INTRODUCTION

University of Missouri - Kansas City (UMKC)

General undergraduate academic rules and regulations and graduate academic regulations and information apply to all undergraduate and graduate programs, respectively.

Prospective students should be aware that the University reserves the right to make changes in admission requirements, fees and other specifications in the catalog.

The web site address for the UMKC catalog is http://umkc.edu/catalog.

The UMKC catalog is the official record of degree program requirements. Students are expected to become thoroughly familiar with all academic regulations and requirements of this catalog pertaining to their program of study and to comply with its provisions.

The University of Missouri-Kansas City (UMKC) is one of four campuses that constitute the University of Missouri (http://www.umsystem.edu/ums/about). Established in Columbia in 1839 on the ideals of Thomas Jefferson, the University of Missouri became a land-grant institution upon passage of the Morrill Act by Congress in 1862.

The University is governed by the Board of Curators (http://www.umsystem.edu/curators), whose members are appointed by the governor of Missouri and confirmed by the Missouri Senate. The University president (http://www.umsystem.edu/president) directs and coordinates the programs of the four campuses, with staff assistance in finance, business management, research, extension, development, public information and other UM system services.

The activities of each campus are supervised by a chancellor, who directs campus affairs within policies established by the Board of Curators and the president.

Accreditation

“Accreditation” is the primary means of assuring and improving the quality of higher education institutions and programs in the United States. Active for the past 100 years, this private, voluntary system of self-examination and peer review has been central to the creation of a U.S. higher education enterprise that is outstanding in many respects.

-- Council for Higher Education Accreditation

The University of Missouri - Kansas City is accredited by The Higher Learning Commission, a regional accreditation agency recognized by the U.S. Department of Education.

   The Higher Learning Commission

   230 South LaSalle Street, Suite 7-500, Chicago, IL 60604

   (800) 621-7440

   http://www.hlcommission.org

The Higher Learning Commission accredits UMKC as a whole. Specific undergraduate, graduate, and professional programs, are also accredited by other programmatic accrediting agencies. The accredited programs and their accrediting agencies are identified in the applicable academic unit and/or program information sections of the catalog.

Mission

Mission statement

UMKC’s mission is to lead in life and health sciences; to deepen and expand strength in the visual and performing arts; to develop a professional workforce and collaborate in urban issues and education; and to create a vibrant learning and campus life experience.
Goal 1. Place student success at the center
To provide the optimal learning environment for all students: outstanding academic programs and experiences, seamless student support and a vibrant campus community.
- Challenge all undergraduate, graduate, and professional students to the highest levels of achievement by providing excellent academic programs.
- Engage and retain students by providing “high-impact” educational practices, such as first-year and capstone seminars, undergraduate research, study abroad and internships.
- Empower all students to contribute to a demographically and technologically complex world.
- Offer superior services to students through a model that allows a one-stop approach (real and virtual) to meet students’ needs.
- Support student success with new, proactive intervention systems and programs.
- Provide on-campus, co-curricular experiences that encourage student engagement and community participation.

Goal 2. Lead in life and health sciences
To attain national recognition for excellence in research, expand opportunities for clinical practitioner training and provide outstanding health care delivery.
- Become an essential partner with other members of the Kansas City area life and health sciences community.
- Establish a unified strategic approach to the UMKC life and health sciences research mission emphasizing translational research.
- Implement innovative life and health sciences graduate, doctoral, professional and interprofessional education initiatives.
- Expand clinical practice initiatives and research opportunities that address community health needs.
- Enhance collaborative and cross-disciplinary research and educational programs both within the science and engineering communities, and across disciplines.

Goal 3. Advance urban engagement
To become a model urban university by fully engaging with the Kansas City community to enhance education, public health, the arts and economic development.
- Expand relationships in the Kansas City area to ensure that UMKC is embedded in the fabric of the community and that the community is embedded in the University.
- Facilitate the exchange of the rich intellectual and cultural assets of UMKC and of the Kansas City community.
- Strengthen the PK-20 educational pipeline through strategic alliances with area school districts and community colleges.
- Promote environmental responsibility by integrating sustainability into the curriculum, research and institutional practices.

Goal 4. Excel in the visual and performing arts
To create excellent programs in visual and performing arts that are central to campus life and support Kansas City’s initiatives in entrepreneurship, urban education and innovation.
- Enhance UMKC’s reputation as a national leader in artistic excellence.
- Enhance all students’ education through infusing the arts into campus life.
- Collaborate with local and regional partners to provide community arts programming and experiences.
- Demonstrate the relationships between artistic creativity, entrepreneurial innovation and economic development.

Goal 5. Embrace diversity
To celebrate diversity in all aspects of university life, creating inclusive environments, culturally competent citizens, and globally-oriented curricula and programs.
- Cultivate an environment committed to civility and respect where all students, faculty and staff are empowered to pursue their personal, academic and professional goals.
- Provide a diverse learning and life experience to create culturally competent citizens.
- Recruit and retain a diverse campus community.
- Ensure diversity initiatives are actively reviewed and owned by the University community.

Goal 6. Promote research and economic development
To produce world-class scholarship and creative activity, encourage entrepreneurship, foster innovation, increase technology transfer, and build relationships that create economic and workforce development.
- Expand opportunities for extraordinary scholarship and creative activity.
- Create cross-disciplinary programs, at all levels, and align with strong community partnerships that support research, innovation and economic development.
- Strengthen workforce development programs to address current and future market needs.
- Encourage innovation within science and technology communities to increase technology transfer.
# ACADEMIC PROGRAMS

Fields of study are listed in the first column. The actual undergraduate and graduate degrees or certificates to be earned are listed to the right of each field of study. Degrees, emphasis areas, and minors will appear on students’ official transcripts.

Statement of Purpose

The primary academic missions of the College of Arts and Sciences are teaching, research and service. Through these functions, the College serves the community, the state and society at large. The research and scholarship of the College's faculty not only expand the body of knowledge generally, but also enrich and enhance its teaching and instructional programs.

Most departments of the College offer both undergraduate and graduate study. The College enables students to develop the creative, analytical and communication skills which sustain a lifelong educational process. In addition to serving its own students, the College provides instruction in the liberal arts and sciences for students in the UMKC professional schools. Through its continuing education division and certificate programs, the College also serves individuals and groups in the community.

The College's degree requirements, in coordination with the UMKC general education core, give students a breadth of knowledge, enabling them to understand and appreciate the many facets of human experience, to make meaningful relationships between the various fields of knowledge, and to increase their understanding of themselves, their interests and special abilities. The general requirements and introductory courses allow for maximum freedom in selection of a field of study and provide the basic knowledge for that particular program.

Work in a field of study provides students with a comprehensive and systematic introduction that prepares them to function in the professional fields of their choice. The objective of the total academic program of the College is to engage students in study that will enable them to work competently in their chosen fields or pursue graduate work, while at the same time developing a breadth of knowledge in the arts and sciences. In that way, students can understand their specializations in the larger context of the intellectual and social life of the community.

Graduate-level studies provide students with advanced instruction and/or independent research in a major field of study. Students pursuing master's-level work in a major field or a Ph.D. in Clinical Psychology are directed to the relevant department or program listing in the Arts and Sciences section of this catalog and to the General Graduate Academic Regulations and Information section of this catalog. Those planning other Ph.D.-level studies are directed to UMKC's Interdisciplinary Ph.D. program listing in the School of Graduate Studies section of this catalog.

Arts Sciences Courses

A&S 100 Methodologies In Liberal Arts & Sciences: Theories & Application Credits: 3
This three hour course is designed for freshmen and transfer students, to be taken during their first semester of study at UMKC. The curriculum provides students an introduction to the major disciplines and methodologies of the liberal arts and sciences (the humanities, social sciences, and sciences), including sessions on choosing majors and careers. Additional emphases will include learning to use the library, writing and computational skills, oral presentations, cultural diversity, stress management, and study strategies.

A&S 115 Career Possibilities Credit: 1
This course introduces career development as a complex process of self-assessment and decision-making. Students analyze their personal interests motivation, conduct self-assessment, identify their personal values, and discuss ethical considerations as they relate to possible career choices. Visiting professionals will provide insight into career options as students explore possible career paths.

A&S 210 Cross-Cultural Interaction: Experience and Understanding Credits: 3
This course focuses on the social and cultural context of interactional patterns. U.S. and international students are paired in academic activities to encourage mutual understanding and self-awareness. They will draw on a variety of resources and learning modalities to examine aspects of their own and one another's societies, cultures, religions, and family relations. Making use of intercultural theories, students will reflect upon and explore cultural myths and stereotypes and develop a general understanding of cultural similarities and differences.
A&S 215 Career Explorations Credit: 1
The primary focus of this course is to complete an in-depth self-assessment and the generation of personalized list of career paths. Personal values will inform these possibilities, which are then explored through job shadowing, informational interviews, visiting lecturers, and independent career research. Ethical considerations of chosen career paths are explored. Students reflect on the professional experiences of others and relate them to their own personal values.

Prerequisites: A&S 115.

A&S 310 Cross-Cultural Interaction II: Social Relations Credits: 3
This course will match international students with U.S. students to prepare them to interact more effectively in multilingual and/or intercultural settings. Students learn through readings on cultural theory and cultural relations, in-class small group activities, discussions and lectures, how issues of identity, such as age, sexual orientation, and ethnicity; impact cross-cultural interaction. Papers written for this course will help students integrate theory with previous experience, leading to an understanding of oppression in cross-cultural interaction.

Prerequisites: A&S 210.

A&S 315 Career Methods Credit: 1
In this course students begin to map out the realization of their career paths. They analyze their career choices, how these choices inform their life plans, articulate the ethical and moral requirements of these careers, and understand how their personal values and strengths match these requirements. Independent career research and entry preparation along with job shadowing, informational interviews, mock interviews, and other preparations required for the selected career choices are included in this class.

Prerequisites: A&S 215.

A&S 341 Union Leadership and Administration Credits: 3
This course focuses on the roles and challenges of union leadership in a changing environment. Topics include the union leaders’ role as a representative, organizer and educator as well as administrative responsibilities within the union and the relationship with enterprise management in both adversarial and participatory situations. Options for leadership styles and organizational models will be discussed and explored in both theory and practice. Leaders will develop their skills of motivation, speaking, strategic planning and managing complex campaigns and diverse organizations. This course is part of the Certificate Program in Labor Studies and is offered on the University of Missouri Interactive Video Network at UMKC, UMSL, and UMC.

A&S 350 Special Topics Credits: 1-4
An undergraduate course designed to deal with a topic which is not available in the regular course offerings.

A&S 350A Special Topics Credits: 1-4
An undergraduate course designed to deal with a topic which is not available in the regular course offerings.

A&S 350B Special Topics Credits: 1-4
An undergraduate course designed to deal with a topic which is not available in the regular course offerings.

A&S 350H Special Topics Credits: 1-4
An undergraduate course designed to deal with a topic which is not available in the regular course offerings.

A&S 350R Special Topics Credits: 1-4
An undergraduate course designed to deal with a topic which is not available in the regular course offerings.

A&S 350P Introduction To Substance Abuse Counseling: Theory And Practice Credits: 3
This course will introduce the student to the problems of substance abuse and the methods/techniques used in treatment. The course will explore theories of personality and belief systems of the chemically dependent or alcoholic individual. The course will also review the impact of the disease on the family system.

A&S 400 Special Readings/Topics Credits: 1-6

A&S 400B Special Readings/Topics Credits: 1-6

A&S 400E Special Readings/Topics Credits: 1-6

A&S 400G Special Readings/Topics Credits: 1-3

A&S 400H Special Readings/Topics Credits: 1-3

A&S 400PD Special Readings/Topics Credits: 1-6

A&S 400RR Special Readings/Topics Credits: 1-3

A&S 400SA Special Readings/Topics Credits: 1-6

A&S 400SB Special Readings/Topics Credits: 1-3

A&S 400SS Special Readings/Topics Credits: 1-3

A&S 415 The Aging Body: Causes and Consequences Credits: 3
This course will explore biological changes that occur with aging. Plasticity, frailty, stress, coping, and chronic illness will be viewed through the biopsychosocial lens. Biomedical discoveries and implications for the future of aging will be discussed.
A&S 490 Special Topics Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only.

A&S 490B Special Topics Credits: 1-3

A&S 490PB Special Topics Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the instructor.

A&S 490S Special Topics Credits: 1-3

A&S 490SA Special Topics Credits: 1-3

A&S 490SB Special Topics Credits: 1-3

A&S 490W Special Topics Credits: 1-3

A&S 492 Field Practicum In Aging Credits: 3-8
Students spend 180-480 contact hours in a field placement with supervision in a community agency or organization which services or advocates for older persons, and keep a journal documenting and reflecting on the practicum activities and experiences particularly as they relate to gerontological theory and research.

A&S 5500 Interdisciplinary Colloquium On Aging Credits: 3
This course will introduce students to gerontology as a field of study and as a profession. The context for the emergence of the field is set in important demographic transitions of the 20th century. Identification and understanding of major issues and controversies in the field will help locate the contributions of a range of disciplines to aging studies. The connection of these issues with the development of social policies will be discussed.

A&S 5500C Interdisciplinary Colloquium On Aging III Credits: 1-2

A&S 5500L Special Readings Topics/Philosophy Credits: 1-3

A&S 5500P Special Topics-Readings Psychology Credits: 1-3

A&S 5500Q Special Readings/Topics Theatre Credits: 1-3

A&S 5501 Special Readings/Topics Credits: 1-3
This is a designated Arts and Sciences course which gives all departments in the College the flexibility to offer, on demand and as the need arises, a graduate-level readings course in a particular area of specialization in any discipline in the College. The individual departments determine the content of the course in any given semester in the same manner as any reading course, special topics, or independent study is presently handled. The departments are responsible for approving individuals or groups for the course and determine whether or not the course will be included as a part of a post-baccalaureate degree in their disciplines.

A&S 5501B Special Topics: Critical Thinking In Social Studies Credits: 1-3

A&S 5501D Special Readings/Topics Credits: 1-3

A&S 5501E Special Readings/Topics Credits: 1-3

A&S 5501K Special Topics Credits: 1-4

A&S 5502 Introduction To African American Studies Credits: 3
This course provides an introduction to the contexts, theories, and methodologies that undergird African American studies. In addition to substantial time spent covering particular research skills and resources, students will also be introduced to African American culture and the issues related to African studies from several perspectives: history, literature, sociology, communication studies, and the like. Influences and perspectives from Africa, the Caribbean, and South America will also be covered. The course will thus provide a broad background in African American culture and history, an introduction to the methodologies of several disciplines, and discussion of particular contemporary and historical issues such as slavery, segregation and integration, the Civil Rights Movement, Pan-Africanism, Afrocentrism, and current political debates.

A&S 5505 Career Education And Transition In Special Education Credits: 3
This course is designed to increase awareness and knowledge about current disabilities legislation, vocational education, vocational rehabilitation, quality transition programs, school to work, self advocacy, workplace accommodations and comprehensive life skills learning.

Prerequisites: EDUC-SP 407 (or equivalent).

A&S 5509 Methods Of Inq: Research Issues And Methods In The Liberal Arts Credits: 3
This course serves as an introduction to various methods of inquiry and research in the humanities, social sciences, and sciences. This course includes graduate level instruction in library research use of computer generated research tools and a strong emphasis on academic writing.

A&S 5515 The Aging Body: Causes and Consequences Credits: 3
This course will explore biological changes that occur with aging. Plasticity, frailty, stress, coping, and chronic illness will be viewed through the bi-psycho-social lens. Biomedical discoveries and implications for the future of aging will be discussed.

A&S 5520 Critical Choices: Final Research Project And Capstone Seminar Credits: 3
This seminar is designed as a capstone experience for students in the last semester of their studies in the Master of Arts in Liberal Studies program. Each student defines a final research project, spends the semester developing it, and presents his or her findings to the seminar at the conclusion of the course. Each project is intended to be thought-provoking and to be researched from an interdisciplinary point of view.
A&S 5535 Directed Studies In Liberal Arts Credits: 1-3
Open to students in the Master of Arts in Liberal Studies Program, this course offers students the opportunity to pursue independent work at the graduate level on selected topics of an interdisciplinary nature, working with faculty members from at least two different departments. The course may not be repeated beyond a total of three credit hours.

A&S 5540 Liberal Arts Thesis Credits: 1-3
Open to students in the Master of Arts in Liberal Studies Program who wish to include a written thesis in their program of studies. The course may not be repeated beyond a total of three credit hours.

A&S 5550 Seminar In Social Science Perspectives Study Of Community Credits: 3
A&S 5571A Seminar In The Social Sciences Credits: 1-6
This is a designated Arts and Sciences course which gives all departments in the College the flexibility to offer, on demand and as the need arises, a graduate level seminar in a particular area of specialization in any discipline in the college. The individual departments determine the content of the course in any given term in the same manner as any seminar is currently handled.

A&S 5572 Seminar In Philosophy Of Science I Credits: 3
A&S 5591 Practicum In Community Social Science Research Credits: 3
A&S 5592 Field Practicum In Aging Credits: 3-8
Students spend 180-480 hours in a field placement with the supervision in a community agency or organization which services or advocated for older persons and keep a journal documenting and reflecting on the practicum activities and experiences, particularly as related to gerontological theory and research. Students will study a particular subject relevant to their placement and describe this in a written project.

A&S 5899 Required Graduate Enrollment Credit: 1

Pace - Interdiscip Studies Courses
INT-DISC 380P People With Special Needs: Education Planning Credits: 4
This course will address educational and psychological assessment strategies that result in a diagnosis of disability. Various specific disabilities and legal parameters for public education of people with disabilities will be discussed. Students will learn how to read and understand various educational and psychological assessment reports and will become knowledgeable about how to access community supports and services to address special needs in an education setting. By the end of the course students will have created a personal notebook of educational planning and accommodations for use as a resource for parents, teachers, or students in educational settings.

INT-DISC 381P People With Special Needs: Career Exploration Credits: 4
This course will address the issues that arise in career exploration and planning for people with a disability diagnosis. Students will become familiar with the philosophy of community inclusion and will learn how to plan based upon the unique strengths and interest of the individual. Career exploration tools will be explored in class and as assigned, and students will create a personal notebook to be used as a resource tool of accommodation materials and aids.

INT-DISC 382P People With Special Needs: Disability Service Settings Credits: 4
Independent study course: Students will meet at specific times as a group with the instructor, will write a term paper, and complete a 20 hour practicum in a pre-approved disability service setting.

INT-DISC 482P The Meanings Of Masculinity In Contemporary U.S. Culture Credits: 4
Topics include: Perspectives on Masculinity; Boyhood; Collegiate Masculinities: Privilege and Peril; Men and Work; Men and Health: Body Mind; Men in Relationships; Male Sexualities; Men in Families; Masculinities in the Media; Men, Movements, and the Future. Small and large group discussions are anticipated in the classroom. Outside of the classroom, students will be expected to complete a series of assignments that are relevant to the topics at hand. This course would ideally incorporate UMKC faculty/staff and individuals/groups outside of the university who have completed research/work that seeks to understand men's lives better.

INT-DISC 483P Artful Man Embodied: Cultural Icons of Masculinity Credits: 4
This course will examine a variety of mediums used to "embody" meanings of masculinity (with special attention paid to shifting settings for one media source can alter its meaning drastically simple by being located in a different venue and/or time). This course will incorporate tours of, and works from, the Nelson-Atkins and Kemper Museums. Images by/of :men" to be examined include those found in the work of selected "masculine icon" authors; those found in popular culture; and those found in the everyday (seemingly mundane) worlds of family, work, and medicine. As the title of the course implies, students will explore historical ideas about bodies/embodiment (be they scientific, religious, social, etc.) into their image exploration.

Pace - Integrated Studies Courses
INTGR 200 Intermediate Pre-Hospital Life Support Credits: 4
This course is designed to increase the scope of practice for the Emergency Medical Technician who is considering becoming a paramedic. It encompasses EMS operations, and the management of various medical and trauma emergencies at the Intermediate level. Note: Admitted students in the UMKC Paramedic Program.
INTGR 200L Intermediate Pre-Hospital Life Support Laboratory Credits: 2
Laboratory applications for emergency medical science.
Prerequisites: Admitted student in the UMKC Emergency Medical Services Paramedic Program.

INTGR 201 Advanced Pre-Hospital Life Support I Credits: 4
This course encompasses EMS operations, as well as roles and responsibilities. Airway management, IV therapy, and management of various medical emergencies will be addressed. Students acquire the skills necessary to perform paramedic-level skills. These skills are practiced in the laboratory and clinical setting under close supervision.
Prerequisites: INTGR 200.

INTGR 202 Advanced Pre-Hospital Life Support II Credits: 4
This course encompasses the management of patients in the prehospital setting. Students acquire skills to perform interventions in the paramedic scope of practice. Skills are practiced in the laboratory and clinical settings under supervision, and during field internship with an ambulance provider. Note: Admitted students in the UMKC Paramedic Program.
Prerequisites: INTGR 201.

Natural Science, General Courses
NAT-SCI 101P Changing Life On Earth Credits: 4
This course presents an overview of issues relating to our ever changing world. It is research oriented with papers required on topics dealing with behavior, environmental issues, and aspects of evolution.
Co-requisites: NAT-SCI 102P.

NAT-SCI 102P Fundamentals Of Life Science Credits: 4
This course emphasizes the essential properties of biological systems through four major themes: diversity, the chemical and physical basis of life, continuity, and the organismal nature of life.
Co-requisites: NAT-SCI 103P.

NAT-SCI 103P Applications Of Life Sciences Credits: 4
This course is designed to provide students with laboratory exercises, field trips, films and discussions that help apply biological principles from 102P. New concepts are introduced throughout the course.
Co-requisites: NAT-SCI 102P.

NAT-SCI 130 Physics of Sports Credits: 3
A course intended for liberal arts students focusing on the physics involved in different sports. Physical laws and technological developments that impact sports will be studied.

NAT-SCI 140 How Things Work Credits: 3
A course intended for liberal arts students focusing on the principles of operations, histories, and relationships of objects from our daily environment. The areas of investigation include mechanical and thermal objects, electromagnetism, light, special materials and nuclear energy.
Co-requisites: NAT-SCI 140L.

NAT-SCI 140L How Things Work Laboratory Credit: 1
Simple experiments based on everyday experiences are analyzed in terms of conceptual physics. The material includes elements of mechanics of a rigid body, elastic properties of matter, fluid dynamics, thermodynamics, electromagnetism, optics and modern physics.
Co-requisites: NAT-SCI 140.

Cross Listings: Physics 140L and Phy-Sci 140L.

NAT-SCI 150 Astronomy: Motions of the Cosmos Credits: 3
An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the fundamental laws of gravity and motion crucial to the formation of stars and planetary systems, the growth of black holes and galaxies, and the evolution of cosmic structure.

NAT-SCI 153L Introductory Astronomy Laboratory Credits: 2
An introductory exploration of astronomical phenomena and concepts through quantitative laboratory activities requiring data collection, analysis and interpretation. This course is open to students from all majors. Concurrent enrollment in either NAT-SCI 150 or NAT-SCI 155 is encouraged but not required.

NAT-SCI 155 Astronomy: Starlight and Star Stuff Credits: 3
An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the interactions between light and matter crucial to the life and death of stars, the analysis of starlight and interstellar chemistry, and the interpretation of cosmic history.

NAT-SCI 171 Physics For Future Presidents Credits: 3
A course intended for liberal arts students focusing on the physics they need to be informed citizens in a democracy. Energy, global warming, terrorism, and health are examples of the important topics examined from the perspective of how science should inform policy.
NAT-SCI 375P Nature Of Science Credits: 4
Selected topics from the natural sciences. Provides students fundamental principles and concepts of various physical and mathematical sciences. Lectures, demonstrations and discussions provide an integrated approach to the natural sciences.

NAT-SCI 425P Introduction To Quantitative Methods Credits: 3
Topics addressed are the scientific approach to study of behavior (goals of science, research terminology, variables, distributions, measures of central tendency, confidence intervals, use of research methods and ethics in research), experimental design (validity, reliability, design and sampling techniques), and interpretation of research results. Course includes in-class computer data entry and analysis.
Prerequisites: COMP-SCI 101 and MATH 110 or MATH 116

Physical Science Courses

PHY-SCI 110 Foundations Of Physical Sciences I Credits: 4
Fundamental principles and concepts of the various physical and mathematical sciences, integrated by the history and philosophy of science.

PHY-SCI 110L Foundations Of Physical Sciences, Laboratory I Credit: 1
General laboratory and discussion sessions on various topics in the physical and mathematical sciences.

PHY-SCI 130 Physics of Sports Credits: 3
A course intended for liberal arts students focusing on the physics involved in different sports. Physical laws and technological developments that impact sports will be studied.

PHY-SCI 140 How Things Work Credits: 3
A course intended for liberal arts students focusing on the principles of operations, histories, and relationships of objects from our daily environment. The areas of investigation include mechanical and thermal objects, electromagnetism, light, special materials and nuclear energy.
Co-requisites: PHY-SCI 140L.

PHY-SCI 140L How Things Work Laboratory Credit: 1
Simple experiments based on everyday experiences are analyzed in terms of conceptual physics. The material includes elements of mechanics of a rigid body, elastic properties of matter, fluid dynamics, thermodynamics, electromagnetism, optics and modern physics.
Co-requisites: PHY-SCI 140.

PHY-SCI 150 Astronomy: Motions of the Cosmos Credits: 3
An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the fundamental laws of gravity and motion crucial to the formation of stars and planetary systems, the growth of black holes and galaxies, and the evolution of cosmic structure.

PHY-SCI 153L Introductory Astronomy Laboratory Credits: 2
An introductory exploration of astronomical phenomena and concepts through quantitative laboratory activities requiring data collection, analysis and interpretation. This course is open to students from all majors. Concurrent enrollment in either PHY-SCI 150 or PHY-SCI 155 is encouraged but not required.

PHY-SCI 155 Astronomy: Starlight and Star Stuff Credits: 3
An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the interactions between light and matter crucial to the life and death of stars, the analysis of starlight and interstellar chemistry, and the interpretation of cosmic history.

PHY-SCI 171 Physics For Future Presidents Credits: 3
A course intended for liberal arts students focusing on the physics they need to be informed citizens in a democracy. Energy, global warming, terrorism, and health are examples of the important topics examined from the perspective of how science should inform policy.

PHY-SCI 410A Selected Topics In Contemporary Science Credits: 3
PHY-SCI 410B Selected Topics In Contemporary Science Credits: 3
PHY-SCI 410C Selected Topics in Contemporary Science Credits: 3
PHY-SCI 410P Selected Topics In Contemporary Science Credits: 3
Selected Topics In Contemporary Science

PHY-SCI 410PF Selected Topics In Contemporary Science Credits: 3

PHY-SCI 435 Selected Topics In The History Of Science Credits: 3
Selected Topics In The History Of Science
PHY-SCI 435P Selected Topics In The History Of Science Credits: 3
PHY-SCI 435PF Selected Topics In The History Of Science Credits: 3

Social Science Courses

SOC-SCI 301P Varieties - People and Society Credits: 4
This course will entail an intensive study of the sociocultural patterns in a selected nation. The discussions will focus on ethnic, racial and religious diversity in various national settings integrated with material in Soc Sci 303P.
Prerequisites: Block XVI or equivalent.

SOC-SCI 302P Power and Authority Credits: 4
This weeknight course is intended to deal with the issues of power and authority as they bear on people at the individual, family, social and political levels. The intent of the course is to discuss the issues of control, power, authority and the limits of obedience.

SOC-SCI 395C Economics Of Energy Credit: 1
See ECON 395C.

SOC-SCI 465P Human Resources In The Service Industry Credits: 4
This course will trace the historical development, and examine current policies and procedures of human resources in service organizations. Special emphasis will be placed on understanding the evolving importance of employees in developing systems to meet operational goals. Management and labor perspectives on legal employment issues, compensations issues, and team development strategies will be examined.

SOC-SCI 5610 Philosophy Of Social Science Credits: 3
This course examines the development of the philosophy of science since the end of the 19th century. In this regard, Positivism, Conventionalism, and Realism as the three major conceptions of science will be studied and their significance as philosophical foundations of the social sciences will be assessed. Particular attention will be given to the emerging philosophy of science (i.e., Scientific Realism) which has profoundly challenged the more established Positivism.

SOC-SCI 5621 Consensus Social Theory Credits: 3
This course explicates the connections between mainstream (or orthodox) approaches in the various social sciences, which can be collectively viewed as Capitalist interdisciplinary social theory. Explication entails positivist philosophy of science, classic liberal political philosophy, neo-classical economics, pluralist political science, human ecology and functionalist sociology.
Prerequisites: SOC-SCI 5610.

SOC-SCI 5622 Pragmatism & Evolutionary Social Theory Credits: 3
Drawing on the classical pragmatism of Peirce and Dewey as the philosophical framework for inquiry, and the institutional economics of Veblen, Commons, Mitchell, and Ayres, this course develops Evolutionary Social Theory as a paradigm for interdisciplinary social science.

SOC-SCI 5630 Seminar in Research Methodology Credits: 3
This course assists students with the establishment of a framework for their dissertation research that represents a substantive integration of their coordination discipline with the SSC program. The ultimate goal of the seminar is a defensible dissertation proposal for each student. Includes opportunity for participation by supervisory committee members.
Prerequisites: SOC-SCI 5610, SOC-SCI 5621, and 1 Critical Theory course.

SOC-SCI 5641 History of a Social Science Discipline Econ Credits: 3
The course examines the social and political development of economics that underpins the development of economic theory in the 20th century.
Prerequisites: SOC-SCI 5610.

SOC-SCI 5690 Special Doctoral Reading in Social Science Credits: 1-3
Special Research Topic in Interdisciplinary Social Science at The Doctoral Level
SOC-SCI 5690A Special Topics Credits: 1-3
SOC-SCI 5690B Special Topics Credits: 1-3
SOC-SCI 5690C Special Topics Credits: 1-3
SOC-SCI 5899 Required Graduate Enrollment Credit: 1

Department Description
The Department of Architecture, Urban Planning and Design has three degree programs to choose from.

One degree program is a B.A. in Urban Planning and Design. This degree program is a four-year degree and can be completed at UMKC in its entirety.

The second degree program leads to a degree in one of the following professional areas: architecture, landscape architecture and interior architecture. This track is a two-year program, offered in conjunction with Kansas State University's College of Architecture, Planning and Design.

The third degree program is a B.A. in Urban Studies. The urban studies program prepares students for careers dedicated to understanding the city and improving the life of urban societies. The program provides students with analytical skills vital to the study of the city and urban life. Working to fulfill UMKC's mission of urban engagement, the program and its students actively participate in community partnerships.

UMKC is an urban university, and architecture, urban planning and design is consistent with our vision for our community and region. Kansas City is a great urban laboratory. Few American cities have the planning and design tradition of Kansas City. We think this sets us apart, and places the students within a professional community with unmatched resources, whether one is studying architecture, interior architecture, landscape architecture or urban planning and design.

As the United States population continues to grow and is concentrated in metropolitan areas, urban planning and design is becoming a societal imperative. Planners address diverse public issues affecting where people live, work, and play; where they shop and receive health care; how they get from place to place; what our communities look like; and how we use our resources.
Admission and Advising

Admission to the Department of Architecture, Urban Planning and Design is selective. Seats are limited to 36 incoming students in the Architectural Studies curriculum. Interested students can call or email the department and schedule an appointment for a visit with one of our advisors.

Financial Aid

Many scholarships and student financial aid opportunities are available. Every year approximately 80 percent of our students have some form of scholarship. For students who qualify, UMKC can be a great resource for scholarship assistance. Contact the UMKC Financial Aid Office, phone: (816) 235-1154, website: http://www.umkc.edu/finaid for scholarship information.

Student Activities

The department supports two student organizations.

Planning and Design Students (PDS) is a student organization for students studying Urban Planning and Design. The students interact with the local APA (American Planning Association) chapter in a variety of activities. A group of students attend the national conventions that are held in various locations around the country every year.

The American Public Works Association (APWA) is a student organization that consists of a multidisciplinary group (i.e. engineering, geosciences, public administration) from across the campus.

Faculty

John Eck Associate Teaching Professor of Architecture; B.Arch. (Kansas State University); M.Arch. (University of Virginia); R.A. Email: eckj@umkc.edu, phone (816) 235-5245

Stephanie Frank Assistant Professor of Urban Planning and Design; M.A. (University of Maryland); Ph.D (University of Southern California) Email: franksb@umkc.edu, phone (816) 235-2999

Michael Frisch Associate Professor of Urban Planning and Design; M. City Planning (Massachusetts Institute of Technology); Ph.D. (Rutgers University); A.I.C.P. Email: frischm@umck.edu, phone (816) 235-6369

Clara Irazabal-Zurita Professor of Urban Planning and Design, Director of the Latinx and Latin American Studies Program; M.S.(Central University of Venezuela); M.Arch and Ph.D. (University of California at Berkeley); Email: irazabalzuritac@umkc.edu, phone (816) 235-2541

Sungyop Kim¹,² Associate Professor of Urban Planning and Design; M. Urban and Regional Planning (University of Hawaii); Ph.D. (University of Washington) Email: kims@umkc.edu, phone (816) 235-6898

Joy D. Swallow Chair, Department of Architecture, Urban Planning and Design, and Professor of Architecture; B.Arch. (Kansas State University); M.Arch. (University of Pennsylvania); F.A.I.A. Email: swallowj@umkc.edu, phone (816) 235-2998

Jacob A. Wagner¹,² Associate Professor of Urban Planning and Design; B.A.,M.S. (University of Oregon); Ph.D. (University of New Orleans) Email: wagnerjac@umkc.edu, phone (816) 235-6053

¹ Members of UMKC Graduate Faculty
² Members of UMKC Doctoral Faculty

Undergraduate

Undergraduate Degrees:

- Architectural Studies Major (p. 45)
- Bachelor of Arts in Urban Planning and Design (p. 48)
- Bachelor of Arts in Urban Studies (p. 52)
- Minor in Urban Studies (p. 58)

Graduate

Graduate Programs (p. 46)

- Graduate Certificate in Historic Preservation (p. 46)
Architectural Studies Courses

ENV-DSN 110 The Meaning Of Architecture Credits: 3
Architecture is a visual and physical expression of civilization. This course will introduce to the student an understanding and appreciation of architecture and our built environment through a broad examination of cultural and aesthetic paradigms. May not be taken for credit by students enrolled in the Architectural Studies curricula.

ENV-DSN 201 Environmental Design Studio I Credits: 4
Foundation studies introducing the principles, processes and vocabularies of environmental design. Instruction in two and three dimensional visualization of objects and spaces. Instruction in the use of instrument-aided drawing, freehand drawing and model building to represent and communicate design ideas at different scales of observation.

ENV-DSN 202 Environmental Design Studio II Credits: 4
Continuation of ENV-DSN 201.
**Prerequisites:** ENV-DSN 201.

ENV-DSN 203 Survey of the Design Professions Credit: 1
Overview of the design professions. Comparative study of the roles of the architect, interior architect, interior designer, landscape architect, and planner; their working methods, collaborative endeavors, and interaction with consultants and specialists. Description of career paths, educational alternatives, licensure, and professional organizations.

ENV-DSN 248 Fundamentals of Architectural Technology Credits: 3
Instruction in the fundamentals of architectural technology with emphasis on the concepts and principles necessary for developing an integrated approach to building design.

ENV-DSN 250 History of the Designed Environment I Credits: 3
This course will present an overview of the developments in architectural, urban, landscape and interior design which have had an impact on the physical environment from ancient times through the medieval up to the gothic period. A central objective of the course is to gain an understanding of why these developments occurred and how the needs and aspirations of a given time were manifested in physical form.

ENV-DSN 251 History of the Designed Environment II Credits: 3
This course will present an overview of the developments in architectural, urban, landscape and interior design which have had a consequential impact on the physical environment of the Western world from the Italian Renaissance (starting in the 15th century) up to the present day.

ENV-DSN 252 History of the Designed Environment III Credits: 3
The history of the designed environment from the mid-18th century to the present.

ENV-DSN 301 Architectural Design Studio I Credits: 5
Instruction in architectural design focusing on the application of elements and principles of form and space in design. Instruction in the use of techniques for visually representing design ideas.
**Prerequisites:** ENV-DSN 202.

ENV-DSN 302 Architectural Design Studio II Credits: 5
Instruction in architectural design focusing on the synthesis of basic social, functional, technical, and aesthetic factors in design. Continued instruction in techniques for visually representing ideas.
**Prerequisites:** ENV-DSN 301.

ENV-DSN 347 Structural Systems in Architecture I Credits: 4
Introduction to structure as a building system. Overview of contemporary structural systems and heir components, including wood, timber, steel, concrete, masonry, and hybrid structures. Discussion of building code requirements for structure, general guidelines for building structures, including appropriate application, and methods for schematic estimation of structural member sizing. Basic understanding of how gravity and lateral forces are propagated through a structural frame from load to building foundation.
**Prerequisites:** MATH 110, PHYSICS 210.

ENV-DSN 433 Building Construction Systems in Architecture I Credits: 3
In this lecture course, students develop an understanding of how materials and systems assembly reinforce and extend the intentions of the designer as well as an understanding of the strategies and techniques for integration and coordination of the building components.
**Prerequisites:** ENV-DSN 248.

Urban Planning Design Courses

UPD 203 GIS For Urban Planning Credits: 3
This introductory level GIS course is designed to expose planning students to Geographical Information Systems (GIS). Students will learn basic concepts and theories of GIS and applications of GIS software with hands-on experience. Students will also learn how to search for demographic, socio-economic, land use, transportation, and geospatial data, and how to use such data for their academic research and professional planning work with GIS. Students will apply GIS to the multiple scales of planning work.
UPD 260 History Of Planning And Urban Design Credits: 3
An overview of planning history with an emphasis on the 19th and 20th centuries. The historic framework will include urban history, the rise and development of urban planning, urban design, and social theory and how these areas have affected the shape of our cities.

UPD 280 Land Use Planning Credits: 3
This course explores the basic principles of plan making, land use development and regulation. Students are introduced to contemporary planning and policy issues. Including land use conflicts and alternative models for sustainable planning, design and management. Students will learn how to develop a land use plan using Geographic Information Systems (GIS) and other design tools. An introductory GIS course (UPD 203) is highly recommended.

UPD 300 Quantitative Planning Methods And Techniques Credits: 3
Statistical analysis and other analytic techniques of data gathering. Data and problems framed from complex, real world situations. Competence in firsthand research; survey design; case study method; data gathering methods such as observation, open-ended interviewing and questionnaires.

UPD 310 Planning And Design Studio I Credits: 4
This Urban Planning + Design studio course will introduce methods for analyzing urban spaces at the site and neighborhood level. Students will actively solve problems related to the physical planning of cities and communities while continuing to develop abilities in methods of written, oral and graphic presentation.
Prerequisites: ENV-DSN 201 and ENV-DSN 202 with a grade of C- or better.

UPD 312 Planning And Design Studio II Credits: 4
Studio instruction in urban planning and design focusing on the synthesis of land use analyses, regulatory reviews, urban design issues, and public participation facilitation. Continued instruction in techniques for visually presenting planning and design ideas.
Prerequisites: UPD 300, UPD 310 with a grade of C- or better.

UPD 320 Planning Theory And Practice Credits: 3
This course examines contemporary urban planning and design practice. Theories about planning practice and related case studies will be the basis of this course. Topics covered will include the definition of urban planning, the idea of the "public realm," planning/design expertise and the rational model, the role of diversity, public participation, communicative planning, advocacy and equity planning, ethics comprehensiveness and the limits of planning. The course will include assignments that will build student's ability to write quick and analytical assessments, often required in planning practice. Students will be required to attend public planning forums in and around the region.

UPD 332 Environmental Sustainability Credits: 3
Explores the meaning of sustainability at the personal, governmental and global levels. We will discuss the scientific facts of climate change and ecology, the role of individual and collective choice, and positive approaches for society being developed around the world. No prerequisites. This course is open to all and highly recommended for Environmental Studies majors.

UPD 332CZ Environmental Sustainability Credits: 3
This course will introduce the concept of sustainability and review how sustainability might work at the individual, neighborhood, state, nation and global scales. Students will participate in some form of community engagement on sustainability as well as reflect upon how their own practices impact the environment. Counts toward AS Interdisciplinary "Cluster course." Key course in sustainability minor.

UPD 340 Neighborhood And Community Development Credits: 3
Course provides a comprehensive introduction to the field of community development and neighborhood planning. The development of theoretical models that explain neighborhood change and history in the U.S. will serve as the basis. Issues explored include: community organizing, social movements, federal and state policies, and the role of planning organizations and community development corporations in neighborhood revitalization.

UPD 400 Advanced GIS For Urban Planning Credits: 3
This advanced level GIS course is designed to expose students to high level GIS techniques and geospatial analyses in urban planning. Students will learn advanced theories and geographic information tools with hands-on experiences. Students will have an opportunity to apply their knowledge and skills in GIS to a real world planning project in class.

UPD 403 GIS for Urban Planning Credits: 3
The introductory level GIS course is designed to expose graduate students to Geographical Information Systems (GIS). Students will learn basic concepts and theories of GIS and application of GIS software with hands-on experience. Students will also learn how to search for demographic, socio-economic, land use, transportation, and geospatial data.

UPD 410 Planning And Design Studio III Credits: 4
Instruction in problem analysis and plan development for defined urban or suburban location with multiple constituencies.
Prerequisites: UPD 312 and not more than one grade of D in a UPD studio course.

UPD 411 Professional Practice I Credit: 1
A seminar preparing students for professional practice in urban planning + design including the preparation of a professional resume and portfolio.
Co-requisites: UPD 312.
UPD 412WI Planning And Design Studio IV Credits: 5
Capstone course that incorporates a topical plan or a comprehensive plan for a client comprising a development subdivision, a community or a
redevelopment area.
Prerequisites: UPD 410 with a grade of C- or better, RooWriter.

UPD 413 Professional Practice II Credit: 1
A continuation of professional practice seminar addressing issues of professional writing in Urban Planning and Design practice.
Prerequisites: UPD 411.
Co-requisites: UPD 410.

UPD 420 Transportation Planning Credits: 3
The course provides fundamental theories, methods, and contemporary issues in transportation planning. The topics covered in this course include
the transportation planning process, transportation systems, travel demand analysis, and policy issues such as the linkage between land use and
transportation, urban transportation finance, social and environmental justice, transportation and environmental impacts, and traffic congestion.

UPD 430 Planning For Historic Preservation Credits: 3
The course provides a survey of major issues in the field of historic preservation and heritage studies from a planning perspective. Will focus primarily
on the built environment of the United States, as well as world heritage sites and international perspectives. The course will include the urban planning
techniques used for preserving historic buildings, neighborhood and districts, as well as some of the landmark legal decisions and legislation that
have shaped heritage preservation practice in the U.S. Recommended Preparation: UPD 260.

UPD 432 Urban Environment Planning And Design Credits: 3
The built environment does not exist in a vacuum. Cities operate within broad ecological processes. Effective environmental planning can protect
important natural resources while providing for a higher quality of life for urban residents. As a survey course in a subfield of urban planning, this
course introduces students to environment planning approaches and techniques.

UPD 435 Planning Law And Practice Credits: 3
Introduction to legal procedures basic to urban planning; including legal, constitutional, legislative, and administrative concepts, controls, and land-use
regulations.

UPD 472 Urban Redevelopment Credits: 3
Contemporary issues of urban redevelopment, with an emphasis on American cities, will be examined. Redevelopment processes recently completed
or underway in the greater Kansas City region will be the subject of a case study and a theoretical review by each student.

UPD 475 American Housing Credits: 3
Students will explore housing in cultural, design, and historical terms and examine contemporary American housing policy.

UPD 490 Urban Planning Internship Credits: 3
Urban planning work experience off-campus with an approved professional, Government, or non-profit agency sponsor. A contract specifying the
expected product of the internship is required between the student, agency, and faculty coordinator.
Prerequisites: UPD 203, UPD 300.

UPD 496 Directed Studies In Urban Planning Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 499 Special Topics In Urban Planning Credits: 1-3
Advanced independent research and analysis in urban planning. Topics and methods used in research, to be established by student and academic
supervisor prior to enrollment.

UPD 499A Special Topics In Urban Planning Credits: 1-3
Advanced independent research and analysis in urban planning. Topics and methods used in research, to be established by student and academic
supervisor prior to enrollment.

UPD 499B Special Topics In Urban Planning Credits: 1-3
Advanced independent research and analysis in urban planning. Topics and methods used in research, to be established by student and academic
supervisor prior to enrollment.

UPD 499C Special Topics In Urban Planning Credits: 1-3
Advanced independent research and analysis in urban planning. Topics and methods used in research, to be established by student and academic
supervisor prior to enrollment.

UPD 5526 History of Urban Planning & Design Credits: 3
The course provides a survey of the history of urban planning and design with emphasis on the nineteenth and twentieth centuries in the United
States. The course also teaches basic historic research methods.

UPD 5596 Directed Study In Urban Planning And Design Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5596A Directed Study In Urban Planning And Design Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the instructor.
UPD 5596B Directed Study In Urban Planning And Design Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5596C Directed Study In Urban Planning And Design Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5599 Special Topics In Urban Planning And Design Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5599A Special Topics In Urban Planning And Design Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5599B Special Topics In Urban Planning And Design Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5599C Special Topics In Urban Planning And Design Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5599D Special Topics In Urban Planning And Design Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5630 Quantitative Planning Methods I Credits: 3
This course introduces graduate students to quantitative methods in urban planning analysis. Topics include relating built form to function, demographic forecasting, economic impact analysis, trip generation, and housing market dynamics.

**Prerequisites:** STAT 235.

UPD 5700 Advanced Planning Theory & Practice Credits: 3
Exploration of contemporary planning theory and practice, including planning knowledge, skills, values, and ethics.

UPD 5710 Historic Preservation Studio Credits: 3
Studio instruction in historic preservation planning focusing on research, context, evaluation, policy, and plan creation for historic resources.

UPD 5740 Advanced GIS for Urban Planning Credits: 3
This advanced level GIS course is designed to expose graduate students to high level GIS techniques and geospatial analysis in the urban planning context. Students will learn data management skills in GIS and advanced geoprocessing tools with hand-on experiences. Students will also have an opportunity to work on a real world GIS project as part of course requirements.

**Prerequisites:** UPD 203 (or equivalent).

UPD 5742 Transportation Planning Credits: 3
This course provides fundamental theories, methods, and contemporary issues in transportation planning. The topics covered in this course include the transportation planning process, transportation systems, travel demand analysis, and policy issues such as the linkage between land use and transportation and environmental impacts, and traffic congestion.

UPD 5743 Introduction to Historic Preservation Credits: 3
The course introduces the history and theory of historic preservation through a survey of major issues in the field from a planning perspective. The course focuses on preservation through cultural, social, historical, legal, policy, and economic lenses, primarily in the United States.

UPD 5744 History of the Built Environment Credits: 3
Survey of the built environment concentrating on nineteenth and twentieth century design in the United States.

UPD 5745 Historic Preservation Methods Credits: 3
Exploration of historic preservation methods, including survey, documentation, policy, and management approaches used in practice.

UPD 5746 Urban Environmental Planning Credits: 3
Urban environmental planning examines ecological change due to urbanization. It looks at ways to measure and demonstrate ecological change at the site, neighborhood, and regional scales. Students incorporate environmental ideas and policies into plans developed for a client.

UPD 5747 Urban Redevelopment Credits: 3
This course examines techniques of urban redevelopment within urban planning and real estate. Graduate students learn about the development process, real estate markets, techniques of development finance and local policy approaches to urban redevelopment incentives.

UPD 5750 American Housing Credits: 3
Students will explore housing in cultural, design, and historical terms and examine contemporary American housing policy.

UPD 5790 Historic Preservation Internship Credits: 3
Off-campus work experience with an approved professional, government, or nonprofit agency sponsor.

**Prerequisites:** UPD 5743.

**Urban Studies Courses**

URBAN ST 100 Neighborhood And Community Development Credits: 3
Course provides a comprehensive introduction to the field of community development and neighborhood planning. The development of theoretical models that explain neighborhood change and history in the United States will serve as the basis. Issues explored include: Community organizing, social movements, federal and state policies, and the role of planning organizations and community development corporations in neighborhood revitalization.
URBAN ST 340 Neighborhood and Community Development Credits: 3
Course provides a comprehensive introduction to the field of community development and neighborhood planning. The development of theoretical models that explain neighborhood change and history in the U.S. will serve as the basis. Issues explored include: community organizing, social movements, federal and state policies, and the role of planning organizations and community development corporations in neighborhood revitalization.

URBAN ST 495 Urban Studies Internship Credits: 1-6
Students obtain directed practical experience working with non-profits, governments, or private enterprises. Duties will vary based on contractual agreement between the student, host organization, and the professor.
Prerequisites: junior standing or higher.

URBAN ST 499WI Urban Studies Seminar Credits: 3
This is the capstone course in the Urban Studies Program and is required for majors in the junior/senior year. Students critique urban research and prepare a paper and an oral presentation on an approved topic.
Prerequisites: RooWriter.
Architectural Studies Major

Architectural Studies is a two-year cooperative program with Kansas State University that began in 1987. The accredited curriculum at the KSU College of Architecture Planning and Design is offered at UMKC for the first two years of study. After successfully completing the coursework at UMKC, students are eligible for entry to Kansas State University, College of Architecture Planning and Design. There, students can study architecture, interior architecture and landscape architecture. Students must maintain a minimum 2.75 GPA in the Architectural Studies program.

Architectural Accreditation

The Kansas State University College of Architecture, Planning and Design (with which the UMKC Architectural Studies Program collaboratively participates) is accredited by the National Architectural Accrediting Board (NAAB).

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes two types of degrees: the bachelor of architecture and the master of architecture.

A program may be granted a five-year, three-year, or two-year term of accreditation, depending on its degree of conformance with established educational standards.

Master’s degree programs may consist of a pre-professional undergraduate degree and professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree...
Graduate Certificate in Historic Preservation

Student Learning Outcomes

Students graduating from this program will:

- demonstrate the ability to identify, synthesize, and interpret historic resources.
- demonstrate the ability to apply historic preservation methods and techniques.
- demonstrate effective professional writing and communication skills.

The highest standard for historic preservation education is membership in the National Council for Preservation Education (NCPE). Once approved, the program will seek membership. The program has been designed in accordance with NCPE membership standards, which are found at the following link: http://www.ncpe.us/about-ncpe/standards/

The certificate requires 18 credits (six 3-credit courses), as follows:

Bachelor of Arts in Urban Planning and Design

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes

Students graduating from this program will:

• Knowledge of structure and functions of urban settlements.
• Knowledge of history and theory of planning processes and practices.
• Knowledge of administrative, legal and political aspects of plan-making and policy implementation.
• Knowledge of familiarity with at least one area of specialized knowledge of a particular subject or set of issues.
• Skill in problem formulation, research skills and data gathering.
• Skill in quantitative analysis and computers.
• Skill in written, oral and graphic communication.
• Skill in collaborative problem solving, plan-making and program design.
• Skill in synthesis and application of knowledge to practice.
• Value in issues of equity, social justice, economic welfare and efficiency in the use of resources.
• Value in the role of government and citizen participation in a democratic society and the balancing of individual and collective rights and interests.
• Value in respect for diversity of views and ideologies.
• Value in the conservation of natural resources and of the significant social and cultural heritages embedded in the built environment.
• Value in the ethics of professional practice and behavior, including the relationship to clients and the public, and the role of citizens in democratic participation.

The Urban Planning and Design program provides an innovative curriculum that incorporates a combination of broad liberal arts courses, with a core of professional planning classes, coupled with a series of design studios. The design studio represents a forum where students employ a creative process, infused with knowledge gained from supporting courses, to generate holistic urban planning and design solutions. Urban design projects will engage professionals, civic officials, neighborhood leaders and government officials into an important dialogue.

Admission to the program is selective and reviewed by the UPD program.

'Total credits' in this section indicates the number of General Education Core credit hours that are not met by the degree specific requirements outlined below.

Total Credits  21

1 See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.

Constitution Course Requirement
Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have "satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions."

Courses at UMKC that satisfy this state requirement are:

</tbody>
</table>

Total Credits  3

1 Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements
Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

1 ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.
2 This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

## Major Requirements

Students must successfully complete the major requirements below with at least 12 hours of the noted upper division (300+) course requirements completed at UMKC.

</tr>
</tbody>
</table>
The Department will review other related urban social science classes as needed.

**General Electives**

Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

<table>

</tbody>
</table>

**Minimum GPA: 2.0 (2.5 in all major coursework)**

**Total Credit Hours 120**

**Tools for Planning and Fulfilling Academic Requirements**

UMKC's Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit".

In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC's Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student's officially recorded (Office of Registration and Records) and "what if" plans of study. This evaluation is used to certify all graduation requirements.

UMKC's Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Bachelor of Arts: Urban Studies

University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes
Students graduating from this program will:

- Be able to analyze how gender, ethnicity, and race play important roles in understanding the city. They will be exposed to the broader public through internships in the community.
- Be able to analyze how local, regional, and state governments and related institutions interact.
- Be able to describe how the urban society is structured in interrelated sectors that influence each other locally and interact with sectors beyond the local city.
- Be able to interpret demographic patterns at various scales, from the city block to the metropolitan area.
- Be able to design and implement a research project analyzing a specific urban issue.

‘Total credits’ in this section indicates the number of General Education Core credit hours that are not met by the degree specific requirements outlined below.

Total Credits 24

1 See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.
Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CJC 364</td>

<tr>
<td>POL-SCI 210</td>
<td>American Government (Focus C)</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 3

1 Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

<table>

Total Credits 22

1 ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.

2 This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

Major Requirements

It is recommended to take one or more of these Anchor courses, depending on what your admittance level would be: ANCH 102, ANCH 206, ANCH 211, ANCH 301.

During the first 60 hours of coursework, students are advised to fulfill prerequisites for core courses and for required courses in the urban studies concentration they choose. At the same time, students should fulfill general graduation requirements, where possible, through completion of courses listed under College of Arts & Sciences Degree Requirements.
It is recommended that students planning an Urban Studies major take ENV-SCI 110R, ENV-SCI 210, or GEOLOGY 220 to satisfy part of the Science and Math Division of CAS requirements. In preparation for the core requirements of the urban studies major, the student should take ECON 201, SOCIOL 101, GEOG 105 and PSYCH 210.

When prerequisites and general requirements have been satisfied, students must complete for the urban studies major:

- Core course requirements: 22 hours
- Interest area requirements: 18 hours

Total hours required for the major in urban studies: 40 hours

Students must successfully complete the major requirements below with at least 12 hours of the noted upper division (300+) course requirements completed at UMKC.

</tbody>
</table>

Minimum GPA: 2.0

Total Credit Hours: 120
Interest Areas (18 hours)

In addition to the core requirements, 18 hours should be taken in an interest area:

- Community Development and Housing
- Community Organization and Social Services
- Urban Policy/Management

In consultation with an advisor, selected by the student or designated by the program director, students are expected to develop a program (reflecting interest and applicability to career goals) in one interest area: a recommended course and five electives from those listed under the interest area chosen. Students may not double count any core courses toward the 18 hours.

**Total Credits** 18

**NOTE:** Courses counted towards the core requirements cannot be double-counted for the Interest Area

**Internship (3-6 hours)**

In developing internships, students should first contact the urban studies director.

The student is expected to participate in work activities in a community organization and receive instruction from agency staff for a minimum of 240 hours on site by the end of the program.
The internship may be repeated up to a maximum of two semesters and should be taken as URBAN ST 495. Other internship courses may satisfy this requirement with approval of the advisor.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC's Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student's officially recorded (Office of Registration and Records) and "what if" plans of study. This evaluation is used to certify all graduation requirements.

UMKC's Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Minor in Urban Studies

Student Learning Outcomes

Students graduating from this program will:

- appreciate how gender, ethnicity, and race play important roles in understanding the city.
- be able to demonstrate knowledge of how local, regional, and state governments and related institutions interact. They will understand how the urban economy is structured in interrelated sectors that influence each other locally and interact with sectors beyond the local city. They will understand how to interpret demographic patterns at various scales, from the city block to the metropolitan area.
- will demonstrate the ability of critical thinking about urban space.

Minimum of 9 hours from UMKC.

Courses selected to meet minor requirements cannot be double-counted.
Minor in Anthropology

Students are urged to confer with a department advisor to plan a minor. To declare a minor in anthropology, students must file a completed declaration form with a current copy of their transcript with the Anthropology Program Coordinator. Completion of the minor is recorded on the student’s transcript.

Student Learning Outcomes

Students graduating from this program will:

• Examine the role and relevance of the anthropological perspective for contemporary social life. Thus students will gain knowledge of the fundamentals in Anthropology, such as the foundations of human practice, belief, and organization.

• Reflect on contemporary issues and controversies in the academic discipline of Anthropology. Thus students will be able to examine issues of inequality, cultural difference, and social stratification from a comparative perspective, applying anthropological principles and concepts to their own lives.

• Explore the basic theoretical and methodological perspectives, both in the social sciences and in a chosen specialty area. Thus students will have the capacity to critically evaluate and engage contemporary issues, trends in theory, and instruments of social analysis.

• Advance the critical research, thinking, and writing skills that are integral to professional development and civic engagement. Thus, students will apply the fundamentals of anthropology to both experience and enhanced interest in community engagement.

Anthropology is a holistic and cross-culturally comparative science that is uniquely qualified to prepare students for multicultural work and social environments in the U.S. and abroad. Careers for anthropologists, however, lie in all areas of human interaction. Anthropologists are especially attractive to companies and government agencies that work with and for national minorities and in foreign countries.

Students will be introduced to the subject and methods of cultural anthropology, examining its foundations and current trends in theory and applications. Students earning a minor in anthropology take 3 credit hours of required coursework (ANTHRO 103) and 15 credit hours of elective courses, which result in a total of 18 credit hours. At least 9 of the 18 credit hours must be in courses at the 300- or 400-level. Where courses are cross-listed in a major and a minor, only 6 credit hours can be applied to both. Only 3 credit hours can be shared between two minors. Students should consult with the program coordinator to select the appropriate courses. A minimum grade of C in ANTHRO 103 and a minimum overall GPA of 2.0 in the minor must be attained. No more than 6 of the 18 credits may be transferred from another institution.

Department Description

The Department of Art and Art History is a dynamic environment that aims to provide all UMKC students with education and experience to develop their creative- and critical-thinking skills, their art-making abilities, and their versatility in professional and personal situations. The Department serves a variety of students, ranging from the non-major to the professionally oriented. The department offers programs leading to the Bachelor of Arts and Master of Arts degree in Art History or Studio Art, as well as minors in each area. Art History also participates in the Interdisciplinary Ph.D. program.

Students studying Art History or Studio Art obtain a broad liberal arts foundation during their educational career and receive sound fundamental training in the arts. Small class sizes combined with interactive teaching methods offer a comprehensive learning environment for the aspiring arts professional. The department also collaborates with other departments and schools, and works with the School of Education (https://catalog.umkc.edu/colleges-schools/education) on Art Education degrees.

Kansas City is nationally known for its vibrant arts scene, with the UMKC Gallery of Art, Plug Projects (http://www.plugprojects.com), and many galleries located in the Crossroads Arts District (http://www.kccrossroads.org). The department's partnerships with art organizations like Charlotte Street Foundation (http://www.charlottestreet.org), ArtsKC (http://www.artskc.org), Studios Inc (http://thestudiosinc.org), and others structure internships, networking, entrepreneurial mentoring and other professional development opportunities. Visiting artists and scholars (http://
outside the classroom, physical proximity and close professional connections to the museums, studios, galleries, and art organizations in the Kansas City community offer students additional opportunities for exposure to new ideas, media, and special events. The extensive collection of the Nelson-Atkins Museum of Art (http://www.nelson-atkins.org) is located three blocks away, and there are also major contemporary collections nearby, including those of the Kemper Museum of Contemporary Art (http://www.kemperart.org), H&R Block Artspace (http://www.kcai.edu/hr-block-artspace), the Belger Arts Center (http://www.belgerartscenter.org), and the Nerman Museum of Contemporary Art (http://www.nermanmuseum.org).

Special Resources/Programs

UMKC Gallery of Art
The department is home to the UMKC Gallery of Art (http://info.umkc.edu/gallery). The gallery organizes curated shows from visiting local, national, and international artists, as well arranging shows of student and alumni work. The annual Student Art Exhibition is a guest-juried exhibition that features the work of the current student body.

Visual Resources Library (VRL)
The department is also home to the Visual Resources Library (http://info.umkc.edu/art/about), which hosts an online collection of approximately 45,000 digital images representing significant works of Western art and architecture, ancient through contemporary; the history of photography, printmaking, decorative arts and design; and art of Islam, Asia, Africa and the Americas. The VRL is also a space that hosts workshops for student needs and development, such as informational sessions about department events/opportunities as well as special events like the VRL Book Sale.

The Nelson-Atkins Museum of Art
The University of Missouri-Kansas City is fortunate to be adjacent to one of the most comprehensive and distinguished art museums in the country: The Nelson-Atkins Museum of Art (http://www.nelson-atkins.org). In addition to having ready access to the gallery’s collection, advanced students may be privileged to use the museum's other facilities, such as the reference library, the acquisition records or the museum’s collections. Use of these facilities is undertaken only after consultation with a member of the faculty. Admission to the museum is free to everyone.

The Department maintains a close relationship with the museum through joint appointments, curator-taught seminars, student internships and other cooperative programs.

Undergraduate Admission Information

In undergraduate studies, the Studio Art (p. 78) and Art History (p. 74) programs offer Bachelor of Arts degrees. For incoming freshmen, there are no special requirements beyond those for admission to the University. Transfer students to UMKC need to meet with both a department and a general education advisor prior to beginning classes to evaluate their transcripts to determine course equivalencies.

Program Overview

Degree programs in Studio Art and Art History at UMKC are the B.A. and the M.A. Art History also participates in the Interdisciplinary Ph.D. program. All the programs provide an exciting educational experience in a liberal arts setting.

The Studio Art faculty is comprised of accomplished and actively exhibiting artists, offering courses in drawing, painting, graphic design, print media, digital imaging, motion design, and photography. The faculty of six art historians, one a joint appointment with the Nelson-Atkins Museum, offers courses in the art and architecture of Ancient, Northern Renaissance, Baroque, Modern European, Contemporary, and American, Native American, African, and African-American cultures. The strong adjunct faculty consists of local artists, art educators and professionals. Curators from The Nelson-Atkins Museum of Art (http://www.nelson-atkins.org) regularly offer advanced Art History courses, most recently on topics like Decorative Arts, Art and Patronage in 16th Century Rome, Islamic Art and the Spiritual in Contemporary Art.

Outside of the classroom, physical proximity and professional connections to the museums, studios and art organizations in Kansas City community offer students additional opportunities for internships, visiting artists, and enrichment programs to supplement coursework. Classes make use of the extensive collections at The Nelson-Atkins (http://www.nelson-atkins.org) located three blocks away, as well as the major contemporary collections in Kansas City, including those of the Kemper Museum of Contemporary Art (http://www.kemperart.org), the Belger Arts Center (http://www.belgerartscenter.org) and the Nerman Museum of Contemporary Art (http://www.nermanmuseum.org). Community arts organizations such as the UMKC Gallery of Art (http://info.umkc.edu/art/umkcgallery/contact), the H&R Block Artspace (http://www.kcai.edu/hr-block-artspace), and various art galleries located in the Crossroads Arts District (http://kccrossroads.org) lend unique learning opportunities for studio art and art history majors to experience. Research in Art History is supported by the Miller-Nichols Library (http://library.umkc.edu/node) at UMKC, the Spencer Art Reference Library (http://www.nelson-atkins.org/research/library) at the Nelson-Atkins Museum, and the Linda Hall Library (http://www.lindahall.org).

Career Opportunities

Career opportunities in Studio Art include education, arts administration and practicing art and design in fields of graphic design, interactive design, video arts, print media, photography, digital arts, painting and illustration. Graduates in the Studio Art programs at UMKC have found employment with Artist Inc (http://www.kcartistlink.org/artistinc), Hallmark (http://www.hallmark.com), Barkley (http://www.barkleyus.com), Federal Reserve Bank of Kansas City (https://www.kansascityfed.org), Epsten Gallery at Village Shalom (http://www.villageshalom.org), mySidewalk (http://
www2.mysidewalk.com), the Kansas City Municipal Commission (http://kcmo.gov/generalservices/municipal-art-commission-2) and as successful independent artists. Students have been accepted into graduate programs at institutions including the University of Missouri at Columbia (http://www.missouri.edu), Sam Fox School at Washington University (http://www.samfoxschool.wustl.edu/node/4145), Ohio State (http://www.osu.edu), Guildhall at Southern Methodist University (http://guildhall.smu.edu) and the Rhode Island School of Design (http://www.risd.edu).

Career paths in Art History include work in museums and galleries, educational institutions, and arts administration. Other career choices that mesh well with an Art History degree are publishing, art appraisal, non-profit art or history organizations, archival work, and library science. Graduates from the Art History M.A. program at UMKC have found positions at the Los Angeles County Museum of Art (http://www.lacma.org), Rhode Island School of Design, the Nelson-Atkins Museum, the H&R Block Artspace, the Kemper Museum of Contemporary Art, Avila University (http://www.avila.edu), the Wadsworth Athenaeum (http://www.wadsworthatheneum.org), and the University of North Carolina at Chapel Hill (http://www.unc.edu), as well as right here at UMKC. The M.A. degree at UMKC provides an excellent preparation for doctoral work. Degree requirements are structured to give students a thorough background in research methodology, and courses are taught by faculty actively involved in research. Our graduates have continued their work toward the Ph.D. at institutions including the University of Chicago (http://www.uchicago.edu), Princeton University (http://www.princeton.edu), Case Western Reserve University (http://www.case.edu), the University of Michigan (http://www.umich.edu), and the University of Kansas (http://www.ku.edu).

**Faculty**

Cristina Albu Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=albu); Assistant Professor of Art History; B.A. (University of Bucharest); M.A. (University of Warwick); M.A., Ph.D. (University of Pittsburgh)

Richard W. Allman Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=allman); Associate Professor of Studio Art; B.F.A. (Massachusetts College of Art); M.F.A. (Rhode Island School of Design).

Barry Anderson Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=anderson); Professor of Studio Art; B.F.A. (University of Texas at Austin); M.F.A. (Indiana University - Bloomington).

Eric J. Bransby; Professor Emeritus of Studio Art; B.A., M.A. (Colorado College); M.F.A. (Yale University).

Robert Cohon; Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=cohon); Research Associate Professor of Art History & Joint Appointment with The Nelson-Atkins Museum of Art; B.A. (Columbia University); M.A., Ph.D. (New York University).

Frances Connelly Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=connelly); Professor of Art History; B.A. (Wake Forest University); M.A. (University of Pittsburgh); M.F.A. (University of North Carolina at Greensboro); Ph.D. (University of Pittsburgh).

William G. Crist; Professor Emeritus of Studio Art; B.A. (University of Washington, Seattle); M.F.A. (Cranbrook Academy of Art).

Nancy DeLaurier; Instructor Emeritus of Studio Art; B.S. (Northwestern University).

Burton L. Dunbar III Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=dunbar); Professor of Art History; B.A. (Park College); M.A., Ph.D. (University of Iowa).

George Ehrlich; Professor Emeritus of Art History; B.S., M.F.A., Ph.D. (University of Illinois).

Stephen J. Gosnell; Associate Professor Emeritus of Studio Art; M.A. (State University of New York).

Elijah Gowan Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=gowan); Professor of Studio Art; B.A. (Davidson College); M.F.A. (University of New Mexico).

Leonard I. Koenig; Professor Emeritus of Studio Art; B.A. (Adelphi College); M.A. (University of Iowa); M.F.A. (University of Wisconsin-Madison).

Barbara A. Mueller; Professor Emeritus of Studio Art; B.A. (Maryville College); M.A. (University of Iowa).

Craig A. Subler; Professor Emeritus of Studio Art; B.F.A. (Dayton Art Institute); M.A., M.F.A. (University of Iowa).

Kati Toivanen Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=toivanen); Associate Dean of Undergraduate Programs (College of Arts & Sciences); Professor of Studio Art; B.F.A. (Clark University); M.F.A. (School of the Art Institute of Chicago).

Paul Tosh Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=tosh); Associate Professor of Studio Art; B.F.A. (Middle Tennessee State University); M.F.A. (University of Arizona).

Hye Young Shin Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=shin); Assistant Professor of Studio Art; B.F.A. (Kyung-Sung University); B.F.A. (Hong-Ik University); M.F.A. (University at Buffalo).

Davin Watne Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=watne); Full Time Lecturer of Studio Art; B.F.A (Kansas City Art Institute); M.F.A (Maryland Institute College of Art)

Minor in Studio Art (p. 87)

Graduate

Graduate Degrees:

Master of Arts: Art History (p. 81)
Master of Arts: Studio Art (p. 83)

Art Courses

ART 105 Introduction To Photography Credits: 3
An introduction to the general practice of photography. The course centers on the basic technical and aesthetic aspects of the medium. A fully adjustable digital camera is required.

ART 112 Foundation Drawing Credits: 3
This course focuses on developing skills and techniques of observational drawing. No previous drawing experience required.

ART 112 - MOTR PERF 105D: Studio Art-Drawing

ART 114 Foundation Digital Design Credits: 3
This is an introductory course on techniques, practical applications and aesthetic considerations for digital arts, graphic design, and computer multimedia. Students will create visual projects and learn to participate in a creative class community.

ART 121 Foundation 2D Design Credits: 3
The principles of visual thinking with emphasis on color theory and perception of form and space.

ART 131 Foundation 3D Design Credits: 3
Introductory study in three-dimensional formal principles with emphasis on the aesthetic properties.

ART 204 Digital Video and Motion Design I Credits: 3
This introductory digital video and motion design course is intended for studio majors. General techniques and practical application of animation, video, text and sound in the digital arts and graphic design fields are addressed. Lectures, demonstrations, readings, discussions and application sessions.
Prerequisites: ART 112, ART 114, ART 121 and ART 131.

ART 206 Photography I Credits: 3
An introduction to photography as a means of creative self-expression. The course centers on the technical and aesthetic aspects of the medium. A fully adjustable digital camera is required.
Prerequisites: ART 105 or ART 114.

ART 212 Intermediate Drawing Credits: 3
Continuation of foundation drawing. Emphasis is on gaining technical facility with various drawing mediums and expanding conceptual approaches.
Prerequisites: ART 112.

ART 214 Ceramics I Credits: 3
Introduction to hand-built and wheel forming methods, concept development, ceramic materials, and firing procedures.
Prerequisites: ART 112 or ART 114 or ART 121 or ART 131.
ART 218 Graphic Design I Credits: 3
A beginning level introduction to Graphic Design principles, such as layout, design, concept, basis design theory, graphic design production, and use of industry-level design software and tools.
Prerequisites: ART 112, ART 114, ART 121, and ART 131.

ART 221 Painting I Credits: 3
Exploration of the visual language in paint with continued emphasis on color and design.
Prerequisites: ART 112, ART 114, ART 121 and ART 131.

ART 224 Print Media I Credits: 3
Through hands-on lessons, students will learn a variety of printmaking methods like intaglio, lithography, relief, etc. and approaches to making visual work. Recommended preparation: ART 212.
Prerequisites: ART 112, ART 114, ART 121, ART 131.

ART 230 Fibers I Credits: 3
From altering the surface of fabric to three-dimensional construction, students are taught the basics of fiber arts. This is a hands-on introduction to surface design and soft sculptural hand processes. The course will cover dyeing, shibori, screen-printing, knitting, crochet, and basic sewing. Projects are individualized by expertise, availability of supplies, and students’ own objectives.
Prerequisites: ART 121.

ART 235 Digital Imaging I Credits: 3
This course explores the different ways to connect digital imaging to one's creative practice. Students will learn advanced imaging techniques in order to develop a consistent artistic voice that reflects personal interests and talents. Conceptual issues of digital media will be explored as they relate to contemporary art making.
Prerequisites: ART 114.

ART 305 Photography II Credits: 3
An advanced course in which students develop a deeper understanding of personal interests, sensibilities and goals as they relate to producing and appreciating creative photography. A fully adjustable digital camera is required.
Prerequisites: ART 106 or ART 206.

ART 309 Print Media II Credits: 3
A continuation of ART 224, this course deepens students’ understanding of the historical conventions of and contemporary approaches to print media. Explores concepts and techniques through material involvement.
Prerequisites: ART 224.

ART 310 Digital Video and Motion Design II Credits: 3
This intermediate to advanced level digital video and motion design course is a continuation of ART 204. This course is intended for studio majors; it addresses advanced techniques of video post-production and motion graphic design. Lectures, demonstrations, readings, discussions, and application sessions. Recommended Preparation: ART 206 and ART 235.
Prerequisites: ART 204.

ART 311 Painting II Credits: 3
Painting in oil or acrylic on the intermediate level with continued emphasis on color.
Prerequisites: ART 221.

ART 312 Figure Drawing I Credits: 3
A study of the structure of the human figure with emphasis on the dynamics of figure movement.
Prerequisites: ART 212.

ART 327 Interactive Media Design Credits: 3
This course will cover the theoretical, social/cultural, and historical contexts of interactive media; the current importance and usages of the web and social media; and explore methods and tools of exploiting the media through the creation of websites, digital publications, and "apps". Students will learn to use and work with development languages such as HTML 3/5, CSS (cascading style sheets), and content management systems (CMS) such as Wordpress. Students should have an understanding of Adobe Photoshop.
Prerequisites: ART 235.

ART 330 Fibers II Credits: 3
Intermediate study of surface design and soft sculptural hand processes. Projects are individualized by expertise, availability of supplies, and students' own objectives.
Prerequisites: ART 230.
ART 335A Digital Imaging II Credits: 3
This class will strengthen the competence and knowledge of digital imaging techniques. Research, conceptual and verbal abilities within digital image making will be explored. Students will apply new techniques to their personal interests in the studio arts.
Prerequisites: ART 235.

ART 338 Graphic Design II Credits: 3
Intermediate study of graphic design theory, methodology and techniques, stressing a visual approach to problem solving in design, image making techniques, materials, and production processes standard to the industry.
Prerequisites: ART 218 and ART 348.

ART 340 3D Modeling and Animation Credits: 3
This course addresses the usage of virtual three-dimensional modeling and animation in the contemporary art and design fields.
Prerequisites: ART 204.

ART 348 Introduction To Typography Credits: 3
This course explores the formal and applied aspects of typography as tools for design and artistic expression. Focus is on how type relates to art, layout, and design. Both hand produced typography and computer assisted design software will be incorporated.
Prerequisites: ART 112, ART 114, ART 121 and ART 131.

ART 403 Advanced Typography Credits: 3
A continuation of ART 348, this course looks at more sophisticated typographic practice, typographic design theory, and both traditional methods of typographic design and practice such as letterpress and hand type and computer/digital based typography including motion-and time-based media such as web-sites and multimedia.
Prerequisites: ART 348.

ART 405 Practices in the Visual Arts Classroom Credits: 3
Candidates preparing to student teach will master the use of current research in art education, and apply theoretical and practical educational knowledge.
Prerequisites: Permission from SOE advisor required.

ART 406 Advanced Problems In Photography Credits: 3
This course provides students a forum in which the issues and techniques of contemporary photography can be investigated on a rather esoteric level. The format of the course allows for a mutual decision by the instructor and students, dictating which investigations will be pursued during that particular semester. Possible areas of investigation would include, but are not limited to, color photographic theory and practice, non-silver photographic techniques (e.g. Kwikprint, gum bichromate, cyanotype, Van Dyke Brown, etc.), hand coloring techniques, photo-collage, etc.
Prerequisites: ART 305.

ART 411 Painting III Credits: 3
Painting on the intermediate level with a focus on experimentation and developing a personal visual language and expression.
Prerequisites: ART 311.

ART 412 Figure Drawing II Credits: 3
A continuation of ART 312. Drawing on the advanced level with study of the figure in environmental context.
Prerequisites: ART 312.

ART 421 Painting IV Credits: 3
Painting on the advanced level with supervised individual selection of technique and subject matter.
Prerequisites: ART 411.

ART 423WI Design Seminar Credits: 3
Capstone course for studio art majors with a focus on graphic design. Pertinent issues in practice, theory and history of design will be examined through selected readings, slide presentations and invited speakers. A research paper/presentation on a topic evolving from the discussions will be required. The course will also address resume and portfolio preparation for the design profession. This course is writing intensive.
Prerequisites: ART 338, RooWriter.

ART 430 Graphic Design III Credits: 3
Advanced application of graphic design techniques to complex design problems. The course will stress individualized assignments and portfolio preparation.
Prerequisites: ART 338.

ART 439 Student Design Agency Credits: 3-6
This course operates as a faculty-supervised design agency that works with clients to produce visual marketing materials.
ART 488 Creative Project Development Credits: 3
In this class students evaluate their creative goals and styles, as well as artistic abilities, in relation to their professional aspirations. Specific artistic and appropriate technological skills are developed through projects. Prerequisites: ART 114.

ART 492 Advertising Campaigns Credits: 3
This course focuses on branding, re-branding or development of an identity program, and combines advertising planning with creative execution. Students will learn how to develop advertising/marketing/creative campaign plans for a specific client(s), conceptualize, design and develop all creative aspects including but not limited to logo/identity, copy, advertising, website development, app design, etc., and complete a presentation of the plans/briefs and final creative developments of the plans/briefs and creative to the client(s).
Prerequisites: ART 338 or ART 403.

ART 493 Directed Projects in Studio Art Credits: 1-6
With permission of instructor, advanced students pursue independent research and production of a significant semester-long project. Acceptable for graduate credit with approval.

ART 495 Special Topics in Studio Art Credits: 1-6
In depth exploration of a special topic in Studio Art. Course may be repeated if topic is unique for each repeated effort. Acceptable for graduate credit with approval.

ART 498Q Special Studies in Art: Internship Credits: 1-6
Advanced students gain invaluable practical experience in a professional setting in the field of art.

ART 499WI Senior Seminar Credits: 3
Capstone course for studio majors in all media. Course addresses contemporary theoretical and practical issues in studio art practice, and prepares students for graduation. Multiple papers, class presentations, and a portfolio preparation are required.
Prerequisites: RooWriter.

ART 5405 Practices in the Visual Arts Classroom Credits: 3
Students preparing to student teach in the spring semester read, reflect on and master the use of current research in art education and study, practice and master the use of general education thoughts of today.

ART 5506 Graduate Photography Credits: 3-6
Photography on the graduate level with individual selection of media and technique. May be repeated up to a total of 15 hours.

ART 5510 Graduate Painting Credits: 3-6
Painting on the graduate level with individual selection of medium and technique. May be repeated up to a total of 15 hours.

ART 5513 Graduate Graphic Design Credits: 3-6
Graphic design on the graduate level with individual selection of medium and technique. May be repeated up to a total of 15 hours.

ART 5515 Graduate Drawing Credits: 3-6
Drawing on the graduate level with individual selection of media and technique. Student may pursue selected projects on a group or individual basis. May be repeated up to a total of 15 hours.

ART 5520 Graduate Print Media Credits: 3-6
Print media on the graduate level with individual selection of medium and technique.

ART 5540 Graduate Digital Imaging Credits: 3-6
Digital imaging on the graduate level with individual selection of subject and technique. Permission of the department is required.

ART 5550 Graduate Performance Art Credits: 3-6
Performance art on the graduate level with individual selection of medium and technique. May be repeated up to a total of 15 hours.

ART 5576 Graduate Digital Video and Motion Design Credits: 3-6
Digital video and motion design on the graduate level with individual selection of subject and technique. Permission of the department is required.

ART 5588 Graduate Studio Art Seminar Credits: 3
Studio art seminar for graduate students in any medium. Course will focus on professional practices, as well as the development of a sustainable artistic career. Individual artistic production and shared critiques will be required.
Prerequisites: Studio Art Graduate Students or permission of Art Graduate Advisor

ART 5591 Directed Technical Studies Credits: 2-4
Individually directed studies or research in selected projects of a technical nature in studio art. May be repeated up to a total of six hours applicable to a degree program.

ART 5599 Research And Thesis Credits: 1-9
Production and/or writing of thesis. Usually taken in the last term of candidacy.

ART 5899 Required Graduate Enrollment Credit: 1
Art History Courses

ART-HIST 110 Introduction to the History of Art: Pyramids to Picasso Credits: 3
This is an introduction to the history of art, with in-depth discussions of painting, sculpture, prints, and architecture. Students will be introduced to significant works from major historical periods; their cultural roles, style and composition, and the artistic processes involved in their creation. Emphasis is placed upon Western art history, with attention paid to important interactions with other world traditions, including the arts of Islam, Japan, and Africa. The comprehensive collections of The Nelson-Atkins Museum of Art contribute an important component to the course.

ART-HIST 110 - MOTR ARTS 100: Art Appreciation

ART-HIST 201 From Cave Paintings to Cathedrals Credits: 3
Students will learn to analyze and place in an art historical context Western art and architecture from approximately 35,000 BCE to 1250 CE. Art and architecture from all relevant cultures and religions - pagan, Christian, and Islamic - will be covered; particular emphasis will be placed on the accomplishments of Egyptian and Greek artists.

ART-HIST 201 - MOTR ARTS 101: Art History I

ART-HIST 202 From Michelangelo to Modernism Credits: 3
This course will examine major monuments of Western art and architecture during the late Middle Ages through the Modern period. Art will be examined in its cultural context stressing artistic intent, issues of gender, changing patterns of patronage, and the ascending status of the artist in society.

ART-HIST 202 - MOTR ARTS 102: Art History II

ART-HIST 253 History Of The Designed Environment I, Ancient And Medieval Credits: 3
An overview of developments in architectural, urban, land and interior design which have shaped the physical environment of the Western world from prehistory through the period known as the "Romanesque." Emphasis will be given to relationships between institutions, values and needs of different societies and the architectural forms produced by those societies.

ART-HIST 254 History Of The Designed Environment II, Late Medieval To Modern Credits: 3
An overview of developments in architectural, urban, land and interior design which have had an impact on the physical environment of the Western World from the Gothic era to the beginning of the modern era. A central objective of the course is to gain an understanding of why these developments occurred and how the needs and aspirations of a given time were manifested in physical form.

ART-HIST 255 History Of The Designed Environment III, Modern (1750 To Present) Credits: 3
An overview of developments in architectural, urban, land and interior design which have shaped the physical environment of the Western world during the Modern period. Issues to be explored include renewed interest in archaeology during the eighteenth century, shifts in patronage, the impact of new industrial materials and techniques, demands for an array of new building types, and dilemmas of expression throughout the modern era. Our concerns will broaden and become more global in scope when we examine the twentieth century.

ART-HIST 264 The Grotesque in Art and Culture Credits: 3
This course explores the vibrant and subversive role of the grotesque in the visual arts from 1500 to the present day. The grotesque comprises an alternate image tradition that is often overlooked, or even actively suppressed. This course will explore the distinct strands of the grotesque: witty and inspired improvisation, from Michelangelo to Picasso; rowdy and subversive carnivalesque, from Bruegel to Hogarth to DeKooning; and the monstrous and uncanny, from Bosch to Goya to Kahlo.

ART-HIST 303 World Currents of Contemporary Art Credits: 3
This survey course provides an introduction to the densely interconnected trajectories of contemporary art in different parts of the world. It explores the continuities and discontinuities between modern and contemporary art in the context of intensifying transnational exchanges since the 1960s. Students will become familiar with the intersections of contemporary art with everyday life, mass media, politics and technology.

ART-HIST 315 Arts Of African and New World Cultures Credits: 3
This historical survey of ethnographic arts examines the diasporas of African art and the influences of Africans on the arts of new world cultures (in Brazil, Surinam, Cuba, Haiti, and the United States) and Meso-American art and the influence of Meso-Americans on the arts of the Native North American cultures.

ART-HIST 319 Asian Art Credits: 3
The survey will emphasize the philosophical and cultural context of the arts of India, Southeast Asia, China, Korea and Japan. The course will stress the elements that give an underlying unity to the arts as well as those qualities which distinguish the art of each country as unique.
ART-HIST 330WI Modern Architecture Credits: 3
This class, open to undergraduates from any discipline, explores "Modern Architecture," from c. 1850 to the "present," with an emphasis on American architecture and urban design. We explore new building types designed for a new era, including skyscrapers and a range of cultural buildings, emphasizing how they transformed – and continue to transform – our cities and suburbs.
Prerequisites: RooWriter.

ART-HIST 402CC CC: Making the Modern in France: Dance, Art, Music, and Literature Credits: 3
This cluster course will take an interdisciplinary approach to understand the way modernism developed within the arts, with a focus on late-19th, early 20th-century France. Developments in literature, art, dance, and music and their interconnectedness to cultural and historical events will be highlighted and explored.

ART-HIST 415WI Romanticism Credits: 3
Art of the Romantic Era, principally in Europe, from c. 1790 to c. 1860. Consideration is given to the problems of patronage, criticism and stylistic influences.
Prerequisites: Any ART-HIST course, RooWriter.

ART-HIST 416WI Later 19th Century Painting And Sculpture Credits: 3
From Realism through Post-Impressionism. A study of art, principally in Europe, from c. 1850 to c. 1905, with consideration given to factors influencing stylistic changes during this period.
Prerequisites: Any ART-HIST course, RooWriter.

ART-HIST 421 Made in the USA: Latinx Art and Experience Credits: 3
This course focuses on art of and by members of the U.S. Latinx community. Students in this course will engage with the politics of representation, gender, sexuality, race, class, and ethnicity in Latinx art, as well as visual and popular culture.

ART-HIST 429WI American Painting And Sculpture Credits: 3
A study of the history of painting and sculpture, and other figurative arts, from earliest colonial times to the present. Emphasis will be placed on those artists who illuminate the major achievements in American art, and also the ongoing role played by European training and tradition.
Prerequisites: Any ART-HIST, RooWriter.

ART-HIST 439WI Paris in the Age of the Rococo Credits: 3
In the early 18th century, Paris overtook Rome as the artistic center of Europe. We explore all of the visual arts during the vibrant "Rococo," the age of Watteau, Chardin, and Boucher.
Prerequisites: RooWriter; ART-HIST 110 or ART-HIST 202.

ART-HIST 440WI French Art: Renaissance And Baroque Credits: 3
A history of French art from the time of Louis XII through the Age of Louis XIV, with emphasis on painting and architecture.
Prerequisites: Any ART-HIST course, RooWriter.

ART-HIST 441WI Northern Baroque: The Age Of Rubens, Rembrandt And Wren Credits: 3
The arts of England and the Low Countries in the 17th and early 18th centuries. Emphasis on painting and the graphic arts in the Spanish and Dutch Netherlands and on architecture in England.
Prerequisites: Any ART-HIST course, RooWriter.

ART-HIST 443 Meso-American Art Credits: 3
The course will discuss 2500 years of the arts of ancient Mexico and Guatemala. Included is the rise of such important cultures as the Olmec, Maya, and Aztec. Equal emphasis will be placed on the development of elaborate ceremonial centers such as Monte Alban and the Teotihuacan, as well as the ceramic traditions of the West and East coasts of Mexico.
Prerequisites: ART-HIST 315 or BLKS 315.

ART-HIST 445 Northern European Art: 15th And 16th Centuries Credits: 3
A study of panel painting, sculpture and manuscript illumination in Flanders, France, Germany, and Spain from the Hundred Years' War through the Reformation. Special emphasis will be placed upon the stylistic and iconographic innovations of such major Northern artists as Claus Sluter, Jan van Eyck, Jerome Bosch, Pieter Bruegel, Jean Fouquet and Albrecht Durer. Artistic developments will be presented within the context of changing economic, political, religious and social institutions of the period.
Prerequisites: Any ART-HIST course.

ART-HIST 447WI Italian Baroque: The Age Of Caravaggio, Bernini And Borromini Credits: 3
Painting, sculpture and architecture in Italy from the creation of the Baroque style in the late 16th century to the beginnings of the Barochetto era.
Prerequisites: Any ART-HIST course, RooWriter.
ART-HIST 450 15th Century Italian Art And Architecture
Credits: 3
An examination of the visual arts from the International Style and the Early Renaissance to the beginnings of the High Renaissance. Problems of patronage, artistic theory, the Antique, the role of art in humanist circles, and the effect of religious, political and economic developments on the arts will also be discussed.
Prerequisites: Any ART-HIST course.

ART-HIST 452 Greek Art And Architecture
Credits: 3
A survey of Greek sculpture, vase painting, and architecture from the third millennium to the first-century B.C. Emphasis will be placed on the relationship of Minoan and Helladic aesthetics, and the connections between late Helladic and Geometric forms, and the nature and development of the classical and baroque styles.
Prerequisites: Any ART-HIST course.

ART-HIST 455 History Of Photography
Credits: 3
A survey of the history of photography as a pictorial art; technical developments and the interaction of photography with other arts will be included.
Prerequisites: Any ART-HIST course.

ART-HIST 461 Traditional and Contemporary Native American Arts
Credits: 3
This course covers the history of traditional and contemporary Native North American arts, by examining cultural and aesthetic continuities between Meso-American and Native North American Arts. We also explore how Native American arts reflect the history of North America, including influences from Europeans, and conclude with contemporary Native American artists and their incorporation of various global influences.
Prerequisites: ART-HIST 315 or BLKS 315.

ART-HIST 462 History of Modern Design
Credits: 3
This course examines innovations in design, beginning with the Arts and Crafts movement in the 19th century, surveying all the major design trends of the twentieth century, and concluding with contemporary developments in the age of the computer.
Prerequisites: Any ART-HIST course.

ART-HIST 463 Primitivism and Its Aftermath
Credits: 3
This course explores one of the seminal movements of the modern era and its ramifications for the visual arts today. Class discussions will consider the complexities and contradictions of primitivism of its rejection of modernity. We will look at European artists’ attempts at deliberate regression through their appropriations from archaic, folk, and non-western art traditions, from 1800-on, while also situating these creative endeavors within the cultural and political contexts of the period.
Prerequisites: Any ART-HIST course.

ART-HIST 464 Modern Art & the Grotesque
Credits: 3
This course explores how the grotesque shaped the history, practice and theory of art in the nineteenth and twentieth centuries. The grotesque plays a major role in many modern styles, and its expressive possibilities encompass the capriccio, the carnivalesque and burlesque, the fantastic, and the abject and uncanny. Artists have incorporated the grotesque as a means to push beyond established boundaries, explore alternate modes of experience, and to challenge cultural and aesthetic conventions.
Prerequisites: Any ART-HIST course.

ART-HIST 468 Participatory Forms of Spectatorship in Contemporary Art
Credits: 3
This course explores art practices from the second half of the 20th century that challenges spectators to become more actively involved in the reception and even in the production of art. The course will examine the socio-political conditions and technological developments which have contributed to the strengthening of participatory tendencies in contemporary art.
Prerequisites: ART-HIST 303.

ART-HIST 469 Sensing, Feeling, Thinking: Contemporary Art and the Mind
Credits: 3
Contemporary artists are challenging viewers to reflect on how they perceive, feel and think. This seminar provides an introduction to the mental processes underlying emotion and visual cognition and familiarizes students with contemporary art practices that reveal the dynamic correlations between body, mind and subjectivity.
Prerequisites: ART-HIST 303.

ART-HIST 470 Art Museums: History and Practice
Credits: 3
This course will familiarize students with the history of art museums and collecting practices. It will cover theories of museum government, curating, and object interpretation. Students will explore changes in the functions of art museums and will develop practical skills for future museum employment.
Prerequisites: ART-HIST 202 or ART-HIST 303.

ART-HIST 473 Visual Arts Administration
Credits: 3
This course on professional arts administration includes assignments in: copyright laws, database management, ethics issues, evaluation design, gallery museum management, grant writing and budgeting, public relations, resume design, tax laws, and website design and management. Students are required to learn relevant computer programs. Open to music and theatre majors.
Prerequisites: Junior or Senior Standing.
ART-HIST 476 Site-Specific Art: Within and Beyond the Museum Walls Credits: 3
At a time of increased transnational mobility, contemporary artists are conceiving artworks that catalyze an enhanced awareness of the geographical and socio-political conditions of existence and art making. This seminar examines artworks that are produced outside the studio and are inspired by specific natural environments, museum settings and public spaces.

**Prerequisites:** ART-HIST 303.

ART-HIST 477 Contemporary Artists of the African Diaspora Credits: 3
This course examines cultural and aesthetic continuities between traditional and contemporary arts and artists in Africa and in the Americas, including the study of contemporary Africans whose cultures had the greatest influence in the Americas as well as contemporary African-American artists in Brazil, Cuba, Haiti, and the United States.

**Prerequisites:** ART-HIST 315 or BLKS 315.

ART-HIST 478 Pompeii and Herculaneum: The Archaeology of the Roman World Credits: 3
This course offers insights into the art, architecture, politics, economics, religions and social life of the Roman world through the study of Pompeii and Herculaneum.

ART-HIST 479 From the Parthenon to the Altar of Peace Credits: 3
The course centers on the many different styles of Greek and Roman art from the fifth century B.C. to the early first century A.D. Attention is also paid to the political and literary forces behind its imagery. Three monuments serve as the pillars upon which the course rests: the Parthenon, Pergamon Altar, and the Ara Pacis. The lessons learned about style, the interaction of politics, literature, and art and the foibles of scholarship are intended to be applied to other fields of art history.

**Prerequisites:** Any ART-HIST course.

ART-HIST 482 Scope & Methods Of Art History Credits: 3
An exploration of the discipline of art history, including theoretical issues, guiding questions and problems, diverse approaches (historical and current), and research tools. The undergraduate capstone course for art history majors.

**Prerequisites:** Senior standing.

ART-HIST 493 Directed Studies in Art History Credits: 1-6
With permission of instructor, advanced students pursue independent research and production of a significant semester-long research project. Acceptable for graduate credit with approval.

ART-HIST 495 Special Topics in Art History Credits: 1-6
In depth exploration of a special topic in Art History. Course may be repeated for up to 18 credit hours if topic is unique for each repeated effort. Acceptable for graduate credit with approval.

ART-HIST 497Q Special Studies in Art History: Internship Credits: 1-6
Advanced art history students gain invaluable practical experience in a professional setting in the field of art.

ART-HIST 5501 Scope And Methods Of Art History Credits: 3
An exploration of the discipline of art history, including theoretical issues, guiding questions and problems, diverse approaches (historical and current), and research tools. Required of all Art History graduate students and best taken early in one’s studies.

ART-HIST 5539 Paris in the Age of Rococo Credits: 3
In the early 18th century, Paris overtook Rome as the artistic center of Europe. We explore all of the visual arts during the vibrant "Rococo," the age of Watteau, Chardin, and Boucher.

ART-HIST 5540 Seminar in French Art: Renaissance and Baroque Credits: 3
A history of French art from the time of Louis XII through the Age of Louis XIV, with emphasis on painting and architecture.

ART-HIST 5541 Seminar in Northern Baroque Art: The Age of Rubens, Rembrandt, and Wren Credits: 3
The arts of England and the Low Countries in the 17th and early 18th centuries. Emphasis on painting and the graphic arts in the Spanish and Dutch Netherlands, and on architecture in England.

ART-HIST 5547 Seminar in Italian Baroque Art: The Age of Caravaggio, Bernini, and Borromini Credits: 3
Painting, sculpture, and architecture in Italy from the creation of the Baroque style in the late 16th century to the beginnings of the Barochetto era.

ART-HIST 5548 Seminar in Span Art: El Greco to Goya Credits: 3
A study of Spanish art from the later 15th Century to the Napoleonic invasion.

ART-HIST 5561 Traditional and Contemporary Native American Art Credits: 3
This course aims to inspire students to appreciate the history and aesthetics of traditional and contemporary Native North American arts. We examine cultural and aesthetic continuities between Meso-American and Native North American Arts. Then we explore how Native American arts reflect the history of North America, including influences from Europeans, and conclude with contemporary Native American artists and their incorporation of various global influences.

ART-HIST 5562 History of Modern Design Credits: 3
This course examines innovations in design, beginning with the Arts and Crafts movement in the 19th century, surveying all the major design trends of the twentieth century, and concluding with contemporary developments in the age of the computer.
ART-HIST 5563 Primitivism and Its Aftermath Credits: 3
This course explores one of the seminal movements of the modern era and its ramifications for the visual arts today. Class discussions will consider the complexities and contradictions of primitivism and its rejection through their appropriations from archaic, folk, and non-western art traditions, from 1800-on, while also situating these creative endeavors within the cultural and political contexts of the period.

ART-HIST 5564 Modern Art and the Grotesque Credits: 3
The course explores how the grotesque shaped the history, practice and theory of art in the nineteenth and twentieth centuries. The grotesque plays a major role in many modern styles, and its expressive possibilities encompass the capriccio, the carnivalesque and burlesque, the fantastic, and the abject and uncanny. Artists have incorporated the grotesque as a means to push beyond established boundaries, explore alternate modes of experience, and to challenge cultural and aesthetic conventions.

ART-HIST 5565 Seminar In American Art Credits: 3
Graduate-level seminar dealing with an announced area in American art. May be repeated once, provided there is a change in the area of concentration.

ART-HIST 5566 Seminar In 19th-Century Art Credits: 3
Graduate-level seminar dealing with an announced area in 19th-century art. May be repeated once, provided there is a change in the area of concentration.

ART-HIST 5567 Seminar In 20th-Century Art Credits: 3
Graduate-level seminar dealing with an announced area in 20th-century art. May be repeated once, provided there is a change in the area of concentration

ART-HIST 5568 Participatory Forms of Spectatorship in Contemporary Art Credits: 3
This course explores art practices from the second half of the 20th century that challenge spectators to become more actively involved in the reception and even in the production of art. The course will examine the sociopolitical conditions and technological developments which have contributed to the strengthening of participatory tendencies in contemporary art.

ART-HIST 5569 Sensing, Feeling, Thinking: Contemporary Art and the Mind Credits: 3
Contemporary artists are challenging viewers to reflect on how they perceive, feel and think. This seminar provides an introduction to the mental processes underlying emotion and visual cognition and familiarizes students with contemporary art practices that reveal the dynamic correlations between body, mind and subjectivity.

ART-HIST 5570 Seminar In Renaissance Art Credits: 3
Graduate-level seminar dealing with an announced area in Renaissance art. May be repeated once, provided there is a change in the area of concentration.

ART-HIST 5571 Seminar In Art Of Africa, Oceania And New World Cultures Credits: 3
Seminar in art of Africa, oceania and new world cultures. May be repeated once, provided there is a change in the area of concentration.

ART-HIST 5572 Seminar In Asian Art Credits: 3
Seminar dealing with an announced area in Asian Art. May be repeated once, provided there is a change in the area of concentration.

ART-HIST 5573 Visual Arts Administration Credits: 3
This course on professional arts administration includes assignments in: copyright laws, database management, ethics issues, evaluation design, gallery museum management, grant writing and budgeting, public relations, resume design, tax laws, and website design and management. Students are required to learn relevant computer programs. This course is also open to music and theatre majors. Research requirements for graduate credit are more comprehensive and professional.

ART-HIST 5575 Seminar In Baroque Art Credits: 3
Graduate-level seminar dealing with an announced area in Baroque art. May be repeated once, provided there is a change in the area of concentration.

ART-HIST 5576 Site-Specific Art: Within and Beyond the Museum Walls Credits: 3
At a time of increased transnational mobility, contemporary artists are conceiving artworks that catalyze an enhanced awareness of the geographical and socio-political conditions of existence and art making. This seminar examines artworks that are produced outside the studio and are inspired by specific natural environments, museum settings and public spaces.

ART-HIST 5577 Contemporary Artists of the African Diaspora Credits: 3
This course examines cultural and aesthetic continuities between traditional and contemporary arts and artists in Africa and in the Americas, including the study of contemporary Africans whose cultures had the greatest influence in the Americas, as well as contemporary African-American artists in Brazil, Cuba, Haiti, and the United States.

ART-HIST 5579 From the Parthenon to the Altar of Peace Credits: 3
The course centers on the many different styles of Greek and Roman art from the fifth century B.C. to the early first century A.D. Attention is also paid to the political and literary forces behind its imagery. Three monuments serve as the pillars upon which the course rests: the Parthenon, Pergamon Altar, and the Ara Pacis. The lessons learned about style, the interaction of politics, literature, and art and the foibles of scholarship are intended to be applied to other fields of art history.
ART-HIST 5580 Art Museums: History and Practice Credits: 3
This course will familiarize students with the history of art museums and collecting practices. It will cover theories of museum government, curating, and object interpretation. Students will explore changes in the functions of art museums and will develop practical skills for future museum employment.

ART-HIST 5590 Directed Studies In Art History Credits: 1-6
Individually directed studies or research in selected topics or problems in art history. May be repeated up to a total of six hours applicable to a degree program.

ART-HIST 5599 Research & Thesis Credits: 1-9
Production and/or writing of thesis. Usually taken in the last term of candidacy.

ART-HIST 5699 Research And Dissertation Credits: 1-12
Dissertation Research and writing in Art History.
Bachelor of Arts: Art History

University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes
Students graduating from this program will:

- Have a basic knowledge of both Western and Non-Western art history.
- Cultivate aesthetic understanding and a life-long enthusiasm for history and the arts.
- Develop skills and perspectives to understand art and architecture as complex cultural products.
- Develop effective writing skills.
- Be able to understand the context of information contained in scholarly publications.

