then describes the rise of prominent Greek city-states (with particular emphasis upon the evolution of Sparta and the political, social and cultural contributions of Athens). The course concludes with the rise of Macedon and Alexander's conquests and significance. Also offered as HISTORY 571R.

HISTORY 471 Ancient Greece

This course begins with a survey of the pre-classical Minoan and Mycenaean civilizations and then describes the rise of prominent Greek city-states (with particular emphasis upon the evolution of Sparta and the political, social and cultural contributions of Athens). The course concludes with the rise of Macedon and Alexander's conquests and significance. Also offered as HISTORY 571R.

HISTORY 471P Ancient World: The Political Structure Of The Ancient World

The four-hour lecture period on weeknights will emphasize the historical aspects of the ancient civilizations. The lectures will be

chronologically organized to focus upon their evolution from their rise to their collapse.

HISTORY 472 Ancient Rome

This course covers Roman history from its origins (including the Etruscans) to the decline of the imperial system. Particular emphasis is placed upon the political, social and economic developments in the Republic, the death of the Republic, the early Principate, and the factors that led to Rome's decline in the ancient world. Also offered as HISTORY 572R.

HISTORY 472 Ancient Rome

This course covers Roman history from its origins (including the Etruscans) to the decline of the imperial system. Particular emphasis is placed upon the political, social and economic developments in the Republic, the death of the Republic, the early Principate, and the factors that led to Rome's decline in the ancient world. Also offered as HISTORY 572R.

HISTORY 472P Ancient World: The Cul/Intellectual Dimension Of Ancient Civi

The four weekend periods will provide the students with a general picture of these civilizations: society, religion, economics, and culture (w.f., arts, literature, philosophy, science, etc.). Guest lecturers, slides, films and video cassettes will be used to introduce the varied aspects of these ancient peoples.

HISTORY 475WI The History Of Ancient Israel

Judaism has had a tremendous impact on our civilization and yet most Americans are only dimly aware of its origins and development. This course will trace the roots of the Jewish religion in its historical context from its beginnings through the formation of rabbinic culture. The rise of Christianity will be examined in its original Judaic context, and recent discoveries, particularly those pertaining to the Dead Sea Scrolls, will be interpreted. Offered: Fall

HISTORY 476 Medieval Jewish History

This course covers the general period from the decline of the Roman Empire to the dawn of early modern times. It is concerned with Jewish centers of life and learning in the Diaspora, both East and West. The course considers the Jews under Islamic rule from the time of Mohammed through the Golden Age of Moorish Spain. The focus then shifts to the situation of the Jews in Christian Europe, from the period of Constantine to the expulsions from England, France and Christian Spain. The Jews in the Ottoman Empire are mentioned and the course ends with the episode of Sabbatai Zevi, the false Messiah. Also offered as HISTORY 576R.

HISTORY 477 Modern Jewish History

This course surveys modern Jewish history from the Napoleonic period to World War II. Analyzing the social status of the Jews in Medieval Europe, it proceeds towards a discussion of the growth of the national state and the breakup of the Holy Roman Empire and analyzes the growth of socialism, integral nationalism, and liberalism as they affected the Jewish communities in Europe and America. The course serves as a survey of modern political and economic trends as they affect a distinct group. Also offered as HISTORY 577R.

HISTORY 496 Historical Research Project

Working extensively with an individual faculty member actively engaged in his/her research, students practice the multiple facets of investigating the sources of history, developing a comprehensive analysis from such sources, and composing a persuasive interpretation. Prerequisite: HISTORY 301WI and instructor's approval Offered: On demand.

HISTORY 497XCA Special Topics and Readings

Special Topics and Readings

HISTORY 498WI Senior Capstone

This is the capstone course in the department and is required for majors in the senior year. It consists of tutorial sessions with a regular faculty member and independent research leading to a major paper using original source materials. Performance in this course will weigh heavily in the award of departmental honors. Prerequisites: HISTORY 301 and successful completion of the WEPT.

HISTORY H497 Special Topics And Readings

Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies. On demand.

HISTORY H497 Special Topics And Readings

Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies. On demand.

Honors (HONORS)**HONORS 100** First Year Seminar

This course is designed to help first-year Honors students understand the foundations of higher education and better navigate the college experience. We will study the infrastructure of educational institutions and discuss the historical, cultural, and financial aspects of a university system. Students will also participate in several campus and community events, including a service-learning project. Offered: Fall. Restrictions: Must be admitted into Honors Program

HONORS 100 First Year Seminar

This course is designed to help first-year Honors students understand the foundations of higher education and better navigate the college experience. We will study the infrastructure of educational institutions and discuss the historical, cultural, and financial aspects of a university system. Students will also participate in several campus and community events, including a service-learning project. Offered: Fall. Restrictions: Must be admitted into Honors Program

HONORS 101 Freshman Honors Colloquium

This one hour interdisciplinary course is designed to foster a shared intellectual community among the Honors Program members. Guest lecturers from UMKC and the greater Kansas City region will speak on a given theme, to change from year to year. Required for participation in the Honors Program. Prerequisite: None Offered: Fall and Winter Restrictions: Must be Admitted into the Honors Program

Italian (ITALIAN)

ITALIAN 110 Elementary Italian I

Intended to give the student the ability to read prose of ordinary difficulty and to understand and speak simple Italian. Fall.

ITALIAN 120 Elementary Italian II

Continuation of ITALIAN 110. Winter. Prerequisite(s): Italian 110 or equivalent.

ITALIAN 211 Second Year Italian I

Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language. Prerequisite: ITALIAN 120. Fall.

ITALIAN 221 Second Year Italian II

Continuation of ITALIAN 211.

ITALIAN 221 Second Year Italian II

Continuation of ITALIAN 211.

ITALIAN 280 Special Intermediate Italian Topics I

Instruction of Italian on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit. Prerequisite: Elementary I and II college-level courses or equivalent. As needed. Restrictions: Permission of chair required.

ITALIAN 290 Special Intermediate Italian Topics II

Continuation of ITALIAN 280. May not be repeated for credit. As needed. Restrictions: Permission of chair required.

Latin (LATIN)

LATIN 110 Elementary Latin I

Fundamentals of grammar and syntax; selected passages from various Latin authors concluding with readings from Caesar. Every fall.

LATIN 120 Elementary Latin II

Continuation of LATIN 110. Every Winter. Prerequisite(s): LATIN 110 or equivalent.

LATIN 211 Second Year Latin Readings I

Selected readings from works by various Latin authors. Grammar review. Prerequisite: LATIN120. Fall.

LATIN 221 Second Year Latin Readings II

Continuation of LATIN 211. Winter.

LATIN 280 Special Intermediate Latin Topics I

Instruction of Latin on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit. Prerequisite: Elementary I and II college-level courses or equivalent. As needed.

LATIN 280A Special Intermediate Latin Topics I

Instruction of Latin on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit. Prerequisite: Elementary I and II college-level courses or equivalent. As needed.

LATIN 290 Special Intermediate Latin Topics II

Continuation of LATIN 280. May not be repeated for credit. As needed.

LATIN 290A Special Intermediate Latin Topics II

Continuation of LATIN 280. May not be repeated for credit. As needed.

LATIN 301 Virgil

Selected readings in Classical Latin from the works of Virgil. Prerequisite: Latin 211 or consent from the instructor.

LATIN 302 Ovid

Selected readings in Classical Latin from Ovid's Metamorphoses. Prerequisite: Latin 211 or consent from the instructor.

LATIN 311 Prose Fiction and Epistolography

Selected readings in Classical Latin from Apuleius, Cicero, Petronius, Pliny, etc. Prerequisite: Latin 211 or consent of the instructor.

LATIN 314 Lyric and Elegiac Poetry

Selected readings in Classical Latin from Catullus, Horace, Martial, Ovid, etc. Prerequisite: Latin 211 or Consent from the instructor.

LATIN 490 Special Readings In Latin

Intensive readings in period or genre or literary figure to be selected by the student in consultation with the instructor. Available only to advanced Latin students.

Mathematics (MATH)**MATH 100** Intermediate Algebra

Numbers and their arithmetic properties, introduction to elementary algebra including exponents and radicals, elementary geometry and formulas, linear and quadratic functions and their graphs, and equations with two unknowns. Given on credit, no-credit basis. Does not fulfill Arts and Sciences mathematics requirement. Does not count toward graduation.

MATH 105 The Language Of Mathematics

Reading comprehension and writing skills in the language of Mathematics; grammar, syntax and logic, understanding, expressing, proving; recognizing and employing common patterns of mathematical thought; emphasizing not what is said, but how it is said. Particularly useful to students returning to school after a long hiatus, the math-anxious, students with weak skills, and those interested in elementary or middle school teaching. Prerequisite: Three units of high school mathematics

MATH 105 The Language Of Mathematics

Reading comprehension and writing skills in the language of Mathematics; grammar, syntax and logic, understanding, expressing, proving; recognizing and employing common patterns of mathematical thought; emphasizing not what is said, but how it is said. Particularly useful to students returning to school after a long hiatus, the math-anxious, students with weak skills, and those interested in elementary or middle school teaching. Prerequisite: Three units of high school mathematics

MATH 110 College Algebra

Review of elementary algebra, solution of equations, functions, exponential and logarithmic functions, inequalities, systems of linear equations, equations of second degree and their graphs, binomial theorem, complex numbers, and polynomials. Credit will not be given for both MATH 110 and MATH 120. Prerequisite: Three units of high school mathematics (Algebra I and higher) or MATH 100.

MATH 110 College Algebra

Review of elementary algebra, solution of equations, functions, exponential and logarithmic functions, inequalities, systems of linear equations, equations of second degree and their graphs, binomial theorem, complex numbers, and polynomials. Credit will not be given for both MATH 110 and MATH 120. Prerequisite: Three units of high school mathematics (Algebra I and higher) or MATH 100.

MATH 116 Mathematics For Liberal Arts

A survey of elementary mathematics covering such topics as: logic, sets, counting methods, introduction to probability theory, introductory statistics, plane and coordinate geometry. The course will emphasize mathematical concepts and does not require the level of computational skill of College Algebra. Topics from the history of mathematics will be presented as well as the influence of mathematics on a variety of disciplines. Prerequisite: Three units of high school mathematics (Algebra I and higher).

MATH 120 Precalculus

Review of elementary algebra, solution of equations, functions, inequalities, systems of linear equations, exponential and logarithmic functions, trigonometric functions, trigonometric identities, triangles, equations of second degree and their graphs, binomial theorem, complex numbers, and polynomials. Credit will not be given for both Math 120 and Math 110 or for both MATH 120 and MATH 125. Prerequisites: Three units of high school mathematics (Algebra I or higher) or MATH 100.

MATH 125 Trigonometry

Trigonometric functions, trigonometric identities, triangles, and complex numbers. Credit will not be given for both MATH 125 and MATH 120. Prerequisite: Two units of high school algebra and one unit of geometry, or MATH 110.

MATH 130 Mathematics For Teachers: Number Systems

Designed for elementary school teachers. A constructive development of the real number system beginning with the system of whole numbers; concepts from elementary number theory; applications of quantitative systems to problems in discrete mathematics. Prerequisite: High school algebra and geometry.

MATH 140 Mathematics For Teachers: Elementary Geometry

Designed for elementary school teachers. A development from informal geometric concepts to elements of the Euclidean

deductive system; groups of congruence transformations, similarity transformations and symmetries; coordinate systems and vectors. Prerequisite: High school algebra and geometry.

MATH 202 Analytic Geometry

Coordinate plane, lines, circles, the parabola, the ellipse, the hyperbola, transformation of coordinates, equations of the second degree, curve sketching, polar coordinates and parametric equations, complex numbers, vectors and vector operations, and solid analytic geometry. Prerequisites: 4 units of high school math, or MATH 110 and credit for or concurrent enrollment in MATH 125.

MATH 204 Mathematics For Teachers: Mathematical Immersion

Adaptable for elementary-,middle-,or secondary-school mathematics teachers. Intensive problem solving experience. Develop confidence and enthusiasm about recognizing mathematics reasoning in oneself and in students. Combat mathematics anxiety and myths. Encourage flexibility in the mathematical knowledge of teacher candidates. Prerequisites: MATH 120, MATH 130, MATH 140, or any mathematics course numbered 200 or above.

MATH 205 Discrete Mathematics

Logic, sets, and functions. Algorithms, especially integer algorithms. Methods of proof, especially induction and recursion, counting principles, and discrete probability. Relations and partial ordering with applications. Graphs, circuits, and paths. Prerequisite: 4 units of high school math, or MATH 110.

MATH 206 Brief Calculus And Matrix Algebra

Brief review of selected topics in algebra. Introduction to matrix algebra. Introduction to differential calculus and optimization. Applications to problems in business. Credit will not be given for both MATH 160 and MATH 206 Prerequisite: MATH 110, or equivalent.

MATH 210 Calculus I

Functions and graphs, rational, trigonometric, exponential functions, composite and inverse functions, limits and continuity, differentiation and its applications, integration and its applications. Prerequisite: Four units of high school mathematics including trigonometry, or MATH 120, or MATH 110 and MATH 125, or MATH 202.

MATH 214 Mathematics For Teachers: Algebra

Designed for middle school mathematics teachers. Algebraic reasoning, patterns and inductive reasoning, arithmetic and algebra of integers, algebraic systems, algebraic modeling in geometry, axiomatic mathematics. Prerequisites: MATH 110, MATH 130, and one of MATH 140 or MATH 224.

MATH 216 Biomath I: Calculus and Modeling

Introductory calculus designed for students in the biological sciences or mathematic majors interested in the application of mathematics to these sciences. Biomath I provides the mathematical content of a Calculus I course in a biological context. Topics include functions, limits and continuity, trigonometric functions, exponential functions, composite and inverse functions, limits and continuity, differentiation and its applications, integration and its applications, mathematical modeling, and discrete dynamical systems. Credit will not be given for both Math 216 and Math 210. Prerequisites: Four units of high school mathematics including trigonometry, or Math 120, or Math 110 and math 125, or Math 202.

MATH 220 Calculus II

Techniques of integration, applications of the definite integral, improper integrals, sequences and series, power series. Taylor series and convergence, analytic geometry in calculus. Prerequisite: MATH 210 or MATH 216

MATH 220 Calculus II

Techniques of integration, applications of the definite integral, improper integrals, sequences and series, power series. Taylor series and convergence, analytic geometry in calculus. Prerequisite: MATH 210 or MATH 216

MATH 220 Calculus II

Techniques of integration, applications of the definite integral, improper integrals, sequences and series, power series. Taylor series and convergence, analytic geometry in calculus. Prerequisite: MATH 210 or MATH 216

MATH 224 Mathematics For Teachers: Geometry

Designed for middle school mathematics teachers to connect middle school and college mathematics. Geometric reasoning, Euclidean geometry, congruence, area and volume, similarity, rigid motions and symmetry, vectors and transformations, some other geometries. Prerequisites: MATH 110 and MATH 130; MATH 140 is recommended.

MATH 226 Biomath II: Statistics and Modeling

Calculus-based statistics and modeling designed for students in the biological sciences or mathematics majors interested in the

application of mathematics to these sciences. Topics include introductory ordinary differential equations, continuous dynamical systems, stochastic modeling, elementary probability, random variables, binomial distributions, Poisson distributions, normal distributions, point estimation, confidence intervals, hypothesis testing, ANOVA, and regression. Credit will not be given for both Math 226 and Stat 235 or Stat 236. Prerequisites: Math 210 or Math 216.

MATH 244 Mathematics For Teachers: Calculus

Designed for elementary-and middle-school mathematics teachers. Elementary calculus, beginning with sequences and series, proceeding to functions, limits, continuity, differentiation and integration. Focus on concepts and applications with a discovery and inquiry approach. Prerequisites: Four units of high school mathematics including Trigonometry, or MATH 120, or MATH 110 and MATH 125.

MATH 244 Mathematics For Teachers: Calculus

Designed for elementary-and middle-school mathematics teachers. Elementary calculus, beginning with sequences and series, proceeding to functions, limits, continuity, differentiation and integration. Focus on concepts and applications with a discovery and inquiry approach. Prerequisites: Four units of high school mathematics including Trigonometry, or MATH 120, or MATH 110 and MATH 125.

MATH 244 Mathematics For Teachers: Calculus

Designed for elementary-and middle-school mathematics teachers. Elementary calculus, beginning with sequences and series, proceeding to functions, limits, continuity, differentiation and integration. Focus on concepts and applications with a discovery and inquiry approach. Prerequisites: Four units of high school mathematics including Trigonometry, or MATH 120, or MATH 110 and MATH 125.

MATH 250 Calculus III

Vectors, solid analytic geometry, vector functions and multiple variable functions, partial derivatives, multiple integrals, line and surface integrals with applications. Prerequisite: MATH 220.

MATH 300 Linear Algebra I

Linear equations, matrix algebra, real vector spaces, linear transformations, determinants, eigenvalues and eigenvectors, orthogonality, and applications. Prerequisite: MATH 250, or Math 220 and Comp-Sci 191, or consent of the instructor.

MATH 301 On Solid Ground: Sets And Proofs

Transition to advanced mathematics, elements of set theory and cardinality of sets, logic, mathematical proof techniques, induction, functions, elementary proofs in various subjects such as algebra, number theory, calculus, and others as time permits. Satisfies a state requirement for teacher certification. Prerequisite: MATH 220

MATH 345 Ordinary Differential Equations

First order equations, linear second order differential equations, Taylor series and power series solutions, Laplace transforms, elementary systems of differential equations, numerical methods, and Fourier series and boundary value problems. Prerequisite: MATH 250.

MATH 402 Advanced Analysis I

Numerical sequences and completeness of the real numbers, numerical series, continuity and differentiation of real-valued functions of a real variable, integration and the fundamental theorem of calculus. Prerequisite: MATH 250 and MATH 301

MATH 406 Partial Differential Equations

Separation of variables, boundary value problems, Fourier series and integrals, wave equation, heat equation, potential equation, problems in several dimensions, and Bessel's differential equation. Prerequisite: MATH 345.

MATH 407 Introduction To Complex Variables

Complex numbers, complex differentiation, elementary functions, contour integration and the Cauchy integral formula, Taylor series and Laurent series, residue calculus and its applications, and special functions. Prerequisites: MATH 250, and one of MATH 300, MATH 301, or MATH 345, with MATH 301 recommended.

MATH 410 Modern Algebra

Groups, rings, integral domains, fields and polynomial rings. Prerequisite: MATH 300 and MATH 301.

MATH 412 Advanced Analysis II

Topics in advanced analysis such as sequences and series of functions, power series and elementary functions, Fourier series, metric spaces, analysis in Euclidean spaces, or advanced integration. Prerequisite: MATH 402 or consent of instructor.

MATH 414 Mathematics For Secondary Teachers: Algebra And Analysis

Designed for secondary-school teachers. Examine high school mathematics from a higher point of view. Real and complex numbers, functions, algebraic structures of equations, integers and polynomials, number system structures; analyses of alternate approaches, extensions, and applications of mathematical ideas, discussion of historical contexts and connections between ideas that may have been studied separately in different courses, relationships of ideas studied in secondary-school to those students may encounter in later study. When taken for graduate credit as MATH 5514, an extra project is required. Prerequisites: MATH 300 and 301.

MATH 414 Mathematics For Secondary Teachers: Algebra And Analysis

Designed for secondary-school teachers. Examine high school mathematics from a higher point of view. Real and complex numbers, functions, algebraic structures of equations, integers and polynomials, number system structures; analyses of alternate approaches, extensions, and applications of mathematical ideas, discussion of historical contexts and connections between ideas that may have been studied separately in different courses, relationships of ideas studied in secondary-school to those students may encounter in later study. When taken for graduate credit as MATH 5514, an extra project is required. Prerequisites: MATH 300 and 301.

MATH 420 Linear Algebra II

The topics of Math 300 are expanded and presented in the context of vector spaces over a field, with rigorous justification. Vector spaces and linear transformations, determinants, eigenvalues and eigenvectors, inner product spaces and orthogonality. Prerequisites: Math 300 and Math 301

MATH 420 Linear Algebra II

The topics of Math 300 are expanded and presented in the context of vector spaces over a field, with rigorous justification. Vector spaces and linear transformations, determinants, eigenvalues and eigenvectors, inner product spaces and orthogonality. Prerequisites: Math 300 and Math 301

MATH 424 Mathematics For Secondary Teachers: Geometry

Designed for secondary-school teachers. Examine high school mathematics from a higher point of view. Congruence, distance and similarity, trigonometry, area and volume, axiomatics and Euclidean geometry; analyses of alternate approaches, extensions, and applications of mathematical ideas, discussion of historical contexts and connections between ideas that may have been studied separately in different courses, relationships of ideas studied in secondary-school to those students may encounter in later study. When taken for graduate credit as MATH 5524, an extra project is required. Prerequisite: MATH 300 and 301.

MATH 424 Mathematics For Secondary Teachers: Geometry

Designed for secondary-school teachers. Examine high school mathematics from a higher point of view. Congruence, distance and similarity, trigonometry, area and volume, axiomatics and Euclidean geometry; analyses of alternate approaches, extensions, and applications of mathematical ideas, discussion of historical contexts and connections between ideas that may have been studied separately in different courses, relationships of ideas studied in secondary-school to those students may encounter in later study. When taken for graduate credit as MATH 5524, an extra project is required. Prerequisite: MATH 300 and 301.

MATH 430 Numerical Analysis I

Error analysis, solutions of equations of one variable, interpolation and polynomial approximation, numerical integration and differentiation, numerical solutions of initial-value problems. Prerequisite: MATH 250

MATH 440 Numerical Analysis II

Direct and iterative methods for solving linear systems, introduction to approximation theory, approximating eigenvalues and eigenvectors, solution of systems of nonlinear equations. Prerequisites: MATH 300 and MATH 430, or consent of instructor.

MATH 444 Modern Geometries

Modern axiomatic development of Euclidean geometry and neutral geometry, followed by examination of non-Euclidean geometries; geometric transformations, and other geometries as time permits. Satisfies a state requirement for teacher certification. Prerequisites: MATH 300 and MATH 301

MATH 464WI History Of Mathematics

Topics in the History of Mathematics from Babylonian times through the invention and consolidation of Calculus, with some modern subjects as time permits. The course will emphasize proofs, ideas, and arguments as given in original sources (in translation) from around the world and throughout history. In this writing intensive course, one or two term papers, in addition to several short essays and historical proof explications are required. A field trip will be taken to the Linda Hall Library Rare Book Room. This course is of special interest to secondary mathematics teachers as well as mathematics majors. Prerequisites: MATH 301 or consent from the instructor.

MATH 464WI History Of Mathematics

Topics in the History of Mathematics from Babylonian times through the invention and consolidation of Calculus, with some modern subjects as time permits. The course will emphasize proofs, ideas, and arguments as given in original sources (in translation) from around the world and throughout history. In this writing intensive course, one or two term papers, in addition to several short essays and historical proof explications are required. A field trip will be taken to the Linda Hall Library Rare Book Room. This course is of special interest to secondary mathematics teachers as well as mathematics majors. Prerequisites: MATH 301 or consent from the instructor.

MATH 490 Special Topics

Selected topics in various fields of mathematics. May be repeated for credit when the topic varies. Prerequisite: consent of instructor. On demand.

Military Science (MIL-SCI)**MIL-SCI 102 Leadership Practicum**

Examines leadership in basic tactical and patrolling operations, Includes a tactical application exercise and participation in physical fitness conditioning as a course requirement. Students practice leadership according to 16 principles and learn basic soldier skills. Corequisite: MIL-SCI 116 Offered: Fall Semester

MIL-SCI 112 Leadership Practicum

Examines advanced squad and platoon tactical operations with emphasis on patrolling operations. Topics include: leadership techniques, basic first aid, and problem-solving exercises. A tactical field application exercise and physical fitness conditioning program are included as course requirements. Students perform duties as leaders of small units. Corequisite: MIL-SCI 126. Offered: Spring.

MIL-SCI 116 Foundations of Officership

The course introduces the student to issues and competencies that are central to a commissioned officer's responsibilities. These initial lessons establish a framework for understanding officership, leadership, and Army values. Additionally, the semester addresses life skills, including physical fitness and time management. This course is designed to give the student an accurate insight into the Army profession and the officer's role in the Army. Corequisite: MIL-SCI 102

MIL-SCI 126 Basic Leadership

This course focuses on leadership theory and decision making. "Life skills" lessons in this course include: problem solving, critical thinking, leadership theory, followership, group interaction, goal setting, and feedback mechanisms. Upon completion of this course, students are prepared to advance to more complex leadership instruction concerning the dynamics of organization. Additionally, students will be increasingly required to demonstrate knowledge of leadership fundamentals and communications (written and oral). Corequisite: MIL-SCI 112. Offered: Spring.

MIL-SCI 202 Leadership Practicum

Course examines squad and platoon offensive and defensive operations and leadership procedures in patrolling operations. Includes a tactical application exercise and participation in physical fitness conditioning as a course requirement. Students will perform various leadership roles and present classroom instruction. Corequisite: MIL-SCI 216

MIL-SCI 205 Reserve Officer Training Corps

Five weeks of preparatory training at Fort Knox, Kentucky. Travel pay and salary stipend provided through Military Science Department. The student is not obligated to any military service as a result of attending Basic Camp. Camp graduates are eligible to enroll in advanced military science courses and may be considered for a commission as a second lieutenant in the U. S. Army, Army Reserves or National Guard. Students are also eligible to compete for a full-tuition two-year scholarships. All College of Arts and Sciences students who complete this course can receive Physical Education credit.

MIL-SCI 212 Leadership Practicum

Examines advanced squad and platoon offensive and defensive operations, reaction to obstacles, and leadership procedures in patrolling operations. Includes a tactical application exercise and participation in physical fitness conditioning as a course requirement. Students will perform in various leadership roles and present classroom instruction. Corequisite: MIL-SCI 226

MIL-SCI 216 Individual Leadership Series

This course is designed to develop within the student a knowledge of self, self-confidence and individual skills, Through experiential learning activities, students will develop problem-solving and critical-thinking skills, apply communication, feedback and conflict-resolution skills. This course delves into several aspects of communication and leadership theory. The focus of the course is on critical life skills which enable the student's future success. The course concludes with a major leadership and problem-solving case study which draws upon previous instruction. Prerequisites: MIL-SCI 126, or the consent of

the Department Chairperson; Corequisite: MIL-SCI 202

MIL-SCI 226 Leadership and Teamwork

This course focuses on self-development guided by knowledge of self and group processes. Experiential learning activities are designed to challenge students' current beliefs, knowledge and skills. This semester takes the approach of placing students in a wide variety of group exercises designed to emphasize various leadership competencies and insights. The instructor, acting as a facilitator, helps guide student processing of the events to derive the leadership, group dynamics and problem-solving lessons that the exercises offer. Practical life skills are emphasized throughout. Prerequisites: MIL-SCI 216 or consent of the Department Chairperson; Corequisite: MIL-SCI 212

MIL-SCI 302 Leadership Practicum

Examines squad and platoon offensive and defensive operations, the patrol leader in patrolling operations, and a tactical application exercise. Participation in physical fitness conditioning and a tactical application exercise is required. Students will perform in various leadership roles and present classroom instruction. Prerequisite: MIL-SCI 222 or MIL-SCI 226; Corequisite: MIL-SCI 316. Offered: Fall.

MIL-SCI 312 Leadership Practicum

Familiarization with military firearms; includes assembly and disassembly; tactical communications; and the field artillery request and a tactical application exercise. Participation in physical fitness conditioning and a tactical application exercise is required. Students will perform in various leadership roles and present classroom instruction. Prerequisite: MIL-SCI 316; Corequisite: MIL-SCI 326. Offered: Spring.

MIL-SCI 316 Leadership and Problem Solving

Following an introduction to the principles of physical fitness and healthy lifestyles, lessons will cover: the Leader Development Program, planning and conducting individual and small unit training, basic tactical principles, reasoning skills and the military-specific application of these skills in the form of the Army's troop-leading procedures. The course concludes with a detailed examination of officership, which culminates in a five-hour officership case study. Prerequisites: MIL-SCI 222 or MIL-SCI 226; Corequisite: MIL-SCI 302. Offered: Fall.

MIL-SCI 326 Leadership and Ethics

Continues the focus from MIL-SCI 316 on doctrinal leadership and tactical operations at the small unit level. Instructional modules include: Army branches, Army leadership, philosophy, dynamics of a group environment, oral and written presentation skills, culminating in instruction in national and Army values and ethics. This critical semester synthesizes the various components of training, leadership and team building. Prerequisites: MIL-SCI 316; Corequisite: MIL-SCI 312. Offered: Spring Semester.

MIL-SCI 402 Leadership Practicum

Practical applications in problem analysis, decision making, planning and organization, delegation and control, and development of interpersonal skills required for effective management. Participation in physical fitness conditioning and tactical application exercise is required. Students will perform in various leadership positions and present classroom instruction. Prerequisite: MIL-SCI 326; Corequisite: MIL-SCI 416. Offered: Fall.

MIL-SCI 412 Leadership Practicum

Practical applications in problem analysis, decision making, planning and organization, delegation and control, and development of interpersonal skills required for effective management, includes a tactical application exercise. Participation in physical fitness conditioning is required. Students will perform various leadership roles and conduct classroom instruction. Prerequisites: MIL-SCI 416; Corequisite: MIL-SCI 426

MIL-SCI 416 Leadership And Management

A series of lessons designed to enable students to make informed career decisions as they prepare for commissioning and service as Second Lieutenants. Classes concentrate on Army operations and training management, and communications and leadership skills, which support the final transition from cadet/student to Lieutenant/leader. Subjects include: The Army Training Management System, coordinating activities with staffs, and counseling skills. At the end of this semester, students should possess the fundamental skills, attributes and abilities to operate as a competent leader in the cadet battalion. Prerequisites: MIL-SCI 326; Corequisite: MIL-SCI 402

MIL-SCI 426 Officership

A series of lessons that provide a review of the ethical dimensions of leadership, law in leadership, organizing for military operations to include historical case studies, personnel, supply and maintenance administration and management, personal financial planning and entering the service, The semester concludes with a 12-lesson experiential exercise simulating assignment as a new Lieutenant in a unit. Prerequisites: MIL-SCI 416; Corequisite: MIL-SCI 412

MIL-SCI 497 Leadership And Management Practicum - Directed Study

Practical application in military problem analysis, decision making, planning and organization, delegation and control, and development of interpersonal skills required for effective management. Prerequisite: Instructor's approval. Offered: Summer.

Natural Science (NAT-SCI)

NAT-SCI 101P Changing Life On Earth

This course presents an overview of issues relating to our ever changing world. It is research oriented with papers required on topics dealing with behavior, environmental issues, and aspects of evolution. Prerequisites: Concurrent enrollment with NAT-SCI 102P.

NAT-SCI 102P Fundamentals Of Life Science

This course emphasizes the essential properties of biological systems through four major themes: diversity, the chemical and physical basis of life, continuity, and the organismal nature of life. Prerequisite: Concurrent enrollment in NAT-SCI 103P. As needed.

NAT-SCI 103P Applications Of Life Sciences

This course is designed to provide students with laboratory exercises, field trips, films and discussions that help apply biological principles from 102P. New concepts are introduced throughout the course. Prerequisite: Concurrent enrollment in NAT-SCI 102P. As needed.

NAT-SCI 130 Physics of Sports

A course intended for liberal arts students focusing on the physics involved in different sports. Physical laws and technological developments that impact sports will be studied. Cross-listed with Physics 130 and Physical Science 130.

NAT-SCI 140 How Things Work

A course intended for liberal arts students focusing on the principles of operations, histories, and relationships of objects from our daily environment. The areas of investigation include mechanical and thermal objects, electromagnetism, light, special materials and nuclear energy. This course will meet the area requirement for natural sciences. Cross-listed with Physics 140 and Physical Science 140.

NAT-SCI 140L How Things Work Laboratory

Simple experiments based on everyday experiences are analyzed in terms of conceptual physics. The material includes elements of mechanics of a rigid body, elastic properties of matter, fluid dynamics, thermodynamics, electromagnetism, optics and modern physics. The laboratory supplements the Physical Science 140 lecture and must be taken concurrently with the lecture. Cross-listed with Physics 140L and Physical Science 140L.

NAT-SCI 150 Introduction to Astronomy: Gravity and Motion in the Universe

A survey of modern topics in astronomy with an emphasis on developing conceptual models for the fundamental laws of gravity and motion underpinning the structure and evolution of the universe. Topics include lunar phases, eclipses, planetary motion, exoplanets, formation of planetary systems, star formation, supernovae, white dwarfs, neutron stars, black holes, growth of galaxies, dark matter and the expansion of the universe. Cross-listed with PHYSICS 150 and PHY-SCI 150. Prerequisites: None. Offered: Fall

NAT-SCI 153L Introductory Astronomy Laboratory

An introductory exploration of astronomical phenomena and concepts through quantitative laboratory activities requiring data collection, analysis and interpretation. This course is open to students from all majors. Concurrent enrollment in either Nat-Sci 150 or Nat-Sci 155 is encouraged but not required. Cross-listed with Phy-Sci 153L and Physics 153L.

NAT-SCI 153L Introductory Astronomy Laboratory

An introductory exploration of astronomical phenomena and concepts through quantitative laboratory activities requiring data collection, analysis and interpretation. This course is open to students from all majors. Concurrent enrollment in either Nat-Sci 150 or Nat-Sci 155 is encouraged but not required. Cross-listed with Phy-Sci 153L and Physics 153L.

NAT-SCI 155 Introduction to Astronomy: Interaction of Light and Matter in the Universe

A survey of modern topics in astronomy with an emphasis on developing conceptual models for the interactions between light and matter underpinning energetic phenomena in the universe. Topics include telescopes and detectors, solar system exploration, planetary climates, nuclear fusion and chemical enrichment, stars and stellar evolution, interstellar material, pulsars, quasars, gamma ray bursts, the Big Bang and the possibility of life beyond Earth. Cross-listed with PHYSICS 155 and PHY-SCI 155. Prerequisites: None. Offered: Spring

NAT-SCI 171 Physics For Future Presidents

A course intended for liberal arts students focusing on the physics they need to be informed citizens in a democracy. Energy, global warming, terrorism, and health are examples of the important topics examined from the perspective of how science should inform policy.

NAT-SCI 308P Physical Measurements

An introduction to metrology, this course will emphasize physical measurements in technology and trade as well as in daily life. Material will include the historical development of measurement units, from cubits to meters, especially since 1960; gravitational versus absolute systems; the International System of Units (SI); organizations, treaties and statutes; accuracy vs. precision; and numerical values: conventions, conversions and rounding. Student work will involve laboratory exercises, exams, practicum work and homework assignments (brief essays and/or problem solutions). Prerequisite: MATH 110 or MATH 150 (or equivalent) Summer.

NAT-SCI 375P Nature Of Science

Selected topics from the natural sciences. Provides students fundamental principles and concepts of various physical and mathematical sciences. Lectures, demonstrations and discussions provide an integrated approach to the natural sciences.

NAT-SCI 425P Introduction To Quantitative Methods

Topics addressed are the scientific approach to study of behavior (goals of science, research terminology, variables, distributions, measures of central tendency, confidence intervals, use of research methods and ethics in research), experimental design (validity, reliability, design and sampling techniques), and interpretation of research results. Course includes in-class computer data entry and analysis. Prerequisites: Intro to computers and MATH 110 or MATH 116

NAT-SCI 430PC CC: Biological And Ethical Issues In Aging

This course is designed to provide both a disciplinary and interdisciplinary study of the biological, philosophical, and ethical foundations and principles underlying the phenomenon of aging on an individual and societal level. Various physiological, neurological, anatomical, and psychological processes and changes characteristic of the development occurring during the aging process will be identified, studied, and discussed. The philosophical and specifically ethical issues associated traditionally with aging will be re-examined and analyzed in terms of scientific, technological, cultural, sociological, economic, and legal changes in knowledge and attitudes. PREREQUISITE: BIOLOGY 102 or equivalent. This course is also cross-listed as PHILOS 401PC.

PACE - American Studies (AMER-ST)**AMER-ST 301P** American Studies:Is/Tutorial:Themes In The American Popular Arts

This course uses the popular arts as an entree to the examination of stereotypes in American life, to a better understanding of challenges to tradition, and to assessing the consequences of conflict that have resulted from cultural pluralism. This is a modified independent study course. Students are exposed to some of America's best-known literature, films and music. Instructional audio tapes and traditional literature about American Culture show the relevance of examples of popular art to broader themes. Prerequisites: Concurrent enrollment in AMER-ST 302P and AMER-ST 303PW. Offered: On demand.

AMER-ST 302P Survey Of American Studies

This course offers a look at changes and continuities in American life from the era of British colonization to the present. It emphasizes philosophical, scientific and creative ideas that have had lasting effects, changing social structure, the factors that determine lifestyle, and the consequences of the national preoccupation with pluralism and consensus. The course also covers the main features of American political history. Prerequisite: Concurrent enrollment in AMER-ST 303PW. Offered: On demand.

AMER-ST 303PW Methods & Problems In American Studies

This course examines four topics that are important in American culture; each topic is approached from a different methodological perspective. The topics (problems) are related to cultural resources in the Kansas City area (such as a museum exhibit or a library research collection) and may change from semester to semester. Methods of problem solving are determined by the topic; however, students should expect to participate in oral history, interpretation of material culture, and traditional archival research and document analysis. Prerequisite: Concurrent enrollment in AMER-ST 302P. Offered: On demand.

AMER-ST 340P American Material Culture: The 20th Century

This course will focus on the material culture of modern and post-modern America. This is an area of inquiry particularly well-suited to the examination of material culture resources. Students will be required to write a term paper or do a material culture project. Offered: Fall

AMER-ST 340PP American Material Culture: The 1950s

This course will focus on the period of American culture from demobilization after World War II to the end of the 1950s--an era particularly well-suited to employing material culture resources as evidence. Students will be required to write a term paper or do

a material culture project.

AMER-ST 341P American Material Culture: Objects And Images

This course will examine American cultural and social history from earliest times to present, with a special emphasis on the ways artifacts and visual images can provide information and insight about the American experience.

AMER-ST 342P American Material Culture: Museums

This course will focus on local institutions that use material culture in their presentation of history and the American experience.

PACE - Art (ART)

ART 101P Topical Studies

PACE - Arts and Sciences (PACE-A&S)

A&S 170 Special Topics

An undergraduate course designed to deal with a topic which is not available in the regular course offerings.

A&S 170C Special Topics

An undergraduate course designed to deal with a topic which is not available in the regular course offerings.

A&S 280A Special Topics

An undergraduate course designed to deal with a topic which is not available in the regular course offerings.

A&S 280P Special Topics

An undergraduate course designed to deal with a topic which is not available in the regular course offerings.

A&S 365P Introduction To Substance Abuse Counseling: Theory And Practice

This course will introduce the student to the problems of substance abuse and the methods/techniques used in treatment. The course will explore theories of personality and belief systems of the chemically dependent or alcoholic individual. The course will also review the impact of the disease on the family system

A&S 400SS Special Readings/Topics

PACE - English (ENGLISH)

ENGLISH 352P Critical Approaches To The Short Story

In this course the student will explore the short story as a literary genre. Stories will range from the early masters such as Chekov, Kafka, and Hawthorne through contemporary offerings from Lessing, Mishima, and Achebe. Several critical approaches will be

presented including formalism, New Historicism, and race/class/gender criticism. Students will keep a reading journal covering all material read for the course, and will be assessed on the basis of this journal, a mid-term and a final examination.

Prerequisites: None.

ENGLISH 354P Masterpieces Of Fiction

The goal of this independent study is to provide the student with time and space to read and respond to 7-9 critically acclaimed and classic novels. Students will be allowed to choose the novels they wish to read from a list of 50 that will be provided by the instructors. This course must be taken in conjunction with at least one of the other two courses in this block in order to ensure that the student has exposure to literary theory. Students will be assessed on the basis of their response journal, casual oral examination, and a critical essay. Prerequisites: None.

ENGLISH 460PW Written Discourse: Speaking, Writing, Composing

Prerequisite: Successful completion of the WEPT (effective FS93).

PACE - Chemistry (CHEM)

CHEM 180P Basic Chemistry

A one-semester survey of basic chemistry including: atomic structure, the periodic table, chemical bonding, chemical reactions, and selected topics from organic, polymer and biochemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course. Corequisite: CHEM 181P. Prerequisite: College Algebra or equivalent. This course is equivalent to CHEM 115.

CHEM 181P Experimental Basic Chemistry

A demonstration/laboratory course designed to support and illustrate the concepts presented in Chemistry 180P. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course. Corequisite: CHEM 180P. Prerequisite: College Algebra or equivalent. This course is equivalent to CHEM 115L.

CHEM 182P Special Projects In Chemistry

An independent study course consisting of library work and field work designed to exemplify various applied aspects of chemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course. Corequisite: CHEM 180P. Prerequisite: College Algebra or equivalent.

PACE - Communication and Information Technology (CIT)

CIT 105P Foundations Of Computing And Problem Solving

This course covers the fundamentals of computer use, problem solving, and programming. Specific topics include: the general use of micro and mainframe computers, algorithm design, the relation of algorithms to programs, the fundamentals of programming in the PASCAL language, and program debugging techniques. This course is presented only in a PACE program format. Prerequisite: Co-enrollment in MATH 110.

CIT 105P Foundations Of Computing And Problem Solving

This course covers the fundamentals of computer use, problem solving, and programming. Specific topics include: the general use of micro and mainframe computers, algorithm design, the relation of algorithms to programs, the fundamentals of programming in the PASCAL language, and program debugging techniques. This course is presented only in a PACE program format. Prerequisite: Co-enrollment in MATH 110.

CIT 106P Computers: Their Uses And Impact

This course covers the history of computing, concepts in and classes of computer hardware and software, classes of computer application, economic issues in the development of computer hardware and software products, and philosophical, social and legal issues in the use (and abuse) of computer technology. This course is presented only in a PACE program format.

CIT 106P Computers: Their Uses And Impact

This course covers the history of computing, concepts in and classes of computer hardware and software, classes of computer application, economic issues in the development of computer hardware and software products, and philosophical, social and legal issues in the use (and abuse) of computer technology. This course is presented only in a PACE program format.

CIT 310P Web Design & Development

This three hour course, Web Design and Development, is designed to introduce the student to the Hyper Text Markup Language (HTML) and its use for the development of web pages. This course is offered online and no scheduled classroom attendance will be required. Correspondence through emails and the class forum is strongly encouraged. Prerequisite: COMP-SCI 105p or consent of instructor.

CIT 310P Web Design & Development

This three hour course, Web Design and Development, is designed to introduce the student to the Hyper Text Markup Language (HTML) and its use for the development of web pages. This course is offered online and no scheduled classroom attendance will be required. Correspondence through emails and the class forum is strongly encouraged. Prerequisite: COMP-SCI 105p or consent of instructor.

CIT 315P Web Graphics & Multimedia

This three hour course, Web Graphics and Multimedia, is a continuation to Web Design and Development. The course material will cover different development tools used to incorporate graphics, sounds, and videos into web pages. This course is offered online and no scheduled classroom attendance will be required. Correspondence through emails and the class forum is required. Prerequisite: COMP-SCI 105p or consent of instructor.

CIT 315P Web Graphics & Multimedia

This three hour course, Web Graphics and Multimedia, is a continuation to Web Design and Development. The course material will cover different development tools used to incorporate graphics, sounds, and videos into web pages. This course is offered online and no scheduled classroom attendance will be required. Correspondence through emails and the class forum is required. Prerequisite: COMP-SCI 105p or consent of instructor.

CIT 420P Cgi Perl

CGI Perl teaches CGI scripting techniques using the CGI.pm Perl module. Students learn how to create on-demand, server-based HTML; write and process fill-out forms; write responses to form submissions back to the client browser; store and process cookies; handle file uploads securely; create, read, and write to text databases. Students also explore CGI Perl's role in server push technology and continuous page updating. Students are not required to have previous Perl programming experience, although a thorough knowledge of HTML is necessary. Prerequisite: COMP-SCI IT222p or consent of instructor.

CIT 420P Cgi Perl

CGI Perl teaches CGI scripting techniques using the CGI.pm Perl module. Students learn how to create on-demand, server-based HTML; write and process fill-out forms; write responses to form submissions back to the client browser; store and process cookies; handle file uploads securely; create, read, and write to text databases. Students also explore CGI Perl's role in server push technology and continuous page updating. Students are not required to have previous Perl programming experience, although a thorough knowledge of HTML is necessary. Prerequisite: COMP-SCI IT222p or consent of instructor.

PACE - Communication Studies (COMM-ST)**COMM-ST 254P Communication Competence: Theory And Practice**

An introduction to the discipline of communication. A core set of issues is investigated in three major areas of the field: interpersonal communication, small group communication and public speaking. The course design is based on the premise that the development of communication skills involves two important factors: (1) understanding the theoretical principles underlying effective communication behavior and (2) practical application of those principles in various communicative exercises. Offered: Summer.

COMM-ST 260P Introduction To Web Communications

This four credit hour web-based multimedia course will examine the process of critically evaluating information delivered on the Internet. It is designed as an introduction for adults and students who use Internet information for work and/or school. The process of critically evaluating Internet information will be described in four modules: traditional evaluation techniques; searching and researching strategies; Internet evaluation techniques and Internet evaluation resources.

COMM-ST 345P Communication In Organizational Settings

An examination of the major elements of interpersonal, group, and oral communication competence essential to human interaction in organizational settings. The course focuses on developing communication competencies and increasing theoretical understanding of the communication process within the organizational context. prerequisite(s): None.

COMM-ST 361 Broadcast Management

An analysis of the trends, patterns and methods of radio and television operations. Prerequisite: COMM-ST 308. Offered: On demand.

COMM-ST 421P Multimedia & New Media Streaming

This course is designed to teach students the technology of streaming multimedia on the web and analyze the components of interactivity on the web. Students will examine the process of streaming, as well as the various advantages and disadvantages of streaming. Students will study the hardware, software, and technology involved in the different types of streaming media. Prerequisites: COMM-ST 100, COMM-ST 105P or equivalent is recommended.

COMM-ST 422P New Media Writing For The Web

This course is designed to teach students new media writing and the technology of reporting for online publications. Students will analyze the components of online writing, including the design, creation, and transfer of online digital media. Students will be introduced to digital formats and production tools. Students will examine the technology of writing for the web and the particular needs of new media writing for users of the web, techniques to transfer writing electronically, and how to use resources on the web for online reporters. Prerequisites: COMM-ST100, COMM-ST 105P or equivalent is recommended.

COMM-ST 423P Shooting Digital Video For The Web And New Media

This course is designed to teach students the fundamental concepts of digital video, with special consideration given to shooting the new media and the web. Students will learn the process of digital video, the types of file formats, technical considerations of displaying video on the web, and technical features of the digital video camera. This class will enable students to maximize the use of video in various new media digital formats (CD-ROM, DVD, etc.), as well as its use on the web. Prerequisites: COMM-ST 100 COMM ST 105P or equivalent is recommended.

COMM-ST 424P Web Radio

This course is designed to teach students the technology and underlying concepts in producing Web radio. A general overview of radio techniques and historical context, as well as practical and technical information will be given. Legal and copyright implications of making Web radio will be reviewed. Prerequisites: COMM-ST 100, COMM-ST 105P or equivalent is recommended.

COMM-ST 456 Electronic Journalism

A practical approach to the practices and principles of broadcasting news media, including preparing copy for microphone and camera, editing wire copy, reporting public affairs and public relations, and an intensive scrutiny of the concepts of freedom and responsibility as they apply to the press and current legislation. Prerequisite: COMM-ST 351. Fall and winter.

PACE - Criminal Justice and Criminology (CJC)**CJC 353 Ethical And Controversial Issues In Policing**

This course covers various ethical and controversial issues confronting law enforcement agencies and examines ethical dilemmas involved in police decision-making with an emphasis on current controversial issues. Topics to be addressed include police misconduct; stop and frisk practices; search and seizure; racial profiling; use of excessive and deadly force; and vehicle pursuits.

CJC 353 Ethical And Controversial Issues In Policing

This course covers various ethical and controversial issues confronting law enforcement agencies and examines ethical dilemmas involved in police decision-making with an emphasis on current controversial issues. Topics to be addressed include police misconduct; stop and frisk practices; search and seizure; racial profiling; use of excessive and deadly force; and vehicle pursuits.

CJC 475P White Collar Crime

This course examines activities variously called white-collar crimes, crimes of privilege, corporate and government crimes, and underworld crimes. The purpose of the course are (1) to describe, analyze, and assess social impact of these offenses, (2) to examine the capacity of existing theories in criminology and social deviance to account for those activities, (3) to describe the responsibilities, powers, and activities of those agencies which have jurisdiction over them, and (4) to assess the effectiveness of various legal sanctions in controlling such activities and to review the problems involved in legislation intended to achieve that control. Part of PACE Block --Justice and Society. PACE class to meet one night a week from 6:00-10:00 p.m. and one weekend: Fri. E6:00-10:00; Sat 8:00-5:00; Sun 1:00-5:30 for eight weeks in either fall or winter semester.

CJC 475P White Collar Crime

This course examines activities variously called white-collar crimes, crimes of privilege, corporate and government crimes, and underworld crimes. The purpose of the course are (1) to describe, analyze, and assess social impact of these offenses, (2) to examine the capacity of existing theories in criminology and social deviance to account for those activities, (3) to describe the responsibilities, powers, and activities of those agencies which have jurisdiction over them, and (4) to assess the effectiveness of various legal sanctions in controlling such activities and to review the problems involved in legislation intended to achieve that control. Part of PACE Block --Justice and Society. PACE class to meet one night a week from 6:00-10:00 p.m. and one weekend: Fri. E6:00-10:00; Sat 8:00-5:00; Sun 1:00-5:30 for eight weeks in either fall or winter semester.

PACE - Economics (ECON)**ECON 201P Introduction To Economics I**

Economics I deals primarily with macroeconomic or national economic concepts, the economics of the determination of recession, inflation, maintenance of full employment and economic growth, with an emphasis upon the economics of modern Keynesian analyses. It further introduces the economics of Marx and Ayres and discusses relevant and current economic issues. Economics 201 and 202 are prerequisites for all other economics courses except with specific permission of the instructor. Every

semester.

ECON 202P Introduction To Economics II

Economics II deals primarily with microeconomics, firm analysis, the principles of demand, supply, elasticity, price determination, costs, income distribution, market structures, trade, and other related social, economic issues. ECON 201, ECON 202 are prerequisites for all other economics courses except with specific permission of the instructor. Every semester.

ECON 204P Principles Of Economics

The course will combine macro and micro principles of economics. Credit will not be given for both macro (ECON 201 and ECON 204) or for both micro (ECON 202 and ECON 204) towards a degree. The course will be offered over two nights a week (2 1/2 hr/class) and two weekends. Offered: Summer.

ECON 301P Macroeconomic Analysis

The economic system as a whole and the ways in which its functioning is affected by the behavior of the interdependent sectors of which it is composed. Major factors affecting national income; use of sectoral accounts in analyzing general economic prospects.

ECON 302P Microeconomic Analysis

Functioning of the individual enterprise and households. Problems confronting business enterprises operating under different types of market situations; influence of the prices factors of production on methods of production; effects that changes in income levels and in relative prices have on sales of different types of goods and services. Every semester.

ECON 331P Money And Banking

A study of the structure, operations and problems of banks and other financial institutions with emphasis on their macroeconomic performance. The importance of banking in the financial system and the influence of Federal Reserve monetary policies are also studied. Offered: Fall.

ECON 353 Financial Analysis And The Economy

This course examines techniques of financial evaluation used by individuals, corporate managers, and portfolio analysts. Focus of the course will be on the interaction of the mechanics of analytical methods and economic activity. Topics covered will include individual portfolio building, asset evaluation, and financial market theory. Prerequisites: ECON 201 and ECON 202. Offered: Winter odd years.

ECON 366 Art Markets

An economic analysis of the development of art markets and the issue of government involvement in the arts. Prerequisite: ECON 202 is recommended, but not required.

ECON 486 Labor Economics

An examination of the theories of wage determination, the economic effects of wage determination upon the wage structure, the distribution of national income, employment, and an introduction to collective bargaining. Prerequisite: ECON 302. On request.

PACE - History (HISTORY)

HISTORY 330PW The Works Of Western Man

In the period 1750-1987, the nations bordering the Atlantic Ocean, largely relying on their technological advances, became world powers. This course, relying on analysis of films plus required readings, will survey the energy sources employed, the tools developed, and the regimes of the workplace which led to this dominance. Grades will be assigned to three types of exercises: frequent quizzes, a mini-project in historical research and a book critique of a piece of fiction. Prerequisite: Successful completion of the WEPT (effective FS93).

HISTORY 330PW The Works Of Western Man

In the period 1750-1987, the nations bordering the Atlantic Ocean, largely relying on their technological advances, became world powers. This course, relying on analysis of films plus required readings, will survey the energy sources employed, the tools developed, and the regimes of the workplace which led to this dominance. Grades will be assigned to three types of exercises: frequent quizzes, a mini-project in historical research and a book critique of a piece of fiction. Prerequisite: Successful completion of the WEPT (effective FS93).

HISTORY 331P America In The Machine Age

The United States has experienced repeated waves of technological advancements. This course will largely focus on industrialization in the 19th century as well as consumer society of our own era. How Americans produced goods and what were the dynamics of the market place are two central themes. Required readings will be complemented by films and presentations

from resource persons throughout Kansas City. A research project and three tests are required.

HISTORY 332P The City: Past And Present

This course treats the built environment, especially the urban infrastructure. Both systems and structures of the cityscape are examined from a historical perspective, with three metropolises (Rome, Paris, New York) and Kansas City serving as case studies. The technical areas include shelter, public buildings, transportation, water supply, power, waste management, communications, and the like. Projects are included. Offered: Every 2 years.

HISTORY 400Z Special Studies

HISTORY 470P Ancient World: The Social History Of The Ancient World

The optional four-credit-hour component (modified independent study) will concern the social aspects of these civilizations, i.e., their daily lives. Readings and audiovisual aids will be used to help the student who will be expected to choose one aspect of each civilization, such as women, slavery, merchants, education, medicine, etc., and write a five-page paper about that topic for each period, i.e., Mesopotamia, Egypt, Greece and Rome.

HISTORY 471P Ancient World: The Political Structure Of The Ancient World

The four-hour lecture period on weeknights will emphasize the historical aspects of the ancient civilizations. The lectures will be chronologically organized to focus upon their evolution from their rise to their collapse.

HISTORY 472P Ancient World: The Cul/Intellectual Dimension Of Ancient Civi

The four weekend periods will provide the students with a general picture of these civilizations: society, religion, economics, and culture (w.f., arts, literature, philosophy, science, etc.). Guest lecturers, slides, films and video cassettes will be used to introduce the varied aspects of these ancient peoples.

PACE - Humanities (HMNTY)

HMNTY 104P Indep Study/Tutorial: Spec Applications: Themes Of Individuality

In this course students apply knowledge and skills gained in the weekend and weekday courses to four supervised and well delineated study projects relating to the major themes of Block II, and involving various art forms and presentation media.

HMNTY 105P Literature, Composition & Critical Thinking: Individual & Society

This course develops facility in writing, reading and critical thinking through numerous writing and critical thinking activities, papers and readings focused around the topic of the relationship of the individual and society. This course accomplishes the purposes and fulfills the requirement of the first semester of freshman English.

HMNTY 106P The Individual In Literature, Philosophy And Art

This weekend course acquaints students with classic works of literature, philosophy and the fine arts, as well as the methodologies of the humanities, by means of an historical and systematic analysis of the developmental stages of individuality from the classical period to the contemporary era.

HMNTY 201P The Many Lives Of Dr. Faust

This course will involve the development, impact and artistic forms of ""The Lives of Dr. Faust,"" a major legend in Western Culture. This course examines Faust as dealing with a search for knowledge from Byzantium to modern Europe and America. This approach covers such topics as the limits of power, the choice between good and evil, and the limits of human awareness. The course will present this Faust legend in various artistic forms, by allowing the student to experience this ""myth"" through art, drama, literature and culture. Offered: Winter.

HMNTY 202P The Meaning Of The American Experience

This course meets the College requirement for ENGLISH 225. Integrated with the other courses in the block, its aim is to help students to become informed writers on the topics of American myths. The first part of the course will require students to write personal response papers; the second half will involve library research that can be synthesized into research papers. Offered: Winter.

HMNTY 203P American Dreams: Four Major American Myths

This course examines several meanings of four major American myths: the Puritan myth, the myth of the land, the myth of individualism and the myth of the machine. Students will examine works of literature, art, and film in order to comprehend the meaning of myth in their own culture and grasp the way in which cultural artifacts shape and express current values in American life. The course will take special note of the Faust myth's relevance in American culture. Prerequisites: Concurrent enrollment in Humanities 202P. Offered: Winter.

HMNTY 320P International Cultures

At the beginning of the new Millennium, this PACE course should heighten students' awareness of the values, esthetics and historical baggage of a particular culture as it introduces them to the dynamics of a rapidly changing world. Literature and scholarly texts will be in the in-roads to the culture and will deepen the students' insight into contemporary events. Course will vary with geographical area of study.

HMNTY 320P International Cultures

At the beginning of the new Millennium, this PACE course should heighten students' awareness of the values, esthetics and historical baggage of a particular culture as it introduces them to the dynamics of a rapidly changing world. Literature and scholarly texts will be in the in-roads to the culture and will deepen the students' insight into contemporary events. Course will vary with geographical area of study.

HMNTY 340PW The World Of Advertising

This course will present a broad overview of advertising literature. Students will be given some idea of the issues inherent in the world of advertising, procedures for running an ad campaign, and the role of persuasive writing and graphic design. As projects to accompany the historical and theoretical aspects of advertising, students will design a commercial or an ad campaign. The course will emphasize critical thinking, ethical issues, writing and speaking. Prerequisite: Two semesters of composition and successful completion of the WEPT (effective FS93).

HMNTY 375P Research In Women's Culture

Independent Study: Each student, with an instructor, will develop a research topic of personal or professional interest related to PACE 376P or PACE 377P and produce appropriate writing on the topic.

HMNTY 375P Research In Women's Culture

Independent Study: Each student, with an instructor, will develop a research topic of personal or professional interest related to PACE 376P or PACE 377P and produce appropriate writing on the topic.

HMNTY 376P Textural Representation Of Feminine

Focusing on the roles women have played in literature, as characters, as readers, and as writers, students will read, write about, and discuss short fiction, novels, and feminist literary theory. This course explores the ways in which both the choice of subject matter and the method of presentation differ in female-written and male-written texts, the ways in which women have been portrayed in literature by women writers and by men writers, and the ways in which ethnicity affects both subject matter and writing style in women's writing.

HMNTY 377P Growing Up Female With Mass Media

The purpose of this course is to examine women and women's issues in American film, media and culture. Focusing on the construction of women's images in the information age, the course follows the rise of feminism, backlash and "post feminism" to the position of the contemporary woman, providing a historical context for popular culture.

HMNTY 401PW The Culture Of The Working Class: Independent Study

This course, the independent study component of the labor and economics block, will employ a variety of cultural media which illustrate some of the issues covered in the weekend and evening courses. "The Culture of the Working Class" will show how literature, art, music and film have reflected and/or influenced the labor movement. Students will read novels, short stories and poems, view movies and works of art which address problems of the working class, both in Western Europe and the United States, from the late 1800's to the present. The work done will be validated through written work by the student. Prerequisite: Successful completion of the WEPT (effective FS93).

HMNTY 404PW Professional Communication

In this course students will study formats for various types of technical reports, from resumes to completion reports, most of which will use as content research projects assigned in the independent study segment. Students will also study techniques for presenting material orally, from small group communication to formal presentations of longer technical reports, complete with audio-visual aids. In both written reports and oral communication, students will learn to consider a variety of audiences. The course will have texts and will be team-taught. The writing element will provide another option for PACE students to fulfill the new junior/senior writing requirement. Prerequisite: Successful completion of the WEPT (effective FS93).

HMNTY 408P Images Of Aging In Literature

This one credit hour course will give students an opportunity to examine human attitudes towards the changes that occur in later life viewing them through fictional characters and events. It is one thing to learn the facts of the aging process and aging in society, but quite another to examine attitudes and feelings about such issues subjectively, through the eyes of one facing them. Through reading literature about older people and their concerns, discussing it and writing papers about it, students should develop a truer perspective about that portion of their own lives and alter their attitudes towards older people in their present culture. Though this is a one-credit-hour course, discussions and papers may also draw from readings done in the Independent

Study portion of the block.

HMNTY 410PW Turning Life Into Stories

This course will take a factual approach to creative prose writing, including both artistic nonfiction and fiction in various forms. The instructor will describe a form, suggest ways it might be written, and illustrate the form with examples of his own work and that of other writers. Student papers will be critiqued in writing by the instructor. Students will also read much of their work to the class, which will operate as a writing workshop. Prerequisite: ENGLISH 110 & ENGLISH 225 (or equivalents) and successful completion of the WEPT (effective FS93).

HMNTY 452 Images Of The Family In Art And Literature

An application of the skills and knowledge gained from the companion weekend and/or weekday courses in this block by means of the instructor-approved and guide independent study projects of the student's own individual or small group choice, focusing on images of the family in literature and art. Each student must select and present four projects (one on each of the following faith cultures—Christianity/Judaism, Islam, and one on a topic of their choice) in written, oral and/or audio/visual media. Students meet in groups and individual sessions with the instructor of this block.

HMNTY 461 Interpreting Past And Present Rhetorical Practices

The purpose of this course is to examine what rhetoric is and how it has been (and is currently) used to influence what we believe, practice and value as individuals and as a society. Beginning with the classical period, then moving chronologically to present day rhetorical theories, students will analyze the ways in which rhetoric has both influenced and been influenced by its historical context. Course grades will be determined by four examinations, an 8-10 page course paper, and an oral presentation of the work of one rhetorician.

HMNTY 462 Analyzing Modern Discourse Communities

In this course, students will learn how to critically examine the rhetorical effects of political, legal, journalistic, literary documents. Students will also learn how to more effectively argue by mastering particular rhetorical strategies. There will be four written projects in this course: a summary/research assignment, a review assignment, an analysis assignment and an argument assignment.

HMNTY 490P Perceptions & Images Of Disabilities In Literature And Film

This course combines classroom discussion of selected films and literature and independent study. Students will study films and selections from literature to develop an understanding and awareness of the social, economic and political aspects of disability as conveyed through popular culture. Students will also apply research, observation and writing skills to gain awareness and insights regarding disabilities, through working on an individual or team project. The project will further the understanding of disabilities and how various social, psychological and environmental conditions may affect people with disabilities and their families.

PACE - Integrated Studies (INTGR)

INTGR 401P The Creative Source: Concepts And Actions

A survey of the intellectual history of our culture highlighting the contributions of important philosophers, theologians, scientists, political figures, artists and musicians from antiquity through the contemporary period. Prerequisite: Senior standing.

INTGR 402P Turning Points In The History Of Ideas

Focused discussions on specific aspects within the history of ideas in five major eras (Antiquity, the Middle Ages, the Renaissance, the Romantic Age and the 20th-century), Prerequisite: Senior standing.

INTGR 403P Major Intellectual Developments In Western History

Major developments within the history of ideas in philosophy (and religion), the arts, political thought, and the history of science. Prerequisite: Senior standing.

INTGR 425P Integrative Seminar In Disability Studies

The Integrative Seminar in Disability Studies provides students the venue to focus and synthesize their knowledge of disability within an academic field. Required for Interdisciplinary Certificate in Disability Studies. Prerequisites: HMNTY 490P, PSYCH 406P and PSYCH 407P Offered: On Demand

INTGR 430P Development Disabilities: Partners In Policymaking

Participants, selected through an application process conducted by the Missouri Planning Council for Developmental Disabilities, attend eight two-day sessions over a period of eight months. Partners meet with and learn from nationally known speakers, gaining state of the art information on critical issues, including state and federal issues. Partners develop skills that will enable them to form productive partnerships to influence police and law. Prerequisite: Selection by Missouri Planning Council Offered: TBD

PACE - Psychology (PSYCH)**PSYCH 270P Compulsive Gambling And Other Addictions**

Course will focus on compulsive gambling and the psychology of addiction. Alcohol, drug, food and sex addiction will also be explored. After attending this course, the student will be able to understand the problem gambling continuum, the phases of the problem gambler and how this addiction affects the family.

PSYCH 407P Developmental Disabilities And Community Life

Focus is on developmental disabilities in community life and interdisciplinary process as a means of coordinating services and supports in community settings. Students will learn about specific disciplines and professions and how they must work together in the community. Topics include the State developmental disabilities network and service system, the principles of person-centered planning, the effects of severe disability on families, and the dynamics surrounding community inclusion of persons with severe disabilities.

PSYCH 418 Brain and Behavior I

Introduction to the neural bases of human behavior, including movement, learning and memory, sensation and perception, emotion, cognition, psychological, and neurological disorders. Prerequisite: PSYCH 302WI.

PSYCH 490P Perceptions & Images Of Disabilities In Literature And Film

This course combines classroom discussion of selected films and literature and independent study. Students will study films and selections from literature to develop an understanding and awareness of the social, economic and political aspects of disability as conveyed through popular culture. Students will also apply research, observation and writing skills to gain awareness and insights regarding disabilities, through working on an individual or team project. The project will further the understanding of disabilities and how various social, psychological and environmental conditions may affect people with disabilities and their families.

PACE - Political Science (POL-SCI)**POL-SCI 347P Crime and Civil Liberties**

A study of civil liberties in American society, emphasizing their role in the criminal and legal process. Topics include issues related to the Fourth, Fifth, Sixth, Eighth and 14th amendments. Other topics to be covered will depend on class interest and current events. Part of PACE Block -- Justice and Society.

POL-SCI 347P Crime and Civil Liberties

A study of civil liberties in American society, emphasizing their role in the criminal and legal process. Topics include issues related to the Fourth, Fifth, Sixth, Eighth and 14th amendments. Other topics to be covered will depend on class interest and current events. Part of PACE Block -- Justice and Society.

POL-SCI 358 Global Political And Social Issues

This course is designed to afford the student with an overview of important global and regional challenges associated with the emerging 21st century. Hence, there are three objectives: (1) gain an understanding of the facts and complexities of the selected issues within the framework of globalization; (2) describe and explain difficulties in formulating political/ policy consensus aimed at resolving these issues; (3) considering both the factual complexities and difficulties in formulating policy; identify future trends related to major global challenges.

POL-SCI 406P Political Leadership

This weekend course will examine theories, institutions and styles of political leadership; analyze recruitment and selection methods; and study popular perceptions of such leaders. Using film, fiction and materials from political science, this course will culminate in a look at U.S. presidents and the presidency in the 20th century. Prerequisites: Social Science PACE 102P and 103P, or POL-SCI 210 or equivalent; concurrent enrollment in POL-SCI 409P for those in the PACE Program or in the B.L.A. degree program. For other students, the consent of the instructor is required. Students who have credit for POL-SCI 406A or its equivalent may not enroll in this course.

POL-SCI 407P Politics Of Representation

A study of legislative institutions, procedures and behaviors in the U.S. Congress that raises practical as well as theoretical questions of political representation in modern society. This course will be presented by video cassette and will be integrated with POL-SCI 406P and POL-SCI 409P. Prerequisites: Social Science PACE 102P and 103P or POL-SCI 210 or equivalent; concurrent enrollment in POL-SCI 406P and POL-SCI 409P.

POL-SCI 409P Bureaucratic Politics

This weeknight course will examine the emergence of bureaucracies as the modern method of collective problem solving. In the U.S. political context, this involves the dynamic interplay of rational choice, due process and pluralistic politics. The transitions from limited to positive government and then to the current ethos of deregulation will be studied.

POL-SCI 435P Politics Of The Environment

A survey of the political aspects of environmental issues. The course poses the problems of environmental damage and examines actual and proposed policies aimed at addressing them. The course content is the same as POL-SCI 435 title except additional reading and writing will be required commensurate with a 4 credit hour course.

PACE - Social Science (SOC-SCI)**SOC-SCI 210P** Foundations Of Social Science

An application of salient principles, facts and methods of social sciences to study of origins and nature of social institutions; problems of emotional adjustment and vocational choice; analysis of contemporary social, legal and economic trends affecting values, conception of freedom and of social power, and political organization.

SOC-SCI 305P Economic Principles And Applications Of Accounting

In this one-hour course, students will use computers to apply accounting principles and to analyze annual reports of corporations. The course will be taught during one hour of a four-hour weeknight course, with ACCTNG 201 being taught during the other three hours. It should be taken concurrently with ACCTNG 201 and with the Independent Study course, SOC-SCI 403P, Business Administration Applications. On a two-year rotation.

SOC-SCI 355P The Environmental Movement: Roots And Actions

A multi-disciplinary course synergizing case studies from history, political science, environmental management, and urban planning to develop a deep understanding of current environmental issues. We will probe such issues as the Concept of Nature and Environmental aesthetics Agriculture and the Environment, Energy and the Environment, Developing the "Built Environment", Environmental Costs of Industrialism, the Birth of the Environmental Movement, Environmental Politics, Environmental Justice and many other topics.

SOC-SCI 359P Technology Policies In Hospitality

This course will examine policies and practices of technology in hospitality and the impact of technology on decision making in the industry. Special attention will be given to the relationship between technology and organizational resources, examining the future development of policies and practices. Prerequisites: None. Offered: Any Semester.

SOC-SCI 364PW Contemporary Industrial Society

This course examines the historical theoretical and behavioral foundations of the industrial economy of the U.S. Particular emphasis is placed on technological change, the culture of modern corporations, strategic planning and the contemporary environment of business enterprise (legal, social, environmental and economic). The major institutions of business structure of the modern corporation are covered. Prerequisites: ECON 201, ECON 202 and successful completion of WEPT Test. Offered: Fall.

SOC-SCI 375P Contemporary Issues In The Service Industry

This course will allow students to undertake in-depth research of current issues important to the service industry. Focus will be placed on understanding theoretical principles and their impact on management behavior and decision making. Issues may include; the evolving technology of the industry, the impact of the industry on national employment issues, and the social impact of the industry on class and racial issues. This course is offered as an independent study and must be taken in conjunction with ECON 323P: Administration in the Service Industry. Prerequisites: None. Offered: Any Semester.

SOC-SCI 395B The Economics Of The Law

See ECON 395B. Prerequisites: ECON 201 and ECON 202. Offered: Fall.

SOC-SCI 395C Economics Of Energy

See ECON 395C. Offered: Fall.

SOC-SCI 395G Economics Of Poverty

See ECON 395G. Offered: Fall.

SOC-SCI 403P Industrial Organization Applications

The students will read books and business journals and reflect, in written form, on topics related to the organizational environment. Students will also research and prepare technical reports on specific organizational issues. Validation will be coordinated with the technical writing component of the block. Offered: Fall

SOC-SCI 403P Industrial Organization Applications

The students will read books and business journals and reflect, in written form, on topics related to the organizational environment. Students will also research and prepare technical reports on specific organizational issues. Validation will be

coordinated with the technical writing component of the block. Offered: Fall

SOC-SCI 411P Aging In American Society: Past And Present

Modern views of aging are often contrasted with views of aging in earlier times. The popular mythology suggests that the position of the older adult has fallen from a place of high status and respect. Exploring the myths and rhetoric, this introduction to the field of social gerontology examines aging in America as grounded in the nation's history and a variety of sociocultural contexts.

SOC-SCI 438P Labor History & Economic Policy

Analysis of the confluence of political and economic behavior the economics of collective action. Prerequisites: ECON 301 and ECON 302.

SOC-SCI 456P In-Depth Country Study

Students enrolled in this section will chose a country in Latin America (not their country of origin, if applicable) and prepare a country study. Students will receive a general reading list (which has to be incorporated) and, if desired, suggestions about country-specific readings. The studies should be founded in cultural anthropology: i.e., they should be holistic in integrating all population groups of the country, and they should be integrated in treating the country as an inter-connected, but open, system.

SOC-SCI 457P First Nations And Survival In Latin America

This course examines the history of a specific country, historical and contemporary issues (such as genocide, land use, economic and political marginalization and independence movements.) The course focuses on history and experience as it is constructed by and impacts native people. Special consideration is given to women and gender constructs in the native societies and the impact of a dominant European patriarchy.

SOC-SCI 457P First Nations And Survival In Latin America

This course examines the history of a specific country, historical and contemporary issues (such as genocide, land use, economic and political marginalization and independence movements.) The course focuses on history and experience as it is constructed by and impacts native people. Special consideration is given to women and gender constructs in the native societies and the impact of a dominant European patriarchy.

SOC-SCI 458P Women, Men And Development In A Cultural Context

Students will explore two main areas of social scientific discourse in Latin America: theories of development and marginalization; and feminist interpretation of and responses to development. We will explore how the phases of political and economic history are reflected in ideas about development, dependency, and women's issues. A large part of the class will be concerned with the increasingly important issue of street children in Latin America and other minority issues. Offered: Winter

SOC-SCI 458P Women, Men And Development In A Cultural Context

Students will explore two main areas of social scientific discourse in Latin America: theories of development and marginalization; and feminist interpretation of and responses to development. We will explore how the phases of political and economic history are reflected in ideas about development, dependency, and women's issues. A large part of the class will be concerned with the increasingly important issue of street children in Latin America and other minority issues. Offered: Winter

SOC-SCI 465P Human Resources In The Service Industry

This course will trace the historical development, and examine current policies and procedures of human resources in service organizations. Special emphasis will be placed on understanding the evolving importance of employees in developing systems to meet operational goals. Management and labor perspectives on legal employment issues, compensations issues, and team development strategies will be examined. Prerequisites: None. Offered: Any Semester.

SOC-SCI 489P Internship In Hospitality Studies

This course will allow students to demonstrate mastery of acquired theories and principles in conjunction with a working hospitality organization. Emphasis will be placed on directed research and readings to enhance individual understanding or concepts. Students will work with the Hospitality Studies Coordinator on exact course requirements. Prerequisites: Permission of instructor. Offered: Every Semester.

SOC-SCI 490C Readings In Labor Economics

See ECON 490C. Prerequisites: ECON 201 and ECON 202. Offered: Winter.

PACE - Sociology (SOCIOLOGY)

SOCIOLOGY 381P Everyday Masculinities

This independent study course is designed to encourage students to put into play their study of and growing understanding of men's lives. Each student will design and carry out an independent study/research project that will take into account (critically)

the experience of at least three men in their immediate surroundings. Ethnographic methods (observation, field-note/interview and transcription strategies, write-up, etc.) will be covered to facilitate the student's successful completion of their project. The project will be broken down into phases to insure timely progress throughout the semester. Restrictions: Concurrent enrollment in Meanings of Masculinity required.

PACE - Natural Science (NAT-SCI)

NAT-SCI 101P Changing Life On Earth

This course presents an overview of issues relating to our ever changing world. It is research oriented with papers required on topics dealing with behavior, environmental issues, and aspects of evolution. Prerequisites: Concurrent enrollment with NAT-SCI 102P.

NAT-SCI 102P Fundamentals Of Life Science

This course emphasizes the essential properties of biological systems through four major themes: diversity, the chemical and physical basis of life, continuity, and the organismal nature of life. Prerequisite: Concurrent enrollment in NAT-SCI 103P. As needed.

NAT-SCI 103P Applications Of Life Sciences

This course is designed to provide students with laboratory exercises, field trips, films and discussions that help apply biological principles from 102P. New concepts are introduced throughout the course. Prerequisite: Concurrent enrollment in NAT-SCI 102P. As needed.

NAT-SCI 308P Physical Measurements

An introduction to metrology, this course will emphasize physical measurements in technology and trade as well as in daily life. Material will include the historical development of measurement units, from cubits to meters, especially since 1960; gravitational versus absolute systems; the International System of Units (SI); organizations, treaties and statutes; accuracy vs. precision; and numerical values: conventions, conversions and rounding. Student work will involve laboratory exercises, exams, practicum work and homework assignments (brief essays and/or problem solutions). Prerequisite: MATH 110 or MATH 150 (or equivalent) Summer.

NAT-SCI 375P Nature Of Science

Selected topics from the natural sciences. Provides students fundamental principles and concepts of various physical and mathematical sciences. Lectures, demonstrations and discussions provide an integrated approach to the natural sciences.

NAT-SCI 425P Introduction To Quantitative Methods

Topics addressed are the scientific approach to study of behavior (goals of science, research terminology, variables, distributions, measures of central tendency, confidence intervals, use of research methods and ethics in research), experimental design (validity, reliability, design and sampling techniques), and interpretation of research results. Course includes in-class computer data entry and analysis. Prerequisites: Intro to computers and MATH 110 or MATH 116

NAT-SCI 430PC CC: Biological And Ethical Issues In Aging

This course is designed to provide both a disciplinary and interdisciplinary study of the biological, philosophical, and ethical foundations and principles underlying the phenomenon of aging on an individual and societal level. Various physiological, neurological, anatomical, and psychological processes and changes characteristic of the development occurring during the aging process will be identified, studied, and discussed. The philosophical and specifically ethical issues associated traditionally with aging will be re-examined and analyzed in terms of scientific, technological, cultural, sociological, economic, and legal changes in knowledge and attitudes. PREREQUISITE: BIOLOGY 102 or equivalent. This course is also cross-listed as PHILOS 401PC.

PACE - Interdisciplinary Studies (INT-DISC)

INT-DISC 201P Energy, Technology And Society

Independent study television course. Technology is examined as a human activity that reflects society's needs and values. The social implications of technology are explored and the concept of technological systems is developed. The history and evolution of technology is studied, particularly as it has influenced life and planning for the future. Prerequisites: Concurrent enrollment in INT-DISC 202P and INT-DISC 203P.

INT-DISC 202P Energy Science

Weeknight course. Fundamental physical principles and concepts concerning energy sources, energy production, energy use and energy reserves will be studied. Emphasis will be placed on the physics of energy including chemical, electrical, mechanical, nuclear, solar and thermal energy. Prerequisite: Concurrent enrollment in INT-DISC 201P and INT-DISC 203P.

INT-DISC 203P Social, Economic And Political Influences On Energy

Weekend course. Some of the most important determinants of uses of energy and technology are social rather than physical. This course will consider such influences as energy conservation, the psychology of decision making, the impact of our organization on the means of production and our ability to utilize available energy to satisfy human needs, the human costs of high technology with respect to basic biological requirements and also with respect to higher human needs. Finally, alternative social organizations will be studied. Prerequisite: Concurrent enrollment in INT-DISC 201P and INT-DISC 202P.

INT-DISC 204P Work, Labor And Society

This course focuses on work, labor and society. Agrarian societies and the rise of industrialism are studied. Emphasis is placed upon understanding the role of the worker in today's society. Prerequisites: Concurrent enrollment in Social Science and HMNTY 202P and HMNTY 203P.

INT-DISC 205P Liberalism And The Technological Society

Weeknight course. The philosophy of liberalism and the reactions against that philosophy will be studied. We will examine the factors that have led to the rise of industrialism and technology and study the ways in which they have affected other aspects of the society. Students will be required to write a term paper. Emphasis will be placed on research and bibliographic methodology. Prerequisites: Concurrent enrollment in Social Science and HMNTY 203P is required.

INT-DISC 206P Political And Social Aspects Of A Technological Society

Weekend course. Industrialism has changed our way of looking at ourselves and the world. We will examine the new conception of the individual that arose with industrial society and will focus on some of the problems and prospects that have been associated with it. Social Darwinism, unions, and various utopian/anti-utopian theories will be among the ideas studied. Prerequisite: Concurrent enrollment in Social Sciences and HMNTY 202.

INT-DISC 310P Global Political And Social Issues

This course will give students a broad overview of a particular culture, region or ethnic group's political and social issues within the context of contemporary global challenges. Major topics include politics, economics, environmental and international concerns appropriate to understanding a cross section of traditions and values of a variety of social strata within a designated area of study.

INT-DISC 380P People With Special Needs: Education Planning

This course will address educational and psychological assessment strategies that result in a diagnosis of disability. Various specific disabilities and legal parameters for public education of people with disabilities will be discussed. Students will learn how to read and understand various educational and psychological assessment reports and will become knowledgeable about how to access community supports and services to address special needs in an education setting. By the end of the course students will have created a personal notebook of educational planning and accommodations for use as a resource for parents, teachers, or students in educational settings. Offered: Fall or Winter

INT-DISC 381P People With Special Needs: Career Exploration

This course will address the issues that arise in career exploration and planning for people with a disability diagnosis. Students will become familiar with the philosophy of community inclusion and will learn how to plan based upon the unique strengths and interest of the individual. Career exploration tools will be explored in class and as assigned, and students will create a personal notebook to be used as a resource tool of accommodation materials and aides. Offered: Fall or Winter

INT-DISC 382P People With Special Needs: Disability Service Settings

Independent study course: Students will meet at specific times as a group with the instructor, will write a term paper, and complete a 20 hour practicum in a pre-approved disability service setting. Offered: Fall or Winter

INT-DISC 401P The Natural Life Cycle

Independent study Television course. Students will be exposed to some of the latest concepts and research related to the natural life cycle. The various tapes to be viewed in this class will focus on the birth process, the maturation of the individual, and the abnormalities that can occur through various diseases and death. The tapes will have a predominantly biological orientation, although there will be a few tapes that provide artistic insight into the various stages of the life process. Prerequisites: Senior standing and concurrent enrollment in INT-DISC 402P and INT-DISC 403p.

INT-DISC 402P Literature And Life Sciences

This integrated weeknight course attempts to provide students with an overview of the relationship between biology and literature. Other disciplines also will be discussed, but these two will be the dominant ones presented. The life cycle of the human organism will provide the structure for this course. This process will then be subdivided into various substrata focusing on such aspects as childhood development, nutrition, the cardiovascular system, and the nervous system. Each of these aspects will also be examined from an artistic point of view. Prerequisites: Senior standing and concurrent enrollment in INT-DISCy 403P.