Total Credits 18

1 See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.
Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

<table>

</tbody>
</table>

Total Credits: 3

Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelor’s degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

Total Credits: 34

1 ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.

2 This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

Major Requirements

Students graduating with a B.A. degree in Art History will be prepared for entry into a graduate program or the job market.

Formal study of Art History begins with introductory survey courses. There are two courses in Western art (ART-HIST 201 and ART-HIST 202), a survey in contemporary art (ART-HIST 303), and two in non-Western art (ART-HIST 315 and ART-HIST 319). There are no prerequisites for these courses. Students are encouraged to take the survey sequence in Western art sequentially, if possible.
Lectures are intermediate-level courses and are assigned 400-level numbers. Seminars are advanced-level courses and are assigned 400- and 5000-level numbers. The prerequisite for these courses is the relevant survey course, or permission of the instructor.

Directed Study (ART-HIST 493 ) and Internship courses (ART-HIST 497Q) may also help fulfill Art History Electives with the approval of an Art History advisor. Enrollment in these courses is granted only by the instructor who will supervise the study.

Students must successfully complete the major requirements below with at least 12 hours of the noted upper division (300+) course requirements completed at UMKC.

1 A 400-level course in non-Western art can count for this requirement OR towards the six 400-level courses requirement, but not both.

**General Electives**

Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

Minimum GPA: 2.5

Total Credit Hours: 120

**Tools for Planning and Fulfilling Academic Requirements**

UMKC's Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC's Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/plannymydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.
UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Bachelor of Arts: Studio Art

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes

Students graduating from this program will:

- Have the basic skills for the practice of art in one or more specialized disciplines.
- Develop creative, conceptual and technical skills in a variety of visual media to produce work that can effectively contribute to the larger creative community.
- Develop professional skills appropriate to the discipline, including awareness of the latest advances in adapting technology for the creation of works of art, including appropriate software and hardware skills.
- Communicate ideas visually, verbally, and through the written word.
- Recognize and understand the relevance of global art history to the current practice of art.

Program Requirements

Students graduating with a B.A. degree in Studio Art will be prepared for entry into a professional school, a graduate program or the job market.

Focus B (Satisfied in program requirements below)
Focus C (May be satisfied by Constitution course requirement below)
Focus Elective (Satisfied in program requirements below)

'Total credits' in this section indicates the number of General Education Core credit hours that are not met by the degree specific requirements outlined below.

Total Credits 18

1 See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.
Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

<table>

¹ Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

¹ ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.

² This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

Major Requirements

Formal study in Studio Art begins with foundation courses: ART 112, ART 114, ART 121, and ART 131. There are no prerequisites for these courses and non-majors and exploratory students are also encouraged to take foundation courses. They cannot be taken for graduate credit.

Intermediate and advanced courses typically require the foundation series and possibly other prerequisites. ART 495: Special Topics may be offered that can count towards the Studio Electives. Recent Special Topics include screenprinting, art book publishing, and advertising campaigns (with Communication Studies).
Directed Projects (ART 493) and Internship courses (ART 498Q) may also help fulfill Studio Electives with the approval of a Studio Art advisor. Enrollment in these courses is granted only by the instructor who will supervise the study. Graduate credit is possible only when a student is admitted to graduate study.

Another important part of the Studio Art program is the Junior Portfolio Reviews that happen each spring semester. Students gather around 10 of their strongest pieces to present to a group of faculty and guests for a comprehensive critique of their work with suggestions for areas of growth, classes to take before graduating, and more. Many students benefit from this process so much that they do it again as a senior.

Students must successfully complete the major requirements below with at least 12 hours of the noted upper division (300+) course requirements completed at UMKC.

1 Up to 6 additional credit hours in Art History can be counted toward the 24 Studio Elective credit hours with preapproval from a studio faculty advisor.

**General Electives**

Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Master of Arts: Art History

Applications for Graduate Study

Applications for the M.A. degree in Art History are reviewed continually during the calendar year. However, students must have their applications completed by November 15 for admission for the spring semester and by June 15 for the fall term. To be considered for graduate assistantships (GTAs) and fellowships during the following academic year, and for maximum choice in coursework for the first semester, fall candidates need to have their application submitted by February 1.

How to Apply for the M.A. in Art History:

- To Office of Admissions (http://www.umkc.edu/admissions)
  - Application ($35 online, $45 paper)
  - Transcripts
- To Department of Art & Art History (umkcarthistorygrad@umkc.edu), Attention: Graduate Advisor in Art History
  - Writing Sample
  - Two letters of recommendation
  - Personal statement, addressing: 1) Reason(s) for pursuing admittance into graduate-level study, 2) Reason(s) for choosing UMKC’s Department of Art & Art History as educational institution, 3) Ultimate professional ambitions, and 4) Why you should be selected for the M.A. program.

Art History Classification of Entering Students

Admission to the graduate program in art history requires a B.A. or equivalent degree and sufficient undergraduate study in art history to provide a sound foundation for advanced study. Ideally, this foundation would include a solid grounding in the history of Western art, some study of non-Western art, and sufficient advanced-level work to indicate that a student can succeed in the specialized or topical courses and seminars associated with graduate study. Admission review is done by the graduate advisor in Art History.

The applicant should have, in addition to a good general education in the humanities, 18 to 24 credit hours in art history with a grade-point average of 3.0 or better. Students with fewer hours and/or a restricted exposure to other humanities and fine arts courses, or having inconsistent grades, are eligible for admission to the graduate program on the basis of recent evidence indicating the potential for success, such as performance in 400-level courses, or through papers and exams for courses elsewhere. If there are some deficiencies in preparation that can be met readily by one or two undergraduate survey courses, a student will be admitted to graduate study. However, the survey courses must be taken for undergraduate credit before the student is allowed to take the qualifying examination that is required for advancement to degree candidacy.

Applicants lacking the minimum preparation deemed necessary for admission to graduate-level study in art history may make up their deficiency through enrollment in selected undergraduate courses offered by the department. These will be determined after consultation with a faculty advisor and in all cases must include 400-level work. Progress will be reviewed at the end of each term, and if warranted, reclassification to graduate status will occur prior to the start of the next semester.

Student Learning Outcomes

Students graduating from this program will:

- Demonstrate advanced knowledge of specialized areas of art history.
- Cultivate independent and original thinking.
- Employ comprehensive communication through written, oral, and technological methods.
- Express aesthetic appreciation of art and architecture.
- Explain works of art and architecture as complex cultural products.
- Students graduating with an M.A. in Art History will be prepared for entry into a Ph.D. program or the job market.

Requirements for Graduation

Option I: Non-thesis Option

(33 hours of approved coursework), including:

- ART-HIST 5501: Scope & Methods of Art History (3 hours)
- At least 30 hours of coursework, of which at least six courses (18 hours) must be graduate seminars

Option II: Thesis Option

(30 hours of approved coursework), including:

- ART-HIST 5501: Scope & Methods of Art History (3 hours)
Master of Arts: Art History

- At least 21 hours of additional coursework, of which four courses (12 hours) must be graduate seminars
- 6 hours of thesis research (ART-HIST 5599 Research and Thesis)
- Students must obtain permission to pursue the thesis option. Permission to do so depends on the quality of the student's thesis proposal submitted to the Department, the student's writing skills, and the ability of the Department to supervise the student in the subject area of the proposed thesis topic. An oral defense of the thesis is required. Those students who anticipate further graduate work toward the doctorate are strongly advised to elect the thesis option.

Non-Course Requirements:
- No more than 12 hours of coursework taken at the 400-level
- A minimum G. P. A. of 3.0
- As soon as possible, but no later than after 18 hours are completed, the student will select Option I or II. For students admitted to the Thesis Option, the student will select a thesis committee with the consultation of the Graduate Advisor.
- In either the 30-hour thesis option or the 33-hour non-thesis option, no more than 6 hours of readings, independent study, or directed studies credit (other than thesis hours) may be counted toward the requirements for the M.A. Exceptions may be made for credits granted for professional internships approved by the Department.

Special Requirements

Requirements for Retention
A student must maintain a graduate grade-point average of 3.0. In extenuating circumstances, a student may petition the Department of Art and Art History to be continued as a graduate student for one term (or 6 hours) if the graduate GPA falls below 3.0. The deficiency must be remedied during the approved probationary period if the student is to be continued.

Reading Knowledge in Foreign Language
M.A. students must acquire a reading knowledge of one foreign language considered essential to advanced study in art history before beginning the M.A. thesis. Students are encouraged to acquire this skill as early as possible in their graduate studies, so they may use it in graduate seminars and research papers. This requirement is most often fulfilled by three semesters at the college level, with a grade of B or better in the third semester. Students who believe they have acquired a sufficient reading knowledge, but have not completed three semesters of language training at the college level, may petition the graduate advisor to take a reading exam in that language. Normally, however, three semesters of college-level study are necessary to achieve sufficient mastery.

Thesis
The final requirement for the M.A. degree in Art History is the M.A. thesis, which is normally begun two semesters before a student completes the degree. The thesis is an approved project that demonstrates capacity for independent work of a suitably high level of proficiency, one utilizing the primary sources available on the topic in English and in the foreign language that meets the program requirement, as well as the major relevant secondary sources. This project, selected in conjunction with the thesis advisor most often develops from a seminar paper, and its presentation must conform to the requirements of the School of Graduate Studies.

Summary of Forms
1. Master’s Degree Program of Study – filled out by the student and the graduate advisor/principal advisor in the department.
2. Recommendation for Appointment of Advisor or Supervisor/Examination Committee form – filled out by the student and the graduate advisor in the department.
3. Report of Results of Examination for Master’s Degree Students Form – filled out by the chair of the thesis committee and mailed to the Office of Graduate Records.
4. Intent to Graduate – filled out by the student at the Records Office in the Administrative Center (no faculty signature required)
5. Thesis Review/Examination – filled out by the chair of the thesis committee and mailed to the Office of Graduate Records.
Master of Arts: Studio Art

M.A. in Studio Art Overview

For Studio Art, the UMKC Department of Art and Art History only offers the Master of Arts Degree, which is not the terminal degree in studio art and will not qualify candidates to teach on the University level. The M.A. in studio art has the following emphasis areas: painting, drawing, printmaking, photography, digital imaging, motion design, and graphic design. Most students will take the majority of their coursework as independent study classes under the direction of one faculty member in the graduate student’s area of emphasis. Students must decide which single emphasis area they plan to pursue before they apply for graduate school in the Department of Art and Art History.

Applications for Graduate Study in Studio Art

Application deadline is February 1 for the Fall semester and October 15 for the Spring semester. There is no summer semester admission.

How to Apply:

• To Office of Admissions (http://www.umkc.edu/admissions)
  • Application ($35 online, $45 paper)
  • Transcripts
• To Department of Art & Art History, Attention: Graduate Advisor in Studio Art
  • Portfolio of recent work on CD is with 15-20 images (jpeg/bmp/QT/AVI/Flash)
  • Listing the images’ titles, dates, sizes and media (hard-copy)
  • CV/resume
  • Personal statement, addressing:
  i Reason(s) for pursuing admittance into graduate-level study,
  ii Reason(s) for choosing UMKC’s Department of Art & Art History as educational institution,
  iii Focus of art work,
  iv Ultimate professional ambitions, and
  v Why you should be selected for the M.A. program.
  • Three letters of recommendation from art professionals or professors

Applications are reviewed by a committee of Studio Art faculty.

Student Learning Outcomes

Students graduating from this program will:

• Have an advanced knowledge of a specialized area of studio art.
• Develop creative, conceptual and technical skills in a variety of visual media to produce work that can effectively contribute to the larger creative community.
• Communicate ideas visually, verbally, and through the written word.
• Recognize and understand the relevance of global art history to the current practice of art.
• Develop professional skills.
• Be proficient in adapting technology for the creation of works of art, including computer skills and digital photography.
• Students graduating with an M.A. in Studio Art will be prepared for entry into an M.F.A. program or the job market.

Degree Requirements

A minimum of 36 graduate credit hours is required for the M.A. degree in studio art, including a minimum of six hours of ART 5599, and three courses in Art History on the 400- or 5000-level. Additional courses are determined in consultation with the discipline advisor and the supervising thesis committee. Courses are usually three credit hours each and are offered at both the 400 and 5000 levels. Any course counted as part of the required 36-hour minimum must be taken for credit. Students may take no more than 14 hours of 400-level classes (40 percent of a 36-hour program). Any 400- or 5000-level course taken for graduate credit must be completed with a grade of B- (2.7) or better in order to be counted toward the M.A. degree.

Each student’s program of study is designed in consultation with the lead professor in the primary discipline, who will be their principal art advisor. There is no general distribution requirement within the studio courses taken, but the student’s choice and mix of classes needs to be approved by their art advisor. Courses in disciplines outside the Art and Art History department may be applied toward the degree with the preapproval of the student’s principal art advisor.

Thesis Committee

After completion of an 18 to 21-hour minimum, the student selects a thesis committee. Normally, the faculty member in the student’s major studio discipline is requested to act as chair of the thesis committee in addition to two other faculty members who have been asked by the student to serve
on the committee. The chair of the thesis committee must be on the graduate faculty. Members of the thesis committee may include other studio faculty, an art historian or a faculty member from another department within the University. Typically, all three members of the thesis committee are faculty with whom the student has had some association. At this stage, the thesis chair consults with the student, who then submits a Master’s Degree Program of Study form to the principal graduate advisor. This form is forwarded to the chair of the Department of Art and Art History, the dean of The College of Arts and Sciences and the Graduate Office.

M.A. Qualifying Exam (Review)
At some appropriate time after the completion of 18 to 21 hours toward the M.A. degree and before the beginning of the thesis, a review of the student’s studio work by the chosen thesis committee is held. The purpose of this review is to determine the readiness of the student to engage in thesis-level work. For this review, the candidate presents a body of studio work representing both their present accomplishments and the potential for a thesis project. The student will also submit a prospectus for the intended thesis work. In an oral discussion with the thesis committee, student will explain the concept of the thesis and how this work will contribute to their continued art production. The committee will ask questions of the student and assess the progress of the work in order to determine whether the student should be allowed to advance to the final hours of class work leading to thesis. The thesis committee must approve the research plan and has a right to refuse it if the student does not have an available thesis project. If the prospectus is refused, the committee will make suggestions on how to improve the thesis proposal and a second review will be scheduled at a future date. Additional coursework may be recommended.

Thesis Procedure
The student plans a body of work to pursue a clearly identified artistic concept in consultation with his/her committee. An Appointment of Thesis Committee form with the names of the student’s committee members is filled out by the student in consultation with the departmental principal graduate studio advisor and sent to the associate dean for graduate studies of the College of Arts and Sciences as well as to the Office of Graduate Faculties and Research. If, at any point during the thesis process, the student’s committee is changed, an updated version of the form must be resubmitted. It is the responsibility of students to notify the principal graduate studio advisor of any changes in the composition of their committee, allowing the proper forms to be corrected.

At the beginning of the final semester of the student’s program of study, he or she must fill out Intent to Graduate form, available online and from the Office of Registration and Records. This form enables the student to be placed on the graduation roll and on a mailing list to receive materials concerning graduation and other important information. If, for some reason, the student does not graduate that semester, he or she is required to file another form the subsequent semester. The deadline for the Intent to Graduate form is listed in the front part of each semester’s catalog of courses.

Review of Thesis
(Defense/Public Manifestation of Work)
Upon completion of the thesis body of work, the student presents the work to his or thesis committee for final review and approval. This review must be in the form of a public exhibit or performance. This exhibit can be held in the UMKC Gallery of Art or any other public location within the Kansas City metropolitan area.

Summary of Forms
1. Master’s Degree Program of Study – filled out by the student and the graduate advisor/principal advisor in the department.
2. Recommendation for Appointment of Advisor or Supervisor/Examination Committee form – filled out by the student and the graduate advisor in the department.
3. Report of Results of Examination for Master’s Degree Students Form – filled out by the chair of the thesis committee and mailed to the Office of Graduate Records.
4. Intent to Graduate – filled out by the student at the Records Office in the Administrative Center (no faculty signature required)
5. Thesis Review/Examination – filled out by the chair of the thesis committee and mailed to the Office of Graduate Records.
Minor in Art and Visual Communication

Student Learning Outcomes

Students graduating from this program will:

- Be able to create basic logos and layouts using digital tools to represent an entity.
- Be able to produce competent photographic imagery that demonstrates both aesthetic and technical abilities.
- Be able to communicate a message visually or use visuals to strengthen a message.
- Be able to articulate stylistic differences or similarities of art and architecture from different periods and/or geographic areas.

Bioethics

Online Degree Certificate Program in Bioethics

The Department of Philosophy, in conjunction with the Department of History and the Sirridge Office of Medical Humanities and Bioethics, offers an online graduate certificate program in Bioethics. The program provides a foundation in the history and theory of bioethics, a deeper understanding of healthcare law and policy, and the skills necessary to engage in ethics consultation and case review. Students who complete the program receive training in ethical issues related to clinical care and research involving human subjects.

The goal of the online certificate program in bioethics is to provide health professionals with the knowledge and skills necessary to effectively resolve ethical dilemmas they encounter in clinical practice.

Students working toward an Interdisciplinary Ph.D., Master of Arts in Liberal Studies, or any other UMKC graduate degree program will be able to complete the required courses and receive a graduate level certificate in bioethics. In addition to students completing other degrees at UMKC, students with appropriate academic credentials may apply solely to the certificate program.

Course requirements for the Graduate Certificate in Bioethics (p. 89).

Faculty

Jeremy Garrett, Ph.D., Adjunct Assistant Professor of Philosophy
Clancy Martin, Ph.D., Professor, Department of Philosophy
Lynda Payne, Ph.D., R.N., Sirridge Missouri Endowed Professor in Medical Humanities and Bioethics; Professor, Department of History
Marilyn Pesto, J.D., R.N., Director, Sirridge Office of Medical Humanities and Bioethics
Diane Plantz, M.D., Emergency Department, Children’s Mercy Hospital
Wayne Vaught, Ph.D., Professor of Philosophy, Medicine and Bioethics; Dean, College of Arts and Sciences; Program Director, Online Degree Program in Bioethics
Graduate Certificate in Bioethics

The Department of Philosophy, in conjunction with the Department of History and the Sirridge Office of Medical Humanities and Bioethics, offers an online graduate certificate program in Bioethics. The program provides a foundation in the history and theory of bioethics, a deeper understanding of healthcare law and policy, and the skills necessary to engage in ethics consultation and case review. Students who complete the program receive training in ethical issues related to clinical care and research involving human subjects.

The goal of the online certificate program in bioethics is to provide health professionals with the knowledge and skills necessary to effectively resolve ethical dilemmas they encounter in clinical practice.

Students working toward an Interdisciplinary Ph.D., Master of Arts in Liberal Studies, or any other graduate degree program will be able to complete the required courses and receive a graduate level certificate in bioethics. In addition to students completing other degrees at UMKC, students with appropriate academic credentials may apply solely to the certificate program.

Student Learning Outcomes

Students graduating from this program will:

- Identify key historical events in bioethics
- Identify foundational principles of bioethics
- Understand key legal cases and concepts
- Have an understanding of health policy and ethics
- Be able to identify and utilize resources in bioethics
- Be able to effectively identify and resolve ethical conflicts in healthcare

Program Requirements

The certificate program consists of four courses, 3 credit hours each (12 credit hours total). They include PHILOS 5550 History and Philosophy of Bioethics, PHILOS 5551 Healthcare Law and Policy, PHILOS 5552 Clinical Ethics Case Consultation, and PHILOS 5690 Research in Selected Fields: Graduate Study.

Program Description
The UMKC Black Studies Program is an academic unit that holistically investigates the experience, contributions and conditions of African-descent people in the formation and evolution of American society and culture. In accordance with these objectives, our focus extends to an examination of the active role of Africa and the African Diaspora in global society and human culture. The Black Studies Program – through both a social science and a humanities orientation – provides a unique and rich approach to exploring and comprehending the human experience.

The Black Studies Program is focused on the acquisition and dissemination of an instructive body of knowledge. The curriculum prepares students with a critical skill set that will enable them to pursue diverse employment opportunities. The program makes available to students the foundational research for undergraduate, graduate and professional training in the discipline of Black Studies.

The program currently offers undergraduate courses that can lead to a Minor in Black Studies. Students can also obtain an Emphasis Area in Black Studies through the Bachelor of Liberal Arts Program. Black Studies offers students from any graduate discipline coursework toward a Graduate Certificate (p. 99). In addition, coursework is available at the graduate level leading to an Informal Emphasis in Black Studies under the Master of Arts in Liberal Studies Degree (p. 101).

Faculty
Interim Program Director:
Michael K. McDonald, Ph.D.

Program Advisor:
Adrienne Walker Hoard, M.F.A., Ed.D.- Undergraduate & Graduate

Professor(s):
Adrienne Walker Hoard, M.F.A, Ed.D

• Art/Studio Art (Color Theory, African/African American Art), Art Education, African American Art History, and Black Studies.

Associate Professor:
Jacqueline E. Wood, Ph.D.

• Black Studies and English (Drama, Literature, Poetry).

Library Co-Liaison(s):
Tracey Hughes, M.I.S.L.T., M.A.L.S.

• Library Instruction and Reference

Gloria Tibbs, M.L.S.

• Collection Development and Reference

Administrative Assistant:
Patricia C. Charles

Undergraduate
The Black Studies Program at UMKC provides instruction for undergraduate students to develop proficiency in written and oral communications regarding the study of African descent people in the Americas and in the African Diaspora. Our curriculum offers in-depth knowledge regarding an African perspective on political systems, humanities contributions and social science research in higher education. While contributing to the general education requirements of UMKC in both the humanities and the social sciences, our program serves to enhance the global literacy and professional development of our undergraduate populations.

Undergraduate Degrees:
• Bachelor of Liberal Arts: Black Studies Emphasis (p. 95)
Undergraduate Minor:
• Minor in Black Studies (p. 103)

Graduate
The Black Studies Program provides critical skill sets in written and oral communication, research, analysis, theory building, multicultural understanding and global awareness. Through a holistic examination of the African American experience, we are committed to enhancing general education and to promoting professional development as well as the training of scholars in the field.

Graduate Degrees:
• Master of Liberal Studies: Black Studies Informal Emphasis (p. 101)

Graduate Certificates:
• Certificate in Black Studies (p. 99)

Courses
BLKS 201 Global Systems and the Origins of Black American Culture and Institutions Credits: 3
This multidisciplinary course examines global capitalism, European contact with Africa, the development of the African Diaspora, and the origins of Black American institutions and culture. Applying a Black studies perspective, the course explores such themes as cultural and gendered oppression, institutional destabilization, economic dislocation, liberation struggles, and creative impulses and aesthetics and the social and historical experiences of Black people in the Americas.

BLKS 302 Conceptual and Theoretical Foundations in African American Studies Credits: 3
This course will provide an in-depth examination of the theoretical and conceptual parameters of African American studies. We will study the evolution of the field, key scholars and creative intellectuals, and seminal categories of thought.

BLKS 315 Arts of African and New World Cultures Credits: 3
This historical survey of ethnographic arts examines the diasporas of African art and the influences of Africans on the arts of new world cultures (in Brazil, Surinam, Cuba, Haiti, and the United States) and Meso-American art and the influence of Meso-Americans on the arts of the Native North American cultures.

BLKS 320 Critical Health Issues in Black Communities Credits: 3
Beginning with the African context and the opposition of chattel slavery, this course examines social, cultural, and historical factors affecting the health status of African Americans to the present era. It explores a variety of health-related issues including the interplay between environment, biology, and culture; folk and popular health practices; structured inequality and oppression; lifestyle, beliefs and values; and the organization and delivery of health care. Moreover, this course moves well beyond the idea that medical care—its presence, absence, or quality—is the singular or most critical factor determining the health of a people, community, or society. It reveals the importance of social phenomena in disease resistance and health promotion. Historical shifts from the prominence of infectious to chronic diseases; the implications to health of chattel slavery, sharecropping, segregation, poverty, and structured inequality; the relationship between psychosocial factors and disease, i.e. destabilized social settings that compromise resistance to disease; environmental racism; and the health status of African Americans as it relates to the organization of work, family structure and function, religious beliefs, the organization of medical care, lifestyle, consumer manipulation, and post-industrial society are major issues addressed by the course.

BLKS 321 The Black Family and Male-Female Relationships Credits: 3
This course examines the historical evolution and current status of the African American family in the United States. Utilizing the African experience as its starting point the course conveys a broad understanding of the role of the family in human survival and progress. We investigate such issues as male-female relationships, sexual practices, dating, marriage, single parenting, the education and socialization of children, and so on. We also examine an array of social and economic issues, including institutionalized inequality, that affects the viability of today’s African American family.

BLKS 325 African American Business Development Credits: 3
This course investigates the various challenges to African American business development and entrepreneurship on the United States. We study the lives of successful, pioneering African American businesswomen and men in order to assess how they managed to transcend the barriers of racism and structured inequality. We explore why certain kinds of enterprises emerged among African Americans and why others did not, and we scrutinize the traditional business problems for African Americans of capitalization distribution market penetration, and wealth creation.

BLKS 330 African American Migrations in Literature Credits: 3
The course examines representations of two different trajectories of migration in African American literature: African American journeys from the south to northern and mid-western regions of America, and concurrent migrations of Caribbean people to the US in the early twentieth century.

BLKS 331 African American Literature I Credits: 3
This course provides a survey of African American literature from its beginnings to the Harlem Renaissance of the 1920s and 1930s. Areas of interest will include abolitionist literature (especially slave narratives), turn-of-the-century literature and the Harlem Renaissance. This course will examine any or all of the following literary forms: fiction, poetry, drama, autobiography and essay. It will view African American literature in its historical and cultural contexts.
BLKS 322WI African American Novel Credits: 3
This course will examine the African American novel in the 19th and 20th centuries; the emphasis will be on the period from the 1920s to the present. The novels will be examined in their historical and cultural contexts.
Prerequisites: RooWriter.

BLKS 333 African American Literature II Credits: 3
A survey of African American literature from the end of the Harlem Renaissance to the present, covering a range of authors, texts, and contexts.

BLKS 334 From Field Shout to Hip Hop: African American Poetic Traditions Credits: 3
This course examines the development of African American poetry from its early forms as field shouts, ballads, and blues to present forms including spoken word and hip hop. Includes authors such as Phillis Wheatley, Paul Lawrence Dunbar, Langston Hughes, Gwendolyn Brooks, Tupac Shakur, and Jessica Care Moore.

BLKS 335 Stages Toward Freedom: African American Dramatic Traditions Credits: 3
This course explores the development of African American dramatic traditions from the eighteenth century through the Harlem Renaissance Black Arts Movement, to current postmodernism. Includes authors such as W.W. Brown, Zoran N. Hurston, Amiri Baraka, Sonia Sanchez, August Wilson, Suzan-Lori Parks.

BLKS 337 The Civil Rights Movement in African American Literature Credits: 3
This course examines how African American literature shaped ideas about freedom, rights, citizenship and race in the civil rights movement. It draws on a variety of literary forms—speeches, essays, autobiographies, fiction, drama, poetry and film—to explore the movement's impact on communities and cultures as well as its various debates and competing visions.

BLKS 338 Women's Literature in Africa and the African Diaspora Credits: 3
This course is a comparative examination of the variety of literary works produced by women of African descent in the United States, the Caribbean and Africa. Students will explore the cross-cultural implications of texts in light of the intersections of gender, race and class.

BLKS 349 Symbols and Codes from the Diaspora: African American Visual Arts Survey Credits: 3
This course provides an examination of the theoretical and conceptual parameters of African and African American visual aesthetics. Through the writings of key scholars in African American aesthetics, students will study symbolic forms and patterns from various African cultures throughout the Diaspora and investigate formal image categories within African Diaspora visual culture.

BLKS 351 African American Art History: Part I, 1600-1960 Credits: 3
This course presents a comprehensive survey of African American visual art from 1600 through 1960. Critical issues in early American art history highlight the expressions of African American artists and scholars. Students will investigate artistic expressions of this period.

BLKS 403WI Writing for African American Studies Credits: 3
This course instructs students in how to produce advanced knowledge in the field of African American studies. It provides training in the construction of quality research papers for graduate, scholarly, and professional work and exposes students to a wide array of scholarly journals, databases, and authoritative resources in African American studies. Each time the courses taught, students will develop their research around a specific topic defined by the instructor.
Prerequisites: RooWriter.

BLKS 404 Research Seminar Credits: 3
This course introduces the logic, theory, and techniques of empirical research and applies them to African American Studies. It exposes students to a variety of research approaches in order to examine their utility for producing knowledge within the field.

BLKS 410 African American Art History: Part II, 1960-Present Day Credits: 3
This course presents a survey of African American visual arts from 1960 to the present. Visual arts include new media and processes for Diaspora artists. Students investigate contemporary artists within African Diaspora visual culture.

BLKS 458 Slave Narratives: Race, Gender, and Writing Freedom Credits: 3
A truly American, home grown genre and powerful force in the development of American political and social realities, the African American Slave Narrative is an established, recognized influence in the development of African American and American literary history. In this course you will have the opportunity to explore the historical trajectory of the Slave Narrative, looking at early formulations of its structure, purpose and conventions—especially in terms of gender and race, subsequent various permutations, and the eventual development of the Neo-slave Narrative as its resurrection, which adds to the complexity and theoretical impact of the literary autobiography from black perspectives.

BLKS 480 Special Topics/Seminar Credits: 1-3
In-depth exploration of special topics in Black Studies. When available, topics will be announced prior to registration. Course may be repeated for up to six credit hours.

BLKS 490 Directed Study/Research Credits: 1-3
Individual research and learning projects supervised by a faculty member. Course may be repeated for up to six credit hours.

BLKS 496 Internship in Black Studies Credits: 1-3
This Internship course presents an opportunity for undergraduate students to integrate their academic studies in the discipline of Black Studies with community service and engagement. As a student intern within a business or professional organization in the urban Metropolitan community, the student gains critical information about the processes and procedures of this business entity in relation to African American community members.
BLKS 5502 Conceptual and Theoretical Foundations in African American Studies Credits: 3
This course will provide an in-depth examination of the theoretical and conceptual parameters of African American studies. We will study the evolution of the field, key scholars and creative intellectuals, and seminal categories of thought.

BLKS 5503 Writing for African American Studies Credits: 3
This course instructs students in how to produce advanced knowledge in the field of African American studies. It provides training in the construction of quality research papers for graduate, scholarly, and professional work and exposes students to a wide array of scholarly journals, databases, and authoritative resources in African American studies. Each time the course is taught, students will develop their research around a specific topic defined by the instructor.

BLKS 5504 Research Seminar Credits: 3
This course introduces the logic, theory, and techniques of empirical research and applies them to African American Studies. It exposes students to a variety of research approaches in order to examine their utility for producing knowledge within the field.

BLKS 5510 African American Art History: Part II, 1960-Present Day Credits: 3
This course presents a survey of African American visual arts from 1960 to the present. The Black Arts Movement, the Black Aesthetic, mainstream arts institutions and Black collectors are reviewed. Visual arts include new media and processes for Diaspora artists. Students investigate contemporary artists within African Diaspora visual culture.

BLKS 5520 Critical Health Issues in Black Communities Credits: 3
Beginning with the African context and the imposition of chattel slavery, this course examines social, cultural, and historical factors affecting the health status of African Americans to the present era. It explores a variety of health-related issues including the interplay between environment, biology, and culture; folk and popular health practices; structured inequality and oppression; lifestyle, beliefs, and values; and the organization and delivery of health care. Moreover, this course moves well beyond the idea that medical care-its presence, absence, or quality-is the singular or most critical factor determining the health of a people, community, or society. It reveals the importance of social phenomena in disease resistance and health promotion. Historical shifts from the prominence of infectious to chronic diseases; the implications to health of chattel slavery, sharecropping, segregation, poverty, and structures inequality; the relationship between psychosocial factors and disease, i.e. destabilized social settings that compromise resistance to disease; environmental racism; and the health status of African Americans as it relates to the organization of work, family structure and function, religious beliefs, the organization of medical care, lifestyle, consumer manipulation, and post-industrial society are major issues addressed by the course.

BLKS 5521 The Black Family & Male-Female Relationships Credits: 3
The course examines the historical evolution and current status of the African American family in the United States. Utilizing the African experience as its stated point, the course conveys a broad understanding of the role of the family in human survival and progress. We investigate such issues as male-female relationships, sexual practices, dating, marriage, single parenting, the education issues, including institutionalized inequality, that affects the viability of today's African American family.

BLKS 5525 African American Business Development Credits: 3
This course investigates the various challenges to African American business development and entrepreneurship in the United States. We study the lives of successful, pioneering African American businesswomen and men in order to assess how they managed to transcend the barriers of racism and structured inequality. We explore why certain kinds of enterprises emerged among African Americans and why others did not, and we scrutinize the traditional business problems for African Americans of capitalization, distribution, market penetration, and wealth creation.

BLKS 5530 African American Migrations in Literature Credits: 3
The course examines representations of two different trajectories of migration in African American literature: African American journeys from the south to northern and mid-western regions of America, and concurrent migrations of Caribbean people to the US in the early twentieth century.

BLKS 5534 From Field Shout to Hip Hop: African American Poetic Traditions Credits: 3
This course examines the development of African American poetry from its early forms as field shouts, ballads, and blues to present forms including spoken word and hip hop. Includes authors such as Phillis Wheatley, Paul Lawrence Dunbar, Langston Hughes, Gwendolyn Brooks, Tupac Shakur, and Jessica Care Moore.

Cross Listings: ENGLISH 5546: From Field Shout to Hip Hop: African American Poetic Traditions

BLKS 5535 Stages toward Freedom: African American Dramatic Traditions Credits: 3
This course explores the development of African American dramatic traditions from the eighteenth century through the Harlem Renaissance, Black Arts Movement, to current postmodernism. Includes authors such as W.W. Brown, Zora N. Hurston, Amiri Baraka, Sonia Sanchez, August Wilson, Suzan-Lori Parks.

Cross Listings: ENGLISH 5557: Stages toward Freedom: African American Dramatic Traditions

BLKS 5537 The Civil Rights Movement in African American Literature Credits: 3
This course examines how African American literature shaped ideas about freedom, rights, citizenship and race in the civil rights movement. It draws on a variety of literary forms-speeches, essays, autobiographies, fiction, drama, poetry and film-to explore the movement's impact on communities and cultures as well as its various debates and competing visions.

Cross Listings: ENGLISH 5554: The Civil Rights Movement in African American Literature
BLKS 5538 Women's Literature in Africa and the African Diaspora Credits: 3
This course is a comparative examination of the variety of literary works produced by women of African descent in the United States, the Caribbean and Africa. Students will explore the cross-cultural implications of texts in light of the intersections of gender, race and class.

Cross Listings: ENGLISH 5538

BLKS 5539 Slave Narratives: Race, Gender and Writing Freedom Credits: 3
A truly American, home grown genre and powerful force in the development of American political and social realities, the African American Slave Narrative is an established, recognized influence in the development of African American and American literary history. In this course you will have the opportunity to explore the historical trajectory of the Slave Narrative, looking at early formulations of its structure, purpose and conventions—especially in terms of gender and race, subsequent various permutations, and the eventual development of the Neo-slave Narrative as its resurrection, which adds to the complexity and theoretical impact of the literary autobiography from black perspectives.

BLKS 5549 Symbols and Codes from the Diaspora: African American Visual Arts Survey Credits: 3
This course provides an examination of the theoretical and conceptual parameters of African and African American visual aesthetics. Through the writings of key scholars in African American aesthetics, students will study symbolic forms and patterns from various African cultures throughout the Diaspora and investigate formal image categories within African Diaspora visual culture.

BLKS 5551 African American Art History: Part I, 1600-1960 Credits: 3
This course presents a comprehensive survey of African American visual art from 1600 through 1960. Critical issues in early American art history highlight the expressions of African American artists and scholars. The Negro Crafts Movement, New Negro Movement and Harlem Renaissance. Students will investigate artistic expressions of this period.

BLKS 5580 Special Topics/Seminar Credits: 1-3
In-depth exploration of special topics in Black Studies.

BLKS 5590 Directed Study/Research Credits: 1-6
Individual research and learning projects supervised by a faculty member.

BLKS 5596 Internship in Black Studies Credits: 1-6
This Internship course presents an opportunity for graduate students to integrate their academic studies in the discipline of Black Studies with community service and engagement. As a student intern within a business or professional organization in the urban Metropolitan community, the student gains critical information about the processes and procedures of this business entity in relation to African American community members.

BLKS 5599 Research Thesis Credits: 1-6
Individually directed research leading to preparation and completion of a thesis.

BLKS 5699 Research and Dissertation Credits: 1-12
Individually directed research leading to preparation and completion of a doctoral dissertation.

BLKS 5899 Required Graduate Enrollment Credit: 1
Enrollment required during the completion of a thesis/dissertation.
Bachelor of Liberal Arts: Black Studies Emphasis

University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes
Students graduating from this program will:

- Analyze the experience, contributions, and condition of African-descent peoples in the evolution and formation of American society and culture.
- Examine the active role of Africa and the African Diaspora in global society and human culture.
- Apply Black Studies curriculum as a critical tool to analyze the human experience generally.
- Compare the breadth and depth of perspectives that give respect and voice to the Black experience.
- Apply social science and humanistic approaches to examine human society and culture.
- Demonstrate professional written and oral communication skills.

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

Total Credits 3

1 Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services section of the catalog.

The Emphasis Area Requirements outlined below may contribute to completion of BLA distribution requirements above.
Black Studies Emphasis Area Requirements

The emphasis area in Black Studies assists undergraduate students who want to obtain graduate and professional degrees in a variety of fields (master's degrees, Ph.D.'s, law, public health, counseling, social work, educational administration, business, journalism, social work, medicine, library or information science, public policy, public administration, and so on) where specialized knowledge of the broad-based experiences and perspectives of African descent peoples would be useful. At the same time, students learn skill sets that are applicable to a wide variety of circumstances, which prepare them for entry-level positions in private industry, government, and public or non-profit agencies.

Students must take **30 hours of Black Studies courses** to complete the emphasis area in Black Studies under the Bachelor of Liberal Arts Degree. A minimum of 24 hours of Black Studies courses must be at the 300 or 400 level or above. A minimum of 24 credit hours in Black Studies must be earned at UMKC.

Students declaring the Black Studies Emphasis under the Bachelor of Liberal Arts (p. 430) (B.L.A.) must meet with the Black Studies undergraduate advisor (http://cas.umkc.edu/blackstudies/faculty.asp) to begin a plan of study prior to enrolling in courses.

Twelve of the 30 hours of coursework must include the **Core Black Studies** courses:

<table>

**Interest Area Electives**

- **Humanities Interest Area—Literature and Culture (15 credits):**
  - Under this interest area the Black Studies emphasis will require four courses (12 credits) from the humanities interest area and one course (3 credits) from the social science interest area.

- **Social Science Interest Area—Institutions and Social Process (15 credits):**
  - Under this interest area the Black Studies emphasis will require four courses (12 credits) from the social science interest area and one course (3 credits) from the humanities interest area.

Examples of elective undergraduate courses in Black Studies are:

</table>

Examples of **Black Studies, Special Topics BLKS 480** courses with a **Humanities Focus** are:
• African American Experience in Literature (1773-1960)
• African American Migrations in Literature
• Contemporary African American Literature
• Film Adaptations in African American Literary Text
• Introduction to Caribbean Literature and Film

Examples of Black Studies, Special Topics BLKS 480 courses with a Social Science Focus are:

• From Vaudeville to Rhythm and Blues
• Hip-Hop's Influence on African Americans and American Society
• Kansas City and the Black Experience
• Race, Class and Justice
• Racial and Ethnic Relations

Students are strongly encouraged to take the remaining 3 hours of coursework as an approved community engagement project/research under Directed Study, BLKS 490 or through Internship, BLKS 496. Because faculty consent is required in order to enroll in the Directed Study or Internship options, students should begin building an academic relationship with the Black Studies faculty member whose academic background can best guide them.

Students cannot earn credit toward the Emphasis Area in Black Studies with a grade below a "C" in a Black Studies course.

To graduate with an Emphasis Area in Black Studies, students must achieve a minimum grade-point average of 2.0 in all courses accepted toward the emphasis area.

For more information on the Black Studies Program, please visit http://cas.umkc.edu/blackstudies/.

Tools for Planning and Filling Academic Requirements

UMKC’s Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Graduate Certificate in Black Studies

Graduate Certificate in Black Studies:
The Black Studies Program at the University of Missouri-Kansas City offers a graduate certificate in Black Studies. The certificate permits students to augment their graduate and professional work with specialized training in Black Studies.

Black Studies is a liberal arts specialty that typically draws from multiple fields of inquiry. The graduate certificate in Black Studies advances students’ awareness of the multidisciplinary and trans-disciplinary character of the field, key theoretical issues that form the parameters of this specialty, and important tools for producing knowledge in Black Studies. The graduate certificate familiarizes students with the expansive character of existing knowledge in Black Studies and shows how this knowledge can be used to understand the human experience generally.

The graduate certificate offers a coherent and focused course of study for any graduate student. The certificate also prepares students to seek advanced degrees with an emphasis is Black Studies if they choose to do so. Applicants seeking to enroll in the graduate certificate may do so as a free-standing option or within a UMKC degree program.

Admission Criteria:
To be admitted to the graduate certificate program in Black Studies, students must be admitted as a graduate student to the University of Missouri-Kansas City and have an overall grade-point average of 3.25. They must have had an acceptable introductory course in the field of Black Studies (which may come from programs or departments of Black Studies, African American Studies, African Studies, Pan African Studies, and the like) from an accredited college or university.

If a student has not had an introductory course in the field, he or she must pass BLKS 201, with a grade of C or better.

Applicants whose undergraduate GPA is less than 3.25 may be considered for admission upon petition to the Graduate Admission Committee for the Black Studies Program.

Prospective students applying for admission must:
1. Complete the online UMKC Graduate Application.
2. Submit official transcripts from an accredited institution showing the awarding of an undergraduate degree. Transcripts are considered official if they are received in a sealed envelope from the institution or sent electronically to the UMKC Office of Admissions (admit@umkc.edu).
3. Provide an Academic Writing Sample.
4. Provide three letters of recommendation to the Black Studies Graduate Admission Committee at the Black Studies Program, 5305 Holmes Road, Kansas City, Missouri 64110

The priority deadline to apply for Fall Semester is March 1. The final deadline to apply for Fall semester is August 1. The deadline to apply for Spring semester is November 1.

Student Learning Outcomes
Students graduating from this program will:

• Demonstrate knowledge of the historical development of African American studies as an academic field.
• Be able to review and evaluate the work of key scholars in the field of African American studies.
• Demonstrate the ability to apply foundational ideas in African American studies in the interpretation of historical, political and social phenomena.

Program Requirements:
To earn the graduate certificate in Black Studies students must complete 18 hours of graduate course work in Black Studies, which does not include BLKS 201. At least 12 hours must be at or above the 5500-level. Students must maintain a 3.0 grade-point average while enrolled. The requirements for the certificate must be completed within two (2) years. Students should seek advising from the Black Studies Program graduate advisor (http://cas.umkc.edu/blackstudies/faculty.asp) prior to beginning a Plan of Study and to make sure they have met the requirements for the certificate.

The 18 hours of course work must include the three core courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BLKS 5502</td>
<td>Conceptual and Theoretical Foundations in African American Studies (must be taken during the first year)</td>
<td>3</td>
</tr>
<tr>
<td>BLKS 5503</td>
<td>Writing for African American Studies (must be taken during the first year)</td>
<td>3</td>
</tr>
<tr>
<td>BLKS 5504</td>
<td>Research Seminar (must be taken during the final year)</td>
<td>3</td>
</tr>
</tbody>
</table>
Beyond the three required core courses, students must complete **6 hours of electives** in Black Studies, which includes any graduate level course with a Black Studies prefix (BLKS). One elective should be taken in the Humanities Focus and the second in the Social Science Focus.

Examples of elective graduate courses in Black Studies are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BLKS 5510</td>
<td>African American Art History: Part II, 1960-Present Day (Humanities Focus)</td>
<td>3</td>
</tr>
<tr>
<td>BLKS 5520</td>
<td>Critical Health Issues in Black Communities (Social Science Focus)</td>
<td>3</td>
</tr>
<tr>
<td>BLKS 5521</td>
<td>The Black Family &amp; Male-Female Relationships (Social Science Focus)</td>
<td>3</td>
</tr>
<tr>
<td>BLKS 5525</td>
<td>African American Business Development (Social Science Focus)</td>
<td>3</td>
</tr>
<tr>
<td>BLKS 5530</td>
<td>African American Migrations in Literature (Humanities Focus)</td>
<td>3</td>
</tr>
<tr>
<td>BLKS 5534</td>
<td>From Field Shout to Hip Hop: African American Poetic Traditions (Humanities Focus)</td>
<td>3</td>
</tr>
<tr>
<td>BLKS 5535</td>
<td>Stages toward Freedom: African American Dramatic Traditions (Humanities Focus)</td>
<td>3</td>
</tr>
<tr>
<td>BLKS 5537</td>
<td>The Civil Rights Movement in African American Literature (Humanities Focus)</td>
<td>3</td>
</tr>
<tr>
<td>BLKS 5538</td>
<td>Women's Literature in Africa and the African Diaspora (Humanities Focus)</td>
<td>3</td>
</tr>
<tr>
<td>BLKS 5539</td>
<td>Slave Narratives: Race, Gender and Writing Freedom (Humanities Focus)</td>
<td>3</td>
</tr>
<tr>
<td>BLKS 5549</td>
<td>Symbols and Codes from the Diaspora: African American Visual Arts Survey (Humanities Focus)</td>
<td>3</td>
</tr>
<tr>
<td>BLKS 5551</td>
<td>African American Art History: Part I, 1600-1960 (Humanities Focus)</td>
<td>3</td>
</tr>
</tbody>
</table>

Electives may also be **Special Topics courses** (BLKS 5580).

Examples of **Special Topics** (BLKS 5580) courses with a **Humanities Focus** are:

- African American Experience in Literature (1773-1960)
- Contemporary African American Literature
- Film Adaptations in African American Literary Text
- Introduction to Caribbean Literature and Film

Examples of **Special Topics** (BLKS 5580) courses with a **Social Science Focus** are:

- From Vaudeville to Rhythm and Blues
- Hip-Hop's Influence on African Americans and American Society
- Kansas City and the Black Experience
- Race, Class and Justice
- Racial and Ethnic Relations

Students are strongly encouraged to take the remaining 3 hours as an **approved community engagement project/research** under Directed Study (BLKS 5590) or Internship (BLKS 5596). Because faculty consent is required in order to enroll in the Directed Study or Internship options, students should begin building an academic relationship with the Black Studies faculty member whose academic background can best guide them.
Master of Arts in Liberal Studies: Black Studies Informal Emphasis

Admission Requirements:

Students may be admitted to the Informal Emphasis in Black Studies if they have a baccalaureate degree in Black Studies or an equivalent degree from an accredited college or university with an overall grade-point average of 3.25. Applicants whose undergraduate GPA is less than 3.25 may be considered for admission upon petition to the Graduate Admission Committee for the Black Studies Program.

Students who have a baccalaureate degree with an overall GPA of 3.25 or better and who did not major in Black Studies may be conditionally admitted to the Program upon consultation with the program's graduate advisor (http://cas.umkc.edu/blackstudies/faculty.asp) and enrollment into the Black Studies introductory course, BLKS 201.

Upon satisfactory completion of the above course, the student must receive final approval from the Black Studies Director for full admission to the Informal Emphasis Area.

Prospective students applying for admission must submit, in addition to the UMKC application, the following documents:

1. A “Statement of Purpose” in the form of a personal essay of approximately 1,000 words outlining the focus area the applicant wishes to pursue. The statement should include the student’s reasons for applying to the Program along with their academic plans and goals.
2. An Academic Writing Sample.
3. Three (3) Letters of Recommendation.
4. Official transcripts from an accredited institution showing the awarding of an undergraduate degree. Transcripts are considered official if they are received in a sealed envelope from the institution or sent electronically to the UMKC Office of Admissions (admit@umkc.edu).

These documents (except the UMKC application) should be sent directly to the Master of Arts in Liberal Studies Program. The documents can be sent in print form to: MALS Program, 106 Cockefair Hall, UMKC, 5100 Rockhill Road, Kansas City, MO 64110.

Electronic copies may also be submitted as either Word or PDF attachments to an email to mals@umkc.edu.

Applications that indicate Black Studies as the focus area will be forwarded to the respective program for review by the Graduate Admission Committee for Black Studies.

Prior to submitting an application, prospective students should speak with the Black Studies graduate advisor (http://cas.umkc.edu/blackstudies/faculty.asp)

The priority deadline to apply for Fall Semester is March 1. The final deadline to apply for Fall semester is August 1. The deadline to apply for Spring semester is November 1.

Student Learning Outcomes:

1. Demonstrate knowledge of the historical development of African American studies as an academic field.
2. Be able to review and evaluate the work of key scholars in the field of African American studies.
3. Demonstrate the ability to apply foundational ideas in African American studies in the interpretation of historical, political and social phenomena.

Program Requirements:

The degree is a 36 credit hour program. Students who elect to participate in the Black Studies Informal Emphasis area should begin by enrolling in the Black Studies core courses, BLKS 5502 and BLKS 5503 (fulfills MALS introductory seminar requirement) and during their last year of the program, students should enroll in BLKS 5504 (fulfills MALS capstone seminar requirement).

Thesis Option

A written thesis is not required, however students who have a particular interest that lends itself to detailed research are especially encouraged to consider the thesis option. Students who wish to complete a thesis project may apply three credit hours from BLKS 5599 toward their degree requirements. With the thesis option, the students must select a Black Studies faculty member as their thesis adviser who will direct the plan of study and research.

Plan of Study

Students who elect to earn an Informal Emphasis in Black Studies under the Master of Arts in Liberal Studies Program are strongly encouraged to meet with the Black Studies graduate advisor (http://cas.umkc.edu/blackstudies/faculty.asp), prior to enrolling in courses, in order to begin their plan of study worksheet. Graduate students should complete the three core courses listed below. Please note, that those students who may have taken undergraduate versions of the core courses must complete them at the graduate level.

The three core courses are:
<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BLKS 5502</td>
<td>Conceptual and Theoretical Foundations in African American Studies (must be taken during the first year)</td>
<td>3</td>
</tr>
<tr>
<td>BLKS 5503</td>
<td>Writing for African American Studies (must be taken during the first year; fulfills MALS introductory seminar requirement)</td>
<td>3</td>
</tr>
<tr>
<td>BLKS 5504</td>
<td>Research Seminar (must be taken during the final year; fulfills MALS capstone seminar requirement)</td>
<td>3</td>
</tr>
</tbody>
</table>

Students should work with the Black Studies graduate advisor (http://cas.umkc.edu/blackstudies/faculty.asp), prior to the start of each semester, in order to review their plan of study worksheet and make sure they are accurately fulfilling the additional 27 hours of elective course work that is relevant to the field. Recommended courses include all graduate-level courses with a Black Studies prefix and other courses approved by the Director of the Black Studies Program. Students are encouraged to take elective courses with both humanities and social science focuses.

Examples of elective graduate courses in Black Studies are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BLKS 5510</td>
<td>African American Art History: Part II, 1960-Present Day (Humanities Focus)</td>

</tr>
<tr>
<td>BLKS 5551</td>
<td>African American Art History: Part I, 1600-1960 (Humanities Focus)</td>
<td>3</td>
</tr>
</tbody>
</table>

Electives may also be Special Topics (BLKS 5580) or Research and Thesis (BLKS 5599).

Examples of Special Topics courses with a Humanities Focus are:

- African American Experience in Literature (1773-1960)
- Contemporary African American Literature
- Film Adaptations in African American Literary Text
- Introduction to Caribbean Literature and Film

Examples of Special Topics courses with a Social Science Focus are:

- From Vaudeville to Rhythm and Blues
- Hip-Hop’s Influence on African Americans and American Society
- Kansas City and the Black Experience
- Race, Class and Justice
- Racial and Ethnic Relations

Students are strongly encouraged to take the remaining 3 hours of course work as an approved community engagement project/research under the Directed Study (BLKS 5590) or through Internship (BLKS 5596). Because faculty consent is required in order to enroll in the Directed Study or Internship options, students should begin building an academic relationship with the Black Studies faculty member whose academic background can best guide them.

For more information on the Master of Arts in Liberal Studies Degree, please click here (p. 434).
Minor in Black Studies

Student Learning Outcomes

Students graduating from this program will:

• Construct knowledge based timeline which outlines evidence of seminal African American contributions to American history and American society.
• Interpret and compare current events and other contexts of human struggle based on their knowledge of historical global systems within the paper collected from core courses.
• Examine the origins and historical experience of Blacks in the Americas from the perspective of several African American scholars.
• Evaluate seminal ideas through researching the works of major scholars in the various disciplines encompassing the canon of African American Studies.
• Create well-written critical responses to articulate and communicate their analyses of course lectures and activities.

Program Requirements:

Students who elect to earn a minor in Black Studies must meet with the Black Studies undergraduate advisor (http://cas.umkc.edu/blackstudies/faculty.asp) to begin a plan of study prior to enrolling in courses toward the minor. There are 18 credit hours of prescribed coursework, of which nine hours must be at the 300- or 400-levels, and a minimum of nine hours must be earned at UMKC.

Total Credits 18

Examples of Black Studies, Special Topics (BLKS 480) courses with a Humanities Focus are:

• African American Experience in Literature (1773-1960)
• African American Migrations in Literature
• Contemporary African American Literature
• Film Adaptations in African American Literary Text
• Introduction to Caribbean Literature and Film

Examples of Black Studies, Special Topics (BLKS 480) courses with a Social Science Focus are:

• From Vaudeville to Rhythm and Blues
• Hip-Hop's Influence on African Americans and American Society
• Kansas City and the Black Experience
• Race, Class and Justice
• Racial and Ethnic Relations

Students are strongly encouraged to take the remaining 3 hours of coursework as an approved community engagement project/research under Directed Study, BLKS 490 or through Internship, BLKS 496. Because faculty consent is required in order to enroll in the Directed Study or Internship options, students should begin building an academic relationship with the Black Studies faculty member whose academic background can best guide them.

Students wishing to graduate with a Minor in Black Studies must achieve a minimum grade-point average of 2.0 (cannot be below a "C") in Black Studies courses.

To learn more about the Black Studies Program, please click here (http://cas.umkc.edu/blackstudies/default.asp).
Department of Chemistry

Spencer Chemistry Building, Room 205
5009 Rockhill Road
Phone: (816) 235-2273
Fax: (816) 235-5502
umkc-chemdept@umkc.edu
http://cas.umkc.edu/chem

Department Chair:
Kathleen V. Kilway

Professors Emeriti:
John W. Connolly, Henry A. Droll, James R. Durig (Curator’s Professor Emeritus), Peter Groner, Eckhard W. Hellmuth, Y.C. Jerry Jean (Curator's Distinguished Teaching Professor Emeritus), Peter F. Lott, Layton L. McCoy, Thomas C. Sandreczki, Kenneth S. Schmitz, Timothy F. Thomas, Charles J. Wurrey (Curator's Distinguished Teaching Professor Emeritus and James C. Olson’s Professor of Chemistry)

Curators’ Professors:
Jerry R. Dias (chemistry), Kathleen V. Kilway (chemistry and chair), Zhonghua Peng (chemistry, principal graduate advisor)

Professors:
Keith R. Buszek, Andrew J. Holder

Associate Professors:
Xiaobo Chen, Nathan Oyler, J. David Van Horn

Assistant Professors:
Shin Moteki

Teaching Professors:
Andrea Drew Gounev (coordinator of organic chemistry laboratories and undergraduate advisor), Todor K. Gounev (program director)

Assistant Teaching Professors:
Paul Barron (coordinator of general chemistry laboratories and undergraduate advisor), Lena Hoober-Burkhardt (coordinator of advanced chemistry laboratories and undergraduate advisor)

Department Description

The Department of Chemistry offers programs of study leading to the bachelor of arts, bachelor of science and master of science degrees, and participates in UMKC’s Interdisciplinary Ph.D. program. To the extent that each program is flexible (see degree requirements), it is possible to specialize at the graduate level in the areas of analytical, inorganic, organic, physical or polymer chemistry.

Research Facilities

Major Instrumentation
- Varian Inova 400 MHz NMR spectrometer.
- Bruker 250 MHz NMR spectrometer with solid state probe.
- IBM 200 Electron Spin Resonance Spectrometer.
- AA and ICP-AA spectrophotometers.
- CARY-1 UV-Visible dual beam spectrophotometer.
- Cambridge Structural Database Subscription (Van Horn).
- Raman and Infrared Spectroscopy Lab (Durig).
- Positron Annihilation and Gamma-ray Spectroscopy Lab (Jean).
- ABI Pioneer peptide synthesizer.
- Sprint BioCad liquid chromatography system.
- Finnigan MAT Double Focusing mass spectrometer.

Research Instrumentation
- Ocean Optics UV-Vis-NIR and other UV-Visible spectrophotometers.
- Metrohm Titrando system with “PC Control” software.
- BAS Epsilon electrochemistry apparatus (Peng).
- Shimadzu HPLC (Van Horn).
- Shimadzu RF-5301PC Fluorescence spectrophotometer.
- Perkin Elmer Polarimeter (Buszek).

**Support Facilities**
- Computer and Electronics Shop.
- Chemical Stores.

**On Campus Resources**
- Jasco J-710 Circular Dichroism Spectropolarimeter (School of Biological Sciences).
- Varian 600 MHz NMR Spectrometer (School of Biological Sciences, Laity).
- ESI-mass spectrometer and Triple-Quad LC-ESI MS with nanospray adaptor (School of Pharmaceutical Sciences).
- Machine Shop (Department of Physics).

Computer facilities include UMKC's Academic Research servers using HP's Itanium technology and numerous personal computers located in the Spencer Chemistry Building and Flarsheim Hall for teaching and research purposes. A computational research laboratory is also housed in the department with a number of high-speed workstations and modern software.

**Faculty**

**Paul M. Barron,** assistant teaching professor of chemistry, coordinator of general chemistry laboratories, principal undergraduate advisor; Ph.D. (University of Nebraska).

**Keith R. Buszek**\(^{2,3}\) professor of chemistry; B.S. (University of California, Irvine); Ph.D. (University of California, Los Angeles).

**Xiaobo Chen,** associate professor of chemistry; B.S. (Peking University, China); M.S. (Chinese Academy of Sciences); Ph.D. (Case Western Reserve University).

**John W. Connolly,** professor emeritus of chemistry; B.S. (Xavier University); Ph.D. (Purdue University).

**Jerry R. Dias**\(^{2,3}\) curators’ professor of chemistry; B.S. (San Jose State College); Ph.D. (Arizona State University).

**Andrea Drew-Gounev,** teaching professor of chemistry, coordinator of organic laboratories, principal undergraduate advisor; B.S. Ph.D. (University of South Carolina).

**Henry A. Droll,** professor emeritus of chemistry; B.S., M.S. (George Washington University); Ph.D. (University of Pennsylvania).

**Andrew J. Holder**\(^{2,3}\) professor of chemistry; B.S. (Mobile College); Ph.D. (University of Southern Mississippi).

**Lena Hoober-Burkhardt,** assistant teaching professor of chemistry, coordinator of advanced chemistry laboratories, undergraduate advisor; B.A. (Princeton University); Ph.D. (University of Southern California).

**Y. C. Jerry Jean**\(^{2,3}\) curators’ emeritus professor of chemistry and physics; B.S. (Taipei Institute of Technology Taiwan); Ph.D. (Marquette University).

**Kathleen V. Kilway**\(^{2,3}\) chair and curators’ teaching professor of chemistry; B.S. (St. Mary’s College); M.S., Ph.D. (University of California-San Diego).

**Peter F. Lott,** professor emeritus of chemistry; B.S., M.S. (St. Lawrence University); Ph.D. (University of Connecticut).

**Layton L. McCoy,** professor emeritus of chemistry; B.S., Ph.D. (University of Washington).

**Shin Moteki**\(^{2,3}\) assistant professor of chemistry; Ph.D. (University of Nebraska-Lincoln).

**Nathan A. Oyler**\(^{2,3}\) associate professor of chemistry; B.S. (University of Arizona); Ph.D. (University of Washington).

**Zhonghua Peng**\(^{2,3}\) curators’ professor of chemistry; B.S. (University of Science and Technology of China); M.S. (Chinese Academy of Sciences); Ph.D. (University of Chicago).

**Thomas C. Sandreczki**\(^{2,3}\) professor emeritus of chemistry; B.A. (Houghton College); M.S., Ph.D. (University of Rochester).
Undergraduate

Undergraduate Degrees:

- Bachelor of Science: Chemistry (p. 125)
- Bachelor of Arts: Chemistry (p. 115)
- Minor in Chemistry (p. 133)

Career Implication of the Bachelor's Degree

The Department of Chemistry offers two bachelor of science degree programs. Both require a minimum of 43 credit hours of chemistry courses; they are designed for those who want to work in the field of chemistry. The American Chemical Society approved degree is based on the guidelines established by the American Chemical Society (ACS) and specifically requires Organic and Inorganic Synthesis (CHEM 382) and a Biochemistry course (either CHEM 367 or LS BIOCHEM numbered 341 or higher). Many of those receiving the bachelor of science degree have gone on to graduate work, professional schools, and advanced degrees. Others have gone directly into the chemical industry (laboratory assistants).

In contrast, the bachelor of arts degree is more flexible because it requires only a minimum of 26 credit hours of chemistry. The bachelor of arts student is shown a minimum of what chemistry is about. By choosing suitable courses, this degree prepares the individual with the chemical background for work in other areas. Examples include technical librarian, medical technologist, business administration, public health, and sales or advertising in the chemical industry. The majority of students pursuing the bachelor of arts in chemistry do so in preparation for professional schools, such as medicine, dentistry, and pharmacy. The bachelor of arts can also provide a student with a background in chemistry equivalent to that of a bachelor of science, but tailored to the individual's desires.

Teacher Certification in Chemistry

Certification as a middle school (grades 5-9) or secondary (grades 9-12) chemistry teacher in either Kansas or Missouri requires that a student complete specific requirements in biology, chemistry, environmental science, geology, physics and the School of Education. A separate application for teacher education is required. For further information about the program, consult the School of Education section of this catalog or contact the Education Student Services Office at (816) 235-2234.

Admission Requirements

Other than University of Missouri admission requirements, there are no special prerequisites for beginning either the bachelor of arts or the bachelor of science program. High school chemistry and a good working knowledge of algebra and arithmetic are desirable for entering the bachelor of science program. It should be noted that much of the bachelor of science program, and some of the bachelor of arts program, are highly structured in the order which chemistry courses must be taken. It is assumed that transfer students, Associates degree students, and junior college students should have begun the appropriate course sequence in their previous schools. All students are required to consult with the Chemistry Undergraduate Advisor before their registration at UMKC.

Advising

Those seeking either a bachelor of science or a bachelor of arts degree should see one of the Chemistry Department's undergraduate faculty advisors at the earliest possible time. Students who major in Chemistry must see an undergraduate faculty advisor each semester prior to enrolling in courses.

Honors Program

Students with outstanding records of achievement may be eligible to enroll in special honors courses. Such courses are designated by the letter H preceding the course number, or special arrangements can be made with instructors of regular courses. Students enrolled in the special courses should consult with their faculty advisor to arrange for optimal degree planning.
Prerequisites and Co-requisites

A minimum grade of C- or higher is required for all prerequisite and co-requisite courses for all students taking courses within the Department of Chemistry. Additionally, students must be concurrently enrolled in all co-requisite courses. In exceptional cases, students may receive written consent to waive one or both of these requirements from the Chair of the Chemistry Undergraduate Program Committee by completing and submitting a detailed petition form to the Department and only if approval of the petition is granted.

Graduate

Graduate Degrees:

- Master of Science: Chemistry (p. 129)
  - Emphasis areas:
    - Analytical
    - Inorganic
    - Organic
    - Physical
    - Polymer
  - Thesis-Based Option (p. 131)
  - Non-Thesis Option (p. 130)

Graduate Study in Chemistry

Both the Master of Science (MS) degree and interdisciplinary Ph.D. degree with Chemistry as the primary discipline have the basic aim of training students to work independently in chemistry. Both programs train the student through a broad but flexible base of coursework for further education, but the interdisciplinary Ph.D. places a greater emphasis on original research.

Master of Science: Chemistry

The Chemistry Department offers the master of science degree, with an emphasis in analytical, inorganic, organic, physical, or polymer chemistry. Students may complete a M.S. in Chemistry in a Thesis-Based or in a Non-Thesis Option. The non-thesis M.S. program has an emphasis on coursework, while the Thesis-Based degree has an emphasis on both coursework and original research. Graduating chemistry M.S. students will be exposed to the most recent advances in chemical sciences. In addition, thesis-based M.S. students will experience the excitement of performing guided research.

Students, who have received a grade of B- (2.7) or better in graduate coursework taken as part of a degree program at another institution, may transfer up to 6 credit hours of this work on approval of a majority of the student's committee. A written request for this approval must be submitted within one year of full admission to the program.

Interdisciplinary Doctor of Philosophy Program: Chemistry

Doctor of philosophy (Ph.D.) programs at UMKC are interdisciplinary. Students desiring to study at the doctoral level in the discipline of chemistry (as the primary unit) must apply to the School of Graduate Studies. Detailed information on the general and discipline-specific admission requirements for the doctoral degree may be found in the Graduate Academic Regulations and Information section of this catalog.

Students pursuing an Interdisciplinary Ph.D. degree, who have selected chemistry as one of their disciplines, should consult the School of Graduate Studies section of this catalog for degree requirements, and other academic regulations applicable to their degree programs. The interdisciplinary Ph.D. with Chemistry as the primary unit has research track only. (For further information on the Interdisciplinary Ph.D. Program, see the chemistry discipline within the School of Graduate Studies section of this catalog.)

Courses

CHEM 111 Physical Basis Of Chemistry Credits: 3
An introductory course in the basic principles applicable to chemistry for students who intend to take but are not adequately prepared to take CHEM 211. The emphasis is on quantitative relationships and problem solving.

CHEM 115 Elements Of Chemistry I Credits: 4
A one-semester course in general chemistry with special emphasis on organic chemistry and biochemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course.

Co-requisites: CHEM 115L.

CHEM 115 - MOTR CHEM 100L: Essentials in Chemistry with Lab
CHEM 115L Elements Of Chemistry, Laboratory I Credit: 1
A one-term course in general chemistry with special emphasis on organic chemistry and biochemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course.
Co-requisites: CHEM 115.

CHEM 115L - MOTR CHEM 100L: Essentials in Chemistry with Lab

CHEM 160 Chemistry, Society, And The Environment Credits: 3
This course is intended to offer a survey of chemical and scientific concepts surrounding current issues. The emphasis will be on the application of fundamental chemical knowledge to allow a full understanding of these issues in the context of currently known facts and theories. Through classroom discussion and application of the scientific method, the ramifications of the issues will be examined. Topics will include pollution, the importance of the chemical industry, its responsibilities to society, and other items of current scientific and environmental interest.

CHEM 160 - MOTR CHEM 100L: Essentials in Chemistry with Lab

CHEM 160L Laboratory For Chemistry, Society, And The Environment Credit: 1
This course is offered in support of CHEM 160. It will consist of field activities, experiments, and demonstrations to reinforce the concepts and ideas presented in that course.

CHEM 160L - MOTR CHEM 100L: Essentials in Chemistry with Lab

CHEM 180P Basic Chemistry Credits: 4
A one-semester survey of basic chemistry including: atomic structure, the periodic table, chemical bonding, chemical reactions, and selected topics from organic, polymer and biochemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course.
Prerequisites: MATH 110 or equivalent.

Corequisite: CHEM 181P.

Cross Listings: CHEM 115.

CHEM 180P - MOTR CHEM 100L: Essentials in Chemistry with Lab

CHEM 181P Experimental Basic Chemistry Credits: 4
A demonstration/laboratory course designed to support and illustrate the concepts presented in Chemistry 180P. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course.
Prerequisites: MATH 110 or equivalent.

Co-requisites: CHEM 180P.

Cross Listings: CHEM 115L.

CHEM 182P Special Projects In Chemistry Credits: 4
An independent study course consisting of library work and field work designed to exemplify various applied aspects of chemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course.
Prerequisites: MATH 110 or equivalent.

Co-requisites: CHEM 180P.

CHEM 206 Human Nutrition Credits: 3
Introduction to nutrition for health and wellness and the use of chemical energy in the breakdown and synthesis of biomolecules. Nutrition as it applies to a variety of life situations from infancy to older adults. Learning encompasses elements of anatomy and physiology related to nutrition and health.

CHEM 206 - MOTR LIFS 100: Essentials in Human Biology
CHEM 211 General Chemistry I Credits: 4
Stoichiometry, gas laws, thermochemistry, atomic structure, molecular shapes and bonding theories. Recommended preparation: working knowledge of College Algebra.

CHEM 211 - MOTR CHEM 150L: Chemistry I with Lab

CHEM 211L Experimental General Chemistry I Credit: 1
Introduction to the laboratory techniques used in studying the chemical properties of substances. Some quantitative techniques are included.
Co-requisites: CHEM 211.

CHEM 211L - MOTR CHEM 150L: Chemistry I with Lab

CHEM 212LR Experimental General Chemistry II Credit: 1
Introduction to analysis and synthesis. Descriptive chemistry of the more common elements.
Co-requisites: CHEM 212R.

CHEM 212R General Chemistry II Credits: 4
Liquids and solids, solutions, equilibrium, kinetics, electrochemistry and thermodynamics. Introductory course to all advanced work in chemistry.
Prerequisites: CHEM 211 and CHEM 211L (each with a C- or better).
Co-requisites: CHEM 212LR.

CHEM 2YC Chemistry Elective LE Credits: 99
Transfer credit

CHEM 311 Laboratory Safety And Health I Credit: 1
An introduction to laboratory safety and health. Topics to be discussed include good laboratory practice; laboratory hazards; safe chemical handling, storage and disposal; first aid; protective equipment; and federal regulations.
Prerequisites: CHEM 320 or CHEM 321.

CHEM 320 Elementary Organic Chemistry Credits: 4
This one-semester course covers all fundamental principles of organic chemistry, including modern bonding theory, analytical techniques, physical properties, and chemical reactions. This course is designed to satisfy requirements for students in the UMKC Six-Year Medical Program or certain Biology B.A. majors. This course is not recommended for pre-medical, pre-dental, pre-pharmacy or other pre-health students.
Prerequisites: CHEM 212R and CHEM 212LR (each with a C- or better).
Co-requisites: CHEM 320L.

CHEM 320L Experimental Organic Chemistry Credit: 1
Elementary organic chemistry experiments to teach basic laboratory operations.
Co-requisites: CHEM 320.

CHEM 321 Organic Chemistry I Credits: 3
The two terms (CHEM 321, CHEM 322R) constitute an integrated unit in which the chemistry of aliphatic, aromatic, and some heterocyclic compounds are studied. The study begins with simple monofunctional compounds and ends with polyfunctional natural products.
Prerequisites: CHEM 212R and CHEM 212LR (each with a C- or better).
Co-requisites: CHEM 321L.

CHEM 321L Organic Chemistry Laboratory I Credit: 1
Introduces the student to basic techniques and procedures in isolation, purification, and characterization of organic compounds and simple reactions used in the organic chemistry laboratory. The student will also be trained in the proper way to write a scientific laboratory report.
Co-requisites: CHEM 321.

CHEM 322L Organic Chemistry Laboratory II Credit: 1
CHEM 322L is an extension of CHEM 321L. CHEM 322L builds from the basic techniques, procedures, and writing to more advanced organic operations.
Prerequisites: CHEM 321 and CHEM 321L (or equivalents; each with a C-or better).
Co-requisites: CHEM 322R.
CHEM 322R Organic Chemistry II Credits: 3  
Continuation of CHEM 321.  
**Prerequisites:** CHEM 321 and CHEM 321L (each with a C- or better).

**Co-requisites:** CHEM 322L.

CHEM 330 Elementary Physical Chemistry Credits: 3  
An introductory course in the principles of physical chemistry for students who have not had calculus.  
**Prerequisites:** CHEM 220 or CHEM 250; CHEM 320 or CHEM 322R (each with a C- or better).

CHEM 341 Analytical Chemistry I: Quantitative Analysis Credits: 4  
Principles of gravimetric, volumetric, electrolytic, and other methods of analysis.  
**Prerequisites:** CHEM 212R (with a C- or better).

CHEM 341WI Analytical Chemistry I: Quantitative Analysis Credits: 4  
Principles of gravimetric, volumetric, electrolytic, and other methods of analysis.  
**Prerequisites:** CHEM 212R and CHEM 212LR (each with a C- or better).

CHEM 345R Instrumental Analysis Credits: 3  
An introductory course on the use of instruments for chemical analysis with particular reference to applications of interest to medical technologists and other students in the sciences. Emphasis will be placed on optical, electrochemical and separation methods.  
**Prerequisites:** CHEM 341 or CHEM 341WI (with a C- or better).

CHEM 367 Bioorganic Chemistry Credits: 3  
An examination into the current topics at the interface between chemistry and biology. Emphasis will be on the current literature and will include such topics as nucleic acid chemistry, protein chemistry, and carbohydrate chemistry.  
**Prerequisites:** CHEM 322R and CHEM 322L (each with a C- or better).

CHEM 382 Inorganic And Organic Synthesis Credits: 2  
A number of inorganic, organic, and organometallic compounds will be prepared using a variety of synthetic techniques.  
**Prerequisites:** CHEM 322R and CHEM 322L (each with a C- or better).

CHEM 387 Environmental Chemistry I Credits: 3  
A survey of how chemical principles can be applied to the environment. Included will be topics in aquatic chemistry, atmospheric chemistry and chemistry of the geosphere and soil.  
**Prerequisites:** CHEM 320 or CHEM 322R (with a C- or better).

CHEM 390 Special Topics In Chemistry Credits: 1-3  
This course will focus on an area of chemistry of contemporary significance. The amount of credit is to be determined by arrangement with the department. May be repeated for credit when the topic varies but no more than three hours of credit may be applied to major course requirements.  
**Prerequisites:** CHEM 320 and CHEM 322R (each with a C- or better).

CHEM 390PT Special Topics In Chemistry Credits: 1-3  
**Prerequisites:** CHEM 212R and CHEM 212LR (each with a C- or better).

CHEM 395 Directed Readings In Chemistry Credits: 1-3  
Intensive readings in areas of joint interest to the enrolled student and the cooperating faculty member. Readings may not duplicate or substitute for current course offerings.  
**Prerequisites:** CHEM 322R and CHEM 322L (each with a C- or better).

CHEM 399 Intro To Research Credits: 1-3  
Special problems to introduce undergraduate chemistry majors to research methods. A comprehensive written report is required and a copy of the report is to be retained in the chemistry office.  
**Prerequisites:** CHEM 212R and CHEM 212LR.

CHEM 410 Chemical Literature Credit: 1  
A systematic introduction to the efficient use of the chemical literature. Topics will include both classical search methods and computer search methods.  
**Prerequisites:** CHEM 322R and CHEM 322L (each with a C- or better).
CHEM 431 Physical Chemistry I Credits: 3
A first course in physical chemistry having a calculus base. This course emphasizes thermodynamics with an introduction to the basic principles of quantum mechanics.
Prerequisites: MATH 250; and PHYSICS 220 or PHYSICS 250.

CHEM 432 Physical Chemistry II Credits: 3
A second course in physical chemistry having a calculus base. This course emphasizes the quantum mechanics description of atoms and molecules, molecular spectroscopy, statistical mechanics, and kinetics.
Prerequisites: MATH 250; and PHYSICS 220 or PHYSICS 250; and CHEM 431 (each with a C- or better).
Co-requisites: CHEM 437WI.

CHEM 434 Molecular Spectroscopy Credits: 3
A theoretical introduction to molecular spectroscopy and its relation to structure. Electronic, vibrational and rotational spectra of chemical systems will be discussed.
Prerequisites: CHEM 432 (with a C- or better).

CHEM 437WI Experimental Physical Chemistry I Credits: 3
Experimental methods in physical chemistry. One hour lecture and six hours laboratory each week. Satisfies writing intensive requirements for the B.A. or B.S. degree.
Prerequisites: RooWriter.
Co-requisites: CHEM 432.

CHEM 442R Analytical Chemistry II: Instrumental Analysis Credits: 3
A continuation of CHEM 341. The experimental and theoretical aspects of optical and electrochemical, chromatographic and other physicochemical methods of analysis.
Prerequisites: CHEM 341 or CHEM 341WI (with a C- or better).

CHEM 445 Introduction To Principles Of Forensic Investigation Credits: 2
A survey of the physicochemical forensic techniques employed in the detection, examination, processing, preservation and court presentation of evidence.
Prerequisites: CHEM 212R and CHEM 212LR (each with a C- or better).

CHEM 451R Inorganic Chemistry Credits: 3
Modern concepts and theories of inorganic chemistry.
Prerequisites: CHEM 431 (with a C- or better).

CHEM 471 Introduction To Polymer Chemistry Credits: 3
Survey of organic and inorganic monomers and polymers; the occurrence, synthesis, structures and properties of natural and synthetic polymers; discussion of general properties of plastics, elastomers, fibers, resins, and plasticizers.
Prerequisites: CHEM 320 and CHEM 320L or CHEM 322R and CHEM 322L (each with a C- or better).

CHEM 480 Computer Applications To Chemical Problems Credits: 3
The course will survey the field of computational chemistry, concentrating on methods, programs and general utility to the research chemist. The student will learn the principles of the theory underlying the methods and will use selected software to carry out chemical calculations.
Prerequisites: CHEM 322R and 322L (with C- or better).

CHEM 490 Special Topics In Chemistry Credits: 1-3
This course will focus on an area of chemistry of contemporary significance. The amount of credit is to be determined by arrangement with the department. May be repeated for credit when the topic varies but no more than three hours of credit may be applied to major course requirements.
Prerequisites: CHEM 431 (with a C- or better).

CHEM 495 Directed Readings In Chemistry Credits: 1-3
Intensive readings in areas of joint interest to the enrolled student and the cooperating faculty member. Readings may not duplicate or substitute for current course offerings.
Prerequisites: CHEM 431 (with a C- or better).

CHEM 499 Senior Research Credits: 1-9
The student is given an original research problem and will be held responsible for all previous experience in working toward its solution. A well-written, comprehensive, and well documented research report is required, and a copy of the report is to be retained in the Chemistry department.
Prerequisites: CHEM 431 (with a C- or better).
CHEM 5511 Laboratory Safety And Health I Credit: 1
An introduction to laboratory safety and health. Topics to be discussed include good laboratory practice; laboratory hazards; safe chemical handling; storage and disposal; first aid; protective equipment; and federal regulations.

CHEM 5520R Survey Of Organic Chemistry Credits: 3
An intensive advanced survey of the structure, synthesis and reactions of organic compounds.

CHEM 5521R Mechanisms Of Organic Reactions Credits: 3
A comprehensive course in which the mechanisms of organic reactions are discussed in light of modern chemical principles.
**Prerequisites:** CHEM 322R and CHEM 432.

CHEM 5522 Synthetic Organic Chemistry Credits: 3
A critical approach to the synthesis and modification of organic molecules; newer methods will be emphasized.
**Prerequisites:** CHEM 322R and CHEM 432.

CHEM 5529 Selected Topics In Organic Chemistry Credits: 3
Selected topics from the chemistry and theories of organic structures with particular attention to recent developments.

CHEM 5530 Systematic Physical Chemistry Credits: 3
An intensive and comprehensive review of the principles of physical chemistry. This course may either emphasize thermodynamics with an introduction to principles of quantum mechanics or emphasize quantum mechanical description of atoms and molecules, molecular spectroscopy, statistical mechanics and kinetics.

CHEM 5530A Physical Chemistry I Credits: 3
This graduate course reviews principles of physical chemistry, focusing on thermodynamics, equilibria and electrochemistry.

CHEM 5530B Physical Chemistry II Credits: 3
This graduate course reviews principles of physical chemistry, focusing on quantum chemistry, molecular spectroscopy and structure, and kinetics.

CHEM 5531 Classical Thermodynamics Credits: 3
A rigorous treatment of the laws of thermodynamics and their application to ideal and non-ideal equilibrium systems.

CHEM 5532 Chemical Kinetics Credits: 3
Empirical analysis of chemical reaction rates. Theories of unimolecular and bimolecular reactions, reactions in solution and complex reactions. Review of modern and classical techniques used to study chemical kinetics.

CHEM 5533 Quantum Chemistry Credits: 3
Application of quantum mechanical methods to the study of systems of chemical interest. Exact solutions and approximate methods will be discussed.

CHEM 5534 Molecular Spectroscopy Credits: 3
A theoretical introduction to molecular spectroscopy and its relation to structure. Electronic, vibrational and rotational spectra of chemical systems will be discussed.

CHEM 5535 Statistical Thermodynamics Credits: 3
A rigorous treatment of the fundamental concepts of statistical thermodynamics, with applications to specific systems that reflect the interests of students participating in the course.

CHEM 5539 Selected Topics In Physical Chemistry Credits: 3
Selected topics and recent developments in physical chemistry.
**Prerequisites:** CHEM 5530.

CHEM 5541R Advanced Analytical Chemistry Credits: 3
An intensive review of modern concepts of analytical chemistry.
**Prerequisites:** CHEM 432.

CHEM 5551R Advanced Inorganic Chemistry I Credits: 3
A systematic treatment of bonding, structure, reactions and reaction mechanisms of inorganic compounds, with emphasis on classical transition metal compounds and organometallic compounds.
**Prerequisites:** CHEM 451R or equivalent.

CHEM 5559 Selected Topics In Inorganic Chemistry Credits: 3
Various special topics in the inorganic area to be offered in different semesters.
**Prerequisites:** CHEM 5551R.

CHEM 5567 Advanced Bioorganic Chemistry Credits: 3
This course examines the organic chemistry and laboratory synthesis of the major biopolymers and organic chemistry related to biological systems. Emphasis is on literature and library research and natural product and solid phase organic synthesis, combinatorial synthesis, bioconjugates and applied bioorganic chemistry.
CHEM 5571R Introduction To Polymer Chemistry Credits: 3
Survey of organic and inorganic monomers and polymers; the occurrence, synthesis, structures and properties of natural and synthetic polymers; discussion of general properties of plastics, elastomers, fibers, resins and plasticizers.
**Prerequisites:** CHEM 432.

CHEM 5580R Computer Applications To Chemical Problems Credits: 3
The purpose of this course is to survey the field of computational chemistry, concentrating on methods, programs and general utility to the research chemist. The student will learn the principles of the theory underlying the methods and will use selected software to carry out chemical calculations.
**Prerequisites:** CHEM 320/320L or CHEM 322R/322L with "C-" or better.

CHEM 5587 Environmental Chemistry I Credits: 3
A survey of how chemical principles can be applied to the environment. Included will be topics in aquatic chemistry, atmospheric chemistry and chemistry of the geosphere and soil.

CHEM 5588 Environmental Chemistry II Credits: 3
Discussion of selected topics in advanced environmental chemistry, such as environmental toxicology, environmental risk, the chemistry of hazardous wastes and their treatment, and environmental analytical chemistry.

CHEM 5590 Directed Studies Credits: 1-3
Intensive readings and/or research in an area selected by the graduate student in consultation with the instructor.

CHEM 5598 Research Methodology Conference Credits: 3
Student will meet on an individual basis with two faculty members who are involved in research. The student's adviser will coordinate this course.

CHEM 5599 Research And Thesis Credits: 1-9
Research for thesis.

CHEM 5611 Chemistry Seminar Credit: 1
Presentation and discussion of topics currently appearing in United States and foreign literature.

CHEM 5699 Research And Dissertation Credits: 1-16
Research for dissertation.

CHEM 5899 Required Graduate Enrollment Credit: 1

CHEM 5931 Human Nutrition Credits: 3
Introduction to nutrition for health and wellness and the use of chemical energy in the breakdown and synthesis of biomolecules. Nutrition as it applies to a variety of life situations from infancy to older adults. Learning encompasses elements of anatomy and physiology related to nutrition and health.

CHEM H212R Honors: General Chemistry II Credits: 4
Liquids and solids, solutions, equilibrium, kinetics, electrochemistry and thermodynamics. Introductory course to all advanced work in chemistry.

CHEM H321 Honors: Organic Chemistry I Credits: 3
The two terms (CHEM H321, CHEM H322R) constitute an integrated unit in which the chemistry of aliphatic, aromatic, and some heterocyclic compounds are studied. The study begins with simple monofunctional compounds and ends with polyfunctional natural products.

CHEM H321L Organic Chemistry Laboratory I - Honors Credit: 1
Introduces the student to basic techniques and procedures in isolation, purification, and characterization of organic compounds and simple reactions used in the organic chemistry laboratory. The student will also be trained in the proper way to write a scientific laboratory report.

CHEM H322L Organic Chemistry Laboratory II Credit: 1
An extension of CHEM 321L. This course builds from the basic techniques, procedures, and writing to more advanced organic operations.
**Prerequisites:** CHEM 321 and CHEM 321L (each with a C- or better).

**Co-requisites:** CHEM 322R.

CHEM H322LR Organic Chemistry Laboratory II-Honors Credits: 2
A more intense version of CHEM 322L. See course description for CHEM 322L.
**Prerequisite:** CHEM 321L.

CHEM H322R Honors: Organic Chemistry II Credits: 3

CHEM H399 Introduction To Research Credits: 1-3
Special problems to introduce undergraduate chemistry majors to research methods. A comprehensive written report is required and a copy of the report is to be retained in the chemistry office. May be taken only after consultation with a member of the chemistry staff.
**Prerequisites:** CHEM 212R.

CHEM H499 Senior Research - Honors Credits: 1-9
Course frequency subject to enrollments, staffing and financial exigency.
Bachelor of Arts: Chemistry

University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes
Students graduating from this program will:

• Apply chemical concepts to solving theoretical and practical problems.
• Follow general laboratory practice guidelines and demonstrate proper laboratory safety practices.
• Read, analyze, interpret, and cite the chemical literature as applied to answering chemical questions.
• Clearly and accurately communicate scientific information in an ethical manner.

Students graduating with a baccalaureate degree in chemistry will be prepared for entry into professional schools (e.g., medical, dental, pharmaceutical, or veterinary), graduate programs, or chemical industries.

'Total credits' in this section indicates the number of General Education Core credit hours that are not met by the degree specific requirements outlined below.

Total Credits: 21

See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.
Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

Total Credits

³ Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

Total Credits

¹ ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.

² This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

Major Requirements

Students must successfully complete the major requirements below with at least 12 hours of the noted upper division (300+) course requirements completed at UMKC.

While credit as a result of advanced placement (AP) scores and courses in Biochemistry (LS-BIOC 441, LS-BIOC 365, or LS-BIOC 366) may be used towards meeting major requirements, they do not count towards the residency requirement.

- All majors must receive a C- or better in all chemistry courses with an overall chemistry GPA of 2.0 for graduation.
• A minimum grade of C- is required for all prerequisite courses (including physics and mathematics courses). In exceptional cases, students may receive written consent by submitting a petition to the Chemistry Undergraduate Curriculum Committee which has to be approved to waive this requirement.

• Each chemistry major must be advised by the Chemistry Undergraduate Advisor every semester.

1 Any combination of 300-level and 400-level chemistry courses to bring the total credit hours to 26. Certain biochemistry courses (offered by the School of Biological Sciences) also may be included in this total. Please confer with the principal undergraduate advisor.

No more than three hours total in CHEM 395, CHEM 399, CHEM 495 and CHEM 499 may be used in meeting the major course requirements.

General Electives
Students take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

Tools for Planning and Fulfilling Academic Requirements
UMKC’s Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.

Courses
CHEM 111 Physical Basis Of Chemistry Credits: 3
An introductory course in the basic principles applicable to chemistry for students who intend to take but are not adequately prepared to take CHEM 211. The emphasis is on quantitative relationships and problem solving.
CHEM 115 Elements Of Chemistry I Credits: 4
A one-term course in general chemistry with special emphasis on organic chemistry and biochemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course.
Co-requisites: CHEM 115L.

CHEM 115 - MOTR CHEM 100L: Essentials in Chemistry with Lab

CHEM 115L Elements Of Chemistry, Laboratory I Credit: 1
A one-term course in general chemistry with special emphasis on organic chemistry and biochemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course.
Co-requisites: CHEM 115.

CHEM 115L - MOTR CHEM 100L: Essentials in Chemistry with Lab

CHEM 160 Chemistry, Society, And The Environment Credits: 3
This course is intended to offer a survey of chemical and scientific concepts surrounding current issues. The emphasis will be on the application of fundamental chemical knowledge to allow a full understanding of these issues in the context of currently known facts and theories. Through classroom discussion and application of the scientific method, the ramifications of the issues will be examined. Topics will include pollution, the importance of the chemical industry, its responsibilities to society, and other items of current scientific and environmental interest.
CHEM 160 - MOTR CHEM 100L: Essentials in Chemistry with Lab

CHEM 160L Laboratory For Chemistry, Society, And The Environment Credit: 1
This course is offered in support of CHEM 160. It will consist of field activities, experiments, and demonstrations to reinforce the concepts and ideas presented in that course.
CHEM 160L - MOTR CHEM 100L: Essentials in Chemistry with Lab

CHEM 180P Basic Chemistry Credits: 4
A one-semester survey of basic chemistry including: atomic structure, the periodic table, chemical bonding, chemical reactions, and selected topics from organic, polymer and biochemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course.
Prerequisites: MATH 110 or equivalent.
Corequisite: CHEM 181P.

Cross Listings: CHEM 115.

CHEM 180P - MOTR CHEM 100L: Essentials in Chemistry with Lab

CHEM 181P Experimental Basic Chemistry Credits: 4
A demonstration/laboratory course designed to support and illustrate the concepts presented in Chemistry 180P. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course.
Prerequisites: MATH 110 or equivalent.
Co-requisites: CHEM 180P.

Cross Listings: CHEM 115L.

CHEM 182P Special Projects In Chemistry Credits: 4
An independent study course consisting of library work and field work designed to exemplify various applied aspects of chemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course.
Prerequisites: MATH 110 or equivalent.
Co-requisites: CHEM 180P.
CHEM 206 Human Nutrition Credits: 3
Introduction to nutrition for health and wellness and the use of chemical energy in the breakdown and synthesis of biomolecules. Nutrition as it applies to a variety of life situations from infancy to older adults. Learning encompasses elements of anatomy and physiology related to nutrition and health.

CHEM 206 - MOTR LIFS 100: Essentials in Human Biology

CHEM 211 General Chemistry I Credits: 4
Stoichiometry, gas laws, thermochemistry, atomic structure, molecular shapes and bonding theories. Recommended preparation: working knowledge of College Algebra.

CHEM 211 - MOTR CHEM 150L: Chemistry I with Lab

CHEM 211L Experimental General Chemistry I Credit: 1
Introduction to the laboratory techniques used in studying the chemical properties of substances. Some quantitative techniques are included.
Co-requisites: CHEM 211.

CHEM 211L - MOTR CHEM 150L: Chemistry I with Lab

CHEM 212LR Experimental General Chemistry II Credit: 1
Introduction to analysis and synthesis. Descriptive chemistry of the more common elements.
Co-requisites: CHEM 212R.

CHEM 212R General Chemistry II Credits: 4
Liquids and solids, solutions, equilibrium, kinetics, electrochemistry and thermodynamics. Introductory course to all advanced work in chemistry.
Prerequisites: CHEM 211 and CHEM 211L (each with a C- or better).
Co-requisites: CHEM 212R.

CHEM 2YC Chemistry Elective LE Credits: 99
Transfer credit

CHEM 311 Laboratory Safety And Health I Credit: 1
An introduction to laboratory safety and health. Topics to be discussed include good laboratory practice; laboratory hazards; safe chemical handling, storage and disposal; first aid; protective equipment; and federal regulations.
Prerequisites: CHEM 320 or CHEM 321.

CHEM 320 Elementary Organic Chemistry Credits: 4
This one-semester course covers all fundamental principles of organic chemistry, including modern bonding theory, analytical techniques, physical properties, and chemical reactions. This course is designed to satisfy requirements for students in the UMKC Six-Year Medical Program or certain Biology B.A. majors. This course is not recommended for pre-medical, pre-dental, pre-pharmacy or other pre-health students.
Prerequisites: CHEM 212R and CHEM 212LR (each with a C- or better).
Co-requisites: CHEM 320.

CHEM 320L Experimental Organic Chemistry Credit: 1
Elementary organic chemistry experiments to teach basic laboratory operations.
Co-requisites: CHEM 320.

CHEM 321 Organic Chemistry I Credits: 3
The two terms (CHEM 321, CHEM 322R) constitute an integrated unit in which the chemistry of aliphatic, aromatic, and some heterocyclic compounds are studied. The study begins with simple monofunctional compounds and ends with polyfunctional natural products.
Prerequisites: CHEM 212R and CHEM 212LR (each with a C- or better).
Co-requisites: CHEM 321.

CHEM 321L Organic Chemistry Laboratory I Credit: 1
Introduces the student to basic techniques and procedures in isolation, purification, and characterization of organic compounds and simple reactions used in the organic chemistry laboratory. The student will also be trained in the proper way to write a scientific laboratory report.
Co-requisites: CHEM 321.
CHEM 322L Organic Chemistry Laboratory II Credit: 1
CHEM 322L is an extension of CHEM 321L. CHEM 322L builds from the basic techniques, procedures, and writing to more advanced organic operations.

**Prerequisites:** CHEM 321 and CHEM 321L (or equivalents; each with a C- or better).

**Co-requisites:** CHEM 322R.

CHEM 322R Organic Chemistry II Credits: 3
Continuation of CHEM 321.

**Prerequisites:** CHEM 321 and CHEM 321L (each with a C- or better).

**Co-requisites:** CHEM 322L.

CHEM 330 Elementary Physical Chemistry Credits: 3
An introductory course in the principles of physical chemistry for students who have not had calculus.

**Prerequisites:** CHEM 220 or CHEM 250; CHEM 320 or CHEM 322R (each with a C- or better).

CHEM 341 Analytical Chemistry I: Quantitative Analysis Credits: 4
Principles of gravimetric, volumetric, electrolytic, and other methods of analysis.

**Prerequisites:** CHEM 212R (with a C- or better).

CHEM 341WI Analytical Chemistry I: Quantitative Analysis Credits: 4
Principles of gravimetric, volumetric, electrolytic, and other methods of analysis.

**Prerequisites:** CHEM 212R and CHEM 212LR (each with a C- or better), RooWriter.

CHEM 345R Instrumental Analysis Credits: 3
An introductory course on the use of instruments for chemical analysis with particular reference to applications of interest to medical technologists and other students in the sciences. Emphasis will be placed on optical, electrochemical and separation methods.

**Prerequisites:** CHEM 341 or CHEM 341WI (with a C- or better).

CHEM 357 Bioorganic Chemistry Credits: 3
An examination into the current topics at the interface between chemistry and biology. Emphasis will be on the current literature and will include such topics as nucleic acid chemistry, protein chemistry, and carbohydrate chemistry.

**Prerequisites:** CHEM 322R and CHEM 322L (each with a C- or better).

CHEM 382 Inorganic And Organic Synthesis Credits: 2
A number of inorganic, organic, and organometallic compounds will be prepared using a variety of synthetic techniques.

**Prerequisites:** CHEM 322R and CHEM 322L (each with a C- or better).

CHEM 387 Environmental Chemistry I Credits: 3
A survey of how chemical principles can be applied to the environment. Included will be topics in aquatic chemistry, atmospheric chemistry and chemistry of the geosphere and soil.

**Prerequisites:** CHEM 320 or CHEM 322R (with a C- or better).

CHEM 390 Special Topics In Chemistry Credits: 1-3
This course will focus on an area of chemistry of contemporary significance. The amount of credit is to be determined by arrangement with the department. May be repeated for credit when the topic varies but no more than three hours of credit may be applied to major course requirements.

**Prerequisites:** CHEM 320 and CHEM 322R (each with a C- or better).

CHEM 390PT Special Topics In Chemistry Credits: 1-3
CHEM 392 Chemistry Internship/Practical Training Credits: 1-3
Practical work in chemistry in an industrial, academic or other professional setting. Prior to the start of work, the department must approve the internship/practical training.

**Prerequisites:** CHEM 212R and CHEM 212LR (each with a C- or better).

CHEM 395 Directed Readings In Chemistry Credits: 1-3
Intensive readings in areas of joint interest to the enrolled student and the cooperating faculty member. Readings may not duplicate or substitute for current course offerings.

**Prerequisites:** CHEM 322R and CHEM 322L (each with a C- or better).

CHEM 399 Intro To Research Credits: 1-3
Special problems to introduce undergraduate chemistry majors to research methods. A comprehensive written report is required and a copy of the report is to be retained in the chemistry office.

**Prerequisites:** CHEM 212R and CHEM 212LR.
CHEM 410 Chemical Literature Credit: 1  
A systematic introduction to the efficient use of the chemical literature. Topics will include both classical search methods and computer search methods.  
**Prerequisites:** CHEM 322R and CHEM 322L (each with a C- or better).

CHEM 431 Physical Chemistry I Credits: 3  
A first course in physical chemistry having a calculus base. This course emphasizes thermodynamics with an introduction to the basic principles of quantum mechanics.  
**Prerequisites:** MATH 250; and PHYSICS 220 or PHYSICS 250.

CHEM 432 Physical Chemistry II Credits: 3  
A second course in physical chemistry having a calculus base. This course emphasizes the quantum mechanics description of atoms and molecules, molecular spectroscopy, statistical mechanics, and kinetics.  
**Prerequisites:** MATH 250; and PHYSICS 220 or PHYSICS 250; and CHEM 431 (each with a C- or better).  
**Co-requisites:** CHEM 437WI.

CHEM 434 Molecular Spectroscopy Credits: 3  
A theoretical introduction to molecular spectroscopy and its relation to structure. Electronic, vibrational and rotational spectra of chemical systems will be discussed.  
**Prerequisites:** CHEM 432 (with a C- or better).

CHEM 437WI Experimental Physical Chemistry I Credits: 3  
Experimental methods in physical chemistry. One hour lecture and six hours laboratory each week. Satisfies writing intensive requirements for the B.A. or B.S. degree.  
**Prerequisites:** RooWriter.  
**Co-requisites:** CHEM 432.

CHEM 442R Analytical Chemistry II: Instrumental Analysis Credits: 3  
A continuation of CHEM 341. The experimental and theoretical aspects of optical and electrochemical, chromatographic and other physicochemical methods of analysis.  
**Prerequisites:** CHEM 341 or CHEM 341WI (with a C- or better).

CHEM 445 Introduction To Principles Of Forensic Investigation Credits: 2  
A survey of the physicochemical forensic techniques employed in the detection, examination, processing, preservation and court presentation of evidence.  
**Prerequisites:** CHEM 212R and CHEM 212LR (each with a C- or better).

CHEM 451R Inorganic Chemistry Credits: 3  
Modern concepts and theories of inorganic chemistry.  
**Prerequisites:** CHEM 431 (with a C- or better).

CHEM 471 Introduction To Polymer Chemistry Credits: 3  
Survey of organic and inorganic monomers and polymers; the occurrence, synthesis, structures and properties of natural and synthetic polymers; discussion of general properties of plastics, elastomers, fibers, resins, and plasticizers.  
**Prerequisites:** CHEM 320 and CHEM 320L or CHEM 322R and CHEM 322L (each with a C- or better).

CHEM 480 Computer Applications To Chemical Problems Credits: 3  
The course will survey the field of computational chemistry, concentrating on methods, programs and general utility to the research chemist. The student will learn the principles of the theory underlying the methods and will use selected software to carry out chemical calculations.  
**Prerequisites:** CHEM 322R and 322L (with C- or better).

CHEM 490 Special Topics In Chemistry Credits: 1-3  
This course will focus on an area of chemistry of contemporary significance. The amount of credit is to be determined by arrangement with the department. May be repeated for credit when the topic varies but no more than three hours of credit may be applied to major course requirements.  
**Prerequisites:** CHEM 431 (with a C- or better).

CHEM 495 Directed Readings In Chemistry Credits: 1-3  
Intensive readings in areas of joint interest to the enrolled student and the cooperating faculty member. Readings may not duplicate or substitute for current course offerings.  
**Prerequisites:** CHEM 431 (with a C- or better).
CHEM 499 Senior Research Credits: 1-9
The student is given an original research problem and will be held responsible for all previous experience in working toward its solution. A well-written, comprehensive, and well documented research report is required, and a copy of the report is to be retained in the Chemistry department.

Prerequisites: CHEM 431 (with a C- or better).

CHEM 5511 Laboratory Safety And Health I Credit: 1
An introduction to laboratory safety and health. Topics to be discussed include good laboratory practice; laboratory hazards; safe chemical handling; storage and disposal; first aid; protective equipment; and federal regulations.

CHEM 5520R Survey Of Organic Chemistry Credits: 3
An intensive advanced survey of the structure, synthesis and reactions of organic compounds.

CHEM 5521R Mechanisms Of Organic Reactions Credits: 3
A comprehensive course in which the mechanisms of organic reactions are discussed in light of modern chemical principles.

Prerequisites: CHEM 322R and CHEM 432.

CHEM 5522 Synthetic Organic Chemistry Credits: 3
A critical approach to the synthesis and modification of organic molecules; newer methods will be emphasized.

Prerequisites: CHEM 322R and CHEM 432.

CHEM 5529 Selected Topics In Organic Chemistry Credits: 3
Selected topics from the chemistry and theories of organic structures with particular attention to recent developments.

CHEM 5530 Systematic Physical Chemistry Credits: 3
An intensive and comprehensive review of the principles of physical chemistry. This course may either emphasize thermodynamics with an introduction to principles of quantum mechanics or emphasize quantum mechanical description of atoms and molecules, molecular spectroscopy, statistical mechanics and kinetics.

CHEM 5530A Physical Chemistry I Credits: 3
This graduate course reviews principles of physical chemistry, focusing on thermodynamics, equilibria and electrochemistry.

CHEM 5530B Physical Chemistry II Credits: 3
This graduate course reviews principles of physical chemistry, focusing on quantum chemistry, molecular spectroscopy and structure, and kinetics.

CHEM 5531 Classical Thermodynamics Credits: 3
A rigorous treatment of the laws of thermodynamics and their application to ideal and non-ideal equilibrium systems.

CHEM 5532 Chemical Kinetics Credits: 3
Empirical analysis of chemical reaction rates. Theories of unimolecular and bimolecular reactions, reactions in solution and complex reactions. Review of modern and classical techniques used to study chemical kinetics.

CHEM 5533 Quantum Chemistry Credits: 3
Application of quantum mechanical methods to the study of systems of chemical interest. Exact solutions and approximate methods will be discussed.

CHEM 5534 Molecular Spectroscopy Credits: 3
A theoretical introduction to molecular spectroscopy and its relation to structure. Electronic, vibrational and rotational spectra of chemical systems will be discussed.

CHEM 5535 Statistical Thermodynamics Credits: 3
A rigorous treatment of the fundamental concepts of statistical thermodynamics, with applications to specific systems that reflect the interests of students participating in the course.

CHEM 5539 Selected Topics In Physical Chemistry Credits: 3
Selected topics and recent developments in physical chemistry.

Prerequisites: CHEM 5530.

CHEM 5541R Advanced Analytical Chemistry Credits: 3
An intensive review of modern concepts of analytical chemistry.

Prerequisites: CHEM 432.

CHEM 5551R Advanced Inorganic Chemistry I Credits: 3
A systematic treatment of bonding, structure, reactions and reaction mechanisms of inorganic compounds, with emphasis on classical transition metal compounds and organometallic compounds.

Prerequisites: CHEM 451R or equivalent.

CHEM 5559 Selected Topics In Inorganic Chemistry Credits: 3
Various special topics in the inorganic area to be offered in different semesters.

Prerequisites: CHEM 5551R.
CHEM 5567 Advanced Bioorganic Chemistry Credits: 3
This course examines the organic chemistry and laboratory synthesis of the major biopolymers and organic chemistry related to biological systems. Emphasis is on literature and library research and natural product and solid phase organic synthesis, combinatorial synthesis, bioconjugates and applied bioorganic chemistry.

CHEM 5571R Introduction To Polymer Chemistry Credits: 3
Survey of organic and inorganic monomers and polymers; the occurrence, synthesis, structures and properties of natural and synthetic polymers; discussion of general properties of plastics, elastomers, fibers, resins and plasticizers.
**Prerequisites:** CHEM 432.

CHEM 5580R Computer Applications To Chemical Problems Credits: 3
The purpose of this course is to survey the field of computational chemistry, concentrating on methods, programs and general utility to the research chemist. The student will learn the principles of the theory underlying the methods and will use selected software to carry out chemical calculations.
**Prerequisites:** CHEM 320/320L or CHEM 322R/322L with "C-" or better.

CHEM 5587 Environmental Chemistry I Credits: 3
A survey of how chemical principles can be applied to the environment. Included will be topics in aquatic chemistry, atmospheric chemistry and chemistry of the geosphere and soil.

CHEM 5588 Environmental Chemistry II Credits: 3
Discussion of selected topics in advanced environmental chemistry, such as environmental toxicology, environmental risk, the chemistry of hazardous wastes and their treatment, and environmental analytical chemistry.

CHEM 5590 Directed Studies Credits: 1-3
Intensive readings and/or research in an area selected by the graduate student in consultation with the instructor.

CHEM 5598 Research Methodology Conference Credits: 3
Student will meet on an individual basis with two faculty members who are involved in research. The student's adviser will coordinate this course.

CHEM 5599 Research And Thesis Credits: 1-9
Research for thesis.

CHEM 5611 Chemistry Seminar Credit: 1
Presentation and discussion of topics currently appearing in United States and foreign literature.

CHEM 5699 Research And Dissertation Credits: 1-16
Research for dissertation.

CHEM H206 Human Nutrition Credits: 3
Introduction to nutrition for health and wellness and the use of chemical energy in the breakdown and synthesis of biomolecules. Nutrition as it applies to a variety of life situations from infancy to older adults. Learning encompasses elements of anatomy and physiology related to nutrition and health.

CHEM H212R Honors: General Chemistry II Credits: 4
Liquids and solids, solutions, equilibrium, kinetics, electrochemistry and thermodynamics. Introductory course to all advanced work in chemistry.

CHEM H321 Honors: Organic Chemistry I Credits: 3
The two terms (CHEM H321, CHEM H322R) constitute an integrated unit in which the chemistry of aliphatic, aromatic, and some heterocyclic compounds are studied. The study begins with simple monofunctional compounds and ends with polyfunctional natural products.

CHEM H321L Organic Chemistry Laboratory I - Honors Credit: 1
Introduces the student to basic techniques and procedures in isolation, purification, and characterization of organic compounds and simple reactions used in the organic chemistry laboratory. The student will also be trained in the proper way to write a scientific laboratory report.

CHEM H322L Organic Chemistry Laboratory II Credit: 1
An extension of CHEM 321L. This course builds from the basic techniques, procedures, and writing to more advanced organic operations.
**Prerequisites:** CHEM 321 and CHEM 321L (each with a C- or better).

**Co-requisites:** CHEM 322R.

CHEM H322LR Organic Chemistry Laboratory II-HonorsCredits: 2
A more intense version of CHEM 322L. See course description for CHEM 322L.
**Prerequisite:** CHEM 321L.
CHEM H322R Honors: Organic Chemistry II Credits: 3
CHEM H399 Introduction To Research Credits: 1-3
Special problems to introduce undergraduate chemistry majors to research methods. A comprehensive written report is required and a copy of the report is to be retained in the chemistry office. May be taken only after consultation with a member of the chemistry staff.

Prerequisites: CHEM 212R.

CHEM H499 Senior Research - Honors Credits: 1-9
Course frequency subject to enrollments, staffing and financial exigency.
Bachelor of Science: Chemistry

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes

Students graduating from this program will:

- Apply chemical concepts to solving theoretical and practical problems.
- Follow general laboratory practice guidelines and demonstrate proper laboratory safety practices.
- Read, analyze, interpret, and cite the chemical literature as applied to answering chemical questions.
- Articulate scientific information, both orally and in writing.
- Analyze and solve scientific problems as part of a team.
- Demonstrate ethical scientific practice, treatment of data and other people's work.

Students graduating with a baccalaureate degree in chemistry will be prepared for entry into professional schools (e.g., medical, dental, pharmaceutical, or veterinary), graduate programs, or chemical industries.

'Total credits' in this section indicates the number of General Education Core credit hours that are not met by the degree specific requirements outlined below.

Total Credits 21

1 See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.
Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

Total Credits 3

1 Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

1 ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.

2 This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

Major Requirements

The Chemistry Department bachelor of science degree is certified by the American Chemical Society (ACS) and requires the 43 credit hours in chemistry listed below, specifically the 2 credit hours of CHEM 382, 3 credit hours of CHEM 367 or LS-BIOC 341 and an upper division elective which may be chosen from selected departments.

In order to meet the residency requirement for a major in Chemistry, a minimum of 12 credit hours must be completed in the Department of Chemistry at UMKC, of which 9 out of the 12 hours must be at the 300-level or above. While credit as a result of advanced placement (AP) scores and courses in
Biochemistry (LS-BIOC 441, LS-BIOC 365, or LS-BIOC 366) may be used towards meeting major requirements, they do not count towards the residency requirement.

- All majors must receive a C- or better in all chemistry courses with an overall chemistry GPA of 2.0 for graduation.
- A minimum grade of C- is required for all prerequisite courses (including physics and mathematics courses). In exceptional cases, students may receive written consent by submitting a petition to the Chemistry Undergraduate Curriculum Committee which has to be approved to waive this requirement.
- Each chemistry major must be advised by the Chemistry Undergraduate Advisor every semester.

Advanced Work

One of the following: ¹

- CHEM 400 or higher
- MATH course higher than 250 with 220 as a prerequisite
- BIOLOGY 300 or Higher
- PHYSICS 300 or Higher
- STAT 400 or Higher

Math

- MATH 120 Precalculus
- MATH 210 Calculus I (Focus B)
- MATH 220 Calculus II
- MATH 250 Calculus III

Engineering Physics

- PHYSICS 240 Physics For Scientists and Engineers I
- PHYSICS 250 Physics For Scientists and Engineers II

ACS Requirements

- CHEM 382 Inorganic And Organic Synthesis
- CHEM 367 Bioorganic Chemistry
  - or LS-BIOC 441 Biochemistry

Total Credits 73
On rare occasions, a student may need more flexibility than the ACS-certified B.S. degree allows. In this case, course substitutions may be selected and approved by a chemistry advisor so that the student may still complete the bachelor of science degree in chemistry as a non-ACS-certified degree.

**Math and Science Requirements**
The Bachelor of Science degree requires a minimum of 60 hours in math and science coursework. The number of credit hours needed to meet this minimum requirement are listed below.

<table>

**General Electives**
Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

**Tools for Planning and Fulfilling Academic Requirements**
UMKC’s Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Master of Science: Chemistry

Requirements for Admission

Applicants should have the equivalent of an American Chemical Society (ACS)-approved bachelor's degree in chemistry. This degree includes the equivalent of: one year of general chemistry, quantitative analysis, one year of organic chemistry, one year of physical chemistry, physical chemistry laboratory, instrumental analysis, inorganic chemistry, one year of physics, and three semesters of calculus, and the ACS-recommended distribution of advanced courses and course credits. (For example, see UMKC's B.S. program in chemistry (p. 125.) Applicants should take particular note of the physical chemistry requirement. They may be admitted as provisional students if they have a limited number of undergraduate deficiencies. At the time that admission is offered, applicants will be notified of any requirements to be met for reclassification as fully admitted. Undergraduate courses included in these requirements must be completed with grades of C- or higher.

Applications are only accepted through the online system, and include:

1. Official, confidentially transmitted transcripts.
2. Statement of purpose.
3. Two confidentially transmitted letters of recommendation (academic and/or professional).
4. Official Graduate Record Exam (General Test) score, less than six (6) years old.
5. English language proficiency requirement.

An official Graduate Record Exam score (general test) is required as part of the application to the program. The GRE score will be evaluated as part of the entire application.

Applicants from foreign countries, who have an official language other than English, must achieve scores of at least 550 (paper-based), 213 (computer-based), or 79 (internet-based) on the Test of English as a Foreign Language (TOEFL) to be considered for admission.

Placement Examinations

Incoming students must take placement examinations in analytical, inorganic, organic, and physical chemistry. Placement examinations are typically administered the week before the first week of classes of the fall and spring semesters. Students scoring below the 50th percentile in the organic and/or physical chemistry exams are required to enroll in CHEM 5520R and/or CHEM 5530A/CHEM 5530B, respectively. Enrollment in other graduate organic or physical chemistry courses is not permitted until CHEM 5520R or CHEM 5530A/CHEM 5530B, respectively, is (are) successfully completed. CHEM 5530A/CHEM 5530B is currently offered concurrently with CHEM 431 or CHEM 432. A student is required to take either CHEM 5530A/CHEM 431 or CHEM 5530B/CHEM 432 or both, depending on his/her performances in the various sub-disciplines of the physical chemistry placement exam. Should a student be required to take both CHEM 5530A/CHEM 431 and CHEM 5530B/CHEM 432, the average grade of the two CHEM 5530 courses will be considered for the fulfillment of the physical chemistry deficiency. Two grades of C+ or lower, or one grade of less than C- in CHEM 5520R or CHEM 5530, will result in termination from the degree program. These courses may not be counted toward the M.S. coursework requirements. Students must complete all additional coursework required as a result of the placement exams by the end of their first three regular semesters.

Graduate Program Committee

Upon admission to M.S. program in chemistry, students will be advised by the department's principal graduate advisor, acting on behalf of the chemistry graduate program committee. Based on the committee’s evaluation of the students’ transcripts and placement exam scores, the principal graduate advisor will inform students of any deficiencies and how they should be removed. The principal graduate advisor also will advise students on course curriculum. For the thesis degree, the curriculum advising is performed by the research advisor (once they have been selected). The graduate program committee serves as the supervisory committee for non-thesis M.S. students.

Seminar Attendance

Full-time M.S. students are required to attend all regularly scheduled and special departmental seminars and colloquia. Part-time students are also required to attend these seminars but may petition the Chair of the Department of Chemistry to waive this requirement all but one semester. Such students will be required either to participate fully during one semester, including the presentation of a one-hour seminar, or to present two one-hour seminars in lieu of full participation.

Minimum Requirements for Master of Science Degree

In addition to the requirements listed here, all M.S. students are subject to the all general M.S. requirements of the University. See the School of Graduate Studies (p. 1185) section of this catalog for a complete listing.
Master of Science in Chemistry (Non-Thesis)

Student Learning Outcomes

Students graduating from this program will:

- Possess an extensive knowledge in both breadth and depth in chemistry
- Demonstrate critical thinking and problem solving skills
- Search, read, understand and use scientific literature
- Articulate scientific information both orally and in writing

Coursework

The emphasis of this program is coursework. Non-thesis M.S. students are required to complete a minimum of 31 credit hours of graduate-level coursework. Non-thesis M.S. Students are required to complete:

<table>

</tbody>
</table>

Students who receive a grade of C+ or lower in more than two courses applicable to the M.S. program or who have a cumulative grade-point average of less than 3.0 on courses applicable toward the M.S. degree after completing 18 or more credit hours of such courses, will be terminated from the degree program. Grades received for CHEM 5590 and any undergraduate-level courses are not included in the minimum GPA calculation.

Students who have received a grade of B- or better in graduate chemistry coursework taken as part of a degree program at another institution may have up to 6 credit hours of equivalent required coursework waived upon approval of a majority of the graduate program committee. A written request for this approval must be submitted within one year of full admission to the M.S. program.

Seminar Presentation

Students must present a one-hour literature seminar based on a topic of their choice which has been approved by the Department of Chemistry Chair (or a designee). Students must register for CHEM 5611 the semester of this presentation. This seminar will include an exhaustive review of the pertinent literature and discussion of both present and future implications of research in this area. An abstract is to be posted and distributed one week prior to the presentation date.

Time Constraints and Financial Assistance

The non-thesis M.S. degree program is intended primarily for students currently employed in a chemically related industry. Full-time, non-thesis M.S. students are required to complete all of the requirements for their degree within four years. Part-time, non-thesis M.S. students are required to complete all requirements for their degree within seven years. Non-thesis M.S. students are not eligible for financial support from the Department of Chemistry.
Master of Science in Chemistry (Thesis-Based)

Student Learning Outcomes

Students graduating from this program will:

- Possess an extensive knowledge in both breadth and depth in chemistry
- Demonstrate critical thinking and problem solving skills
- Search, read, understand and use scientific literature
- Articulate scientific information both orally and in writing
- Design and conduct rational experimental research

Coursework

The emphasis of this program is research. A minimum of 31 credit hours (including research and thesis) is required. Full-time students should complete the formal coursework requirement no later than the end of their second year.

<table>

<td>31</td>
</tr>
</tbody>
</table>

The selected courses must be approved by the student's supervisory committee. Students who receive a grade of C+ or lower in more than two courses applicable to the M.S. program or who have a cumulative GPA lower than 3.0 on courses (not including CHEM 5590, CHEM 5599 or any undergraduate courses) applicable toward the M.S. degree after completing 18 or more credit hours of such courses, will be terminated from the degree program.

Students, who have received a grade of B- or better in graduate coursework taken as part of a degree program at another institution, may transfer up to 6 credit hours of this work on approval of a majority of the student's committee. A written request for this approval must be submitted within one year of full admission to the program.

Research Advisor and Supervisory Committee

Full-time students must select a research advisor from the graduate faculty of the Department of Chemistry and a supervisory committee by the end of their first regular (i.e., fall or spring) semester on campus. Part-time students must select their research advisor and supervisory committee by the end of their third year after enrollment in their first course as an M.S. student at UMKC.

The research advisor becomes the chairperson of the supervisory committee, which includes at least two additional members of the chemistry graduate faculty. Students and their supervisory committee shall plan a program of study which, when met, will qualify students for the M.S. degree. This program of study must be approved by the supervisory committee, the department chair, and the principal graduate advisor prior to the completion of 15 hours of coursework applicable to the degree. The supervisory committee is responsible for conducting the final thesis examination for students in the thesis program.

Seminar Presentation

Students must present a one-hour seminar based on their thesis research project. This seminar will include an exhaustive review of the literature pertinent to their project, a description of the objectives, the proposed methodology, and the significance of this research. Students must register for CHEM 5611 and present this seminar during the semester following selection of their research advisor and committee.
**Thesis Defense**

The candidate’s thesis must be prepared following all of the guidelines required by the UMKC School of Graduate Studies. All supervisory committee members must receive a final draft of the thesis for approval of form and content at least two weeks before submission to the Dean of the School of Graduate Studies. Candidates should submit preliminary drafts of their thesis to their supervisory committee well in advance of this deadline. After the thesis is certified for acceptance by the Dean of the School of Graduate Studies, the student must present an oral defense of his/her research in the form of a thesis seminar. The supervisory committee will make a final determination of the acceptability of the thesis immediately following this presentation. Only minor changes may be made to the thesis at this point.

**Time Constraints and Financial Assistance**

Full-time Thesis-Based M.S. students are required to complete all of the requirements for their degree within four years. In compelling circumstances, and on the written recommendation of a majority of the supervisory committee, a single extension for up to one year may be requested for approval by the Chair of the Department of Chemistry.

Full-time Thesis-Based M.S. students may receive financial support from the Department of Chemistry for a maximum of two-and-one-half years. Students from countries having an official language other than English, and who wish to be supported as GTAs, must meet the UMKC standards for international students to become certified as GTAs. Full information on that process can be found here: Policy on Award of Teaching Assistantships (p. 1214).
Minor in Chemistry

Student Learning Outcomes

Students graduating from this program will:

- Have a functional knowledge of all the basic areas of chemistry including analytical, organic, physical, inorganic and biochemistry.
- Be able to integrate their knowledge in these areas and use their critical thinking skills in order to become problem solvers.
- Be proficient in chemistry laboratories, especially with respect to: Following and understanding general laboratory practice guidelines, especially proper laboratory safety. Performing chemical analyses. Performing simple chemical synthesis. Understanding and using modern chemical instrumentation.
- Students graduating with a minor degree in chemistry should be proficient in the basic skills of chemistry. They will: Be able to articulate clearly scientific information, both in written and oral forms. Be able to use effectively the scientific literature.

Students graduating with a baccalaureate degree in chemistry will be prepared for entry into professional schools (e.g., medical, dental, pharmaceutical, or veterinary), graduate programs, or chemical industries.

Program Requirements

Students may elect to obtain a minor in chemistry in conjunction with a major in another academic discipline. The minimum departmental requirements are 18 credit hours of chemistry with at least 9 of these hours from courses at the 300 or 400 level. To meet the College's residency requirement for a minor in Chemistry, students must complete 9 credit hours from the Department of Chemistry at UMKC, and 6 of those 9 hours must be courses at the 300 or 400 level. While credit as a result of advanced placement (AP) scores and courses in Biochemistry (LS-BIOC 441, LS-BIOC 365, or LS-BIOC 366) may be used towards meeting minor requirements, they do not count towards meeting the residency requirement. In addition, the minor courses must be selected from more than one area of chemistry and a minimum grade of a C- is required for all minor and prerequisite courses.

Classical and Ancient Studies Program

Cockefair Hall 106
Phone: (816) 235-1305
Fax: (816) 235-1308
http://cas.umkc.edu/classics

Mailing Address:
University of Missouri - Kansas City
Classical and Ancient Studies Program
Cockefair Hall 106
5121 Rockhill Road
Kansas City, MO 64110-2499

The field of Classics is the original interdisciplinary university field of study, illuminating the foundations of Western experience through the study of language, literature, religion, philosophy, art, archaeology and other subjects. Modern Classics programs continue to focus on the ancient Mediterranean world, particularly Greek and Roman culture, but also encompass the study of non-Western cultures and post-Greco-Roman societies. The broad scope and intellectual rigor of the Classical and Ancient Studies major and minor options help students to understand the contemporary world and to prepare for a wide range of careers.

The Classical and Ancient Studies program provides several options for the study of history, literature, art, culture, and language of the Ancient Mediterranean world. Students can major in English and complete the track in Classical, Medieval, and Early Modern Literature; major in History with a concentration in Antiquity and Medieval history; major in Foreign Languages with an emphasis in Classical Language and Cultures; or pursue a minor in Classical and Ancient Studies in conjunction with any of the degrees above or with any other degree program.

Undergraduate

Undergraduate Degrees That Offer a Classics Emphasis:

The Classical and Ancient Studies program provides several options for the study of history, literature, art, culture, and language of the Ancient Mediterranean world. Students can major in English and complete the track in Classical, Medieval, and Early Modern Literature; major in History with a concentration in Antiquity and Medieval history; major in Foreign Languages with an emphasis in Classical Languages and Cultures; or pursue a minor in Classical and Ancient Studies in conjunction with any of the degrees above or with any other degree program.

- English Department: Emphasis in Classical, Medieval, and Early Modern Literature (p. 140)
Classical and Ancient Studies Program

- Foreign Languages and Literatures Department: Emphasis in Greek and Latin (p. 323)
- History Department: Antiquity and Medieval History Concentration (p. 407)
- Minor in Classical and Ancient Studies (p. 143)

Classics Courses

CLASSICS 119 Myth and Literature Credits: 3
A study of classical myth including readings from Homer to Ovid, analysis of selected myths in later literature, art, and music, and a study of contemporary definitions and approaches to myth.
Cross Listings: ENGLISH 119.

CLASSICS 120 Literary Monstrosities Credits: 3
This course explores representations of monsters in literature. Students are introduced to different ways of thinking about monstrosities from a range of cultural and historical perspectives, as well as through a variety of materials in order to approach this question from an interdisciplinary perspective.
Cross Listings: ENGLISH 120.

CLASSICS 131 Seven Wonders and Beyond: Archaeological Wonders of the Ancient World Credits: 3
This is a survey of the archaeology of Egypt and the Near East, the Aegean cultures of Crete and Mycenae, and the world of classical Greece and Italy. In addition, archaeological wonders of Europe and the New World will be discussed.

CLASSICS 210 Foundations Of Ancient World Literature I Credits: 3
This course studies ancient world literature such as The Descent of Inanna, Egyptian love poetry, Hebrew Scriptures, the epics of Homer and Virgil, the Analects of Confucius, and the wisdom of Laozi. The course also considers ancient creation epics such as the cosmic battle between Marduk and Tiamat, the Metamorphosis of Ovid, and the great Indian epic The Ramayana.
CLASSICS 210 - MOTR LITR 200: World Literature

CLASSICS 300 Special Topics Credits: 1-3
A course about a selected field, genre or individual figure from the ancient world that is not part of the program's regular offerings. May be repeated for credit.

CLASSICS 300A Special Topics Credits: 1-3
A course about a selected field, genre or individual figure from the ancient world that is not part of the program's regular offerings. May be repeated for credit.

CLASSICS 300CB Women In The Ancient World Credits: 3
This course focuses on the history, representation, literature, social lives, and political roles of women in ancient civilization including Egypt, Mesopotamia, the Biblical World, Greece, and Rome. It integrates methodologies from history, art history and archaeology, literary studies, and women's studies.

CLASSICS 300CY Ancient World in Cinema Credits: 3
This course will explore the tradition of depicting the ancient Mediterranean world in film from the early silent era to the present. Topics to be covered include the ways that filmmakers respond to literary and historical sources from the ancient world, interact with the artistic tradition of films about the ancient world, the relation of these films to other works by the same creative personnel (directors, actors, writers, producers, etc.), and the political and cultural contexts in which the films were released.

CLASSICS 300CZ Archaeology Of Ancient Disasters Credits: 3
Remarkable human achievements are revealed by archaeological research, but the human past was frequently shaped as well by disasters of natural and human origin. Drawing on case studies that include data from the geosciences, archaeological excavations, and historical sources, this class examines how earth processes, the biosphere, and human cultural behavior were all sources of catastrophe. We begin with the geological context of disaster, including earthquakes, volcanic eruptions, climate change, and soil depletion. Next, we examine how ancient societies respond to disease, an ever present threat from the biological environment. Finally, we look at how ancient human groups were changed by stresses of cultural origin, including overpopulation, depletion of vital resources, and warfare. The study of ancient disasters not only gives us a wider understanding of human history, it may offer lessons for coping with future catastrophes.

CLASSICS 318 Bible As Literature Credits: 3
A critical study of the major portions of the Old and New Testaments and the Apocrypha, with special attention to the development of literature from oral tradition, the literary genres, themes and archetypes represented in the collection, and the diction and style which have influenced later literature. Consideration also of the relation of Biblical literature to the historical, religious, and cultural milieu of the ancient Near East.
Cross Listings: ENGLISH 318.
CLASSICS 340 AWI Classical Literature In Translation Credits: 3
This course will focus on representative authors and works from the Greek and Roman Classical periods, such as Homer, Sophocles, Euripides, Aeschylus, Aristophanes, Plato, the Greek Lyrics, Virgil, Horace, Juvenal, Ovid and Plautus.
Prerequisites: RooWriter.

CLASSICS 369 Introduction to Prehistoric and Classical Archaeology Credits: 3
An introduction to archaeological research methods that traces human origins and cultural development from the earliest fossil evidence to the threshold of written history and civilization. This class emphasizes the evolutionary and cultural developments that allowed our ancestors to colonize the continents and develop lifeways involving hunting and gathering, farming and urbanism.

CLASSICS 370 Archaeology as Anthropology: The Development of Human Societies Credits: 3
This course examines the development of archaeology as a distinctive branch of anthropology, and archaeology's role in a centuries-long debate about the causes of cultural variation and the development of human societies. This class examines how the Enlightenment, colonialism, the geological discovery of Deep Time and the Darwinian Revolution not only give rise to anthropology and archaeology, but launched an enduring debate about how and why we study cultural behavior.
Cross Listings: ANTHRO 385.

CLASSICS 376 Concepts of the Hero in Ancient Literature and World Cinema Credits: 3
This course explores how concepts of heroism are related to the principles of values and civic duty in a wide range of ancient world cultures and contemporary world cinemas. Students will also demonstrate an understanding of how these values impact individual heroes and their interactions with others in their society.
Cross Listings: ENGLISH 376, COMM-ST 323.

CLASSICS 384 Frauds, Myths and Mysteries in Archaeology Credits: 3
Using archaeological hoaxes, myths, and mysteries from around the world – including local and regional examples - students will use science to make good judgments about information they receive in today’s world. This course will demonstrate how science approaches questions about human antiquity and will show where pseudoscience falls short. (Lecture/on-line asynchronous).
Cross Listings: GEOLOGY 384.

CLASSICS 391 WI Ancient Greek and Roman Medicine Credits: 3
This course explores the practice of medicine in the Ancient Greek and Roman Worlds from 800 BCE until 300 CE. Students will read primary sources in English and will also be introduced to Greek and Latin grammar and medical vocabulary so that they can understand and study essential terms from the history of medicine in their original language.
Prerequisites: RooWriter.

CLASSICS 469 Archaeology And Biblical History Credits: 3
An examination of ancient Israel as she emerges from the ruins of the past, both lapidary and literary. Through a study of the "mute documents," artifacts man-made (storied cities, household utensils, inscribed shards from Jericho to Jerusalem) we gain an insight indispensable for Biblical studies, for ancient Near Eastern history.
Cross Listings: HISTORY 469.

CLASSICS 470 Ancient Egypt Credits: 3
This course describes the political, social and cultural evolution of ancient Egypt from pre-dynastic times, with major emphasis upon the Old, Middle, and new Kingdoms (especially the 18th dynasty and the reign of Akhenaton).
Cross Listings: HISTORY 470.

CLASSICS 470P Ancient World: The Social History Of The Ancient World Credits: 4
The optional four-credit-hour component (modified independent study) will concern the social aspects of these civilizations, i.e., their daily lives. Readings and audiovisual aids will be used to help the student who will be expected to choose one aspect of each civilization, such as women, slavery, merchants, education, medicine, etc., and write a five-page paper about that topic for each period, i.e, Mesopotamia, Egypt, Greece and Rome.
Cross Listings: HISTORY 470P.

CLASSICS 471 Ancient Greece Credits: 3
This course begins with a survey of the pre-classical Minoan and Mycenaean civilizations and then describes the rise of prominent Greek city-states (with particular emphasis upon the evolution of Sparta and the political, social and cultural contributions of Athens). The course concludes with the rise of Macedon and Alexander’s conquests and significance.
Cross Listings: HISTORY 471.

CLASSICS 471P Ancient World: The Political Structure Of The Ancient World Credits: 4
The four-hour lecture period on weeknights will emphasize the historical aspects of the ancient civilizations. The lectures will be chronologically organized to focus upon their evolution from their rise to their collapse.
Cross Listings: HISTORY 471P.
CLASSICS 472 Ancient Rome Credits: 3
This course covers Roman history from its origins (including the Etruscans) to the decline of the imperial system. Particular emphasis is placed upon the political, social and economic developments in the Republic, the death of the Republic, the early Principate, and the factors that led to Rome's decline in the ancient world.
Cross Listings: HISTORY 472.

CLASSICS 472P Ancient World: The Cultural & Intellectual Dimensions Ancient Civ Credits: 4
The four weekend periods will provide the students with a general picture of these civilizations: society, religion, economics, and culture (w.f., arts, literature, philosophy, science, etc.). Guest lecturers, slides, films and video cassettes will be used to introduce the varied aspects of these ancient peoples.
Cross Listings: HISTORY 472P.

CLASSICS 474 Late Antiquity: The Transformation of the Mediterranean World (200–600 AD) Credits: 3
The decline of the Roman Empire and the barbarian invasions transformed the Mediterranean and European worlds, forming the foundation of Europe and the Islamic world. Students will investigate the multicultural society of Late Antiquity and become familiar with the primary sources for the period.
Cross Listings: HISTORY 474, HISTORY 5574.

CLASSICS 475WI History Of Ancient Israel Credits: 3
Judaism has had a tremendous impact on our civilization and yet most Americans are only dimly aware of its origins and development. This course will trace the roots of the Jewish religion in its historical context from its beginnings through the formation of rabbinic culture. The rise of Christianity will be examined in its original Judaic context, and recent discoveries, particularly those pertaining to the Dead Sea Scrolls, will be interpreted.
Prerequisites: RooWriter.
Cross Listings: HISTORY 475WI.

CLASSICS 499 Senior Tutorial Credits: 3
A three-hour comprehensive reading and research tutorial leading to the writing of a senior paper. It consist of tutorial sessions and independent research leading to a major paper using original source materials.

Greek Courses
GREEK 110 Elementary Ancient Greek I Credits: 3
The goal of this course is an ability to read classical Greek. The student will be introduced to the fundamentals of grammar and the basic vocabulary of the language and will do exercises in the reading and writing of sentences. Continuous passages of Greek will be presented by the end of the semester.

GREEK 120 Elementary Ancient Greek II Credits: 3
A continuation of the study of the grammar and vocabulary of classical Greek, with an increasing emphasis on developing skills in translation. By the middle of the semester students will be introduced to selections from Plato, Herodotus or Homer.
Prerequisites: GREEK 110.

GREEK 211 Intermediate Ancient Greek I Credits: 3
Instruction of Greek on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit.
Prerequisites: GREEK 120.

GREEK 221 Intermediate Ancient Greek II Credits: 3
Continuation of GREEK 211. May not be repeated for credit.
Prerequisites: GREEK 211.

GREEK 301 Herodotus Credits: 3
Selected readings in Ancient Greek from Herodotus’ Histories.
Prerequisites: GREEK 211.

GREEK 302 Homer Credits: 3
Selected readings in Ancient Greek from Homer's Iliad or Odyssey.
Prerequisites: GREEK 211.

GREEK 310 Selected Readings in Ancient Greek and Rhetoric Credits: 3
Selected readings in Ancient Greek from works by Plato, Aristotle, or the Attic Orators.
Prerequisites: GREEK 211.

GREEK 311 Drama and Lyric Poetry Credits: 3
Selected readings in Ancient Greek from plays by Aeschylus, Sophocles, Euripides, or the Lyric Poets.
Prerequisites: GREEK 211.
GREEK 312 Greek Narrative Prose Credits: 3
Selected readings in Ancient Greek from Herodotus, Thucydides, Xenophon, Lucian, etc.
Prerequisites: GREEK 211.

GREEK 490 Special Readings in Greek Credits: 1-3
Intensive readings in period or genre or literary figure to be selected by the student in consultation with the instructor. Available only to advanced Greek students.

Latin Courses
LATIN 110 Elementary Latin I Credits: 3
Elementary Latin I introduces students with no previous Latin experience to the fundamentals of Latin grammar. The course is continued with LATIN 120.

LATIN 120 Elementary Latin II Credits: 3
Elementary Latin II is a continuation of LATIN 110. This course focuses on the fundamentals of Latin grammar and morphology, and students will read longer Latin passages.
Prerequisites: LATIN 110.

LATIN 211 Second Year Latin Readings I Credits: 3
This course introduces students to extended readings from Roman authors in Latin. Students' knowledge of basic Latin grammar, vocabulary, and morphology will be reviewed and reinforced.
Prerequisites: LATIN 120.

LATIN 221 Second Year Latin Readings II Credits: 3
Prerequisites: LATIN 211.

LATIN 280 Special Intermediate Latin Topics I Credits: 2-4
Instruction of Latin on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit.
Prerequisites: LATIN 110, LATIN 120.

LATIN 290 Special Intermediate Latin Topics II Credits: 2-4
Continuation of LATIN 280. May not be repeated for credit.
Prerequisites: LATIN 280.

LATIN 301 Virgil Credits: 3
Selected readings in Classical Latin from the works of Virgil.
Prerequisites: LATIN 211.

LATIN 302 Ovid Credits: 3
Selected readings in Classical Latin from Ovid's Metamorphoses.
Prerequisites: LATIN 211.

LATIN 311 Prose Fiction and Epistolography Credits: 3
Selected readings in Classical Latin from Apuleius, Cicero, Petronius, Pliny, etc.
Prerequisites: LATIN 211.

LATIN 314 Lyric and Elegiac Poetry Credits: 3
Selected readings in Classical Latin from Catullus, Horace, Martial, Ovid, etc.
Prerequisites: LATIN 211.

LATIN 490 Special Readings In Latin Credits: 1-3
Intensive readings in period or genre or literary figure to be selected by the student in consultation with the instructor. Available only to advanced Latin students.
English Department: Emphasis in Classical, Medieval, and Early Modern Literature

University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

College of Arts & Sciences Degree Requirements
Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

1 ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.
2 This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

Students wishing to focus on ancient literatures in translation can pursue a degree in English with an emphasis in Classical, Medieval, and Early Modern Literature. This track involves a core of three survey courses to give students grounding in each of the three periods. Students also take one elective from each time period that allows them to study each period in more depth, a course such as 'Shakespeare In Film', 'The Ancient World in Film', or 'Arthurian Legends' that allows them to study how these literatures have been received in modern society; a course such as 'History of English', 'Old English', 'Ancient Greek', 'Classical Latin', or the 'History and Principles of Rhetoric' that allows students to understand the linguistic backgrounds of these literatures. Students complete the degree with three electives that can be taken in the English department or many other departments in the college including Classics, History, Art History, Philosophy, and Geosciences. For more information, see the relevant catalog section for the English Department (p. 258).

1. ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.
2. This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

If you would like to focus on the study of ancient languages, you can pursue a degree in Foreign Languages with an emphasis in Greek and Latin. This track involves a core set of language courses that allow you to become a proficient reader of Ancient Greek and Latin texts. This language core is supplemented with electives offered by the Classics Program, the History Department, the English Department, the Art and Art History Department, and the Philosophy Department. These electives are taught using translated texts, and these courses allow you to tailor your program of study to your specific interests in history, art or literature. In addition to these electives, students must also complete a capstone course. For more information, see the relevant catalog section for the Foreign Languages and Literatures Department (p. 323).
History Department: Antiquity and Medieval History Concentration

Students who are interested in ancient and medieval history can pursue a concentration in Antiquity and Medieval history as part of a history major. The history major includes two foundation courses that survey world history, four courses in the Classics area of concentration, four courses in areas outside the area of concentration, and a two-semester final research sequence: History 301WI “Historiography and Method,” and History 498WI “Senior Capstone Seminar.” For the Antiquity and Medieval history concentration, students take four courses in Ancient or Medieval History. Two of these courses can be taken in departments other than history including Classics, English, Art History, Philosophy, and Geosciences. For more information, see the relevant catalog section for the History Department (p. 407).
Minor in Classical and Ancient Studies

Student Learning Outcomes

Students graduating from this program will:

- Knowledge of Historical, Literary, Artistic, and Cultural Contexts Students will be able to reproduce in broad outline the main periods of Ancient Mediterranean history, along with significant events and/or developments in each period. Students will also be able to demonstrate their awareness of basic literary, philosophical, social, and cultural developments that affect the interpretation of texts, artifacts, and historical events from cultures and across the Mediterranean.
- Understanding of the Reception of the Ancient World Students will be able to demonstrate knowledge of at least one of the ways in which material from the Ancient Mediterranean World has been received and integrated into other later artistic, literary, historic, or cultural contexts.
- Proficiency With Primary Sources Students will be able to identify and articulate scholarly problems based on interaction with primary source materials from the ancient world. Students who elect to take Greek or Latin will demonstrate further proficiency working with primary source materials in the original languages.
- Proficiency in Research Methods Students will be able to analyze secondary source materials and describe current scholarly conversations about the ancient world.
- Communication of Knowledge Students will be able to communicate results of their work effectively to others in expository prose, oral presentations, or electronic media such as films or web pages.

Students can pursue a minor in Classical and Ancient Studies in conjunction with any degree program. The minor is an 18 hour program that allows students the flexibility to pursue their individual interests in the ancient world. To complete the minor students take 18 hours of credit selected in consultation with program advisor. Nine of these hours must be at or above the 300-level. A maximum of six credit hours can count towards both a major and the Classical and Ancient Studies minor.

Lecturers:
Jean Dufresne, Michael Schaefer, Rhiannon Dickerson

The department offers courses leading to a Bachelor of Arts in Communication Studies and a Bachelor of Arts in Film & Media Arts.

The Bachelor of Arts in Communication Studies degree offers three areas of emphasis:

- Interpersonal and Public Communication
- Journalism and Mass Communication
- Film and Media Studies

Department Description

The Department of Communication Studies produces students who think creatively and critically and who have developed oral, written, and visual communication skills essential to professional and personal collaboration, media production and analysis, cultural awareness, and community engagement. The Department of Communication Studies offers a variety of program areas, including interpersonal communication, public communication, print and digital journalism, advertising, public relations, media theory and history, as well as radio, digital media, and film/video production.

Students graduating from the Department of Communication Studies Will:

- Demonstrate proficiency in formal writing, oral presentation and visual communication.
- Create messages and media works appropriate to their audience, purpose and context.
- Explain, synthesize and apply Communication research methods, theories, perspectives, principles and concepts.
• Articulate the connection between communication and culture.

The Bachelor of Arts in Film & Media Arts provides rigorous training in media production focused on individual creative development and cinematic storytelling. The degree integrates the study of film history with hands-on production in a variety of filmmaking practices including narrative, documentary, experimental and animation.

The Interpersonal and Public Communication emphasis offers study in the areas of public address and rhetoric, interpersonal and intercultural communication, organizational communication and areas associated with human communication behavior including advertising, public relations and strategic communication.

The Journalism and Mass Communication emphasis offers concentrated study in print and electronic journalism, radio, television, advertising and public relations.

The Film and Media Studies emphasis provides an interdisciplinary study of film and media, including the history and theory of global cinema culture, critical media studies and media production.

UMKC Debate
The UMKC debate program operates from the Department of Communication Studies. UMKC offers a great blend of quality education, extremely competitive debate program and a wonderful city to spend your college years in.

• UMKC Debate Team is open to all UMKC students including those with no previous debate experience. - Interested students can email the Director of Debate: vegan@umkc.edu.
• Travel Schedule: UMKC has a full travel schedule and travels the NDT/CEDA policy debate circuit. This includes tournaments throughout the region and across the country.
• Squad Size: UMKC has a medium-sized squad which has the benefit of allowing all debaters the ability to go to many tournaments throughout the year. Each debater will have the chance to flourish at regional and national tournaments.
• Coaching: UMKC currently has an excellent coaching staff. Our excellent student-to-coach ratio guarantees hands-on coaching and extensive focus for each debater.

Special Laboratories
The department has media classrooms and production spaces for student projects that include a video production studio with lighting grid and green-screen capabilities, a sound recording facility with narration booth and radio console, a convergence journalism studio and post production media labs outfitted with the latest software. A student equipment check-out lab maintains an extensive inventory of production equipment including cameras, audio equipment, lights, dollies, tripods and more – everything students need to create outstanding media productions. Our facilities foster the ability to light, shoot and edit professionally, allowing the students to tell compelling stories that make an impact on audiences.

K-ROO Radio is a student-run multimedia organization that aims to provide students, faculty, staff, and the Kansas City community with quality entertainment and information about UMKC events and organizations. Through Internet radio and live events, www.k-roo.org (http://www.k-roo.org) provides a platform to reach a worldwide audience to promote and support student endeavors, as well as create programming in music, sports, news, and spoken word/comedy/drama productions. K-ROO Radio, which reports to the Office of Student Involvement, is open to all students of any major and is located on the third floor of the Student Union at 5100 Cherry St. in room 303B. Internships for production and promotions are available through the Communication Studies Department.

The nationally syndicated public radio program, New Letters on the Air, features creative writers from around the world and is produced in association with the internationally distributed New Letters magazine and the Communication Studies department. - Broadcast locally on KCUR-FM, the weekly program is also available via www.newletters.org/radio (http://www.newletters.org/radio) and podcasts - KCUR-FM http://kcur.org/ is the 100,000-watt public radio station licensed to UMKC. - Programming includes offerings from National Public Radio and Public Radio International, as well as local news from the award-winning news department. - Internships are available year round to Communication Studies students.

Special Awards and Scholarships
The Alex and Josephine B. Coleman Scholarship is awarded each year to an outstanding junior- or senior-level student. The award recognizes meritorious undergraduate work in communications and encourages program completion. The Suzanne Crispin Williams Scholarship is awarded annually to a non-traditional returning female student in Communication Studies or Women's Studies. A Film Finishing Fund provides grants to intermediate and advanced production students and the Student Film League holds showcases of student film and video projects. Cash prizes may be awarded for winning entries. The Faye Kircher Public Speaking Contest is held in the fall and spring semesters. Students enrolled in COMM-ST 110 courses are selected by their classmates for participation in the public speaking contest. Cash prizes are awarded. The Fred G. Andrews Jubilee Creative Cinema Fund will provide support for sponsored or co-sponsored workshops, programming for Film and Media Arts, as well as internships and scholarships for students majoring in Communication Studies with an emphasis in Film and Media Arts. The Carol Koehler Memorial Scholarship is awarded annually to a Communication Studies student enrolled in a three hour internship. Scholarship information can be found on the Communication Studies website at http://cas.umkc.edu/Communication_Studies/scholarships.cfm.
Career Implications
Communication students may find rewarding careers in the multifaceted communication industry. The program is excellent preparation for careers in media production, marketing, public relations, advertising, radio, nonprofit organizations and human resources.

Further Educational Opportunities
The B.A. in Communication Studies prepares students for advanced study in communication studies, film and media, as well as in graduate programs such as law, medicine, business, public administration and those associated with the applied and performing arts.

Internship Program
All students completing the B.A. in Film & Media Arts and emphasis in Journalism and Mass Communication are required to complete an internship. Although an internship is not required for students completing an emphasis in Interpersonal and Public Communication or Film and Media Arts, the Communication Studies Department strongly recommends the internship experience as a means of linking theory to practice, and preparing students to work effectively in professional settings. Internships provide students with on-the-job experience which is both practical and purposeful. The internship program allows opportunities for experience on a national and international level.

The Internship course number is COMM-ST 484. Each intern is required to enroll in at least one credit hour. One credit hour requires 75 hours of internship work. Two credit hours require 150 hours of internship work. Three credit hours require 225 hours of internship work. Four credit hours require 300 hours of internship work.

Information on Internship Opportunities is available in the department office and at http://cas.umkc.edu/Communication_Studies/internships.cfm, and through the Roo Career Network https://umkc-csm.symplicity.com/. The coordinator for the Internship Program is Linda Kurz Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=kurz)

Advising System
Current program requirements are available in the department office. Students must file a formal declaration of major with a departmental advisor. The department highly recommends that students meet with their major advisor before enrolling in classes each semester. At 90 hours or one year prior to graduation, students should file for a final degree audit with their major advisor and with the College of Arts and Sciences. Undergraduate advisors are Linda Kurz Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=kurz) and Judith McCormick Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=mcormick). Students in the Film and Media Studies Emphasis should contact Caitlin Horsmon Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=horsmon); or Lyn Elliot Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=elliott) for advising in that emphasis area.

Financial Aid
Students with University work-study assignments are welcomed as student assistants in various aspects of the department’s activities.

Faculty
Joan E. Aitken Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=aitken); Retired professor emerita of communication studies; B.A. (Michigan State University); M.A., Ed.D. (University of Arkansas).

Gregory D. Black Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=black); Retired professor emeritus of communication studies; B.S. (Bowling Green State University); M.A. (California State); Ph.D. (University of Kansas).

Mitchell Brian Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=brian); associate teaching professor of communication studies; B.A. (California State University, Northridge); M.A. (University of Missouri-Kansas City).

Linda M. Collier Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=collier); Retired associate professor of communication studies; B.A., J.D. (University of Missouri-Kansas City).

Rhiannon Dickerson Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=dickerson); lecturer, communication studies; B.A. (University of Central Missouri); M.F.A. (Iowa Writers Workshop, University of Iowa).

Jean Dufresne Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=dufresne); lecturer, communication studies; B.A. (Morningside College); M.A. (University of Iowa); Ph.D. (University of Nebraska-Lincoln).

Angela C. Elam Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=elam); assistant teaching professor of communication studies and radio producer; B.A. (Clemson University); M.F.A. (University of Georgia-Athens).

Lyn Elliot Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=elliott); professor of communication studies; B.A. (Carleton College); M.A., Ph.D. (University of Iowa); M.F.A. (University of Iowa).
University of Missouri - Kansas City

Gregory Gutenko Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=gutenko); associate professor of communication studies; B.A., M.A. (University of Missouri-Kansas City); Ph.D. (University of Missouri-Columbia).

Caitlin M. Horsmon Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=horsmon); associate professor of communication studies; B.A. (Oberlin College); M.A.M.F.A. (University of Iowa).

Steven Kraske Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=kraske); associate teaching professor of communication studies; B.A. (University of Wisconsin-Madison).

Gaylord V. Marr; Retired professor emeritus of communication studies; B.A., M.A. (University of Nebraska).

Jason Martin Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=martin); assistant professor of communication studies; B.B.A., B.S. (University of Kentucky); M.A. (The Ohio State University); Ph.D. (University of Kentucky).

Judith McCormick Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=mccormick); associate teaching professor of communication studies; B.A., M.A. (Texas Tech University), Ph.D. (Kansas State University).

Michael K. McDonald Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=mcdonald); associate professor of communication studies; B.S., M.A. (University of Missouri-Kansas City), Ph.D. (University of Kansas).

Steven P. Melling Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=melling); assistant teaching professor of communication studies; B.S. (Northwestern Missouri State University); M.A., Ph.D. (University of Kansas).

Peter Morello Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=morello); associate professor of communication studies; B.A. (University of Wisconsin-Madison); M.S. (Columbia University).

Michael Neer Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=neer); Retired, professor emeritus of communication studies; B.A., M.A., Ph.D. (University of Missouri-Columbia).

Michael W. Schaefer Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=schaefer); lecturer of communication studies; B.A., M.A. (University of Missouri-Kansas City).

Robert B. Unger Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=unger); Retired, professor emeritus of communication studies and English; B.A. (University of Missouri-Columbia); M.P.A. (Harvard University).

Ye Wang Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=wang); assistant professor of communication studies; B.A. (Beijing University of Posts and Telecommunications); M.A. Linguistics (Beijing Foreign Studies University); M.A., Ph.D. Journalism (University of Missouri).

Undergraduate

Undergraduate Degrees:
- Bachelor of Arts: Communication Studies
  - Film and Media Studies Emphasis
  - Journalism and Mass Communication Emphasis
  - Interpersonal and Public Communications Emphasis
- Bachelor of Arts: Film and Media Arts (p. 173)
- Minor in Communication Studies
- Minor in Film Studies

Courses
COMM-ST 110 Fundamentals Of Effective Speaking And Listening Credits: 3
An introduction to the dimensions of effective platform speaking with special emphasis on developing critical listening skills. Lecture, performance, and discussion.
COMM-ST 110 - MOTR COMM 110: Fundamentals of Public Speaking
COMM-ST 140 Principles Of Communication Credits: 3
An interdisciplinary introduction to the study of contemporary communication studies including a consideration of intrapersonal, interpersonal and public communication.

COMM-ST 140 - MOTR COMM 100: Introduction to Communications

COMM-ST 203 Introduction to Journalism Credits: 3
Introduction to the styles and techniques of reporting and writing basic news through assignments in straight news, features and in-depth stories. Exposure to the history and principles of American journalism. Practical application in writing news and news feature articles.

COMM-ST 212 Argumentation And Debate Credits: 3
A study of the nature of logical discourse generated through the preparation and presentation of oral argument within the framework of the debate format. Lecture, performance and discussion.

COMM-ST 212 - MOTR COMM 220: Argumentation Debate

COMM-ST 213 Argumentation And Critical Thought Credits: 3
An introduction to the theory and application of argument construction. The course is designed to examine the fundamental strategies of critical thinking and to help understand the relationships among critical thought and argumentation development and refutation. This course is designed for application across many fields and is not specific to debate or oral argument.

COMM-ST 220 Introduction: Modern Communications Media Credits: 3
A comprehensive survey of the content, structure and control of the communications media in American society--newspaper, motion pictures, radio and television; providing an informational frame of reference that will enable discerning students to formulate and apply useful critical concepts in evaluating America's media environment.

COMM-ST 230 Introduction to Film Studies Credits: 3
The course is an introduction to the study of film as an art form and industrial practice. Students will study the basics of film analysis, cinematic formal elements, genre, narrative structure and the cultural functions of cinema.

Prerequisites: DISC 100 or ENGLISH 110.

COMM-ST 250 Introduction to Film and Video Production Credits: 3
This course teaches the fundamentals of media making using digital video. Students will learn techniques in pre-production planning, camera, sound, and editing by creating a series of short videos. Students will also learn to think analytically about film, and to apply insights about what gives an image impact and meaning to their own work. It is the foundation and prerequisite for all film and video production courses in the department.

COMM-ST 260P Introduction To Web Communications Credits: 4
This four credit hour web-based multimedia course will examine the process of critically evaluating information delivered on the Internet. It is designed as an introduction for adults and students who use Internet information for work and/or school. The process of critically evaluating Internet information will be described in four modules: traditional evaluation techniques; searching and researching strategies; Internet evaluation techniques and Internet evaluation resources.

COMM-ST 265 Visual Communication Credits: 3
This course introduces the creative capture and design of photographic images as used in both print and new media for advertising, journalism, and public relations. Basic artistic and production methods are examined, including real-world professional practices and the creative control of process variables.

COMM-ST 270 Introduction to Digital and Mobile Journalism Credits: 3
An introduction to the practices and principles of creating video, combined with audio, graphics, and data information, by newsgathering in the field, for both current and emerging mobile, non-broadcast, digital and social media platforms.

COMM-ST 300CY Ancient World in Cinema Credits: 3
This course will explore the tradition of depicting the ancient Mediterranean world in film from the early silent era to the present. Topics to be covered include the ways that filmmakers respond to literary and historical sources from the ancient world, interact with the artistic tradition of films about the ancient world, the relation of these films to other works by the same creative personnel (directors, actors, writers, producers, etc.), and the political and cultural contexts in which the films were released.

COMM-ST 308 Introduction To The Study Of Human Communication Credits: 3
This course serves to introduce students to the basic theories, perspectives and methodologies used (historically and currently) in the study of speech, interpersonal and mass communication.

COMM-ST 311 Radio & Television Performance Credits: 3
A study of the specialized radio and television performing and operating situations and techniques simulated and evaluated in studio sessions. Lecture, discussion and performance.
COMM-ST 312 Advanced Public Speaking Credits: 3
Advanced study of rhetorical theory and its application to the presentation and criticism of public discourse.

Prerequisites: COMM-ST 110.

COMM-ST 312P Advanced Public Speaking Credits: 3
Advanced study of rhetorical theory and its application to the presentation and criticism of public discourse.

Prerequisites: COMM-ST 110.

COMM-ST 314 Reporting Credits: 3
Reporting is an advanced news gathering and reporting course designed to sharpen the writing skills and critical thinking of student journalists.

Prerequisites: COMM-ST 203 or ENGLISH 203.

COMM-ST 314WI Reporting Credits: 3
A seminar of practical application in advanced reporting. Assignments to cover news events and to pursue in-depth news reports on the campus and off.

Prerequisites: COMM-ST 203 or ENGLISH 203; RooWriter.

COMM-ST 317 Persuasion Credits: 3
A study of the rhetorical, psychological and ethical principles of influencing and controlling individuals and groups, and of the methods of adapting to various attitudes and audiences through the preparation, presentation and evaluation of persuasive speeches. Lecture, discussion and performance.

Prerequisites: COMM-ST 110.

COMM-ST 320 Mass Media, Culture And Society Credits: 3
A critical exploration of the role of mass media (and its reception) in the social construction of reality. The course employs theoretical, analytical and empirical approaches derived from multidisciplinary sources, particularly "critical theory" semiology, post-structuralism, psychoanalysis and ethnography. Term paper required.

COMM-ST 322 Oral Performance In Speech Communication Credits: 3
This course is designed to develop and strengthen oral communication for students pursuing careers in pre-law, media, human resources, and education as well as increase the skills of potential professional speakers. The student will learn to develop emotional, vocal, physical, and non-verbal skills through an investigation of poetry, prose, and non-fiction literature. Through the process of reading, studying, investigating, rehearsing, and performing literary and nonliterary works, the students will learn to pay particular attention to the voice embodied in a given text and the cultural and social context within which that voice speaks.

Prerequisites: COMM-ST 110.

COMM-ST 323 Concepts of the Hero in Ancient Literature and World Cinema Credits: 3
This course explores how concepts of heroism are related to the principles of values and civic duty in a wide range of ancient world cultures and contemporary world cinemas. Students will also demonstrate an understanding of how these values impact individual heroes and their interactions with others in their society.

COMM-ST 331 Mass Media In America Credits: 3
Social history of the development of mass media, radio, film, and television, from Marconi's first experiments to the present. Emphasis placed on relationship of American culture and American media. Term paper required.

COMM-ST 331WI Mass Media In America Credits: 3
Writing intensive. Social History of the development of mass media, radio, film and television, from Marconi's first experiments to the present. Emphasis placed on relationship of American culture and American media. Term paper required.

Prerequisites: RooWriter.

COMM-ST 339 Introduction to Film Theory Credits: 3
A survey of the history of theoretical and critical approaches to film theory/philosophy. Students will be introduced to major foundational and contemporary theoretical approaches to cinema that may include but are not limited to formalism, realism, auteurism, psychoanalysis, genre studies, structuralism, feminism, semiotics, cultural studies, post-structuralism, queer theory and digital studies.

COMM-ST 341 Rhetorical Theory And Criticism Credits: 3
An analysis of significant public discourse within the context of social protest and political rhetoric with attention to applying methods of communication criticism in evaluating the effectiveness of persuasive advocacy aimed at social change.

COMM-ST 341WI Rhetorical Theory And Criticism Credits: 3
Writing intensive. An analysis of significant public discourse within the context of social protest and political rhetoric with attention to applying methods of communication criticism in evaluating the effectiveness of persuasive advocacy aimed at social change.

Prerequisites: RooWriter.

COMM-ST 343 Group Dynamics Credits: 3
A study of strategies and communication relationships unique to non- dyadic situations, with an emphasis on the integral structure of leadership, roles, norms and task functions.
COMM-ST 344 Communication In Organizational Settings Credits: 3
An examination of the major elements of interpersonal, group, and oral communication competence essential to human interaction in organizational settings. The course focuses on developing communication competencies and increasing theoretical understanding of the communication process within the organizational context.

COMM-ST 344WI Communication In Organizational Settings Credits: 3
An examination of the major elements of interpersonal, group, and oral communication competence essential to human interaction in organizational settings. The course focuses on developing communication competencies and increasing theoretical understanding.
**Prerequisites:** COMM-ST 110 or COMM-ST 308, RooWriter.

COMM-ST 345 German Film Credits: 3
This course introduces students to the important contributions of German films to the development of movies as a unique literary art form. The class will cover important terms and concepts in film theory, the specifically German context of film, and important themes and periods in German film history. Taught in English with subtitled films.

COMM-ST 346 Art of the Short Film Credits: 3
Art of the Short Film examines the social, economic and aesthetic histories of narrative, documentary and experimental short form films from the birth of cinema to today.

COMM-ST 347 Topics in Film Genre Credits: 3
A topics course that examines the history and theory of film genres. Repeatable up to six hours when the topic changes.

COMM-ST 348 The Art of the Interview Credits: 3
This course will introduce students to the styles and techniques of conducting professional interviews with the goal of eliciting insightful, thoughtful answers fit for print or broadcast. Students will prepare QA interviews and articles for publication while gaining the confidence needed to work in professional newsrooms or office settings.

COMM-ST 351WI Fundamentals Of Writing For The Media Credits: 3
Analysis of individual differences and common characteristics of copy for eye and ear, with emphasis on the application of both verbal and visual imagery in the process of communicating the writer's ideas and intentions. Weekly written assignments and critical analysis of the student's work.
**Prerequisites:** COMM-ST 110, RooWriter.

COMM-ST 354 Introduction to Screenwriting Credits: 3
An introduction to the form and language of the motion picture screenplay. Students will learn to create a workable blueprint for a movie and undertake an in-depth examination of visual storytelling. This will include understanding the basics of dramatic structure, scene and sequence construction and the role of dialogue. Emphasis will be placed on students mastering the accepted movie industry format of the screenplay. They will also adapt a short story and revise it after giving and receiving feedback in small groups.

COMM-ST 355WI The New Feature Writing Credits: 3
An intensive practicum in the art of writing feature stories with a special emphasis on shorter stories that will grab reader interest in an era of short-attention spans.
**Prerequisites:** COMM-ST 203 or ENGLISH 203, RooWriter.

COMM-ST 356 U News Practicum Credits: 3
This course is workshop-based for students producing UMKC's weekly newspaper, U News. It also focuses on contemporary issues in American journalism and engaging with the university community.
**Prerequisites:** COMM-ST 203

COMM-ST 361 Media Management Credits: 3
An analysis of the trends, patterns and methods of radio and television operations.

COMM-ST 363 Radio Production I Credits: 3
A study of the techniques of producing audio material for use in radio, in concerts, on film, on television and in the recording studio.

COMM-ST 373 Intermediate Media Production Credits: 3
An intermediate-level production course emphasizing hands-on skills in cinematography and lighting, sound, and editing.
**Prerequisites:** COMM-ST 230 and COMM-ST 250.

COMM-ST 376 History Of The Film Industry Credits: 3
A history of the development of the American film industry from 1900 to the end of the studio era. The course will stress such issues as studio production, censorship, the economics of production and the selling of mass culture through the film medium. Term paper required.

COMM-ST 377 Interpersonal Communication Credits: 3
An intensive analysis of the dimensions of intrapersonal and interpersonal communication designed to identify the philosophies and methods which underwrite effective human communication. Lecture and discussion.
COMM-ST 377WI Interpersonal Communication Credits: 3
An intensive analysis of the dimensions of intrapersonal and interpersonal communication designed to identify the philosophies and methods which underwrite effective human communication. Lecture and discussion. 
Prerequisites: RooWriter.

COMM-ST 378 Computer-Mediated Communication Credits: 3
Examination of the nature of human communication on the Internet. Design function, content innovations of computer mediated communication discussed, with emphasis on technology as a means of interpersonal communication. Research, essays, and participation in online environment required.

COMM-ST 378WI Computer Mediated Communication Credits: 3
Examination of the nature of human communication on the internet. Design, function, content innovations of computer mediated communication discussed, with emphasis on technology as a means of interpersonal communication. Research, essays, and participation in online environment required.
Prerequisites: RooWriter.

COMM-ST 380 Contemporary Media Topics Credits: 3
COMM-ST 381 Narrative Production Credits: 3
This course covers the creative, technical, and practical aspects of short-form narrative film production. 
Prerequisites: COMM-ST 250 and COMM-ST 354.

COMM-ST 383 Cross-Cultural Journalism & Mass Media Credits: 3
Cross-Cultural Journalism Mass Media provides journalistic tools for traditional and new media coverage of diverse ethnic, gender, ability and ideological groups inside and outside the United States. The critical role of diverse voices in a democracy will be discussed. Students at UMKC and the Missouri School of Journalism participate in joint lectures transmitted by UMKC and MU instructors from their respective campuses.

COMM-ST 384 Documentary Film History Credits: 3
Documentary Film History is an overview of the history and theory of documentary cinema. The course surveys the documentary tradition with special attention to the relationship between content and style and the issues central to documentary film making, including ethical and legal questions, the relationship between representation and power and the ways in which film speaks to notions of truth and truth telling.

COMM-ST 385 Documentary Production Credits: 3
This course is designed to familiarize students with the basics of documentary production from an artistic, ethical, and practical results-oriented perspective.
Prerequisites: COMM-ST 250.

COMM-ST 386 Animation Credits: 3
This course provides an introduction to animation production techniques and an overview of the history of American animation arts. We will address both stop-motion and computer animation using industry standard software. 
Prerequisites: COMM-ST 250.

COMM-ST 387 Strategic Communication Research Credits: 3
This course will examine different research methods and research stages in advertising and public relations, including quantitative and qualitative research methods. Students will learn how to plan, conduct, and evaluate strategic communication research. Students are also expected to develop a greater appreciation for the role that research plays in effective campaigns.

COMM-ST 388 Media Ethics Credits: 3
This course is designed to sensitize the ethical considerations the underlie the conventions and practices of print, broadcast, and internet media. By placing traditional and new media in a wider intellectual context than is generally possible under the daily demands of producing news, information, and entertainment, it seeks to produce a larger sense of media as industry and as a career choice.

COMM-ST 390 Forensic Activities Credits: 1-4
Participation in the intercollegiate forensic program. A practicum in debate, discussion, oratory and other forensic activities.

COMM-ST 391 The World(s) Of Alfred Hitchcock Credits: 3
The course offers an historical study of the film art of Alfred Hitchcock. The course gives special attention to the director’s work in the silent cinema of the U.K., Hitchcock’s early major British sound films, his arrival in the United States, his major World War II propaganda films, the directors maturing into a major influence on world cinema in the 1940’s, and Hitchcock’s “masterworks” of the 1950’s-1960’s.

COMM-ST 392 Topics in World Cinema Credits: 3
A variable topics course focused on the histories and theories of international cinemas. Repeatable up to 6 hours when the topic changes.

COMM-ST 393 Topics in Sound & Cinema Credits: 3
A variable topics course that focuses on the histories and aesthetics of sound in cinema. Repeatable up to 6 hours when the topic changes.

COMM-ST 394 Topics in Gender and Cinema Credits: 3
A course focused on the relationship between popular culture, film history and the construction of gender and sexuality. Repeatable up to 6 hours when the topic changes.
COMM-ST 400 Special Studies Credits: 1-3
(A-N) This is an upper-level course on a subject which is not a part of the regular department offering. The course results from one or more of the following: (1) the expressed desire of students (2) the broadened or refocused scholarship of a member of the communication studies faculty (3) the temporary presence of a scholar whose specialization is not reflected in the department’s regular offerings (4) the conclusion by the department that the course meets a community need (5) the effort of the Communication Studies faculty to provide an interdisciplinary approach to an era or topic.

COMM-ST 400G Special Studies In Communication Studies Credits: 1-3
COMM-ST 400M Special Studies In Communication Studies Credits: 1-6
COMM-ST 400N Special Studies Credits: 1-3
COMM-ST 400Q Special Studies In Communication Studies Credits: 1-3
COMM-ST 400W Special Studies in Communication Studies Credits: 1-3
COMM-ST 400Z Special Studies Credits: 1-3

COMM-ST 406CD CC: Film Adaptation Credits: 3
The class will explore the process of adapting both fiction and non-fiction literary works into motion pictures. Students will examine the original literary source, then the interim screenplay and finally the completed motion picture.

COMM-ST 411 Seminar in Film and Media Arts Credit: 1
This course covers special topics and professional practices within Film and Media Arts. Course is repeatable. Required of B.A. in Film and Media Arts majors for every semester enrolled. Enrollment restricted to declared majors, B.A. in Film and Media Arts.

Prerequisites: Declared major, B.A. in Film and Media Arts.

COMM-ST 426 History And Criticism Of American Public Address I Credits: 3
This course examines American Public Address from 1630 to 1900, with an emphasis on the connections between rhetoric and social change. Students analyze how texts function within specific historical contexts.

COMM-ST 428 History and Criticism of American Public Address II Credits: 3
This course examines American Public Address from 1900 to present, with an emphasis on the connections between rhetoric and social change. Students analyze how texts function within specific historical contexts.

COMM-ST 431 Colloquium In Interpersonal Dynamics Credits: 3
An examination of the practical application of communication principles and theories, with focus on one of the following: health, organizational, nonverbal, intrapersonal, conflict management, computer mediated, or intercultural communication.

COMM-ST 432 Press, Politics And Public Policy Credits: 3
An advanced course in the study of the press and political establishments in the formation of public policy.

COMM-ST 441 Applications of Interpersonal Communication Credits: 3
This course examines interpersonal communication theory as it pertains to a variety of interpersonal relationships. The course employs class discussions of theory and assignments that apply those theories to real life interactions.

Prerequisites: COMM-ST 377 or COMM-ST 377WI.

COMM-ST 444WI Intercultural Communication Credits: 3
A consideration of communication phenomena in multicultural settings. A study of the public forum with an emphasis on the interpersonal aspects of international, intercultural, and co-cultural communication.

Prerequisites: RooWriter.

COMM-ST 446 Principles Of Advertising Credits: 3
A survey of advertising as an industry and a career field, examining its history and development in America, and its application in mass and special media. Specific procedures are studies for linking the development of advertising strategies, messages and campaigns to the marketing process, and for evaluation and selection of appropriate media to carry the advertising message.

COMM-ST 447 Interactive and Social Media Advertising Credits: 3
This course examines advertising on the Internet as a form of interactive communication, with a special focus on social media and search engines. It addresses basic concepts, current issues, and the development of interactive advertising strategies and plans. The coverage includes interactivity, pricing models, online targeting strategies, search engine optimization and advertising, social media advertising, and online video advertising.

COMM-ST 448 Principles Of Public Relations Credits: 3
An overview, presenting the function, purposes, procedures and practices of public relations, its role in society, industry, government and politics, and its potential as a career field. This is a survey course with primary emphasis on theory, supplemented with applied techniques.

COMM-ST 453 Urban Journalism Practicum Credits: 4
This course engages student journalists to produce stories with an urban focus across radio, online, and television platforms. By practicing convergence journalism, students gain practical story-telling experience for professional news organizations.

Prerequisites: COMM-ST 203 and permission of instructor.
COMM-ST 454 Advanced Screenwriting Credits: 3
This course provides students with advanced theory in narrative screenwriting, training in industry standard script analysis (called "coverage") and story editing. Students will be required to draft, revise and workshop a short film screenplay or will focus on a feature screenplay, delivering a draft and revision of the first act and a detailed outline for the rest of the script. Students will workshop feature screenplays in small groups, emphasizing the art of constructive story editing.
Prerequisites: COMM-ST 354.

COMM-ST 456 Electronic Journalism Credits: 3
A practical approach to the practices and principles of broadcasting news media, including preparing copy for microphone and camera, editing wire copy, reporting public affairs and public relations, and an intensive scrutiny of the concepts of freedom and responsibility as they apply to the press and current legislation.

COMM-ST 457 Client-Based Media Production Credits: 3
This course teaches the process of creating media for a professional client. Students will take on specialized crew positions and work together to plan, write, direct, shoot, edit, and distribute a short video for a local non-profit client.
Prerequisites: COMM-ST 250.

COMM-ST 462 Public Broadcasting Credits: 3
A study of the development of public broadcasting, its position and responsibilities in the world of modern communications. Programming and operations concepts and philosophies of public broadcast facilities will be studied and analyzed.
Prerequisites: COMM-ST 220.

COMM-ST 466 Advanced Electronic Journalism Credits: 3
An advanced study of television and Internet news gathering, field production and performance for electronic media.
Prerequisites: COMM-ST 456.

COMM-ST 470 Directing Credits: 3
An advanced course in video techniques with emphasis on creating complex formats for broadcasting, recording and performance. Lecture, discussion, and laboratory.
Prerequisites: COMM-ST 250.

COMM-ST 471 Advanced Media Production Credits: 3
An advanced course in media production techniques focused on the creation of a significant individual media work and professional development.
Prerequisites: COMM-ST 250, COMM-ST 373, and COMM-ST 354.

COMM-ST 473 Directing Actors and Scenes Credits: 3
This intensive workshop class seeks to deepen the student director's understanding of the acting process and provide ways of clearly and creatively communicating with actors. The course will deepen students understanding of blocking scenes and designing camera coverage. It will explore the role of the director as a guiding creative force in the making of a film through collaboration and provide techniques for scene analysis and preparation. Students will cast, rehearse and present a live performance for their final project and design appropriate camera coverage.
Prerequisites: COMM-ST 250.

COMM-ST 478 Media Law Credits: 3
A comprehensive examination of the law as it pertains to advertising, public relations, journalism, commercial and electronic media, broadcast regulatory agencies, corporate speech and corporate participation in elections. Students will study topics that include the First Amendment, defamation and privacy. Court opinions and legislation will be the course's primary focus, however students will also examine contemporary and historic theory of free expression.

COMM-ST 483 Research Seminar In Communication Studies Credits: 3
This is the departmental capstone course and is required for majors in their last semester of their senior year. The course summarizes and extends student's theoretical and applied understanding of the role of communication competence in the work place and beyond. The course also focuses on refining student's research competencies and their appreciation of the cultural role of modern communication methods.
Prerequisites: Senior standing.

COMM-ST 484 Communication Studies Activities Credits: 1-4
Internships opportunities for advanced students involved in community and campus activities. Student must receive approval of advising professor in semester prior to enrollment. No more than four hours with any one project.

COMM-ST 492 Advertising Campaigns Credits: 3
The course content focuses on branding, re-branding or development of an identity program, and combines advertising planning with creative execution. Students will learn how to develop advertising/marketing/creative campaign plans for a specific client(s), conceptualize, design and develop all creative aspects including but not limited to logo/identity, copy, advertising, website development, app design, etc., and complete a presentation of the plans/briefs and final creative developments of the plans/briefs and creative to the client(s).
Prerequisites: COMM-ST 446 or COMM-ST 447 or COMM-ST 387.
COMM-ST 498 Special Problems In Communication Studies Credits: 1-3
Research and/or projects for advanced upper class students. Student must receive approval of advising professor in semester prior to enrollment. No more than three hours with any one instructor.

COMM-ST 5554 Graduate Seminar: Screenwriting Credits: 3
Students will complete their feature screenplay, focusing on acts two and three and then ready the script for submission to contests and industry contacts. We will focus on in-depth scene work, polishing dialogue and deepening theme.
Prerequisites: COMM-ST 454 or ENGLISH 429B.

COMM-ST 5597 Directed Graduate Studies: Readings Credits: 1-6
Special Projects on the graduate level.

COMM-ST 5598 Directed Graduate Studies: Non-Thesis Research Credits: 1-6
Special projects on the graduate level.
Bachelor of Arts: Communication Studies - Film and Media Studies

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes

Students graduating from this program will:

- Assess films, film culture and film history using film theory.
- Specify relationships between film form and meaning using close textual analysis.
- Identify social, political and aesthetic elements of cinema
- Research and formulate theoretical questions and synthesize original scholarship in appropriate written form.
- * Construct short films in a variety of modes possibly such as narrative, documentary, animated and promotional. (*media production courses are encouraged but not required.)

Program Requirements

The Film and Media Studies emphasis provides an interdisciplinary study of film and media, including the history and theory of global cinema culture, critical media studies and extensive training in media production. Our courses emphasize critical thinking, creative exploration and skill development by combines the study of film history and theory with the art and practice of film-making. Students write, produce, direct and edit several narrative, documentary and experimental shorts while studying histories and theories of the moving image. Students work with video, animation, non-linear editing systems and audio production tools. Internships and extracurricular activities prepare students for creative success, professional careers and advanced graduate studies. The program is aligned with UMKC’s visual and performing arts mission.

The department has media classrooms and production spaces for student projects, that include a video production studio with multi-camera and "green-screen" capabilities, a sound recording facility with narration booth and radio console, and post production media labs outfitted with latest software, including Final Cut Pro, Avid, Pro Tools, Photoshop, After Effects, Flash, etc. These software packages provide the tools to not only edit sound and video, but to produce animation, motion graphics, and rich media content for the web. A student equipment checkout lab maintains an extensive inventory of production equipment ranging from traditional film cameras, such as Super 8 and 16mm; to the latest HD video cameras providing the capabilities for professional digital cinematography. Location lighting equipment includes tungsten, fluorescent & HMI instruments. Pro sound gear packages are also available to students including a wide variety of microphones, booms, mixers and digital recorders. Our facilities foster the ability to light, shoot and edit professionally, allowing the students to tell compelling stories that make an impact on audiences.

¹ Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

**College of Arts & Sciences Degree Requirements**

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

Total Credits 31

¹ ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.
This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

Major Requirements
Film and Media Studies Emphasis

In addition to the 6 credit hours of the department's core courses (COMM-ST 110, COMM-ST 483 or COMM-ST 471), the Film and Media Studies emphasis requires COMM-ST 230, COMM-ST 339 and 21 hours of Film and Media Studies electives for a total of 33 credit hours. Students are required to take one writing intensive course in any department.

Students must maintain a 2.0 GPA in their major courses. Only major courses with a grade of C- or higher will be accepted for credit in the major, and counted toward the major GPA. With prior permission, three hours of elective credit from another department may be accepted as Communication Studies elective credit. Transfer students may transfer a maximum of 15 hours from another institution, and must complete a minimum of 18 credit hours within the department.

Students must successfully complete the major requirements below with at least 18 credit hours taken in the department at UMKC with 12 of those hours at the 300-level or above.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”.

In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transerguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Bachelor of Arts: Communication Studies - Interpersonal and Public Communication Emphasis

University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes
Students graduating from this program will:

• Demonstrate effective oral, written, and visual communication
• Conduct basic research through the identification, evaluation, application, and citation of appropriate scholarly sources.
• Identify key interpersonal communication theories and concepts as they pertain to relationships and interactions with others from diverse backgrounds and across different settings.
• Identify key rhetorical theories and concepts and how they relate to the design and evaluation of effective messages.
• Explain how cultural diversity presents challenges and opportunities in interpersonal and public communication.

Program Requirements
The Interpersonal and Public Communication emphasis offers study in the areas of public address and rhetoric, interpersonal and intercultural communication, organizational communication and areas associated with human communication behavior including advertising, public relations and strategic communication.

**Total Credit Hours: 120**

**Tools for Planning and Fulfilling Academic Requirements**

UMKC’s Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Bachelor of Arts: Communication Studies - Journalism and Mass Communications Emphasis

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes

Students graduating from this program will:

- Produce work applying best practices in short- and long-form news, feature and investigative reporting for print, broadcast and digital journalism.
- Research and develop methods in data collection.
- Produce writing that meets or exceeds professional standards.
- Demonstrate reporting skill that meets or exceeds professional standards.
- Adapt the dissemination of information appropriate to cross-cultural audiences.
- Identify and express ethical news writing and reporting in the best traditions of American journalism and mass communication.

Program Requirements

The Journalism and Mass Communication emphasis offers concentrated study in select areas including print and electronic journalism, radio, television, journalism, advertising and public relations.

See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.

**Constitution Course Requirement**

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

¹ Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

**College of Arts & Sciences Degree Requirements**

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

¹ ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.

² This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

**Major Requirements**

**Journalism and Mass Communication Emphasis**

Students must maintain a 2.0 GPA in their major courses. Only major courses with a grade of C- or higher will be accepted for credit in the major, and counted toward the major GPA. With prior permission, three hours of elective credit from another department may be accepted as Communication Studies elective credit.
Students must successfully complete the major requirements below with at least 18 credit hours taken in the department at UMKC with 12 of those hours at the 300-level or above.

**Courses**

COMM-ST 110 Fundamentals Of Effective Speaking And Listening Credits: 3
An introduction to the dimensions of effective platform speaking with special emphasis on developing critical listening skills. Lecture, performance, and discussion.

COMM-ST 140 Principles Of Communication Credits: 3
An interdisciplinary introduction to the study of contemporary communication studies including a consideration of intrapersonal, interpersonal and public communication.

COMM-ST 203 Introduction to Journalism Credits: 3
Introduction to the styles and techniques of reporting and writing basic news through assignments in straight news, features and in-depth stories. Exposure to the history and principles of American journalism. Practical application in writing news and news feature articles.

COMM-ST 212 Argumentation And Debate Credits: 3
A study of the nature of logical discourse generated through the preparation and presentation of oral argument within the framework of the debate format. Lecture, performance and discussion.

COMM-ST 213 Argumentation And Critical Thought Credits: 3
An introduction to the theory and application of argument construction. The course is designed to examine the fundamental strategies of critical thinking and to help understand the relationships among critical thought and argumentation development and refutation. This course is designed for application across many fields and is not specific to debate or oral argument.

COMM-ST 220 Introduction: Modern Communications Media Credits: 3
A comprehensive survey of the content, structure and control of the communications media in American society–newspaper, motion pictures, radio and television; providing an informational frame of reference that will enable discerning students to formulate and apply useful critical concepts in evaluating America's media environment.

COMM-ST 230 Introduction to Film Studies Credits: 3
The course is an introduction to the study of film as an art form and industrial practice. Students will study the basics of film analysis, cinematic formal elements, genre, narrative structure and the cultural functions of cinema.

**Prerequisites:** DISC 100 or ENGLISH 110.
COMM-ST 250 Introduction to Film and Video Production Credits: 3
This course teaches the fundamentals of media making using digital video. Students will learn techniques in pre-production planning, camera, sound, and editing by creating a series of short videos. Students will also learn to think analytically about film, and to apply insights about what gives an image impact and meaning to their own work. It is the foundation and prerequisite for all film and video production courses in the department.

COMM-ST 260P Introduction To Web Communications Credits: 4
This four credit hour web-based multimedia course will examine the process of critically evaluating information delivered on the Internet. It is designed as an introduction for adults and students who use Internet information for work and/or school. The process of critically evaluating Internet information will be described in four modules: traditional evaluation techniques; searching and researching strategies; Internet evaluation techniques and Internet evaluation resources.

COMM-ST 265 Visual Communication Credits: 3
This course introduces the creative capture and design of photographic images as used in both print and new media for advertising, journalism, and public relations. Basic artistic and production methods are examined, including real-world professional practices and the creative control of process variables.

COMM-ST 270 Introduction to Digital and Mobile Journalism Credits: 3
An introduction to the practices and principles of creating video, combined with audio, graphics, and data information, by newsgathering in the field, for both current and emerging mobile, non-broadcast, digital and social media platforms.

COMM-ST 300CY Ancient World in Cinema Credits: 3
This course will explore the tradition of depicting the ancient Mediterranean world in film from the early silent era to the present. Topics to be covered include the ways that filmmakers respond to literary and historical sources from the ancient world, interact with the artistic tradition of films about the ancient world, the relation of these films to other works by the same creative personnel (directors, actors, writers, producers, etc.), and the political and cultural contexts in which the films were released.

COMM-ST 308 Introduction To The Study Of Human Communication Credits: 3
This course serves to introduce students to the basic theories, perspectives and methodologies used (historically and currently) in the study of speech, interpersonal and mass communication.

COMM-ST 311 Radio & Television Performance Credits: 3
A study of the specialized radio and television performing and operating situations and techniques simulated and evaluated in studio sessions. Lecture, discussion and performance.

COMM-ST 312 Advanced Public Speaking Credits: 3
Advanced study of rhetorical theory and its application to the presentation and criticism of public discourse.
Prerequisites: COMM-ST 110.

COMM-ST 312P Advanced Public Speaking Credits: 3
Advanced study of rhetorical theory and its application to the presentation and criticism of public discourse.
Prerequisites: COMM-ST 110.

COMM-ST 314 Reporting Credits: 3
Reporting is an advanced news gathering and reporting course designed to sharpen the writing skills and critical thinking of student journalists.
Prerequisites: COMM-ST 203 or ENGLISH 203.

COMM-ST 314WI Reporting Credits: 3
A seminar of practical application in advanced reporting. Assignments to cover news events and to pursue in-depth news reports on the campus and off.
Prerequisites: COMM-ST 203 or ENGLISH 203; RooWriter.

COMM-ST 317 Persuasion Credits: 3
A study of the rhetorical, psychological and ethical principles of influencing and controlling individuals and groups, and of the methods of adapting to various attitudes and audiences through the preparation, presentation and evaluation of persuasive speeches. Lecture, discussion and performance.
Prerequisites: COMM-ST 110.

COMM-ST 320 Mass Media, Culture And Society Credits: 3
A critical exploration of the role of mass media (and its reception) in the social construction of reality. The course employs theoretical, analytical and empirical approaches derived from multidisciplinary sources, particularly "critical theory" semiology, post-structuralism, psychoanalysis and ethnography. Term paper required.
COMM-ST 322 Oral Performance In Speech Communication Credits: 3
This course is designed to develop and strengthen oral communication for students pursuing careers in pre-law, media, human resources, and education as well as increase the skills of potential professional speakers. The student will learn to develop emotional, vocal, physical, and non-verbal skills through an investigation of poetry, prose, and non-fiction literature. Through the process of reading, studying, investigating, rehearsing, and performing literary and nonliterary works, the students will learn to pay particular attention to the voice embodied in a given text and the cultural and social context within which that voice speaks.
Prerequisites: COMM-ST 110.

COMM-ST 323 Concepts of the Hero in Ancient Literature and World Cinema Credits: 3
This course explores how concepts of heroism are related to the principles of values and civic duty in a wide range of ancient world cultures and contemporary world cinemas. Students will also demonstrate an understanding of how these values impact individual heroes and their interactions with others in their society.

COMM-ST 331 Mass Media In America Credits: 3
Social history of the development of mass media, radio, film, and television, from Marconi’s first experiments to the present. Emphasis placed on relationship of American culture and American media. Term paper required.

COMM-ST 331WI Mass Media In America Credits: 3
Writing intensive. Social History of the development of mass media, radio, film and television, from Marconi’s first experiments to the present. Emphasis placed on relationship of American culture and American media. Term paper required.
Prerequisites: RooWriter.

COMM-ST 339 Introduction to Film Theory Credits: 3
A survey of the history of theoretical and critical approaches to film theory/philosophy. Students will be introduced to major foundational and contemporary theoretical approaches to cinema that may include but are not limited to formalism, realism, auteurism, psychoanalysis, genre studies, structuralism, feminism, semiotics, cultural studies, post-structuralism, queer theory and digital studies.

COMM-ST 341 Rhetorical Theory And Criticism Credits: 3
An analysis of significant public discourse within the context of social protest and political rhetoric with attention to applying methods of communication criticism in evaluating the effectiveness of persuasive advocacy aimed at social change.

COMM-ST 341WI Rhetorical Theory And Criticism Credits: 3
Writing intensive. An analysis of significant public discourse within the context of social protest and political rhetoric with attention to applying methods of communication criticism in evaluating the effectiveness of persuasive advocacy aimed at social change.
Prerequisites: RooWriter.

COMM-ST 343 Group Dynamics Credits: 3
A study of strategies and communication relationships unique to non-dyadic situations, with an emphasis on the integral structure of leadership, roles, norms and task functions.

COMM-ST 344 Communication In Organizational Settings Credits: 3
An examination of the major elements of interpersonal, group, and oral communication competence essential to human interaction in organizational settings. The course focuses on developing communication competencies and increasing theoretical understanding of the communication process within the organizational context.

COMM-ST 344WI Communication In Organizational Settings Credits: 3
An examination of the major elements of interpersonal, group, and oral communication competence essential to human interaction in organizational settings. The course focuses on developing communication competencies and increasing theoretical understanding.
Prerequisites: COMM-ST 110 or COMM-ST 308, RooWriter.

COMM-ST 345 German Film Credits: 3
This course introduces students to the important contributions of German films to the development of movies as a unique literary art form. The class will cover important terms and concepts in film theory, the specifically German context of film, and important themes and periods in German film history. Taught in English with subtitled films.

COMM-ST 346 Art of the Short Film Credits: 3
Art of the Short Film examines the social, economic and aesthetic histories of narrative, documentary and experimental short form films from the birth of cinema to today.

COMM-ST 347 Topics in Film Genre Credits: 3
A topics course that examines the history and theory of film genres. Repeatable up to six hours when the topic changes.

COMM-ST 348 The Art of the Interview Credits: 3
This course will introduce students to the styles and techniques of conducting professional interviews with the goal of eliciting insightful, thoughtful answers fit for print or broadcast. Students will prepare QA interviews and articles for publication while gaining the confidence needed to work in professional newsrooms or office settings.
COMM-ST 351WI Fundamentals Of Writing For The Media Credits: 3
Analysis of individual differences and common characteristics of copy for eye and ear, with emphasis on the application of both verbal and visual imagery in the process of communicating the writer's ideas and intentions. Weekly written assignments and critical analysis of the student's work. **Prerequisites:** COMM-ST 110, RooWriter.

COMM-ST 354 Introduction to Screenwriting Credits: 3
An introduction to the form and language of the motion picture screenplay. Students will learn to create a workable blueprint for a movie and undertake an in-depth examination of visual storytelling. This will include understanding the basics of dramatic structure, scene and sequence construction and the role of dialogue. Emphasis will be placed on students mastering the accepted movie industry format of the screenplay. They will also adapt a short story and revise it after giving and receiving feedback in small groups. **Prerequisites:** COMM-ST 355WI The New Feature Writing Credits: 3
An intensive practicum in the art of writing feature stories with a special emphasis on shorter stories that will grab reader interest in an era of short-attention spans. **Prerequisites:** COMM-ST 203 or ENGLISH 203, RooWriter.

COMM-ST 356 U News Practicum Credits: 3
This course is workshop-based for students producing UMKC's weekly newspaper, U News. It also focuses on contemporary issues in American journalism and engaging with the university community. **Prerequisites:** COMM-ST 203

COMM-ST 361 Media Management Credits: 3
An analysis of the trends, patterns and methods of radio and television operations.

COMM-ST 363 Radio Production I Credits: 3
A study of the techniques of producing audio material for use in radio, in concerts, on film, on television and in the recording studio.

COMM-ST 373 Intermediate Media Production Credits: 3
An intermediate-level production course emphasizing hands-on skills in cinematography and lighting, sound, and editing. **Prerequisites:** COMM-ST 230 and COMM-ST 250.

COMM-ST 376 History Of The Film Industry Credits: 3
A history of the development of the American film industry from 1900 to the end of the studio era. The course will stress such issues as studio production, censorship, the economics of production and the selling of mass culture through the film medium. Term paper required.

COMM-ST 377 Interpersonal Communication Credits: 3
An intensive analysis of the dimensions of intrapersonal and interpersonal communication designed to identify the philosophies and methods which underwrite effective human communication. Lecture and discussion. **Prerequisites:** RooWriter.

COMM-ST 378 Computer-Mediated Communication Credits: 3
Examination of the nature of human communication on the internet. Design function, content innovations of computer mediated communication discussed, with emphasis on technology as a means of interpersonal communication. Research, essays, and participation in online environment required.

COMM-ST 380 Contemporary Media Topics Credits: 3
COMM-ST 381 Narrative Production Credits: 3
This course covers the creative, technical, and practical aspects of short-form narrative film production. **Prerequisites:** COMM-ST 250 and COMM-ST 354.

COMM-ST 383 Cross-Cultural Journalism & Mass Media Credits: 3
Cross-Cultural Journalism Mass Media provides journalistic tools for traditional and new media coverage of diverse ethnic, gender, ability and ideological groups inside and outside the United States. The critical role of diverse voices in a democracy will be discussed. Students at UMKC and the Missouri School of Journalism participate in joint lectures transmitted by UMKC and MU instructors from their respective campuses.
COMM-ST 384 Documentary Film History Credits: 3
Documentary Film History is an overview of the history and theory of documentary cinema. The course surveys the documentary tradition with special attention to the relationship between content and style and the issues central to documentary film making, including ethical and legal questions, the relationship between representation and power and the ways in which film speaks to notions of truth and truth telling.

COMM-ST 385 Documentary Production Credits: 3
This course is designed to familiarize students with the basics of documentary production from an artistic, ethical, and practical results-oriented perspective.
Prerequisites: COMM-ST 250.

COMM-ST 386 Animation Credits: 3
This course provides an introduction to animation production techniques and an overview of the history of American animation arts. We will address both stop-motion and computer animation using industry standard software.
Prerequisites: COMM-ST 250.

COMM-ST 387 Strategic Communication Research Credits: 3
This course will examine different research methods and research stages in advertising and public relations, including quantitative and qualitative research methods. Students will learn how to plan, conduct, and evaluate strategic communication research. Students are also expected to develop a greater appreciation for the role that research plays in effective campaigns.

COMM-ST 388 Media Ethics Credits: 3
This course is designed to sensitize the ethical considerations that underlie the conventions and practices of print, broadcast, and internet media. By placing traditional and new media in a wider intellectual context than is generally possible under the daily demands of producing news, information, and entertainment, it seeks to produce a larger sense of media as industry and as a career choice.

COMM-ST 390 Forensic Activities Credits: 1-4
Participation in the intercollegiate forensic program. A practicum in debate, discussion, oratory and other forensic activities.

COMM-ST 391 The World(s) Of Alfred Hitchcock Credits: 3
The course offers an historical study of the film art of Alfred Hitchcock. The course gives special attention to the director's work in the silent cinema of the U.K., Hitchcock's early major British sound films, his arrival in the United States, his major World War II propaganda films, the directors maturing into a major influence on world cinema in the 1940's, and Hitchcock's "masterworks" of the 1950's-1960's.

COMM-ST 392 Topics in World Cinema Credits: 3
A variable topics course focused on the histories and theories of international cinemas. Repeatable up to 6 hours when the topic changes.

COMM-ST 393 Topics in Sound & Cinema Credits: 3
A variable topics course that focuses on the histories and aesthetics of sound in cinema. Repeatable up to 6 hours when the topic changes.

COMM-ST 394 Topics in Gender and Cinema Credits: 3
A course focused on the relationship between popular culture, film history and the construction of gender and sexuality. Repeatable up to 6 hours when the topic changes.

COMM-ST 400 Special Studies Credits: 1-3
(A-N) This is an upper-level course on a subject which is not a part of the regular department offering. The course results from one or more of the following: (1) the expressed desire of students (2) the broadened or refocused scholarship of a member of the communication studies faculty (3) the temporary presence of a scholar whose specialization is not reflected in the department's regular offerings (4) the conclusion by the department that the course meets a community need (5) the effort of the Communication Studies faculty to provide an interdisciplinary approach to an era or topic.

COMM-ST 400Z Special Studies Credits: 1-3
COMM-ST 406CD CC: Film Adaptation Credits: 3
The class will explore the process of adapting both fiction and non-fiction literary works into motion pictures. Students will examine the original literary source, then the interim screenplay and finally the completed motion picture.

COMM-ST 411 Seminar in Film and Media Arts Credit: 1
This course covers special topics and professional practices within Film and Media Arts. Course is repeatable. Required of B.A. in Film and Media Arts majors for every semester enrolled. Enrollment restricted to declared majors, B.A. in Film and Media Arts.
Prerequisites: Declared major, B.A. in Film and Media Arts.
COMM-ST 426 History And Criticism Of American Public Address I Credits: 3
This course examines American Public Address from 1630 to 1900, with an emphasis on the connections between rhetoric and social change. Students analyze how texts function within specific historical contexts.

COMM-ST 428 History and Criticism of American Public Address II Credits: 3
This course examines American Public Address from 1900 to present, with an emphasis on the connections between rhetoric and social change. Students analyze how texts function within specific historical contexts.

COMM-ST 431 Colloquium In Interpersonal Dynamics Credits: 3
An examination of the practical application of communication principles and theories, with focus on one of the following: health, organizational, nonverbal, intrapersonal, conflict management, computer mediated, or intercultural communication.

COMM-ST 432 Press, Politics And Public Policy Credits: 3
An advanced course in the study of the press and political establishments in the formation of public policy.

COMM-ST 441 Applications of Interpersonal Communication Credits: 3
This course examines interpersonal communication theory as it pertains to a variety of interpersonal relationships. The course employs class discussions of theory and assignments that apply those theories to real life interactions.

Prerequisites: COMM-ST 377 or COMM-ST 377WI.

COMM-ST 444WI Intercultural Communication Credits: 3
A consideration of communication phenomena in multicultural settings. A study of the public forum with an emphasis on the interpersonal aspects of international, intercultural, and co-cultural communication.

Prerequisites: RooWriter.

COMM-ST 446 Principles Of Advertising Credits: 3
A survey of advertising as an industry and a career field, examining its history and development in America, and its application in mass and special media. Specific procedures are studies for linking the development of advertising strategies, messages and campaigns to the marketing process, and for evaluation and selection of appropriate media to carry the advertising message.

COMM-ST 447 Interactive and Social Media Advertising Credits: 3
This course examines advertising on the Internet as a form of interactive communication, with a special focus on social media and search engines. It addresses basic concepts, current issues, and the development of interactive advertising strategies and plans. The coverage includes interactivity, pricing models, online targeting strategies, search engine optimization and advertising, social media advertising, and online video advertising.

COMM-ST 448 Principles Of Public Relations Credits: 3
An overview, presenting the function, purposes, procedures and practices of public relations, its role in society, industry, government and politics, and its potential as a career field. This is a survey course with primary emphasis on theory, supplemented with applied techniques.

COMM-ST 453 Urban Journalism Practicum Credits: 4
This course engages student journalists to produce stories with an urban focus across radio, online, and television platforms. By practicing convergence journalism, students gain practical story-telling experience for professional news organizations.

Prerequisites: COMM-ST 203 and permission of instructor.

COMM-ST 454 Advanced Screenwriting Credits: 3
This course provides students with advanced theory in narrative screenwriting, training in industry standard script analysis (called "coverage") and story editing. Students will be required to draft, revise and workshop a short film screenplay or will focus on a feature screenplay, delivering a draft and revision of the first act and a detailed outline for the rest of the script. Students will workshop feature screenplays in small groups, emphasizing the art of constructive story editing.

Prerequisites: COMM-ST 354.

COMM-ST 456 Electronic Journalism Credits: 3
A practical approach to the practices and principles of broadcasting news media, including preparing copy for microphone and camera, editing wire copy, reporting public affairs and public relations, and an intensive scrutiny of the concepts of freedom and responsibility as they apply to the press and current legislation.

COMM-ST 457 Client-Based Media Production Credits: 3
This course teaches the process of creating media for a professional client. Students will take on specialized crew positions and work together to plan, write, direct, shoot, edit, and distribute a short video for a local non-profit client.

Prerequisites: COMM-ST 250.

COMM-ST 462 Public Broadcasting Credits: 3
A study of the development of public broadcasting, its position and responsibilities in the world of modern communications. Programming and operations concepts and philosophies of public broadcast facilities will be studied and analyzed.

Prerequisites: COMM-ST 220.
COMM-ST 466 Advanced Electronic Journalism Credits: 3
An advanced study of television and Internet news gathering, field production and performance for electronic media.
Prerequisites: COMM-ST 456.

COMM-ST 470 Directing Credits: 3
An advanced course in video techniques with emphasis on creating complex formats for broadcasting, recording and performance. Lecture, discussion, and laboratory.
Prerequisites: COMM-ST 250.

COMM-ST 471 Advanced Media Production Credits: 3
An advanced course in media production techniques focused on the creation of a significant individual media work and professional development.
Prerequisites: COMM-ST 250, COMM-ST 373, and COMM-ST 354.

COMM-ST 473 Directing Actors and Scenes Credits: 3
This intensive workshop class seeks to deepen the student director's understanding of the acting process and provide ways of clearly and creatively communicating with actors. The course will deepen students' understanding of blocking scenes and designing camera coverage. It will explore the role of the director as a guiding creative force in the making of a film through collaboration and provide techniques for scene analysis and preparation. Students will cast, rehearse and present a live performance for their final project and design appropriate camera coverage.
Prerequisites: COMM-ST 250.

COMM-ST 478 Media Law Credits: 3
A comprehensive examination of the law as it pertains to advertising, public relations, journalism, commercial and electronic media, broadcast regulatory agencies, corporate speech and corporate participation in elections. Students will study topics that include the First Amendment, defamation and privacy. Court opinions and legislation will be the course's primary focus, however students will also examine contemporary and historic theory of free expression.

COMM-ST 483 Research Seminar In Communication Studies Credits: 3
This is the departmental capstone course and is required for majors in their last semester of their senior year. The course summarizes and extends student's theoretical and applied understanding of the role of communication competence in the work place and beyond. The course also focuses on refining student's research competencies and their appreciation of the cultural role of modern communication methods.
Prerequisites: Senior standing.

COMM-ST 484 Communication Studies Activities Credits: 1-4
Internships opportunities for advanced students involved in community and campus activities. Student must receive approval of advising professor in semester prior to enrollment. No more than four hours with any one project.

COMM-ST 492 Advertising Campaigns Credits: 3
The course content focuses on branding, re-branding or development of an identity program, and combines advertising planning with creative execution. Students will learn how to develop advertising/marketing/creative campaign plans for a specific client(s), conceptualize, design and develop all creative aspects including but not limited to logo/identity, copy, advertising, website development, app design, etc., and complete a presentation of the plans/briefs and final creative developments of the plans/briefs and creative to the client(s).
Prerequisites: COMM-ST 446 or COMM-ST 447 or COMM-ST 387.

COMM-ST 498 Special Problems In Communication Studies Credits: 1-3
Research and/or projects for advanced upper class students. Student must receive approval of advising professor in semester prior to enrollment. No more than three hours with any one instructor.

COMM-ST 554 Graduate Seminar: Screenwriting Credits: 3
Students will complete their feature screenplay, focusing on acts two and three and then ready the script for submission to contests and industry contacts. We will focus on in-depth scene work, polishing dialogue and deepening theme.
Prerequisites: COMM-ST 454 or ENGLISH 429B.

COMM-ST 557 Directed Graduate Studies: Readings Credits: 1-6
Special Projects on the graduate level.

COMM-ST 559 Directed Graduate Studies: Non-Thesis Research Credits: 1-6
Special projects on the graduate level.
Bachelor of Arts: Film and Media Arts

University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes
Students graduating from this program will:

• Analyze the complex social, political, economic and aesthetic history of the cinema in critical writing.
• Assess films and film culture in relationship to a variety of theoretical traditions.
• Identify and describe key terms and concepts and major trends and periods related to film history and theory.
• Apply film theory concepts to film texts in written form and in their creative work.
• Demonstrate knowledge of media making craft as a collaborative and creative process applying theoretical historical and aesthetic concepts.
• Demonstrate the ability to create quality media productions including skills in audio, cinematography, editing and producing.

Constitution Course Requirement
Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”
Courses at UMKC that satisfy this state requirement are:

Total Credits 3

1 Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

Total Credits 34

1 ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.

2 This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

Major Requirements

The major requirements curriculum for the B.A. would be 30 credit hours of required courses, 12 credit hours of film production and screenwriting electives, 6 credit hours of film and media studies credits, plus 1-8 credit hours of COMM-ST 411, Film and Media Arts Seminar.

The B.A. in Film and Media Arts requires 48 credit hours of coursework, plus the one-credit Film and Media Arts Seminar each semester that a student is enrolled in the Film and Media Arts major. Students must maintain a 2.0 GPA in their major courses. Only major courses with a grade of C- or higher will be accepted for credit in the major, and counted toward the major GPA.