INT-DISC 403P Stages Of Growth

This integrated weekend course will attempt to offer the student both laboratory experiences and cinematic works that focus on the life-cycle process. Each of the weekend sections will be devoted to a particular stage of development, moving from conception to birth and childhood, to maturation and death. Prerequisites: Senior standing and concurrent enrollment in INT-DISC 402P.

INT-DISC 420P Brain And Behavior

The class will explore current and sometimes contradictory theories and evidence for the interaction of biological and psychosocial processes in such areas as gender differences, the experience of pain, addictive behaviors, and diseases such as depression, heart attack, rheumatoid arthritis and anorexia. Students and instructor will also briefly examine the organization of the triune brain, neurologic accidents, the range of tools currently used in diagnosis and treatment of mind-body diseases, and raise some of the bioethical issues these problems engender. Methods will include lecture, discussion, readings, films, oral class presentations, papers and exams. Prerequisite: One course in biology and/or psychology. Summer

INT-DISC 482P The Meanings Of Masculinity In Contemporary U.S. Culture

Topics include: Perspectives on Masculinity; Boyhood; Collegiate Masculinities: Privilege and Peril; Men and Work; Men and Health: Body & Mind; Men in Relationships; Male Sexualities; Men in Families; Masculinities in the Media; Men, Movements, and the Future. Small and large group discussions are anticipated in the classroom. Outside of the classroom, students will be expected to complete a series of assignments that are relevant to the topics at hand. This course would ideally incorporate UMKC faculty/staff and individuals/groups outside of the university who have completed research/work that seeks to understand men's lives better.

INT-DISC 483P Artful Man Embodied: Cultural Icons Of Masculinity

This course will examine a variety of mediums used to "embody" meanings of masculinity (with special attention paid to shifting settings for one media source can alter its meaning drastically simple by being located in a different venue and/or time). This course will incorporate tours of, and works from, the Nelson-Atkins and Kemper Museums. Images by/of "men" to be examined include those found in the work of selected "masculine icon" authors; those found in popular culture; and those found in the everyday (seemingly mundane) worlds of family, work, and medicine. As the title of the course implies, students will explore historical ideas about bodies/embodyment (be they scientific, religious, social, etc.) into their image exploration. Restrictions: Enrollment in Meanings of Masculinity recommended to take the course.

PACE - Physical Science (PHY-SCI)**PHY-SCI 301P Scientific Approaches To The Physical Worlds**

Applications of chemistry, earth science and astronomy in industry and to our daily environment. Particular emphasis is placed on the technological advancements made in these areas of natural science and on their relationship to our standard of living.

PHY-SCI 302P Concepts Of Chemistry, Earth Sciences And Astronomy

Basic principles of chemistry, earth sciences and astronomy with special emphasis on the earth and its environment.

PHY-SCI 303P Applications Of Physical Science

Laboratory exercise, field experiences, tutorial-type seminars and recitation in elementary chemistry, earth science and astronomy.

PACE - Philosophy (PHILOS)**PHILOS 401PC CC: Biological And Ethical Issues In Aging**

This course is designed to provide both a disciplinary and interdisciplinary study of the biological, philosophical, and ethical foundations and principles underlying the phenomenon of aging on an individual and societal level. Various physiological, neurological, anatomical, and psychological processes and changes characteristic of the development occurring during the aging process will be studied, and discussed. The philosophical and specifically ethical issues associated traditionally with aging will be re-examined and analyzed in terms of scientific, technological, cultural, sociological, economic, and legal changes in knowledge and attitudes. Prerequisites: Biology 102 or equivalent. This course is also cross-listed as NAT-SCI 430PC.

Philosophy (PHILOS)**PHILOS 210 Introduction to Philosophy**

An introduction to many of the central problems of philosophy. The various dimensions of philosophy are examined as it related to our relationships with each other, our understanding of our world and our understanding of ourselves. Connections between classical philosophers and contemporary issues are explored as philosophy is considered as a deeply personal and also as a social phenomenon.

PHILOS 211 Great Minds

In this course we will explore texts that have played a pivotal role in shaping western intellectual thought and the formation of political and cultural communities up to the present day. We will focus on tracing out their common themes such as political and social organization, political authority, morality, human nature, and the nature of knowledge. In doing so, our concerns will be twofold. On the one hand we will be trying to understand these texts in their historical and social context, on the other we will analyze and critically discuss the arguments they present and their underlying assumptions thereby learning how to construct well-formed arguments of our own.

PHILOS 221 Contemporary Moral Issues

This course offers a philosophical examination of ethical issues in contemporary society. Topics for discussion include ethical conflicts arising in business and technology, engineering, healthcare, politics, and the environment. Moral concerns addressed may include reproductive rights and technologies, warfare, capital punishment, pornography, privacy, consumerism, euthanasia, sexuality, and animal welfare.

PHILOS 222 Foundations Of Logic

This course introduces the basic concepts and methods of modern logic, beginning with "premise", "inference", "conclusion", and "argument", with emphasis on understanding and reconstructing complex patterns of reasoning, and analysis and construction of valid arguments.

PHILOS 300CK Cluster Course: Controversy And Choice In Life And Science

An examination of advances in the health and life sciences that involve methodological questions about the pursuit and acceptance of theories. Procedures for choosing and conducting research will be analyzed using a model that incorporates existing knowledge. Assessment and management of research are also explored. Participating guests will present solutions derived.

PHILOS 310WI Ancient Philosophy

A survey of the central figures of classical philosophy: the pre-Socratics, Socrates, Plato, Aristotle, the Stoics, the Epicureans and other philosophers of antiquity. The contributions of major philosophers to the development of science, religion, and social and political theories are studied. Prerequisites: PHILOS 210, PHILOS 222 or an equivalent and successful completion of the WEPT Offered: Fall.

PHILOS 315 Logic And Methodology In The Health And Social Sciences

Analysis of the reasoning processes and theory-building procedures specific to the health and social sciences. As its major focus, the course will critically examine the philosophical foundations of the health and social sciences using the case study method. In addition, brief case study analyses of reasoning and theory-construction in the physical sciences will be offered in comparison. Prerequisite: PHILOS 210, PHILOS 222.

PHILOS 320WI History of Modern Philosophy

A survey of the central figures of modern philosophy: Rene Descartes, Baruch Spinoza, G.W. Leibniz, Thomas Hobbes, John Locke, George Berkeley, David Hume and Immanuel Kant. In addition to the philosophical issues of the period, cultural, historical and political matters are considered. A secondary goal is the establishment of the pedigree of contemporary philosophical problems. Prerequisites: PHILOS 210, or PHILOS 222 or an equivalent and successful completion of the WEPT Offered: Winter.

PHILOS 321 Ethics

Attention is given to the nature of ethical ideas and the development and history of ethical theory. Prerequisites: PHILOS 210, PHILOS 221, or PHILOS 222, or with permission of instructor.

PHILOS 322 Philosophy of Literature

A close study of the ancient problems at the intersection of philosophy and literature: what sort of truth, if any, do we find in literature? Does literature have ethical content? What makes a literary text beautiful? How do "literary" texts differ from philosophical and other kinds of texts? Should literary texts influence our thinking about politics and other social issues? We will study classic philosophers like Plato, Aristotle, Kierkegaard, and Nietzsche, great literary writers such as Sappho, Dante, Goethe, Dostoevsky, and Rilke, and harder to categorize figures like Freud. The class will include the study of several recent philosophers who worked specifically on the subject of the "philosophy of literature," such as Bakhtin, Benjamin, Lacan, Szondi.

PHILOS 325 Aesthetics

The basic problems of aesthetics are examined, with special emphasis on the character of the work of art, the aesthetic response of the viewer, the creative process of the artist, and the nature of aesthetic criticism. These topics are discussed in light of conflicting aesthetic theories. Prerequisite: PHILOS 210, PHILOS 222, or equivalent.

PHILOS 326 Epistemology: Theories Of Knowledge

A study of the problems connected with the nature of knowledge and human understanding. Prerequisite: PHILOS 210, 222 or an equivalent.

PHILOS 327 Metaphysics: Theories Of Reality

An investigation of the essential problems regarding the nature of reality in its most general aspects. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

PHILOS 328 Philosophy In The Middle Ages

The history of philosophy from St. Augustine to William of Ockham, including analysis of the relationships of medieval philosophical developments to earlier and later philosophical developments. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

PHILOS 329 American Philosophy

The main trends of American thought are covered, with special emphasis on the philosophies of Peirce, James and Dewey. Prerequisite: PHILOS 210 or PHILOS 215 or PHILOS 222 or an equivalent.

PHILOS 330 19Th-Century Philosophy

Following a review of the influence of Kant on European thought, consideration is given to the German idealists, Comte and Positivism, Mill and Empiricism, British Neo-Hegelianism, the rise of Evolutionary Philosophy and Nietzsche. Prerequisites: PHILOS 210 or PHILOS 215 or PHILOS 222 or an equivalent.

PHILOS 331 Philosophy Of Religion

An analysis of the nature and function of religion and its relation to culture. An examination is made of the basic ideas of religion, and special attention is given to the problems of religion and reality, religion and science, and the changing character of religion in our times. No prerequisites.

PHILOS 332 Existentialism

A study of the development of existentialism. Selections from the works of such thinkers as Kierkegaard, Nietzsche, Sartre, Heidegger, Camus and other related philosophers are considered. Special attention is devoted to the existential movements in literature, social science and medicine. Prerequisite: PHILOS 210, PHILOS 222 or equivalent.

PHILOS 333 Social And Political Philosophy

A consideration of representative views of the place of man in contemporary society. Contributions in psychology, political theory, economics, sociology and anthropology are investigated philosophically with a view toward offering a critical appraisal of the nature of man in the human community. No prerequisites.

PHILOS 333 Social And Political Philosophy

A consideration of representative views of the place of man in contemporary society. Contributions in psychology, political theory, economics, sociology and anthropology are investigated philosophically with a view toward offering a critical appraisal of the nature of man in the human community. No prerequisites.

PHILOS 334 Philosophy Of Science

A critical analysis of the assumptions, methods and conceptual frameworks of the sciences. The course emphasizes such topics as the influence of theory on observation; the problem of discovery, verification and experimental confirmation; and the relation of scientific language and concepts to ordinary language and beliefs. Prerequisite: PHILOS 222.

PHILOS 334 Philosophy Of Science

A critical analysis of the assumptions, methods and conceptual frameworks of the sciences. The course emphasizes such topics as the influence of theory on observation; the problem of discovery, verification and experimental confirmation; and the relation of scientific language and concepts to ordinary language and beliefs. Prerequisite: PHILOS 222.

PHILOS 335 Philosophy Of Mind

A study of problems arising in connection with such topics as mental phenomena, the relation of mind to body, free will and determinism, the self and personal identity, and "thinking" machines. Classical and contemporary treatments of such concepts as "mind," "intention," "sensation," "perception," "stimulus," etc., and their relation to action and behavior are considered. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

PHILOS 336 Philosophy Of Language

A study of the nature and uses of language, with special reference to concepts of meaning, denotation, reference, syntax, name, metaphor, vagueness, and definition. Applications in the fields of psychology, linguistics, anthropology, and literary criticism are

examined. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

PHILOS 337 Philosophy Of History

A discussion of methodological and substantive issues, including the nature of historical explanation, whether history can be a science, and various theories of history such as those of Vico, Hegel, Marx, and Collingwood. Prerequisite: PHILOS 210, PHILOS 215, PHILOS 222 or an equivalent.

PHILOS 338 Philosophy Of Biology

An investigation of methodological and conceptual issues in biology, such as the roles of mechanistic and teleological explanations, reductionism, the nature of evolutionary theories, and the relation between taxonomy and the concept of species. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

PHILOS 338 Philosophy Of Biology

An investigation of methodological and conceptual issues in biology, such as the roles of mechanistic and teleological explanations, reductionism, the nature of evolutionary theories, and the relation between taxonomy and the concept of species. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

PHILOS 340 Philosophy Of Law

An analysis of major philosophies of law, including methods of justifying legal systems through natural law, legal positivism, sociological jurisprudence, theology, etc. Contemporary legal theories are critically analyzed. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

PHILOS 344 Philosophy of Sport

This course uses sports as a point of departure to explore central philosophical themes in metaphysic/epistemology, aesthetics, ethics, and social/political philosophy. Students will explore the concept and role of sports in society from ancient Greece to modern times.

PHILOS 346 Metaphysics and Epistemology

this course is an advanced overview of some central themes in metaphysics nad epistemology. Metaphysics focuses on basic questions about the nature of reality. Epistemology is concerned with questions about knowledge and justification. In this class, we will explore a variety of topics (causation, universals, scepticism, induction, etc.) that occupy contemporary philosophers. Prerequisite: Philosophy 222 or consent of the instructor.

PHILOS 350 Scientific Controversies

Students will study particular scientific controversies and the arguments scientists se to defend their own position and attack the positions of their opponents.

PHILOS 360 Current Issues In Bioethics

Alternative approaches to issues such as life and death, human experimentation, the scarcity of resources, contraception, abortion, euthanasia, eugenics, etc. will be discussed critically. Major theories of ethics will be applied to several of the issues in order to have the student develop his or her own approach to ethical decision making in the area of bioethics. No prerequisites.

PHILOS 370 Environmental Ethics And Policy

Various philosophical approaches to issues such as the value of nature, human obligations to non-human animals, species, ecosystems and future generations; environmental justice; restoration; resource use; environmental politics; and the relation between environmental issues, policy and ethics will be discussed critically. Prerequisite: None Offered: Annually Restrictions: None

PHILOS 370 Environmental Ethics And Policy

Various philosophical approaches to issues such as the value of nature, human obligations to non-human animals, species, ecosystems and future generations; environmental justice; restoration; resource use; environmental politics; and the relation between environmental issues, policy and ethics will be discussed critically. Prerequisite: None Offered: Annually Restrictions: None

PHILOS 400 Interdisciplinary Studies: Cluster Course Offerings

PHILOS 400CJ Cluster Course: Aesthetic Issues In The Arts

Specialists in various art forms (e.g., literature, music, painting) will discuss specific artworks from their own perspective as artists and/or critics. This gives the student first-hand experience of how questions dealt with in the philosophy of art arise. Using this common core of examples, philosophical issues such as relevance of artists' intentions to interpretation and evaluation, the nature of aesthetic value, the nature and significance of comedy, and special issues raised by contemporary developments in the

arts are discussed.

PHILOS 400CO Cluster Course: Issues In Death And Dying

A study of the various philosophical dimensions of death and dying in the history of thought from the pre-Socratics through the contemporary existentialist philosophers. Topics to be critically examined will include the ethical, religious and legal implications of the changing definitions of death, active and passive euthanasia, suicide, the ethical aspects of truth telling, and the impact of technological and scientific advancements as they relate to the rights and dignity of the dying patient and survivors as well as special populations such as children and incapacitated persons. The philosophical dimensions of death and dying will include epistemological, metaphysical, ethical and hermeneutic aspects. Alternate theories and approaches to ethical decision making concerning this important aspect of human existence will be presented.

PHILOS 401PC CC: Biological And Ethical Issues In Aging

This course is designed to provide both a disciplinary and interdisciplinary study of the biological, philosophical, and ethical foundations and principles underlying the phenomenon of aging on an individual and societal level. Various physiological, neurological, anatomical, and psychological processes and changes characteristic of the development occurring during the aging process will be studied, and discussed. The philosophical and specifically ethical issues associated traditionally with aging will be re-examined and analyzed in terms of scientific, technological, cultural, sociological, economic, and legal changes in knowledge and attitudes. Prerequisites: Biology 102 or equivalent. This course is also cross-listed as NAT-SCI 430PC.

PHILOS 423 Symbolic Logic

Advanced analysis of deductive procedures; sentential connectives, quantifiers, classes, and relations; the notion of formal system; introduction to axiomatics and metalogical proofs. No prerequisites.

PHILOS 423 Symbolic Logic

Advanced analysis of deductive procedures; sentential connectives, quantifiers, classes, and relations; the notion of formal system; introduction to axiomatics and metalogical proofs. No prerequisites.

PHILOS 424 Art, Aesthetics And Society

This course examines various moral and social issues concerning the arts and the aesthetics of our environment, bringing in case studies of particular artworks. It explores the relationships between aesthetic and moral value in the case of censorship, the effect of images on the public, and the aesthetics of the natural environment. It also looks at how public art is supposed to serve the public, and ethical dilemmas faced by art museums.

PHILOS 425 History Of Aesthetics

An examination of the major thinkers in the history of aesthetics, such as Plato, Aristotle, Kant, Nietzsche, Tolstoy and Croce. The focus will be on how their ideas bear on topics which will interest anyone desiring to understand the origin, nature and value of the arts. Examples of these topics are the relationships among art, knowledge and morality; the natures of originality, creativity and genius; the importance of form, content and expression of emotions; and standards of taste and the claims of criticism. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

PHILOS 430 Plato

Selected dialogues of Plato are studied with a view to understanding Plato's philosophy and its position in the world of Greece and antiquity. Plato's philosophy is also examined with reference to his place in the Western tradition and in modern philosophy. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

PHILOS 431 Aristotle

Selected portions of Aristotle's works on logic, metaphysics, science, ethics, politics, and poetics are studied with a view to understanding Aristotle's philosophy and its position in the world of Greece and antiquity. Aristotle's philosophy is examined with reference to its place in the Western tradition and in modern philosophy. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

PHILOS 435 Hume

A study of selected writings of David Hume for the purpose of gaining an understanding of the rise of modern empiricism and its influence on contemporary thought. Prerequisite: Philosophy 210 or 215 or 222 or an equivalent. On demand.*

PHILOS 435R The British Tradition In Philosophy

This course is a survey of major British philosophers. Among those who will be studied are Thomas Hobbes, John Locke, David Hume, J.S. Mill, E.H. Bradley, and Bertrand Russell. The influence of British philosophy on other philosophical movements will also be included. Prerequisite: PHILOS 210, PHILOS 215, PHILOS 222 or an equivalent.

PHILOS 436 Kant

A study of selected writings of Immanuel Kant, with particular emphasis on the epistemological, metaphysical and ethical aspects

of Kant's philosophy; an examination of Kant's significance within contemporary thought. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent.

PHILOS 445 20th-Century Philosophy

A study of the development of philosophy in the 20th-Century, treating such movements as Idealism, Realism, Logical Positivism, Existentialism, Phenomenology, Pragmatism, and Analytic Philosophy. Prerequisite: PHILOS 210 or PHILOS 215 or PHILOS 222.

PHILOS 448 Recent Ethical Theories

An analysis and investigation of modern and contemporary ethical theories. Among the theories considered are ethical relativity, the emotive theory, utilitarianism, neo Kantianism, and situation ethics. Prerequisite: PHILOS 321.

PHILOS 450WI Ethics And Government

An examination of ethical issues related to government, with the primary focus on national and local governmental bodies in the United States. Ethics in the executive, legislative and judicial branches are examined. Ethical standards for elected officials and appointed public servants are reviewed. Attempts to "legislate morality" are considered. The course includes a historical review of ethics and government and an analysis of the legal implications of legislation regarding ethics in the executive branch. Prerequisite: PHILOS 210 or permission of the instructor. Offered: On demand.

PHILOS 450WI Ethics And Government

An examination of ethical issues related to government, with the primary focus on national and local governmental bodies in the United States. Ethics in the executive, legislative and judicial branches are examined. Ethical standards for elected officials and appointed public servants are reviewed. Attempts to "legislate morality" are considered. The course includes a historical review of ethics and government and an analysis of the legal implications of legislation regarding ethics in the executive branch. Prerequisite: PHILOS 210 or permission of the instructor. Offered: On demand.

PHILOS 480 Selected Topics

Each time this course is offered a particular philosopher or particular area of philosophy will be the topic of discussion. The course may be repeated for credit when the topic varies. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent, depending on the topic.

PHILOS 480 Selected Topics

Each time this course is offered a particular philosopher or particular area of philosophy will be the topic of discussion. The course may be repeated for credit when the topic varies. Prerequisite: PHILOS 210, PHILOS 222 or an equivalent, depending on the topic.

PHILOS 480A Selected Topics

PHILOS 480B Selected Topics

PHILOS 480E Selected Topics

PHILOS 490 Special Topics And Readings

Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies. Prerequisite: Philosophy 222, 310, 320, 321 or 423.

PHILOS 490 Special Topics And Readings

Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies. Prerequisite: Philosophy 222, 310, 320, 321 or 423.

PHILOS 490B Special Topics And Readings

Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies. Prerequisite: Philosophy 222, 310, 320, 321 or 423.

PHILOS 490F Special Topics and Readings

Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies. Prerequisite: Philosophy 222, 310, 320, 321 or 423.

Physical Science (PHY-SCI)
PHY-SCI 100PS Special Topics Umkc

PHY-SCI 110 Foundations Of Physical Sciences I

Fundamental principles and concepts of the various physical and mathematical sciences, integrated by the history and philosophy of science. Fall and winter semester.*

PHY-SCI 110L Foundations Of Physical Sciences, Laboratory I

General laboratory and discussion sessions on various topics in the physical and mathematical sciences.

PHY-SCI 110L Foundations Of Physical Sciences, Laboratory I

General laboratory and discussion sessions on various topics in the physical and mathematical sciences.

PHY-SCI 130 Physics of Sports

A course intended for liberal arts students focusing on the physics involved in different sports. Physical laws and technological developments that impact sports will be studied. Cross-listed with Physics 130 and Natural Science 130.

PHY-SCI 140 How Things Work

A course intended for liberal arts students focusing on the principles of operations, histories, and relationships of objects from our daily environment. The areas of investigation include mechanical and thermal objects, electromagnetism, light, special materials and nuclear energy. This course will meet the area requirement for natural sciences. Cross-listed with Physics 140 and Natural Science 140.

PHY-SCI 140L How Things Work Laboratory

Simple experiments based on everyday experiences are analyzed in terms of conceptual physics. The material includes elements of mechanics of a rigid body, elastic properties of matter, fluid dynamics, thermodynamics, electromagnetism, optics and modern physics. The laboratory supplements the Physical Science 140 lecture and must be taken concurrently with the lecture. Cross-listed with Physics 140L and Natural Science 140L.

PHY-SCI 150 Introduction to Astronomy: Gravity and Motion in the Universe

A survey of modern topics in astronomy with an emphasis on developing conceptual models for the fundamental laws of gravity and motion underpinning the structure and evolution of the universe. Topics include lunar phases, eclipses, planetary motion, exoplanets, formation of planetary systems, star formation, supernovae, white dwarfs, neutron stars, black holes, growth of galaxies, dark matter and the expansion of the universe. Cross-listed with PHYSICS 150 and NAT-SCI 150. Prerequisites: None. Offered: Fall

PHY-SCI 153L Introductory Astronomy Laboratory

An introductory exploration of astronomical phenomena and concepts through quantitative laboratory activities requiring data collection, analysis and interpretation. This course is open to students from all majors. Concurrent enrollment in either Phy-Sci 150 or Phy-Sci 155 is encouraged but not required. Cross-listed with Physics 153L and Phy-Sci 153L.

PHY-SCI 153L Introductory Astronomy Laboratory

An introductory exploration of astronomical phenomena and concepts through quantitative laboratory activities requiring data collection, analysis and interpretation. This course is open to students from all majors. Concurrent enrollment in either Phy-Sci 150 or Phy-Sci 155 is encouraged but not required. Cross-listed with Physics 153L and Phy-Sci 153L.

PHY-SCI 155 Introduction to Astronomy: Interaction of Light and Matter in the Universe

A survey of modern topics in astronomy with an emphasis on developing conceptual models for the interactions between light and matter underpinning energetic phenomena in the universe. Topics include telescopes and detectors, solar system exploration, planetary climates, nuclear fusion and chemical enrichment, stars and stellar evolution, interstellar material, pulsars, quasars, gamma ray bursts, the Big Bang and the possibility of life beyond Earth. Cross-listed with PHYSICS 155 and NAT-SCI 155. Prerequisites: None. Offered: Spring

PHY-SCI 171 Physics For Future Presidents

A course intended for liberal arts students focusing on the physics they need to be informed citizens in a democracy. Energy, global warming, terrorism, and health are examples of the important topics examined from the perspective of how science should inform policy.

PHY-SCI 301P Scientific Approaches To The Physical Worlds

Applications of chemistry, earth science and astronomy in industry and to our daily environment. Particular emphasis is placed

on the technological advancements made in these areas of natural science and on their relationship to our standard of living.

PHY-SCI 302P Concepts Of Chemistry, Earth Sciences And Astronomy

Basic principles of chemistry, earth sciences and astronomy with special emphasis on the earth and its environment.

PHY-SCI 303P Applications Of Physical Science

Laboratory exercise, field experiences, tutorial-type seminars and recitation in elementary chemistry, earth science and astronomy.

Physics (PHYSICS)

PHYSICS 102 Introduction To Physics

Introduction to fundamental concepts and basic laws of physics with daily life examples. Simple problem solving techniques. This course will meet the area requirements for the natural sciences. Prerequisite(s): None.

PHYSICS 130 Physics of Sports

A course intended for liberal arts students focusing on the physics involved in different sports. Physical laws and technological developments that impact sports will be studied. Cross-listed with Natural Science 130 and Physical Science 130. Offered: Spring.

PHYSICS 130 Physics of Sports

A course intended for liberal arts students focusing on the physics involved in different sports. Physical laws and technological developments that impact sports will be studied. Cross-listed with Natural Science 130 and Physical Science 130. Offered: Spring.

PHYSICS 140 How Things Work

A course intended for liberal arts students focusing on the principles of operations, histories, and relationships of objects from our daily environment. The areas of investigation include mechanical and thermal objects, electromagnetism, light, special materials and nuclear energy. This course will meet the area requirement for natural sciences. Cross-listed with Natural Science 140 and

Physical Science 140. Offered: Fall and Spring.

PHYSICS 140 How Things Work

A course intended for liberal arts students focusing on the principles of operations, histories, and relationships of objects from our daily environment. The areas of investigation include mechanical and thermal objects, electromagnetism, light, special materials and nuclear energy. This course will meet the area requirement for natural sciences. Cross-listed with Natural Science 140 and Physical Science 140. Offered: Fall and Spring.

PHYSICS 140L How Things Work Laboratory

A course intended for liberal arts students focusing on the principles of operations, histories and relationships of objects from our daily environment. The areas of investigation include mechanical and thermal objects, electromagnetism, light, special materials and nuclear energy. This course will meet the area requirement for natural sciences Cross-listed with Natural Science 140L and Physical Science 140L. Offered: Spring.

PHYSICS 140L How Things Work Laboratory

Topics include lunar phases, eclipses, planetary motion, exoplanets, formation of planetary systems, star formation, supernovae, white dwarves, neutron stars, black holes, growth of galaxies, dark matter and the expansion of the universe. Cross-listed with NAT-SCI 150 and PHY-SCI 150. Prerequisites: None. Offered: Fall

PHYSICS 153L Introductory Astronomy Laboratory

An introductory exploration of astronomical phenomena and concepts through quantitative laboratory activities requiring data collection, analysis and interpretation. This course is open to students from all majors. Concurrent enrollment in either Physics 150 or Physics 155 is encouraged but not required. Cross-listed with Nat-Sci 153L and Phy-Sci 153L.

PHYSICS 153L Introductory Astronomy Laboratory

An introductory exploration of astronomical phenomena and concepts through quantitative laboratory activities requiring data collection, analysis and interpretation. This course is open to students from all majors. Concurrent enrollment in either Physics 150 or Physics 155 is encouraged but not required. Cross-listed with Nat-Sci 153L and Phy-Sci 153L.

PHYSICS 155 Introduction to Astronomy: Interaction of Light and Matter in the Universe

A survey of modern topics in astronomy with an emphasis on developing conceptual models for the interactions between light and matter underpinning energetic phenomena in the universe. Topics include telescopes and detectors, solar system exploration, planetary climates, nuclear fusion and chemical enrichment, stars and stellar evolution, interstellar material, pulsars, quasars, gamma ray bursts, the Big Bang and the possibility of life beyond Earth. Cross-listed with NAT-SCI 155 and PHY-SCI 155. Prerequisites: None. Offered: Spring

PHYSICS 160 Vision and Imaging: From Light to Electrons

This course is intended for non-Physics majors who wish to learn about recent development in the field of physics. Students will explore light and electrons and learn how they are used to visualize nature from microscopic to macroscopic scales. The underlying physics principles in various imaging techniques and the concept of optics will be explained. Intriguing images will be shown and interpreted, to demonstrate that physics is fascinating and has great impact on our lives. No specific mathematics is required for taking this course. This course will meet the area requirements for the natural sciences.

PHYSICS 171 Physics for Future Presidents

A course intended for liberal arts students focusing on the physics they need to be informed citizens in a democracy. Energy, global warming, terrorism, and health are examples of the important topics examined from the perspective of how science should

inform policy. Offered: Fall.

PHYSICS 171 Physics for Future Presidents

A course intended for liberal arts students focusing on the physics they need to be informed citizens in a democracy. Energy, global warming, terrorism, and health are examples of the important topics examined from the perspective of how science should inform policy. Offered: Fall.

PHYSICS 190 Introduction to High Performance Scientific Computing

A survey course designed for students interested in learning how computer technology and scientific simulations have helped establish the frontiers of modern knowledge. Topics covered are the forms and components of high performance computing hardware; recent progress in software development; data visualization and management; examples of how high performance computing is used in practice; and introductions to some of the most popular programs used by scientists worldwide.

Prerequisite: MATH 110 as a CO-requisite.

PHYSICS 210 General Physics I

Fundamental principles of physics including mechanics, heat and energy, and applications of these principles to different interdisciplinary natural science. Prerequisite or corequisite: College mathematics including trigonometry and algebra or equivalent. Three lectures and one two hour laboratory period per week. Offered: Fall and Spring.

PHYSICS 210 General Physics I

Fundamental principles of physics including mechanics, heat and energy, and applications of these principles to different interdisciplinary natural science. Prerequisite or corequisite: College mathematics including trigonometry and algebra or equivalent. Three lectures and one two hour laboratory period per week. Offered: Fall and Spring.

PHYSICS 220 General Physics II

Fundamental principles of physics including sound, electricity, magnetism, optics, elementary modern physics, and applications of these principles to different interdisciplinary natural science. Prerequisite: PHYSICS 210 or equivalent or consent of instructor. Three lectures and one two hour laboratory period per week. Offered: Fall and Spring.

PHYSICS 220 General Physics II

Fundamental principles of physics including sound, electricity, magnetism, optics, elementary modern physics, and applications of these principles to different interdisciplinary natural science. Prerequisite: PHYSICS 210 or equivalent or consent of instructor. Three lectures and one two hour laboratory period per week. Offered: Fall and Spring.

PHYSICS 240 Physics For Science And Engineering I

Introduction to mechanics, wave motion and sound and heat and thermodynamics. CoRequisite: Calculus I Offered: Fall and Spring.

PHYSICS 240 Physics For Science And Engineering I

Introduction to mechanics, wave motion and sound and heat and thermodynamics. CoRequisite: Calculus I Offered: Fall and Spring.

PHYSICS 250 Physics For Science And Engineering II

Introduction to electricity and magnetism, light and optics and modern physics. Prerequisite: Physics for Science and Engineering I. Corequisite: Calculus II or consent of instructor. Four hours lecture and two hours laboratory per week. Offered: Fall and Spring.

PHYSICS 250 Physics For Science And Engineering II

Introduction to electricity and magnetism, light and optics and modern physics. Prerequisite: Physics for Science and Engineering I. Corequisite: Calculus II or consent of instructor. Four hours lecture and two hours laboratory per week. Offered: Fall and Spring.

PHYSICS 265L Astronomy Laboratory

Experiments in planetary motion, apparent solar time, stellar spectra, stellar magnitudes, binary stars, telescopic observations of the sun, moon and planets. Prerequisite: PHYSICS 260 or concurrently and consent of instructor. Offered: On demand.

PHYSICS 301A Basic Science Physics

Selected topics from physics; their development and application to everyday problems. Discussion and demonstrations. Intended for teachers in the elementary schools. Offered: On Demand.

PHYSICS 310 Mechanics I

Advanced statics and dynamics of particles and rigid bodies including gravitation. Prerequisites: One year of physics and calculus

or consent of instructor. Offered: Fall.

PHYSICS 311 Mechanics II

Continuation of Mechanics I, including mechanics of continuous media, Lagranges equations, tensor algebra and theory of small vibrations. Prerequisite: Mechanics I or consent of instructor. Offered: Spring.

PHYSICS 311 Mechanics II

Continuation of Mechanics I, including mechanics of continuous media, Lagranges equations, tensor algebra and theory of small vibrations. Prerequisite: Mechanics I or consent of instructor. Offered: Spring.

PHYSICS 330 Methods Of Theoretical Physics I

Introduction to mathematical and numerical methods used in the theoretical modeling of physical systems. Treatments of linear systems in scientific and engineering applications will be emphasized. Prerequisite: Math 250. Offered: Spring.

PHYSICS 330 Methods Of Theoretical Physics I

Introduction to mathematical and numerical methods used in the theoretical modeling of physical systems. Treatments of linear systems in scientific and engineering applications will be emphasized. Prerequisite: Math 250. Offered: Spring.

PHYSICS 350 Modern Physics With Engineering Applications

An introduction to the theories that revolutionized science and technology in the twentieth century. Topics include special and general relativity, introductory quantum mechanics and atomic structure. Inventions and applications based on these are also examined. Prerequisites: Math 210 and 220 and either Physics 210 or 240 and 250, or consent of the instructor. Offered: fall

PHYSICS 350 Modern Physics With Engineering Applications

An introduction to the theories that revolutionized science and technology in the twentieth century. Topics include special and general relativity, introductory quantum mechanics and atomic structure. Inventions and applications based on these are also examined. Prerequisites: Math 210 and 220 and either Physics 210 or 240 and 250, or consent of the instructor. Offered: fall

PHYSICS 350 Modern Physics With Engineering Applications

An introduction to the theories that revolutionized science and technology in the twentieth century. Topics include special and general relativity, introductory quantum mechanics and atomic structure. Inventions and applications based on these are also examined. Prerequisites: Math 210 and 220 and either Physics 210 or 240 and 250, or consent of the instructor. Offered: fall

PHYSICS 353 Practical Astronomy

A practical overview of the basic methods of observational astronomy research, including the principles of telescopes, detectors and measurement theory. Prerequisites: Physics 240 and Physics 250, Math 210 and Math 220, or consent of the instructor. Offered spring semesters, even years.

PHYSICS 355 Stellar Astrophysics

A mathematical and conceptual overview of the observed properties of stars and the fundamental astrophysics of radiative transfer, hydrostatic equilibrium, atomic processes and thermonuclear energy production that govern their structure, atmospheres and remnants. Prerequisites: Physics 240 and 250, Math 210 and Math 220, or consent of instructor. Offered: Fall even years.

PHYSICS 355 Stellar Astrophysics

A mathematical and conceptual overview of the observed properties of stars and the fundamental astrophysics of radiative transfer, hydrostatic equilibrium, atomic processes and thermonuclear energy production that govern their structure, atmospheres and remnants. Prerequisites: Physics 240 and 250, Math 210 and Math 220, or consent of instructor. Offered: Fall even years.

PHYSICS 356 Galaxies

A mathematical and conceptual overview of the observed properties and astrophysics of galaxies highlighting star formation and evolution, the interstellar medium, the Milky Way, galaxy populations and demographics, active galactic nuclei, and galaxy formation and evolution. Prerequisites: Physics 240 and Physics 250, Math 210 and Math 220, or consent of instructor. Offered: Fall Odd Years.

PHYSICS 360 Physical Electronics

A study of electron ballistics and electronic emission and conduction in vacuum tubes and in solid state devices. Prerequisites: One year of physics and calculus. Offered: On Demand.

PHYSICS 365L Electronic Measurements

Four hours of laboratory work per week. Prerequisite: Physics 360 or consent of the instructor. Offered: On Demand.

PHYSICS 385L Physics of Electronics

An introduction to the solid state physics of basic electronic components and their operation through both theory and practical labwork. Prerequisites: Completion of PHYSICS 220 or PHYSICS 250. Offered: Spring.

PHYSICS 385L Physics of Electronics

An introduction to the solid state physics of basic electronic components and their operation through both theory and practical labwork. Prerequisites: Completion of PHYSICS 220 or PHYSICS 250. Offered: Spring.

PHYSICS 395L Computer Interfacing Laboratory

An introduction to data acquisition and automation by computer interfacing transduction and control equipment through the serial and parallel buses. The course is multidisciplinary, balancing the physics of transduction to the computer science of automation programming to the electrical engineering of bus protocols. Both high- and low-level programming are taught within the context of automating an experimental procedure. Digital-to-analog and analog-to-digital conversion is also covered. Prerequisites: PHYS 385L. Offered: Fall Even Years.

PHYSICS 410 Thermal Physics

A study of the laws of thermodynamics and their applications, with an introduction to kinetic theory. Statistical methods are emphasized. Prerequisites: One year of physics and calculus. Offered: Fall Odd Years.

PHYSICS 413 Computational Physics

Introduction to scientific programming and numerical analysis with applications to physics. Prerequisites: Undergraduate mathematics through differential equations plus one year of physics or consent of instructor. Offered: Even Years.

PHYSICS 420 Optics

Geometrical optics, physical optics and introduction to selected topics in modern optics. Prerequisites: One year of physics and Calculus I and II. Offered: Spring even years.

PHYSICS 420 Optics

Geometrical optics, physical optics and introduction to selected topics in modern optics. Prerequisites: One year of physics and Calculus I and II. Offered: Spring even years.

PHYSICS 425L Optics Laboratory

Fundamental experiments with geometrical and physical optics. Prerequisite: Must be taking or have completed Physics 420. On demand.

PHYSICS 425LW Optics Laboratory

Fundamental experiments with geometrical and physical optics. Prerequisite: Must be taking or have completed PHYSICS 420 and successful completion of the WEPT (effective FS93).

PHYSICS 431 Methods Of Theoretical Physics II

A continuation of PHYSICS 430R stressing applications to Physical and engineering problems. Prerequisite(s) PHYSICS 430R Offered: Winter

PHYSICS 437 Particle Physics

Essential aspects of modern physics are examined in a historical context, and also in terms of the standard model describing concisely the fundamental interactions among particles. Conservation laws are discussed, and recent developments such as String Theory are considered. Physics 437 is also offered as Physics 5537. Prerequisites: Physics 240, Physics 250, Physics 350 or 472.

PHYSICS 445LWI Modern Physics Laboratory

Classical experiments in modern physics including such topics as hydrogen spectra, Faraday effect, holographs, e/m of the electron, the photoelectric effect, the Zeeman effect and the Franck-Hertz experiment. Four hours of laboratory work per week. Must have completed WEPT. Corequisite: PHYSICS 350. Offered: Winter-Even Years.

PHYSICS 450 Introduction To Solid State Physics

Crystal structure and binding, elementary lattice dynamics and energy band theory. Free electron models, theory of semiconductors and metals. Prerequisites: Mechanics I or Thermal Physics, or consent of instructor. Offered: Spring Odd Years.

PHYSICS 450 Introduction To Solid State Physics

Crystal structure and binding, elementary lattice dynamics and energy band theory. Free electron models, theory of semiconductors and metals. Prerequisites: Mechanics I or Thermal Physics, or consent of instructor. Offered: Spring Odd Years.

PHYSICS 460 Electricity And Magnetism I

Static electric fields in free space and material media; Kirchoff's laws and direct current circuits; static magnetic fields.

Prerequisite: One year of physics and calculus. Offered: Spring.

PHYSICS 460 Electricity And Magnetism I

Static electric fields in free space and material media; Kirchoff's laws and direct current circuits; static magnetic fields.

Prerequisite: One year of physics and calculus. Offered: Spring.

PHYSICS 461 Electricity And Magnetism II

Magnetostatics; alternating current circuits; Maxwell's equations and radiation; special relativity; topics in electromagnetism.

Prerequisite: PHYSICS 460 or consent of instructor. Offered: Winter.

PHYSICS 465 Cosmology

This course provides a foundation in both physical and observational cosmology. Students will acquire both a mathematical and conceptual understanding of the formation and dynamics of the Universe. Prerequisites: Physics 240 and 250, Math 210 and 220, or consent of the instructor. Offered: spring semester, odd years.

PHYSICS 472 Introduction To Quantum Mechanics

Introduction to the theory and applications of quantum mechanics with emphasis on the mathematical treatment of modern physics. Prerequisite: PHYSICS 350 or consent of instructor. Offered: Fall.

PHYSICS 472 Introduction To Quantum Mechanics

Introduction to the theory and applications of quantum mechanics with emphasis on the mathematical treatment of modern physics. Prerequisite: PHYSICS 350 or consent of instructor. Offered: Fall.

PHYSICS 475LWI Nuclear Physics Laboratories

Experiments concerning the properties of alpha, beta and gamma radiation, their emission and interactions with matter. Must have completed WEPT. Four hours of laboratory work per week. Offered: Winter-Odd Years.

PHYSICS 476LW Advanced Laboratory

This course offers a selection of important experiments in physics, performed with modern instrumentation. It is designed to give students a deeper understanding of physics and help them develop experimental abilities and improve their communication skills. Corequisite: Physics 350 or consent of instructor. Prerequisite: Successful completion of the WEPT or consent of instructor. Offered: Fall-Odd Years

PHYSICS 480 Electron and Scanning probe Microscopy

The principles of electron optics, diffraction, and sample preparation, image interpretation and photographic processing are taught; student operation of the electron microscope and individual projects are emphasized. Must have completed WEPT.

Prerequisite: Consent of instructor. Offered: Fall.

PHYSICS 490 Special Problems

The kind of problem and the amount of credit to be given by arrangement with the department. Prerequisite: Consent of the department. Offered: On Demand.

PHYSICS 499 Undergraduate Research

Independent student research on a physics/astrophysics project under the supervision of a faculty member. Projects will engage students in aspects of the scientific process including data collection and analysis, research methods and strategies, scientific discussion and written/oral communication. Requires a minimum of 3-4 hours of research per week for each credit hour.

PHYSICS H150 Honors: Introduction To Astronomy

Honors: Introduction To Astronomy

PHYSICS H220 General Physics II

Fundamental principles of physics including sound, electricity, magnetism, optics, elementary modern physics, and applications of these principles to different interdisciplinary natural science. Prerequisite: Physics 210 or equivalent or consent of instructor. Three lectures and one two hour laboratory period per week. Offered: Fall and Winter

PHYSICS H240 Physics For Science And Engineering I

Introduction to mechanics, wave motion and sound and heat and thermodynamics. CoRequisite: Calculus I Offered: Fall and Winter

PHYSICS H250 Physics For Science And Engineering II

Introduction to electricity and magnetism, light and optics and modern physics. Prerequisite: Physics for Science and Engineering I. Corequisite: Calculus II or consent of instructor. Four hours lecture and two hours laboratory per week. Offered: Fall and Winter.

Political Science (POL-SCI)

POL-SCI 210 American Government

American government and politics, with special reference to the U.S. Constitution. This course meets the state requirement for study of the U.S. and Missouri Constitutions. Prerequisite: None. Offered: Every semester.

POL-SCI 210 American Government

American government and politics, with special reference to the U.S. Constitution. This course meets the state requirement for study of the U.S. and Missouri Constitutions. Prerequisite: None. Offered: Every semester.

POL-SCI 220 Introduction To Comparative Politics

An analysis of the way political institutions, processes and policies vary from country to country. Emphasis on politics in Europe, with attention to other nations when making comparisons. Prerequisite: None.

POL-SCI 220 Introduction To Comparative Politics

An analysis of the way political institutions, processes and policies vary from country to country. Emphasis on politics in Europe, with attention to other nations when making comparisons. Prerequisite: None.

POL-SCI 300 Interdisciplinary Studies:Cluster Course

Provides an overview of the interrelationships of the humanities and social sciences. Offered in conjunction with other departments.

POL-SCI 300CS Cluster Course: History Of Russian Culture

POL-SCI 301 Western Political Philosophy

An examination of the major theories of politics from Plato to today.

POL-SCI 302 Political Research And Analysis

This class focuses on methods of analysis used in political science research. This course also covers research plans used to gather information about politics and effective ways of utilizing that information. As advances in computing technology expand the availability of politically-driven data, it is possible to bring an increasing amount of information to bear on more questions.

POL-SCI 302 Political Research And Analysis

This class focuses on methods of analysis used in political science research. This course also covers research plans used to gather information about politics and effective ways of utilizing that information. As advances in computing technology expand the availability of politically-driven data, it is possible to bring an increasing amount of information to bear on more questions.

POL-SCI 303 Political Behavior

This course will survey research on conventional and unconventional forms of mass political behavior. Topics to be discussed include campaign participation, voting behavior, public opinion, the media, and participation in protests and revolutions. This course will also cover the methodological approaches to the study of political behavior. Offered: Spring

POL-SCI 303 Political Behavior

This course will survey research on conventional and unconventional forms of mass political behavior. Topics to be discussed include campaign participation, voting behavior, public opinion, the media, and participation in protests and revolutions. This course will also cover the methodological approaches to the study of political behavior. Offered: Spring

POL-SCI 304 Politics Of The Developing Nations

An analysis of the evolving political systems of the new nations in Africa, Asia and Latin America. Social, cultural and economic influences on political processes and policies are explored.

POL-SCI 305 Survey Research And Analysis

Students will learn the process of research design and how one designs and implements surveys. The students will also learn how one analyzes survey data. Prerequisite: None Offered: Annually

POL-SCI 306 International Relations

An analysis of relations among nations, with emphasis on structures of international power, causes of war, and approaches to peace.

POL-SCI 307 The United Nations: Politics And Economics

This interdisciplinary course covers many facets of the United Nations, acquainting students with its structure, its operations and its involvement in international events, past and present. It merges politics, economics issues and the history of the UN in an effort to understand more fully the UN's role in international diplomacy. Students in this course will have an opportunity to participate in various Model UN conferences during the year. Offered: Fall Semester

POL-SCI 308 Politics, Parties And Pressure Groups

This course is an introduction to parties and interest groups, and their important role in the political process. We will examine the formation, organization, activities, and impact of political parties and interest groups in the US and in comparative perspective.

POL-SCI 308 Politics, Parties And Pressure Groups

This course is an introduction to parties and interest groups, and their important role in the political process. We will examine the formation, organization, activities, and impact of political parties and interest groups in the US and in comparative perspective.

POL-SCI 309 Public Opinion And Voting Behavior

A study of the formation, distribution and expression of public opinion and partisanship in the American political system.

POL-SCI 310 African Americans and the American Political Process

This course will analyze political culture, socialization, and mobilization with a focus on trends in the interaction between African Americans and institutions, processes, policies, and other actors that comprise the American system of politics and governance. Offered: Every other semester

POL-SCI 310 African Americans and the American Political Process

This course will analyze political culture, socialization, and mobilization with a focus on trends in the interaction between African Americans and institutions, processes, policies, and other actors that comprise the American system of politics and governance. Offered: Every other semester

POL-SCI 311 Comparative Politics: Techniques Of Social Control

An analysis of techniques used by regimes to perpetuate themselves in office and the effects of these techniques upon constitutional continuity, ideology, and social and economic change.

POL-SCI 312 Mass Media And American Politics

An examination of the role of mass media in American electoral and policy processes.

POL-SCI 313 Politics In The American States

A study of the structures, functions, and politics of the institutions of American state governments and an assessment of their role in the federal system. This course is particularly interested in the extent to which political economy and political culture, broadly defined, influence public policy within the states. Prerequisite: None.

POL-SCI 314 Politics of Kansas City Metro

This course will provide an understanding of politics in urban America through a study of metropolitan Kansas City. It will discuss the relationships between local governments, their decision making process, city-county consolidation, structure of regional council of governments, forming political alliances and current political issues affecting the metropolitan area. The course will discuss the politics of issues like transportation, sports facilities, environment and economic competitiveness. Offered: Winter

POL-SCI 314 Politics of Kansas City Metro

This course will provide an understanding of politics in urban America through a study of metropolitan Kansas City. It will discuss the relationships between local governments, their decision making process, city-county consolidation, structure of regional council of governments, forming political alliances and current political issues affecting the metropolitan area. The course will discuss the politics of issues like transportation, sports facilities, environment and economic competitiveness. Offered: Winter

POL-SCI 316 Terrorism And Political Violence

This course explores terrorism and armed struggle from theoretical and historical perspectives, and analyzes a number of violent movements with nationalist, ideological, and religious motivations. Offered: As Needed

POL-SCI 317 Revolutionary Origins Of The Modern State

An examination of the radical changes in economics, the social order, institutions and ideologies since the French Revolution which have led to the rise of totalitarianism and unstable democratic political systems in the advanced industrial nations.

POL-SCI 318 Political Psychology

The field of political psychology is an interdisciplinary field that draws on both psychology and political science to address topics in the political world. This course will focus on a variety of topics including inter-group conflict, stereotyping and prejudice, political socialization, attitude formation and change, political communication, decision heuristics and biases, public opinion, and the future of political psychology.

POL-SCI 319 Campaigns And Elections

This course will examine the role of campaigns in determining the outcome of both congressional and presidential elections and the way that electoral rules structure both campaign strategies and electoral outcomes. This course focuses on topics such as the role of the media, campaign advertising, campaign financing, public opinion, registration requirements, and the role of interest groups.

POL-SCI 326 Racial & Ethnic Politics

This course provides an analysis of the political behavior and roles of racial and ethnic groups in the American political system. Theoretical, empirical, and practical issues of race, racism, and race relations are examined (in the political context). Public policy, electoral behavior, and political institutions are also investigated with regards to the empowerment and political incorporation of communities of color

POL-SCI 327 Nationalism And Ethnic Conflict

Nationalism and ethnicity serve as a basis for group identification, political mobilization, terrorism, war, and genocide. This course provides students with theoretical frameworks for analyzing nationalism and ethnic strife, and explores case studies to test our assumptions and theories about nationalist violence. Offered: As needed

POL-SCI 328 State And Local Government

In this course, we will cover the major issues, institutions, and political actors involved with state and local government. The class will expose you to how American federalism impacts states, metropolitan regions, and cities. The politics of governance, agenda setting, and public budgeting are also examined. The main objective is to develop a good understanding of the literature (theoretically, empirically and practically) on state and local politics.

POL-SCI 328 State And Local Government

In this course, we will cover the major issues, institutions, and political actors involved with state and local government. The class will expose you to how American federalism impacts states, metropolitan regions, and cities. The politics of governance, agenda setting, and public budgeting are also examined. The main objective is to develop a good understanding of the literature (theoretically, empirically and practically) on state and local politics.

POL-SCI 332 American National Security

Since the Second World War, the United States' military instrument has grown increasingly isolated from the other instruments of national power. The needs of the post-cold war era, in contrast, are for the more sophisticated orchestration of all instruments of national power at all levels of government. Students will be presented with the relevant concepts of international relations theory, national security strategy, legislation, and the executive branch organizations that wield the instruments of national power. The course pays particular attention to the National Security Council, established by 1947 legislation to integrate the domestic, foreign, and military policies of the United States as they relate to national security. Offered: On demand.

POL-SCI 333 Social Networks in Politics

This class focuses on mass political behavior and social networks in the US. Particular attention will be devoted to how relations between individuals can affect political attitudes and participation. We will also consider how these individual relations combine to shape outcomes such as political attitudes, voter turnout, and election outcomes.

POL-SCI 336 American Foreign Policy

Understanding the contemporary debate over American foreign policy in terms of the premises and perspectives of several competing schools of thought.

POL-SCI 338 Religion And Politics

This course explores the rise of Islamic, Christian, and Jewish fundamentalisms in the modern world and assesses their impact on states, societies, and cultures around the globe. It explores how faith can be used to organize and legitimate social activism, liberation movements, and political terrorism. Offered: As needed

POL-SCI 339 Cyberspace, Technology, and Politics

In this course we will read significant thinkers who are pondering major changes occurring in politics and society because of technology and the internet. Some argue that the world is getting ""flat"" and think that the change will be beneficial, while others believe we need to make economic units smaller and more local. We will also explore the internet, blogs and web 2.0 and explore their effect on our lives and on politics.

POL-SCI 341 The Theory Of Democracy

Analysis of the writings of philosophers like Hobbes, Locke, Rousseau, Marx and Nietzsche who developed and analyzed the ideas associated with modern democracies.

POL-SCI 341 The Theory Of Democracy

Analysis of the writings of philosophers like Hobbes, Locke, Rousseau, Marx and Nietzsche who developed and analyzed the ideas associated with modern democracies.

POL-SCI 342 American Political Thought

A study of American political ideas, with emphasis on current problems and conflicts, and intellectual responses to social change.

POL-SCI 343 The Politics Of Social Security

A study of the American Social Security system, including its history, principles, and prospects for the future.

POL-SCI 344 Jurisprudence

An examination of theories of law from the viewpoint of political science.

POL-SCI 345 The Politics Of Sex And Gender

Just as there is a politics of class and race, so is there a politics of sex and gender. Though gender roles and sexual practices seem as though they are natural, post-modern theorists argue that they are social constructions that change over time, privilege some groups, and disadvantage others. In this course we will examine the debate between opposing viewpoints and discuss how and where political decisions are made in this area. Prerequisite: None.

POL-SCI 346 Introduction to the Trial Process

This course examines the trial process. We examine both about the structure of the judicial system and the different elements of a trial. Students will also participate in a mock trial using the American Mock Trial Associations annual problem.

POL-SCI 347P Crime and Civil Liberties

A study of civil liberties in American society, emphasizing their role in the criminal and legal process. Topics include issues related to the Fourth, Fifth, Sixth, Eighth and 14th amendments. Other topics to be covered will depend on class interest and current events. Part of PACE Block -- Justice and Society.

POL-SCI 347P Crime and Civil Liberties

A study of civil liberties in American society, emphasizing their role in the criminal and legal process. Topics include issues related to the Fourth, Fifth, Sixth, Eighth and 14th amendments. Other topics to be covered will depend on class interest and current events. Part of PACE Block -- Justice and Society.

POL-SCI 348 Constitutional Law: The Federal System

A study of the president, congress and state governments from the perspective of the Constitution, emphasizing powers and limitations on the exercise of authority.

POL-SCI 349 Constitutional Law: Civil Liberties

A study of civil liberties in American society, emphasizing factors and forces that restrict or enlarge their scope, as understood through constitutional interpretation.

POL-SCI 353 Chinese Politics

China's political system from earliest origins to the present. Close attention is given to the manner in which current political and economic institutions function. Comparisons are made with other communist and Asian political systems.

POL-SCI 354 Politics In Russia

A study of domestic and international politics in Russia, emphasizing the post-Soviet period.

POL-SCI 355 Politics In Eastern And Central Europe

An analysis of the internal politics and foreign policies of the Czech Republic, Slovakia, Hungary, Poland, and selected other countries in East-Central Europe, emphasizing the transition to post-Communist rule and new and enduring patterns of political

culture.

POL-SCI 357 European Politics

An examination of government and politics in the established democracies of Western Europe, and of political developments in the former Communist states of Central and Eastern Europe. Offered: Winter .

POL-SCI 358 Global Political And Social Issues

This course is designed to afford the student with an overview of important global and regional challenges associated with the emerging 21st century. Hence, there are three objectives: (1) gain an understanding of the facts and complexities of the selected issues within the framework of globalization; (2) describe and explain difficulties in formulating political/ policy consensus aimed at resolving these issues; (3) considering both the factual complexities and difficulties in formulating policy; identify future trends related to major global challenges.

POL-SCI 359 Latin American Politics

In this course we will focus on the major periods in Latin American political history since the Great Depression. This includes the post-War period of optimism in which democratic governments promoted rapid economic development, the period of pessimism and authoritarianism from the 1960s to the 1980s, and a new democratic renewal beginning in the 1990s. We will examine the consolidating democracies that emerged in the 1990s in depth. We will also examine case studies of recently failed democracy, Venezuela, and ask why this democracy failed.

POL-SCI 360 Labor, Politics and Society

This course explores many aspects of unions and the labor movement in society and the vital role organized labor plays as a pillar of democratic society. Unions impact the economy, growth, and the distribution of wealth, and the impact racial and gender equality, social security health and job safety, energy and the environment, and even foreign relations. As a social movement, labor has had a major impact on American history. This course covers these topics from a labor perspective. It examines current obstacles for union organizing, recent union campaigns, labor's political role, and the relationship between labor and the media. This course is part of the Certificate Program in Labor Studies and is offered on the University of Missouri Interactive Video Network at UMKC, UMSL, and UMC.

POL-SCI 361 Global Issues in a Changing World

Threats to national and international security were once dominated by military force and interstate warfare. Threats are now seen in a much broader context. Non-state, transnational actors now pose a threat to transnational business, states, and even civilizations. Issues like global climate change and HIV/AIDS are seen as threats to national survival well beyond any single nation's ability to contain. For some, the deep phenomenon of globalization is seen as a threat to national sovereignty and, indeed, a threat to the international system of states. In this course, challenges and opportunities replace threat as the organizing principle, and the role of international institutions takes center stage. Offered: Annually.

POL-SCI 362 Latin America and International Relations

This course we will survey the relations between Latin American states and between Latin America and the world. Taking the Latin American states as the key actors, we examine the history of US-Latin American relations, including current issues such as drug trafficking, immigration and terrorism. We will also study the region as a player on the international stage, examining Latin America's changing role in the world arena related to trade, development, and the environment. Finally we examine the emergence of new leadership in Latin America. Offered: Every other semester.

POL-SCI 364 Designing American Elections

This course examines the role of elections in American politics. Topics include voter registration, campaign finance, redistricting, the electoral college, and primary elections. We will also evaluate how different electoral rules affect political outcomes such as voter turnout, participation, and representation.

POL-SCI 369 Politics Of The Middle East

This course explores the formation of the modern Middle East; the role of Islam in shaping its political cultures; the post-colonial transformations that shaped its current political systems; the economic and democratic reforms that challenge existing regimes; and the pivotal states and conflicts that stir regional politics. Offered: As needed

POL-SCI 370 Labor Law

In this course, participants will examine the role of government in the regulation of labor-management relations in the United States. While the focus of the course will be on federal laws regulating private sector labor relations, parallel issues addressed in the Railway Labor Act and state public sector labor relations law will also be covered. Specific topics include the legal framework for the organization of workers, definition of prohibited or unfair labor practices of employers and unions, legal regulation of the collective bargaining process, regulation of the use of economic weapons in labor disputes, enforcement of collective bargaining agreements and the regulation of internal trade union activities. Prerequisites: None.

POL-SCI 380 Political Science And Politics

Offered as a special course in the individual faculty member's area of research specialization. The course may be repeated for credit when the topic varies. The topic and instructor will be announced in advance. Prerequisite: Consent of the instructor or advanced standing.

POL-SCI 380 Political Science And Politics

Offered as a special course in the individual faculty member's area of research specialization. The course may be repeated for credit when the topic varies. The topic and instructor will be announced in advance. Prerequisite: Consent of the instructor or advanced standing.

POL-SCI 380A Political Science And Politics

POL-SCI 380B Political Science And Politics

POL-SCI 380C Political Science And Politics

POL-SCI 380D Political Science And Politics

POL-SCI 380E Political Science And Politics

POL-SCI 380X Political Science And Politics

POL-SCI 381 Mock Trial

A study of the trial process in the U.S. judicial system focusing on the structure and rules of trials, including the role of attorneys. Combination of student performance with in-class lecture and discussion. Restrictions: Consent of instructor

POL-SCI 403 Political Ideology

A critical examination of contemporary political ideologies including democratic and authoritarian theories.

POL-SCI 403 Political Ideology

A critical examination of contemporary political ideologies including democratic and authoritarian theories.

POL-SCI 405 American Constitutional Thought

An analysis of the development of American constitutional doctrine, with emphasis on the historical and intellectual context within which the Supreme Court changes its attitudes toward economic and political issues.

POL-SCI 406 Presidential Politics

This course will examine the American presidency as an institution, and will analyze its role in the American political system. It will also consider the administrations of the various presidents.

POL-SCI 406 Presidential Politics

This course will examine the American presidency as an institution, and will analyze its role in the American political system. It will also consider the administrations of the various presidents.

POL-SCI 406P Political Leadership

This weekend course will examine theories, institutions and styles of political leadership; analyze recruitment and selection methods; and study popular perceptions of such leaders. Using film, fiction and materials from political science, this course will culminate in a look at U.S. presidents and the presidency in the 20th century. Prerequisites: Social Science PACE 102P and 103P, or POL-SCI 210 or equivalent; concurrent enrollment in POL-SCI 409P for those in the PACE Program or in the B.L.A. degree program. For other students, the consent of the instructor is required. Students who have credit for POL-SCI 406A or its equivalent may not enroll in this course.

POL-SCI 406P Political Leadership

This weekend course will examine theories, institutions and styles of political leadership; analyze recruitment and selection methods; and study popular perceptions of such leaders. Using film, fiction and materials from political science, this course will culminate in a look at U.S. presidents and the presidency in the 20th century. Prerequisites: Social Science PACE 102P and 103P,

or POL-SCI 210 or equivalent; concurrent enrollment in POL-SCI 409P for those in the PACE Program or in the B.L.A. degree program. For other students, the consent of the instructor is required. Students who have credit for POL-SCI 406A or its equivalent may not enroll in this course.

POL-SCI 407 Congressional Politics

A study of legislative institutions, procedures and behavior (with emphasis on the U.S. Congress) in the context of theories of political representation.

POL-SCI 407 Congressional Politics

A study of legislative institutions, procedures and behavior (with emphasis on the U.S. Congress) in the context of theories of political representation.

POL-SCI 407P Politics Of Representation

A study of legislative institutions, procedures and behaviors in the U.S. Congress that raises practical as well as theoretical questions of political representation in modern society. This course will be presented by video cassette and will be integrated with POL-SCI 406P and POL-SCI 409P. Prerequisites: Social Science PACE 102P and 103P or POL-SCI 210 or equivalent; concurrent enrollment in POL-SCI 406P and POL-SCI 409P.

POL-SCI 408 Judicial Politics

An examination of the judiciary in the American political process, emphasizing the role of judges, lawyers and the Supreme Court.

POL-SCI 409 Bureaucratic Politics

A study of political processes that create and operate within bureaucracies in the American pluralist system. Close attention is given to the tension between representation and rationality when making decisions.

POL-SCI 409 Bureaucratic Politics

A study of political processes that create and operate within bureaucracies in the American pluralist system. Close attention is given to the tension between representation and rationality when making decisions.

POL-SCI 409P Bureaucratic Politics

This weeknight course will examine the emergence of bureaucracies as the modern method of collective problem solving. In the U.S. political context, this involves the dynamic interplay of rational choice, due process and pluralistic politics. The transitions from limited to positive government and then to the current ethos of deregulation will be studied.

POL-SCI 418 International Security

The course examines competing theories and concepts of national and international security, selected security issues, and the responses of several countries to different security environments.

POL-SCI 424 Urban Politics and Community Power Structures

This course surveys and analyzes the literature covering urban politics. Students will gain both a theoretical understanding of and empirical grounding in the politics of urban America. An array of important political, social and economic problems that impact urban politics will be examined.

POL-SCI 425 Comparative Politics

Aspects of politics in various countries as viewed through the language and thought processes of contemporary approaches to political science.

POL-SCI 425 Comparative Politics

Aspects of politics in various countries as viewed through the language and thought processes of contemporary approaches to political science.

POL-SCI 427 Presidential Power: foundations, Growth, Issues

An intense examination of the growth of presidential power, from its constitutional foundations; the necessity of a strong presidency, but the potential for abuse. Appropriate for the general student, as well as for majors in political science.

POL-SCI 428 Political Culture And Political Behavior

This course will examine the concept of political culture and its use in the empirical analyses of political behavior in advanced political systems. Emphasis will be placed on the U.S system with comparisons drawn from Western Europe. The student will be expected to complete an empirically documented research paper.

POL-SCI 429 Courts And Public Policy

An analysis of how courts influence policy in selected political arenas.

POL-SCI 432 American Security Policy

An examination of national security policy as an organizational and intellectual response to changes in technology and international conflict.

POL-SCI 435 Politics Of The Environment

A survey of the political aspects of environmental issues. The course poses the problems of environmental damage and examines actual and proposed policies aimed at addressing them. Also offered through the PACE program. Prerequisite: None.

POL-SCI 435 Politics Of The Environment

A survey of the political aspects of environmental issues. The course poses the problems of environmental damage and examines actual and proposed policies aimed at addressing them. Also offered through the PACE program. Prerequisite: None.

POL-SCI 435 Politics Of The Environment

A survey of the political aspects of environmental issues. The course poses the problems of environmental damage and examines actual and proposed policies aimed at addressing them. Also offered through the PACE program. Prerequisite: None.

POL-SCI 435P Politics Of The Environment

A survey of the political aspects of environmental issues. The course poses the problems of environmental damage and examines actual and proposed policies aimed at addressing them. The course content is the same as POL-SCI 435 title except additional reading and writing will be required commensurate with a 4 credit hour course.

POL-SCI 438 Urban Politics

The study of local politics and government in metropolitan areas with special attention to political party and interest group activity; community leadership, influences and "power"; and citizen participation and political behavior.

POL-SCI 438 Urban Politics

The study of local politics and government in metropolitan areas with special attention to political party and interest group activity; community leadership, influences and "power"; and citizen participation and political behavior.

POL-SCI 440 Contemporary Political Thought

Political philosophy from Nietzsche to today.

POL-SCI 441 Political Freedom

Selected writings by political thinkers dealing with the establishment of freedom and justice in the state. Examines the challenges to political freedom under various regimes.

POL-SCI 442 American Political Thought

This course will focus on intellectual reactions to the major periods in American history (the movement for independence, the writing of the Constitution, the Jacksonian period, the Civil War debate, the growth of big business, the rise of the positive state and contemporary America). Contemporary theorists will be included along with Adams, Jefferson, Madison, Hamilton, Marshall, etc.

POL-SCI 450WI Ethics And Government

An examination of ethical issues related to government with the primary focus on national and local governmental bodies in the United States. Ethics in the executive, legislative and judicial branches are examined. Ethical standards for elected officials and appointed public servants are reviewed. Attempts to "legislate morality" are considered. The course includes a historical review of ethics and government and an analysis of the legal implication of legislation regarding ethics in the executive branch. Prerequisite: Successful completion of the WEPT.

POL-SCI 451 International Politics In Europe

An examination of developments in international politics in Europe since the end of the Cold War. Issues are discussed in the context of relevant theories of international relations. Offered: every two years Restrictions: May not be taken by those who took "Europe After the Cold War

POL-SCI 452 Concepts in International Relations

This course exposes advanced undergraduate students to major conceptual and theoretical approaches to international relations. Restrictions: Prior course in international relations, politics, economics or history, or permission of instructor.

POL-SCI 480 Government And Politics

This variable credit course will explore different contemporary issues and problems related to government and politics. Credit may apply to the major but will not satisfy any of the four subfields distribution requirements.

POL-SCI 480F Government And Politics**POL-SCI 490** Senior Seminar

A review, analysis and integration of the literatures of the several sub-fields of the discipline. For senior political science majors only. Prerequisite: Senior standing. Offered: Each semester.

POL-SCI 491 Internship

With the written consent of the department chairman, students may participate in structured internship programs approved by the department for a maximum of six hours.

POL-SCI 492WI Senior Seminar (Capstone)

This intensive survey of political science provides graduating seniors an opportunity for integration and review of their study of political values, behavior, and institutions. Satisfies both writing intensive and capstone requirements. Prerequisites: Senior standing in political science and completion of the WEPT. Offered: Winter.

POL-SCI 493 Study Abroad

This course is designed to allow students to get credit for overseas study in approved programs. These include research intensive programs like InterFuture, programs which are approved by the International Studies Center at UMKC, internships and other programs run by agencies of the U.S. government, and programs run by accredited Colleges and Universities. Students will need the prior approval of the Chair or Undergraduate Advisor of the Political Science Department, and will be required to work with a faculty member in the Department. Offered: On demand.

POL-SCI 497 Political Science Tutorial

Senior political science majors may apply to do independent study under a selected professor. Must have written consent of the professor prior to registration. Only one tutorial will count toward the major.

POL-SCI 498 Honors Tutorial

Senior political science majors with a grade point average of 3.4 or above in political science may apply to do independent study under a selected professor. Must have written consent of professor prior to registration. Only one tutorial will count toward the major.

Psychology (PSYCH)**PSYCH 210** General Psychology

A survey of the fundamental principles, theories, and methods of psychological science. Prerequisite to all other courses in psychology except with consent of the instructor. Offered: Each semester.

PSYCH 270P Compulsive Gambling And Other Addictions

Course will focus on compulsive gambling and the psychology of addiction. Alcohol, drug, food and sex addiction will also be explored. After attending this course, the student will be able to understand the problem gambling continuum, the phases of the problem gambler and how this addiction affects the family.

PSYCH 302WI Experimental Psychology

The rationale and methodology of experimentation in psychology, emphasizing interpretation of data and the design of experiments. Three hours lecture and two hours laboratory a week. Prerequisites: PSYCH 210; PSYCH 316 must be completed prior to or concurrently with this course; successful completion of WEPT. Offered: Each semester.

PSYCH 302WI Experimental Psychology

The rationale and methodology of experimentation in psychology, emphasizing interpretation of data and the design of experiments. Three hours lecture and two hours laboratory a week. Prerequisites: PSYCH 210; PSYCH 316 must be completed prior to or concurrently with this course; successful completion of WEPT. Offered: Each semester.

PSYCH 303WI Psychological Writing

Writing skills in science are emphasized. Instruction and intensive practice in writing are provided. Prerequisites: PSYCH 210; Successful completion of the WEPT exam.

PSYCH 304 Learning

Survey course of the fundamental principles of contemporary theories of learning. Prerequisite: Psych 210

PSYCH 305 Psychology Of Women

A critical examination of studies of the psychology and behavior of women. Prerequisite: PSYCH 210.

PSYCH 308 Sensation And Perception

The study of how we perceive the world through our senses, including the anatomy and function of the sense organs and the effect of normal and altered sensory experience on behavior. Prerequisite: PSYCH 302WI must be completed prior to or concurrently with this course. Restrictions: May not be taken for graduate credit.

PSYCH 310 Theories Of Aggression

Major theories of aggression and their application are examined. Prerequisite: PSYCH 210.

PSYCH 311 Applied Psychology

The major applications of scientific psychology to human problems and behavior, such as business, mental health, and education are covered. May not be taken for graduate credit. Prerequisite: PSYCH 210.

PSYCH 312 Social Psychology

Survey of behavior in the actual, imagined, and implied presence of others, including attitudes, the self, conformity, altruism, aggression, prejudice, and group processes. May not be taken for graduate credit. Prerequisite: PSYCH 210. Offered: Each semester.

PSYCH 316 Quantitative Methods In Psychology

Introduction to the use, calculation, reporting, and interpretation of descriptive and elementary inferential statistical techniques in psychological science. May not be taken for graduate credit. Prerequisite(s): PSYCH 210; Any MATH 110 or higher (except MATH 125). Offered: Each semester.

PSYCH 320 Ethnic And Minority Perspectives In Psychology

The theory, methods and content of psychology relevant to the interests and needs of ethnic minorities, and the contributions of ethnic groups and other minorities to psychology. Prerequisite: PSYCH 210.

PSYCH 322 Child Psychology

Survey of child development from conception to adolescence, including major theories, developmental milestones and research related to the physical, cognitive, social and emotional growth of children. May not be taken for graduate credit. Prerequisite: PSYCH 210. Offered: Each semester.

PSYCH 322P Child Psychology

Survey of the child development from conception to adolescence, including major theories, developmental milestones and research related to the physical, cognitive, social and emotional growth of children. May not be taken for graduate credit. Prerequisite: PSYCH 210.

PSYCH 323 Theory And Methods Of Personality

The development, organization, dynamics and determinants of personality. May not be taken for graduate credit. Prerequisite: PSYCH 210. Offered: Each semester.

PSYCH 328 Psychology Of Human Sexual Behavior

The psychological, biological and social factors that contribute to human sexuality, and a review of human sexual development across the lifespan. Prerequisite: PSYCH 210.

PSYCH 331 An Introduction To Health Psychology

A survey of the role of psychological factors in physical health and well-being including in health promotion, disease prevention, and adjustment to illness. Prerequisite: PSYCH 210.

PSYCH 400 Principles Of Psychological Testing

The theory of psychological testing and measurement. Prerequisite: PSYCH 316.

PSYCH 403 Environmental Psychology

Environmental influences on the behavior of individuals and their influence on the environment. Prerequisite: PSYCH 210.

PSYCH 403 Environmental Psychology

Environmental influences on the behavior of individuals and their influence on the environment. Prerequisite: PSYCH 210.

PSYCH 405 Motivation and Emotion

A review of the principles of both human and animal motivation from classical drive, behavioral, and cognitive perspectives. May not be taken for graduate credit. Prerequisite: PSYCH 210.

PSYCH 405 Motivation and Emotion

A review of the principles of both human and animal motivation from classical drive, behavioral, and cognitive perspectives. May not be taken for graduate credit. Prerequisite: PSYCH 210.

PSYCH 406P Introduction To Developmental Disabilities

Principles of human development, causes of disability, and the effects of disability on individuals and families over the life span. Prerequisite: PSYCH 210.

PSYCH 406P Introduction To Developmental Disabilities

Principles of human development, causes of disability, and the effects of disability on individuals and families over the life span. Prerequisite: PSYCH 210.

PSYCH 407 Cognitive Psychology

Historical foundations and current state of knowledge regarding human information processing and the mental processes that underlie human behavior. Prerequisite: PSYCH 302WI must be completed prior to or concurrently with this course.

PSYCH 407 Cognitive Psychology

Historical foundations and current state of knowledge regarding human information processing and the mental processes that underlie human behavior. Prerequisite: PSYCH 302WI must be completed prior to or concurrently with this course.

PSYCH 407P Developmental Disabilities And Community Life

Focus is on developmental disabilities in community life and interdisciplinary process as a means of coordinating services and supports in community settings. Students will learn about specific disciplines and professions and how they must work together in the community. Topics include the State developmental disabilities network and service system, the principles of person-centered planning, the effects of severe disability on families, and the dynamics surrounding community inclusion of persons with severe disabilities.

PSYCH 407P Developmental Disabilities And Community Life

Focus is on developmental disabilities in community life and interdisciplinary process as a means of coordinating services and supports in community settings. Students will learn about specific disciplines and professions and how they must work together in the community. Topics include the State developmental disabilities network and service system, the principles of person-centered planning, the effects of severe disability on families, and the dynamics surrounding community inclusion of persons with severe disabilities.

PSYCH 415 History And Systems Of Psychology

The historical development of the field of psychology, including a review of its major theoretical schools and methodological advances. This is the department's capstone course. Required of psychology majors. Prerequisites: Grade of C- or better in PSYCH 302WI. Restrictions: Should be taken only by Psychology majors and minors in their senior year. Offered: fall and spring.

PSYCH 418 Brain and Behavior I

Introduction to the neural bases of human behavior, including movement, learning and memory, sensation and perception, emotion, cognition, psychological, and neurological disorders. Prerequisite: PSYCH 302WI.

PSYCH 419 Biopsychology II

Advanced study of the neural bases of behavior. Prerequisite: PSYCH 418.

PSYCH 428 Advanced Applied Child Development

Academic service learning course that focuses on contemporary developmental issues, particularly those with applied and social policy implications for promoting positive healthy development of children and adolescents. Students spend a minimum of 25 hours actively engaged in community work serving children or youth. Prerequisite: PSYCH 322, earned grade of "B" or greater, or written permission of instructor.

PSYCH 430 Introduction To Community Psychology

Introduction to community psychology, a field which seeks to understand how social, political and economic factors contribute to

human and social problems and seeks to improve individual and community well-being through social innovation and action research. Prerequisite: PSYCH 302 WI.

PSYCH 430 Introduction To Community Psychology

Introduction to community psychology, a field which seeks to understand how social, political and economic factors contribute to human and social problems and seeks to improve individual and community well-being through social innovation and action research. Prerequisite: PSYCH 302 WI.

PSYCH 433 Abnormal Psychology

Introduction to major psychological problems and disorders as well as consideration of some of the many interacting biopsychosocial influences viewed from an empirically-informed perspective. May not be taken for graduate credit. Prerequisite: PSYCH 210. Offered: Each semester.

PSYCH 440 The Psychology Of Aging

Survey of concepts, theory, and methods in the psychology of aging, including biological and social influences on behavior. Prerequisite: PSYCH 210. Semester Offered: Spring.

PSYCH 441 Adult Development And Aging

Major developmental theories of adult development and aging are reviewed, including the impact of cohort, gender, race/ethnicity, socioeconomic status, and culture on development. Prerequisite: PSYCH 210. Offered: Each semester.

PSYCH 450 Special Topics

Offered as the result of student demand, specialized faculty interests, or the availability of a visiting expert in a field related to psychology. Prerequisite: Consent of instructor. Offered: On demand.

PSYCH 450A Special Topics

PSYCH 450L Special Topics In Psychology

PSYCH 453P Family Life Cycle: Dev Approach Understanding Family Dynamic

The primary purpose of this course is to enhance the student's understanding of the dynamics of healthy families. After receiving a historical overview of the development of families and the cultural roots and traditions behind family structures, child-rearing values and other factors, the student will be given a framework to understand how healthy families establish a dynamic balance between individual and group needs, and between needs to establish structure and to be flexible in the face of change. A second framework will also be presented to provide students with an understanding of how families use their internal resources to cope with life stressors. Given these basic cultural, interactional, and coping frameworks as foundation for understanding, students will explore how families change as they move through time from formation as a couple through early child-rearing, adolescence, mid-life, and post retirement. Implication for human service professionals will be presented.

PSYCH 453P Family Life Cycle: Dev Approach Understanding Family Dynamic

The primary purpose of this course is to enhance the student's understanding of the dynamics of healthy families. After receiving a historical overview of the development of families and the cultural roots and traditions behind family structures, child-rearing values and other factors, the student will be given a framework to understand how healthy families establish a dynamic balance between individual and group needs, and between needs to establish structure and to be flexible in the face of change. A second framework will also be presented to provide students with an understanding of how families use their internal resources to cope with life stressors. Given these basic cultural, interactional, and coping frameworks as foundation for understanding, students will explore how families change as they move through time from formation as a couple through early child-rearing, adolescence, mid-life, and post retirement. Implication for human service professionals will be presented.

PSYCH 458 Behavior Modification

Survey of procedures used to change individual behaviors in variety of settings. Prerequisites: PSYCH 302WI and PSYCH 304.

PSYCH 461A Field Practicum

Provides supervised experience working in community agencies/ organizations which address various human and social problems. A minimum of ten hours per week at practicum site and class attendance are required. Prerequisite(s): PSYCH 302WI; at least 15 credit hours of psychology. Consent of instructor. Offered: Fall and Spring semesters.

PSYCH 490 Directed Individual Research

Students work on an individual research project under the supervision of a departmental faculty member. Prerequisite: Consent of

instructor. Semester Offered: On demand.

PSYCH 490 Directed Individual Research

Students work on an individual research project under the supervision of a departmental faculty member. Prerequisite: Consent of instructor. Semester Offered: On demand.

PSYCH 490P Perceptions & Images Of Disabilities In Literature And Film

This course combines classroom discussion of selected films and literature and independent study. Students will study films and selections from literature to develop an understanding and awareness of the social, economic and political aspects of disability as conveyed through popular culture. Students will also apply research, observation and writing skills to gain awareness and insights regarding disabilities, through working on an individual or team project. The project will further the understanding of disabilities and how various social, psychological and environmental conditions may affect people with disabilities and their families.

Religious Studies (RELIG-ST)

RELIG-ST 100 Introduction To Comparative Religion

An introduction to the major religious traditions of the world and small group or tribal religions. Emphasis on the comparative study of selected myths, rituals, types of religious specialists, and types of religious communities.

RELIG-ST 306 History of Christianity to the Middle Ages

This course examines the historical and theological development of Christianity from its origins to the High Middle Ages. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major social, institutional, and intellectual force with a focus on patterns of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship. cross-listed as History 306A

RELIG-ST 307 History of Christianity from Middle Ages to Present

This course examines the historical and theological development of Christianity from the High Middle Ages to the present. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major social, institutional, and intellectual force with a focus on patterns of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship. cross-listed as History 307A

RELIG-ST 400 Special Topics In Religious Studies

Special topics in religious studies which are not offered regularly. The focus of the course varies by semester and instructor.

RELIG-ST 400A Special Topics In Religious Studies

RELIG-ST 400B Special Topics In Religious Studies

RELIG-ST 400C Special Topics In Religious Studies

RELIG-ST 400D Special Topics In Religious Studies

RELIG-ST 400E Special Topics In Religious Studies

RELIG-ST 400F Special Topics in Religious Studies

RELIG-ST 401 Religion in America

An in-depth examination of selected aspects of the history of religions in America from the colonial periods to the present. Special emphasis will be given to methodological issues in the study of American religious history. Offered: On Demand

RELIG-ST 402 Religion and Colonialism in Latin America

The study of selected aspects of the history of religions in the Americas. Primary focus is on the complex ways that European, Native American African religions helped to structure and negotiate the experiences and the significance of cultural contact and colonialism through lived worlds of meaning.

RELIG-ST 403 Vision, Dreams and Prophecies as Religious Phenomena

This course explores the ways visions, dreams, and prophecies have acquired religious significance in Western and non-Western contexts from the ancient period to the present.

RELIG-ST 404 Gender and Religion

Cross-cultural and comparative study of how religious groups create and transmit gender roles and expectations.

RELIG-ST 467 Myth And Ritual

Myth and "ritual" have long been fundamental categories in the study of religion. This course will briefly survey some of the major theories and approaches to the study of myth and ritual from the Enlightenment to the present. The course will not only trace the shifting meanings of "myth" and "ritual", but will critically evaluate the utility of diverse approaches to the study of religious phenomena designated by these terms. Reading will include theoretical works, as well as selected case studies.

RELIG-ST 484 Sacred Narratives and Texts

This course addresses the "social lives" of sacred narratives and texts in selected religions of the world. Areas of study include methods of exegesis in different religious traditions, orality and literacy (including the reoralization of written text), the canonization process, text as amulets, reading and meditative practices and techniques, and narratives and the arts. The course is comparative, cross-cultural, and interdisciplinary in nature.

RELIG-ST 487 Contemporary Approaches to the Study of Religion

This course which is the second installment in a two course series, charts the historical development of religious studies as an academic discipline, paying particular attention to the models, methods and assumptions that have informed it past and present. In this course, particular emphasis will be placed upon the ways the objects and aims of religious studies have shifted from the Second World War to the present.

RELIG-ST 493 Sex & Religion: The Erotic & The Anti-Erotic In Comparative Persp

This course is designed to highlight issues related to the various ways in which religions of the world have integrated, embraced, or repressed one of the most basic human experiences sexual expression. NOTE: This course will be offered with RELIG-ST 5593; requirements for undergraduates will be less than for graduate students in terms of length and sophistication of the research paper. Offered: On demand

RELIG-ST 493 Sex & Religion: The Erotic & The Anti-Erotic In Comparative Persp

This course is designed to highlight issues related to the various ways in which religions of the world have integrated, embraced, or repressed one of the most basic human experiences sexual expression. NOTE: This course will be offered with RELIG-ST 5593; requirements for undergraduates will be less than for graduate students in terms of length and sophistication of the research paper. Offered: On demand

RELIG-ST 494RS Death In The History Of Religions

As a biological "fact," death would appear to be a human universal. Yet, human beings have imagined--and, thus experienced--the meaning of death in many diverse ways in different cultures and over time. This course explores the conceptualization and representation of death and dying, as well as the ritual activities surrounding death, found in selected religious communities. The goal is to gain insight into how people have sought to (re) create a world of meaning in the face of death and to gain a critical perspective on our own contemporary situation.

RELIG-ST 495RS Time And Space In The History Of Religions

Time and space are essential components of the lived worlds of human beings, yet the cultural and historical constructions of these are remarkably diverse and, moreover, are subject to change. This course is a cross-cultural, interdisciplinary, and comparative exploration of the constructions and experiences of time and space found in selected religious communities and historical periods. In addition, it investigates the pivotal role the categories of "sacred and profane time and space" have played in theorizing religion and in the study of religious myths and rituals in the modern period.

RELIG-ST 496RS The Body In The History Of Religions

The human body is the site of extensive imaginal and ritual activities in all religious traditions. This course explores some of the diverse ways religious communities have imagined and experienced the human body, as well as how the body had been manipulated and worked on in an effort to transform the human situation in the world.

RELIG-ST 497RS Special Topics And Readings

Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies. Permission of Faculty Member. Offered: On demand.

Social Science (SOC-SCI)

SOC-SCI 210 Foundations Of Social Science I

An application of salient principles, facts and methods of social sciences to study of origins and nature of social institutions; problems of emotional adjustment and vocational choice; analysis of contemporary social, legal and economic trends affecting values, conception of freedom and of social power, and political organization. Every semester. Note: Continued in SOC-SCI 220.

SOC-SCI 210P Foundations Of Social Science

An application of salient principles, facts and methods of social sciences to study of origins and nature of social institutions; problems of emotional adjustment and vocational choice; analysis of contemporary social, legal and economic trends affecting values, conception of freedom and of social power, and political organization.

SOC-SCI 302P Power and Authority

This weeknight course is intended to deal with the issues of power and authority as they bear on people at the individual, family, social and political levels. The intent of the course is to discuss the issues of control, power, authority and the limits of obedience. Prerequisites: SOC-SCI 102 and SOC-SCI 103 or equivalent; concurrent enrollment in SOC-SCI 303P.

SOC-SCI 305P Economic Principles And Applications Of Accounting

In this one-hour course, students will use computers to apply accounting principles and to analyze annual reports of corporations. The course will be taught during one hour of a four-hour weeknight course, with ACCTNG 201 being taught during the other three hours. It should be taken concurrently with ACCTNG 201 and with the Independent Study course, SOC-SCI 403P, Business Administration Applications. On a two-year rotation.

SOC-SCI 355P The Environmental Movement: Roots And Actions

A multi-disciplinary course synergizing case studies from history, political science, environmental management, and urban planning to develop a deep understanding of current environmental issues. We will probe such issues as the Concept of Nature and Environmental aesthetics Agriculture and the Environment, Energy and the Environment, Developing the "Built Environment", Environmental Costs of Industrialism, the Birth of the Environmental Movement, Environmental Politics, Environmental Justice and many other topics.

SOC-SCI 359P Technology Policies In Hospitality

This course will examine policies and practices of technology in hospitality and the impact of technology on decision making in the industry. Special attention will be given to the relationship between technology and organizational resources, examining the future development of policies and practices. Prerequisites: None. Offered: Any Semester.

SOC-SCI 364PW Contemporary Industrial Society

This course examines the historical theoretical and behavioral foundations of the industrial economy of the U.S. Particular emphasis is placed on technological change, the culture of modern corporations, strategic planning and the contemporary environment of business enterprise (legal, social, environmental and economic). The major institutions of business structure of the modern corporation are covered. Prerequisites: ECON 201, ECON 202 and successful completion of WEPT Test. Offered: Fall.

SOC-SCI 375P Contemporary Issues In The Service Industry

This course will allow students to undertake in-depth research of current issues important to the service industry. Focus will be placed on understanding theoretical principles and their impact on management behavior and decision making. Issues may include; the evolving technology of the industry, the impact of the industry on national employment issues, and the social impact of the industry on class and racial issues. This course is offered as an independent study and must be taken in conjunction with ECON 323P: Administration in the Service Industry. Prerequisites: None. Offered: Any Semester.

SOC-SCI 395B The Economics Of The Law

See ECON 395B. Prerequisites: ECON 201 and ECON 202. Offered: Fall.

SOC-SCI 395C Economics Of Energy

See ECON 395C. Offered: Fall.

SOC-SCI 395G Economics Of Poverty

See ECON 395G. Offered: Fall.

SOC-SCI 397A The Economics Of Public Process I

This film/tape course and ECON 397B are specifically designed in the format of the PACE program. Regular majors in economics may count one of these two courses as meeting the 27 minimum required departmental hours. The J.K. Galbraith film series and text, The Age of Uncertainty, provide the central theme for this course. Offered: Fall.

SOC-SCI 397B The Economics Of Public Process II

This film/tape course and ECON 397A are specifically designed in the format of the PACE program. Regular majors in economics may count one of these two courses as meeting the 27 minimum required departmental hours. The Milton Friedman film series, Free to Choose, provides the central theme for this course. Prerequisites: ECON 201 and ECON 202. Offered: Summer.

SOC-SCI 403P Industrial Organization Applications

The students will read books and business journals and reflect, in written form, on topics related to the organizational environment. Students will also research and prepare technical reports on specific organizational issues. Validation will be coordinated with the technical writing component of the block. Offered: Fall

SOC-SCI 403P Industrial Organization Applications

The students will read books and business journals and reflect, in written form, on topics related to the organizational environment. Students will also research and prepare technical reports on specific organizational issues. Validation will be coordinated with the technical writing component of the block. Offered: Fall

SOC-SCI 411P Aging In American Society: Past And Present

Modern views of aging are often contrasted with views of aging in earlier times. The popular mythology suggests that the position of the older adult has fallen from a place of high status and respect. Exploring the myths and rhetoric, this introduction to the field of social gerontology examines aging in America as grounded in the nation's history and a variety of sociocultural contexts.

SOC-SCI 438P Labor History & Economic Policy

Analysis of the confluence of political and economic behavior the economics of collective action. Prerequisites: ECON 301 and ECON 302.

SOC-SCI 456P In-Depth Country Study

Students enrolled in this section will chose a country in Latin America (not their country of origin, if applicable) and prepare a country study. Students will receive a general reading list (which has to be incorporated) and, if desired, suggestions about country-specific readings. The studies should be founded in cultural anthropology: i.e., they should be holistic in integrating all population groups of the country, and they should be integrated in treating the country as an inter-connected, but open, system.

SOC-SCI 457P First Nations And Survival In Latin America

This course examines the history of a specific country, historical and contemporary issues (such as genocide, land use, economic and political marginalization and independence movements.) The course focuses on history and experience as it is constructed by and impacts native people. Special consideration is given to women and gender constructs in the native societies and the impact of a dominant European patriarchy.

SOC-SCI 457P First Nations And Survival In Latin America

This course examines the history of a specific country, historical and contemporary issues (such as genocide, land use, economic and political marginalization and independence movements.) The course focuses on history and experience as it is constructed by and impacts native people. Special consideration is given to women and gender constructs in the native societies and the impact of a dominant European patriarchy.

SOC-SCI 458P Women, Men And Development In A Cultural Context

Students will explore two main areas of social scientific discourse in Latin America: theories of development and marginalization; and feminist interpretation of and responses to development. We will explore how the phases of political and economic history are reflected in ideas about development, dependency, and women's issues. A large part of the class will be concerned with the increasingly important issue of street children in Latin America and other minority issues. Offered: Winter

SOC-SCI 458P Women, Men And Development In A Cultural Context

Students will explore two main areas of social scientific discourse in Latin America: theories of development and marginalization; and feminist interpretation of and responses to development. We will explore how the phases of political and economic history are reflected in ideas about development, dependency, and women's issues. A large part of the class will be concerned with the increasingly important issue of street children in Latin America and other minority issues. Offered: Winter

SOC-SCI 465P Human Resources In The Service Industry

This course will trace the historical development, and examine current policies and procedures of human resources in service organizations. Special emphasis will be placed on understanding the evolving importance of employees in developing systems to meet operational goals. Management and labor perspectives on legal employment issues, compensations issues, and team development strategies will be examined. Prerequisites: None. Offered: Any Semester.

SOC-SCI 489P Internship In Hospitality Studies

This course will allow students to demonstrate mastery of acquired theories and principles in conjunction with a working hospitality organization. Emphasis will be placed on directed research and readings to enhance individual understanding or concepts. Students will work with the Hospitality Studies Coordinator on exact course requirements. Prerequisites: Permission of instructor. Offered: Every Semester.

SOC-SCI 490C Readings In Labor Economics

See ECON 490C. Prerequisites: ECON 201 and ECON 202. Offered: Winter.

Sociology (SOCIOL)**SOCIOL 101** Sociology: An Introduction

An introduction to the study of society and the basic concepts of sociology. Fall, winter, summer.

SOCIOL 101 Sociology: An Introduction

An introduction to the study of society and the basic concepts of sociology. Fall, winter, summer.

SOCIOL 101 Sociology: An Introduction

An introduction to the study of society and the basic concepts of sociology. Fall, winter, summer.

SOCIOL 103 Introduction To Cultural Anthropology

An introduction to culture and the basic concepts of anthropology. Topics include kinship, language, and cultural change. also offered as ANTHRO 103. Offered: Fall/Winter.

SOCIOL 103 Introduction To Cultural Anthropology

An introduction to culture and the basic concepts of anthropology. Topics include kinship, language, and cultural change. also offered as ANTHRO 103. Offered: Fall/Winter.

SOCIOL 201 Introduction To Social Psychology

Exploration of the relationships between human behavior and social context. The course focuses on how realities are socially constructed and sustained, the role of symbol systems, definitions of the situation, the self as a product of interaction, and the relationship between language, thought and culture.

SOCIOL 201 Introduction To Social Psychology

Exploration of the relationships between human behavior and social context. The course focuses on how realities are socially constructed and sustained, the role of symbol systems, definitions of the situation, the self as a product of interaction, and the relationship between language, thought and culture.

SOCIOL 201 Introduction To Social Psychology

Exploration of the relationships between human behavior and social context. The course focuses on how realities are socially constructed and sustained, the role of symbol systems, definitions of the situation, the self as a product of interaction, and the relationship between language, thought and culture.

SOCIOL 202R Social Organization

This course focuses on the principles of social organization that undergird all human societies: social groups; age and gender differences; the institutions of family, economy, religion and polity; power; community and other units of residence; and social differentiation based on such factors as wealth and/or prestige. The focus of analysis is on the maintenance of social order, social change, and integration of society. Crosslisted with ANTHRO 202R. Prerequisite: SOC-SCI 101. Offered: Every semester.

SOCIOL 203 Social Problems

An examination of major social problems of modern Western society, including issues of racial conflict, war, civil rights, youth movements, the mass media, urban poverty, and crime. The topics will vary from year to year depending upon the instructor.

SOCIOL 203 Social Problems

An examination of major social problems of modern Western society, including issues of racial conflict, war, civil rights, youth movements, the mass media, urban poverty, and crime. The topics will vary from year to year depending upon the instructor.

SOCIOL 203 Social Problems

An examination of major social problems of modern Western society, including issues of racial conflict, war, civil rights, youth movements, the mass media, urban poverty, and crime. The topics will vary from year to year depending upon the instructor.

SOCIOL 203 Social Problems

An examination of major social problems of modern Western society, including issues of racial conflict, war, civil rights, youth movements, the mass media, urban poverty, and crime. The topics will vary from year to year depending upon the instructor.

SOCIOL 205 The Social Life of Things

This course examines the ways anthropologists have studied the connections between people and things. It explores how social relationships are created and changed through the use and exchange of objects, and how objects themselves take on particular meanings and histories in these processes. In questioning the relationship between material culture and human sociality, the course will expose students to a range of ethnographic and historical case studies, as well as introduce them to some core theoretical perspectives and debates within anthropology

SOCIOL 205 The Social Life of Things

This course examines the ways anthropologists have studied the connections between people and things. It explores how social relationships are created and changed through the use and exchange of objects, and how objects themselves take on particular meanings and histories in these processes. In questioning the relationship between material culture and human sociality, the course will expose students to a range of ethnographic and historical case studies, as well as introduce them to some core theoretical perspectives and debates within anthropology

SOCIOL 211 Social And Psychological Development Through The Life Cycle

A survey of significant psychosocial issues, events and crises throughout the human life span. The life cycle of the family is examined as the primary context within which individual development occurs. Although the primary emphasis will be on normal adjustment and development, attention will also be given to the occurrence of special problems and deviations at each life stage. Fall/winter.

SOCIOL 211 Social And Psychological Development Through The Life Cycle

A survey of significant psychosocial issues, events and crises throughout the human life span. The life cycle of the family is examined as the primary context within which individual development occurs. Although the primary emphasis will be on normal adjustment and development, attention will also be given to the occurrence of special problems and deviations at each life stage. Fall/winter.

SOCIOL 211 Social And Psychological Development Through The Life Cycle

A survey of significant psychosocial issues, events and crises throughout the human life span. The life cycle of the family is examined as the primary context within which individual development occurs. Although the primary emphasis will be on normal adjustment and development, attention will also be given to the occurrence of special problems and deviations at each life stage. Fall/winter.

SOCIOL 212 Global Health

This course will use the lens of critical medical anthropology to analyze the sources of poor health outcomes, health disparities, and the global impacts of health policy. Students will explore the connections between population health and other aspects of social life, such as power, inequality, war, and economics, exploring the ways in which globalization and the privatization of health creates conditions that facilitate disease.

SOCIOL 300A Special Topics In Sociology

Each time this course is offered, a different area of sociology, to be announced, will be given. Crosslisted with ANTH 300R.

SOCIOL 303 Cluster Course: Interdisciplinary Studies

SOCIOL 303CA Cluster Course: Perspectives In Science And Healing

SOCIOL 303CF Cluster Course: African And African American Women And Creativity

SOCIOL 303CO Cluster Course: Issues In Death And Dying

This course reviews historical and theoretical perspectives on death and dying. It explores the relationship of death to the social structure and culture in which it occurs, and examines interdisciplinary issues concerning death and contemporary society.

SOCIOL 303CP Cluster Course: Religion In America

SOCIOL 303CT Cluster Course: Healing And Cultural Diversity

SOCIOL 303CW Cluster Course: Critical Issues in Women's & Gender Studies

This class is an interdisciplinary upper-level course that will examine critical issues in women's and gender studies by focusing on the intersections of gender, race, class, sexuality, and social context. Through their study of these intersections, students will be more sensitive to the impact of social structures on gender and the experiences of women and men. This course may be cross-listed with CC Eng 300CW and/or Hist 400CW, depending on the semester.

SOCIOL 303CW Cluster Course: Critical Issues in Women's & Gender Studies

This class is an interdisciplinary upper-level course that will examine critical issues in women's and gender studies by focusing on the intersections of gender, race, class, sexuality, and social context. Through their study of these intersections, students will be more sensitive to the impact of social structures on gender and the experiences of women and men. This course may be cross-listed with CC Eng 300CW and/or Hist 400CW, depending on the semester.

SOCIOL 303CW Cluster Course: Critical Issues in Women's & Gender Studies

This class is an interdisciplinary upper-level course that will examine critical issues in women's and gender studies by focusing on the intersections of gender, race, class, sexuality, and social context. Through their study of these intersections, students will be more sensitive to the impact of social structures on gender and the experiences of women and men. This course may be cross-listed with CC Eng 300CW and/or Hist 400CW, depending on the semester.

SOCIOL 305 Language and Culture

This course is designed to familiarize students with the basic objects, aims, and methods of linguistic anthropology. Students will acquire this familiarity by studying both theoretical and ethnographic articles that focus on some of the major areas of concern within the field including: the evolution of human language, linguistic particularity and universality, the relationship of language to thought, structuralism and semiotics, trope theory, language and emotion, sociolinguistics, the development of writing systems, and language conservation and change.

SOCIOL 305 Language and Culture

This course is designed to familiarize students with the basic objects, aims, and methods of linguistic anthropology. Students will acquire this familiarity by studying both theoretical and ethnographic articles that focus on some of the major areas of concern within the field including: the evolution of human language, linguistic particularity and universality, the relationship of language to thought, structuralism and semiotics, trope theory, language and emotion, sociolinguistics, the development of writing systems, and language conservation and change.

SOCIOL 306 Culture, Emotion, and Identity

This course introduces students to some of the key theoretical perspectives and debates within the field of psychological anthropology. By drawing upon cross-cultural studies of emotion, personhood, sexuality, illness, and consciousness it seeks to understand some of the ways that culture and society influence human psychology and experience.

SOCIOL 310R Families And The Life Course

This course is an upper level introduction examining the sociological, historical, and social psychological research on the family, focusing primarily on the United States. The course examines families of varied ethnicity, as well as family compositions at different stages of the life course. Emphasis is placed on the interdependence of family members, as well as how society and policy influence the family.

SOCIOL 313R Sociology Of Women

A study of family, community and career roles of women in contemporary society. Special attention is directed to the variety of their life patterns and dual roles made possible by a changing society. Fall/winter.

SOCIOL 314 Anthropology of Gender

This class explores theories of the social construction of gender in cross-cultural contexts. It will also explore global issues of local and international politics, the economy, work and education as these relate to gender.

SOCIOL 314 Anthropology of Gender

This class explores theories of the social construction of gender in cross-cultural contexts. It will also explore global issues of local and international politics, the economy, work and education as these relate to gender.

SOCIOL 316 Sociology Of Death And Dying

Examination of attitudes, behaviors and institutions related to death and dying in contemporary American society. Topics include the status of death in American society, effects of the setting on dying, interaction with the dying, funeral practices, bereavement customs, surviving spouse, and suicide.

SOCIOL 317 Policies Of Drug Use And Control

Utilizing both historical and contemporary information, this course provided an assessment of the ""drug problem"" in the U.S. and policies of control developed in response to the problem. Drug use criminalization, legalization, medical treatment and prevention strategies and related issues are considered in regard to scientific knowledge related to the patterns, causes and impact of substance abuse. Also offered as CJC 317. Annually.

SOCIOL 318 Sociology Of The Aging Woman

An exploration of the intersection of gender and aging issues with special attention to cultural images of women, the development of self-concept and identity in mid-life and beyond, caring roles in the family, work and retirement, and health and mental health issues. These issues are examined within the context of social class, race, and ethnicity. Implications for community programs and social policy are considered.

SOCIOL 319 Theoretical Criminology

A comprehensive examination of the major criminological theories, their philosophical assumptions, and the sociohistorical context in which they were articulated. Also offered as CJC 319.

SOCIOL 320 Social Deviance

The dominant sociological perspectives on deviance will be discussed with special attention given to the processes that define behavior and persons as deviant and the impact of such definitions on social relationships and identity.

SOCIOL 322 Race And Ethnic Relations

The nature, origin and dynamics of ethnic and race relations in the U. S. and other societies. Specific attention will be given to the historical and contemporary contexts of prejudice discrimination and confrontation. Also offered as ANTHRO 322. Offered: Fall/Winter.

SOCIOL 322 Race And Ethnic Relations

The nature, origin and dynamics of ethnic and race relations in the U. S. and other societies. Specific attention will be given to the historical and contemporary contexts of prejudice discrimination and confrontation. Also offered as ANTHRO 322. Offered: Fall/Winter.

SOCIOL 322 Race And Ethnic Relations

The nature, origin and dynamics of ethnic and race relations in the U. S. and other societies. Specific attention will be given to the historical and contemporary contexts of prejudice discrimination and confrontation. Also offered as ANTHRO 322. Offered: Fall/Winter.

SOCIOL 324 Diversity And You

This course will examine diversity from the perspectives of race, ethnicity, class and gender. Emphasis will be placed on the impact of racism, classism and sexism on interpersonal relationships and strategies to encourage diversity in schools, neighborhoods, and the work place. Students may also enroll in ""directed research"" in conjunction with his course.

SOCIOL 324 Diversity And You

This course will examine diversity from the perspectives of race, ethnicity, class and gender. Emphasis will be placed on the impact of racism, classism and sexism on interpersonal relationships and strategies to encourage diversity in schools, neighborhoods, and the work place. Students may also enroll in ""directed research"" in conjunction with his course.

SOCIOL 324 Diversity And You

This course will examine diversity from the perspectives of race, ethnicity, class and gender. Emphasis will be placed on the impact of racism, classism and sexism on interpersonal relationships and strategies to encourage diversity in schools, neighborhoods, and the work place. Students may also enroll in ""directed research"" in conjunction with his course.

SOCIOL 327 Us Government's Indian Policies: Practices Of A Colonizing Nation

This class will convey information about the implementation of US government policies toward American Indians and how each of the policies, from treaty making, establishing reservations, removing, confronting tribes militarily, and abolishing reservations through allotment resulted in consequences detrimental to tribal welfare. The colonization process created ramifications and consequences that Indian people contend with to this day. This class will provide a historical overview of the consequences associated with political, social, and economic processes that divested Indian people of control over their lives and land they originally lived on. Also cross listed as ANTHRO 327.

SOCIOL 328 Body and Society

Body and Society is an interdisciplinary and comparative approach to the study of the body as the subject and object of social processes. Interdisciplinary approaches to topics such as meaning, ritual, performance, and practice will provide a framework for classical as well as contemporary explorations of bodily representation and experiences across a variety of cultural contexts. Prerequisite: Introduction to Cultural Anthropology

SOCIOL 328 Body and Society

Body and Society is an interdisciplinary and comparative approach to the study of the body as the subject and object of social processes. Interdisciplinary approaches to topics such as meaning, ritual, performance, and practice will provide a framework for classical as well as contemporary explorations of bodily representation and experiences across a variety of cultural contexts. Prerequisite: Introduction to Cultural Anthropology

SOCIOL 328 Body and Society

Body and Society is an interdisciplinary and comparative approach to the study of the body as the subject and object of social processes. Interdisciplinary approaches to topics such as meaning, ritual, performance, and practice will provide a framework for classical as well as contemporary explorations of bodily representation and experiences across a variety of cultural contexts. Prerequisite: Introduction to Cultural Anthropology

SOCIOL 329 The Imagery Of The American Indian In Film

This course will trace the imagery of the American Indian used by film makers through the years and how this has played a role in reinforcing certain inaccurate perceptions of American Indian cultural, social, and economic life. The course examines the sociological implications created by persistently showing misrepresented images of American Indians. The goal is to measure and compare the reality of American Indian life (values , Traditions, and beliefs) with the images created by film makers from the

early years of the 20th century to the present. Also cross listed as ANTHRO 325.

SOCIOL 331 Urban Anthropology

A course designed to apply anthropological methods to the study of various urban environments. The approach to the subject is comparative, seeking to spell out those features of the urban setting which vary from culture to culture as well as those which are common to all. Crosslisted with ANTHRO 331. Offered: Fall.

SOCIOL 331 Urban Anthropology

A course designed to apply anthropological methods to the study of various urban environments. The approach to the subject is comparative, seeking to spell out those features of the urban setting which vary from culture to culture as well as those which are common to all. Crosslisted with ANTHRO 331. Offered: Fall.

SOCIOL 331 Urban Anthropology

A course designed to apply anthropological methods to the study of various urban environments. The approach to the subject is comparative, seeking to spell out those features of the urban setting which vary from culture to culture as well as those which are common to all. Crosslisted with ANTHRO 331. Offered: Fall.

SOCIOL 332 Sociology Of Political Life

The concept of power, community power structure and decision making. The social basis of liberal democracy; consensus and legitimacy; political stability and instability. Power and politics in a mass society; elites and masses; democracy and oligarchy; alienation; bureaucracy; pluralism and totalitarianism. Ideology and social movements.

SOCIOL 335R Introduction To Social Work: Principles And Practice

An introductory course to social work, its history and current role in the delivery of social welfare services. Designed to give the student insight into the body of knowledge, theory, values, principles, and techniques of the social work process. Investigation into the varieties of practice methods, i.e., casework, group work, community organization, and the present trend toward the generic approach. Fall/winter.

SOCIOL 335R Introduction To Social Work: Principles And Practice

An introductory course to social work, its history and current role in the delivery of social welfare services. Designed to give the student insight into the body of knowledge, theory, values, principles, and techniques of the social work process. Investigation into the varieties of practice methods, i.e., casework, group work, community organization, and the present trend toward the generic approach. Fall/winter.

SOCIOL 336 Society And Community Service

This course explores the history and increasing importance of the non-profit sector and volunteerism. Applying theoretical approaches from development and community organizing, the course analyzes the uses of volunteerism and NGOs nationally and internationally. Students' understanding will be enhanced through the inclusion of applied methods needed to manage a non-profit organization and by serving in an internship in a local non-profit during the semester.

SOCIOL 337 Community Development In Urban America

The focus in this course is on experiential learning in which the student participates in several urban community development projects that allow for learning about collaboratives, networking, problem-solving, and requisite skills to successfully manage a project. Principles of community development are presented to give the student background for understanding the projects visited.

SOCIOL 337 Community Development In Urban America

The focus in this course is on experiential learning in which the student participates in several urban community development projects that allow for learning about collaboratives, networking, problem-solving, and requisite skills to successfully manage a project. Principles of community development are presented to give the student background for understanding the projects visited.

SOCIOL 337 Community Development In Urban America

The focus in this course is on experiential learning in which the student participates in several urban community development projects that allow for learning about collaboratives, networking, problem-solving, and requisite skills to successfully manage a project. Principles of community development are presented to give the student background for understanding the projects visited.

SOCIOL 339 American Indian Leaders: Past And Present

This course will examine the definition of leadership as it relates to American Indian issues. Consideration will be given to the nuances of leadership by examining the social, cultural economic, and political situations that gave cause for particular individuals to assume roles of Indian ranks with those practiced by non-indian leaders. It will trace the evolving nature of

leadership within tribal nations and American Indian communities from past to present, as well as looking at Indian leadership roles in time of war and peace. Lives of the major characters of American Indian historical record will be reviewed, such as Geronimo, Crazy horse, Sitting Bull, Osceola, Tecumseh, Pontic, Black Hawk, Quannah Parker, and Captain Jack. Also cross listed as ANTHRO 326.

SOCIOL 340R Social Change

Examines the key dimensions that bring about change in societies, including revolutions and evolutionary processes. Attention is given to the global context of social change, as well as the role of social actors and social movements. Crosslisted with (ANTH 340R or SOC 340R).

SOCIOL 341R The Anthropology Of Economic Institutions

Examines in a comparative perspective the social, cultural and political framework of economic activities. Emphasis is placed on socioeconomic systems and the contradictions they generate. Crosslisted with ANTHRO 341R.

SOCIOL 343 Societies And Cultures Of Latin America

A survey of emerging cultures and societies in Latin America; pre-history and geography; the Mayan, the Aztec and Incan civilizations; contemporary Indian, peasant and urban subcultures; the impact of forces such as migration, urbanization, peasant mobilization, and agrarian reform. Also offered as ANTHRO 343.

SOCIOL 343 Societies And Cultures Of Latin America

A survey of emerging cultures and societies in Latin America; pre-history and geography; the Mayan, the Aztec and Incan civilizations; contemporary Indian, peasant and urban subcultures; the impact of forces such as migration, urbanization, peasant mobilization, and agrarian reform. Also offered as ANTHRO 343.

SOCIOL 346 Cultures Of The African Diaspora

This course will explore the cultures of African people and their descendents who settled in Europe, the Caribbean or the Americas due primarily to the impact of the Trans-Atlantic trade in human beings. The focus will be comparative, with emphasis on cultural adaptation, kinship systems, music and religion.

SOCIOL 346 Cultures Of The African Diaspora

This course will explore the cultures of African people and their descendents who settled in Europe, the Caribbean or the Americas due primarily to the impact of the Trans-Atlantic trade in human beings. The focus will be comparative, with emphasis on cultural adaptation, kinship systems, music and religion.

SOCIOL 347 The American Indian Image: Stereotype Vs. Reality

This class will take a historical, sociological, and cultural approach to review how society at large views American Indians. The course will trace the origin and continued use of American Indian stereotyped views, and assess the sociological and psychological complications that result when judging Indians solely on stereotyped imagery. The course will review the historical content of American Indian life as portrayed in early plays, films, and newspaper accounts and compare these stereotyped images with the reality of American Indian life by providing a depiction of a series of historical events that will offer a more balanced and accurate consideration for American Indian life past and present. Also cross listed as ANTHRO 327.

SOCIOL 348 Latin American Immigrants & Refugees in the U.S.

The course is an introduction to the study of the culture and societies of U.S. citizens and immigrants of Latin American heritage living in the U.S. The course emphasizes recent anthropological as well as historical and cultural studies. Topics covered: ethnohistory, and cultural diffusion over successive generations.

SOCIOL 348 Latin American Immigrants & Refugees in the U.S.

The course is an introduction to the study of the culture and societies of U.S. citizens and immigrants of Latin American heritage living in the U.S. The course emphasizes recent anthropological as well as historical and cultural studies. Topics covered: ethnohistory, and cultural diffusion over successive generations.

SOCIOL 348 Latin American Immigrants & Refugees in the U.S.

The course is an introduction to the study of the culture and societies of U.S. citizens and immigrants of Latin American heritage living in the U.S. The course emphasizes recent anthropological as well as historical and cultural studies. Topics covered: ethnohistory, and cultural diffusion over successive generations.

SOCIOL 351 Gender, Work And Social Change

This course examines the role of gendered work and consumption in global social change. Drawing from sociological perspectives on gender and work, this course foregrounds a global comparative analysis of societal development and working contexts, including tourism employment, sex work, domestic work, and agricultural, garment, and informatics production.

Academic-service learning constitutes a primary course assignment. Offered: Winter

SOCIOL 361 Social Theory

A survey of the major orientations in social theory, their historical development, and contemporary issues and controversies in social theory. Prerequisite: 3 hours in social science.

SOCIOL 361 Social Theory

A survey of the major orientations in social theory, their historical development, and contemporary issues and controversies in social theory. Prerequisite: 3 hours in social science.

SOCIOL 361 Social Theory

A survey of the major orientations in social theory, their historical development, and contemporary issues and controversies in social theory. Prerequisite: 3 hours in social science.

SOCIOL 362 Methods Of Sociological Research

Experimental and observational schemes; survey analysis; interview and questionnaire designs; scaling techniques; sampling. Also offered as CJC 483. Prerequisites: 3 hours in Social Science.

SOCIOL 362 Methods Of Sociological Research

Experimental and observational schemes; survey analysis; interview and questionnaire designs; scaling techniques; sampling. Also offered as CJC 483. Prerequisites: 3 hours in Social Science.

SOCIOL 362 Methods Of Sociological Research

Experimental and observational schemes; survey analysis; interview and questionnaire designs; scaling techniques; sampling. Also offered as CJC 483. Prerequisites: 3 hours in Social Science.

SOCIOL 363 Introduction To Statistics In Sociology/Criminal Justice

A first course in the statistical analysis of quantitative data. Course emphasizes descriptive statistics, probability theory, parameter estimation, bivariate hypothesis testing, and computer applications. Prerequisites: MATH 110, MATH 116 or an equivalent.

SOCIOL 363 Introduction To Statistics In Sociology/Criminal Justice

A first course in the statistical analysis of quantitative data. Course emphasizes descriptive statistics, probability theory, parameter estimation, bivariate hypothesis testing, and computer applications. Prerequisites: MATH 110, MATH 116 or an equivalent.

SOCIOL 363 Introduction To Statistics In Sociology/Criminal Justice

A first course in the statistical analysis of quantitative data. Course emphasizes descriptive statistics, probability theory, parameter estimation, bivariate hypothesis testing, and computer applications. Prerequisites: MATH 110, MATH 116 or an equivalent.

SOCIOL 372 Introduction To The Sociology Of Religion

Using the tremendous diversity of religious belief and practice in North America, in particular new religious movements, this class will acquaint students with the academic study of religion as a social (and sociological) phenomenon. Students will learn how religion has been interpreted by sociologists in the past, and how evolving perspectives shape both the way academics perceive religion and how they study it. They will learn how religion permeates and affects virtually every domain of human culture and interaction. And they will gain experience in fieldwork, coming to understand in the process religious traditions other than those in which they may have been raised.

SOCIOL 373 Anthropology of Religion

This course explores the ways anthropologists have gone about studying religion from the opening decades of the 20th century to present. The course introduces students to the diversity of human religious expression and experience through anthropological literature and to the diversity of anthropological expression especially as it has been revealed in social scientific studies of religious life. The course is designed to generate a critical dialogue about the special role that religion has played in the ongoing anthropological engagement with "other" societies and cultures over time

SOCIOL 373 Anthropology of Religion

This course explores the ways anthropologists have gone about studying religion from the opening decades of the 20th century to present. The course introduces students to the diversity of human religious expression and experience through anthropological literature and to the diversity of anthropological expression especially as it has been revealed in social scientific studies of religious life. The course is designed to generate a critical dialogue about the special role that religion has played in the ongoing

anthropological engagement with "other" societies and cultures over time

SOCIOL 374 Anthropology of Childhood

This course explores how children's lives are shaped by cultural, economic, and political forces and relations. Drawing upon a range of case studies and disciplinary perspectives it will consider how and why children emerge as sites of contestation and debate, and it will examine the various ways in which the category and experience of childhood unfold in different socio-historical contexts. The main objective of the course is to better understand the social construction of childhood and use the study of childhood as privileged window for exploring the articulation of cultural, economic and political relations within the context of contemporary global society. Offered: On-demand

SOCIOL 381P Everyday Masculinities

This independent study course is designed to encourage students to put into play their study of and growing understanding of men's lives. Each student will design and carry out an independent study/research project that will take into account (critically) the experience of at least three men in their immediate surroundings. Ethnographic methods (observation, field-note/interview and transcription strategies, write-up, etc.) will be covered to facilitate the student's successful completion of their project. The project will be broken down into phases to insure timely progress throughout the semester. Restrictions: Concurrent enrollment in Meanings of Masculinity required.

SOCIOL 390R Directed Field Experience I

The student will work within one or more social agencies or organizations in the city under the joint supervision of a professional within the organization and a member of the Sociology Department. In-class discussion will cover the major problems of social organization. Prerequisite: Consent of instructor.

SOCIOL 390RA Directed Field Experience I

SOCIOL 391 Directed Field Experience II

A continuation of SOCIOL 390. Winter.

SOCIOL 397 Independent Readings In Sociology

Intensive readings in an area selected by the student with prior consultation with instructor. Prerequisite: Twelve hours of sociology. On demand.

SOCIOL 398 Independent Research In Sociology

Intensive research in an area selected by the student with prior consultation with instructor. Prerequisite: Twelve hours of sociology. On demand.

SOCIOL 404WI The Sociology Capstone: Senior Seminar

A seminar which explores the interrelationships between sociology theory, research methods and statistics. May focus on major contemporary issues building on and integrating knowledge obtained in previous courses. This course is a writing intensive course and satisfies this requirement for the general degree requirements of the college. Prerequisites: SOCIOL 101, SOCIOL 361, SOCIOL 362, SOCIOL 363. Offered: Fall/Winter. Restrictions: Successful completion of the WEPT exam.

SOCIOL 410R Aging In Contemporary Society

Attitudes and stereotypes, the status of the aged in American society; the social psychology of the aging process; the response of societal institutions such as the family and political system to the aging of the population as a whole. Applications and potentials of research are considered.

SOCIOL 411 Sociology Of Human Sexuality

A cross cultural examination of the most fundamental dichotomy in human society: male and female. Considering sex both as a biological and social category, this course compares diversity and similarity in the interrelationships of male and female in patterns of behavior and social organization found in human societies across time and space.

SOCIOL 416 Aging And Developmental Disabilities

This course explores the experience of aging with a developmental disability or mental retardation within the context of normative aging. Among the comparisons made between older persons with and without developmental disabilities are their demographic characteristics, physical and cognitive functioning, role transitions and losses, identities and self-concepts, and family and caregiving issues. Policies, programs, and emerging concepts of best practices are considered within the context of quality of life, ethical, and community inclusion issues. Prerequisites: None. Offered: Summer.

SOCIOL 417 Practicum In Aging And Developmental Disabilities

Students gain experience in working with and defining issues of Older persons with developmental disabilities through

placements in sheltered workshops, senior centers, residential group homes, and other community-based programs. Prerequisites: None. Offered: Summer.

SOCIOL 418 Feminist Theories

This class introduces the major feminist theories and their primary authors over the last 200 years. The class takes both a historical view (beginning with two millennia of male-centered theories about women) and a conceptual approach (theories are grouped by common ground) and familiarizes the student with both the historical processes that necessitate feminist theories as well as with the breadth and depth of the historically and currently available scholarship. Prerequisite: Introduction to Women's Studies Offered: Winter Semester

SOCIOL 430R Complex Organizations

The sociology of complex organizations examines sociological theories and methods that explain what an organization is trying to accomplish and ways in which performance can be assessed. Emphasis will be on internal structures and processes of organizations, the organization's relationship to the individual and the organization's environment.

SOCIOL 431 Social Organization Of The City

An examination of the social structure of the American city with special reference to the historical development of American cities. Attention will be focused on the role of social institutions as they have changed in relation to urban problems.

SOCIOL 431 Social Organization Of The City

An examination of the social structure of the American city with special reference to the historical development of American cities. Attention will be focused on the role of social institutions as they have changed in relation to urban problems.

SOCIOL 431 Social Organization Of The City

An examination of the social structure of the American city with special reference to the historical development of American cities. Attention will be focused on the role of social institutions as they have changed in relation to urban problems.

SOCIOL 433 Immigration and the City

This course examines key issues and controversies in immigration research. Special attention will be paid to the social, economic, and historical developments of urban immigrant communities.

SOCIOL 440R Sociology Of Medicine

Relationship of basic concepts in sociology to health and medical care. Cultural and class variations in health status. Social and cultural aspects of health. Prerequisite: SOCIOL 101 or consent of instructor.

SOCIOL 441 Globalization and Development

Focuses on issues of economic development, social stratification, political institutions, and political mobilization in societies where colonialism provided the context for their long-term disadvantages in the international economic order. Specific attention is paid to the intersection of the international components that define the options and limits for societal development (e.g., market shifts, international institutions and contracts, foreign policies, and migration) and the distinct social, political and cultural implications of these factors for developing societies. Crosslisted with ANTHRO 441.

SOCIOL 441 Globalization and Development

Focuses on issues of economic development, social stratification, political institutions, and political mobilization in societies where colonialism provided the context for their long-term disadvantages in the international economic order. Specific attention is paid to the intersection of the international components that define the options and limits for societal development (e.g., market shifts, international institutions and contracts, foreign policies, and migration) and the distinct social, political and cultural implications of these factors for developing societies. Crosslisted with ANTHRO 441.

SOCIOL 441 Globalization and Development

Focuses on issues of economic development, social stratification, political institutions, and political mobilization in societies where colonialism provided the context for their long-term disadvantages in the international economic order. Specific attention is paid to the intersection of the international components that define the options and limits for societal development (e.g., market shifts, international institutions and contracts, foreign policies, and migration) and the distinct social, political and cultural implications of these factors for developing societies. Crosslisted with ANTHRO 441.

SOCIOL 441 Globalization and Development

Focuses on issues of economic development, social stratification, political institutions, and political mobilization in societies where colonialism provided the context for their long-term disadvantages in the international economic order. Specific attention is paid to the intersection of the international components that define the options and limits for societal development (e.g., market shifts, international institutions and contracts, foreign policies, and migration) and the distinct social, political and cultural

implications of these factors for developing societies. Crosslisted with ANTHRO 441.

Spanish (SPANISH)

SPANISH 110 Elementary Spanish I

The goals of this course are an ability to speak and to understand simple (spoken) Spanish as well as to read and write simple prose. Every semester.

SPANISH 110 Elementary Spanish I

The goals of this course are an ability to speak and to understand simple (spoken) Spanish as well as to read and write simple prose. Every semester.

SPANISH 120 Elementary Spanish II

Continuation of SPANISH 110. Prerequisite(s): Spanish 110 or equivalent. Every semester.

SPANISH 120 Elementary Spanish II

Continuation of SPANISH 110. Prerequisite(s): Spanish 110 or equivalent. Every semester.

SPANISH 211 Second Year Spanish I

Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language. Prerequisite: SPANISH 120. Every semester.

SPANISH 211 Second Year Spanish I

Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language. Prerequisite: SPANISH 120. Every semester.

SPANISH 216 Spanish For The Health Sciences

This course will enable the student to converse with Hispanic patients and/or hospital personnel in situations such as admissions, patient care, lab work as ordered by a physician or dentist, emergency room procedures, etc. In addition, medical readings in Spanish will give professional and paraprofessional students an increased vocabulary related to the many fields within the health sciences. This course will satisfy one semester of the A&S language requirement. Prerequisite: one year of college Spanish or its equivalent.

SPANISH 216 Spanish For The Health Sciences

This course will enable the student to converse with Hispanic patients and/or hospital personnel in situations such as admissions, patient care, lab work as ordered by a physician or dentist, emergency room procedures, etc. In addition, medical readings in Spanish will give professional and paraprofessional students an increased vocabulary related to the many fields within the health sciences. This course will satisfy one semester of the A&S language requirement. Prerequisite: one year of college Spanish or its equivalent.

SPANISH 221 Second Year Spanish II

Continuation of SPANISH 211. Every semester.

SPANISH 250 Commercial Spanish

Business practices in correspondence in the Spanish language; special vocabulary of business, trade, banking and administration. Refinement of grammatical and stylistic skills. Subjects treated include price inquiries, quotations, offers, orders, complaints, administrative, banking and diplomatic correspondence. Prerequisite: SPANISH 221 or equivalent.

SPANISH 280 Special Intermediate Spanish Topics I

Instruction of Spanish on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit. Prerequisite: Elementary I and II college-level courses or equivalent. As needed.

SPANISH 290 Special Intermediate Spanish Topics II

Continuation of SPANISH 280. May not be repeated for credit. As needed.

SPANISH 301 Introduction To Literary Studies

Emphasis will be placed on the study of literary theory and the philosophical ideas behind the literary movements, their relations and differences. A representative work or works of each genre will be thoroughly studied and analyzed. Critical reports will be written about different features of the literary works under consideration. Strongly recommended for all majors, to be taken

before 400-level literature courses. Prerequisite: SPANISH 315

SPANISH 315 Intermediate Conversation And Composition I

Grammar review, practice in speaking and writing Spanish; emphasis on idiomatic usage and practical vocabulary. Required for major. Prerequisite: SPANISH 221 or equivalent.

SPANISH 315 Intermediate Conversation And Composition I

Grammar review, practice in speaking and writing Spanish; emphasis on idiomatic usage and practical vocabulary. Required for major. Prerequisite: SPANISH 221 or equivalent.

SPANISH 325 Intermediate Conversation And Composition II

Continuation of SPANISH 315. Required for major. Prerequisite: SPANISH 315.

SPANISH 325 Intermediate Conversation And Composition II

Continuation of SPANISH 315. Required for major. Prerequisite: SPANISH 315.

SPANISH 350 Continental Spanish Civilization

General cultural characteristics of Spain. Readings from representative literary works.

SPANISH 351 Latin American Civilization

Historical development of Latin America. Readings from representative literary works.

SPANISH 365 The Search For Mexican Identity

The goal of the course is to familiarize the student with the poignant search for self awareness and definition witnessed in the letters and fine arts of Mexico in the 20th-century. Readings will include works by Vasconcelos, Reyes, Ramos, Paz, Rulfo and Fuentes, and will be complemented by slide presentations of pertinent works by major artists.

SPANISH 373 History Of Spanish Literature I

A study of the development of Spanish peninsular literature from the Middle Ages to 1700. Prerequisite: SPANISH 315 & SPANISH 325

SPANISH 374 History Of Spanish Literature II

A study of the development of Spanish peninsular literature from 1700 to present. Prerequisite: SPANISH 315 & SPANISH 325

SPANISH 380 Special Topics

Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes. Prerequisite: Permission of the instructor.

SPANISH 401 Introduction To Spanish American Literature I

The colonial period. Selected readings in historical and literary material from the time of the conquest to the period of struggle for independence. On demand. Prerequisites: Spanish 315

SPANISH 402 Introduction To Spanish American Literature II

The 19th and 20th-centuries. Selected readings from prose and poetry of Spanish-American writers. On demand. Prerequisites: Spanish 315

SPANISH 414 Early 20th Century Peninsular Literature: From the Generation of 1898 to Surrealism

Selected readings in Spanish narrative, poetry, drama and philosophical essay from the beginning of the 20th Century to the Avant-Garde movements in the 1930's.

SPANISH 415 Advanced Conversation And Composition I

Continued practice in speaking and writing Spanish, with attention to the elements of style. Continued in SPANISH 425. First semester required of all majors and second semester recommended. Both semesters required of prospective high school teachers. Either or both semesters may be repeated with the consent of the instructor and the Spanish section head. No more than six hours credit may be applied towards a degree. Prerequisite: SPANISH 325. Offered: Every fall.

SPANISH 416 Medieval Spanish Literature

From the Cantar de Mio Cid to 1499. Winter.

SPANISH 417 Spanish-American Lyric Poetry

A survey of poetry in Spanish America from Colonial times to World War II, including a study of the most representative poets

and their writings. Winter.

SPANISH 418 Romantic Movement In Spain

The origin and development of romantic literature against the historical and ideological background of the first half of the 19th century. Various literary genres will be studied; these will include works by Rivas, Espronceda, Larra, Zorrilla, Gil y Carrasco, Becquer and others.

SPANISH 420 Cervantes' Don Quixote, Part I

An intensive reading of the first part of Cervantes' novel, Don Quixote.

SPANISH 421 Cervantes' Don Quixote, Part II

An intensive reading of the second part of Cervantes' novel, Don Quixote. Part One is not a prerequisite. Also offered as SPANISH 5521.

SPANISH 421 Cervantes' Don Quixote, Part II

An intensive reading of the second part of Cervantes' novel, Don Quixote. Part One is not a prerequisite. Also offered as SPANISH 5521.

SPANISH 425 Advanced Conversation And Composition II

Continuation of SPANISH 415. See SPANISH 415. Required for teacher certification in Spanish. Prerequisite: SPANISH 415. Winter.

SPANISH 426 Golden Age Drama

The development of the Spanish drama from Lope's youth to the death of Calderon. Also offered as SPANISH 5526.

SPANISH 426 Golden Age Drama

The development of the Spanish drama from Lope's youth to the death of Calderon. Also offered as SPANISH 5526.

SPANISH 427 Pre-Columbian And Spanish Colonial Literature

A study of the pre-Columbian works in drama, narrative, and poetry (Popol Vuh, Apu-Ollantay, Incan and Aztec poetry) leading into a survey of Spanish-American colonial literature. Also offered as SPANISH 5527.

SPANISH 427 Pre-Columbian And Spanish Colonial Literature

A study of the pre-Columbian works in drama, narrative, and poetry (Popol Vuh, Apu-Ollantay, Incan and Aztec poetry) leading into a survey of Spanish-American colonial literature. Also offered as SPANISH 5527.

SPANISH 428 Contemporary Spanish Poetry

A comprehensive and intensive study of 20th-century Spanish poetry. Poets and poetry will be studied in the light of literary movements, foreign influences, political tendencies and philosophical ideas. Also offered as SPANISH 5528.

SPANISH 428 Contemporary Spanish Poetry

A comprehensive and intensive study of 20th-century Spanish poetry. Poets and poetry will be studied in the light of literary movements, foreign influences, political tendencies and philosophical ideas. Also offered as SPANISH 5528.

SPANISH 429 The Novel Of The Mexican Revolution

The revolution as the principal focus of 20th-century Mexican fiction. The course will examine both the evolving understanding of the event/process and the sophistication of narrative technique employed in its presentation. Among the writers to be studied are Azuela, Guzman, Lopez y Fuentes, Yanez, Revueltas, Rulfo and Fuentes. Also offered as SPANISH 529.

SPANISH 429 The Novel Of The Mexican Revolution

The revolution as the principal focus of 20th-century Mexican fiction. The course will examine both the evolving understanding of the event/process and the sophistication of narrative technique employed in its presentation. Among the writers to be studied are Azuela, Guzman, Lopez y Fuentes, Yanez, Revueltas, Rulfo and Fuentes. Also offered as SPANISH 529.

SPANISH 430 Spanish Mysticism

An examination of the development of mysticism in Oriental and Occidental civilizations, with emphasis on the great periods of mystic experience as reflected in the literary production of the Spanish Golden Age. Readings could include the works of Fray Luis de Granada, Fray Luis de Leon, Saint John of the Cross and Saint Teresa of Avila. Also offered as SPANISH 5530.

SPANISH 430 Spanish Mysticism

An examination of the development of mysticism in Oriental and Occidental civilizations, with emphasis on the great periods of mystic experience as reflected in the literary production of the Spanish Golden Age. Readings could include the works of Fray

Luis de Granada, Fray Luis de Leon, Saint John of the Cross and Saint Teresa of Avila. Also offered as SPANISH 5530.

SPANISH 431 The Golden Age Novel

A study of major prose works of the Golden Age. Possible topics include authorship, innovative narrative techniques, textual strategies and metafiction issues. Readings could include works by Alfonso Martinez de Toledo, Diego de San Pedro, Fernando de Rojas, Francisco Delicado, Cervantes, and Lope de Vega. Also offered as SPANISH 5531.

SPANISH 431 The Golden Age Novel

A study of major prose works of the Golden Age. Possible topics include authorship, innovative narrative techniques, textual strategies and metafiction issues. Readings could include works by Alfonso Martinez de Toledo, Diego de San Pedro, Fernando de Rojas, Francisco Delicado, Cervantes, and Lope de Vega. Also offered as SPANISH 5531.

SPANISH 432 Pastoral Literature

A study of the development of pastoral literature during the Spanish Golden Age. Possible texts: Juan del Encina's Eclogues, Montemayor's Los siete libros de la Diana and Cervantes' Galatea. These works will be examined within their historical and cultural context. Also offered as SPANISH 5532.

SPANISH 432 Pastoral Literature

A study of the development of pastoral literature during the Spanish Golden Age. Possible texts: Juan del Encina's Eclogues, Montemayor's Los siete libros de la Diana and Cervantes' Galatea. These works will be examined within their historical and cultural context. Also offered as SPANISH 5532.

SPANISH 433 Cervantes' Exemplary Novels

A study of Cervantes' Exemplary Novels within the context of 17th-Century Spain. Attention will be paid to interpretive possibilities and how knowledge of historical contexts might influence readings of this rich and varied cultural output. Also offered as SPANISH 5533.

SPANISH 433 Cervantes' Exemplary Novels

A study of Cervantes' Exemplary Novels within the context of 17th-Century Spain. Attention will be paid to interpretive possibilities and how knowledge of historical contexts might influence readings of this rich and varied cultural output. Also offered as SPANISH 5533.

SPANISH 434 The Picaresque Novel

A study of the development of picaresque fiction during the Spanish Golden Age. The course deals with novelists principally active during the Baroque period such as Mateo Aleman, Francisco Lopez de Ubeda, Miguel de Cervantes, and Francisco de Quevedo. Also offered as Spanish 5534.

SPANISH 434 The Picaresque Novel

A study of the development of picaresque fiction during the Spanish Golden Age. The course deals with novelists principally active during the Baroque period such as Mateo Aleman, Francisco Lopez de Ubeda, Miguel de Cervantes, and Francisco de Quevedo. Also offered as Spanish 5534.

SPANISH 435 Peninsular Poetry

This course is a survey of poetics and poetry in Spain from the Reconquest to the present, with emphasis on socio-historical contexts and movements. It examines theoretical and methodological approaches to literary analysis and also provides practical experience in exploring poetic texts. Students will analyze a wide spectrum of poems, while discussing the cultural, philosophical, linguistic, political and ethical considerations that surround the reception of a text.

SPANISH 436 Spain's Transition to Democracy: Literature and Film

This course reviews the cultural production between the death of Francisco Franco in 1975 and the entrance in the European Union in film, literature and music, within its historical and political context.

SPANISH 450 Modern Classics Of Latin American Literature

The goal of the course is to familiarize the student with the principal Latin American writers of the modern period. The focus will be dual: the progressive sophistication of literary technique and the refinement of social conscience. Among the authors to be studied are: Asturias, Borges, Carpentier, Cortazar, Donoso, Fuentes, Garcia Marquez, Paz, Rulfo and Vargas Llosa. Also offered as SPANISH 5550.

SPANISH 450 Modern Classics Of Latin American Literature

The goal of the course is to familiarize the student with the principal Latin American writers of the modern period. The focus will be dual: the progressive sophistication of literary technique and the refinement of social conscience. Among the authors to be studied are: Asturias, Borges, Carpentier, Cortazar, Donoso, Fuentes, Garcia Marquez, Paz, Rulfo and Vargas Llosa. Also offered

as SPANISH 5550.

SPANISH 453 Spanish-American Short Story

A study of Spanish-American short stories from Romanticism to the present. Also offered as SPANISH 5553.

SPANISH 453 Spanish-American Short Story

A study of Spanish-American short stories from Romanticism to the present. Also offered as SPANISH 5553.

SPANISH 460 U.S.-Latino Literature

An interdisciplinary approach to U.S.-Latino Studies, including both literary and cultural texts. The course will be taught in English, the language in which the texts are produced. Also offered as SPANISH 5560.

SPANISH 460 U.S.-Latino Literature

An interdisciplinary approach to U.S.-Latino Studies, including both literary and cultural texts. The course will be taught in English, the language in which the texts are produced. Also offered as SPANISH 5560.

SPANISH 480 Special Topics

Each time this course is offered a particular genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes. Offered: On demand.

SPANISH 480A Special Topics

Each time this course is offered a particular genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes. Offered: On demand.

SPANISH 490 Special Readings

Intensive readings in field or literary figure to be selected by the student in consultation with the instructor. Available, by permission only, to advanced students of Spanish; available only when student cannot take regularly scheduled courses. Prerequisite: 3.0 GPA. On demand.

SPANISH 499 Senior Seminar (Capstone)

Required for major. Covers seminal works of Peninsular and Latin American literature in their historical and cultural context. Course content varies, but will include such elements as geography, politics, folklore, history of the language, architecture, art and music. To be taken during final Fall Semester of residence. Prerequisite: 18 hours beyond first year Offered: Fall

Prerequisite: 18 hours beyond first year Offered: Fall

Statistics (STAT)

STAT 234 Mathematics For Teachers: Probability And Statistics

Designed for elementary-and middle-school mathematics teachers. Foundational knowledge of probability and statistics, elements of statistics, organizing, displaying and describing data, probability distributions, correlation, regression, prediction, estimation. Prerequisites: 4 units of high school math or Math 110.

STAT 234 Mathematics For Teachers: Probability And Statistics

Designed for elementary-and middle-school mathematics teachers. Foundational knowledge of probability and statistics, elements of statistics, organizing, displaying and describing data, probability distributions, correlation, regression, prediction, estimation. Prerequisites: 4 units of high school math or Math 110.

STAT 235 Elementary Statistics

An introduction to descriptive and inferential statistics. Organization and presentation of data, averages and variations, elementary probability, random variables, special discrete distributions, normal distributions, sampling distributions, point estimation, confidence intervals, and hypothesis testing. Credit will not be given for both STAT 235 and STAT 236. Prerequisite: 4 units high school math or MATH 110.

STAT 235 Elementary Statistics

An introduction to descriptive and inferential statistics. Organization and presentation of data, averages and variations, elementary probability, random variables, special discrete distributions, normal distributions, sampling distributions, point estimation, confidence intervals, and hypothesis testing. Credit will not be given for both STAT 235 and STAT 236. Prerequisite:

4 units high school math or MATH 110.

STAT 236 Applied Statistics For Public Administration

Designed for students in business, public administration, and urban studies; will cover descriptive and inferential statistics, elementary probability, analysis of nominal and ordinal data, regression analysis; will use a statistical software package to apply the tools of statistics and answer quantitative questions. Credit will not be given for both STAT 235 and STAT 236. Prerequisite: 4 units high school math or MATH 110

STAT 236 Applied Statistics For Public Administration

Designed for students in business, public administration, and urban studies; will cover descriptive and inferential statistics, elementary probability, analysis of nominal and ordinal data, regression analysis; will use a statistical software package to apply the tools of statistics and answer quantitative questions. Credit will not be given for both STAT 235 and STAT 236. Prerequisite: 4 units high school math or MATH 110

STAT 436 Introduction To Mathematical Statistics I

Sample space, conditional probability, random variables, probability distribution functions and probability densities; transformations of random variables, mathematical expectation, conditional distributions and expectations, laws of large numbers and limit theorems, applications. Prerequisite: MATH 250.

STAT 441 Introduction To Mathematical Statistics II

Sampling Distributions; point estimation; interval estimation; hypothesis testing; analysis of variance; nonparametric methods; statistical software applications; topics in Applied Statistics. Prerequisites: STAT 436.

Theatre (THEATRE)

THEATRE 100 Topical Studies In Theatre Practice

(A, B, C, D) This course provides students with an opportunity to explore special offerings in theatre practice. No prerequisite. Does not fulfill general education course requirement in the Fine Arts or Humanities. May count for elective credit in the Theatre major. Different sections of the course may be repeated. On demand.

THEATRE 100 Topical Studies In Theatre Practice

(A, B, C, D) This course provides students with an opportunity to explore special offerings in theatre practice. No prerequisite. Does not fulfill general education course requirement in the Fine Arts or Humanities. May count for elective credit in the Theatre major. Different sections of the course may be repeated. On demand.

THEATRE 101 Introduction To Acting

An introductory course to acquaint the freshman theatre major and non-major student with the process of acting through relaxation and improvisational exercise.

THEATRE 113 Introduction To Technical Production

An introduction to the technical production process with emphasis on production organization, planning and scenic construction techniques. Required laboratory work.

THEATRE 121 Oral Interpretation Of Literature

Principles of interpretation, analysis and oral reading of prose and poetry. Emphasis upon platform performance: body language, vocal control and performance techniques.

THEATRE 130 Foundations Of Fine Arts Theatre

An introduction to theatre arts and a general orientation to the creative and technical aspects of live performance. Includes historical overview, analysis of the components of a play, and observation of and critical reaction to theatrical productions. Frequent guest speakers.

THEATRE 180 Theatre Production I

A practicum course in theatre to be elected for one credit each semester during the freshman and sophomore years. The student will be assigned to a different area each semester. High school students may elect for college credit. Every semester.

THEATRE 210 Introduction To Design For The Theater

An introduction to aesthetics and design for the theater in the areas of scenery, costume, lighting and sound. The emphasis is upon the theory, vocabulary, form, style, historical influences and process in each area. Attendance at theater productions is required. Course is taught by design faculty from each area.

THEATRE 295 Speech For The Theatre I

Training in voice and articulation and the techniques of adaptation to the needs of the artist-performer in the theatre: exercises to free the voice, develop effective breathing, tone production, articulation, flexibility of vocal production, and projection.

THEATRE 295B Speech For The Theater I**THEATRE 298** Movement For Actors

Basic movement training including relaxation and alignment techniques, exercises to increase physical facility and skills to enhance rhythmic coordination and physical characterization. THEATER 298A prerequisite for THEATER 298B. Fall/winter.

THEATRE 300 Acting I

Basic principles of dramatic performance: training in voice, movement and language as an organic developmental whole.

THEATRE 300 Acting I

Basic principles of dramatic performance: training in voice, movement and language as an organic developmental whole.

THEATRE 300CH Cluster Course: Healing And The Arts

This course explores the healing potential of theatre fine arts, music and narrative literature in the lives of their creators, those who experience the works of art and in society as a whole. This course fulfills the Cluster Course Requirement. Prerequisite: None Offered: Winter Semester

THEATRE 300CR Interdisciplinary Studies:Special Topics

Faculty from at least two different departments (one of which must be a department in the division of humanities, including history) may determine the topic and syllabus, subject to the approval of the director of Integrated Studies and the programs advisory committee in addition to the approval of the departments involved. This special topics course will satisfy the interdisciplinary course requirement for the B.A. Winter.

THEATRE 300CS Cluster Course: History Of Russian Culture**THEATRE 315** Acting II

Textual analysis, characterization and building a role. Prerequisite: Acting I (THEATER 300).

THEATRE 315 Acting II

Textual analysis, characterization and building a role. Prerequisite: Acting I (THEATER 300).

THEATRE 317 Scene Design

Introduces the mechanics of layout: perspective, basic drafting techniques, front elevation and floorplan execution. Second half of the semester emphasizes scenic design as an art form. Prerequisite: THEATER 113 (THEATER 4311 recommended) or consent of instructor.

THEATRE 325 Acting III

Study and practice of period and contemporary styles of acting. Prerequisite: Acting II (THEATER 315) . Each semester.

THEATRE 325 Acting III

Study and practice of period and contemporary styles of acting. Prerequisite: Acting II (THEATER 315) . Each semester.

THEATRE 329 Master Class In Acting

(A,B,C,D) Class in advanced studies in acting. May be repeated for credit up to eight hours and guest artist change. Prerequisite: Acting III.

THEATRE 331 Advanced Oral Interpretation

Oral interpretation of poetry and prose. Careful analysis of selected masterpieces as art forms and an application of the aesthetic discipline to the oral reading of literature.

THEATRE 333 History Of Costuming I

The study of the history of European costume, with emphasis on the social and economic ramifications of costuming through the ages.

THEATRE 333 History Of Costuming I

The study of the history of European costume, with emphasis on the social and economic ramifications of costuming through the

ages.

THEATRE 340 Stage Makeup

Lecture and laboratory work in the fundamentals of makeup for the stage.

THEATRE 350 Theatre History I

Development of theatre art, including the physical stage, technical production elements, dramatic literature, and audience behavior from primitive origins to the 18th century.

THEATRE 350 Theatre History I

Development of theatre art, including the physical stage, technical production elements, dramatic literature, and audience behavior from primitive origins to the 18th century.

THEATRE 351WI Theatre History II

Development of Theatre art, including the physical stage, technical production elements, dramatic literature, and audience behavior from the 18th century to the present.

THEATRE 352 History Of Costuming II

The study of the history of Non-European costume, with emphasis on the social and economic ramifications of costuming through the ages.

THEATRE 352 History Of Costuming II

The study of the history of Non-European costume, with emphasis on the social and economic ramifications of costuming through the ages.

THEATRE 371 Stage Lighting

First half of the course introduces the student to the technical aspects of stage lighting through lectures, laboratory and crew work. Second half of semester involves the student in the fundamentals of design theory and procedure.

THEATRE 373 Master Class In Technology

Class in advanced studies in technology. May be repeated for credit up to eight hours as content and guest artist change. Permission of instructor or head of area required.

THEATRE 378 Stage Management I

A functional analysis of the duties and responsibilities of the stage manager, with particular reference to the organization and conducting of rehearsals and performances, professional practices and union requirements. Requires student to be an assistant to a stage manager on a University or an KC Rep production. The first of a two-semester requirement in stage management for theater majors.

THEATRE 379 Master Class In Design

Class in advanced studies in design. May be repeated for credit up to eight hours as content and guest artist change. Permission of instructor or head of area required. Undergraduate students elect THEATER 379.

THEATRE 380 Theatre Production II

(A,B,C,D) A practicum course in theatre to be taken one hour each of the last four semesters. The student will work in various areas each semester, to be selected from: (1) scenery construction, (2) scene painting, (3) stage crew, (4) wardrobe, (5) properties, (6) lighting, (7) house management, (8) assistant stage management. As advanced theatre majors, each student will be expected to accept crewhead responsibilities and demonstrate proficiency in the areas selected. Prerequisite: THEATER 113. Fall/winter/summer.

THEATRE 395 Speech For The Theatre II

(C,D) Theatre 395 is a continuation of Theatre 295. The objective of these classes is: training in voice and articulation and the techniques of adaptation to the needs of the artist performer in the theatre: exercises to free the voice, develop effective breathing, tone production, articulation, flexibility of vocal production, and projection. Prerequisites: THEATER 295A and THEATER 295B.

THEATRE 400 Special Problems In Theatre

(A-M) Research and/or production projects for advanced upperclass students. No more than three hours with any one instructor. Prerequisite: Consent of instructor. (A) Acting; (B) Children's Theatre; (C) Costumes; (D) Scenic Design; (E) Directing; (F) History; (G) Lighting; (H) Playwriting; (I) Sound; (J) Stage Management; (K) Technical Production (L) Theatre Management; (M) Theory and Criticism.

THEATRE 400A Special Problems In Theatre: Acting

THEATRE 400B Special Problems In Theatre: Design

THEATRE 400C Special Problems In Theatre: Costumes

THEATRE 400CC The Practice and Theory of Creativity - Cluster Course

A team taught multidisciplinary course for undergraduate students that fosters awareness of the nature and power of creativity. One third of the class covers current literature on the creative process. The remainder uses arts as a catalyst for creative individual and group projects that foster communication and remove barriers to creativity. Throughout the course processes are taught which integrate creativity with the discipline necessary to realize the creative objective. Cross-listed with CONSVTY 434CH

THEATRE 400CH Special Problems In Theatre

THEATRE 400D Special Problems In Theatre: Scenic Design

THEATRE 400E Special Problems In Theatre: Directing

THEATRE 400F Special Problems In Theatre: History

THEATRE 400G Special Problems In Theatre: Lighting

THEATRE 400H Special Problems In Theatre: Playwriting

THEATRE 400I Special Problems In Theater: Sound

THEATRE 400J Special Problems In Theatre: Stage Management

THEATRE 400K Special Problems In Theatre: Technical Production

THEATRE 400L Special Problems In Theatre: Theatre Management

THEATRE 400M Special Problems In Theatre: Theory And Criticism

THEATRE 400N Special Problems In Theatre: Dramaturgy

THEATRE 400P Special Problems: Storytelling Art And Technique

THEATRE 400R Special Problems In Theatre

THEATRE 400S Special Topics In Theatre

THEATRE 400T Special Problems In Theatre

THEATRE 400U Special Topics In Theatre

THEATRE 400V Special Problems in Theater

THEATRE 400X Special Problems In Theatre

THEATRE 401CH Cc: The Practice And Study Of Creativity

This cluster course will provide students with a deep understanding of the mechanics value power and challenges of creativity in all aspects of their lives, allowing them to continually adapt themselves to a rapidly changing world and to become outstanding community leaders. The class will foster awareness of the nature and power of students' creativity from three different perspectives: visual arts/art history, theatre/dance, and music composition/performance. This course is cross-listed with CONSVTY 497CH.

THEATRE 403 Theatre Company & Production

This course serves (1) as a weekly company meeting for Theatre majors, (2) an organizing point for production assignments and duties for the semester, and (3) a study of a special topic which will change each semester. Fall and Spring only. Course is repeatable. Required of Majors for every semester they are enrolled. Restricted to Majors and Minors.

THEATRE 403 Theatre Company & Production

This course serves (1) as a weekly company meeting for Theatre majors, (2) an organizing point for production assignments and duties for the semester, and (3) a study of a special topic which will change each semester. Fall and Spring only. Course is repeatable. Required of Majors for every semester they are enrolled. Restricted to Majors and Minors.

THEATRE 415 Beginning Directing

Theory and process of play production, including interpretation, composition, picturization, movement, rhythm, and character interpretation.

THEATRE 418 History of American Musical Theatre

A survey of trends in the American musical theatre from the 18th century to the present. This course includes material on creators and repertory in addition to the discussions of stylistic, analytical, social, aesthetic, and commercial aspects of musical theatre.

THEATRE 418 History of American Musical Theatre

A survey of trends in the American musical theatre from the 18th century to the present. This course includes material on creators and repertory in addition to the discussions of stylistic, analytical, social, aesthetic, and commercial aspects of musical theatre.

THEATRE 425 Advanced Directing

Continuation of work in Theatre 415, with special attention to proscenium, arena, and thrust staging techniques. Prerequisite: THEATER 415 or equivalent experience.

THEATRE 425 Advanced Directing

Continuation of work in Theatre 415, with special attention to proscenium, arena, and thrust staging techniques. Prerequisite: THEATER 415 or equivalent experience.

THEATRE 431 Rendering Techniques For The Theatre Designer I

Introduces the mechanics of handling black and white media to develop three-dimensional technique with an emphasis on observational training and object drawing.

THEATRE 432 Costume Design

The practice of the theatrical costume design, leading to the preparation of designs for production, and the execution of designs in actual costuming for the stage.

THEATRE 432A Costume Design

THEATRE 432B Costume Design

THEATRE 432C Costume Design

THEATRE 432D Costume Design

THEATRE 437 Playwriting I

Theory and practice of writing for the theatre with emphasis on the basic techniques.

THEATRE 438 Playwriting II

Theory and practice of writing for the theatre with emphasis on advanced techniques.

THEATRE 476 Theatre Sound And Electronics

Study of electronic principles used in audio and control devices. Concentrates on applying knowledge to using the equipment employed in the theatre such as sound-effect systems, inter-communication equipment, and includes a special section on the creation of sound and music for theatre productions.

THEATRE 478 Stage Management II

Practicum course in stage management. Requires stage management of a University production and/or assistant stage management of an KC Rep production and/or assistant stage management of a main stage University production. Prerequisite: THEATER 378 or consent of instructor. Fall/ winter/summer.

THEATRE 489 Seminar In Professional Theatre

This course shall be conducted by a visiting artist who is in residence with either Kansas City Repertory Theatre or the academic theatre. Both student work and the work of the visitor shall be analyzed and criticized in this semester. Fall.

THEATRE 489 Seminar In Professional Theatre

This course shall be conducted by a visiting artist who is in residence with either Kansas City Repertory Theatre or the academic theatre. Both student work and the work of the visitor shall be analyzed and criticized in this semester. Fall.

THEATRE 497 Repertory Theatre

Apprentice-level responsibilities for Theatre 497 are as follows: apprentices will be used in as many production areas as possible: (1) as actors in small roles and/or extras or supers; (2) as understudies if possible; (3) as needed in the following departments: (a) properties; (b) carpentry and the shop; (c) lighting; (d) costumes; (e) house management; (f) stage management; (g) running crews. Prerequisite: Selection for apprenticeship by departmental chairman. Each semester.

Urban Planning and Design (UPD)

UPD 101 Introduction To Urban Studies

This lecture and discussion course provides the undergraduate student with an overview of the interdisciplinary field of urban social science. The student who successfully completes this course will have a broad understanding of the major issues, vocabulary, basic methods, and prominent scholars in urban studies. We will also explore current events of relevance, including the opportunities and problems facing major cities in the United States including Kansas City. Also cross listed as URBAN ST 101.

UPD 101 Introduction To Urban Studies

This lecture and discussion course provides the undergraduate student with an overview of the interdisciplinary field of urban social science. The student who successfully completes this course will have a broad understanding of the major issues, vocabulary, basic methods, and prominent scholars in urban studies. We will also explore current events of relevance, including the opportunities and problems facing major cities in the United States including Kansas City. Also cross listed as URBAN ST 101.

UPD 203 GIS For Urban Planning

This introductory level GIS course is designed to expose planning students to Geographical Information Systems (GIS). Students will learn basic concepts and theories of GIS and applications of GIS software with hands-on experience. Students will also learn how to search for demographic, socio-economic, land use, transportation, and geospatial data, and how to use such data for their academic research and professional planning work with GIS. Students will apply GIS to the multiple scales of planning work.

UPD 203 GIS For Urban Planning

This introductory level GIS course is designed to expose planning students to Geographical Information Systems (GIS). Students will learn basic concepts and theories of GIS and applications of GIS software with hands-on experience. Students will also learn how to search for demographic, socio-economic, land use, transportation, and geospatial data, and how to use such data for their academic research and professional planning work with GIS. Students will apply GIS to the multiple scales of planning work.

UPD 260 History Of Planning And Urban Design

An overview of planning history with an emphasis on the 19th and 20th centuries. The historic framework will include urban history, the rise and development of urban planning, urban design, and social theory and how these areas have affected the shape of our cities.

UPD 260 History Of Planning And Urban Design

An overview of planning history with an emphasis on the 19th and 20th centuries. The historic framework will include urban history, the rise and development of urban planning, urban design, and social theory and how these areas have affected the shape of our cities.

UPD 280 Land Use Planning

This course explores the basic principles of plan making, land use development and regulation. Students are introduced to contemporary planning and policy issues. Including land use conflicts and alternative models for sustainable planning, design and management. Students will learn how to develop a land use plan using Geographic Information Systems (GIS) and other design tools. An introductory GIS course (UPD 203) is highly recommended.

UPD 280 Land Use Planning

This course explores the basic principles of plan making, land use development and regulation. Students are introduced to contemporary planning and policy issues. Including land use conflicts and alternative models for sustainable planning, design and management. Students will learn how to develop a land use plan using Geographic Information Systems (GIS) and other design tools. An introductory GIS course (UPD 203) is highly recommended.

UPD 300 Quantitative Planning Methods And Techniques

Statistical analysis and other analytic techniques of data gathering. Data and problems framed from complex, real world situations. Competence in firsthand research; survey design; case study method; data gathering methods such as observation, open-ended interviewing and questionnaires.

UPD 300 Quantitative Planning Methods And Techniques

Statistical analysis and other analytic techniques of data gathering. Data and problems framed from complex, real world situations. Competence in firsthand research; survey design; case study method; data gathering methods such as observation, open-ended interviewing and questionnaires.

UPD 310 Planning And Design Studio I

The urban planning and design studio will introduce to the student a methodology of designing urban spaces. Students will actively participate in problem solving and determine the physical shaping of communities and cities, while developing abilities in graphic methods of communication and Presentation. The application of principles of urban design, social, political, cultural, economic and environmental considerations will help inform solutions. Students will have the opportunity to work interactively with a wide spectrum of professionals, neighborhood leaders, and political entities in developing strategies for solutions to real urban situations. Prerequisite: ENV-DSN 201/202 with a grade of C- or better Restrictions: Consent of Department

UPD 310 Planning And Design Studio I

The urban planning and design studio will introduce to the student a methodology of designing urban spaces. Students will actively participate in problem solving and determine the physical shaping of communities and cities, while developing abilities in graphic methods of communication and Presentation. The application of principles of urban design, social, political, cultural, economic and environmental considerations will help inform solutions. Students will have the opportunity to work interactively with a wide spectrum of professionals, neighborhood leaders, and political entities in developing strategies for solutions to real urban situations. Prerequisite: ENV-DSN 201/202 with a grade of C- or better Restrictions: Consent of Department

UPD 312 Planning And Design Studio II

This course integrates material from Quantitative Planning Methods and Techniques (UPD 300). Instruction in urban planning and design focusing on the synthesis of land use analyses, regulatory reviews, urban design issues, and public participation facilitation. Continued instruction in techniques for visually presenting planning and design ideas. Prerequisite(s) UPD 300, UPD 310 with a grade of C- or better Restrictions: Consent of Department

UPD 312 Planning And Design Studio II

This course integrates material from Quantitative Planning Methods and Techniques (UPD 300). Instruction in urban planning

and design focusing on the synthesis of land use analyses, regulatory reviews, urban design issues, and public participation facilitation. Continued instruction in techniques for visually presenting planning and design ideas. Prerequisite(s) UPD 300, UPD 310 with a grade of C- or better Restrictions: Consent of Department

UPD 320 Planning Theory And Practice

This course examines contemporary urban planning and design practice. Theories about planning practice and related case studies will be the basis of this course. Topics covered will include the definition of urban planning, the idea of the "public realm," planning/design expertise and the rational model, the role of diversity, public participation, communicative planning, advocacy and equity planning, ethics comprehensiveness and the limits of planning. The course will include assignments that will build student's ability to write quick and analytical assessments, often required in planning practice. Students will be required to attend public planning forums in and around the region.

UPD 320 Planning Theory And Practice

This course examines contemporary urban planning and design practice. Theories about planning practice and related case studies will be the basis of this course. Topics covered will include the definition of urban planning, the idea of the "public realm," planning/design expertise and the rational model, the role of diversity, public participation, communicative planning, advocacy and equity planning, ethics comprehensiveness and the limits of planning. The course will include assignments that will build student's ability to write quick and analytical assessments, often required in planning practice. Students will be required to attend public planning forums in and around the region.

UPD 332CZ Environmental Sustainability

This course will introduce the concept of sustainability and review how sustainability might work at the individual, neighborhood, state, nation and global scales. Students will participate in some form of community engagement on sustainability as well as reflect upon how their own practices impact the environment. Counts toward A&S Interdisciplinary "Cluster course." Key course in sustainability minor.

UPD 332CZ Environmental Sustainability

This course will introduce the concept of sustainability and review how sustainability might work at the individual, neighborhood, state, nation and global scales. Students will participate in some form of community engagement on sustainability as well as reflect upon how their own practices impact the environment. Counts toward A&S Interdisciplinary "Cluster course." Key course in sustainability minor.

UPD 340 Neighborhood And Community Development

Course provides a comprehensive introduction to the field of community development and neighborhood planning. The development of theoretical models that explain neighborhood change and history in the U.S. will serve as the basis. Issues explored include: community organizing, social movements, federal and state policies, and the role of planning organizations and community development corporations in neighborhood revitalization.

UPD 340 Neighborhood And Community Development

Course provides a comprehensive introduction to the field of community development and neighborhood planning. The development of theoretical models that explain neighborhood change and history in the U.S. will serve as the basis. Issues explored include: community organizing, social movements, federal and state policies, and the role of planning organizations and community development corporations in neighborhood revitalization.

UPD 400 Advanced GIS For Urban Planning

This advanced level GIS course is designed to expose students to high level GIS techniques and geospatial analyses in urban planning. Students will learn advanced theories and geographic information tools with hands-on experiences. Students will have an opportunity to apply their knowledge and skills in GIS to a real world planning project in class.

UPD 400 Advanced GIS For Urban Planning

This advanced level GIS course is designed to expose students to high level GIS techniques and geospatial analyses in urban planning. Students will learn advanced theories and geographic information tools with hands-on experiences. Students will have an opportunity to apply their knowledge and skills in GIS to a real world planning project in class.

UPD 401 Portfolio and Resume Development

This class focuses on the development of portfolios necessary for professional advancement in the design fields. Students examine the various types of resumes and portfolios that can be used in different employment situations. Students will be exposed to the many design decisions that must be made when developing a resume and portfolio. Offered Spring

UPD 401 Portfolio and Resume Development

This class focuses on the development of portfolios necessary for professional advancement in the design fields. Students examine the various types of resumes and portfolios that can be used in different employment situations. Students will be

exposed to the many design decisions that must be made when developing a resume and portfolio. Offered Spring

UPD 403 GIS for Urban Planning

The introductory level GIS course is designed to expose graduate students to Geographical Information Systems (GIS). Students will learn basic concepts and theories of GIS and application of GIS software with hands-on experience. Students will also learn how to search for demographic, socio-economic, land use, transportation, and geospatial data.