Students must successfully complete the major requirements below with at least 12 hours of the noted upper division (300+) course requirements completed at UMKC.

**Tools for Planning and Fulfilling Academic Requirements**

UMKC's Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC's Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/plannymdegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student's officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.
UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Minor in Communication Studies

Student Learning Outcomes

Students graduating from this program will:

• Oral and written communication competence.
• The development of critical thinking skills.
• The development of both social and professional skills.

The Department of Communication Studies offers a variety of program areas, including interpersonal communication, public communication, print and electronic journalism, advertising, public relations, media theory and history, as well as radio, television, and film/video production. While each of these program areas have distinct outcomes in regard to professional competence, the faculty makes a strong effort to work collaboratively to assure that the measure of success in earning a degree in Communication Studies is defined in three departmental outcome goals which we seek to make one in the learning process:

1. Oral and written communication competence.
2. The development of critical thinking skills.
3. The development of both social and professional skills.

We recognize that the development of "professional skills" involve both general and specific outcomes. General outcomes include producing students who display professional standards in regard to interpersonal, intercultural, and organizational communication skills, as well as professional work habits (punctuality, reliability, ethical discernment, teambuilding, etc.). Specific professional skills taught in the Department prepare students to succeed in the professional areas of business communication, health communication, advertising, public relations, film, broadcasting, and journalism.

The Department makes a conscious effort to assess our curricula, teaching, as well as learning processes, and student/faculty competence, on the basis of student learning outcomes. We take pride in our reputation as a "teaching" department.

These outcome goals must equally serve students who will be immediately entering the workplace following the attainment of their undergraduate degree, as well as those who will be entering graduate school programs in a wide variety of academic areas (law, business, interpersonal and public communication, journalism, film, among others).

In every departmental course/lab, we consciously seek to employ specific learning process options that reinforce the three goals above.

A minor in communication studies may be earned by completing two required courses (COMM-ST 110 and COMM-ST 308), plus another 12 credit hours in any 300- or 400-level courses within the department, except for those listed below. Students may declare their minor by meeting with the undergraduate advisor and filing a completed Declaration of Major Form (available in 202 Haag Hall) with a current copy of their transcript. Only minor courses with a grade of C- or higher will be accepted for credit in the minor.

COMM-ST 390 does not count toward the minor in Communication Studies.

Courses may be offered on a rotation basis. Please consult advisor for current availability.

Minimum GPA: 2.0
Minor in Film Studies

Student Learning Outcomes

Students graduating from this program will:

• Assess films, film culture and film history using film theory.
• Specify relationships between film form and meaning using close textual analysis.
• Analyze the relevance of global cinema history to film production.
• Identify social, political and aesthetic elements of cinema.
• Research and formulate theoretical questions and synthesize original scholarship in appropriate written form.
• Construct short films in a variety of modes possibly including narrative, documentary, animated and promotional.

The Film Studies minor emphasizes an interdisciplinary study of film and media, critical thinking, creative exploration and skill development by combining the study of film history and theory with the art and practice of filmmaking. Students may write, produce, direct and edit narrative, documentary and experimental shorts while studying histories and theories of the moving image.

Only minor courses with a grade of C- or higher will be accepted for credit in the minor.

Department Description
The Department of Criminal Justice and Criminology offers programs of study leading to the following degrees:

• Bachelor of Arts in Criminal Justice and Criminology
• Master of Science in Criminal Justice and Criminology

A program minor is available in Criminal Justice and Criminology.

The mission of the department is to extend knowledge about the nature of crime and criminal justice. This mission includes continuing participation by faculty in significant criminological research; other scholarly endeavors; and inviting students to join in that activity by:

• Learning the core materials of the discipline.
• Acquiring research skills.
• Assisting in faculty research.
• Becoming involved in student activities that supplement coursework and research.

Within the context of a liberal arts education, the program offers an interdisciplinary approach to study the criminal justice system. The program is designed to develop the intellectual skills required to function effectively as a field practitioner and to provide the knowledge base for careers as planners, administrators and researchers. The course offerings emphasize issues and problems relevant to policy considerations in criminal justice.

Department Activities
Undergraduate Academic Advising
Student academic advising is a continuous process in the department. Undergraduate advisors are available for consultation throughout the academic year. The department recommends that students check the program requirements in the department office before filing the declaration of major form. Undergraduate majors are encouraged to consult with the department to establish a tentative plan of study. Students should leave
University of Missouri - Kansas City

181

their mail and email addresses with the department office so that they can receive notifications concerning class time tables, new classes, and other
departmental information of interest to majors.

Financial Assistance
Students can receive financial assistance through various campus scholarships, loan programs, grants and the work-study program. Students who are
interested should contact the Financial Aid and Scholarships Office (http://www.sfa.umkc.edu/site2).

Alvin Brooks Scholarship
Award Amount: Varies
Qualifications: Full-time undergraduate student majoring in Criminal Justice & Criminology, who is in good academic standing with a minimum GPA of
2.0. Preference given to students who are a first generation college student, who graduated from an accredited Kansas City, Missouri high school or
transferred from a Kansas City area community college. The student must demonstrate financial need.
How to Apply: The College of Arts and Sciences' Scholarship Application.

Clarence Kelley Memorial Scholarship
Award Amount: Varies
Qualifications: Full-time undergraduate student majoring in Criminal Justice & Criminology, who is in good academic standing. Preference will be given
to students who have demonstrated a commitment to high academic achievement.
How to Apply: The College of Arts and Sciences' Scholarship Application

Criminal Justice Club and Honor Society
The Criminal Justice and Criminology Club is open to all students interested in criminal justice topics; students do not have to be a Criminal Justice
and Criminology Major. Club activities include service projects in the community, sponsorship of community speakers on campus, participation in
local and regional professional meetings, and learning about internships and research opportunities. The department also has a chapter of Alpha Phi
Sigma, a national honor society for Criminal Justice students. Students must meet certain academic qualifications and pay an initiation fee to join this
national honor society.

Cooperative Programs
The department cooperates with several other programs on the campus by jointly listing courses at the undergraduate level. Students may benefit
from combining one of these areas of study with their major:
• Honors College
• Women's and Gender Studies
• Black Studies

Graduate Academic Advising
Student academic advising is a continuous process in the department. The principal graduate advisor is available for consultation throughout the
academic year. Graduate students are required to consult with the department to establish a tentative plan of study. A master's degree program of
study form, and a form appointing a supervisory committee, should be submitted by the end of the student's first semester in the program. Students
should leave their mail and e-mail addresses with the department so they can receive notifications concerning class time tables, new classes and
other departmental news and opportunities.

- Master of Science in Criminal Justice and Criminology (p. 191)

Courses
CJC 101 Introduction To Criminal Justice Credits: 3
This introductory overview course is designed to familiarize students with the three main components of the adult criminal justice system: police, courts, and corrections. The course will investigate the viewpoints of offenders, victims, social scientists, the general public, and workers in the system on diverse issues of social control, criminal behavior, treatment and punishment.

CJC 210 Introduction To Statistics In Sociology/Criminal Justice Credits: 3
A first course in the statistical analysis of quantitative data. Course emphasizes descriptive statistics, probability theory, parameter estimation, bivariate hypothesis testing, and computer applications.
Prerequisites: MATH 110, MATH 116 (or equivalent).

Cross Listings: SOCIOL 263.

CJC 215 Methods Of Criminological Research Credits: 3
A seminar which explores the interrelationships between sociology theory, research methods and statistics. May focus on major contemporary issues building on and integrating knowledge obtained in previous courses.

CJC 220 Theoretical Criminology Credits: 3
A comprehensive examination of the major criminology theories, their philosophical assumptions, and the socio-historical context in which they were articulated.

CJC 240 Delinquency And Juvenile Justice Credits: 3
This course focuses on the nature, extent and theoretical explanations of delinquency and the history and philosophy behind the juvenile justice system in terms of the roles played by law enforcement, juvenile courts, and corrections. Juvenile groups such as status offenders, delinquents, gang members, victims, and juveniles adjudicated as adult criminals will also be examined.

CJC 280 Gangs and Crime Credits: 3
This course will provide students with an overview of what is known about street gangs. Specifically, the course will cover definitional issues, gang organization and structure, gang culture, gang member onset and desistance, among other issues related to criminal street gangs. This course will also encourage students to think critically about communities, crime, and group formation.

CJC 282 Criminal Justice & Criminology in Popular Media Credits: 3
This course examines criminology and criminal justice as it is represented in popular film to explore critically the impact media has on the public’s perception of the criminal justice system, the origin of criminal behavior, and the broad sociological constructs of criminology. A key focus is the media’s power to shape criminal justice policy and practice.
CJC 332 Race, Class and Justice Credits: 3
This course examines the intersection of race and class as it relates to crime and justice. Specifically, the course focuses on race and class in relation to criminological theory and the application of justice system practices and policies.

Cross Listings: BLKS 480.

CJC 350 Social Deviance Credits: 3
The dominant sociological perspectives on deviance will be discussed with special attention given to the processes that define behavior and persons as deviant and the impact of such definitions on social relationships and identity.

Cross Listings: SOCIOL 320.

CJC 351 Policing In The Community Credits: 3
The purpose of this class is to introduce the student to police operations and the effectiveness of different police programs. The material discussed in class focuses on empirical evaluations of police effectiveness, and the role of the police in today’s society. This class is divided into four broad areas: the nature and effectiveness of patrol; criminal investigations; special operations including crackdowns, responses to domestic assaults, and hot spot policing; and the latest crime prevention strategies, such as community oriented policing and problem solving.

CJC 354 Policing in America Credits: 3
A comparison of law enforcement and peace-keeping functions of the police provides a basic theme for the course, with examination of several topics related to police accomplishing these functions. Some of the topics covered include police discretion, police professionalism, the police officer as a bureaucratic agent, and police-community relations.

CJC 361 Principles & Practices of Criminal Courts Credits: 3
The course examines the American criminal judicial system, including the history, philosophy, and changing nature of criminal courts. The activities of lawyers, judges, and related professionals are emphasized, and current topics involving the criminal court are discussed.

CJC 364 The Supreme Court And The Criminal Process Credits: 3
Course examines recent Supreme Court decisions on the constitutional aspects of the administration of justice. Topics include the nationalization of the Bill of Rights and jurisdiction with an emphasis on problems involving the Fourth, Fifth, Sixth, Eighth, and 14th Amendments.

CJC 370 Principles Of Corrections Credits: 3
This course explores adult institutional and community-based corrections in the United States. Major areas examined include the evolution of corrections, the process of correctional reform, adult offenders and prison culture, treatment and rehabilitation of offenders, intermediate sanctions, and correctional workers.

CJC 371 Community Corrections Credits: 3
This course will examine intermediate sanctions in the United States, such as probation, halfway houses, boot camps, among others. Specifically, the origin and proliferation of the use of corrections in the community will be explored in depth. The effectiveness of several major community correctional strategies will be explored through a review of the research literature base. Several issues will be highlighted including (but not limited to ) ethical constraints, political problems, and treatment effectiveness in light of the use of community sanctions.

CJC 380 Psycho-Social Determinants of Crime & Delinquency Credits: 3
This course offers an interdisciplinary approach to the study of crime and delinquency outlining biological, developmental, psychological, social-psychological, and societal factors associated with criminal behavior. The course also focuses on ways in which these factors may be integrated to solve, explain, and prevent crimes.

CJC 383 Policies Of Drug Use And Control Credits: 3
Utilizing both historical and contemporary information, this course provides an assessment of the “drug problem” in the U.S. and policies of control developed in response to the problem. Drug use criminalization, legalization, medical treatment, and prevention strategies and related issues are considered in regard to scientific knowledge related to the patterns, causes, and impact of substance abuse.

CJC 385 Victimology Credits: 3
This course addresses the study of crime, criminals and victims. It examines the relationship between victims and offenders. Special treatment is given to criminological as well as victimological theories. A segment of the course will address the sporadic nature of juvenile crime. The course will examine viable strategies to reduce levels of victimization. In the final analysis the course will offer crime prevention strategies.

CJC 390 New Dimensions In Criminal Justice Credits: 3
Examination of contemporary topics, issues or problems related to the development of justice and/or operations in response to criminal and related behaviors addressed by the justice system. May be repeated for credit when the topic changes.

CJC 430 Women, Crime And Criminal Justice Credits: 3
This course will focus on the experiences of women and girls with crime in America. The primary areas studied will be females as victims, offenders, and professionals in the criminal justice system. Various criminological theories and research will also be examined in light of gender.

CJC 431 Hate & Bias Crimes Credits: 3
The purpose of this course is to examine the development and enforcement of hate crime law within our legal system. Discussion focuses on the causes and consequences of hate crimes, the constitutional issues associated with bias crime statutes, and the effectiveness of formal and informal social controls for eliminating hate and bias crimes.
CJC 435WI Gender And Law Credits: 3
This course examines the contemporary legal rights and obligations of women in light of the historical relationships between the social status of women and their legal status. Topics investigated include proprietary and contractual rights, family law, employment practices, educational opportunities, and women as victims and perpetrators of crime.
Prerequisites: RooWriter.

CJC 481 Restorative Justice Credits: 3
This course is an introduction to the concept of restorative justice. The course examines the roots of the concept, its theoretical perspective, and its applications in juvenile justice, mediation and correctional settings.

CJC 482 The Death Penalty In America Credits: 3
This course takes a sociological look at the most extreme punishment currently in use in the United States. Society debates its value without giving much weight to the research which social science conducts. Indeed, the political domain frequently misrepresents the data that is available. The course evaluates the adequacy of the research and separates the strands of the debates in order to understand the role of the death penalty in our society.

CJC 484 White Collar Crime Credits: 3
This course examines activities variously called white-collar crimes, crimes of privilege, corporate and government crimes, and upperworld crimes. The purposes of the course are (1) to describe, analyze, and assess social impact of these offenses, (2) to examine the capacity of existing theories in criminology and social deviance to account for those activities, (3) to describe the responsibilities, powers, and activities of those agencies which have jurisdiction over them, and (4) to assess the effectiveness of various legal sanctions in controlling such activities and to review the problems involved in legislation intended to achieve that control.

CJC 488 Mentoring Juvenile Justice System-Involved Youth Credits: 3
Youth mentoring experience in a juvenile justice setting with required training and classroom study.
Prerequisites: successful background check completion.

CJC 490 Directed Studies In Criminal Justice And Criminology Credits: 1-3
Individual research and study in the student's field of interest as approved and directed by major professors. The work involves examination and reporting of selected problems affecting the various agencies of our legal system. Only two of the 490 sequence courses and up to 3 credit hours can be applied to the major. A. Law Enforcement B. Court Operations and Administration C. Corrections D. Legal Theory and Philosophy E. Criminological Theory F. Sociology of Law.

CJC 491 Internship In Criminal Justice Credits: 3-6
Intern experience under faculty supervision in local, state, federal or private agencies working with justice system involved offenders.
Prerequisites: CJC 101, junior standing.

CJC 492 Topics In Criminal Justice Credit: 1
Specialized, short courses with focused examination of particular topics germane to the study of the justice system. May be repeated for credit.

CJC 495WI Capstone: Criminal Justice And Criminology Credits: 3
This course is designed to integrate student’s program of study in the major of criminal justice and criminology. The class examines current conditions of the justice system with respect of race, gender and social class.
Prerequisites: RooWriter.

CJC 5500 Sociology Of Law Credits: 3
A sociological study of the legal system with focus on organizational analyses of the legal profession, courts as a social system, the bureaucratization of the legal process, stratification and the allocation of legal services and careers.

CJC 5511 Sociological Methods II Credits: 3
Quantitative research is the primary focus of the course; emphasis is placed on problem formulation; research design; sampling procedures, questionnaire construction and interviewing techniques; data collection; problems of scaling, computer statistical programs; linking appropriate statistical analyses with data analysis; and report writing.
Prerequisites: CJC 483 or equivalent.

Cross Listings: SOCIOL 5511.

CJC 5515 Qualitative Research Methods in Criminal Justice Credits: 3
This course focuses on qualitative research methods, such as interviewing techniques, focus groups, content analysis, and field observation. Emphasis is placed on research design, data collection, and data analysis.
Prerequisites: CJC 483 or equivalent.
CJC 5516 Intermediate Statistics Credits: 3
A systematic development of the logic and practice of selected statistical methods used in sociological research. Included are analysis of variance and covariance, regression analysis, multiple contingency, and non-parametric tests.
Prerequisites: CJC 363 or equivalent.

Cross Listings: SOCIOL 5516.

CJC 5518 Advanced Criminological Theory Credits: 3
This course provides an understanding of past as well as present criminological theories by examining each criminological tradition (beginning in the 18th century and continuing into the present.) The primary aim of the course is to determine the root causes of deviant and criminal behaviors. Moreover, this course offers special attention to how society has historically reacted and responded to crime and deviant behavior. Furthermore, by examining crime and deviant behavior from a historical context, the students are able to determine how criminological theories have influenced public policies designed to reduce and control criminal behavior. In the final analysis, students will examine the rationales that society use to justify efforts toward punishment and treatment.
Prerequisites: CJC 319 or equivalent.

CJC 5520 Juvenile Justice Credits: 3
This course provides a historical and contemporary overview of the juvenile justice system via a critical examination of the function of this system and theories explaining delinquency in adolescence. We will explore special topics within juvenile justice and proposals for juvenile justice reform.

CJC 5551 Seminar In Policing Credits: 3
This course addresses the important topics related to the institution of policing. Through readings and class discussions, students will gain a better understanding of both historical aspects of policing as well as the future of policing. Topics include selection, training and socialization, police management, deviance and corruption, use of force, community oriented policing.

CJC 5565 Seminar In Crime Prevention Credits: 3
This seminar examines variations in methods to reduce crime in America, including strategies from the criminal justice system as well as other institutions. Building on established criminological theory, this seminar will evaluate the best practices to prevent crime across a variety of social contexts.

CJC 5570 Contemporary Corrections And Correctional Policy Credits: 3
Present-day correctional alternatives are considered regarding the correctional policy that is, or potentially can be, carried out within the various programs. Prisons, probation, parole community-based programs are evaluated as to the theory of punishment demonstrated within these programs. Emphasis is placed on what constitutes a rational and workable corrections policy and the form of correctional programs needed to realize such policy.

CJC 5575 Correctional Rehabilitation And Treatment Credits: 3
This course will begin with a thorough examination of the rise, fall, and recent resurrection of "rehabilitation and treatment" in American correctional strategies. Both past and current treatment strategies will be studied regarding their effectiveness in reducing recidivism. This will be done through a survey of the quantitative literature base. There will be some emphasis on treating special needs offenders (e.g., sex offenders, juvenile offenders, offenders with developmental disabilities or mental illnesses.)

CJC 5576 Seminar In Criminal Justice And Criminology Issues Credits: 3
This course is an advanced exploration of the relationship between the criminal justice system and criminal behavior from at least one of the following perspectives: psychological, sociological, economic, legal, political or administration/management. Will include discussions and analysis of contemporary readings and on-going research in the selected perspective.

CJC 5580 Seminar: Policy And Decision Making In Criminal Justice Credits: 3
The focus of the course is assessment of the character and recent crime trends in the United States, with attention to identifying elements that shape justice system policies in response to crime. Consideration is given to the nature and scope of policy and decision-making processes in legal institutions and law enforcement bureaucracies, how such policies have impacted crime, and alternative policies address the problem of crime.

CJC 5590 Directed Studies In Criminal Justice And Criminology Credits: 1-3
Individual research and study in the student’s field of interest as approved and directed by major professors. The work involves examination and reporting of selected problems affecting the various agencies of our legal system. A. Law Enforcement B. Court Operations and Administration C. Corrections D. Legal Theory and Philosophy E. Criminological Theory F. Sociology of Law.

CJC 5592 Advanced GIS For Crime Analysis Credits: 3
This course provides an overview of crime mapping as it relates to the spatial and temporal analysis of crime. Utilizing theory related to criminal offending, this course will provide students with hands-on experience in geographic profiling and crime prevention strategies.
Prerequisites: GEOG 203 or equivalent.

CJC 5595 Crime Analysis Internship Credits: 3
This experience involves working with criminal analysts in the field. Students will learn and hone practical skills while being supervised by department faculty or staff.
Prerequisites: CJC 5592.
CJC 5599 Research And Thesis Credits: 1-6
Directed specialized research. Before writing a thesis, the student must clear the topic and research design with the Supervisory Committee.

CJC 5699 Dissertation Research Credits: 1-12
Individual directed research leading to preparation and completion of doctoral dissertation.
**Prerequisites:** Ph.D. course requirements completed.

CJC 5899 Required Graduate Enrollment Credit: 1
Bachelor of Arts: Criminal Justice and Criminology

University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes
Students graduating from this program will:

- Demonstrate ability to integrate, critique, synthesize, and apply content.
- Demonstrate strong oral and written communication skills.
- Demonstrate understanding of skills.
- Possess an understanding of job and career paths.
- Demonstrate ability to link theory, research and policy.
- Demonstrate ability to engage with and address existing social problems.

The mission of the Bachelor of Arts in Criminal Justice and Criminology is to offer students the opportunity to learn how to analyze and interpret the systems of social control that are applied through the criminal justice system and throughout society, as well as how to explain the causes and consequences of these social structures. This major focuses on crime, criminals, and professionals who handle these concerns through arrest, court processing and punishments. As such, the major emphasizes community engagement and service so to prepare students for the jobs and leadership opportunities that will be necessary for their role as future change agents. The major offers skills in critical thinking and in conducting and evaluating research which promote evidence-based decision-making and effective communication. Always striving for best practices, this major is especially relevant to the urban engagement mission of the university, and its domain is always situated within inclusive learning environments which demand students become culturally competent individuals in order to understand and thrive in society.

Career Implications
The B.A. curriculum is designed to prepare students for entry-level positions and middle-management careers in the public and private sectors of police and security services, adult and juvenile justice systems and post-adjudicatory services such as probation, parole and related private organizations, as well as federal, state and local administrative agencies. The program is intended to augment skills that are developed in the training programs and academies of service agencies and to develop new talent for the wide variety of agencies and organizations that administer our legal institutions. In addition to the foregoing variety of career roles, CJC majors can exercise career options in consulting, government, human services, journalism and urban planning, and with the appropriate graduate training, in teaching social work, criminology and law.

**Constitution Course Requirement**

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

1 Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

**College of Arts & Sciences Degree Requirements**

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

Select one course each from two different systems:

**Policing:**
- CJC 351: Policing In The Community
- CJC 354: Policing in America

**Courts:**
- CJC 364: The Supreme Court And The Criminal Process

**Corrections:**
- CJC 370: Principles Of Corrections
- CJC 371: Community Corrections

**Major Electives**

CJC Electives (see restrictions below)                               | 15 |

**Total Credits**                                                  | 36 |

1. STAT 235 is not a substitute for CJC 210.
2. CJC 495WI is open only to CJC majors in their last year of coursework who have completed the RooWriter.

Students must receive a grade of no lower than C- in the core required courses (CJC 101, CJC 210, CJC 215, CJC 220, and CJC 495WI) and achieve an overall GPA of 2.0 in the major. Students with more than one academic major may apply only 9 credit hours from another degree program toward the CJC major.

It is suggested that students broaden their course choices by selecting related offerings in English (especially those courses that stress writing skills), philosophy, history, geography, political science, psychology, sociology and public administration.

**CJC Elective Restrictions**

In selecting courses to fulfill the 15 credit hours of CJC electives, CJC majors and minors should be aware of the following restrictions:

- No more than 3 credit hours of Directed Studies in Criminal Justice and Criminology (CJC 490) may be used to fulfill CJC elective requirements.
- No more than 3 credit hours of Internship in Criminal Justice (CJC 491) may be used to fulfill CJC elective requirements.
- No more than 3 credit hours of Topics in Criminal Justice (CJC 492) may be used to fulfill CJC elective requirements.

Students who are pursuing the CJC major or minor are strongly encouraged to meet with a CJC advisor each semester to review their progress toward degree completion, as well as to determine the appropriateness of coursework selected.

**General Electives**

Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

Minimum GPA: 2.0
Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC's Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student's officially recorded (Office of Registration and Records) and "what if" plans of study. This evaluation is used to certify all graduation requirements.

UMKC's Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Master of Science: Criminal Justice and Criminology

Program Description
The M.S. degree in Criminal Justice and Criminology (CJC) offers coursework that emphasizes policy analysis of criminal justice and criminology issues. The M.S. in CJC prepares those seeking appropriate study and academic credentials to qualify for management and administrative positions in justice-related agencies. The degree may also serve as preparation for advanced study in criminology and criminal justice at the doctoral level.

Application Procedures
Applicants must submit an application for admission to UMKC and transcripts of their undergraduate work (and other graduate work if applicable) to the university Office of Admissions. Additionally, applicants must submit a personal statement to the department’s Admissions Committee (i.e., the Graduate Director). This statement should be two to three pages in length (double-spaced) and should identify how the applicant’s undergraduate education and their work or personal experience has prepared them for graduate study in the area of criminal justice and criminology. Applicants are also encouraged to express how they view study in our graduate program as fitting with their future career or educational goals. It is recommended that students review the M.S. in CJC program’s course offerings as well as the concentration areas of the faculty in order to glean additional information about what the academic programming has to offer.

Applicants for the spring term must have all materials to the admissions committee by November 1, and those applying for fall semester admission must have materials in by April 1. The department strongly recommends that application materials be submitted well in advance of the posted due date to ensure all materials will be on hand in time for review.

Decisions regarding admission to the graduate program are made by the graduate faculty of the program. Materials are reviewed with attention to past academic performance and substantive areas of study that would prepare students for CJC graduate study.

Admission Requirements
The minimum admission requirements for entrance into the M.S. in CJC program include the following:

1. Completed an undergraduate degree, from an accredited university or college, with coursework in the socio-behavioral sciences sufficient to prepare for graduate-level study in the criminal justice and criminology field.
2. Achieved a minimum cumulative GPA of 3.0 in all undergraduate work.
3. Completed three undergraduate courses, one each in statistics, research methods, and theories of crime.
4. Two letters of recommendation: Applicants should ask at least two individuals to provide references on their behalf using the MS Letter of Recommendation form (http://cas2.umkc.edu/cjc/pdfs/FORM_MS_CJC_Letter_of_rec_form.pdf). Please note that references may also include a written letter of reference, that speaks to the applicant’s scholastic aptitude, and their level of preparation for graduate-level education. References should be provided by individuals who are not related to the applicant, and ideally will come from individuals who have direct knowledge of the applicant’s academic credentials and preparedness.

The application process is competitive. Satisfaction of the minimum criteria stated above does not guarantee admission to the graduate program of study. Students are admitted according to their rank in the applicant pool and consideration of the adequacy of departmental resources. Students who do not meet admission requirements, but who otherwise may show promise for graduate work, may be admitted provisionally to the program. Provisional admission means deficiencies must be corrected before a student is fully admitted as a degree-seeking student in the M.S. in CJC program. Typical deficiencies include a need to take undergraduate coursework to prepare for graduate study in this program, or to demonstrate scholastic ability in graduate-level courses.

Student Learning Outcomes
Students graduating from this program will:

• demonstrate broad and deep knowledge of the prevailing explanations for criminal behavior (both macro/social causes, as well as micro/individualistic causes). Students will understand the historical origins of the prevailing theoretical explanations for criminal behavior, and will become fluent in the empirical literature that has served to test and further develop those theories.
• demonstrate the ability to design and execute research. Specifically, students will learn how to fully develop and execute a research proposals/projects of both a qualitative and quantitative nature. Students will also demonstrate the ability to analyze data, interpret findings, and communicate those findings in an accessible way to a general audience.
• demonstrate comprehensive knowledge regarding trends in crime, including crime trends throughout American history, and reasons for shifts in crime trends. Likewise students will demonstrate how and why policy develops within the Criminal Justice System, as well as what impact major policy shifts have had on the Criminal Justice System.

The Department of Criminal Justice and Criminology’s mission is to lead in graduate education within the area of Criminal Justice and Criminology; to deepen and expand scientific understanding of America’s justice systems; to develop a graduate-educated workforce and collaborate in urban issues and education; to create a vibrant learning and campus life experience for our master’s students.
The M.S. in CJC degree requires successful completion of 30 credit hours of graduate work. Within these 30 hours, students may elect to complete a thesis or pursue the Demonstration Project.

A core of five courses is required of all students. The required courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CJC 5511</td>
<td>Sociological Methods II</td>
<td>3</td>
</tr>
<tr>
<td>CJC 5515</td>
<td>Qualitative Research Methods in Criminal Justice</td>
<td>3</td>
</tr>
<tr>
<td>CJC 5516</td>
<td>Intermediate Statistics</td>
<td>3</td>
</tr>
<tr>
<td>CJC 5518</td>
<td>Advanced Criminological Theory</td>
<td>3</td>
</tr>
<tr>
<td>CJC 5580</td>
<td>Seminar: Policy And Decision Making In Criminal Justice</td>
<td>3</td>
</tr>
<tr>
<td><strong>Total Credits</strong></td>
<td></td>
<td><strong>15</strong></td>
</tr>
</tbody>
</table>

The required graduate courses in statistics, research methods and theory demand completion of prerequisite courses in these areas from the student’s undergraduate work. Those who have not had such courses may be required to take the prerequisite course(s) prior to enrolling in the graduate course. Beyond the required courses, students must complete an additional 15 hours of academic work. This work should include the available M.S. in CJC electives (which include the three courses listed above, of which at least one must be taken), other graduate-level courses from other departments that have been approved by the student’s Thesis Committee or the Graduate Committee prior to enrollment, and other coursework from the CJC curriculum that has been approved by the Graduate Committee prior to enrollment. These hours may also include Thesis hours, or Directed Study hours per the Demonstration Project depending on the desires of the student. The content of the 15 hours of study will reflect the student’s choices after consultation with their Thesis advisor, and/or the Graduate Committee, as well as the student’s decision regarding the Thesis or the Demonstration Project option.

In sum, the following generally reflects the two options - Thesis Option and Demonstration Project Option:

- Thesis Option: 15 credit hours of required courses + 9 hours of M.S. CJC graduate elective coursework + 6 hours of Thesis = 30.0 credit hours.
- Demonstration Project Option: 15 credit hours of required courses + 12 hours of M.S. CJC graduate elective coursework + 3 hours of Directed Studies = 30.0 credit hours.

**Thesis Option**

Those electing to write a thesis as part of their graduate work can receive up to 6 hours credit (CJC 5599) for preparation of the thesis. In addition to writing the thesis students must successfully complete an oral defense of that thesis before their supervisory committee. Thesis defenses are also open to the public. The research topic of the thesis will address some issue of specific interest to the student under the advisement of their thesis chair. Through courses, literature review, and analyses conducted in developing the thesis, students are expected to become proficient in their specific thesis topic area.

**Demonstration Project Option**

Students electing the Demonstration Project Option will take 3.0 credit hours of CJC 5590: Directed Studies, during their final semester of coursework. In addition, students conducting Demonstration Projects will take one additional 3.0 credit hour elective. These 6.0 credit hours (CJC 5590 - Directed Studies for the Demonstration Project along with one additional 3.0 credit hour elective) are in lieu of the 6.0 credit hours of CJC 5599 that a student electing to conduct a Thesis would take.

The demonstration project will require the student to write an independent research paper that outlines solutions to a given scenario. The process is designed to reflect the academic peer-reviewed protocol and will involve two stages of blind review. Please see the Graduate Guidebook (http://cas2.umkc.edu/cjc/pdfs/MS-Student-Guidebook.pdf) and/or the graduate director for more detail regarding the Demonstration Project.
Minor in Criminal Justice and Criminology

Student Learning Outcomes
Students graduating from this program will:

• Demonstrate knowledge of the Criminal Justice System, its subsystems (the institutions and structures of police, courts, and corrections) and their interactions (processes).
• Demonstrate knowledge of the major theoretical explanations for individual motivations to commit crime as well as the nature/occurrence of crime which includes the prominent schools of criminological thoughts - the Positivist, Classical and Chicago Schools of Criminology - and emergent theories.
• Demonstrate the ability to analyze criminal justice literature, through reading comprehension and interpretation.

Program Requirements
Undergraduate students can obtain a CJC minor. A minimum of 18 credit hours is required, including the introductory course CJC 101. At least 9 of the 18 credit hours must be in courses at the 300 or 400 level, and at least 9 of the 18 credit hours must be taken at UMKC. Only 6 credit hours from the major field of study may be applied toward a CJC minor, and only 3 credit hours may overlap between two minors. Students should receive a grade no lower than a C- in the required course and should have an overall 2.0 GPA for the minor.
Department of Economics

Haag Hall, Room 211

Mailing Address
University of Missouri-Kansas City
Department of Economics
HH 211
5100 Rockhill Road
Kansas City, MO 64110-2499

Department Chair:
Karen Vorst, (816) 235-2837

Undergraduate Advisor:
Karen Vorst, (816) 235-2837

IPhD Coordinator:
Peter J. Eaton, (816) 235-2832

M.A. Advisor:
Erik Olsen, (816) 235-1153

Business Specialist II:
Deborah E. Foster, (816) 235-2405

Office Support Assistant II:
Kayla Weru, (816) 235-1153

Professors Emeriti:
W. Robert Brazelton, L. Kenneth Hubbell, A. Ross Shepherd, F. Eugene Wagner, John O. Ward

Professors:
Mathew Forstater, James I. Sturgeon, Karen S. Vorst (chair)

Associate Professors:
William Black, Peter J. Eaton, Stephanie Kelton, Linwood Tauheed, Erik K. Olsen

Assistant Professors:
Scott Fullwiler, Ellis Scharfenaker

Lecturers:
Judith Ancel, John Henry, Michael Kelsay, Ben Young

The Department of Economics is committed to promoting excellence in broad-based undergraduate programs; graduate and interdisciplinary doctoral education; research; and community, university and professional service. The department focuses its research, teaching and service efforts on the urban mission of the University by fostering a diversity of research and teaching perspectives for faculty and students.

The department offers an undergraduate major that can be completed either through day or evening classes and is a major participant in PACE (Program for Adult College Education).

Our Students
The department offers programs leading to a Bachelor of Arts, Master's of Arts and Interdisciplinary Ph.D., in Economics. It also provides undergraduate service courses to the College of Arts and Sciences, the Bloch School, and the School of Computing and Engineering. Undergraduate majors participate in a variety of visiting lecture programs and faculty colloquialism through the Economics Club and the Omicron Delta Epsilon (the economics honorary society).
Faculty and Facilities
Faculty members of the department maintain active, extensive research programs and a strong commitment to teaching – holding four outstanding teaching awards. Faculty members have served as presidents for national and regional economic associations and lectured and conducted research in the Fulbright Program, the Ford Foundation, the U.S. Department of Commerce, and the U.S. Department of Labor. Faculty members have established national and international reputations in a number of research fields. For a small faculty, the department has ranked high among other economics departments at comparable institutions nationally.

The Department of Economics and the Center for Economic Information are housed in Haag Hall. Faculty and other department programs are housed in Manheim Hall. Students have access to state-of-the-art computer labs and classrooms.

Center for Economic Information
Haag Hall, Room 210
5120 Rockhill Road
(816) 235-1394
http://www.umkc.edu/cei/

Peter Eaton, director
Douglas Bowles, associate director

The Center for Economic Information (CEI) was established in November 1994 with the goal of making local, regional and national information accessible to economic decision-makers in the Kansas City metropolitan area. The CEI is affiliated with the Department of Economics and the College of Arts and Sciences.

The center is involved in research, teaching and outreach activities. The primary expertise of the center is in application of information technology for economic analysis.

Missouri Council for Economic Education
The department houses the Missouri Council for Economic Education (MCEE). MCEE is the statewide provider of economic education training for elementary and secondary education. It is located in Manheim Hall.

Information
You may request information about economics programs by calling the department’s main number, (816) 235-1314; visiting the website at http://cas.umkc.edu/econ/; or sending an information request via email to economics@umkc.edu.

For specific information on the undergraduate degree program, contact Karen Vorst (816) 235-2837 or vorstk@umkc.edu. For master’s program inquires, contact Erik Olsen, M.A. Advisor, (816) 235-1153 or olsenek@umkc.edu. Peter Eaton, IPhD Coordinator, (816) 235-2832 or mailto: eatonp@umkc.edu.

Faculty
W. Robert Brazelton\textsuperscript{2,3} Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=brazelton); professor emeritus of economics; B.A. (Dartmouth College); M.A., Ph.D. (University of Oklahoma).

William Black\textsuperscript{2,3} Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=black); associate professor of economics and law; Ph.D. (University of California at Irvine).

Doug Bowles Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=bowles); research associate, assistant director, CEI, director, SSC, Ph.D., (University of Missouri-Kansas City)

Peter J. Eaton\textsuperscript{2,3} Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=eaton); associate professor of economics; B.A. (University of Santa Clara); Ph.D. (University of Florida).

Mathew Forstater\textsuperscript{2,3} Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=forstater); professor of economics; B.A. (Temple University); M.A. (New School for Social Research); Ph.D. (New School for Social Research).

Scott Fullwiler Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=fullwiler); assistant professor of economics; B.A., Ph.D. (University of Nebraska-Lincoln)

L. Kenneth Hubbell Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=hubbell); professor emeritus of economics and joint professor in the L.P. Cookingham Institute of Public Affairs; B.A., M.A. (Texas Christian University); Ph.D. (University of Nebraska).

Stephanie A. Kelton\textsuperscript{2,3} Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=kelton); professor of economics; B.A. (California State University-Sacramento); M.Phil. (Cambridge University); Ph.D. (New School for Social Research).
Michael Kelsay, Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=kelsay); Adjunct professor of economics; Ph.D. (University of Tennessee).

Erik K. Olsen Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=olsen); associate professor of economics; B.S. (Northeastern University); Ph.D. (University of Massachusetts at Amherst).

Ellis Scharfenaker Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=scharfenaker); assistant professor of economics; B.A. (The Evergreen State College); M.S., Ph.D., (The New School for Social Research)

Ross Shepherd Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=shepherd); professor emeritus of economics; A.B. (Harvard University); M.A., Ph.D. (Syracuse University).

James L. Sturgeon Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=sturgeon); professor of economics; B.A. (Kansas State Teachers College-Emporia); M.A. (University of Missouri-Kansas City); Ph.D. (University of Oklahoma).

Linwood Tauheed Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=tauheed); associate professor of economics; Ph.D. (University of Missouri at Kansas City).

Karen S. Vorst Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=vorst); chair, department of economics, professor of economics; B.S. (Bowling Green State University); Ph.D. (Indiana University).

F. Eugene Wagner Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=wagner); professor emeritus of economics; B.A., M.S. (University of Missouri-Kansas City); Ph.D. (Syracuse University).

John O. Ward Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=ward); professor emeritus of economics; B.A., M.A. (University of Toledo); Ph.D. (University of Oklahoma).

Ben Young Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=young); lecturer of economics, Ph.D. (University of Oklahoma).

Courses

ECON 100 Economics Explained Credits: 3

Everything you need to know about how the economy works and where it’s going. This course simplifies and clarifies the vocabularies and concepts used to describe all the important economic phenomenon in our society today: unemployment, trade deficits, government budget deficits or surpluses, inflation, investments, and customer debt. It describes where we’ve been (economically) and assess the future of the economic system we call capitalism.

ECON 100 - MOTR ECON 100: Introduction to Economics

ECON 150 Introduction To Labor Studies Credits: 3

This interdisciplinary course offered by The Institute for Labor Studies, covers the role of workers and the labor movement in society and the American political and economic system. Students will gain an overview, from a labor viewpoint, of the organization of work and workers, collective bargaining and representation, and labor’s rights, roles, and strategies in a democracy and in the global economy. A particular focus will be the image of the working class and organized labor in the media and among public perception.
ECON 201 Introduction To Economics I Credits: 3
Economics I deals primarily with macroeconomic or national economic concepts, the economics of the determination of recession, inflation, maintenance of full employment and economic growth, with an emphasis upon the economics of modern Keynesian analyses. It further introduces the economics of Marx and Ayres and discusses relevant and current economic issues. ECON 201 and ECON 202 are prerequisites for most other economics courses.

ECON 201P Introduction To Economics I Credits: 3
Economics I deals primarily with macroeconomic or national economic concepts, the economics of the determination of recession, inflation, maintenance of full employment and economic growth, with an emphasis upon the economics of modern Keynesian analyses. It further introduces the economics of Marx and Ayres and discusses relevant and current economic issues. ECON 201 and ECON 202 are prerequisites for most other economics courses.

ECON 202 Introduction To Economics II Credits: 3
Economics II deals primarily with microeconomics, firm analysis, the principles of demand, supply, elasticity, price determination, costs, income distribution, market structures, trade, and other related social, economic issues. ECON 201 and ECON 202 are prerequisites for most other economics courses.

ECON 202P Introduction To Economics II Credits: 3
Economics II deals primarily with microeconomics, firm analysis, the principles of demand, supply, elasticity, price determination, costs, income distribution, market structures, trade, and other related social, economic issues. ECON 201 and ECON 202 are prerequisites for most other economics courses.

ECON 300CM Cluster Course: Mexico, Central America And The Human Condition Credits: 3
Faculty from at least two different departments (one of which must be a department in the Division of Humanities, including History) may determine the topic and syllabus, subject to the approval of the director of Integrated Studies and the program's advisory committee in addition to the approval of the departments involved. This special topics course will satisfy the interdisciplinary course requirement for the B.A.
Prerequisites: ECON 201, ECON 202.

ECON 300CS Cluster Course Credits: 3
Faculty from at least two different departments (one of which must be a department in the Division of Humanities, including History) may determine the topic and syllabus, subject to the approval of the director of Integrated Studies and the program's advisory committee in addition to the approval of the departments involved. This special topics course will satisfy the interdisciplinary course requirement for the B.A.
Prerequisites: ECON 201, ECON 202.

ECON 301 Macroeconomic Analysis Credits: 3
This course provides more in-depth analysis of the macroeconomy. It examines the economic system as a whole and the ways in which its functioning is affected by the behavior of the interdependent sectors of which it is composed. It details the major factors affecting national income and the use of sectoral accounts in analyzing economic prospects and policies.
Prerequisites: ECON 201.

ECON 302 Microeconomic Analysis Credits: 3
This course provides in-depth analysis of the microeconomy. It examines the functioning of the individual enterprise and households. It specifically details problems confronting business enterprises operating under different types of market situations. It features analyses of the influence of the prices factors of production on methods of production and the effects that changes in income levels and in relative prices have on sales of different types of goods and services.
Prerequisites: ECON 202.

ECON 303H Special Issues In Economic Credits: 3
Readings and discussions of selected economic topics. Content varies over time as economic conditions change. Designed for outstanding students in Principles of Economics.
Prerequisites: ECON 201, ECON 202.

ECON 308 Challenges Facing The US Economy Credits: 3
This course provides an introduction to challenges facing the US economy, such as growing inequality and poverty in the midst of plenty, persistent unemployment in the central cities, the threat of recession or inflation, the problems and opportunities created by an aging society, implementation of welfare-to-work plans, and other topics of interest to students.
Prerequisites: ECON 201, ECON 202.
ECON 314 Race, Class And Gender: Theory, History, And Policy Credits: 3
Analyzes the ways in which race and gender discrimination result in differences in opportunities and outcomes in society. Begins with a historical overview of the origins of modern racism and patriarchy, and their relation to the rise and development of capitalism. Discursive and nondiscursive factors are investigated. Alternative theoretical approaches to understanding the intersections of race, class, and gender are evaluated. Policy debates on issues related to affirmative action, education, welfare, employment, and others are considered.
Prerequisites: ECON 201, ECON 202.

ECON 331 Money And Banking Credits: 3
A study of the structure, operations and problems of banks and other financial institutions with emphasis on their macroeconomic performance. The importance of banking in the financial system and the influence of Federal Reserve monetary policies are also studied.
Prerequisites: ECON 201, ECON 202.

ECON 331P Money And Banking Credits: 3
A study of the structure, operations and problems of banks and other financial institutions with emphasis on their macroeconomic performance. The importance of banking in the financial system and the influence of Federal Reserve monetary policies are also studied.
Prerequisites: ECON 201, ECON 202.

ECON 336 The Kansas City Economy Credits: 3
This course explores the Kansas City economy in depth from both a micro and macro perspective. The macro approach details how important the Kansas City economy is to the state of Missouri, to the US economy, and in the international arena. The micro approach details the contribution of the many different sectors of the KC area to the overall local economy.
Prerequisites: ECON 201 or ECON 202.

ECON 340 Collective Bargaining Credits: 3
This course involves a study of the economics and process of collective bargaining in the labor sphere, including contract negotiations, contract enforcement, and methods to resolve bargaining disputes. Both theoretical and applied issues in collective bargaining will be addressed. Students will participate in a contract bargaining simulation.

ECON 341 Union Leadership and Administration Credits: 3
This course focuses on the roles and challenges of union leadership in a changing environment. Topics include the union leaders’ role as a representative, organizer and educator as well as administrative responsibilities within the union and the relationship with enterprise management in both adversarial and participatory situations. Options for leadership styles and organizational models will be discussed and explored in both theory and practice. Leaders will develop their skills of motivation, speaking, strategic planning and managing complex campaigns and diverse organizations.

ECON 353 Financial Analysis And The Economy Credits: 3
This course examines techniques of financial evaluation used by individuals, corporate managers, and portfolio analysts. Focus of the course will be on the interaction of the mechanics of analytical methods and economic activity. Topics covered will include individual portfolio building, asset evaluation, and financial market theory.
Prerequisites: ECON 201 and ECON 202.

ECON 395A Economic Issues Credit: 1
ECON 395C The Economics Of Energy Credit: 1
ECON 395D Economic Issues Credit: 1

ECON 402 Labor and the Global Political Economy Credits: 3
This course will examine current issues, trends, and developments which are shaping labor in today’s global economy. Students will analyze the shifting balance of power between labor and capital, the role of government, and evaluate the strategic options for workers and unions operating in a global environment.

ECON 404R American Economic History Since 1865 Credits: 3
The course deals with the emergence of Industrial American since 1865. It covers the rise to dominance of the large modern corporation, the problem of economic and social instability and stability, the rise of trade associations, cartels, and government regulation in an unstable economy, and the evolution of American economic policy and national economic planning.
Prerequisites: ECON 201 and ECON 202.

ECON 404RR American Labor History Credits: 3
This course examines history of work and the working class in the U.S. from 1750 to the present. We will focus on the transformation of the workplace, the rise of the union movement, the nature of cultural and political organizations, workers’ relationships with other social groups, and the role played by gender, race, and ethnicity in uniting or dividing the working class.
Prerequisites: ECON 201 and ECON 202.

Cross Listings: HISTORY 366RR.
ECON 405 European Economic Systems Credits: 3
A general study of the economic systems of Germany, France, Sweden, the United Kingdom, Russia, and other countries: and the European Economic Union. The course will study the economic-business organization, economic and social policies, trade policies, and the on-going political, economic, and business changes within the area, and their relation to other areas of the world in terms of economics, business and trade.
Prerequisites: ECON 201, ECON 202.

ECON 406WI History Of Economic Thought Credits: 3
Analysis of basic concepts of economic thought, their historical sources and significance.
Prerequisites: RooWriter.

ECON 411 Geographic Information Systems (GIS) for Urban Economic Development Credits: 3
An advanced quantitative methods course featuring the application of Geographic Information Systems (GIS) to the problems of urban economic development. Surveys federal, state, and local geospatial and attribute data resources, including Census Bureau TIGER files, and provides training in geodatabase construction and management. Geospatial processing, editing, and address geocoding are also covered. Formal analytical methods (cartographic aesthetics and visualization, spatial analysis, exploratory data analysis, network analysis, crime analysis, etc.) are all applied in the context of the problematics of urban and regional economic development.
Prerequisites: GEOG 203 or UPD 203

ECON 412 International Trade And Development Credits: 3
This course emphasizes the global allocation of resources and distribution of income in the analysis of economic development and international trade. Major topics include various theories of economic development, comparative advantage, terms of trade, tariffs, quotas, economic integration and the use of trade to foster economic development.
Prerequisites: ECON 201, ECON 202.

ECON 416 Law And Economics Credits: 3
This course will examine the use of economic principles in the analysis and application of public and private law. Emphasis will be given to the efficiencies of laws in meeting social objectives, how laws can be modified to become more economically efficient, and the uses of economics in the actual practice of the law. Issues covered will include proofs of liability in antitrust, contracts and employment law using statistical and economic analysis, and the calculation of economic damages in commercial, employment and personal injury/death litigation. Graduate students will be assigned a specific research paper.
Prerequisites: ECON 201, ECON 202, ECON 302.

ECON 420 Environment, Resources And Economic Growth Credits: 3
This course focuses on the theory and policy issues involved in resource recreation and depletion; environmental destruction, preservation and recreation; and the interrelation of these problems of and prospects for economic growth.
Prerequisites: ECON 201, ECON 202.

ECON 421 Mathematical Economics Credits: 3
An introduction to mathematical methods as applied to the questions addressed by economists. The principal methods to be applied are matrix algebra and differential calculus in the context of optimization. Other topics may include integral calculus, differential equations, difference equations, or linear and non-linear programming.
Prerequisites: ECON 201, ECON 202, ECON 301, ECON 302 and MATH 210.

ECON 425 Intermediate Economic Statistics Credits: 3
An introduction to the empirical side of economics. Estimation theory and the properties of commonly used estimators are covered. Some of the more important topics dealt with are: multiple regression, heteroscedasticity and autocorrelation in regression analysis, analysis of variance and the use of qualitative variables in regression analysis. Hands-on work with computer software designed for econometrics is stressed. No experience with computers necessary.
Prerequisites: ECON 201, ECON 202, ECON 301, ECON 302 and STAT 235 (or its equivalent).

ECON 429 Environment, Resources And Economic Growth Credits: 3
This course focuses on the theory and policy issues involved in resource recreation and depletion; environmental destruction, preservation and recreation; and the interrelation of these problems of and prospects for economic growth.
Prerequisites: ECON 201, ECON 202.

ECON 431 Monetary Theory And Policy Credits: 3
A study of the nature and functions of money and the financial system, with emphasis on monetary theory and its application to current banking and financial problems. Recent contributions to monetary theory and current literature.
Prerequisites: ECON 201, ECON 202, ECON 301.

ECON 435 Public Finance Credits: 3
Problems of public and private sector decision making of revenue-expenditure policies and an examination of the actual legal, political and economic policies for revenues and expenditures of federal, state and local governments.
Prerequisites: ECON 201, ECON 202, ECON 302.
ECON 437 State And Local Government Finance Credits: 3
This course investigates the role, problems and relative importance of municipal governments in the United States. Such areas as the demand for public services, tax and expenditure policies, and intergovernmental fiscal relations will be explored in detail. Case studies of state and local governments will be introduced to emphasize the problems and proposed solutions arising in modern municipal governments.
Prerequisites: ECON 201, ECON 202, ECON 302.

ECON 438 Economic Policy Credits: 3
Analysis of the confluence of political and economic behavior, the economics of collective action.
Prerequisites: ECON 201, ECON 202, ECON 301 and ECON 302.

ECON 442 International Finance Credits: 3
This course emphasizes the global activity and balance of payments implications of government taxation, expenditure and monetary policies under various capital market conditions. Major topics include: exchange rates and the balance of payments; national income determination in an open economy; integrated and non-integrated capital markets; economic growth stabilization policies and the quest for global economic stability.
Prerequisites: ECON 201, ECON 202, ECON 301.

ECON 451 Institutional Economic Theory Credits: 3
Analysis of impact of modern philosophy and developments in social sciences on economic theory.
Prerequisites: ECON 201, ECON 202, ECON 301, ECON 302.

ECON 458 Urban Economics Credits: 3
An inquiry into the economics of location decisions and the influence of these on urban growth and on the real estate market; the evaluation of urban transportation and other public services; an examination of economic development of ghetto neighborhoods.
Prerequisites: ECON 202, ECON 302 (or equivalent).

ECON 460 Industrial Organization Credits: 3
Prerequisites: ECON 201, ECON 202, ECON 301, ECON 302.

ECON 475 Economics Institutions and Policies Credits: 3
This course focuses on the economic system analysis of labor market phenomena in the context of historical-institutional development and labor market policies, this course is offered winter semester only.
Prerequisites: ECON 201 and ECON 202.

ECON 486 Labor Economics Credits: 3
An examination of the theories of wage determination, the economic effects of wage determination upon the wage structure, the distribution of national income, employment, and an introduction to collective bargaining.
Prerequisites: ECON 201, ECON 202, ECON 302.

ECON 488 Radical Political Economy Credits: 3
This course will cover the ideas that constitute radical political economy. It will show how radical political economy can be used to examine current economics and social problems and will outline possible economic structures of utopian visions.
Prerequisites: ECON 201, ECON 202.

ECON 490 Readings In Economics Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the professor in any of the following fields: (a) economic theory, (b) history of economic thought, (c) labor economics, (d) urban economics, (e) monetary and fiscal policy and theory, (f) international economics, (g) economic development, (h) comparative economic systems, (i) public finance, (j) public policy toward business, (k) quantitative economics.
Prerequisites: ECON 201, ECON 202.

ECON 496 Practicum in Urban Economic Development Credits: 3
The Practicum in Urban Economic Development provides students with the opportunity to integrate and apply the knowledge and skills developed through previous coursework to real-world problems of urban economic development. Working on collaborative, service-learning projects in partnership with both community and metropolitan-level organizations, students will engage with the process of applied urban economic development in a team-structured context. Student teams will be each be responsible for one term project over the course of the semester. The course will culminate with the public presentation of project outcomes.
Prerequisites: ECON 336, ECON 458.

ECON 497 Internship Credits: 1-6
The course allows the student to participate in cognate, approved internships of a professional nature.
Prerequisites: The completion of 75 credit hours and undergraduate major or graduate student in Economics, ECON 201, ECON 202.
ECON 5501 Advanced Macroeconomic Analysis Credits: 3
Basic theoretical concepts of national income and statistical tools utilized in its measurement. Aggregate demand and supply as problems of economic dynamics. The course includes examination of the primary competing theoretical approaches: neoclassical, Keynesian, new classical, real business cycle, new Keynesian supply side, Austrian, and Post Keynesian. Topics covered include growth, money, labor markets consumption, investment, expectations formation, role of time and uncertainty, equilibrium and disequilibrium analysis, exchanges rates, international trade, and optimal currency areas. Policy implications of the various macroeconomic theories are explored.
Prerequisites: ECON 301 and ECON 302 (or equivalent).

ECON 5502 Advanced Microeconomic Analysis Credits: 3
The course first provides a critical survey of neoclassical microeconomic theory, including methodology, demand theory, production and cost theory, theory of competitive and non-competitive markets, distribution, welfare, and general equilibrium. It then introduces heterodox microeconomic theory, covering its historical origins, methodology, structural organization of economic activity, in-put-output models, flow of funds, agency and institutions, and the business enterprise.
Prerequisites: ECON 302, ECON 5521.

ECON 5503 Advanced Heterodox Economics Credits: 3
The course examines various theoretical approaches and topics, both historically and currently, that constitute heterodox economics. In particular the course deals in depth with the mathematical and economic properties of heterodox production and price models. After reviewing the mathematics of linear production-price models, the module will examine Leontief, Sraffian, and other heterodox price and production models.
Prerequisites: ECON 301, ECON 302, and MATH 210.

ECON 5504R American Economic History Since 1865 Credits: 3
The course deals with the emergence of Industrial America since 1865. It will cover the rise to dominance of the large modern corporation, with the problem of economic and social instability and stability, with the rise of trade associations, cartels, and government regulation in an unstable economy, and with the evolution of American economic policy and national economic planning.
Cross Listings: HISTORY 5566R.

ECON 5504RR American Labor History Credits: 3
This course examines the history of work and the working class in the U.S. from 1750 to the present. We will focus on the transformation of the workplace, the rise of the union movement, the nature of cultural and political organizations, workers' relationships with other social groups, and the role played by gender, race, and ethnicity in uniting or dividing the working class.
Prerequisites: Graduate standing.
Cross Listings: HISTORY 5566RR.

ECON 5505 Advanced Comparative Economic Systems Credits: 3
Contents vary depending upon the instructor's design for the course.
Prerequisites: ECON 301, ECON 302.

ECON 5506 Advanced History Of Economic Thought Credits: 3
This seminar uses issues raised in the reading of two 'classic' primary texts, Adam Smith's An Inquiry into the Nature and Causes of the Wealth of Nations (1776) and John Maynard Keynes's The General Theory of Employment, Interest and Money (1936), as points of departure for the examination of a series of topics in the history and development of economics and alternative paradigms in the discipline. These investigations will lead us to the study of a number of other seminal articles, representing alternative approaches in the field. Topics include competition, accumulation, path dependence and endogenous technical change, cumulative causation, the laws of return, money and credit, capital theory, and more.
Prerequisites: ECON 301, ECON 302.

ECON 5508 Controversial Issues In Recent Economic Literature Credits: 3
This course will focus on theoretical and policy-oriented controversies that have occurred in economic in the 20th century. The type of controversies covered include, but are not restricted to, money, unemployment, business cycles and economic growth, pricing and administered prices, capital controversy, labor theory of value controversy, and free trade vs. protectionism. While the course concentrates on recent debates, it identifies the origins of the modern disputes in earlier controversies. For each controversy, its real world importance and policy implications are discussed.

ECON 5511 Geographic Information Systems (GIS) for Urban Economic Development Credits: 3
An advanced quantitative methods course featuring the application of Geographic Information Systems (GIS) to the problems of urban economic development. Surveys federal, state, and local geospatial and attribute data resources, including Census Bureau TIGER files, and provides training in geodatabase construction and management. Geospatial processing, editing, and address geocoding are also covered. Formal analytical methods (cartographic aesthetics and visualization, spatial analysis, exploratory data analysis, network analysis, crime analysis, etc.) are all applied in the context of the problematics of urban and regional economic development.
Prerequisites: GEOG 203 or UPD 203.

ECON 5512 Advanced Economic Development Credits: 3
Contents vary depending upon the instructor's design.
Prerequisites: ECON 301, ECON 302.
ECON 5513 Economic Cycles And Growth Credits: 3
A critical review and evaluation of economic analysis and the forces of economic fluctuation and growth; and analysis of statics, dynamics, monopolistic competition, the role of the interrelationships of the market structure and other institutional forces as they relate to fluctuations and growth. An emphasis will be made on the critical evaluation of recent literature in the field of economic analysis related to fluctuations, growth, statics, dynamics, market structure and the reinterpretation of economic fluctuations, growth, forecasting and overall economic behavior. An analysis of the technological, monetary, and fiscal policy implied by economic trends and growth will also be discussed.

Prerequisites: ECON 5501 or equivalent.

ECON 5516L Law And Economics Credits: 3
This course will examine the use of economic principles in the analysis and applications of public and private law. Emphasis will be given to the efficiencies of laws in meeting social objectives, how laws can be modified to become more economically efficient, and the uses of economics in the actual practice of the law. Issues covered will include proofs of liability in antitrust, contracts and employment law using statistical and economic analysis, and the calculation of economic damages in commercial, employment and personal injury/-death litigation. Graduate students will be assigned a specific research paper.

Prerequisites: ECON 302.

ECON 5521 Mathematical Economics Credits: 3
An introduction to mathematical methods as applied to the questions addressed by economists. The principal methods to be applied are matrix algebra and differential calculus in the context of optimization. Other topics may include integral calculus, differential equations, difference equations or linear and nonlinear programming.

Prerequisites: ECON 301, ECON 302 and MATH 110 (or equivalent).

ECON 5525 Econometric Methods Credits: 3
Continuation of ECON 425. The major problems encountered in building and testing economic models are treated and alternative solutions to these problems are discussed. Major topics include corrections for heteroscedasticity and autocorrelation, maximum likelihood and BLUE estimation, simultaneous equations methods, probit and logit analysis and distributed lags. Other topics may include ARIMA or other series analytic methods, three stage least squares and dynamic multipliers or simulation. Work with econometric software is stressed. No programming experience necessary.

Prerequisites: ECON 425 (or equivalent) and ECON 5521.

ECON 5529 Readings In Quantitative Economics Credits: 3
Readings from the economic literature which stress advanced mathematical or econometric tools. A general subject matter is selected by the student with the consent of the instructor.

Prerequisites: ECON 5521, ECON 5525.

ECON 5531 Monetary Theory And Policy Credits: 3
A study of the nature and functions of money and the financial system, with emphasis on monetary theory and its application to current banking and financial problems; recent contributions to monetary theory and current literature.

Prerequisites: ECON 301.

ECON 5535 Theory Of Public Finance Credits: 3
An inquiry into the scope and nature of economics with emphasis on the nature of the public sector including a brief study of welfare criteria along with the study of ability to pay, benefit theory of taxation, and expenditure theories.

ECON 5537 State And Local Government Finance Credits: 3
This course investigates the role, problems and relative importance of municipal governments in the United States. Such areas as the demand for public services, tax and expenditure policies, and intergovernmental fiscal relations will be explored in detail. Case studies of state and local governments will be introduced to emphasize the problems and proposed solutions arising in modern municipal governments.

Prerequisites: ECON 302.

ECON 5538 Economic Policy Credits: 3
Analysis of the confluence of political and economic behavior, the economics of collective action.

Prerequisites: ECON 301 and ECON 302.

ECON 5540 Advanced International Trade Credits: 3
This course emphasizes the global allocation of resources and distribution of income under various commodity market conditions and government trade policies. Major topics include: comparative advantage; terms of trade; the distribution of gains and losses from trade; perfect vs. imperfect competition; tariffs, quotas and other barriers to trade; exchange rates and the balance of payments; preferential trading arrangements; international factor movements and multinational corporations.

Prerequisites: ECON 302 (or equivalent); graduate standing.

ECON 5542 Advanced International Finance Credits: 3
This course emphasizes the global activity and balance of payments implications of government taxation, expenditure and monetary policies under various capital market conditions. Major topics include: exchange rates and the balance of payments; national income determination in an open economy; integrated and non-integrated capital markets; economic growth, stabilization policies and the quest for global economic stability.
ECON 5548 Advanced Socialist Economic Systems Credits: 3
The course will deal with the theoretical analysis of socialist economic theory, Marxian and non-Marxian, and/or of socialist economics systems such as those of Eastern Europe, the Chinese mainland and elsewhere. The emphasis of the course will vary depending upon the instructor's design for the course.
**Prerequisites:** ECON 301 and ECON 302.

ECON 5550 Regional Economics Credits: 3
The economics of spatial relations, emphasizing basic location and land utilization theory and the role of transport will be considered at the micro-level. Keynesian and neoclassical growth theories and contemporary policy approaches to regional growth and decline are analyzed.
**Prerequisites:** ECON 302.

ECON 5551 Advanced Institutional Theory Credits: 3
Evolution, organization and allocation functions of the modern industrial economy. Contributions and limitations of conventional economic concepts. Philosophical and theoretical interpretations of the economy in light of modern developments in philosophy and social science.
**Prerequisites:** ECON 451.

ECON 5558 Advanced Urban Economics Credits: 3
The study of the city as a dynamic system of interrelated and interdependent markets. Significant markets in cities include land, housing, labor, transportation and public services.

ECON 5560 Industrial Organization Credits: 3
**Prerequisites:** ECON 301, ECON 302.

ECON 5575 Labor Economics, Institutions and Policies Credits: 3
This course focuses on the economic analysis of labor market phenomena in the context of historical-institutional development and on labor market policies. This course is offered winter semester only.
**Prerequisites:** ECON 201 and ECON 202.

ECON 5583 Racial Inequality & Public Policy Credits: 3
This course will provoke open debate and discourse about public policy responses to racial inequality. The emphasis is on stimulating participants to think about and to analyze critically the range of strategies offered for reducing racism and racial economic inequality.

ECON 5587 Human Resource Economics Credits: 3
An analysis of the factors determining the productivity of human resource: education, nutrition, job training and work environment. An analysis of work patterns, wage patterns, and the impact of automation. Graduate students will be assigned a specific research paper on a topic to be decided with the instructor.
**Prerequisites:** ECON 302.

**Cross Listings:** ECON 487.

ECON 5588 Advanced Political Economy Credits: 3
This course gives students a comprehensive introduction to the history and modern practice of political economy, with particular emphasis on Marxian and Classical political economy. Topics include: value theory, class theory, economic reproduction, economic crisis, the theory of history, and methodology.

ECON 5589 Graduate Seminar In Labor Economics Credits: 3
Content of seminar will vary from semester to semester depending upon the instructor's design for the course.
**Prerequisites:** ECON 486.

ECON 5590 Special Topics Credits: 1-3
Selected topics in theoretical and applied economics.

ECON 5590A Special Topics Credits: 1-3
ECON 5590B Special Topics Credits: 1-3
ECON 5590C Special Topics Credits: 1-3

ECON 5591 Research And Planning Seminar Credits: 3
The objective of this research seminar is to apply the quantitative techniques and theoretical constructs of economics to an urban-regional problem. Students are required to formulate and evaluate present economic models, and then complete a research project.
**Prerequisites:** ECON 5502 and ECON 5521.

ECON 5599 Research And Thesis Credits: 1-6
Directed specialized research.
ECON 5601 Colloquium In Advanced Macroeconomics Credits: 3
The course will deal with analyses of topics in Macroeconomic analysis and Macroeconomic policies and investigation of current literature in diverse areas of Macroeconomic analysis. A written report(s) will be made upon the selected assignment(s).
Prerequisites: ECON 5501 or equivalent.

ECON 5602 Colloquium In Advanced Microeconomics Credits: 3
As a continuation of Economics 502, this course deals with the business enterprises-including production, costs, pricing, and investment-markets, market demand, market governance, general price-quantity models of the economy, microfoundations of the heterodox macroeconomics, and social welfare.
Prerequisites: ECON 5502.

ECON 5606 Colloquium on Advanced History of Economic Thought Credits: 3
The course examines advanced topics in history of economic thought.
Prerequisites: ECON 5506.

ECON 5608 Topics In Economic Theory Credits: 3
This course deals with advanced topics in Institutionalism, Post Keynesian, and other heterodox economic theory. May be repeated with different topic.

ECON 5616 History Of Economics In The 20th Century Credits: 3
The history of 20th century economics is concerned with a number of interdependent issues, including the institutional organization of economics at universities; the historical development of the structures and social networks that make-up the economic paradigms of neoclassical economics, Marxist economics, Post Keynesian economics, and other heterodox economics; and the role of institutional and state power to maintain the dominance of the neoclassical paradigm. The aim of the course is to introduce students to this institutional/organizational history.

ECON 5625 Colloquium In Econometrics Credits: 3
This course treats advanced topics in econometrics such as non-linear estimation techniques, model development, simultaneous equation estimation techniques, and simulation. Topics are developed from theoretical and application perspectives. Familiarity with personal computer is necessary.
Prerequisites: ECON 5501, ECON 5502, ECON 5521, ECON 5525, or equivalents.

ECON 5631 Colloquium on Monetary Theory and Policy Credits: 3
This course explores advanced monetary theory and policy, examining recent debates and current research practices, as well as classic articles on monetary theory and policy.
Prerequisites: ECON 5601 or ECON 5501 and ECON 5531.

ECON 5645 Financial Macroeconomics Credits: 3
This course will introduce the student to the central role of financial analysis in macroeconomic analysis and to theories of macroeconomics instability based on the integration of finance and macroeconomics. It will examine modern finance theory and modern approaches to financial analysis, paying particular attention to the contributions made by Fisher and Keynes.

ECON 5660 Evolution Of American Industrial Society Credits: 3
Drawing on economic and organizational theory, the course will concentrate on the evolution of American industrial technology, the American business enterprise, and the organization of American industries and markets since 1870.

ECON 5665 Colloquium In Advanced Health Economics Credits: 3
This course is designed as a seminar with a special emphasis on analysis of econometric methods to assess issues in health care. The topics are developed from a theoretical and applied perspective. Familiarity with personal computers is necessary. Special emphasis will be given in the selection of course topics to the interests and backgrounds of participants.
Prerequisites: ECON 5521, ECON 5525, ECON 5565, or equivalents.

ECON 5680 Teaching Methods And Course Design Credits: 3
This course is designed to prepare students for the challenge of teaching economics. Students will be taught how to write a syllabus; how to prepare for class; how to plan learning activities; how to become skillful in leading discussion; how to present an effective lecture; how to test and assess student learning; how to develop effective group projects; how to motivate their students for lifelong learning. Students will be required to design a course to be taught at the 200-, 300 or 400-level. The student will prepare a complete set of course materials, including a lecture outline, a list of require readings, useful handouts, course materials, including a lecture outline, a list of require readings, useful handouts, course assignments, exams, etc. The course should incorporate an interdisciplinary approach and should emphasize an "active learning" component, designed to promote a "rich learning experience." The student will work closely with an appropriate member of the faculty.
Prerequisites: Must have completed/passed Comprehensive Exams.

ECON 5688 Colloquium On Political Economy Credits: 3
This course is designed as a seminar and will take into account theory and policy analysis from alternative perspectives. The topics covered will include philosophical foundations of contemporary theory and policy, the organization of production information and finance, resource and environment, wealth and income distribution, public and private policy and planning. Stress is placed on contemporary research and students are expected to become involved in research projects.
ECON 5690 Special Doctoral Readings In Economics Credits: 1-3
Special research topics in Economics at the Doctoral level.

ECON 5699 Doctoral Dissertation Credits: 1-12
Directed selected research for Economics in the interdisciplinary doctoral program.

ECON 5899 Required Graduate Enrollment Credit: 1
Bachelor of Arts: Economics

University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes
Students graduating from this program will:

• Apply the theory and methods of the ‘standard’ approaches in both micro and macroeconomics given a variety of social and economic issues.
• Have a capacity for critical thinking and its role in challenging the ‘standard’ approach to economic problems.
• Demonstrate well-developed written and verbal communication skills.
• Demonstrate competency in a variety of qualitative and quantitative methods that will become part of their problem-solving toolkit.

Career Implications
The undergraduate degree in economics is excellent preparation for graduate study in economics and most other academic disciplines, as well as law and business. A degree in economics opens a wide range of career choices including teaching, government service, finance, banking and insurance. It is excellent preparation for a career in business, public administration and management.

Advising System
Students in the program should see the Economics website for more information about undergraduate advising.

Honor Society
The Zeta chapter of the Omicron Delta Epsilon International Honor Society in Economics is on campus. Information on this organization can be obtained from Ben Young. The society is open to all undergraduate students with at least 12 hours of economics and a 3.0 GPA in economics and related courses. Graduate students in economics with a 3.0 GPA also may join.

Special Awards and Scholarships
The Joe E. Brown Institutional Economics Award is given each year to an undergraduate or graduate student for outstanding academic performance in the study of institutional theory. The department also offers the Robert Greene Scholarship, Frank Wagner Scholarship, James Crew Scholarship, and the Karen Vorst Scholarship for undergraduates.

Total Credits  21

1  See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.

Constitution Course Requirement
Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

1  Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

• Take an equivalent course from the list above at a regionally accredited institution.
• Earn credit for one of the above courses through AP, IB, or CLEP.
• Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
• Have a previous bachelors degree (or higher) from a regionally accredited institution.
• Have an Associate of Arts degree from a regionally accredited institution.
• Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements
Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

Major Electives
18

Total Credits 42

General Electives
Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

Money and Finance Emphasis

Student Learning Outcomes
Students graduating from this program will:

- Identify important issues related to money and finance from both a macro (broad policy questions) and micro (firm-specific questions) perspective.
- Determine what information is needed to evaluate the issues and identify/construct appropriate data sets and other information for analysis.
- Develop and use their problem-solving skills and be able to analyze specific issues in order to formulate a variety of solutions.
- Communicate their analyses effectively through written and oral presentations.
- Gain experience working in teams either in the classroom and/or on the job through an internship experience.

Focus Elective (Satisfied in program requirements below)

'Total credits’ in this section indicates the number of General Education Core credit hours that are not met by the degree specific requirements outlined below.

| Total Credits | 21 |

See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.

**Constitution Course Requirement**

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

<table>

Total Credits 3

1 Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

**College of Arts & Sciences Degree Requirements**

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

### Political Economy Emphasis

**Student Learning Outcomes**

Students graduating from this program will:

- Explain, analyze, and critically evaluate different market structures.
- Analyze specific economic issues using different methodologies of both a quantitative and qualitative nature.
- Undertake independent research into an examination of an issue of current social concern.
- Assess the role of domestic and international institutions and norms in shaping economic outcomes.
- Address and critically evaluate policy proposals from different theoretical perspectives.
- Explain why different theoretical perspectives lead to different policy recommendations.
- Understand the relation between economic theory(ies) and the examination of at least two major social issues (race and/or gender, economic development, environmental concerns, etc.).
- Examine a specific issue from a standpoint that incorporates social and political concerns in the economic inquiry.

**Urban Economic Development Emphasis**

**Student Learning Outcomes**

Students graduating from this program will:

- Become familiar and conversant with the full range of private, public, and non-profit sector organizations and activities which contribute to the process of urban economic development.
• Develop comprehensive and advanced skills in spatial analysis and the operation of Geographic Information Systems (GIS) in the support of urban economic development.
• Learn and develop competency in the theory and methods of the field of Urban Economics.
• In collaborative partnerships with local organizations, students will demonstrate the ability to integrate and apply the knowledge and skills acquired in learning outcomes 1-3 to practical problems in urban economic development.

Minimum GPA: 2.0

Total Credit Hours: 120
Teacher Certification in Social Studies
Student Learning Outcomes

Upon graduating with a Teacher Certification in Social Studies:

- Students will be able to distinguish the attributes of a variety of economic theories and policies.
- Students will be able to use their economic knowledge to examine a wide variety of problems that are economic, social and/or political in nature, on both the micro and macro levels.
- Students will have knowledge of statistical methods that will become part of their problem-solving toolset.
- Students will become proficient writers through assignments in regular classes, as well as intensive-writing experiences in the capstone course.
- All students will have undertaken a research project in conjunction with a local community development corporation as part of an academic service learning assignment. In fact, there will be many opportunities to be actively engaged with the Kansas City community through our community service requirement in various courses.
- Students will be better problem solvers and better-informed citizens.

Certification as a middle school (grades 5-9) or secondary (grades 9-12) social studies teacher in either Kansas or Missouri requires that a student complete specific requirements in History, Political Science, Economics, Geography, Behavioral Sciences and the School of Education. A separate application for teacher education is required. For further information about the program, consult the School of Education (p. 1018) section of this catalog or contact the Education Student Services Office at (816) 235-2234.

Tools for Planning and Fulfilling Academic Requirements

UMKC’s Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Minor in Economics

Student Learning Outcomes
Students graduating from this program will:

- Students will be able to distinguish the attributes of a variety of economic theories and policies.
- Students will be able to use their economic knowledge to examine a wide variety of problems that are economic, social and/or political in nature, on both the micro and macro levels.
- Students will become proficient writers through assignments in regular classes, as well as intensive-writing experiences in the capstone course.
- Students will be better problem solvers and better-informed citizens.

Program Requirements
The minor in economics is open to all students and consists of a minimum of 18 hours (six courses) in economics.

The courses are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 201</td>
<td>Introduction To Economics I</td>
<td>3</td>
</tr>
<tr>

<td>3</td>
</tr>
<tr>
<td>ECON Upper Level Electives</td>
<td>12</td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>18</td>
</tr>
</tbody>
</table>

Twelve hours in 300/400-level courses must be approved by the economics Undergraduate Advisor. Students are encouraged to consider the Economics BA Emphasis Areas available when determining elective selection.

Students must maintain a 2.0 GPA within the minor coursework to be awarded the minor in Economics.
Undergraduate Certificate Program in Labor Studies

Student Learning Outcomes

Students graduating from this program will:

• Students will gain an understanding of the theoretical framework and distinct visions and goals of the labor movement in the United States historically and at present.

• Students will understand the strategic challenges working people and organized labor face today and faced in the past in the U.S. and in the global economy. They will develop ability to do critical analysis on strategy and tactics historically, through critical research on the global economy, and by developing the skills of strategic planning in a contemporary context.

• Students will develop skills in labor negotiation, in labor organizing and mobilization, and in union leadership all within the confines of law and practice.

Students take all six courses listed. They can take one or two 3-credit courses per semester. Classes alternate between Wednesday evenings and Saturdays (7 meetings per semester, 9am-4pm) and rotate to be available at all times on a three year rotation. At two classes a semester, a student can complete the program in 3 semesters.
Master of Arts: Economics

Career Implications

The master of arts in economics is designed as a preparation for further graduate training at the doctoral level and for professional positions in industry, business, government, teaching and research. Courses may be taken in areas other than economics with the approval of the graduate advisor.

Advising System

Students should consult with the graduate advisor, Erik Olsen, (816) 235-2405, olsenek@umkc.edu, to plan their graduate program of study.

Admission Requirements

Students may be admitted for graduate study in economics if they have a baccalaureate degree in economics from an accredited college or university with an overall grade-point average of at least 2.5 on the 4.0 scale (or the equivalent). Applicants whose undergraduate GPA is less than 2.5 may be considered for admission upon petition to the Graduate Admission Committee of the Department of Economics.

Students who have a baccalaureate degree with an overall undergraduate GPA of 2.5 or better and who did not major in economics may be admitted to the program upon consultation with the department’s graduate advisor and on demonstrating proficiency in the following areas:

- Intermediate Macroeconomic Analysis
- Intermediate Microeconomic Analysis
- Introductory Statistics

All students with less than a 2.5 (4.0 scale) GPA prior to admission shall be required to take the general Graduate Record Examinations (GRE) and obtain a score of 153 in verbal, a score of 144 in quantitative, and a score of 4.0 on the analytical portion or better.

International students who have studied less than two years (full time) in a U.S. academic program or a comparable program in an English-speaking country are required to have TOEFL score of 550 or above or 213 on the computer-based test.

Student Learning Outcomes

Students graduating from this program will:

- Have an advanced knowledge of the basic areas of the field.
- Be able to integrate their knowledge with critical thinking skills.
- Be able to articulate their knowledge, both orally and in writing.
- Be able to effectively research the literature of this field.

Degree Requirements

Thirty hours of graduate work are required for the M.A. in economics. The following required courses (15 hours) and their prerequisites are listed:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 5501</td>
<td>Advanced Macroeconomic Analysis</td>
<td>3</td>
</tr>
<tr>
<td>ECON 5502</td>
<td>Advanced Microeconomic Analysis</td>
<td>3</td>
</tr>
<tr>
<td>ECON 5521</td>
<td>Mathematical Economics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 5525</td>
<td>Econometric Methods</td>
<td>3</td>
</tr>
<tr>
<td>ECON 5551</td>
<td>Advanced Institutional Theory</td>
<td>3</td>
</tr>
<tr>
<td>Additional hours of coursework</td>
<td></td>
<td>15</td>
</tr>
</tbody>
</table>

Total Credits 30

1. ECON 5521 is waived if students have completed ECON 421 or its equivalent. In the event students have not had ECON 421 they should take ECON 5521. Calculus is strongly recommended as a prerequisite for ECON 5521.
2. For students not entering in the fall semester, it is strongly recommended that ECON 5521 be taken at the first opportunity.
3. ECON 425 is required for all students who have not had it, or something very much like it. (See Professor Olsen)
4. ECON 451 is required for all students who have not had an approved substitute - see graduate advisor.
5. An additional 15 hours of coursework must be completed. Up to nine of these hours may be in selected 400-level courses in economics and related disciplines, upon consultation with the graduate adviser. Graduate credit toward the M.A. in economics is not given for courses at the 300 level. No more than 6 hours of ECON 5590, may be counted toward graduation.
Substitutions for the above prerequisites may be approved by the graduate advisor.

The prerequisites for graduate courses are very important and must be completed prior to enrollment in courses with prerequisites. Graduate students in economics must also comply with the general graduate academic regulations as found in the School of Graduate Academic Regulations and Information (https://catalog.umkc.edu/general-graduate-academic-regulations-information/general-graduate-academic-regulations) section of this catalog.

**Requirements for Retention**

Students are expected to maintain a high degree of academic excellence. Students must maintain a minimum 3.0 graduate grade-point average. A student who receives a grade of C+ or lower will receive an academic warning. Students who receive a grade of C or C- in two classes, or a grade of D+ or lower in one class, will be dropped from the program. A 3.0 (B) must be earned in all undergraduate courses approved for graduate credit and in ECON 5590 and ECON 5599.

A student is required to fill out a "program of study" with the graduate advisor before the completion of 15 hours of coursework. At that time, the graduate committee will consider the student’s performance and make a recommendation with regard to retention of the student. After being approved by the College of Arts and Sciences graduate officer, the program of study is filed with the UMKC Records Office and may be amended upon consultation with the graduate advisor.

**Requirements for Graduation**

**Elective Courses Option**

Students are required to complete 15 hours beyond the required courses. Of these, 6 hours must be at the 5500 level. Economics 5591 and 5599 cannot be counted towards graduation requirements.

**Project Option**

Students are required to complete 15 hours beyond the required courses. Of these, 6 hours must be at the 5500-level or above. Students complete a supervised applied research project that counts as part of the 15 hours beyond the required courses. The number of hours for the project depends on its scope and is determined by the student and his/her project advisor. For more information about the project, see the Graduate Advisor. Depending on the scope of the project, students are required to take 3 to 6 hours from among the following courses:

<table>
<thead>
<tr>

</tbody>
</table>

¹ ECON 5591 prerequisite.
Interdisciplinary Ph.D.

The Department of Economics participates in the Interdisciplinary Ph.D. program.

For further information see School of Graduate Studies (p. 1185) section in this catalog, contact the Department of Economics, (816) 235-1314, or Peter Eaton Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=eaton), Interdisciplinary Ph.D. Coordinator, (816) 235-2832 or eatonp@umkc.edu
Bachelor of Arts / Master of Arts: Economics - Dual Degree Program

Student Learning Outcomes

Students graduating from this program will:

• Apply the theory and methods of the ‘standard’ approaches in both micro and macroeconomics given a variety of social and economic issues.
• Have a capacity for critical thinking and its role in challenging the ‘standard’ approach to economic problems.
• Demonstrate well-developed written and verbal communication skills.
• Demonstrate competency in a variety of qualitative and quantitative methods that will become part of their problem-solving toolkit.
• Have an advanced knowledge of the basic areas of the field.
• Be able to integrate their knowledge with critical thinking skills.
• Be able to articulate their knowledge, both orally and in writing.
• Be able to effectively research the literature of this field.

This program offers students the opportunity to fulfill the requirements of the BA and MA degrees in less time, and for less money, than the separate degree programs. Students earning a UMKC BA degree in Economics may count up to 9 credit-hours of 400-level undergraduate credit toward the MA degree. A student completing the requirements for the BA degree with 9 credit-hours of 400-level coursework (including ECON 425 and 451) can earn the MA degree with seven additional Economics courses (as specified below). For a full-time student this additional coursework can be completed in one year of study.

The requirements for this program are:

• Students must apply after completion of 60 hours toward their BA degree. Students must apply for the BA-MA option before applying for graduation with the BA degree.
• To apply, students must submit an application (Application form (http://catalog.umkc.edu/Apps/BA-MA%20Program/BA-MA-Application_Version%202.0.pdf)) and a completed Declaration of Major forms to the Department of Economics (Declaration form (http://catalog.umkc.edu/Apps/Forms/BA-MA-%20DOM%20Forms.pdf)).
• Student applications will be reviewed and approved or denied at the discretion of the MA Program Advisor in the Department of Economics.
• Students must pass a college-level calculus course before entering the program. MATH 206 Brief Calculus and Linear Algebra or an equivalent is recommended; MATH 210 Calculus I is also acceptable.

BA-MA Requirements

BA Component – see the requirements for the BA-Economics program (https://catalog.umkc.edu/colleges-schools/arts-sciences/academic-departments-programs/economics/bachelor-of-arts-economics).

Chair: Virginia Blanton
Associate Chair: Jennifer Phegley

Professors:
Hadara Bar-Nadav, Virginia Blanton, Michelle Boisseau, Joan F. Dean, Stephen Dilks, Jane Greer, Christie Hodgen, James McKusick, Jennifer Phegley, Jeffrey Rydberg-Cox

Associate Professors:
John Barton, Laurie Ellinghamhausen, Jennifer Frangos, Daniel Mahala, Michael Pritchett, Anthony Shiu, Jacqueline Wood

Assistant Professors:
Whitney Terrell

Associate Teaching Professors:
Crystal Gorham Doss

Associate Research Professors:
Robert Stewart

Full-time Lecturers:
Sheila Honig, Cynthia Jones

Professors Emeriti:
Robert M. Farnsworth, Moira Ferguson, Daniel F. Jaffe, James McKinley, David Ray, Lois Spatz, Thomas Stroik, Linda Voigts, David Weinglass, Robert Willson

Associate Professors Emeriti:
Ralph Berets, James A. Reeds, Jonas Spatz

Department Description
The Department of English Language and Literature offers programs of study that lead to the Bachelor of Arts, the Master of Arts, the Master of Fine Arts, and the Interdisciplinary Doctor of Philosophy degrees. In the undergraduate program, students may pursue a general English program, or they may select an emphasis in Classical, Medieval and Early Modern Literature; Language and Rhetoric; or Creative Writing. Four minors in English are offered: Creative Writing, Language and Literature; Manuscript, Print Culture, Editing; and Writing. Master’s in English students may focus their studies on Literature, or may select from two emphases: Language and Literature or Manuscript, Print Culture, and Editing. The M.F.A. in Creative Writing and Media Arts is an interdisciplinary program leading to a terminal degree. English is an academic discipline eligible for full participation in the University’s Interdisciplinary Ph.D. program.

The Department of English includes faculty who have a broad range of professional competence in the study of literature and language, and who are trained to teach courses in British and American literature, linguistics, American culture, film, creative writing, and composition. The department believes the study and teaching of literature and language to be an important means of preserving and vitalizing our humanistic tradition.

Publications
The Department of English and the College of Arts and Sciences publish New Letters, a continuation of The University Review, which for over 50 years published the works of new and distinguished writers. New Letters continues to provide a medium for the best imaginative writing available.
The Department of English sponsors the publication of *Number One*, a magazine of student poetry and fiction, and *The Sosland Journal*, a collection of award-winning student essays from the Ilus W. Davis contest.

BkMk Press, operated under the auspices of the College of Arts and Sciences and housed in the Department of English, publishes books of high-quality poetry and prose by professional writers.

**Related Information, Opportunities, and Conferences**

The Department of English sponsors undergraduate and graduate student conferences, a writers’ reading series, summer creative writing workshops, and annual contests in creative and expository writing. The Department offers additional scholarships for creative writers and students in literature, including the Diversity in English Scholarship for undergraduates. Graduate students are also eligible for the Farnsworth Fellowship. Interdisciplinary Ph.D. students can apply for the Ilus Davis Doctoral Teaching Fellowship. The Department also offers courses and an annual conference for English teachers as part of its continuing education function. Four student groups provide social and literary activities for majors and interested others: Undergraduate English Council, English Graduate Student Association, Graduate Students in Creative Writing, and Sigma Tau Delta (the international English honor society).

**Career Implications of the Undergraduate Degree**

The English major is recommended for students interested in a broad, general background in the humanities and in the skills of analysis, synthesis, and self-expression. It is excellent preparation for medicine, business, and law, as well as for further literary study in graduate school.

In addition to careers in education, writing, and editing, English majors with writing and editorial skills find that they are desirable candidates for positions in businesses where effective communication and written evaluation are required.

**Advising System**

All undergraduate English majors are assigned to the Director of Undergraduate Studies.

**Internships and Other Opportunities**

Through the resources of the metropolitan media and publishing houses, as well as the on-campus facilities of the national literary journal *New Letters*, the literary publisher BkMk Press, and the academic journal, *Eighteenth Century Theory & Interpretation*, students may gain experience in writing and editing. With the approval of the supervising faculty, as well as the Director of Undergraduate Studies, students may intern with these media for credit. In addition, a number of other on- and off-campus internships are available for writers and editors.

**Graduate Degrees**

The Department of English offers three graduate programs: the Master of Arts: English; the Master of Fine Arts: Creative Writing and Media Arts; and the Interdisciplinary Ph.D.

**Faculty**

Hadara Bar-Nadav²,³ Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=bar-nadav); professor of English; B.A. (William Paterson College); M.A. (Montclair State University); Ph.D. (University of Nebraska-Lincoln).

John C. Barton²,³ Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=barton); associate professor of English; B.A. (University of California-Berkeley); M.A., Ph.D. (University of California-Irvine).

Ralph A. Berets associate professor emeritus of English; B.A., M.A., Ph.D. (University of Michigan).

Virginia Blanton²,³ Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=blanton); professor of English; B.A. (Southwestern College); M.A., Ph.D. (Binghamton University).

Joan F. Dean²,³ Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=dean); curators’ distinguished teaching professor of English; A.B. (Canisius College); M.A., Ph.D. (Purdue University).

Stephen Dilks²,³ Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=dilks); professor of English; B.A. (University of Stirling, Scotland); M.A., Ph.D. (Rutgers University).

Crystal Gotham Doss Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=doss); associate teaching professor in English; B.A. (William Jewell College); M.A. (University of Kansas); Ph.D. (University at Buffalo).

Laurie Ellinghausen²,³ Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=ellinghausen); associate professor of English; B.A. (University of Houston); M.A. (Ohio State University), Ph.D. (University of California-Santa Barbara).

Robert M. Farnsworth professor emeritus of English; B.A. (University of Michigan); M.S. (University of Connecticut); Ph.D. (Tulane University).

Moira Ferguson professor emerita of English; B.A. (University of London, Birkbeck College); M.A., Ph.D. (University of Washington, Seattle).
Jennifer Frangos Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=frangos); associate professor of English; B.A. (Vassar College); M.A. (State University of New York-Buffalo), Ph.D. (State University of New York-Stony Brook).

Jane Greer Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=greer); professor of English; B.A. (Hanover College); M.A., Ph.D. (Ohio State University).

Christie Hodgen Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=hodgen); professor of English; B.A. (University of Virginia, Charlottesville); M.F.A. (Indiana University, Bloomington), Ph.D. (University of Missouri, Columbia).

Sheila Honig Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=honig); lecturer in English; B.A., M.A. (University of Missouri, Columbia).

Daniel Freeman Jaffe professor emeritus of English; B.A. (Rutgers University); M.A. (University of Michigan).

Cynthia Jones Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=jones); lecturer in English & Classics; B.A., M.A., Ph.D. (University of Missouri-Kansas City).

Daniel Mahala Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=mahala); associate professor of English; B.A. (State University of New York at Binghamton); M.A. (New York University), D.A. (State University of New York at Albany).

James C. McKinley Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=mckinley); professor emeritus of English; B.J., M.A., Ph.D. (University of Missouri, Columbia).

James McKusick Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=mckusick); professor of English; B.A. (Dartmouth College); M.A. (Yale University); M.Phil. (Yale University); Ph.D. (Yale University).

Jennifer Phegley Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=phegley); professor of English; B.A. (Southwest Texas State University); M.A., Ph.D. (Ohio State University).

Michael Pritchett Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=pritchett); associate professor of English; B.J. (University of Missouri, Columbia); M.F.A (Warren Wilson College).

David Ray professor emeritus of English; B.A., M.A. (University of Chicago).

James A. Reeds associate professor emeritus of English and linguistics; B.A., M.A. (University of Iowa); A.M., Ph.D. (University of Michigan).

Jeffrey A. Rydberg-Cox Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=rydberg-cox); curators’ distinguished professor of English and classics; B.A. (Colorado College); M.A., Ph.D. (University of Chicago).

Anthony Shiu Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=shiu); associate professor of English; B.A. (Ohio University); M.A. (University of Vermont), Ph.D. (Michigan State University).

Robert Stewart Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=stewart); associate research professor of English and editor of New Letters; B.A. (University of Missouri-St. Louis), M.A. (University of Missouri-Kansas City).

Thomas Stroik Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=stroik); curators’ distinguished professor emeritus of English; B.A., M.A., Ph.D. (University of Wisconsin-Madison).

Whitney Terrell Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=terrell); assistant professor of English; B.A., (Princeton University); M.F.A. (University of Iowa).

Linda E. Voigts Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=voigts); curators’ distinguished professor emerita of English; B.A. (William Jewell College); M.A. (University of Missouri-Kansas City); Ph.D. (University of Missouri, Columbia).

David H. Weinglass professor emeritus of English; B.A., M.A. (St. Catherine's College-University of Cambridge); Ph.D. (Kansas State University).

Robert F. Willson, Jr. Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=willson); professor emeritus of English; B.A. (Wayne State University); M.A., Ph.D. (University of Wisconsin).

Jacqueline Wood Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=wood); associate professor of English & Black Studies; B.A. (Ohio Wesleyan University); M.A. (Florida Atlantic University); Ph.D. (University of Florida).

1 Associate or Adjunct Graduate Faculty
2 Members of UMKC Graduate Faculty
3 Members of UMKC Doctoral Faculty
Undergraduate
Bachelor of Arts: English

To major in English is to devote oneself to the study of culture, past and present; to books, their readers, writers, and publishers; to critical thinking and the interpretation of what it means to be human; to language and the communication of ideas in both written and spoken form. An education in English allows for a command of the written and spoken word. It is this command that allows those that have pursued a degree in English to find success in a variety of arenas through their ability to persuade and interpret, clarify ideas, think independently and creatively, and their overall commitment to the cultural repository that an English degree offers.

Students who choose to major in English Literature and Language develop their abilities to read and analyze texts written in the English language. They study British and American literature of the past and present and learn to view texts through a variety of interpretive lenses. English majors also develop their abilities as flexible, effective writers, capable of moving among a variety of genres, including creative and expository writing.

Within the 36-credit hour program, English majors take a core set of courses, including survey courses on the history of British and American literature, a course devoted to Shakespeare, and courses in linguistics and rhetoric. Beyond this core, students may choose to emphasize in the study of literature, rhetoric, creative writing, or classical, medieval, and early modern literature. In their final year, all students select from a menu of capstone options, including a senior thesis (recommended for students interested in graduate school), a seminar on teaching writing (recommended for students seeking certification to teach in secondary schools), or one of many upper-level seminars.

Students majoring in English may also consider a minor in another area of English studies, provided that there be no more than 9 credit hours of overlap between the major/emphasis and the minor.

Undergraduate Admission Requirements
Preparation
Transfer students should enter the English major with soundly developed writing and reading skills and a general familiarity with the major authors and literary movements of English and American literature. Transfer students should meet with the Director of Undergraduate Studies immediately upon admittance to discuss requirements and any possible transfer credits towards the major. With the approval of the Director of Undergraduate Studies, the Department accepts up to 18 hours of transfer credits in English for courses fulfilling major requirements.

Undergraduate Programs
Bachelor of Arts: English (p. 246)
Bachelor of Arts: English Creative Writing Emphasis (p. 252)
Bachelor of Arts: English Classical, Medieval, & Early Modern Literature Emphasis (p. 258)
Bachelor of Arts: English Language and Rhetoric Emphasis (p. 262)
Teacher Certification in English (p. 268)
Minor in Creative Writing (p. 269)
Minor in Language and Literature (p. 272)
Minor in Manuscript, Print Culture, and Editing (p. 274)
Minor in Writing (p. 276)

Graduate
Graduate Degrees:
- Master of Arts: English (p. 277)
- Master of Fine Arts: Creative Writing and Media Arts (p. 282)
- Interdisciplinary Ph.D. in English (p. 299)

Assistantships
The Department of English offers a limited number of Graduate Teaching Assistantships on a competitive basis. Applications for Graduate Teaching Assistantships are considered in January for the following fall semester. All Graduate Teaching Assistants are expected to enroll in at least six hours per semester. Graduate Teaching Assistantships may be awarded to students who demonstrate readiness to become teachers in first- and second-year writing courses. Graduate Teaching Assistants must undergo a pre-semester orientation and attend mentoring meetings twice monthly with the Director of Composition and fellow graduate teachers. First-semester GTAs are also required to complete successfully ENGLISH 5519.
Courses

ENGLISH 100B Basic Speaking and Listening for Non-Native Speakers Credits: 1-3
The study and practice of speaking and listening for survival-level social functions in English. Frequent exercises focus on the production of isolated words and phrases in areas of need, and on the development of survival level oral/aural skills for beginning ESL students. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 100C Basic Reading and Vocabulary for Non-Native Speakers Credits: 1-3
The study and practice of survival-level reading English vocabulary in context. Frequent exercises focus on basic reading comprehension related to familiar topics and situations, and the introduction of dictionary skills. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 100D Basic Writing for Non-Native Speakers Credits: 1-3
The study and practice of survival level writing skills including spelling, capitalization and some punctuation. Introduction of basic sentence structures and completion of simple standard forms of written English. Frequent exercises focus on survival level writing such as words and basic phrases in the present tense. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 100G Basic Grammar for Non-Native Speakers Credits: 1-3
The study and practice of survival level sentence structures and words. Frequent exercises focus on basic level sentences, questions, directions, and descriptions in the present tense that relate to students’ immediate surroundings and some life skills areas. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 100S Special Topics in English as a Second Language Credits: 1-6
A course designed to address the specific needs of an individual student or group of students studying English as a Second Language. In addition to targeting English skills, the course may address topics or skills which are not covered in the standard Academic English curriculum of the Applied Language Institute. This course will accommodate individual students or groups of students studying at the Institute for periods of time other than the standard semester length. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 100T TOEFL Preparation Credits: 1-3
This course will prepare students to take the TOEFL (Test of English as a Foreign Language), in either the paper-based (PBT) or internet-based (iBT) form, and/or to improve their scores from previous attempts. Exercises focus on developing the skills and strategies necessary for navigating TOEFL questions while continuing to develop the general English language skills that support success on the TOEFL. The course will provide students with a personal awareness of strengths and weaknesses so they may focus their test preparation work in and outside of class. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 101B Academic Speaking and Listening for Non-Native Speakers I Credits: 1-3
The study and practice of speaking and listening for basic social functions in English. Exercises include the practice of basic descriptions and the development of oral/aural skills for beginning ESL students. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 101C Academic Reading and Vocabulary for Non-Native Speakers I Credits: 1-3
The study and practice of reading with basic English vocabulary in context. Exercises focus on reading comprehension, identifying the topics of short readings, and the introduction of basic dictionary skills. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 101D Academic Writing for Non-Native Speakers I Credits: 1-3
The study and practice of basic writing skills including handwriting, spelling, capitalization and punctuation. Frequent short exercises emphasize basic sentence structure, biographical description, and completion of standard forms. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 101G Academic Grammar for Non-Native Speakers I Credits: 1-3
The study and practical application of basic sentence structure and word parts. Frequent exercises emphasize use and understanding of simple sentences, questions, directions, and descriptions in the present and past tenses. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 102B Academic Speaking and Listening for Non-Native Speakers II Credits: 1-3
The study and practice of speech in environments such as the classroom, work, and simple social occasions. Exercises focus on student's ability to distinguish sounds and to produce them correctly in the context of a sentence and to listen for specific information. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 102C Academic Reading and Vocabulary for Non-Native Speakers II Credits: 1-3
The study and practice of reading narrative and expository texts and standard forms. Exercises focus on the development of vocabulary and introduction of reading techniques such as identification of topics and main ideas, skimming, scanning, prediction, and inference. This course carries no credit toward graduation in the College of Arts and Science.

ENGLISH 102D Academic Writing for Non-Native Speakers II Credits: 1-3
The study and practice of techniques for writing short paragraphs in English. Frequent exercises emphasize various forms of paragraph organization and the improvement of punctuation and mechanical skills in writing. This course carries no credit toward graduation in the College of Arts and Sciences.
ENGLISH 102G Academic Grammar for Non-Native Speakers II Credits: 1-3
The study and practical application of basic sentence structures, including future and irregular past tense constructions. Frequent exercises emphasize use and understanding of comparatives, questions, and compound nouns and verbs. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 103B Academic Speaking and Listening for Non-Native Speakers III Credits: 1-3
The study and practice of listening for and producing speech in the past, present and future tenses. Exercises introduce note-taking techniques and focus on the ability to hear and express abstract ideas. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 103C Academic Reading and Vocabulary for Non-Native Speakers III Credits: 1-3
The study and practice of longer reading passages of various rhetorical styles. Exercises focus on improvement of reading speed and the development of vocabulary and comprehension through complex inferences. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 103D Academic Writing for Non-Native Speakers III Credits: 1-3
The study and practice of writing multi-paragraph academic essays. Frequent exercises emphasize point-of-view, process writing, and a variety of rhetorical styles. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 103G Academic Grammar for Non-Native Speakers III Credits: 1-3
The study and practical application of complex sentence structures, including perfect and perfect progressive tenses. Frequent exercises emphasize use and understanding of passive voice, gerunds and infinitives, articles, conditionals, and modals. The course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 104B Academic Speaking and Listening for Non-Native Speakers IV Credits: 1-3
The study and practice of standard English, particularly in the college classroom. Exercises include training in academic lecture comprehension and note-taking as well as formal (classroom presentation) and informal (conversation) English speaking. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 104C Advanced Academic English Reading For Non-Native Speakers IV Credits: 1-3
This course focuses on preparing students to deal effectively with sophisticated academic reading materials by guiding them in the development of a conscious and reflective approach toward reading. It emphasizes advanced reading skills of interpretation, inference, critical analysis, evaluation and application. There will be frequent exercises addressing the acquisition and practice of study skills and collaborative academic work.

ENGLISH 104D Academic Writing for Non-Native Speakers IV Credits: 1-3
The study and practice of rhetorical principles in standard English prose. Frequent writing exercises emphasize critical thinking and research skills as well as fluency and accuracy in academic writing. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 104G Advanced Academic English Grammar For Non-Native Speakers IV Credits: 1-3
This course focuses on the analytical understanding and application of English grammar. Students will be expected to observe usage patterns of the English language in a combination of both normative and prescriptive grammars appropriate for academic English application. There will be frequent exercises emphasizing mastery of complex grammar structures including all verb tenses, dependent clauses, modals, and unreal conditionals, and of the relationship between ideas and the construction of sentences in academic discourse.

ENGLISH 105B Advanced Speaking and Listening Topics for Non-Native Speakers Credits: 1-3
This course focuses on developing high-level fluency in English listening and speaking through critical awareness of social language use. Students will work toward greater speaking and listening fluency and adaptability through the practice of skills involving purpose, audience, speech norms and context.

ENGLISH 105C Advanced Reading and Vocabulary Topics for Non-Native Speakers Credits: 1-3
In this course, advanced ESL readers will develop the core critical reading skills required for success in academics by examining and applying those skills in the context of authentic college-level readings representing a wide variety of genres and modes. Readings will include extensive college textbook passages, newspaper articles, opinion sections, academic essays and interpretive reading of literature.

ENGLISH 105D Advanced Writing Topics for Non-Native Speakers Credits: 1-3
This course engages advanced ESL and EFL writers to develop greater dexterity of expression in composition. In addition to reinforcing core rhetorical skills, grammar and writing mechanics, students will explore new rhetorical styles such as personal responses, autobiographical essays, and writing about literature. Extensive reading complements the writing discussion and practice with pieces including personal and academic essays, narrative, magazine journalism and fiction.

ENGLISH 105G Advanced Grammar Topics for Non-Native Speakers Credits: 1-3
In this course, students will pursue an in-depth comprehension of English grammar, with a strong focus on increasing fluency in the English language through a critical analysis of connotation and pragmatics and their role in language fluency. Contextual readings, film and native conversation passages will complement the grammar discussions and practice, engaging students to move beyond a literal understanding based on syntax and semantics to a more contextual awareness of English form and function.
ENGLISH 110 English I: Introduction To Academic Prose Credits: 3
This course introduces students to college-level reading, writing, and discourse analysis: it engages students in the analysis and creation of texts that reveal multiple perspectives about specific rhetorical situations and cultural issues. In addition to learning how to revise by analyzing their own writing, students will learn to edit their own work and use proper academic documentation.

ENGLISH 119 Myth and Literature Credits: 3
A study of classical myth including readings from Homer to Ovid, analysis of selected myths in later literature, art, and music, and a study of contemporary definitions and approaches to myth.

ENGLISH 120 Literary Monstrosities Credits: 3
This course explores representations of monsters in literature. Students are introduced to different ways of thinking about monstrosities from a range of cultural and historical perspectives, as well as through a variety of materials in order to approach this question from an interdisciplinary perspective.

ENGLISH 123 True Lives: Autobiographical Arts and Acts Credits: 3
This course explores life writing and other autobiographical practices. Students will read and analyze a variety of life writing forms and think critically about life writing in various cultural, historical, and social contexts. They will also examine autobiography as a form of self-expression, as an articulation of personal and social values, as a public art, and as a way to study human experience in different contexts. Genres may include memoir, autobiography, diaries, etc., at the discretion of the instructor.

ENGLISH 124 Writing About Literature Credits: 3
This course is designed to be taken either prior to or concurrent with a student's first literature course. It introduces students to literary criticism in its broadest, most generic sense, as a stylized response to reading. Students in the course will be introduced to different approaches to writing about literature, to methods of generating ideas, and focusing and developing a topic.

**Prerequisites:** ENGLISH 110.

ENGLISH 126 Popular Literature Credits: 3
This course is designed to help students develop a fuller understanding of the human condition by exploring a range of accessible, bestselling fiction and non-fiction from a variety of periods and places, historic and contemporary. The course may include popular stories, songs and ballads, the scripts of blockbuster plays and films, best-selling novels, and widely distributed nonfictional prose.

ENGLISH 130 Introduction to Human Language Credits: 3
This course examines the biological and cultural properties of human language and it provides a foundation for understanding the role language plays in personal lives, in social institutions, and in the literary arts.

ENGLISH 141 Women and Literary Culture/The Heroine in Literature Credits: 3
This course explores the role of the heroine in literature. Students will examine how the heroine is crafted by a variety of writers and think critically about the role of the heroine in various cultural, historical, and social contexts. Genres may include science fiction/fantasy, mystery, romance, etc. at the discretion of the instructor.

ENGLISH 200 Introduction To Undergraduate Study In English Credits: 3
An investigation of reading, writing, and research practices associated with studies in English. Students will learn about multiple forms, genres, and critical approaches, as well as encounter texts from various historical periods and places. Required of all English majors before enrolling in 400-level ENGLISH courses.

ENGLISH 203 Introduction to Journalism Credits: 3
Introduction to the styles and techniques of reporting and writing basic news through assignments in straight news, features and in-depth stories. Exposure to the history and principles of American journalism. Practical application in writing news and news feature articles.

ENGLISH 207 World Literature in English Credits: 3
This course helps students develop a fuller understanding of the human condition by exploring accessible literary texts in English by non Euro-American writers. The course provides historical, economic and political contexts and is designed for students who enjoy learning about global cultures by reading and discussing a diverse range of bestselling literature.

ENGLISH 207 - MOTR LITR 200: World Literature
ENGLISH 213 Introduction To Drama Credits: 2-3
Beginning with an intensive study of a few plays analyzed to elicit general principles, the course moves on to consider several representative examples of each of the major periods and types of Western drama, from the Greeks to the present.

ENGLISH 214 Introduction To Fiction Credits: 3
Students will be introduced to the study of fiction as a literary art form. Students will continue to develop their understanding of fiction-writing in preparation for more advanced courses in literature and creative writing. Coursework will focus on close reading of short and long forms of fiction selected from a range of literary periods and world literature. Students are expected to interpret and analyze various forms of fiction and write critically about the role of fiction as a form of cultural discourse.

ENGLISH 214 - MOTR LITR 100: Introduction to Literature

ENGLISH 215 Introduction To Poetry Credits: 3
An introduction to the study of poetry for students desiring a basic course either to develop a greater appreciation of poetry or to prepare for more advanced courses in literature or creative writing. Class discussions will focus on close readings of poems and analysis of poetic techniques. Writing assignments will complement reading and class discussion and will enable students to develop their own critical and creative skills.

ENGLISH 215 - MOTR LITR 100: Introduction to Literature

ENGLISH 216 The Craft of Creative Writing Credits: 3
This course introduces students to the key techniques that writers of imaginative literature use. Students will develop skills at writing and reading in multiple genres.
Prerequisites: DISC 100.

ENGLISH 225 English II: Intermediate Academic Prose Credits: 3
This course extends the work of ENGLISH 110 with an additional emphasis on research. Each section of ENGLISH 225 uses a combination of book-length and shorter texts on focus on specific historical and/or cultural issues. As they learn to participate in scholarly conversations, students will find and evaluate library and internet sources. As with ENGLISH 110, this course emphasizes revision, editing, and proper academic documentation. ENGLISH 225 or equivalent is a prerequisite for all 300 and 400 level ENGLISH courses.
Prerequisites: ENGLISH 110 and sophomore standing.

ENGLISH 225 - MOTR ENGL 200: Composition II

ENGLISH 241 Women And Literary Culture: Introduction Credits: 3
The course offers an introduction to women as producers and consumers of literature. Students will become acquainted with women writers, explore women's reading practices, and interrogate the issues that have surrounded women's participation in cultural arenas.

ENGLISH 242 Women Writing/Women Reading Credits: 3
This course investigates women as producers and consumers of literature. Students will become acquainted with diverse women writers, explore women's reading practices, and interrogate the cultural, historical, and social contexts that influence women's writing and reading.
Prerequisites: Anchor I and DISC 100.

ENGLISH 242 - MOTR LITR 106: Women's Literature

ENGLISH 250 Introduction to Language Acquisition and Diversity Credits: 3
Investigation of the basic principles of first and second language acquisition. Topics addressed include language competency, socio-cultural factors in language, dialects, acquisitional principles, and language diversity. Students will take part in monitored classroom observations in public schools, and will critically analyze how the topics addressed in class apply to real life and to teaching situations.

ENGLISH 270 Writing Tutor Training Seminar Credits: 3
This course covers the basics of serving as a tutor for writers. Students acquire hands-on experience in consulting with writers at all stages of the writing process, including invention work, drafting, revising, documenting, and editing. Students will also become conversant in theories of peer tutoring and research on Writing Centers.
Prerequisites: ENGLISH 110.
ENGLISH 273 Science Fiction Credits: 3
This course focuses on a range of science fiction texts from a variety of periods and traditions. Students will examine the relationship between
different types of science fiction from various periods and the related social, economic, and political contexts.
Prerequisites: DISC 100.

ENGLISH 278 Asian American Literature Credits: 3
This course examines literary and cultural texts produced by Asian Americans from the nineteenth century to the present. Texts will be drawn from
a variety of genres and from several Asian American groups in order to examine how Asian American literature engages, challenges, revises, and
reinvents American literary traditions. The course will identify and explore specific cultural and political issues that have shaped the writings, including
trans-nationalism, immigration, racial identity, group identity, and community. Authors may include Carlos Bulosan, Maxine Hong Kingston, John
Okada, Bienvenido Santos, and Hisaye Yamamoto.
Prerequisites: DISC 100.

Co-requisites: DISC 200.

ENGLISH 278 - MOTR LITR 105: Multicultural Literature

ENGLISH 300CB Women in the Ancient World Credits: 3
This course focuses on the history, representation, literature, social lives, and political roles of women in ancient civilization including Egypt,
Mesopotamia, the Biblical World, Greece, and Rome. It integrates methodologies from history, art history and archaeology, literary studies, and
women's studies.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 300CD American Social Film: Silver Screen & American Dream Credits: 3
This course will combine American social history and film history in the sound era. Using Hollywood entertainment films, the course will look at
Hollywood as an indicator of social, political and economic conditions in the United States since the 1930s. The main topics are representations of the
American dream and nightmare, poverty and affluence, success and failure. This course is offered as a cluster with HISTORY 400CP.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 300CE Radical Changes Since 1945 Credits: 3
This course will focus on modernism, post-modernism and expressionism in the visual arts and literature since World War II. Common lectures will
address intellectual movements such as existentialism and formalism and cultural development such as the increased impact of technology and
mass media in contemporary society. By focusing on these movements, the cluster course hopes to provide an integrated view of the literature and
visual arts of the period and to draw upon analogous developments in contemporary architecture, music, philosophy and film.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 300CN Terrorism, Civil War And Trauma Credits: 3
This interdisciplinary course examines the modern experience of terrorism and civil war in the light of art, film, history, literature, and philosophy. It
explores a number of traumatic events, historic and contemporary, challenging us to think about such contemporary issues as violence and identity
formation, civil rights and state-sponsored terrorism, pacifism and patriotism, resistance and collaboration, fundamentalism and fascism, neo-colonialism and anti-imperialism.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 300CW Critical Issues in Women's & Gender Studies Credits: 3
This class is an interdisciplinary upper-level course that will examine critical issues in women's and gender studies by focusing on the intersections
of gender, race, class, sexuality, and social context. Through their study of these intersections, students will be more sensitive to the impact of social
structures on gender and the experiences of women and men.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 300CX Empire Credits: 3
This is an interdisciplinary, team-taught course designed to teach students ways to think about the complexities of human cultures, past and present,
helping them examine how imperialism continues to shape contemporary understandings of personal, institutional, and cultural identities (both of
selves and others). The course engages students in the analysis of global cultures with a focus on the economic, environmental, political and social
consequences of specific imperial regimes and the ongoing impact of these regimes on particular groups that continue to live with the legacies of
empire.
Prerequisites: ENGLISH 225 OR DISC 200.

ENGLISH 300CY Ancient World in Cinema Credits: 3
This course will explore the tradition of depicting the ancient Mediterranean world in film from the early silent era to the present. Topics to be covered
include the ways that filmmakers respond to literary and historical sources from the ancient world, interact with the artistic tradition of films about the
ancient world, the relation of these films to other works by the same creative personnel (directors, actors, writers, producers, etc.), and the political and
cultural contexts in which the films were released.
ENGLISH 300F SS: Academic English/International Grad Teaching Assistants Credits: 3
The study and practice of standard spoken English combined with the study and practice of classroom teaching techniques. Exercises focusing on improvement of pronunciation, and formal (classroom presentation) and informal (conversation) English speaking are combined with techniques for lecture organization, strategies for clear content presentation, and with analysis of the American post-secondary educational culture. This course is designed for prospective International Graduate Teaching Assistants who need to improve their English communication skills and obtain an understanding of American educational culture.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 301WI Writing and The Academy Credits: 3
This course examines social and ethical issues raised by academic reading and writing. While some attention is paid to the formal aspects of academic prose within specific disciplines, the main emphasis of the course is on the cultural consequences of the different ways that academic knowledge is created and taught. In addition to studying the language and structure of academic reading and writing, the course explores the various rhetorics of the academy in terms of a broad range of subjects including economics, gender, education, history, and myth. This course satisfies the junior-level writing requirement and counts towards the writing minor.
Prerequisites: ENGLISH 110, ENGLISH 225 or DISC 200, RooWriter.

ENGLISH 304WI Workplace Writing Credits: 3
This writing intensive course focuses on the rhetorical principles of workplace communication, providing students with opportunities to analyze complex rhetorical situations, to study various workplace genres, and to compose texts that meet the needs of diverse stakeholders.
Prerequisites: ENGLISH 225 or DISC 200, RooWriter.

ENGLISH 305WI Theory and Practice Of Composition Credits: 3
A course in expository writing that will include reading on composition theory and the nature of literacy. Frequent short essays and a long paper.
Prerequisites: ENGLISH 110, ENGLISH 225 or DISC 200, RooWriter.

ENGLISH 306WI Advanced Composition Credits: 3
Further study of writing for those who wish to continue the study beyond the two semesters of composition. Emphasis will be placed on translating critical thinking into effective writing. (NOTE: Students may not receive credit for more than one of the following: ENGLISH 305, ENGLISH 306, ENGLISH 403). Required of business and public administration majors.
Prerequisites: ENGLISH 110, ENGLISH 225 or DISC 200, RooWriter.

ENGLISH 307WI Language, Literacy, Power Credits: 3
This course uses discourse analysis to investigate language and literacy. Students will explore how the discourses of institutional and cultural identities act as instruments of power and legitimacy.
Prerequisites: ENGLISH 110, ENGLISH 225 or DISC 200, RooWriter.

ENGLISH 308 Rhetorics of New Media Credits: 3
This course will focus on the rhetorical study of new media texts (such as hypertext, networked multimedia, multimedia art and performance, virtual spaces, and so on) and theories of new media. The course will consider the rhetorical possibilities and constraints of new media and critically examine their impact on democratic discourse and literacy in the public sphere. Specialized knowledge of multimedia equipment and software is neither expected nor required.
Prerequisites: ENGLISH 110, ENGLISH 225 or DISC 200.

ENGLISH 309WI Rhetorics of Public Memory Credits: 3
This course explores how museums and other cultural institutions function as rhetorical agents in creating and preserving public memory. Students will explore how processes of collection, arrangement, and visual display operate as modes of persuasion and make arguments about civic identities and community values.
Prerequisites: ENGLISH 225 or DISC 200, RooWriter.

ENGLISH 310 Introduction To Linguistics/Language Science Credits: 3
This course is a comprehensive introduction to the theory, methodology, and applications of the science of language. It examines properties of human language, covers all branches of language science, and provides a foundation for a critical understanding of language issues. Required for ENGLISH 470; recommended for ENGLISH 320 and ENGLISH 330.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 311 American Literature I Credits: 3
A survey of American literature and culture from its beginnings to 1865. This course will cover a range of authors, several genres, and culture forms, which may include fiction, poetry, drama, autobiography, oral, contact and/or slave narratives, folklore, and songs.
Prerequisites: ENGLISH 225 or DISC 200.
ENGLISH 312 Creative Writing I Fiction Credits: 3
A course centered on the short story. Emphasis is placed on three areas: general principles governing the writing of fiction; practice in short fiction (primarily the short story, but including the novella); criticism; and technical skills (including editing and rewriting).
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 313WI Reporting Credits: 3
A seminar of practical application in advanced reporting. Assignments to cover news events and to pursue in-depth news reports on the campus and off.
Prerequisites: COMM-ST 203 or ENGLISH 203; RooWriter.

ENGLISH 315 Creative Writing Poetry Credits: 3
Writing and rewriting poems, with discussion of techniques needed to produce desired effects. Analysis and evaluation of student work. Examination of technical means utilized in selected poems by accomplished poets.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 316WI Literary Nonfiction Credits: 3
Literary Nonfiction is a writing intensive course in the reading and writing of nonfiction prose as a literary art. We'll survey the historical development of literary nonfiction (especially the essay), sample contemporary authors of the genre, write critical commentary on works we read, and compose personal essays of our own. The course is not exclusively a literary seminar nor a creative writing workshop, but seeks to mix and make connections between these modes, in the tradition of the essay itself.
Prerequisites: ENGLISH 225 or DISC 200, RooWriter.

ENGLISH 317 British Literature I Credits: 3
A survey of British Literature and culture from its beginnings to the 18th century, including works by Chaucer and Milton.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 317 - MOTR LITR 102: British Literature

ENGLISH 318 Bible As Literature Credits: 3
A critical study of the major portions of the Old and New Testaments and the Apocrypha, with special attention to the development of literature from oral tradition, the literary genres, themes and archetypes represented in the collection, and the diction and style which have influenced later literature. Consideration also of the relation of Biblical literature to the historical, religious, and cultural milieu of the ancient Near East.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 320 Structure Of English Credits: 3
Not a remedial grammar course. Methods of linguistic inquiry and grammatical description. Study of traditional and modern schools of syntax, especially transformational grammar. Practice describing the structure of sentences. Application to the teaching of grammar in high schools.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 321 American Literature II Credits: 3
A survey of American literature and culture from 1865 to the present. This course will cover a range of authors, several genres, and culture forms, which may include fiction, poetry, drama, autobiography, essay, lyrics, and film.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 321 - MOTR LITR 101: American Literature

ENGLISH 323 Shakespeare Credits: 3
An intensive critical study of William Shakespeare's writings in various contexts (historical, social, political, literary, contemporary, for example). Readings will encompass at least eight plays and will include at least one comedy, history, tragedy, and romance. Required of all English majors.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 325 Arthurian Legends Credits: 3
Focusing on writers such as Marie de France, Chretien de Troyes, Sir Thomas Malory, Alfred, Lord Tennyson, Sara Teasdale, Bernard Malamud, and Marion Zimmer Bradley, this course examines the legend of King Arthur and his Round Table as a recurring myth, repeatedly manifested in time through literature, art, history, music, and film.
Prerequisites: ENGLISH 225 or DISC 200.
ENGLISH 326 Modern And Contemporary Irish Literature Credits: 3
This course examines a range of texts written by Irish-born writers from the end of the nineteenth century on. While it is likely the course will include texts by the most famous Irish writers, such as Yeats, Joyce, Beckett, O’Brien, Heaney, and Friel, course materials will vary from semester to semester and may focus on a specific genre, historical period, or area of interest.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 327 British Literature II Credits: 3
A survey of British Literature and culture from the late 18th century to the present. This course will cover a range of authors and genres, including at least one novel.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 327 - MOTR LITR 102: British Literature

ENGLISH 330 History Of The English Language Credits: 3
The study of English beginning with the Indo-European language family up to and including varieties of English spoken around the world today. Both outer history and the inner history of phonology, morphology, syntax, and lexicon will be addressed.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 331 African American Literature I Credits: 3
This course provides a survey of African American literature from its beginnings to the Harlem Renaissance of the 1920's and 1930's. Areas of interest will include abolitionist literature (especially Slave Narratives), turn-of-the-century literature and the Harlem Renaissance. This course will examine any or all of the following literary forms: fiction, poetry, drama, autobiography and essay. It will view African American literature in its historical and cultural contexts.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 331 - MOTR LITR 105: Multicultural Literature

ENGLISH 332WI African American Novel Credits: 3
This course will examine the African American Novel in the 19th and 20th centuries. The novels will be examined in their historical and cultural contexts.
Prerequisites: ENGLISH 225 (or equivalent) or DISC 200, RooWriter.

ENGLISH 333 African American Literature II Credits: 3
A survey of African American literature from the end of the Harlem Renaissance to the present, covering a range of authors, texts, and contexts.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 336 Contemporary American Literature Credits: 3
This course focuses on contemporary American literature, concentrating on literary and cultural change. Topics, genres, and authors discussed will vary each semester.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 337 Introduction to American Literary and Cultural Studies Credits: 3
This course focuses on American literary and cultural production in an interdisciplinary manner. It explores how social, political, and economic conditions interact with the fields of art, film, history, and literature from colonial times to the present.

ENGLISH 339 Introduction to Screenwriting Credits: 3
An introduction to the form and language of the motion picture screenplays. Students create a blueprint for a movie and examine visual storytelling in-depth, including basic dramatic structure, scene and sequence construction and dialogue. Students will master the industry screenplay format, adapt a short story for the screen, and learn to receive feedback in small groups.
Prerequisites: DISC 200 or ENGLISH 225.

ENGLISH 340AWI Classical Literature in Translation Credits: 3
This course will focus on representative authors and works from the Greek and Roman Classical periods, such as Homer, Sophocles, Euripides, Aeschylus, Aristophanes, Plato, the Greek Lyrics, Virgil, Horace, Juvenal, Ovid and Plautus.
Prerequisites: RooWriter.
ENGLISH 342WI Women And Rhetoric Credits: 3
A study of the position of women within the traditions of western rhetoric. Students will examine the rhetorical practices of women as they pursue both public and private goals. Christine de Pizan, Sor Juana Ines de la Cruz, Hannah More, Maria Stewart, Frances Willard, Ida Wells-Barnett, Meridel Le Sueur, and Gloria Anzaldua are among the female rhetorians who may be studied in this course.
Prerequisites: ENGLISH 225 or DISC 200, RooWriter.

ENGLISH 344WI Women & Literary Culture: Genre Focus Credits: 3
A study of women writers that focuses on genre, i.e., texts that share a common set of conventions. The course will explore the conventions associated with a particular genre in various historical periods and consider the ways in which gender and genre intersect in shaping texts and their interpretation.
Prerequisites: ENGLISH 225 or DISC 200, RooWriter.

ENGLISH 345WI Women And Literary Culture: Historical Focus Credits: 3
A study of women's literary culture in a specific historical period either as broadly defined as Medieval or Renaissance or as narrowly defined as a decade or movement (e.g., 1960's, abolitionist movement). This course includes women writers across multiple boundaries (e.g., national, generic, racial, sexual, socio-economic). Content will change depending on the instructor.
Prerequisites: ENGLISH 225 or DISC 200, RooWriter.

ENGLISH 350 The 18th Century Novel Credits: 3
A detailed examination of the development of the novel in the 18th century. The course emphasizes the evolution of the novel from such predecessors as rogue literature, the picaresque story and the romance, due to changing social realities. The novelists studied may include Austen, Behn, Fielding, Godwin, Haywood, Richardson, Smollett, and Sterne.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 351 Special Readings Credits: 1-3
Readings in a period, genre or theme to be selected by the instructor with attention to the needs of students who are interested in literary topics not covered in regular offerings. Proposals for a course in such readings require the approval of the department.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 351A Special Readings: Detective Fiction Credits: 3
This course will focus on a specific period, sub-genre, or theme related to Detective fiction.
Prerequisites: Anchor II, DISC 200.

ENGLISH 355 The Novel Before 1900 Credits: 3
Intensive attention to novels in English written before 1900, which may include comparative or analytical studies of genre; critical reception of novels; serialization, gender issues; authors and editors; and valuation.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 356 Studies in Poetry Credits: 3
An intensive study of poetry through the examination of a specific topic or the works of particular poets, for instance: Love, Seduction, and Betrayal; Form and Change; Death, Grief, and Consolation; Whitman, Dickinson, and the Soul; Sacred Poetry, Poetry and Metaphysics; The Long Poem; The Comic Poem; Sonnet, Sonnet Sequence and the Lyric; The Voyage; Nature, Self, and the Romantic Poet.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 360 The Modern Novel Credits: 3
This course focuses on selected novelists between 1900 and 1945 and is organized around particular literary themes, sub-genres, or contemporary issues.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 365 Contemporary Novel Credits: 3
This course focuses on selected novelists since 1945 and is organized around particular literary themes, sub-genres, or contemporary issues.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 365WI Contemporary Novel Credits: 3
This course focuses on selected novelists since 1945 and is organized around particular literary themes, sub-genres, or contemporary issues.
Prerequisites: ENGLISH 225 or DISC 200, RooWriter.

ENGLISH 367 Introduction to Latinx Literature Credits: 3
An introduction to the literary production by US Latinx, the course introduces students to writings by authors from various Latinidades—such as Chicana/Chicano, Puerto Rican, Chilean American, Cuban American, Dominican American, and Mexican American—in multiple genres, including poetry, fiction, drama, personal essay, and film.
Prerequisites: ENGLISH 225 or DISC 200.
ENGLISH 376 Concepts of the Hero in Ancient Literature and World Cinema Credits: 3
This course explores how concepts of heroism are related to the principles of values and civic duty in a wide range of ancient world cultures and contemporary world cinemas. Students will also demonstrate an understanding of how these values impact individual heroes and their interactions with others in their society.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 378 Asian American Literature Credits: 3
This course examines literary and cultural texts produced by Asian Americans from the nineteenth century to the present. Texts will be drawn from a variety of genres and from several Asian American groups in order to examine how Asian American literature engages, challenges, revises, and reinvents American literary traditions. The course will identify and explore specific cultural and political issues that have shaped the writings, including transnationalism, immigration, racial identity, group identity, and community. Authors may include Carlos Bulosan, Maxine Hong Kingston, John Okada, Bienvendo Santos, and Hisaye Yamamoto.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 404 Old English Credits: 3
This course is a study of Old English, its grammar, its poetic style, and its literature, both poetry and prose.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 405 Magazine Editing Credits: 3
A course combining academic study of editorial management, publishing operations and language skills, with "hands on" experience in article evaluation, editing, magazine production, and legal matters such as copyright and libel. Class work concentrates on authentic and effective language use, with attention given to copy editing, grammar, typography, printing processes, financing and distribution for commercial and small-press publications.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 408 Harlem Renaissance Credits: 3
This course examines the period from 1920 to 1940, known as the Harlem Renaissance, a time of unprecedented literary and cultural creativity by Black artists. This course explores a variety of cultural productions, not only traditional forms of literature such as novels, short stories, plays and poetry, but also nonliterary objects of study such as painting, sculpture, and music.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 410 Black Women Writers Credits: 3
This course explores the writings of African American Women Writers. The course examines how these writers have interacted with and often revised stereotypical representations of African American womanhood typically found within canonical and African American male literatures. The course will examine literature (which might include fiction, poetry, autobiography, and drama) of the nineteenth and twentieth centuries; the majority of the works will be by modern and contemporary authors such as Nella Larsen, Zora Neale Hurston, Toni Morrison, and Terry McMillan. By placing the works in this sort of cultural and historical context, it will be possible to examine the unique tradition of African American women's writing as well as individual texts.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 412 Chaucer Credits: 3
Readings from Chaucer's most important works, especially "The Canterbury Tales" and "Troilus and Criseyde" with emphasis on them as types of medieval genres and on the Middle English language.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 317.

ENGLISH 413 Renaissance Literature I Credits: 3
English literature from the time of Wyatt and Surrey to the beginning of the 17th century, including the works of Spenser, Marlowe, Sidney, Shakespeare and others.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 317.

ENGLISH 414 Milton Credits: 3
A study of Milton's prose and poetry, with special attention to "Paradise Lost".
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 317.

ENGLISH 415 Restoration And Early 18th-Century British Literature Credits: 3
British literature from the late 17th century to the mid 18th century. Selected writers may include Addison and Steele, Behn, Congreve, Defoe, Dryden, Finch, Milton, Pope, Rochester, Swift, and Wortley Montagu.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 317.

ENGLISH 416 The Romantic Period Credits: 3
An extensive study of selected writers (such as Austen, Barbauld, Byron, Coleridge, Hazlitt, Hemans, Keats, Gilpin, the Shelleys, Wollstonecraft, and Wordsworth) organized around literary themes and/or cultural issues important to the Romantic period.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 327.
ENGLISH 417 Modern Poetry Credits: 3
Study of works by modernist poets such as Hopkins, Yeats, Frost, Stevens, Williams, Moore, Pound, H.D., Eliot, Millay, Hughes.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 418 19th-Century American Literature Credits: 3
An intensive study of either selected major American writers in the 19th century or of 19th-century literary movements.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 311.

ENGLISH 422 Medieval Literature Credits: 3
Western religious and secular verse and prose to the 15th century. Late Middle English works are read in the original; all other selections in translation.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 317.

ENGLISH 423 Renaissance Literature II Credits: 3
English literature from 1600 to the beginning of the Restoration, including the works of Donne, Jonson, Milton and other contemporaries.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 317.

ENGLISH 426 The Victorian Period Credits: 3
An intensive study of selected writers (such as Arnold, Braddon, the Brontes, the Brownings, Dickens, Darwin, Eliot, Gaskell, Hardy, Ruskin, and the Rossettis) organized around literary themes and/or cultural issues important to the Victorian period.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 327.

ENGLISH 427 Contemporary Poetry Credits: 3
Study of works by contemporary poets (post World War II), such as Auden, Bishop, Hayden, Berryman, Rukeyser, Larkin, Rich, Plath, Heaney, Boland, Komunyakaa.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 428 20th-Century American Literature Credits: 3
An intensive study of either selected major American writers in the 20th century or of 20th-century literary movements.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 321.

ENGLISH 429B Advanced Screenwriting Credits: 3
This course provides students with advanced theory in narrative screenwriting, training in industry standard script analysis (called "coverage") and story editing. Students will be required to draft, revise and workshop a short film screenplay or will focus on a feature screenplay, delivering a draft and revision of the first act and a detailed outline for the rest of the script. Students will workshop feature screenplays in small groups, emphasizing the art of constructive story editing.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 339 or COMM-ST 354.

ENGLISH 431 18th-Century British Literature Credits: 3
British literature from the mid to late 18th century. Selected writers may include Blake, Burney, Collins, Equiano, Fielding, Gray, Johnson, Sheridan, and Wollstonecraft.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 432WI Advanced Creative Writing Prose Credits: 3
A course for advanced students of fiction writing. Open to students who have taken English 312 or its equivalent. The class will proceed through analysis of models, discussion of general principles, critique of student work. Students will simultaneously be encouraged to experiment and to refine the form and subjects best suited to their talents. Emphasis will remain on the short story, though there may be units in other forms--novella, film script, the non-fiction essay.
Prerequisites: ENGLISH 225 or DISC 200, RooWriter.

ENGLISH 433 Histories Of Writing, Reading, And Publishing Credits: 3
A study of selected topics concerning the material practices of writing, reading, and publishing within specific cultural and historical contexts. Issues examined may include authorship, education, information technologies, libraries, literacy, periodicals, popular literature, publishers, and communities of readers.
Prerequisites: ENGLISH 225 or DISC 200, one appropriate introductory course at the 300 level.

ENGLISH 434 Postcolonial Literature Credits: 3
An exploration of postcolonialism through the study of literary and theoretical texts created by or representing peoples whose historical experience has been decisively shaped by the experience or legacies of colonialism. Texts will be drawn from a variety of genres and from several countries. The course will consider several definitions of postcolonialism and related terms such as cosmopolitanism, hybridity, diaspora, and nationalism.
Prerequisites: ENGLISH 225 or DISC 200.
ENGLISH 435WI Advanced Creative Writing Poetry Credits: 3
An advanced poetry workshop that includes intensive reading of contemporary poetry and aims at each student creating a portfolio of publishable poems. The focus of the course will vary to address a variety of topics such as metaphor and closure; imitation and the line; form and voice. May be repeated once for credit.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 315, RooWriter.

ENGLISH 436WI Poetic Forms Credits: 3
An advanced creative writing course that focuses on intensive study of and practice in metrics and traditional and nonce forms. May be repeated once for credit.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 315, RooWriter.

ENGLISH 437WI Prose Forms Credits: 3
The making of a work of prose requires expertise with the structure of the chosen form, and an understanding of the relationship of form to content. This class teaches the techniques for planning and drafting major prose forms which could include the very-short story, the story, novella, novel, linked-story collection, episodic novel, essay novel, the play, the creative nonfiction book, and others. Students will learn how to create particular prose forms and how to use content as a guide to inventing new forms. We will examine some of the best examples of both traditional and newly invented forms by writers such as Anton Chekhov, Katherine Anne Porter, Tim O'Brien, and Sandra Cisneros.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 312, RooWriter.

ENGLISH 438 The "New Letters" Writing Conference Credits: 1-3
An intensive weekend conference for creative writers of varying genres and levels of experience, published and unpublished – fiction, poetry, nonfiction, stage and screen. The conference includes creative and interdisciplinary sessions on writing and publishing, genre-specific workshops, socializing and networking opportunities, and private manuscript consultations. The course of study for two-and three-credit students includes selected reading and post-weekend tutorial time conducted by accomplished, working writers. The conference may be repeated once for credit. Two- and three-credit students need the instructor’s consent and must have taken a 300-level creative-writing course in the focus genre prior to enrolling.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 439 Shakespeare and Film Credits: 3
Grounded in the close analysis of texts, this course examines film adaptations of Shakespeare’s plays across the range of dramatic genres (history plays, tragedy, comedy, and romance). This course is open to seniors and graduate students only. Graduate students will be responsible for supplemental critical readings.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 323.

ENGLISH 440 American Culture Credits: 3
Texts that offer perspectives on key historical themes of American culture. Texts may be grouped around any culturally significant principle (e.g. region, race, gender, class, ethnicity, religion) or theme (e.g. the mythology of the frontier, marriage and domesticity, the American Dream). The course may be taken twice for credit, provided substantive changes in topic.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 311 and ENGLISH 321.

ENGLISH 441 Girls And Print Culture Credits: 3
This course deals with girls’ relationships to the continually evolving print culture. Students will examine various literary representations of girlhood by adult writers, explore texts directed at girls (e.g., conduct books, periodicals, textbooks), and study the writing and reading practices of girls themselves.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 442 Playwriting I Credits: 3
Theory and practice of writing for the theatre with emphasis on the basic techniques.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 443 Playwriting II Credits: 3
Theory and practice of writing for the theatre with emphasis on advanced techniques.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 445 History And Principles Of Rhetoric Credits: 3
A study of selected writings of ancient, and modern rhetoricians illustrating key issues in the development of Western discourse theory and practice. Issues examined include the relationships between rhetoric and knowledge, orality and literacy, and rhetoric and poetics. Attention will also be given to the implications of rhetorical theory for modern language instruction.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 447 Theory and Criticism in English Studies Credits: 3
A survey of major schools and methods of literary theory and criticism. Authors and texts to be determined by the instructor of the course.
Prerequisites: ENGLISH 225 or DISC 200, junior or senior standing and six hours of literature.
ENGLISH 448 External Internship Credits: 1-3
Students may complete an external internship involving writing and editing with a publishing company, trade magazine, literary or academic journal, other print or electronic media organization, or with advertising, public relations, or non-profit firms. Internships are granted on a competitive basis. Students will compile a portfolio of their work under the direction of the internship supervisor to be submitted for evaluation to the department's internship coordinator.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 449A Publication Practicum Credits: 1-3
This course provides practical experience with New Letters magazine, New Letters on the Air, and BkMk Press in business analysis/reporting, copy-editing, manuscript evaluation, promotion/grant development, library research, market research, and other skills. The practicum is limited to three students per semester, to be chosen on the basis of demonstrated writing and organizational skills. References are required. May be taken for no more than three credit hours over a maximum of two semesters.
Prerequisites: ENGLISH 225 or DISC 200; Permission of the instructor.

ENGLISH 449B Publication Practicum Credits: 3
This course covers the basics of producing an issue of an academic journal. Students acquire hands-on experience at all stages of production.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 449C Publication Practicum Credits: 1-3
This course allows students to work with a faculty member on an ad hoc project for publication such as a special journal issue or festschrift, book manuscript, a new scholarly edition of a primary text, or a digital edition. Course may be repeated once for continued work on the same project.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 450 Special Readings Credits: 1-3
Intensive individual readings in a field, genre, or individual figure to be selected by a student or a group of students in consultation with an instructor willing to direct the project. Generally limited to graduating seniors who have completed the majority of the work for their major. Not open to students in their first semester at UMKC. May be repeated for credit.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 451 Shakespeare Comedies And Histories Credits: 3
A study of Shakespeare's major comedies and history plays with special emphasis on his dramatic works before 1600.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 317 and ENGLISH 323.

ENGLISH 452 Early English Drama Credits: 3
English religious and secular drama prior to Shakespeare. Mystery and morality plays are studied, with emphasis on their literary and social backgrounds. Close reading of such works as "Everyman," "The Wakefield Second Shepherd's Play," and "The Spanish Tragedy."
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 317 and ENGLISH 323.

ENGLISH 453 Modern Drama, 1880-1945 Credits: 3
A study of modern drama: Continental, British, and American, including history and development, critical theory, and literary evaluation. This course will focus on the earlier modern playwrights from Ibsen and Shaw, with special attention to naturalism.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 454 The Civil Rights Movement in African American Literature Credits: 3
This course examines how African American literature shaped ideas about freedom, rights, citizenship and race in the civil rights movement. It draws on a variety of literary forms-speeches, essays, autobiographies, fiction, drama, poetry and film-to explore the movement's impact on communities and cultures as well as its various debates and competing visions.
Prerequisites: ENGLISH 225 or DISC 200, completion of six hours of literature.

ENGLISH 456 From Field Shout to Hip Hop: African American Poetic Traditions Credits: 3
This course examines the development of African American poetry from its early forms as field shouts, ballads, and blues to present forms including spoken word and hip hop. Includes authors such as Phillis Wheatley, Paul Lawrence Dunbar, Langston Hughes, Gwendolyn Brooks, Tupac Shakur, and Jessica Care Moore.

ENGLISH 457 Stages Toward Freedom: African American Dramatic Traditions Credits: 3
This course explores the development of African American dramatic traditions from the eighteenth century through the Harlem Renaissance Black Arts Movement, to current postmodernism. Includes authors such as W.W. Brown, Zoran N. Hurston, Amiri Baraka, Sonia Sanchez, August Wilson, Suzan-Lori Parks.
ENGLISH 458 Slave Narratives: Race, Gender, and Writing Freedom Credits: 3
A truly American, home grown genre and powerful force in the development of American political and social realities, the African American Slave Narrative is an established, recognized influence in the development of African American and American literary history. In this course you will have the opportunity to explore the historical trajectory of the Slave Narrative, looking at early formulations of its structure, purpose and conventions—especially in terms of gender and race, subsequent various permutations, and the eventual development of the Neo-slave Narrative as its resurrection, which adds to the complexity and theoretical impact of the literary autobiography from black perspectives.

ENGLISH 459 African American Migrations in Literature Credits: 3
The course examines representations of two different trajectories of migration in African American literature: African American journeys from the south to northern and mid-western regions of America, and concurrent migrations of Caribbean people to the US in the early twentieth century.

ENGLISH 460 Special Offerings Credits: 1-4
The visiting professor who gives this course determines what its content shall be. All aspects of literature and linguistics are within its possible range. 
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 461 Shakespeare Tragedies And Romances Credits: 3
A study of Shakespeare's major tragedies and late romances with special emphasis on his dramatic literature after 1600.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 317 and ENGLISH 323.

ENGLISH 462 Restoration And 18th-Century Drama Credits: 3
The drama after the restoration of the monarchy and the reopening of the theaters through the 18th century. Special emphasis is placed on the comedy of manners and the heroic drama in the Restoration and the sentimental comedy in the 18th century. Includes such playwrights as Dryden, Congreve, Etherege, Wycherley, Steele, Lillo, Cumberland, Sheridan, and Goldsmith.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 317.

ENGLISH 463 Contemporary Drama II Credits: 3
A study of contemporary drama: Continental, British, and American, including history and development, critical theory and literary evaluation. This course will focus on the more recent writers, including the absurdists, with special attention to experimental drama.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 464 Medieval Methods & Paleography Credits: 3
This course examines the methodology and historiography of Medieval Studies. Through an introduction to paleography, the study of medieval handwritings, it prepares students for advanced work in Medieval and Renaissance studies. Using an interdisciplinary approach, this course will examine the historical and cultural settings for medieval texts, their physical form and production, as well as the tradition of textural transmission in the medieval world. In addition to gaining familiarity with the many different types of primary sources, such as literary, artistic, legal and notarial sources, students will be exposed to methods for practical archival work in various European nations.
Prerequisites: ENGLISH 225 or DISC 200, First Year Latin.

ENGLISH 465 Studies In The Modern Novel Credits: 3
An intensive study of no more than three major 20th-century novelists. The content of the course will change, depending on the instructor.
Prerequisites: ENGLISH 225 or DISC 200, completion of six hours of literature.

ENGLISH 468 Women's Literature in Africa and the African Diaspora Credits: 3
This course is a comparative examination of the variety of literary works produced by women of African descent in the United States, the Caribbean and Africa. Students will explore the cross-cultural implications of texts in light of the intersections of gender, race and class.

ENGLISH 470 Introduction To Descriptive Linguistics Credits: 3
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 310.

ENGLISH 475 Creative Nonfiction Credits: 3
This course emphasizes the study and crafting of creative nonfiction. special attention is given to developing the writing techniques required to shape publishable narratives out of experience.
Prerequisites: ENGLISH 225 or DISC 200, ENGLISH 312, ENGLISH 315, ENGLISH 316WI.

ENGLISH 499 Senior Tutorial Credits: 3
A comprehensive tutorial for students who have a faculty-approved research project. The project will culminate in a critical study of 20-25 pages or a creative writing portfolio of similar length. This course is appropriate for students who intend to continue their studies at the graduate level.
Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 5500 Graduate Study In English Credits: 3
An introduction to methods of research and scholarship related to English studies. The course uses a wide spectrum of print and digital materials, library facilities (including archives and Special Collections), databases, and other resources to explore English studies as an academic discipline and profession.
ENGLISH 5500P Special Topics Credits: 3

ENGLISH 5501 Magazine Editing Credits: 3
A course combining academic study of editorial management, publishing operations, and language skills, with "hands on" experience in article evaluation, editing, magazine production, and legal matters such as copyright and libel. Class work concentrates on authentic and effective language use, with attention given to copy editing, grammar, typography, printing processes, financing and distribution for commercial and small-press publications.

ENGLISH 5502 Magazine Nonfiction Credits: 3
This course emphasizes the origination and execution of nonfiction magazine articles for a variety of publications. Special attention is given to successful queries and the various writing techniques required for different kinds or articles. Students learn re-structuring and revision and the legalities affecting writers. Students are expected to complete three publishable articles.

ENGLISH 5503 Old English Credits: 3
This course is a study of Old English, its grammar, its poetic style, and its literature, both poetry and prose.

ENGLISH 5508 Harlem Renaissance Credits: 3
This course examines the period from 1920 to 1940, known as the Harlem Renaissance, a time of unprecedented literary and cultural creativity by Black artists. This course explores a variety of cultural productions, not only traditional forms of literature such as novels, short stories, plays and poetry, but also nonliterary objects of study such as painting, sculpture, and music.

ENGLISH 5510 Black Women Writers Credits: 3
This course explores the writings of African American Women Writers. The course examines how these writers have interacted with and often revised stereotypical representations of African American womanhood typically found within canonical and African American male literatures. The course will examine literature (which might include fiction, poetry, autobiography, and drama) of the 19th and 20th centuries; the majority of the works will be by modern and contemporary authors such as Nella Larsen, Zora Neale Hurston, Toni Morrison, and Terry McMillan. By placing the works in this sort of cultural and historical context, it will be possible to examine the unique tradition of African American women's writings as well as individual texts.

ENGLISH 5512 Chaucer Credits: 3
Readings from Chaucer's most important works, especially "The Canterbury Tales" and "Troilus and Criseyde" with emphasis on them as types of medieval genres and on the Middle English language. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5513 Renaissance Literature I Credits: 3
English literature from the time of Wyatt and Surrey to the beginning of the 17th century, including the works of Spenser, Marlowe, Sidney, Shakespeare and others. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5514 Milton Credits: 3
A study of Milton's prose and poetry, with special attention to "Paradise Lost". Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5515 Restoration And Early 18th-Century British Literature Credits: 3
British literature from the late 17th century to the mid-18th century. Selected writers may include Addison and Steele, Behn, Congreve, Defoe, Dryden, Finch, Pope, Rochester, Swift, and Wortley Montagu.

ENGLISH 5516 The Romantic Period Credits: 3
An extensive study of selected writers (such as Austen, Barbauld, Byron, Coleridge, Hazlitt, Hemans, Keats, Gilpin, the Shelleys, Wollstonecraft, and Wordsworth) organized around literary themes and/or cultural issues important to the Romantic period.

Prerequisites: ENGLISH 327.

ENGLISH 5517 Modern Poetry Credits: 3
Study of works by modernist poets such as Hopkins, Yeats, Frost, Stevens, Williams, Moore, Pound, H.D., Eliot, Millay, Hughes. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5518 19th-Century American Literature Credits: 3
An intensive study of either selected major American writers in the 19th century or of 19th-century literary movements. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5519 Teaching Writing: Theories, Histories, Contexts, Practices Credits: 3
This course focuses on issues related to the teaching of English at the high school and college levels, with an emphasis on the teaching of writing. Issues addressed may include assignment design, teaching invention and revision, response to and evaluation of writing, collaborative learning, relationships between reading and writing, classroom uses of electronic media, and institutional contexts within which teachers work. The course is required of Graduate Teaching Assistants in the UMKC Composition Program, to be taken either prior to or concurrently with their first semester of teaching. Secondary English teachers and others interested in English teaching are also welcome.

ENGLISH 5520 Greater Kansas City Writing Project Credits: 3
Studies in methods and objectives for the teaching of English with special attention to secondary school teaching. This course is repeatable for credit with advisor approval.
ENGLISH 5520A Greater Kansas City Writing Project Credits: 3
ENGLISH 5520B Greater Kansas City Writing Project Credits: 3
ENGLISH 5520D Greater Kansas City Writing Project Credits: 3
ENGLISH 5522 Medieval Literature Credits: 3
Western religious and secular verse and prose to the 15th century. Late Middle English works are read in the original; all other selections in translation. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5523 Renaissance Literature II Credits: 3
English literature from 1600 to the beginning of the Restoration, including the works of Donne, Jonson, Milton, and other contemporaries. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5526 The Victorian Period Credits: 3
An intensive study of selected writers (such as Arnold, Braddon, the Brontës, the Brownings, Dickens, Darwin, Eliot, Gaskell, Hardy, Ruskin, and the Rossettis) organized around literary themes and/or cultural issues important to the Victorian period.
Prerequisites: ENGLISH 327.

ENGLISH 5527 Contemporary Poetry Credits: 3
Study of works by contemporary poets (post-World War II), such as Auden, Bishop, Hayden, Berryman, Rukeyser, Larkin, Rich, Plath, Heaney, Boland, and Komunyakaa. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5528 20th Century American Literature Credits: 3
Major American writers or literary movements of the 20th century. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5529 Graduate Seminar: Screenwriting Credits: 3
A seminar on advanced theory in narrative screenwriting, script analysis and constructive story editing. Students draft, revise and workshop a short film script or a feature screenplay, and deliver a pitch, treatment, draft and revision of the first act and detailed outline of the whole script. Students workshop feature screenplays in small groups.
Prerequisites: ENGLISH 429B or COMM-ST 454.

Cross Listings: COMM-ST 354.

ENGLISH 5531 Late 18th-Century British Literature Credits: 3
British literature from the mid to late 18th century. Selected writers may include Blake, Burney, Collins, Equiano, Fielding, Gray, Johnson, Sheridan, and Wollstonecraft.

ENGLISH 5532 Advanced Creative Writing: Fiction Credits: 3
A course for advanced students of fiction writing. The class will proceed through analysis of models, discussion of general principles, and critique of student work. Students will simultaneously be encouraged to experiment and to refine the form and subjects best suited to their talents. Emphasis will remain on the short story, though there may be units in other forms—novella, film script, the non-fiction essay. May be repeated once for credit.
Prerequisites: Graduate Standing.

ENGLISH 5533 Histories Of Writing, Reading, And Publishing Credits: 3
A study of selected topics concerning the material practices of writing, reading, and publishing within specific cultural and historical contexts. Issues examined may include authorship, education, information technologies, libraries, literacy, periodicals, popular literature, publishers, and communities of readers.

ENGLISH 5534 Postcolonial Literature Credits: 3
An exploration of postcolonialism through the study of literary and theoretical texts created by or representing peoples whose historical experience has been decisively shaped by the experience or legacies of colonialism. Texts will be drawn from a variety of genres and from several countries. The course will consider several definitions of postcolonialism and related terms such as cosmopolitanism, hybridity, diaspora, and nationalism.

ENGLISH 5535 Advanced Creative Writing: Poetry Credits: 3
An advanced poetry workshop that includes intensive reading of contemporary poetry and aims at each student creating a portfolio of publishable poems. The focus of the course will vary to address a variety of topics such as metaphor and closure; imitation and the line; form and voice. May be repeated once for credit.
Prerequisites: Graduate Standing.

ENGLISH 5536 Poetic Forms Credits: 3
An advanced creative writing course that focuses on intensive study of and practice in metrics and traditional and nonce forms. May be repeated once for credit.
Prerequisites: ENGLISH 315 or equivalent.
ENGLISH 5537 Prose Forms Credits: 3
This course covers techniques for planning and drafting major prose forms. Students will learn how to use content as a guide to inventing new forms (i.e. novella, novel, linked-story collection, episodic novel, essay novel, and creative nonfiction book.

Prerequisites: ENGLISH 432WI, ENGLISH 435WI.

ENGLISH 5538 Women's Literature in Africa and the African Diaspora Credits: 3
This course is a comparative examination of the variety of literary works produced by women of African descent in the United States, the Caribbean and Africa. Students will explore the cross-cultural implications of texts in light of the intersections of gender, race and class.

Cross Listings: BLKS 5538.

ENGLISH 5540 American Culture Credits: 3
Texts that offer perspectives on key historical themes of American culture. Texts may be grouped around any culturally significant principle (e.g. region, race, gender, class, ethnicity, religion) or theme (e.g. the mythology of the frontier, marriage and domesticity, the American Dream). Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5541 Girls And Print Culture Credits: 3
This course deals with girls' relationships to the continually evolving print culture. Students will examine various literary representations of girlhood by adult writers, explore texts directed at girls (e.g., conduct books, periodicals, textbooks), and study the writing and reading practices of girls themselves.

ENGLISH 5545 History And Principles Of Rhetoric Credits: 3
A study of selected writings of ancient and modern rhetoricians illustrating key issues in the development of Western discourse theory and practice. Issues examined include the relationships between rhetoric and knowledge, orality and literacy, and rhetoric and poetics. Attention will also be given to the implications of rhetorical theory for modern language instruction. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5546 From Field Shout to Hip Hop: African American Poetic Traditions Credits: 3
This course examines the development of African American poetry from its early forms as field shouts, ballads, and blues to present forms including spoken word and hip hop. Includes authors such as Phillis Wheatley, Paul Lawrence Dunbar, Langston Hughes, Gwendolyn Brooks, Tupac Shakur, and Jessica Care Moore.

ENGLISH 5547 Theory and Criticism in English Studies Credits: 3
A survey of major schools and methods of literary theory and criticism. Authors and texts to be determined by the instructor of the course.

ENGLISH 5548 External Internship Credits: 1-3
Students may complete an external internship involving writing and editing with a publishing company, trade magazine, literary or academic journal, other print or electronic media organization, or with advertising, public relations, or non-profit firms. Internships are granted on a competitive basis. Students will compile a portfolio of their work under the direction of the internship supervisor to be submitted for evaluation to the department's internship coordinator.

ENGLISH 5549A Publication Practicum Credits: 1-3
This course provides practical experience with New Letters magazine, New Letters on the Air, and BkMk Press in business analysis/reporting, copy-editing, manuscript evaluation, promotion/grant development, library research, market research, and other skills. The practicum is limited to three students per semester, to be chosen on the basis of demonstrated writing and organizational skills. References are required. May be taken for no more than three credit hours over a maximum of two semesters. Permission of the instructors required.

ENGLISH 5549B Publication Practicum Credits: 1-3
This course covers the basics of producing an issue of an academic journal. Students acquire hands-on experience at all stages of production.

ENGLISH 5549C Publication Practicum Credits: 1-3
This course allows students to work with a faculty member on an ad hoc project for publication such as a special journal issue or festschrift, book manuscript, a new scholarly edition of a primary text, or a digital edition. Course may be repeated once for continued work on the same project.

ENGLISH 5550 Graduate Seminar Credits: 3
Authors, works and intellectual currents which form the basis of these seminars may vary from semester to semester, depending upon the instructor's design for the course. May be repeated for credit. Continued in ENGLISH 5555.
ENGLISH 5550A Graduate Seminar Medieval Literature I Credits: 3
ENGLISH 5550B Graduate Seminar Renaissance Literature I Credits: 3
ENGLISH 5550C Graduate Seminar Neo-Classical Literature I Credits: 3
ENGLISH 5550D Graduate Seminar 19th Century Literature I Credits: 3
ENGLISH 5550E Graduate Seminar American Literature I Credits: 3

ENGLISH 5550M Graduate Seminar In Rhetoric And Composition Credits: 3
ENGLISH 5550MA Greater Kansas City Writing Project: Invitational Credits: 3
ENGLISH 5550MC Greater K.C. Writing Project: Writing & The Teaching Of Literature Credits: 3
ENGLISH 5550MD Greater Kc Writing Project: Critical Thinking & Process Writing Credits: 3
ENGLISH 5550ME Greater K.C. Wrtg Project: Researching The Theories Of Tchng Wrtng Credits: 3
ENGLISH 5550N Graduate Seminar: Criticism Credits: 3
ENGLISH 5550P Graduate Seminar: Sociolinguistics And Dialectology Credits: 3
Seminar focusing on the role of social factors in language use, and on the origin and development of regional and urban dialects in English. Special attention will be paid to sociolinguistic motivations for change, variation and merger in dialects and languages in contact, and Black English.
ENGLISH 5551 Shakespeare Comedies And Histories Credits: 3
A study of Shakespeare's major comedies and history plays with special emphasis on his dramatic works before 1600. Students will make in-class presentations and submit papers requiring research and bibliographical work.
ENGLISH 5552 Early English Drama Credits: 3
English religious and secular drama prior to Shakespeare. Mystery and morality plays are studied with emphasis on their literary and social backgrounds. Close readings of such works as "Everyman," "The Wakefield Second Shepherd's Play," and "The Spanish Tragedy." Students will make in-class presentations and submit papers requiring research and bibliographical work.
ENGLISH 5553 Modern Drama 1880-1945 Credits: 3
A study of modern drama: Continental, British, and American, including history and development, critical theory, and literary evaluation. This course will focus on the earlier modern playwrights from Ibsen to Shaw, with special attention to naturalism. Students will make in-class presentations and submit papers requiring research and bibliographical work.
ENGLISH 5554 The Civil Rights Movement in African American Literature Credits: 3
This course examines how African American literature shaped ideas about freedom, rights, citizenship and race in the civil rights movement. It draws on a variety of literary forms—speeches, essays, autobiographies, fiction, drama, poetry and film—to explore the movement's impact on communities and cultures as well as its various debates and competing visions.
ENGLISH 5555 Graduate Seminar Credits: 3
Graduate Seminar - second half.
Prerequisites: ENGLISH 5550.
ENGLISH 5555A Graduate Seminar Medieval Literature II Credits: 3
ENGLISH 5555B Graduate Seminar Renaissance Literature II Credits: 3
ENGLISH 5555C Graduate Seminar Neo-Classical Literature I Credits: 3
ENGLISH 5555D Graduate Seminar In 19th-Century Literature II Credits: 3
ENGLISH 5555E Graduate Seminar American Literature II Credits: 3
ENGLISH 5555F Graduate Seminar In Modern Literature II Credits: 3
ENGLISH 5555G Graduate Seminar Literary Criticism Credits: 3
ENGLISH 5555H Graduate Seminar Studies In Fiction II Credits: 3
ENGLISH 5555I Graduate Seminar In Dramatic Literature II Credits: 3
ENGLISH 5555J Graduate Seminar English Language Credits: 3
ENGLISH 5555K Graduate Seminar: Composition Credits: 3
ENGLISH 5555M Graduate Seminar: Prose Fiction Credits: 3
ENGLISH 5555N Graduate Seminar: Composition Credits: 3
ENGLISH 5556 Studies In The Novel 1740-1900 Credits: 3
An intensive study of no more than three major novelists of the eighteenth or nineteenth century. The content of the course will change, depending on the instructor. Students will make in-class presentations and submit papers requiring research and bibliographical work.
ENGLISH 5557 Stages toward Freedom: African American Dramatic Traditions Credits: 3
This course explores the development of African American dramatic traditions from the eighteenth century through the Harlem Renaissance, Black Arts Movement, to current postmodernism. Includes authors such as W.W. Brown, Zora N. Hurston, Amiri Baraka, Sonia Sanchez, August Wilson, Suzan-Lori Parks.
ENGLISH 5558 Slave Narratives: Race, Gender and Writing Freedom Credits: 3
A truly American, home grown genre and powerful force in the development of American political and social realities, the African American Slave Narrative is an established, recognized influence in the development of African American and American literary history. In this course you will have the opportunity to explore the historical trajectory of the Slave Narrative, looking at early formulations of its structure, purpose and conventions—especially in terms of gender and race, subsequent various permutations, and the eventual development of the Neo-slave Narrative as its resurrection, which adds to the complexity and theoretical impact of the literary autobiography from black perspectives.
ENGLISH 5559 African American Migrations in Literature Credits: 3
The course examines representations of two different trajectories of migration in African American literature: African American journeys from the south to northern and mid-western regions of America, and concurrent migrations of Caribbean people to the US in the early twentieth century.
ENGLISH 5560 Special Topics Credits: 1-4
The professor who gives this course determines what its content shall be. All aspects of English studies are within its possible range.
ENGLISH 5561 Shakespeare: Tragedies And Romances Credits: 3
A study of Shakespeare's major tragedies and late romances with special emphasis on his dramatic literature after 1600. Students will make in-class presentations and submit papers requiring research and bibliographical work.
ENGLISH 5562 Restoration And 18th-Century Drama Credits: 3
The drama after the restoration of the monarchy and the reopening of the theatres through the 18th century. Special emphasis is placed on the comedy of manners and the heroic drama in the Restoration and the sentimental comedy in the 18th-century. Includes such playwrights as Dryden, Congreve, Etherege, Wycherley, Steele, Lillo, Cumberland, Sheridan, and Goldsmith. Students will make in-class presentations and submit papers requiring research and bibliographical work.
ENGLISH 5563 Contemporary Drama Credits: 3
A study of contemporary drama: Continental, British, and American, including history and development, critical theory and literary evaluation. This course will focus on the more recent writers, including the absurdists, with special attention to experimental drama. Students will make in-class presentations and submit papers requiring research and bibliographical work.
ENGLISH 5564 Medieval Methods & Paleography Credits: 3
This course examines the methodology and historiography of Medieval Studies. Through an introduction to paleography, the study of medieval handwritings, it prepares students for advanced work in Medieval and Renaissance studies. Using an interdisciplinary approach, this course will examine the historical and cultural settings for medieval texts, their physical form and production, as well as the tradition of textural transmission in the medieval world. In addition to gaining familiarity with the many different types of primary sources, such as literary, artistic, legal, and notarial sources, students will be exposed to methods for practical archival work in various European nations.
Prerequisites: First Year Latin.

Cross Listings: HISTORY 5583.
ENGLISH 5565 Studies In Modern Novel Credits: 3
An intensive study of no more than three major 20th-century novelists. The content of the course will change depending on the instructor. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5566CA Cluster Course: Images Of The Human Body In The Renaissance Credits: 3
Focusing on Renaissance conceptions of the human body, this cluster treats the following topics as they are reflected in Renaissance literature, art, astrology, astronomy, biology, anatomy, medicine, and politics: A) The dignity of the human body B) Microcosm and macrocosm. C) The human body and the heavens D) Stranger manifestations: freaks and beasts E) The humors F) Disorders of the human body G) The body politic H) The human body as an object of study.

ENGLISH 5566CF Courts And Culture In The Middle Ages Credits: 3
This cluster course offers an interdisciplinary approach to the study of the Middle Ages, focusing on medieval cultures in Europe. Arranged around a series of themes, the cluster will read a variety of documentary and literary texts to investigate not only the "high culture" of the courts but also the interactions of people from various social backgrounds in Western Europe.

ENGLISH 5575 Advanced Creative Writing: Creative Nonfiction Credits: 3
This course is devoted to the study and crafting of the personal essay. Students will explore - and - practice many different varieties of this diverse form. Whether in the guise of aesthetic appreciation, cultural critique, personal history, political reportage, or travelogue, our course readings are first and foremost PERSONAL narratives, both troubled and enriched by their subjectivity (the essay’s ‘I’). Students will study the many challenges particular to this form (most of which concern notions of truth, and its rendering) and strive to overcome them as they create vivid personal narratives of their own.

ENGLISH 5582 European Literature: 18th Century Credits: 3
The 18th-century course will focus on a representative sampling from authors such as Corneille, Racine, Moliere, Voltaire, Prevost, La Bruyere, La Rochefoucauld, Montesquieu, Diderot, Rousseau, Schiller, Goethe, and Grimmelshausen. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5591 Research In Selected Fields Credits: 1-3
Individual study under the direction of a senior member of the department, leading to the writing of a formal or scholarly paper. May be repeated for credit.

ENGLISH 5598A MFA Thesis Credits: 3-6
Under the guidance of a graduate MFA faculty member, students completing the MFA must complete and orally defend a publishable or producible manuscript. May be repeated for a maximum of six hours credit.

ENGLISH 5599 Research And Thesis Credits: 1-9
A student, with permission of the graduate committee, may write a thesis for 3 hours credit.

ENGLISH 5600 Introduction To Doctoral Study In English Credits: 3
Introduction to research skills necessary for doctoral work, particularly for writing the thesis; attention will be paid both to traditional skills such as bibliography and to computer skills.

ENGLISH 5601 Culminating Experience in Literature Credit: 1
Under the guidance of a graduate faculty member in English, students following the program of study in Literature must revise and orally defend a 20-30 page paper in Literature on a pass/no pass basis.

ENGLISH 5602 Culminating Experience in Language & Literature Credit: 1
Under the Guidance of a graduate faculty member in English, Students following the program of study in Language Literature must revise and orally defend a 20-30 page paper in Language Literature on a pass/no pass basis.

ENGLISH 5603 Culminating Experience in Manuscript, Print Culture, & Editing. Credit: 1
Under the guidance of a graduate faculty member in English, students following the program of Study in Manuscript, Print Culture, and Editing must revise and orally defend a 20-30 page paper in Manuscript, Print Culture, and Editing on a pass/no pass basis.

ENGLISH 5650 Doctoral Seminar Credits: 3

ENGLISH 5691 Doctoral Research In Selected Fields Credits: 3
Individual study under the direction of a senior member of the department leading to the writing of a formal or scholarly paper. May be repeated for credit.

ENGLISH 5699 Research And Dissertation Credits: 1-15
Research and preparation for the doctoral dissertation.

ENGLISH 5899 Required Graduate Enrollment Credit: 1
**Bachelor of Arts: English**

**University Requirements**

**General Education**

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

**Constitution Course**

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

**RooWriter Assessment**

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

**Exit Examinations**

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

**Student Learning Outcomes**

Students graduating from this program will:

- Create coherent academic arguments that are built upon multi-leveled textual analysis.
- Integrate close reading of primary texts.
- Situate texts in cultural and/or historical contexts.
- Engage in critical conversations.
- Present an essay in ways that reflect a sense of professional rules and conventions.

The Bachelor of Arts in English program is recommended for students interested in literature and language, in writing and reading, in texts of all types and how they influence and reflect our world. The English major is also an excellent choice for those interested in obtaining a firm foundation for graduate study in programs as wide-ranging as business or law school, communications, cultural studies, and, of course, English and Creative Writing. English majors planning to attend graduate school are strongly urged to take courses in all periods of English and American literature.

To graduate with a major in English, students must achieve a grade-point average of at least 2.0 in the 36-hour program described below, but no credit will be given for courses in which the grade is below C-. No course may fulfill more than one requirement. At least 18 hours must be taken in the English Department at UMKC. Students complete a capstone project in their final year.

No more than one course in Creative Writing may be counted toward the 36-hour requirement for the Literature major. No courses in expository writing or journalism may be used to fulfill the 300- or 400-level elective requirements.

All students with a major in English must fulfill these requirements. Emphasis areas can be added to the major and they will not be on the diploma, but will be noted in the transcript.

**Program Requirements**

**Program Specific Recommendations for UMKC General Education Core (p. 2250) Coursework**

Focus C (May be satisfied by Constitution course requirement below)

Focus Elective 1

Total Credits 3

‘Total credits’ in this section indicates the number of General Education Core credit hours that are not met by the degree specific requirements outlined below.

Total Credits 21

See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

Total Credits 3

1 Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

**Capstone Experience** ²
Select one of the following:
Any 400-level English course in literature or linguistics that is cross-listed with a graduate level course in English
ENGLISH 499  Senior Tutorial ²

Total Credits 36

Only one English course at the 100- or 200-level may be used to fulfill an elective requirement. At least two of the four electives must be at the 400-level. Two of the four electives must cover periods prior to 1900. Elective courses may be offered on a rotation basis. Please consult with your advisor for availability.
No more than one course in Creative Writing may be counted toward the 36-hour requirement for the Literature major. No courses in expository writing or journalism may be used to fulfill the 300- or 400-level elective requirements.

Please see the Director of Undergraduate Studies to apply for the Capstone course. All students must complete a Capstone contract, signed by the instructor and submitted to the Director of Undergraduate Studies before the end of the third week of the semester in which the Capstone course is being taken.

Approval is required by a tenure-line faculty member and the Director of Undergraduate Studies for enrollment in ENGLISH 499.

**General Electives**
Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

**Tools for Planning and Fulfilling Academic Requirements**
UMKC's Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC's Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/plannymydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student's officially recorded (Office of Registration and Records) and "what if" plans of study. This evaluation is used to certify all graduation requirements.
UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes

Students graduating from this program will:

- Demonstrate a thorough understanding of poetics or storytelling craft through the production of creative works that are structurally sound, polished, and complete.
- Demonstrate effective problem-solving and revision strategies in the composition of poems or stories.
- Demonstrate a strong, deliberate command of style, grammar, and mechanics.
- Demonstrate a general knowledge of literary history, especially the literary traditions of their chosen genre.
- Demonstrate the ability to analyze texts critically and the ability to recognize how a text displays a writer’s artistic decisions.
- Demonstrate a working vocabulary with which to discuss the technical and aesthetic aspects of their craft.

The Bachelor of Arts in English with Creative Writing Emphasis combines intensive writing workshops with courses in literature to foster discovery and mastery in creative writing. Our program is based on the belief that successful writers grow from the study of writing and the study of literature, which enables students to learn the traditions and adapt them to their own art. Students complete a capstone project in their final year.

To graduate with a major in English, students must achieve a grade-point average of at least 2.0 in the 36-hour program described below, but no credit will be given for courses in which the grade is below C-. No course may fulfill more than one requirement. At least 18 hours must be taken in the English Department at UMKC. Students complete a capstone project in their final year. Courses may be offered on a rotation basis. Please consult with advisor for current availability.

"Total credits" in this section indicates the number of General Education Core credit hours that are not met by the degree specific requirements outlined below.

Total Credits

1. See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have "satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions."

Courses at UMKC that satisfy this state requirement are:

<table>

</tbody>
</table>

Total Credits

1. Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

---

1 Requires permission of the Director of Creative Writing or the Director of Undergraduate Studies.

2 Please see the Director of Undergraduate Studies to apply for the Capstone course. All students must complete a Capstone contract, signed by the instructor and submitted to the Director of Undergraduate Studies before the end of the third week of the semester in which the Capstone course is being taken.

3 Students must complete a poetry or prose sequence with distinguished work before applying to a tenure-line faculty member and the Director of Creative Writing or the Director of Undergraduate Studies for permission to enroll in ENGLISH 499.
General Electives

Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC's Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student's officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC's Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
English Classical, Medieval, & Early Modern Literature Emphasis

University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes
Students graduating from this program will:

- Create coherent academic arguments that are built upon multi-leveled textual analysis
- Integrate close readings of primary texts
- Situate texts in cultural and/or historical contexts
- Engage in critical conversations
- Present an essay in ways that reflect a sense of professional rules and conventions

The Bachelor of Arts in English with an emphasis in Classical, Medieval, and Early Modern Literature is recommended for students interested in a broad background in the humanities and for those interested in obtaining a firm foundation for further study in graduate school. This option within the English major involves a core of three survey courses to give students grounding in each of the three periods. Students also take one elective from each time period; a course such as “Shakespeare in Film,” “The Ancient World in Film,” or “Arthurian Legends” that allows for the study of how these literatures have been received in modern society; and a course on the linguistic backgrounds of these literatures, such as “History of English,” “Old English,” “Ancient Greek,” “Classical Latin,” or the “History and Principles of Rhetoric.” The remaining three electives can be taken in the English Department or many other departments in the college including Classics, History, Art History, Philosophy, and Geosciences.

To graduate with a major in English, students must achieve a grade-point average of at least 2.0 in the 36-hour program described below, but no credit will be given for courses in which the grade is below C-. No course may fulfill more than one requirement. At least 18 hours must be taken in the English Department at UMKC. Students complete a capstone project in their final year.

1 Please see the Director of Undergraduate Studies to apply for the Capstone course. All students must complete a Capstone contract, signed by the instructor and submitted to the Director of Undergraduate Studies before the end of the third week of the semester in which the Capstone course is being taken.

2 Approval is required by a tenure-line faculty member and the Director of Undergraduate Studies for enrollment in ENGLISH 499.

General Electives

Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

Tools for Planning and Fulfilling Academic Requirements

UMKC’s Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
English Language and Rhetoric Emphasis

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes

Students graduating from this program will:

• Create coherent academic arguments that are built upon complex rhetorical and/or linguistic analysis.
• Analyze the language and rhetoric of various texts and media.
• Situate media in cultural and/or historical contexts.
• Engage in critical conversations.
• Present an essay in ways that reflect a sense of professional rules and conventions.

The Bachelor of Arts in English with an emphasis in Language and Rhetoric is recommended for students interested in a broad background in the humanities with a focus in language and rhetoric and for those interested in obtaining a firm foundation for further study in graduate school. Students will receive intensive emphasis in the study of rhetoric and linguistic analysis. This option is especially relevant for students considering law school and careers in communications, marketing, and business.

To graduate with a major in English, students must achieve a grade-point average of at least 2.0 in the 36-hour program described below, but no credit will be given for courses in which the grade is below C-. No course may fulfill more than one requirement. At least 18 hours must be taken in the English Department at UMKC. Students complete a capstone project in their final year.

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

</tbody>
</table>

Total Credits 3

1 Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

**College of Arts & Sciences Degree Requirements**

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

**Capstone Experience**

Select one of the following:

- Any 400-level English course language, rhetoric, or literature that is cross-listed with a graduate-level course
- ENGLISH 499 Senior Tutorial

**Total Credits**: 36

**General Electives**

Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

1. No course may be used to fulfill more than one requirement, but courses not used for “Language” or “Rhetoric” categories above may be taken for the “Language/Rhetoric/Theory” category.
2. Only one course at the 100- or 200-level may be used to fulfill an elective requirement. No more than one course in Creative Writing may be counted toward the 36-hour requirement for the Language and Rhetoric Emphasis. No course in expository writing or journalism may be used to fulfill the 300-level or above elective requirement. Elective coursework may be offered on a rotation basis. Please consult with your advisor for current availability.
3. Please see the Director of Undergraduate Studies to apply for the Capstone course. All students must complete a Capstone contract, signed by the instructor and submitted to the Director of Undergraduate Studies before the end of the third week of the semester in which the Capstone course is being taken.
4. Approval is required by a tenure-line faculty member and the Director of Undergraduate Studies for enrollment in ENGLISH 499.

**Minimum GPA: 2.0**

**Total Credit Hours: 120**
Tools for Planning and Fulfilling Academic Requirements

UMKC’s Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Teacher Certification in English

Program Requirements

Certification as a middle school (grades 5-9) or secondary (grades 9-12) English teacher in either Kansas or Missouri requires that a student complete specific requirements in English and the School of Education. A separate application for teacher education is required. For further information about the program, consult the School of Education section of this catalog or contact the Education Student Services Office at (816) 235-2234.
Minor in Creative Writing

Program Requirements

The Minor in Creative Writing is designed for students who are eager to give focused attention to developing their talents in poetry, fiction, or creative nonfiction writing.

To graduate with a Minor in Creative Writing, students must achieve a grade-point average of at least 2.0 in the 21-hour program described below, but no credit will be given for courses in which the grade is below C-. No course may fulfill more than one requirement.

Total Credits: 21

1 Some courses in Communication Studies, Theatre, or Foreign Languages may also be applicable with the permission of the Director of Undergraduate Studies or the Director of Creative Writing.
Minor in English Language and Literature

Student Learning Outcomes

Students graduating from this program will:

- Create coherent academic arguments that are built upon multi-leveled textual analysis.
- Integrate close reading of primary texts.
- Engage in critical conversations.
- Present an essay in ways that reflect a sense of professional rules and conventions.

Program Requirements

The Minor in English Language and Literature is designed for students desiring a general background in literature written in English.

To graduate with a Minor in English Language and Literature, students must achieve a grade-point average of at least 2.0 in the 18-hour program described below, but no credit will be given for courses in which the grade is below C-. Students must take 12 of the 18 hours required at the 300- or 400-level. No course may fulfill more than one requirement. No courses in journalism or in expository writing may be counted toward the Minor in English. No more than one course in Creative Writing may be counted toward the Minor in English Literature. In addition to the following approved courses, students may petition to have other considered by the Director of Undergraduate Studies in English.

Minor in Manuscript, Print Culture, and Editing

Program Requirements

The Minor in Manuscript, Print Culture, and Editing examines the social, cultural, economic, and political history of the written word. It considers relationships among authors, editors, publishers, printers, illustrators, and booksellers as well as the reception of texts by readers, reviewers, and critics. This minor allows students to study the production of texts through the centuries while also gaining hands-on editing experience through internal and external internships. Students take a wide variety of courses covering a range of historical periods that have a significant emphasis on the history of reading, writing, and authorship as well as courses that focus on aspects of contemporary publishing and editing.

To graduate with a Minor in Manuscript, Print Culture, and Editing, students must achieve a grade-point average of at least 2.0 in the 21-hour program described below, but no credit will be given for courses in which the grade is below C-. No course may fulfill more than one requirement.

Minor in Writing

Program Requirements

The Minor in Writing is designed for students interested in a focus on writing of all types and genres. Students select from a menu of courses in writing, rhetoric, and linguistics.

To graduate with a Minor in Writing, students must achieve a grade-point average of at least 2.0 in the 18-hour program described below, but no credit will be given for courses in which the grade is below C-. No course may fulfill more than one requirement. No more than two courses in Creative Writing may be counted toward the Minor in Writing. One writing-intensive (WI) course in a discipline other than English may be counted toward the Minor in Writing.

Master of Arts: English
Master of Arts: English

The Department of English offers the Master of Arts in English, which focuses on literary study, as well as two emphasis areas that allow students to concentrate their studies in a particular area: 1) Language and Literature, and 2) Manuscript, Print Culture, and Editing. Through courses in English and American literature, creative and expository writing, film, linguistics, composition/rhetoric, literary criticism, the history of books and print culture, as well as editing, these programs of study are designed to prepare students for teaching, research, and writing careers, for careers in editing, and for further study at the doctoral level. The 31-hour M.A. in English is designed for students desiring a general background in English and American literature and is strongly recommended for students planning further graduate study in English and/or American literature.

The Language and Literature emphasis is designed for students who wish to combine graduate study of literature with the study of linguistics and/or composition and rhetoric. This emphasis is recommended for students interested in teaching in community colleges or secondary schools and for students interested in pursuing the Ph.D. in composition and rhetoric or linguistics.

The Manuscript, Print Culture, and Editing emphasis is designed for students who wish to combine the study of literature with the study of book history, print culture, and editing. This emphasis is recommended for students interested in editorial careers, offering several internship experiences in print and online media, and for students interesting in pursuing the Ph.D. in book history and print culture.

Members of the graduate faculty are assigned as advisors to newly admitted M.A. students. New graduate students should meet with their advisors as soon as possible to prepare an official program of study.

Admission

The application process is competitive. Satisfying the admission requirements does not guarantee admission to the program.

The applicant must hold:

- a B.A. in English, or a B.A. degree that includes at least 30 hours of sophomore-, junior-, or senior-level English courses, or the equivalent. Applicants with fewer than 30 hours of undergraduate English courses may be admitted and assigned additional coursework as part of their program. These extra hours are added to the hours required for graduation.
- a 3.0 cumulative grade-point average in undergraduate work and a 3.0 average in undergraduate English coursework. In unusual circumstances, the graduate committee may consider applicants with lower grade-point averages.

Applicants will be asked to submit the following materials with their online application:

1. **Academic information**, including institutions attended, degrees earned, GPA, foreign language experience, honors and awards, and relevant work experience
2. **Writing sample** that demonstrates the applicant's writing abilities in the humanities in up to 15 pages of recent academic prose (upload file)
3. **Statement of purpose** that describes the applicant’s academic and professional objectives in an essay of 500-600 words, discussing in detail their interest, research, and writing in their emphasis area (upload file)
4. **Three letters of recommendation** that evaluate the applicant’s readiness for graduate study written by three professors or others who know the applicant’s abilities and potential well (provide email addresses and recommenders will receive instructions to upload letters)
5. **GRE score** of 60 percent or higher on the verbal aptitude section (submit official scores using code 6872)
6. **Transcripts** from all post-secondary schools attended (mail to UMKC Office of Admissions, 5100 Rockhill Road, 120 Administrative Center, 64110)
7. **Graduate Teaching Assistantship** application materials, if applying, including a 250-500 word teaching statement addressing the applicant’s interest in and qualifications for teaching, and an academic writing sample from an upper-level college course (upload files)

Students may not take more than six hours of graduate credit in English before entering the program as a "fully admitted" student.

Student Learning Outcomes

Students graduating from this program will:

- Create sophisticated academic arguments that situate texts within aesthetic, social, and historical context.
- Produce work in dialogue with current and historical conversations in the field;
- Evaluate and engage methodological approaches appropriate to academic discourse;
- Develop and defend, both orally and in writing, their critical perspectives;
- Synthesize an understanding of interrelations across diverse fields of study;
- Demonstrate a broad grounding in the diversity of fields in English studies.
- Produce written work in a vivid, appropriate style that demonstrates mastery of mechanics and grammar.
**Degree Requirements**

Students must earn 31 graduate credits to complete the M.A. in English. Of these credits, at least 15 hours must be at graduate level (courses numbered 5000 and above) and taught by a member of the graduate faculty and at least 9 hours must be in 5000-level seminars or other 5000-level courses which are not cross-listed with 400-level courses.

Students must take ENGLISH 5500, ENGLISH 5547, and one hour of ENGLISH 5601, ENGLISH 5602, or ENGLISH 5603 for their "Culminating Experience," as is appropriate depending on the focus of their studies.

Students must maintain a 3.0 (B) grade-point average to remain in the M.A. program and to complete the degree.

By the time of graduation from the M.A. program, students must fulfill a foreign language requirement by satisfactorily completing (with a C or better) one year (two university semesters) of the same foreign language. Alternatively, the foreign language requirement may be satisfied by scoring a "C" on the final exam of the first-year, second-semester course in a foreign language. Previous undergraduate coursework may be used to satisfy this requirement. Old English may satisfy one semester of this requirement. Foreign language credits do not apply toward the 31-hour degree requirement, unless taken at the graduate level.

Students must remain continuously enrolled, except in summer, for a minimum of 1 credit hour per semester. ENGLISH 5899 is the continuous enrollment course number.

Students must complete a formal Program of Study and have it signed within a year after admission. A final Program of Study must be submitted and signed during the semester a student files to graduate.

Students must complete all coursework within seven years.

Students must take at least one course from five of the seven designated areas, including at least one course from areas I & II, one course from areas III & IV, and one course from areas V-VII:

¹ Satisfies 18th- or 19th-Century requirement, depending on the content.
² Satisfies 19th- or 20th-Century requirement, depending on the content.

Other courses in the catalog at the 400 or 500 level may satisfy an area requirement if the content is appropriate.

Students who focus on Literature must complete ENGLISH 5601 on a topic related to the study of Literature.

**Language and Literature Emphasis**

If desired, a student may elect the Language and Literature Emphasis when obtaining the M.A. in English. At least 12 hours selected from the following list of courses are required:

<table>
<thead>
<tr>

ENGLISH 5550M/5555M  Graduate Seminar In Rhetoric And Composition  3
ENGLISH 5550P  Graduate Seminar: Sociolinguistics And Dialectology  3
Total Credits  31

For students interested in teaching in community colleges or secondary schools or in pursuing a Ph.D. in composition and rhetoric, ENGLISH 5519 is highly recommended. ENGLISH 5519 is required for graduate teaching assistants.

In addition to the requirements for areas I & II, students must take at least one course from three of the five remaining areas (III-VII), including at least one course from areas III-IV and at least one course from areas V-VII.

Students who focus on Language & Literature must complete ENGLISH 5602 on a topic related to the study of Language & Literature.

**Manuscript, Print Culture, and Editing Emphasis**

If desired, a student may elect the Manuscript, Print Culture, and Editing Emphasis when obtaining the M.A. in English. This emphasis examines the social, cultural, economic, and political history of the written word. It considers relationships among authors, editors, publishers, printers, illustrators, and booksellers as well as the reception of texts by readers, reviewers, and critics. In addition, it allows students to study the production of texts through the centuries while also gaining hands-on editing experience through internal and external publishing internships. Students will take a wide variety of courses covering a range of historical periods that have a significant emphasis on the history of reading, writing, and authorship as well as courses that focus on aspects of contemporary publishing and editing.

This emphasis also follows the distribution requirements for the M.A. in English, and it requires that students take twelve (12) of the 31 required credit hours in courses that have been designated as ones fulfilling the goals of the emphasis in Manuscript, Print Culture, and Editing; some courses will always be so designated, including the following:

<table>
<thead>
<tr>

</table>
New courses may receive the designation if approved by the Department of English's Graduate Committee.

Students who elect the MPCE emphasis must complete ENGLISH 5603 on a topic related to the study of Manuscript, Print Culture, and Editing.

**Culminating Experience**

At the end of their M.A. course work (either in the last semester or the second to last semester), all M.A. students in English will revise a seminar paper (written in a previous course) under the guidance of a faculty mentor. The goal of the revisions will be to create a polished paper of about 20-30 pages that could be the basis for a conference paper, a writing sample, or a publishable article.

Students will enroll in and successfully complete one hour of ENGLISH 5601, ENGLISH 5602, or ENGLISH 5603 for their "Culminating Experience," as is appropriate depending on the focus of their studies. Enrollment is required in order to work on this final paper with their chosen faculty mentor.

Final papers will be reviewed by a faculty committee that will rotate each academic year. The committee will consist of two assigned members of the graduate faculty appointed by the Director of Graduate Studies, who will work with the student's faculty mentor.

Students will turn in their revised papers to their mentors and the review committee at least two weeks prior to the end of the semester. The mentor is responsible for arranging a meeting with the student and the review committee before the end of the semester in which the Culminating Experience is taken. After conducting a defense about the paper and providing feedback for the student, the mentor and the review committee will assign a grade of pass or fail. Students must complete the oral defense in order to pass.

In addition to the department requirements above, graduate students in English must comply with the requirements listed in the General Graduate Academic Regulations and Information section of this catalog.
Master of Fine Arts: Creative Writing and Media Arts

The Department of English offers the degree Master of Fine Arts (M.F.A.) in Creative Writing and Media Arts. This interdisciplinary degree includes coursework in allied programs in Communication Studies and Theatre. The 42-hour program provides learning opportunities in writing, literary publishing, broadcasting, screen and stage writing, and production skills. The M.F.A. is a terminal degree in the field of Creative Writing and is designed to prepare students for careers as literary artists, authors, playwrights, poets, teachers, and screenwriters.

Admission

The application process is competitive. Satisfying the admission requirements does not guarantee admission to the program.

The applicant must hold:

- a B.A. in English, or a B.A. degree that includes at least 30 hours of sophomore-, junior- or senior-level English courses, or the equivalent. Applicants with fewer than 30 hours of undergraduate English courses may be admitted and assigned additional coursework as part of their program. These extra hours are added to the hours required for graduation.
- a 3.0 cumulative grade-point average in undergraduate work and a 3.0 average in undergraduate English coursework. In unusual circumstances, the Graduate Committee may consider applicants with lower grade-point averages.

Applicants will be asked to submit the following materials with their online application:

1. Academic information, including institutions attended, degrees earned, GPA, foreign language experience, honors and awards, and relevant work experience
2. Writing sample that demonstrates the applicant's writing abilities in a single emphasis area (no more than 10 pages for poetry; no more than 30 pages for fiction, creative nonfiction, playwriting or screenwriting)
3. Statement of purpose that describes the applicant’s academic and professional objectives in an essay of 500-600 words, discussing in detail their interest, research, and writing in their emphasis area (upload file)
4. Three letters of recommendation that evaluate the applicant's readiness for graduate study written by three professors or others who know the applicant's abilities and potential well (provide email addresses and recommenders will receive instructions to upload letters)
5. GRE score of 60 percent or higher on the verbal aptitude section (submit official scores using code 6872)
6. Transcripts from all post-secondary schools attended (mail to UMKC Office of Admissions, 5100 Rockhill Road, 120 Administrative Center, 64110)
7. Graduate Teaching Assistantship application materials, if applying, including a 250-500 word teaching statement addressing the applicant’s interest in and qualifications for teaching, and an academic writing sample from an upper-level college course (upload files)

Students may not take more than six hours of graduate credit in English before entering the program as a "fully admitted" student.

Student Learning Outcomes

Students graduating from this program will:

- Mastery of poetics or storytelling craft through the creation of a full-length manuscript of poetry, fiction, non-fiction, plays, or screenplays that are structurally sound, polished, and complete, and have a distinct voice;
- Effective problem-solving and revision strategies in the composition of poems, fiction, non-fiction, plays, or screenplays;
- A deliberate, masterful command of language, including style, grammar, and mechanics;
- Proficiency in at least one genre outside of their primary field and the ability to apply the techniques of their secondary genres to the work they produce in their primary field or study;
- Sophisticated critical analyses of literary texts, including an understanding of how a text displays a writer's artistic techniques and the ability to incorporate those techniques into their own writing; and
- Thorough knowledge of the literary traditions of their primary genre and the ability to situate their own work within current literary conversations.

Degree Requirements

Students must earn 42 graduate credit hours beyond the bachelor's degree. Of these, at least 27 hours must be at the graduate level (courses numbered 5500 and above) and taught by a member of UMKC's graduate faculty.

Students must maintain a 3.0 (B) grade-point average to remain in the M.F.A. program and to complete the degree.

Foreign Language Requirement: By the time of graduation from the M.F.A. program, students must have completed one year (two university semesters) of a single foreign language. Alternatively, the foreign language requirement may be satisfied by scoring a "C" on the final exam of the first-year, second-semester course in foreign language. Previous undergraduate coursework may be used to satisfy this requirement.

Students must remain continuously enrolled, except in summer, for a minimum of 1 credit hour per semester. ENGLISH 5899 is the continuous enrollment course number.
Students must complete a formal Program of Study and have it signed within a year after admission. A final Program of Study must be submitted and signed during the semester a student files to graduate.

Students must complete all coursework within seven years.

Students must focus on one or more of the following genres:

- Creative Nonfiction (p. 284)
- Fiction (p. 287)
- Playwriting (p. 290)
- Poetry (p. 293)

With approval from the Director of Creative Writing and the instructor of the course, students may arrange to submit creative work in their core genre in a workshop of another genre.

Residency requirements: a minimum of 33 hours must be completed at UMKC.

**Requirements for M.F.A. Thesis**

In consultation with the faculty, the student will choose a thesis committee comprised of three members: a thesis director from the M.F.A. faculty and two other faculty members approved by the director and selected from the M.F.A. faculty, the faculty of another institution, or the faculties of the Departments of English, Communication Studies, or Theatre. Under the guidance of the thesis director, the student will complete a publishable or producible manuscript of one of the following:

- a book of poems (48-80 pages, single spaced); or
- a book of short stories or creative nonfiction essays (180 pages, double spaced); or
- a novel or novel-length nonfiction book (180-page minimum, double spaced); or
- a full-length play or several one-act plays; or
- a feature-length screenplay (95-120 pages) or a series bible and two 1-hour episodes (20 pages + two 45-page episodes); or
- a full-length cross-genre work, with Committee Chair permission.

At the completion of the writing project, the student will meet with his or her committee for a one-hour defense of the thesis.

Advisors may approve courses in other departments that may be highly valuable for particular student programs, e.g., History for documentary film, Foreign Language for translation work, Philosophy for aesthetics and theoretical/experimental approaches, and Art. Collaborative directed studies may be offered to allow two or more students to use two or more genres/media. Students may also seek collaborative opportunities in the Conservatory of Music and Dance and in Computer Science.

In addition to the department requirements above, graduate students in English must comply with the requirements listed in the General Graduate Academic Regulations and Information (p. 1189) section of this catalog.
Master of Fine Arts: Creative Writing & Media Arts - Creative Nonfiction Option

Student Learning Outcomes

Students graduating from this program will:

• Show mastery of storytelling craft through the creation of a full-length manuscript of creative nonfiction that: a) is structurally sound; b) is polished and complete; c) has a distinct voice and/or vision.
• Show evidence of effective problem-solving and revision strategies
• Demonstrate a deliberate, masterful command of language, including: a) Style; b) grammar and mechanics.
• Demonstrate, in the text or critical introduction, a proficiency in at least one genre outside of their primary field and the ability to apply the techniques of their secondary genres to the work they produce in their primary field of study
• Demonstrate sophisticated critical analyses of literary texts, including an understanding of how a text displays a writer’s artistic techniques and the ability to incorporate those techniques into their own writing.
• Demonstrate thorough knowledge of the literary traditions of their primary genre and the ability to situate their own work within current literary conversation.

Coursework

This emphasis follows the Master of Fine Arts in Creative Writing and Media Arts (p. 282) Program Requirements. Students must complete the following coursework for this emphasis:

I. 12 hours of craft workshop: Students choose 4 workshops in their core genre

III. 12 hours of literature courses are required. 15 hours are recommended.

Students choose from among more than 65 literature courses listed below. Their principal focus will be in the core genre in which they plan to write their final portfolio, but they may also reach into other genres as well. With their advisor’s permission, students may also choose courses from other departments.

IV. 6 Hours of Thesis Portfolio: ENGLISH 5598A

V. 6 Hours Electives

From the list of literary classes above, students complete sufficient credit hours to bring the total of all requirements to 42 credit hours. With advisor’s approval, students may also select electives from other departments.
Master of Fine Arts: Creative Writing and Media Arts - Poetry Option

Student Learning Outcomes

Students graduating from this program will:

- Show mastery of storytelling craft through the creation of a full-length manuscript of poetry, fiction that: a) is structurally sound; b) is polished and complete; c) has a distinct voice and/or vision.
- Show evidence of effective problem-solving and revision strategies.
- Demonstrate a deliberate, masterful command of language, including: a) style; b) grammar and mechanics.
- Demonstrate, in the text or critical introduction, a proficiency in at least one genre outside of their primary field and the ability to apply the techniques of their secondary genres to the work they produce in their primary field of study.
- Demonstrate sophisticated critical analyses of literary texts, including an understanding of how a text displays a writer’s artistic techniques and the ability to incorporate those techniques into their own writing.
- Demonstrate thorough knowledge of the literary traditions of their primary genre and the ability to situate their own work within current literary conversations.

Coursework

This emphasis follows the Master of Fine Arts in Creative Writing and Media Arts Program Requirements. Students must complete the following coursework for this emphasis:

I. 12 hours of craft workshop: Students choose 4 workshops is their core genre

**IV. 6 Hours of Thesis Portfolio: ENGLISH 5598A**

**V. 6 Hours Electives**

From the list of literary classes above, students complete sufficient credit hours to bring the total of all requirements to 42 credit hours. With advisor's approval, students may also select electives from other departments.
Interdisciplinary Ph.D in English

English is an academic discipline eligible for full participation in UMKC's Interdisciplinary Ph.D. Program. Interested students should review the School of Graduate Studies catalog for general and discipline-specific admission criteria, academic regulations, and degree requirements and also contact the Department's I.Ph.D. Coordinator.

Suggested Focus Areas: American Studies; Manuscript and Print Culture; Medieval Studies; Rhetoric and Composition; Transatlantic Studies; Women's and Gender Studies.

English as a Primary Discipline coordinates well with the co-disciplines of Art History, History, and the Humanities Consortium.
Environmental Studies Program

Program Description
The Environmental Studies Program provides students with the most innovative preparation in urban environmental issues and sustainability. The ES program engages a diverse student body with a strong foundation in environmental and geosciences. It includes relationships between humans, society, and the environment. In addition to core courses in environmental science, environmental courses emphasizing the humanities and social sciences provide necessary balance for addressing physical Earth issues in a societal context. Undergraduate students gain essential life skills, an appreciation for complex environmental processes, and respect for the diversity of environmental challenges in both Environmental Studies BA and Environmental Science BS degrees.

The department has offered geography and geology courses since 1934. The department also offers a master of science degree in environmental and urban geosciences. Students who designate geosciences as their coordinating discipline for the interdisciplinary doctoral program must meet admission and other requirements available from the department. See the School of Graduate Studies section of the graduate catalog for more information about doctoral programs.

Faculty
Program Director:
Caroline P. Davies

Participating Architecture, Urban Planning and Design Faculty:
Joy Swallow, Michael Frisch, Sungyup Kim, and Jacob Wagner

Participating Biology Faculty:
Aaron Reed

Participating Business Faculty:
Sandy Price, David Renz, and Li Sun

Participating Chemistry Faculty:
Kathleen Kilway, and J. David VanHorn

Participating Engineering Faculty:
ZhiQiang Chen, John Kevern, Deborah O'Bannon, and Jerry Richardson

Participating Economics Faculty:
Mathew Forstater and Michael Kelsay

Participating Education Faculty:
A. Louis Odom

Participating Geosciences Faculty:
Jimmy Adegoke, Caroline Davies, Steven Driever, Syed Hasan, Alison Graettinger, Wei Ji, Jejung Lee, James Murowchick, Tina Niemi, and Fengpeng Sun

Participating History Faculty:
Brian Frehner and John Herron

Participating Law Faculty:
John Ragsdale and Irma Russell

Participating Philosophy Faculty:
James Sheppard

Participating Political Science Faculty:
Reginald Bassa

Undergraduate
Undergraduate Degrees:
- Bachelor of Arts: Environmental Studies (p. 351)
- Bachelor of Science: Environmental Science (p. 356)
- Environmental Studies Minor (p. 361)
Courses

**ENV-STDY 325 Cultural Perspectives on the Environment Credits: 3**
This course explores the history of conservation practices in American agriculture from the 1700s through the present. Additionally, the course examines the past and present legal implications of environmental statutes for minority farmers from a social and environmental justice perspective.

**Cross Listings:** GEOG 325.

**ENV-STDY 334 Gender and the Environment Credits: 3**
This course provides a survey of different ways women relate to nature. The objectives of the course are: to understand historical relationships between women and nature in the western world, to understand different theoretical approaches to studying women and nature, to explore the geography of women’s activism on behalf of the environment, and to understand how women’s health is linked to the environment.

**Cross Listings:** GEOG 334.

**ENV-STDY 412 Global Tourism Credits: 3**
This course is a regional survey of world tourism. Topics include the uniqueness of place, the marketing of tourist destinations, and the cultural, economic, and environmental impacts on host societies.

**Prerequisites:** GEOG 105 or GEOG 200 or GEOG 202.

**ENV-STDY 430 Soil and Groundwater Remediation Credits: 3**

**Prerequisites:** GEOG 335 (or GEOLOGY 335).

**ENV-STDY 450 Ecotoxicology Credits: 3**
This course addresses the fundamentals of ecotoxicology, integrating the sciences of ecology and toxicology. Students will learn the biological basis for pollutant effects on individuals and populations of plants and animals, how pollutant intensity varies as a function of bioavailability, the basics of risk assessment, and how pollutant effects are modified by ecological interactions within communities and ecosystems. The ultimate goal of ecotoxicology is to predict the effects of pollution within an ecological context.

**Prerequisites:** BIOLOGY 108, CHEM 211, CHEM 212R.

**ENV-STDY 499WI Environmental Studies Practicum Credits: 3**
Students conduct research, participate in discussions, and prepare written reports on selected topics concerning the environment.

**Prerequisites:** Senior standing, RooWriter.
Family Studies

Program Director:
Deborah B. Smith Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=smith), Professor, Department of Sociology

Haag Hall (http://www.umkc.edu/virtualtour/haag-hall.asp), Room 208

Undergraduate
- Minor in Family Studies (p. 303)
Family Studies Minor

Student Learning Outcomes

Students graduating from this program will:

• Demonstrated understanding of family issues
• Translation of academic knowledge into lay-person friendly materials
• Demonstrated understanding of human development

Through its Family Studies Program, the College of Arts and Sciences offers a family studies minor for matriculated undergraduate students interested in the welfare and empowerment of American families. This interdisciplinary academic curriculum introduces participants to the sociological and psychological foundations of families, as well as the historical, political and social climates in which they exist. Students who complete the 18-hour (nine hours core and nine hours elective) course of study will have expanded career opportunities in areas such as human services, health care, law, communications, program development and academic research.

Students wishing to complete a minor must declare their intention to their advisor. Completion of the minor is recorded on the student's transcript.

The following classes can be used toward the nine credit hours of core requirements:

<table>
<thead>
<tr>

Associate Professors:
K. Scott Baker (chair), Gayle Levy, Nacer Khelouz, Alice R. Reckley Vallejos, Alberto Villamandos

Assistant Professors:
Matthew Edwards

Associate Teaching Professors:
Lindsay Myers

Department Description
The Department of Foreign Languages and Literatures offers programs of study leading to the bachelor of arts degree in Languages and Literatures, with an emphasis in French Language and Literature, Spanish Language and Literature, or Classical Languages and Cultures; and graduate-level work leading to a master of arts in Romance Languages and Literatures (French and Spanish). In addition, undergraduate minors are offered in French, German, German Studies, Spanish, and Classics. Language instruction also is offered in Arabic, Ancient Greek, Italian and Latin.

Career Implications
Aside from pursuing teaching careers, holders of degrees in foreign languages are in demand by government, the media and international business in growing numbers, as the need for increased sophistication and expertise in international affairs continues to expand. Multinational companies and organizations now view foreign language skills as an asset in a prospective employee. In the past 10 years this notion has become widespread in such areas as business, industry, commerce, civil service, education, law, communications media and health services. The changing conditions of international economics, politics and communications indicate that this trend will continue.

Higher Educational Applications
Reading knowledge of a foreign language is a requisite for many graduate degrees. Foreign language proficiency, moreover, is gaining increasing importance on all levels of university instruction as curricula are internationalized. Scholars and professionals in many fields have long recognized the need for, and advantages of, foreign language competency for improved international communication and effective conduct of basic and applied research.

Special Resources
Credit by Exam
Beginning-level courses (110, 120) are not applicable toward requirements for the major. College credit for them may be earned by examination.
CLEP credit is available for French, German or Spanish (110 and 120). Contact Testing Services to arrange for the exam. A passing score is necessary to receive credit. (No more than 30 of a student's total hours may be earned by examination, and students with senior standing cannot earn credit via CLEP.)

Departmental testing or "Credit by Examination," is also available for 211-level credit. Students should first speak to the appropriate language advisor. The form is available online here (http://www.umkc.edu/registrar/forms/credit_by_exam.pdf). A minimum grade of C is necessary to receive credit.

**Study Abroad**

UMKC has exchange and study agreements with other institutions in many parts of the world. Students have an opportunity to spend a year or a semester of study at a number of universities around the globe, including at the University of Seville in Spain, the University of Lyon II in France, the University of Klagenfurt in Austria and the University of Veracruz in Xalapa, Mexico. Summer programs are held at the University of Buenos Aires, Argentina; the University of Granada, Spain; and the University of Lyon II, France.

The department encourages students to travel and study abroad on our programs or those offered by any accredited American university. It should be noted, however, that the department must approve in advance any courses taken abroad for major or graduate credit. Interested students should contact the appropriate departmental advisor.