UPD 410 Planning And Design Studio III

Instruction in problem analysis and plan development for defined urban or suburban location with multiple constituencies. Prerequisites: UPD 312 and not more than one grade of D in a UPD studio course. Restrictions: UPD 312 with a grade of C- or better. Restrictions: Consent of the department

UPD 410 Planning And Design Studio III

Instruction in problem analysis and plan development for defined urban or suburban location with multiple constituencies. Prerequisites: UPD 312 and not more than one grade of D in a UPD studio course. Restrictions: UPD 312 with a grade of C- or better. Restrictions: Consent of the department

UPD 411 Professional Practice I

This course prepares students for professional practice in planning and design. Issues to be addressed in the seminar include mediation, public meeting facilitation methods and presentation skills. Students engage in writing assignments addressing urban plans and designs concurrent with their work in Planning and Design Studio III (UPD 410). Prerequisite: Concurrent enrollment with UPD 410. Restrictions: Consent of the department

UPD 411 Professional Practice I

This course prepares students for professional practice in planning and design. Issues to be addressed in the seminar include mediation, public meeting facilitation methods and presentation skills. Students engage in writing assignments addressing urban plans and designs concurrent with their work in Planning and Design Studio III (UPD 410). Prerequisite: Concurrent enrollment with UPD 410. Restrictions: Consent of the department

UPD 412WI Planning And Design Studio IV

Capstone course that incorporates a topical plan or a comprehensive plan for a client comprising a development subdivision, a community or a redevelopment area. Prerequisites: UPD 410 with a grade of C- or better; Must have passed the WEPT Restrictions: Consent of the department

UPD 412WI Planning And Design Studio IV

Capstone course that incorporates a topical plan or a comprehensive plan for a client comprising a development subdivision, a community or a redevelopment area. Prerequisites: UPD 410 with a grade of C- or better; Must have passed the WEPT Restrictions: Consent of the department

UPD 413 Professional Practice II

A continuation of professional practice seminar addressing issues of Urban Planning and Design practice including different career options in the public, private, and the nonprofit sectors. The course will chart a path of successful post graduation professional development. Restrictions: Concurrent enrollment in UPD 412WI. Restrictions: Consent of the department

UPD 413 Professional Practice II

A continuation of professional practice seminar addressing issues of Urban Planning and Design practice including different career options in the public, private, and the nonprofit sectors. The course will chart a path of successful post graduation professional development. Restrictions: Concurrent enrollment in UPD 412WI. Restrictions: Consent of the department

UPD 420 Transportation Planning

The course provides fundamental theories, methods, and contemporary issues in transportation planning. The topics covered in this course include the transportation planning process, transportation systems, travel demand analysis, and policy issues such as the linkage between land use and transportation, urban transportation finance, social and environmental justice, transportation and environmental impacts, and traffic congestion.

UPD 420 Transportation Planning

The course provides fundamental theories, methods, and contemporary issues in transportation planning. The topics covered in this course include the transportation planning process, transportation systems, travel demand analysis, and policy issues such as the linkage between land use and transportation, urban transportation finance, social and environmental justice, transportation and environmental impacts, and traffic congestion.

UPD 430 Planning For Historic Preservation

The course provides a survey of major issues in the field of historic preservation and heritage studies from a planning perspective. Will focus primarily on the built environment of the United States, as well as world heritage sites and international perspectives. The course will include the urban planning techniques used for preserving historic buildings, neighborhood and districts, as well as some of the landmark legal decisions and legislation that have shaped heritage preservation practice in the U.S. Prerequisite: UPD 260 recommended

UPD 430 Planning For Historic Preservation

The course provides a survey of major issues in the field of historic preservation and heritage studies from a planning perspective. Will focus primarily on the built environment of the United States, as well as world heritage sites and international perspectives. The course will include the urban planning techniques used for preserving historic buildings, neighborhood and districts, as well as some of the landmark legal decisions and legislation that have shaped heritage preservation practice in the U.S. Prerequisite: UPD 260 recommended

UPD 432 Urban Environment Planning And Design

The built environment does not exist in a vacuum. Cities operate within broad ecological processes. Effective environmental planning can protect important natural resources while providing for a higher quality of life for urban residents. As a survey course in a subfield of urban planning, this course introduces students to environment planning approaches and techniques. Prerequisites: UPD Urban Planning Theory and Practice recommended. Offered: Spring

UPD 432 Urban Environment Planning And Design

The built environment does not exist in a vacuum. Cities operate within broad ecological processes. Effective environmental planning can protect important natural resources while providing for a higher quality of life for urban residents. As a survey course in a subfield of urban planning, this course introduces students to environment planning approaches and techniques. Prerequisites: UPD Urban Planning Theory and Practice recommended. Offered: Spring

UPD 440 New Urbanism

This course will focus on all the components of the New Urbanism-from the region to the block and the building. It will give a detailed analysis of the history and techniques of NU, and the current state of the practice. The course will be a combination of lecture and field work, as students will be asked to participate in exercises that will deepen their understanding of the built environment.

UPD 450 Planning Law And Practice

Introduction to legal procedures basic to urban planning; including legal, constitutional, legislative, and administrative concepts, controls, and land-use regulations.

UPD 450 Planning Law And Practice

Introduction to legal procedures basic to urban planning; including legal, constitutional, legislative, and administrative concepts, controls, and land-use regulations.

UPD 460CC CC: Queer in the City: An introduction to Lesbian and Gay Studies

This course introduces queer theory within the context of gender studies and urban studies. We will read, discuss, and react to classic text in queer theory, lesbian and gay studies, and sexuality and space studies. There will be an emphasis on finding ""otherness"" within everyday spaces, places, texts, and discourses.

UPD 472 Urban Redevelopment

Contemporary issues of urban redevelopment, with an emphasis on American cities, will be examined. Redevelopment processes recently completed or underway in the greater Kansas City region will be the subject of a case study and a theoretical review by each student.

UPD 472 Urban Redevelopment

Contemporary issues of urban redevelopment, with an emphasis on American cities, will be examined. Redevelopment processes recently completed or underway in the greater Kansas City region will be the subject of a case study and a theoretical review by each student.

UPD 490 Urban Planning Internship

Urban planning work experience off-campus with an approved professional, Government, or non-profit agency sponsor. A contract specifying the expected product of the internship is required between the student, agency, and faculty coordinator. Prerequisites: UPD 203, UPD 300 Restrictions: Consent of the Department.

UPD 490 Urban Planning Internship

Urban planning work experience off-campus with an approved professional, Government, or non-profit agency sponsor. A

contract specifying the expected product of the internship is required between the student, agency, and faculty coordinator. Prerequisites: UPD 203, UPD 300 Restrictions: Consent of the Department.

UPD 496 Directed Studies In Urban Planning

Intensive reading and/or research in an area selected by the student in consultation with the instructor. Restrictions: Consent of the department

UPD 496 Directed Studies In Urban Planning

Intensive reading and/or research in an area selected by the student in consultation with the instructor. Restrictions: Consent of the department

UPD 499 Special Topics In Urban Planning

Advanced independent research and analysis in urban planning. Topics and methods used in research, to be established by student and academic supervisor prior to enrollment.

UPD 499 Special Topics In Urban Planning

Advanced independent research and analysis in urban planning. Topics and methods used in research, to be established by student and academic supervisor prior to enrollment.

UPD 499C Special Topics In Urban Planning

Advanced independent research and analysis in urban planning. Topics and methods used in research, to be established by student and academic supervisor prior to enrollment. Offered: Every semester Restrictions: Permission of instructor

UPD 499D Special Topics In Urban Planning

Advanced independent research and analysis in urban planning. Topics and methods used in research, to be established by student and academic supervisor prior to enrollment. Offered: Every semester Restrictions: Permission of instructor

UPD 499E Special Topics In Urban Planning

Advanced independent research and analysis in urban planning. Topics and methods used in research, to be established by student and academic supervisor prior to enrollment. Offered: Every semester Restrictions: Permission of instructor

UPD 499F Special Topics In Urban Planning

Advanced independent research and analysis in urban planning. Topics and methods used in research, to be established by student and academic supervisor prior to enrollment. Offered: Every semester Restrictions: Permission of instructor

Urban Studies (URBAN-ST)

URBAN ST 100 Neighborhood And Community Development

Course provides a comprehensive introduction to the field of community development and neighborhood planning. The development of theoretical models that explain neighborhood change and history in the United States will serve as the basis. Issues explored include: Community organizing, social movements, federal and state policies, and the role of planning organizations and community development corporations in neighborhood revitalization. Also cross listed as UPD 340

URBAN ST 100 Neighborhood And Community Development

Course provides a comprehensive introduction to the field of community development and neighborhood planning. The development of theoretical models that explain neighborhood change and history in the United States will serve as the basis. Issues explored include: Community organizing, social movements, federal and state policies, and the role of planning organizations and community development corporations in neighborhood revitalization. Also cross listed as UPD 340

URBAN ST 101 Introduction To Urban Studies

Introduction to Urban Studies is a lecture and discussion course that provides the undergraduate student with an overview of the interdisciplinary field of urban social science. The Student who successfully completes this course will have a broad understanding of the major issues, vocabulary, basic methods, and prominent scholars in urban studies. We will also explore current events of relevance, including the opportunities and problems facing major cities in the United States including Kansas City. Also cross listed as UPD 101.

URBAN ST 101 Introduction To Urban Studies

Introduction to Urban Studies is a lecture and discussion course that provides the undergraduate student with an overview of the interdisciplinary field of urban social science. The Student who successfully completes this course will have a broad understanding of the major issues, vocabulary, basic methods, and prominent scholars in urban studies. We will also explore current events of relevance, including the opportunities and problems facing major cities in the United States including Kansas

City. Also cross listed as UPD 101.

URBAN ST 340 Neighborhood and Community Development

Course provides a comprehensive introduction to the field of community development and neighborhood planning. The development of theoretical models that explain neighborhood change and history in the U.S. will serve as the basis. Issues explored include: community organizing, social movements, federal and state policies, and the role of planning organizations and community development corporations in neighborhood revitalization. Prerequisite: none

URBAN ST 340 Neighborhood and Community Development

Course provides a comprehensive introduction to the field of community development and neighborhood planning. The development of theoretical models that explain neighborhood change and history in the U.S. will serve as the basis. Issues explored include: community organizing, social movements, federal and state policies, and the role of planning organizations and community development corporations in neighborhood revitalization. Prerequisite: none

URBAN ST 460CC CC: Queer in the City: An Introduction to Lesbian and Gay Studies

This course introduces queer theory within the context of gender studies and urban studies. We will read, discuss, and react to classic text in queer theory, lesbian and gay studies, and sexuality and space studies. There will be an emphasis on finding "otherness" within everyday spaces, places, texts, and discourses.

URBAN ST 495 Urban Studies Internship

Students obtain directed practical experience working with non-profits, governments, or private enterprises. Duties will vary based on contractual agreement between the student, host organization, and the professor. Students should have junior standing or higher and the instructor's permission. Prerequisite: Permission of the instructor. Offered: Summer, Fall, or Winter as available

URBAN ST 499WI Urban Studies Seminar

This is the capstone course in the Urban Studies Program and is required for majors in the junior/senior year. Students critique urban research and prepare a paper and an oral presentation on an approved topic.

URBAN ST 499WI Urban Studies Seminar

This is the capstone course in the Urban Studies Program and is required for majors in the junior/senior year. Students critique urban research and prepare a paper and an oral presentation on an approved topic.

Women's and Gender Studies (WGS)

WGS 201 Introduction To Women's & Gender Studies

This class provides an introduction to the interdisciplinary field of women's and gender studies. The focus of this course will be the many ways gender is integral to our understanding of our world and the communities in which we live.

WGS 301 Introduction to Feminist Theory

This course covers a wide variety of feminist theories and theoretical perspectives, primarily since the 1960s, and is devoted to understanding and evaluating this body of work and the insights and possibilities for change that it suggests. Prerequisite: WGS 201 or permission of the instructor.

WGS 405 Special Topics In Women's And Gender Studies

Each time this course is offered a different area of Women's and Gender Studies will be covered. This course may be repeated for credit when the topic changes. Offered: Every Semester

WGS 405 Special Topics In Women's And Gender Studies

Each time this course is offered a different area of Women's and Gender Studies will be covered. This course may be repeated for credit when the topic changes. Offered: Every Semester

WGS 460CC CC: Queer in the City: An introduction to Lesbian and Gay Studies

This course introduces queer theory within the context of gender studies and urban studies. We will read, discuss, and react to classic text in queer theory, lesbian and gay studies, and sexuality and space studies. There will be an emphasis on finding "otherness" within everyday spaces, places, texts, and discourses.

WGS 484 Women's & Gender Studies Internship

The Women's Studies Internship Program is an opportunity for undergraduate students to gain on-site experience. Students will receive 1-4 hours of academic credit while learning and working in off- or on-campus placements. Students will engage in the ongoing feminist effort to integrate research with social activism as they apply academic knowledge to their work experience and consider how practical experience informs or alters theory. Internship experiences may take place on or off-campus, such as at the UMKC Women's Center or a local battered women's shelter. The Women's Center Director serves as coordinator for all

internship experiences. Prerequisite: WGS 201 or permission of instructor. Restriction: Student must receive approval of advising professor in semester prior to enrollment.

WGS 499 Women's And Gender Studies: Senior Seminar

This capstone course focuses on research leading to a term paper on a Women's and Gender Studies Topic. Offered: Every semester

World Literature (WLD-LIT)

WLD-LIT 210 Foundations Of World Literature I

This course studies ancient world literature such as The Descent of Inanna, Egyptian love poetry, Hebrew Scriptures, the epics of Homer and Virgil, the Analects of Confucius, and the Oriental wisdom of Laozi. The course also considers ancient creation epics such as the cosmic battle between Marduk and Tiamat, the Metamorphosis of Ovid, and the great Indian epic The Ramayana. Also listed as CLASSICS 210.

WLD-LIT 210 Foundations Of World Literature I

This course studies ancient world literature such as The Descent of Inanna, Egyptian love poetry, Hebrew Scriptures, the epics of Homer and Virgil, the Analects of Confucius, and the Oriental wisdom of Laozi. The course also considers ancient creation epics such as the cosmic battle between Marduk and Tiamat, the Metamorphosis of Ovid, and the great Indian epic The Ramayana. Also listed as CLASSICS 210.

School of Biological Sciences

School of Biological Sciences Undergraduate Courses

Biology (BIOLOGY)

BIOLOGY 102 Biology And Living

Introduction to structural organization and functional processes of living systems. Three hours lecture a week. For non-biology majors only. Does not count toward biology degree.

BIOLOGY 102L Biology And Living Laboratory

Exploration of basic biological concepts through laboratory activities requiring data collection and analysis. Four hours laboratory per week. For non-majors only; does not count toward Biology degree requirements. Prerequisite: BIOLOGY 102 or concurrent.

BIOLOGY 108 General Biology I

Fundamental studies in biology emphasizing the unity and diversity of life. Topics include the basic chemistry of biological processes, cell types and organelles, energy harvesting and energy producing pathways, cell and life cycles, genetics, DNA structure, genes, transcription, translation, natural selection, population genetics, speciation, and phylogenetic analysis. Prerequisites: High School Biology and Chemistry background highly recommended.

BIOLOGY 108 General Biology I

Fundamental studies in biology emphasizing the unity and diversity of life. Topics include the basic chemistry of biological processes, cell types and organelles, energy harvesting and energy producing pathways, cell and life cycles, genetics, DNA structure, genes, transcription, translation, natural selection, population genetics, speciation, and phylogenetic analysis. Prerequisites: High School Biology and Chemistry background highly recommended.

BIOLOGY 108 General Biology I

Fundamental studies in biology emphasizing the unity and diversity of life. Topics include the basic chemistry of biological processes, cell types and organelles, energy harvesting and energy producing pathways, cell and life cycles, genetics, DNA structure, genes, transcription, translation, natural selection, population genetics, speciation, and phylogenetic analysis. Prerequisites: High School Biology and Chemistry background highly recommended.

BIOLOGY 108L General Biology I Laboratory

Basic laboratory studies in Biology emphasizing the unity and diversity of life. Structure, function, heredity, development, ecology and evolution will be explored. Three hours laboratory per week. Prerequisites or corequisite: BIOLOGY 108

BIOLOGY 109 General Biology II

Fundamental studies in biology emphasizing the unity and diversity of life. Topics include prokaryotes, fungi, invertebrate-vertebrate zoology and phylogeny, human evolution, plant structure and development, animal development and physiology, ecology (population and ecosystems). Prerequisite(s) High School Biology and Chemistry background highly recommended.

BIOLOGY 109 General Biology II

Fundamental studies in biology emphasizing the unity and diversity of life. Topics include prokaryotes, fungi, invertebrate-vertebrate zoology and phylogeny, human evolution, plant structure and development, animal development and physiology, ecology (population and ecosystems). Prerequisite(s) High School Biology and Chemistry background highly recommended.

BIOLOGY 109 General Biology II

Fundamental studies in biology emphasizing the unity and diversity of life. Topics include prokaryotes, fungi, invertebrate-vertebrate zoology and phylogeny, human evolution, plant structure and development, animal development and physiology, ecology (population and ecosystems). Prerequisite(s) High School Biology and Chemistry background highly recommended.

BIOLOGY 109L General Biology II Laboratory

Basic laboratory studies in Biology emphasizing the unity and diversity of life. Structure, function, heredity, development, regulation of growth and evolution will be explored. Three hours laboratory per week. Prerequisites or corequisite: BIOLOGY 109

BIOLOGY 115 First Year Seminar

This course is designed to provide students with the skills necessary to achieve success at the university. The curriculum includes time management, study, reading, note-taking and test-taking strategies, health and wellness, and student support services. Additional emphasis will include career exploration, including professionalism, writing a resume, and developing plan of study for degree completion. Offered: Fall

BIOLOGY 115 First Year Seminar

This course is designed to provide students with the skills necessary to achieve success at the university. The curriculum includes time management, study, reading, note-taking and test-taking strategies, health and wellness, and student support services. Additional emphasis will include career exploration, including professionalism, writing a resume, and developing plan of study for degree completion. Offered: Fall

BIOLOGY 202 Cell Biology

Basic concepts of cellular and subcellular structure and function, including supramolecular and organelle structure and organization, bioenergetics, cell growth and cellular communication. Three lectures per week. Prerequisites: BIOLOGY 108, BIOLOGY 109, and CHEM 212R, or LS-ANATO 119/119L, LS-MCRB 121 and CHEM 212R, OR consent of SBS advisor.

BIOLOGY 203 Essential Cell Biology

Foundations of cellular functions. Serves as a bridge between biochemistry and cell and organ physiology for dental students. Applications of fundamental principles to the physiology and pathology of the oral tissues will be stressed.

BIOLOGY 203 Essential Cell Biology

Foundations of cellular functions. Serves as a bridge between biochemistry and cell and organ physiology for dental students. Applications of fundamental principles to the physiology and pathology of the oral tissues will be stressed.

BIOLOGY 206 Genetics

A modern approach integrating molecular and organismal studies of the general genetics of lower and higher organisms. Chromosomal structure and function, gene transmission, heredity, plasticity and population genetics will be discussed. Three hours lecture per week. Prerequisites: BIOLOGY 108, BIOLOGY 109, CHEM 212R.

BIOLOGY 302 General Ecology

Introduction to the study of populations, communities, and ecosystems by examining the interrelationships between living organisms and their environments. The role of natural selection and evolution will also be considered. Three hours lecture per week. Prerequisites: BIOLOGY 108, BIOLOGY 109, or BIOLOGY 102.

BIOLOGY 302 General Ecology

Introduction to the study of populations, communities, and ecosystems by examining the interrelationships between living organisms and their environments. The role of natural selection and evolution will also be considered. Three hours lecture per week. Prerequisites: BIOLOGY 108, BIOLOGY 109, or BIOLOGY 102.

BIOLOGY 302L Ecology Laboratory

This course provides laboratory and field experience in ecology. The course will cover topics including statistical analysis and

data presentation, terrestrial and aquatic sampling, experimental design and scientific writing. Offered Spring only. Prerequisite: Biology 302 (corequisite).

BIOLOGY 303 Invertebrate Zoology

Taxonomy, evolutionary relationships, behavior, reproduction, morphology and ecology of the invertebrates. Three hours lecture a week. Prerequisites: BIOLOGY 108 & BIOLOGY 109, CHEM 212R.

BIOLOGY 303 Invertebrate Zoology

Taxonomy, evolutionary relationships, behavior, reproduction, morphology and ecology of the invertebrates. Three hours lecture a week. Prerequisites: BIOLOGY 108 & BIOLOGY 109, CHEM 212R.

BIOLOGY 305 Marine And Freshwater Biology

Introduction to the study of marine ecology, deep-sea biology, oceanic nekton, inter-tidal ecology, estuaries, mangroves and salt marshes, as well as ecology of rivers, lakes, streams, wetlands and human impact on aquatic habitats. Three hours lecture per week. Prerequisites: BIOLOGY 108 & BIOLOGY 109, CHEM 211.

BIOLOGY 305 Marine And Freshwater Biology

Introduction to the study of marine ecology, deep-sea biology, oceanic nekton, inter-tidal ecology, estuaries, mangroves and salt marshes, as well as ecology of rivers, lakes, streams, wetlands and human impact on aquatic habitats. Three hours lecture per week. Prerequisites: BIOLOGY 108 & BIOLOGY 109, CHEM 211.

BIOLOGY 308 Vertebrate Zoology

Taxonomy, evolutionary relationships, behavior, reproduction, morphology and ecology of the vertebrates. Three hours lecture a week. Prerequisites: BIOLOGY 108 & BIOLOGY 109, CHEM 212R.

BIOLOGY 308 Vertebrate Zoology

Taxonomy, evolutionary relationships, behavior, reproduction, morphology and ecology of the vertebrates. Three hours lecture a week. Prerequisites: BIOLOGY 108 & BIOLOGY 109, CHEM 212R.

BIOLOGY 312WL Laboratory In Developmental Biology, Genetics And Cell Biology

Experimental studies of genetics and development in selected eukaryotic model organisms with an emphasis on the molecular and cellular mechanism of inheritance. Six hours lab and one hour lecture per week. Designation: Writing Intensive. Prerequisites: LS-BIOC 341, BIOLOGY 409 corequisite.

BIOLOGY 314 Entomology

Anatomy, physiology and identification of insects with emphasis on their environmental adaptations. Three hours lecture per week. Prerequisite: BIOLOGY 109 or LS-ANATO 119.

BIOLOGY 319 Global Health: New and Emerging Infectious Diseases

This course will discuss infectious diseases that are newly identified, or increasing in prevalence throughout the world. Several aspects of each disease will be discussed, including transmission, symptoms, treatment, prevention, and diagnosis. The course is meant for students interested in a health-related career (medicine, dental, pharmacy, public health), but other students with a basic biology background are welcome. The course is offered in spring semesters only. Prerequisites: Biology 108/109 or Biology 102.

BIOLOGY 319 Global Health: New and Emerging Infectious Diseases

This course will discuss infectious diseases that are newly identified, or increasing in prevalence throughout the world. Several aspects of each disease will be discussed, including transmission, symptoms, treatment, prevention, and diagnosis. The course is meant for students interested in a health-related career (medicine, dental, pharmacy, public health), but other students with a basic biology background are welcome. The course is offered in spring semesters only. Prerequisites: Biology 108/109 or Biology 102.

BIOLOGY 322 General Parasitology

Parasitic protists, worms and arthropods and the disease states they may induce, will be examined in relationship to human, animal and plants hosts. Three hours lecture per week. Prerequisite(s): BIOLOGY 109 OR LS-ANATO 119. Offered: Summer

BIOLOGY 326 Biological Conservation

Applications of ecology and genetics to the conservation of communities and individual species, including discussion of the Endangered Species Act extinction processes, and the effects of habitat fragmentation. Prerequisites: BIOLOGY 302 recommended: BIOLOGY 108 & BIOLOGY 109 required

BIOLOGY 327 Biogeography And Biodiversity

Evolutionary and climatological effects on the geographic distribution of organisms, including areas of endemism as well as

preservation of biodiversity. Prerequisite(s): BIOLOGY 108 & BIOLOGY 109. Offered: Summer

BIOLOGY 328 Histology

Animal tissues and their specialization in the organism, with major emphasis on higher organisms. Two hours lecture per week. Prerequisite(s): BIOL 109 or BIOLOGY 118, BIOLOGY 202, CHEM 212R.

BIOLOGY 328 Histology

Animal tissues and their specialization in the organism, with major emphasis on higher organisms. Two hours lecture per week. Prerequisite(s): BIOL 109 or BIOLOGY 118, BIOLOGY 202, CHEM 212R.

BIOLOGY 328L Laboratory In Histology And Cellular Ultrastructure

Examination of structure/function relationships at the subcellular, cellular and organ levels. Both plants and animals will be examined with emphasis on vertebrates. Five hours lab per week. Prerequisite: BIOL 202, CHEM 212R, (corequisite) BIOL 328, consent of SBS Adviser. Offered: Winter

BIOLOGY 328L Laboratory In Histology And Cellular Ultrastructure

Examination of structure/function relationships at the subcellular, cellular and organ levels. Both plants and animals will be examined with emphasis on vertebrates. Five hours lab per week. Prerequisite: BIOL 202, CHEM 212R, (corequisite) BIOL 328, consent of SBS Adviser. Offered: Winter

BIOLOGY 328WL Laboratory In Histology And Cellular Ultrastructure

Examination of structure/function relationships at the subcellular, cellular and organ levels. Both plants and animals will be examined with emphasis on vertebrates. Five hours lab per week. Designation: Writing Intensive. Prerequisites: BIOLOGY 202, CHEM 212R, (co-requisite) BIOLOGY 328, consent of SBS advisor.

BIOLOGY 329 Endocrinology

Endocrine regulation and control of growth, development, homeostasis, and reproduction. Includes study of the endocrine organs, their products, and mechanisms of action. Two hours of lecture per week. Prerequisite: BIOLOGY 202 (Physiology background recommended.)

BIOLOGY 331 Reproductive Biology

Comprehensive overview of current concepts and knowledge regarding male and female reproductive processes, from gametogenesis through early placentalation. Includes structural, developmental, physiological and pathophysiological aspects of reproduction. Two hours of lecture per week. Prerequisite: Recommended LS-ANATO 118, LS-ANATO 119, LS-PHYS 117, LS-PHYS 316, BIOLOGY 202 and/or BIOLOGY 329. Offered: Summer

BIOLOGY 344 Bioorganic Structure And Biomolecular Function

An introduction to chemical and physical properties of complex biological macromolecules and their functions in living cells. Nomenclature, functional groups, reactions and stereochemistry are among the topics to be emphasized. Prerequisites: BIOLOGY 109 and CHEM 320, CHEM 322R. Offered (semester): Winter.

BIOLOGY 346 Plant Biology

An integrated study of growth, development, and reproduction of plants, including structure and function of plant tissues and organs, as well as a survey of the recent advances in genetic engineering, plant defense mechanisms, and medical botany and the usefulness of plants to humans. Three hours lecture per week. Prerequisites or corequisite: BIOLOGY 202

BIOLOGY 346 Plant Biology

An integrated study of growth, development, and reproduction of plants, including structure and function of plant tissues and organs, as well as a survey of the recent advances in genetic engineering, plant defense mechanisms, and medical botany and the usefulness of plants to humans. Three hours lecture per week. Prerequisites or corequisite: BIOLOGY 202

BIOLOGY 405 Introduction To Evolution

Discussion of the biological processes that produce organic diversity through phyletic change, including variation, mutation, adaptation, population genetics, natural selection, genetic drift, gene flow, and macroevolution. Prerequisite: BIOLOGY 206.

BIOLOGY 409 Developmental Biology

Principles of development and differentiation of structure during embryology in animals. Molecular, cellular and organismal level concepts and mechanisms will be considered. Three hours lecture per week. Prerequisites: BIOLOGY 202, BIOLOGY 206.

BIOLOGY 409 Developmental Biology

Principles of development and differentiation of structure during embryology in animals. Molecular, cellular and organismal

level concepts and mechanisms will be considered. Three hours lecture per week. Prerequisites: BIOLOGY 202, BIOLOGY 206.

BIOLOGY 427 Plant Physiology

A study of the biochemical and physical processes involved in plant function at the molecular and cellular level and the mechanisms by which plants respond to environmental challenges. Three hours lecture per week. Prerequisites: BIOLOGY 202, BIOLOGY 206 AND LS-BIOC 341

BIOLOGY 427 Plant Physiology

A study of the biochemical and physical processes involved in plant function at the molecular and cellular level and the mechanisms by which plants respond to environmental challenges. Three hours lecture per week. Prerequisites: BIOLOGY 202, BIOLOGY 206 AND LS-BIOC 341

BIOLOGY 442 Neurobiology

Neurobiology will consist of the presentation of theory and data concerning cellular and molecular fundamentals of the nervous system, synaptic mechanisms, sensory-motor systems, and higher-order functions of the nervous system. Three hours lecture per week. Prerequisite: LS-PHYS 316, LS-BIOC 341, or permission of instructor.

BIOLOGY 442 Neurobiology

Neurobiology will consist of the presentation of theory and data concerning cellular and molecular fundamentals of the nervous system, synaptic mechanisms, sensory-motor systems, and higher-order functions of the nervous system. Three hours lecture per week. Prerequisite: LS-PHYS 316, LS-BIOC 341, or permission of instructor.

BIOLOGY 498WI Critical Analysis Of Biological Issues

Reading and Analysis of scientific literature, including original papers, on a topic of broad biological interest. Critical discussion of experimental methods and results. Writing of scientific reviews and a term paper. Taking the MFAT test is a requirement of this course, and the course satisfies the general education synthesis requirement. Three hours per week of lecture and literature research. Prerequisite(s): Chem 320 or CHEM 322R, completion of core requirements, consent of SBS adviser. Designation: Writing Intensive.

BIOLOGY 498WI Critical Analysis Of Biological Issues

Reading and Analysis of scientific literature, including original papers, on a topic of broad biological interest. Critical discussion of experimental methods and results. Writing of scientific reviews and a term paper. Taking the MFAT test is a requirement of this course, and the course satisfies the general education synthesis requirement. Three hours per week of lecture and literature research. Prerequisite(s): Chem 320 or CHEM 322R, completion of core requirements, consent of SBS adviser. Designation: Writing Intensive.

Life Science (LIFE-SCI)

LIFE-SCI 399 Introduction To Research

Introduction to the theory and practice of research in modern biological sciences. Consent of full-time regular SBS doctoral faculty member and undergraduate programs office required. Requires minimum of 3-4 hours per week in the laboratory for each credit hour. Prerequisites: BIOLOGY 108, BIOLOGY 109, CHEM 212R, 3.0 Science GPA. Semester offered: Every semester

LIFE-SCI 401 Biophysical Principles

Fundamental biophysical concepts and their application to the study of biological molecules, particularly macromolecules and supramolecular structures. Includes discussion of thermodynamics, kinetics, and spectroscopy. Prerequisites: PHYSICS 240 OR PHYSICS 210, MATH 210 AND LS-BIOC 341 Offered: Fall Semesters

LIFE-SCI 438 Molecular Recognition In Cellular Biology

Studies the latest development leading to an increased understanding of cellular biology processes when the experimental tools of structural biology analysis and molecular genetics are applied. Prerequisites: BIOLOGY 108 & BIOLOGY 109, LS-BIOC 341, BIOLOGY 202 & BIOLOGY 206. Offered: Fall

LIFE-SCI 490WI Senior Seminar

Discussion, writing and specific readings to coordinate with and amplify topics covered in School of Biological Sciences seminars; must include a term paper on a specific topic. Designation: Writing Intensive. Prerequisite(s): Completion of core requirements, consent of SBS adviser.

LIFE-SCI 497A Special Topics-Bioinformatics

Individual or small group study of topics in the area of bioinformatics including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements. Prerequisite(s) Completion of Biology degree core requirements; a minimum

GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Advisor.

LIFE-SCI 497B Special Topics-Genetics

Individual or small group study of topics in the area of genetics including class room work, presentation, library work, and writing of term papers or other reports. Prerequisite: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member, and permission from a School of Biological Sciences Undergraduate Advisor. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

LIFE-SCI 497BB Special Topics: Behavioral Biology

LIFE-SCI 497C Special Topics-Microbiology

Individual or small group study of topics in the area of microbiology including class room work, presentation, library work, and writing of term papers or other reports. Prerequisite: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Advisor. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

LIFE-SCI 497D Special Topics-Physiology

Individual or small group study of topics in the area of physiology including class room work, presentation, library work, and writing of term papers or other reports. Prerequisite: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Advisor. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

LIFE-SCI 497E Special Topics - Biochemistry

Individual or small group study of topics in the area of biochemistry including class room work, presentation, library work, and writing of term papers or other reports. Prerequisite: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Advisor. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

LIFE-SCI 497F Special Topics - Biophysics

Individual or small group study of topics in the area of biophysics including class room work, presentation, library work, and writing of term papers or other reports. Prerequisite: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Advisor. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

LIFE-SCI 497G Special Topics-Cell Biology

Individual or small group study of topics in the area of cell biology including class room work, presentation, library work, and writing of term papers or other reports. Prerequisite: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Advisor. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

LIFE-SCI 497H Special Topics: Neuroscience

Individual or small group study of topics in the area of neuroscience including class room work, presentation, library work, and writing of term papers or other reports. Prerequisites: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Advisor. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

LIFE-SCI 497I Special Topics-Botany

Individual or small group study of topics in the area of botany including class room work, presentation, library work, and writing of term papers or other reports. Prerequisites: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Advisor. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

LIFE-SCI 497J Special Topics-Zoology

Individual or small group study of topics in the area of zoology including class room work, presentation, library work, and writing of term papers or other reports. Prerequisites: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

LIFE-SCI 497K Special Topics-Ecology

Individual or small group study of topics in the area of ecology including class room work, presentation, library work, and writing of term papers or other reports. Prerequisites: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

LIFE-SCI 497L Special Topics-Biological Sciences

Individual or small group study of topics in the area of biological sciences including class room work, presentation, library work, and writing of term papers or other reports. Prerequisites: Completion of Biology degree core requirements, a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements.

LIFE-SCI 497P Special Topics-Biotechnology

Individual or small group study of topics in the area of biotechnology including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours towards Biology course degree requirements. Prerequisite(s): Completion of Biology degree core requirements; a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser. Offered: Fall, Winter, Summer

LIFE-SCI 499A Undergraduate Research-Bioinformatics

Independent research, including the writing of research reports in the area of bioinformatics. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements. Prerequisite(s) Completion of Biology degree core requirements a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser.

LIFE-SCI 499B Undergraduate Research-Genetics

Independent research, including the writing of research reports in the area of genetics. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0; consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

LIFE-SCI 499C Undergraduate Research-Microbiology

Independent research, including the writing of research reports in the area of microbiology. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0; consent of faculty member; permission from a School of Biological Sciences Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

LIFE-SCI 499D Undergraduate Research-Physiology

Independent research, including the writing of research reports in the area of physiology. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0; consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

LIFE-SCI 499E Undergraduate Research-Biochemistry

Independent research, including the writing of research reports in the area of biochemistry. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0; consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LS 497 and 499 may not exceed 4 credit hours towards biology course degree requirements.

LIFE-SCI 499F Undergraduate Research- Biophysics

Independent research, including the writing of research reports in the area of biophysics. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0; consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology

course degree requirements.

LIFE-SCI 499G Undergraduate Research-Cell Biology

Independent research, including the writing of research reports in the area of cell biology. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0; consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

LIFE-SCI 499H Undergraduate Research-Neuroscience

Independent research, including writing of research reports in the area of neuroscience. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0; consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

LIFE-SCI 499I Undergraduate Research-Botany

Independent research, including the writing of research reports in the area of botany. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0, consent of faculty member; permission from a school of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

LIFE-SCI 499J Undergraduate Research-Zoology

Independent research, including the writing of research reports in the area of zoology. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0, consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

LIFE-SCI 499K Undergraduate Research-Ecology

Independent research, including the writing of research reports in the area of ecology. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0, consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

LIFE-SCI 499L Undergraduate Research-Biological Sciences

Independent research, including the writing of research reports in the area of biological sciences. Prerequisites: Completion of Biology degree core requirements, minimum GPA of 3.0; consent of faculty member; permission from a School of Biological Sciences Undergraduate Adviser. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements.

LIFE-SCI 499M Undergraduate Research-Biological Sciences Honors

Independent research, including the writing of research reports in the area of biological sciences. Prerequisites: Consent of SBS adviser required.

LIFE-SCI 499P Undergraduate Research-Biotechnology

Independent research, including the writing of research reports in the area of biotechnology. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours towards biology course degree requirements. Prerequisite(s) Completion of Biology degree core requirements a minimum GPA of 3.0; consent of an appropriate faculty member; and permission from a School of Biological Sciences Undergraduate Adviser. Offered: Fall, Winter, Summer

LIFE-SCI H490WI Honors Senior Seminar

Discussion, writing and specific readings to coordinate with and amplify topics covered in School of Biological Sciences seminars; must include a term paper on a specific topic. Designation: Writing Intensive. Prerequisite(s): Completion of core requirements, consent of SBS adviser.

Life Science - Anatomy (LS-ANATO)

LS-ANATO 118 Introductory Anatomy

Description and discussion of the cells, organs, organ systems and basic tissues of vertebrates with special emphasis on their interrelationships in functional anatomy. Three hours lecture per week. Prerequisites: BIOL 102 or BIOL 108 or BIOL 109.

LS-ANATO 118 Introductory Anatomy

Description and discussion of the cells, organs, organ systems and basic tissues of vertebrates with special emphasis on their

interrelationships in functional anatomy. Three hours lecture per week. Prerequisites: BIOL 102 or BIOL 108 or BIOL 109.

LS-ANATO 118 Introductory Anatomy

Description and discussion of the cells, organs, organ systems and basic tissues of vertebrates with special emphasis on their interrelationships in functional anatomy. Three hours lecture per week. Prerequisites: BIOL 102 or BIOL 108 or BIOL 109.

LS-ANATO 118L Introductory Anatomy Laboratory

Laboratory investigation of cells, tissues, and organs with special emphasis on their interrelationship in vertebrates. One hour recitation and three hours lab per week. Pre/co-requisite: LS ANAT 118

LS-ANATO 118L Introductory Anatomy Laboratory

Laboratory investigation of cells, tissues, and organs with special emphasis on their interrelationship in vertebrates. One hour recitation and three hours lab per week. Pre/co-requisite: LS ANAT 118

LS-ANATO 119 Functional Anatomy I

An introduction to the functional anatomy of vertebrates with emphasis on organs, organ systems and tissues. Three hours lecture per week.

LS-ANATO 119L Functional Anatomy I Laboratory

An introduction to the functional anatomy of vertebrates with emphasis on organs, organ systems and tissues. Three hours recitation per week.

Life Science - Biochemistry (LS-BIOC)

LS-BIOC 304 Biochemistry And Nutrition

The chemistry of the structures and processes of the human body in their normal condition with special consideration of the chemical aspects of disease of the oral structure. A presentation of the basic principles of nutrition.

LS-BIOC 304 Biochemistry And Nutrition

The chemistry of the structures and processes of the human body in their normal condition with special consideration of the chemical aspects of disease of the oral structure. A presentation of the basic principles of nutrition.

LS-BIOC 3120 Biochemistry And Nutrition

The fundamentals of biochemistry and the nutritional implications as they relate to source and utilization of essential nutrients.

LS-BIOC 3240 Applied Nutrition

Students will discuss life cycle nutrition as it relates to preventive dentistry and total health. Nutritional factors from infancy to old age are discussed, including diet and nutrition for special patients such as expectant mothers, diabetics, patients with heart disease, fracture patients, institutionalized patients, etc. Students will provide nutritional counseling to healthy patients and special patients within the framework of the course. Principles will be utilized in later clinical courses and practicums.

LS-BIOC 3240 Applied Nutrition

Students will discuss life cycle nutrition as it relates to preventive dentistry and total health. Nutritional factors from infancy to old age are discussed, including diet and nutrition for special patients such as expectant mothers, diabetics, patients with heart disease, fracture patients, institutionalized patients, etc. Students will provide nutritional counseling to healthy patients and special patients within the framework of the course. Principles will be utilized in later clinical courses and practicums.

LS-BIOC 341 Basic Biochemistry

One semester course covering the properties of organic compounds important to biological systems. Structures, characterization and reactions of common compounds and their relationship to the building blocks of biological systems will be discussed. Three hours lecture per week. Prerequisites: BIOLOGY 202, and CHEM 320, or CHEM 322R.

LS-BIOC 360 Biochemistry

Introduction to modern biochemistry. Structure and function of biologically important compounds, major biochemical pathways and their regulation in animals, plants and microorganisms, and the molecular and biochemical basis of gene function will be studied. Three hours lecture per week. Prerequisites: BIOLOGY 202, BIOLOGY 206, LS-BIOC 341, and CHEM 320 or CHEM 322R.

LS-BIOC 360L Laboratory In Biochemistry And Molecular Biology

Laboratory studies in biochemistry and molecular biology with an emphasis on modern techniques and quantitative relationships. Written consent of the instructor required. Prerequisite: LS-BIOC 341.

LS-BIOC 360L Laboratory In Biochemistry And Molecular Biology

Laboratory studies in biochemistry and molecular biology with an emphasis on modern techniques and quantitative relationships. Written consent of the instructor required. Prerequisite: LS-BIOC 341.

LS-BIOC 360WL Laboratory In Biochemistry And Molecular Biology

Laboratory studies in biochemistry and molecular Biology with an emphasis on modern techniques and quantitative relationships. Written consent of the instructor required. Designation: Writing Intensive. Prerequisite(s): LS-BIOC 341.

LS-BIOC 365 Human Biochemistry I

The basic principles of human biochemistry for pharmacy students presented in a two-term integrated unit. Topics will include the chemistry and mechanisms involved in biosynthesis, degradations and utilization of the major constituents of living systems and the biochemistry of specialized tissues, hormones, nutrition and regulation. Restricted to students in the School of Pharmacy. Prerequisites: BIOLOGY 202 (pre or corequisite) and CHEM 320 or CHEM 322R.

LS-BIOC 366 Human Biochemistry II

The basic principles of human biochemistry for pharmacy students and other undergraduates presented in a two-term integrated unit. Topics will include the chemistry and mechanisms involved in biosynthesis, degradation and utilization of the major constituents of living systems and the biochemistry of specialized tissues, hormones, nutrition and regulation. Restricted to students in the School of Pharmacy. Prerequisite: LS-BIOC 365.

LS-BIOC 425 Bioinformatics

Study of the acquisition, storage, retrieval, analysis, modeling, and distribution of information in biomolecular databases. Recent developments in genomics and proteomics and how these databases are used in modern biological research will be emphasized. Prerequisites: LS-BIOC 341 or permission of instructor

LS-BIOC 430 Molecular Biology And Genetic Engineering

Molecular aspects of gene structure and function, including macromolecular synthesis, gene regulation, genetic transfer and biotechnology will be discussed in prokaryotes and eukaryotes. Three hours lecture per week. Prerequisites: BIOLOGY 202, BIOLOGY 206, and LS-BIOC 341.

Life Science - Microbiology (LS-MCRB)**LS-MCRB 112** Microbiology And Living

Lectures and demonstrations concerning the cell structure, genetics and physiology of microorganisms and the role microorganisms play in the world around man with an emphasis on medical and clinical aspects of the significance of various groups of bacteria, viruses fungi and other microorganisms. This course is intended for nursing and other allied health students and for non-biology majors interested in life sciences. Prerequisite: None

LS-MCRB 112 Microbiology And Living

Lectures and demonstrations concerning the cell structure, genetics and physiology of microorganisms and the role microorganisms play in the world around man with an emphasis on medical and clinical aspects of the significance of various groups of bacteria, viruses fungi and other microorganisms. This course is intended for nursing and other allied health students and for non-biology majors interested in life sciences. Prerequisite: None

LS-MCRB 113 Introductory Microbiology

An introduction to microbiology with emphasis on infection and the basis of immunity. Three hours lecture per week. For non-majors only; does not count toward Biology degree requirements. Prerequisite(s): High School Biology and Chemistry background highly recommended.

LS-MCRB 114L Introductory Microbiology Laboratory

Introductory laboratory studies in microbiology and infection to correlate with LS-MCRB 113. Four hours per week. For non-majors only; does not count toward biology degree requirements. Prerequisite: LS-MCRB 112 or LS-MCRB 113.

LS-MCRB 114L Introductory Microbiology Laboratory

Introductory laboratory studies in microbiology and infection to correlate with LS-MCRB 113. Four hours per week. For non-majors only; does not count toward biology degree requirements. Prerequisite: LS-MCRB 112 or LS-MCRB 113.

LS-MCRB 121 Human Biology III (Microbiology)

Basic concepts of microbiology with emphasis on infectious diseases and host defenses. Three hours lecture per week. Prerequisite(s): LS-ANATO 119, CHEM 211

LS-MCRB 121L Human Biology III (Microbiology) Lab

Laboratory exercises demonstrating basic concepts of microbiology with emphasis on infectious diseases and host defenses. Three hours laboratory per week. Prerequisites or corequisite: LS-MCRB 121 Offered: (semester)

LS-MCRB 313 Microbiology

Fundamental and applied aspects of microbial structure, metabolism, genetics and diversity. Experimental approaches to studying the microbial world will be emphasized. Three hours lecture per week. Prerequisites: BIOLOGY 202, BIOLOGY 206, and LS-BIOC 341 co-requisite.

LS-MCRB 313L Laboratory In Microbiology

General microbiological procedures plus advanced work in the areas of microbial physiology and genetics, pathogenic microbiology, virology, applied microbiology and biotechnology. One hour lecture and six hours lab per week. Pre-or co-requisites, LS-MCRB 313, LS-BIOC 341, consent of SBS adviser. Offered: Fall

LS-MCRB 313L Laboratory In Microbiology

General microbiological procedures plus advanced work in the areas of microbial physiology and genetics, pathogenic microbiology, virology, applied microbiology and biotechnology. One hour lecture and six hours lab per week. Pre-or co-requisites, LS-MCRB 313, LS-BIOC 341, consent of SBS adviser. Offered: Fall

LS-MCRB 313WL Laboratory In Microbiology

General microbiological procedures plus advanced work in the areas of microbial physiology and genetics, pathogenic microbiology, virology, applied microbiology, and biotechnology. One hour lecture and six hours lab per week. Designation: Writing Intensive. Prerequisite: Pre-or co-requisites, LS-MCRB 313, LS-BIOC 341 Offered: Fall

LS-MCRB 313WL Laboratory In Microbiology

General microbiological procedures plus advanced work in the areas of microbial physiology and genetics, pathogenic microbiology, virology, applied microbiology, and biotechnology. One hour lecture and six hours lab per week. Designation: Writing Intensive. Prerequisite: Pre-or co-requisites, LS-MCRB 313, LS-BIOC 341 Offered: Fall

LS-MCRB 4180 Microbiology

Study of infectious diseases, their etiology, symptoms, prevention and treatment. Special emphasis is placed on plaque formation, caries development, periodontal and other oral diseases that relate to dentistry. Four hours lecture per week

LS-MCRB 431 Virology

Survey of the molecular biology of animal, plant, and bacterial viruses. The course will emphasize the molecular mechanisms of virus replication, viral pathogenesis, and the use of virus as model systems to study mammalian cells. Three hours lecture per week. Prerequisites: BIOLOGY 202 and BIOLOGY 206; pre or co-requisite LS-BIOC 341 or LS-BIOC 365

LS-MCRB 435 Immunology

A study of the cellular and humoral aspects of the immune response, with emphasis upon the mechanisms involved and the relationship of this response to disease processes. Three hours lecture per week. Prerequisites: LS-MCRB 121 or LS-MCRB 313, and LS-BIOC 341 or LS-BIOC 366. Offered: Winter Semesters

LS-MCRB 435 Immunology

A study of the cellular and humoral aspects of the immune response, with emphasis upon the mechanisms involved and the relationship of this response to disease processes. Three hours lecture per week. Prerequisites: LS-MCRB 121 or LS-MCRB 313, and LS-BIOC 341 or LS-BIOC 366. Offered: Winter Semesters

Life Science - Physiology (LS-PHYS)

LS-PHYS 117 Human Physiology

Introduction to body functions presented from an organ systems approach. Three hours lecture per week. For non-majors only; does not count toward biology degree requirements.

LS-PHYS 3070 Oral Physiology

Concepts of general physiology will be discussed as they relate to the clinical practice of dental hygiene. Emphasis will be placed on the normal and abnormal physiology of oral structures, including such topics as neurophysiology, muscle function, salivation, and endocrinology.

LS-PHYS 3070 Oral Physiology

Concepts of general physiology will be discussed as they relate to the clinical practice of dental hygiene. Emphasis will be placed on the normal and abnormal physiology of oral structures, including such topics as neurophysiology, muscle function, salivation,

and endocrinology.

LS-PHYS 316 Principles Of Physiology

Physiological functions and processes of animals at the organ and organ systems levels, including concepts of integrated and homeostatic mechanisms. The relationship between organ function and underlying cellular mechanisms in vertebrates will be emphasized. Three hours lecture per week. Prerequisites: BIOLOGY 202, BIOLOGY 206, and LS-BIOC 341.

LS-PHYS 399 Pharmacy Physiology I

Introduction to the general principles of neurophysiology. Prerequisites: BIOLOGY 202 and CHEM 320.

LS-PHYS 400 Pharmacy Physiology II

The principles of physiology presented by an integrated approach based on an organ system format. Emphasis is placed on facts and principles pertinent for the student enrolled in pharmacy. Prerequisite: LS-PHYS 399.

LS-PHYS 401 Physiology Lecture

An integrated study of normal functions of various organ systems of the human body with special consideration of the physiology of the oral cavity and its related structures.

Medical Technology (MED-TECH)

MED-TECH 999 Medical Technology Internship

School of Computing & Engineering

School of Computing & Engineering Undergraduate Courses

Civil Engineering (CIV-ENGR)

CIV-ENGR 111 Essential Engineering

Introduction to the practice and history of engineering including its impact on human history, product design/ development and its relationship to the ecosystem, professionalism and ethics, the engineering approach to solving real-world problems, engineering communications and calculations, engineering teamwork and case studies. (Same as MEC-ENGR 111)

CIV-ENGR 111 Essential Engineering

Introduction to the practice and history of engineering including its impact on human history, product design/ development and its relationship to the ecosystem, professionalism and ethics, the engineering approach to solving real-world problems, engineering communications and calculations, engineering teamwork and case studies. (Same as MEC-ENGR 111)

CIV-ENGR 211 The Engineering Enterprise

The engineering enterprise course covers four topics essential for engineering students with new venture creation interests: creating economic value, leadership, finance, and marketing. The primary objective of this course is to motivate the student to think as a blend of an engineer and a businessperson. (Same as MEC-ENGR 211.) Pre/corequisite: CIV-ENGR 111

CIV-ENGR 219 Computer Programming For Engineers

Analysis and synthesis of structured computer algorithms for solving engineering problems using high level programming tools such as Excel, Matlab, Fortran and/or C++. (Same as MEC-ENGR 219) Prerequisite: MATH 220

CIV-ENGR 275 Engineering Statics

Fundamentals of statics; static equilibrium and introduction to elements of mechanics of elastic materials. Prerequisite: PHYSICS 240; Co-requisite: MATH 250

CIV-ENGR 276 Strength Of Materials

Stress and strain; torsion; bending and shear stresses in beams; combined stresses; deflection of beams; columns. Prerequisite: CIV-ENGR 275.

CIV-ENGR 276 Strength Of Materials

Stress and strain; torsion; bending and shear stresses in beams; combined stresses; deflection of beams; columns. Prerequisite:

CIV-ENGR 275.

CIV-ENGR 301 Fundamental Topics In Civil Engineering
Special engineering topics for undergraduate students. Prerequisite: Instructor's consent.

CIV-ENGR 301 Fundamental Topics In Civil Engineering
Special engineering topics for undergraduate students. Prerequisite: Instructor's consent.

CIV-ENGR 311 The Technical Entrepreneur
The guiding principal for the course is that entrepreneurs are innovators and operate in an uncertain and risky environment. The course looks at the entrepreneurial mindset and the process of new product line launch. (Same as MEC-ENGR 311). Prerequisite: CIV-ENGR 211

CIV-ENGR 319 Engineering Computation And Statistics
Statistical distribution functions and application to engineering problems. Limited treatment of curve-fitting and time-series analysis. Introduction to factorial design. (Same as MEC-ENGR 319). Prerequisites: MEC-ENGR 219 and MATH 220

CIV-ENGR 319 Engineering Computation And Statistics
Statistical distribution functions and application to engineering problems. Limited treatment of curve-fitting and time-series analysis. Introduction to factorial design. (Same as MEC-ENGR 319). Prerequisites: MEC-ENGR 219 and MATH 220

CIV-ENGR 319 Engineering Computation And Statistics
Statistical distribution functions and application to engineering problems. Limited treatment of curve-fitting and time-series analysis. Introduction to factorial design. (Same as MEC-ENGR 319). Prerequisites: MEC-ENGR 219 and MATH 220

CIV-ENGR 320 Introduction to Factorial Design
Concepts and techniques of ANOVA and factorial design to supplement standard undergraduate statistics courses.
Prerequisite: Undergraduate Statistics Offered: Winter

CIV-ENGR 321 Structural Analysis I
Analysis of statically determinate beams, frames and trusses; shear and moment diagrams; influence line diagrams; beam deflections. Analysis of statically indeterminate structures. Energy methods. Prerequisite: CIV-ENGR 276 and MATH 345

CIV-ENGR 323 Structural Steel Design
Basic principles of structural steel design. Design of beams, axially loaded members, columns, and bolted and welded connections. Prerequisite: CIV-ENGR 321.

CIV-ENGR 323 Structural Steel Design
Basic principles of structural steel design. Design of beams, axially loaded members, columns, and bolted and welded connections. Prerequisite: CIV-ENGR 321.

CIV-ENGR 335 Soil Mechanics
Detailed study of physical and mechanical properties of soil governing its behavior as an engineering material. Prerequisite: CIV-ENGR 276, Chem 211 and 211L, Machine Shop Safety

CIV-ENGR 335 Soil Mechanics
Detailed study of physical and mechanical properties of soil governing its behavior as an engineering material. Prerequisite: CIV-ENGR 276, Chem 211 and 211L, Machine Shop Safety

CIV-ENGR 335 Soil Mechanics
Detailed study of physical and mechanical properties of soil governing its behavior as an engineering material. Prerequisite: CIV-ENGR 276, Chem 211 and 211L, Machine Shop Safety

CIV-ENGR 342 Water And Wastewater Treatment Processes
Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineering systems for the distribution, collection and treatment of water and wastewater. Prerequisite: CIV-ENGR 351

CIV-ENGR 342 Water And Wastewater Treatment Processes
Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineering systems for the distribution, collection and treatment of water and wastewater. Prerequisite: CIV-ENGR 351

CIV-ENGR 351 Fluid Mechanics

Concepts of the statics and dynamics of fluids, with emphasis on principles of continuity, momentum and energy. Boundary layers, dimensional analysis and drag are covered briefly. Thorough treatment of pipe flow. (Same as ME 351). Prerequisites: MEC-ENGR 285, MATH 345, or ME 272

CIV-ENGR 351 Fluid Mechanics

Concepts of the statics and dynamics of fluids, with emphasis on principles of continuity, momentum and energy. Boundary layers, dimensional analysis and drag are covered briefly. Thorough treatment of pipe flow. (Same as ME 351). Prerequisites: MEC-ENGR 285, MATH 345, or ME 272

CIV-ENGR 351 Fluid Mechanics

Concepts of the statics and dynamics of fluids, with emphasis on principles of continuity, momentum and energy. Boundary layers, dimensional analysis and drag are covered briefly. Thorough treatment of pipe flow. (Same as ME 351). Prerequisites: MEC-ENGR 285, MATH 345, or ME 272

CIV-ENGR 355WI Water Resource Engineering

Design and analysis of water resource infrastructure. Applied surface water hydrology, analysis of pipeline systems, design of pumping plants and power generation, cavitation, water hammer, valves operations, open channel flow in rigid channels, gradually varied and rapidly varied flow. Prerequisites: CIV-ENGR 319, CIV-ENGR 351, WEPT passed

CIV-ENGR 357 Engineering Hydraulics

Analysis and design of closed conduit systems for water supply; fundamentals of open channel flow; principles of pumping and hydropower generation; transients and control of surge pressures in pipelines. Prerequisites: CE 351 Fluid Mechanics

CIV-ENGR 378WI Civil Engineering Materials

Composition, structure, properties, behavior and selection of civil engineering materials. Prerequisite: CIV-ENGR 276, Chem 211 and 211L, WEPT passed, and Machine Shop Safety

CIV-ENGR 378WI Civil Engineering Materials

Composition, structure, properties, behavior and selection of civil engineering materials. Prerequisite: CIV-ENGR 276, Chem 211 and 211L, WEPT passed, and Machine Shop Safety

CIV-ENGR 378WI Civil Engineering Materials

Composition, structure, properties, behavior and selection of civil engineering materials. Prerequisite: CIV-ENGR 276, Chem 211 and 211L, WEPT passed, and Machine Shop Safety

CIV-ENGR 390 Engineering Coop/Internship

Students may participate in structured Engineering Coop/ Internship under the supervision of employer. They must carry out significant professional responsibilities and whatever additional assignments are determined by the employer. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211

CIV-ENGR 390 Engineering Coop/Internship

Students may participate in structured Engineering Coop/ Internship under the supervision of employer. They must carry out significant professional responsibilities and whatever additional assignments are determined by the employer. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211

CIV-ENGR 400 Problems

Directed investigation of civil engineering problems. Prerequisite: Instructor's consent

CIV-ENGR 400 Problems

Directed investigation of civil engineering problems. Prerequisite: Instructor's consent

CIV-ENGR 401 Topics In Civil Engineering

Study of current and new technical developments in civil engineering.

CIV-ENGR 401 Topics In Civil Engineering

Study of current and new technical developments in civil engineering.

CIV-ENGR 401A Special Topics In Civil Engineering

CIV-ENGR 401A Special Topics In Civil Engineering

CIV-ENGR 401BE Topics in Civil Engineering

CIV-ENGR 401D Topics In Civil Engineering

CIV-ENGR 401DM Topics In Civil Engineering

CIV-ENGR 401EH Topics in Civil Engineering

CIV-ENGR 401G Topics In Civil Engineering

CIV-ENGR 401GB Topics In Civil Engineering

CIV-ENGR 401HA Topics In Civil Engineering

CIV-ENGR 401J Special Topics In Civil Engineering
Study of current and new technical developments in civil engineering.

CIV-ENGR 401PM Topics in Civil Engineering

CIV-ENGR 401SP Special Topics In Civil Engineering

CIV-ENGR 401SV Topics in Civil Engineering
Study of current and new technical developments in civil engineering.

CIV-ENGR 401SW Topics in Civil Engineering
Study of current and new technical developments in civil engineering.

CIV-ENGR 401X Topics in Civil Engineering

CIV-ENGR 409 Fundamentals of Engineering Review
This course consists of a series of lectures and is intended as a review class for all the subjects included in the Fundamentals of Engineering exam. Classes specifically focus on the review of equations and formulas included in the reference handbook published by NCEES. (Cross-listed with ME 409 and EE 401FE).

CIV-ENGR 409 Fundamentals of Engineering Review
This course consists of a series of lectures and is intended as a review class for all the subjects included in the Fundamentals of Engineering exam. Classes specifically focus on the review of equations and formulas included in the reference handbook published by NCEES. (Cross-listed with ME 409 and EE 401FE).

CIV-ENGR 411 Civil Engineering Systems Design I
Comprehensive and realistic design project using the systems approach. Design choices and their effect upon the environment. Design constraints include constructability, minimization of environmental impact, and cost-effectiveness. Managerial and professional aspects of design practice. Prerequisite: CE 357, CE 467, CE 323 (or CE422WI)

CIV-ENGR 412 Civil Engineering Systems Design II
Continuation of CIV-ENGR 411 Prerequisite: CIV-ENGR 411

CIV-ENGR 415 Engineering Leadership and Ethics
Analysis of leadership, including 360-degree assessment of students' leadership. Discussion of leadership cases and application to

engineering careers. Frequent analysis of engineering ethics cases using the NSPE Code. (Cross-listed with CE 5515)
Prerequisites: CE 211

CIV-ENGR 421 Matrix Methods Of Structural Analysis

An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the computer programs to three dimensional structures. Prerequisite: CIV-ENGR 321.

CIV-ENGR 421 Matrix Methods Of Structural Analysis

An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the computer programs to three dimensional structures. Prerequisite: CIV-ENGR 321.

CIV-ENGR 422WI Reinforced Concrete Design

Basic principles of reinforced concrete design. Design of beams for flexure and shear; design of short and slender columns. Bond stress development. Footing design. Prerequisite: CIV-ENGR 321, WEPT passed

CIV-ENGR 423 Advanced Structural Steel Design

Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections. Prerequisite: CIV-ENGR 323.

CIV-ENGR 423 Advanced Structural Steel Design

Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections. Prerequisite: CIV-ENGR 323.

CIV-ENGR 425 Prestressed Concrete

Theory and practice of prestressed concrete design. Pretensioning, posttensioning. Anchorage of steel. Materials, design specifications. Prerequisite: CIV-ENGR 422

CIV-ENGR 427 Advanced Reinforced Concrete Design

Advanced topics in the design of footings, retaining walls, two way floor slabs, torsion and continuous structures, shear friction, strut and tie design, precast design. Prerequisites: CE 422

CIV-ENGR 427 Advanced Reinforced Concrete Design

Advanced topics in the design of footings, retaining walls, two way floor slabs, torsion and continuous structures, shear friction, strut and tie design, precast design. Prerequisites: CE 422

CIV-ENGR 429 Design of Structures for Blast and Fire

General overview of Blast Design; risk assessment and design criteria; simplifies Blast Effects Analysis; ground shock, material response; antiterrorism design considerations; weapons effects and mitigation; internal explosions; progressive collapse analysis; and introduction to Fire Design.

CIV-ENGR 430 Reinforced Concrete Theory and Design

Advanced design of reinforced concrete structures; review of standard codes and specifications and their influence. Prerequisite: CE 375 or equivalent.

CIV-ENGR 431 Fundamentals of Geomaterial Characterization

Overviews state-of-the-art instrumental techniques for analysis of the physio-chemical properties of soils and civil engineering materials. Analysis techniques will be presented for soils, fresh and hardened concrete, asphalt binders and metals. (Cross-listed with CE 5531) Prerequisites: CE 335; CE 378WI

CIV-ENGR 432 Foundation Engineering

Design of basic foundation structures, footings, retaining walls, pile foundations, dams. Prerequisite: CIV-ENGR 335.

CIV-ENGR 432 Foundation Engineering

Design of basic foundation structures, footings, retaining walls, pile foundations, dams. Prerequisite: CIV-ENGR 335.

CIV-ENGR 442 Hydraulic Structures

A review of the history and hydraulic design procedures for a variety of hydraulic structures including spillways, water measurement structures, canal structures and energy dissipation structures. (Cross-listed with CE 5542.) Prerequisites: CE 355WI

CIV-ENGR 443 Hazardous Waste Management

Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination. Prerequisite: MEC-ENGR 285 and CIV-ENGR

CIV-ENGR 443 Hazardous Waste Management

Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211

CIV-ENGR 444 Unit Processes in Environmental Engineering

Chemical and physical relationships as applied to unit processes of water and wastewater. Prerequisite: CIV-ENGR 342.

CIV-ENGR 446 Limnology

Physical, biological and chemical issues important in surface fresh waters. Includes carbonate chemistry, algal assay and thermocline analysis. Prerequisites: MATH 345, CHEM 211

CIV-ENGR 447 Contracts and Law for Engineers

Law of contracts, including types, construction, interpretation, performance, and termination. Construction and Engineering service contracts: proposals, general and financial conditions, specifications and drawings. Corporate and professional and person liability, insurance and bonds, property, evidence, arbitration and mediation. Offered: Fall

CIV-ENGR 448 Environmental Public Policy

Engineering and economic aspects of environmental policy. Basic understanding of environmental statutes and case law. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211

CIV-ENGR 448 Environmental Public Policy

Engineering and economic aspects of environmental policy. Basic understanding of environmental statutes and case law. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211

CIV-ENGR 449 Environmental Compliance, Auditing And Permitting

Statutes, regulations and permitting for air hazardous wastes and storage tanks. Asbestos, radon, EMF, and emerging areas of regulatory concern. Siting issues. Criminal and civil enforcement. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211

CIV-ENGR 452 Hydraulics Of Open Channels

Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves. Prerequisite: CIV-ENGR 351.

CIV-ENGR 452 Hydraulics Of Open Channels

Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves. Prerequisite: CIV-ENGR 351.

CIV-ENGR 453 Hydraulics And Variability Of Rivers

Introduction to the concepts of alluvial channel behavior, evolution and change due to natural and man-induced modifications to streams and watersheds. Numerous case studies of river behavior are studied from the perspective of hydraulics, geomorphology and sediment transport. Prerequisite: CIV-ENGR 355

CIV-ENGR 454 River Stability And Scour

Bridge hydraulics, stream stability, scour at bridge piers and abutments, hydraulic modeling of floods, countermeasures for protection of bridge infrastructure. Prerequisite: CIV-ENGR 355

CIV-ENGR 454 River Stability And Scour

Bridge hydraulics, stream stability, scour at bridge piers and abutments, hydraulic modeling of floods, countermeasures for protection of bridge infrastructure. Prerequisite: CIV-ENGR 355

CIV-ENGR 456 Urban Hydrology

An introduction to urban hydrology and urban drainage systems focusing on the engineering techniques and unique issues associated with estimating and designing for rainfall/runoff in an urban metropolitan area. (Cross-listed with CE 5556.) Prerequisites: CE 355WI

CIV-ENGR 463 The Engineer in Society

Broad concepts in law as related to business industry and the processes of design, procurement, construction, and the role of the design professional.

CIV-ENGR 465 Engineering Administration

Cash flow analysis, financial analysis, managerial accounting and cost control, budgeting, organizational structure and behavior.
Prerequisite: MEC-ENGR 285 and CIV-ENGR 211.

CIV-ENGR 465 Engineering Administration

Cash flow analysis, financial analysis, managerial accounting and cost control, budgeting, organizational structure and behavior.
Prerequisite: MEC-ENGR 285 and CIV-ENGR 211.

CIV-ENGR 466 Green Building and Sustainable Infrastructure

All construction projects must not only consider the immediate cost, but must also consider the future environmental impacts. Green building programs are one mechanism to quantify the "greenness" of construction, including LEED, Green Globes/BREEM, and many others. Green rating systems are also in development for residential subdivisions, highways, roads, and airports. Upon completion of this course students will be prepared for LEED Professional Accreditation Exam for New Construction. Two major additional aspects of green building important to sustainable infrastructure include stormwater management using "green" techniques and methods to mitigate the urban heat island. The course will also discuss infrastructure project sustainability from a life cycle cost perspective and determining the life cycle inventory of various materials. This course will include many knowledgeable guest speakers to bring a current and real world connection to the topics discussed in class. Upon completion of the course, students will better understand what sustainability means and how it applies in the context of our build environment and have a good idea of how technology will impact our sustainable future.

CIV-ENGR 467 Introduction To Construction Management

Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques.
Prerequisite: ME 285; CE 211; CE 335

CIV-ENGR 468 Construction Planning And Scheduling

Planning and scheduling of construction operations by the critical path method. Network diagramming, scheduling computations, and time-cost trade-offs. Manpower and equipment leveling. Computer and non-computer techniques. Prerequisite: ME 285, CE 211, and ME 467

CIV-ENGR 469 Construction Methods And Equipment

Introduction to methods used to plan, construct, and manage heavy civil projects. Topics will include development, project control, equipment productivity, earthmoving fundamentals, formwork design, and other issues in heavy civil projects.
Prerequisites: ME 285, CE 211, and ME 467.

CIV-ENGR 470 Corrosion Engineering

This course will cover the physical interaction of metallic materials with their environment, called corrosion. Corrosion is an electrochemical process and the thermodynamics and kinetics of corrosion processes will be discussed. (Cross-listed with CE 5570.) Prerequisites: Chem 211/211L and CE 378WI

CIV-ENGR 471 Advanced Portland Cement Concrete

This course will cover topics such as cement chemistry, concrete proportioning, aggregates, mineral and chemical admixtures, fresh and hardened properties of concrete, and durability of concrete. Design and proportioning of concrete mixtures for desired fresh and hardened properties will be emphasized. Specialty concrete types such as high strength/high performance concrete, lightweight concrete, pervious concrete, high volume fly ash concrete, and fiber reinforced concrete will also be covered.
Prerequisites: Chem 211/211L and CE 378WI.

CIV-ENGR 472 Advanced Mechanics Of Materials

Shear center; unsymmetric bending; curved beams; beams on elastic foundations; thick-walled cylinders. Energy methods. Torsion of noncircular sections. Theories of failure. Plate theory. Prerequisite: CIV-ENGR 276.

CIV-ENGR 472 Advanced Mechanics Of Materials

Shear center; unsymmetric bending; curved beams; beams on elastic foundations; thick-walled cylinders. Energy methods. Torsion of noncircular sections. Theories of failure. Plate theory. Prerequisite: CIV-ENGR 276.

CIV-ENGR 473 Durability of Civil Engineering Materials

Investigation of pavements and structures including steel, reinforced concrete, and plain concrete for a variety of applications and masonry and asphalt. Explores the identification, causes of, and remediation for issues related to metallic corrosion and concrete deterioration in civil engineering projects. Course content will be delivered through lectures, labs and case study examples. (Cross-listed with CE 5573) Prerequisites: CE 335, CE 378WI

CIV-ENGR 475 Seismic Design of Structures

Introduction to basic analysis and design principles for the seismic design of buildings (concrete, steel, wood). General seismic principles, codes and loads, static lateral force procedure, dynamic lateral force procedure, topics in rigidities of buildings. Prerequisites: ME 285 and CE 323 (or CE 422)

CIV-ENGR 481 Highway And Traffic Engineering

Principles of highway engineering and traffic analysis, road/vehicle performance, geometric alignment of highways, traffic analysis and queuing theory, signal design, statistical analysis of traffic data and highway drainage. Prerequisite: MEC-ENGR 285

CIV-ENGR 481 Highway And Traffic Engineering

Principles of highway engineering and traffic analysis, road/vehicle performance, geometric alignment of highways, traffic analysis and queuing theory, signal design, statistical analysis of traffic data and highway drainage. Prerequisite: MEC-ENGR 285

CIV-ENGR 484 Pavement Materials Design, Maintenance, and Rehabilitation

Traffic loading and volume, stress and deflection, characterization of pavement materials, design of flexible and rigid pavements, design of overlays, evaluation of pavement performance, maintenance techniques, and rehabilitation options. (Cross-listed with CE 5584) Prerequisite: CIV-ENGR 378WI.

CIV-ENGR 486 Finite Element Methods

(same as Mechanical and Aerospace Engineering 486). Prerequisite(s): CE375 or Mechanical and Aerospace Engineering 386.

CIV-ENGR 486 Planning and Geometric Design of Highways

Techniques of highway planning in rural and urban areas. Design of the visible elements of highways. Prerequisite: CIV-ENGR 481

CIV-ENGR 487 Applied Finite Element Analysis

The study of advanced simulation techniques for the solution to engineering problems. The use of Finite Element Method toward solving mechanical, structural, vibration and potential flow problems will be explored. The use of current commercial simulation tools will be used extensively. Prerequisite: MEC-ENGR 130, CIV-ENGR 275, Matrix Algebra Offered: Fall

CIV-ENGR 491 Unit Process Laboratory

Chemical and physical relationships as applied to unit processes of water and wastewater. Prerequisite: CE 292

CIV-ENGR 491 Internship

For International students who must register to cover off-campus employment which is approved as related to their degree by their departmental advisor and ISAO.

CIV-ENGR 491 Internship

For International students who must register to cover off-campus employment which is approved as related to their degree by their departmental advisor and ISAO.

CIV-ENGR 497 Engineering Hydrology

Fundamental concepts of hydrology in engineering; computation principles of runoff from rainfall; measurement of hydrologic quantities; quantitative and statistical estimation of design stream-flow magnitude and frequency; principles of unsteady routing of hydrographs. Prerequisites: CE 351 Fluid Mechanics and CE 319 Engineering Statistics

Computer Science (COMP-SCI)**COMP-SCI 100 Computer Survival: Applications**

Hands-on experience using a computer as a tool to enhance learning. Use of an integrated software package which includes word processing, graphics, database, spreadsheet, and telecommunications applications. Not applicable to Computer Science major requirements. Prerequisites: MATH 110 or equivalent.

COMP-SCI 100 Computer Survival: Applications

Hands-on experience using a computer as a tool to enhance learning. Use of an integrated software package which includes word processing, graphics, database, spreadsheet, and telecommunications applications. Not applicable to Computer Science major requirements. Prerequisites: MATH 110 or equivalent.

COMP-SCI 101 Problem Solving And Programming I

Problem solving, algorithms, and program design. Use of structured programming, arrays, control structures, strings, searching,

sorting and files in C++. Introduction to object-oriented programming. Coding, testing and debugging using a modern development environment. Prerequisites: MATH 110 or equivalent.

COMP-SCI 111 Introduction to Computing

This course provides a broad and general introduction to the computing fields underlying computer science, information technology and computer engineering and its impact on humanity and society. It introduces important concepts of the field, including hardware, software, communications networks, algorithmic processes, information representation, and programming. The course is not programming oriented, but some light programming might be required. The course also introduces academic skills and strategies for success as a student and in a professional career.

COMP-SCI 190A Special Topics

Selected introductory topics in the area of computing. May be repeated for credit when topic varies. Prerequisite: Permission of Instructor

COMP-SCI 190C Special Topics

Selected introductory topics in the area of computing. May be repeated for credit when topic varies. Prerequisite: Permission of Instructor

COMP-SCI 191 Discrete Structures I

Mathematical logic, sets, relations, functions, mathematical induction, algebraic structures with emphasis on computing applications. Prerequisite: MATH 110

COMP-SCI 191 Discrete Structures I

Mathematical logic, sets, relations, functions, mathematical induction, algebraic structures with emphasis on computing applications. Prerequisite: MATH 110

COMP-SCI 1EC Computer Science Elective

Transfer Credit

COMP-SCI 201 Problem Solving And Programming II

Problem solving and programming using classes and objects. Efficiency of searching & sorting algorithms. Inheritance, abstract data types, templates, pointers, recursion, linked lists, stacks and queues implemented C++. Prerequisites: COMP-SCI 101, COMP-SCI 191.

COMP-SCI 201L Problem Solving and Programming II - Lab

Programming exercises and demonstrations to reinforce concepts learned in Comp-Sci 201 and provide additional practice in C++ programming. Prerequisites: Comp-Sci 101, Comp-Sci 191. Concurrent enrollment in Comp-Sci 201R required.

COMP-SCI 201R Problem Solving And Programming II

Problem solving and programming using classes and objects. Algorithm efficiency, abstract data types, searching and sorting, templates, pointers, linked lists, stacks and queues implemented in C++. Prerequisites: COMP-SCI 101, COMP-SCI 191. (Must be passed with a C or higher). Concurrent enrollment in Comp-Sci 201L required.

COMP-SCI 222 Multimedia Production And Concepts

Multimedia production and concepts will give an overview of multimedia technology and communication theory needed to deliver information and to produce interactive presentations for the web, for CD-ROM, and for in-person presentations and demos. The course offers exposure to software, hardware, other multimedia technologies, authoring and copyright matters. Prerequisite(s): CS 101

COMP-SCI 243 C And Unix

Syntactics and semantics of C applied to dynamic structures, recursion, abstract data types, libraries. General introduction to UNIX operating system and UNIX file system, and use of UNIX system calls in C. Prerequisite: COMP-SCI 101.

COMP-SCI 243 C And Unix

Syntactics and semantics of C applied to dynamic structures, recursion, abstract data types, libraries. General introduction to UNIX operating system and UNIX file system, and use of UNIX system calls in C. Prerequisite: COMP-SCI 101.

COMP-SCI 246 Introduction To C++

Syntax and semantics of C++ applied to object oriented programming concepts of abstract data type, classes, data hiding, polymorphism and inheritance. Prerequisite: COMP-SCI 201, COMP-SCI 243.

COMP-SCI 246 Introduction To C++

Syntax and semantics of C++ applied to object oriented programming concepts of abstract data type, classes, data hiding, polymorphism and inheritance. Prerequisite: COMP-SCI 201, COMP-SCI 243.

COMP-SCI 281 Introduction To Computer Architecture

Data representation, number systems, Boolean algebra, combinatorial components, sequential logic, processor design, computer organization and design, input and output organization. Prerequisite: COMP-SCI 191

COMP-SCI 281R Introduction To Computer Architecture and Organization

Digital Logic and Data Representation, process architecture and instruction sequencing, memory hierarchy and bus-interfaces and functional organization. Prerequisite: COMP-SCI 101, COMP-SCI 191. (Must be passed with a C or higher).

COMP-SCI 282 Assembler Language Programming

Use of an assembler language for a virtual machine, internal representation of data and instructions, the assembly process, linking, loading and program relocation and execution. I/O, exception handling, alternative architectures. Prerequisite: COMP-SCI 201R and COMP-SCI 281R.

COMP-SCI 282 Assembler Language Programming

Use of an assembler language for a virtual machine, internal representation of data and instructions, the assembly process, linking, loading and program relocation and execution. I/O, exception handling, alternative architectures. Prerequisite: COMP-SCI 201R and COMP-SCI 281R.

COMP-SCI 291 Discrete Structures II

Recurrence relations and their use in the analysis of algorithms. Graphs, trees, and network flow models. Introduction to Finite state machines, grammars, and automata. Prerequisite: COMP-SCI 191 or ECE 226 and E&C-ENGR 227 for ECE students.

COMP-SCI 303 Data Structures

Linear and hierarchical data structures, including stacks, queues, lists, trees, priority queues, advanced tree structures, hashing tables, dictionaries and disjoint-set. Abstractions and strategies for efficient implementations will be discussed. Linear and hierarchical algorithms will be studied as well as recursion and various searching and sorting algorithms. Programming concepts include Object Orientation, concurrency and parallel programming. Several in-depth projects in C++ will be required. Prerequisites: Comp-Sci 191 and either Comp-Sci 201 or both Comp-Sci 201R and Comp-Sci 201L. All prerequisites must be passes with C or higher. Offered: Every Semester

COMP-SCI 304WI Ethics And Professionalism

Societal and ethical obligations of computer science, information technology, and electrical/computer engineering practice. Topics include obligations of professional practice, electronic privacy, intellectual property, ethical issues in networking, computer security, computer reliability, and whistle-blowing. Prerequisites: ENGL 225 (Freshman English II) or equivalent and completion of Written English Proficiency Test (WEPT)

COMP-SCI 311 Introduction To Circuits And Devices

Electric charge and electric energy, Kirchoff's law for current and voltage, analysis of DC circuits, Thevenin and Norton equivalent, inductors and capacitors, transient response of RL and RC circuits, AC circuit analysis and effective value AC signals, and Laplace Transform method for transient analysis. Prerequisites: MATH 220 and PHYSICS 250. Offered: Every Year
Restrictions: None

COMP-SCI 317 Telecommunications: Management & Legal Issues

Analysis of financial and legal issues surrounding the domestic telecommunications industry. Ratio analysis; capital structure; regulatory implications on the convergence of computers and communications; recent FCC trends in regulation and policy; market structure; impact of new technologies; background and analysis of the Communications Act of 1934 and major amendments to date.

COMP-SCI 321 Intro To Computing Resources Administration

A system administrator is a technical person in charge of computing resources for an organization. This person cares for the computing system and responds to the users computing needs. This introductory course is designed to give an overview of a wide variety of technical, interpersonal, documentation, and managerial skills needed to become an effective systems administrator. Prerequisite(s): CS 352

COMP-SCI 349 Java Programming With Applications

The course covers the syntax and semantics of the Java programming language along with the use of essential class libraries. These topics will be taught in the context of application development. Students will learn how to write small to medium sized Java applications and applets. Specific topics covered include: essential classes in the Java API, interfaces, inheritance,

exceptions, graphical user interface components, layout managers, events, I/O classes, Applets, data base access, and multithreading. Prerequisite: COMP-SCI 201 or equivalent Offered: Every Semester

COMP-SCI 350 Interactive Computing

Use of APL for computation and for instruction. Primitive function, function definition and editing. System commands, workspace and libraries. Projects include both computational use and instructional techniques in either programmed instruction or simulation. Introduction to BASIC and TSO. Equivalent to Math. 351.

COMP-SCI 352 Data Structures And Algorithms

Abstract data structures and analysis of associated algorithms, abstractions as separate from implementation. Structures include lists, trees, priority queues, advanced tree structures, hashing tables, and graphs. Comparison of efficiency of algorithms as implemented with various data structures. Advanced searching and sorting algorithms, shortest paths, spanning tree and flow algorithms. Introduction to the basic concepts of NP-complete problems. Prerequisites: (must be passed with a C or higher) COMP-SCI 201 (or E&C-ENGR 216 for ECE students), COMP-SCI 291, MATH 210.

COMP-SCI 352 Data Structures And Algorithms

Abstract data structures and analysis of associated algorithms, abstractions as separate from implementation. Structures include lists, trees, priority queues, advanced tree structures, hashing tables, and graphs. Comparison of efficiency of algorithms as implemented with various data structures. Advanced searching and sorting algorithms, shortest paths, spanning tree and flow algorithms. Introduction to the basic concepts of NP-complete problems. Prerequisites: (must be passed with a C or higher) COMP-SCI 201 (or E&C-ENGR 216 for ECE students), COMP-SCI 291, MATH 210.

COMP-SCI 371 Database Design, Implementation And Validation

This course discusses in detail all aspects of ORACLE database management systems. It covers in detail database design, implementation, and validation using ORACLE. In addition to these, it briefly covers ORACLE implementation, tuning, and implementation. The course is suitable for undergraduates and professional alike. Prerequisite: COMP-SCI 352 or COMP-SCI 303.

COMP-SCI 375 Introduction To Computer Graphics

Interactive Computer Graphics, Hardware Interaction, 3D transformations, Shading, Lighting and Texturing. Prerequisite: COMP-SCI 303 or COMP-SCI 352.

COMP-SCI 393 Numerical Analysis And Symbolic Computation

Basic elements of numerical analysis: numerical solution of algebraic equations, solution of linear simultaneous algebraic equations, matrices, eigenvalues and eigenvectors, numerical integration and numerical solution of linear differential equations. Use of a symbolic manipulator on both symbolic and numerical computation, applied to the above listed basic elements of numerical analysis. Prerequisites: MATH 250, COMP-SCI 201, COMP-SCI 281.