**Language Resource Center**

A modern facility housing audio, video and computer equipment and both general use and specialized software is located in 109 Scofield Hall. The purpose of the lab is to supplement and support in-class foreign language learning. Tutoring services for students of French, German and Spanish are provided free of charge. Conversation hours are also held in the Language Resource Center. All language students are encouraged to take advantage of the resources of the LRC.

**Requirements for Teacher Certification in Foreign Languages**

Certification as a Foreign Language teacher (K-12) in either Kansas or Missouri requires that a student complete specific requirements in Spanish, French or German and the School of Education. A separate application for teacher education is required. For further information about the program, contact Dr. Reckley Vallejos, reckleya@umkc.edu, and the School of Education at (816) 235-2234.

Professor Emeritus of Spanish
B.A., M.A. (Occidental College); Ph.D. (University of California, Los Angeles)

Iman Osman Khalil
Associate Professor Emerita of German
M.A., Dr.Phil. (University of Munich)

Raymond T. Riva
Professor Emeritus of Spanish
B.A., Ph.D. (University of Illinois); A.M. (Middlebury College)

Undergraduate

Undergraduate Degrees:

- Bachelor of Arts: Languages and Literatures (Emphasis areas in French, German, Spanish and Classics) (p. 323)
- Minors in French, German, Spanish, or Classics (p. 329)
- Minor in German Studies (p. 327)
Graduate Degrees:

- Master of Arts in Romance Languages (p. 330)

Arabic Courses

ARABIC 110 Elementary Arabic I Credits: 5
Fundamentals of the language, essentials of conversation, grammar, practical vocabulary, useful phrases, and the ability to understand, read and write simple classical Arabic.

ARABIC 120 Elementary Arabic II Credits: 5
Continuation of ARABIC 110.
Prerequisites: ARABIC 110.

ARABIC 211 Second Year Arabic I Credits: 3
Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language.
Prerequisites: ARABIC 120.

ARABIC 221 Second Year Arabic II Credits: 3
Continuation of ARABIC 211.

ARABIC 280 Special Intermediate Arabic Topics I Credits: 1-3
Instruction of Arabic on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit.
Prerequisites: Elementary I and II college-level courses or equivalent.

ARABIC 290 Special Intermediate Arabic Topics II Credits: 1-3
Continuation of ARABIC 280. May not be repeated for credit.

French Courses

FRENCH 110 Elementary French I Credits: 3
The goals of this course are an ability to speak and to understand simple (spoken) French as well as to read and write simple prose.
FRENCH 110 - MOTR LANG 101: French I

FRENCH 120 Elementary French II Credits: 3
Continuation of FRENCH 110.
Prerequisites: FRENCH 110.

FRENCH 120 - MOTR LANG 102: French II

FRENCH 211 Second Year French I Credits: 3
Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language.
Prerequisites: FRENCH 120.

FRENCH 221 Second Year French II Credits: 3
Continuation of FRENCH 211.
Prerequisites: FRENCH 211.

FRENCH 280 Special Intermediate French Topics I Credits: 2-4
Instruction of French on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit.
Prerequisites: FRENCH 110, FRENCH 120.

FRENCH 290 Special Intermediate French Topics II Credits: 2-4
Continuation of FRENCH 280. May not be repeated for credit.
Prerequisites: FRENCH 280.
FRENCH 301 Introduction to French Literature Credits: 3
An introduction to the study of different genres of French literature and techniques of criticism. Readings include representative works of major authors from various periods. Strongly recommended for all majors, to be taken before or concurrently with other literature courses. Taught in French.

FRENCH 303 Masterpieces of French Literature I Credits: 3
An introduction to the history of French literature from the Middle Ages to 1800, stressing the historical context, the major literary movements, and the development of the various genres. Selected readings of the works of the major authors of the period. Taught in French.

FRENCH 304 Masterpieces Of French Literature II Credits: 3
An introduction to the history of French literature from 1800 to the present stressing historical context, the major literary movements and the developments of the various genres. Selected readings of the works of major authors of the period. Taught in French.

FRENCH 315 Intermediate Composition and Conversation Credits: 3
Grammar review, practice in speaking and writing French, emphasis on writing. Required for major.
Prerequisites: FRENCH 221.

FRENCH 325 Intermediate Conversation and Composition Credits: 3
Grammar review, practice in speaking and writing French; emphasis on speaking. Required for major.
Prerequisites: FRENCH 221.

FRENCH 340WI French Texts in Translation Credits: 3
Seminar on French texts in translation. Class will be conducted in English and no knowledge of French is necessary. May be taken for major credit.
Prerequisites: ENGLISH 110, ENGLISH 225, RooWriter.

FRENCH 350 French Civilization I Credits: 3
An historical introduction to French civilization and culture with emphasis on historical, social and cultural development.
Prerequisites: FRENCH 221.

FRENCH 351 Introduction to French Phonetics Credits: 3
Drill and practice in pronunciation in class and in language laboratory.
Prerequisite: FRENCH 221.

FRENCH 352 French Civilization II: Contemporary French Civilization Credits: 3
An in-depth survey of contemporary French culture, including major historical events and movements that have shaped modern France, as well as geography, the political system, family life and education, economics, etc.
Prerequisites: FRENCH 221.

FRENCH 354 French Civilization III: Lyon, Crossroads of France and Europe Credits: 3
An introduction to French culture and civilization through the history, geography, culture and arts of Lyon and its region. Offered during the Study Abroad Program in Lyon.

FRENCH 380 Special Topics Credits: 1-3
Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes.

FRENCH 414 Medieval Literature Credits: 3
Selected readings in various genres including epic, romance, theater and lyric. Emphasis will be placed on the intertextual relations and the cultural and historical context surrounding text production in the Middle Ages.

FRENCH 415 Advanced Conversation and Composition I Credits: 3
Practice in speaking and writing French, with attention to the elements of style. First semester required of all majors and second semester recommended. Both semesters required of prospective high school teachers. Either or both semesters may be repeated. No more than six hours of credit may be applied toward a degree.
Prerequisites: FRENCH 325.

FRENCH 417 16th-Century French Literature Credits: 3
Selected readings in prose and poetry from Marot through Astree. Authors may include Rabelais, Ronsard, du Bellay, Montaigne, Marguerite de Navarre.

FRENCH 424 19th-Century French Literature Credits: 3
Selected readings in various genres from Romanticism through Symbolism.

FRENCH 426 20th-Century French Literature Credits: 3
Selected readings from the Belle Epoque to the contemporary period.

FRENCH 435 Directed Discussions In Advanced French Credits: 3
Directed discussion on contemporary French culture. The discussions cover a wide range of topics on modern France: social, intellectual and cultural aspects. Students will participate and have the opportunity to observe and react within a cultural frame of reference. Open to advanced students of French and to teachers of the language for in-service training.
FRENCH 440 Medieval Romance Credits: 3
The various movements of French medieval romance from the 12th through 15th centuries with an emphasis on the 12th and 13th centuries. Analysis of literary technique and socio-historical context will be stressed. No knowledge of Old French is assumed.

FRENCH 443 Early French Theater Credits: 3
An examination of the development of French theater from Late Antiquity through the Renaissance, including religious and secular drama. The focus is on literary analysis of the dramatic texts, with some consideration of theater history and dramaturgy. **Prerequisites:** FRENCH 221.

FRENCH 444 Renaissance Poetry Credits: 3
French poetry from the Grand Rhetoriqueurs through the Pleiade. Study of poetic forms, major poets and schools, and different approaches to analyzing poetry. **Prerequisites:** FRENCH 221.

FRENCH 449 Survey of French Theater Credits: 3
A survey of the major French playwrights and their plays from the 17th through the 21st centuries. Historical and cultural influences will be covered as well as the specificities of the genre from the perspective of how the plays are performed and how we read them.

FRENCH 452 Medieval Poetry Credits: 3
A study of medieval poetry including religious and secular poetry, Provencal and Old French lyric, the influence of poetry in other genres such as romance and theater, later medieval poetry of the 14th and 15th centuries, as well as a discussion of the origins of the lyric. **Prerequisites:** FRENCH 221.

FRENCH 455 Fin-De-Siecle and Belle Epoque Credits: 3
Study of the literary, cultural and historical context of this time period in French history, for example: Symbolism, Decadence, and the years 1900-1914.

FRENCH 457 20th Century French Narrative Credits: 3
The analysis of major currents in French 20th century narrative, especially fiction and film. Courses will be organized around narrative themes or historical events and will include social and cultural components.

FRENCH 463 19th-Century French Fiction Credits: 3
Studies in the birth, development and variation of French Romanticism. Readings include de Stael, Senancour, Constant, Hugo, Stendhal and Merimee. The advent of realism and naturalism in France. Readings include Balzac, Flaubert, Daudet, De Maupassant, and Zola.

FRENCH 472 Francophone Studies Credits: 3
Study of different national Francophone literatures. Reading may include writers from Quebec, Haiti, Africa, Louisiana, Vietnam, the French Indies, etc.

FRENCH 473 The Francophone World Credits: 3
This course is an introduction to a large spectrum of Francophone literatures cultures around the world with a focus on North and West Africa, Belgium, Quebec, French Antilles and Haiti. **Prerequisites:** FRENCH 415.

FRENCH 474 Orientalism and Literature Credits: 3
This course focuses on the impact of Orientalism as a Western ideology of reconstruction of the Orient space. **Prerequisites:** FRENCH 415.

FRENCH 480 Special Topics Credits: 1-3
Each time this course is offered a particular author, genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes.

FRENCH 490 Special Readings Credits: 1-3
Intensive readings in field or literary figure to be selected by the student in consultation with the instructor. Available to advanced students of French; available only when student cannot take regularly scheduled courses. **Prerequisites:** 3.0 GPA.

FRENCH 499 Senior Seminar (Capstone) Credits: 3
Required for major. Covers seminal works of French literature in their historical and cultural context. Course content varies, but will include such elements as geography, politics, folklore, history of the language, architecture, art and music. **Prerequisites:** 21 hours beyond first year.

FRENCH 5500CF Courts and Culture in the Middle Ages Credits: 3
This cluster course offers an interdisciplinary approach to the study of the Middle Ages, focusing on medieval cultures in Europe. Arranged around a series of themes, the cluster will read a variety of documentary and literary texts to investigate not only the "high culture" of the courts but also the interaction of people from various social backgrounds in Western Europe. **Prerequisites:** admission to the graduate program in Romance Languages.
FRENCH 5512 17th-century French Literature Credits: 3
Selected readings in the literature of the 17th century, with an emphasis on non-dramatic works.
Prerequisites: Admission to M.A. in Romance Languages and Literature program.

Cross Listings: FRENCH 412.

FRENCH 5513 18th-century French Literature Credits: 3
Emphasis on philosophical and social significance. Authors may include Marivaux, Beaumarchais, LeSage, L'Abbe Prevost, Montesquieu, Rousseau, Diderot.
Prerequisites: Admission to M.A. in Romance Languages and Literature program.

Cross Listings: FRENCH 413.

FRENCH 5514 Medieval Literature Credits: 3
Selected readings in various genres including epic, romance, theater and lyric. Emphasis will be placed on the intertextual relations and the cultural and historical context surrounding text production in the Middle Ages.
Prerequisites: Admission to M.A. in Romance Languages and Literature program.

Cross Listings: FRENCH 414.

FRENCH 5517 16th-century French Literature Credits: 3
Selected readings in prose and poetry from Marot through Astree. Authors may include Rabelais, Ronsard, du Bellay, Montaigne, Marguerite de Navarre.

Cross Listings: FRENCH 417.

FRENCH 5520 Non-Dramatic 17th-century French Literature Credits: 3
Evaluation and reading of the works of Malherbe and contemporaries, of Descartes and Pascal and contemporaries, and of the great authors at the height of the classical period.

FRENCH 5524 19th-century French Literature Credits: 3
Selected readings in various genres from Romanticism through symbolism.

FRENCH 5526 20th-century French Literature Credits: 3
Selected readings from the Belle Epoque to the contemporary period.

Cross Listings: FRENCH 426.

FRENCH 5540 Medieval Romance Credits: 3
The various movements of French medieval romance from the 12th through 15th centuries with an emphasis on the 12th and 13th centuries. Analysis of literary technique and socio-historical context will be stressed. No knowledge of Old French is assumed.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

Cross Listings: FRENCH 440.

FRENCH 5543 Early French Theater Credits: 3
An examination of the development of French theater from Late Antiquity through the Renaissance, including religious and secular drama. The focus is on literary analysis of the dramatic texts, with some consideration of theater history and dramaturgy.

Prerequisites: Admission to the MA in Romance Languages Literature program.

Cross Listings: FRENCH 443.

FRENCH 5544 Renaissance Poetry Credits: 3
French Poetry from the Grand Rhetoriqueurs through the Pleiade. Study of poetic forms, major poets and schools, and different approaches to analyzing poetry.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

Cross Listings: FRENCH 444.

FRENCH 5545 Epistolatory and the Novel Credits: 3
Explorations of the genre through the analysis of 17th- and 18th-century French novels. Introduced by a theoretical review.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

Cross Listings: FRENCH 445.
FRENCH 5546 17th-century French Drama Credits: 3
The classical period: Emphasis on Corneille, Racine and Moliere.
Prerequisites: Admission to M.A. in Romance Languages and Literature program.

Cross Listings: FRENCH 446.

FRENCH 5547 19th-century French Poetry Credits: 3
The study of the poetry and dominant poetic movements of the 19th century, with special attention given to different approaches to its analysis.
Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5548 20th century French Theater Credits: 3
Analysis of major currents of French theater of the 20th Century, with emphasis upon the postwar period and its movements.
Cross Listings: FRENCH 448.

FRENCH 5552 Medieval Poetry Credits: 3
A study of medieval poetry including religious and secular poetry, Provencal and Old French lyric, the influence of poetry in other genres such as romance and theater, later medieval poetry of the 14th and 15th centuries, as well as a discussion of the origins of the lyric.
Prerequisites: Admission to M.A. in Romance Languages and Literature program.

Cross Listings: FRENCH 452.

FRENCH 5553 Lyon, Crossroads of France and Europe Credits: 3
Lyon, Crossroads of France and Europe

FRENCH 5554 The Intellectual Origins of the French Revolution Credits: 3
Study of philosophical and political texts by Montesquieu, Rousseau, Voltaire, Diderot, etc. on government, society, language, freedom and equality. Critical study of the Enlightenment.
Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5555 Fin-De-Siecle and Belle Epoque Credits: 3
Study of the literary, cultural and historical context of this time period in French history, for example: Symbolism, Decadence, and the years 1900-1914.
Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRN-LNG 5899 Required Graduate Enrollment Credit: 1

German Courses

GERMAN 110 Elementary German I Credits: 3
The goals of this course are an ability to speak and to understand simple (spoken) German as well as to read and write simple prose.

GERMAN 120 Elementary German II Credits: 3
Continuation of GERMAN 110.
Prerequisites: GERMAN 110.

GERMAN 211 Second-Year German I Credits: 3
Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language.
Prerequisites: GERMAN 120.

GERMAN 221 Second-Year German II Credits: 3
Continuation of GERMAN 211.
Prerequisites: GERMAN 211.

GERMAN 280 Special Intermediate German Topics I Credits: 2-4
Instruction of German on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit.
Prerequisites: GERMAN 110, GERMAN 120.

GERMAN 290 Special Intermediate German Topics II Credits: 2-4
Continuation of GERMAN 280. May not be repeated for credit.
Prerequisites: GERMAN 280.

GERMAN 300CZ The Other Europe Credits: 3
This course addresses a crucial, if often overlooked arena of history and culture: East-Central Europe. Open to all undergraduates, this course will explore the challenges of geopolitics, modernization, Western influences, multi-ethnic societies, and collective memory.

GERMAN 301 Introduction to Literary Studies Credits: 3
An introduction to the study of the different genres of German literature and techniques of criticism. Readings include representative works of major authors from various periods. Strongly recommended for all majors. To be taken before or concurrently with other literature courses. Taught in German.

GERMAN 305 Current Events in Germany Credits: 3
This course focuses on contemporary issues in Germany such as politics, the economy, foreign affairs, culture, science, education, etc. Various television news programs, news magazines, and newspapers will be the primary sources of information in this course.
Prerequisites: GERMAN 221.

GERMAN 306 Aspects Of Contemporary German Culture (Conducted In German) Credits: 3
The goal of the course is to familiarize the student with various aspects of contemporary culture in the German-speaking countries (Germany, Switzerland, Austria). The class will be structured around lectures, guest lectures, audiovisual presentations and discussions, emphasizing crosscultural comparisons.

GERMAN 307 From the Middle Ages to the Baroque Credits: 3
The goal of this course is to introduce students to the history of German literature from the Middle Ages to the Baroque, emphasizing the historical and social context and the development of various genres.
Prerequisites: GERMAN 221.

GERMAN 308 From the Enlightenment Through the 19th Century Credits: 3
The goal of this course is to introduce students to the history of German literature from the Enlightenment through the 19th century, emphasizing the historical and social context and the development of various genres.
Prerequisites: GERMAN 221.

GERMAN 310 Classical Period Of German Literature Credits: 3
Readings in the late 18th and 19th centuries with emphasis on Goethe and Schiller.
GERMAN 313 CC: Intro to German Studies Credits: 3
This cluster course explores major themes in German culture, history, and philosophy from the medieval period to the present. Concentrating on primary sources in English translation also introduces students to the methodologies of German Studies. German language ability not required, but class can count toward German major for students who do the written work in German.
Prerequisites: ENGLISH 110 (or HISTORY 206).

GERMAN 314CC Weimar Culture: Gender and Modernity in Central Europe Credits: 3
A course concerned with the culture of Weimar Germany (1919-1933), a period of crucial importance not only for German history but also for European and world history. Examines how film, advertising, theater set design, painting, photography and other media sought to re-imagine gender identities, foster new cultural forms, and transform economic relations during the Roaring Twenties in Germany.

GERMAN 315 Intermediate Conversation and Composition I Credits: 3
Practice in speaking and writing German; emphasis on idiomatic usage. Required for major.
Prerequisites: GERMAN 221.

GERMAN 325 Intermediate Conversation and Composition II Credits: 3
Continuation of GERMAN 315. Required for major.
Prerequisites: GERMAN 315.

GERMAN 335 Commercial German Credits: 3
The class covers business practices and correspondence in the German language; special vocabulary of business, economics, banking, and their contextualization in the European Union. It will also include refinement of grammatical and stylistic skills.
Prerequisites: GERMAN 221.

GERMAN 340 Society and Literature in 20th-Century Germany Credits: 3
Conducted in English with English translations. Literary currents and figures in 20th-century Germany against their social and political background, from the turn of the century to the postwar period. Reading and discussion of major works by such authors as Thomas Mann, Hesse, Kafka, Rilke, Brecht, Boll, Grass, Hochhuth and Weiss. Open to students of all disciplines. Not for major credit in German.

GERMAN 341 German Film Credits: 3
This course introduces students to the important contributions of German films to the development of movies as a unique literary art form. The class will cover important terms and concepts in film theory, the specifically German context of film, and important themes and periods in German film history. Taught in English with subtitled films.

GERMAN 342 Contemporary German Film 1980 Credits: 3
This course will introduce students to the important role film has played in the public discourse about German society immediately prior to reunification in the 1980s and during the turbulent social adjustments in unified Germany after 1990. Lectures and readings in the first week will cover important terms and concepts in film theory as well as provide background for the specific German context of film history. The class will treat film in the 1980s in terms of continuations of and liberations from the New German Cinema of the 1970s in West Germany, and in the context of state censorship and sponsorship of film in East Germany. We will approach movies from the 1990s and 2000s by accessing their depiction of historical and contemporary Germany through the lens of reunification, and we will examine issues of German identity especially as contextualized by reunification and multiculturalism. The course will be taught in English with subtitled films.
Prerequisites: GERMAN 315.

GERMAN 343 Eastern European Film In Context Credits: 3
The course covers themes in film from 1945 to present between the Baltic and the Balkans, including war, socialism, literary nationalisms, irony, and everyday life. The formal characteristics of film are also discussed.

GERMAN 344 Scandinavian Film Credits: 3
The course covers film in Scandinavia, from silent to contemporary movies. The relation of Scandinavian film to literature, art, social and political movements, as well as the economy will be discussed.

GERMAN 380 Special Topics Credits: 1-3
Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes.

GERMAN 401 Bertolt Brecht Credits: 3
Covers major works by Brecht in their social and historical context. May focus on a specific genre or survey parts or all of Brecht’s career. Discussions and readings in German.
Prerequisites: GERMAN 315.
GERMAN 410 Music in German Culture Credits: 3
This course examines the role of music in German national self-definition from late 18th century to the present. The political and ideological role of music will be examined from 1789 to National Socialism, the GDR and reunification, including the gendering of music as feminine in Romanticism, and modernism. Music as it relates to the public and private, as well as collective and individual experiences will also be explored. Different genres and media will be discussed, from opera, art song, and cabaret to ballads and film; literary works thematizing music will be read.
Prerequisites: GERMAN 315.

GERMAN 411 Romanticism Credits: 3
Main currents and authors from the Romantic school, 1780-1820.

GERMAN 412 The German Novelle Credits: 3
An examination of representative noveller of the 19th and 20th centuries. Special emphasis on the study of form.

GERMAN 414 German Lyric Poetry Credits: 3
Lyric poetry from its beginnings to the present. Emphasis on 19th and 20th centuries.

GERMAN 415 Advanced Conversation and Composition I Credits: 3
Practice in speaking and writing German, with attention to the elements of style. Continued in GERMAN 425. First semester required of all majors and second semester recommended. Both semesters required of prospective high school teachers. Either or both semesters may be repeated. No more than six hours of credit may be applied toward a degree.
Prerequisites: GERMAN 325.

GERMAN 420 German Enlightenment Drama Credits: 3
This course covers plays, dramatic theories and theater history in the German-speaking countries 1730-1780. Emphasis will be placed on the theater as a bourgeois instrument of public discourse.
Prerequisites: GERMAN 315.

GERMAN 421 19th-Century Drama Credits: 3
Kleist through Hauptmann.

GERMAN 422 Contemporary Drama Credits: 3
This course will provide students with a survey of the most important dramatic movements of the 20th century. It will proceed chronologically through Expressionism, the Brechtian theatre of alienation, documentary theater and post-modernist theater.
Prerequisites: GERMAN 221.

GERMAN 425 Advanced Conversation and Composition II Credits: 3
Continuation of GERMAN 415. Required for teacher certification in German.
Prerequisites: GERMAN 415.

GERMAN 426 20th-Century German Literature Credits: 3
Selected readings from Neo-Romanticism to the present.

GERMAN 453 Women's Voices in Germany and Austria Credits: 3
The course focuses on the role of women in German and Austrian society from the Roman era to the present, primarily through the examination of literary texts by women.
Prerequisites: GERMAN 221.

GERMAN 480 Special Topics Credits: 1-3
Each time this course is offered a particular author, genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes.

GERMAN 481 East German (DEFA) Film Credits: 3
The course covers East German film from 1945-1989. Differences between films produced in East Germany and Soviet and other Eastern European cinemas will be discussed. Historical, political and cultural influences on film will be analyzed through multiple genres including popular, artistic, pedagogical and critical.

GERMAN 490 Special Readings Credits: 1-3
Intensive readings in a field or literary figure to be selected by the student in consultation with the instructor. Available only to advanced students of German when students cannot take regularly scheduled courses.
Prerequisites: 3.0 GPA.

GERMAN 499 Senior Seminar (Capstone) Credits: 3
Required for major. Covers seminal works of German literature in their historical and cultural context. Course content varies, but will include such elements as geography, politics, folklore, history of the language, architecture, art and music.
Prerequisites: 21 hours beyond first year.
Greek Courses
GREEK 110 Elementary Ancient Greek I Credits: 3
The goal of this course is an ability to read classical Greek. The student will be introduced to the fundamentals of grammar and the basic vocabulary of the language and will do exercises in the reading and writing of sentences. Continuous passages of Greek will be presented by the end of the semester.

GREEK 120 Elementary Ancient Greek II Credits: 3
A continuation of the study of the grammar and vocabulary of classical Greek, with an increasing emphasis on developing skills in translation. By the middle of the semester students will be introduced to selections from Plato, Herodotus or Homer.
Prerequisites: GREEK 110.

GREEK 211 Intermediate Ancient Greek I Credits: 3
Instruction of Greek on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit.
Prerequisites: GREEK 120.

GREEK 221 Intermediate Ancient Greek II Credits: 3
Continuation of GREEK 211. May not be repeated for credit.
Prerequisites: GREEK 211.

GREEK 301 Herodotus Credits: 3
Selected readings in Ancient Greek from Herodotus' Histories.
Prerequisites: GREEK 211.

GREEK 302 Homer Credits: 3
Selected readings in Ancient Greek from Homer's Iliad or Odyssey.
Prerequisites: GREEK 211.

GREEK 310 Selected Readings in Ancient Greek and Rhetoric Credits: 3
Selected readings in Ancient Greek from works by Plato, Aristotle, or the Attic Orators.
Prerequisites: GREEK 211.

GREEK 311 Drama and Lyric Poetry Credits: 3
Selected readings in Ancient Greek from plays by Aeschylus, Sophocles, Euripides, or the Lyric Poets.
Prerequisites: GREEK 211.

GREEK 312 Greek Narrative Prose Credits: 3
Selected readings in Ancient Greek from Herodotus, Thucydides, Xenophon, Lucian, etc.
Prerequisites: GREEK 211.

GREEK 490 Special Readings in Greek Credits: 1-3
Intensive readings in period or genre or literary figure to be selected by the student in consultation with the instructor. Available only to advanced Greek students.

Italian Courses
ITALIAN 110 Elementary Italian I Credits: 3
Intended to give the student the ability to read prose of ordinary difficulty and to understand and speak simple Italian.

A study of the development of picaresque fiction during the Spanish Golden Age. The course deals with novelists principally active during the Baroque period such as Mateo Aleman, Francisco Lopez de Ubeda, Miguel de Cervantes, and Francisco de Quevedo.

SPANISH 435 Peninsular Poetry Credits: 3
This course is a survey of poetics and poetry in Spain from the Reconquest to the present, with emphasis on socio-historical contexts and movements. It examines theoretical and methodological approaches to literary analysis and also provides practical experience in exploring poetic texts. Students will analyze a wide spectrum of poems, while discussing the cultural, philosophical, linguistic, political and ethical considerations that surround the reception of a text.

SPANISH 436 Spain's Transition to Democracy: Literature and Film Credits: 3
This course reviews the cultural production between the death of Francisco Franco in 1975 and the entrance in the European Union in film, literature and music, within its historical and political context.

SPANISH 450 Modern Classics Of Latin American Literature Credits: 3
The goal of the course is to familiarize the student with the principal Latin American writers of the modern period. The focus will be dual: the progressive sophistication of literary technique and the refinement of social conscience. Among the authors to be studied are: Asturias, Borges, Carpentier, Cortazar, Donoso, Fuentes, Garcia Marquez, Paz, Rulfo and Vargas Llosa.

SPANISH 453 Spanish-American Short Story Credits: 3
A study of Spanish-American short stories from Romanticism to the present.

SPANISH 460 U.S.-Latino Literature Credits: 3
An interdisciplinary approach to U.S.-Latino Studies, including both literary and cultural texts. The course will be taught in English, the language in which the texts are produced.

SPANISH 480 Special Topics Credits: 1-3
Each time this course is offered a particular genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes.

SPANISH 490 Special Readings Credits: 1-3
Intensive readings in field or literary figure to be selected by the student in consultation with the instructor. Available, by permission only, to advanced students of Spanish; available only when student cannot take regularly scheduled courses.

Prerequisites: 3.0 GPA.

SPANISH 499 Senior Seminar (Capstone) Credits: 3
Required for major. Covers seminal works of Peninsular and Latin American literature in their historical and cultural context. Course content varies, but will include such elements as geography, politics, folklore, history of the language, architecture, art and music. To be taken during final Fall Semester of residence.

Prerequisites: 18 hours beyond first year.

SPANISH 503 History of the Spanish Language Credits: 3
An introduction to the history of the Spanish language from Latin to the present, with an overview of dialects in the Peninsula and in the Americas.

Prerequisites: Spanish 325 or higher grammar class.

SPANISH 514 Spanish Literature Credits: 3
Selected readings in Spanish narrative, poetry, drama and philosophical essay from the beginning of the 20th Century to the Avant-Garde movements in the 1930's.

SPANISH 516 Medieval Spanish Literature Credits: 3
A study of selected medieval masterpieces in their Old Spanish form, with special emphasis on Romances, the Cantar de Mio Cid La Celestina, El Corbacho, Libro del buen amor, etc. Includes a short history of the Spanish language.

SPANISH 519 Federico Garcia Lorca Credits: 3
A study in depth of the poetry and drama of Federico Garcia Lorca.
SPANISH 5520 Cervantes' Don Quixote, Part 1 Credits: 3
An intensive reading of the first part of Cervantes' novel, Don Quixote.

SPANISH 5521 Cervantes' Don Quixote, Part II Credits: 3
An intensive reading of the second part of Cervantes' novel, Don Quixote. Part One is not a prerequisite.

SPANISH 5526 Golden Age Drama Credits: 3
A study in depth of the creation of national theater by Lope de Vega and his followers.

SPANISH 5527 Pre-Columbian and Spanish Colonial Literature Credits: 3
A study of pre-Columbian works in drama, narrative, and poetry (Popol Vuh, Apu-Ollantay, Incan and Aztec poetry) along with a survey of Spanish-American colonial literature.

SPANISH 5528 Contemporary Spanish Poetry Credits: 3
A comprehensive and intensive study of 20th-century Spanish poetry. The poets and their poetry will be studied in the light of literary movements, foreign influences, political tendencies and philosophical ideas.

SPANISH 5529 Novel of the Mexican Revolution Credits: 3
The revolution as the principal focus of 20th-century Mexican fiction. The course will examine both the evolving understanding of the event/process and the sophistication of narrative technique employed in its presentation. Among the writers to be studied are Azuela, Guzman, Lopez y Fuentes, Yanez, Revueltas, Rulfo and Fuentes.

SPANISH 5530 Spanish Mysticism Credits: 3
An examination of the development of mysticism in Oriental and Occidental civilizations, with emphasis on the great periods of mystic experience as reflected in the literary production of the Spanish Golden Age. Readings could include the works of Fray Luis de Granada, Fray Luis de Leon, Saint John of the Cross and Saint Teresa of Avila.

SPANISH 5531 The Golden Age Novel Credits: 3
A study of major prose works of the Golden Age. Possible topics include authorship, innovative narrative techniques, textual strategies and metafiction issues. Readings could include works by Alfonso Martinez de Toledo, Diego de San Pedro, Fernando de Rojas, Francisco Delicado, Cervantes, and Lope de Vega.

SPANISH 5532 Pastoral Literature Credits: 3
A study of the development of pastoral literature during the Spanish Golden Age. Possible texts: Juan del Encina's Eclogues, Montemayor's Los siete libros de la Diana and Cervantes' Galatea. These works will be examined within their historical and cultural context.

SPANISH 5533 Cervantes' Exemplary Novels Credits: 3
A study of Cervantes' Exemplary Novels within the context of 17th Century Spain. Attention will be paid to interpretive possibilities and how knowledge of historical contexts might influence readings of this rich and varied cultural output.

SPANISH 5534 The Picaresque Novel Credits: 3
A study of the development of picaresque fiction during the Spanish Golden Age. The course deals with novelists principally active during the Baroque period such as Mateo Aleman, Francisco Lopez de Ubeda, Miguel de Cervantes, and Francisco de Quevedo.

SPANISH 5535 Peninsular Poetry Credits: 3
This course is a survey of poetics and poetry in Spain from the Reconquest to the present, with emphasis on sociohistorical contexts and movements. It examines theoretical and methodological approaches to literary analysis and also provides practical experience in exploring poetic texts. Students will analyze a wide spectrum of poems, while discussing the cultural philosophical, linguistic, political and ethical considerations that surround the reception of a text.

SPANISH 5536 Spain's Transition to Democracy: Literature and Film Credits: 3
This course reviews the cultural production between the death of Francisco Franco in 1975 and the entrance in the European Union, in film, literature and music, within its historical and political context.

SPANISH 5550 Modern Classics of Latin American Literature Credits: 3
The goal of the course is to familiarize the student with the principal Latin American writers of the modern period. The focus will be dual: the progressive sophistication of literary technique, and the refinement of social conscience. Among the authors to be studied are: Asturias, Borges, Carpentier, Cortazar, Donoso, Fuentes, Garcia Marques, Paz, Rulfo, and Vargas Llosa.

Cross Listings: SPANISH 450.

SPANISH 5553 Spanish-American Short Story Credits: 3
A study of Spanish-American short stories from Romanticism to the present.

SPANISH 5580 Special Topics Credits: 1-3
Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes.
SPANISH 5580D Special Topics Credits: 1-3
SPANISH 5590 Directed Studies in Spanish & Latin American Literature Credits: 1-3
Intensive readings in a field or literary figure to be selected by the student in consultation with the instructor. Available by permission of graduate advisor or instructor, as appropriate, only when student cannot take regularly scheduled courses.
Bachelor of Arts: Languages and Literatures

Student Learning Outcomes

Students graduating from this program will:

- Attain advanced reading, writing, listening and speaking proficiency in the language studied.
- Obtain a broad base of knowledge and perspectives on the Classical world, or on French-, German- or Spanish-speaking civilizations, and of their respective cultures—literature, the arts, socio-historical, political and economic structures, etc.—within a variety of interpretive frameworks.
- Understand and articulate cultural practices and process as dynamic elements in the construction of identity, and to appreciate and encourage cultural diversity in human endeavor.
- Understand aspects of language and culture in the world as part of all human communication, and within interdisciplinary contexts.
- Develop skills in critical thinking and analysis, including, but not limited to, textual analysis.

General Information

Undergraduate Advisors

French: Gayle Levy
(816) 235-2820, levyg@umkc.edu (myersll@umkc.edu)

German: K. Scott Baker
(816) 235-2823, bakerks@umkc.edu

Larson Powell
(816) 235-1316, powelllar@umkc.edu

Spanish: Alberto Villamandos
(816) 235-2324, villamandosa@umkc.edu

Classics: Jeff Rydberg-Cox
(816) 235-2560, rydbergcoxj@umkc.edu

Initial Advising and Placement

A language placement exam is strongly recommended for all students with previous foreign language experience in French, German or Spanish. The placement exam or the recommendation of a foreign language advisor will best determine a student's level, contributing to his or her success. Contact the department office for more information. Placement test website: http://cas.umkc.edu/ForeignLanguages/PlacementExam.asp

Consultation with an advisor is recommended for students who intend to major or minor in foreign languages.

Transfer Credit

Transfer students normally may expect to continue their foreign language study at the next comparable level. On consultation with their advisors or the course instructors, and after taking the placement exam, students may be advised to do either remedial or more advanced coursework. No more than nine hours of transfer credit for 200- to 400-level courses are normally allowed toward degree requirements. Usually a maximum of six transfer credits can be applied to the minor.

Credit for study at a foreign institution will be granted, provided the courses proposed for study abroad have been approved in advance by a departmental advisor and endorsed by the department chair. When advance endorsement for credit is not obtained from the department, the credit is subject to approval by the department chair.

In cases where students have been engaged in an extended period (e.g., a year) of formal study at an approved academic institution abroad, transfer credit of more than nine hours may be granted, if approved by the department chair.

Credit by Examination

Beginning-level courses (110, 120) are not applicable toward requirements for the major. College credit for them may be earned by examination.

CLEP credit is available for French, German or Spanish (110 and 120). Contact Testing Services to arrange for the exam. A passing score is necessary to receive credit. (No more than 30 of a student's total hours may be earned by examination, and students with senior standing cannot earn credit via CLEP.)

Departmental testing or "Credit by Examination," is also available for 211-level credit. Students should first speak to the appropriate language advisor. The form is available online here (http://www.umkc.edu/registrar/forms/credit_by_exam.pdf). A minimum grade of C is necessary to receive credit.
Attendance and Course Level

Class attendance
The nature of language acquisition is such that regular attendance, throughout the semester, is expected of all students enrolled for credit.

Course Levels
Course levels are generally indicated by the first digit of the course number. For example, 100-level courses are first-year courses, 200-level classes represent second-year courses, etc. Accordingly, students entering a 200-level French course must have completed FRENCH 110 and FRENCH 120, their equivalent, or show proof of second-year skill-level (such as Placement Test score). Successful completion of a second-year course (normally 211 and 221, their equivalent, or proof of appropriate skill-level) is required of all students who want to enroll in 300- or 400-level courses. Exceptions must have the approval of the student’s foreign language advisor.

The Department of Foreign Languages and Literatures offers a program of study leading to the bachelor of arts in Languages and Literatures with emphases in French, Spanish or Classics.

Learning outcomes are aligned with national and state standards on language and cultural understanding, and on national standards for language skill as reflected in the American Council on the Teaching of Foreign Language proficiency guidelines.

Total Credits: 24

1 See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.

Constitution Course Requirement
Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

Total Credits: 3

1 Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:
• Take an equivalent course from the list above at a regionally accredited institution.
• Earn credit for one of the above courses through AP, IB, or CLEP.
• Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
• Have a previous bachelors degree (or higher) from a regionally accredited institution.
• Have an Associate of Arts degree from a regionally accredited institution.
• Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

1 ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.
2 This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

Major Requirements

Total: 36 credits at or above the 200-level

The Language and Literatures major consists of two parts: an Emphasis and a Breadth Requirement.

Language and Literatures majors must complete 30 credit hours at or above the 200-level in one of the following emphases:

Students must successfully complete the major requirements below with at least 12 hours of the noted upper division (300+) course requirements completed at UMKC.

Emphasis: French Language and Literature

<tr>
<td>Breadth Requirement See below</td>
</tr>
<tr>
<td>CLASSICS 499 Senior Tutorial (Capstone)</td>
</tr>
<tr>
<td>Total Credits 36</td>
</tr>
</tbody>
</table>

Breadth Requirement
The Breadth Requirement may be met by completing one of the following:

1. A second Language and Literatures emphasis;
2. A minor in another foreign language offered by the Department;
3. Six (6) credit hours of coursework at the 200-level or higher among foreign language courses outside the Emphasis (including courses taught in English). These classes must focus on language, literary or cultural studies. Appropriate courses offered by other departments (e.g. History of Latin America) can fulfill the breadth requirement with the prior approval of the undergraduate advisor.

Other Requirements and Regulations
1. A capstone course is required for the completion of the B.A. in Languages and Literatures.
2. Higher-level courses may be substituted for lower-level coursework, e.g. a 300-level course can be taken instead of a 200-level course. A minimum of two 400-level courses is required for each Emphasis in addition to the Capstone, 499.
3. A 2.0 grade-point-average in Languages and Literatures courses is required for graduation.
4. Study abroad is strongly recommended for all departmental majors and minors, but not required for degree completion.
5. FRENCH 435 does not count toward the major in Languages and Literatures.
6. Native speakers studying their own languages will complete a minimum of 21 credit hours in courses numbered 300 and above, but normally not including 315 or 325, and they will complete the Breadth Requirement. A native speaker is defined as a person who speaks the target language fluently and who has completed formal schooling through the secondary school level, or equivalent, in the target language.

General Electives
Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

Tools for Planning and Fulfilling Academic Requirements
UMKC's Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC's Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/plannymydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student's officially recorded (Office of Registration and Records) and "what if" plans of study. This evaluation is used to certify all graduation requirements.

UMKC's Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
German Studies Minor

Student Learning Outcomes

Students graduating from this program will:

• To attain advanced reading, writing, listening and speaking proficiency in the language studied.
• To obtain a broad base of knowledge and perspectives on the Classical world, or on French-, German- or Spanish-speaking civilizations, and of their respective cultures—literature, the arts, socio-historical, political and economic structures, etc.—within a variety of interpretive frameworks.
• To understand and articulate cultural practices and process as dynamic elements in the construction of identity, and to appreciate and encourage cultural diversity in human endeavor.
• To understand aspects of language and culture in the world as part of all human communication, and within interdisciplinary contexts.
• To develop skills in critical thinking and analysis, including, but not limited to, textual analysis.

Learning outcomes are aligned with national and state standards on language and cultural understanding, and on national standards for language skill as reflected in the American Council on the Teaching of Foreign Language proficiency guidelines:

Program Requirements

The German Studies minor consists of 18 hours selected from the list of approved courses, of which a minimum of 6 credits must be in German Language and a minimum of 9 credits must be upper-division coursework. Up to 6 credits may come from classes listed in the Associated Course List, but these courses apply only if the student’s project focuses on a German topic. A capstone project is also required. A maximum of six hours may apply to both a German minor and a German Studies minor.

Minor: French, German, Spanish

Student Learning Outcomes

Learning outcomes are aligned with national and state standards on language and cultural understanding, and on national standards for language skill as reflected in the American Council on the Teaching of Foreign Language proficiency guidelines:

• To attain advanced reading, writing, listening and speaking proficiency in the language studied.
• To obtain a broad base of knowledge and perspectives on the Classical world, or on French-, German- or Spanish-speaking civilizations, and of their respective cultures—literature, the arts, socio-historical, political and economic structures, etc.—within a variety of interpretive frameworks.
• To understand and articulate cultural practices and process as dynamic elements in the construction of identity, and to appreciate and encourage cultural diversity in human endeavor.
• To understand aspects of language and culture in the world as part of all human communication, and within interdisciplinary contexts.
• To develop skills in critical thinking and analysis, including, but not limited to, textual analysis.

The growing need for experts in the international aspects of academic and professional fields has led to a renewed interest in the foreign language minor as a complement to a student's training in a major field. In increasing numbers, students completing baccalaureate degrees in the Henry W. Bloch School of Business and Public Administration, in the Conservatory of Music and in other departments of The College of Arts and Sciences have selected a course of study that includes a minor in a foreign language. Majors in all fields are urged to discuss this possibility with their advisors.

Requirements for Program Minor

An academic minor in a target language requires a minimum of 18 hours consisting of six hours of 200-level courses or above plus 12 hours of courses at the 300- and 400-levels. FRENCH 435 does not count toward a minor. Usually a maximum of six transfer credits can be applied to the minor.
Master of Arts: Romance Language and Literature

The master of arts degree program provides necessary training in French or Spanish language and literature for those who want to teach those languages at the secondary school or junior college level. It also serves students who plan to continue with studies at the doctoral level. Other employment opportunities can be found in government, business and industry, publishing houses, foundations, etc.

Admission Requirements

A bachelor’s degree from an accredited institution with a 3.0 (B) grade-point average in the subject area and a 2.75 overall GPA is required for admission.

The Graduate Record Examination (Advanced Achievement) is recommended, and two letters of recommendation are required. Students’ transcripts with accompanying data are carefully evaluated.

Applicants with inadequate preparation may be required to make up deficiencies by taking more than the standard 30 hours of coursework.

Courses taken prior to admission into a graduate program will not count for graduate credit.

Requirements for Retention

If students’ graduate grade-point averages fall below 3.0 (B), they may take coursework only on the 300 and 400 levels until a 3.0 graduate grade-point average has been achieved. Coursework completed under this condition will not count toward the master’s degree.

Transfer Credit

No more than 6 hours of transfer credit are normally allowed toward degree requirements.

Advising

Students interested in pursuing a master’s degree in Romance languages should meet with the appropriate principal graduate advisor before beginning studies:

French: Nacer Khelouz
(816) 235-5996, khelouznacer@umkc.edu (levyg@umkc.edu)

Spanish: Louis Imperiale
(816) 235-2822, imperialel@umkc.edu

In consultation with the advisor, a course of study will be planned listing the courses that will satisfy requirements for the degree. Prior to registration at least once each year, candidates must meet with their advisors for approval of their course programs. They also must seek their advisor’s endorsement whenever a change in the agreed course of study is necessary.

Student Learning Outcomes

Students graduating from this program will:

• Students demonstrate Written Proficiency in the chosen language. More specifically, the writing proficiency objective is for students to attain at least an Advanced level of writing as outlined by the American Council on the Teaching of Foreign Languages (2012). These writers meet "work and/or academic writing needs" on a variety of topics generally with "precision and detail."

• Students demonstrate Oral Proficiency in their chosen language by attaining an Advanced level of speaking as outlined by the American Council on the Teaching of Foreign Languages (2012). These speakers are able to "engage in conversation in a clearly participatory manner in order to communicate information on autobiographical topics, as well as topics of community, national, or international interest. The topics are handled concretely by means of narration and description in the major time frames of past, present and future. These speakers can also deal with a social situation with an unexpected complication. The language of Advanced-level speakers is abundant, the oral paragraph being the measure of Advanced-level length and discourse."

• Students demonstrate advanced competency in cultural and textual analysis, including appropriately sophisticated research and documentation skills. Students can effectively describe, analyze and critically evaluate multiple topics in support of an original thesis. Students can search, find and accurately identify appropriate sources for a chosen topic. They can effectively analyze, evaluate and summarize other people’s thinking about a particular topic. They consistently and accurately cite relevant research. The demonstration of this competency is most often in the target language.

• Students demonstrate thematic knowledge of the culture(s) of their chosen language, including but not necessarily limited to the literature in that language. Students demonstrate a significant grasp of the history of Spanish or French-speaking countries and/or peoples and they can discuss in some depth their culture(s) and cultural production, including literary texts.
M.A. Degree Requirements

1. Students must earn 30 graduate credit hours to complete the M.A. in Romance Languages. Of these credits, at least 21 hours must be at the graduate level (courses numbered 5500 and above). When appropriate and/or necessary, students may count up to 9 hours of 400-level courses taken while enrolled as a graduate student towards the M.A. A minimum GPA of 3.0 is required in all graduate work. Students must take courses in a variety of areas, genres and periods in order to achieve both breadth and depth of knowledge. See below for specific course and distribution requirements for each emphasis area (Spanish & French). Students must obtain approval of their study programs by the graduate advisor for their area at least once a year.

2. Students must demonstrate ability to read, speak and write, idiomatically and with accuracy, the language in which the M.A. degree is being pursued.

3. Final Examination: Students must take a final examination consisting of both written and oral sections. See details below for each emphasis area.

4. Second Language Proficiency: In addition to the mastery of the target language, students must demonstrate a reading knowledge of a second language in one of the following ways:
   • Taking a reading examination in French, Spanish, Italian, German or Latin administered or approved by the department or given by the Educational Testing Service.
   • Achieving a grade of 3.0 (B) or better in a 211 (3 credit hour), or equivalent, language course.
   • Achieving a grade of 2.0 (C) or better in each of two 300-level courses or in one 400-level literature or civilization course taught in the second language.

M.A. in Romance Languages: French Emphasis

Student Learning Outcomes

Students graduating with an M.A. in romance languages will:

• Obtain specialized knowledge of either Hispanic or French and Francophone cultures, especially of their literatures as foundational paradigms for inquiry into language and cultural phenomena.
• Develop skill in reflective inquiry.
• Analyze cultural products, process and perspectives with a variety of interpretive strategies.
• Attain superior reading, writing, listening and speaking proficiency in the primary language studied, and intermediate reading proficiency in the secondary language studied.

1. Distribution of courses
   a. Students will choose courses covering five out of the seven following periods or fields:
      i Medieval/Early Modern
      ii Renaissance
      iii 17th and 18th Centuries
      iv 19th Century
      v 20th and 21st Centuries
      vi Linguistics or Pedagogy
      vii Francophonie
   b. In addition, as part of their 30 credit hours of study, students will take one course in advanced French stylistics.

2. Exams. The final exam will be comprised of a written and an oral portion.
   a. Written exam
      i In consultation with the French faculty, students will draw up a list of eight subjects covering most periods/fields and one explication de texte of a poem.
      ii The written exam will consist of 2-3 questions, written by the faculty and based on the subjects from the student’s list. The student will have two hours in which to write the essays. No notes are allowed, but the student may consult the texts during the exam.
   b. Oral exam
      On a subsequent day, the student will take the one-hour oral exam, which will consist of the explication de texte and follow-up questions to the written exam. The student may bring brief notes, on index cards, to help in the explication de texte.

M.A. in Romance Languages: Spanish Emphasis

Student Learning Outcomes

Students graduating with an M.A. in romance languages will:

• Obtain specialized knowledge of either Hispanic or French and Francophone cultures, especially of their literatures as foundational paradigms for inquiry into language and cultural phenomena.
• Develop skill in reflective inquiry.
• Analyze cultural products, process and perspectives with a variety of interpretive strategies.
• Attain superior reading, writing, listening and speaking proficiency in the primary language studied, and intermediate reading proficiency in the secondary language studied.

1. Distribution of courses
   a. Students will choose courses covering six out of the eight following periods or fields:
      i  Medieval/Early Modern
      ii  Golden Age
      iii  18th and 19th Centuries
      iv  20th and 21st Centuries
      v  Spanish or Romance Linguistics
      vi  Foreign Language Pedagogy
      vii  Pre-Columbian / Indigenous/ Colonial Literature
      viii U.S.-Latino Studies
   b. In addition, a student's coursework must include at least one course in each general category of Peninsular or Latin American.

2. Exams. The final exam will be comprised of a written and an oral portion.
   a. Written Exam
      Questions will be based on a reading list prepared in advance by the students and their graduate advisor, based on the periods and fields covered in all their graduate courses; it will consist of 15 (out of 30 possible) identifications, two short and two long essays. The student will have four hours in which to write the essays. No notes, texts or dictionaries will be allowed.
   b. Oral Exam
      On a subsequent day, the student will take the one-hour oral exam, which will consist of a textual analysis. Prior to the exam, the student will be given a text and will have 30 minutes to prepare the analysis.
Department of Geosciences

Department of Geosciences
Robert H. Flarsheim Science and Technology Hall
5110 Rockhill Road, Room 420
Kansas City, MO 64110-2499
(816) 235-1334, (816)-235-6081
Fax: (816) 235-5535
geosciences@umkc.edu
http://cas.umkc.edu/geo

Department Chair:
Interim Chair: Michael B. Kruger

Professors:
Wei Ji (graduate Geography adviser and GIS Certificate Program Director), Tina M. Niemi (principal undergraduate Geology adviser)

Associate Professors:
Jimmy O. Adegoke (undergraduate Geography advisor; Director of CAER), Caroline P. Davies (undergraduate Environmental Science advisor; Director, Environmental Studies program), Jejung Lee, James B. Murowchick (principal graduate advisor; Interdisciplinary Ph.D. coordinator)

Professors Emeriti:
Raymond M. Coveney, Jr., Steven L. Driever, Richard J. Gentile, Syed E. Hasan, Daniel P. Hopkins

Department Description

The Department of Geosciences offers programs of study leading to bachelor of science degrees in Environmental Science, Geography, and Geology and bachelor of arts degrees in Environmental Studies, Geography and Geology. The department offers a master of science degree in Environmental and Urban Geosciences and participates in the Interdisciplinary Ph.D. program. The department also offers an undergraduate and graduate certificate in Geographic Information Systems (GIS). Students who designate Geosciences (Environmental Studies, Geology or Geography focus) on their application for admission to the doctoral program must meet admission and other requirements available from the department. See the School of Graduate Studies section in the Graduate Catalog for more information about doctoral programs. The department takes a leading role in the undergraduate interdisciplinary Environmental Studies program. Courses offered by the department can be used to fulfill the requirements of the Missouri Department of Education for earth science, science-math, and social science teaching specialties.

Students majoring in Environmental Studies, Environmental Science, Geography, or Geology obtain a broad liberal arts education during their undergraduate career and at the same time receive sound fundamental training in the geosciences. Departmental faculty members are committed to educating non-majors about the earth and environmental sciences as well as those students who plan to pursue careers in the geosciences.

All undergraduate majors in the Department of Geosciences (including Environmental Studies) must maintain a minimum grade point average above 2.0 in all courses taken to fulfill departmental degree requirements. This minimum GPA also applies to all credit hours transferred from other institutions.

Students in the geosciences address earth-related questions and problems facing society today. Environmental studies focuses on environmental processes and policy. Geography deals with place and the relationships between people and the environment. Geology explores the materials and processes of the earth and its evolution and history.

We offer unique university experiences such as field courses and excursions. The Geosciences’ faculty and students have conducted research in many countries such as Jordan, Mexico, Chad, China, Korea, Cameroon, the Bahamas, Denmark, Spain, India and Turkey.

Special Resources and Services

Geosciences Museum

The Geosciences Museum, founded by Richard L. Sutton, M.D., is located in Room 271, R.H. Flarsheim Hall. It contains relief models and interactive displays, along with a full range of 2,500 spectacular mineral and fossil specimens from all over the world. Hours of operation are 8:30 a.m. to 4:30 p.m. Monday through Friday. Admission is free.

Center for Applied Environmental Research (CAER)

The Center for Applied Environmental Research http://cas.umkc.edu/caer is administered by the Geosciences Department and directed by Professor Jimmy O. Adegoke. The center is a resource for governmental agencies, private firms, and the general public in matters of the environment. Its programs address such matters as environmental geophysics, geochemistry, underground space, foundation stability, waste management, geologic hazards, environmental justice, natural resource assessment, and land-use planning.
Undergraduate Admission Requirements

Prospective students desiring to major in the Geosciences programs should enroll in as much work as possible in mathematics, English composition and sciences during their high school years.

Students transferring from other colleges or universities should have taken required non-departmental 100- and 200-level courses listed under degree programs in this catalog prior to arriving at UMKC. For example, geology students should take mineralogy during their first fall semester after transferring and should have already completed the chemistry prerequisite by that time. In addition, it would be desirable for B.S. majors to have completed a semester of calculus. To assure that students transferring from other institutions of higher education can continue in an uninterrupted plan of study in the fields of geology, geography or environmental studies, it is advisable that they acquaint themselves with the departmental degree requirements listed in this catalog as well as the two-year timetable of course offerings available from the department advisors, prior to registration.

Social and Behavioral Science Division of CAS Degree Requirements

All Geography courses except those listed above count toward the Social and Behavioral Sciences requirements of the College of Arts and Sciences.

Careers for Geography, Geology and Environmental Studies/Science Graduates

Geography

Students of geography at UMKC are offered a well-rounded education leading to promising career prospects; the market for geographers is global. Geography is centrally concerned with the whole range of interrelations between human beings and the natural and built environments. Geography graduates find work in commerce; government and public administration; city and regional planning; natural resource management and environmental conservation; historic preservation; landscape design; pollution control; weather-forecasting; climatological and agricultural analysis; statistical analysis; government and commercial map-making; transportation; the travel and tourism industry; market analysis and development; diplomacy; and national and international economic development programs. Experience with geographic information science (GIS) and remote sensing technologies is a great advantage in all these fields. Well-educated geographers are often involved in the crafting of policy and legislation, in the practice of law, in consulting, in publishing and in education.

Geology

Geology graduates have numerous employment opportunities, especially in areas relating to the environment, to engineering and to applied geology. Training in urban and environmental geology will prepare graduates to develop and evaluate environmental impacts, deal with waste management issues; model groundwater flow; handle laboratory and field instrumentation; and assess natural hazards. Geologic studies of soils, energy, mineral and water resources, and the environment are essential for private industry, as well as for governmental agencies. Graduates may also join state and federal geological surveys. The petroleum industry was for many years the principal employer of geologists. However, currently the best employment opportunities are in the area of the environment.

Environmental Studies

Environmental issues such as climate variation, atmospheric pollutants and non-point-source water pollution are complex issues. The general public is ill-equipped to evaluate these issues and must rely on experts. The need for environmental education and professionals in the field of the environment
has never been greater. Given these needs, employment opportunities are unlimited and are likely to remain so for decades. Specific careers available to those who hold an environmental studies degree lie with companies and agencies that deal with engineering, environmental geology, environmental law, environmental health and safety, emergency response, environmental training, environmental chemistry, politics and social issues.

**Departmental Activities**

**Advising System**

Students who wish to major in Geology, Geography or Environmental Studies should seek advice from the department at the earliest possible time. Transfer students, including those from local community colleges, should see faculty advisors in the department prior to admission to UMKC. All full-time faculty members serve as department advisors, but lead roles are designated to particular faculty for each discipline. Individuals may inquire about advising appointments at any time during the semester by phone at (816) 235-1334 or by email at geosciences@umkc.edu.

**Practicums and Internships**

The nature of the fields of atmospheric science, environmental studies, geology, and geography necessitates practical in-class and laboratory exercises; field trips and fieldwork; working seminars and independent projects of a practical nature. More explanation of specific courses can be found in the individual course descriptions. Internships are available with local organizations.

**Financial Aid and Transportation Costs**

A variety of scholarships and student financial aid alternatives are available to students accepted for regular enrollment. (See the Financial Aid website http://www.umkc.edu/finaid for more information.) Scholarships available solely to Geosciences students include the ASCE-AEG Scholarship Fund, Association of Earth Sciences Clubs Fund, Richard J. Gentile Scholarship, The Geosciences Scholarship, the Truman Stauffer Memorial Scholarship, and the Denis Ward Scholarship. Please note that certain field courses and field trips necessitate that some travel costs are at the expense of the individual student.

**Teacher Certification in Earth Science or Social Science**

Certification as a middle school (grades 5-9) or secondary (grades 9-12) Earth Science teacher in either Kansas or Missouri requires that a student complete specific requirements in Biology, Chemistry, Environmental Studies, Geology, Physics and in the School of Education. Certification as a middle school (grades 5-9) or secondary (grades 9-12) Social Science teacher in either Kansas or Missouri requires that a student complete specific requirements in History, Political Science, Economics, Geography, Behavioral Sciences and in the School of Education. A separate application for teacher education is required. For further information about the program, consult the School of Education (p. 1018) section of this catalog or contact the Education Student Services Office at (816) 235-2234.

**Faculty**

- **Jimmy O. Adegoke** Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=adegoke); Professor of Geosciences; B.S. (Ahmadu Bello University); M.S. (University of Ibadan); Ph.D. (Pennsylvania State University).
- **Raymond M. Coveney, Jr.** Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=coveney); Professor Emeritus of Geosciences; B.S. (Tufts University); M.S., Ph.D. (University of Michigan).
- **Caroline P. Davies** Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=davies); Associate Professor of Geosciences; B.A. (College of William-Smith); M.S. (University of Maine); Ph.D. (Arizona State University).
- **Steven L. Driever** Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=driever); Professor Emeritus of Geosciences; B.A. (University of Virginia); M.S. (Northwestern University); Ph.D. (University of Georgia).
- **Richard J. Gentile** Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=gentile); Professor Emeritus of Geosciences; B.A., M.A. (University of Missouri-Columbia); Ph.D. (University of Missouri-Rolla).
- **Syed E. Hasan** Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=hasan); Professor Emeritus of Geosciences; B.S. (Patna University); M.S. (Indian Institute of Technology, formerly Roorkee University); Ph.D. (Purdue University).
- **Daniel P. Hopkins**; Professor Emeritus of Geosciences; B.A. (Tulane University); Ph.D. (Louisiana State University)
- **Paul L. Hilpman**; Professor Emeritus of Geosciences; A.B. (Brown University); M.A., Ph.D. (University of Kansas).
- **Wei Ji** Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=ji); Professor of Geosciences; B.S., M.S. (Peking University); Ph.D. (University of Connecticut).
- **Jejung Lee** Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=lee); Associate Professor of Geosciences; B.S., M.S. (Seoul National University); Ph.D. (Northwestern University).
- **James B. Murowchick** Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=murowchick); Associate Professor of Geosciences; B.S. (University of Illinois); M.S., Ph.D. (Pennsylvania State University).
Undergraduate

Undergraduate Degrees:

- Environmental Studies Program (p. 350)
  - Bachelor of Arts: Environmental Studies (p. 351)
  - Bachelor of Science: Environmental Science (p. 356)
  - Environmental Studies Minor (p. 361)
  - Environmental Sustainability Minor (p. 363)
- Geography and Geology Programs (p. 365)
  - Bachelor of Science/Bachelor of Arts: Geography (p. 366)
  - Bachelor of Science/Bachelor of Arts: Geology (p. 372)
  - Geography and Geology Minor (p. 378)
  - Undergraduate Certificate Program in GIS (p. 379)

Graduate

Graduate Degrees:

- Graduate Certificate Program in GIS
- Master of Science: Environmental and Urban Geosciences (p. 381)

Environmental Science Courses

ENV-SCI 110L Understanding the Earth Laboratory Credits: 2
Laboratory and field demonstration and exercises in environmental science. Weekly exercises or field trips.

Co-requisites: ENV-SCI 110R.

ENV-SCI 110R - MOTR PHYS 110L: Essentials Physical Sciences w/Lab

ENV-SCI 210 Issues in Environmental Science Credits: 3
Explores important environmental issues such as air and water pollution, water supply, climate change, agriculture and food supply, environmental health, ecosystem disruption, environmental management, environmental ethics, and energy resources. Topics may vary depending on current events.

ENV-SCI 220 Ecosystem Science for Decision Makers Credits: 3
This course addresses the fundamentals of ecosystem science with an emphasis on human-induced change in natural systems. Course content characterizes the biological patterns found in nature emphasizing application of underlying principles. Scientific tools are provided to evaluate ecosystem concerns and make informed decisions.

ENV-SCI 303 Weather and Climate Credits: 4
Overview of weather processes and the main components of the climate system. Emphasis is on the physical basis of daily weather patterns, seasonal climate variability and longer-term climate change at local, regional, and global scales. The theme throughout the course will be the importance of weather and climate as major drivers of environmental change.

Prerequisites: ENV-SCI 110R or GEOLOGY 220.
ENV-SCI 310 Field Experience in Waste Management Credits: 2-3
This course provides an overview of waste management issues, including nature, classification and disposal of various wastes, and U.S. laws governing the management of solid, hazardous, biologic and nuclear waste. Lectures and discussions will be supplemented by visits to waste management facilities to study methods and technologies used for treatment and disposal of wastewater, solid, hazardous, and biologic wastes. This field-intensive course includes travel to neighboring states and includes an overnight out-of-town stay. Final report required.

ENV-SCI 321 Climate Change Impact Assessment and Policy Response Credits: 3
This course introduces how scientists assess observed climate change and predict future climate change. Lectures, discussions, problem sets, and term papers help students explore interactions among climate change, human activities and policy responses. It helps students achieve an appreciation for the role of accurate scientific information as foundation for shaping political agreements and policies on climate change.
Prerequisites: ENV-SCI 110R.

ENV-SCI 332CZ Environmental Sustainability Credits: 3
This course will introduce the concept of sustainability and review how sustainability might work at the individual, neighborhood, state, nation and global scales. Students will participate in some form of community engagement on sustainability as well as reflect upon how their own practices impact the environment.

ENV-SCI 416 Understanding and Living with Volcanoes Credits: 3
This course will examine the distribution, tectonic setting, and morphology of a range of volcano types on Earth and a few examples from other planets. Students will study volcanic processes including explosive and passive processes and how we investigate them. This will involve discussion of volcanic hazards and hazard assessment, risk communication, and the challenges of volcanic crises response. The course will also cover how volcanoes impact the local and global economy and Earth's climate. Recommended preparation: GEOG 314 / GEOLOGY 314 or GEOLOGY 325 or GEOLOGY 342.
Prerequisites: GEOLOGY 220 or ENV-SCI 110R/ENV-SCI 110L, and GEOG 203 or GEOG 402.

ENV-SCI 449 Global Water and Sustainability Credits: 3
This course examines the physical characteristics of water and its role in Earth systems. The challenges facing societies in an era of rapidly-changing climate are explored.
Cross Listings: GEOG 449.

ENV-SCI 496 Environmental Internship Credits: 1-4
Students obtain practical experience working for local engineering and environmental firms, or governmental agencies. Specific duties and application requirements will vary depending on the funding organization's needs. Junior or senior standing required for undergraduates.

ENV-SCI 5550 Ecotoxicology Credits: 3
This course addresses the fundamentals of ecotoxicology, integrating the sciences of ecology and toxicology. Students will learn the biological basis for pollutant effects on individuals and populations of plants and animals, how pollutant intensity varies as a function of bioavailability, the basics of risk assessment, and how pollutant effects are modified by ecological interactions within communities and ecosystems. The ultimate goal of ecotoxicology is to predict the effects of pollution within an ecological context.
Prerequisites: BIOLOGY 108, CHEM 211, CHEM 212R.

Environmental Studies Courses
ENV-STDY 325 Cultural Perspectives on the Environment Credits: 3
This course explores the history of conservation practices in American agriculture from the 1700s through the present. Additionally, the course examines the past and present legal implications of environmental statutes for minority farmers from a social and environmental justice perspective.
Cross Listings: GEOG 325.

ENV-STDY 334 Gender and the Environment Credits: 3
This course provides a survey of different ways women relate to nature. The objectives of the course are: to understand historical relationships between women and nature in the western world, to understand different theoretical approaches to studying women and nature, to explore the geography of women's activism on behalf of the environment, and to understand how women's health is linked to the environment.
Cross Listings: GEOG 334.

ENV-STDY 412 Global Tourism Credits: 3
This course is a regional survey of world tourism. Topics include the uniqueness of place, the marketing of tourist destinations, and the cultural, economic, and environmental impacts on host societies.
Prerequisites: GEOG 105 or GEOG 200 or GEOG 202.

ENV-STDY 430 Soil and Groundwater Remediation Credits: 3
Prerequisites: GEOG 335 (or GEOLOGY 335).
ENV-STDY 450 Ecotoxicology Credits: 3
This course addresses the fundamentals of ecotoxicology, integrating the sciences of ecology and toxicology. Students will learn the biological basis for pollutant effects on individuals and populations of plants and animals, how pollutant intensity varies as a function of bioavailability, the basics of risk assessment, and how pollutant effects are modified by ecological interactions within communities and ecosystems. The ultimate goal of ecotoxicology is to predict the effects of pollution within an ecological context.
Prerequisites: BIOLOGY 108, CHEM 211, CHEM 212R.

ENV-STDY 499WI Environmental Studies Practicum Credits: 3
Students conduct research, participate in discussions, and prepare written reports on selected topics concerning the environment.
Prerequisites: Senior standing, RooWriter.

Geography Courses
GEOG 105 Introduction to the Elements of Geography Credits: 3
A survey of major elements of physical and human geography, with a concise overview of the world’s regions. Emphasis on global relationships and distributions, both environmental and cultural. Climates, natural vegetation, land forms, cultural origins and diffusions, economic patterns.
GEOG 105 - MOTR GEOG 101: World Regional Geography

GEOG 150 Introduction to Physical Geography Credits: 3
This course is an introduction to the study of the natural environmental systems of earth—the atmosphere, the hydrosphere, the biosphere, and the lithosphere. The primary objective of the course is to provide a broad overview of these systems at a global scale. This overview will entail descriptions of natural systems and the variations they exhibit both from place to place and through time. It will also entail explaining how natural systems operate and interact with each other, thereby providing a necessary foundation for understanding the tremendously diverse physical geography of earth. Applies to natural science requirement.
GEOG 150 - MOTR GEOG 100: Physical Geography

GEOG 200 World Geography I Credits: 3
A survey of the physical and human geography of the regions and nations of Europe and the Americas, with Australia and New Zealand. The approach is strongly historical, emphasizing interconnections, shared colonial backgrounds and broader global contexts in the modern world. The course is aimed at non-specialists.

GEOG 202 World Geography II Credits: 3
A survey of the physical and human geography of the regions and nations of Russia and the other former Soviet republics, the Middle East, Africa, South Asia, East Asia Southeast Asia and the Pacific Realm. The approach is strongly historical emphasizing interconnections shared colonial backgrounds, and broader global contexts in the modern world. The course is aimed at non-specialists.

GEOG 203 Introduction to Geographic Information Systems Credits: 4
An introductory course covering the basic principles of geographic information systems focusing on such software programs as ARC-INFO and ARC-VIEW.

GEOG 210 Human Geography Credits: 3
A study of the geographical underpinnings and distribution of the main elements of culture, including population patterns, language, religion, political territorial organization, settlement, and economic livelihood. The environmental settings, geographic origins, diffusion, and geographic interrelationships of these culture traits are emphasized.

GEOG 303 Weather and Climate Credits: 4
Overview of weather processes and the main components of the climate system. Emphasis is on the physical basis of daily weather patterns, seasonal climate variability and longer-term climate change at local, regional, and global scales. The theme throughout the course will be the importance of weather and climate as major drivers of environmental change.
Prerequisites: ENV-SCI 110R or GEOLOGY 220.

GEOG 309 Urban Geography Credits: 3
Historical development, morphology and functions of urban places, including intercity relationships and the relationship between cities and their hinterlands; emphasis on American cities.

GEOG 311 Economic Geography Credits: 3
A systematic study of the modern world economy that includes discussion of the location of production and consumption, the nature and role of multinational enterprises in trade, resource limitations to growth, and cultural responses to globalization.
GEOG 314 Principles of Geomorphology Credits: 4
Explores the processes that shape the earth's surface. Focuses on the development and description of fluvial, glacial, eolian, and coastal landforms. Studies the influence of tectonic and climatic factors. Field trip.
Prerequisites: ENV-SCI 110R (or GEOLOGY 220).

GEOG 317 Cartography Credits: 4
Design and preparation, by hand and computer, of informative, effective, and attractive maps and other graphics for various geographical purposes, especially term papers, thesis, and public presentations. Lectures, discussion, and laboratory.

GEOG 321 Climate Change Impact Assessment and Policy Response Credits: 3
This course introduces how scientists assess observed climate change and predict future climate change. Lectures, discussions, problem sets, and term papers help students explore interactions among climate change, human activities and policy responses. It helps students achieve an appreciation for the role of accurate scientific information as foundation for shaping political agreements and policies on climate change.
Prerequisites: ENV-SCI 110R.

GEOG 325 Cultural Perspectives on the Environment Credits: 3
This course explores the history of conservation practices in American agriculture from the 1700s through the present. Additionally, the course examines the past and present legal implications of environmental statutes for minority farmers from a social and environmental justice perspective.
Cross Listings: ENV-STDY 325.

GEOG 329 World Political Geography Credits: 3
An analysis of the influence of geographic factors (both physical and human) on the economic and political relationships of the nations of the world. Emphasis will be placed on population size and political viability of states, boundaries and frontiers as limits of national space, problems related to the spatial integration of states, and the independence and interdependence of states within the larger world political system.

GEOG 332 Cultural Geography Credits: 3
A study of the distribution and interpretation of cultural patterns throughout the world. Examined are material and non-material elements of culture such as settlement, land use, technology and belief systems. The geographic origins and diffusion of culture traits are emphasized.

GEOG 333 Geographic Elements of Urban Planning Credits: 3
Analysis of the changing form and structure of urban places from a planning viewpoint. The focus will be on land-use trends on both the intraurban and interurban levels. Covered will be such topics as planning for urban transportation, new towns, land-use planning, urban renewal, and environmental planning.

GEOG 334 Gender and the Environment Credits: 3
This course provides a survey of different ways women relate to nature. The objectives of the course are: to understand historical relationships between women and nature in the western world, to understand different theoretical approaches to studying women and nature, to explore the geography of women's activism on behalf of the environment, and to understand how women's health is linked to the environment.
Cross Listings: ENV-STDY 334.

GEOG 335 Introduction to Waste Management Credits: 3
Prerequisites: ENV-SCI 110R, GEOG 150, GEOLOGY 220.

GEOG 336 Principles of Soil Science Credits: 3
Study of genesis, evolution, distribution and classification of soils. Analysis of soil-forming materials and processes. Lecture, discussion and laboratory.
Prerequisites: ENV-SCI 110R, GEOLOGY 220.

GEOG 340 Geography of the United States and Canada Credits: 3
A survey of the physical and human geography of the United States and Canada. The approach is strongly historical emphasizing interconnections, shared colonial backgrounds, and broader international contexts in the Americas and around the globe. This course is aimed at non-specialists.

GEOG 341 Geography of South America Credits: 3
A study of the physical and human geography of South America, with an emphasis on cultural processes and the historical record. Contemporary issues such as economic development, trade, urbanization, and geopolitical conflicts are discussed.

GEOG 342 Geography of Mexico, Central America and the Caribbean Credits: 3
A study of the physical and human geography of Middle America, with an emphasis on cultural processes and the historical record. Contemporary issues such as economic development, trade urbanization, and geopolitical conflicts are discussed.

GEOG 350 Geography of Europe Credits: 3
A survey of the physical and human geography of the regions and nations of Europe. The approach is strongly historical, emphasizing international interconnections and broad global contexts. The course is aimed at non-specialists.
GEOG 351 Regional Geography of the Middle East Credits: 3
A study of human imprint upon the land through settlement patterns, institutions of land organization, and types of economy. Strategies for the economic development of various regions in the Middle East are discussed.

GEOG 360 Principles of Biogeography Credits: 4
This course is an introduction to biogeography that explores the patterns of plant and animal distributions from both ecological and historical perspectives. We examine past geologic and climatic conditions, as well as interactions between organisms and their environment to explain modern distributions of flora and fauna. Human interactions with plants and animals have increasingly profound consequences on distributions of flora and fauna from destruction to management. We explore the increasing importance of issues and strategies in conservation. The laboratory portion of the course builds on core ecological concepts and provides experiences of field observation, data collecting and data analysis.

Prerequisites: ENV-SCI 110R.

GEOG 398 Field Trip Credit: 1
Three-day field trip in March or April (at student's expense) for department majors. An opportunity to observe and study physical and cultural features and collect materials. Brief descriptive report of trip required.

Prerequisites: 6-9 hours of upper-level geography.

GEOG 401 Advanced Geographic Information Science Credits: 4
This course is designed for the students knowledgeable in the fundamentals of geographic information systems, who wish to gain expertise in advanced topics and applications in geographic information systems, remote sensing, and related environmental informatics. Classes are organized to encourage active learning. Students are encouraged and guided to develop their research projects by integrating related techniques of geographic information science.

Prerequisites: GEOG 203.

GEOG 402 Environmental Remote Sensing and Digital Image Analysis Credits: 4
This course will provide students with innovative techniques for landscape-level environmental analysis, geographic and geological studies, earth science research, and environmental resources management using remotely sensed data including satellite images. Students will be taught basic remote sensing concepts and technical skills, including energy radiative transfer processes in remote sensing, sensors and resolutions, computer-based image processing and classification, and remote sensing/GIS integration.

Prerequisites: GEOG 203.

GEOG 403WI History and Philosophy of Geoscience Credits: 3
A survey of geoscientific thought since antiquity. The substance of geography, geology, and environmental studies will be sought primarily in scholarly treatise and formal analytical systems including cartography, but the course also addresses geoscientific principles emerging from the history of environment, government, law, economy, religion, literature, and material culture. Readings, lectures, discussions, research, writing.

Prerequisites: RooWriter.

Cross Listings: GEOG 5503WI.

GEOG 404 Biogeography and Landscape Ecology Credits: 3
Principles and applications of biogeography and landscape ecology, emphasizing distribution of major ecosystems and related plants and animal species on earth, biodiversity, landscape patterns and processes, and physical, biological, and human interactions. The course explores ecosystem and landscape analyses using advanced GIS, remote sensing, and spatial modeling methods for real problem solving in environmental and biological research, ecosystem conservation, and urban planning and studies.

Prerequisites: GEOG 203, GEOG 402 (or GEOG 5502).

GEOG 406 Global Environmental Change Credits: 3
This course will examine the current rates of global environmental change and potential causes in the context of Earth’s natural climate variability. The course will follow a seminar format. Students will read and discuss published articles on current and emerging theories of forcing mechanisms in the Earth’s systems.

GEOG 412 Global Tourism Credits: 3
This course is a regional survey of world tourism. Topics include the uniqueness of place, the marketing of tourist destinations, and the cultural, economic, and environmental impacts on host societies.

Prerequisites: GEOG 105 or GEOG 200 or GEOG 202.

GEOG 416 Understanding and Living with Volcanoes Credits: 3
This course will examine the distribution, tectonic setting, and morphology of a range of volcano types on Earth and a few examples from other planets. Students will study volcanic processes including explosive and passive processes and how we investigate them. This will involve discussion of volcanic hazards and hazard assessment, risk communication, and the challenges of volcanic crises response. The course will also cover how volcanoes impact the local and global economy and Earth's climate.

Prerequisites: GEOLOGY 220 or ENV-SCI 110R/110L, and GEOG 203 or GEOG 402.

GEOG 417 Special Topics Credits: 1-3
Individual research and study of a selected topic in geography, meteorology or earth science.
GEOG 426 Paleoecology: Microfossils and Climate Change Credits: 3
Paleoecology will focus on questions addressing past environments and past climates based on the ecology of microfossils. Micro-organisms are very sensitive to a wide variety of environmental conditions including temperature, precipitation, hydrology, water chemistry, salinity, habitat, and pollution. The fossil remains of these organisms are used as proxy indicators for reconstructing past environmental conditions, climate change, vegetation dynamics, and human impacts. Students will have the opportunity to process microfossils and make interpretations based on analysis data.

GEOG 430 Energy Resources Credits: 3
This course covers the distribution, origin, and utilization of all types of energy. Topics include exploration, production, storage, transportation and conservation of carbon-based fuels, hydrologic, nuclear energy, and alternate energy sources such as solar, wind, geothermal, and hydrogen. 
**Prerequisites:** ENV-SCI 110R (or GEOLOGY 220).

GEOG 435 Geoaquacology Credits: 3
This course examines geomorphological and archaeological methods used in reconstructing sites, settlement patterns, and paleoenvironments. Explores dating methods, soils, and stratigraphy as tools for studying landscape evolution and human occupation.
**Prerequisites:** GEOG 314 (or GEOLOGY 314).

GEOG 437 Population Geography Credits: 3
This course analyzes human populations: how they grow, how their compositions change, and how and why people migrate from one place to another. Students will study basic demographic processes- mortality, fertility, and migration- and underline theory and techniques. Students will also examine relationships between population growth and population planning, immigration, urbanization and cities, and the environment.

GEOG 442 Quaternary Environments Credits: 3
This course reviews earth climatic history and focuses on major mechanisms for global and regional climate change. Methods of paleoclimatic reconstruction are examined, including analysis of proxy data and climate modeling. Application of these methods toward prediction of future climate change is also explored.
**Prerequisites:** GEOG 314 or GEOLOGY 314.

GEOG 444 Spatial Data Analysis Credits: 4
Quantitative techniques and applications of spatial data analysis. The course will cover basic geospatial analysis techniques including hypothesis testing, kriging, variogram analysis, multivariate analysis and reliability analysis. Emphasis is on practical applications rather than theories. Intended for Geology, Geography, Environmental Studies, and relevant fields. Three hours lecture and one hour computer lab per week.

GEOG 448 Satellite Climatology Credits: 4
Use of satellite observations to study the climate system. Discussions consider the development of satellite climatology, sensors, platforms and methodologies used to estimate climate variables from radiance measurements. Aspects of climate that are emphasized include cloud climatologies, cloud systems, atmospheric moisture, radiation budget, and land-surface conditions. Three hours lecture and one hour lab per week.
**Prerequisites:** GEOG 303.

GEOG 449 Global Water and Sustainability Credits: 3
This course examines the physical characteristics of water and its role in Earth systems. The challenges facing societies in an era of rapidly changing climate are explored.
**Cross Listings:** ENV-SCI 449.

GEOG 450 Gis Fundamentals for Research Applications Credits: 4
This course will address the needs of upper level undergraduate and graduate students who desire to learn and apply fundamental Geographic Information Systems concepts and techniques for their research projects. This course will draw on the content of the Introductory GIS course offered by the department but will also be flexible such that the individual needs or interest of students can be met through guided reading and/or tailored laboratory sessions. The Department of Geosciences GIS computer laboratory, with a variety of GIS and Remote Sensing software, will be available for this course. Only for upper-level undergraduate and graduate students.

GEOG 457 North American Prehistory Credits: 3
This class offers instruction in the archaeological survey of prehistoric North America from the Arctic to northern Mexico. The course outlines cultural developments within this region form the peopling of the Americas near the end of the last Ice Age to the arrival of Europeans more than 10,000 years later. The diversification of Native American societies across this time span is examined in relation to social and environmental challenges, including the transformation of hunter-gatherer groups into chiefdoms and complex agricultural societies.
**Cross Listings:** ANTHRO 384.

GEOG 460 Transportation Geography Credits: 3
Relation between transportation and spatial organization, selected analytical models dealing with traffic demand, network configuration, and allocation of transport facilities; application to specific problem areas including commuting. Seminar with discussions of briefs and term paper.

GEOG 496 Geography Internship Credits: 1-6
Students obtain directed practical experience working with non-profits, governments, or private enterprises. Duties will vary based on contractual agreement between the student, host organization, and the professor.
**Prerequisites:** Junior standing or higher.
GEOG 499WI Geography Seminar Credits: 3
Students critique geographic research and prepare a paper and an oral presentation on an approved topic.

Prerequisites: Senior standing, RooWriter.

GEOG 5502 Environmental Remote Sensing and Digital Image Analysis Credits: 4
This course will provide students with innovative techniques for landscape-level environmental analysis, geographic and geological studies, earth science research, and environmental resources management using remotely sensed data including satellite images. Students will be taught basic remote sensing concepts and technical skills, including energy radiative transfer processes, in remote sensing, sensors and resolutions, computer-based image processing and classification, and remote sensing/GIS integration.

Prerequisites: GEOG 203.

GEOG 5503WI History and Philosophy of Geoscience Credits: 3
A survey of geoscientific thought since antiquity. The substance of geography will be sought primarily in scholarly treatises, formal analytical systems, and cartography, but the course also addresses geographical principles emerging from the history of such matters as government, law economy, religion, and material culture. Readings, lectures, discussions, research, writing.

Prerequisites: RooWriter.

Cross Listings: GEOG 403WI.

GEOG 5504 Biogeography and Landscape Ecology Credits: 3
Principles and applications of biogeography and landscape ecology, emphasizing distribution of major ecosystems and related plants and animal species on earth, biodiversity, landscape patterns and processes, and physical, biological, and human interactions. The course explores ecosystem and landscape analyses using advanced GIS, remote sensing, and spatial modeling methods for real problem solving in environmental and biological research, ecosystem conservation, and urban planning and studies.

Prerequisites: GEOG 203, GEOG 402 (or GEOG 5502).

GEOG 5506 Global Environmental Change Credits: 3
This course will examine the current rates of global environmental change and potential causes in the context of Earth's natural climate variability. The course will follow a seminar format. Students will read and discuss published articles on current and emerging theories of forcing mechanisms in the Earth's systems. Additional in-depth research and written evaluation are required for graduate credit.

GEOG 5507 Advanced Geographic Information Science Credits: 4

Prerequisites: GEOG 203.

GEOG 5508 Archaeological Field Survey Methods Credits: 3
This class offers instruction in the basic skills required to conduct field surveys in archaeology and other geosciences disciplines. In the classroom, students learn about the development of archaeology as a scientific discipline and how to recognize some of the basic field data sought by archaeologists. Students earn about mapping and land navigation techniques. The field phase of instruction includes visits to archaeological sites in the region.

GEOG 5509 Urban Geography Credits: 3
Historical development, morphology and functions of urban places, including intercity relationships and the relationship between cities and their hinterlands; emphasis on American cities. Students will complete a series of reports and a term paper.

GEOG 5510 Landscape, Language, Literature, and Law Credits: 3
An examination of the geographic underpinnings and implications of languages, literatures, and jurisprudence. The course explores languages' historic rootedness in the interactions between human beings and their surroundings; the varying geographic expressiveness and discrimination of languages; the effect and significance of literary evocations of landscapes; and the cultural and environmental geographic content of the language of law. Readings, lectures, discussions, writing.

Cross Listings: GEOG 410.

GEOG 5512 Global Tourism Credits: 3
This course is a regional survey of world tourism. Topics include the uniqueness of place, the marketing of tourist destinations, and the cultural, economic, and environmental impacts on host societies.

Prerequisites: GEOG 105 (or GEOG 200, or GEOG 202).

GEOG 5515 History and Philosophy of Cartography Credits: 3
An examination of the techniques, assumptions, psychology, and cultural implications of mapping from the Stone Age to the age of satellites and the computerized Geographic Information System. Readings, lectures, discussions, writing.

Prerequisites: Baccalaureate degree.

Cross Listings: GEOG 415.
GEOG 5526 Paleoecology: Microfossils and Climate Change Credits: 3
Paleoecology will focus on questions addressing past environments and past climates based on the ecology of microfossils. Micro-organisms are very sensitive to a wide variety of environmental conditions including temperature, precipitation, hydrology, water chemistry, salinity, habitat, and pollution. The fossil remains of these organisms are used as proxy indicators for reconstructing past environmental conditions, climate change, vegetation dynamics, and human impacts. Students will have the opportunity to process microfossils and make interpretations based on analysis of data.

GEOG 5530 Location Theory Credits: 3
An analysis and evaluation of the basic theories that have been developed to account for the spatial arrangements of economic activity. Emphasis on urban areas as nodes of economic interaction. Three hours lecture and discussion per week.
Prerequisites: GEOG 311, six hours in economics or urban studies.

GEOG 5535 Geoarchaeology Credits: 3
This course examines geomorphological and archaeological methods used in reconstructing sites, settlement patterns, and paleo-environments; evaluating archeological site integrity; and assessing the impact of development, with the emphasis on geomorphological evidence. No archaeological background necessary.
Prerequisites: GEOG 150, GEOG 314.
Cross Listings: GEOG 435.

GEOG 5537 Population Geography Credits: 3
An analysis of human population: how they grow, their changing compositions, and how and why people migrate from one place to another. Basic demographic processes—morality, fertility, and migration—and theory and techniques for their study are discussed. The relationships between population growth and population planning, immigration, urbanization and cities, and the environment.

GEOG 5542 Quaternary Environments Credits: 3
This course reviews earth climatic history and focuses on major mechanisms for global and regional climate change. Methods of paleoclimatic reconstruction are examined, including analysis of proxy data and climate modeling. Application of these methods toward prediction of future climate change is also explored.
Prerequisites: GEOG 314 (or GEOLOGY 314).

GEOG 5544 Advanced Spatial Data Analysis Credits: 4
This course will focus on advanced computation methods for the analysis and modeling of complex and often non-deterministic processes in the spatial and environmental sciences. Students will be introduced to innovative techniques for analyzing large datasets with attribute spaces of very high dimensionality, including hyper-spectral remote sensing data. Three hours lecture and one hour computer lab per week.
Prerequisites: GEOG 444, elementary statistics, or permission of instructor.

GEOG 5546 Global Water and Sustainability Credits: 3
This course examines the physical characteristics of water and its role in Earth systems. The challenges facing societies in an era of rapidly changing climate are explored.

GEOG 5548 Satellite Climatology Credits: 4
Use of satellite observations to study the climate system. Discussions consider the development of satellite climatology, sensors, platforms and methodologies used to estimate climate variables from radiance measurements. Aspects of climate that are emphasized include cloud climatologies, cloud systems, atmospheric moisture, radiation budget, and land-surface conditions. Three hours of lecture and one hour of lab per week.

GEOG 5597 Graduate Seminar in Geosciences Credits: 3
This graduate seminar examines emerging and current issues in Environmental and Urban Geosciences. Most environmental issues and their solutions are inherently multidisciplinary and are characterized by significant interactions between oceans, atmosphere, land, and society. In addition to examining these issues, this seminar engages students in the process of critically evaluating Earth and human systems studies. The course provides students with a fundamental background of today’s important environmental challenges and experience doing the craft of science through critically reading, thinking, writing, and speaking.
Cross Listings: GEOLOGY 5597.

GEOG 5598 Special Topics in Geography Credits: 1-3
Advanced independent research in Cultural or Physical Geography.
Prerequisites: Baccalaureate degree.

GEOG 5598A Special Topics in Cultural Geography Credits: 1-3
Advanced independent research in Cultural Geography.
Prerequisites: Baccalaureate degree.

GEOG 5598B Special Topics in Physical Geography Credits: 1-3
Advanced independent research in Physical Geography.
Prerequisites: Baccalaureate degree.
GEOG 5598D Special Topics in Advanced GIS and Remote Sensing Credits: 1-3
Advanced independent research in geographic information science (GIS) and remote sensing.

GEOG 5598F Special Topics: Geostatistics and Modeling Credits: 1-3
Advanced independent research in geostatistics and modeling techniques.

GEOG 5598K Issues in Waste Management Credit: 1
This course focuses on the critical problems of managing the waste materials generated in our society. The course includes discussion of various types of waste—municipal solid waste, hazardous (industrial) waste, nuclear and medical wastes. Sources, handling, storage, transportation, treatment and disposal of these wastes are reviewed. Experts from government and the waste management industry give guest lectures.

GEOG 5599 Research and Thesis Geography Credits: 1-9
Students will conduct research and writing in support of a thesis topic, which will have been approved in advance by the appropriate graduate advisory committee. Credit load will also be approved in advance by the student's graduate advisor.
Prerequisites: Baccalaureate degree.

GEOG 5690 Special Research Topics Credits: 1-3
Student will produce a major research paper suitable for publication under the direction of their instructor.

GEOG 5699R Research And Dissertation Credits: 1-10
Research for dissertation in partial fulfillment of the Geosciences requirements for the Ph.D. degree.

Geology Courses

GEOLOGY 220 General Geology Credits: 3
Geology is the study of Earth, the materials that make up the Earth, and the forces and processes that build and shape the continents, oceans, and life on Earth. The goal of this course is for students to gain an understanding of the fundamental concepts and scientific principles that underlie the physical, chemical, and biological processes that shape our Earth and to learn to think critically about scientific information and how geologic processes affect us every day.
GEOLOGY 220 - MOTR GEOL 100: Geology

GEOL 220L General Geology Laboratory Credits: 2
Laboratory and field investigations of principles of the geology designed to complement the topics covered in GEOLOGY 220 through the use of inquiry-based investigations in the laboratory and field.
Co-requisites: GEOLOGY 220.

GEOLOGY 250L Field Methods in Earth and Environmental Science Credits: 3
A field-based course covering basic methods used by earth scientists for environmental, geographic, and geologic investigations. Students will collect field data at off-campus sites, conduct periodic monitoring, and analyze samples using departmental and personal instrumentation. Students will work on collaborative projects and will present their results. Class will meet weekly for four hours in the field.
Prerequisites: ENV-SCI 110R (or GEOLOGY 220), ENV-SCI 110L (or GEOLOGY 220L).
GEOLOGY 250L - MOTR PHYS 110L: Essentials Physical Sciences w/Lab

GEOLOGY 251L Field Methods in Earth and Environmental Science: Off-Campus Credits: 3
This course will provide students with an introductory, inquiry-based learning experience that focuses on the application of field methods for understanding surface and subsurface earth processes and environmental issues. Students will collect field data at off-campus sites, conduct periodic monitoring, and analyze samples using departmental instrumentation. Students will work on collaborative projects and will present their results. Class will meet at an off campus location during break (added cost) plus have four on campus meetings. Prerequisites: GEOLOGY 220 (or ENV-SCI 110R), GEOLOGY 220L (or ENV-SCI 110L).

GEOLOGY 251L - MOTR PHYS 110L: Essentials Physical Sciences w/Lab

GEOLOGY 303 Weather and Climate Credits: 4
Overview of weather processes and the main components of the climate system. Emphasis is on the physical basis of daily weather patterns, seasonal climate variability and longer-term climate change at local, regional, and global scales. The theme throughout the course will be the importance of weather and climate as major drivers of environmental change.
Prerequisites: ENV-SCI 110R or GEOLOGY 220.

GEOLOGY 312 Mineralogy Credits: 4
Introduction to crystallography, mineral chemistry and the systematic classification and identification of minerals. Three hour lecture and discussion with two hours laboratory a week.
Prerequisites: CHEM 212R, GEOLOGY 220.
GEOLOGY 313 Evolution and the Geologic Record Credits: 4
An introduction to the history of life by studying the geologic record. Students will examine major features of the fossil record including: invertebrates, vertebrates, and plants. Students explore what the fossil record tells us about geologic time, evolution, past environments and distributions of organisms. Three hours of lecture and two hours of laboratory a week. The course will include field trips to collect and interpret fossils and paleoenvironments.

GEOLOGY 314 Principles of Geomorphology Credits: 4
Explores the processes that shape the earth's surface. Focuses on the development and description of fluvial, glacial, eolian, and coastal landforms. Studies the influence of tectonic and climatic factors. Three hours lecture and two hours lab per week. Field trip.
Prerequisites: ENV-SCI 110R (or GEOLOGY 220).

GEOLOGY 321 Climate Change Impact Assessment and Policy Response Credits: 3
This course introduces how scientists assess observed climate change and predict future climate change. Lectures, discussions, problem sets, and term papers help students explore interactions among climate change, human activities and policy responses. It helps students achieve an appreciation for the role of accurate scientific information as foundation for shaping political agreements and policies on climate change.
Prerequisites: ENV-SCI 110R.

GEOLOGY 325 Sedimentology/Stratigraphy Credits: 4
Study of sedimentary rocks with special emphasis given to hand specimen identification based on mineral composition and textural features. Characteristics of sediments, transportation and environment of sediment deposition. Principles of stratigraphy, facies analysis and interpretation. Measurement and description of stratified rocks. Three hours lecture and two hours lab per week. Field trips.
Prerequisites: GEOLOGY 220.

GEOLOGY 326CZ Archaeology of Ancient Disasters Credits: 3
Remarkable human achievements are revealed by archaeological research, but the human past was frequently shaped as well by disasters of natural and human origin. Drawing on case studies that include data from the geosciences, archaeological excavations, and historical sources, this class examines how earth processes, the biosphere, and human cultural behavior were all sources of catastrophe. We begin with the geological context of disaster, including earthquakes, volcanic eruptions, climate change, and soil depletion. Next, we examine how ancient societies responded to disease, an ever present threat from the biological environment. Finally, we look at how ancient human groups were changed by stresses of cultural origin, including overpopulation, depletion of vital resources, and warfare. The study of ancient disasters not only gives us a wider understanding of human history, it may offer lessons for coping with future catastrophes.

GEOLOGY 335 Introduction to Waste Management Credits: 3
Prerequisites: ENV-SCI 110R, GEOG 150, GEOLOGY 220.

GEOLOGY 342 Igneous and Metamorphic Petrology Credits: 4
Introduction to the principles governing the classification, occurrence and origins of igneous and metamorphic rocks. Three hours lecture and discussion with two hours laboratory a week.
Prerequisites: GEOLOGY 312.

GEOLOGY 350 Earth Structures and Tectonics Credits: 4
This course is designed to teach students the basic techniques and approaches for problem solving in structural geology. The course will cover the fundamentals of crustal deformation and discuss joints, faulted and folded rocks in their plate tectonic context. Two hours of lectures and three hours of laboratory a week. Course will include local field trips and one weekend field trip.
Prerequisites: GEOLOGY 220, PHYSICS 210 (or PHYSICS 240).

GEOLOGY 370R Hydrogeology Credits: 3
Geology and hydrologic factors controlling the occurrence, movement, quality, recovery and development of water supply and distribution. Problems relating to urbanization of flood plains.

GEOLOGY 384 Frauds, Myths and Mysteries in Archaeology Credits: 3
Using archaeological hoaxes, myths, and mysteries from around the world – including local and regional examples - students will use science to make good judgments about information they receive in today’s world. This course will demonstrate how science approaches questions about human antiquity and will show where pseudoscience falls short. (Lecture/on-line asynchronous).
Cross Listings: CLASSICS 384.
GEOLOGY 398 Geology Midcontinent Field Trip Credit: 1
A study of a selected area of the midcontinent U.S. with emphasis on locations to be visited during a three-day field trip (at the student’s expense). An opportunity to observe and study physical features and collect materials. Several scheduled one-hour meetings in addition to field trip. Lectures, discussion and reading assignments provide a background to place the area covered by the field trip into the overall geologic framework of the Midcontinent U.S. Descriptive report or written examination. Limited enrollment.

Prerequisites: Junior or senior level.

GEOLOGY 407 Archaeological Resources Management Credits: 3
This class examines contemporary issues managing archaeological resources. This class is intended for students seeking work in Cultural Resources Management (CRM); those already working CRM, or student anthropology, environmental studies, geology, geography, public administration and other fields likely to deal with archaeological and historical resources in a research or employment setting. This class does not require a background in archaeology.

GEOLOGY 408 Archaeological Field Survey Methods Credits: 3
This class offers instruction in the basic skills required to conduct field surveys in archaeology and other geosciences disciplines. In the classroom, students learn about the development of archaeology as a scientific discipline and how to recognize some of the basic field data sought by archaeologists. Students learn about mapping and land navigation techniques. The field phase of instruction includes visits to archaeological sites in the region.

GEOLOGY 409 Field School in Archaeology Credits: 1-5
This class offers students an opportunity to attend a field school in archaeology. Students will be taught how to: design archaeological research, set-up excavation, keep a wide range of excavation records, make maps and drawings, take photographs related to excavation problems, identify and recover a broad spectrum of artifact and faunal remains, collect samples for specialized analysis and use a wide range of excavation tools. This course will also introduce students to recording and analyzing excavated materials in the archaeological laboratory. Class size limited to 20 students.

GEOLOGY 411 Mineral Deposits Credits: 3
Distribution, origin and environmental implications of extractable resources including non-metallic deposits, ores, and selected energy resources.

GEOLOGY 416 Understanding and Living with Volcanoes Credits: 3
This course will examine the distribution, tectonic setting, and morphology of a range of volcano types on Earth and a few examples from other planets. Students will study volcanic processes including explosive and passive processes and how we investigate them. This will involve discussion of volcanic hazards and hazard assessment, risk communication, and the challenges of volcanic crises response. The course will also cover how volcanoes impact the local and global economy and Earth’s climate. Recommended preparation: GEOG 314 / GEOLOGY 314 or GEOLOGY 325 or GEOLOGY 342.

Prerequisites: GEOLOGY 220 or ENV-SCI 110R/110L, and GEOG 203 or GEOG 402.

GEOLOGY 434 Hazardous Waste Operations Management Credits: 2
Overview of federal regulations dealing with hazardous waste management, toxicology, hazard communication, site management, air monitoring, operating procedures, and health and safety. The course includes hands-on training on spill control, equipment use and emergency response. Practical training involves physical stress and participants must be in good physical health. This course satisfies OSHA’s 40 hour training requirement for hazardous waste personnel.

GEOLOGY 441 Environmental Geophysics Credits: 3
Fundamental theory and near-surface applications of the geophysical methods; (1) seismic refraction, (2) seismic reflection, (3) gravity, and (4) magnetics. Emphasis will be placed on the use of these methods in environmental and engineering investigations, addressing such issues as water resources, contaminant transport, geotechnical properties and archaeological protection. Course will include a field component illustrating application of selected techniques to local environmental problem.

GEOLOGY 446 Petroleum Geology Credits: 3
Study of the origin, concentration, exploration for and recovery of petroleum.

Prerequisites: GEOLOGY 220.

GEOLOGY 456 Field Methods in 3D Imaging of the Environment Credits: 3
This course is designed to teach students techniques to create high-resolution, 3D images of the environment and detailed topographic maps using digital technologies. The class will include instruction on various aerial systems and hand-held photography and the software required for data acquisition, processing, and interpretation.

GEOLOGY 460 Introduction to Geochemistry Credits: 3
Basic principles governing the origin, distribution and migration of the elements and the geochemical cycles operating in the earth's atmosphere, hydrosphere and lithosphere.

Prerequisites: CHEM 212R, GEOLOGY 312.

GEOLOGY 471 Tectonics Credits: 3
A detailed inquiry into plate tectonics and the geophysical and geological data that define the motion of lithospheric plates. Global examples of divergent, convergent, and transform plate boundaries will be studied through lectures, discussions, problem sets, and term papers.

Prerequisites: GEOLOGY 325, GEOLOGY 350.
GEOLOGY 490 Geology Field Camp Credits: 6
Study and practical involvement in the methods of geological mapping. The six-week course is conducted during the summer, partially in a field camp away from the Kansas City area. Students pay their own travel expenses to and from the field. Participation in the course involves individual mapping in the field area and field reports.

GEOLOGY 498 Undergraduate Field Research Credits: 1-5
The student will collaborate with fellow students and instructors in collection of original field geologic data at a location remote from campus. Field research will be carried out during semester intersessions or summer semesters.

GEOLOGY 499WI Geology Seminar Credits: 3
Students participate in discussions; present formal talks; and prepare written papers on selected topics.
Prerequisites: Senior standing, RooWriter.

GEOLOGY 507 Archeological Resources Management Credits: 3
This class examines contemporary issues managing archaeological resources. This class is intended for students seeking work in Cultural Resources Management (CRM); those already working CRM, or student anthropology, environmental studies, geology, geography, public administration and other fields likely to deal with archaeological and historical research or employment setting. This class does not require a background in archaeology.

GEOLOGY 508 Archaeological Field Survey Methods Credits: 3
This class offers instruction in the basic skills required to conduct field surveys in archaeology and other geosciences disciplines. In the classroom, students learn about the development of archaeology as a scientific discipline and how to recognize some of the basic field data sought by archeologists. Students learn about mapping and land navigation techniques. The field phase of instruction includes visits to archeological sites in the region.

GEOLOGY 509 Field Study in Archaeology Credits: 1-5
This class offers students an opportunity to attend a field school in archaeology. Students will be taught how to: design archaeological research, set-up excavation, keep a wide range of excavation records, make maps and drawings, take photographs related to excavation problems, identify and recover a broad spectrum of artifact and faunal remains, collect samples for specialized analyses and use a wide range of excavation tools. This course will also introduce students to recording and analyzing excavated materials in the archaeological laboratory.