COMP-SCI 394R Applied Probability

Basic concepts of probability theory. Counting and measuring. Probability, conditional probability and independence. Discrete, continuous, joint random variables. Functions of random variables. Sums of independent random variables and transform methods. Random number generation and random event generation. Law of large numbers, central limit theorem, inequalities. Their applications to CS and ECE areas are stressed. Prerequisites: Math 300, STAT 235, CS 201R, or ECE 216.

COMP-SCI 394R Applied Probability

Basic concepts of probability theory. Counting and measuring. Probability, conditional probability and independence. Discrete, continuous, joint random variables. Functions of random variables. Sums of independent random variables and transform methods. Random number generation and random event generation. Law of large numbers, central limit theorem, inequalities. Their applications to CS and ECE areas are stressed. Prerequisites: Math 300, STAT 235, CS 201R, or ECE 216.

COMP-SCI 404 Introduction to Algorithms and Complexity

A rigorous review of asymptotic analysis techniques and algorithms: from design strategy (such as greedy, divide-and-conquer, and dynamic programming) to problem areas (such as searching, sorting, shortest path, spanning trees, transitive closures, and other graph algorithms, string algorithms) arriving at classical algorithms with supporting data structures for efficient implementation. Throughout, the asymptotic complexity is studied in worst case, best case, and average case for time and/or space, using appropriate analysis techniques (recurrence relations, amortization). Introduction to the basic concepts of computability and NP-complete theory. Prerequisites: Comp-Sci 291, Comp-Sci 303 or Comp-Sci 352, (Must be passed with a C or higher). Preferred co-requisites Comp-Sci 394R and Math 300. Offered: Every Fall

COMP-SCI 411 Introduction To Telecommunications Systems

Representation of signals and systems, Fourier Series, Fourier Transform, transmission of signal through linear system, amplitude modulation systems, frequency and pulse modulation systems, sampling, time division multiplexing, digital modulation and noise

in modulation systems. Prerequisites: COMP-SCI 311, COMP-SCI 394R and MATH 250.

COMP-SCI 411 Introduction To Telecommunications Systems

Representation of signals and systems, Fourier Series, Fourier Transform, transmission of signal through linear system, amplitude modulation systems, frequency and pulse modulation systems, sampling, time division multiplexing, digital modulation and noise in modulation systems. Prerequisites: COMP-SCI 311, COMP-SCI 394R and MATH 250.

COMP-SCI 416 Telecommunications Systems: A Survey

Review of Telecommunications techniques; wire, radio, microwave, satellite and optical fiber communications systems; mobile phones, ISDN and broadband ISDN, Signalling System No. 7, CCITT telecommunications standards. Prerequisite: COMP-SCI 311 or consent of instructor.

COMP-SCI 416 Telecommunications Systems: A Survey

Review of Telecommunications techniques; wire, radio, microwave, satellite and optical fiber communications systems; mobile phones, ISDN and broadband ISDN, Signalling System No. 7, CCITT telecommunications standards. Prerequisite: COMP-SCI 311 or consent of instructor.

COMP-SCI 420 Introductory Networking and Applications

This introductory course examines the systems aspects of the different LAN/MAN/WAN models, including topics such as protocols, network operating systems, applications, management and wireless communication systems. It also examines how the different models are interconnected using bridges and routers. NOTE: NOT FOR GRADUATE CREDIT. Prerequisites: Senior Standing/Consent of Instructor

COMP-SCI 420 Theory Of Programming Languages

Formal definition of programming languages including specification of syntax and semantics; simple statements including precedence, infix, prefix and postfix notation; global properties of algorithmic languages including scope of declarations, storage allocation, grouping of statements, binding time of constituents, subroutines, coroutines and tasks; list of processing, string manipulation, and simulation languages; run-time representation of program and data structures. Prerequisite: CS 340. Equivalent to Math 421.

COMP-SCI 421 Fundamentals Of Data Communication

COMP-SCI 421 Fundamentals Of Data Communication

COMP-SCI 421A Foundations of Data Networks

This introductory course examines the analytical aspects of data communications and computer networking. Topics cover protocol concepts and performance analysis that arise in physical, data link layer, MAC sub layer, and network layer. Prerequisites: COMP-SCI 291, COMP-SCI 303, COMP-SCI 394R.

COMP-SCI 421A Foundations of Data Networks

This introductory course examines the analytical aspects of data communications and computer networking. Topics cover protocol concepts and performance analysis that arise in physical, data link layer, MAC sub layer, and network layer. Prerequisites: COMP-SCI 291, COMP-SCI 303, COMP-SCI 394R.

COMP-SCI 423 Client/Server Programming And Applications

Fundamentals of Client/Server programming using socket interface; features of network programming including connection oriented and connectionless communication in multiple environments (Windows, UNIX, and Java); other client/server mechanisms, such as RPC and RMI) and formal object environments designed to facilitate network programming (CORBA, COM and Beans). Prerequisites: COMP-SCI 352, or COMP-SCI 303 and COMP-SCI 431.

COMP-SCI 423 Client/Server Programming And Applications

Fundamentals of Client/Server programming using socket interface; features of network programming including connection oriented and connectionless communication in multiple environments (Windows, UNIX, and Java); other client/server mechanisms, such as RPC and RMI) and formal object environments designed to facilitate network programming (CORBA, COM and Beans). Prerequisites: COMP-SCI 352, or COMP-SCI 303 and COMP-SCI 431.

COMP-SCI 431 Introduction To Operating Systems

Concurrency and control of asynchronous processes, deadlocks, memory management, processor and disk scheduling, parallel processing, file system organization. Prerequisites: COMP-SCI 352 or COMP-SCI 303, and COMP-SCI 281R (or both E&C-

ENGR 226 and EDE 227 for ECE students).

COMP-SCI 431 Introduction To Operating Systems

Concurrency and control of asynchronous processes, deadlocks, memory management, processor and disk scheduling, parallel processing, file system organization. Prerequisites: COMP-SCI 352 or COMP-SCI 303, and COMP-SCI 281R (or both E&C-ENGR 226 and EDE 227 for ECE students).

COMP-SCI 441 Programming Languages: Design And Implementation

Programming language paradigms (Object oriented programming, functional programming, declarative programming, and scripting) and design tradeoffs in terms of binding, visibility, scope, lifetime, type-checking and abstraction. Programming language specification, grammar, lexical analysis, exception handling, and runtime considerations. Prerequisite: COMP-SCI 352.

COMP-SCI 444 Compiler/Translator Design

This course will teach modern compiler techniques applied to both general-purpose and domain-specific languages. The examples chosen will also convey a detailed knowledge of state-of-the-art based WWW technology. The fundamental goal of programming is to provide instructions to the computer hardware. The primary purpose of the compiler/translator is to facilitate communication from the programmer via some high level language to ultimately the computer hardware. Understanding how compiler/translators are built and operate is important to understanding efficiency of operation and storage. Prerequisite: COMP-SCI 352.

COMP-SCI 444 Compiler/Translator Design

This course will teach modern compiler techniques applied to both general-purpose and domain-specific languages. The examples chosen will also convey a detailed knowledge of state-of-the-art based WWW technology. The fundamental goal of programming is to provide instructions to the computer hardware. The primary purpose of the compiler/translator is to facilitate communication from the programmer via some high level language to ultimately the computer hardware. Understanding how compiler/translators are built and operate is important to understanding efficiency of operation and storage. Prerequisite: COMP-SCI 352.

COMP-SCI 449 Foundations of Software Engineering

The course introduces concepts of Software Engineering (definitions, context) and the Software Development Process (life cycle). Students will get a solid foundation in Agile methodology, SW requirements, Exceptions and Assertions, Verification and Validation, SW Models and modeling, and User Interface Design. Various SW Architectures will be discussed. Prerequisites: Comp-Sci 303 or Comp-Sci 352 (Must be passed with a C or higher)

COMP-SCI 451 Software Engineering

Introduction to all phases of the software life cycle including planning, requirements analysis, system specification, design, construction, testing, deployment, and maintenance. Evaluation of engineering methods, processes, techniques, and measurements. Analyzing and modeling software artifacts, assessing and controlling quality. Software evolution and reuse. Estimation and measurement of project and product attributes including cost, schedule, and productivity and quality. Nontechnical considerations including organization, project management and professionalism. Students work together in small teams to complete a sizable software project. Prerequisite: COMP-SCI 352.

COMP-SCI 451R Software Engineering Capstone

The course will focus on the requirements and project planning and managing of medium sized projects with deliverables of each phase of the software life cycle. Additional studies of software modeling, requirements specifications, configuration management, verification, validation, software evolution and quality and finally measurement, estimation and economics of the software process. Prerequisites: COMP-SCI 352 or COMP-SCI 449

COMP-SCI 456 Human Computer Interface

Design of human-computer interfaces considering the psychological and physical abilities of the user. User interface design from a functional and ergonomic perspective. Contents organization, visual organization, navigation. Use of graphical interface (GUI) and the development of high quality user interfaces. Prerequisites: COMP-SCI 451.

COMP-SCI 457 Software Architecture: Requirements & Design

Introduction to requirements and design engineering with emphasis on organization and presentation of system requirements and designs for customers, users and engineers; validation of requirements and design with needs of system customer; examination of requirement and design changes during the lifetime of a system; transformation of informal ideas into formal detailed descriptions; examination of the different stages in the design process including architectural design, interface design and data structure design, database design, program and transaction design; examination of domain modeling criteria and examination of design quality attributes. Also discusses non-functional attributes and project resource allocation. Prerequisite(s): COMP-SCI 352.

COMP-SCI 458 Software Architecture: Testing & Maintenance

Introduction of software system testing (including verification), software process, software reuse, software maintenance, and software re-engineering. Prerequisite(s): COMP-SCI 352.

COMP-SCI 461 Introduction To Artificial Intelligence

Search space generation, pruning and searching, employment of heuristics in simulation of the cognitive process, an overview of predicate calculus, automatic theorem proving. Prerequisite: COMP-SCI 441.

COMP-SCI 461 Introduction To Artificial Intelligence

Search space generation, pruning and searching, employment of heuristics in simulation of the cognitive process, an overview of predicate calculus, automatic theorem proving. Prerequisite: COMP-SCI 441.

COMP-SCI 464 Applied Artificial Intelligence

Intelligent agents. Solving problems by search. Game playing. Logical reasoning systems. Planning agents. Decision making. Learning methods. Neural networks and learning. Neural language processing. Perception Expert systems. Prerequisite(s): COMP-SCI 461 Artificial Intelligence.

COMP-SCI 464 Applied Artificial Intelligence

Intelligent agents. Solving problems by search. Game playing. Logical reasoning systems. Planning agents. Decision making. Learning methods. Neural networks and learning. Neural language processing. Perception Expert systems. Prerequisite(s): COMP-SCI 461 Artificial Intelligence.

COMP-SCI 465 Introduction To Microcomputers

Basics of microcomputer architecture, survey of current technology and hardware. Prerequisite: CS 250, 340. Equivalent to EE. 326.

COMP-SCI 470 Introduction To Database Management Systems

Database architecture, Data independence, Schema, E-R and Relational Database modeling, Relational algebra and calculus, SQL, File organizations, Relational database design, Physical database organization, Query processing and optimization, Transaction structure and execution, Concurrency control mechanism, Database recovery, database security. Prerequisites: COMP-SCI 352, COMP-SCI 431 (Recommended co-requisite).

COMP-SCI 471 Database Design, Implementation And Validation

This course discusses in detail all aspects of ORACLE database management systems. It covers in detail database design, implementation, and validation using ORACLE. In addition to these, it briefly covers ORACLE implementation, tuning, and implementation on Window NT. The course is suitable for undergrad seniors and professional alike. Prerequisite: COMP-SCI 352

COMP-SCI 475 Introduction To Computer Graphics

Interactive Computer Graphics, Hardware Interaction, 3D transformations, Shading, Lighting and Texturing. Prerequisite: COMP-SCI 352.

COMP-SCI 481 Advanced Computer Architecture

Organization and Function of Memories, Direct Access Storage Devices, Central Processor Units, and Sequential Storage Devices, Classical Von Neuman Architecture. Prerequisite: COMP-SCI 281 and COMP-SCI 282.

COMP-SCI 481 Advanced Computer Architecture

Organization and Function of Memories, Direct Access Storage Devices, Central Processor Units, and Sequential Storage Devices, Classical Von Neuman Architecture. Prerequisite: COMP-SCI 281 and COMP-SCI 282.

COMP-SCI 490 Special Topics

Selected topics in specific areas of computer science. May be repeated for credit when the topic varies.

COMP-SCI 490 Special Topics

Selected topics in specific areas of computer science. May be repeated for credit when the topic varies.

COMP-SCI 490CI Special Topics

COMP-SCI 490IS Special Topics

COMP-SCI 490SI Special Topics

COMP-SCI 490SM Special Topics

COMP-SCI 491 Internship

Students may participate in structured internships under the joint supervision of an employer and a faculty member. The student must carry out significant professional responsibilities that also have academic merit. The number of credit hours is based on the quality of the academic experience. Available for credit/nocredit only and students must be in good standing with at least 18 credit hours of CS/IT counting towards the degree. Registration by consent number only; petition forms for CS/IT491 Internships are available in the office of CSEE Division and on the web. Prerequisite: Junior level or above and consent of instructor.

Offered: Every Semester Restrictions: None

COMP-SCI 491 Internship

Students may participate in structured internships under the joint supervision of an employer and a faculty member. The student must carry out significant professional responsibilities that also have academic merit. The number of credit hours is based on the quality of the academic experience. Available for credit/nocredit only and students must be in good standing with at least 18 credit hours of CS/IT counting towards the degree. Registration by consent number only; petition forms for CS/IT491 Internships are available in the office of CSEE Division and on the web. Prerequisite: Junior level or above and consent of instructor.

Offered: Every Semester Restrictions: None

COMP-SCI 493 Introduction To Computability, Formal Languages And Automata

Regular expressions and finite state machines. Context-free grammars and pushdown automata. Turing machine. Church's Thesis. Primitive recursive functions and computational complexity. Undecidability. Prerequisite: COMP-SCI 291.

COMP-SCI 494R Applied Stochastic Models

Review of basic probability including properties of joint random variables and functions of random variables. Discrete and continuous random processes, such as the Poisson process, Brownian motion, and white Gaussian noise. Linear filtering of random processes. Markovian birth and death processes and elementary queuing theory. Prerequisite: CS 394R or permission from instructor Offered: Fall Semester Restrictions: None

COMP-SCI 497 Directed Readings

Readings in an area selected by an undergraduate student in consultation with a faculty member. Arrangements must be made prior to registration.

COMP-SCI 497 Directed Readings

Readings in an area selected by an undergraduate student in consultation with a faculty member. Arrangements must be made prior to registration.

COMP-SCI 498 Research Seminar

Undergraduate research based on intensive readings from the current research literature under the direction of a faculty member. Arrangements must be made prior to registration.

COMP-SCI 498 Research Seminar

Undergraduate research based on intensive readings from the current research literature under the direction of a faculty member. Arrangements must be made prior to registration.

COMP-SCI 499 Undergraduate Research

Completion of project, including a final written report, under the direction of a faculty member. A prospectus must be accepted prior to registration.

COMP-SCI 499 Undergraduate Research

Completion of project, including a final written report, under the direction of a faculty member. A prospectus must be accepted prior to registration.

Electrical and Computer Engineering (E&C-ENGR)

E&C-ENGR 110 Introduction to Electrical and Computer Engineering

Introduction to the profession of electrical and computer engineering, other engineering disciplines, ethics, environmental responsibility, student success strategies, and teamwork.

E&C-ENGR 110 Introduction to Electrical and Computer Engineering

Introduction to the profession of electrical and computer engineering, other engineering disciplines, ethics, environmental responsibility, student success strategies, and teamwork.

E&C-ENGR 216 Engineering Computation

Development, analysis and synthesis of structured computer programs for solving engineering problems in the Python, MATLAB, and C languages. Introduction to algorithms and data structures. Prerequisite: Math 110 or equivalent

E&C-ENGR 216 Engineering Computation

Development, analysis and synthesis of structured computer programs for solving engineering problems in the Python, MATLAB, and C languages. Introduction to algorithms and data structures. Prerequisite: Math 110 or equivalent

E&C-ENGR 226 Logic Design

Design of combinational logic circuits, logic minimization techniques, design of RAM, ROM, PLA, PAL, design of sequential logic circuits, state machine design techniques, digital system design. Must be taken concurrently with E&C-ENGR 227.

E&C-ENGR 227 Logic Design Laboratory

Laboratory for 226. Experimental topics related to the design of combinational and sequential logic systems and small digital systems. Co-requisite: E&C-ENGR 226.

E&C-ENGR 228 Introduction to Computer Design

This course covers computer organizations and fundamental computer design techniques. It also discusses design of computer data unit, control unit, input-output, microprogramming. Memory systems (RAM memory, Cache memory, interrupts, secondary memory) and direct memory access design is also discussed. Verilog HDL design is introduced and applied to small digital systems. Prerequisites: E&C-ENGR 226 and E&C-ENGR 227.

E&C-ENGR 228 Introduction to Computer Design

This course covers computer organizations and fundamental computer design techniques. It also discusses design of computer data unit, control unit, input-output, microprogramming. Memory systems (RAM memory, Cache memory, interrupts, secondary memory) and direct memory access design is also discussed. Verilog HDL design is introduced and applied to small digital systems. Prerequisites: E&C-ENGR 226 and E&C-ENGR 227.

E&C-ENGR 229 Introduction to Computer Design Laboratory

This laboratory course covers experimental topics related to the design of digital computer systems and arithmetic circuits which students study in the E&C-ENG 288. Prerequisites: E&G-ENG 226 and E&G-ENG 227, and must be taken concurrently with E&C-ENG 228.

E&C-ENGR 229 Introduction to Computer Design Laboratory

This laboratory course covers experimental topics related to the design of digital computer systems and arithmetic circuits which students study in the E&C-ENG 288. Prerequisites: E&G-ENG 226 and E&G-ENG 227, and must be taken concurrently with E&C-ENG 228.

E&C-ENGR 230 Biological Engineering

An introductory course that examines biological systems from an engineering viewpoint using engineering models. The student is introduced to friendly computer tools to model system behavior of first and second order systems and the effects of diffusion. The tools are then used to study neuron models in terms of diffusion, charge drift and the Einstein relation, ion pumps, membrane potential and the Goldman equation. The tools are then used to study closed loop models of human muscles, eye movements and the body's thermoregulation system. Prerequisites: Math 210 and some computer programming skills

E&C-ENGR 241 Applied Engineering Analysis I

Partial differentiation, multiple integrals, first and second order ordinary differential equations, partial fractions, and Laplace transform solution of Ordinary Differential Equations. Prerequisites: Math 220. (Must be passed with a C or higher). Prerequisites: Math 220 and PHYSICS 250. Co-requisite: Physics 240.

E&C-ENGR 241 Applied Engineering Analysis I

Partial differentiation, multiple integrals, first and second order ordinary differential equations, partial fractions, and Laplace transform solution of Ordinary Differential Equations. Prerequisites: Math 220. (Must be passed with a C or higher). Prerequisites: Math 220 and PHYSICS 250. Co-requisite: Physics 240.

E&C-ENGR 241 Applied Engineering Analysis I

Partial differentiation, multiple integrals, first and second order ordinary differential equations, partial fractions, and Laplace transform solution of Ordinary Differential Equations. Prerequisites: Math 220. (Must be passed with a C or higher).

Prerequisites: Math 220 and PHYSICS 250. Co-requisite: Physics 240.

E&C-ENGR 250 Engineering Mechanics and Thermodynamics

This course concentrates on practical concepts in mechanics and thermodynamics for ECE majors, such as the practical use of forces, moments, couples, centroids, and moment of inertia, friction, manipulating systems of rigid bodies in motion and applying conservation of energy to gases, liquids, and solids. Materials will also be addressed. Prerequisites: MATH 220 and PHYSICS 240.

E&C-ENGR 250 Engineering Mechanics and Thermodynamics

This course concentrates on practical concepts in mechanics and thermodynamics for ECE majors, such as the practical use of forces, moments, couples, centroids, and moment of inertia, friction, manipulating systems of rigid bodies in motion and applying conservation of energy to gases, liquids, and solids. Materials will also be addressed. Prerequisites: MATH 220 and PHYSICS 240.

E&C-ENGR 276 Circuit Theory I

Kirchoff's circuit laws, Ohm's Law, nodal and mesh analyses, source transformations, superposition, Thevenin and Norton equivalents, transient analysis of 1st and 2nd order systems. AC circuit analysis, phasors, impedance, sinusoidal steady-state responses, operational amplifiers and PSpice Prerequisites: Physics 250 with E&C-ENGR 341R concurrently Restrictions: open to all ECE majors; all others by permissions

E&C-ENGR 276 Circuit Theory I

Kirchoff's circuit laws, Ohm's Law, nodal and mesh analyses, source transformations, superposition, Thevenin and Norton equivalents, transient analysis of 1st and 2nd order systems. AC circuit analysis, phasors, impedance, sinusoidal steady-state responses, operational amplifiers and PSpice Prerequisites: Physics 250 with E&C-ENGR 341R concurrently Restrictions: open to all ECE majors; all others by permissions

E&C-ENGR 276 Circuit Theory I

Kirchoff's circuit laws, Ohm's Law, nodal and mesh analyses, source transformations, superposition, Thevenin and Norton equivalents, transient analysis of 1st and 2nd order systems. AC circuit analysis, phasors, impedance, sinusoidal steady-state responses, operational amplifiers and PSpice Prerequisites: Physics 250 with E&C-ENGR 341R concurrently Restrictions: open to all ECE majors; all others by permissions

E&C-ENGR 277 Circuit Theory I Lab

Introduction to the use and limitations of basic instruments used in electrical testing and measurement. Experimental techniques and laboratory safety. Data gathering, interpretation and presentation. Preparation of laboratory reports. Experimental work supporting theoretical concepts developed in E&C-ENGR 276. Must be taken with E&C-ENGR 276

E&C-ENGR 277 Circuit Theory I Lab

Introduction to the use and limitations of basic instruments used in electrical testing and measurement. Experimental techniques and laboratory safety. Data gathering, interpretation and presentation. Preparation of laboratory reports. Experimental work supporting theoretical concepts developed in E&C-ENGR 276. Must be taken with E&C-ENGR 276

E&C-ENGR 277 Circuit Theory I Lab

Introduction to the use and limitations of basic instruments used in electrical testing and measurement. Experimental techniques and laboratory safety. Data gathering, interpretation and presentation. Preparation of laboratory reports. Experimental work supporting theoretical concepts developed in E&C-ENGR 276. Must be taken with E&C-ENGR 276

E&C-ENGR 301 Fundamental Topics In Electrical And Computer Engineering

Undergraduate topics in electrical or computer engineering. Prerequisite: Instructor's consent. Offered: On demand.

E&C-ENGR 301 Fundamental Topics In Electrical And Computer Engineering

Undergraduate topics in electrical or computer engineering. Prerequisite: Instructor's consent. Offered: On demand.

E&C-ENGR 301EA Topics in Electrical Engineering

E&C-ENGR 301ES Topics in Electrical Engineering

E&C-ENGR 302 Electromagnetic Waves and Fields

Maxwell's equations plane waves in lossless and lossy media transmission line theory and Smith Chart - single stub matching rectangular waveguides - TE and TM modes rectangular cavity resonators electromagnetic radiation from Hertzian point sources,

dipole and loop antennas simple linear arrays Friis formula for radar and wireless systems. Prerequisites: PHYS 250 ECE 341 R, and ECE 376 Restrictions SCE students only or with special permission.

E&C-ENGR 302 Electromagnetic Waves and Fields

Maxwell's equations plane waves in lossless and lossy media transmission line theory and Smith Chart - single stub matching rectangular waveguides - TE and TM modes rectangular cavity resonators electromagnetic radiation from Hertzian point sources, dipole and loop antennas simple linear arrays Friis formula for radar and wireless systems. Prerequisites: PHYS 250 ECE 341 R, and ECE 376 Restrictions SCE students only or with special permission.

E&C-ENGR 303 Traveling Waves And Fields-Laboratory

Students will be required to write computer programs that exploit the MATLAB toolbox features and write short technical reports on the results. Typical projects are: (a) signal amplitude and delay distortion on lossy transmission lines, (b) performance comparison of transient behavior of PCB, stripline, microstrip transmission line configurations and (c) cross-talk modeling on transmission lines (optional). Prerequisite: PSpice and MATLAB knowledge/proficiency. Co-requisite: E&C-ENGR 302

E&C-ENGR 316 Microcomputer Fundamentals

Computer arithmetic, combinational and sequential circuit analysis and design. Computer organization, bus control, input/output transfers, and interrupts. Introduction to microprocessor-based systems. Prerequisites: E&C-ENGR 216 with E&C-ENGR 317 concurrently. No longer offered, please see advisor.

E&C-ENGR 317 Microcomputer Fundamentals Laboratory

Laboratory for E&C-ENGR 316. Combinational and sequential logic. 8-bit microprocessors. No longer offered, please see advisor.

E&C-ENGR 326 Logic Design

Digital electronics, integrated circuit level logic design, algorithmic state machines, microprocessor architecture and interfacing and digital systems design methodology. Must be taken concurrent with E&C-ENGR 327. Prerequisites: E&C-ENGR 316 with a C or higher. No longer offered, please see advisor.

E&C-ENGR 326 Microcomputer Architecture And Interfacing

Digital electronics, integrated circuit level logic design, algorithmic state machines, microprocessor architecture and interfacing and digital systems design methodology. Must be taken concurrent with ECE 327. Prerequisites: ECE 316 with a C or higher. Offered: Winter

E&C-ENGR 327 Logic Design Laboratory

Laboratory for 326. Experimental topics related to the design of sequential logic systems and small digital systems. Must be taken concurrent with E&C-ENGR 326. Prerequisites: E&C-ENGR 317 with a C or higher. No longer offered, please see advisor.

E&C-ENGR 327 Computer Architecture

Laboratory for 326. Experimental topics related to the design of sequential logic systems and small digital systems. Must be taken concurrent with ECE 326. Prerequisites: ECE317 with a C or higher. Offered: Winter

E&C-ENGR 330 Electronic Circuits

Application of operational amplifiers, semiconductors device physics, elementary analysis and design of analog electronic circuits that utilize diodes, BJT's, and MOSFET's in single and multistage amplifiers with passive loads and power amplifiers; DC biasing, small signal analysis and calculation of frequency responses. The use of CAD (Spice) in the analysis and design of electronic circuits. Prerequisites: E&C-ENGR 276 with a C or higher. Co-requisite: E&C-ENGR 331

E&C-ENGR 330 Electronic Circuits

Application of operational amplifiers, semiconductors device physics, elementary analysis and design of analog electronic circuits that utilize diodes, BJT's, and MOSFET's in single and multistage amplifiers with passive loads and power amplifiers; DC biasing, small signal analysis and calculation of frequency responses. The use of CAD (Spice) in the analysis and design of electronic circuits. Prerequisites: E&C-ENGR 276 with a C or higher. Co-requisite: E&C-ENGR 331

E&C-ENGR 331 Electronic Circuits Laboratory

Laboratory experiments in the application of operational amplifiers, the analysis, design, and testing of single and multistage amplifiers with passive loads, and the measurement of frequency response. Prerequisites: E&C-ENGR 276 with a C and E&C-ENGR 277. Co-requisite: E&C-ENGR 330.

E&C-ENGR 331 Electronic Circuits Laboratory

Laboratory experiments in the application of operational amplifiers, the analysis, design, and testing of single and multistage

amplifiers with passive loads, and the measurement of frequency response. Prerequisites: E&C-ENGR 276 with a C and E&C-ENGR 277. Co-requisite: E&C-ENGR 330.

E&C-ENGR 341 Engineering Mathematics

Linear homogeneous and inhomogeneous differential equations, Laplace transform with applications; trigonometric and complex (exponential) Fourier series; Fourier transforms; Z-transforms; Matrices & properties and definition; Gaussian elimination, linear systems, Cramer's rule, rank and inverse of a matrix; eigenvalue and eigenvectors. Their applications to transient analysis of electrical circuits, communication systems, EM theory, etc. will be discussed. Prerequisites: Math 250 and ECE 216. Students who have Math 345 should enroll in 3 credit hours.

E&C-ENGR 341R Applied Engineering Analysis II

Complex number; Euler's formulas, analytic functions, Taylor and Laurent series; Cauchy residue theorem and application to evaluation of integrals; linear algebra, eigenvalue and eigenvectors; Fourier series and transforms. Prerequisites: ECE 241 and PHYSICS 250.

E&C-ENGR 341R Applied Engineering Analysis II

Complex number; Euler's formulas, analytic functions, Taylor and Laurent series; Cauchy residue theorem and application to evaluation of integrals; linear algebra, eigenvalue and eigenvectors; Fourier series and transforms. Prerequisites: ECE 241 and PHYSICS 250.

E&C-ENGR 358 Introduction to Control Systems

Study of feedback techniques, with applications to control systems. Includes modeling, applications of Bode plot, root locus, state-variable, and Nyquist methods. Prerequisite: E&C-ENGR 380.

E&C-ENGR 358 Introduction to Control Systems

Study of feedback techniques, with applications to control systems. Includes modeling, applications of Bode plot, root locus, state-variable, and Nyquist methods. Prerequisite: E&C-ENGR 380.

E&C-ENGR 366 Power Engineering

Magnetic circuitry in general and in machinery; DC machine theory, operation, applications; transformer circuits, synchronous machine theory, operation applications; basic principles of energy conversion; use of matrices; basic principles of power transmission and control. Prerequisites: E&C-ENGR 376 with E&C-ENGR 302 concurrently. Offered: Winter.

E&C-ENGR 376 Circuit Theory II

Power, three-phase circuits, complex s-plane methods, resonance, frequency response, and two-port networks for circuit analysis. Prerequisites: E&C-ENGR 276 and must be taken concurrently with E&C-ENGR 377

E&C-ENGR 376 Circuit Theory II

Power, three-phase circuits, complex s-plane methods, resonance, frequency response, and two-port networks for circuit analysis. Prerequisites: E&C-ENGR 276 and must be taken concurrently with E&C-ENGR 377

E&C-ENGR 376 Distributed Transmission Systems

A continuation of ECE 276. R-L-C transients responses, complex s-plane methods, resonance, frequency response, two-port networks, Laplace transforms for circuit analysis. Prerequisite: ECE 377 concurrently. Offered: Every year; Fall.

E&C-ENGR 377 Circuit Theory II Lab

Continuation of E&C-ENGR 277 introducing the use of additional instruments used in electrical testing and measurements. Statistical data evaluation methods. Experimental work supporting concepts developed in E&C ENGR 376. Prerequisites: E&C-ENGR 277 and must be taken concurrently with E&C-ENGR 376.

E&C-ENGR 377 Circuit Theory II Lab

Continuation of E&C-ENGR 277 introducing the use of additional instruments used in electrical testing and measurements. Statistical data evaluation methods. Experimental work supporting concepts developed in E&C ENGR 376. Prerequisites: E&C-ENGR 277 and must be taken concurrently with E&C-ENGR 376.

E&C-ENGR 377 Circuit Theory II Lab

Continuation of E&C-ENGR 277 introducing the use of additional instruments used in electrical testing and measurements. Statistical data evaluation methods. Experimental work supporting concepts developed in E&C ENGR 376. Prerequisites: E&C-ENGR 277 and must be taken concurrently with E&C-ENGR 376.

E&C-ENGR 378 Systems Lab

Introduction to the use and limitations of basic instruments used in electrical testing and measurement. Experimental techniques

and laboratory safety. Data gathering, interpretation and presentation. Statistical data evaluation methods. Preparation of laboratory reports. Experimental work supporting theoretical concepts developed in E&C-ENGR 276. Prerequisite: E&C-ENGR 276.

E&C-ENGR 378 Microwave Principles

E&C-ENGR 380 Signals And Systems

Continuous and discrete-time signals and systems, linearity and time-invariance, impulse response and convolution. Fourier analysis of discrete and continuous signals and systems and the application of Laplace, z, and Fourier transforms. Prerequisite: E&C-ENGR 341R, and E&C-ENGR 381 concurrently.

E&C-ENGR 380 Signals And Systems

Continuous and discrete-time signals and systems, linearity and time-invariance, impulse response and convolution. Fourier analysis of discrete and continuous signals and systems and the application of Laplace, z, and Fourier transforms. Prerequisite: E&C-ENGR 341R, and E&C-ENGR 381 concurrently.

E&C-ENGR 380 Signals And Systems

Continuous and discrete-time signals and systems, linearity and time-invariance, impulse response and convolution. Fourier analysis of discrete and continuous signals and systems and the application of Laplace, z, and Fourier transforms. Prerequisite: E&C-ENGR 341R, and E&C-ENGR 381 concurrently.

E&C-ENGR 381 Signals And Systems Lab

Computer Laboratory for E&C-ENGR 380. Various signal processing software programs (MATLAB and DSP) are used to investigate properties and applications of continuous and discrete time signals and systems. Corequisite: E&C-ENGR 380.

E&C-ENGR 381 Signals And Systems Lab

Computer Laboratory for E&C-ENGR 380. Various signal processing software programs (MATLAB and DSP) are used to investigate properties and applications of continuous and discrete time signals and systems. Corequisite: E&C-ENGR 380.

E&C-ENGR 381 Signals And Systems Lab

Computer Laboratory for E&C-ENGR 380. Various signal processing software programs (MATLAB and DSP) are used to investigate properties and applications of continuous and discrete time signals and systems. Corequisite: E&C-ENGR 380.

E&C-ENGR 390 Engineering Coop/Internship

Students may participate in structured Engineering Coop/ Internship under the supervision of employer. They must carry out significant professional responsibilities and whatever additional assignments are determined by the employer. Prerequisite: Junior level or above or consent of instructor. Offered: Every semester.

E&C-ENGR 400 Problems In Electrical And Computer Engineering

Analytic or experimental problems pertaining to electrical or computer engineering. Prerequisites: Senior standing, instructor's approval and an approved petition from his or her degree coordinator.

E&C-ENGR 401 Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and instructor's approval.

E&C-ENGR 401 Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and instructor's approval.

E&C-ENGR 401AN Topics in Electrical Engineering

E&C-ENGR 401AS Topics In Electrical Engineering

E&C-ENGR 401CA Topics In Electrical Engineering

E&C-ENGR 401CI Topics in Electrical Engineering

E&C-ENGR 401DE Special Topics ECE

E&C-ENGR 401EC Topics In Electrical Engineering

E&C-ENGR 401EN Topics in Electrical Engineering

E&C-ENGR 401FE Topics In Electrical Engineering

E&C-ENGR 401FE Topics In Electrical Engineering

E&C-ENGR 401H Topics In Electrical And Computer Engineering

E&C-ENGR 401H Topics In Electrical And Computer Engineering

E&C-ENGR 401IR Topics In Electrical Engineering

E&C-ENGR 401NN Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and instructor's approval.

E&C-ENGR 401NN Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and instructor's approval.

E&C-ENGR 401PE Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and instructor's approval.

E&C-ENGR 401PE Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and instructor's approval.

E&C-ENGR 401PG Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and instructor's approval.

E&C-ENGR 401PL Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and instructor's approval.

E&C-ENGR 401PL Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and instructor's approval.

E&C-ENGR 401RB Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and instructor's approval.

E&C-ENGR 401RD Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and

instructor's approval.

E&C-ENGR 401RS Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and instructor's approval.

E&C-ENGR 401RS Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and instructor's approval.

E&C-ENGR 401VL Topics in Electrical Engineering

E&C-ENGR 401WN Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and instructor's approval.

E&C-ENGR 401XX Topics In Electrical And Computer Engineering

Topics covering current and new technical developments in electrical or computer engineering. Prerequisites: Senior standing and instructor's approval.

E&C-ENGR 402WI Senior Design I

First capstone design course in electrical and computer engineering. Provides and accounts for laboratory, library, research and other work needed for the development of the project proposal. Stresses written and oral presentations and ethics. Prerequisites: E&C-ENGR 302, E&C-ENGR 380, E&C-ENGR 430, and E&C-ENGR 428R. Must have passed the WEPT test and can only be taken if student is within three semesters of graduation.

E&C-ENGR 402WI Senior Design I

First capstone design course in electrical and computer engineering. Provides and accounts for laboratory, library, research and other work needed for the development of the project proposal. Stresses written and oral presentations and ethics. Prerequisites: E&C-ENGR 302, E&C-ENGR 380, E&C-ENGR 430, and E&C-ENGR 428R. Must have passed the WEPT test and can only be taken if student is within three semesters of graduation.

E&C-ENGR 402WI Senior Design I

First capstone design course in electrical and computer engineering. Provides and accounts for laboratory, library, research and other work needed for the development of the project proposal. Stresses written and oral presentations and ethics. Prerequisites: E&C-ENGR 302, E&C-ENGR 380, E&C-ENGR 430, and E&C-ENGR 428R. Must have passed the WEPT test and can only be taken if student is within three semesters of graduation.

E&C-ENGR 403 Senior Design II

Second capstone design course in electrical and computer engineering. Project management, professional engineering practice, economic, environmental and safety considerations in project design, the development of written and oral presentation skills and working in teams. Provides laboratory experiences in prototyping, fabrication and troubleshooting of a design project. Prerequisite: E&C-ENGR 402WI.

E&C-ENGR 403WI Senior Design II

Second capstone design course in electrical and computer engineering. Project management, professional practice, ethical and engineering economic considerations and development of written and oral presentation skills. Provides laboratory experience in prototyping, fabrication, and troubleshooting of the design project. Stresses written and oral presentation. Prerequisite: E&C-ENGR 402WI.

E&C-ENGR 406 Parallel And Distributed Processing

Covers the fundamental issues involved in designing and writing programs for simultaneous execution. Semaphores and monitor constructs are covered to provide a basis for critical section programming. Expansion of these concepts provide a basis for the analysis and design of control systems for multiprocessor devices and computer networks. Prerequisites: 227 or suitable systems programming course or instructor's consent.

E&C-ENGR 408 State Variable Methods In Automatic Control

(Same as Mechanical and Aerospace Engineering 408) State variables for continuous and discrete-time dynamic control systems; controllability and observability; optimal control of linear systems. Prerequisite: ECE 206.

E&C-ENGR 412 Principles of RF/Microwave Engineering

General aspects of TE, TM and TEM mode propagation in waveguides; circular waveguides; optical waveguides; wave propagation on dielectric backed conductors; wire antennas; equivalence principle and aperture antennas; antenna impedance and mutual coupling in arrays; array beamforming; scattering matrix representations; impedance matching; resonators; filters, couplers and power-dividers; microstriplines and striplines; r.f. propagation in wireless and radar systems; conformal mapping techniques and applications (optional). Prerequisites: E&C-ENGR 302, E&C-ENGR 380, E&C-ENGR 381, MATLAB proficiency.

E&C-ENGR 412 Principles of RF/Microwave Engineering

General aspects of TE, TM and TEM mode propagation in waveguides; circular waveguides; optical waveguides; wave propagation on dielectric backed conductors; wire antennas; equivalence principle and aperture antennas; antenna impedance and mutual coupling in arrays; array beamforming; scattering matrix representations; impedance matching; resonators; filters, couplers and power-dividers; microstriplines and striplines; r.f. propagation in wireless and radar systems; conformal mapping techniques and applications (optional). Prerequisites: E&C-ENGR 302, E&C-ENGR 380, E&C-ENGR 381, MATLAB proficiency.

E&C-ENGR 412 Principles of RF/Microwave Engineering

General aspects of TE, TM and TEM mode propagation in waveguides; circular waveguides; optical waveguides; wave propagation on dielectric backed conductors; wire antennas; equivalence principle and aperture antennas; antenna impedance and mutual coupling in arrays; array beamforming; scattering matrix representations; impedance matching; resonators; filters, couplers and power-dividers; microstriplines and striplines; r.f. propagation in wireless and radar systems; conformal mapping techniques and applications (optional). Prerequisites: E&C-ENGR 302, E&C-ENGR 380, E&C-ENGR 381, MATLAB proficiency.

E&C-ENGR 413 R.F./Microwave Techniques For Wireless Systems Laboratory

Design of probe-and stripline-fed rectangular and circular patch microstrip antennas; simulation of performance using CAD tools; modeling of R.F. propagation path loss using CAD tools for site-specific prediction applications. Prerequisites: E&C-ENGR 302, E&C-ENGR 380, E&C-ENGR 341 or E&C-ENGR 401H, MATLAB proficiency. Co-requisite: E&C-ENGR 412. Offered on demand

E&C-ENGR 413 Introduction To Fourier Optics**E&C-ENGR 414 Microwave Engineering For Wireless Systems**

Microwave networks; s-, z-, y- and abcd matrices; signal flow graphs; circular waveguides; stripline & microstrip characteristics; impedance transformers; power dividers and directional couplers; microwave filters; microwave resonators; active microwave circuits. Prerequisites: ECE 302 and 380, MATLAB proficiency required. Restrictions: Open to all ECE majors; all others by permission

E&C-ENGR 414 Microwave Engineering For Wireless Systems

Microwave networks; s-, z-, y- and abcd matrices; signal flow graphs; circular waveguides; stripline & microstrip characteristics; impedance transformers; power dividers and directional couplers; microwave filters; microwave resonators; active microwave circuits. Prerequisites: ECE 302 and 380, MATLAB proficiency required. Restrictions: Open to all ECE majors; all others by permission

E&C-ENGR 414 Microwave Engineering For Wireless Systems

Microwave networks; s-, z-, y- and abcd matrices; signal flow graphs; circular waveguides; stripline & microstrip characteristics; impedance transformers; power dividers and directional couplers; microwave filters; microwave resonators; active microwave circuits. Prerequisites: ECE 302 and 380, MATLAB proficiency required. Restrictions: Open to all ECE majors; all others by permission

E&C-ENGR 415 Microwave Engineering For Wireless Systems Lab

Design & performance simulation of microwave filters and active microwave circuits; comparative analysis of impedance transformers; use of CAD tools in microwave circuit design. Prerequisites: E&C-Engr 414 Restrictions: MATLAB proficiency required.

E&C-ENGR 416 Neural And Adaptive Systems

A hands-on introduction to the theory and applications of neurocomputing. Includes classification, function approximation, supervised and unsupervised learning, time series analysis, and adaptive filtering using different feed-forward and recurrent artificial neural networks. Prerequisites: E&C-Engr 341 and Comp-Sci 394R; or an intermediate knowledge of calculus, probability, and linear algebra along with instructor's consent.

E&C-ENGR 416 Neural And Adaptive Systems

A hands-on introduction to the theory and applications of neurocomputing. Includes classification, function approximation, supervised and unsupervised learning, time series analysis, and adaptive filtering using different feed-forward and recurrent artificial neural networks. Prerequisites: E&C-Engr 341 and Comp-Sci 394R; or an intermediate knowledge of calculus, probability, and linear algebra along with instructor's consent.

E&C-ENGR 418 Introduction to Radar Systems

Radar equation; MT, Pulsed Doppler and Tracking Radars; detection of and information from radar signals; radar antennas; transmitters and receivers; radar propagation and clutter. Prerequisites: ECE 302, ECE 380 and ECE 381.

E&C-ENGR 424 Computer Design

Design of general purpose computers including arithmetic and control units, input/output, memory systems, microprogramming and introduction to parallel structures and processing. Prerequisite: E&C-ENGR 226. Offered: On demand.

E&C-ENGR 425 Computer Design Laboratory

Laboratory for E&C-ENGR 424. Design and implementation of basic computer units including fixed and floating-point adders and multipliers, ALU's, control units. Prediction of performance using various software packages. Prerequisites: E&C-ENGR 227 with E&C-ENGR 424 concurrently. Offered: On demand.

E&C-ENGR 426 Functional Languages And Architecture

Describes functional languages (e.g., LISP and FP) and the architecture to execute these languages including LISP machines and data flow computers.

E&C-ENGR 426 Microcomputer Architecture And Interfacing

Advanced microprocessor architecture and programming; interfacing and programming of peripherals. Parallel and serial communication, interrupts, direct memory access, coprocessors. Prerequisite: E&C-ENGR 226.

E&C-ENGR 426 Microcomputer Architecture And Interfacing

Advanced microprocessor architecture and programming; interfacing and programming of peripherals. Parallel and serial communication, interrupts, direct memory access, coprocessors. Prerequisite: E&C-ENGR 226.

E&C-ENGR 427 Microcomputer Laboratory

Laboratory for E&C-ENGR 426. Microprocessor hardware and software involving interfacing of peripherals to 8-bit and 16-bit microprocessor. Simple D/A conversion, music composition, and various programmable controllers. Prerequisites: E&C-ENGR 227 with E&C-ENGR 426 concurrently.

E&C-ENGR 427 Microcomputer Laboratory

Laboratory for E&C-ENGR 426. Microprocessor hardware and software involving interfacing of peripherals to 8-bit and 16-bit microprocessor. Simple D/A conversion, music composition, and various programmable controllers. Prerequisites: E&C-ENGR 227 with E&C-ENGR 426 concurrently.

E&C-ENGR 427 Microcomputer Laboratory

Laboratory for E&C-ENGR 426. Microprocessor hardware and software involving interfacing of peripherals to 8-bit and 16-bit microprocessor. Simple D/A conversion, music composition, and various programmable controllers. Prerequisites: E&C-ENGR 227 with E&C-ENGR 426 concurrently.

E&C-ENGR 428R Embedded Systems

This course examines the hardware/software aspects associated with developing microcontroller-based computer systems. The students learn about the architecture and assembly language for popular microcontrollers and how to take advantage of a variety of input/output options that include binary ports, A/D and D/A converters, communication ports, and interfacing techniques for various applications Prerequisites: E&C-ENGR 426 and E&C-ENGR 427 Co-requisite: E&C-ENGR 429

E&C-ENGR 429 Embedded Systems Laboratory

The laboratory introduces the students to a variety of challenging design projects using microcontroller interfacing techniques to develop real world applications, such as digital thermometer and digital pressure monitoring systems. Students must produce an individual design project. Prerequisite: E&C-ENGR 426 and E&C-ENGR 427 Co-requisite: E&C-ENGR 428R

E&C-ENGR 429 Embedded Systems Laboratory

The laboratory introduces the students to a variety of challenging design projects using microcontroller interfacing techniques to develop real world applications, such as digital thermometer and digital pressure monitoring systems. Students must produce an individual design project. Prerequisite: E&C-ENGR 426 and E&C-ENGR 427 Co-requisite: E&C-ENGR 428R

E&C-ENGR 429 Embedded Systems Laboratory

The laboratory introduces the students to a variety of challenging design projects using microcontroller interfacing techniques to develop real world applications, such as digital thermometer and digital pressure monitoring systems. Students must produce an individual design project. Prerequisite: E&C-ENGR 426 and E&C-ENGR 427 Co-requisite: E&C-ENGR 428R

E&C-ENGR 430 Power-Systems Stability**E&C-ENGR 430** Microelectronic Circuits

The analysis and design of feedback amplifiers, oscillators and of microelectronic circuits that employ diodes, MOSFETs and BJTs in current mirrors, amplifiers with active loads, differential amplifiers, operational amplifiers, and CMOS Logic gates. The use of CAD (Spice) in the analysis and design of feedback amplifiers and microelectronic circuits. Prerequisite: E&C-ENGR 330 and E&C-ENGR 331. Must be taken concurrently with E&C-ENGR 431.

E&C-ENGR 433 Analog Integrated Circuit Design

Principles of the design and analysis of analog integrated circuits. Study of MOS device physics and second order effects, device fabrication and layout, noise, single-stage and differential amplifiers, current mirrors, reference circuits, opamps and frequency compensation. Introduction to CAS circuit design and Cadence design tools. Prerequisites: ECE 276

E&C-ENGR 435 Design And Simulation Of Vlsi Circuits

Design of NMOS and CMOS integrated circuits with emphasis on digital applications. Device models are developed for circuit simulation. Prerequisite: E&C-ENGR 330 or instructor's consent.

E&C-ENGR 435 Power Systems Relaying**E&C-ENGR 436** Power Electronics I

Power electronic device characteristics, important circuit and component concepts, phase controlled rectifiers, line communicated inverters and AC phase control. Includes laboratory projects. Prerequisite: E&C-ENGR 430.

E&C-ENGR 436 Power Electronics I

Power electronic device characteristics, important circuit and component concepts, phase controlled rectifiers, line communicated inverters and AC phase control. Includes laboratory projects. Prerequisite: E&C-ENGR 430.

E&C-ENGR 454 Robotic Control And Intelligence

Introduces robotics; robot system characteristics; robot motive power systems; geometric structure of robots; sensors and feedback; control applications and algorithms; data acquisition and output actuation functions; robots and Artificial Intelligence; microprocessor applications in robotics. Prerequisites: E&C-ENGR 358 and E&C-ENGR 226, or E&C-ENGR 426. Offered: on demand.

E&C-ENGR 458 Introduction To The Modeling And Management Of Uncertainty

Theoretical and practical issues in the modeling and management of uncertainty. Topics include probabilistic uncertainty, belief theory and fuzzy set theory. Applications to computer vision, pattern recognition and expert systems.

E&C-ENGR 458R Automatic Control

Techniques for feedback control system modeling and design. Includes applications of Bode plots, root locus, Nyquist methods, state-variables, compensator design, and computational aids. Prerequisites: E&C-ENGR 341 and E&C-ENGR 380

E&C-ENGR 460 Electromechanical Conversion I

Magnetic circuitry in general and in machinery; DC machine theory, operation, applications; transformer circuits, synchronous machine theory, operation applications; basic principles of energy conversion; introduction to power electronics; and basic principles of power transmission and control are covered. Prerequisite: E&C-ENGR 276 or E&C-ENGR 302.

E&C-ENGR 461 Electromechanical Conversion II

Application of fundamentals and concepts of power systems to practical power plan and industrial applications. Identification of the significant internal components of power system equipment. Single and Three Phase Circuits, DC and AC Generators/Alternators, Transformers, DC and AC Motors, DC and AC transmission, and System Electrical Protection. Prerequisite: E&C-ENGR 460.

E&C-ENGR 462 Symmetrical Components Analysis Of Power Systems

Short circuit analysis using symmetrical components. Simultaneous faults and open conductors. Prerequisite: E&C-ENGR 466

E&C-ENGR 462 Symmetrical Components Analysis Of Power Systems

Short circuit analysis using symmetrical components. Simultaneous faults and open conductors. Prerequisite: E&C-ENGR 466

E&C-ENGR 462 Symmetrical Components Analysis Of Power Systems

Short circuit analysis using symmetrical components. Simultaneous faults and open conductors. Prerequisite: E&C-ENGR 466

E&C-ENGR 463 Advanced Sustainable Energy Systems Engineering

Sustainable Energy Systems Engineering focuses on understanding the theory and application of emerging energy technologies, including solar, wind, biomass, oceanic, geothermal, hydropower, fuel cell (hydrogen), nuclear, and other more exotic energy sources. A premise of the course is that a sustainable energy technology must both be technically feasible and economically viable. Renewable energy sources will be highlighted with a focus on projections for a sustainable energy future. Graduate students will be assigned an additional project to work. Prerequisite: ECE 466

E&C-ENGR 464 Electric Transportation And Industrial Drives

Electric vehicle propulsion and industrial drives; review of DC and AC machine principles, traction motor requirements and performance, DC and AC industrial drives, heating effects. Prerequisite: E&C-ENGR 460. Offered: On demand

E&C-ENGR 466 Power Systems I

Power System fundamentals; Methods of power system analysis and design; Modeling of power systems components such as transmission lines, transformers and generators; Analysis of steady state operation of power system and unbalanced conditions. Prerequisites: E&C-ENGR 376 and 341R

E&C-ENGR 466 Power Systems I

Power System fundamentals; Methods of power system analysis and design; Modeling of power systems components such as transmission lines, transformers and generators; Analysis of steady state operation of power system and unbalanced conditions. Prerequisites: E&C-ENGR 376 and 341R

E&C-ENGR 466 Power Systems I

Power System fundamentals; Methods of power system analysis and design; Modeling of power systems components such as transmission lines, transformers and generators; Analysis of steady state operation of power system and unbalanced conditions. Prerequisites: E&C-ENGR 376 and 341R

E&C-ENGR 467 Power Systems II

Power system matrices. Power flow analysis. Gauss-Seidel and Newton-Raphson techniques. Fast-decoupled load flow. Economic dispatch. Voltage control system. Power system control. Prerequisites: E&C-ENGR 466 and E&C-ENGR 358.

E&C-ENGR 467 Power Systems II

Power system matrices. Power flow analysis. Gauss-Seidel and Newton-Raphson techniques. Fast-decoupled load flow. Economic dispatch. Voltage control system. Power system control. Prerequisites: E&C-ENGR 466 and E&C-ENGR 358.

E&C-ENGR 468 Electric Power Distribution Systems

Operation and design of utility and industrial distribution systems including distribution system planning; load characteristics; application of distribution transformers; design of subtransmission lines, distribution substations, primary systems, secondary systems; application of capacitors; voltage regulation and reliability. Prerequisite: E&C-ENGR 460. Offered: On Demand.

E&C-ENGR 468 Electric Power Distribution Systems

Operation and design of utility and industrial distribution systems including distribution system planning; load characteristics; application of distribution transformers; design of subtransmission lines, distribution substations, primary systems, secondary systems; application of capacitors; voltage regulation and reliability. Prerequisite: E&C-ENGR 460. Offered: On Demand.

E&C-ENGR 469 Computer Applications To Power Systems

Load flow, fault, network reduction, and transient stability studies on digital and analog computers. Prerequisites: E&C-ENGR 460K. Offered: On demand.

E&C-ENGR 470 Reliability Of Electric Power Systems

Principles of reliability as applied to Power Systems with an overview of current methods to measure reliability of Power Systems are introduced. Analytical and Monte Carlo models for component state and system state duration, with contingency analysis and linear programming for optimal power flow are also covered. Restoration times and cost assessment after component or system failures due to internal or external problems provide focus to practical operating principles. Prerequisite: E&C-ENGR 466, COMP-SCI 394R or equivalent.

E&C-ENGR 470 Reliability Of Electric Power Systems

Principles of reliability as applied to Power Systems with an overview of current methods to measure reliability of Power Systems are introduced. Analytical and Monte Carlo models for component state and system state duration, with contingency analysis and linear programming for optimal power flow are also covered. Restoration times and cost assessment after component or system failures due to internal or external problems provide focus to practical operating principles. Prerequisite: E&C-ENGR 466, COMP-SCI 394R or equivalent.

E&C-ENGR 470 Reliability Of Electric Power Systems

Principles of reliability as applied to Power Systems with an overview of current methods to measure reliability of Power Systems are introduced. Analytical and Monte Carlo models for component state and system state duration, with contingency analysis and linear programming for optimal power flow are also covered. Restoration times and cost assessment after component or system failures due to internal or external problems provide focus to practical operating principles. Prerequisite: E&C-ENGR 466, COMP-SCI 394R or equivalent.

E&C-ENGR 472 Power Generation Systems

Multi discipline survey of power generation systems and subsystems, including coal-fired steam, co-generation and combined cycle, and combustion turbines. With a goal of reviewing all the major subsystems, this course exposes the electrical engineer to all the mechanical, thermodynamic, and chemical processes of power generation systems. Prerequisite: ECE 466

E&C-ENGR 472 Power Generation Systems

Multi discipline survey of power generation systems and subsystems, including coal-fired steam, co-generation and combined cycle, and combustion turbines. With a goal of reviewing all the major subsystems, this course exposes the electrical engineer to all the mechanical, thermodynamic, and chemical processes of power generation systems. Prerequisite: ECE 466

E&C-ENGR 474 Introduction To Communication Systems

Introduction to principles and fundamentals of communication systems. Signal representation and analysis, Fourier transform and applications, probability and random variables, analog and digital modulation techniques. Prerequisites: E&C-ENGR 474, E&C-ENGR 380 and Comp-Sci 394R.

E&C-ENGR 474 Introduction To Communication Systems

Introduction to principles and fundamentals of communication systems. Signal representation and analysis, Fourier transform and applications, probability and random variables, analog and digital modulation techniques. Prerequisites: E&C-ENGR 474, E&C-ENGR 380 and Comp-Sci 394R.

E&C-ENGR 476 Introduction To Wireless Communication Systems

Principles of wireless communication analysis and design. Digital communication basics, cellular radio, wireless PCS communications, multiple access techniques, channel coding and equalization, and standards of digital cellular/PCS systems. Prerequisites: E&C-ENGR 474.

E&C-ENGR 476 Introduction To Wireless Communication Systems

Principles of wireless communication analysis and design. Digital communication basics, cellular radio, wireless PCS communications, multiple access techniques, channel coding and equalization, and standards of digital cellular/PCS systems. Prerequisites: E&C-ENGR 474.

E&C-ENGR 477 Introduction to Wireless Networking

Principles of the design and analysis of wireless networks. Study of medium access control, administration routing and adaptation to the complexities of the wireless environment. Investigation of networking issues in the IEEE 802.11 family of standards, IEEE 802.15 (Bluetooth), Long Term Evolution, cellular, satellite, ad hoc, and sensor networks. Prerequisites: CS 394R.

E&C-ENGR 478 Modulation And Transmission Of Signals

Review of Fourier analysis of signals, study of signal transmission. Analog modulation and demodulation, use of nonlinear devices in modulation systems, sampling and pulse modulation systems, sampling and pulse modulation. Prerequisites: E&C-ENGR 330 and E&C-ENGR 380. On demand.

E&C-ENGR 480 Digital Signal Processing

Concepts, analytic tools, design techniques used in computer processing of signals: signal representation, sampling, discrete-time system analysis, recursive/non-recursive filters, design/implementation of digital filters. Prerequisites: E&C-ENGR 380

E&C-ENGR 480 Digital Signal Processing

Concepts, analytic tools, design techniques used in computer processing of signals: signal representation, sampling, discrete-time system analysis, recursive/non-recursive filters, design/implementation of digital filters. Prerequisites: E&C-ENGR 380

E&C-ENGR 480 High Frequency Transmission And Radiation

E&C-ENGR 481 Digital Signal Processing Laboratory

Laboratory for E&C-ENGR 480. Processing methods for discrete-time signals and digital filters. Prerequisites: E&C-ENGR 378 with E&C-ENGR 480 concurrently. Offered: On demand.

E&C-ENGR 482 Analog Signal Processing

Fundamentals of network synthesis with emphasis on the design of analog filters; the approximation problem, sensitivity, LC and RC passive filters, RC active filters, and switched capacitor filters. Prerequisites: E&C-ENGR 330 and E&C-ENGR 380. Offered: on demand.

E&C-ENGR 483 Analog Signal Processing Laboratory

Laboratory for E&C-ENGR 482. Analog filters based upon active-RC circuits. Integrated circuit universal active filters and switched capacitor active filters. Prerequisites: E&C-ENGR 331 with E&C-ENGR 482 concurrently. Offered: On demand.

E&C-ENGR 484 Digital Image Processing

Fundamentals of digital image processing hardware and software, including digital image acquisition, display, compression, transforms and segmentation. Prerequisites: E&C-ENGR 380 and experience in a high-level programming language.

E&C-ENGR 484 Digital Image Processing

Fundamentals of digital image processing hardware and software, including digital image acquisition, display, compression, transforms and segmentation. Prerequisites: E&C-ENGR 380 and experience in a high-level programming language.

E&C-ENGR 484 Digital Image Processing

Fundamentals of digital image processing hardware and software, including digital image acquisition, display, compression, transforms and segmentation. Prerequisites: E&C-ENGR 380 and experience in a high-level programming language.

E&C-ENGR 486 Pattern Recognition

Pattern recognition techniques of applications such as automatic recognition for speech, visual inspection systems, clinical medicine, automatic photographic recognition systems and advanced automation systems. Prerequisite: Senior standing

E&C-ENGR 486 Pattern Recognition

Pattern recognition techniques of applications such as automatic recognition for speech, visual inspection systems, clinical medicine, automatic photographic recognition systems and advanced automation systems. Prerequisite: Senior standing

E&C-ENGR 488 Introduction To Digital Image Processing

Fundamentals of digital image processing hardware and software, including digital image acquisition, image display, image enhancement and compression. Prerequisites: Senior standing; experience in high-level language. Offered: On demand

E&C-ENGR 490 Digital Computer Applications In Engineering

Use of digital computers for the solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, differentiation, and differential equations. Prerequisites: MATH 250, E&C-ENGR 216 and junior standing in engineering. On demand.

E&C-ENGR 491 Internship

Students may participate in structured internships under the joint supervision of an employer and a faculty member. The student must carry out significant professional responsibilities that also have academic merit. The number of credit hours is based on the quality of the academic experience. Available for credit/nocredit only and students must be in good standing with at least 18 credit hours of ECE courses counting towards the degree. Registration by consent number only: petition forms for E&C-ENGR 491 internships are available in the office of CSEE Division and on the web. Prerequisite: At least 18 hours of E&C-ENGR courses toward the degree.

E&C-ENGR 492WI Senior Design I

First capstone design course in electrical engineering. Engineering project planning and development, professional practice, ethics and engineering economy. Stresses written and oral presentation. Prerequisite: Must be taken within three semesters of graduation; ECE 493 and ENGL 304WI taken concurrently. Offered: Fall

E&C-ENGR 496 Special Topics

Selected Topics in specific areas of electrical or computer engineering. May be repeated for credit when the topic varies. Prerequisite: At least 18 hours of ECE courses toward the degree. Offered: On demand

E&C-ENGR 497 Directed Readings

Readings in an area selected by an undergraduate student in consultation with a faculty member. Arrangements must be made prior to registration. Prerequisite: Consent of instructor Offered: On demand

E&C-ENGR 498 Research Seminar

Undergraduate research based on intensive readings from the current research literature under the direction of a faculty member. Arrangements must be made prior to registration. Prerequisite: Consent of instructor Offered: On demand

E&C-ENGR 499 Undergraduate Research

Completion of a project, including a final written report, under the direction of a faculty member. A prospectus must be accepted prior to registration. Prerequisite: Consent of instructor Offered: On demand

Information Technology (INFO-TEC)**INFO-TEC 222 Multimedia Production And Concepts**

Multimedia production and concepts will give an overview of multimedia technology and communication theory needed to deliver information and to produce interactive presentations for the web, for CD-ROM, and for in-person presentations and demos. The course offers exposure to software, hardware, other multimedia technologies, authoring and copyright matters. Prerequisite(s): COM-SCI 101 Offered: Winter Semester

INFO-TEC 290 Special Topics

Selected topics in specific subject areas of Information Technology which are not part of the regular offerings. Prerequisite: Approval of instructor. Offered: Winter

INFO-TEC 321 Introduction To Computing Resources Administration

This introductory course is designed to give an overview of a wide variety of technical, interpersonal, documentation, and managerial skills needed to become an effective systems administrator. Prerequisite: COMP-SCI 201

INFO-TEC 321 Introduction To Computing Resources Administration

This introductory course is designed to give an overview of a wide variety of technical, interpersonal, documentation, and managerial skills needed to become an effective systems administrator. Prerequisite: COMP-SCI 201

INFO-TEC 350 Object-Oriented Software Development

Application of object oriented programming languages as a means to implement object oriented designs. Polymorphism through inheritance and interfaces, design methods such as Responsibility Driven Design and such reusable design techniques as abstract classes and frameworks. Event-driven programming and the Java Swing classes for constructing interactive Graphical User Interfaces (GUIs), the basics of the Unified Modeling (UML) and elementary design patterns. Prerequisites: COMP-SCI 201R and COMP-SCI 352 or COMP-SCI 303.

INFO-TEC 350 Object-Oriented Software Development

Application of object oriented programming languages as a means to implement object oriented designs. Polymorphism through inheritance and interfaces, design methods such as Responsibility Driven Design and such reusable design techniques as abstract classes and frameworks. Event-driven programming and the Java Swing classes for constructing interactive Graphical User Interfaces (GUIs), the basics of the Unified Modeling (UML) and elementary design patterns. Prerequisites: COMP-SCI 201R and COMP-SCI 352 or COMP-SCI 303.

INFO-TEC 350 Object-Oriented Software Development

Application of object oriented programming languages as a means to implement object oriented designs. Polymorphism through inheritance and interfaces, design methods such as Responsibility Driven Design and such reusable design techniques as abstract classes and frameworks. Event-driven programming and the Java Swing classes for constructing interactive Graphical User Interfaces (GUIs), the basics of the Unified Modeling (UML) and elementary design patterns. Prerequisites: COMP-SCI 201R and COMP-SCI 352 or COMP-SCI 303.

INFO-TEC 426 Practical Network Security

This course examines common threats to computer network security and discusses various techniques to mitigate those threats. The course material is supplemented with lab assignments that implement network security tools and use them to build a small secure network. It discusses information hiding, traffic monitoring and control, intrusion detection, and security policy. Note: NOTE FOR GRADUATE CREDIT. Prerequisites: CS 420/Consent of instructor.

INFO-TEC 427 Network Analysis

This course focuses on routing in an autonomous system network using Cisco Systems equipment. It will include a review of the fundamental operations needed in AS routing and will then, through lecture and lab assignments, implement various network

configurations using Cisco equipment. The concepts addressed will include router, switch and protocol implementations for Cisco Discovery Protocol, Spanning Tree Protocol, VLAN's, VLAN Trunking Protocol and standard Cisco network routing protocols, among others. Prerequisites: IT 321 and CS 420.

INFO-TEC 490 Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

INFO-TEC 490A Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

INFO-TEC 490C Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

INFO-TEC 490GP Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

INFO-TEC 490IT Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

INFO-TEC 490J Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

INFO-TEC 490MI Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

INFO-TEC 490NA Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

INFO-TEC 490NS Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

INFO-TEC 490SD Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

INFO-TEC 490WD Special Topics

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

INFO-TEC 491 Internship

Students may participate in structured internships under the joint supervision of an employer and a faculty member. The student must carry out significant professional responsibilities that also have academic merit. The number of credit hours is based on the quality of the academic experience. Available for credit/nocredit only, and students must be in good standing with a least 18 credit hours of CS/IT counting towards the degree. Registration by consent number only; petition forms for CS/IT 491 Internships are available in the CSEE Division Office. Prerequisite: AT least 18 hours of CS/IT that counts towards the B.I.T. degree.

Mechanical Engineering (MEC-ENGR)

MEC-ENGR 111 Essential Engineering

Introduction to the practice and history of engineering including its impact on human history, product design/ development and its relationship to the ecosystem, professionalism and ethics, the engineering approach to solving real-world problems, engineering communications and calculations, engineering teamwork and case studies. (Same as CIV-ENGR 111).

MEC-ENGR 130 Engineering Graphics

Introduction to Engineering Graphics with the use of the Computer Aided Design tools AutoCAD and SolidWorks. Introduction to 2D design with AutoCAD includes: basic features, layer control, geometric constructions, orthographic projections, dimensioning and notes, tolerancing, section views, and working drawings. Introduction to 3D design with SolidWorks includes: part modeling, revolved features, sweeps, lofts, assembly modeling and engineering drawings. No previous 2D or 3D CAD experience is necessary to take this class. Semester Offered: Fall/Winter

MEC-ENGR 130 Engineering Graphics

Introduction to Engineering Graphics with the use of the Computer Aided Design tools AutoCAD and SolidWorks. Introduction to 2D design with AutoCAD includes: basic features, layer control, geometric constructions, orthographic projections,

dimensioning and notes, tolerancing, section views, and working drawings. Introduction to 3D design with SolidWorks includes: part modeling, revolved features, sweeps, lofts, assembly modeling and engineering drawings. No previous 2D or 3D CAD experience is necessary to take this class. Semester Offered: Fall/Winter

MEC-ENGR 130L Engineering Graphics Lab
Supplemental lab instruction and assistance for MEC-ENGR 130.

MEC-ENGR 131 Engineering Graphics-3D design
Introduction to Engineering Graphics using the 3D Computer Aided Design tool SolidWorks. Introduction to 3D design with SolidWorks includes: part modeling, revolved features, sweeps, lofts, assembly modeling, and engineering drawings. Some previous 2D AutoCAD experience is required to take this class. NOTE: This class starts halfway through the semester by joining in with MEC-ENGR 130 when they finish AutoCAD and begin SolidWorks. Prerequisite: 2D AutoCAD experience.

MEC-ENGR 131L Engineering Graphics 3D Design Lab
Supplemental lab instruction and assistance for MEC-ENGR 131

MEC-ENGR 211 The Engineering Enterprise
The engineering enterprise course covers four topics essential for engineering students with new venture creation interests: creating economic value, leadership, finance, and marketing. The primary objective of this course is to motivate the student to think as a blend of an engineer and a businessperson. (Same as CIV-ENGR 211). Pre/corequisite: MEC-ENGR 111

MEC-ENGR 219 Computer Programming For Engineers
Analysis and synthesis of structured computer algorithms for solving engineering problems using high level programming tools such as Excel, Matlab, Fortran and/or C++. (Same as CIV-ENGR 219) Prerequisite: MATH 210

MEC-ENGR 220 Electric Circuits
Introduction to electric circuits for civil and mechanical engineering students. Prerequisites: MEC-ENGR 219, PHYSICS 250 Pre or Corequisite MATH 345 or ME 272 Offered: Winter

MEC-ENGR 220 Electric Circuits
Introduction to electric circuits for civil and mechanical engineering students. Prerequisites: MEC-ENGR 219, PHYSICS 250 Pre or Corequisite MATH 345 or ME 272 Offered: Winter

MEC-ENGR 270 Engineering Analysis I
This is an applied course with emphasis on physics and engineering applications. Topics include engineering applications using conics, parametric equations, polar coordinates, vectors, solid analytic geometry, vector valued functions, multi-variable functions, partial derivatives (including applications), multiple integration, vector calculus including Green's Theorem, Curl and Divergence, line and surface integrals and Stoke's Theorem. Prerequisites: Math 220. Restrictions: Civil & Mechanical Engineering Students Only

MEC-ENGR 272 Engineering Analysis II
An applied course using differential equations in solutions to engineering problems. Topics include applications in first-order differential equations, linear higher-order equations, Laplace transform, Series solutions of linear ODEs (Taylor, Power, and Fourier), Numerical solutions, introduction to systems of differential equations. Prerequisites: ME 270 or Math 250. Restrictions: Civil & Mechanical Engineering Students Only.

MEC-ENGR 285 Engineering Dynamics
Basic fundamentals of particle and rigid body dynamics; energy and momentum methods; computer use. Prerequisite: CIV-ENGR 275.

MEC-ENGR 299 Engineering Thermodynamics
Fluid properties, work and heat, first law, second law, entropy, applications to vapor and ideal gas processes. Prerequisites: PHYSICS 240 and MATH 220.

MEC-ENGR 301 Fundamental Topics In Mechanical Engineering
Current and new technical developments in mechanical engineering. Prerequisite: instructor's consent.

MEC-ENGR 301 Fundamental Topics In Mechanical Engineering
Current and new technical developments in mechanical engineering. Prerequisite: instructor's consent.

MEC-ENGR 301E Topics In Mechanical Engineering

MEC-ENGR 306 Computer-Aided Engineering

Principles, analysis and application of numerical methods for the solution of engineering problems. Computer implementation. Prerequisites: CE 319, Math 345, or ME 272

MEC-ENGR 306 Computer-Aided Engineering

Principles, analysis and application of numerical methods for the solution of engineering problems. Computer implementation. Prerequisites: CE 319, Math 345, or ME 272

MEC-ENGR 311 The Technical Entrepreneur

The guiding principal for the course is that entrepreneurs are innovators and operate in an uncertain and risky environment. The course looks at the entrepreneurial mindset and the process of new product line launch. (Same as CIV-ENGR 311). Prerequisite: MEC-ENGR 211

MEC-ENGR 319 Engineering Computation And Statistics

Statistical distribution functions and application to engineering problems. Limited treatment of curve-fitting and time-series analysis. Introduction to factorial design. (Same as CE 319) Prerequisite: MEC-ENGR 219 and MATH 220

MEC-ENGR 324 Engineering Materials

The nature of the structure of engineering materials. The relationship of material structure to the physical properties. Mechanical behavior of engineering materials. Prerequisites: MEC-ENGR 299, CIV-ENGR 276 and CHEM 211 and 211L, and Machine Shop Safety.

MEC-ENGR 324 Engineering Materials

The nature of the structure of engineering materials. The relationship of material structure to the physical properties. Mechanical behavior of engineering materials. Prerequisites: MEC-ENGR 299, CIV-ENGR 276 and CHEM 211 and 211L, and Machine Shop Safety.

MEC-ENGR 324 Engineering Materials

The nature of the structure of engineering materials. The relationship of material structure to the physical properties. Mechanical behavior of engineering materials. Prerequisites: MEC-ENGR 299, CIV-ENGR 276 and CHEM 211 and 211L, and Machine Shop Safety.

MEC-ENGR 351 Fluid Mechanics

Concepts of the statics and dynamics of fluids, with emphasis on principles of continuity, momentum and energy. Boundary layers, dimensional analysis and drag are covered briefly. Thorough treatment of pipe flow. (Same as CIV-ENGR 351.) Prerequisites: MEC-ENGR 285, MATH 345

MEC-ENGR 352WI Instrumentation & Measurements Lab I

Static and dynamic errors; experiment design; instrumentation selection and calibration; measurement of voltage, resistance, amperage, duration, frequency, displacement, velocity, acceleration, strain, force and torque. Prerequisites: MEC-ENGR 285, CIV-ENGR 276, MEC-ENGR 220, Math 345 or ME 272, WEPT passed, Machine Shop Safety

MEC-ENGR 352WI Instrumentation & Measurements Lab I

Static and dynamic errors; experiment design; instrumentation selection and calibration; measurement of voltage, resistance, amperage, duration, frequency, displacement, velocity, acceleration, strain, force and torque. Prerequisites: MEC-ENGR 285, CIV-ENGR 276, MEC-ENGR 220, Math 345 or ME 272, WEPT passed, Machine Shop Safety

MEC-ENGR 352WI Instrumentation & Measurements Lab I

Static and dynamic errors; experiment design; instrumentation selection and calibration; measurement of voltage, resistance, amperage, duration, frequency, displacement, velocity, acceleration, strain, force and torque. Prerequisites: MEC-ENGR 285, CIV-ENGR 276, MEC-ENGR 220, Math 345 or ME 272, WEPT passed, Machine Shop Safety

MEC-ENGR 360 Thermal System Design

Gas and vapor mixtures, cycles, availability, imperfect gases, thermodynamic relations, combustion, chemical equilibrium, power systems and design projects. Effects of design choices on the earth and living systems. Prerequisites: MEC-ENGR 299, MATH 250 or ME 270, Pre or Co-requisite: CE 351

MEC-ENGR 360 Thermal System Design

Gas and vapor mixtures, cycles, availability, imperfect gases, thermodynamic relations, combustion, chemical equilibrium, power

systems and design projects. Effects of design choices on the earth and living systems. Prerequisites: MEC-ENGR 299, MATH 250 or ME 270, Pre or Co-requisite: CE 351

MEC-ENGR 362 Instrumentation & Measurements Lab II

Continuation of 352 with emphasis on instruments to measure temperature, pressure, fluid flow, fluid velocity, sound, spectral content and emissions. Prerequisites: MEC-ENGR 351 and MEC-ENGR 352. Corequisite: MEC-ENGR 399.

MEC-ENGR 380 Manufacturing Methods

Introduction to manufacturing processes with emphasis on those aspects most relevant to methods, problems in force analysis, and practicum and experimentation in machine tool applications. Prerequisites: MEC-ENGR 324.

MEC-ENGR 380 Manufacturing Methods

Introduction to manufacturing processes with emphasis on those aspects most relevant to methods, problems in force analysis, and practicum and experimentation in machine tool applications. Prerequisites: MEC-ENGR 324.

MEC-ENGR 385 System Dynamics

Kinematics of mechanical systems. Introduction to the modeling and analysis of dynamic mechanical systems. Computer analysis. Prerequisites: MEC-ENGR 285, MATH 345 or ME 272

MEC-ENGR 385 System Dynamics

Kinematics of mechanical systems. Introduction to the modeling and analysis of dynamic mechanical systems. Computer analysis. Prerequisites: MEC-ENGR 285, MATH 345 or ME 272

MEC-ENGR 390 Engineering Coop/Internship

Students may participate in structured Engineering Coop/ Internship under the supervision of employer. They must carry out significant professional responsibilities and whatever additional assignments are determined by the employer. Prerequisite: MEC-ENGR 285 and CIV-ENGR 211

MEC-ENGR 399 Heat And Mass Transfer

Fundamentals of conduction, convection, and radiation heat transfer. Use of nondimensional parameters. Theory of heat exchangers. Mass transfer. Prerequisites: ME 360, Math 345 or ME 272

MEC-ENGR 399 Heat And Mass Transfer

Fundamentals of conduction, convection, and radiation heat transfer. Use of nondimensional parameters. Theory of heat exchangers. Mass transfer. Prerequisites: ME 360, Math 345 or ME 272

MEC-ENGR 400 Problems

Special design, experimental and analytical problems in mechanical engineering.

MEC-ENGR 400CB Problems

Special design, experimental and analytical problems in mechanical engineering.

MEC-ENGR 400DQ Problems

Special design, experimental and analytical problems in mechanical engineering.

MEC-ENGR 400EA Problems

Special design, experimental and analytical problems in mechanical engineering.

MEC-ENGR 401 Topics In Mechanical Engineering

Current and new technical developments in mechanical engineering. Prerequisite: instructor's consent.

MEC-ENGR 401BI Topics In Mechanical Engineering

MEC-ENGR 401BN Topics In Mechanical Engineering

MEC-ENGR 401E Topics In Mechanical Engineering

MEC-ENGR 401FA Topics In Mechanical Engineering

MEC-ENGR 401FE Topics in Mechanical Engineering

MEC-ENGR 401H Topics In Mechanical Engineering

MEC-ENGR 401M Topics In Mechanical Engineering

MEC-ENGR 401MS Topics in Mechanical Engineering

MEC-ENGR 401NE Topics in Mechanical Engineering

MEC-ENGR 401OE Topics In Mechanical Engineering

MEC-ENGR 401P Topics In Mechanical Engineering

MEC-ENGR 401R Topics In Mechanical Engineering

MEC-ENGR 401RE Topics In Mechanical Engineering

MEC-ENGR 401SA Topics In Mechanical Engineering

MEC-ENGR 401SB Topics in Mechanical Engineering

MEC-ENGR 401TS Topics in Mechanical Engineering

MEC-ENGR 401V Topics In Mechanical Engineering

MEC-ENGR 401X Topics in Mechanical Engineering

Current and new technical developments in mechanical engineering. Prerequisite: instructor's consent.

MEC-ENGR 409 Fundamentals of Engineering Review

This course consists of a series of lectures given by different professors and is intended as a review class for all the subjects included in the Fundamentals of Engineering exam. Classes specifically focus on the review of equations and formulas included in the reference handbook published by NCEES. Lectures given using PowerPoint presentations will be posted on blackboard each week. All lectures are NOT given using PowerPoint presentations and it is the students' responsibility to obtain the notes of those classes in case they were not able to attend the class.

MEC-ENGR 409 Fundamentals of Engineering Review

This course consists of a series of lectures given by different professors and is intended as a review class for all the subjects included in the Fundamentals of Engineering exam. Classes specifically focus on the review of equations and formulas included in the reference handbook published by NCEES. Lectures given using PowerPoint presentations will be posted on blackboard each week. All lectures are NOT given using PowerPoint presentations and it is the students' responsibility to obtain the notes of those classes in case they were not able to attend the class.

MEC-ENGR 411 Introduction to Biomechanics

This course is to provide students with an introduction to the engineering principles of biomechanics. Following a general introduction to anatomical terminology, students will be exposed to three primary sub-disciplines of biomechanics including

kinetics and kinematics of human movement, muscle mechanics, and biomaterials. Students will become familiar with measurement techniques and current research being done within each of these units through lectures and in-class discussions and presentations of relevant journal articles. A final semester project, culminating in a NIH-style research proposal, will be developed throughout the semester in one of the three units presented.

MEC-ENGR 412 Biodynamics

Introduction to musculoskeletal biomechanics including: computational biomechanics, movement simulation, motor control and musculoskeletal tissues. Prerequisite: ME 411

MEC-ENGR 413 Bioinstrumentation of Human Motion

The purpose of this course is to provide an opportunity for students to gain a hands-on, in-depth understanding of the kinematic, and electromyographic measurement and analysis techniques used to quantify biomechanics of human motion. Students will also be introduced to neurological measurement techniques used to quantify brain activity related to the biomechanical components of human motion. To prepare for these topics, a review of data sampling and signal procession theory will be provided. Prerequisites: ME 411

MEC-ENGR 414 Material Science For Advanced Applications

Study of the physical and mechanical metallurgy of alloy systems of interest in engineering applications. Prerequisite: MEC-ENGR 324.

MEC-ENGR 415 Feedback Control Systems

Introduction to feedback control theory for linear dynamic systems. Topics include root locus analysis, frequency response analysis, and controller design. Prerequisite: MEC-ENGR 385

MEC-ENGR 420 Human Powered Vehicle Design Lab

Introduction to the science of human powered vehicles (HPV) providing the background necessary for the design of such vehicles. Students will learn and utilize engineering design practices and apply them toward the creation of an aerodynamic, highly engineered land based HPV. Prerequisite: Consent of Instructor

MEC-ENGR 424 Non-Metallic Engineering Materials

Structures, properties and applications of ceramics, glasses, cermets, polymers and composite materials. Prerequisite: MEC-ENGR 324.