GEOLOGY 512 Geology and Hazardous Waste Management Credits: 3
Nature, sources and characterization of hazardous waste; collection, transportation and disposal of hazardous wastes. Fundamentals of toxicology and risk assessment. Application of geologic principles and methods in the assessments and remediation of abandoned hazardous waste sites and contaminated aquifers. Review of selected case histories. Experts from government and private organizations will be invited to deliver guest lectures. An out-of-town field trip to a hazardous waste site is required. A term paper based on library research or an approved experimental project is required for graduate credit.
Prerequisites: GEOLOGY 325, GEOLOGY 342, GEOLOGY 350.

GEOLOGY 513 Advanced Mineral Deposits Credits: 3
Distribution, origin and environmental implications of extractable resources including non-metallic deposits, ores, and selected energy resources.
Prerequisites: GEOLOGY 312, GEOLOGY 325, graduate standing.

GEOLOGY 516 Understanding and Living with Volcanoes Credits: 3
This course will examine the distribution, tectonic setting, and morphology of a range of volcano types on Earth and a few examples from other planets. Students will study volcanic processes including explosive and passive processes and how we investigate them. This will involve discussion of volcanic hazards and hazard assessment, risk communication, and the challenges of volcanic crises response. The course will also cover how volcanoes impact the local and global economy and Earth's climate.

GEOLOGY 521 Advanced Methods for Earth and Environmental Science Credits: 3
This course will provide students with an inquiry-based learning experience that focuses on the application of field methods for understanding surface and subsurface earth processes and environmental issues. Students will collect field data at off campus site, conduct periodic monitoring, and analyze samples using departmental instrumentation.
Prerequisites: GEOLOGY 220 (or ENV-SCI 110R), GEOLOGY 220L (or ENV-SCI 110L).

GEOLOGY 525 Quaternary Geology Credits: 3
The study of Quaternary processes, surficial deposits, and land forms. Course content will cover both the glaciated and nonglaciated portions of the United States as well as the interrelations between Quaternary geology and urbanization. Three hour lecture. Field trips.
Prerequisites: GEOLOGY 314, baccalaureate degree in geology.

GEOLOGY 531 X-Ray Diffraction and Fluorescence Methods: X-Ray Mthds Geol/Anly Credits: 2
Theory and practical application of x-ray diffraction and fluorescence methods in characterizing geologic materials. Two hours lecture and one 2-hour lab per week for 8 weeks.
GEOLOGY 5532 Icpms Applications in Geology Credits: 2
Theory and practical application of Inductively-Coupled Plasma Mass Spectrometry in the geosciences and environmental sciences. Two hours lecture and discussion, and one 2-hour lab per week for 8 weeks.

GEOLOGY 5534 Hazardous Waste Operation Management Credits: 2
Overview of federal regulations dealing with hazardous waste management, toxicology, hazard communication, site management, air monitoring, operating procedures, and health and safety. The course includes hands-on training on spill control, equipment use and emergency use and emergency response. Practical training involves physical stress and participants must be in good physical health. This course satisfies OSHA’s 40 hour training requirement for hazardous waste personnel.
Prerequisites: GEOG 335 (or GEOLOGY 335).

GEOLOGY 5535 Aqueous Geochemistry Credits: 3
This course is directed to two objectives. First it will equip the students with a basic understanding of the geochemical principles and calculations which are directly related to environmental problems and second, it will provide the student with a basic understanding of specific problem areas in environmental geochemistry.
Prerequisites: CHEM 211, CHEM 212R, Baccalaureate degree in geology.

GEOLOGY 5536 Introduction to Scanning Electron Microscopy Methods Credits: 2
Practical introduction to the use of the scanning electron microscope and its accessories, including image production, elemental analysis, and elemental mapping of solid materials. Geological applications will be emphasized, but the methods presented will be useful for microscopic examination of solid materials in any discipline. 2 hours of lecture and lab per week for 8 weeks.
Prerequisites: Permission of the instructor.

GEOLOGY 5541 Environmental Geophysics Credits: 3
Fundamental theory and near-surface applications of the geophysical methods including seismic methods, potential methods, and electrical methods. Emphasis will be placed on the use of these methods in environmental and engineering investigations, addressing such issues as water resources, contaminant transport, geotechnical properties, and archaeological protection. Course will include a field component illustrating application of selected techniques to a local environmental problem.
Prerequisites: Baccalaureate degree in Geology.

GEOLOGY 5542 Electrical Methods in Environmental Geophysics Credits: 3
Fundamental theory and near-surface applications of the electrical geophysical methods; (1) electrical resistivity, (2) electromagnetics, (3) ground penetrating radar, and (4) induced polarization. Emphasis will be placed on the use of these methods in environmental and engineering investigations, addressing such issues as water resources, contaminant transport, geotechnical properties and archaeological protection. Course will include a field component illustrating application of selected techniques to a local environmental problem.
Prerequisites: Baccalaureate degree in Geology.

GEOLOGY 5546 Petroleum Geology Credits: 3
This course addresses the geological habitat of oil and natural gas, the impacts of petroleum on society, subsurface mapping techniques, and the acquisition and interpretation of subsurface and production data.
Prerequisites: GEOLOGY 220, baccalaureate degree in geology.

GEOLOGY 5551 Geotechnics Credits: 4
Integration of the basic principles and concepts from material sciences, rock and soil mechanics, and civil engineering. Mechanical properties, geologic aspects and engineering classifications of earth materials and the effects of physical forces on their engineering behavior will be emphasized. Three hours of lecture and two hours of laboratory each week. Field trips.
Prerequisites: PHYSICS 210, PHYSICS 220, GEOLOGY 350.

GEOLOGY 5555 Environmental Impact Analysis Credits: 3
A systematic analysis of the spectrum of environmental changes related to human use and occupancy in urban settings. Study of the nature of activities such as industrialization, mining, urbanization and transportation, and their effect on the specific site and general region. Methods of measuring aesthetic and economic quality of the urban areas will be explored in an attempt to facilitate writing environmental impact statements.
Prerequisites: Baccalaureate degree in geology.

GEOLOGY 5559 Inquiry-Based Field Studies for Teachers Credits: 3-6
Inquiry-based studies in environmental science, environmental chemistry and geology involving collaborations between course participants, practicing scientists and professional educators. The course is designed especially for pre- and in-service teachers of all levels and contact areas to enhance critical thinking, problem solving and process skills as defined by state and national standards. Projects will balance field and lab studies with analysis and presentation of results through electronic, oral and written means.
GEOLOGY 5561 Geologic Mapping Credits: 3
Analysis of the stratigraphic section in the greater Kansas City area by field investigation. Compilation of descriptive data and the construction of detailed geologic maps. Practical problems to determine the most beneficial use of the land in an area that is rapidly becoming urbanized. Previous field mapping experience highly recommended.
**Prerequisites:** Baccalaureate degree in geology.

GEOLOGY 5570 Advanced Hydrogeology Credits: 3
This course will focus on advanced groundwater hydrology with emphasis on flow equations and computational modeling in various geologic settings. Students will be introduced to basic analytical skills to derive dynamics of groundwater flow, comprehensive understanding of aquifer characteristics, and interpretation of field based groundwater data using computational simulations.
**Prerequisites:** Baccalaureate degree in Geosciences, GEOL 370R, or permission of instructor.

GEOLOGY 5571 Tectonics Credits: 3
A detailed inquiry into plate tectonics and the geophysical and geological data that define the motion of lithospheric plates. Global examples of divergent, convergent, and transform plate boundaries will be studied through lectures, discussions, problem sets, and term papers.
**Prerequisites:** GEOLOGY 325, GEOLOGY 350.

GEOLOGY 5572 Earthquake Geology Credits: 3
This course is detailed inquiry into the study of present and past earthquakes as they are preserved in the seismological, geophysical, and geological record. Global examples of earthquakes will be studied through lectures, discussions, problem sets, term papers, field trips and field projects.
**Prerequisites:** GEOLOGY 350.

GEOLOGY 5597 Graduate Seminar in Geosciences Credits: 3
This graduate seminar examines emerging and current issues in Environmental and Urban Geosciences. Most environmental issues and their solutions are inherently multidisciplinary and are characterized by significant interactions between oceans, atmosphere, land, and society. In addition to examining these issues, this seminar engages students in the process of critically evaluating Earth and human systems studies. The course provides students with a fundamental background of today’s important environmental challenges and experience doing the craft of science through critically reading, thinking, writing, and speaking.
**Cross Listings:** GEOG 5597: Graduate Seminar in Geosciences II

GEOLOGY 5598 Special Topics in Urban Environmental Geology Credits: 1-3
Individual research into practical geoscience problems in the urban environment. Provides opportunity for individual research in applied geology. Topic and method to be established by student and academic supervisor prior to enrollment.

GEOLOGY 5598A Special Topics In Urban Environmental Geology: Petroleum Geology Credits: 1-3
GEOLOGY 5598B Spec Topics In Urban Environmental Geology: Soil/Rock Mechanics Credits: 1-3
GEOLOGY 5598C Sp Topics In Urban Environmental Geol: Stratigraphy/Paleontology Credits: 1-3
GEOLOGY 5598D Spec Topics In Urban Environmental Geology-Environmental Geology Credits: 1-3
GEOLOGY 5598E Special Topics in Energy and Mineral Resources Credits: 1-3
This course provides students an opportunity for advanced independent research in energy and mineral resources.

GEOLOGY 5598H Special Topics in Urban Environmental Geology - Geochemistry and Mineralogy Credits: 1-3
Special Topics In Urban Environmental Geology - Geochemistry and Mineralogy
GEOLOGY 5598I Special Topics In Urban Environmental Geology Credits: 1-3
GEOLOGY 5598J Special Topics In Urban Environmental Geology: Environmental Sci Credits: 1-3
GEOLOGY 5598K Issues in Waste Management Credit: 1
This course focuses on the critical problems of managing the waste materials generated in our society. The course includes discussion of various types of waste-municipal solid waste, hazardous (industrial) waste, nuclear and medical wastes. Sources, handling, storage, transportation, treatment and disposal of these wastes are reviewed. Experts from government and the waste management industry give guest lectures.

GEOLOGY 5598M Special Topics in Geostatistics and Modeling Credits: 1-3
Advanced independent research in geostatistics and modeling techniques.

GEOLOGY 5599 Research and Thesis: Geology Credits: 1-9
Individual directed research by the student leading to the preparation of a formal written thesis and oral defense.

GEOLOGY 5690 Special Research Topics Credits: 1-3
Student will produce a major research paper suitable for publication under the direction of their instructor.

GEOLOGY 5699R Research And Dissertation Credits: 1-10
Research for dissertation in partial fulfillment of the Geosciences requirements for the Ph.D. degree.

GEOLOGY 5899 Required Graduate Enrollment Credit: 1
Environmental Studies Program

Program Description

The Environmental Studies Program provides students with the most innovative preparation in urban environmental issues and sustainability. The ES program engages a diverse student body with a strong foundation in environmental and geosciences. It includes relationships between humans, society, and the environment. In addition to core courses in environmental science, environmental courses emphasizing the humanities and social sciences provide necessary balance for addressing physical Earth issues in a societal context. Undergraduate students gain essential life skills, an appreciation for complex environmental processes, and respect for the diversity of environmental challenges in both Environmental Studies BA and Environmental Science BS degrees.

The department has offered geography and geology courses since 1934. The department also offers a master of science degree in environmental and urban geosciences. Students who designate geosciences as their coordinating discipline for the interdisciplinary doctoral program must meet admission and other requirements available from the department. See the School of Graduate Studies section of the graduate catalog for more information about doctoral programs.

Faculty

Program Director:
Caroline P. Davies

Participating Architecture, Urban Planning and Design Faculty:
Joy Swallow, Michael Frisch, Sungyup Kim, and Jacob Wagner

Participating Biology Faculty:
Aaron Reed

Participating Business Faculty:
Sandy Price, David Renz, and Li Sun

Participating Chemistry Faculty:
Kathleen Kilway, and J. David VanHorn

Participating Engineering Faculty:
ZhiQiang Chen, John Kevern, Deborah O’Bannon, and Jerry Richardson

Participating Economics Faculty:
Mathew Forstater and Michael Kelsay

Participating Education Faculty:
A. Louis Odom

Participating Geosciences Faculty:
Jimmy Adegoke, Caroline Davies, Steven Driever, Syed Hasan, Alison Graettinger, Wei Ji, Jejung Lee, James Murowchick, Tina Niemi, and Fengpeng Sun

Participating History Faculty:
Brian Frehner and John Herron

Participating Law Faculty:
John Ragsdale and Irma Russell

Participating Philosophy Faculty:
James Sheppard

Participating Political Science Faculty:
Reginald Bassa
Bachelor of Arts: Environmental Studies

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes

Students graduating from this program will:

- Describe the components and function of Earth systems.
- Explain environmental policy and ethical approaches to environmental issues and global challenges such as climate change, global water scarcity and ocean acidification, energy, consumption and waste management, and urban sustainability.
- Explain environmental challenges from multiple cultural perspectives and through world experiences.
- Apply advanced geographical knowledge, quantitative, and analytical skills to new settings and complex problems.
- Characterize environmental elements analytically and communicate their findings effectively.

‘Total credits’ in this section indicates the number of General Education Core credit hours that are not met by the degree specific requirements outlined below.

Total Credits 21

1 See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.
Constitution Course Requirement
Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

Total Credits: 3

1 Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements
Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

1 ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.
2 This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

Major Requirements
Students must successfully complete the major requirements below with at least 12 hours of the noted upper division (300+) course requirements completed at UMKC.

Select one of the following WI courses:
- ENV-STDY 499WI  Environmental Studies Practicum
- GEOG 499WI  Geography Seminar
- GEOLOGY 499WI  Geology Seminar
- GEOG 403WI  History and Philosophy of Geoscience

### Required Supporting Social Sciences
Select four of the following from three different disciplines: 12
- ECON 420  Environment, Resources And Economic Growth
- GEOG 406  Global Environmental Change
  or GEOG 449  Global Water and Sustainability
- HISTORY 365A  American Environmental History
- PHILOS 370  Environmental Ethics And Policy
- UPD 432  Urban Environment Planning And Design

Select one of the following: 3

### Divisions of Learning
Select three of the following (at least one from each division of learning): 9

#### Natural Sciences (NS):
- BIOLOGY 302  General Ecology
- BIOLOGY 303  Invertebrate Zoology
- BIOLOGY 305  Marine and Freshwater Biology
- BIOLOGY 308  Vertebrate Zoology
- BIOLOGY 346  Plant Biology
- CIV-ENGR 454  River Stability and Scour
- CHEM 211 & 211L  General Chemistry I and Experimental General Chemistry I
- CHEM 212R & CHEM 212LR  General Chemistry II and Experimental General Chemistry II
- ENV-SCI 332CZ  Environmental Sustainability
  or ANCH 301  Environmental Sustainability
- ENV-SCI 449  Global Water and Sustainability
- ENV-SCI 496  Environmental Internship
- ENV-STDY 430  Soil and Groundwater Remediation

All Physical Geography courses are applicable as natural science electives:
- GEOG 303  Weather and Climate
- GEOG 314  Principles of Geomorphology
- GEOG 360  Principles of Biogeography
- GEOG 401  Advanced Geographic Information Science
- GEOG 402  Environmental Remote Sensing and Digital Image Analysis
- GEOG 406  Global Environmental Change
- GEOG 430  Energy Resources
- GEOG 435  Geoarchaeology
- GEOG 442  Quaternary Environments
- GEOG 448  Satellite Climatology

Any Geology course may be used for additional natural science electives, but the following courses are particularly relevant to the environmental studies major:
- GEOLOGY 312  Mineralogy
- GEOLOGY 314  Principles of Geomorphology

1 BA students need at least one course taken from each of the three divisions of learning: Natural Sciences (NS), Social Sciences (SS), & Ethics, Jurisprudence, & Culture (E). Core courses cannot also be counted for credit in this section.

**General Electives**

Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

**Tools for Planning and Fulfilling Academic Requirements**

UMKC's Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.
UMKC's Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student's officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Bachelor of Science: Environmental Science

University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes
Students graduating from this program will:

• Describe the components and function of Earth systems.
• Explain environmental policy and ethical approaches to environmental issues and global challenges such as climate change, global water scarcity and ocean acidification, energy, consumption and waste management, and urban sustainability.
• Explain environmental challenges from multiple cultural perspectives and through world experiences.
• Apply advanced geographical knowledge, quantitative, and analytical skills to new settings and complex problems.
• Characterize environmental elements analytically and communicate their findings effectively.

'Total credits' in this section indicates the number of General Education Core credit hours that are not met by the degree specific requirements outlined below.

Total Credits 21

1 See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.
Constitution Course Requirement
Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

<table>

</tr>
</tbody>
</table>

Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements
Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

Minimum GPA: 2.0

Total Credit Hours: 120

Tools for Planning and Fulfilling Academic Requirements

UMKC’s Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.
UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Environmental Studies Minor

Student Learning Outcomes

Students graduating from this program will:

- Environmental Studies students can describe the components and function of Earth systems, have knowledge of environmental policy and ethical approaches to environmental issues, and have engaged in global challenges such as climate change, global water scarcity and ocean acidification, energy, consumption and waste management, and urban sustainability.
- Environmental Studies students will be actively involved with diverse communities throughout their course work and understand environmental challenges from multiple cultural perspectives and through world experiences.
- Environmental Studies students will demonstrate this learning through the application, across the curriculum, of advanced geographical knowledge, quantitative, and analytical skills in their application to new settings and complex problems.
- Environmental Studies students will have the ability to characterize environmental elements analytically and communicate their findings effectively.

Environmental Studies Minor (B.A.)

B.A. Program Coordinator:

Caroline Davies, Geosciences, (816) 235-1335;

Students pursuing the bachelor of arts degree who wish to obtain a minor in environmental studies must take at least 18 credit hours of coursework from the following list, a minimum of nine credit hours at the 300- or 400-level and a minimum of nine credit hours at UMKC. The program of study is to be planned with a program coordinator.

<table>

Environmental Studies Minor (B.S.)

Student Learning Outcomes

- Environmental Studies students can describe the components and function of Earth systems, have knowledge of environmental policy and ethical approaches to environmental issues, and have engaged in global challenges such as climate change, global water scarcity and ocean acidification, energy, consumption and waste management, and urban sustainability.
- Environmental Science/Studies students will be actively involved with diverse communities throughout their course work and understand environmental challenges from multiple cultural perspectives and through world experiences.
- Environmental Studies students will demonstrate this learning through the application, across the curriculum, of advanced geographical knowledge, quantitative, and analytical skills in their application to new settings and complex problems.
• Environmental Studies students will have the ability to characterize environmental elements analytically and communicate their findings effectively.

**B.S. Program Coordinator:**
Caroline Davies, Geosciences, (816) 235-1335;

Students pursuing the bachelor of science degree who wish to obtain a minor in environmental studies must take at least 18 credit hours of coursework from the following list, a minimum of nine credit hours at the 300- or 400-level and a minimum of nine credit hours at UMKC. Environmental Sustainability Minor

Program Description
Global populations are becoming predominantly urban and the state of the environment is central to issues of quality of life, health and safety. The Sustainability minor program provides students with the most innovative preparation in urban environmental sustainability through course work that cross cuts multiple disciplines and focuses on integrative solutions. Students develop a foundation knowledge in Earth systems. Students engage the challenges of sustainability through course work and community problem solving in sustainable thinking, planning, policy, and design. Undergraduate students gain essential life skills, a foundation in complex environmental and human systems, and critical problem solving skills.

Student Learning Outcomes
Students graduating from this program will:

• Sustainability students can describe the interactions and feedbacks of Earth systems, have knowledge of environmental policy and urban planning, and are engaged in sustainability issues at many scales.
• Sustainability students will be actively involved with diverse communities throughout their course work, and assess sustainability challenges from multiple cultural perspectives and through world experiences.
• Sustainability students will demonstrate this learning through the application of advanced sustainable knowledge, quantitative, and analytical skills in their application to new settings and complex problems.
• Sustainability students will have the ability to characterize human-environmental interactions analytically and communicate their findings effectively.

Requirements
Minimum of 18 hours, Minimum of 9 hours from UMKC (not transferred)

Minimum of 9 Junior/Senior (300/400) level courses. Total hours determined by department. Academic Minors are optional. The minor will not appear on the Commencement Program or diploma but will be noted on the transcript.
Geography and Geology Programs

Program Description
The department has offered geography and geology courses since 1934. The geography and geology programs of the Department of Geosciences include both bachelor of arts and bachelor of science degrees.

Faculty

Professors:
Steven L. Driever (principal undergraduate geography advisor), Syed E. Hasan (Director, CAER), Wei Ji (graduate Geography advisor and GIS Program Director), Tina Niemi (principal undergraduate Geology advisor)

Associate Professors:
Jimmy Adegoke, Caroline P. Davies (undergraduate Environmental Studies advisor, BS; Director, Environmental Studies Program), Daniel P. Hopkins (undergraduate Environmental Studies advisor, B.A.), Jejung Lee (principal graduate advisor and IPhD Coordinator ) and James B. Murowchick (Chair)

Associate Teaching Professors:
Julie L. Urbanik

Professors Emeriti:
Raymond M. Coveney, Jr., Richard J. Gentile, Paul L. Hilpman, Eldon J. Parizek
Bachelor of Science/Bachelor of Arts: Geography

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Bachelor of Arts: Geography

Student Learning Outcomes

Students graduating from this program will:

- Understand human-environmental relationships and their spatial dimensions in various geographic areas, from local places to the entire world.
- Integrate knowledge from the humanities, social sciences, and natural sciences and apply that information to places.
- Know how to design, produce, and interpret maps using modern technology. Evidence of success is provided by performance on our exit examinations, admission to graduate schools, and ultimately the successful careers in geosciences pursued by our graduates.

</table>

Total Credits 3

1 Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

Bachelor of Science: Geography

Student Learning Outcomes

Students graduating from this program will:

• Understand human-environmental relationships and their spatial dimensions in various geographic areas, from local places to the entire world.
• Integrate knowledge from the humanities, social sciences, and natural sciences and apply that information to places.
• Know how to design, produce, and interpret maps using modern technology. Evidence of success is provided by performance on our exit examinations, admission to graduate schools, and ultimately the successful careers in geosciences pursued by our graduates.

Tools for Planning and Fulfilling Academic Requirements
UMKC's Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC's Degree Audit System (https://www.umkc.edu/Registrar/majors-degrees/planmymidegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student's officially recorded (Office of Registration and Records) and "what if" plans of study. This evaluation is used to certify all graduation requirements.

UMKC's Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Bachelor of Science/Bachelor of Arts: Geology

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Bachelor of Arts: Geology

Student Learning Outcomes

Students graduating from this program will:

- Be able to identify minerals and rocks.
- Be able to interpret stratigraphy based on multiple lines of evidence.
- Be able to analyze data to quantify geological features and structures.
- Be able to utilize field data to produce maps used in solving geological problems.
- Be able to report effectively on critically evaluated geological data.

**Total Credits** 62

1. Students must receive a grade of no lower than C- in all major required courses and major elective courses; and achieve an overall minimum GPA of 2.0 in the major with the exception of the supporting requisites section above.
2. High school biology satisfies this requirement.

**General Electives**

Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

---

**Bachelor of Science: Geology**

**Student Learning Outcomes**

Students graduating from this program will:

- Be able to identify minerals and rocks.
- Be able to interpret stratigraphy based on multiple lines of evidence.
• Be able to analyze data to quantify geologic features and structures.
• Utilize field data to produce maps used in solving geological problems.
• Be able to report effectively on critically evaluated geological data.

Focus A 
Focus B (Satisfied in program requirements below) 
Focus C (May be satisfied by the Constitution course requirement below) 
Focus Elective (Satisfied in program requirements below)

‘Total credits' in this section indicates the number of General Education Core credit hours that are not met by the degree specific requirements outlined below.

Total Credits 21

See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CJC 364</td>
<td>The Supreme Court And The Criminal Process</td>
<td>3</td>

| HISTORY 102| U.S. History Since 1877 (Focus C) 
| HISTORY 360R| Constitutional History of the United States 
| HONORS 230| Honors American Government (Focus C) 
| POL-SCI 210| American Government (Focus C) 

Total Credits 3

Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

• Take an equivalent course from the list above at a regionally accredited institution.
• Earn credit for one of the above courses through AP, IB, or CLEP.
• Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
• Have a previous bachelors degree (or higher) from a regionally accredited institution.
• Have an Associate of Arts degree from a regionally accredited institution.
• Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

Tools for Planning and Fulfilling Academic Requirements
UMKC's Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC's Degree Audit System (https://www.umkc.edu/registration/majors-degrees/plannymydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student's officially recorded (Office of Registration and Records) and "what if" plans of study. This evaluation is used to certify all graduation requirements.

UMKC's Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Minors in Geography and Geology

Academic minors are offered in geography (18 hours) and in geology (18 hours). At least nine of the hours needed for the minor must be taken at UMKC. The minor programs are sufficiently flexible to enable students with diverse backgrounds to choose relevant coursework from the department's offerings. The programs are structured to ensure that students gain an appreciation of the breadth of the minor field. The minor should be declared as early as possible, but not later than the beginning of the student's senior year. Up to eight hours of coursework may simultaneously count in both the major and minor areas, where applicable. This applies to departmental and non-departmental students.

Student Learning Outcomes

Students graduating from this program will:

- Understand human-environmental relationships and their spatial dimensions in various geographic areas, from local places to the entire world.
- Integrate knowledge from the humanities, social sciences, and natural sciences and apply that information to places.
- Know how to design, produce, and interpret maps using modern technology. Evidence of success is provided by performance on our exit examinations, admission to graduate schools, and ultimately the successful careers in geosciences pursued by our graduates.

Minor in Geography

A minor in geography may be obtained with a minimum of 18 semester hours of coursework in this discipline (at least nine of which must be at the 300- and 400-level).

Either ENV-SCI 110R (5 hours with lab) -or- GEOG 105 (3 hours) is required.

Note: GEOG 398, GEOG 417, and GEOG 499WI do not count as credit in a minor program in geography.

Student Learning Outcomes

Students graduating from this program will:

- Understand the forces and processes that build and shape the Earth.
- Be able to identify minerals and rocks and understand their formation processes.
- Understand evolution, earth history, and the role of fossils in geologic time.
- Be able to utilize techniques to describe the three-dimensional geometry of Earth layers and deformation processes.
- Collect and interpret field data, produce maps, and use them to solve geologic and environmental problems.
- Be able to critically analyze published literature and have experience with technical writing and presentations.

Minor in Geology

A minor in geology may be obtained with a minimum of 18 semester hours of coursework in this discipline (at least nine of which must be at the 300- and 400-level).

GEOLOGY 220 (5 hours with lab) -and- GEOLOGY 250L (3 hours) are required.

Note: GEOLOGY 398, and GEOLOGY 499WI do not count as credit in a minor program in geology.
Undergraduate Certificate Program in GIS

Student Learning Outcomes

Students graduating from this program will:

- Identify geospatial issues and technical needs in problem-solving in relation to relevant academic disciplines, industrial production, or public services.
- Design geospatial technical approaches for problem-solving.
- Analyze geospatial data and produce maps using relevant GIS software.
- Present geospatial study findings with oral presentation and written reports.

Geographic Information Systems (GIS) and related geospatial techniques are fast-growing and increasingly applied to almost all sectors of our society. Examples include environmental mapping, urban planning, and public resource management. This Missouri State-approved, transcripted undergraduate certificate program offers GIS-related multidisciplinary courses through several academic programs of the College of Arts & Sciences, such as Geosciences, Urban Planning and Design, Sociology, Economics, and Criminal Justice and Criminology. The curriculum is designed to prepare students for a variety of careers in the rapidly growing job market.

This undergraduate certificate program is open to any degree-seeking undergraduate students at UMKC with appropriate academic backgrounds.

For completion of the certificate program, the student is required to finish the coursework of 17-18 credit hours with a 3.0 GPA or higher.

Master of Science: Environmental and Urban Geosciences

The Department of Geosciences offers a Master of Science degree in Environmental and Urban Geosciences (M.S. EUG). This program prepares students for advanced study in natural hazards, paleoseismology, geology, geochemistry, climate variability, water resources, wetland dynamics, air and water pollution, geochaeology, paleoenvironments, geography, urban and human systems, GIS, and environmental remote sensing. The program provides students with either a thesis or non-thesis option. All students must complete the core curriculum and additional coursework.

Admissions Requirements

For full admission to the graduate degree program in environmental and urban geosciences, the following requirements must be met:

1. Completion of an undergraduate degree with a major in a geosciences field (such as Environmental Sciences or Studies, Geography, and/or Geology) and a grade-point average of at least 3.0 (A = 4.0) overall, as well as in the major.
2. Submission of scores on the Graduate Record Examination (GRE) is not required but highly recommended. GRE scores may be used to award assistantships.
3. Two letters of recommendation from academic and/or professional references.
4. The student must declare either a thesis or non-thesis degree option in his or her application. If you are declaring a thesis option admission, you must secure a thesis advisor in the Geosciences Department before admission and declare this in your application. For assistance, contact the Graduate Advisor.
5. All application materials must be submitted to the Admissions Office by March 31 for fall semester and October 1 for spring semester for final consideration.
6. All admitted M.S. EUG students must take a mandatory assessment during “Orientation” before the first day of class each semester.

With department approval, students with non-geoscience undergraduate degrees may be provisionally admitted on a non-regular degree-seeking basis. After successfully completing recommended courses for the appropriate undergraduate geoscience degree, provisionally-admitted students may be granted degree-seeking status.

Graduate Assistantships

Teaching assistantships are awarded on a competitive basis only to incoming fully-admitted, graduate students in the thesis option degree program. Assistantship applications and all supporting materials should be submitted by March 31 for fall enrollment and October 1 for spring enrollment. International Graduate Teaching Assistants (GTA) must be certified by the School of Graduate Studies (http://sgs.umkc.edu) prior to serving in any GTA position. Interested international students should contact the School of Graduate Studies for more information.

Student Learning Outcomes

Students graduating from this program will:

- be able to conduct an independent geospatial research project.
- be able to analyze and interpret environmental data.
- review ethics in research and career goals, conduct literature searches, and critically evaluate scholarly information.
- assess and defend research findings through oral and written communication.

Core Curriculum

### Requirements for Retention

1. For newly admitted graduate students, elimination of all undergraduate deficiencies (if any) in the undergraduate major and its supporting prerequisites is required upon or before the completion of the first 12 hours of coursework for graduate credit.
2. A 3.0 (B) average or better must be maintained in all graduate coursework. In addition, a 3.0 (B) average and a satisfactory balance of grades must be maintained in the approved program of study, or the student will be subject to either probationary status or dismissal from the program.
3. Thesis-option M.S. EUG students are required to pass a qualifying examination administered by the department during first year orientation.

### Requirements for Graduation

1. Formal acceptance of a Program of Study, including thesis research proposal for thesis option students, is required by the department and the School of Graduate Studies upon completion of the GEOG/GEOLOGY 5597.
2. No more than 12 credit hours of the program may be 300- to 400-level courses, and at least 18 credit hours must be at the 5000-level or above.
3. A formal written thesis and final oral examination are required of thesis option M.S. EUG students. The format of the thesis must be in accordance with guidelines of the School of Graduate Studies.
4. Satisfactory compliance with all applicable requirements of the School of Graduate Studies is required, including continuous enrollment and residency. Please refer to the General Graduate Academic Regulations and Information (p. 1189) section of this catalog.

Gerontology

Program Director:
Joan McDowd, PhD
mcdowdj@umkc.edu
(816) 235-2490

Program Office:
Cherry Hall, Room 314
http://cas.umkc.edu/cas

With the rapid aging of the population along with the consequences this brings to nearly every sector of our lives, it is important to prepare for the ways in which population changes will change our world. Studying gerontology can prepare students to understand and address the challenges of an aging world. UMKC offers gerontology programs at both the graduate and undergraduate levels.

For more information about Gerontology and our programs, please see our website (http://aging.umkc.edu/academic-programs).

Undergraduate
  • Minor in Gerontology (p. 385)

 Graduate
  • Graduate Certificate in Gerontology (p. 384)
Graduate Certificate in Gerontology

A graduate Gerontology certificate can be a way to begin to explore a new career or it can bring added value to an existing career. This eighteen-credit program can be taken either as a free-standing certificate or integrated with a graduate degree program at UMKC, such as the Master of Arts in Liberal Studies (p. 434). Students from such diverse fields as social work, counseling, nursing, psychology, pharmacy, dental hygiene, sociology, law, architecture, and education have completed the certificate. Students should contact the Program Director to discuss enrollment and a plan of study.

Student Learning Outcomes

Students graduating from this program will:

• Utilize gerontological frameworks to examine human development and aging.
• Relate biological theory and science to understanding senescence, longevity, and variation in aging.
• Relate psychological theory and science to understanding adaptation, stability, and change in aging.
• Relate social theory and science to understanding heterogeneity, inequality, and context as they relate to aging.
• Distinguish factors related to aging outcomes, both intrinsic and contextual, through critical thinking and empirical research.
• Adhere to ethical principles to guide work with and on behalf of older persons.
• Engage, through communication with older persons, their families, and the community in personal and public issues in aging.
• Engage collaboratively with others to promote integrated approaches to aging.

¹ The practicum requirement should be enrolled in after all other core requirements are completed.
² Students should contact the Program Director to identify appropriate course(s).
Minor in Gerontology

Undergraduate students in any major in the College of Arts and Sciences may seek an interdisciplinary minor in gerontology designed to increase awareness of issues of our aging population. The minor will augment a variety of career paths, including service provision, administration, psychology, the health professions, and education or research. Students should contact the Program Director to discuss the required 18-credit plan of study. The minor may also be integrated with the Bachelor of Health Sciences or the Bachelor of Liberal Arts degree.

Student Learning Outcomes

Students graduating from this program will:

• Students will be able to describe what is known about biological, psychological, and sociocultural factors involved in adult development and aging processes.
• Students will be able to describe physical, cognitive, and social role changes associated with aging and major theories associated with each.
• Students will be able to explain and analyze variations in aging due to such factors as gender, social class, race/ethnicity, LGBT status, and mental health status.
• Students will demonstrate an understanding of attitudes and stereotypes regarding aging, their sources, and potential for change (both in themselves and others).
• Students will be able to apply knowledge from their aging courses to a practice setting.

Healing and Humanities

Scofield Hall (http://www.umkc.edu/virtualtour/scofield-hall.asp), Room 9
711 E. 51st Street

Faculty Coordinator/Program Advisor:
Cassandra Shaffer Johnson, Coordinator of Pre-Health Programs, (816) 235-6085, shafferjohnsonc@umkc.edu

The interdisciplinary minor in healing and humanities enables students to explore the complicated nature of health care issues by integrating knowledge from the arts and humanities with the social and natural sciences. The minor is particularly appropriate for students considering health-related professions, complementing other scientific, clinical and professional preparation. Health care careers are projected to be among the fastest-growing fields in the 21st century. America's changing health care environment increasingly calls for individuals who understand the complexity of factors affecting healing and who are able to take a humane, holistic approach.

Undergraduate Minor in Healing and Humanities

Student Learning Outcomes

Students graduating from this program will:

• Analyze the complexity of factors affecting healing
• Explain an understanding of holistic and biopsychosocial dimensions of patient care
• Develop an interdisciplinary foundation for future careers in the world of health care

The healing and humanities curriculum enables pre-health and health professional students to develop an interdisciplinary foundation for a future health care career.

Requirements

To earn a minor in healing and humanities:

• Students must earn at least 18 credit hours from the list of approved courses below and other courses as approved by the program advisor
• Three core courses are required for all students seeking the minor:

<table>
<thead>
<tr>
<th>Code</th>

</tr>
<tr>
<td>COMM-ST 431</td>
<td>Colloquium In Interpersonal Dynamics</td>
<td>3</td>
</tr>
</tbody>
</table>

• At least nine credit hours must be upper-division (i.e., 300-499)
• At least nine hours must be earned at UMKC

Students may select from among a wide variety of courses offered by many participating departments. The program advisor is available to provide academic advice on course selection and degree requirements, as well as career guidance. Students interested in the healing and humanities minor should consult with the program advisor to plan a program of study.

Assistant Professors:
Sandra Enríquez

Associate Teaching Professor:
Rebecca Miller Davis

Department Description

History is an essential component of a liberal arts education. As an important part of the curriculum, historical study enables students to understand the interaction of many aspects of state, society and culture, and the dynamics of human change. History offers a valuable perspective on contemporary problems as well as knowledge of the past for its own inherent interest.

Departmental offerings, at the undergraduate and graduate levels, include the major areas of historical concern such as American history and ancient, medieval, and modern European history. In recognition of the role of a university in its community, the department also offers courses in urban and social history, the history of science, Classics, Asian history, Latin American history, environmental history, religious studies, women’s, gender, and sexualities studies, girls studies, African American history, Latinx history, as well as public history. The department is also vitally involved in interdisciplinary courses and programs.

Desirable Preparation for Undergraduate Admission

Students wishing to major in history should acquire as broad a background as possible in subjects related to their historical interests. Both secondary school and community college courses in history should be supplemented with courses in other social sciences and the humanities. Students interested in the history of science should emphasize studies in physical and biological sciences.

The discipline is broad in scope and methods. Faculty members believe a logical and systematic selection of courses in other disciplines will complement the study of history. They encourage prospective majors to consult with them in preparing an integrated course of study.

Career Implications of the Bachelor’s Degree

The bachelor of arts degree in history provides students with general preparation for a wide range of occupations. Most majors follow business and professional careers and receive benefits both personally and professionally from the development of analytical skills and examination of relevant subject matter in history courses. A common misconception is that the only thing available after graduation is to teach history. That is a possible path, but certainly not your only option.

Among the many jobs you can consider are: advertising, analyst, archivist, broadcaster, campaign worker, consultant, congressional aide, editor, foreign service, foundation staffer, information specialist, intelligence, journalist, legal assistant, lobbyist, museum curator, nonprofit leader, personnel manager, public relations... the list is almost endless. It sounds cliché, but the career path for a history majors is limited only by your imagination.

More specifically, with your degree in history you can work as an educator (primary, secondary or post-secondary schools, historic sites and museums); as a researcher (museums, think tanks, cultural resources management, preservation); as a communicator (writers, archivists, librarians); as an advocate (lawyers, legislative staff, foundations); and in business (contract historians, nonprofits, corporation staff).

Why so many opportunities? Consider this: the study of history trains us how to think—not in a small or proscribed way, but in an analytical way. In our courses, you will discover that a flexible and perceptive mind is the most practical tool imaginable. You will become excellent writers and
communicators with the ability to analyze complex problems with dexterity and finesse, a skill that will help you regardless of your chosen career path. Beyond this—and this remains a much less practical concern—as we hope you discover, history is more than names and dates. At best, the study of history can be a cure for ignorance, prejudice, and provincialism. And at the very least, it is an interesting story about who we are as a community, a nation, and a people.

If your interests remain in the academic world, know that our students have gone on to many top-flight colleges and universities. Recent UMKC history majors have pursued graduate study at the state universities of Virginia, Texas, Connecticut, Iowa, New York, Mississippi, Nebraska, Kansas, Colorado, Kentucky, Florida, Michigan, and California-Berkeley, as well as Yale University, Brown University, Columbia University, Emory University, Georgetown University, Northwestern University, London School of Economics, Ohio State, Southern Methodist, Marquette, Norte Dame, University of British Columbia, Texas Tech, Queen's College-Belfast, King’s College-London, and Cambridge University.

Individuals seeking careers as teachers and professional historians may pursue advanced degrees on this campus. The department offers the Master of Arts degree and participates in the Interdisciplinary Ph.D. program. Students interested in graduate studies should contact the principal graduate advisor, Miriam Forman-Brunell, forman-brunellm@umkc.edu, or Massimiliano Vitiello, vitiellom@umkc.edu; or for the Interdisciplinary Ph.D. program, contact Lynda Payne, paynel@umkc.edu, or Matthew Osborn, osbornmw@umkc.edu.

Departmental Activities

Advising
Advising is key to a meaningful and profitable course of study in the department. Students should consult their principal advisor regarding selection of courses and for help in academic matters. Undergraduate students may select a faculty advisor, or an advisor can be appointed by the principal undergraduate advisor. Faculty office hours and prospective schedules of courses are posted in the department office, located in 203 Cockefair Hall and on the department website at http://cas.umkc.edu/history. The department offers printed guides to the requirements for its degrees.

Principal Undergraduate Advisors
David Freeman, freemandf@umkc.edu; Rebecca Davis, davisrebe@umkc.edu; and Dennis Merrill, merrilld@umkc.edu

Principal Masters Advisors
Massimiliano Vitiello, vitiellom@umkc.edu; and Miriam Forman-Brunell, forman-brunellm@umkc.edu

Interdisciplinary Ph.D. Program Advisors
Lynda Payne, paynel@umkc.edu; and Matthew Osborn, osbornmw@umkc.edu

Special Programs

Teaching Certification in Social Studies
Certification as a middle school (grades 5-9) or secondary (grades 9-12) social studies teacher in either Kansas or Missouri requires that a student complete specific requirements in history, political science, economics, geography, behavioral sciences and the School of Education. A separate application for teacher education is required. For further information about the program, consult the School of Education (p. 1018) section of this catalog or contact the Education Student Services Office at (816) 235-2234.

Public History
Courses offered by the department prepare graduates for a variety of careers in historical agencies or in the study and preservation of cultural artifacts. For further information, consult Sandra Enríquez, enriquezs@umkc.edu.

The History Club
Founded in 1999, with the purpose of promoting the study of history, the History Club is open to all UMKC students, history majors and non-majors. The club sponsor is Dennis Merrill, merrilld@umkc.edu.

The History Graduate Student Association
Students participating in the Master’s and Interdisciplinary Ph.D. program are automatically members of the History Graduate Student Association (HGSA). Each year the HGSA sponsors two events: the Graduate Student Orientation and the Graduate Student Conference. The faculty advisor is Dennis Merrill, merrilld@umkc.edu.

Faculty

William B. Ashworth, Jr. 2,3 Associate Professor of History; B.A. (Wesleyan University); Ph.D. (University of Wisconsin).

Andrew Bergerson2,3 Professor of History; B.A. (Cornell University); M.A. (University of Edinburgh); Ph. D. (University of Chicago).

Diane Mutti Burke2,3 Department Chair; professor of history; B.A. (Dartmouth College); M.A., Ph.D. (Emory University).

Rebecca Miller Davis2 Associate Teaching Professor of History; B.A., M.A. (James Madison University); Ph.D. (University of South Carolina).

Gary L. Ebersole2,3 Professor of History and Director of Religious Studies; B.A. (Dickinson College); M.A., Ph.D. (University of Chicago).
Sandra Enríquez2,3 Assistant Professor of History; Director of Public History emphasis; B.A., M.A. (University of Texas, El Paso); Ph.D. (University of Houston).

Miriam Forman-Brunell2,3 Professor of History; A.B., M.A. (Sarah Lawrence College); Ph.D. (Rutgers University).

David Freeman2,3 Associate Professor of History; B.A. (University of Minnesota-Duluth); M.A., Ph.D. (Emory University).

Brian Frehner2,3 Associate Professor of History; B.A. (University of California, Los Angeles); M.A. (University of Nevada, Las Vegas); Ph.D. (University of Oklahoma).

Viviana L. Grieco2,3 Associate Professor of History; B.A. (Universidad de Buenos Aires); M.A., Ph.D. (Emory University).

John Herron2,3 CAS Associate Dean; Professor of History; B.A., M.A. (Montana State University), Ph.D. (University of New Mexico).

Dennis Merrill2,3 Curators’ Teaching Professor of History; B.A. (Providence College); M.A., Ph.D. (University of Connecticut).

Linda Mitchell2,3 Professor of History; Martha Jane Phillips Starr/Missouri Distinguished Professor of Women’s and Gender Studies; B.A. (Sarah Lawrence College); M.A., Ph.D. (Indiana University).

Matthew Osborn2,3 Associate Professor of History; B.A. (University of California Santa Cruz); M.A. and Ph.D. (University of California Davis).

Lynda Payne2,3 Professor of History; M.A. (University of Edinburgh); Ph.D. (University of California, Davis).

Massimiliano Vitiello2,3 Associate Professor of History; Royall Professor; M.A. (University of Rome); Ph.D. (University of Messina); postdoctoral license in medieval studies (Pontifical Institute of Mediaeval Studies-Toronto).

Courses

HISTORY 101 U.S. History to 1877 Credits: 3
This course offers a broad survey of American history up to 1877.
HISTORY 101 - MOTR HIST 101: American History I

HISTORY 102 U.S. History Since 1877 Credits: 3
This course covers American history from the end of Reconstruction to the present.
HISTORY 102 - MOTR HIST 102: American History II
HISTORY 201 European History to 1600 Credits: 3
This course surveys the political, social and cultural history of Europe from ancient times to 1600. Beginning with a brief description of the riverine civilizations of the ancient Near East, the course then examines the political and cultural evolution of classical Greco-Roman civilization, the medieval world, the rise of the national state, and the essential characteristics of the eras of the Renaissance and Reformation.

HISTORY 201 - MOTR WCIV 101: Western Civilization I

HISTORY 202 European History since 1600 Credits: 3
This course surveys the political, economic, social, intellectual, and cultural history of Europe from about 1600 to the present. Emphasis is given to themes of continuity and change in European culture through the experience of political, scientific and industrial revolutions, conservative reactions, liberal reforms, nation building, imperialism, two world wars, fascism, communism and the Cold War.

HISTORY 202 - MOTR WCIV 102: Western Civilization II

HISTORY 206 World History To 1450 Credits: 3
This course surveys the cultural, social, economic, and political history of the world to 1450. It studies the development of civilizations in isolation as well as the origins, nature, and consequences of global forms of interaction and exchange.

HISTORY 206 - MOTR HIST 201: World History I

HISTORY 208 World History since 1450 Credits: 3
This course surveys the social, economic, political history of the world from 1450 to the present. It studies the development of civilizations in isolation as well as the origins, nature, and consequences of global forms of interaction and exchange.

HISTORY 208 - MOTR HIST 202: World History II

HISTORY 213 Researching Kansas City Credits: 3
Researching Kansas City is an interdisciplinary undergraduate research course open to honors and other high-achieving students. It will introduce students to scholarly research and analysis through the exploration of important issues of the past and present in Kansas City.

Prerequisite: Honors Program Student.

HISTORY 215 Getting High: Alcohol & Drugs in American History Credits: 3
This class will investigate historical transformations in how American society has defined and responded to problematic drinking and drug use. The class will analyze what controversies surrounding various forms of intoxication indicate about the nature of American society and culture.
The social movements and conflicts that developed during the 1960s continue to define American culture. Questions of racial and gender equity, a greater willingness to challenge authority, concerns about the environment, and a new openness about issues of sexuality all developed during the sixties and remain as arenas of debate today. This course will examine the origins, contexts, and major themes of these social and cultural movements.

**Prerequisites:** RooWriter.

**HISTORY 301WI Historiography and Method Credits: 3**
This basic course is required of all history majors at the beginning of the junior year. Content includes: 1) what history is; 2) its value and usefulness; 3) the diversity of our fields, approaches, and methods; and 4) the techniques of preparing and writing history papers. Texts and reading are approved by the Department (i.e.: Turabian for style). Although the emphasis is general instead of particular, the instructor will be assisted by other historians representing their main special interest areas.

**HISTORY 302 Colonial North America, 1492–1763 Credits: 3**
This course examines European colonization in North America, from the voyage of Christopher Columbus to the eve of the American Revolution. Students will consider the Atlantic-world context of colonization, the environmental factors that shaped colonial development, and the complex interactions of European, African, and Indian peoples.

**HISTORY 303 The American Revolution, 1763-1789 Credits: 3**
This course examines the history of the American Revolution, from the explosive political crisis of the 1760s to the struggle over ratification of the Constitution. Students will consider the origins and conduct of the war, as well as the Revolution’s far-reaching political, social, and economic consequences.

**HISTORY 304 America, 1783-1828: The National Experience Credits: 3**
The two major threads of this course are the formation and implementation of the Constitution and the cultural adolescence of the new nation. Topics considered include the political bequest of the framers’ generation, the growing pains of territorial expansion and industrialism, the paradoxical development of regionalism and nationalism.

**HISTORY 305 America, 1828-1852: The Jacksonian Period Credits: 3**
An analysis of the political, social, economic, and intellectual factors in American society, 1828-1852. The period featured the presidency of Andrew Jackson, the shaping of a new democratic ideology, the culmination of manifest destiny, the quickening of the antislavery impulse, the Mexican War, the growing sectional split, and the Compromise of 1850.

**HISTORY 306 America, 1850-1877: Civil War and Reconstruction Credits: 3**
A survey of the political, social and economic factors leading to the dissolution of the federal union is followed by a consideration of the major features and developments of the war period. This, in turn, leads to an analysis of the major factors and relationships involved in the "reconstruction" of the federal union. The course covers the years 1850 to 1877.
HISTORY 306A History of Christianity to the Middle Ages Credits: 3
This course examines the cultural, historical and theological development of Christianity from its origins to the High Middle Ages. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major cultural, social, institutional, and intellectual force in Western Europe with a focus on patterns of crisis and reform.

HISTORY 307 America 1877-1917: Development of Industrial America Credits: 3
This course deals with the reactions of different groups of Americans to the industrialization and urbanization of the United States from 1877 to 1917, using concepts associated with modernization upon the behavior of the business community, farmers, laborers, immigrants, professionals and major ethno-cultural groupings. Other contemporary proposals for the adjustment to industrialism are explained as well as the programs which each group eventually used to adjust to modern society.

HISTORY 307A History of Christianity from the Middles Ages to Present Credits: 3
This course examines the cultural, historical and theological development of Christianity from the High Middle Ages to the present. The main themes follow the development of foundational Christian theological thought and practice into what are now mainstream Western Christian theologies, the institutional histories of Western Christianity, and the cultures of Western civilization.

HISTORY 308A America: 1914-1945: The Era Of The World Wars Credits: 3
This course examines United States social, intellectual, economic, political and diplomatic history from the beginning of World War I to the end of World War II. Special emphasis is placed on the coexistence of realism and idealism in American foreign policy, the evolution of power shifts within the American federal system, and the causes and consequences of rapid urban growth and increased industrial sophistication. Students examine the material and social texture of life during the two world wars, the so-called "roaring 20s", and the Great Depression through contemporary art forms (especially novels) and historical monographs.

HISTORY 308B Cold War, Conformity, and Dissent: America, 1945-1989 Credits: 3
This course examines United States social, cultural, intellectual, economic, political, and transformational history from the end of World War II in 1945 to the collapse of the Berlin Wall in 1989. Given our focus on the recent past, special emphasis is placed upon the importance of the historical perspective to an understanding of contemporary affairs. Major themes include: America's rise to the world power, the development of the Keynesian welfare state, the concentration of corporate wealth and power, the persistence of poverty amidst plenty, and the changing status of American women and racial and ethnic minority groups.

HISTORY 309 World War II Film and Propaganda Credits: 3
This course examines film and propaganda, including posters, political cartoons, speeches, and other media, created in prewar or wartime conditions by both the Allies and Axis powers from 1933 to 1945 as it affected World War II.

HISTORY 334 History of Technology Credits: 3
The course examines technology as it shapes and is shaped by human society. Students will consider technology as a product of historically-specific and sometimes overlapping contexts shaped by culture, economics, natural environments, and social processes.

HISTORY 348 Missouri/Kansas Border Wars Credits: 3
This course explores the history of the Civil War on the Missouri/Kansas border, where residents first shed blood over the issue slavery. An exploration of this most uncivil of wars provides insight into the ways in which societies can be fragmented by ideology and ultimately rebuilt upon different lines.

HISTORY 349 Civil War in Memory and Film Credits: 3
This course explores how the era of the Civil War and Reconstruction has been portrayed in film, literature, and art, and if the popular memory of the war accurately reflects the history. We also will discuss how the understanding of this pivotal event in American History has changed over time and how cultural artifacts often say more about the time in which they were produced than the actual history of the Civil War.

HISTORY 354R Women in Modern America Credits: 3
This course traces the part women have played in the processes of industrialization and urbanization. It looks at the general demographic, economic and social changes affecting women of all classes, as well as the role of middle-class women in the progressive, prohibition and suffrage movements. The course will also study the impact of the two world wars and the Depression upon the roles of women.

HISTORY 355A Indians of North America to 1789 Credits: 3
The history of the native peoples of North America from their origins to the era of the American Revolution.

HISTORY 355B Indians of North America Since 1789 Credits: 3
The history of the native people of North America (Indians and Inuit) and their interaction with the European invaders since 1789. This course is the sequel to HISTORY 355A, Indians of North America to 1789.

HISTORY 356 Rise of the City in the U.S. Credits: 3
This course treats the background and major developments of the urbanization of the United States. Includes the American urban tradition, the scope of urbanization, colonial beginnings, urban rivalries, promotion, case studies of cities, the growth of urban services, the slum, problems of government, population trends, urban planning, and suburban growth. Consideration is also given to the methods and techniques of urban research and history of the development of this field.

HISTORY 356R Kansas City: History of a Regional Metropolis Credits: 3
This course uses Kansas City as an urban laboratory to help students better understand the dynamics of the urbanization process in America. It features lectures and discussions on such subjects as early settlement patterns, the battle for the first bridge over the Missouri River, the development of an economy based on agricultural pursuits, the City Beautiful Movement, the social fabric, the Pendergast Machine, and the impact of World War II and after. The course fits Kansas City into the larger framework of the American urban mosaic.
HISTORY 357 The American West Credits: 3
This course deals with the relationship of the American West to the social and economic development of the United States. Major emphasis is placed on the role of the trans-Mississippi West in the economic growth of the national economy. Related cultural and political events are evaluated in the terms of the many Western frontiers. Emphasis will be placed on the Turner thesis, the Indian heritage, frontier violence, and the cow town experience.

HISTORY 358 History of the American South I Credits: 3
A study of the political, intellectual, cultural, economic, and social development of the American South up to and including the Civil War. Special topics discussed will be the plantation system, slavery, abolition, secession, the Confederacy, and the interaction of the region with the nation.

HISTORY 360R Constitutional History of the United States Credits: 3
The general question covered is: how does American society govern itself? Topics include the fusion of Anglo traditions and American environment, creation of the American republic under the Constitution of 1787, the struggle for sovereignty during the Marshall-Taney era, and the Supreme Court’s utilization of the 14th Amendment to adapt the Constitution to modernity.

HISTORY 361 America and the World in the Global Age: 1900 to the Present Credits: 3
Following a rapid survey of American diplomatic and transnational affairs before 1900, this course analyzes America's increasingly complex encounters with the world - by government officials and non-state actors - since that date. Attention is given to the interrelationships of domestic and international contexts, with an attempt to discover political, geographic, technological, cultural, and economic influences that have shaped this area of American development.

HISTORY 364R Nature, Culture And The Human Experience Credits: 3
This course is an introduction to various interpretations of nature with a focus on American culture and society. We will consider ideas about nature from diverse perspectives including history, literature, philosophy and religion in order to understand how human perceptions and uses shape relations with the natural world. Specific themes include such diverse topics as the aesthetic tradition, environmental thought, and environmental justice.

HISTORY 365A American Environmental History Credits: 3
This course examines the changing relationships between human beings and the natural world through time. The main argument of this course will be that American History looks very different through an environmental lens. Nature is an important category of historical analysis as well as a topic worthy of historical study itself and this course will examine themes as diverse as Native American ecology to the modern environment crusade.

HISTORY 366RR American Labor History Credits: 3
This course examines the history of work and the working class in the U.S. from 1750 to the present. We will focus on the transformation of the workplace, the rise of the union movement, the nature of cultural and political organizations, workers' relationships with other social groups, and the role played by gender, race, and ethnicity in uniting or dividing the working class.

HISTORY 368 Children and Youth in American History Credits: 3
This course—which brings a gendered perspective to the history of childhood and the study of youth—focuses on the changing construction of girlhood and boyhood from precontact to the present. We will examine the variety of forces that have scripted the lives of children and adolescents and explore the active role they have played in shaping their lives and American culture. We will make use of the scholarly literature on childhood and youth as well as examine such primary sources as childbearing manuals, laws, literature, cartoons, and toys as material culture.

HISTORY 369 Women and Work in Early America Credits: 3
This course examines the ways in which gender, race, region, and class have shaped the historical experiences of American women. Students will trace women's lives from pre-European contact to 1877 through an examination of a wide variety of social, cultural, economic, and political forces and factors.

HISTORY 370 Introduction to Material Culture Credits: 3
This course will consider the ways in which material culture contributes to our understanding of history. Scholars have increasingly recognized the significance of "the things they left behind," particularly as they provide insights to the lives of those who did not leave extensive written records. Students will consider all aspects of material culture, drawing largely on examples from American history: architecture, domestic utensils and furnishings, clothing, tools, and good agricultural practices. The courses will emphasize the process of handicraft technology as well as the product, and will consider the impact of modernization upon both process and product.

HISTORY 371 American History Through Film Credits: 3
This course will move through the twentieth century and highlight major themes and developments that reveal the contours of American history as depicted in film. Students will examine the ways in which filmmakers have presented history, paying particular attention to the presentation of political, cultural, and social conflicts.

HISTORY 379 Museums, Monuments, and American Life: An Introduction to Public History Credits: 3
This course will investigate the ways America commemorates, invokes, and misremembers its history—what scholars call public history. Students will learn the skills professionals use to communicate historical scholarship to wider audiences, and will grapple with the political and ethical issues that arise when we expand the discipline's stakeholders.

HISTORY 391 Archival Methods Credits: 3
This combined discussion and research course will examine the research potential of primary-source materials in the custody of archival depositories and the methodology employed to utilize effectively these resources. An analysis of archival method, specifically in the areas of arrangement, description and preservation, will be emphasized during the discussion portion of the course. Most of the course will be devoted to independent research in various collections of the Regional Archives of the Kansas City Federal Records Center. The course will meet at such places as the Federal Records Center, 2306 Bannister Road, or the Truman Library for both the discussion and research segments.
HISTORY 392A Archival Internship Credits: 1-3
Students work directly with professional archivists and other personnel at the Kansas City Federal Records Center, the Truman Library, Jackson County Historical Society, and similar facilities in the area. Emphasis will be given to areas of arrangement, description and preservation of archival materials. Each student must make individual arrangements through the department.

HISTORY 392B Public History Internship Credits: 1-3
Students work directly with public history and editorial personnel at the Kansas City Museum, the Kansas City Pitch Weekly, the Truman Library, and similar facilities in the area. Depending on the institutional affiliation, emphasis will be given to museum operations and displays, editing, fund-raising, historical research and writing. Each student must make individual arrangements through the department.

HISTORY 393 Museum Studies Credits: 3
This course is designed to acquaint students with specific careers in museums and historical agencies; to introduce students to the wide range of operating issues facing those working in the museum profession on a day-to-day basis; and to familiarize students with the organizations, reference works and resources available to develop the skills and training required for those who choose to make this their profession.

HISTORY 394 African American History Before 1877 Credits: 3
This course is a survey of the African American experience from Pre-Columbian exploration through reconstruction. The course focuses on the trans-Atlantic slave trade, slavery in the colonies as well as resistance and abolition movements.

HISTORY 395 African American History Since 1877 Credits: 3
This course is a survey of African Americans in the United States from 1877 to the present. The course explores the post-reconstruction era, civil rights and black nationalistic movements; the concepts of racism, desegregation/integration and separation. Contemporary issues facing a multiracial and pluralistic society are also addressed.

HISTORY 398 Black Civil Rights in the 20th and 21st Centuries Credits: 3
This course examines the fight for black civil rights in the United States in the 20th and 21st centuries, focusing on the Jim Crow period, the fight to end segregation, and the enduring problem of race in the United States.

HISTORY 400 Special Studies Credits: 1-3
Courses on subjects which are not a part of the regular department offering. The courses result from one or more of the following: (1) The expressed desire of students; (2) the broadened or refocused scholarship of a member of the history faculty; (3) the temporary presence of a scholar whose specialization is not reflected in the department's regular offerings; (4) the conclusion by the department that the course meets a community need; (5) the effort of the history faculty to provide an interdisciplinary approach to an era or topic. The course is experimental in the sense that it is a one-time offering with the potential of repetition or modification—depending upon student, faculty and community response.

HISTORY 400B Special Studies Credits: 1-3
HISTORY 400C Special Studies Credits: 1-3
HISTORY 400CC Special Studies Credits: 3
HISTORY 400CL Special Studies Credits: 1-3
HISTORY 400CW Cluster Course: Critical Issues in Women's & Gender Studies Credits: 3
What does it mean to grow up female in America? How does being female influence the body, the mind, identity? This course is an interdisciplinary exploration of the issues that have shaped the lives of American women throughout the life cycle and across the timeline. This course examines the role that culture and society have played in shaping and defining what it means to be an American girl and woman.

Special studies in History. Writing Intensive.
HISTORY 401A Religion in America Credits: 3
An in-depth examination of selected aspects of the history of religions in America from the colonial period to the present. Special emphasis will be given to methodological issues in the study of American religious history.

HISTORY 404 Women and Gender in Latin America Credits: 3
This course studies gender in Latin America from the eve of conquest by the Portuguese and Spanish in the fifteenth century to the present. It examines how ideas about gender affected the lives of Latin American men and women. This course additionally analyzes how gender and race contributed to the creation of a hierarchical social order. Finally, it discusses the exercise of authority within and outside households and its impact on private and public spaces.

HISTORY 405 Colonial Latin America (From the Encounter to the Early 19th Century) Credits: 3
This course discusses the conquest and colonization of Latin America by the Spanish and the Portuguese imperial powers from the time of the encounter to the early nineteenth century. It studies the Iberian, Indigenous and African cultures and their influence in the creation of a hierarchical imperial order. Emphasis is given to the impact of the conquest, the economics of exploitation, race, sexual and gender identities and, religious and legal domination.

HISTORY 406 Modern Latin America Credits: 3
This course studies social, political, economic and cultural trends in Latin America in the nineteenth and twentieth centuries. Discussion topics include nation building after independence with an emphasis on gender and race in the creation of national identities and new forms of social stratification; integration of national economies into the world economic system; the expansion of political participation and citizenship; immigration (national and transnational) and the tensions caused by the forces of modernization and tradition. Although the purpose of the course is to provide a general background for a large and diverse region (more than 20 countries), case studies from Argentina, Mexico and Brazil will illustrate the above-mentioned themes and will provide the basis for a comparative regional perspective.

HISTORY 407 Latin American Crises and Opportunities Credits: 3
This course studies why Latin America has experienced in the 20th and 21st centuries recurrent economic and political crises – and why it is still a land of enormous opportunity. While this is primarily a history course, it undertakes a multidisciplinary examination of the region’s strengths and weaknesses by discussing theories of economic development, political and sociological models as well as the influence of crime and violence. Case studies anchored in representative countries will be used to illustrate historical trends and theories.

HISTORY 408 Gender, Health, and Development in Senegal Credits: 3
This course examines women's economic empowerment, health education initiatives, philanthropy, and social entrepreneurship in West Africa and Senegal in particular. In the main city of Dakar we will visit indigenous and global nonprofits to study their policies and processes. The culture, both urban and rural, will be experienced in order to provide a unique perspective on the Senegalese and their culture.

Prerequisites: Junior or Senior standing - must meet requirements established by study abroad office.

HISTORY 411A Medieval Civilization I Credits: 3
This course covers the period between the decline of the Roman Empire in the West and the Investiture Controversy. Topics include the rise of Christianity and early church-state relationships; the barbarian invasions and the various Germanic kingdoms; the age of Charlemagne; monasticism and feudalism. There will also be special sessions on the civilizations of Islam and Byzantium.

HISTORY 411B Medieval Civilization II Credits: 3
Medieval Civilization II.

HISTORY 412A Medieval Women & Children Credits: 3
This course explores the roles of women in the social, economic, political and cultural environments of medieval and early modern Europe. We examine the lives of women in all areas of life, from the ordinary to the extraordinary, in urban and rural environments, from the centers of religious and political power to the margins of society. Focus will be on the world of work for urban and peasant women and on the social and legal institutions of marriage, kinship and the family. The course makes extensive use of primary sources by and about women during this period.

HISTORY 413 Renaissance Credits: 3
Beginning with a definition and exploration of the Renaissance as a period of gradual transition between the Middle Ages and the beginning of modern culture, this course concerns itself primarily with the rise and spread of Humanism; the revival of interest in antiquity; the growth of individualism; and the rise of secularism, as well as with the artistic achievements of the period.

HISTORY 414 Reformation Credits: 3
Beginning with a description and analysis of the social, intellectual and political aspects of the later Middle Ages, the course continues with an examination of those profound religious, social and political changes which mark the 16th century as the end of the Middle Ages and the beginning of the modern secular era.

HISTORY 415B 17th and 18th Century European History Credits: 3
This course is designed to present the upper-division undergraduate with a firm grasp of the major intellectual, cultural, political and economic developments of 17th and 18th century Europe. It considers the bitter Thirty Years War in Central Europe, the rise of the Netherlands, the fall of Italy and Spain, the rise of constitutional and absolutist styles of government, the scientific revolution, the colonization by European of the Pacific and Indian Ocean Basins, Enlightenment political philosophy, the Agricultural Revolution, and the French Revolution.
HISTORY 416R The French Revolution and Napoleon Credits: 3
Narrative history concentrating on the explosive and colorful events and personalities in France, but also showing the European and Western context and impact of the revolution and Napoleon. Illustrated accounts cover such "great days" as the storming of the Bastille, the fall of Robespierre, and Napoleon's Coup of 18 Brumaire, and great battles. Main periods are: the origins of the revolution (economic, social, political, intellectual); revolution and reconstruction (1789-92); through terror to Thermidor (Jacobins and sans-culottes); Napoleon's wars and reconstruction (France and Europe). Cinema, slides and martial music periodically. Discussion of major authors and interpretations.

HISTORY 417R Nations & Empires: 19th Century Europe Credits: 3
This upper-division course will survey significant trends in warfare, politics, economics, social relations and culture in 19th century Europe, paying particular attention to the rise of modern ideologies and identities, world hegemony, and the social technologies of dehumanization that foreshadowed the unprecedented inhumanities of the 20th century.

HISTORY 418R The Age of Extremes 20th Century History Credits: 3
This upper-division course traces the history of Europe in the 20th century. It will survey significant trends in warfare, politics, economics, social relations and culture, paying particular attention to the issues of modernity and post modernity, imperialism and decolonization, dehumanization and genocide as well as the role of ordinary people in these systems of mass destruction.

HISTORY 419R Contemporary Europe: 1930-2000 Credits: 3
This upper-division course traces the history of Europe in the period of living memory. It will survey significant trends in warfare, politics, economics, social relations and culture, paying particular attention to the rise of globalization and the condition of postmodernity, decolonization and neocolonization, European unification and everyday life.

HISTORY 420CC World War I in Film: The World made Modern Credits: 3
This cluster course examines World War I and its legacy through the lenses of international history and film studies. It explores the origins and conduct of the "Great War," as it was called at the time, as well as its transforming effects on the modern international relations and the ongoing process of globalization. It also examines how the war spurred the growth of an infant motion picture industry, and how movies produced during the decades that followed helped shaping popular memories of the conflict-reflecting and shaping cultural discourses regarding the myth or reality of modern civilizational progress; the ethics of modern weaponry; the individual's placed in mass society; constructions of class, race, and gender; and the meaning of national identify in a globalizing world. The class will draw on selected history texts and an array of films and film clips.

HISTORY 425R European Criminal Justice History, 500-1900 Credits: 3
This course will survey European crime, criminal procedure, policing and punishment between 500 and 1900. Particular attention will be given to changing methods of proof (oaths, ordeals, juries); changing type of criminal activity (banditry, vagrancy, witchcraft, professional theft) and changing penal strategies (the stocks, breaking on the wheel, the workhouse, the prison, the penitentiary). English experiences are emphasized.

HISTORY 426R The Scientific Revolution, 1500-1700 Credits: 3
An analysis of the intellectual and social currents which culminated in the Scientific Revolution. After presenting the Renaissance world view, the course will examine the influence of humanism, art, religion, and the voyages of discovery on science, as a prelude to understanding the achievements of Galileo, Harvey, Newton, and the scientific societies of the 17th century.

HISTORY 427R The Darwinian Revolution, 1650-1900 Credits: 3
An inquiry into the intellectual background of Darwin's "Origin of Species." The course will examine 18th- and 19th-century attitudes toward time, species, change, race, the age of the earth, the nature of fossils, creation, and evolution, as background to understanding the achievement of Darwin and the reception of his work.

HISTORY 428A History Of The Body Credits: 3
This advanced course will explore the new field of the history of the body, with particular attention to sexuality and gender. Topics will include the history of sexualities, the body and society, body disciplines, medical practices and representations of illness, beauty and fashion, and the relationship between sexualities and nationalisms.

HISTORY 428B Gender & Medicine: Patients & Practitioners From Antiquity to Present Credits: 3
This course explores, in a selective fashion, the role of women in Western medicine both as health care providers and patients. The subject of the history of medicine is too broad to be covered comprehensively in a semester, and so we will focusing on diseases or physical conditions which were believed to be limited to women—childbirth, certain mental health conditions, reproductive health, breast cancer—as well as the increasing marginalization of women within the profession of health care providers to those branches concerned primarily with "women's problems.

HISTORY 430RA 'We Are The Dead': The Great War Experience Through its Artifacts Credits: 3
World War One was the "war to end all wars"; all previous wars were indeed eclipsed by its scale of destruction. And yet, it was a war that initiated a century of continual bloodshed and crimes against humanity. This course will explore the causes, nature and consequences of the Great War of 1914-18. It will be taught on different themes each Winter semester at the National World War One Memorial Museum at Liberty Memorial.

HISTORY 431R Medieval England, 1066 To 1485 Credits: 3
Beginning with the Norman conquest of England in 1066, this course traces the history of Medieval England through the establishment of the Tudor dynasty. Covered will be such items as the rise of the Angevin Empire, the conflict between monarch nobility, the evolution of Parliament, as well as the Anglo-French rivalry which culminated in the Hundred Years' War.

HISTORY 432R Tudor England, 1485-1603 Credits: 3
This course covers England from the accession of Henry VII, the first Tudor, to the death of Elizabeth I in 1603. Topics to be covered are:
transformation of England into a modern state, the Reformation, the role of Parliament, conflicts with European powers, especially Spain, etc.
HISTORY 433R History of Britain 1603-1832 Credits: 3
This course surveys the history of Britain from the the rise of the Stuart dynasty through the Industrial Revolution, with particular emphasis on the cultural aspects of political, social, economic, and military changes. Topics include: the domination of the aristocracy; the rise of the Navy; the exploration of the Pacific; the monarchy of George III; the loss of the American colonies; the wars with Napoleon; the Agricultural and early Industrial Revolutions; and the social changes they brought in both Britain and the Empire.

HISTORY 434R History of Britain 1832-Present Credits: 3
This course surveys the history of the British Isles from the industrial revolution to the present day, with a particular emphasis on the cultural aspects of political, social, economic, and military changes. Topics include Victorian society, the rise of the class system, imperialism, the domestic impact of the two world wars, the reaction to the loss of the Empire, pop culture, and contemporary issues.

HISTORY 436R Modern German History Credits: 3
This course traces the history of Central Europe from the fall of Bismarck to the reunification of Germany one century later. It will ask students to think critically about the relationship between state and society, elites and ‘ordinary’ Germans, in the various German-speaking regimes that existed over the course of this era: two empires, two interwar republics, two fascist dictatorships, and three post-fascist republics. All assigned readings will be in English; a background knowledge of European history is recommended.

HISTORY 437BWI First German Republics, 1917-1935 Credits: 3
This course traces the history of the two German Republics during the inter-war years—the First Austrian Republic and the so-called Weimar Republic—from the peace movements of the First World War to the solidification of fascist dictatorships. It will ask students to think critically about the relationship between state and society and the role played by ‘elite’ and ‘ordinary’ people in shaping German history. This reading and writing-intensive course will be run as a seminar. Final grades will be based on a portfolio of assignments of which students will select what they consider to be the best examples of their work.
Prerequisites: HISTORY 202, HISTORY 208.

HISTORY 437BWI First German Republics, 1917-1935 Credits: 3
This course traces the history of the two German Republics during the inter-war years—the First Austrian Republic and the so-called Weimar Republic—from the peace movements of the First World War to the solidification of fascist dictatorships. It will ask students to think critically about the relationship between state and society and the role played by ‘elite’ and ‘ordinary’ people in shaping German history. This reading and writing-intensive course will be run as a seminar. Final grades will be based on a portfolio of assignments of which students will select what they consider to be the best examples of their work.
Prerequisites: HISTORY 202, HISTORY 208.

HISTORY 437CW The Third Reich, 1930-1950 Credits: 3
This course traces the history of the Third Reich—its origins, nature, and crimes against humanity—from its first electoral successes in the Great Depression to the trials of its leaders for various war crimes. At its center stand the challenging questions of the ethical and historical responsibility for the Holocaust. It will ask students to think critically about the relationship between state and society and the roles played by ‘elite’ and ‘ordinary’ people in shaping German history. This reading and writing-intensive course will be run as a seminar. Final grades will be based on a portfolio of assignments of which students will select what they consider to be the best examples of their work.
Prerequisites: HISTORY 202, HISTORY 208.

HISTORY 437DDW Cold War Germanies, 1941-1991 Credits: 3
This course traces the history of the three postwar German Republics—the Second Austrian Republic, the German Democratic Republic, and the Federal Republic of Germany—from the initial plans of the Allies for postwar reconstruction to the Reunification of Germany in 1991. It will ask students to think critically about relationship between state and society and the role played by ‘elite’ and ‘ordinary’ people in shaping German history. This reading and writing-intensive course will be run as a seminar. Final grades will be based on a portfolio of assignments of which students will select what they consider to be the best examples of their work.
Prerequisites: HISTORY 202, HISTORY 208.

HISTORY 444R Islam and the Arabs: The Formative Period Credits: 3
The first semester of a three-semester sequence begins with a brief overview of the geography and topography of the Middle East. The course proceeds with a discussion of the conditions of pre-Islamic Arabia; the appearance of Muhammad and his mission; the rise and spread of Islam; the establishment and consolidation of the Arab dynasties in the Middle East, North Africa and Spain; Islamic institutions; and Islamic society and culture. The time span will be approximately 500 A.D. to the Mongol conquest of Baghdad in 1258.
Cross Listings: HISTORY 5544.

HISTORY 445 The Ottoman Empire in the Middle East to World War I Credits: 3
The second semester of a three-semester sequence covers the transition from Arab to Turkish hegemony in most of the Middle East as well as the restoration of native Persian dynasties in Iran and their subsequent development. The emphasis is on the rise and decline of the Ottoman Turkish Empire. Attention is given to the Ottoman provinces and to the national movements of subject peoples. The course ends with an overview of World War I and the peace treaties which marked the dissolution of the Ottoman Empire.
HISTORY 446R The Middle East from World War I to the Present Credits: 3
The third semester of a three-semester sequence deals with the emergence of the modern countries of the Middle East after World War I and their history and course of development to the present day. There will be a general survey of the government and politics, economic situation, and social and cultural characteristics of each important country in the area. In addition, special topics will be discussed such as the modernization process, ideological alternatives, relations with the great powers, the economics and politics of oil, and the Arab-Israeli conflict.

HISTORY 462J Japanese Civilization Credits: 3
A survey of Japanese civilization and cultural history from the prehistorical period to the present. Emphasis on the interplay between religion, the arts, politics, and social structure.

HISTORY 464 Medieval Methods and Paleography Credits: 3
This course examines the methodology and historiography of Medieval Studies. Through an introduction to paleography, the study of medieval handwritings, it prepares students for advanced work in Medieval and Renaissance studies. Using an interdisciplinary approach, this course will examine the historical and cultural settings for medieval texts, their physical form and production, as well as the tradition of textual transmission in the medieval world. In addition to gaining familiarity with the many different types of primary sources, such as literary, artistic, legal, and notarial sources, students will be exposed to methods for practical archival work in various European nations.

Prerequisites: LATIN 110.

HISTORY 468R Archaeology and the History of Antiquity Credits: 3
This course will analyze the contributions of archaeology to the understanding of ancient history. It will cover archaeological excavations and their pertinence to classical civilization in the Near East and Greece. The techniques and methodology of field archaeologists will be discussed and demonstrated. Archaeological excavations relating to the Hittite capital, to the Ugaritic tablets, to the Minoan-Mycenaean civilization and its link to the Near East will be treated.

HISTORY 469 Archeology and Biblical History Credits: 3
An examination of ancient Israel as she emerges from the ruins of the past, both lapidary and literary. Through a study of the "mute documents," artifacts man-made (storied cities, household utensils, inscribed shards from Jericho to Jerusalem) we gain an insight indispensable for Biblical studies, for ancient Near Eastern history.

HISTORY 470 Ancient Egypt Credits: 3
This course describes the political, social and cultural evolution of ancient Egypt from pre-dynastic times, with major emphasis upon the Old, Middle, and New Kingdoms (especially the 18th dynasty and the reign of Akhenaton).

HISTORY 470P Ancient World: The Social History Of The Ancient World Credits: 4
The optional four-credit-hour component (modified independent study) will concern the social aspects of these civilizations, i.e., their daily lives. Readings and audiovisual aids will be used to help the student who will be expected to choose one aspect of each civilization, such as women, slavery, merchants, education, medicine, etc., and write a five-page paper about that topic for each period, i.e., Mesopotamia, Egypt, Greece and Rome.

HISTORY 471 Ancient Greece Credits: 3
This course begins with a survey of the pre-classical Minoan and Mycenaean civilizations and then describes the rise of prominent Greek city-states (with particular emphasis upon the evolution of Sparta and the political, social and cultural contributions of Athens). The course concludes with the rise of Macedon and Alexander's conquests and significance.

HISTORY 471P Ancient World: The Political Structure Of The Ancient World Credits: 4
The four-hour lecture period on weeknights will emphasize the historical aspects of the ancient civilizations. The lectures will be chronologically organized to focus upon their evolution from their rise to their collapse.

HISTORY 472 Ancient Rome Credits: 3
This course covers Roman history from its origins (including the Etruscans) to the decline of the imperial system. Particular emphasis is placed upon the political, social and economic developments in the Republic, the death of the Republic, the early Principate, and the factors that led to Rome's decline in the ancient world.

HISTORY 472P Ancient World: The Cul/Intellectual Dimension Of Ancient Civi Credits: 4
The four weekend periods will provide the students with a general picture of these civilizations: society, religion, economics, and culture (w.f., arts, literature, philosophy, science, etc.). Guest lecturers, slides, films and video cassettes will be used to introduce the varied aspects of these ancient peoples.

HISTORY 474 Late Antiquity: The transformation of the Mediterranean World (200–600 AD) Credits: 3
The decline of the Roman Empire and the barbarian invasions transformed the Mediterranean and European worlds, forming the foundation of Europe and the Islamic world. Students will investigate the multicultural society of Late Antiquity and become familiar with the primary sources for the period.

HISTORY 475WI The History of Ancient Israel Credits: 3
Judaism has had a tremendous impact on our civilization and yet most Americans are only dimly aware of its origins and development. This course will trace the roots of the Jewish religion in its historical context from its beginnings through the formation of rabbinic culture. The rise of Christianity will be examined in its original Judaic context, and recent discoveries, particularly those pertaining to the Dead Sea Scrolls, will be interpreted.

Prerequisites: RooWriter.
HISTORY 476 Medieval Jewish History Credits: 3
This course covers the general period from the decline of the Roman Empire to the dawn of early modern times. It is concerned with Jewish centers of life and learning in the Diaspora, both East and West. The course considers the Jews under Islamic rule from the time of Mohammed through the Golden Age of Moorish Spain. The focus then shifts to the situation of the Jews in Christian Europe, from the period of Constantine to the expulsions from England, France and Christian Spain. The Jews in the Ottoman Empire are mentioned and the course ends with the episode of Sabbatai Zevi, the false Messiah.

HISTORY 477 Modern Jewish History Credits: 3
This course surveys modern Jewish history from the Napoleonic period to World War II. Analyzing the social status of the Jews in Medieval Europe, it proceeds towards a discussion of the growth of the national state and the breakup of the Holy Roman Empire and analyzes the growth of socialism, integral nationalism, and liberalism as they affected the Jewish communities in Europe and America. The course serves as a survey of modern political and economic trends as they affect a distinct group.

HISTORY 494 #Heartlandia: Digital Histories of the Midwest Credits: 3
What is the Midwest? The course will consider the political, economic, and religious history of mid-America in order to define the Midwest. Students will collaboratively contribute to an ongoing digital history project like a podcast or virtual exhibit, gaining an understanding of the region as well as new technical skills.

HISTORY 496 Historical Research Project Credits: 1-3
Working extensively with an individual faculty member actively engaged in his/her research, students practice the multiple facets of investigating the sources of history, developing a comprehensive analysis from such sources, and composing a persuasive interpretation.

Prerequisites: HISTORY 301WI.

HISTORY 497 Special Topics and Readings Credits: 1-6
Intensive reading and/or research in an area selected by the student in consultation with the instructor. May be repeated for credit when the topic varies.

HISTORY 497XCA Special Topics and Readings Credits: 1-6
Special Topics and Readings

HISTORY 498WI Senior Capstone Credits: 3
This is the capstone course in the department and is required for majors in the senior year. It consists of tutorial sessions with a regular faculty member and independent research leading to a major paper using original source materials. Performance in this course will weigh heavily in the award of departmental honors.

Prerequisites: HISTORY 301WI, RooWriter.

Cross Listings: HISTORY 400.
HISTORY 5500RC Special Topics In History For Graduate Studies Credits: 1-3
HISTORY 5500RD Special Topics In History For Graduate Studies Credits: 1-3

HISTORY 5500SS Special Topics In History For Graduate Studies Credits: 1-3
HISTORY 5500W Special Topics in History for Graduate Students Credits: 3
HISTORY 5500Z Special Studies: Labor In Industrial America Credits: 3
This course examines the history of work and the working class in the U.S. from 1877 to the present. We will focus on the transformation of the workplace, the rise of the union movement, the nature of cultural and political organizations, workers’ relationships with other social groups, and the role played by gender, race, and ethnicity in uniting or dividing the working class.
HISTORY 5501A Religion in America Credits: 3
An in-depth examination of selected aspects of the history of religions in America from the colonial period to the present. Special emphasis will be given to methodological issues in the study of American religious history.
HISTORY 5502 America,1000-1763: The Formative Era Credits: 3
Early American history encompasses the formative era of many institutions and attitudes which still persist in present-day America. A study of how these patterns and policies emerged will enlighten us as to our current ways our society seeks to adapt to change.
HISTORY 5503 America, 1763-1783: The Revolutionary Heritage Credits: 3
The American Revolution created American history by creating a new nation. What the American Revolution was depends to a large extent upon what Americans think they are or ought to be. The goals of this course, therefore, are twofold: (1) to probe the nature, causes and consequences of the American Revolution; (2) to assess the intentions and behavior of both the Framers of the Constitution in 1763-1783 and the inheritors of modern America.
HISTORY 5504 America, 1783-1828: The National Experience Credits: 3
Cross Listings: HISTORY 304.
HISTORY 5505 America, 1828-1852: The Jacksonian Period Credits: 3
Cross Listings: HISTORY 305.
HISTORY 5506 America, 1850-1877: Civil War and Reconstruction Credits: 3
Cross Listings: HISTORY 306.
HISTORY 5506A History of Christianity to Middle Ages Credits: 3
This course examines the historical and theological development of Christianity from its origins to the High Middle Ages. The main themes follow the mechanisms and conditions shaping Christianity’s expansion into a major social, institutional, and intellectual force with a focus on pattern of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship.
HISTORY 5507 America 1877-1917: Development of Industrial America Credits: 3
HISTORY 5507A The History of Christianity from the Middle Ages to the Present Credits: 3
This course examines the historical and theological development of Christianity from the High Middle Ages to the present. The main themes follow the mechanisms and conditions shaping Christianity’s expansion into a major social, institutional and intellectual force with a focus on patterns of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship.
HISTORY 5508A America 1914-1945: The Era of the World Wars Credits: 3
Cross Listings: HISTORY 308B.
HISTORY 5508B America 1945-Present: Our Times Credits: 3
Cross Listings: HISTORY 308B.
HISTORY 5511 Medieval Civilization I Credits: 3
Medieval Civilization I
HISTORY 5512 Medieval Civilization II Credits: 3
Medieval Civilization II
HISTORY 5512A Medieval Women & Children Credits: 3
This course explores the roles of women in the social, economic, political, and cultural environments of medieval and early modern Europe. We examine the lives of women in all areas of life, from the ordinary to the extraordinary, in urban and rural environments, from the centers of religious and political power to the margins of society. Focus will be on the world of work for urban and peasant women and on the social and legal institutions of marriage, kinship, and the family. The course makes extensive use of primary source by and about women during this period.
HISTORY 5513 Renaissance Credits: 3
Cross Listings: HISTORY 413.
HISTORY 5514 Reformation Credits: 3
Cross Listings: HISTORY 414.

HISTORY 5515B 17Th And 18Th Century European History Credits: 3
This course is designed to present the upper-division undergraduate with a firm grasp of the major intellectual, cultural, political and economic development of 17th and 18th century Europe. It considers the bitter Thirty Years War in Century Europe, the rise of the Netherlands, the fall of Italy and Spain, the rise of constitutional and absolutist styles of government, the scientific revolution, the colonization by Europeans of the Pacific and Indian Ocean Basins, Enlightenment political philosophy, the Agricultural Revolution, and the French Revolution. Also offered for undergraduates as 415B. Graduate students will be held to a higher standard in terms of additional, in-depth historiographic research, writing, and discussion.

Cross Listings: HISTORY 416R.

HISTORY 5517 19th Century European History Credits: 3
This upper-division course will survey significant trends in warfare, politics, economics, social relations and culture in 19th century Europe, paying particular attention to the rise of modern ideologies and identities, world hegemony, and the social technologies of dehumanization that foreshadowed the unprecedented inhumanities of the 20th century. Graduates will be held to a higher standard in terms of additional, in-depth historiographic research, writing, and discussion.

Cross Listings: HISTORY 417R.

HISTORY 5518 20th Century European History Credits: 3
This upper-division course traces the history of Europe in the 20th century. It will survey significant trends in warfare, politics, economics, social relations and culture, paying particular attention to the rise of globalization and the condition of postmodernity, imperialism and decolonization, dehumanization and genocide as well as the role of ordinary people in these systems of mass destruction. Graduate students will be held to a higher standard in terms of additional, in-depth historiographic research, writing, and discussion.

Cross Listings: HISTORY 418R.

HISTORY 5519 Contemporary European History: 1950-2000 Credits: 3
This upper-division course traces the history of Europe in the period of living memory. It will survey significant trends in warfare, politics, economics social relations and culture, paying particular attention to the rise of globalization and the condition of postmodernity, decolonization and neo-colonization, European unification and everyday life. Graduate students will be held to a higher standard in terms of additional, in-depth historiographic research, writing, and discussion.

Cross Listings: HISTORY 419R.

HISTORY 5521 Oral History Credits: 3
This course focuses on the methods, theories, ethics, practices, and applications of tools in documenting and recovering the experiences of people hidden from the “traditional records.” Through lectures, readings, discussions, and fieldwork, students will learn the various steps in developing a robust oral history project. Students will go out into the community to capture the histories of communities in Kansas City.

HISTORY 5525R European Criminal Justice History, 500-1900 Credits: 3
This course will survey European crime, criminal procedure, policing and punishment between 500 and 1900. Particular attention will be given to changing methods of proof (oaths, ordeals, juries); changing type of criminal activity (banditry, vagrancy, witchcraft, professional theft) and changing penal strategies (the stocks, breaking on the wheel, the workhouse, the prison, the penitentiary). English experiences are emphasized.

HISTORY 5526 Modern Latin America Credits: 3
This course studies social, political, economic and cultural trends in Latin America in the nineteenth and twentieth centuries. Discussion topics include nation building after Independence with an emphasis on gender and race in the creation of national identities and new forms of social stratification; integration of national economies into the world economic system; the expansion of political participation and citizenship; immigration (national and transnational) and the tensions caused by the forces of modernization and tradition. Although the purpose of the course is to provide a general background for a large and diverse region (more than 20 countries), case studies from Argentina, Mexico and Brazil will illustrate the above-mentioned themes and will provide the basis for a comparative regional perspective.

HISTORY 5526R The Scientific Revolution 1500-1700 Credits: 3
Cross Listings: HISTORY 426R.

HISTORY 5527 The Darwinian Revolution, 1650-1900 Credits: 3
Cross Listings: HISTORY 427R.

HISTORY 5528A History Of The Body Credits: 3
This advanced course will explore the new field of the history of the body, with particular attention to sexuality and gender. Topics will include the history of sexualities, the body and society, body disciplines, medical practices and representations of illness, beauty, and fashion, and the relationship between sexualities and nationalisms.
HISTORY 5528B Women & Medicine: Patients & Practitioners From Antiquity-Present Credits: 3
This course explores, in a selective fashion, the role of women in Western Medicine both as health care providers and patients. The subject of the history of medicine is too broad to be covered comprehensively in a semester, and so we will focus on diseases or physical conditions which were believed to be limited to women-childbirth, certain mental health conditions, reproductive health, breast cancer-as well as the increasing marginalization of women within the profession of health care providers to those branches concerned primarily with “women’s problems.”

HISTORY 5531 Medieval England, 1066 to 1485 Credits: 3
Cross Listings: HISTORY 431R.

HISTORY 5532 Tudor-England, 1485-1688 Credits: 3
This course covers the history of England from the accession of Henry VII in 1485 to the crowning of William and Mary in the Glorious Revolution. Its main emphasis is the Tudor dynasty 1485-1603 with special reference to the transformation of England into a modern state, Re-Reformation, the role of Parliament, etc. The course concludes with the major characteristics of the early Stuart period.

HISTORY 5533 History of Britain 1603-1832 Credits: 3
This course analyzes the rise and fall of the Stuart dynasty and the effects of civil war, rebellion, and religious turmoil on the peoples of Britain. The domination of politics and culture by the aristocracy in the eighteenth century is examined. The rise of the Navy due to constant warfare and the exploration of the Pacific are discussed. The monarchy of George III, the loss of the American colonies, and the wars with Napoleon are examined. Finally, the Agricultural and early Industrial Revolutions are considered through an analysis of the social changes they brought in Britain and the Empire.

HISTORY 5534 History of Technology Credits: 3
The course examines technology as it shapes and is shaped by human society. Students will consider technology as a product of historically-specific and sometimes overlapping contexts shaped by culture, economics, natural environments, and social processes.

HISTORY 5536 Modern German History: 1890-1990 Credits: 3
This course traces history of Central Europe from the fall of Bismarck to the reunification of Germany one century later. It will ask students to think critically about the relationship between state and society, elites and ‘ordinary’ Germans, in the various German-speaking regimes that existed over the course of this era: two empires, two interwar republics, two fascist dictatorships, and three post-fascist republics. All assigned readings will be in English; a background knowledge of European history is recommended.

HISTORY 5537 Nazi Germany Credits: 3
Nazi Germany

HISTORY 5544 Islam & the Arabs: The Formative Period Credits: 3
Cross Listings: HISTORY 444R.

HISTORY 5545 The Ottoman Empire in the Middle East to WWI Credits: 3
Cross Listings: HISTORY 445.

HISTORY 5546 The Middle East from World War I to the Present Credits: 3
Cross Listings: HISTORY 446R.

HISTORY 5548 Missouri/Kansas Border Wars Credits: 3
This course explores the history of the Civil War on the Missouri/Kansas border, where residents first shed blood over the issue slavery. An exploration of this most uncivil of wars provides insight into the ways in which societies can be fragmented by ideology and ultimately rebuilt upon different lines.
Prerequisites: undergraduate degree.

HISTORY 5549 Civil War in Memory and Film Credits: 3
This course explores how the era of the Civil War and Reconstruction has been portrayed in film, literature, and art, and if the popular memory of the war accurately reflects the history. We also will discuss how the understanding of this pivotal event in American History has changed over time and how cultural artifacts often say more about the time in which they were produced than the actual history of the Civil War.

HISTORY 5552 Latin American History through the Movies Credits: 3
This course explores the national cinemas and film industries of various regions in Latin America. Students will analyze films both as artistic endeavors and as sociological documents that provide a window into the socio-historical context of the nation in question. This course will also examine the history of Latin American cinema from the beginnings of sound to present.

HISTORY 5554 Women in Modern America Credits: 3
Cross Listings: HISTORY 354R.

HISTORY 5556 Rise of the City in the U.S. Credits: 3
Cross Listings: HISTORY 356.

HISTORY 5556R Kansas City: History of a Regional Metropolis Credits: 3
Cross Listings: HISTORY 356R.
HISTORY 5557 The American West Credits: 3
Cross Listings: HISTORY 357.

HISTORY 5558 Black Civil Rights in the 20th and 21st Centuries Credits: 3
This course examines the fight for black civil rights in the United States in the 20th and 21st centuries, focusing on the Jim Crow period, the fight to end segregation, and the enduring problem of race in the United States.

HISTORY 5558R History of the American South Credits: 3
History of the American South

HISTORY 5559 World War II Film and Propaganda Credits: 3
This course examines film and propaganda, including posters, political cartoons, speeches, and other media, created in prewar or wartime conditions by both the Allies and Axis powers from 1933 to 1945 as it affected World War II.

HISTORY 5561R American Foreign Relations Credits: 3
Cross Listings: HISTORY 361.

HISTORY 5562J Japanese Civilization Credits: 3
A survey of Japanese civilization and cultural history from the prehistorical period to the present. Emphasis on the interplay between religion, the arts, politics, and social structure.

HISTORY 5563R Military History of the U.S. Credits: 3
Military History of the U.S.

HISTORY 5566R American Economic History Since 1865 Credits: 3
The course deals with the emergence of Industrial America since 1865. It will cover the rise to dominance of the large modern corporation, with the problem of economic and social instability and stability, with the rise of trade associations, cartels, and government regulation in an unstable economy, and with the evolution of American economic policy and national economic planning.

HISTORY 5566RR American Labor History Credits: 3
This course examines the history of work and the working class in the U.S. from 1750 to the present. We will focus on the transformation of the workplace, the rise of the union movement, the nature of cultural and political organizations, workers' relationships with other social groups, and the role played by gender, race, and ethnicity in uniting or dividing the working class.

HISTORY 5569 Women and Work in Early America Credits: 3
This course examines the ways in which gender, race, region, and class have shaped the historical experiences of American women. Students will trace women's lives from pre-European contact to 1877 through an examination of a wide variety of social, cultural, economic, and political forces and factors.

HISTORY 5570 Introduction to Material Culture Credits: 3
Cross Listings: HISTORY 370.

HISTORY 5570R Ancient Egypt Credits: 3
Cross Listings: HISTORY 470.

HISTORY 5571 American History Through Film Credits: 3
This course will move through the twentieth century and highlight major themes and developments that reveal the contours of American history as depicted in film. Students will examine the ways in which filmmakers have presented history, paying particular attention to the presentation of political, cultural, and social conflicts.

HISTORY 5571R Ancient Greece Credits: 3
Cross Listings: HISTORY 471.

HISTORY 5572R Ancient Rome Credits: 3
Cross Listings: HISTORY 472.

HISTORY 5574 Late Antiquity: The Transformation of the Mediterranean World (200-600 AD) Credits: 3
The decline of the Roman Empire and the barbarian invasions transformed the Mediterranean and European worlds, forming the foundation of Europe and the Islamic world. Students will investigate the multicultural society of Late Antiquity and become familiar with the primary sources for the period.

HISTORY 5575 Ancient Israel Credits: 3
Judaism has had a tremendous impact on our civilization and yet most Americans are only dimly aware of its origins and development. This course will trace the roots of the Jewish religion in its historical context from its beginning through the formation of rabbinic culture. The rise of Christianity will be examined in its original Judaic context, and recent discoveries, particularly those pertaining to the Dead Sea Scrolls, will be interpreted.

HISTORY 5575R The History of Ancient Israel Credits: 3
The History of Ancient Israel

HISTORY 5576R Medieval Jewish History Credits: 3
Cross Listings: HISTORY 476.
HISTORY 5577R Modern Jewish History Credits: 3
Cross Listings: HISTORY 477.

HISTORY 5578R The Holocaust and the State of Israel Credits: 3
The Holocaust and the State of Israel
HISTORY 5579 Public History: Theory and Method Credits: 3
This course explores the theoretical and methodological challenges that surround the public preservation and presentation of history in spaces like museums and historical societies. Students will learn the skills professionals use to communicate historical scholarship to wider audiences and will grapple with the issues around expanding history's stakeholders.

HISTORY 5580 The History Of The American South I Credits: 3
A study of the political, intellectual, cultural, economic, and social development of the American South up to and including the Civil War. Special topics discussed will e the plantation system, slavery, abolition, secession, the Confederacy and the interaction of the region with the nation.

HISTORY 5581 Research Methodologies Credits: 3
An introduction to a variety of research tools and techniques including such topics as evidence, critical method, verification, bibliography, book review, computers, statistics, and archival methods.

HISTORY 5581GR How To - History I Credits: 3
This foundational course in the doing of history will use the "great books" of historical scholarship to introduce graduate students to historical questions, methods, theories, and rhetorical strategies. The goal of the course is for the student to learn how to engage in historical criticism and formulate historical questions for themselves. This required course must be taken in the first year of graduate study in history.

HISTORY 5582 Colloquium In American History I Credits: 3
These courses are designed to acquaint the graduate student with the writings and theories of major American historians. Faculty lectures are combined with student bibliographical essays and the reading of important historical works in order to prepare the student for the final examination taken upon completion of M.A. course work. Books read in the course compose a large proportion of the departmental reading list.

HISTORY 5582GR How To - History II Credits: 3
This foundational course in the doing of history will introduce graduate students to professional obligations and research methodologies of academic historians. Pragmatic in focus, it will prepare students for all stages of research and teaching through all aspects of an historical career from graduate school to full professorship or other directions. This required course must be taken in the first year of graduate study in history and it fulfills the SGS recommendation for ethical instruction.
Prerequisites: HISTORY 5581GR.

HISTORY 5583 Colloquium In American History II Credits: 3
These courses are designed to acquaint the graduate student with the writings and theories of major American historians. Faculty lectures are combined with student bibliographical essays and the reading of important historical works in order prepare the student for the final examination taken upon completion of M.A. course work. Books read in the course compose a large proportion of the departmental reading list.

HISTORY 5583GR Medieval Methods & Paleography Credits: 3
This course examines the methodology and historiography of Medieval and Renaissance Studies. Through an introduction to paleography, the study of handwritings, it prepares students for advanced work in these fields. Using an interdisciplinary approach, this course examines the historical and cultural settings for texts, their physical form and production, as well as the tradition of textual transmission in the medieval and early modern world. In addition to gaining familiarity with many different types of primary sources, such as literary, artistic, legal, and notarial sources, students will be exposed to methods for archival work in various European nations.

HISTORY 5584R Colloquium In European History I Credits: 3
The European History Colloquium I will examine some of the crucial problems or watersheds in European history from antiquity through the Reformation. Course requirements include weekly discussions on specific topics and a research paper or project due by the end of the semester.

HISTORY 5585 Colloquium In European History II Credits: 3
The European History Colloquium II will examine some of the crucial problems or watersheds in European history from the Reformation through the 20th century. The course seeks to provide an in-depth study of specific topics and of the associated bibliography.

HISTORY 5585GR Colloquium in U.S. History Credits: 3
Students read broadly in the historiography of a particular historical problem, place, period, or specialization in U.S. History in order to master the relevant literature and hone their skills of historical criticism.
Co-requisites: HISTORY 5581GR.

HISTORY 5586GR Colloquium in World History Credits: 3
Students read broadly in the historiography of a particular historical problem, place, period, or specialization in world history in order to master the relevant literature and hone their skills of historical criticism.
Co-requisites: HISTORY 5581GR.