MEC-ENGR 431 Experimental Methods In Fluid Flow & Heat Transfer

Laboratory experiments involving fundamental mechanisms and phenomena associated with fluid flow and heat transfer. Current experimental methods and techniques employed. Prerequisites: MEC-ENGR 362 and MEC-ENGR 399.

MEC-ENGR 440 Heating And Air Conditioning

General principles of thermodynamics, heat transfer, and fluid dynamics are used to calculate building loads, size equipment and ducts, and evaluate system performance in maximizing human comfort. Consideration of indoor air quality and human health. Prerequisites: MEC-ENGR 360 and MEC-ENGR 399

MEC-ENGR 441 Intermediate Fluid Mechanics

Topics in potential and viscous flow theory, and computational fluid dynamics. Prerequisite: MEC-ENGR 351.

MEC-ENGR 444 Composite Materials

A survey of composite materials used in engineering, emphasizing fiber-reinforced composites as well as laminate and particulate composites. Prerequisite: MEC-ENGR 324.

MEC-ENGR 447 Contracts And Law For Engineers

Law of contracts, including types, construction, interpretation, performance, and termination. Construction and Engineering service contracts: Proposals, general and financial conditions, specifications and drawings. Corporate and professional and personal liability, insurance and bonds, property, evidence, arbitration and mediation. Offered: Fall

MEC-ENGR 449 Environmental Compliance, Auditing & Permitting

Statues, regulations and permitting for air hazardous wastes and storage tanks. Asbestos, radon, EMF, and emerging areas of regulatory concern. Siting issues. Criminal and civil enforcement. Crosslisted as CIV-ENGR 449 Prerequisite: Junior standing within the degree program Offered: Winter

MEC-ENGR 451 Power Plant Design

Preliminary component and system design. Optimum design of boilers, steam turbines, condensers and cooling towers and their integration into a system to minimize production costs and impact on the environment. Prerequisites: MEC-ENGR 360 and

MEC-ENGR 399.

MEC-ENGR 452 Advanced Mechanics Of Materials

Analysis of more complicated problems in stresses and strains. Prerequisite: CIV-ENGR 276.

MEC-ENGR 453 Experimental Stress Analysis

Photoelastic, electric strain gage, brittle lacquer methods of experimental stress analysis for static loads. Strain gage work includes strain rosettes. Prerequisite: CIV-ENGR 276.

MEC-ENGR 454 Power Generation Systems

Fundamentals of the power industry in a format suitable for all engineering disciplines. Survey of electric power systems, including fossil and nuclear steam cycles, combustion turbines, combines cycles, and renewable such as solar and wind. Introduction to major machinery components, systems, controls, and an overview of fuels, emissions, and emission control technologies. Offered: Winter

MEC-ENGR 455 Digital Control Of Mechanical Systems

Introduction to digital control systems. Topics include Z-transforms, sampling, stability analysis, and digital controller design. Prerequisites: MEC-ENGR 415 and MATH 345.

MEC-ENGR 456WI Mechanical Component Design

Introduction to mechanical engineering design and its impact on human history, principles of design with ductile and brittle materials for static and dynamic loading, classical and reliability-based factors of safety, fracture mechanics in design, application to the design of selected machine components. Prerequisites: ME 380, ME 385, ME 130, ME 399, WEPT passed

MEC-ENGR 456WI Mechanical Component Design

Introduction to mechanical engineering design and its impact on human history, principles of design with ductile and brittle materials for static and dynamic loading, classical and reliability-based factors of safety, fracture mechanics in design, application to the design of selected machine components. Prerequisites: ME 380, ME 385, ME 130, ME 399, WEPT passed

MEC-ENGR 457 Mechatronic System Design

Basic principles of mechatronic applications for mechanical engineers through course instruction and ""hands-on"" activities and projects. Prerequisites: ME 362 and ME 415

MEC-ENGR 458 Modern Control Systems

Controller design for multiple-input/multiple-output systems; controllability and observability; stochastic control problems; regulators and tracking controllers; observers. Prerequisite: MEC-ENGR 415.

MEC-ENGR 460 Electromechanical Conversion

Basic principles of energy conversion; magnetic circuitry in general and in machinery; DC machine theory, transformer operation and circuit application; synchronous machine theory electric system operation; introduction to power electronic principles and practices. (Cross-listed with ME 5560). Prerequisite: ME 220

MEC-ENGR 461 Electromechanical Conversion II

Application of fundamental and concepts of power systems to practical power plant and industrial applications. Identification of the significant internal components of power system equipment: Single and Three Phase Circuits, DC and AC Generators/Alternators,Transformers,DC and AC Motors,Dc and AC Transmission,and System Electrical Protection. Prerequisite: MEC-ENGR 460

MEC-ENGR 466 Applied Optimization And Decision Modeling

Introduction to mathematical programming techniques and applications. Linear and integer programming, transportation models, multiple objective and goal programming. Prerequisite: MEC-ENGR 306

MEC-ENGR 470 Experimental Design & Analysis

Presentation of concepts and methods of statistical analysis and the design of experiments. Concepts, techniques, interpretation, and use of results are stressed. Focus is on experimental strategy and objectives, and the application of the methods discussed, rather than the mechanics of derivation. Major sections include: a review of hypothesis testing and basic analysis of variance techniques; single factor experiments including 2k and 3k design, confounding, and Taguchi philosophy; nested and split plot designs; analysis of covariance and an introduction to response surface methods. (Cross-listed with ME 5570)

MEC-ENGR 476 Machine Tool Design

Methodology of machine tool design. Dynamic modeling, analysis, synthesis, and simulation of machine tools to meet functional

requirements and design constraints. Prerequisites: MEC-ENGR 285 and MEC-ENGR 306.

MEC-ENGR 483 Manufacturing Automation

This course covers fundamentals underlying contemporary manufacturing automation. The following two aspects of manufacturing automation will be emphasized: (1) computer based systems for automating and controlling manufacturing processes such as numerically controlled machining and material handling robots; and (2) use of software systems in facilitating information exchange between different components of manufacturing decision support systems. The course will be taught using a project-based learning approach. Prerequisites: MEC-ENGR 319 and MEC-ENGR 380

MEC-ENGR 484 Vibration Analysis

Vibration theory with application to mechanical systems. Prerequisites: MEC-ENGR 385

MEC-ENGR 486 Applied Finite Element Analysis

The study of advanced simulation techniques for the solution to engineering problems. The use of Finite Element Method toward solving mechanical, structural, vibration and potential flow problems will be explored. The use of current commercial simulation tools will be used extensively. Prerequisites: ME 306, ME 324, ME 385, ME 399.

MEC-ENGR 491 Internship

For International students who must register to cover off-campus employment which is approved as related to their degree by their departmental advisor and ISAO.

MEC-ENGR 491 Internship

For International students who must register to cover off-campus employment which is approved as related to their degree by their departmental advisor and ISAO.

MEC-ENGR 491 Internship

For International students who must register to cover off-campus employment which is approved as related to their degree by their departmental advisor and ISAO.

MEC-ENGR 495 Vehicle Dynamics

Analysis and prediction of the dynamic behavior of ground vehicles utilizing computer simulation. Mechanics of various suspension systems, tire-roadway interaction, vehicle aerodynamics, vehicle handling and steering characteristics. Special topics including non-holonomic constraint formulation and stability of motion. Prerequisite: MEC-ENGR 385.

MEC-ENGR 496WI Mechanical Design Synthesis

Modern design theories and methodologies, with emphasis on the initial stages of the design process. Effect of design choices on the earth and living systems. Principles of embodiment design and life-cycle considerations. A comprehensive group design project is required. The course satisfies the Writing Intensive requirement. Prerequisite: MEC-ENGR 456WI, WEPT passed

MEC-ENGR 499 Intermediate Heat Transfer

Advanced topics in conduction, convection and radiation heat transfer including transient heat transfer, phase change and heat exchangers. Prerequisites: MEC-ENGR 360 and MEC-ENGR 399

Henry W. Bloch School of Management

School of Business & Public Administration Undergraduate Courses

Accounting (ACCTNG)

ACCTNG 210 Introduction To Financial Accounting

An overview of basic concepts and terminology associated with reporting financial information to parties outside of an organization. This course requires students to take an accompanying lab that meets one day a week. Prerequisite: Math 110 or its equivalent and completion of 30 hours.

ACCTNG 211 Introduction To Managerial Accounting

An introduction to the use of cost accounting concepts and information in managing the activities of a business. Prerequisite: ACCTNG 210 or its equivalent

ACCTNG 307 Cost Management

A study of the principles and techniques of cost accounting with emphasis on the structure of cost accounting systems and the processing, summarizing and reporting of cost information. Topics include various issues relevant for manufacturing and service organizations, and introduction of situations that require the application of cost information to managerial settings. Prerequisite: ACCTNG 211 or its equivalent and Junior standing.

ACCTNG 307 Cost Management

A study of the principles and techniques of cost accounting with emphasis on the structure of cost accounting systems and the processing, summarizing and reporting of cost information. Topics include various issues relevant for manufacturing and service organizations, and introduction of situations that require the application of cost information to managerial settings. Prerequisite: ACCTNG 211 or its equivalent and Junior standing.

ACCTNG 310 Intermediate Accounting I

A study of theory and application of external corporate reporting. The course covers a variety of financial accounting issues including assets, liabilities, revenue recognition, and accounting change analysis. Publications and pronouncements of the accounting professions are emphasized where applicable. Prerequisites: ACCTNG 211 or its equivalent and junior standing

ACCTNG 310 Intermediate Accounting I

A study of theory and application of external corporate reporting. The course covers a variety of financial accounting issues including assets, liabilities, revenue recognition, and accounting change analysis. Publications and pronouncements of the accounting professions are emphasized where applicable. Prerequisites: ACCTNG 211 or its equivalent and junior standing

ACCTNG 311 Intermediate Accounting II

Continued study of intermediate accounting. The course covers a variety of financial accounting issues including corporate equities, income taxes, pensions, other post-employment benefits, leases, and the statement of cash flows. Publications and pronouncements of the accounting profession are emphasized where applicable. Prerequisites: ACCTNG 310 or its equivalent.

ACCTNG 311 Intermediate Accounting II

Continued study of intermediate accounting. The course covers a variety of financial accounting issues including corporate equities, income taxes, pensions, other post-employment benefits, leases, and the statement of cash flows. Publications and pronouncements of the accounting profession are emphasized where applicable. Prerequisites: ACCTNG 310 or its equivalent.

ACCTNG 350 Accounting Systems And Controls

This course examines a number of systems employed to process accounting information, the internal control activities typically used in each system and associated documentation techniques. Prerequisites: MIS 202 & ACCTNG 310

ACCTNG 350 Accounting Systems And Controls

This course examines a number of systems employed to process accounting information, the internal control activities typically used in each system and associated documentation techniques. Prerequisites: MIS 202 & ACCTNG 310

ACCTNG 405 Auditing

A study of how the auditor determines the nature and amount of evidence that should be accumulated considering the unique aspects of an engagement, as well as some idea of how that evidence is evaluated in the context of a financial audit. Prerequisites: ACCTNG 311 and ACCTNG 350 or equivalents.

ACCTNG 405 Auditing

A study of how the auditor determines the nature and amount of evidence that should be accumulated considering the unique aspects of an engagement, as well as some idea of how that evidence is evaluated in the context of a financial audit. Prerequisites: ACCTNG 311 and ACCTNG 350 or equivalents.

ACCTNG 408 Federal Income Taxation

An examination of the theory and practice of taxation as applied to individuals and businesses. Prerequisite: ACCTNG 211 or its equivalent.

ACCTNG 408 Federal Income Taxation

An examination of the theory and practice of taxation as applied to individuals and businesses. Prerequisite: ACCTNG 211 or its equivalent.

ACCTNG 409 Advanced Taxation

An examination of the theory, practice, and research methodology of taxation as applied to corporations, partnerships, estates and trusts. Prerequisite: ACCTNG 408 or equivalent.

ACCTNG 409 Advanced Taxation

An examination of the theory, practice, and research methodology of taxation as applied to corporations, partnerships, estates and trusts. Prerequisite: ACCTNG 408 or equivalent.

ACCTNG 420 Advanced Accounting

A study of the accounting business combinations and the preparation of consolidated financial statements. Prerequisite: ACCTNG 311 or equivalent

ACCTNG 420 Advanced Accounting

A study of the accounting business combinations and the preparation of consolidated financial statements. Prerequisite: ACCTNG 311 or equivalent

ACCTNG 421 Governmental/Not-For-Profit Accounting

An overview of accounting for state and local governments and not-for-profit entities. Pronouncements of the accounting profession are emphasized where applicable. Prerequisite: ACCTNG 311 or equivalent

ACCTNG 421 Governmental/Not-For-Profit Accounting

An overview of accounting for state and local governments and not-for-profit entities. Pronouncements of the accounting profession are emphasized where applicable. Prerequisite: ACCTNG 311 or equivalent

ACCTNG 496 Internship: Accounting

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Admission only by prior approval and consent of the instructor. Note: Internship coursework is evaluated on a credit/no credit basis.

ACCTNG 497 Special Topics In Accounting

Study and research in accounting areas of special student interest, under individual faculty supervision and guidance. Admission only by prior approval and consent of the instructor. Prerequisite: Senior standing.

Decision Science and Operations Management (DSOM)**DSOM 309** Intermediate Business Statistics

This course emphasizes statistical applications in business, and students will complete research projects using one or more multivariate statistical techniques. Topics covered will include statistical software (such as SAS or SPSS), multiple regression, Chi-Square, analysis of variance, non-parametric methods, multidiscriminant analysis, factor analysis, and a brief introduction to structural equation models. Prerequisite: STAT 235

DSOM 326 Production/Operations Management

This course presents an introduction to the concepts, models, and methods of operations management. Students will study approaches to planning, scheduling, and controlling product and service facilities, processes, cost, quality, quantity, production, capacity, inventory, and distribution requirements. Computer applications and computer-based operations control systems will be introduced as a means to effectively manage the operations functions of both product and service organizations. Prerequisites: ECON 202 and STAT 235

DSOM 346 Management Analysis

This course examines the application of various scientific and mathematical methods to decision making in management, and makes use of spreadsheets and other software to construct and analyze practical methods of real-world systems. Applications will be based on topics such as project management, decision analysis, scheduling, queuing systems, simulation, optimization/allocation models, forecasting, and profitability analysis. Prerequisites: DSOM 326 and MIS 202.

DSOM 431 Quality and Process Improvement

A study of planning and managing effective quality and processes in organizations. Students are expected to master important quality management and process improvement tools including Six Sigma, Statistical Process Control, TQM, Theory of Constraints, and other contemporary tools via appropriate software, case studies, and projects. Prerequisites: DSOM 309 and DSOM 326.

DSOM 496 Internship: Decision Science and Operations Management

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Prerequisite: Admission only by prior approval and consent of instructor. Note: Internship coursework is evaluated on a credit/no credit basis.

DSOM 497 Special Topics: Decision Science and Operations Management

An opportunity for students to integrate their academic studies via employment with a business/organization in the community.

Prerequisite: Admission only by prior approval and consent of instructor

Entrepreneurship (ENT)**ENT 201 Entrepreneurship Immersion**

This course is designed to inspire and nurture the entrepreneurial spirit of students. Students will gain an appreciation of the entrepreneurial process and the characteristics of successful entrepreneurs. Students will also learn how to identify entrepreneurial opportunities, how to turn those opportunities into start-up businesses, and whether entrepreneurship might be a potential career path. The course includes case studies and interactions with successful entrepreneurs. Offered: Fall and Spring. Restrictions: Not open to students who have completed ENT 215, 301, or ENT 315

ENT 215 Introduction to Entrepreneurship

This course is designed to introduce students to the excitement and challenges of building your own business. It focuses on identifying and evaluating entrepreneurial opportunities, as well as identifying what it takes to get a new venture off the ground. The course is enriched with real-life examples, including case studies of start-ups and personal stories from local entrepreneurs. The instructor emphasizes active, hands-on learning; additionally, student teams will get a taste for starting and running a company through a computerized business simulation.

ENT 301 Entrepreneurship Immersion

This course is designed to inspire and nurture the entrepreneurial spirit of students. Students will gain an appreciation of the entrepreneurial process and the characteristics of successful entrepreneurs. Students will also learn how to identify entrepreneurial opportunities, how to turn those opportunities into start-up businesses, and whether entrepreneurship might be a potential career path. The course includes case studies and interactions with successful entrepreneurs. Offered: Fall and Spring. Restrictions: Not open to students who have completed ENT 201, 215, or ENT 315

ENT 315 Introduction to Entrepreneurship

This course is designed to introduce students to the excitement and challenges of building your own business. It focuses on identifying and evaluating entrepreneurial opportunities, as well as identifying what it takes to get a new venture off the ground. The course is enriched with real-life examples, including case studies of start-ups and personal stories from local entrepreneurs. The instructor emphasizes active, hands-on learning; additionally, student teams will get a taste for starting and running a company through a computerized business simulation.

ENT 321 Real Estate Principles

The Student will be introduced to the very basics of real estate from the terminology, real estate's role in the economy, legal foundations, government controls, appraisal processes, valuation processes, brokering and closing transactions, time value of money, basic management issues and lease clauses, and basic standard form purchase contracts.

ENT 327 Creating the New Venture: Experiential Learning

This course guides students through the process, experiences, and requirements for creating a new venture and planning for operations up to the point of securing customers and generating first revenues. Key course actions include developing a business plan for the new venture, examining the initial steps for start-up and operational launch, and preparing for securing of customers/revenues. Prerequisites: ENT 201, ENT 215, ENT 301, or ENT 315

ENT 328 Creating the E-Business Experiential Learning

This course guides students through the process, experiences, and requirements for creating a new online e-venture and planning for operations up to the point of securing customers and generating first revenues. Key course actions include developing a business plan for the new venture, examining the initial steps for start-up and operational launch, and preparing for securing of customers revenues. Prerequisites: ENT 201, ENT 215, ENT 301, or ENT 315

ENT 332 Managing the New Venture: Experiential Learning

In this course, students will acquire the skill sets needed for managing and growing a successful new venture, and will actually manage a new enterprise. Prerequisites: ENT 327 or ENT 328

ENT 341 Technology Entrepreneurship

This course is designed to familiarize students with the creation of successful, high-value enterprises, with an emphasis on markets for technology and venture capital. Students identify a business opportunity, create a technology-based solution, and assess the commercial and technological viability of the business opportunity. Case studies will emphasize both life science and IT technologies.

ENT 361 New Product Development

This course introduces students to a formal process to develop new products and services. Throughout the process, students will learn how an abstract idea can be transformed into concrete product concepts that will in turn be translated into tangible working prototypes.

ENT 364 Entrepreneurial Management

Students are exposed to the unique entrepreneurial experience of conceiving, evaluating, creating, managing, and potentially selling a business. The goal is to provide a comprehensive background with practical application of important concepts applicable to an entrepreneurial environment. Key business areas of finance, accounting, marketing, and management will be addressed from an entrepreneurial perspective.

ENT 412 Entrepreneurial Finance and Venture Capital Investment

This course examines the financing and valuation of new ventures from the perspectives of entrepreneurs and venture capitalists. The focus is on financial thinking, tools, and techniques that are relevant for seeking new venture financing and making investment decisions. The course is suitable for anyone with an interest in startup companies, or venture capital and private equity firms. Prerequisite: Fin 325.

ENT 421 Real Estate Finance Fundamentals

This course will provide a fundamental understanding of basic financial concepts of real estate including compounding and discounting, construction of amortization tables and after-tax yield analysis for a simple real estate investment. It also touches on the basics of title insurance, ownership issues, fixed rate versus variable rate mortgages in residential real estate, understanding housing bubbles, and trends in valuation of residential real estate. In addition, the student will complete mathematical comparisons of leasing versus owning a home. Prerequisite: FIN 325

ENT 425 Corporate Entrepreneurship

Students receive an introduction to the field of corporate entrepreneurship, including the effectiveness of different models of corporate entrepreneurship. Specific topics include the creation of an entrepreneurial culture within the organization, the translation of opportunities into attractive corporate investments, corporate venturing, and the role of venture champions.

ENT 432 Entrepreneurial Marketing and Selling

This course exposes students to the objectives, challenges, and requirements for effective, results-oriented marketing activities and sales efforts for the entrepreneur/new venture. Key topics include the selection, design, and budgeting of entrepreneurial marketing and advertising programs, along with effective selling, customer acquisition, and service/retention efforts.

ENT 446 Entrepreneurial Selling and Sales Force Management

This course assists students in developing a successful sales plan for a new venture. The first half of the course deals with sales techniques; the second half addresses important sales force management topics such as recruitment, training, deployment, motivation, compensation, and evaluation.

ENT 460 Creating the Enterprise

This course looks at the processes and skills needed so that individuals can create their own enterprise, manage a new business, or work within an entrepreneurial organization. Students will learn how to take a good idea, assess that idea, and develop an appropriate business model, and will work in teams to develop a full-length business plan. Prerequisites: Students must have completed or be currently enrolled in the following courses: ACCTNG 211, FIN 325, MKT 324, MGT 330, and DSOM 326

ENT 491 Entrepreneurial Consulting

Working in teams, students will consult with small business client firms. This will require the identification of problems, the proposal of solutions, and the responsibility for implementing those solutions where practicable in the enterprise.

ENT 496 Internship: Entrepreneurship

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Prerequisite: Admission only by prior approval and consent of instructor. Note: Internship coursework is evaluated on a credit/no credit basis.

ENT 497 Special Topics: Entrepreneurship

Study and research in areas of special interest under individually faculty direction. Prerequisites: Senior standing and pre-registration consent of instructor.

ENT 497A Special Topics: Entrepreneurship

Study and research in areas of special interest under individually faculty direction. Prerequisites: Senior standing and pre-registration consent of instructor.

ENT 497B Special Topics: Entrepreneurship

Study and research in areas of special interest under individually faculty direction. Prerequisites: Senior standing and pre-registration consent of instructor.

ENT 497F Special Topics: Entrepreneurship

Study and research in areas of special interest under individually faculty direction. Prerequisites: Senior standing and pre-registration consent of instructor.

Finance (FIN)

FIN 325 Financial Management

This course provides an overview of the relationship between business decisions and the value of the firm, as determined by the marketplace. Students will study the composition of capital structure, capital budgeting, and cost of capital theory, including incremental analysis of investment situations. Prerequisite: ACCTNG 210

FIN 340 Global Financial Markets and Institutions

Students are introduced to global financial markets and institutions as well as the regulators. Topics include financial instruments, past and current global financial crises, financial restructuring and reforms, and the interrelationships between financial and real economies. Prerequisites: FIN 325

FIN 345 Investments

The course develops the theoretical framework necessary for a systematic approach to portfolio management. Content includes consideration of investment objectives, measurement of risk and returns, alternative uses of invested funds, analysis of securities markets, and the techniques of security analysis. Students will have an opportunity for the creation and management of an investment portfolio. Prerequisite: FIN 325

FIN 350 Introduction to Risk Management and Insurance

This course introduces students to the principles of personal and corporate risk management. Personal risk management topics include: personal insurance planning, annuity investing and personal liability management. Corporate risk management topics include: Managing corporate risk, reducing risk through hedging, and legal liability risk.

FIN 351 International Financial Management

The world's business activities and economics are becoming more integrated. This course provides an introduction, appreciation and understanding of how this process impacts financial decisions for global business. Students should expect to develop an integrated analytical and decision making perspective that will enable them to extend financial concepts such as capital budgeting and risk management, and instruments such as forwards, swaps, fixed income analysis, arbitrage, etc. to their international analogs. Prerequisite: Fin 325 or equivalent

FIN 419 Financial Statement Analysis

Students will take an in-depth look at the external financial statements that are prepared by corporations, including the tools needed to organize, summarize, and understand corporate financial data for use in decision making. Ratio analysis, trend analysis, earnings forecasting, bankruptcy predictors, statistical methods important to finance, and financial data bases are among the topics that will be covered. Prerequisites: FIN 325 and must have Junior standing with a major or minor within the Bloch School of Management

FIN 419 Financial Statement Analysis

Students will take an in-depth look at the external financial statements that are prepared by corporations, including the tools needed to organize, summarize, and understand corporate financial data for use in decision making. Ratio analysis, trend analysis, earnings forecasting, bankruptcy predictors, statistical methods important to finance, and financial data bases are among the topics that will be covered. Prerequisites: FIN 325 and must have Junior standing with a major or minor within the Bloch School of Management

FIN 427 Debt Instruments And Markets

An overall view of the financing process and the role of financial markets. The course will cover the characteristics of instruments traded in money and capital markets; determinants of and the relationships between different asset prices; and international aspects of financial markets. In particular, topics that will be covered include: Interest rate theory, valuing fixed income securities, managing interest rate risk, derivative financial instruments, capital market equilibrium, managing currency risk and applications of structured fixed income products. Prerequisites: ECON 202 and FIN 325

FIN 428 Commercial Bank Management

This course presents an overview of financial management of the interest spreads, credit risk, liquidity, and capital positions of commercial banks. Topics to be covered include analysis of bank profitability, lending functions and policy, securities investment

strategies, fund attraction, regulatory examination, capital adequacy, and integrated asset/liability management. Instructional media includes cases and computerized bank management simulation. Prerequisites: ECON 202 and FIN 325.

FIN 435 Advanced Corporate Finance

The course focuses on the finance function of the firm from the managerial perspective. Topics include working capital management, capital budgeting, financial structure, merger and reorganization, capital rationing, and analysis of risk. Students will use cases and computer techniques. Prerequisite: FIN 325

FIN 496 Internship: Finance

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Admission only by prior approval and consent of instructor. Note: Internship coursework is evaluated on a credit/no credit basis.

FIN 497 Special Topics: Finance

Study and research in areas of special interest under individual faculty direction. Prerequisite: Senior Standing and pre-registration consent of instructor

FINE-ART 3HB Upper Level Fine Arts/ Humanities

Upper Level Transfer Credit

FINE-ART 3SE Upper Level Fine Arts Studio

Upper Level Transfer Credit

Management (MGT)

MGT 100 Foundations of Business and College Life

This course provides an introduction to the functional areas of business (e.g., accounting, systems, finance, marketing, human resources, and entrepreneurship) as well as a number of contemporary business topics, including social responsibility, diversity, ethics, and globalization. Additionally, students will be exposed to various topics that facilitate a successful transition from high school to college. Examples include an overview of University and Bloch School resources, development of effective study habits, time and stress management, selection of a major and career options. Restrictions: Open to freshmen.

MGT 301 Effective Business Communication

The instructor introduces students to the strategic nature of business communication. By the end of the course, students should be able to analyze business situations, prepare messages that fulfill the intended purposes of their communication, and meet the needs and expectations of business audiences. Students will develop the tools to deliver effective, professional written and oral communications, and will learn how to use library and electronic business research tools. Prerequisite: ENGLISH 225, successful completion of WEPT. Restrictions: Course must be completed in student's junior year

MGT 306 Legal, Ethical And Regulatory Environment Of Business

The course looks at legal and moral thought, with attention to ethical issues in business. Students are introduced to our common law system; selected areas of law, with attention to the inclusion of cultural and moral values; and an introduction to government regulation of business.

MGT 320 Law Of Commercial Transactions

Study of major areas of law included in the Uniform Commercial Code. Topics may include sales, commercial paper, bank deposits and collections, aspects of property law, documents of title, investment securities, and secured transactions. Prerequisite: MGT 306.

MGT 330 Understanding the Individual in the Organization

This course explores the micro dynamics of organizations: the individual and his/her relationship to other people, teams, and work groups. Topics will include: individual traits, behaviors, and skills for effective performance; self-assessment and professional development; staffing; motivation; individual and group dynamics; multicultural understanding and diversity; and ethical decision making.

MGT 337 Managing Human Capital

Building on prior coursework, this course will provide students with advanced human resource concepts and practices as well as practical experience in how human resources should be managed in successful businesses. Student groups will work with a local organization to diagnose, analyze, and make recommendations regarding effective programs in staffing, developing, rewarding, motivating, and managing its personnel. Prerequisite: MGT 330.

MGT 355 Organizational Effectiveness and Leadership

Students will study the "macro dynamics" of organizations: broad knowledge of how organizations work and the various ethical

means of impacting outcomes. Topics will include: structure, culture, and politics of organizations; human resources and linkages to organizational culture and success; organization influence and political savvy; managing change and learning in a global context; organizational governance, codes of conduct, and internal controls; the role of business in society; and various professional development issues. Prerequisite: MGT 330.

MGT 370 International Management

Students receive an introduction to management in an international environment, addressing the management functions and behaviors necessary to develop global vision and management skills at a strategic (macro) and interpersonal (micro) level. Cross-cultural management and competitive strategy are evaluated in the context of global changes.

MGT 470 International Study in Business

This course is designed to provide a study-abroad experience for the student. The course involves three components: study of international business through on-campus lectures and discussions; travel to a foreign country for visitations to business firms, government organizations, and cultural sites; and critique sessions of the international learning experience after travel completion. Restrictions: Special application and selection process prior to enrollment

MGT 471 Strategic Management

The study of business strategy concepts and application using case studies representing "real world" situations. The course stresses the formulation of business strategies to achieve organizational objectives using strategic analysis and models based upon external and internal assessments of the organization's environment. Prerequisites: ACCTNG 211, FIN 325, MGT 330, MKT 324, and DSOM 326 (or concurrent enrollment).

MGT 496 Internship: Management

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Admission only by prior approval and consent of instructor. Note: Internship coursework is evaluated on a credit/no credit basis.

MGT 497 Special Topics: Management

Study and research in areas of special interest under individual faculty direction. Prerequisites: Senior Standing and pre-registration consent of instructor.

Management Information Systems (MIS)

MIS 202 Computer Applications In Management

A comprehensive coverage of computer tools for personal productivity in a management context, including spreadsheets and databases. Prerequisites: Math 110 or equivalent.

MIS 402 Information Management

This course introduces students to the impact of information technologies and systems on the enterprise. Business Intelligence and decision support capabilities are explored as well. Prerequisites: MIS 202 and STAT 235

MIS 415 Managing the Information Systems Resource

All organizations today have information systems, and managing the related resources (systems personnel, software applications, databases, networks, computing hardware) is a necessary skill for many employees. This course is aimed at developing the non-technical skills that business-school graduates need to make appropriate decisions about the deployment of information systems throughout the firm. Prerequisites: MIS 202 and six hours of business school courses at the 300-level or above.

MIS 496 Internship: Management Information Systems

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Prerequisite: Admission only by prior approval and consent of instructor. Note: Internship coursework is evaluated on a credit/no credit basis.

MIS 497 Special Topics: Management Information Systems

Study and research in areas of special interest under individual faculty direction. Prerequisite: Senior Standing and pre-registration consent of instructor

Marketing (MKT)

MKT 324 Marketing Concepts

The course focuses on the processes involved in the marketing of goods and services, including the meaning and importance of marketing terminology, the marketing mix, the marketing concept, consumerism, market segmentation, market and marketing research, and the impacts of different competitive structures on marketing decision making.

MKT 335 Consumer Behavior in Marketing

This course draws upon findings from various disciplines including cognitive psychology, social psychology, sociology, economics, and anthropology to understand and predict buying behavior. Structured around applications in marketing strategy, topical coverage includes motivation, perception, attitude change, choice decisions and the consumption process, as well as post-purchase satisfaction. Prerequisite: MKT 324

MKT 348 Market Analysis

Market Analysis equips students with the tools needed to be intelligent users of market data. Topics to be covered include the design of research projects, questionnaire design, sampling, data collection techniques, data analysis, and the presentation of results. Prerequisites: MKT 324 and DSOM 309, or concurrent enrollment

MKT 418 Sales and Promotion Strategies

Students receive exposure to the planning, implementation, and evaluation of various revenue-generating and promotional strategies. Topics covered will include the analysis of customers, competitors, and product markets; market segmentation; product positioning; media planning; promotional effectiveness; and client-agency relationships. Prerequisite: MKT 324

MKT 442 Internet/Direct Marketing

This course examines internet and direct marketing as these topics relate to marketing strategy and the overall marketing plan. Coverage will include topics such as website traffic, customer relationship management (CRM), email marketing, podcasts, blogs, social media, online video, online advertising, online marketing research, and other strategies and tactics for customer acquisition, retention, and add-on selling. Prerequisite: MKT 324

MKT 465 Introduction to Retailing and Pricing

This course presents an approach to retail and pricing management. Topics covered in the course include: retail strategy development, understanding the customer, retail information systems, market location selection, merchandise buying and handling, financial operations management, human resource management, operations management, store layout and design, laws ethics, and retail tactics.

MKT 476 Services Marketing

The purpose of this course is to show how the marketing of services differs from the marketing of goods. Additionally, students will learn the relationship between service quality and customer satisfaction, how to understand and assess service expectations, and how to match those expectations with company standards. Prerequisite: MKT 324.

MKT 480 Marketing Strategy

This senior-year capstone examines various activities within the overall marketing process, and introduces the development and application of an analysis framework. The use of case problems and technology, and exposure of issues related to ethics, allow the student to gain a full understanding of the relationship between marketing and management. Prerequisite: Nine hours of marketing, including MKT 324.

MKT 496 Internship: Marketing

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Prerequisite: Admission only by prior approval and consent of instructor. Note: Internship coursework is evaluated on a credit/no credit basis.

MKT 497 Special Topics: Marketing

Study and research in areas of special interest under individual faculty direction. Prerequisite: Senior Standing and pre-registration consent of instructor

Public Administration (PUB-ADM)**PUB-ADM 310 Introduction To Public Administration**

Introductory analysis of the theory and practice of public administration and its special role in society. General examination of newer approaches to planning, programming, budgeting, and system analysis in the responsible-responsive administration context. The political role of the public administrator in public policy formulation and his/her general strategies.

PUB-ADM 310 Introduction To Public Administration

Introductory analysis of the theory and practice of public administration and its special role in society. General examination of newer approaches to planning, programming, budgeting, and system analysis in the responsible-responsive administration context. The political role of the public administrator in public policy formulation and his/her general strategies.

PUB-ADM 410 Research Methods In Public Administration

This introductory course focuses on quantitative empirical research design and statistical analyses in relation to public

administration issues and concerns. Prerequisite(s): Admission to MPA 5 year program.

PUB-ADM 415 Issues In Urban Administration

This course is designed for students in urban affairs, urban planning, business administration, political science, sociology, geosciences, economics and related fields. It provides an overview of major issues and trends in urban administration. Issues include taxes, urban sprawl, race/ethnicity, education, poverty, affordable housing, environment, crime, and land use. Particular focus will be paid to public policy, comparing policies and leadership to construct an interdisciplinary, comparative understanding of how cities address these problems, issues and trends.

PUB-ADM 448 Leadership For Public Service

The two core purposes of this course are for students to learn about effective and ethical leadership, and for students to understand and develop their own capacity for leadership. The course is organized around three general themes: 1) leadership as relations with subordinates, including issues of work motivation; 2) leadership as lateral relations, including organizational politics and conflict management and resolution; and 3) leadership as influence in the organization's environment. Prerequisite(s) Admission to MPA 5 year program.

PUB-ADM 455 Non-Profit Leadership Issues

Focusing on leadership issues in nonprofits, this course will explore issues in an intensive seminar format (fifteen class hours). Topics include building and renewing nonprofit boards, and the power of diversity in nonprofit organizations. Recommended for nonprofit management students.

PUB-ADM 455B Non-Profit Leadership Issues: Board-Staff Relations

PUB-ADM 455B Non-Profit Leadership Issues: Board-Staff Relations

PUB-ADM 455C Non-Profit Leadership Issues:A Vital Resource In A Changing World

PUB-ADM 455C Non-Profit Leadership Issues:A Vital Resource In A Changing World

PUB-ADM 495 Voluntarism, Philanthropy & The Non-Profit Sector In The U.S.

This course provides a survey of the origins, development and contemporary functioning of the private, nonprofit sector in the U.S. The course explores theories and concepts that describe the social, political, legal and economic meaning of voluntarism, philanthropy and the nonprofit sector.

PUB-ADM 497 Special Topics In Public Administration

Study and research in areas of special interest under individual faculty direction. Prerequisite: Senior standing and pre-registration consent of instructor.

PUB-ADM 497 Special Topics In Public Administration

Study and research in areas of special interest under individual faculty direction. Prerequisite: Senior standing and pre-registration consent of instructor.

PUB-ADM 497B Special Topics In Public Administration

Real Estate (RL-EST)

RL-EST 321 Real Estate Principles

The Student will be introduced to the very basics of real estate from the terminology, real estate's role in the economy, legal foundations, government controls, appraisal processes, valuation processes, brokering and closing transactions, time value of money, basic management issues and lease clauses, and basic standard form purchase contracts.

RL-EST 322 Real Estate Principles II

The objectives of this course are to expand on the concepts taught in the prerequisite to this course known as ""Real Estate Principles"". It will explain the role of the real estate broker as well as their legal responsibilities. It will cover agency law, current disclosure laws and provide a thorough understanding of the real estate license laws, Upon completion of this course the student would be eligible to take the Real Estate licensing examination for the state of Missouri. Prerequisites: RL-EST 321/ENT

RL-EST 421 Real Estate Finance Fundamentals

This course will provide a fundamental understanding of basic financial concepts of real estate including compounding and discounting, construction of amortization tables and after-tax yield analysis for a simple real estate investment. It also touches on the basics of title insurance, ownership issues, fixed rate versus variable rate mortgages in residential real estate, understanding housing bubbles, and trends in valuation of residential real estate. In addition, the student will complete mathematical comparisons of leasing versus owning a home. Prerequisite: FIN 325

RL-EST 425 Principles of Real Estate Property Management

Explores the complexities of managing apartments, condominiums, office buildings, industrial property, and shopping centers. This course covers rental markets, development of rental schedules, leasing techniques and negotiations, repairs and maintenance, tenant relations, merchandising, selection and training of personnel, accounting and owner relations.

RL-EST 496 Internship: Real Estate

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Prerequisite: Admission only by prior approval and consent of instructor. Note: Internship coursework is evaluated on a credit/no credit basis.

RL-EST 497 Special Topics: Real Estate

Study and research in areas of special interest under individual faculty direction. Prerequisites: Senior standing and pre-registration consent of instructor.

RL-EST 497A Special Topics-Real Estate

Study and research in areas of special interest under individual faculty direction. Prerequisites: Senior standing and pre-registration consent of instructor.

RL-EST 497B Special Topics-Real Estate

Study and research in areas of special interest under individual faculty direction. Prerequisites: Senior standing and pre-registration consent of instructor.

Conservatory of Music & Dance**Conservatory of Music and Dance Undergraduate Courses****Conservatory (CONSVTY)****CONSVTY 101C Voice Class I**

A course in the fundamentals of correct voice productions; breathing, breath control, study of vowel forms and consonants. Elementary songs. Poise, posture, and stage presence. This course covers two points of view: development of the student's own voice and the pedagogy of voice-class instruction. A voice audition is required before registration.

CONSVTY 101C Voice Class I

A course in the fundamentals of correct voice productions; breathing, breath control, study of vowel forms and consonants. Elementary songs. Poise, posture, and stage presence. This course covers two points of view: development of the student's own voice and the pedagogy of voice-class instruction. A voice audition is required before registration.

CONSVTY 103 Fundamentals Of Music Theory

An introduction to the rudiments of music theory and basic musicianship skills. Designed primarily as a review course for Conservatory students. Non-music majors may also enroll in this course.

CONSVTY 104 Jazz Improvisation I

A systematic approach to the art of jazz improvisation. Emphasis upon performance as well as analysis. Prerequisite: CONSVTY 122 or consent of the instructor.

CONSVTY 104 Jazz Improvisation I

A systematic approach to the art of jazz improvisation. Emphasis upon performance as well as analysis. Prerequisite: CONSVTY

122 or consent of the instructor.

CONSVTY 105 Jazz Improvisation For Non-Jazz Majors

This course is designed to provide the non-Jazz major with fundamental concepts needed to compose spontaneously. Blues and basic jazz forms are covered through performance and recordings. Offered: Fall

CONSVTY 105 Jazz Improvisation For Non-Jazz Majors

This course is designed to provide the non-Jazz major with fundamental concepts needed to compose spontaneously. Blues and basic jazz forms are covered through performance and recordings. Offered: Fall

CONSVTY 108 Beginning Piano For Non-Music Majors

A class for non-music majors to acquire basic piano skills. Popular arrangements and group techniques designed to encourage students to play the piano for pleasure. Prerequisite: Consent of the instructor.

CONSVTY 108 Beginning Piano For Non-Music Majors

A class for non-music majors to acquire basic piano skills. Popular arrangements and group techniques designed to encourage students to play the piano for pleasure. Prerequisite: Consent of the instructor.

CONSVTY 110 Keyboard Skills I

Group instruction focused on developing basic keyboard skills in sight-reading, transposition, harmonization, accompanying, improvisation, technique, and repertoire. Music theory concepts will be reinforced through keyboard applications.

CONSVTY 110 Keyboard Skills I

Group instruction focused on developing basic keyboard skills in sight-reading, transposition, harmonization, accompanying, improvisation, technique, and repertoire. Music theory concepts will be reinforced through keyboard applications.

CONSVTY 114 Keyboard Skills I for Piano Majors

Techniques of sight reading , transposition, improvisation and open-score reading.

CONSVTY 114 Keyboard Skills I for Piano Majors

Techniques of sight reading , transposition, improvisation and open-score reading.

CONSVTY 115 Keyboard Skills II for Piano Majors

Continuation of CONSVTY 114.

CONSVTY 115 Keyboard Skills II for Piano Majors

Continuation of CONSVTY 114.

CONSVTY 120 Music Appreciation

Designed for the general University student with little or no music background and required for Dance Majors (no credit for music majors). An emphasis on the basic elements of music and the historical and stylistic periods, illustrated by examples from different genre, such as instrumental and vocal ensembles, large and small, solo literature for voice and instruments, and dance. Three class sessions a week with frequent live performance and guest speakers.

CONSVTY 120 Music Appreciation

Designed for the general University student with little or no music background and required for Dance Majors (no credit for music majors). An emphasis on the basic elements of music and the historical and stylistic periods, illustrated by examples from different genre, such as instrumental and vocal ensembles, large and small, solo literature for voice and instruments, and dance. Three class sessions a week with frequent live performance and guest speakers.

CONSVTY 121 Music Theory I

A course presenting the elementary melodic, rhythmic, and harmonic elements of music through part-writing and analysis. The vocabulary for the first semester includes traditional usage and analysis of triads and their inversions, nonharmonic tones, introduction to chords of the seventh, and elementary modulation.

CONSVTY 122 Music Theory II

Continuation of CONSVTY 121. Prerequisite: CONSVTY 121 or equivalent.

CONSVTY 123 Keyboard Skills II

Continued group instruction focused on developing basic keyboard skills in sight-reading, transposition, harmonization, accompanying, improvisation, technique, and repertoire. Music theory concepts will be reinforced through keyboard applications.

CONSVTY 123 Keyboard Skills II

Continued group instruction focused on developing basic keyboard skills in sight-reading, transposition, harmonization, accompanying, improvisation, technique, and repertoire. Music theory concepts will be reinforced through keyboard applications.

CONSVTY 125 History And Development Of Rock And Roll

Designed for students with little or no music background, the course is an exploration of American popular music from early Rhythm and Blues and Country Western through Woodstock. Examines in detail the social/racial issues most important to the music and the cultural history of twentieth-century America. The course features online video lectures and numerous interviews with professors and scholars from other disciplines, presenting a perspective of the influence of this music on nearly every area of American life. Students are required to participate in online discussion groups as part of the class. Music majors may enroll for music elective credit.

CONSVTY 126 Introduction to World Music

An introduction to global music traditions and their cultural contexts. Open to all students.

CONSVTY 128 Introduction To Music Education/Music Therapy

An introductory course for all BME Choral and Instrumental majors, all music therapy majors, and all students who want general information about the field of music education and music therapy. Includes information on the profession and the role of music education in a school curriculum, as well as the roll of music therapy in various settings.

CONSVTY 129A Ear Training And Solfege

Study of tonal aural problems and rhythms. Introduction to movable do solfege.

CONSVTY 129A Ear Training And Solfege

Study of tonal aural problems and rhythms. Introduction to movable do solfege.

CONSVTY 129B Ear Training And Solfege

Continuation of CONSVTY 129A. Prerequisite: CONSVTY 129A.

CONSVTY 129B Ear Training And Solfege

Continuation of CONSVTY 129A. Prerequisite: CONSVTY 129A.

CONSVTY 130 Music Therapy Techniques: Adults

Class demonstration and participation in use of materials for psychiatric and geriatric clients. Required of all BME Therapy majors.

CONSVTY 133 Beginning Composition I

Introduction to the compositional process, including notation, calligraphy and score preparation, styles and forms, and related topics. A weekly one-hour lab is required.

CONSVTY 133A Beginning Composition For Non-Composition Majors I

An introductory course in music composition, with exercises in instrumentation, notation, orchestration, form, melodic construction, harmony, counterpoint, and rhythm. Discussion and analysis of current works, trends and techniques in music composition. Final project is an original composition. A weekly one-hour lab is required.

CONSVTY 133B Beginning Composition For Prospective Composition Majors

A class for students wishing to work toward major status in the music composition program. Exercises and projects as in 133A, with an extra hour per-week of in-depth, guided exercises and portfolio development. Prerequisite: Permission of the instructor via evaluation of a composition portfolio-in-progress on the first day of class. A weekly one-hour lab is required.

CONSVTY 134 Beginning Composition II

Continuation of CONSVTY 133. Prerequisites: CONSVTY 121 and CONSVTY 133 or consent of the instructor. A weekly one-hour lab is required.

CONSVTY 134A Beginning Composition For Non-Composition Majors II

Prerequisites: CONSVTY 133A or consent of the instructor via portfolio evaluation on the first day of class. A weekly one-hour lab is required.

CONSVTY 134B Beginning Composition For Prospective Composition Majors II

Continuation of CONSVTY 133B. Exercises and projects as in CONSVTY 134A., with an extra hour per-week of in-depth, guided exercises and portfolio development. Prerequisites: CONSVTY 133B or consent of the instructor via portfolio evaluation

on the first day of class. A weekly one-hour lab is required.

CONSVTY 150 Introduction To Music Literature

An introduction to the major composers, literature, and forms of the various historical periods. Bibliographical sources and library procedures as well as extensive listening requirements are included.

CONSVTY 154 Music Listening Laboratory

Listening includes works of all major periods and styles in live performance. May be repeated for credit. Required for all Conservatory music majors. Non-music majors encouraged to enroll.

CONSVTY 154 Music Listening Laboratory

Listening includes works of all major periods and styles in live performance. May be repeated for credit. Required for all Conservatory music majors. Non-music majors encouraged to enroll.

CONSVTY 154A Music Listening Laboratory: Non-Western Cultures

The course is a study of music in culture and introduces undergraduate students to living music, musical instruments, and dance of oral traditions and music of high cultures outside the limits of urban European art music through discussion, performance, and observation. Required for all Conservatory music majors. Non-music majors are encouraged to enroll.

CONSVTY 161 String Instrument Laboratory

Designed for the student working at a beginning level of performance on string instruments. Instruction will focus on basic playing techniques and pedagogical issues. Enrollment for credit not required if student is concurrently enrolled in CONSVTY 373 (A&B), CONSVTY 381, CONSVTY 383, or CONSVTY 386. Prerequisite: Permission of instructor.

CONSVTY 161 String Instrument Laboratory

Designed for the student working at a beginning level of performance on string instruments. Instruction will focus on basic playing techniques and pedagogical issues. Enrollment for credit not required if student is concurrently enrolled in CONSVTY 373 (A&B), CONSVTY 381, CONSVTY 383, or CONSVTY 386. Prerequisite: Permission of instructor.

CONSVTY 171 Foreign Language For Singing I

A course for Italian and German diction. Emphasis is placed on oratorio rather than conversational pronunciation. Required for BME Choral and BM voice.

CONSVTY 172 Foreign Language For Singing II

A course for French and Latin diction. Emphasis is placed on oratorio rather than conversational pronunciation. Required for BME Choral and BM voice.

CONSVTY 180 Music In Special Education

Class demonstration and participation in the use of music materials for handicapped children.

CONSVTY 185A Foreign Language For Singing I

A course for English and Latin diction for oratorio performance with detailed study of the International Phonetic Alphabet. Required for BM voice.

CONSVTY 185B Foreign Language For Singing II

A course for Italian diction. Emphasis is placed on sung rather than conversational pronunciation. Required for BM voice.

CONSVTY 185C Foreign Language For Singing III

A course for German diction. Emphasis is placed on sung rather than conversational pronunciation. Required for BM voice.

CONSVTY 185D Foreign Language For Singing Iv

A course for French diction. Emphasis is placed on sung rather than conversational pronunciation. Required for BM voice.

CONSVTY 199 Kangaroo Band

This band will provide music for men's and women's basketball games. Members are required to attend all home games. Open to all University students by audition.

CONSVTY 199 Kangaroo Band

This band will provide music for men's and women's basketball games. Members are required to attend all home games. Open to all University students by audition.

CONSVTY 202 Basic Techniques Of Audio Recording I

A study of the philosophy, history, and development of audio recording. Practical application of recording techniques and development of recording skills.

CONSVTY 202 Basic Techniques Of Audio Recording I

A study of the philosophy, history, and development of audio recording. Practical application of recording techniques and development of recording skills.

CONSVTY 203 Basic Techniques Of Audio Recording II

Continuation of study of recording techniques and development of recording skills. Prerequisite: CONSVTY 202 or consent of the instructor.

CONSVTY 203 Basic Techniques Of Audio Recording II

Continuation of study of recording techniques and development of recording skills. Prerequisite: CONSVTY 202 or consent of the instructor.

CONSVTY 204 Jazz Improvisation II

Prerequisite: CONSVTY 104 or consent of the instructor.

CONSVTY 204 Jazz Improvisation II

Prerequisite: CONSVTY 104 or consent of the instructor.

CONSVTY 205 Applied Jazz Studies

Unlimited repeatability. This weekly private lesson includes the study of advanced concepts used to compose spontaneously. Includes the analyses of harmonic progressions, applications of scales and rhythmic interpretation. Prerequisite: Jazz majors with the approval of the instructor.

CONSVTY 210 Clinical Experience

One hour minimum of supervised clinical experience in music therapy and one hour of seminar per week, which includes practice in developing a treatment plan and writing clinical progress reports. All clinicals regardless of contact hours must have a minimum on-site 10 week duration.

CONSVTY 210A Clinical Experience: I

Must be taken concurrently with CONSVTY 260

CONSVTY 210B Clinical Experience: II

Primarily assists the site coordinator with some leadership responsibilities.

CONSVTY 210C Clinical Experience: III

Equal assisting and leading responsibilities on-site

CONSVTY 210D Clinical Experience: Iv

Some assisting and primarily leading responsibilities on-site.

CONSVTY 210E Clinical Experience: V

Must be taken concurrently with CONSVTY 408

CONSVTY 210F Clinical Experience Vi

Must be taken concurrently with CONSVTY 409.

CONSVTY 214 Keyboard Skills III for Piano Majors

Techniques of sight reading, transposition, improvisation and open-score reading. Prerequisite: CONSVTY 115.

CONSVTY 214 Keyboard Skills III for Piano Majors

Techniques of sight reading, transposition, improvisation and open-score reading. Prerequisite: CONSVTY 115.

CONSVTY 215 Keyboard Skills IV for Piano Majors

Continuation of CONSVTY 214. Prerequisite: CONSVTY 214.

CONSVTY 215 Keyboard Skills IV for Piano Majors

Continuation of CONSVTY 214. Prerequisite: CONSVTY 214.

CONSVTY 221 Music Theory III

Continuation of CONSVTY 122. Introduction to nineteenth century harmony. Prerequisite: CONSVTY 122.

CONSVTY 222A Music Theory Iv

Continuation of CONSVTY 221. An introduction to 20th century analysis and techniques, focusing on popular music and jazz styles. Study in performing, compositional skills, and related ear-training. Prerequisite: CONSVTY 221.

CONSVTY 223 Keyboard Skills III

Group instruction focused on developing intermediate keyboard skills in sight-reading, transposition, harmonization, accompanying, improvisation, technique, and repertoire. Music theory concepts will be reinforced through keyboard applications.

CONSVTY 223 Keyboard Skills III

Group instruction focused on developing intermediate keyboard skills in sight-reading, transposition, harmonization, accompanying, improvisation, technique, and repertoire. Music theory concepts will be reinforced through keyboard applications.

CONSVTY 227 Jazz Keyboards Techniques II

This course is a continuation of Conservatory 226 Jazz Keyboard Techniques I. Prerequisite: Cons 226 or consent of instructor.

CONSVTY 229A Ear Training And Solfege

Continuation of CONSVTY 129B. Prerequisite: CONSVTY 129B.

CONSVTY 229A Ear Training And Solfege

Continuation of CONSVTY 129B. Prerequisite: CONSVTY 129B.

CONSVTY 229B Ear Training And Solfege

Continuation of CONSVTY 229A. Prerequisite: CONSVTY 229A.

CONSVTY 229B Ear Training And Solfege

Continuation of CONSVTY 229A. Prerequisite: CONSVTY 229A.

CONSVTY 233 Intermediate Composition I

Continuation of CONSVTY 134. A weekly one-hour lab is required. Prerequisites for composition majors: CONSVTY 134 and CONSVTY 122 or consent of the instructor. Prerequisites for non-majors: a significant composition portfolio (to be submitted on the first day of class for consideration).

CONSVTY 233A Beginning Composition for Non-Composition Majors I

Continuation of CONSVTY 134A. A weekly on-hour lab is required. Prerequisite: CONSVTY 122 and CONSVTY 134A, or consent of the composition faculty via portfolio submission on the first day of class.

CONSVTY 233A Beginning Composition for Non-Composition Majors I

Continuation of CONSVTY 134A. A weekly on-hour lab is required. Prerequisite: CONSVTY 122 and CONSVTY 134A, or consent of the composition faculty via portfolio submission on the first day of class.

CONSVTY 234 Intermediate Composition II

Continuation of CONSVTY 233. Prerequisites for composition majors: CONSVTY 221 and CONSVTY 233 or consent of the instructor. Prerequisites for non-majors: a significant composition portfolio (to be submitted on the first day of class for consideration).

CONSVTY 234A Beginning Composition for Non-Composition Majors II

Continuation of CONSVTY 233A. A weekly one-hour lab is required. Prerequisite: CONSVTY 221 and CONSVTY 233A, or consent of the composition faculty via portfolio submission on the first day of class.

CONSVTY 234A Beginning Composition for Non-Composition Majors II

Continuation of CONSVTY 233A. A weekly one-hour lab is required. Prerequisite: CONSVTY 221 and CONSVTY 233A, or consent of the composition faculty via portfolio submission on the first day of class.

CONSVTY 235 Techniques Of Electronic Music I: Digital Audio

Conservatory 235 is designed to give students a thorough grasp of studio hardware and software used in composing music with digital audio. Studio configuration, sampling/recording, mixing, effects processing, synthesis, multi-tracking, wave editor and digital audio work station software, basic MIDI and electroacoustic literature and ear training will be discussed in the process of creating a short original composition. Focus will also be on fostering independent creativity and problem solving in a music studio. In addition to three 50-minute lecture/demo sessions per week, 3-5 hours minimum of in-studio work time is expected.

Open to anyone regardless of musical training. Offered: Fall

CONSVTY 236 Techniques Of Electronic Music II: MIDI

Conservatory 236 is designed to give students a grasp of studio hardware and software used in composing music with MIDI. Studio configuration, sampling, mixing, effects processing, multi-tracking, MIDI, and basic digital audio work station software will be taught along with electroacoustic literature and ear training. The course focuses on creating a short composition using MIDI technology. Focus will also be on fostering independent creativity and problem solving in a music studio. In addition to three 50-minute lecture/demo sessions per week, 3-5 hours minimum of in-studio time is expected. Open to anyone regardless of musical training. Offered: Spring

CONSVTY 260 Clinical Foundations Of Music Therapy

This course is intended to prepare students majoring in music therapy for clinical experiences in the community. Students learn and develop skills related to the treatment process. Prerequisites: Students must take concurrently with CONSVTY 210A, Clinical Experience I

CONSVTY 270 Marching Band & Jazz Ensemble Techniques

This course is designed to prepare pre-service teachers with pedagogical and organizational techniques for marching band and jazz ensembles in the schools. The course will include developing practical rehearsal techniques for teaching body manipulation in space, designing and evaluating marching band field design and maneuvers, jazz ensemble pedagogy, jazz improvisation pedagogy, and the use of appropriate materials. A field experience component will further student interaction with an active band program that will allow continued examination and development of a philosophy on the role of marching band and jazz ensembles within the school curriculum. Prerequisite: Permission of faculty.

CONSVTY 285 Elementary Music Methods

Laboratory course for classroom teachers in which principles of instructional design will be applied to music teaching. Students who have extensive music background may elect CONSVTY 385 in place of CONSVTY 285.

CONSVTY 301B Men's Chorus

CONSVTY 301B Men's Chorus

CONSVTY 301C Bella Voce

CONSVTY 301C Bella Voce

CONSVTY 301D Connection

CONSVTY 301D Connection

CONSVTY 301E Opera/Musical Theatre Ensemble

An introduction to opera/musical theatre performance techniques for chorus. Major literature for opera choruses will also be surveyed. Members of this class will be required to perform in an Opera or Musical Comedy chorus. Prerequisites: None.

CONSVTY 301E Opera/Musical Theatre Ensemble

An introduction to opera/musical theatre performance techniques for chorus. Major literature for opera choruses will also be surveyed. Members of this class will be required to perform in an Opera or Musical Comedy chorus. Prerequisites: None.

CONSVTY 301G Ensemble For Composers

Observation, score analysis, non-performance participating during a semester's rehearsals and performance by a participating Conservatory ensemble. Students a.) keep journals that are periodically reviewed and graded by the composition faculty, and b.) meet with composition faculty periodically to review and discuss issues raised in the ensemble settings. Prerequisite(s): Successful completion of four semesters of major ensemble participation as a performer, and either CONSVTY 234 or permission of the composition faculty.

CONSVTY 301G Ensemble For Composers

Observation, score analysis, non-performance participating during a semester's rehearsals and performance by a participating

Conservatory ensemble. Students a.) keep journals that are periodically reviewed and graded by the composition faculty, and b.) meet with composition faculty periodically to review and discuss issues raised in the ensemble settings. Prerequisite(s): Successful completion of four semesters of major ensemble participation as a performer, and either CONSVTY 234 or permission of the composition faculty.

CONSVTY 301H Musica Nova

CONSVTY 301H Musica Nova

CONSVTY 302 Orchestra

Required of all qualified music majors and open to all interested students by audition.

CONSVTY 302 Orchestra

Required of all qualified music majors and open to all interested students by audition.

CONSVTY 303B Jazz Band

the Jazz Ensemble comprises saxophone, trombone, trumpets and rhythm section students of the highest level in the Conservatory and performs repertoire of the highest caliber available to the medium. The curriculum is well balanced between traditional, modern, and original music and requires advanced musical and technical facility amongst its members. The class is open to all UMKC students by audition. Prerequisite: Approval of the instructor.

CONSVTY 303B Jazz Band

the Jazz Ensemble comprises saxophone, trombone, trumpets and rhythm section students of the highest level in the Conservatory and performs repertoire of the highest caliber available to the medium. The curriculum is well balanced between traditional, modern, and original music and requires advanced musical and technical facility amongst its members. The curriculum is well balanced between traditional, modern, and chamber music and requires advanced musical and technical facility amongst its members. The class is open to all UMKC students by audition.

CONSVTY 307A Canticum Novum

CONSVTY 307A Canticum Novum

CONSVTY 307B University Singers

Mixed chorus specializing in choral-orchestral literature. May be repeated for credit. Open by audition to University students, regardless of major.

CONSVTY 307B University Singers

Mixed chorus specializing in choral-orchestral literature. May be repeated for credit. Open by audition to University students, regardless of major.

CONSVTY 308A Conservatory Concert Choir

CONSVTY 308A Conservatory Concert Choir

CONSVTY 309 Audio Recording III

Continuation of study of recording techniques and music production skills. Prerequisite: CONSVTY 203.

CONSVTY 310 Keyboard Skills Iv

Group instruction focused on developing intermediate keyboard skills in sight-reading, transposition, harmonization, accompanying, improvisation, technique, and repertoire. Music theory concepts will be reinforced through keyboard applications. The Piano Proficiency Exam is administered as part of this course.

CONSVTY 310 Keyboard Skills Iv

Group instruction focused on developing intermediate keyboard skills in sight-reading, transposition, harmonization, accompanying, improvisation, technique, and repertoire. Music theory concepts will be reinforced through keyboard applications. The Piano Proficiency Exam is administered as part of this course.

CONSVTY 311 Jazz Theory

The basics of written jazz harmony and its nomenclature will be addressed. Topics covered will include but not be limited to jazz scales and modes: chords, i.e. from the 7 through the 13 with all of their frequent jazz alterations; harmonic progressions, reharmonization; voice leading, dissonance; melody, transcription, analysis and the study of form(s). Notation will be addressed throughout. Students will acquire the fundamentals to pursue jazz improvisation, arranging and composition on a more informed level. This class is a prerequisite to Jazz Arranging. Prerequisite: CONSVTY 222B Theory IV and instructor permission

CONSVTY 314 Seminar In Chamber Music

Potential enrollees must audition. Those accepted from a pool of players from which chamber groups are drawn each semester. Groups must rehearse four hours a week, and will receive a one-hour coaching each week. All enrollees will also take part in a periodic chamber music master class. This class, two hours in length, will be taught by various members of the core chamber music faculty and by guest artists.

CONSVTY 314 Seminar In Chamber Music

Introduction and practice in singing, aural recognition and writing of intervals and short, simple melodies. Also including rhythm, memory and improvisational drills. Prerequisite: CONSVTY 329 Advanced Ear Training

CONSVTY 319 Opera Role Performance

Preparation, rehearsal and performance of a role in an opera or music theatre production at UMKC. Credit for performance as part of the ensemble/chorus may be received from this course after the two chorus requirements are completed as part of the choral requirements. Credit for non-performing duties such as assistant directing or assistant stage managing may be available with approval of opera/music theatre staff. Prerequisite: Audition (generally held during the first week and a half of classes in the fall).

CONSVTY 319 Opera Role Performance

Preparation, rehearsal and performance of a role in an opera or music theatre production at UMKC. Credit for performance as part of the ensemble/chorus may be received from this course after the two chorus requirements are completed as part of the choral requirements. Credit for non-performing duties such as assistant directing or assistant stage managing may be available with approval of opera/music theatre staff. Prerequisite: Audition (generally held during the first week and a half of classes in the fall).

CONSVTY 320 Music Theatre Role Performance

Preparation, rehearsal and performance of a role in an opera or music theatre production at UMKC. Credit for performance as part of the ensemble/chorus may be received from this course after the two chorus requirements are completed as part of the choral requirements. Credit for non-performing duties such as assistant direction or assistant stage managing may be available with approval of opera/music theatre staff. Prerequisite: Audition (generally held during the first week and a half of classes in the fall).

CONSVTY 320 Music Theatre Role Performance

Preparation, rehearsal and performance of a role in an opera or music theatre production at UMKC. Credit for performance as part of the ensemble/chorus may be received from this course after the two chorus requirements are completed as part of the choral requirements. Credit for non-performing duties such as assistant direction or assistant stage managing may be available with approval of opera/music theatre staff. Prerequisite: Audition (generally held during the first week and a half of classes in the fall).

CONSVTY 323 Form And Analysis I

Application of theoretical principles of analysis to Western Art music. Prerequisite: CONSVTY 221.

CONSVTY 325 Piano Pedagogy I

Instructional strategies for teaching the beginning piano student including methods, materials, repertoire, technique and the use of music technology. Various aspects of establishing and managing a piano studio will also be addressed.

CONSVTY 325A Piano Pedagogy - Supervised Teaching I

Supervised practicum designed to demonstrate lesson planning and activities for beginning students through the observation of experienced teachers and various supervised teaching experiences. Must be taken concurrently with CONS 325.

CONSVTY 325A Piano Pedagogy - Supervised Teaching I

Supervised practicum designed to demonstrate lesson planning and activities for beginning students through the observation of experienced teachers and various supervised teaching experiences. Must be taken concurrently with CONS 325.

CONSVTY 326 Piano Pedagogy II

Instructional strategies for teaching the intermediate and advanced piano student, including methods, materials, repertoire, technique, and the use of music technology. Prerequisite: CONS 325.

CONSVTY 326A Piano Pedagogy - Supervised Teaching II

Supervised practicum designed to demonstrate lesson planning and activities for students of various levels through observation of experienced teachers and various supervised teaching experiences must be taken concurrently with Cons 326. Prerequisite: Cons 325A.

CONSVTY 326A Piano Pedagogy - Supervised Teaching II

Supervised practicum designed to demonstrate lesson planning and activities for students of various levels through observation of experienced teachers and various supervised teaching experiences must be taken concurrently with Cons 326. Prerequisite: Cons 325A.

CONSVTY 329 Advanced Ear Training

Study of atonal and highly chromatic tonal aural problems, complex rhythms, and recognition of instruments. Prerequisite: CONSVTY 222 or CONSVTY 222B or equivalent. May be repeated for credit.

CONSVTY 329 Advanced Ear Training

Study of atonal and highly chromatic tonal aural problems, complex rhythms, and recognition of instruments. Prerequisite: CONSVTY 222 or CONSVTY 222B or equivalent. May be repeated for credit.

CONSVTY 330 Jazz Composition

This course encourages composers to work towards developing an individual writing style and controlling the melodic line in the Jazz idiom. It includes writing assignments, and end-of-the-semester writing projects that are performed by UMKC Jazz ensembles and/or top Kansas City professionals.

CONSVTY 331 Orchestration I

An introduction to the instruments of the symphony orchestra and rudiments of scoring. Classification of instruments and learning to write for all transposing instruments. Prerequisites: CONSVTY 222 or CONSVTY 222B or consent of an instructor or Music theory I-IV.

CONSVTY 331A Orchestration I

An introduction to the instruments of the symphony orchestra and rudiments of scoring. Meets concurrently with CONSVTY 331; the third credit hour is required for music composition and music theory majors. Prerequisites: CONSVTY 222 or CONSVTY 222B or consent of an instructor of Music Theory I-IV.

CONSVTY 333 Advanced Composition

Prerequisites: CONSVTY 222 or CONSVTY 222B and CONSVTY 234 or consent of the instructor. May be repeated for credit.

CONSVTY 335 Electronic Music Composition

CONSVTY 335 focuses on creating an original music composition in any style utilizing the full range of digital audio or MIDI hardware, software and techniques available to the student. In addition to weekly meetings arranged with the instructor, 5-8 hours per week of studio time is required. Available each semester and may be repeated for credit. Prerequisite(s): CONSVTY 235 or CONSVTY 236 or consent of the instructor.

CONSVTY 351 History Of Music In Western Civilization I

A chronological study of music in Western civilization with emphasis on periods and styles from early times to the death of Bach. Outside listening required. Prerequisite: CONSVTY 150 and successful completion of Cons. 122 highly recommended, or by consent of the instructor.

CONSVTY 351WI History of Music in Western Civilization I - Writing Intensive

George Santayana once reasoned that if you cannot remember the past, you are condemned to repeat it. If that is the case, then as music students you all must ask how the music of the past can inform and change the music you make and make you better musicians. This class examines selected works from Western musical history and explores the biographical, stylistic, and aesthetic issues they raise. It seeks to hone your analytical skills through knowledge of stylistic features while introducing you to musical debates that still rage today. Prerequisite: Must have a grade of "A" in CONSVTY 150, Completed English 110 & ENGLISH 225, & Pass the WEPT.

CONSVTY 352 History Of Music In Western Civilization II

A chronological study of music in Western civilization from 1750 to the present. Outside listening required. Prerequisite: CONSVTY. 351.

CONSVTY 352WI History Of Music In Western Civilization II-Writing Intensive

A chronological study of music in Western Civilization from 1750 to the present. Outside listening and writing projects required. Prerequisites: CONSVTY 150 Pass the WEPT GPA of 3.5 or higher Offered: Most semesters, at least once every academic year

CONSVTY 353A History And Development Of Jazz I

History of Jazz from its beginning through the present, using recordings, films and musical examples. Emphasis on the major historical trends in Jazz, including Early Jazz, Ragtime, Dixieland, Swing, Bebop, Cool Jazz, Hard Bop, Free Jazz, Jazz-Rock Fusion and modern developments. This course makes use of the Marr Sound Archive, and is appropriate for all students throughout the UMKC Campus.

CONSVTY 353WI History And Development Of Jazz II (WI)

This course aims to contextualize jazz within the musical culture of the twentieth century. It is designed to develop the students understanding of jazz from a writing and research perspective. This course concentrates on the lives, bands, and works of people who have been instrumental in the development of the various jazz styles. In-depth analysis of major jazz figures including Louis Armstrong, Duke Ellington, Count Basie, Charlie Parker, Dizzy Gillespie, Thelonious Monk, Clifford Brown, Sonny Rollins, John Coltrane, Miles Davis, Wayne Shorter, and many others. This course is most appropriate for Jazz Studies majors, and other conservatory students with some jazz background and knowledge of the fundamentals of music. This course makes use of the Marr sound Archive. Prerequisites: Conservatory 353A and approval of instructor.

CONSVTY 357 Choral Literature

Includes listening and analysis as they relate to programming and educational issues in choral ensemble setting. May be repeated for credit. Prerequisites: CONSVTY 380 or permission of instructor.

CONSVTY 358 Wind Band Literature and Lab

Designed for the student working with beginning and intermediate levels of wind/percussion instruments. Includes critical analysis and evaluation of literature selection as it relates to educational issues and programming in wind/percussion ensemble settings. Includes an off-campus course meeting with a community wind band rehearsal/performance setting providing opportunities realistic opportunities for observation and teaching. Prerequisites: Enrollment concurrent with CONSVTY 381; permission of faculty.

CONSVTY 358 Wind Band Literature and Lab

Designed for the student working with beginning and intermediate levels of wind/percussion instruments. Includes critical analysis and evaluation of literature selection as it relates to educational issues and programming in wind/percussion ensemble settings. Includes an off-campus course meeting with a community wind band rehearsal/performance setting providing opportunities realistic opportunities for observation and teaching. Prerequisites: Enrollment concurrent with CONSVTY 381; permission of faculty.

CONSVTY 359 String Literature

Includes listening and analysis as they relate to programming and educational issues in string ensemble settings. May be repeated for credit. Prerequisites: CONSVTY 381 or permission of instructor.

CONSVTY 361 Piano Literature I (Pre-Classical)

A survey of the development of keyboard literature from the fourteenth century through the Baroque. Special attention given to the development of keyboard forms, performance practices, idiomatic styles, and stringed keyboard instruments that precede the

piano.

CONSVTY 361 Piano Literature I (Pre-Classical)

A survey of the development of keyboard literature from the fourteenth century through the Baroque. Special attention given to the development of keyboard forms, performance practices, idiomatic styles, and stringed keyboard instruments that precede the piano.

CONSVTY 362 Piano Literature II (Classical)

A survey through analysis, reading, listening, and performance of piano repertoire from 1750 (death of J.S. Bach) to 1828 (death of Schubert).

CONSVTY 368 Orchestral Literature for Trumpet

Intended to introduce students to the standard repertoire for orchestral trumpet; class meets once weekly for an hour. Students will be expected to prepare and play approximately a dozen works per semester, rotating parts in a full trumpet section.

Prerequisite: Permission of faculty

CONSVTY 368 Orchestral Literature for Trumpet

Intended to introduce students to the standard repertoire for orchestral trumpet; class meets once weekly for an hour. Students will be expected to prepare and play approximately a dozen works per semester, rotating parts in a full trumpet section.

Prerequisite: Permission of faculty

CONSVTY 370 Choral/Vocal Techniques

Laboratory applications of vocal pedagogy, ensemble rehearsal technique, literature selection, and performance practice. Students will participate in singing and observation activities in a large ensemble setting with an emphasis on critical analysis of technical and pedagogical issues. Prerequisites: CONSVTY 380 or permission of instructor.

CONSVTY 370 Choral/Vocal Techniques

Laboratory applications of vocal pedagogy, ensemble rehearsal technique, literature selection, and performance practice. Students will participate in singing and observation activities in a large ensemble setting with an emphasis on critical analysis of technical and pedagogical issues. Prerequisites: CONSVTY 380 or permission of instructor.

CONSVTY 373A Instrumental Techniques Violin-Viola

CONSVTY 373B Instrumental Techniques Cello-Double Bass

CONSVTY 373C Instrumental Techniques Flute And Clarinet

CONSVTY 373D Instrumental Techniques Trumpet-Horn

CONSVTY 373D Instrumental Techniques Trumpet-Horn

CONSVTY 373E Instrumental Techniques Percussion

CONSVTY 373F Instrumental Techniques Oboe-Bassoon

CONSVTY 373F Instrumental Techniques Oboe-Bassoon

CONSVTY 373G Instrumental Techniques Guitar

CONSVTY 373H Instrumental Techniques Trombone-Tuba

CONSVTY 373H Instrumental Techniques Trombone-Tuba

CONSVTY 373N Survey Of Wind And Percussion Instruments

An overview of basic wind and percussion instruments used in public school settings. Includes embouchre formation, hand position, sound production, and pedagogical issues encountered in beginning situations.

CONSVTY 373P Survey Of String Instruments

An overview of basic string instruments used in public school settings. Includes hand position, bowing, sound production, and pedagogical issues encountered in beginning situations.

CONSVTY 373R Strings Techniques Lab (for BME String Majors)

Designed for the student working with beginning and intermediate level string instrumentalists. The course will focus on the pedagogy of teaching strings in a lab setting. Includes critical analysis and evaluation of literature selection as it relates to educational issues string ensemble settings. This course is a lab setting. Students will be playing daily on secondary instruments,

CONSVTY 375A Special Percussion Methods For Music Therapy Students

Study of classroom and individual percussion techniques applicable to situations found in the field of music therapy. Prerequisites: None.

CONSVTY 375B Special Percussion Methods For Dance Students

A class of percussion techniques which stresses hand drumming skills and advanced rhythmic counting and analysis. Prerequisites: None.

CONSVTY 376 Collaborative Piano I

Study of collaborative techniques and vocal literature.

CONSVTY 377 Collaborative Piano II

Continuation of CONSVTY 376. Prerequisites: CONSVTY 376.

CONSVTY 378 Instrumental Ensemble Rehearsal Techniques & Lab

Laboratory applications of large instrumental ensemble (strings, winds, percussion) pedagogy, ensemble rehearsal technique, and performance practice. Students will participate in playing, observation, rehearsal activities in a large ensemble setting with an emphasis on critical analysis of technical pedagogical issues and ensemble performance preparation. Includes an off-campus course meeting. Prerequisites: CONSVTY 381, CONSVTY 358 and completion of large ensemble requirement or permission of instructor. Enrollment concurrent with CONSVTY 383

CONSVTY 378 Instrumental Ensemble Rehearsal Techniques & Lab

Laboratory applications of large instrumental ensemble (strings, winds, percussion) pedagogy, ensemble rehearsal technique, and performance practice. Students will participate in playing, observation, rehearsal activities in a large ensemble setting with an emphasis on critical analysis of technical pedagogical issues and ensemble performance preparation. Includes an off-campus course meeting. Prerequisites: CONSVTY 381, CONSVTY 358 and completion of large ensemble requirement or permission of instructor. Enrollment concurrent with CONSVTY 383

CONSVTY 378 Instrumental Ensemble Rehearsal Techniques & Lab

Laboratory applications of large instrumental ensemble (strings, winds, percussion) pedagogy, ensemble rehearsal technique, and performance practice. Students will participate in playing, observation, rehearsal activities in a large ensemble setting with an emphasis on critical analysis of technical pedagogical issues and ensemble performance preparation. Includes an off-campus course meeting. Prerequisites: CONSVTY 381, CONSVTY 358 and completion of large ensemble requirement or permission of instructor. Enrollment concurrent with CONSVTY 383

CONSVTY 378L Instrumental Ensemble Rehearsal Lab

Laboratory applications of wind/percussion pedagogy, ensemble rehearsal technique, literature selection, and performance practice. Students will participate in playing, observation, and rehearsal activities in a large ensemble setting with an emphasis on critical analysis of technical pedagogical issues and ensemble performance preparation. This course may meet off-campus. Prerequisites: Cons 381, 358, and completion of large ensemble requirement or permission of instructor. Enrollment Concurrent with Cons 383 and 378.

CONSVTY 379 String Ensemble Techniques

Laboratory applications of string pedagogy, ensemble rehearsal technique, literature selection, and performance practice. Students will participate in playing and observation activities in a large ensemble setting with an emphasis on critical analysis of technical and pedagogical issues. Prerequisites: CONSVTY 381 or permission of instructor. Registration concurrent with final

semester of large ensemble requirement.

CONSVTY 380 Basic Conducting - Choral

A study of the basic techniques of all rhythms, patterns, subdivision of beats, dynamics, starting, stopping, and giving cues through conducting in class. Elementary study of the score as to form and harmonic content will be discussed. Prerequisite: CONSVTY 222A or CONSVTY 222B.

CONSVTY 381 Basic Conducting - Instrumental

A study of the basic techniques of all rhythms, patterns, subdivision of beats, dynamics, starting, stopping, and giving cues through conducting in class. Elementary study of the score as to form and harmonic intent will be discussed. Prerequisite: CONSVTY 222A or CONSVTY 222B.

CONSVTY 382 Choral Conducting

A study of choral techniques including voice tryouts, placement, attack, release, blend, vocal development, diction, and rehearsal techniques through actual experience of conducting in class. Prerequisite: CONSVTY 380. Mus. Ed.-Choral majors must take concurrently with CONSVTY 387.

CONSVTY 383 Instrumental Conducting

A study of instrumental conducting techniques through actual conducting situations in instrumental groups. Primary objective will be the study of instrumental rehearsal techniques. Prerequisite: CONSVTY 381. Mus. Ed.-Instrumental majors must take concurrently with CONSVTY 386.

CONSVTY 385 Elementary Music Methods

Basic principles of curriculum planning for music education, investigation of current methods and approaches, and practical teaching experience in laboratory setting. For music majors and non-majors who have extensive musical backgrounds. Prerequisites: CONSVTY 222A or CONSVTY 222B and CONSVTY 411C. Permission of Faculty and must be taken concurrently with 411C.

CONSVTY 386 Secondary Music Methods - Instrumental

The organization, scheduling and feeder-system techniques of beginning band and orchestral programs through high-school level instruction. Areas of study will include curriculum, pedagogical techniques, library facilities, bidding procedures, basic instrument techniques. Prerequisites: Permission of Faculty and must be taken concurrently with CONSVTY 383 and CONSVTY 411B.

CONSVTY 387 Secondary Music Methods - Choral

The organization of junior and senior high school choral classes to include methods, materials and program building. Prerequisites: Permission of Faculty and must be taken concurrently with CONSVTY 382 and CONSVTY 411B.

CONSVTY 391 Basic Piano Technology

Introduces the art of tuning by ear, including the discussion of historical temperaments that preceded equal temperament: explores the action mechanism and its influence on the production of musical tone. Prerequisite: CONSVTY. 122 or consent of the instructor.

CONSVTY 391 Basic Piano Technology

Introduces the art of tuning by ear, including the discussion of historical temperaments that preceded equal temperament: explores the action mechanism and its influence on the production of musical tone. Prerequisite: CONSVTY. 122 or consent of the instructor.

CONSVTY 404 Jazz Improvisation Iv

This class is a continuation of Jazz Improvisation III. This course features in-depth analyses of the blues and free improvisation focusing on rhythm changes and bi-tonal/polytonal chords. Course includes an in-depth analysis of styles from Dixieland to contemporary jazz. A strong emphasis is placed on solo construction and development of individual styles. Prerequisite: CONSVTY 304 Jazz Improvisation III or consent of the instructor.

CONSVTY 405 Introductory Foundations In The Arts

The course will concentrate on the development of a philosophical, historical and social model to assist in understanding the complexities, strengths and problems of the arts in the context of present day education.

CONSVTY 406 Influence Of Music On Behavior

Explores the physiological, psychological and social influences of music on behavior. Although for music therapy practice it may also be of interest to other music majors and/or allied health professionals. Prerequisite: Completion of applied music 202 (2 hours) required of music majors. Completion of CONSVTY 128, CONSVTY 130 & CONSVTY 180 for music therapy majors or

consent of the instructor.

CONSVTY 407 Audio Intern Program

Practical recording experience interning with Conservatory recording and music production labs with one lecture weekly.

Prerequisite: consent of the instructor.

CONSVTY 408 Music In Therapy: Adults

Lecture and clinical demonstration of theory and practice of music therapy with adult clients. Prerequisites: Must take concurrently with CONSVTY 210E, Clinical Experience V.

CONSVTY 409 Music In Therapy: Children

Lecture and clinical demonstrations of theory and practice of music therapy with children. Prerequisites: Must take concurrently with CONSVTY 210F, Clinical Experience VI.

CONSVTY 410 Internship

1040 hours of supervised clinical experience at a site approved by the American Music Therapy Association, to be taken after all other course work for the music therapy degree is completed.

CONSVTY 411A Field Experience In Music

To introduce music students to a critical examination of the complex nature of teaching, learning, children, and the music classroom/ensemble setting. Students will be expected to spend 30 hours observing, participating, planning and teaching in an assigned music classroom environment during the semester. Prerequisites: Permission of faculty and must be taken concurrently with CONSVTY 405.

CONSVTY 411A Field Experience In Music

To introduce music students to a critical examination of the complex nature of teaching, learning, children, and the music classroom/ensemble setting. Students will be expected to spend 30 hours observing, participating, planning and teaching in an assigned music classroom environment during the semester. Prerequisites: Permission of faculty and must be taken concurrently with CONSVTY 405.

CONSVTY 411B Field Experience In Music

To introduce music students to secondary school settings and further develop observation, planning and teaching skills. Students will be expected to spend 30 hours in a middle/ junior high school music classroom and 30 hours in a high school music classroom for a total of 60 hours during the semester. To be taken concurrently with CONSVTY 386 OR CONSVTY 387. Prerequisites: CONSVTY 411A or permission of faculty

CONSVTY 411B Field Experience In Music

To introduce music students to secondary school settings and further develop observation, planning and teaching skills. Students will be expected to spend 30 hours in a middle/ junior high school music classroom and 30 hours in a high school music classroom for a total of 60 hours during the semester. To be taken concurrently with CONSVTY 386 OR CONSVTY 387. Prerequisites: CONSVTY 411A or permission of faculty

CONSVTY 411C Field Experience In Music

To introduce music students to elementary school music settings and continue to refine observation, planning and teaching skills in secondary school music settings. Students will be expected to spend 30 hours in an elementary school music classroom and 30 hours in either a middle school/junior high or high school music classroom. To be taken concurrently with CONSVTY 385. Prerequisites: CONSVTY 411B or permission of faculty

CONSVTY 411C Field Experience In Music

To introduce music students to elementary school music settings and continue to refine observation, planning and teaching skills in secondary school music settings. Students will be expected to spend 30 hours in an elementary school music classroom and 30 hours in either a middle school/junior high or high school music classroom. To be taken concurrently with CONSVTY 385. Prerequisites: CONSVTY 411B or permission of faculty

CONSVTY 412A Student Teaching Music In Elementary School

Observation, planning and teaching in an elementary music classroom setting. Students will be expected to spend a minimum of seven weeks teaching full-time under supervision. Prerequisite: CONSVTY 411C

CONSVTY 412A Student Teaching Music In Elementary School

Observation, planning and teaching in an elementary music classroom setting. Students will be expected to spend a minimum of seven weeks teaching full-time under supervision. Prerequisite: CONSVTY 411C

CONSVTY 412B Student Teaching Music In Secondary School

Observation, planning and teaching in a middle school/junior high or high school music classroom setting. Students will be expected to spend a minimum of seven weeks teaching full-time under supervision. Prerequisite: CONSVTY 411C

CONSVTY 412B Student Teaching Music In Secondary School

Observation, planning and teaching in a middle school/junior high or high school music classroom setting. Students will be expected to spend a minimum of seven weeks teaching full-time under supervision. Prerequisite: CONSVTY 411C

CONSVTY 417 Opera Workshop

Introduction to opera and opera performance techniques. Class will include performance of opera scenes. Prerequisite: consent of the instructor. May be repeated for credit.

CONSVTY 417 Opera Workshop

Introduction to opera and opera performance techniques. Class will include performance of opera scenes. Prerequisite: consent of the instructor. May be repeated for credit.

CONSVTY 417A Singing/Acting Training for Music Theatre

Specific training especially tailored for incoming undergraduate BA in Music/Theatre Concentration students and others interested in Introductory acting and singing/acting techniques. Recommended for Freshman or Sophomore performance track students. Prerequisite: Admission into the BA in Music/Theatre Concentration program OR permission of Instructor. An audition may be required.

CONSVTY 417A Singing/Acting Training for Music Theatre

Specific training especially tailored for incoming undergraduate BA in Music/Theatre Concentration students and others interested in Introductory acting and singing/acting techniques. Recommended for Freshman or Sophomore performance track students. Prerequisite: Admission into the BA in Music/Theatre Concentration program OR permission of Instructor. An audition may be required.

CONSVTY 417B Singing/Acting Training for Opera

Specific training especially tailored for undergraduate Vocal Performance majors and others interested in introduction Singing/Acting techniques for opera. Recommended for singers in their sophomore or junior years. This course IS NOT OPEN to Freshmen. Prerequisite: Admission into the BM vocal performance degree program OR permission of Instructor. An audition may be required.

CONSVTY 417B Singing/Acting Training for Opera

Specific training especially tailored for undergraduate Vocal Performance majors and others interested in introduction Singing/Acting techniques for opera. Recommended for singers in their sophomore or junior years. This course IS NOT OPEN to Freshmen. Prerequisite: Admission into the BM vocal performance degree program OR permission of Instructor. An audition may be required.

CONSVTY 417C Community Engagement Opera

Preparation, rehearsal and performance of an outreach opera. Offerings range from a work specifically for children, a cut-down version of a full-length opera, and occasional full-length operas in areas of repertoire not featured in the main-stage opera season. Performed off campus in conjunction with the student opera-lovers organization, Bravi. Prerequisite: Audition (Generally held during the first two weeks of the fall Semester).

CONSVTY 417C Community Engagement Opera

Preparation, rehearsal and performance of an outreach opera. Offerings range from a work specifically for children, a cut-down version of a full-length opera, and occasional full-length operas in areas of repertoire not featured in the main-stage opera season. Performed off campus in conjunction with the student opera-lovers organization, Bravi. Prerequisite: Audition (Generally held during the first two weeks of the fall Semester).

CONSVTY 417D Music Theatre Review/Scenes

Preparation, rehearsal and performance of an existing or original review and/or scene work. Productions will vary from year to year. Existing works maybe performed if and only if the music theatre budget allows for proper licensing, rights and rentals. Performances of final production projects may occur off campus. Prerequisite: Successful completion of CONSVTY 417A Singer/Actor Techniques for Music Theatre or permission of instructor. (Audition may be required.)

CONSVTY 417D Music Theatre Review/Scenes

Preparation, rehearsal and performance of an existing or original review and/or scene work. Productions will vary from year to year. Existing works maybe performed if and only if the music theatre budget allows for proper licensing, rights and rentals. Performances of final production projects may occur off campus. Prerequisite: Successful completion of CONSVTY 417A

Singer/Actor Techniques for Music Theatre or permission of instructor. (Audition may be required.)

CONSVTY 417E Scene Study

Preparation, rehearsal and performance of scenes from opera, operetta and music theatre. Scenes will be determined and assigned based on student's needs and development. One-act operas may also occasionally be produced in this class. Prerequisite: Permission of Instructor. Audition may be required.

CONSVTY 417E Scene Study

Preparation, rehearsal and performance of scenes from opera, operetta and music theatre. Scenes will be determined and assigned based on student's needs and development. One-act operas may also occasionally be produced in this class. Prerequisite: Permission of Instructor. Audition may be required.

CONSVTY 417F Advanced Opera Workshop

Singer/Actor techniques, dramatic preparation of arias, audition techniques, recitative and role study. Prerequisite: Undergraduates: Successful completion of CONSVTY 417B and permission of Voice teacher highly recommended, as several areas and a role study project will be required for work in class.

CONSVTY 417F Advanced Opera Workshop

Singer/Actor techniques, dramatic preparation of arias, audition techniques, recitative and role study. Prerequisite: Undergraduates: Successful completion of CONSVTY 417B and permission of Voice teacher highly recommended, as several areas and a role study project will be required for work in class.

CONSVTY 421A Music Theory Review For Graduate Students

An intensive review with emphasis placed on analysis. Open to graduate students only. MAY NOT BE USED ON A PLANNED PROGRAM.

CONSVTY 421A Music Theory Review For Graduate Students

An intensive review with emphasis placed on analysis. Open to graduate students only. MAY NOT BE USED ON A PLANNED PROGRAM.

CONSVTY 421B Ear Training And Solfege For Graduate Students

An intensive review of ear training and sight singing. Open to graduate students only. MAY NOT BE USED ON A PLANNED PROGRAM.

CONSVTY 421B Ear Training And Solfege For Graduate Students

An intensive review of ear training and sight singing. Open to graduate students only. MAY NOT BE USED ON A PLANNED PROGRAM.

CONSVTY 422A Music History Review (early)

Graduate-level review of music in Western civilization from antiquity to 1750. Outside listening is required. Offered: Fall and Winter.

CONSVTY 422B Music History Review (Late)

Graduate-level review of music in Western civilization from 1750 to the present. Outside listening is required. Offered Fall and Winter.

CONSVTY 422C Music History Review

Graduate-level review of music in Western civilization from antiquity to the present. Outside listening is required. Offered: Fall.

CONSVTY 423 Business Jazz And Commercial Music

An introduction to the various elements of the music industry, including production, marketing, unions, contracts, broadcasting, licensing agreements and copyrights.

CONSVTY 423 Business Jazz And Commercial Music

An introduction to the various elements of the music industry, including production, marketing, unions, contracts, broadcasting, licensing agreements and copyrights.

CONSVTY 424 Acoustics

Study of the propagation of sound, the psychology and physiology of hearing, the acoustics of instruments, and of rooms, and tuning systems. Available for graduate credit.

CONSVTY 425A Arranging For Choral Groups

Practice in transcribing vocal music of the current pop idiom. Analysis and writing in contemporary harmonic idioms. Stylistic analysis of solo and choral writing in operettas and musical plays. Scoring for mixed voices, men's voices, and women's voices. Prerequisite: CONSVTY 222A or CONSVTY 222B.

CONSVTY 425B Arranging Instrumental

Prerequisite: CONSVTY 222 or CONSVTY 222B or recommendation of an instructor of Music Theory I-IV.

CONSVTY 426B Jazz Arranging For Small Ensembles

This course will teach the art of Calligraphy as well as the techniques of arranging and orchestration for small jazz ensembles for up to five horns. The course will also include an in-dept study of basic voicings, instrumental sonorities, and some extended forms using intensive listening and score study. UMKC combos, or top Kansas City professionals, will perform final assignments. Prerequisite: CONSVTY 222 Music Theory IV or consent of the instructor.

CONSVTY 426B Jazz Arranging For Small Ensembles

This course will teach the art of Calligraphy as well as the techniques of arranging and orchestration for small jazz ensembles for up to five horns. The course will also include an in-dept study of basic voicings, instrumental sonorities, and some extended forms using intensive listening and score study. UMKC combos, or top Kansas City professionals, will perform final assignments. Prerequisite: CONSVTY 222 Music Theory IV or consent of the instructor.

CONSVTY 426D Jazz Arranging For Big Bands

This course is a continuation of Jazz Arranging for small ensembles. It will cover the basics of arranging and orchestration techniques for big bands. It includes an in-depth study of basic voicing and instrumental sonorities using intensive listening and score study. The students will have a chance to hear their final arrangements performed at the end of the semester by the Concert Jazz Band. Prerequisite: CONSVTY 426B

CONSVTY 427 18Th Century Counterpoint I

Analysis and writing in 18th century style and forms including canon, invention and fugue. Prerequisite: CONSVTY 222 or CONSVTY 222B or recommendation of an instructor of Music Theory I-IV.

CONSVTY 428 Contemporary Harmonic/Contrapuntal Style

Analysis and writing in contemporary styles. Prerequisite: CONSVTY 222 or recommendation of an instructor of Music Theory I-IV

CONSVTY 428 Contemporary Harmonic/Contrapuntal Style

Analysis and writing in contemporary styles. Prerequisite: CONSVTY 222 or recommendation of an instructor of Music Theory I-IV

CONSVTY 431 Orchestration II

A detailed study of the scores of major orchestral and wind ensemble works, plus the application of orchestrational concepts in the creation or orchestration of an original piece of music. Prerequisite: CONSVTY 331A or consent of the instructor.

CONSVTY 431 Orchestration II

A detailed study of the scores of major orchestral and wind ensemble works, plus the application of orchestrational concepts in the creation or orchestration of an original piece of music. Prerequisite: CONSVTY 331A or consent of the instructor.

CONSVTY 433 Composition Recital

Preparation and performance of the student's original compositions at one or more concerts sponsored by UMKC Conservatory of Music, with a total of 50 to 60 minutes performance time. Prerequisite: 6 hours of CONSVTY 333, approval of major status by the Composition Division, and consent of the instructor.

CONSVTY 433 Composition Recital

Preparation and performance of the student's original compositions at one or more concerts sponsored by UMKC Conservatory of Music, with a total of 50 to 60 minutes performance time. Prerequisite: 6 hours of CONSVTY 333, approval of major status by the Composition Division, and consent of the instructor.

CONSVTY 434CC The Practice and Study of Creativity

A team-taught, multidisciplinary cluster course for undergraduate students that fosters awareness of the nature and power of students' creativity. Approximately one third of the class covers current literature on the creative process in general and in the arts. The remainder of the class utilizes the arts as a catalyst for students to design and implement creative group and individual projects that foster communication, remove barriers to creativity and combine creativity with discipline toward a common result. There are neither prerequisites nor expectations of arts-related abilities. The ideal class consists of 4-6 students from each of 3

areas - Arts;Science/Social Science/Business/Law; and Humanities/Education/General Studies.

CONSVTY 435 Psychological Foundations Of Music

The study of the psychological aspects of music including perception, cognition, affect, and preference. An introduction measurement and experimental research including statistical techniques. Prerequisite: CONSVTY 260 or permission of instructor

CONSVTY 437 Computer Literacy For Musicians

Computing skills for the music teacher. Study of the computer as a tool for music majors who will teach in public school music classes, direct ensembles, or teach at the college or university level. Hands-on practice with file creation and editing, graphics and character set generation, data analysis, preparation of computer based instruction, and data retrieval. for upper level undergraduate and graduate students. Prerequisites: Cons 110 Keyboard Skills I or permission of instructor.

CONSVTY 438 Creative Collaboration: Ideas and Strategies

Creative Collaboration: Ideas and Strategies investigates the history of collaboration in the arts since the turn of the 20th century. While case studies are drawn from th arts, students from any discipline and field will explore creative collaboration together. The goal of the class is to create a large-scale work in multidiscipline groups. Groups will vary depending on enrollments, but thinking outside the box and full participation regardless of individual discipline is required. course is open to students in any field and discipline. Prerequisites: none.

CONSVTY 449 Introduction To Arts Administration

This course is designed to be an overview of topics of importance to arts organizations including organizational culture, leadership, marketing, media relations, fundraising, facilities management, and audience building. Students will review current literature in this area and develop a project related to their particular area of interest.

CONSVTY 449A Arts Administration Practicum

This course is designed to give practical experience for students in the Introduction to Arts Administration class. The student will receive a placement with an arts organization to be determined by the instructor.

CONSVTY 450 Music And Film

Designed for the general university student, this course will survey the use of music in cinema. It will include sections on music, technology, the film medium and the various ways in which music adds to the cinematic experience. Music majors may enroll for elective credit. No prerequisite.

CONSVTY 457 Vocal Literature I

Literature for the solo voice. A course covering the literature from 1600 to present times, illustrated by recordings and members of the class and the instructor. Prerequisite: upper division standing and consent of the instructor. Requirement for B.M. voice majors.

CONSVTY 458 Vocal Literature II

A continuation of CONSVTY 457.

CONSVTY 459 Advanced Choral Literature

A survey of choral literature including the music of all periods, both sacred and secular, in both small and large forms. May be repeated for credit.

CONSVTY 460 Organ Literature I

A survey of organ music from the 15th century through 1750.

CONSVTY 461 Piano Literature III (Romantic)

A survey through analysis, reading, listening, and performance of piano repertoire from the Romantic Period to the early 20th Century. .

CONSVTY 462 Piano Literature IV (Post-Romantic)

A survey through analysis, reading, listening, and performance of piano repertoire from the early 20th Century to the present day.

CONSVTY 464A Wind And Percussion Literature Percussion

A study of solo and ensemble literature for percussion.

CONSVTY 469 Organ Literature II

A survey of organ music from 1750 to the present.

CONSVTY 470A Introduction To Pedagogy And Literature Woodwinds

A study of teaching techniques and materials and of solo and ensemble literature. Senior status required.

CONSVTY 470B Introduction To Pedagogy And Literature Brass

A study of teaching techniques and materials and of solo and ensemble literature. Senior status required.

CONSVTY 470C Introduction To Pedagogy And Literature Percussion

A study of teaching techniques and materials and of solo and ensemble literature. Senior status required.

CONSVTY 470D Introduction To String Literature And Pedagogy

A study of teaching techniques and materials and solo and ensemble literature. Senior status required.

CONSVTY 471 Jazz/Commercial Music Pedagogy

This course is designed to develop skills in the teaching of jazz and commercial music. Students will be exposed to a variety of materials, techniques and philosophies and trained in various techniques of rehearsing and conducting jazz ensembles, including the study of scores and recordings of different styles and rehearsal of the Conservatory's jazz ensembles. Includes an emphasis on structuring jazz and studio music curriculum at the College level. Prerequisite: CONSVTY 381 Basic Conducting.

CONSVTY 476 Collaborative Piano III

Study of collaborative techniques and instrumental literature. Prerequisites 377.

CONSVTY 476 Collaborative Piano III

Study of collaborative techniques and instrumental literature. Prerequisites 377.

CONSVTY 477 Collaborative Piano IV

Continuation of CONSVTY 476. Prerequisites: CONSVTY 476

CONSVTY 477 Collaborative Piano IV

Continuation of CONSVTY 476. Prerequisites: CONSVTY 476

CONSVTY 483 Advanced Instrumental Conducting

A review of techniques and musical styles of literature for all levels and all media through conducting in class.

CONSVTY 490 Independent Study

Intensive reading, research projects, creative work, or special performance in the student's major field, selected by the student in consultation with the appropriate faculty. Prerequisite: Consent of the instructor.

CONSVTY 491B Pedagogical Practices I Voice

CONSVTY 491C Pedagogical Practices I Organ

CONSVTY 491D Pedagogical Practices I Strings

CONSVTY 491K Pedagogical Practices I Theory

CONSVTY 491M Pedagogical Practices I General

The course will address a variety of aspects of the human relationships in music teaching/learning settings. Topics will include teacher/student relationships, large group dynamics (ensemble), one-on-one interaction (studio), time management, performance anxiety, productive practice, and the observation and assessment of musical behavior. A field observation component is included.

CONSVTY 492B Pedagogical Practices II Voice

A laboratory experience that includes teaching applied voice in preparation for an end of semester concert experience. The course content includes introduction to skill sets required for teaching applied voice and applied voice studio budget and organization. Prerequisite: 491B Pedagogical Practices I Voice

CONSVTY 492C Pedagogical Practices II Organ

CONSVTY 492D Pedagogical Practices II Strings

CONSVTY 494 Performance Styles

A practical approach to the music of the Medieval, Renaissance, Baroque, Early Classical and Contemporary eras through performance. May be repeated for credit. Prerequisites: Completion of CONSVTY 122, audition and consent of the instructor.

CONSVTY 497 Seminar-Workshop In Music

Special courses in techniques, theory, and repertoire taught by the Conservatory staff and visiting specialists. As announced.

CONSVTY 498 Research Problems
Individual study under the direction of a faculty adviser, leading to the writing of a formal paper. A public, non-graded presentation of the paper with performance examples is required. Prerequisites: None.

CONSVTY 498 Research Problems
Individual study under the direction of a faculty adviser, leading to the writing of a formal paper. A public, non-graded presentation of the paper with performance examples is required. Prerequisites: None.

Bassoon (BASSOON)

BASSOON 100A Preparatory Applied Study

One hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit towards the major. Consent of the instructor.

BASSOON 100B Applied Study Of A Second Instrument

Applied study of a second instrument. One-half hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required. Consent of the instructor.

BASSOON 100C Applied Study For The Non-Music Major

Applied study for the non-music major. One-half hour lesson weekly. No jury required. Consent of the instructor.

BASSOON 100D Applied Study For The Non-Music Major

Nine one-half hour lessons. No jury required.

BASSOON 101 Freshman Bassoon I

BASSOON 102 Freshman Bassoon II

BASSOON 201 Sophomore Bassoon I

BASSOON 202 Sophomore Bassoon II

BASSOON 301 Junior Bassoon I

BASSOON 302 Junior Bassoon II

BASSOON 401 Senior Bassoon I

BASSOON 402 Senior Bassoon II

Cello (CELLO)

CELLO 100A Preparatory Applied Study

One hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit towards the major. Consent of the instructor.

CELLO 100B Applied Study Of A Second Instrument

Applied study of a second instrument. One-half hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required. Consent of the instructor.

CELLO 100C Applied Study For The Non-Music Major

Applied study for the non-music major. One-half hour lesson weekly. No jury required. Consent of the instructor.

CELLO 100D Applied Study For The Non-Music Major

Nine one-half hour lessons. No jury required.

Dance (DANCE)

DANCE 106 Computer Technology for Dance

This course will not only give basic computer knowledge but will give students the tools to conceptualize movement which is then integrated into choreographic motifs and sequences in an easy-to-use 3D environment. The students will use these tools to create choreography and to experiment with interdisciplinary arts and dance technology projects that will be implemented into the Advanced Composition course. Prerequisite: DANCE 218A Composition I.

DANCE 107 Dance Production I

A study of the fundamentals of dance production including sound design and recording techniques, video and video editing, lighting design for dance, stage make-up, and costume design and construction. Laboratory projects will be coordinated with actual dance productions.

DANCE 108 Dance Production II

Continuation of DANCE 107.

DANCE 140A Analysis Of Movement For The Dance I

A study of the structure of classical ballet steps and movements including basic anatomy, vocabulary and aesthetics of ballet. This course will also present a comparison of ballet training systems. Restricted to dance majors.

DANCE 140B Analysis Of Movement For The Dance II

Continuation of DANCE 140A, exploring and analyzing the fundamental structure of modern dance technique. The techniques of Lester Horton and Martha Graham will be examined.

DANCE 141B Ballet Technique And Theory I

Fundamentals of technique of classical ballet at the intermediate level with attention given to strengthening, stretching, anatomical alignment, and developing the ballet aesthetic. This course includes pointe work. Classes meet M, T, Th, F for 1.5 hours. Non-Majors by audition.

DANCE 141B Ballet Technique And Theory I

Fundamentals of technique of classical ballet at the intermediate level with attention given to strengthening, stretching, anatomical alignment, and developing the ballet aesthetic. This course includes pointe work. Classes meet M, T, Th, F for 1.5 hours. Non-Majors by audition.

DANCE 141M Modern Dance Technique And Theory I

This intermediate level dance course is based on the technique and theory of Lester Horton and fundamental elements of Martha Graham. Designed to fortify, stretch, and strengthen the body, the technique is codified into a series of studies designed to cover a wide range of movement vocabulary. Classes meet M, T, Th, F for 1.5 hours. Non-Majors by audition.

DANCE 141M Modern Dance Technique And Theory I

This intermediate level dance course is based on the technique and theory of Lester Horton and fundamental elements of Martha Graham. Designed to fortify, stretch, and strengthen the body, the technique is codified into a series of studies designed to cover a wide range of movement vocabulary. Classes meet M, T, Th, F for 1.5 hours. Non-Majors by audition.

DANCE 142B Ballet Technique And Theory II

Continuation of DANCE 141B.

DANCE 142B Ballet Technique And Theory II

Continuation of DANCE 141B.

DANCE 142M Modern Dance Technique And Theory II

Continuation of Dance 141M.

DANCE 142M Modern Dance Technique And Theory II

Continuation of Dance 141M.

DANCE 213C Men's Class I

This course is designed to meet the needs of the male dancer and will focus on developing the technique, strength, and agility needed for a professional career.

DANCE 213C Men's Class I

This course is designed to meet the needs of the male dancer and will focus on developing the technique, strength, and agility needed for a professional career.

DANCE 213D Men's Class II

Continuation of DANCE 213C.

DANCE 213D Men's Class II

Continuation of DANCE 213C.

DANCE 217A Improvisation I

An introduction to the use of improvisation as a method of discovery. Through structured choreographic problem-solving and creative responses to given movement problems, dancers will explore the elements of time, space, energy, and force learning the basic skills needed for dance composition. Restricted to Dance majors.

DANCE 217A Improvisation I

An introduction to the use of improvisation as a method of discovery. Through structured choreographic problem-solving and creative responses to given movement problems, dancers will explore the elements of time, space, energy, and force learning the basic skills needed for dance composition. Restricted to Dance majors.

DANCE 218A Composition II

An introduction to the fundamentals of choreography, including the development of dance compositions through the exploration and definition of specific studies, including floor design, shape design, motion design, and time design. Restricted to dance majors. Prerequisite: Dance 217A Restrictions: Dance majors only

DANCE 218B Composition III

An introduction to the fundamentals of choreography, including the development of dance compositions through the exploration and definition of specific studies, including floor design, shape design, motion design, and time design. Restricted to dance majors. Prerequisite: Dance 217A Restrictions: Dance majors only

DANCE 218B Composition III

An introduction to the fundamentals of choreography, including the development of dance compositions through the exploration and definition of specific studies, including floor design, shape design, motion design, and time design. Restricted to dance majors. Prerequisite: Dance 217A Restrictions: Dance majors only

DANCE 241B Ballet Technique And Theory III

Continuation of DANCE 142B at the intermediate/advanced level including pointe. Restricted to dance majors.

DANCE 241B Ballet Technique And Theory III

Continuation of DANCE 142B at the intermediate/advanced level including pointe. Restricted to dance majors.

DANCE 241M Modern Dance Technique And Theory III

Continuation of DANCE 142M, on the intermediate/advanced level. Restricted to dance majors.

DANCE 241M Modern Dance Technique And Theory III

Continuation of DANCE 142M, on the intermediate/advanced level. Restricted to dance majors.

DANCE 242B Ballet Technique And Theory Iv

Continuation of DANCE 241B, at the intermediate/advanced level including pointe work.

DANCE 242B Ballet Technique And Theory Iv

Continuation of DANCE 241B, at the intermediate/advanced level including pointe work.

DANCE 242M Modern Technique And Theory Iv

Continuation of DANCE 142M, on the intermediate/advanced level.

DANCE 242M Modern Technique And Theory Iv

Continuation of DANCE 142M, on the intermediate/advanced level.

DANCE 250 Labanotation I

An introduction to basic theory and elementary skills of labanotation.

DANCE 260 Jazz I

A study of Western Theatrical Dance focusing on Jazz and Afrp-Caribbean based forms.

DANCE 260 Jazz I

A study of Western Theatrical Dance focusing on Jazz and Afrp-Caribbean based forms.

DANCE 261 Jazz II

Continuation of DANCE 260 with a more in deapth study of Western Theatrical Dance focusing on Jazz and Afro-Caribbean based dance forms.

DANCE 261 Jazz II

Continuation of DANCE 260 with a more in deapth study of Western Theatrical Dance focusing on Jazz and Afro-Caribbean based dance forms.

DANCE 301 Advanced Movement Analysis For Dancers

A study of the body which relates specifically to the needs of dancers. Emphasis is placed upon an understanding of the skeletal system, the muscular system, their specific importance to dance technique, and dance injuries and prevention. Prerequisites: Dance major.

DANCE 302 Fundamentals Of Body Alignment

An introduction to the fundamentals of body alignment, including therapeutic exercises which focus on muscular imbalances and injury prevention. Emphasis is placed upon developing total body strength and flexibility. Required for dance majors or by permission of instructor. Prerequisite: DANCE 301.

DANCE 302 Fundamentals Of Body Alignment

An introduction to the fundamentals of body alignment, including therapeutic exercises which focus on muscular imbalances and injury prevention. Emphasis is placed upon developing total body strength and flexibility. Required for dance majors or by permission of instructor. Prerequisite: DANCE 301.

DANCE 303 Pilates

A non-impact body conditioning method based on principles of abdominal and scapular stabilization. Introduction to the essential and intermediate mat work, which consists of non-weight bearing exercises. Designed to give the student an understanding of the principles and muscular emphasis behind the Pilates method. Proper alignment, full range of motion, and patterned breathing will be emphasized. Prerequisite: DANCE 301 and DANCE 302

DANCE 303 Pilates

A non-impact body conditioning method based on principles of abdominal and scapular stabilization. Introduction to the essential and intermediate mat work, which consists of non-weight bearing exercises. Designed to give the student an understanding of the principles and muscular emphasis behind the Pilates method. Proper alignment, full range of motion, and patterned breathing will be emphasized. Prerequisite: DANCE 301 and DANCE 302

DANCE 305 History Of Dance I

A study of the development of Western theatrical dance forms, from its roots in the European court through the 20th century. Beginning with a brief overview of "early dance," emphasis will be placed on the study of Renaissance theatre spectacles to the rise of the professional dancer culminating with the 20th century contemporary ballet. This course includes outside reading and writing intensive requirements.

DANCE 306 History Of Dance II

Continuation of DANCE 305 exploring the development of dance as a 20th century Western theatre dance form. Development of modern dance, modern dance pioneers, modern dance development in Europe, African-American contribution to modern dance, modern dance influence on the ballet and the Avant-Garde and Post Modern movements will be studied. Outside reading and writing intensive requirements included.

DANCE 309B Company

A repertory company comprised of dance majors, selected guest artists and dance faculty for the preparation and public performance of choreographic works, concerts and lecture/ demonstrations, and Great Works projects directed by dance faculty. Restricted to dance majors.

DANCE 309B Company

A repertory company comprised of dance majors, selected guest artists and dance faculty for the preparation and public performance of choreographic works, concerts and lecture/ demonstrations, and Great Works projects directed by dance faculty. Restricted to dance majors.

DANCE 313A Partnering/Pas De Deux I

This course is designed to meet the needs of the 300/400 level ballet student and will teach the elementary skills of partnering such as turns, lifts, promenades, and balances. Prerequisites: DANCE 341B Ballet Technique and Theory V or higher.

DANCE 313A Partnering/Pas De Deux I

This course is designed to meet the needs of the 300/400 level ballet student and will teach the elementary skills of partnering such as turns, lifts, promenades, and balances. Prerequisites: DANCE 341B Ballet Technique and Theory V or higher.

DANCE 313B Partnering/Pas De Deux II

Continuation of DANCE 313A. Prerequisites: DANCE 341B Ballet Technique and Theory V or higher.

DANCE 313B Partnering/Pas De Deux II

Continuation of DANCE 313A. Prerequisites: DANCE 341B Ballet Technique and Theory V or higher.

DANCE 319A Composition IV

An intermediate course in Dance Composition focusing on choreographic clarity and intent. Topics such as abstraction, motif and development, and prop and costumes will be explored. Prerequisite: DANCE 218B.

DANCE 319A Composition IV

An intermediate course in Dance Composition focusing on choreographic clarity and intent. Topics such as abstraction, motif and development, and prop and costumes will be explored. Prerequisite: DANCE 218B.

DANCE 319B Advanced Choreographic Design

An intermediate course in Dance Composition focusing on choreographic clarity and intent. Topics such as abstraction, motif and development, and prop and costumes will be explored. Prerequisite: DANCE 218B.

DANCE 319B Advanced Choreographic Design

An intermediate course in Dance Composition focusing on choreographic clarity and intent. Topics such as abstraction, motif and

development, and prop and costumes will be explored. Prerequisite: DANCE 319A.

DANCE 341B Ballet Technique And Theory V

Continuation of DANCE 242B, at the advanced level including pointe work. Restricted to dance majors.

DANCE 341B Ballet Technique And Theory V

Continuation of DANCE 242B, at the advanced level including pointe work. Restricted to dance majors.

DANCE 341M Modern Dance Technique And Theory V

Continuation of DANCE 242M on the advanced level. Restricted to dance majors.

DANCE 341M Modern Dance Technique And Theory V

Continuation of DANCE 242M on the advanced level. Restricted to dance majors.

DANCE 342B Ballet Technique And Theory Vi

Continuation of DANCE 341B.

DANCE 342B Ballet Technique And Theory Vi

Continuation of DANCE 341B.

DANCE 342M Modern Dance Technique And Theory Vi

Continuation of DANCE 341M.

DANCE 342M Modern Dance Technique And Theory Vi

Continuation of DANCE 341M.

DANCE 403A Modern Technique For Non-Majors

DANCE 404A Ballet Technique Non-Majors I

The applied and theoretical study of ballet including traditional ballet vocabulary. Written assignments required.

DANCE 404B Ballet Technique For Non-Majors II

The applied and theoretical study of ballet including traditional ballet vocabulary. Written assignments required.

DANCE 405A Modern Dance Repertory I

Modern Dance Repertory is an advanced course for modern dance majors to study and perform the repertoire and works of renowned contemporary choreographers. It is a parallel to the Ballet Variations course which teaches the repertoire of ballet master works. Prerequisites: DANCE 341M Modern Dance Technique and Theory V or higher

DANCE 405A Modern Dance Repertory I

Modern Dance Repertory is an advanced course for modern dance majors to study and perform the repertoire and works of renowned contemporary choreographers. It is a parallel to the Ballet Variations course which teaches the repertoire of ballet master works. Prerequisites: DANCE 341M Modern Dance Technique and Theory V or higher

DANCE 405B Modern Dance Repertory II

Continuation of DANCE 405A. Prerequisites: DANCE 341M Modern Dance Technique and Theory V or higher.

DANCE 405B Modern Dance Repertory II

Continuation of DANCE 405A. Prerequisites: DANCE 341M Modern Dance Technique and Theory V or higher.

DANCE 405C Modern Dance Repertory III

Continuation of DANCE 405B. Prerequisite(s): DANCE 341M Modern Dance Technique and Theory V or higher.

DANCE 405D Modern Dance Repertory IV

Continuation of DANCE 405C. Prerequisite(s): DANCE 341M Modern Dance Technique and Theory V or higher.

DANCE 413A Advanced Pas De Deux I

Advanced pas de deux is designed to meet the needs of the 400 level ballet student with emphasis placed on perfecting advanced partnering skills. Students will have opportunity to learn pas de deux from great ballets giving students the experience and stamina of dancing entire pas de deux. The course provides coaching on both a stylistic approach and a technical approach to the

performance of materials presented in class. Prerequisites: DANCE 441B Ballet Technique and Theory VII or higher.

DANCE 413A Advanced Pas De Deux I

Advanced pas de deux is designed to meet the needs of the 400 level ballet student with emphasis placed on perfecting advanced partnering skills. Students will have opportunity to learn pas de deux from great ballets giving students the experience and stamina of dancing entire pas de deux. The course provides coaching on both a stylistic approach and a technical approach to the performance of materials presented in class. Prerequisites: DANCE 441B Ballet Technique and Theory VII or higher.

DANCE 413B Advanced Pas De Deux II

Continuation of DANCE413A. Prerequisites: DANCE 441B Ballet Technique and Theory VII or higher.

DANCE 413B Advanced Pas De Deux II

Continuation of DANCE413A. Prerequisites: DANCE 441B Ballet Technique and Theory VII or higher.

DANCE 414A Men's Variations I

Men's Variations is designed for the male ballet dancer. Students will have the opportunity to learn and perform renowned variations from the Romantic, Classical, and Neo-Classical periods of ballet. This class will give the male student a true professional coaching experience in their training as they prepare for stage. Prerequisite: DANCE 341B Ballet Techniques and Theory V.

DANCE 414A Men's Variations I

Men's Variations is designed for the male ballet dancer. Students will have the opportunity to learn and perform renowned variations from the Romantic, Classical, and Neo-Classical periods of ballet. This class will give the male student a true professional coaching experience in their training as they prepare for stage. Prerequisite: DANCE 341B Ballet Techniques and Theory V.

DANCE 414B Men's Variations II

Continuation of DANCE 414A Prerequisite: DANCE 341B Ballet Techniques and Theory V

DANCE 414B Men's Variations II

Continuation of DANCE 414A Prerequisite: DANCE 341B Ballet Techniques and Theory V

DANCE 415A Variations I

Variations is designed for the 400 level ballet student. The course will teach female variations to the pre-professional student. Students will have the opportunity to learn and perform renowned variations from Romantic, Classical and Neo-Classical periods of ballet. Students will also work in traditional practice tutus/costumes in order to give them a true professional experience in their training as they prepare for the stage. Prerequisites: DANCE 342B Ballet Technique and Theory VI

DANCE 415A Variations I

Variations is designed for the 400 level ballet student. The course will teach female variations to the pre-professional student. Students will have the opportunity to learn and perform renowned variations from Romantic, Classical and Neo-Classical periods of ballet. Students will also work in traditional practice tutus/costumes in order to give them a true professional experience in their training as they prepare for the stage. Prerequisites: DANCE 342B Ballet Technique and Theory VI

DANCE 415B Variations II

Continuation of DANCE 415A. Prerequisites: DANCE 342B Ballet Technique and Theory IV

DANCE 415B Variations II

Continuation of DANCE 415A. Prerequisites: DANCE 342B Ballet Technique and Theory IV

DANCE 415C Variations III

Continuation of DANCE 415B. Prerequisite(s): DANCE 342B Ballet Technique and Theory VI or consent of instructor.

DANCE 415D Variations IV

Continuation of DANCE415C. Prerequisite(s): DANCE 342B Ballet Technique and Theory VI or consent of instructor.

DANCE 416A Performance Techniques I

A two-semester class rotation focusing on performance techniques of folk and character dances of various countries, traditional vocabulary of pantomime gestures, and theatrical dance forms including tap, ballroom, and jazz styles.

DANCE 416A Performance Techniques I

A two-semester class rotation focusing on performance techniques of folk and character dances of various countries, traditional

vocabulary of pantomime gestures, and theatrical dance forms including tap, ballroom, and jazz styles.

DANCE 416B Performance Techniques II

A two-semester class rotation focusing on performance techniques of folk and character dances of various countries, traditional vocabulary of pantomime gestures, and theatrical dance forms including tap, ballroom, and jazz styles.

DANCE 441B Ballet Technique And Theory Vii

Continuation of DANCE 342B at the pre-professional level including pre-professional pointe work. Restricted to dance majors.

DANCE 441B Ballet Technique And Theory Vii

Continuation of DANCE 342B at the pre-professional level including pre-professional pointe work. Restricted to dance majors.

DANCE 441M Modern Dance Technique And Theory Vii

Continuation of DANCE 342M at the pre-professional level. Additionally, this course is designed to prepare the student for auditioning and acquiring a performing career. Longer combinations with an emphasis on quick retention of material presented in class will be stressed. Restricted to dance majors.

DANCE 441M Modern Dance Technique And Theory Vii

Continuation of DANCE 342M at the pre-professional level. Additionally, this course is designed to prepare the student for auditioning and acquiring a performing career. Longer combinations with an emphasis on quick retention of material presented in class will be stressed. Restricted to dance majors.

DANCE 442B Ballet Technique And Theory Viii

Continuation of DANCE 441B, on the pre-professional level including pre-professional pointe work.

DANCE 442B Ballet Technique And Theory Viii

Continuation of DANCE 441B, on the pre-professional level including pre-professional pointe work.

DANCE 442M Modern Dance Technique And Theory Viii

Continuation of DANCE 441M on the pre-professional level.

DANCE 442M Modern Dance Technique And Theory Viii

Continuation of DANCE 441M on the pre-professional level.

DANCE 493 Senior Recital I

The planning, organization and preparation to fulfill the requirements for Senior Recital including selection of repertoire, preparation for utilization of production techniques, creation or restaging of a solo work, and beginning the creation of original choreographic work in group form utilizing the tools previously developed from the student's work in composition.

DANCE 494 Senior Recital II

A continuation of DANCE 493, this second semester course is the culmination and juried public performance of a fully produced concert on the main stage. The student will present an original choreographic group work. In addition, the student will perform in two different dance idioms; including a self choreographed solo or an approved master work.

DANCE 497CD Modern Dance Technique and Theory

Euphonium (EUPHNM)

EUPHNM 100A Preparatory Applied Study

One hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit towards the major. Consent of the instructor.

EUPHNM 100B Applied Study Of A Second Instrument

Applied study of a second instrument. One-half lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required. Consent of the instructor.

EUPHNM 100C Applied Study For The Non-Music Major.

Applied study for the non-music major. One-half hour lesson weekly. No jury required. Consent of the instructor.

EUPHNM 100D Applied Study For The Non-Music Major
Nine one-half hour lessons. No jury required.

EUPHNM 101 Freshman Euphonium I

EUPHNM 102 Freshman Euphonium II

EUPHNM 201 Sophomore Euphonium I

EUPHNM 202 Sophomore Euphonium II

EUPHNM 301 Junior Euphonium I

EUPHNM 302 Junior Euphonium II

EUPHNM 401 Senior Euphonium I

EUPHNM 402 Senior Euphonium II

Flute (FLUTE)

FLUTE 100A Preparatory Applied Study

One hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit towards the major. Consent of the instructor.

FLUTE 100B Applied Study Of A Second Instrument

Applied study of a second instrument. One-half hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required. Consent of the instructor.

FLUTE 100C Applied Study For The Non-Music Major

Applied study for the non-music major. One-half hour lesson weekly. No jury required. Consent of the instructor.

FLUTE 100D Applied Study For The Non-Music Major

Nine one-half hour lessons. No jury required.

FLUTE 101 Freshman Flute I

FLUTE 102 Freshman Flute II

FLUTE 201 Sophomore Flute I

FLUTE 202 Sophomore Flute II

FLUTE 301 Junior Flute I

FLUTE 302 Junior Flute II

One hour weekly participation in Vocal Performance Seminar is required.

School of Dentistry

School of Dentistry Undergraduate Courses

Dental Hygiene (DENT-HYG)

DENT-HYG 3000 Dental Morphology And Occlusion

This course is designed to provide the dental hygiene student with a sound knowledge base in dental morphology and occlusion through discussion and laboratory experiences. Students will learn to identify anatomical structures of each tooth and be able to communicate these findings effectively with colleagues and patients in both verbal and written forms. Throughout the course, the clinical application and relevance of dental morphology in the practice of dental hygiene will be emphasized. Special consideration will be given to root morphology as it relates to periodontal instrumentation. Activities will include: identification of extracted teeth, terminology exercises, dental charting experiences and identifying classifications of occlusion.

DENT-HYG 3000 Dental Morphology And Occlusion

This course is designed to provide the dental hygiene student with a sound knowledge base in dental morphology and occlusion

through discussion and laboratory experiences. Students will learn to identify anatomical structures of each tooth and be able to communicate these findings effectively with colleagues and patients in both verbal and written forms. Throughout the course, the clinical application and relevance of dental morphology in the practice of dental hygiene will be emphasized. Special consideration will be given to root morphology as it relates to periodontal instrumentation. Activities will include: identification of extracted teeth, terminology exercises, dental charting experiences and identifying classifications of occlusion.

DENT-HYG 3020 Dental Radiology

Lecture and clinical practice of dental radiographic procedures. Topics included are radiation hygiene, taking and developing radiographs, processing and mounting films, and radiographic interpretation. Clinical experience is required throughout the remaining semesters.

DENT-HYG 3030 Introduction to Histopathology of Oral Tissues

A comparison of the microscopic anatomy of healthy and diseased oral tissues. The major goal of this course is to integrate basic sciences (embryology, descriptive histology, and cell biology of oral tissues) with clinical sciences. The gap between the basic and clinical sciences is not always easy to bridge; this course is designed to bridge the "gap." This course provides students with an introduction to oro-facial histology and embryology and pathology that may arise from the tissues of the head, neck, and oral cavity. Restrictions: Dental hygiene students only

DENT-HYG 3080 Introduction To The Preventive Practice Of Dental Hygiene

This course will introduce theories and rationales for basic clinical dental hygiene care (infection control, oral examination and fundamentals of instrumentation) in diverse populations. Practical application of specific clinical skills will be introduced in the classroom and applied in the clinical setting, DENT-HYG H3080L.

DENT-HYG 3080L Preclinical Dental Hygiene

This course emphasizes the practical application of the fundamental concepts and principles of patient care in a diverse society discussed in DENT-HYG H3080. Emphasis is placed on patient assessment and techniques of instrumentation for examination and dental hygiene treatment. After the student has mastered basic skills, he/she will begin to provide direct dental hygiene services.

DENT-HYG 3200 Histopathology

An introduction to the principles of general pathology and organ system pathology including inflammation, immunity and diseases of immune origin, genetic diseases, neoplasia with emphasis on oral cancer, and diseases of selected organ systems including pulmonary, cardiovascular, hematopoietic, endocrine, skeletal, gastrointestinal, hepatic, pancreatic and other systems as time permits.

DENT-HYG 3200 Histopathology

An introduction to the principles of general pathology and organ system pathology including inflammation, immunity and diseases of immune origin, genetic diseases, neoplasia with emphasis on oral cancer, and diseases of selected organ systems including pulmonary, cardiovascular, hematopoietic, endocrine, skeletal, gastrointestinal, hepatic, pancreatic and other systems as time permits.

DENT-HYG 3210 Applied Biochemistry

This course is designed to build upon previous knowledge of chemistry, biology, and physiology as a basis for understanding principles in biochemistry. Presented through a self-paced online format, course content is selected to provide the foundation knowledge in biochemistry needed for subsequent courses in nutrition, pathology, and other health related topics.

DENT-HYG 3220 Dental Biomaterials

This course is designed to provide the dental hygiene student with a sound knowledge base in the science and manipulation of dental biomaterials. Through lectures and laboratory session, the student's ability to make clinical judgments regarding the application of dental biomaterials and the ways in which materials react to the oral environment will be enhanced.

DENT-HYG 3220 Dental Biomaterials

This course is designed to provide the dental hygiene student with a sound knowledge base in the science and manipulation of dental biomaterials. Through lectures and laboratory session, the student's ability to make clinical judgments regarding the application of dental biomaterials and the ways in which materials react to the oral environment will be enhanced.

DENT-HYG 3260 Principles Of Periodontics

This course in Periodontics will cover the biological and clinical aspects of periodontal health and pathology. An introduction to the supporting structures of the teeth will provide the foundation of understanding pathogenesis, histopathology and subsequent therapeutic treatment of periodontal diseases. The dental hygienist's role in recognition, prevention and treatment of periodontal diseases and maintenance of periodontal health is examined.

DENT-HYG 3280C Dental Hygiene Clinic I

Students will further develop clinical skills and techniques learned in DENT-HYG 3080L and previous courses by providing services to patients.

DENT-HYG 3280C Dental Hygiene Clinic I

Students will further develop clinical skills and techniques learned in DENT-HYG 3080L and previous courses by providing services to patients.

DENT-HYG 3285 Seminar In Dental Hygiene I

This course expands on theory and background presented in DENT-HYG 3080. Topics include expanding dental hygiene skills required for the care of patients and continued development of problem solving abilities and critical thinking skills as they relate to the provision of dental hygiene care. Provide students with a more insightful view of the role of the dental hygienist in the delivery of comprehensive patient care. Offered: Winter

DENT-HYG 3300 Radiographic Interpretation

The purpose of the course is to introduce interpretation of radiographic anomalies and pathology just prior to the clinical experience. Since there was little time for an emphasis on radiographic interpretation during your second year radiology course, this lecture and participation course supplement clinic instruction in diagnosis of the patient's oral needs and formulation of a treatment plan. Upon completion of this course, the student should be able to recognize simple pathology and radiographic anomalies. Offered: Winter

DENT-HYG 3300 Radiographic Interpretation

The purpose of the course is to introduce interpretation of radiographic anomalies and pathology just prior to the clinical experience. Since there was little time for an emphasis on radiographic interpretation during your second year radiology course, this lecture and participation course supplement clinic instruction in diagnosis of the patient's oral needs and formulation of a treatment plan. Upon completion of this course, the student should be able to recognize simple pathology and radiographic anomalies. Offered: Winter

DENT-HYG 3320 Oral Health Behavior Change

The purpose of this hybrid course is to prepare the junior dental hygiene student to effectively assess and individualize preventive oral health care through the use of brief motivational interviewing. The course will include evidenced based information in dental caries and caries risk assessment, caries preventive measures, introduction to periodontal disease, dental stains, and management of xerostomia, halitosis, and dentinal sensitivity, oral healthcare products and how to care for an oral appliance. The student will subsequently apply course concepts to facilitate patient behavior change in the clinical setting. Prerequisite: General Psychology.

DENT-HYG 3340 Principles Of Public Health

This course introduces the student to principles of public health, the field of epidemiology, health care delivery systems, public health terminology and teaching methodologies to use in culturally diverse community settings. Students will have the opportunity to assess a target population, plan, implement and evaluate appropriate programs. Students will also apply theories and skills of communication and education while preparing and presenting oral health education programs for various population groups. The material presented in this course will extend to the subsequent course DH 4220 (Community Oral Health field Experiences).

DENT-HYG 3340 Principles Of Public Health

This course introduces the student to principles of public health, the field of epidemiology, health care delivery systems, public health terminology and teaching methodologies to use in culturally diverse community settings. Students will have the opportunity to assess a target population, plan, implement and evaluate appropriate programs. Students will also apply theories and skills of communication and education while preparing and presenting oral health education programs for various population groups. The material presented in this course will extend to the subsequent course DH 4220 (Community Oral Health field Experiences).

DENT-HYG 4017 International Outreach

Students in dental hygiene education in the dental school will have the opportunity to apply knowledge and skills while delivering care in an international setting. The long range goal is a practitioner who is sensitive to diverse community needs.

DENT-HYG 4020 Local Anesthesia And Pain Control

This course is designed to prepare dental hygiene students for the safe, effective administration of local anesthesia and nitrous oxide sedation. Included are content areas in anatomy, physiology, pharmacology, and emergency management as they relate to the administration of local anesthetics, nitrous oxide, and pain control. Laboratory sessions are structured to develop actual experiences in administration of local anesthetics and nitrous oxide. Various mechanisms for pain control are also covered. Methods of presentation include lecture, large group discussion, laboratory and clinical participation.

DENT-HYG 4020 Local Anesthesia And Pain Control

This course is designed to prepare dental hygiene students for the safe, effective administration of local anesthesia and nitrous oxide sedation. Included are content areas in anatomy, physiology, pharmacology, and emergency management as they relate to the administration of local anesthetics, nitrous oxide, and pain control. Laboratory sessions are structured to develop actual experiences in administration of local anesthetics and nitrous oxide. Various mechanisms for pain control are also covered. Methods of presentation include lecture, large group discussion, laboratory and clinical participation.

DENT-HYG 4040 Introduction To Research And Instruction

Introduction to research and instruction. The student will be introduced to the idea of scientific inquiry and the research process, in particular as it relates to securing content for teaching. Students will evaluate the usefulness of various databases as well as conduct productive database literature searches. Instructional topics will focus on current technologies such as: production of electronic presentations and handout materials, exporting images for inclusion in print and electronic educational presentation, and development of presentation skills to effectively conduct an educational session.

DENT-HYG 4040 Introduction To Research And Instruction

Introduction to research and instruction. The student will be introduced to the idea of scientific inquiry and the research process, in particular as it relates to securing content for teaching. Students will evaluate the usefulness of various databases as well as conduct productive database literature searches. Instructional topics will focus on current technologies such as: production of electronic presentations and handout materials, exporting images for inclusion in print and electronic educational presentation, and development of presentation skills to effectively conduct an educational session.

DENT-HYG 4050 Periodontics II

This course in Periodontics will provide an introduction to Phase II and III therapy. Periodontal decision making will be emphasized. The dental hygienists' role in recognition, prevention and treatment of periodontal diseases and maintenance of periodontal health is further examined. Prerequisite: DENT-HYG 3620 Principles of Periodontics. Offered: Winter

DENT-HYG 4060C Dental Hygiene Clinic II

The student will continue to develop competency in basic dental hygiene skills. Principles of periodontal techniques, such as non-surgical periodontal therapy, supportive treatment procedures and comprehensive patient care in a diverse society will be emphasized. The student will be asked to demonstrate professional management skills and productivity.

DENT-HYG 4065 Seminar In Dental Hygiene II

This seminar course is offered in conjunction with DH 4060C, Dental Hygiene Clinic II and is part of the clinical education continuum. Emphasis will be placed on developing advanced clinical techniques, instrument sharpening, intra-oral imaging, adjunctive dental hygiene treatment, and increased problem-solving in the clinical setting.

DENT-HYG 4065 Seminar In Dental Hygiene II

This seminar course is offered in conjunction with DH 4060C, Dental Hygiene Clinic II and is part of the clinical education continuum. Emphasis will be placed on developing advanced clinical techniques, instrument sharpening, intra-oral imaging, adjunctive dental hygiene treatment, and increased problem-solving in the clinical setting.

DENT-HYG 4080 Introduction To Research and Evidence Based Decision Making

This is a lecture/discussion course with assigned exercises in the research process and evaluating scientific studies. Students will apply basic principles of research design and methodology to the critical analysis of contemporary oral health related literature focusing on the review and evaluation of literature as it relates to the practice and profession of dentistry and dental hygiene with the intent of utilizing an evidence-based approach to care. Semester Offered: Fall.

DENT-HYG 4100 Pharmacology

Discussion of pharmacotherapeutic drugs, their classification, applications, administration, adverse effects, and interactions.

DENT-HYG 4100 Pharmacology

An overview and introduction to the major drug groups and common drugs taken by dental outpatients. Course includes the basic principles and general theories of drug action, basic pharmacokinetics, their mechanisms of action and therapeutic uses and the relative dental significance of each.

DENT-HYG 4120 Seminar In Dental Hygiene

This course is offered in conjunction with DENT-HYG 4120C Preventive Dentistry Clinic III, and is a part of the clinical education continuum. Major content emphasis includes developing problem solving abilities, managing patients with special needs and diverse backgrounds (oncology, gerontology and physical disabilities), and managing emergencies in the dental office. Skills in preventive treatment program planning and evaluation of patient care will be reinforced through community experiences and self reflection.

DENT-HYG 4120 Seminar In Dental Hygiene

This course is offered in conjunction with DENT-HYG 4120C Preventive Dentistry Clinic III, and is a part of the clinical education continuum. Major content emphasis includes developing problem solving abilities, managing patients with special needs and diverse backgrounds (oncology, gerontology and physical disabilities), and managing emergencies in the dental office. Skills in preventive treatment program planning and evaluation of patient care will be reinforced through community experiences and self reflection.

DENT-HYG 4120C Dental Hygiene Clinic III

The student will continue to develop competency in intermediate dental hygiene skills. Principles of periodontal techniques, such as root planning, pain control and supportive techniques will be stressed. Comprehensive treatment planning and implementation of comprehensive care to a diverse patient population will be the focus of this course. Continued development of professionalism, management and critical thinking skills will be emphasized.

DENT-HYG 4120C Dental Hygiene Clinic III

The student will continue to develop competency in intermediate dental hygiene skills. Principles of periodontal techniques, such as root planning, pain control and supportive techniques will be stressed. Comprehensive treatment planning and implementation of comprehensive care to a diverse patient population will be the focus of this course. Continued development of professionalism, management and critical thinking skills will be emphasized.

DENT-HYG 4210 Practice Management

Current relevant issues impacting dental hygiene practice are discussed. Dental practice economics, communicating and management in a diverse society are included. Also included in this course is the study of jurisprudence as it relates to the practice of dental hygiene.

DENT-HYG 4210 Practice Management

Current relevant issues impacting dental hygiene practice are discussed. Dental practice economics, communicating and management in a diverse society are included. Also included in this course is the study of jurisprudence as it relates to the practice of dental hygiene.

DENT-HYG 4220 Community Oral Health Field Experiences

In this course the student will participate in service learning activities which require application of dental public health principles. Students will have the opportunity to work with a variety of diverse populations. Projects will engage the students in assessing a target population, planning, implementing and evaluating appropriate programs. Students will also apply theories and skills of communication and education while preparing and presenting oral health education programs for various diverse population groups.

DENT-HYG 4220 Community Oral Health Field Experiences

In this course the student will participate in service learning activities which require application of dental public health principles. Students will have the opportunity to work with a variety of diverse populations. Projects will engage the students in assessing a target population, planning, implementing and evaluating appropriate programs. Students will also apply theories and skills of communication and education while preparing and presenting oral health education programs for various diverse population groups.

DENT-HYG 4230 Principles Of Public Health

This course introduces the student to principles of public health, the field of epidemiology, health care delivery systems, public health terminology and teaching methodologies to use in culturally diverse community settings. Students will have the opportunity to assess a target population, plan, implement and evaluate appropriate programs. Students will also apply theories and skills of communication and education while preparing and presenting oral health education programs for various population groups. The material presented in this course will extend to the subsequent course DH 4220 (Community Oral Health field Experiences).

DENT-HYG 4230 Principles Of Public Health

This course introduces the student to principles of public health, the field of epidemiology, health care delivery systems, public health terminology and teaching methodologies to use in culturally diverse community settings. Students will have the opportunity to assess a target population, plan, implement and evaluate appropriate programs. Students will also apply theories and skills of communication and education while preparing and presenting oral health education programs for various population groups. The material presented in this course will extend to the subsequent course DH 4220 (Community Oral Health field Experiences).

DENT-HYG 4240 Ethics In Professional Practice

Study of ethics and ethical issue related to the practice of dental hygiene within a diverse society. Includes application of ethical

principles to real-life situations.

DENT-HYG 4240 Ethics In Professional Practice

Study of ethics and ethical issue related to the practice of dental hygiene within a diverse society. Includes application of ethical principles to real-life situations.

DENT-HYG 4260 Senior Seminar

This course serves as a means of synthesizing information from all courses in the dental hygiene curriculum and applying content to patient cases and practice management issues. Case-based learning (CBL) will be utilized to review significant content areas as well as to introduce subjects not previously encountered during previous clinical experiences. Case based/problems based learning (PBL) with faculty facilitation will assist students in managing patient cases. This course is also designed to assist in preparing senior dental hygiene students for the written and clinical examinations required for licensure.

DENT-HYG 4260 Senior Seminar

This course serves as a means of synthesizing information from all courses in the dental hygiene curriculum and applying content to patient cases and practice management issues. Case-based learning (CBL) will be utilized to review significant content areas as well as to introduce subjects not previously encountered during previous clinical experiences. Case based/problems based learning (PBL) with faculty facilitation will assist students in managing patient cases. This course is also designed to assist in preparing senior dental hygiene students for the written and clinical examinations required for licensure.

DENT-HYG 4260C Dental Hygiene Clinic Iv

The student will have the opportunity to reach competency in all clinical skills. Emphasis will be placed on decision-making, problem-solving, critical thinking, appointment and time management. The course will focus on comprehensive dental hygiene care to a diverse population.

DENT-HYG 4260C Dental Hygiene Clinic Iv

The student will have the opportunity to reach competency in all clinical skills. Emphasis will be placed on decision-making, problem-solving, critical thinking, appointment and time management. The course will focus on comprehensive dental hygiene care to a diverse population.

DENT-HYG 4320 Special Patient Care Practicum

Through outside agency affiliation, students will have the opportunity of applying the course content from Principles of Public Health, Dental Health Education and DHE-Practicum. Sites for participation include hospitals, nursing homes, and residential and day activity centers for developmentally disabled. Offered: TBA

DENT-HYG 4330 Introduction To Oncology And Practicum

Field experience designed to provide the student with personal observation of oncology patients undergoing therapy; chemotherapy for various cancers and surgical treatment and/or radiation therapy for head and neck cancers. A limited opportunity will be provided to assist in treatment planning for oral/dental needs, oral hygiene education, and observation of a head and neck cancer surgery. Laboratory experience will include construction of custom fluoride carriers, demonstration of oral hygiene products and an overview of hospital administration, procedures and in-patient charts, basic oncologic principles and the psychological ramifications of cancer, therapy and rehabilitation. Offered: TBA

DENT-HYG 4340 Community Dentistry Practicum

The community dentistry practicum provides the student with an opportunity for personal exploration of the many settings of community dentistry. These experiences may lead the students into clinical activities or design and implementation of dental health educational programs. The student will have the opportunity to work with various community health professionals in the Kansas City area. The student will need reliable transportation and should expect some experiences to require travel. Possibilities for practicum experiences are broad and will be defined after an initial assessment of the student's interest and goals. An individual learning contract will be written following the assessment. The student will be required to meet as a group periodically throughout the semester.

DENT-HYG 4340 Community Dentistry Practicum

The community dentistry practicum provides the student with an opportunity for personal exploration of the many settings of community dentistry. These experiences may lead the students into clinical activities or design and implementation of dental health educational programs. The student will have the opportunity to work with various community health professionals in the Kansas City area. The student will need reliable transportation and should expect some experiences to require travel. Possibilities for practicum experiences are broad and will be defined after an initial assessment of the student's interest and goals. An individual learning contract will be written following the assessment. The student will be required to meet as a group periodically throughout the semester.

DENT-HYG 4350 Periodontal Therapy Practicum

This course is designed for the dental hygiene student who desires increased experience with periodontal skills. The course involves practical experience in the graduate periodontics clinic working with a periodontology resident. Two clinic sessions per week; one seminar scheduled weekly. Offered: Winter Semester online, onsite TBA

DENT-HYG 4360 Practice Management Practicum

Current relevant issues impacting dental hygiene practice are discussed. Dental practices, economics, communication and management are included. Practical application of course would include the development of a dental office operating manual. Offered: TBA

DENT-HYG 4380 Research Practicum

This course provides an opportunity to apply the content in the previous course Introduction to Research Design. The protocol identified may be a basic science, clinical or community dental hygiene problem. The field experience may deal with a basic or applied, descriptive or explanatory research question. Offered: TBA

DENT-HYG 4400 Nutrition and Oral Health

This course will cover the sources and use of nutrients associated with general nutrition with an emphasis on applied concepts in oral health and nutrition. The dental hygienists' role in recognition, prevention and treatment of nutrition related oral disease(s) and maintenance of oral health is examined. Students will be introduced to and practice individualized nutritional counseling utilizing previously learned brief motivational interviewing strategies for encouraging diet change. Nutritional counseling principles will be utilized in later clinical courses and practicums. Prerequisites: DENT HYG 3210 Applied Biochemistry and DENT HYG 3220 Oral Health Education or approval of course Director. Offered: Fall 2nd year.

DENT-HYG 4500 Seminar On Issues In Higher Education For Health Professionals

This course is designed to introduce the student to issues encountered in higher education. Topics included are curriculum vitae and resume writing, interviewing skills, accreditation, promotion and tenure, portfolios and outcomes assessment, dental hygiene theory development, and various other topic areas. Offered: Winter Semester

DENT-HYG 4500 Seminar On Issues In Higher Education For Health Professionals

This course is designed to introduce the student to issues encountered in higher education. Topics included are curriculum vitae and resume writing, interviewing skills, accreditation, promotion and tenure, portfolios and outcomes assessment, dental hygiene theory development, and various other topic areas. Offered: Winter Semester

DENT-HYG 4600 Evidence Based Decision Making in the Clinical Practice of Dental Hygiene

This course is designed for the graduate and degree completion dental hygiene student and expand on the student's basic knowledge of the dental hygiene process of care. Utilization of evidence based decision making skills will be explored in an effort to incorporate current scientific literature, personal clinical experience and patient preferences as it relates to the delivery of comprehensive patient care. Skills taught in this course will enhance background knowledge related to the dental hygiene process of care and help to foster an attitude of critical analysis and lifelong learning. Semester Offered: Spring.

DENT-HYG 4620 Principles In Dental Hygiene Education

Through individualized instruction, the student will have an introduction to educational concepts in preparation for student teaching. Topics included are goals and objectives, curriculum and course design, development of course syllabi, teaching/learning strategies, use of technology in teaching, basic principles of testing, micro-teaching demonstration, and student and self evaluation. It is recommended that this course be taken in the same semester as DENT-HYG 4680. Offered: Fall semester on-line only.

DENT-HYG 4625 Dental Hygiene Administration

This course is designed for the post-certificate dental hygiene student. Major topic areas include accreditation of dental hygiene programs, the impact of National and State Board examinations on curriculum planning, selective admissions policies and procedures, faculty evaluation, promotion and tenure and students' rights. Offered: TBA

DENT-HYG 4630 Practicum In Dental Hygiene Administration

Under the supervision of the Director of Dental Hygiene, the student will gain actual experiences in the daily administration of a dental hygiene program. The student may contract for responsibilities such as admissions, budget preparations, course scheduling, report writing and student academic counseling. Offered: TBA

DENT-HYG 4635 Practicum In Clinical Supervision

Under the supervision and permission of the Dental Hygiene Clinical Supervisor, the student will gain actual experience in the duties involved in coordinating the clinical education of a dental hygiene student. The student may contract for responsibilities such as, coordinating mock board examinations, maintaining student clinical records, developing faculty and student clinic

schedules and report writing. Offered: TBA

DENT-HYG 4635 Practicum In Clinical Supervision

Under the supervision and permission of the Dental Hygiene Clinical Supervisor, the student will gain actual experience in the duties involved in coordinating the clinical education of a dental hygiene student. The student may contract for responsibilities such as, coordinating mock board examinations, maintaining student clinical records, developing faculty and student clinic schedules and report writing. Offered: TBA

DENT-HYG 4640 Student Teaching And Conference I

Under the direction of a supervising professor, the student may select teaching experience in the classroom areas of their choice. The student develops behavioral course objectives, comprehensive lesson plans, test and examination items, classroom presentations, and prepares student evaluations in the selected classroom teaching areas. The student may select teaching assignments in one of the developed externship student teaching programs. Conferences will be held in conjunction with the course. Students must complete DENT-HYG 4620 and DENT-HYG 4040 prior to enrolling in this course.

DENT-HYG 4640 Student Teaching And Conference I

Under the direction of a supervising professor, the student may select teaching experience in the classroom areas of their choice. The student develops behavioral course objectives, comprehensive lesson plans, test and examination items, classroom presentations, and prepares student evaluations in the selected classroom teaching areas. The student may select teaching assignments in one of the developed externship student teaching programs. Conferences will be held in conjunction with the course. Students must complete DENT-HYG 4620 and DENT-HYG 4040 prior to enrolling in this course.

DENT-HYG 4650 Student Teaching And Conference II

The student will continue to develop teaching skills in laboratory and/or classroom areas as selected by the student under the direction of a supervising professor. Students must complete DENT-HYG 4640 prior to enrolling in this course. Offered: TBA, on-line and on-site

DENT-HYG 4660 Independent Study In Dental Hygiene

This course is designed for the dental hygiene student who desires independent study of a particular problem or area of interest in dental hygiene education. The student must have prior approval of the Director of Dental Hygiene before enrolling in this course. Offered: Fall, winter, summer.

DENT-HYG 4680 Dental Hygiene Clinical Instruction I

Students must complete DENT-HYG 4640 prior to enrolling in this course. Continued development of competency as a clinical instructor under the supervision of the dental hygiene faculty. Requires a half-day in clinic student instructor. Offered: Fall on-line, on-site TBA

DENT-HYG 4685 Dental Hygiene Clinical Instruction II

A continuation of DENT-HYG 4680 Dental Hygiene Clinical Instruction I. Under the supervision of the dental hygiene faculty, students may continue to develop skills as a dental hygiene clinical instructor. Students must complete DENT-HYG 4680 prior to enrolling in this course. Offered: TBA

DENT-HYG 4750 Geriatric Oral Health Promotion And Education

This course is designed to enhance knowledge, attitudes, behavior and clinical care directed at geriatric oral health promotion and education. It is designed for dental hygienists and other health care providers who work with the older adult. Teaching methods include seminar, self-instructional modules and a community-based practicum. Offered: Fall Semester

School of Education

School of Education Undergraduate Courses

Counseling Psychology and Counselor Education (CPCE)

CPCE 220 Self in a Multicultural Society

This course will focus on what it means for the individual to live in a multicultural, urban, and increasingly global society. Students will examine their own cultural identity, including values and worldviews as well as assumptions and biases regarding others' diversity. In addition, the course will focus on learning about different cultures and issues associated urbanism,

globalization, cultural conflicts and social advocacy.

CPCE 400 Intro to Counseling Psychology

This course will provide an overview of the profession of counseling psychology. Presentations and assignments will the origins and history of counseling psychology, research and intervention strategies used by counseling psychologists, and current trends in the field. It is important to note that although counseling strategies will be reviewed, this course will not focus on developing or practicing counseling skills. Prerequisites: Students enrolled in this class must have completed 6 hours in psychology including PSYCH 210 or be advanced students in Education.

CPCE 420 Effective Interpersonal Communication

Theory, and research on interpersonal relationships; students will learn effective communication skills, including understanding verbal and nonverbal behavior, listening, and empathy.

CPCE 420 Effective Interpersonal Communication

Theory, and research on interpersonal relationships; students will learn effective communication skills, including understanding verbal and nonverbal behavior, listening, and empathy.

CPCE 425 Positive Psychology

Introduction to current theory and empirical research in positive psychology. Topics explored include happiness, self-esteem, empathy, friendship, optimism, love, achievement, strengths, mindfulness, spirituality, and hope.

Curriculum and Instruction (EDUC-C&I)

EDUC-C&I 497 Individual Study

Guided study of a selected topic in curriculum and instruction. Prerequisite: Permission of instructor.

Education (EDUC)

EDUC 160 Career And Life Planning

Skill development in career planning through processes of self-assessment and self-development and analyzing the structure of the world of work and occupational information, values, clarification and decision making, vocational exploration and preparation for employment.

Physical Education (PHYS-ED)

PHYS-ED 106 Badminton

This course teaches the basic rules, skill techniques, terminology and strategy for badminton. Fall/Winter.

PHYS-ED 125 Golf

PHYS-ED 125 Golf

PHYS-ED 145 Social Dance

PHYS-ED 149 Basketball And Team Handball

This course teaches the basic rules, skill techniques, terminology and strategy for basketball and team handball.

PHYS-ED 153 Volleyball

PHYS-ED 153 Volleyball

PHYS-ED 157 Weight Training

PHYS-ED 157 Weight Training

PHYS-ED 158 Advanced Weight Training

This course teaches free weight training exercises that are used within a well-balanced training program, and provides experience needed to design weight training programs. Prerequisites: PHYS-ED 157 or permission of instructor.

PHYS-ED 159 Jogging

PHYS-ED 174 Cross Training

This course provides knowledge, skill and opportunity to improve primary sport/activity performance or overall fitness, through designing and participating in a variety of cross training physical activities.

PHYS-ED 175 Personal Fitness

This course is designed to expose students to facts about and experiences in dealing with motor, physical, physiological,

psychological and nutritional aspects of the human being. Specific areas of study include hypokinetic disease, physical fitness, nutrition and wellness concepts. Fall/Winter/Summer

PHYS-ED 175L Lifetime Fitness Lab

This course is designed to provide supervised activity experiences including self assessment and self directed physical exercise programs that are coordinated with the lecture portion of the course.

PHYS-ED 180 Beginning Swimming

This course is designed to equip each student with basic water safety skills and knowledge in order to make them reasonably safe while in, on or about the water.

PHYS-ED 181 Fitness Swimming

This course is designed to challenge and encourage each student to develop an individualized fitness program based on personal goals. Lap swimming as well as water exercise will be incorporated in the class.

PHYS-ED 189 Special Topics: Activity

A course designed to deal with a special activity class which is not available in the regular course offerings. Activity class, instructors and prerequisites to be listed in the semester bulletin.

PHYS-ED 189AG Special Topics

PHYS-ED 189AY Special Topics:Activity

PHYS-ED 189AY Special Topics:Activity

PHYS-ED 189BE Special Topics: Activity

PHYS-ED 189KF Special Topics

A course designed to deal with a special activity class which is not available in the regular course offerings. Activity class, instructors and prerequisites to be listed in the semester bulletin.

PHYS-ED 189KT Special Topics: Activity

PHYS-ED 189RC Special Topics: Activity

A course designed to deal with a special activity class which is not available in the regular course offerings. Activity class, instructors and prerequisites to be listed in the semester bulletin.

PHYS-ED 189RC Special Topics: Activity

A course designed to deal with a special activity class which is not available in the regular course offerings. Activity class, instructors and prerequisites to be listed in the semester bulletin.

PHYS-ED 189XX Special Topics: Activity

PHYS-ED 189XY Special Topics: Activity

PHYS-ED 189YO Special Topics: Activity

PHYS-ED 206 First Aid And Safety

Methods of administering first aid in case of accident or sudden illness; bandaging; resuscitation; and caring for wounds and injuries. Safety in schools will be stressed. (Elective).

PHYS-ED 207 Outdoor And Leisure Pursuits

Designed to acquaint students with opportunities for leisure and recreational activity in the outdoors. Emphasizes safety measures and planning skills as well as development of particular movement skills and knowledge about associated wildlife.

PHYS-ED 212 Self Defense

Study in the theory of self defense. Content focuses on: technique for eliminating dangers from daily living, methods for recognizing and avoiding dangers, and skills and strategies for employing physical defense when necessary.

PHYS-ED 312 Physical Education For Elementary Schools

Identifies physical education needs of elementary school child in relation to his/her total development with emphasis on methods and materials.

PHYS-ED 312L Laboratory Experiences In Physical Educ For The Elementary School

This course consists of laboratory teaching experiences, with skill theme combinations of games, gymnastics, dance & fitness. Must be taken concurrently with PHYS-ED 312.

PHYS-ED 323 Nutrition For Fitness And Sport

This course examines the role nutrition, complemented by exercise, may play in the enhancement of fitness and sport performance. Considerable attention will be devoted to the use of nutritional ergogenic aids with reference to athletic performance. Prerequisite: LS-PHYS 117, LS- ANATO 118, LS-ANATO 118L or permission of instructor. Offered: Fall and Winter.

PHYS-ED 361WI Sociology Of Sport And Exercise

The critical examination of the function of sport in the American culture, in an interdisciplinary fashion, with a focus on the contemporary scene. The work of the course will include readings on sociological issues of sport and exercise, the writing of mini-research papers, and a long paper with a presentation. Prerequisite: Introduction course in sociology Offered: MW 1pm-2:15 (Winter)

PHYS-ED 370 Psychology Of Sport And Exercise

Exploration of psychological constructs related to the competitive sport process and to physical activity. Prerequisite: Introductory course in Psychology.

PHYS-ED 389 Special Topics In Health And Physical Education

This course is designed to offer a topic which is not available in the regular course offerings. Topics, instructors and prerequisites to be listed in the semester bulletin.

PHYS-ED 401 Health Teaching In The Schools

Study of school health programs with emphasis on methods and materials for health and safety instruction in grades K-8. Prerequisites: Elementary or Physical Education Teaching major.

PHYS-ED 401L Health Teaching In The Schools Lab

Students will attain beginning level competence in skills related to teaching health in schools, including planning, preparation and presentation skills. Computer skills will be used to search internet, e-mail, and develop a computer generated presentation.

PHYS-ED 499 Internship

Extensive experience in a practical situation under supervision of university faculty and on-site personnel. Breadth and intensity

of involvement will depend on student ability. Prerequisites: Upper Division Major; consent of instructor.

Special Education (EDUC-SP)

EDUC-SP 407 Educating Exceptional Children And Youth

An introductory course in special education concerning issues, theories, and practices for educating the exceptional student in both general and special classrooms or settings; identification and educational intervention procedures for children and adolescents with exceptionalities, including behavior disordered; learning disabled, mentally retarded, speech impaired; visually impaired, physically impaired, hearing impaired, multihandicapped and gifted.

Teacher Education (TCH-ED)

TCH-ED 130 Number Systems And Related Topics

This course is designed for elementary perservice teachers to meet certification requirements for a course in number theory. The course provides a constructive development of the real number system, introduces concepts from elementary number theory and applies this knowledge of quantitative systems to solve various types of problems. Prerequisites: High School Algebra and Geometry Offered: Fall Semesters

TCH-ED 140 Geometry For Elementary Teachers

This course is designed for elementary perservice teachers to meet certification requirements for a course in geometry. It provides a constructive development of axiomatic geometry and introduces concepts from transformation geometry. Elements of spatial sense and measurement are included and an emphasis is placed on applying this knowledge to solve various types of problems. Prerequisites: High School Algebra and Geometry Offered: Winter Semesters

TCH-ED 150 Foundations of Urban Education

This course is designed to introduce students to the social and philosophical issues in urban education and will include an emphasis on culture, race, class, and ethnicity as they relate to schooling in urban America. Prerequisite: Students must be accepted to the Institute for Urban Education.

TCH-ED 151 Introduction to Urban Education Field Experience

Introduction to Urban Education Field Experience. The field experience is intended to give students an opportunity to see the application of learning theory in authentic classroom situations. Students are encouraged to become involved in the learning of the classroom and 'provide a helping hand' to the teacher. Prerequisite: Students must be admitted to the Institute for Urban Education

TCH-ED 152 Urban Education Seminar I: Social Justice

Introductory seminar to the field of urban education. This seminar aligns with the other fall semester experiences and allows students an opportunity to dialogue about the possible application of their experience work as it applies to teaching in an urban school. Students will be introduced to current topics in education and society; identify, develop and enhance study strategies; observe, listen and think critically, sharpen writing skills; and work effectively in groups.

TCH-ED 153 Math Methods for Urban Education teachers: Number Systems

designed for elementary school teacher. A constructive development of the real number system beginning with the system of whole number, concepts from the elementary number theory; applications of quantitative systems to problems in discrete mathematics. Prerequisites: High School Algebra or College Algebra with at least a C

TCH-ED 201 Children's Literature

Survey of books for children. Attention given to standard aids for selection, criteria for evaluating different types of literature and creating an environment for response to literature. A primary focus on multicultural literature for children. Fall

TCH-ED 201 Children's Literature

Survey of books for children. Attention given to standard aids for selection, criteria for evaluating different types of literature and creating an environment for response to literature. A primary focus on multicultural literature for children. Fall

TCH-ED 251 Child and Adolescent Development for Urban Educators

This course is designed to provide students with the information they will use as educators to design developmentally appropriate practices for the children they will work in the classroom setting, thus discussions about how the information is translated into the classroom will be applied. To be taken concurrently with TE 252

TCH-ED 252 Field Exp: Child/Adolescent Development

This field experience is designed in conjunction with TE 251 Child Development for Urban Teachers to provide students with real-world interactions to study the development of children from birth to adolescence. Field experience setting have been

arranged to provide students with an opportunity to observe and interact with children as they study the four stages of development.

TCH-ED 253 Urban Education Seminar II: Social Justice

This seminar aligns with the other semester experiences and allows students an opportunity to dialogue about the possible application of their experience work as it applies to teaching in an urban school. Students will be introduced to current topics in urban education and society; identify, develop and enhance study strategies; observe, listen and think critically, sharpen writing skills; and work effectively in groups as they explore social justice and the relationship between society and schools. Prerequisite: Students must be admitted to the Institute for Urban Education

TCH-ED 254 Math Methods for Urban Teachers: Geometry

Designed for elementary school teachers. A constructive development of geometry and concepts from elementary teacher education; applications will be made to connect with elementary curriculums. Prerequisite: High School Algebra and Geometry or College Algebra with at least a C.

TCH-ED 255 Intergrated Music and Visual Arts

Basic principals of creativity and their application in the multicultural teaching of art, creative dance and musical and rhythmic interpretation will be explored. An emphasis is placed on interrelationship of these disciplines and their integration into the curriculum. Special emphasis will be placed on helping students to develop a wider and more respectful understanding of our nation's cultural diversity as reflected in all art forms. Students will be exposed to the literature, poetry, theater, visual art and music contributed by African-Americans, Hispanic Americans and Native Americans among other. To be taken concurrently with TE 256. Prerequisite: Must be admitted to the Institute for Urban Education.

TCH-ED 256 Field Experience: Music and Visual Arts

The field experience is intended to give students an opportunity to see the application of learning theory and integration of the arts in authentic classroom situations. To be taken concurrently with TE 255. Prerequisite: Must be admitted to the Institute for Urban Education.

TCH-ED 258 Math Methods for Urban Teachers: Probability and Statistics

Designed for Elementary and Middle School Teachers. This course is designed to provide undergraduate students in elementary and middle school mathematics with the foundational knowledge of the teaching of probability and statistics and how to use the elements of statistics to interpret and solve problems in elementary and middle school classrooms. Prerequisite: High School Algebra and Geometry or College Algebra with at least a C.

TCH-ED 259 Introduction to Urban Teaching

This course is designed to introduce students to the sociopolitical context of urban education, schooling, teaching and learning. It will provided an overview of education in a multicultural democracy, mostly African Americans, Latino Americans, and other racial/ ethnic groups and immigrants. Specifically, it will introduce students to the notion of teaching for social justice, the social justice teacher and the social empowerment. Opportunities will be provided for students to review research, debunk stereotypes, negative views, and to recognize urban learners as capable, motivated, and resilient. The ultimate goal of this course is to facilitate experiences that will enable students to develop the knowledge, skills and dispositions needed to learning in urban schools. To be taken concurrently with TE 265. Prerequisite: Must be admitted to the Institute for Urban Education.

TCH-ED 265 Field Experience: Urban Teaching

As a CO-requisite to Introduction to Urban Teaching, students will spend 60 hours in urban schools working with diverse student populations, specifically; students will work with African Americans, Latino Americans, and English Language Learners grades K-8. Reflection and discussion of clinical experiences will occur during the urban education seminar and Introduction to urban education classes. Students will keep a reflective journal of their experiences working with diverse learners. To be taken concurrently with TE 259. Prerequisite: Must be admitted to the Institute for Urban Education. Restrictions: CO-Requisite: Urban Education Seminar IV

TCH-ED 266 Urban Education IV: Classroom Management

This course will present the foundations for developing expertise in classroom management. Theory and activities will introduce students to strategies and procedures to manage student's behavior as well as keep them on task throughout the school day. The intent of this course is to provide the prospective teacher with the skills and the expertise necessary for you to manage the classroom behavior of your students effectively while creating a caring and supportive atmosphere. Prerequisite: Must be admitted to the Institute for Urban Education. CO-Requisite: Field experience: Urban Teaching

TCH-ED 300 Summer Community Experience

This course provides an in-depth examination into both the evolution of ghetto communities and dynamics of community building in inner cities, with special emphasis on Kansas City, Missouri. In addition, theories of educational psychology as well as child and adolescent behavior will be infused to assist participants in developing age appropriate mentoring/teaching strategies

and activities. Prerequisite: Must be admitted to the Institute for Urban Education.

TCH-ED 350 Multi-Media Production For The Classroom

An introductory course in the media production techniques involving knowledge and practical use of computers, scanners, digital video, digital audio and graphics to create professional multimedia for use in the classroom. The class is designed for prospective and current classroom teachers.

TCH-ED 351 Literature for A Lifetime

This course will provide students with an encompassing survey of fiction and non-fiction literature appropriate for all age ranges from the young child to adult. Lectures and discussions will focus on the value of literature as a tool for thinking, as a way of illuminating modern life, as a means of understanding history and human behavior, and as a source of aesthetic pleasure and lifelong enjoyment. Students will learn how to select and critique both the media used in illustrated books and the literacy techniques and forms of the many genre of literature. In this course special emphasis will be placed on literature that reflects life in many cultures and periods of history, in particular from those racial and ethnic sources that make modern America such a pluralistic and diverse society. There will also be an emphasis on the universal themes that run through literature of the societies. Prerequisite: Must be admitted to the Institute for Urban Education.

TCH-ED 366 Field Experience: Literacy

Students will spend 100 hours working in an urban school classroom. Students will have the opportunity to apply learning and lessons designed in the semester's pedagogical courses, particularly Integrated Instruction: Language Arts and Social Studies. Students will work with their seminar leader, having the opportunity to be observed and conference about their teaching.

TCH-ED 385 Teaching and Learning with Technology

This is an introductory course that covers the fundamentals of standard educational computer applications in addition to providing basic concepts regarding classroom hardware and software integration. This course familiarizes students with the National Educational Technology Standards for Teachers and Students. Because of the computer's increasing importance in all phases of education, hands-on experiences are required throughout the course.

TCH-ED 400 Child Development

Intellectual and social development from birth through middle childhood and their implications for the educative process.

TCH-ED 402 Integrated Arts

Basic principles of creativity and their application in the multicultural teaching of art, creative dramatics, creative movement and musical rhythmic interpretation will be explored. An emphasis will be placed on the interrelationship of these disciplines and integration into the curriculum.

TCH-ED 403 Educational Psychology

This course will provide an introductory examination of psychological research and theory which have implications for, and applications to learning and instruction in interactive social contexts, such as classrooms.

TCH-ED 404 Education Of The Exceptional Child And Youth

Students will be introduced to identification and educational intervention strategies for educating exceptional children and adolescents in inclusive classroom situations. This course requires a 10-hour field experience. Fall, Winter, and Summer.

TCH-ED 404 Education Of The Exceptional Child And Youth

Students will be introduced to identification and educational intervention strategies for educating exceptional children and adolescents in inclusive classroom situations. This course requires a 10-hour field experience. Fall, Winter, and Summer.

TCH-ED 405 Practicum I

Taken in conjunction with elementary and middle school methods courses. Students are expected to spend 60 hours at classroom sites during the semester.

TCH-ED 406 Practicum II: Elementary

Taken in conjunction with elementary courses. Students are expected to spend 60 hours at classroom sites during the semester.

TCH-ED 407 Practicum III - Elementary

Taken in conjunction with the elementary courses. Students are expected to spend 60 hours at classroom sites during the semester.

TCH-ED 408WI Advanced Foundations

The course will concentrate on the development of a philosophical, historical and social model to assist in understanding the complexities, strengths and problems of present day education. Prerequisite: Admission to the Teacher Education program as an

undergraduate student Offered: Fall

TCH-ED 408WI Advanced Foundations

The course will concentrate on the development of a philosophical, historical and social model to assist in understanding the complexities, strengths and problems of present day education. Prerequisite: Admission to the Teacher Education program as an undergraduate student Offered: Fall

TCH-ED 409 Curriculum and Assessment

Curriculum and Assessment is the first of a three-part course sequence designed to assist the preservice teacher in acquiring the knowledge and skills to become an effective practitioner in a world of constant change. The preservice teacher in turn will become a professional educator and facilitator of learning by developing an understanding of the varied roles and relationships that are an integral part of the teaching/learning process. This course focuses on the meaning of curriculum, the role of standards in curriculum design and implementation, the role of assessment is used to effectively enhance instruction and student learning. Restrictions: You must be admitted to the Teacher Education program in Elementary or Middle School Education or the IUE to take this course.

TCH-ED 409 Curriculum and Assessment

Curriculum and Assessment is the first of a three-part course sequence designed to assist the preservice teacher in acquiring the knowledge and skills to become an effective practitioner in a world of constant change. The preservice teacher in turn will become a professional educator and facilitator of learning by developing an understanding of the varied roles and relationships that are an integral part of the teaching/learning process. This course focuses on the meaning of curriculum, the role of standards in curriculum design and implementation, the role of assessment is used to effectively enhance instruction and student learning. Restrictions: You must be admitted to the Teacher Education program in Elementary or Middle School Education or the IUE to take this course.

TCH-ED 412 Language Arts In The Elementary And Middle School

Provides instruction in planning, implementing and assessing language arts activities. Critical analysis in classroom settings is emphasized. Other issues discussed include: literature-based instruction, multicultural perspectives, special needs students and professional behaviors. Fall.

TCH-ED 412 Language Arts In The Elementary And Middle School

Provides instruction in planning, implementing and assessing language arts activities. Critical analysis in classroom settings is emphasized. Other issues discussed include: literature-based instruction, multicultural perspectives, special needs students and professional behaviors. Fall.

TCH-ED 413 Mathematics in the Elementary School

Mathematics-specific pedagogy. Methods, techniques, tools and materials for the effective teaching of mathematics. Emphasis on problem solving and reasoning skills in applying mathematics and on teaching in the context of diverse student backgrounds. Four contact hours per week include a two-hour laboratory. Fall.

TCH-ED 414 General Methods Elementary And Middle - 3

To summarize and synthesize the pre-service educational experience. To become knowledgeable about the realities of a school life in a "real" classroom. Winter.

TCH-ED 415 Reading 1: Intro to Literacy and Reading Instruction

This course introduces concepts about literacy processes; i.e., social, cultural, cognitive and linguistic foundations of reading and writing processes. The major focus of the course is on learning components of a comprehensive reading curriculum, and a range of instructional approaches and methods appropriate for learners at different stages of literacy development.

TCH-ED 416 Reading II: Assessing and Teaching Diverse Learners

This course focuses on understanding the major components of reading processes (phonemic awareness, word identification and phonics, vocabulary and background knowledge, fluency, comprehension strategies, and motivation) and how they are integrated in fluent reading for individual students at different stages of literacy development. The major project for the course involves assessing and teaching an individual student of the course of the semester. Teacher candidates should also assess and teach small groups of readers. Prerequisites: TCH-ED 415 Restrictions: Students admitted to teacher education program. Offered: Winter

TCH-ED 417 Science Methods In The Elementary School

The course prepares pre-service teachers to teach science from a constructivist, inquiry-oriented perspective.

TCH-ED 417 Science Methods In The Elementary School

The course prepares pre-service teachers to teach science from a constructivist, inquiry-oriented perspective.

TCH-ED 418 Social Studies Methods In The Elementary And Middle Schools

A critical analysis of current practices, teaching methods, materials and the relationship of the social sciences to social studies. Emphasis is on understanding cultural diversity and cultural influences on learning. The planning, implementation and evaluation of an interdisciplinary social studies unit of instruction, focusing on competencies and skills needed for the 21st Century. Fall.

TCH-ED 418 Social Studies Methods In The Elementary And Middle Schools

A critical analysis of current practices, teaching methods, materials and the relationship of the social sciences to social studies. Emphasis is on understanding cultural diversity and cultural influences on learning. The planning, implementation and evaluation of an interdisciplinary social studies unit of instruction, focusing on competencies and skills needed for the 21st Century. Fall.

TCH-ED 419 Student Teaching In Elementary School

Observation and student teaching under supervision in an elementary school. Elementary majors must enroll in 12.0 credit hours. Music education majors enroll in 3.0 or 7.0 hours; art education and foreign language education majors enroll in 7.0 hours. Prerequisite: Formal approval by faculty Offered: Winter

TCH-ED 419 Student Teaching In Elementary School

Observation and student teaching under supervision in an elementary school. Elementary majors must enroll in 12.0 credit hours. Music education majors enroll in 3.0 or 7.0 hours; art education and foreign language education majors enroll in 7.0 hours. Prerequisite: Formal approval by faculty Offered: Winter

TCH-ED 420 Adolescent Development

Various aspects of physiological, emotional, cognitive, social and moral development in adolescence will be considered. Attention is focused on a conception of adolescence that is grounded on current research and theory. Fall.

TCH-ED 420 Adolescent Development

Various aspects of physiological, emotional, cognitive, social and moral development in adolescence will be considered. Attention is focused on a conception of adolescence that is grounded on current research and theory. Fall.

TCH-ED 422 Practicum I

Development of observation, interview and analytic skills. Teaching experiences such as teacher aide and/or tutor will be included. Students will be expected to spend 60 hours at classroom sites during the semester.

TCH-ED 422 Practicum I

Development of observation, interview and analytic skills. Teaching experiences such as teacher aide and/or tutor will be included. Students will be expected to spend 60 hours at classroom sites during the semester.

TCH-ED 423 Practicum II

A continuation of Practicum I. Further development of observation, interview and analytic skills. Teaching experiences such as teacher aide and/or tutor will be Included. Students will be expected to spend 60 hours at classroom sites during the semester. Prerequisite: TE 422.

TCH-ED 423 Practicum II

A continuation of Practicum I. Further development of observation, interview and analytic skills. Teaching experiences such as teacher aide and/or tutor will be Included. Students will be expected to spend 60 hours at classroom sites during the semester. Prerequisite: TE 422.

TCH-ED 424 General Methods - Secondary 1

Basic principles of teaching at the secondary level. This course is to be based on significant research in the area and will encourage a reflective style of teaching. Winter.

TCH-ED 425 General Methods - Secondary 2

The intent of this course is to prepare pre-service teachers to be effective managers of instruction who are skillful in interpersonal communication. Course activities include opportunities for applying techniques based upon a variety of management/discipline models. Field experiences permit on-site observation of various management styles. Winter.

TCH-ED 427 Reading In The Secondary School

An examination of the reading process and study of methods and materials used by the secondary school classroom teacher in assessing student reading ability, determining the readability of content area materials and teaching students of all reading levels how to comprehend their textbooks and other printed instructional materials in various content area subjects. Winter.

TCH-ED 427 Reading In The Secondary School

An examination of the reading process and study of methods and materials used by the secondary school classroom teacher in

assessing student reading ability, determining the readability of content area materials and teaching students of all reading levels how to comprehend their textbooks and other printed instructional materials in various content area subjects. Winter.

TCH-ED 430 Gateway to Teaching

This course is designed to introduce pre-service teachers to the education profession and to the teacher education program at UMKC. Through lecture discussion and field experiences the students will examine the social, political, cultural and professional aspects of teaching in 21st century America. In addition, the students will be given an overview of the teacher preparation program and the requirements and expectations for completing the program and qualifying for a certificate to teach in the state of Missouri, Prerequisites: Admission to the Teacher Education program of consent of the instructor.

TCH-ED 431 Summer Community Experience

This field-based course provides an in-depth examination into both the evolution of urban communities and dynamics of community building in inner cities, with special emphasis on Kansas City, Missouri. In addition, theories of educational psychology as well as child and adolescent behavior will be infused to assist participants in developing age appropriate mentoring/teaching strategies and activities. Students in the course are engaged with the community through field trips, simulations, course events, and community service.

TCH-ED 432 Special Methods Of Teaching English to Middle School and High School Students

This course stresses the understanding, skills and information pertinent to teaching English/language arts in middle schools and junior and senior high schools. Fall.

TCH-ED 432 Special Methods Of Teaching English to Middle School and High School Students

This course stresses the understanding, skills and information pertinent to teaching English/language arts in middle schools and junior and senior high schools. Fall.

TCH-ED 433 Special Methods Of Teaching Middle and Secondary Mathematics

Provides students the opportunity to develop and present lessons in various high school mathematics topics. The emphasis is on modeling the concepts introduced and on using strategies that enable students to discover generalizations for themselves. Fall.

TCH-ED 435 Special Methods Of Teaching Middle and Secondary Science

Provides an opportunity for future science teachers to refine their skills as science educators and at the same time to reflect upon the ways and whys of teaching science. Offered: Fall

TCH-ED 435 Special Methods Of Teaching Middle and Secondary Science

Provides an opportunity for future science teachers to refine their skills as science educators and at the same time to reflect upon the ways and whys of teaching science. Offered: Fall

TCH-ED 436 Special Methods Of Teaching Social Studies to Middle/Secondary School Students

The primary goal of this course is to enable preservice social studies teachers to reflect critically on curriculum and pedagogy in secondary social studies. Students will be introduced to current practices and issues in secondary school social studies. Fall.

TCH-ED 436 Special Methods Of Teaching Social Studies to Middle/Secondary School Students

The primary goal of this course is to enable preservice social studies teachers to reflect critically on curriculum and pedagogy in secondary social studies. Students will be introduced to current practices and issues in secondary school social studies. Fall.

TCH-ED 437 Student Teaching In Secondary School

Observation and student teaching under supervision in a secondary school. Secondary majors not specifically listed here must enroll in 12.0 credit hours. Music education majors enroll in 3.0 or 7.0 hours; art education and foreign language education majors must enroll in 7.0 hours. Prerequisite: Formal approval by faculty Offered: Winter

TCH-ED 437 Student Teaching In Secondary School

Observation and student teaching under supervision in a secondary school. Secondary majors not specifically listed here must enroll in 12.0 credit hours. Music education majors enroll in 3.0 or 7.0 hours; art education and foreign language education majors must enroll in 7.0 hours. Prerequisite: Formal approval by faculty Offered: Winter

TCH-ED 438 Cultural Responsive Strategies for Working With Diverse Student Populations

This course is designed to move students from cultural awareness to the application of culturally responsive practice. Specifically, this course will heighten students' understanding of cultural characteristics and their relationships to teaching and learning. Prerequisite: Admission to Teacher Education Program.

TCH-ED 440 Introduction To Early Childhood Education

Introduction to the field of early childhood care and education, birth to age 8. Designed to familiarize future practitioners with the

unique characteristics of early childhood education and its practice.

TCH-ED 440 Introduction To Early Childhood Education

Introduction to the field of early childhood care and education, birth to age 8. Designed to familiarize future practitioners with the unique characteristics of early childhood education and its practice.

TCH-ED 441 Literacy Development I

An introduction to how language is acquired and how to facilitate oral language expression in early childhood classrooms.

TCH-ED 441 Literacy Development I

An introduction to how language is acquired and how to facilitate oral language expression in early childhood classrooms.

TCH-ED 442 Observation, Assessment & Screening In Early Childhood Classrooms

This course is designed to identify developmentally appropriate ways to measure and evaluate child growth and development.

TCH-ED 442 Observation, Assessment & Screening In Early Childhood Classrooms

This course is designed to identify developmentally appropriate ways to measure and evaluate child growth and development.

TCH-ED 444 Mathematics In Early Childhood And Elementary Schools

The course prepares teachers who can create a learning environment in which mathematical concepts are drawn from and modeled within the child's active investigation of his or her own surroundings and views of the world. The emphasis is upon mathematics as a sense-making tool through which observation, action, classification, ordering, seeking patterns and common features, and testing of ideas come together to organize experiences and solve problems in the immediate environment. Stress is placed on methods and materials to make mathematics learning active and hands-on. A variety of materials, physical models, and tools are studied in terms of the way they can be used to help children explore, develop and test ideas, construct meaning, and communicate ideas.

TCH-ED 445 Science In Early Childhood And Elementary Schools

Focus on ways of involving young children in science activities and experiences designed to promote curiosity, investigation and self-awareness as they explore their world.

TCH-ED 445 Science In Early Childhood And Elementary Schools

Focus on ways of involving young children in science activities and experiences designed to promote curiosity, investigation and self-awareness as they explore their world.

TCH-ED 447 Social Studies In Early Childhood & Elementary Schools

This course is designed to help students understand basic social studies concepts and pedagogy for young learners.

TCH-ED 447 Social Studies In Early Childhood & Elementary Schools

This course is designed to help students understand basic social studies concepts and pedagogy for young learners.

TCH-ED 450 Integrating The Curriculum In Early Childhood Education

A culminating curriculum course for early childhood students. The overall goal is to help students become more aware, skilled and informed about developmentally and educationally appropriate practice and curriculum for children during early childhood. Its focus is on constructing an integrated curriculum. A field-based experience is included.

TCH-ED 450 Integrating The Curriculum In Early Childhood Education

A culminating curriculum course for early childhood students. The overall goal is to help students become more aware, skilled and informed about developmentally and educationally appropriate practice and curriculum for children during early childhood. Its focus is on constructing an integrated curriculum. A field-based experience is included.

TCH-ED 451 Child Guidance Within The Classroom

Designed to help students examine and evaluate guidance techniques and teaching strategies used in classrooms for young children. Preventive measures in classroom management will be stressed.

TCH-ED 451 Child Guidance Within The Classroom

Designed to help students examine and evaluate guidance techniques and teaching strategies used in classrooms for young children. Preventive measures in classroom management will be stressed.

TCH-ED 452 Family And Program Relationships In Early Childhood Education

Provides insight into the challenge of parenting, knowledge about the development and implementation of parent education and support programs, and the significance of school-family relationships. In addition, this course seeks to facilitate students'

understanding of and sensitivity to parents' perspectives regarding the care and education of their young children. (Concurrent enrollment in TCH-ED 452, Learning from Parents, required).

TCH-ED 452 Family And Program Relationships In Early Childhood Education

Provides insight into the challenge of parenting, knowledge about the development and implementation of parent education and support programs, and the significance of school-family relationships. In addition, this course seeks to facilitate students' understanding of and sensitivity to parents' perspectives regarding the care and education of their young children. (Concurrent enrollment in TCH-ED 452, Learning from Parents, required).

TCH-ED 453 Learning From Parents

Designed to provide students with direct interactions with parents whose children are participating in early childhood programs, birth to age 8. Emphasis is placed upon students' understanding of, and sensitivity to, parents' perspectives regarding the care and education of their young children and recognition of parents as significant informants about their children. (Concurrent enrollment in TCH-ED 452, Family and Program Relationships, required).

TCH-ED 453 Learning From Parents

Designed to provide students with direct interactions with parents whose children are participating in early childhood programs, birth to age 8. Emphasis is placed upon students' understanding of, and sensitivity to, parents' perspectives regarding the care and education of their young children and recognition of parents as significant informants about their children. (Concurrent enrollment in TCH-ED 452, Family and Program Relationships, required).

TCH-ED 454 Human Relations In The Early Childhood Classroom

Students will analyze the connections between an effective helping relationship and effective teaching in the early childhood classroom. Effective interpersonal communication skills will be identified and practiced. The development of self-concept will be discussed.

TCH-ED 454 Human Relations In The Early Childhood Classroom

Students will analyze the connections between an effective helping relationship and effective teaching in the early childhood classroom. Effective interpersonal communication skills will be identified and practiced. The development of self-concept will be discussed.

TCH-ED 455 Student Teaching In Preschool

Observation and student teaching under supervision in a preschool setting.

TCH-ED 456 Student Teaching In Elementary, K Through 3

Observation and student teaching under supervision in an elementary school, grades K through 3.

TCH-ED 457 Infant And Toddler Care And Education

In this course, students will investigate infant and toddler care and education theories and practices. Students will learn about appropriate curriculum and teaching methods, visit infant and toddler programs, learn about state regulations and national standards for quality, and complete an environment rating scale.

TCH-ED 457 Infant And Toddler Care And Education

In this course, students will investigate infant and toddler care and education theories and practices. Students will learn about appropriate curriculum and teaching methods, visit infant and toddler programs, learn about state regulations and national standards for quality, and complete an environment rating scale.

TCH-ED 458 Practicum For Learning About Infants And Toddlers

The purpose of this course is to learn about child care and education practices in various centers. We will discuss how practices are influenced or constrained by human biology and developmental stages, as they are by ecological and environment pressures such as mothers' work roles. The central themes of the course can be summarized by the phrases ""purposeful care practices"" and the ""optimal practices for infants and toddlers.

TCH-ED 458 Practicum For Learning About Infants And Toddlers

The purpose of this course is to learn about child care and education practices in various centers. We will discuss how practices are influenced or constrained by human biology and developmental stages, as they are by ecological and environment pressures such as mothers' work roles. The central themes of the course can be summarized by the phrases ""purposeful care practices"" and the ""optimal practices for infants and toddlers.

TCH-ED 459 Early Childhood Program Management And Advocacy

Students will begin to explore basic early childhood program components. Different types of advocacy will be presented,

discussed, and implemented. Prerequisite: TCH-ED 440

TCH-ED 459 Early Childhood Program Management And Advocacy

Students will begin to explore basic early childhood program components. Different types of advocacy will be presented, discussed, and implemented. Prerequisite: TCH-ED 440

TCH-ED 460 Middle School Curriculum

This course offers the pre-service teachers an overview of middle school goals, basic principles, and organizations. The course explores interdisciplinary teaming, flexible scheduling, exploratory and advisory programs, and other aspects of the organization within the context of middle school goals and practices. Offered: Summer/Fall

TCH-ED 460 Middle School Curriculum

This course offers the pre-service teachers an overview of middle school goals, basic principles, and organizations. The course explores interdisciplinary teaming, flexible scheduling, exploratory and advisory programs, and other aspects of the organization within the context of middle school goals and practices. Offered: Summer/Fall

TCH-ED 461 Student Teaching In Middle School

Observation and student teaching under supervision in a middle school setting.

TCH-ED 461 Student Teaching In Middle School

Observation and student teaching under supervision in a middle school setting.

TCH-ED 462 Middle School Principles And Organization

This course offers the pre-service teachers an overview of middle school goals, basic principles, and organizations. The course explores interdisciplinary teaming flexible scheduling, exploratory and advisory programs, and other aspects of the organization within the context of middle school goals and practices Offered: Summer/Fall

TCH-ED 462 Middle School Principles And Organization

This course offers the pre-service teachers an overview of middle school goals, basic principles, and organizations. The course explores interdisciplinary teaming flexible scheduling, exploratory and advisory programs, and other aspects of the organization within the context of middle school goals and practices Offered: Summer/Fall

TCH-ED 464 Math Methods for Urban Teachers

Mathematics-specific pedagogy for urban teachers. Methods, techniques, tools and materials for the effective teaching of mathematics. Emphasis on problem solving and reasoning skills in applying mathematics and on teaching in the context of diverse student backgrounds. Portions of this course will occur in urban school classrooms. Students will apply learning to urban classrooms. Prerequisite: Must be admitted to the Institute for Urban Education.

TCH-ED 465 Urban Education VI: Teaching Diverse Students

This interactive course will investigate and examine the principals of teaching diverse students and factors influencing effectiveness of instruction, including empowering African American males, teaching student from diverse populations and working with students with special needs. Some of the class sessions will be taught electronically and work will be submitted electronically. Prerequisite: Must be admitted to the Institute of Urban Education.

TCH-ED 466 Field Experience: Diverse Learners

Students will spend a minimum of 90 hours in an urban school classroom. Students will have the opportunity to apply learning and lessons designed in the semester's pedagogical courses, particularly Best Practices for Teaching Math, Science, and strategies for working with diverse learners. Students will work with their seminar leader, having the opportunity to be observed and conference about their teaching. To be taken concurrently with TE 465 Prerequisite: Must be admitted to the Institute for Urban Education.

TCH-ED 470 Philosophy And History Of Science And Technology

This course uses an historical survey to introduce the main philosophical interpretations of the nature and structure of both science and technology. Core concepts such as prediction, explanation, progress, truth, and utility will be examined in light of various philosophical perspectives. Following this, case study methodology will be used to examine interactions among science, technology, and society. Although the major focus will be upon modern Western culture, some attention will be paid to earlier and non-Western cultures. Case studies to be examined include: under the topic of Risk: Perception and Estimation, nuclear power and pesticides; the impact of high technology upon medicine; and the estimated cost/benefit of computer-mediated communications, for example, the Internet. Offered: Fall Semester.

TCH-ED 470 Philosophy And History Of Science And Technology

This course uses an historical survey to introduce the main philosophical interpretations of the nature and structure of both

science and technology. Core concepts such as prediction, explanation, progress, truth, and utility will be examined in light of various philosophical perspectives. Following this, case study methodology will be used to examine interactions among science, technology, and society. Although the major focus will be upon modern Western culture, some attention will be paid to earlier and non-Western cultures. Case studies to be examined include: under the topic of Risk: Perception and Estimation, nuclear power and pesticides; the impact of high technology upon medicine; and the estimated cost/benefit of computer-mediated communications, for example, the Internet. Offered: Fall Semester.

TCH-ED 475 Working with Families and Communities

This course provides an in-depth examination of research and theory relative to children, family, and community which have implications for and application to learning and instruction. Emphasis will be placed on the exploration and critical examination of and insights into the challenge of parenting, knowledge about the development and support programs, and the significance of school-family relationships. In addition, this course seeks to facilitate students' understanding of and sensitivity to families' perspectives regarding the care and education of their children and adolescents. The course is for students in the elementary education program and Institute for Urban Education. This course is offered fall semester only. Prerequisites: must be admitted to Teacher Education or IUE.

TCH-ED 480 Practicum I Early Childhood

Early Childhood students will participate in observation, assessment, and screening activities as they explore the complex nature of primary school settings. This course is taken in conjunction with TCH-ED 442. Students will be expected to spend 60 hours at classroom sites during the semester.

TCH-ED 480 Practicum I Early Childhood

Early Childhood students will participate in observation, assessment, and screening activities as they explore the complex nature of primary school settings. This course is taken in conjunction with TCH-ED 442. Students will be expected to spend 60 hours at classroom sites during the semester.

TCH-ED 481 Practicum II Early Childhood

Early Childhood students will participate in classroom management and guidance practices as they explore the complex nature of pre-kindergarten settings. This course is taken in conjunction with TCH-ED 451. Students will be expected to spend 60 hours at classroom sites during the semester. Prerequisite: TCH-ED 480 Restrictions: Students must be admitted to teacher education program

TCH-ED 481 Practicum II Early Childhood

Early Childhood students will participate in classroom management and guidance practices as they explore the complex nature of pre-kindergarten settings. This course is taken in conjunction with TCH-ED 451. Students will be expected to spend 60 hours at classroom sites during the semester. Prerequisite: TCH-ED 480 Restrictions: Students must be admitted to teacher education program

TCH-ED 485 Language Arts in the Early Childhood Classroom

This course provides instruction in planning, implementing, and assessing early childhood (birth through third-grade) language arts activities. Critical analysis in classroom settings is emphasized. Other issues discussed include: literature-based instruction, multicultural perspectives, special needs students and professional behaviors.

TCH-ED 492 Integrated Instruction: Language Arts and Social Studies

This course will focus on teaching Language Arts and Social Studies in the Urban Elementary School. Methods, techniques, tools and materials for the effective teaching will be observed and practiced. Students will work closely with in-service teachers and their university instructor. There will be emphasis on balanced literacy, readers' and writers' workshops, literacy development, assessment techniques and the integration of social studies and language arts. Curriculum mapping and unit planning will be introduced and practiced in this course. This course will focus on school and classroom organization and management, detailed lesson planning, use of instructional materials and media in the teaching of language arts and social studies. Prerequisite: Must be admitted to the Institute of Urban Education.

TCH-ED 493 Mathematics Capstone

This seminar will develop academic excellence, inquiry and reflective problem solving, and skills to create caring and safe environments. It is designed to complement the student teaching experience through discussing and analyzing school and school-based issues. It is intended to help further development of reflective, critical, and analytical approaches to pedagogical decision making through supportive collaboration. Students are asked to use knowledge of child/adolescent development, learning, classroom dynamics, society, history, culture, and subject area to analyze classroom situations, and develop and defend alternatives to observed teaching practices and problems. Prerequisites: TE 433 and concurrent enrollment in Student Teaching.

TCH-ED 494 Language Arts Capstone

Designed for students in their last professional semester of the TE program, and are in a full-time student teaching placement.

The course will serve as a culminating experience of the major concepts from the previous three semesters. Topics covered include: school of law, classroom management, working with special needs students, building critical thinking activities into the curriculum, planning and implementing authentic assessments, and examining the obligations, challenges, and realities of the teaching profession. Prerequisite: TE 432 and concurrent enrollment in student teaching.

TCH-ED 495 Science Capstone

This course is a continuation of science teaching methods to prepare prospective middle and high school science teachers with the necessary background knowledge and laboratory skills to become effective professional science teachers. This course is pragmatic in nature to assist you during student teaching and will stress application of inquiry instruction, science assessment, data analysis, and analysis of learning. The blended and online synchronous format allows maximum contact time in a classroom setting. Topics include science safety, classroom management, behavior management, homework, and NSTA position statements, working with students with disabilities, and professionalism in science education. The objectives will be addressed in a seminar setting within the context of student teaching. Application of materials developed during science methods and subsequent preparation the Teacher Work Sample are a major emphasis area. Prerequisites: TE 435 and concurrent student teaching.

TCH-ED 496 Social Studies Capstone

This seminar is designed to complement the student teaching experience through the discussion and analysis of school-based issues. It is intended to help you further develop a reflective, critical and analytical approach to pedagogical decision making through supportive collaboration. You will be asked to use your knowledge of child/adolescent development, learning, classroom dynamics, society, history, culture and your subject area to analyze classroom situations, as well as to defend alternatives to observed teaching practices and problems. Prerequisites: TE 436 and concurrent enrollment in Student Teaching.

TCH-ED 497 Introduction to Teaching Internship

The teaching of this course will occur at urban elementary school sites. The focus will be on basic curriculum development, developing and understanding of teaching/learning styles and varied instructional methodologies. The utilization of technology as an instructional aid, the purpose and creation of varied assessments, for instructional use will be addressed. Continued emphasis will be placed on reflective thinking through class discussion, modeling activities and written assignments. Students will prepare units of study and long range plans for their student teaching internship. Students will have opportunities to apply their learning to urban classrooms. Students will spend a minimum of 300 hours in their teaching internship classroom. Prerequisite: Must be admitted to the Institute for Urban Education.

TCH-ED 498 Urban Education Seminar VII

This seminar meets weekly for 2 hours and is led by a clinical professor who serves as a mentor for the students throughout their program. Students will work closely with mentor teachers in the application and integration of social justice and the elementary school curriculum. A critical analysis of current practices, teaching methods, materials and how social justice manifests in curriculum and instruction. Emphasis is on understanding cultural diversity and cultural influences on learning. Concepts of a classroom community, parental relations and democratic classroom processes will be addressed. Students will have opportunities to apply their learning to urban classrooms. Prerequisite: Must be admitted to the Institute for Urban Education.

TCH-ED 499 Capstone

This seminar is designed to complement the student teaching experience through the discussion and analysis of school-based issues. It is intended to help further develop a reflective, critical and analytical approach to pedagogical decision making through supportive collaboration.

School of Nursing

School of Nursing Undergraduate Courses

Nursing (NURSE)

NURSE 101 Introduction To Nursing

This introductory two-hour course is designed to facilitate role socialization into professional nursing. Beginning with a brief historical overview of professional nursing, nursing is defined and the philosophical and practice standards of the profession are discussed. The student explores nursing's image and power bases in relationship to professional accountabilities and roles. The value and tenets of evidence-based care are emphasized and integrated with use of nursing process in professional, reflective decision-making. A review of educational paths in professional nursing leads the student into a comprehensive survey of the multiple roles, responsibilities, and requisite skills of the professional nurse today and in the future. Prerequisites: None

NURSE 120 Anatomy & Physiology I

This course examines the structure and function of the human body from the molecular to the organismal level as they interact among all body systems across the life span. Instructors also attempt to correlate course materials with the clinical aspects of the application of physiological knowledge. Co-requisite laboratory exercises provide practical application of theoretical concepts. In this first term of two-term course, molecular biology, biochemistry, cellular biology, and histology are studied as well as the integumentary, musculoskeletal, and nervous systems. Restrictions: Pre-nursing or Health Sciences students Offered: Fall

NURSE 120 Anatomy & Physiology I

This course examines the structure and function of the human body from the molecular to the organismal level as they interact among all body systems across the life span. Instructors also attempt to correlate course materials with the clinical aspects of the application of physiological knowledge. Co-requisite laboratory exercises provide practical application of theoretical concepts. In this first term of two-term course, molecular biology, biochemistry, cellular biology, and histology are studied as well as the integumentary, musculoskeletal, and nervous systems. Restrictions: Pre-nursing or Health Sciences students Offered: Fall

NURSE 120 Anatomy & Physiology I

This course examines the structure and function of the human body from the molecular to the organismal level as they interact among all body systems across the life span. Instructors also attempt to correlate course materials with the clinical aspects of the application of physiological knowledge. Co-requisite laboratory exercises provide practical application of theoretical concepts. In this first term of two-term course, molecular biology, biochemistry, cellular biology, and histology are studied as well as the integumentary, musculoskeletal, and nervous systems. Restrictions: Pre-nursing or Health Sciences students Offered: Fall

NURSE 125 Medical Terminology

This course is designed to introduce the student to medical terminology. The major foci of this course are to acquaint the student in how medical terms are formed; how medical terms are applied to organs, body systems and pathological conditions; how common medical abbreviations are used; and how medical terminology is integrated into the medical record. Prerequisite: None Restrictions: None Offered: Fall/Winter

NURSE 127 Drug Calculations

The drug calculation course is designed to introduce the student to methods of drug dosage calculation needed for medication administration in the health care setting. This course will review basic mathematical concepts, introduce medication specific terminology, discuss interpretation of medication orders, identify key elements of the medication label and enable the student to calculate appropriate and accurate drug dosages. Prerequisite: None Restrictions: None Offered: Fall/Spring

NURSE 132A Introduction To Holistic Health Care: Medicinal Plants and Herbs

This course provides a hands-on introduction to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non-traditional cultural oriented healing modalities. Relevant to all health care providers and health care consumers, the content will cover medicinal plants and herbs and related topics.

NURSE 132A Introduction To Holistic Health Care: Medicinal Plants and Herbs

This course provides a hands-on introduction to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non-traditional cultural oriented healing modalities. Relevant to all health care providers and health care consumers, the content will cover medicinal plants and herbs and related topics.

NURSE 132B Introduction To Holistic Health Care: Energy Medicine

This course provides a hands-on introduction to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non-traditional cultural oriented healing modalities. Relevant to all health care providers and health care consumers, the content will include Energy Medicine and related topics.

NURSE 132B Introduction To Holistic Health Care: Energy Medicine

This course provides a hands-on introduction to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non-traditional cultural oriented healing modalities. Relevant to all health care providers and health care consumers, the content will include Energy Medicine and related topics.

NURSE 132C Introduction To Holistic Health Care: Relaxation Techniques

This course provides a hands-on introduction to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non-traditional cultural oriented healing modalities. Relevant to all health care providers and health care consumers, the content will include Relaxation Techniques and related topics.

NURSE 132C Introduction To Holistic Health Care: Relaxation Techniques

This course provides a hands-on introduction to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non-traditional cultural oriented healing modalities. Relevant to all health care providers and

health care consumers, the content will include Relaxation Techniques and related topics.

NURSE 132D Introduction to Holistic Health Care: Chinese Medicine and Hypnosis

This course provides a hands-on introduction to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non-traditional cultural oriented healing modalities. Relevant to all health care providers and health care consumers, the content will include Chinese Medicine, Hypnosis and other related topics.

NURSE 132D Introduction to Holistic Health Care: Chinese Medicine and Hypnosis

This course provides a hands-on introduction to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non-traditional cultural oriented healing modalities. Relevant to all health care providers and health care consumers, the content will include Chinese Medicine, Hypnosis and other related topics.

NURSE 134A Intro To The History Of Healthcare-Trends/Issues Impacting Healthcare & Healthcare Professions

This course is designed to introduce the rich and unique development of some of the major American healthcare fields as disciplines, professions, arts, and sciences from a historical perspective. Past healthcare trends, the societal importance of helping, and the history of nursing education will be identified and discussed. The social, philosophical, cultural, and political forces which have impacted the course of these topics will be examined from ancient to modern times. Offered: Spring

NURSE 134A Intro To The History Of Healthcare-Trends/Issues Impacting Healthcare & Healthcare Professions

This course is designed to introduce the rich and unique development of some of the major American healthcare fields as disciplines, professions, arts, and sciences from a historical perspective. Past healthcare trends, the societal importance of helping, and the history of nursing education will be identified and discussed. The social, philosophical, cultural, and political forces which have impacted the course of these topics will be examined from ancient to modern times. Offered: Spring

NURSE 134B Intro to Hist of Healthcare-Trends/Issues in Public Health, Medicine, and Physical Therapy

This course is designed to introduce the rich and unique development of the major American healthcare fields as disciplines, professions, arts, and sciences from a historical perspective. Trends and issues in public health, medicine, and physical therapy will be identified and discussed. The social, philosophical, cultural, and political forces which have impacted the course of these topics will be examined from ancient to modern times. Offered: Spring

NURSE 134B Intro to Hist of Healthcare-Trends/Issues in Public Health, Medicine, and Physical Therapy

This course is designed to introduce the rich and unique development of the major American healthcare fields as disciplines, professions, arts, and sciences from a historical perspective. Trends and issues in public health, medicine, and physical therapy will be identified and discussed. The social, philosophical, cultural, and political forces which have impacted the course of these topics will be examined from ancient to modern times. Offered: Spring

NURSE 134C Intro to the Hist of Healthcare-Trends/Issues in Nurs, Dentistry, and Pharmacy Organizations

This course is designed to introduce the rich and unique development of the major American healthcare fields as disciplines, professions, arts, and sciences from a historical perspective. Past trends and issues in nursing, dentistry, and pharmacy organizations will be identified and discussed. The social, philosophical, and political forces which have impacted the course of these topics will be examined from ancient to modern times. Offered: Spring

NURSE 134C Intro to the Hist of Healthcare-Trends/Issues in Nurs, Dentistry, and Pharmacy Organizations

This course is designed to introduce the rich and unique development of the major American healthcare fields as disciplines, professions, arts, and sciences from a historical perspective. Past trends and issues in nursing, dentistry, and pharmacy organizations will be identified and discussed. The social, philosophical, and political forces which have impacted the course of these topics will be examined from ancient to modern times. Offered: Spring

NURSE 134D Intro to Hist of Healthcare-Past Trends/Issues Soc Wrk, Future Pub Hlth, and Hist Effcts Cult Div

This course is designed to give an introductory examination of the rich and unique development of the major American healthcare field as disciplines, professions, arts, and sciences from a historical perspective. Past trends and issues in social work, the future of public health, and the historical effects of cultural diversity will be identified and discussed. The social, philosophical, cultural, and political forces which have impacted the course of these topics will be examined from ancient to modern times. Offered: Spring

NURSE 160 Anatomy And Physiology II

This course is a continuation of NURSE 120. CO-requisite laboratory exercises provide practical application of theoretical concepts. Physiologic systems including endocrine, cardiovascular, immune, respiratory, digestive, renal, and reproductive are studied as well as embryology and genetics. Prerequisite: Nurse 120 or HLSC 120

NURSE 160 Anatomy And Physiology II

This course is a continuation of NURSE 120. CO-requisite laboratory exercises provide practical application of theoretical concepts. Physiologic systems including endocrine, cardiovascular, immune, respiratory, digestive, renal, and reproductive are studied as well as embryology and genetics. Prerequisite: Nurse 120 or HLSC 120

NURSE 220 Fundamental Concepts & Skills

This course focuses on fundamental concepts, skills, and techniques that provide a foundation for clinical practice. The beginning student will identify factors that may influence the human system and applies the nursing process in health care setting using basic nursing interventions. This six credit hour course consists of four credit hours of didactic/discussion and two hours of clinical laboratory/lab. Prerequisite: Acceptance into Clinical Nursing Program.

NURSE 230 Health Issues In Aging

This course focuses on promotion and maintenance of the health of the older adult population. The physiological and psychological domains, socio-cultural influences, legal and ethical issues, and health care resources pertaining to older adults will be explored. Assessments, problems and strengths, interventions, and outcomes specific to the older adult population are discussed. Opportunities are provided for interaction with the older population. Prerequisite: Admission into the BSN of BHS Program Offered: Fall

NURSE 230 Health Issues In Aging

This course focuses on promotion and maintenance of the health of the older adult population. The physiological and psychological domains, socio-cultural influences, legal and ethical issues, and health care resources pertaining to older adults will be explored. Assessments, problems and strengths, interventions, and outcomes specific to the older adult population are discussed. Opportunities are provided for interaction with the older population. Prerequisite: Admission into the BSN of BHS Program Offered: Fall

The physiological and psychological domains, socio-cultural influences, legal and ethical issues, and health care resources pertaining to older adults will be explored. Assessments, problems and strengths, interventions, and outcomes specific to the older adult population are discussed. Opportunities are provided for interaction with the older population. Prerequisite: Admission into the BSN of BHS Program Offered: Fall

NURSE 250 Health Assessment For Nursing Practice

This course is designed to provide a systematic approach to the physiological, psychological sociocultural, and developmental assessment of individuals emphasizing findings considered to be within normal limits. The health history is emphasized as a tool for assessing mental and physical status. This course is designed for the pre-licensure student. This course consists of three hours of supervised practice per week. Prerequisites: Admitted into BSN program or consent of the instructor.

NURSE 252 Human Growth And Development

This course provides a basic introduction to the theory for human growth and development across the lifespan. Emphasis is placed upon the biological and the psychosocial aspects of growth and development. Content is organized in a modified chronological order dividing information into major stages of growth and development across the lifespan. Prerequisite: None Restrictions: None Offered: Spring

NURSE 256 Pharmacology

This is a course in pharmacology that builds on prior knowledge of anatomy, physiology, chemistry, microbiology and pathophysiology. The major focus of the course is the basic and clinical concepts of pharmacology in evidence-based care. This course covers drug knowledge in the areas of pharmacotherapeutics, pharmacodynamics, pharmacokinetics, adverse reactions and contraindications, therapeutics indications and nursing implications. Prerequisites: Nursing 127, 220, 230, 250, 395. Offered: Spring

NURSE 262 Management Of Adult Health I

This medical-surgical course focuses on utilization of the nursing process to the specific illnesses of the adult client in the acute care setting. High volume disease processes with associated nursing care are emphasized. The effects on the individual as a holistic system are explored. Skills are developed in caring for persons with biological, psychological and social system alterations to facilitate optimal client outcomes. This five credit hours course consists of three hours of didactic/discussion and

two hours clinical/ lab (120 hours). Prerequisites: Nursing 120, 220, 230, 250, 395. Corequisite: Nursing 256

NURSE 342 Legal & Ethical Issues

This course is designed to investigate medical-legal issues and explore the implications that legal intervention and interpretation as well as litigation have on the scope of nursing practice and the delivery of patient care. Ethical standards of nursing practice and diverse individual and group values are explored, and various ethical systems, concepts and principles used in ethical decision making are introduced. Prerequisites: Admission to the Nursing Major or BSN Completion Program Offered: Fall

NURSE 342 Legal & Ethical Issues

This course is designed to investigate medical-legal issues and explore the implications that legal intervention and interpretation as well as litigation have on the scope of nursing practice and the delivery of patient care. Ethical standards of nursing practice and diverse individual and group values are explored, and various ethical systems, concepts and principles used in ethical decision making are introduced. Prerequisites: Admission to the Nursing Major or BSN Completion Program Offered: Fall

NURSE 345 Quantitative Analysis In The Health Sciences

This course focuses upon the skills required for the utilization of scientific findings in evidence-based care. The conceptual basis of descriptive and the inferential statistics found in the properties of the normal distribution, comprise the core of these skills. Using the normal distribution as a structure for understanding descriptive and inferential procedures, the course presents information necessary to the selection, computation and interpretation of basic statistics relevant to evidence based-care in the health sciences. Discussions of variables, measurement and tabular and graphic presentation of data precede the development of computation skills.

Discussions of variables, measurement and tabular and graphic presentation of data precede the development of computation skills.

NURSE 346 Women's Health in the Community

This two credit hour elective course (three credit hours with instructor consent) will introduce students to the social and personal health concerns of women. The web-based course will examine health issues which women encounter across the lifespan. Each issue will be examined from a traditional and a woman-centered perspective. Emphasis will be placed on caring for women within a holistic framework and recognizing how ethnocultural background, socioeconomic status, age, gender, and gender roles can affect their lives and their health status. Students will integrate biopsychosocial concepts of wellness, health risk identification, and health promotion. Prerequisites: Minimum sophomore standing. Semester Offered: Various.

NURSE 346 Women's Health in the Community

The web-based course will examine health issues which women encounter across the lifespan. Each issue will be examined from a traditional and a woman-centered perspective. Emphasis will be placed on caring for women within a holistic framework and recognizing how ethnocultural background, socioeconomic status, age, gender, and gender roles can affect their lives and their health status. Students will integrate biopsychosocial concepts of wellness, health risk identification, and health promotion. Prerequisites: Minimum sophomore standing. Semester Offered: Various.

NURSE 356 Spanish for Health Care Pre-Professionals

This course will focus on conversational Spanish, medical terminology in Spanish and written/read Spanish. This course will provide the student with basic knowledge that will allow basic communication with patients who speak/read/write Spanish. This is a fast paced course and will require practice of the language outside of the classroom in order to master the material presented. Prerequisite: Permission of Instructor Offered: All Semesters

NURSE 359 Introduction To International Health Care

This course is designed to introduce students to the health care issues found in other countries with a focus on low-and middle-income countries. Students will study philosophical, system and cultural aspects of health care and will be expected to compare health care in the United States with other nations. Core concepts include-globalization; health care reform; organization and management of health systems; community, public and primary health care; humanitarian assistance and refugee health; international nutrition; vaccine development and policy; disease prevention and control; and social and behavioral interventions. This course can be taken for 1-3 hours of credit: One Credit Hour- Students do not take the course (if not offered or cancelled), but participate in the summer study-abroad trip and other activities as determined by the coordinating faculty; Two Credit Hours - Students complete the course as defined in the syllabus but do not participate in the study-abroad trip; Three Credit Hours - Students complete the course and participate in the study-abroad trip and other activities as determined by the coordinating

faculty. Prerequisites: At least second year student in the UMKC School of Nursing or permission of instructor. Offered: Spring

NURSE 360 Management Of Mental Health

This course is designed to introduce the student to psychiatric mental health nursing through the study of sound psychiatric nursing theory, therapeutic and clinical applications across the treatment continuum and the lifespan. This course will focus on the dynamics of the nursing process framework, the establishment and maintenance of a therapeutic nurse-client relationship and the dignity of each person. Emphasis will be placed on assessment, therapeutic communication, neurobiological theory, pharmacology and the individual as a whole person. Nursing interventions will focus on all aspects of client care, communication, client/family teaching, and community resources and their practical application in a variety of clinical settings. Content will be arranged around the major categories identified in the DSM-IV-TR and current social and emotional concerns including mental health settings, e.g. grief and loss, anger and aggression, abuse and violence. This four credit hour course consists of two hours of didactic/discussion and two hours of clinical/lab. Prerequisites: NURSE 342, 344, 366.

NURSE 360 Management Of Mental Health

This four credit hour course consists of two hours of didactic/discussion and two hours of clinical/lab. Prerequisites: NURSE 342, 344, 366.

NURSE 362 Management Of Adult Health II

This medical-surgical course focuses on application of the nursing process to the delivery and the management of adult clients across the care continuum. This course builds on Adult Health I content to include high risk disease processes with associated nursing care. Emphasis is placed on the interaction between the client, family, nursing and the environment to result in optimal client outcomes. This five hour credit course consists of three hours of didactic/ discussion and two hours of clinical lab. Prerequisites: NURSE 342, NURSE 364, NURSE 366

NURSE 362 Management Of Adult Health II

This medical-surgical course focuses on application of the nursing process to the delivery and the management of adult clients across the care continuum. This course builds on Adult Health I content to include high risk disease processes with associated nursing care. Emphasis is placed on the interaction between the client, family, nursing and the environment to result in optimal client outcomes. This five hour credit course consists of three hours of didactic/ discussion and two hours of clinical lab. Prerequisites: NURSE 342, NURSE 364, NURSE 366

NURSE 364 Management Of Maternal & Family Health

This course focuses on the application of the nursing process in the adaptation of the childbearing family. Emphasis is placed on adaptation during pregnancy, labor, birth and postpartum period. Key concepts to be addressed include maternal, fetal, neonatal and family adaptation throughout the maternity cycle, common alterations during the cycle and culturally sensitive, family-centered nursing care. Maternal, fetal and neonatal physiology, pathophysiology and pharmacology will be addressed. Two credit hours didactic and two credit hours for clinical practice (120 clinical hours) are required. Prerequisites: NURSE 256 and NURSE 262

NURSE 395 Pathophysiology

This course will focus on alterations in biologic processes that affect the body's internal homeostasis. A conceptual approach will be used to emphasize general principles of pathophysiology. The etiology, pathogenesis, clinical manifestations, and sequelae of various alterations of human structure and function will be examined. Knowledge from the basic and clinical sciences will be integrated. Prerequisites: Admission to the Nursing major or special permission from instructor.

NURSE 398 Clinical Applications Of Pathophysiology

This nursing elective is designed to guide students through self-directed and in-depth analysis of selected diagnoses that are common to clinical practice and represent major concepts of pathophysiology, evaluation, and management that can be applied to many other illnesses. With faculty guidance, students will work in small groups to comprehensively review and analyze a selected clinical case for presentation and discussion with peers. One case from each of the following major body systems will be presented by student groups: cardiovascular pulmonary, cancer, endocrine, hematologic, immunologic, digestive, neurological, musculoskeletal, and genitourinary. Students are expected to attend and actively participate in all of the case presentations through completion of assigned readings, preparatory review of current literature, active listening, and comprehensive peer evaluation. Students will present and facilitate discussion within the large group of selected current literature following each case

presentation. Prerequisite: 200 level Nursing courses; NURSE 395 Pathophysiology Offered: Varies

NURSE 401 Health Assessment For Clinical Practice

This course is designed to provide a systematic approach to the physiological, psychological, socio-cultural and developmental assessment of individuals emphasizing findings considered to be within normal limits. The health history is emphasized as a tool for assessing mental and physical status. This course is designed for students with previous health care education, including knowledge of biochemical functions of systems and concepts of normal. This course consists of guided self-study and on-site clinical practicum. Prerequisites : Admitted into RN-BSN program or permission of instructor. Offered: Fall/Spring

NURSE 403A Comparative Weight Loss I

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Specific topics that will be addressed include risks of overweight/obesity; common psychological issues for the overweight/obese; societal perceptions and barriers for overweight/obese individuals. This course consists of one hour of didactic work with one module per week for four weeks.

NURSE 403B Comparative Weight Loss II

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Comparison of common medically recommended diets and diet programs and their efficacy/risks; exercise requirements for weight loss and weight maintenance. This course consists of one hour of didactic education with one module per week for four weeks.

NURSE 403C Comparative Weight Loss 3

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Comparison of pharmacologic weight loss options and their efficacy/risks; non-prescription medications/nutraceuticals for weight loss and their efficacy/risks; and bariatric surgeries and efficacy/risks. This course consists of one hour of didactic work with one module per week for four weeks.

NURSE 430A Experience Of Health In Aging: Physiological & Cognitive Aspects

This one-credit hour course is designed for students interested in understanding the role of health in the aging population. The 430A course will focus primarily on physiologic and cognitive functioning of the older adult. Theoretical, empirical and applied knowledge of the aging process is presented. This knowledge is utilized in assessing and interpreting the physiological and psychological influences on health. This knowledge may also be used in developing strategies for the promotion, restoration, and maintenance of health in the aging population. Offered: Winter

NURSE 430A Experience Of Health In Aging: Physiological & Cognitive Aspects

This one-credit hour course is designed for students interested in understanding the role of health in the aging population. The 430A course will focus primarily on physiologic and cognitive functioning of the older adult. Theoretical, empirical and applied knowledge of the aging process is presented. This knowledge is utilized in assessing and interpreting the physiological and psychological influences on health. This knowledge may also be used in developing strategies for the promotion, restoration, and maintenance of health in the aging population. Offered: Winter

NURSE 430B The Experience Of Health In Aging: Relationships & The Environment

This one-credit hour course is designed for students interested in understanding the role of health, relationships in the aging population. The N430B course will focus primarily on loss/grief and relationships environment and as these relate to the older adult. Theoretical, empirical and applied knowledge of the aging process is presented. This knowledge is utilized in assessing and interpreting the influences of relationships, intimacy, loss, grief, and dying on health. This knowledge may also be used in developing strategies for the promotion, restoration, and maintenance of health in the aging population. Offered: Winter

NURSE 430C The Experience Hlth In Aging:Community,Systems & Service Delivery

This one-credit hour course is designed for students interested in understanding the role of health, community, systems and service delivery in the aging population. Selected special issues (such as fluid and continence, medication use, pain and comfort, bone/joint problems) will also be discussed. The N430C course will focus primarily on community, health systems and service delivery as these relate to the older adult. Theoretical, empirical and applied knowledge on aging and the health system and delivery process is presented. This knowledge is utilized in assessing and interpreting the influences of the community and health care delivery systems on health. This knowledge may also be used in developing strategies for the promotion, restoration, and maintenance of health in the aging population.

NURSE 430C The Experience Hlth In Aging:Community,Systems & Service Delivery

This one-credit hour course is designed for students interested in understanding the role of health, community, systems and service delivery in the aging population. Selected special issues (such as fluid and continence, medication use, pain and comfort,

bone/joint problems) will also be discussed. The N430C course will focus primarily on community, health systems and service delivery as these relate to the older adult. Theoretical, empirical and applied knowledge on aging and the health system and delivery process is presented. This knowledge is utilized in assessing and interpreting the influences of the community and health care delivery systems on health. This knowledge may also be used in developing strategies for the promotion, restoration, and maintenance of health in the aging population.

NURSE 432A Holistic Health Care: Medicinal Plants & Herbs

This course provides an in-depth exploration to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non-traditional cultural oriented healing modalities. Relevant to all health care providers and health care consumers, the content will cover medicinal plants and herbs and related topics. Prerequisite: None Offered: Fall

NURSE 432A Holistic Health Care: Medicinal Plants & Herbs

This course provides an in-depth exploration to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non-traditional cultural oriented healing modalities. Relevant to all health care providers and health care consumers, the content will cover medicinal plants and herbs and related topics. Prerequisite: None Offered: Fall

NURSE 432B Holistic Health Care: Energy Medicine

This course provides an in-depth exploration to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non-traditional cultural oriented healing modalities. Relevant to all health care providers and health care consumers, the content will include Energy Medicine and related topics.

NURSE 432B Holistic Health Care: Energy Medicine

This course provides an in-depth exploration to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non-traditional cultural oriented healing modalities. Relevant to all health care providers and health care consumers, the content will include Energy Medicine and related topics.

NURSE 432C Holistic Health Care: Relaxation Techniques

This course provides an in-depth exploration to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non-traditional cultural oriented healing modalities. Relevant to all health care providers and health care consumers, the content will include Relaxation Techniques and related topics. Prerequisite: None Offered: Fall

NURSE 432C Holistic Health Care: Relaxation Techniques

This course provides an in-depth exploration to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non-traditional cultural oriented healing modalities. Relevant to all health care providers and health care consumers, the content will include Relaxation Techniques and related topics. Prerequisite: None Offered: Fall

NURSE 432D Holistic Health Care: Chinese Medicine and Hypnosis

This course provides an in depth exploration to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non traditional cultural oriented healing modalities. Relevant to all health care providers and health care consumers, the content will include Chinese Medicine, Hypnosis and other related topics.

NURSE 432D Holistic Health Care: Chinese Medicine and Hypnosis

This course provides an in depth exploration to the practice of Holistic Health Care which promotes and preserves the health of clients by integrating traditional and non traditional cultural oriented healing modalities. Relevant to all health care providers and health care consumers, the content will include Chinese Medicine, Hypnosis and other related topics.

NURSE 433 Parish Nurse Health Ministry Basic Preparation Course

This course introduces students to the practice of Parish Nurse Health Ministry which promotes and preserves the health of clients in community faith-based settings. Content will include the role of the congregation in health, healing, and wholeness; the theology of health, healing and wholeness, history and philosophy of Parish Nursing, ethics of Parish Nursing; self care for Parish Nurses; assessment of individuals, families, and congregations; accountability and documentation, roles of the Parish Nurse-Integrator of faith and health, Personal Health Counselor, Health Educator, Referral Agent, Coordinator of Volunteers, Developer of Support Groups, and Health Advocate initiating a Parish Nurse Program; functioning with a ministerial team; health promotion and maintenance programs; and loss. 32 classroom hours; 13 independent library hrs. Prerequisite: RN license Offered: Winter/Fall

NURSE 434A History of Healthcare - Trends/Issues Impacting Healthcare and Healthcare Professions

This course is designed to examine, in depth, the rich and unique development of some major American healthcare fields as disciplines, professions, arts, and sciences from a historical perspective. Past healthcare trends, the societal importance of helping, and the history of nursing education will be identified and discussed. The social, philosophical, cultural, and political forces which have impacted the course of these topics will be examined from ancient to modern times. Offered: Summer and

Spring

NURSE 434A History of Healthcare - Trends/Issues Impacting Healthcare and Healthcare Professions

This course is designed to examine, in depth, the rich and unique development of some major American healthcare fields as disciplines, professions, arts, and sciences from a historical perspective. Past healthcare trends, the societal importance of helping, and the history of nursing education will be identified and discussed. The social, philosophical, cultural, and political forces which have impacted the course of these topics will be examined from ancient to modern times. Offered: Summer and Spring

NURSE 434B History of Healthcare- Trends/Issues in Public Health, Medicine, and Physical Therapy

This course was designed to examine, in depth, the rich and unique development of the major American healthcare fields as disciplines, professions, arts, and sciences from a historical perspective. Trends and issues in public health, medicine, and physical therapy will be identified and discussed. The social, philosophical, cultural, and political forces which have impacted the course of these topics will be examined from ancient to modern times. Offered: Summer and Spring

NURSE 434B History of Healthcare- Trends/Issues in Public Health, Medicine, and Physical Therapy

This course was designed to examine, in depth, the rich and unique development of the major American healthcare fields as disciplines, professions, arts, and sciences from a historical perspective. Trends and issues in public health, medicine, and physical therapy will be identified and discussed. The social, philosophical, cultural, and political forces which have impacted the course of these topics will be examined from ancient to modern times. Offered: Summer and Spring

NURSE 434C History of Healthcare - Trends/Issues in Nursing, Dentistry, and Pharmacy Organizations

This course is designed to examine, in depth, and rich and unique development of the major American healthcare fields as disciplines, professions, arts, and sciences from a historical perspective. Past trends and issues in nursing, dentistry, and pharmacy organizations will be identified and discussed. The social, philosophical, cultural, and political forces which have impacted the course of these topics will be examined from ancient to modern times. Offered: Summer and Spring

NURSE 434C History of Healthcare - Trends/Issues in Nursing, Dentistry, and Pharmacy Organizations

This course is designed to examine, in depth, and rich and unique development of the major American healthcare fields as disciplines, professions, arts, and sciences from a historical perspective. Past trends and issues in nursing, dentistry, and pharmacy organizations will be identified and discussed. The social, philosophical, cultural, and political forces which have impacted the course of these topics will be examined from ancient to modern times. Offered: Summer and Spring

NURSE 434D Hist of Healthcare - Past Trends & Issues Scl Work, Future Pub Hlth, & Hist Effects of Cltrl Dvrsty

This course is designed to examine the rich and unique development of the major American healthcare fields as disciplines, professions, arts, and sciences from a historical perspective. Past trends and issues in social work, the future of public health, and the historical effects of cultural diversity will be identified and discussed. The social, philosophical, cultural, and political forces which have impacted the course of these topics will be examined from ancient to modern times. Offered: Summer and Spring

NURSE 434D Hist of Healthcare - Past Trends & Issues Scl Work, Future Pub Hlth, & Hist Effects of Cltrl Dvrsty

This course is designed to examine the rich and unique development of the major American healthcare fields as disciplines, professions, arts, and sciences from a historical perspective. Past trends and issues in social work, the future of public health, and the historical effects of cultural diversity will be identified and discussed. The social, philosophical, cultural, and political forces which have impacted the course of these topics will be examined from ancient to modern times. Offered: Summer and Spring

NURSE 462 Special Topics

This course is designed to explore current issues and trends influencing nursing practice. Economical, political, social and cultural issues are analyzed as they relate to interdisciplinary healthcare topics. Special Topics is aimed at preparing nursing students for immediate and long term milestones in their practice, which includes NCLEX licensure study, current clinical and practice issues, and exposure to advance nursing roles in practice and research. Prerequisites: nursing 465 and Nursing 467

NURSE 465 Management Of Community Health Nursing

This course focuses on applying the nursing process to the care of target community population and the individual. Emphasis is placed on health promotion and disease prevention, Discussion will include epidemiological, social, political, economic and cultural factors that influence the health of a population. The clinical components will consist of application of the nursing process to identify, prioritize, and meet the health needs of aggregates across the lifespan. The four hour course consists of two hours of didactic/discussion and two hours of clinical/lab. (120 hours) Prerequisites: Nursing 360 and Nursing 362. Offered: Fall

NURSE 467 Management Of Critical & Emergent Care

This course focuses on applying the nursing process to the care of critically ill clients. Key concepts are assumption, integration, and prioritization of information to take decisive client-focused action. Students will manage appropriately the interface between client and technology so that a safe, respectful, and caring environment is established and maintained. Nursing knowledge of

cardiovascular/ hemodynamic monitoring and acute management of pulmonary, neurological, renal, gastrointestinal, shock and traumatic emergencies is included. This five hour course consist of three hours didactic/ discussion and two hours clinical/lab. Prerequisites: NURSE 360 and NURSE 362

NURSE 467 Management Of Critical & Emergent Care

This course focuses on applying the nursing process to the care of critically ill clients. Key concepts are assumption, integration, and prioritization of information to take decisive client-focused action. Students will manage appropriately the interface between client and technology so that a safe, respectful, and caring environment is established and maintained. Nursing knowledge of cardiovascular/ hemodynamic monitoring and acute management of pulmonary, neurological, renal, gastrointestinal, shock and traumatic emergencies is included. This five hour course consist of three hours didactic/ discussion and two hours clinical/lab. Prerequisites: NURSE 360 and NURSE 362

NURSE 468 Effectiveness In Complex Health Systems

This leadership course focuses on effectiveness in complex health systems, by building upon acquired personal and interpersonal knowledge, skills and effectiveness in health outcomes. Organizational culture and systems, leadership and management theories, cultural competence, internal and external politics, and the impact of future managerial and societal paradigm changes on health care and health care delivery systems are presented. Knowledge of budgeting and health care finance, use of the legislative system, quality management, customer service, and leadership and management styles are explored. This five hour course consists of four hours of didactic/ discussion and one hour of clinical/ lab. Prerequisites; NURSE 467 and NURSE 465 Restrictions: Minimum grade of "C" in all courses

NURSE 468 Effectiveness In Complex Health Systems

This leadership course focuses on effectiveness in complex health systems, by building upon acquired personal and interpersonal knowledge, skills and effectiveness in health outcomes. Organizational culture and systems, leadership and management theories, cultural competence, internal and external politics, and the impact of future managerial and societal paradigm changes on health care and health care delivery systems are presented. Knowledge of budgeting and health care finance, use of the legislative system, quality management, customer service, and leadership and management styles are explored. This five hour course consists of four hours of didactic/ discussion and one hour of clinical/ lab. Prerequisites; NURSE 467 and NURSE 465 Restrictions: Minimum grade of "C" in all courses

NURSE 472 Clinical Internship

This is the final application course designed to complement didactic content from the core-nursing component of the pre-licensure baccalaureate program. Within this course the student will integrate and apply knowledge acquired in didactic course work and from previous clinical experiences. Students will integrate an increasingly complex knowledge base with an emphasis on developing effectiveness: a) personally; b) interpersonally, and c) in the health management of clients within the complexity of the hospital system. In collaboration with preceptors from the clinical unit, the students will manage direct care for clients in the hospital setting. Five credit hours of clinical practice (300 hours) are required. Prerequisites: NURSE 465 and NURSE 467 Co-requisite: NURSE 468 Offered: Spring

NURSE 476 Scientific Inquiry

This course focuses upon the development of those skills necessary to apply research finding to the evidence-based care of nursing. This application requires that students develop the skills to intelligently and critically read and utilize current research literature. The specific steps in the research process. Including ethical issues, are presented and discussed with emphasis upon the identification of quality research through critical analysis of research reports. Prerequisite: Pre-licensure students; Completion of 14 hours of clinical coursework, e.g. NURSE 262, NURSE 364, NURSE 366 Pre-Co-Requisite: Pre-licensure and RN-BSN nursing students and Bachelor of Health Science students; N345 or an upper-level statistics course. Offered: Spring/Summer

NURSE 476 Scientific Inquiry

This course focuses upon the development of those skills necessary to apply research finding to the evidence-based care of nursing. This application requires that students develop the skills to intelligently and critically read and utilize current research literature. The specific steps in the research process. Including ethical issues, are presented and discussed with emphasis upon the identification of quality research through critical analysis of research reports. Prerequisite: Pre-licensure students; Completion of 14 hours of clinical coursework, e.g. NURSE 262, NURSE 364, NURSE 366 Pre-Co-Requisite: Pre-licensure and RN-BSN nursing students and Bachelor of Health Science students; N345 or an upper-level statistics course. Offered: Spring/Summer

NURSE 481 Block I: Tools For Personal Effectiveness

This is the first in the four-course sequence. The student will discover that the foundation for professional nursing practice is personal effectiveness. Personal effectiveness is contingent upon an understanding of the historical roots of the profession, the meaning of professionalism, image and power bases, professional standards, moral development, political role socialization and professional values. Personal effectiveness is enhanced through critical reflection of personal perspectives and biases, valuing and use of theory and research, critical thinking and decision-making, informatics' technology, the ability to manage time and

stress, and the use of a career plan and informatics.Pre-Corequisite: ENGLISH 225

NURSE 481 Block I: Tools For Personal Effectiveness

This is the first in the four-course sequence. The student will discover that the foundation for professional nursing practice is personal effectiveness. Personal effectiveness is contingent upon an understanding of the historical roots of the profession, the meaning of professionalism, image and power bases, professional standards, moral development, political role socialization and professional values. Personal effectiveness is enhanced through critical reflection of personal perspectives and biases, valuing and use of theory and research, critical thinking and decision-making, informatics' technology, the ability to manage time and stress, and the use of a career plan and informatics.Pre-Corequisite: ENGLISH 225

NURSE 482 Block II: Tools For Interpersonal Effectiveness

This is the second in the four-course sequence. The student will discover that interpersonal effectiveness is a prerequisite to effective management of the care of humans and teams. Interpersonal effectiveness is contingent in an understanding of professional care and caring, ethics in health care, legalities of practice, communication theories and the dynamics of groups and teams. Interpersonal effectiveness is enhanced through the use of such skills as conflict resolution and negotiation, managing change, marketing, team membership,group management, political awareness, technology utilization and communication techniques. Content appropriate to these areas will be covered within this course.Prerequisites: NURSE 481

NURSE 482 Block II: Tools For Interpersonal Effectiveness

This is the second in the four-course sequence. The student will discover that interpersonal effectiveness is a prerequisite to effective management of the care of humans and teams. Interpersonal effectiveness is contingent in an understanding of professional care and caring, ethics in health care, legalities of practice, communication theories and the dynamics of groups and teams. Interpersonal effectiveness is enhanced through the use of such skills as conflict resolution and negotiation, managing change, marketing, team membership,group management, political awareness, technology utilization and communication techniques. Content appropriate to these areas will be covered within this course.Prerequisites: NURSE 481

NURSE 483 Block III: Effectiveness In Human Health Outcomes

This is the third in the four-course sequence. It builds upon the personal and interpersonal skills acquired in the first two block courses and focuses on effectiveness in human health outcomes. The student will discover that effectiveness in human health outcomes is a primary goal in the delivery of an optimum continuum of health care that encompasses health promotion, disease prevention and illness care across the lifespan. Achieving effectiveness in human health outcomes across the wellness-illness continuum and the individual-to-community continuum is contingent on acquiring an understanding of epidemiology, levels of care, communicable disease control, case management, theories applicable to aggregate populations, cultural competence, evidence -based care and information technology.Prerequisites: NURSE 482

NURSE 483 Block III: Effectiveness In Human Health Outcomes

This is the third in the four-course sequence. It builds upon the personal and interpersonal skills acquired in the first two block courses and focuses on effectiveness in human health outcomes. The student will discover that effectiveness in human health outcomes is a primary goal in the delivery of an optimum continuum of health care that encompasses health promotion, disease prevention and illness care across the lifespan. Achieving effectiveness in human health outcomes across the wellness-illness continuum and the individual-to-community continuum is contingent on acquiring an understanding of epidemiology, levels of care, communicable disease control, case management, theories applicable to aggregate populations, cultural competence, evidence -based care and information technology.Prerequisites: NURSE 482

NURSE 484 Block IV: Effectiveness In Complex Health Systems

This is the final course in the four-course sequence. Students will build upon the knowledge and skills acquired in the prior three course in order to examine the essentials of structure and designs, behavior and culture, synergy, workplace diversity, health care finance, and power and politics within complex health systems. Organizational theories, leadership, management and nursing's social responsibility in an emerging global health care environment will also be explored. Prerequisite: Nursing 483

NURSE 485 Application To Practice I

This course is the first of two clinical application courses designed to complement didactic content from the four-course block sequence (NURSE 481-NURSE 484). The student will discover that the knowledge they are acquiring in didactic course work can be immediately applied to practice. The students will integrate an increasingly complex knowledge base with an emphasis on developing effectiveness: a) personally; b) interpersonally and ; c) in the health management of populations if clients within the complexity of community based organization, practice settings, and communities. Student cohort group-in collaboration with preceptors from community based organizations and faculty identify field experiences, projects, and direct care experiences based on real need. The processes and outcomes of those experiences will be collective and provide solutions for the health care community. Projects and experiences may therefore be complex, extending across two semesters. Prerequisites: NURSE 481; Pre or Co-requisite: NURSE 482 and 483. Offered Spring and Fall.

NURSE 486 Application To Practice II

This course is the second of two clinical application courses designed to complement didactic content from the four-course block sequence (NURSE 481-NURSE 484) Working in cohort teams, the students will apply new skills and knowledge to real issues and problems in the delivery of nursing care with an emphasis on teamwork performance and action plan implementation, evaluation, and revision. The students will integrate an increasingly complex knowledge base with an emphasis on developing effectiveness: a) personally; b) interpersonally; and c) in the health management of populations of clients within complex community based organizations and faculty will further develop and/or implement the approved NURSE 485 plan of action. The processes and outcomes of those experiences will be collective and provide solutions for the health care community.

Prerequisites: NURSE 483, NURSE 485. CO-Requisite: NURSE 484 Offered: Winter

NURSE 487 Writing For Nursing Sciences

This course is a companion course to the core nursing component of the baccalaureate program. Within this course the student will discover that good writing is essential in the nursing profession for effectively transmitting nursing practice and professional and academic dialogue. Regardless of whether the writing is on a patient's chart, in a grant proposal, or a formal presentation, professional writing must be clear, precise, logical, and appropriate to the situation. The art and process of writing is complex and can only be learned by practicing writing. Content appropriate to the enhancement of professional writing skills will be covered within this class. Students will examine writing processes, learn to find and use resources for writing, write and present several types of papers for nursing. Prerequisites: Concurrent enrollment in NURSE 484 Offered: Winter

NURSE 490 Special Topics

A course of study in a special area of interest in nursing under individual faculty direction. Prerequisite: Consent of instructor.

NURSE 490BA Special Topics**NURSE 490BB Special Topics****NURSE 490BC Special Topics****NURSE 490H1 Special Topics Nursing****NURSE 490H4 Special Topics Nursing****NURSE 490HA Special Topics****NURSE 490HI Special Topics****NURSE 490WV Special Topics****Health Sciences (HLSC)****HLSC 101 Introduction to Health Sciences**

This course is designed as an introduction to the field in health science. Students will explore the basic concepts related to this field including understanding one's role in health careers, protection against communicable diseases, facilities related to the healthcare profession, health insurance, ethics in healthcare, and workplace injuries. The course will also introduce the student to a wide array of health sciences professions, including, but not limited to, environmental health science, occupational health, ergonomics, radiological health, toxicology, clinical medicine, dental and nursing practice, drug discovery and safety assessment in the pharmaceutical/chemical industry, biotechnology, and careers in government agencies.

HLSC 110 Personal Wellness

This course presents an overview of health behaviors and actions needed to achieve a combination of physical, mental, and social well-being through intelligent lifestyle choices. Effective strategies for staying healthy and improving one's health will be explored. Elements of stress management, preservation of physical and mental well-being, personal hygiene and strong social relationships will be discussed.

HLSC 120 Anatomy & Physiology I

This course examines the structure and function of the human body from the molecular to the organismal level as they interact among all body systems across the life span. Instructors also attempt to correlate course materials with the clinical aspects of the application of physiological knowledge. Co-requisite laboratory exercises provide practical application of theoretical concepts. In this first term of two-term course, molecular biology, biochemistry, cellular biology, and histology are studied as well as the integumentary, musculoskeletal, and nervous systems. Restrictions: Pre-nursing or Health Sciences students Offered: Fall

HLSC 230 Health Issues in Aging

This course focuses on promotion and maintenance of the health of the older adult population. The physiological and psychological domains, pharmacological, and nutritional considerations as affected by theories on aging socio-cultural influences, legal and ethical issues, and health care resources pertaining to older adults are explored. Assessments problems and strengths, interventions and outcomes specific to the older adult population are discussed. Opportunities are provided for interaction with the older adult population. Prerequisite: Admission into the BHS program.

HLSC 252 Human Growth and Development

This course provides a basic introduction to the theory for human growth and development across the life span. Emphasis is placed upon the biological and the psychosocial aspects of growth and development. Content is organized in a modified chronological order dividing information into major stages of growth and development across the life span.

HLSC 345 Quantitative Analysis in the Health Sciences

This course focuses upon the skills required for the utilization of scientific findings in evidence-based care. The conceptual basis of descriptive and inferential statistics found in the properties of the normal distribution comprise the core of these skills. Using the normal distribution as a structure for understanding descriptive and inferential procedures, the course presents information necessary to the selection, computation and interpretation of basic statistics relevant to evidence-based care in the health sciences. Discussions of variables, measurement and tabular and graphic presentation of data precede the development of computation skills.

HLSC 356 Spanish for Health Care Pre-Professionals

This course focuses on conversational Spanish, medical terminology in Spanish, and written/read Spanish. This course will provide the student with basic knowledge that will allow communication with clients who speak/read/write Spanish. This is a fast paced course and will require practice of the language outside of the classroom in order to master the material presented. Prerequisite: Permission of instructor.

HLSC 403A Comparative Weight Loss I

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Specific topics that will be addressed include risks of of overweight/obesity; common psychological issues for the overweight/obese; societal perceptions and barriers for overweight/obese individuals. This course consists of one hour of didactic work with one module per week for four weeks.

HLSC 403B Comparative Weight Loss II

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Comparison of common medically recommended diets and diet programs and their efficacy/risks; exercise requirements for weight loss and weight maintenance. This course consists of one hour of didactic education with one module per week for four weeks. Pre/Co-requisites: HLSC 403A.

HLSC 403C Comparative Weight Loss 3

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Comparison of pharmacologic weight loss options and their efficacy/risks; non-prescription medications/nutraceuticals for weight loss and their efficacy/risks; and bariatric surgeries and efficacy/risks. This course consists of one hour of didactic work with one module per week for four weeks. Pre or co-requisite: HLSC 403A.

HLSC 476 Scientific Inquiry

This course focuses on the development of those skills necessary to apply research findings to the evidence-based health care. This application requires that students develop the skills to intelligently and critically read and utilize current research literature. The specific steps in the research process are presented and discussed with emphasis upon the identification of quality research through critical analysis of research reports. Prerequisites: N345/HLSC 345; Quantitative Analysis in the Health Sciences.

HLSC 490 Special Topics

A course of study in a special area of interest in health sciences under individual faculty direction.

HLSC 490DH Special Topics

A course of study in a special area of interest in health sciences under individual faculty direction.

HLSC 490HS Special Topics

A&S 5500 Interdisciplinary Colloquium On Aging

This course will introduce students to gerontology as a field of study and as a profession. The context for the emergence of the field is set in important demographic transitions of the 20th century. Identification and understanding of major issues and controversies in the field will help locate the contributions of a range of disciplines to aging studies. The connection of these issues with the development of social policies will be discussed.

A&S 5501 Special Readings/Topics

This is a designated Arts and Sciences course which gives all departments in the College the flexibility to offer, on demand and as the need arises, a graduate-level readings course in a particular area of specialization in any discipline in the College. The individual departments determine the content of the course in any given semester in the same manner as any reading course, special topics, or independent study is presently handled. The departments are responsible for approving individuals or groups for the course and determine whether or not the course will be included as a part of a post-baccalaureate degree in their disciplines.

A&S 5502 Introduction To African American Studies

This course provides an introduction to the contexts, theories, and methodologies that undergird African American studies. In addition to substantial time spent covering particular research skills and resources, students will also be introduced to African

American culture and the issues related to African studies from several perspectives: history, literature, sociology, communication studies, and the like. Influences and perspectives from Africa, the Caribbean, and South America will also be covered. The course will thus provide a broad background in African American culture and history, an introduction to the methodologies of several disciplines, and discussion of particular contemporary and historical issues such as slavery, segregation and integration, the Civil Rights Movement, Pan-Africanism, Afrocentrism, and current political debates.

A&S 5505 Career Education And Transition In Special Education

This course is designed to increase awareness and knowledge about current disabilities legislation, vocational education, vocational rehabilitation, quality transition programs, school to work, self advocacy, workplace accommodations and comprehensive life skills learning. Prerequisites: EDUP-SP 407 or equivalent. Offered: On demand.

A&S 5509 Methods Of Inq: Research Issues And Methods In The Liberal Arts

This seminar is required of all first semester participations in the Master of Arts in the Liberal Studies program. Must be taken concurrent with either A&S 5510,A&S 5511,A&S 5512 or A&S 5513. This course serves as an introduction to various methods of inquiry and research in the humanities, social sciences, and sciences. Offered during four week-ends, the course is taught in conjunction with the week-day class offered that term (A&S 5510 through A&S 5513). This course includes graduate level instruction in library research use of computer generated research tools and a strong emphasis on academic writing. Offered fall and winter semesters.

A&S 5510 Method Of Inquiry: An Interdisciplinary Study Of The 1930S

This course is one of a series in the Master of Arts in Liberal Studies program which studies American culture, history, and science by examining major decades of the 20th-century. This seminar offers an in-depth study of America's Great Depression during the 1930s and how the problems of this country related to events across the globe. Readings, lectures, and discussions focus on historical, economic, political, and cultural issues in the face of national conflict. Sessions cover such topics as the emergence of Regionalist artists in the Midwest, the contributions of Kansas City jazz to the creation of a new art form, African-American writers, the role of women in the Depression, economic causes of the Depression, the Pendergast Machine, and scientific developments between the two World Wars. Offered: every fourth semester or on demand.

A&S 5511 Methods Of Inquiry: An Interdisciplinary History Of The 1940S

This course examines a decade, in this case the 1940s, from a variety of perspectives. The second world war stimulated profound changes in science, ethics, government, economics, social structures, and cultural constructions of race, class, and gender. In essence, this course will examine how America in the 1940s became increasingly "modern" and assesses the impact of those changes on the nation and the world.

A&S 5513 Methods Of Inquiry: An Interdisciplinary Study Of The 1960S

As part of the Master of Arts in Liberal Studies series, this course examines a decade, in this case the 1960s, from a variety of perspectives. The Vietnam War stands as a turning point in the ways in which Americans, especially young Americans, viewed their country, the world, and, most importantly, themselves. This decade was crucial to the history of the civil rights movement, the women's liberation movement and American judicial process.

A&S 5520 Critical Choices: Final Research Project And Capstone Seminar

This seminar is designed as a capstone experience for students in the last semester of their studies in the Master of Arts in Liberal Studies program. Working with three faculty members of the graduate faculty (one member each from the humanities, the social sciences, and the sciences), each student defines a final research project, spends the semester developing it, and presents his or her findings to the seminar at the conclusion of the course. Each project is intended to be thought-provoking and to be researched from an interdisciplinary point of view.

A&S 5572 Seminar In Philosophy Of Science I

A&S 5591 Practicum In Community Social Science Research

A&S 5591 Practicum In Community Social Science Research

A&S 5592 Field Practicum In Aging

Students spend 180-480 hours in a field placement with the supervision in a community agency or organization which services or advocated for older persons and keep a journal documenting and reflecting on the practicum activities and experiences, particularly as related to gerontological theory and research. Students will study a particular subject relevant to their placement and describe this in a written project.

A&S 699 Research And Dissertation

Anthropology(ANTHRO)

ANTHRO 5530 Anthropology Of Gender

This class explores theories of the social construction of gender in cross-cultural contexts. It will also explore global issues of diversity, local and international politics, the economy and work, education, etc.

ANTHRO 5530 Anthropology Of Gender

This class explores theories of the social construction of gender in cross-cultural contexts. It will also explore global issues of

diversity, local and international politics, the economy and work, education, etc.

ANTHRO 5531 Feminist Theories

This class introduces the major feminist theories and their primary authors over the last 200 years. The class takes both an historical (we begin with two millennia of male-centered theories about women) and a conceptual approach (theories are grouped by common ground) and familiarizes the student with both the historical processes that necessitate feminist theories as well as with the breadth of the historically and currently available scholarship. Graduate students are expected to fulfill all undergraduate requirements at graduate-level quality, including independent research components; in addition, graduate students are required to be prepared to lead class discussions. Prerequisites: Introduction to Women's Studies Offered: Every Winter