HISTORY 5587R Research Seminar Credits: 3
Students in this course will produce a major research paper under the direction of the instructor: a self-contained thesis chapter, an article for publication or the equivalent.
HISTORY 5587RA Research Seminar Credits: 3
HISTORY 5587RB Research Seminar Credits: 3
HISTORY 5590 History Of The American South II Credits: 3
A study of the political, intellectual, cultural, economic, and social development of the American South since the Civil War. Topics discussed will be the molding of a "New South,: twentieth century internal developments and the interaction of the region with the nation.
HISTORY 5591 Archival Methods Credits: 3
HISTORY 5592 Public History Internship Credits: 1-3
HISTORY 5593 Museum Studies Credits: 3
This course is designed to acquaint students with specific careers in museums and historical agencies; to introduce students to the wide range of operating issues facing those working in the museum profession on a day-to-day basis; and to familiarize students with the organizations, reference works and resources available to develop the skills and training required for those who choose to make this their profession.
HISTORY 5594 Public History and New Media Credits: 3
This course provides students with an understanding of how new media can advance the work of cultural heritage. While contributing to an ongoing digital project, the course will consider how historians utilize digital technology to analyze primary sources as well as how museums use social media to reach broader audiences.
HISTORY 5597 Non-Thesis Research/Reading Credits: 1-6
Individual direction of student reading or research by selected, consenting faculty. This course can be taken only when faculty supervision is unavailable in colloquia or seminars.
HISTORY 5599R Thesis Credits: 1-6
A contribution to knowledge based upon extensive research and reflective of careful analysis. Before writing a thesis, the student must clear the topic and research design with the Supervisory committee.
HISTORY 5680 Doctoral Colloquium Credits: 3
This course will examine the writings and theories of major historians in a particular field of history. The authors, works and intellectual currents which form the basis of the colloquium will vary from semester to semester, depending upon the professor's expertise and design for the course.
HISTORY 5687 Doctoral Research Seminar Credits: 3
Students in this course will produce a major research paper under the direction of the instructor. This shall consist of a self-contained chapter of the dissertation or a work of publishable quality. May be repeated for credit.
HISTORY 5687RB Doctoral Research Seminar Credits: 3
Students in this course will produce a major research paper under the direction of the instructor. This shall consist of a self-contained chapter of the dissertation or a work of publishable quality. May be repeated for credit.
HISTORY 5697 Doctoral-Level Independent Reading Credits: 1-6
Individual reading under the supervision of members of the History Doctoral Faculty in preparation for the Comprehensive Examination for the Ph.D.
HISTORY 5699R Dissertation Credits: 1-15
Course credits in dissertation.
HISTORY 5899 Required Graduate Enrollment Credit: 1
HISTORY 5990 Capstone Credits: 1-6
HISTORY H497 Special Topics and Readings Credits: 1-6
Intensive reading and/or research in an area selected by the student in consultation with the instructor. May be repeated for credit when the topic varies.
Bachelor of Arts: History
University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes
Students graduating from this program will:

- Knowledge of the Past: Acquire knowledge of the world’s civilizations and peoples, and their political, economic, social and cultural histories.
- Knowledge of the Past: Gain in-depth knowledge of a historical field by specializing in one of several departmental interest areas.
- Knowledge of the Past: Gain exposure to a range of historical subjects outside the concentration.
- Knowledge of the Past: Complete at least one course that examines a non-western society.
- Perspectives: Develop a historical understanding of an increasingly multicultural society and interdependent world.
- Perspectives: Understand the variety and complexity of the human experience and foster an appreciation for processes of change.
- Perspectives: Comprehend how constructions of class, race and gender dynamically shape social structures, national identities and all forms of human relationships.
- Perspectives: Realize the interlocking relationships among science, technology, the environment and society.
- Perspectives: Appreciate the value of interdisciplinary perspectives and methods.
- Analysis and Interpretation: Critically evaluate secondary, textual evidence by identifying a thesis, noting sources and methods used in argument, discerning the conclusions and determining the perspective, bias and reliability of the argument.
- Analysis and Interpretation: Think critically, and master the art of interpretive analysis based on the widest possible array of primary sources: written, material and other cultural texts.
- Research and Communication: Locate printed and online information sources to research a topic exhaustively.
- Research and Communication: Write clear, well organized, properly documented and grammatical prose.

The Department of History has developed a set of carefully crafted learning objectives. Simply put, history majors are expected to acquire specified levels of knowledge, perspectives and skills through the study of the past. The learning objectives are designed to help students succeed in their undergraduate history major, as independent, creative and self-directed learners. More important, they will help students to be successful in their pursuit of a career and to hold a lifelong appreciation for the humanities and social sciences.

Total Credits  3

1  Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements
Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

Total Credits  31
ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.

This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

Major Requirements

The History major consists of 36 total credit hours, but no credit will be given toward the major for courses in which the grade is below C-.

Two courses, or 6 credit hours, are required in survey courses, including United States History (HISTORY 101 or HISTORY 102), European History (HISTORY 201 or HISTORY 202), or World History (HISTORY 206 or HISTORY 208). Students will select one course, or 3 credit hours, from two of these three categories (United States, European, or World) for a total of two courses, or 6 credit hours. These courses may also fulfill UMKC general education requirements.

At least four courses, or 12 credits, inside the student’s interest area. The history department divides all upper division courses into four interest areas: Antiquity and Medieval; Early Modern and Modern Europe; United States; and Asia, Middle East and Latin America. All majors should select a primary interest area in order to gain an in-depth understanding of their topic. A student can also devise a thematic interest area with approval by the Undergraduate History Advisor.

Students will also take additional courses from other interest areas to enlarge the scope of their historical knowledge. At least three courses, or 9 credits, should be outside of the student’s primary interest area, and at least one non-western course, or 3 credits, should be taken covering Africa, Asia, Latin America, Middle East, and/or indigenous North Americans.

The final two courses, or 6 credits, come from HISTORY 301WI and HISTORY 498WI. These courses cannot be taken in the same semester and are not offered in the summer. NOTE: Students must complete the RooWriter before enrolling in any writing intensive courses.

Independent-study courses (HISTORY 496, HISTORY 497) and Internship classes (HISTORY 392B) may also help fulfill History electives. Enrollment in these courses is granted only by the supervising instructor.

Students must successfully complete the major requirements below with at least 12 hours of the noted upper division (300+) course requirements completed at UMKC.

General Electives

Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

Tools for Planning and Fulfilling Academic Requirements

UMKC’s Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Minor in History

Student Learning Outcomes

Students graduating from this program will:

• Knowledge of the Past: Acquire knowledge of the world’s civilizations and peoples, and their political, economic, social and cultural histories.
• Knowledge of the Past: Gain in-depth knowledge of a historical field by specializing in one of several departmental interest areas.
• Knowledge of the Past: Gain exposure to a range of historical subjects outside the interest area.
• Knowledge of the Past: Complete at least one course that examines a non-western society.
• Perspectives: Develop a historical understanding of an increasingly multicultural society and interdependent world.
• Perspectives: Understand the variety and complexity of the human experience and foster an appreciation for processes of change.
• Perspectives: Comprehend how constructions of class, race and gender dynamically shape social structures, national identities and all forms of human relationships.
• Perspectives: Realize the interlocking relationships among science, technology, the environment and society.
• Perspectives: Appreciate the value of interdisciplinary perspectives and methods.
• Analysis and Interpretation: Critically evaluate secondary, textual evidence by identifying a thesis, noting sources and methods used in argument, discerning the conclusions and determining the perspective, bias and reliability of the argument.
• Analysis and Interpretation: Think critically, and master the art of interpretive analysis based on the widest possible array of primary sources: written, material and other cultural texts.
• Research and Communication: Locate printed and online information sources to research a topic exhaustively.
• Research and Communication: Write clear, well organized, properly documented and grammatical prose.

Studying history provides students with unique opportunities to develop their intellectual passions, interests, abilities, skills (critical thinking, research, writing, and oral communication) and sensibilities-insight, empathy, and perspective.

Understanding the past provides students with a rich foundation of learning and valuable skills upon which more specialized knowledge can be built. A history background can help students build toward a range of careers—from business to government to education to the law—and facilitate the pursuit of alternative paths especially valuable in a fluid labor market.

Program Requirements

A minor in history may be earned with a minimum of 18 credit hours of coursework in the discipline (at least 12 of which must be at the 300- and 400-level). A maximum of six of the 18 credit hours may be taken in two of the survey courses. For course selection, please refer to the Bachelor of Arts in History (p. 407). A history minor also may be earned online.
Master of Arts: History

This master’s program is designed for students who already have completed a non-terminal baccalaureate degree with a major in History or a related field.

In this program, students will gain a broad understanding of the field of History, while developing an in-depth knowledge of historical scholarship in their areas of interest. Students may find that they develop these interests in the process of their interaction with the department faculty.

Admissions

Applications for the M.A. degree in History are reviewed continually during the calendar year. However, students must have their applications completed by December 1 for admission for the spring semester and by July 1 for the fall term. To be considered for graduate teaching assistantships or paid internships during the following academic year, and for maximum choice in coursework for the first semester, fall candidates need to have their application submitted by February 1. There is a supplemental application for the graduate teaching assistantships and paid internships.

Please contact the History MA Advisor, to convey your interest in applying or for questions regarding the History MA program. Inquiries can also be emailed to history@umkc.edu

The History department will consider for admission as a regular Graduate Student any student whose undergraduate major was History and who had a 3.0 grade point average in History courses and a 3.0 grade point average overall. Applicants who do not hold an undergraduate degree in History, but whose baccalaureate program included substantial training in History and/or related subjects, may also be considered for regular admission.

Applying for the MA History Program

To the Office of Admissions (http://www.umkc.edu/admissions)

• Application
• Official Transcripts and Test Scores (GRE not required)

To the History Department (http://cas.umkc.edu/history)

• A statement of purpose, explaining your academic and professional goals; what sparked your interest in graduate study; relevant academic and work-related activities; elaborate on academic interest, including the faculty with whom you wish to study (typically 2 pages)
• A sample of your scholarly writing (varying according to size of paper)
• Three letters of recommendation (preferably from History professors)

It is your responsibility to confirm the receipt of all materials.

If admitted, students will be asked to sign a letter of intent to enroll.

Financial Aid

There are a limited number of graduate teaching assistantships and paid internships available. The School of Graduate Studies also administers graduate fellowships and scholarships. For all other inquiries about financial aid, contact:

Financial Aid and Scholarships Office
Administrative Center, Room 101
5115 Oak Street
(816) 235-1154 (Kansas City Metro)
1-800-775-8652 (Outside of Metro)
Fax: (816) 235-5511
finaid@umkc.edu
http://www.umkc.edu/finaid

Student Learning Outcomes

Students graduating from this program will:

• How to recognize, demonstrate, and apply appropriate knowledge of the world’s civilizations and peoples as well as their political, economic, social, and cultural histories.
• How to identify and employ primary and/or secondary sources to research a topic exhaustively.
• How to relate the events in his/her particular story to the general history of the topic; and the student relates his/her interpretation to the interpretations of other historians, or to theorists or scholars in other disciplines.
• How to use primary and secondary sources to construct an original historical interpretation, demonstrating competency in identifying a problem, posing a hypothesis, proposing a methodology, and engaging the data.
• How to critically appraise alternative readings of the past, create a coherent historical interpretation, and take a critical position in these debates.
• How to compose and present clear, well-organized, properly documented grammatical prose.

Program Options
The Department of History offers two options leading to the Master of Arts degree—the M.A. in History, requiring 30 hours, and the M.A. in History with an emphasis in Public History, requiring 36 credit hours.

Requirements
Students seeking to fulfill either program option are required to complete the minimum number of credit hours of graduate-level work which must include the following courses with a grade of 2.67 (B-) or better:

<table>
<thead>

</table>

1 The department encourages students to take graduate level electives in the History department at the 5500 level. With the approval of the student’s faculty advisor, however, students may take up to 6 credits at the 400 level if these fit with their overall program of study. Students may also take up to 9 credits in courses outside the department provided:
1. They are demonstrably graduate level courses.
2. They clearly relate to the student’s program of study.

Public History Emphasis in Master of Arts in History
MA History - Public History Emphasis Website (http://cas.umkc.edu/history/degree-options/graduate-programs)

Student Learning Outcomes
Students graduating from this program will:
• apply the art of public interpretation to historical scholarship by crafting a sample historical exhibit.
• critically evaluate projects of a similar nature by reviewing an existing exhibit.
• assess the job prospects of public history and museum professionals by analyzing a specific career in public history.
• critically evaluate the efficacy of digital technology for historical research through hands on workshops and digital history project reviews.

Colloquia

These courses form the knowledge base for the graduate program. Students are encouraged to take as many of these as can fit into their Program of Study. In them, students will

1. Read broadly and learn about the major trends in the historiography of a particular historical problem, place, period, or specialization.
2. Develop fundamental skills of the professional historian such as the ability to write academic book reviews, make conference-style presentations, and discuss among peers the work of other historians critically.

This course typically culminates in the production of a term paper and/or literature review on a subject of the student’s interest that could serve as the context for a future research project or comprehensive examination field.

Research Seminars

Students will produce an original work of scholarship anchored in primary sources that reflects their larger course of study. This paper will serve as the foundation of their M.A. thesis or capstone project.

Internship (for Public History emphasis)

This course provides students in the Public History emphasis with invaluable professional experience in the field. For every credit hour, they will work 40 hours at a cultural institution that aligns with their own professional goals. These can be museums, historical societies, archives, libraries, historic sites, or cultural foundations.

Graduate Thesis or Capstone Course

In this course, taken near the completion of the program of study, students will complete, and defend in an oral examination, their advisor-approved thesis or capstone project. This final project can take one of three forms: a thesis, which is defined as a journal-length professional paper, based on original research using primary sources (10,000-12,000 words) (HISTORY 5599R); a public history capstone project (HISTORY 5990); or for educators, an extensive unit plan (HISTORY 5990). See your advisor for additional guidelines about the thesis/capstone options.

Language Requirements

The M.A. in History will require demonstration of foreign language competency if the subject matter requires it. The faculty advisor will determine how this requirement should be fulfilled.

Minimum Expectations

Students must demonstrate satisfactory progress towards the completion of their degree. In all courses students must

1. Receive a grade of B- or higher in all courses taken in the program.
2. Maintain a minimum cumulative 3.0 graduate GPA.
3. Adhere rigorously and conscientiously to academic standards of honesty.
4. Demonstrate serious commitment to scholarship and intellectual engagement.
5. Satisfactory compliance with all applicable requirements of the School of Graduate Studies. Abide by all requirements of the School of Graduate Studies. Please refer to the General Graduate Academic Regulations and Information (p. 1189) section of this catalog.

In terms of administrative procedures, students must punctually file the following forms, each of which must be approved by the M.A. advisor, the faculty advisor and the other members of the supervisory committee:

1. A tentative program of study, and the form listing the initial members of the Supervisory Committee made up of a chair and two additional faculty members, by the 15th of October or 15th of March before the completion of the student’s 15th credit hour.
2. A final program of study, and the form listing the final members of the supervisory committee, by the 15th of October or 15th of March before the completion of the student’s 30th credit hour.
3. The student must have identified a faculty advisor who has agreed to serve as the student’s committee chair for the student’s thesis/capstone project. Faculty advisors, like tentative programs of study, may be changed over the course of a student’s study.

Each year students are required to submit a formal report of their progress toward their degree by February 1. The narrative statement should include a description of students’ coursework, exam preparation, research activities (including progress toward the thesis/dissertation/final project, conference activities, publications, exhibits, and the status of grant applications), awards, and internships, as applicable. In addition, students should outline their goals for the coming academic year.

Students in the Public History emphasis must declare their emphasis by the completion of their 12th credit hour by forming a viable committee and completing a program of study.

**Advisors and Committees**

Once enrolled, students should schedule a meeting with the Masters Advisor. During this meeting, the student will be assigned a faculty mentor. The faculty mentor will:

• serve as a personal connection to the department

• assist the student in all matters professional during their study in the department

• and may continue even after the student has identified a faculty advisor (their content specific instructor).

**Supervisory Committee**

The supervisory committee consists of three full-time, regular members of the UMKC History Department who are also members of the graduate faculty, with the student’s faculty advisor serving as chair of this committee.

With the approval of the faculty advisor:

• One member of the committee may be a full-time, regular member of another UMKC department (this committee member must also be a member of the graduate faculty).

• A fourth member may be added to the committee from the adjunct graduate faculty or from the graduate faculty of another institution.

Students in the Public History emphasis are encouraged to have a faculty advisor who specializes in the content area related to their capstone project, as well as faculty member who specializes in public history. Public History students are also permitted to include members of the adjunct graduate history faculty on their committees who work professionally in the field of public history in the Kansas City region.

**Extenuating Circumstances**

Students incapable of meeting administrative deadlines may request an extension from the M.A. advisor. These requests must be made in writing in advance of the deadlines. Incompletes will be given only when there are legitimate reasons for not completing course requirements on time, and only when there are reasonable expectations that work can be completed within the time allowed by the School of Graduate Studies (maximum of one year).

**Probation**

Failing any of these conditions means that the student is not making satisfactory progress towards the completion of her/his degree. In that case, the student will be placed on probation and will have to petition the department, through a letter to the M.A. advisor and graduate committee, for permission to resume his or her studies the following semester. The department will then recommend a reasonable plan for remediation. If the student fails to meet the standards set by the department, the student will be declared ineligible for enrollment and dropped from the program.

**Honorary Organizations**

The department sponsors a chapter of the national history honorary, Phi Alpha Theta. Admission into the honorary requires a 3.2 grade-point average in a minimum of 12 credits of graduate work. The honorary sponsors programs and lectures during the school year, and members are often invited to read papers at the regional conventions. Membership in Phi Alpha Theta is noted on each honoree’s official transcript.

Students should strongly consider membership in professional organizations for historians, such as the American Historical Association (http://www.historians.org) and others.

**The Annual Graduate Student Conference**

The History Department hosts an annual Graduate Student Conference each December. Graduate students should plan to attend as required by the program. In it, students will

• demonstrate their expertise in a research agenda of their own creation,
• present their research to peers and faculty,
• comment constructively and critically on the research of others,
• engage critical questions in public, and
• celebrate their academic achievements that year.

**History Department Graduate Student Awards**

Each spring, the faculty will present three graduate student prizes: the Carla Klausner Award for the Best Original History Research Paper; the Louis Potts Award for the Best Original Research Paper on Midwestern History; and the Lynda Payne Award for the Best Public History Project. The Captain Harry S. Truman Prize is annually awarded to the best undergraduate or graduate student paper on a topic related to WWI.
Interdisciplinary Ph.D. in History

History is an academic discipline eligible for full participation in UMKC's Interdisciplinary Ph.D. Program. Students interested in this study should review the School of Graduate Studies section for general and discipline-specific admission criteria, academic regulations, and degree requirements.

Student Learning Outcomes

Students graduating from this program will:

- Knowledge: Mastery of knowledge of the “big questions” of the Holocaust and genocide studies.
- Interconnectedness & Contextualization: Understanding the scope of the Holocaust and genocide studies and the relations between aspects of it.
- Research: The ability to conduct interdisciplinary research in Holocaust and genocide studies.
- Interdisciplinarity: The ability to think about the Holocaust and genocide studies across disciplinary lines.
- Analytic & Creative Synthesis: Ability to analyze and synthesize evidence about the Holocaust and genocide studies.
- Communication: The ability to communicate clearly and effectively to diverse audiences.
- Application & Relevance: The ability to apply what is learned about the Holocaust and genocide studies in diverse contemporary ethical and political contexts.

Curriculum

- **Total Credit Hours**: 18 credit hours, at least 9 of which must be taken at UMKC.
- **Introductory course**: This required course introduces students to the “big questions” of Holocaust and genocide studies and to interdisciplinary scholarship. It will be offered each Spring semester and taught by rotating consortium faculty. Students register for this course through the home institutions of the faculty teaching that semester. It is expected that the introductory course is the first course students take in the certificate program. If their enrollment begins in a semester when the course is not offered, students may petition for an exception through their academic adviser.
- **Elective coursework**: Students must complete 12 additional credit hours from the list of approved courses at participating institutions. The courses are either classified as Core or Contract courses. A minimum of 6 credit hours of core courses must be completed. Contract courses offer students the flexibility to enroll in a course that addresses the Holocaust and genocide studies indirectly, but require an academic contract between the student and professor stipulating how the course material will meet the learning objectives of the Certificate Program. Only six credit hours of contract courses can be counted toward certificate completion. Certificate Course Contract (http://mchekc.org/admin/wp-content/uploads/2014/04/CertificateCourseContract.pdf)
- **Capstone Experience**: Students are required to complete a 3-credit capstone course in the final semester of their certificate curriculum. This capstone course may coincide with the capstone course for a degree program with a delay of some semesters as needed. Or, it may be an independent reading and research course with an approved member of an affiliated institution’s faculty.
• **Capstone Project.** The final product of this course would consist of an interdisciplinary scholarly project. Students are encouraged to develop capstone projects that demonstrate mastery of all of the six student learning objectives for the program.

• **Reflective Essay.** This requirement includes SLO6 “Application & Relevance” in which students demonstrate their ability to apply knowledge about Holocaust and genocide studies in diverse contemporary ethical and political contexts. If their project does not directly address this learning objective, then the student will be asked to complete a brief reflective essay, submitted in addition to the capstone project, in which they consider what they have learned across the curriculum about the HGS’s application and relevance. It is not required if the capstone project demonstrates mastery of SLO6.

• **Transcripts:** In order to receive credit for a course taken at a consortium institution, students are responsible for asking the registrars at the institutions where the courses were taken to send a transcript to the UMKC registrar (http://www.umkc.edu/registrar). Students must provide transcripts to the program coordinator at MCHE from all institutions at which they took courses.

• **Transferring credits:** For Certificate purposes, students may transfer only courses approved by the Consortium faculty. If students are also enrolled in a regular degree program at UMKC, courses approved for the Certificate may not be transferred in addition to courses allowed for transfer for a degree. Approval for a Certificate transfer does not guarantee approval for any degree; that decision depends on the guidelines for the relevant degree program.
Bachelor of Arts / Graduate Certificate in Holocaust Studies - Dual Degree

This program combines a Bachelor's degree with the Graduate Certificate in Holocaust Studies. It enables students pursuing a Bachelor's degree to apply 6 hours of credit from BA coursework at the 300 or 400 level to the Graduate Certificate. All other requirements for both the Bachelor's degree and the Graduate Certificate, including the requirement that at least 9 hours of Certificate coursework be taken at UMKC, remain. (The full description of the Certificate can be found on the Holocaust Studies website: http://cas2.umkc.edu/holocaust/program.asp.)

Admissions Requirements:
- Status:
  - enrolled and in good academic standing at UMKC
  - completed 60 credits towards their undergraduate degree
  - completed 30 at UMKC
- GPA: 3.0 or higher
- Demonstration of a command of the basic facts of the Holocaust. Students may do so through:
  - documented evidence of a prolonged engagement in the teaching of the Holocaust;
  - a grade of B or higher taken at the 300-level or higher in Holocaust coursework; OR
  - a grade of A- of higher in the course Anch 214: ECHI: Nazi-Occupied Europe and the Holocaust

Since the Graduate Certificate is supported by an interuniversity Consortium of faculty, the admissions process involves both the UMKC and the Midwest Center for Holocaust Education. Students interested in admissions should contact Dr. Andrew Stuart Bergerson, bergersona@umkc.edu, 816-235-5728, who is the UMKC advisor for the Certificate.

University of Missouri-Kansas City
Latinx and Latin American Studies
Haag Hall 204
5100 Rockhill Road
Kansas City, MO 64110-2499

Program Description:
The mission of Latinx and Latin American Studies (LLS), a program based in the College of Arts and Sciences, is to function as a vehicle for interdisciplinary and multidisciplinary teaching, research and outreach focusing on Latinas/os-Chicanas/os in the U.S. The LLS program will provide an awareness and understanding of the wide diversity of Latino communities, cultures and backgrounds. The development and expansion of our curricula will serve to empower our students with the concepts and skills to better understand a rapidly growing Latina/o population. The LLS program will engage students, scholars and the greater Kansas City community in collaborative projects, programs and service learning efforts. These efforts will foster new curricula and advance research and outreach scholarship to create new knowledge to better understand the cultural, economic, and historical experiences and contributions of U.S. Latinas/os-Chicanas/os and their diasporic origins.

Program Activities:
• Provide all UMKC students with critical understanding of the historical, political and social context in which Latino/Chicano communities have evolved and continue to be established in the U.S., with particular attention to the greater Kansas City metropolitan area and the Midwest region. Crucial to this goal is the understanding of the transnational nature of these community ties.
• Provide access to a quality education for Latina/o students and other students interested in Latina/o-Chicana/o Studies and at the same time enhance diversity on the campus.
• Strengthen ties with UMKC Latina/o students and other students interested in Latina/o-Chicana/o Studies and at the same time enhance diversity on the campus.
• Strengthen ties with UMKC Latina/o students and other students interested in Latina/o-Chicana/o Studies and at the same time enhance diversity on the campus.
• Engage other area Latina/o professionals in LLS activities
• Strengthen ties between the UMKC and the Latino community.
• Establish UMKC as a center of teaching, learning and research on Latino/Chicano populations.
• Establish and/or strengthen alliances with local Latina/o community organizations, e.g. Guadalupe Center (KCMO), El Centro (KCK), Dos Mundos, KC Hispanic News, Mattie Rhodes Art and Counseling Center, The Mexican Consulate, Latino Writers Collective
• Create alliances/connections with local non-Latina/o organizations, e.g. Nelson-Atkins Art Museum, Kauffman Center for the Performing Arts, Kansas City Public Libraries and the Kansas City Museum

Faculty

Professors:

Norma E. Cantú 1,2 Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=cantu); professor of latina/latino studies and english; B.S., M.S. (Texas A&I University); Ph.D. (University of Nebraska-Lincoln)

Miguel A. Carranza 1,2 professor emeritus of latina/latino studies and sociology; B.A. (Kearney State College); M.A., Ph.D. (University of Notre Dame).

Associate Professor:

Theresa L. Torres 1,2 Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=torres); associate professor of latina/latino studies and sociology; B.A. (Benedictine College); M.A. (Boston College); Ph.D. (Catholic University of America).

Academic Advisor:

Norma E. Cantú

1 Members of UMKC Graduate Faculty
Members of UMKC Doctoral Faculty

**Undergraduate**

**Latinx and Latin American Studies Minor (p. 428)**

**Courses**

**LLS 201 Introduction to Latina/o Studies**
Credits: 3
This course addresses and examines the social, economic, and political factors that have influenced the historical experiences of Latinas and Latinos in the U.S. Attention will focus on the major concepts, issues and debates in the field of Latina/Latino Studies. Particular consideration will be given to an analysis of and understanding as to how these factors have influenced the past and present status of Latinos in U.S. society. Given the diversity existing within the Latino population, the course will be comparative, cross-cultural, and interdisciplinary in nature.

**LLS 300 Special Topics in Latinx and Latin American Studies**
Credits: 3
A variable content course offered in the area of Latinx and Latin American studies.

**LLS 310 The World of Latinx Youth and Adolescents in the U.S.**
Credits: 3
This course will provide a general introduction and in-depth understanding to the largest group of racial/ethnic adolescents in the United States: Latinx youth. An historical examination of Latinx youth will provide a better understanding of their present status, with emphasis on their contact and interactions within social institutions. Additionally, students will analyze the experiences Latinx youth have within and among other groups in the broader social context based on past, present, and possible future interactions.

**Cross Listings:** SOCIOL 338.

**LLS 322 Race and Ethnic Relations**
Credits: 3
The nature, origin and dynamics of ethnic and race relations in the U.S. and other societies. Specific attention will be given to the historical and contemporary contexts of prejudice discrimination and confrontation.

**LLS 348 Latinx Immigrants, Migrants, and Refugees in the U.S.**
Credits: 3
This course addresses the culture of societies of U.S. citizens, immigrants, and refugees of Latin American heritage living in the U.S. The course emphasizes recent anthropological, historical, cultural, and sociological studies.

**Cross Listings:** SOCIOL 348 and ANTHRO 348.

**LLS 397 Independent Readings in Latinx and Latin American Studies**
Credits: 1-3
Students will complete extensive readings in an area selected by the student with prior consultation with instructor.

**LLS 400 Advanced Special Topics in Latinx and Latin American Studies**
Credits: 1-3
This course is a variable content course and offered as a result of specialized faculty interest, student demand, or the availability of a visiting expert in a field closely related to Latinx and Latin American Studies.

**LLS 421 Made in the USA: Latinx Art and Experience**
Credits: 3
This course focuses on art of and by members of the U.S. Latinx community. Students in this course will engage with the politics of representation, gender, sexuality, race, class, and ethnicity in Latinx art, as well as visual and popular culture.

**LLS 497 Directed Research**
Credits: 1-3
Students will develop and conduct a research project in an area selected by the student under the supervision of a faculty member. Students may only enroll in 6 total credits of LLS 497 during their time at UMKC.

**Prerequisites:** Junior or Senior Level Standing.
Latinx and Latin American Studies Minor

Student Learning Outcomes

Students graduating from this program will:

- Examine the role of Latinos and the Latino Diaspora in U.S. society and the growing role of the transnationalism of Latino immigrants going to and from the U.S. to Mexico, Central American and the Caribbean.
- Acquire an understanding of the experiences, contributions and condition of Latinos in the formation of U.S. society and culture.
- Employ Latina/Latino Studies theories and approaches as essential tools to understand and assess the human experience.
- Critically analyze and communicate an awareness of culture and diversity in our global world.
- Examine and evaluate the breadth and depth of the growing diversity represented within the Latino experience in the U.S.

The minor in Latina/Latino Studies is comprised of 18 hours. Nine (9) credit hours must be in upper division (300 or 400) level courses. A minimum of nine (9) of the 18 hours are required in Latina/Latino Studies.

Program Description
The College of Arts and Sciences offers the bachelor of liberal arts (B.L.A.) degree for individuals who seek scientific literacy, an understanding of the social sciences and an appreciation of the humanities. The B.L.A. is an alternative to the B.A./B.S. degree programs and is for individuals who do not wish to commit themselves to a specialty, whose aspirations are not served by a traditional major, and who desire maximum flexibility in course selection.

Students who have found the B.L.A. degree particularly beneficial are those who have matriculated into the six-year medical program and pursue the combined B.L.A./M.D. degrees and those students wishing to apply to the UMKC School of Law through the Early Entry Law Program.

Potential for Graduate Study
Students completing the B.L.A. degree have the potential to pursue graduate study in many areas. One option is the Master of Arts in Liberal Studies, a master’s degree similar in structure to the B.L.A., which continues the tradition of interdisciplinary work in the College at the intermediate level between baccalaureate and doctoral work. Students completing the B.L.A. degree who wish to continue their education at the graduate level are strongly encouraged to seek counsel from a graduate adviser in that discipline early in their undergraduate career.

University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes
Students graduating from this program will:

• Be able to identify and articulate scholarly questions based on evidence and approaches from more than one disciplinary area.
• Be able to demonstrate the ability to gather and organize scholarly literature and raw data needed to answer scholarly questions.
• Be able to demonstrate the ability to analyze and evaluate scholarly literature and raw data to answer scholarly questions.
• Be able to effectively communicate the results of their work via either expository rhetoric or a creative work to an audience that does not specialize in their area of study or share their disciplinary perspective.
• Be able to effectively craft their program of study for intellectual and professional purposes as the foundation for life-long learning.

'Total credits' in this section indicates the number of General Education Core credit hours that are not met by the degree specific requirements outlined below.

Total Credits: 24

See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have "satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions."

Courses at UMKC that satisfy this state requirement are:

<table>

</tr>
</tbody>
</table>

Total Credits: 3

Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

• Take an equivalent course from the list above at a regionally accredited institution.
• Earn credit for one of the above courses through AP, IB, or CLEP.
• Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
• Have a previous bachelors degree (or higher) from a regionally accredited institution.
• Have an Associate of Arts degree from a regionally accredited institution.
• Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Addition details are available in the Student Services section of the catalog.

1. ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.

2. This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

**BLA Requirements**

**Hour Requirements and Eligibility**

A 2.0 GPA is required to declare intent to pursue the B.L.A. and a 2.0 overall GPA is required by the University of Missouri for graduation.

The credit/non-credit option is not available for students pursuing this degree.

**Minor Requirement**

Students must complete a minor offered by any interdisciplinary program or department in the University. Students may also complete a Missouri Department of Higher Education (MDHE) approved emphasis area to fulfill the minor requirement. The Black Studies Emphasis Area (p. 95) is currently the only MDHE approved emphasis area for the BLA Students will work with the faculty adviser corresponding to the selected minor or emphasis area.

**Area Requirements and Limitations Applicable to This Degree**

At least 36 of the total hours must be at the junior/senior (300-400) level. Twelve of these junior/senior (300-400) level hours must be taken within the BLA Area Requirements at UMKC or in the College of Arts and Sciences at UMKC. Additionally, coursework must be taken from at least two departments in each division.

Students should note that some departments within the College of Arts and Sciences (for example, geosciences and history departments) offer coursework that can be applied to more than one division. Students should consult with an advisor in selecting coursework to ensure that they receive proper credit in the various divisions required for the degree.

**General Electives**

Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

**Tools for Planning and Fulfilling Academic Requirements**

UMKC’s Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.
UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Master of Arts in Liberal Studies

Program Description

The Master of Arts in Liberal Studies (MALS) degree program enables individuals to pursue interdisciplinary studies at the graduate level. Courses provide students the opportunity to extend the best experiences of baccalaureate liberal education to the graduate level.

Students admitted to the program will be encouraged to select one of the graduate certificate programs or informal focus areas listed below and will develop a program of study with the cooperation of the assigned advisor.

- Bioethics (graduate certificate)
- Black Studies (graduate certificate or informal focus area)
- Film and Media Studies (informal focus area)
- Gerontology (graduate certificate)
- Holocaust Studies (graduate certificate)
- Humanities Consortium (informal focus area)
- Medieval and Early Modern Studies (graduate certificate)
- Women's and Gender Studies (informal focus area)

Alternatively, students with a strong interest in a different interdisciplinary area of study within the College of Arts and Sciences may submit a statement indicating interest in designing an individualized plan of study. In order to ensure that courses to support a proposed individualized plan of study are available at UMKC, students who want to pursue this option should suggest a list of courses offered in the College of Arts and Sciences that could contribute to their desired area of study. Students wishing to pursue this option should contact the MALS advisor for assistance developing this list of courses.

Student diplomas will list the degree as a Master of Arts in Liberal Studies. The subject field of approved graduate certificates will be designated on a student transcript. Students pursuing informal focus areas with the Master of Arts in Liberal Studies will not have these subject designations on their transcript.

Admission to the Program

Individuals admitted to the program must have a baccalaureate or equivalent degree and mature academic interests. A minimum undergraduate 3.25 GPA is desirable but can be offset by professional and career accomplishments outside academe.

Individuals applying for admission should submit, in addition to the UMKC application, the following documents:

- a statement of purpose in the form of a personal essay of approximately 1,000 words outlining the focus area the applicant wishes to pursue, reasons for applying, and academic plans and goals. Any applicant who does not choose one of the specific certificate programs or informal focus areas listed for the MALS program should also include a statement indicating interest in designing an individualized plan of study. Such a statement should indicate the proposed area of study and a list of courses offered in the College of Arts and Sciences that would contribute to the area of study.
- a sample of recent academic writing
- 3 letters of recommendation

These documents (except the UMKC application) should be sent directly to the Master of Arts in Liberal Studies Program, UMKC, 5121 Rockhill Road, Cockefair 106, Kansas City, MO 64110.

Prior to submitting an application, prospective students should speak with the program advisor or a member of the faculty who works in their chosen focus area.

The deadline to apply for Fall Semester is March 1. The deadline to apply for Spring Semester is November 1.

Student Learning Outcomes

Students graduating from this program will:

- be able to identify and articulate scholarly problems and questions based on evidence and approaches from more than one disciplinary area at an advanced level.
- be able to gather and organize the primary source materials and raw data needed to answer these questions at an advanced level.
- be able to analyze relevant primary source materials and raw data to create a coherent answer to a scholarly problem or question at an advanced level.
- be able to critically appraise scholarly conversations in multiple fields, create a coherent interpretation, and take a critical position in these debates.
• be able to effectively communicate, at an advanced level, the results of their work via either expository prose or a creative work to an audience that does not specialize in their area of study or share their disciplinary perspective.

Requirements for Completion of the Degree

The degree is a 36 credit hour program. Generally, each participant’s plan of study will consist of three parts.

Program participants begin by enrolling in A&S 5509. On completion of this required three hour introductory seminar, participants earn 30 credit hours based on the study plan associated with their graduate certificate program, informal focus area, or their individual study plan. At the conclusion of the program, individuals enroll in a required three hour capstone seminar, A&S 5520.

Please consult the MALS website at cas.umkc.edu/MALS for advising worksheets for each of the graduate certificate programs and informal focus areas that can be pursued in conjunction with the MALS.

A written thesis is not required, but individuals who wish to complete a thesis project may apply three credit hours of A&S 5540 toward their degree requirements. An individual who works well independently and who has a particular interest that lends itself to detailed research is especially encouraged to consider the thesis option. With the thesis option, the participant will select a faculty advisor who will direct the plan of study and research.

Two courses (6 hours) may be taken from another school at the university outside of the College of Arts and Sciences. No more than 12 hours at the 400-level (or 300-level when permitted by the department) may be applied to the plan of study.

Relationship of the MALS to Interdisciplinary Doctoral Degrees

The College of Arts and Sciences has a strong tradition of interdisciplinary studies at both the baccalaureate and doctoral levels.

The Master of Arts in Liberal Studies degree continues the tradition of interdisciplinary work in the college at the intermediate level between baccalaureate and doctoral work. In a few cases, students completing this degree may find the transition to doctoral work as the appropriate next step. However, students should recognize that the degree is not designed to provide students in the program with specific subject skills usually associated with targeted career objectives in traditional research areas.

Students interested in coordinating their M.A. in Liberal Studies coursework with future doctoral work at UMKC are strongly encouraged to make this intent known at the outset of their work. Without initial planning conducted with a committee of doctoral faculty, a student’s master’s coursework may not be appropriate to later doctoral studies.

Dr. Larson Powell
Director, Humanities Consortium
Department of Foreign Languages & Literatures
phone: 816-235-1316

Student Learning Outcomes
Students graduating from this program will:

• Knowledge: Mastery of knowledge of the “big questions” of the Holocaust and genocide studies.
• Interconnectedness & Contextualization: Understanding the scope of the Holocaust and genocide studies and the relations between aspects of it.
• Research: The ability to conduct interdisciplinary research in Holocaust and genocide studies.
• Interdisciplinarity: The ability to think about the Holocaust and genocide studies across disciplinary lines.
• Analytic & Creative Synthesis: Ability to analyze and synthesize evidence about the Holocaust and genocide studies.
• Communication: The ability to communicate clearly and effectively to diverse audiences.
• Application & Relevance: The ability to apply what is learned about the Holocaust and genocide studies in diverse contemporary ethical and political contexts.

Curriculum
• Total Credit Hours: 18 credit hours, at least 9 of which must be taken at UMKC.
• Introductory course: This required course introduces students to the “big questions” of Holocaust and genocide studies and to interdisciplinary scholarship. It will be offered each Spring semester and taught by rotating consortium faculty. Students register for this course through the home institutions of the faculty teaching that semester. It is expected that the introductory course is the first course students take in the certificate program. If their enrollment begins in a semester when the course is not offered, students may petition for an exception through their academic adviser.
• Elective coursework: Students must complete 12 additional credit hours from the list of approved courses at participating institutions. The courses are either classified as Core or Contract courses. A minimum of 6 credit hours of core courses must be completed. Contract courses offer students the flexibility to enroll in a course that addresses the Holocaust and genocide studies indirectly, but require an academic contract between the student and professor stipulating how the course material will meet the learning objectives of the Certificate Program. Only six credit hours of contract courses can be counted toward certificate completion. Certificate Course Contract (http://mchekc.org/admin/wp-content/uploads/2014/04/CertificateCourseContract.pdf).
• Capstone Experience:
  • Capstone Course. Students are required to complete a 3-credit capstone course in the final semester of their certificate curriculum. This capstone course may coincide with the capstone course for a degree program with a delay of some semesters as needed. Or, it may be an independent reading and research course with an approved member of an affiliated institution’s faculty.
• **Capstone Project.** The final product of this course would consist of an interdisciplinary scholarly project. Students are encouraged to develop capstone projects that demonstrate mastery of all of the six student learning objectives for the program.

• **Reflective Essay.** This requirement includes SLO6 “Application & Relevance” in which students demonstrate their ability to apply knowledge about Holocaust and genocide studies in diverse contemporary ethical and political contexts. If their project does not directly address this learning objective, then the student will be asked to complete an brief reflective essay, submitted in addition to the capstone project, in which they consider what they have learned across the curriculum about the HGS’s application and relevance. It is not required if the capstone project demonstrates mastery of SLO6.

• **Transcripts:** In order to receive credit for a course taken at a consortium institution, students are responsible for asking the registrars at the institutions where the courses were taken to send a transcript to the UMKC registrar (http://www.umkc.edu/registrar). Students must provide transcripts to the program coordinator at MCHE from all institutions at which they took courses.

• **Transferring credits:** For Certificate purposes, students may transfer only courses approved by the Consortium faculty. If students are also enrolled in a regular degree program at UMKC, courses approved for the Certificate may not be transferred in addition to courses allowed for transfer for a degree. Approval for a Certificate transfer does not guarantee approval for any degree: that decision depends on the guidelines for the relevant degree program.
Bachelor of Arts / Graduate Certificate in Holocaust Studies - Dual Degree

This program combines a Bachelor’s degree with the Graduate Certificate in Holocaust Studies. It enables students pursuing a Bachelor’s degree to apply 6 hours of credit from BA coursework at the 300 or 400 level to the Graduate Certificate. All other requirements for both the Bachelor’s degree and the Graduate Certificate, including the requirement that at least 9 hours of Certificate coursework be taken at UMKC, remain. (The full description of the Certificate can be found on the Holocaust Studies website: http://cas2.umkc.edu/holocaust/program.asp.)

Admissions Requirements:

• Status:
  enrolled and in good academic standing at UMKC
  completed 60 credits towards their undergraduate degree
  completed 30 at UMKC
• GPA: 3.0 or higher
• Demonstration of a command of the basic facts of the Holocaust. Students may do so through:
  documented evidence of a prolonged engagement in the teaching of the Holocaust;
  a grade of B or higher taken at the 300-level or higher in Holocaust coursework; OR
  a grade of A- of higher in the course Anch 214: ECHI: Nazi-Occupied Europe and the Holocaust

Since the Graduate Certificate is supported by an interuniversity Consortium of faculty, the admissions process involves both the UMKC and the Midwest Center for Holocaust Education. Students interested in admissions should contact Dr. Andrew Stuart Bergerson, bergersona@umkc.edu, 816-235-5728, who is the UMKC advisor for the Certificate.

Lecturers:
Kristin Kathman, Stephanie Van Rhein

Department Description
The Department of Mathematics and Statistics offers coursework leading to the Bachelor of Arts and Bachelor of Science degrees in Mathematics. At the graduate level, the department offers a Master of Science degree in Mathematics and a Master of Science degree in Statistics, and participates in the UMKC School of Graduate Studies Interdisciplinary Ph.D. program. Qualified students can select Mathematics as the coordinating unit or a co-discipline when applying for admission or preparing their plans of study. See the School of Graduate Studies (p. 1281) section in the Graduate Catalog for more information about the Ph.D. program.

These programs are designed to develop the student’s own knowledge of mathematics or statistics, and to provide the tools and understanding necessary for the study of other scientific and quantitative fields.

The Department of Mathematics and Statistics has an institutional membership in the American Mathematical Society.

Advising System
Advising is on an individual basis with senior mathematics faculty members. Appointments for advising may be made by contacting the department, the undergraduate advisor, the principal graduate advisor, or the interdisciplinary Ph.D. coordinator.

Library Resources
In addition to UMKC’s Miller Nichols Library, the department has full access to the holdings and services of the Linda Hall Library of Science and Technology (http://www.lindahall.org), a privately endowed institution of international prominence. The Linda Hall Library subscribes to more than 700 mathematics journals and maintains a large and growing collection of mathematics books.

Faculty
Majid Bani-Yaghoub Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=bani); assistant professor of mathematics; Ph.D. (Carleton University, Canada).
Richard Delaware Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=delaware); teaching professor of mathematics; B.S. (Santa Clara University); M.A. (University of Kansas); Ph.D. (University of Missouri - Kansas City).

Eric J. Hall Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=hall); associate professor of mathematics; B.A. (Carleton College); Ph.D. (University of Michigan).

Kristin Kathman Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=van%20rhein); lecturer in mathematics; B.S., M.S. (University of Missouri - Kansas City).

Xianping Li Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=li); assistant professor of mathematics; Ph.D. (University of Kansas).

Kamel Rekab Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=rekab); professor of statistics; M.S. (Stanford University); Ph.D. (University of Michigan).

Noah H. Rhee Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=rhee); professor of mathematics; B.S. (Seoul National University, South Korea); Ph.D. (Michigan State University).

Liana Sega Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=seg); associate professor of mathematics; B.S. (University of Bucharest, Romania); Ph.D. (Purdue University).

Stephanie Van Rhein Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=van%20rhein); lecturer in mathematics; B.S., M.S. (University of Missouri University of Science and Technology).

Hristo D. Voulov Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=voulov); associate professor of mathematics; M.S., Ph.D. (Sofia University, Bulgaria).

Yong Zeng Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=zeng); professor of statistics; B.S. (Fudan University, China); M.S. (University of Georgia); Ph.D. (University of Wisconsin - Madison).

1  Associate or Adjunct Graduate Faculty
2  Members of UMKC Graduate Faculty
3  Members of UMKC Doctoral Faculty

Undergraduate

Undergraduate Degrees:
• Bachelor of Arts in Mathematics and Statistics (p. 448)
• Bachelor of Science in Mathematics and Statistics (p. 451)
• Minor in Mathematics (p. 454)
• Teacher Certification in Mathematics (p. 455)

Graduate

Graduate Degrees:
• Master of Science in Mathematics (p. 456)
• Master of Science in Statistics (p. 458)
• Interdisciplinary Ph.D. in Mathematics (p. 464)

Mathematics Courses
MATH 100 Intermediate Algebra Credits: 3
Numbers and their arithmetic properties, introduction to elementary algebra including exponents and radicals, elementary geometry and formulas, linear and quadratic functions and their graphs, and equations with two unknowns. Grades are not counted toward GPA. Does not fulfill Arts and Sciences mathematics requirement. Does not count toward graduation.
MATH 109 Precalculus Algebra Fundamentals Credits: 2
This course is required for students not meeting full placement requirements for MATH 110 (Precalculus Algebra) in order to concurrently enroll in MATH 110. Fundamental topics and skills that are necessary for success in MATH 110 will be developed in close alignment with the material covered in MATH 110 over the course of the semester. Students enrolling in this co-requisite course must remain enrolled in both courses for the semester. Students will not be permitted to withdraw from one of the courses (either MATH 109 and MATH 110) and not the other. Grades are not counted toward GPA. Does not fulfill Arts and Sciences mathematics requirement. Does not count toward graduation.

Prerequisites: ALEKS assessment score of 35 or higher, or ACT mathematics score of 18 or higher.

Co-requisites: MATH 110.

MATH 110 Precalculus Algebra Credits: 3
Functions and graphs. Inverses, compositions, and transformation of functions. Solving equations, systems of equations, and inequalities. Linear, quadratic, polynomial, and rational functions. Exponential and logarithm functions and applications.

Prerequisite: Grade of B- or higher in MATH 100, ALEKS assessment score of 51 or higher, ACT mathematics score of 22 or higher, or concurrent enrollment in MATH 109.

MATH 110 - MOTR MATH 130: Pre-Calculus Algebra

MATH 116 Mathematics For Liberal Arts Credits: 3
A survey of elementary mathematics covering such topics as: logic, sets, counting methods, introduction to probability theory, introductory statistics, plane and coordinate geometry. The course will emphasize mathematical concepts and does not require the level of computational skill of College Algebra. Topics from the history of mathematics will be presented as well as the influence of mathematics on a variety of disciplines. Recommended preparation: Three units of high school mathematics Algebra I and higher.

MATH 116 - MOTR MATH 120: Mathematical Reasoning Modeling

MATH 120 Precalculus Credits: 5
Functions and graphs. Inverses, compositions, and transformation of functions. Solving equations and systems of equations, and inequalities. Linear, quadratic, polynomial, and rational functions. Exponential and logarithm functions and applications. Trigonometric functions, trigonometric identities, triangles. Credit will be given for either MATH 110 or MATH 120, and for either MATH 120 or MATH 125.

Prerequisite: Grade of B- or higher in MATH 100, ALEKS assessment score of 56 or higher, or ACT mathematics score of 24 or higher.

MATH 120 - MOTR MATH 150: Pre-Calculus

MATH 125 Trigonometry Credits: 2
Trigonometric functions, trigonometric identities, triangles, and complex numbers. Credit will be given for either MATH 120 or MATH 125.

Prerequisites: MATH 110 (C- or higher), or ALEKS assessment score of 63% or higher.

MATH 125 - MOTR MATH 150: Pre-Calculus

MATH 130 Mathematics for Teachers: Number Systems Credits: 3
Designed for elementary school teachers. A constructive development of the real number system beginning with the system of whole numbers; concepts from elementary number theory; applications of quantitative systems to problems in discrete mathematics. Recommended preparation: High school algebra and geometry.

MATH 140 Mathematics for Teachers: Elementary Geometry Credits: 3
Designed for elementary school teachers. A development from informal geometric concepts to elements of the Euclidean deductive system; groups of congruence transformations, similarity transformations and symmetries; coordinate systems and vectors. Recommended preparation: High school algebra and geometry.

MATH 202 Analytic Geometry Credits: 3
Coordinate plane, lines, circles, the parabola, the ellipse, the hyperbola, transformation of coordinates, equations of the second degree, curve sketching, polar coordinates and parametric equations, complex numbers, vectors and vector operations, and solid analytic geometry.

Prerequisites: MATH 110 (or 4 units of high school math).

Co-requisites: MATH 125.
MATH 204 Mathematics for Teachers: Mathematical Immersion Credits: 3
Prerequisites: MATH 120 or MATH 130 or MATH 140 or any MATH course 200 or above.

MATH 205 Discrete Mathematics Credits: 3

MATH 206 Brief Calculus And Matrix Algebra Credits: 3
Brief review of selected topics in algebra. Introduction to matrix algebra. Introduction to differential calculus and optimization. Applications to problems in business.
Prerequisites: MATH 110 (C- or higher), or ALEKS assessment score of 63% or higher.

MATH 210 Calculus I Credits: 4
Functions and graphs, rational, trigonometric, exponential functions, composite and inverse functions, limits and continuity, differentiation and its applications, integration and its applications.
Prerequisites: MATH 120 (C- or higher), or both MATH 110 and MATH 125 (C- or higher), or ALEKS assessment score of 76% or higher.

MATH 214 Mathematics for Teachers: Algebra Credits: 3
Designed for middle school mathematics teachers. Algebraic reasoning, patterns and inductive reasoning, arithmetic and algebra of integers, algebraic systems, algebraic modeling in geometry, axiomatic mathematics.
Prerequisites: MATH 110, MATH 130, MATH 140 (or MATH 224).

MATH 216 Calculus for Biological Sciences Credits: 4
Introductory calculus designed for students in health and biological sciences. Topics include functions, limits and continuity, trigonometric functions, differentiation and its applications, integration, mathematical modeling, and discrete dynamical systems. Group projects are an integral part of this course. Credit will not be given for both MATH 216 and MATH 210.
Prerequisites: MATH 120 (C- or higher), or both MATH 110 and MATH 125 (C- or higher), or ALEKS assessment score of 76% or higher.

MATH 220 Calculus II Credits: 4
Techniques of integration, applications of the definite integral, improper integrals, sequences and series, power series. Taylor series and convergence, analytic geometry in calculus.
Prerequisites: MATH 210 (or MATH 216).

MATH 224 Mathematics for Teachers: Geometry Credits: 3
Designed for middle school mathematics teachers to connect middle school and college mathematics. Geometric reasoning, Euclidean geometry, congruence, area and volume, similarity, rigid motions and symmetry, vectors and transformations, some other geometries. Recommended Preparation: MATH 140.
Prerequisites: MATH 110, MATH 130.

MATH 226 Biomath II: Statistics and Modeling Credits: 3
Calculus-based statistics and modeling designed for students in the biological sciences or mathematics majors interested in the application of mathematics to these sciences. Topics include introductory ordinary differential equations, continuous dynamical systems, stochastic modeling, elementary probability, random variables, binomial distributions, Poisson distributions, normal distributions, point estimation, confidence intervals, hypothesis testing, ANOVA, and regression. Credit will be given for either MATH 226 or STAT 235 (or STAT 236).
Prerequisites: MATH 210 (or MATH 216).

MATH 244 Mathematics for Teachers: Calculus Credits: 4
Prerequisites: MATH 120 (or four units of high school mathematics including Trigonometry, or MATH 110 and MATH 125).

MATH 250 Calculus III Credits: 4
Vectors, solid analytic geometry, vector functions and multiple variable functions, partial derivatives, multiple integrals, line and surface integrals with applications.
Prerequisites: MATH 220.

MATH 266 Accelerated Calculus I Credits: 4
An accelerated first course in calculus focusing on application of differential calculus and basic vector and matrix calculations. Enrollment in this course requires permission from the School of Computing and Engineering.
Prerequisites: By Permission after review of: ACT Math 25/four years of high school math including pre-calculus or calculus with an average of B or higher; School of Computing Engineering Student.
MATH 268 Accelerated Calculus II Credits: 3
An accelerated second course in calculus focusing on application of integral calculus, analytic geometry, and vector analysis.
Prerequisites: MATH 266; School of Computing Engineering Student.

MATH 300 Linear Algebra I Credits: 3
Linear equations, matrix algebra, real vector spaces, linear transformations, determinants, eigenvalues and eigenvectors, orthogonality, and applications.
Prerequisites: MATH 250, (or MATH 220 and COMP-SCI 191).

MATH 301 On Solid Ground: Sets and Proof Credits: 3
This course is a transition from procedural mathematics, such as calculus, to advanced mathematics where proofs are the professional language of discourse. It covers basic set theory and logic, relations and functions, and how to analyze, construct, and write clearly reasoned, well-structured elementary proofs using universal techniques. This course satisfies a state requirement for teacher certification.
Prerequisites: MATH 220.

MATH 345 Ordinary Differential Equations Credits: 4
First order equations, linear second order differential equations, Taylor series and power series solutions, Laplace transforms, elementary systems of differential equations, numerical methods, and Fourier series and boundary value problems.
Prerequisites: MATH 250.

MATH 402 Advanced Analysis I Credits: 3
Numerical sequences and completeness of the real numbers, numerical series, continuity and differentiation of real-valued functions of a real variable, integration and the fundamental theorem of calculus.
Prerequisites: MATH 250, MATH 301.

MATH 406 Partial Differential Equations Credits: 3
Separation of variables, boundary value problems, Fourier series and integrals, wave equation, heat equation, potential equation, problems in several dimensions, and Bessel's differential equation.
Prerequisites: MATH 345 (or E&C-ENGR 241, or MEC-ENGR 272).

MATH 407 Introduction to Complex Variables Credits: 3
Complex numbers, complex differentiation, elementary functions, contour integration and the Cauchy integral formula, Taylor series and Laurent series, residue calculus and its applications, and special functions.
Prerequisites: MATH 250, a 300-level MATH course (or E&C-ENGR 241, or MEC-ENGR 272).

MATH 410 Modern Algebra Credits: 3
Groups, rings, integral domains, fields and polynomial rings.
Prerequisites: MATH 300, MATH 301.

MATH 412 Advanced Analysis II Credits: 3
Topics in advanced analysis such as sequences and series of functions, power series and elementary functions, Fourier series, metric spaces, analysis in Euclidean spaces, or advanced integration.
Prerequisites: MATH 402.

MATH 414 Mathematics for Secondary Teachers: Algebra and Analysis Credits: 3
Designed for secondary-school teachers. Examine high school mathematics from a higher point of view. Real and complex numbers, functions, algebraic structures of equations, integers and polynomials, number system structures; analyses of alternate approaches, extensions, and applications of mathematical ideas, discussion of historical contexts and connections between ideas that may have been studied separately in different courses, relationships of ideas studied in secondary-school to those students may encounter in later study. When taken for graduate credit as MATH 5514, an extra project is required.
Prerequisites: MATH 300, MATH 301.

MATH 420 Linear Algebra II Credits: 3
The topics of MATH 300 are expanded and presented in the context of vector spaces over a field, with rigorous justification. Vector spaces and linear transformations, determinants, eigenvalues and eigenvectors, inner product spaces and orthogonality.
Prerequisites: MATH 300, MATH 301.

MATH 424 Mathematics for Secondary Teachers: Geometry Credits: 3
Designed for secondary-school teachers. Examine high school mathematics from a higher point of view. Congruence, distance and similarity, trigonometry, area and volume, axiomatics and Euclidean geometry; analyses of alternate approaches, extensions, and applications of mathematical ideas, discussion of historical contexts and connections between ideas that may have been studied separately in different courses, relationships of ideas studied in secondary-school to those students may encounter in later study. When taken for graduate credit as MATH 5524, an extra project is required.
Prerequisites: MATH 300, MATH 301.
MATH 430 Numerical Analysis I Credits: 3
Error analysis, solutions of equations of one variable, interpolation and polynomial approximation, numerical integration and differentiation, numerical solutions of initial-value problems.
Prerequisites: MATH 250 (or E&C-ENGR 241, or MEC-ENGR 272).

MATH 434 Introduction to Scientific Computing Credits: 3
This course provides a comprehensive introduction to numerical methods used in scientific computing. It focuses on solving math models arising from other fields such as physics, engineering, biology, and economics. The topics include mathematical foundations, numerical linear algebra, finite difference method, finite volume method, finite element method, and parallel computing.
Prerequisites: MATH 300 or COMP-SCI 393.

MATH 440 Numerical Analysis II Credits: 3
Direct and iterative methods for solving linear systems, introduction to approximation theory, approximating eigenvalues and eigenvectors, solution of systems of nonlinear equations.
Prerequisites: MATH 300, MATH 430.

MATH 444 Modern Geometries Credits: 3
Modern axiomatic development of Euclidean geometry and neutral geometry, followed by examination of non-Euclidean geometries; geometric transformations, and other geometries as time permits. Satisfies a state requirement for teacher certification.
Prerequisites: MATH 300, MATH 301.

MATH 464WI History Of Mathematics Credits: 3
Topics in the History of Mathematics from Babylonian times through the invention and consolidation of Calculus, with some modern subjects as time permits. The course will emphasize proofs, ideas, and arguments as given in original sources (in translation) from around the world and throughout history. In this writing intensive course, one or two term papers, in addition to several short essays and historical proof explications are required. A field trip will be taken to the Linda Hall Library Rare Book Room. This course is of special interest to secondary mathematics teachers as well as mathematics majors.
Prerequisites: MATH 301, RooWriter.

MATH 469 Mathematical Modeling Credits: 3
This course introduces analytical and numerical techniques for modeling and analysis of real-world problems in areas such as economics, engineering, biology and physics. It is designed for students with basic knowledge of linear algebra and differential equations. Interdisciplinary modeling projects are the integral part of this course.
Prerequisites: MATH 300 (or COMP-SCI 393) and MATH 345 (or MEC-ENGR 272).

MATH 490 Special Topics Credits: 1-3
Selected topics in various fields of mathematics. May be repeated for credit when the topic varies.

MATH 496 Internship/Practical Training in Mathematics or Statistics Credits: 1-3
This course provides an internship or other practical training arrangement using mathematics or statistics in an industrial, academic or other professional setting. Department approval of internship experience or practical experience required. Repeatable with up to a combined 3 credits toward the major.
Prerequisites: MATH 250.

MATH 5509 General Algebra I Credits: 3
Groups, rings, modules, homology, fields and Galois theory, valuations, matrices, and multilinear algebra. Continued in MATH 5519.
Prerequisites: MATH 410, MATH 420.

MATH 5510 Complex Variables I Credits: 3
The group of linear fractional transformations, complex integration, Cauchy's theorem, the maximum modulus theorem, analytic continuation, Riemann surfaces. Continued in MATH 5520.
Prerequisites: MATH 402, MATH 407.

MATH 5513 Real Variables I Credits: 3
Prerequisites: MATH 402, MATH 412.

MATH 5514 Mathematics for Secondary Teachers: Algebra and Analysis Credits: 3
Designed for secondary-school teachers. Examine high school mathematics from a higher point of view. Real and complex numbers, functions, algebraic structures of equations, integers and polynomials, number system structures; analyses of alternate approaches, extensions and applications of mathematical ideas, discussion of historical contexts and connections between ideas that may have been studied separately in different courses, relationships of ideas studied in secondary-school to those students may encounter in later study. When taken for graduate credit as Math 5514, an extra project is required.
Prerequisites: MATH 300.
MATH 5517 Matrix Theory I Credits: 3
Unitary matrices, normal matrices, Jordan canonical form, nonnegative matrices and their applications, the symmetric eigenvalue problem.
Prerequisites: MATH 420.

MATH 5519 General Algebra II Credits: 3
Prerequisites: MATH 5509.

MATH 5520 Complex Variables II Credits: 3
Prerequisites: MATH 5510.

MATH 5521 Differential Equations Credits: 3
This course offers an introduction to the qualitative theory and applications of ordinary differential equations (ODE). The presentation of the course will be a blend of fundamental theory and examples. The basic results will be proved rigorously and more advanced results will be only illustrated by examples that demonstrate when and how they may be applied.
Prerequisites: MATH 345, MATH 412, MATH 420.

MATH 5523 Real Variables II Credits: 3
Prerequisites: MATH 5513.

MATH 5524 Mathematics for Secondary Teachers: Geometry Credits: 3
Designed for secondary-school teachers. Examine high school mathematics from a higher point of view. Congruence, distance and similarity, trigonometry, area and volume, axiomatics and Euclidean geometry; analyses of alternate approaches, extensions, and applications of mathematical ideas, discussion of historical contexts and connections between ideas that may have been studied separately in different courses, relationships of ideas studied in secondary-school to those students may encounter in later study. When taken for graduate credit as Math 5524, an extra project is required.
Prerequisites: MATH 300, MATH 301.

MATH 5527 Matrix Theory II Credits: 3
Prerequisites: MATH 5517.

MATH 5532 Advanced Numerical Analysis I Credits: 3
Error Analysis, Solving Systems of Linear Equations, Solutions of Nonlinear Equations, the Least-Squares Problems, and Approximating functions. Continued in MATH 5542.
Prerequisites: MATH 402, MATH 420.

MATH 5542 Advanced Numerical Analysis II Credits: 3
Prerequisites: MATH 5532.

MATH 5545 Mathematical Methods In Science And Engineering Credits: 3
This course offers applied linear algebra and Fourier analysis which are indispensable tools in science and engineering. It is designed for beginning graduate students with moderate background in linear algebra and real analysis. Many of the results that are presented in the course will be proved rigorously from mathematical point of view.
Prerequisites: MATH 402, MATH 406, and MATH 420.

MATH 5557 Functional Analysis Credits: 3
Hilbert spaces, linear operators, compact operators, Banach spaces, the Hahn-Banach theorem, the open mapping and closed graph theorems, the principle of uniform boundedness, locally convex spaces.
Prerequisites: MATH 402 and MATH 420.

MATH 5575 Stochastic Calculus for Finance Credits: 3
This course presents the basic idea and theory of stochastic calculus with the focus on the applications to finance. Topics include Brownian motion, Itô integral, Itô formula, Black-Scholes equation and formula, risk-neutral pricing, connections with partial differential equations, exotic options, American derivative securities, and term structure models for interest rates.
Prerequisites: MATH 402 and STAT 436.

MATH 5590 Special Topics Credits: 1-3
Selected topics in various fields of mathematics. May be repeated for credit when the topic varies.

MATH 5699 Research And Thesis Credits: 1-16
Doctoral dissertation.

MATH 5899 Required Graduate Enrollment Credit: 1
Statistics Courses

STAT 235 Elementary Statistics Credits: 3
An introduction to descriptive and inferential statistics. Organization and presentation of data, averages and variations, elementary probability, random variables, special discrete distributions, normal distributions, sampling distributions, point estimation, confidence intervals, and hypothesis testing.
Prerequisites: MATH 110 (C- or higher), or ALEKS assessment score of 61% or higher.

STAT 436 Introduction To Mathematical Statistics I Credits: 3
Sample space, conditional probability, random variables, probability distribution functions and probability densities; transformations of random variables, mathematical expectation, conditional distributions and expectations, laws of large numbers and limit theorems, applications.
Prerequisites: MATH 250.

STAT 441 Introduction To Mathematical Statistics II Credits: 3
Sampling Distributions; point estimation; internal estimation; hypothesis testing; analysis of variance; nonparametric methods; statistical software applications; topics in Applied Statistics.
Prerequisites: STAT 436.

STAT 496 Internship/Practical Training in Mathematics or Statistics Credits: 1-3
This course provides an internship or other practical training arrangement using mathematics or statistics in an industrial, academic or other professional setting. Department approval of internship experience or practical experience required. Repeatable with up to a combined 3 credits toward the major.
Prerequisites: MATH 250.

STAT 5501 Statistical Design Of Experiments Credits: 3
This course is designed to present a variety of experimental design techniques to students with moderate mathematical and statistical background. The course includes three major components: efficient factorial designs, linear and quadratic process optimization of the location parameter, and variability reduction. Students will be trained to use the SPSS statistical software package.
Prerequisites: STAT 436.

STAT 5537 Mathematical Statistics I Credits: 3
Prerequisites: MATH 402.

STAT 5547 Mathematical Statistics II Credits: 3
Continuation of STAT 5537.

STAT 5551 Applied Statistical Analysis Credits: 3
Methods for analyzing data from experiments and observational studies; design-based and model-based inferences; model assessment; ANOVA; power analysis; SAS procedures.
Prerequisites: STAT 441.

STAT 5561 Time Series Analysis Credits: 3
This course is intended to present the basis knowledge (including models, methods and concepts) of time series analysis to students with a good background in intermediate mathematical statistics. Some elementary knowledge of basic linear regression analysis would be helpful but not necessary. The presentation will be balanced between theory and data analysis, with sufficient theory to understand the basis of methods and a broad variety of models and many real data examples. Case studies will be drawn from business and economics, network traffic and meteorology, and data will be analyzed by students using existing computer programs (SAS, Minitab and R). Students are also expected to understand proper use and limits of time series models.
Prerequisites: STAT 441.

STAT 5565 Regression Analysis Credits: 3
Simple linear regression; multiple linear regression; correlation analysis; model selections; checking assumptions; regression diagnostics; combating multi-collinearity; nonlinear regression.
Prerequisites: STAT 441.

STAT 5572 Multivariate Analysis Credits: 3
Random vectors; multivariate normal distributions; Hotelling’s T-square distribution; Wishart distribution; inferences on one mean vector; MANOVA; inferences on covariance matrices; profile analysis.
Prerequisites: MATH 420 and STAT 441.
STAT 5575 Stochastic Calculus for Finance Credits: 3
This course presents the basic idea and theory of stochastic calculus with the focus on the applications to finance. Topics include Brownian motion, Ito integral, Ito formula, Black-Scholes equation and formula, risk-neutral pricing, connections with partial differential equations, exotic options, American derivative securities, and term structure models for interest rates.
Prerequisites: MATH 402 and STAT 436.

Cross Listings: MATH 5575.

STAT 5576 Probability Credits: 3
Existence and extension of measure, random variable, expectation and its properties, types of convergence, law of large numbers, weak convergence, central limit theorem, and martingale.
Prerequisites: STAT 436 and MATH 5513.

STAT 5578 Advanced Mathematical Statistics Credits: 3
Exponential and location families, principles of data reduction, asymptotic distributions, advanced theory of estimation and hypothesis testing.
Prerequisites: STAT 5547.

STAT 5588 Theory of Linear Model Credits: 3
This course covers vector space, full rank linear model, general inverse, estimation under linear constraints interval estimation, hypothesis testing, distributions of quadratic forms, general distribution theory, estimability, Gauss-Markov theorem, Best Linear Unbiased Estimation (BLUE), regression on dummy variables, estimation of variance components, Scheffe and Turkey intervals, and non-full rank linear model.
Prerequisites: MATH 420, STAT 5537, and STAT 5565.

STAT 5590 Special Topics Credits: 1-3
Selected topics in various fields of mathematics. May be repeated for credit when the topic varies.
Bachelor of Arts: Mathematics and Statistics

University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes
Students graduating from this program will:

• Demonstrate competence with the formal language and structure of mathematical proofs by explicating and applying concepts, theorems, or standard proofs, providing and/or analyzing relevant examples and counterexamples, and demonstrating the reasoning skills necessary to construct logically correct and well-structured proofs.

• Demonstrate competence with the formal language and structure of applied mathematical or statistical theory by synthesizing and applying concepts and techniques, demonstrating the reasoning skills necessary to construct logically correct, well-structured mathematical models or statistical analyses, and explaining both how applied mathematical or statistical theory gives rise to commonly used techniques, and the assumptions behind those techniques.

• Demonstrate the ability to recognize and understand the relationship between scientific concepts and their mathematical representations by analyzing quantitative information from such relationships between scientific concepts and their mathematical representations, implementing analytical or numerical techniques and computations for a given task, and demonstrating the ability to carry out those computations.

• Demonstrate qualitative skills, such as the ability to translate real-world problems into mathematical language, choose and apply analytical, statistical, or numerical strategies and techniques, provide exact or approximate solutions or partial solutions to problems as required, and interpret and explain the results and the assumptions behind those results as well as the appropriateness of the techniques chosen.

• Demonstrate the ability to prepare background materials or gather data, write and produce one or more revisions seeking out peer or other reviews, and finally produce a mathematics or statistics long written assignment, a project report including an explanation of how results pertain to the research question, an exposition of mathematics or statistics, or create and give an oral presentation, in all cases tailoring the writing or presentation to a given audience.

'Total credits' in this section indicates the number of General Education Core credit hours that are not met by the degree specific requirements outlined below.

Total Credits

1 See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.

**Constitution Course Requirement**

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

<table>

Total Credits

1 Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

**College of Arts & Sciences Degree Requirements**

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

Total Credits 38

1 At least four of the courses at the 300 level or above must be completed in the Department of Mathematics and Statistics at UMKC.

General Electives

Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

<table>

Minimum GPA: 2.0 (degree and major)

Total Credit Hours: 120

Suggested Plan of Study

Because of the diversity of acceptable programs available, a four-year plan of study is not suggested. Students are cautioned, however, that certain mathematics courses must be taken in the appropriate sequence. Students should consult with a department undergraduate advisor to plan a program of study.

Tools for Planning and Fulfilling Academic Requirements

UMKC’s Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Bachelor of Science in Mathematics and Statistics

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes

Students graduating from this program will:

• Be able to read, write, understand mathematical proofs, and construct mathematical proofs as appropriate.
• Be able to reason with and apply mathematical concepts, principles and methods; analyze and evaluate problems (both theoretical and practical) and plan strategies for their solution.
• Be able to work collaboratively with others on projects requiring mathematical knowledge and input, to function effectively in a professional workplace related to mathematics, or in a graduate program.

General Electives
Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

Minimum GPA: 2.0 (degree and major)
Total Credit Hours: 120

Suggested Plan of Study
Because of the diversity of acceptable programs available, a four-year plan of study is not suggested. Students are cautioned, however, that certain mathematics courses must be taken in the appropriate sequence. Students should consult with a department undergraduate advisor to plan a program of study.

Tools for Planning and Fulfilling Academic Requirements
UMKC's Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC's Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student's officially recorded (Office of Registration and Records) and "what if" plans of study. This evaluation is used to certify all graduation requirements.

UMKC's Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Minor in Mathematics

Student Learning Outcomes

Students graduating from this program will:

• Demonstrate competence with the formal language and structure of mathematical proofs by explicating and applying concepts, theorems, or standard proofs, providing and/or analyzing relevant examples and counterexamples, and demonstrating the reasoning skills necessary to construct logically correct and well-structured proofs.

• Demonstrate competence with the formal language and structure of applied mathematical or statistical theory by synthesizing and applying concepts and techniques, demonstrating the reasoning skills necessary to construct logically correct, well-structured mathematical models or statistical analyses, and explaining both how applied mathematical or statistical theory gives rise to commonly used techniques, and the assumptions behind those techniques.

• Demonstrate the ability to recognize and understand the relationship between scientific concepts and their mathematical representations by analyzing quantitative information from such relationships between scientific concepts and their mathematical representations, implementing analytical or numerical techniques and computations for a given task, and demonstrating the ability to carry out those computations.

• Demonstrate qualitative skills, such as the ability to translate real-world problems into mathematical language, choose and apply analytical, statistical, or numerical strategies and techniques, provide exact or approximate solutions or partial solutions to problems as required, and interpret and explain the results and the assumptions behind those results as well as the appropriateness of the techniques chosen.

• Demonstrate the ability to prepare background materials or gather data, write and produce one or more revisions seeking out peer or other reviews, and finally produce a mathematics or statistics long written assignment, a project report including an explanation of how results pertain to the research question, an exposition of mathematics or statistics, or create and give an oral presentation, in all cases tailoring the writing or presentation to a given audience.

Program Requirements

A minor in mathematics may be obtained by completing a total of 19-20 hours of mathematics courses, including:

<table>

Teacher Certification in Mathematics

Student Learning Outcomes

Students graduating with a B.A. or B.S. degree in Mathematics and Statistics are expected to:

• Be able to read, write, understand mathematical proofs, and construct mathematical proofs as appropriate.
• Be able to reason with and apply mathematical concepts, principles and methods; analyze and evaluate problems (both theoretical and practical) and plan strategies for their solution.
• Be able to work collaboratively with others on projects requiring mathematical knowledge and input, to function effectively in a professional workplace related to mathematics, or in a graduate program.

Program Requirements

Certification as a middle school (grades 5-9) or secondary school (grades 9-12) Mathematics teacher in either Kansas or Missouri requires that a student complete specific requirements both in Mathematics and in the School of Education. A separate application for teacher education is required. For further information, consult the School of Education (p. 1018) section of this catalog or contact the Education Student Services Office at (816) 235-2234.
Master of Science in Mathematics

Student Learning Outcomes

Students graduating from this program will:

- apply logical reasoning skills towards answering theoretical and conceptual questions of the core areas of mathematics, meaning students will be able to explicate concepts, theorems, and standard proofs, provide and/or analyze relevant examples and counterexamples, and construct logically correct and mathematically rigorous proofs.
- demonstrate quantitative skills by implementing analytical or numerical techniques for a given task, as well as initiating concrete computations and approximations, and demonstrate the ability to carry them out.
- demonstrate qualitative skills, such as the ability to translate real-world problems into mathematical formulations, apply analytical or numerical strategies and techniques, provide exact or approximate solutions or partial solutions to problems as appropriate, and interpret and explain the results as well as the assumptions behind those results.
- demonstrate the ability to prepare background materials or gather data, write and produce one or more revisions seeking out peer or other reviews, and finally write a mathematics or statistics project report, an exposition of mathematics, or create and give an oral presentation tailored to a given audience.

Degree Requirements

At least 30 credit hours of approved coursework in the department are required. At least 18 credit hours (of the 30 minimum total credits) must be at the 5500 level in the department. Courses numbered below 400 do not carry graduate credit for mathematics and statistics graduate students. Courses numbered at the 400 level will NOT be credited to the master’s degree if they were previously taken from UMKC or are equivalent (content wise) to courses previously taken from any other accredited colleges/universities for the undergraduate degree. Independent Reading courses (MATH 490 or MATH 5590 or STAT 5590) are not counted toward the degree unless approved for inclusion in the plan of study of the student prior to taking the course. Normally, more than 3 credit hours of Independent Reading will not be counted toward the master’s degree.

In addition to the minimum 30 credit hours of course work, master’s degree seeking students are required to attend five Departmental Graduate Seminars per semester.

Master’s degree candidates are required to submit a Master Plan of Study Form prior to the completion of 15 credit hours of course work.

All master’s degree candidates must take six core courses (all at the 5500 level) as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5509</td>
<td>General Algebra I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5513</td>
<td>Real Variables I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5532</td>
<td>Advanced Numerical Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5510</td>
<td>Complex Variables I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5521</td>
<td>Differential Equations</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5545</td>
<td>Mathematical Methods In Science And Engineering</td>
<td>3</td>
</tr>
</tbody>
</table>

The remaining 12 credit hours can be fulfilled by choosing from the 400 or 5500 level courses offered by the department. For more details about the courses offered, please refer to the departmental Web site (http://cas.umkc.edu/math).

Students have two options for completing the degree: with thesis or without thesis. The thesis option allows students to apply up to 6 Research and Thesis (MATH 5699 or STAT 5699) credit hours towards the 12 elective credit hours. Below are the additional requirements specific to each option.

For students completing a MS degree without thesis: In the last semester before graduation, the student will make an oral presentation, under the supervision of one or two faculty members. This talk will be assessed by an advisory committee.

For students completing a MS degree with thesis: Students are required to write a Master’s thesis under the supervision of a graduate faculty member, give an oral presentation, and defend it before an examining committee. The examining committee is composed of a supervisor (Chair of the examining committee) and at least two other faculty members. All members of the committee need to be graduate or doctoral faculty in the department. The process of completing the thesis requirement is as follows:

- The student is required to submit a two-page proposal to the supervisory committee by the end of the 1st year.
- The student is required to provide a complete thesis to each of the examining committee members before the oral defense.
- Upon receipt of the recommendations from the examining committee members (“Thesis-Pre-Oral-Defense-Form” at http://sgs.umkc.edu/current-students/thesis-dissertation-guidelines/), the oral defense will be scheduled.
• After a successful oral defense followed by required revisions, the examining committee chair will forward the Master's thesis along with other forms ("Thesis-Final-Evaluation-form" and "Preliminary-Approval-by-Supervisory-Committee-Chair-1" found at http://sgs.umkc.edu/current-students/thesis-dissertation-guidelines/) to the School of Graduate Studies.

A student pursuing the thesis option can enroll in Research and Thesis credit hours (MATH 5699 or STAT 5699). Such classes will be counted towards the degree only if they are approved for the plan of study of the student prior to taking the class. No more than 6 credit hours combined of approved Research and Thesis and Independent Reading can be counted towards the degree.

Admission requirements

• Applicants need to hold a bachelors's degree from an accredited college or university, with a satisfactory GPA.
• If the applicant's degree is not in Mathematics or Statistics (or equivalent), then the applicant must have taken Calculus I, II, and III and at least three other Mathematics or Statistics classes beyond Calculus III, with satisfactory grades.
• Applicants need to include with their application materials a valid GRE general test score and a one page narrative outlining educational goals. Optional letters of recommendation should be sent directly to the department Principal Graduate Advisor.
• International applicants need to satisfy the requirements of the International Students Affairs Office (http://www.umkc.edu/isao), including those on TOEFL or IELTS scores.

Applicants who want to apply for a GTA position in the department need to fill out the GTA application form (available on the department web site http://cas.umkc.edu/mathematics) and have three letters of recommendation, accompanied by the "Evaluation of fitness for graduate studies" form sent directly to the department Principal Graduate Advisor.
Master of Science in Statistics

Student Learning Outcomes

Students graduating from this program will:

• demonstrate an understanding of basic statistical theory by being able to synthesize statistical concepts, assumptions, and theorems, and be able to explain how such theory gives rise to the common techniques of statistical analysis.

• will demonstrate the ability to communicate the results of a statistical analysis to a non-statistician both in writing and verbally, and to explain how these results pertain to the research question at hand.

• will exhibit the ability to decide on a statistical technique to apply to a given situation, demonstrate the ability to carry out that technique, either analytically or through the use of statistical software, and demonstrate the ability to assess the appropriateness of the technique that was applied.

Degree Requirements

At least 30 credit hours of approved coursework in the department are required. At least 18 credit hours (of the 30 minimum total credits) must be at the 5500 level in the department. Courses numbered below 400 do not carry graduate credit for mathematics and statistics graduate students. Courses numbered at the 400 level will NOT be credited to the master's degree if they were previously taken from UMKC or are equivalent (content wise) to courses previously taken from any other accredited colleges/universities for the undergraduate degree. Independent Reading courses (MATH 490 or MATH 5590 or STAT 5590) are not counted toward the degree unless approved for inclusion in the plan of study of the student prior to taking the course. Normally, more than 3 credit hours of Independent Reading will not be counted toward the master's degree.

In addition to the minimum 30 credit hours of course work, master's degree seeking students are required to attend five Departmental Graduate Seminars per semester.

Master's degree candidates are required to submit a Master Plan of Study Form prior to the completion of 15 credit hours of course work.

All master's degree candidates must take six core courses (all at the 5500 level) as follows:

<table>

Bachelor of Science: Mathematics and Statistics / Master of Science: Mathematics - Dual Degree

This program offers students an opportunity to meet the full requirements of the BS and MS in a shorter time period than the separate degree programs. The students may complete a Bachelor of Science degree in Mathematics and Statistics in four years and the Master’s degree in Mathematics the fifth year.

Student Learning Outcomes

Students graduating from this program will:

• read, write, understand mathematical proofs, and construct mathematical proofs as appropriate.
• reason with and apply mathematical concepts, principles and methods; analyze and evaluate problems (both theoretical and practical) and plan strategies for their solution.
• work collaboratively with others on projects requiring mathematical knowledge and input, to function effectively in a professional workplace related to mathematics, or in a graduate program.
• apply logical reasoning skills towards answering theoretical and conceptual questions of the core areas of mathematics, meaning students will be able to explicate concepts, theorems, and standard proofs, provide and/or analyze relevant examples and counterexamples, and construct logically correct and mathematically rigorous proofs.
• demonstrate quantitative skills by implementing analytical or numerical techniques for a given task, as well as initiating concrete computations and approximations, and demonstrate the ability to carry them out.
• demonstrate qualitative skills, such as the ability to translate real-world problems into mathematical formulations, apply analytical or numerical strategies and techniques, provide exact or approximate solutions or partial solutions to problems as appropriate, and interpret and explain the results as well as the assumptions behind those results.
• demonstrate the ability to prepare background materials or gather data, write and produce one or more revisions seeking out peer or other reviews, and finally write a mathematics or statistics project report, an exposition of mathematics, or create and give an oral presentation tailored to a given audience.

Admission Requirements

1. The applicant must be a UMKC undergraduate student who has completed a minimum of 60 cumulative credit hours.
2. The applicant should complete the BS/MS application (http://cas2.umkc.edu/Mathematics/docs/MSBS%20Math%20Dept%20Application%20Form%20rev.doc) form and submit it to both the undergraduate (baniyaghoubm@umkc.edu) and graduate advisors (segal@umkc.edu).
3. The applicant must satisfactorily complete the following courses:
   a. MATH 300 Linear Algebra I
   b. MATH 301 On Solid Ground: Sets and Proof, or any 400-level class that has MATH 301 as a prerequisite. For instance, MATH 410, MATH 420, or MATH 402
   c. MATH 345 Ordinary Differential Equations
4. A minimum overall GPA of 3.0 is required.
5. A minimum GPA of 3.2 in Math/Stat courses is required

B.S. Degree Requirements (total of 33 credit hours)

As listed below, there are 24 credit hours required undergraduate courses.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 210</td>
<td>Calculus I</td>
<td>4</td>

Also a total of 12 credit hours of Math of Stat elective courses at the 400 level or above must completed satisfactorily.

**B.S./M.S. Degree Overlap (up to 9 credit hours)**

Up to 9 credit hours of 400-level Math or Stat courses in the graduate degree can overlap with the courses taken towards satisfying the requirements for the undergraduate degree.
Interdisciplinary Ph.D. in Mathematics

Student Learning Objectives

Students are expected to:

• Have a broad understanding of several branches of mathematics and how they are related. Be able to read and/or listen to documents and discussions having mathematical content, with an appropriate level of understanding, and exhibit a high level of mathematical literacy.
• Be able to clearly articulate mathematical information accurately and effectively, using a form, structure and style that suits the purpose, including written and face-to-face presentation.
• Be able to independently acquire further mathematical knowledge without guidance.
• Be prepared for entry into professional schools, doctoral programs, or the job market.

Degree Requirements

UMKC offers an Interdisciplinary Ph.D. program. Students desiring to study at the doctoral level in mathematics must apply to the School of Graduate Studies. Detailed information on the general and discipline-specific requirements (p. 1281) appears in the School of Graduate Studies (p. 1185) section of this catalog. For more details visit the department Web site: http://cas.umkc.edu/math.
**Medieval and Early Modern Studies**

**Program Director:**
Dr. Kathy Krause  
Professor of French  
Dept. of Foreign Languages and Literatures  
krausek@umkc.edu

**Graduate Certificate in Medieval and Early Modern Studies (MEMS)**
The Graduate Certificate in Medieval and Early Modern Studies (MEMS) (p. 466) offers students an interdisciplinary opportunity to focus their studies in early literatures, history, and culture (ca. 500-1500). The certificate not only benefits graduate students pursuing MA, MALS, MFA, and Interdisciplinary Ph.D. degrees in traditional fields, such as Art History, English, History, and Theatre but also provides an opportunity for education professionals to pursue further study in the pre-modern period as professional development and enhancement.

Certificate Program Requirements (p. 466)

**Minor in Medieval and Early Modern Studies (MEMS)**
Undergraduate students in any major in the College of Arts and Sciences may seek an interdisciplinary minor in Medieval and Early Modern Studies (MEMS). The minor offers students an interdisciplinary opportunity to focus their studies in early literatures, history, and culture (ca. 500-1500). The minor may be integrated with the Bachelor of Liberal Arts (BLA) degree. Students complete an 18-credit program of study, with upper-level courses from at least two disciplines. Completion of the Medieval and Early Modern Studies minor is recorded on the student's transcript. Students must declare their intention to pursue the minor on the "Declaration of Major" form and should meet with the MEMS program director. No more than 6 credits may be transferred from another institution.

For a list of classes fulfilling the Medieval and Early Modern Studies Minor requirements each semester, please consult the MEMS program director. Courses in Medieval and Early Modern Studies are found primarily in College of Arts and Sciences, but there are also courses offered in the Conservatory of Music and Dance. Courses that fulfill the requirements of the minor are those which focus on the medieval and early modern periods, as well as directed readings courses or independent studies courses with affiliated faculty. Special topics courses and similar offerings can be approved on a case-by-case basis by the program director.

Minor Program Requirements (p. 468)
Graduate Certificate in Medieval and Early Modern Studies

Graduate Certificate in Medieval and Early Modern Studies (MEMS)

The Graduate Certificate in Medieval and Early Modern Studies (MEMS) offers students an interdisciplinary opportunity to focus their studies in early literatures, history, and culture (ca. 500-1500). The certificate not only benefits graduate students pursuing MA, MALS, MFA, and Interdisciplinary Ph.D. degrees in traditional fields, such as Art History, English, History, and Theatre but also provides an opportunity for education professionals to pursue further study in the pre-modern period as professional development and enhancement.

¹ The Capstone Experience or Thesis could be a written academic thesis or another kind of project, as developed by the student and his/her committee.

² The four elective courses must be distributed between at least two academic disciplines (e.g. English and History) and must include at least one three-credit medieval course and one three-credit early modern course.

Strongly recommended: Two Years College-level Proficiency in Latin

Admission Process

Applicants must be admitted to UMKC’s School of Graduate Studies and by a graduate program in the College of Arts and Sciences. Application materials can be obtained from SGS.

List of Courses for the Graduate Certificate in Medieval and Early Modern Studies

Courses in Medieval and Early Modern Studies are found primarily in the departments of the College of Arts and Sciences, but there is also an opportunity to collaborate with faculty members at the Conservatory of Music and Dance. The courses that would fulfill the requirements of the graduate certificate include graduate colloquia focusing on the pre-modern period, undergraduate/graduate hybrid courses (at the 300-400 level for undergrads and 5500 for graduates), special topics courses, directed readings courses with affiliated faculty, and independent studies courses with affiliated faculty. Courses appropriate to the program will be approved on a case-by-case basis.

Minor in Medieval and Early Modern Studies

Undergraduate students in any major may seek an interdisciplinary minor in Medieval and Early Modern Studies (MEMS). The minor offers students an interdisciplinary opportunity to focus their studies in early literatures, history, and culture (ca. 500-1500). The minor may be integrated with the Bachelor of Liberal Arts (BLA) degree. Students complete an 18-credit program of study, with upper-level courses from at least two disciplines. Completion of the Medieval and Early Modern Studies minor is recorded on the student’s transcript. Students must declare their intention to pursue the minor on the "Declaration of Major" form and should meet with the MEMS program director. No more than 6 credits may be transferred from another institution.

For a list of classes fulfilling the Medieval and Early Modern Studies Minor requirements each semester, please consult the MEMS program director. Courses in Medieval and Early Modern Studies are found primarily in College of Arts and Sciences, but there are also courses offered in the Conservatory of Music and Dance. Courses that fulfill the requirements of the minor are those which focus on the medieval and early modern periods, as well as directed readings courses or independent studies courses with affiliated faculty. Special topics courses and similar offerings can be approved on a case-by-case basis by the program director.

Student Learning Outcomes

Students graduating from this program will:

- acquire knowledge about the multidisciplinary nature and interdisciplinary methods of Medieval and Early Modern Studies scholarship.
- acquire knowledge about the historical, cultural, social, political and economic contexts of these periods.
- acquire knowledge about issues of diversity, including race, class, and gender expression in these periods.
- have the skills to understand and utilize the theories and methods of the various disciplines that contribute to Medieval and Early Modern Studies.
- have the skills to think critically across multiple disciplines.
- have the skills to identify and articulate scholarly problems based on interaction with primary source materials. (Students who elect to take Latin or other vernacular languages of the medieval period will demonstrate further proficiency working with primary source materials in the original languages.)
- have the skills to communicate the results of their work effectively to others in expository prose, oral presentations, or electronic media such as films or web pages.

Requirements:

Total of at least 18 credits at 300-400 level from approved courses, distributed as follows:

- At least 6 credits from at least two disciplines (ex: 6 cr. English, 12 cr History OR 6 cr. French, 6 cr. Spanish, 6 cr. Philosophy)
- No more than 9 credits may also count for major field
- May replace 3 credits of traditional coursework with 3 credits of independent study/directed readings

Strongly Recommended:

- The equivalent of two years of college-level coursework in Latin (i.e. successfully completion of Latin 221 at UMKC or its equivalent)
- Medieval Methods and Paleography (HISTORY 464)

Program Description
The Army Reserve Officers Training Corps provides college-trained officers for the U.S. Army and Army Reserve. With the exception of a five-week paid summer camp, all instruction is presented on campus. Various field training exercises are conducted to further enrich students' leadership skills.

A commission as a second lieutenant in the U.S. Army, Army Reserve or National Guard is awarded to individuals who have successfully completed the ROTC program and obtained a baccalaureate degree from UMKC. Currently, college graduates who are commissioned through ROTC are placed on either active duty, the reserves or National Guard duty, depending on their desires and on the needs of the service at the time of graduation. The length and type of obligation will depend on the scholarship awarded.

Financial Assistance
Financial assistance is available through the U.S. Army Scholarship Program. Two-, three- and four-year scholarships are awarded each year to selected students who are enrolled or will enroll in the Army ROTC program. The scholarships provide payment of tuition, fees, textbooks and a monthly payment of $350 for freshman, $400 for sophomores, $450 for juniors, $500 for seniors, not to exceed 10 months for each year of the scholarship. Non-scholarship contracted cadets in the advanced portion of ROTC receive monthly payments of $450 for juniors and $500 for seniors, not to exceed 10 months per year for two years. Students are furnished free textbooks for military science classes.

The Simultaneous Membership Program (SMP) allows students to be a member of a National Guard or Reserve units while enrolled in ROTC. Advanced course SMP students receive E5 pay, plus monthly payments of $450 for juniors, and $500 for seniors from ROTC, plus any Active Duty GI Bill entitlement.

ROTC scholarships are also available to graduate students. Please contact the ROTC Scholarship and Enrollment Officer at 816-235-1152 for more information.

Curriculum
All students are eligible to take Military Science 100- and 200-level courses without any military obligation. However, Military Science 300- and 400-level courses are reserved for students who have a signed contract with ROTC to become an officer upon graduation.

Undergraduate
Undergraduate Program:
- Two-Year Instruction (p. 473)

Courses
MIL-SCI 102 Leadership Practicum Credits: 2
Examines leadership in basic tactical and patrolling operations, includes a tactical application exercise and participation in physical fitness conditioning as a course requirement. Students practice leadership according to 16 principles and learn basic soldier skills.
MIL-SCI 112 Leadership Practicum Credits: 2
Examines advanced squad and platoon tactical operations with emphasis on patrolling operations. Topics include: leadership techniques, basic first aid, and problem-solving exercises. A tactical field application exercise and physical fitness conditioning program are included as course requirements. Students perform duties as leaders of small units.
**Co-requisites:** MIL-SCI 126.

MIL-SCI 116 Foundations of Officership Credit: 1
The course introduces the student to issues and competencies that are central to a commissioned officer's responsibilities. These initial lessons establish a framework for understanding officership, leadership, and Army values. Additionally, the semester addresses life skills, including physical fitness and time management. This course is designed to give the student an accurate insight into the Army profession and the officer's role in the Army.
**Co-requisites:** MIL-SCI 102.

MIL-SCI 126 Basic Leadership Credit: 1
This course focuses on leadership theory and decision making. "Life skills" lessons in this course include: problem solving, critical thinking, leadership theory, followership, group interaction, goal setting, and feedback mechanisms. Upon completion of this course, students are prepared to advance to more complex leadership instruction concerning the dynamics of organization. Additionally, students will be increasingly required to demonstrate knowledge of leadership fundamentals and communications (written and oral).
**Co-requisites:** MIL-SCI 112.

MIL-SCI 202 Leadership Practicum Credits: 2
Course examines squad and platoon offensive and defensive operations and leadership procedures in patrolling operations. Includes a tactical application exercise and participation in physical fitness conditioning as a course requirement. Students will perform various leadership roles and present classroom instruction.
**Corequisite:** MIL-SCI 216

MIL-SCI 212 Leadership Practicum Credits: 2
Examines advanced squad and platoon offensive and defensive operations, reaction to obstacles, and leadership procedures in patrolling operations. Includes a tactical application exercise and participation in physical fitness conditioning as a course requirement. Students will perform in various leadership roles and present classroom instruction.
**Co-requisites:** MIL-SCI 226.

MIL-SCI 216 Individual Leadership Series Credits: 2
This course is designed to develop within the student a knowledge of self, self-confidence and individual skills, Through experiential learning activities, students will develop problem-solving and critical-thinking skills, apply communication, feedback and conflict-resolution skills. This course delves into several aspects of communication and leadership theory. The focus of the course is on critical life skills which enable the students future success. The course concludes with a major leadership and problem-solving case study which draws upon previous instruction.
**Prerequisites:** MIL-SCI 126.
**Co-requisites:** MIL-SCI 202.

MIL-SCI 226 Leadership and Teamwork Credits: 2
This course focuses on self-development guided by knowledge of self and group processes. Experiential learning activities are designed to challenge students current beliefs, knowledge and skills. This semester takes the approach of placing students in a wide variety of group exercises designed to emphasize various leadership competencies and insights. The instructor, acting as a facilitator, helps guide student processing of the events to derive the leadership, group dynamics and problem-solving lessons that the exercises offer. Practical life skills are emphasized throughout.
**Prerequisites:** MIL-SCI 216.
**Co-requisites:** MIL-SCI 212.

MIL-SCI 302 Leadership Practicum Credits: 2
Examines squad and platoon offensive and defensive operations, the patrol leader in patrolling operations, and a tactical application exercise. Participation in physical fitness conditioning and a tactical application exercise is required. Students will perform in various leadership roles and present classroom instruction.
**Prerequisites:** MIL-SCI 226.
**Co-requisites:** MIL-SCI 316.
MIL-SCI 312 Leadership Practicum Credits: 2
Familiarization with military firearms; includes assembly and disassembly, tactical communications; and the field artillery request and a tactical application exercise. Participation in physical fitness conditioning and a tactical application exercise is required. Students will perform in various leadership roles and present classroom instruction.

Prerequisites: MIL-SCI 316.

Co-requisites: MIL-SCI 326.

MIL-SCI 316 Leadership and Problem Solving Credits: 3
Following an introduction to the principles of physical fitness and healthy lifestyles, lessons will cover: the Leader Development Program, planning and conducting individual and small unit training, basic tactical principles, reasoning skills and the military-specific application of these skills in the form of the Army’s troop-leading procedures. The course concludes with a detailed examination of officership, which culminates in a five-hour officership case study.

Prerequisites: MIL-SCI 226.

Co-requisites: MIL-SCI 302.

MIL-SCI 326 Leadership and Ethics Credits: 3
Continues the focus from MIL-SCI 316 on doctrinal leadership and tactical operations at the small unit level. Instructional modules include: Army branches, Army leadership, philosophy, dynamics of a group environment, oral and written presentation skills, culminating in instruction in national and Army values and ethics. This critical semester synthesizes the varous components of training, leadership and team building.

Prerequisites: MIL-SCI 316.

Co-requisites: MIL-SCI 312.

MIL-SCI 397 US Military History Credits: 3
This course examines the beginnings of human military history from pre-colonial through the birth of America and into the post-Cold War era. The course focuses on the origins of tactics and techniques and emphasizes the military as an aspect of American society and its role in political, social, economic, and international environments.

MIL-SCI 402 Leadership Practicum Credits: 2
Practical applications in problem analysis, decision making, planning and organization, delegation and control, and development of interpersonal skills required for effective management. Participation in physical fitness conditioning and tactical application exercise is required. Students will perform in various leadership positions and present classroom instruction.

Co-requisites: MIL-SCI 416.

MIL-SCI 412 Leadership Practicum Credits: 2
Practical applications in problem analysis, decision making, planning and organization, delegation and control, and development of interpersonal skills required for effective management includes a tactical application exercise. Participation in physical fitness conditioning is required. Students will perform various leadership roles and conduct classroom instruction.

Co-requisites: MIL-SCI 426.

MIL-SCI 416 Leadership And Management Credits: 3
A series of lessons designed to enable students to make informed career decisions as they prepare for commissioning and service as Second Lieutenants. Classes concentrate on Army operations and training management, and communications and leadership skills, which support the final transition from cadet/student to Lieutenant/leader. Subjects include: The Army Training Management System, coordinating activities with staffs, and counseling skills. At the end of this semester, students should possess the fundamental skills, attributes and abilities to operate as a competent leader in the cadet battalion.

Prerequisites: MIL-SCI 326.

Co-requisites: MIL-SCI 402.

MIL-SCI 426 Officership Credits: 3
A series of lessons that provide a review of the ethical dimensions of leadership, law in leadership, organizing for military operations to include historical case studies, personnel, supply and maintenance administration and management, personal financial planning and entering the service. The semester concludes with a 12-lesson experiential exercise simulating assignment as a new Lieutenant in a unit.

Prerequisites: MIL-SCI 416.

Co-requisites: MIL-SCI 412.

MIL-SCI 497 Leadership And Management Practicum - Directed Study Credits: 1-3
Practical application in military problem analysis, decision making, planning and organization, delegation and control, and development of interpersonal skills required for effective management.
Two-Year Instruction

ROTC instruction usually is presented over the four years of traditional full-time study. This also allows commissioning at the same time graduation requirements are met. However, a two-year program is available for students who were unable to take the first two years of instruction and want to earn a commission.

Department Description
The Department of Philosophy offers a program of study leading to the bachelor of arts degree in philosophy. Courses are offered that develop critical and analytical skills, acquaint students with the history of philosophy and apply philosophy to issues of living.

Students who major in other disciplines can gain special insight into their majors with a philosophy minor. There is a focused minor on bioethics, targeted at students interested in the medical and health care professions.

Career Implications of the Degree
The dynamism of American economic life guarantees that change will be a constant, especially in employment – most people will change careers several times during their working lives. How can you prepare yourself for the inevitable challenges of your career? The most important traits that will serve you well in the twenty-first century are flexibility and discipline, the capacity to quickly assess and understand new environments, to recognize opportunities and the ability to deploy tools that will guarantee success. The study of philosophy will prepare you for the challenges of this evolving world. Studying philosophy provides you with the ability to read complex materials with care and comprehension, to write with clarity and economy and to express your ideas forcefully and succinctly. If you are interested in honing the skills that will allow you to succeed in any endeavor requiring focused thought, if you recognize that the best way to prepare for the challenging world of our knowledge-based economy is to hone your mind and sharpen your intellect, then philosophy is the major for you.

Advising System
Although all faculty members of the department are available for student advising, the department has an undergraduate advisor to whom questions about the philosophy program should be directed.
Special Services

The Philosophy Department is committed to having a strong student community, and has a very active Honors Society, Phi Sigma Tau. Events include everything from inviting guest speakers, movie nights, reading/discussion groups (both with and without faculty members) to socializing, and are open to anyone interested in philosophy. Students are highly encouraged to be active participants in both Phi Sigma Tau and departmental life in general.

Scholarly Presentations

Many visiting philosophers present scholarly papers to the Philosophy Department during the academic year. In addition, organizations such as the Kansas City Area Philosophical Association, the Central States Philosophical Association and other professional societies occasionally meet in Kansas City. Students are cordially invited to attend these activities.

Faculty

Bruce Bubacz Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=bubacz); chair, department of philosophy; curators’ professor of philosophy and professor of law; B.A. (Ripon College); M.S., Ph.D. (University of Washington-Seattle).

Clancy W. Martin Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=martin); professor of philosophy; B.A. (Baylor University); Ph.D. (University of Texas at Austin).

Gwen Nally Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=Nally); assistant professor of philosophy; B.A. (James Madison University); M.A., Ph.D. (University of Virginia).

James Sheppard Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=sheppard); associate professor of philosophy; B.A. (University of Wisconsin-Eau Claire); M.A. (Michigan State University); Ph.D. (Binghamton University).

Adrian Switzer Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=Switzer); associate teaching professor of philosophy; B.A. (Lehigh University); M.A., Ph.D. (Loyola University Chicago).

Wayne Vaught Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=vaught); Dean of Arts & Sciences and professor of philosophy and professor of medicine; B.A. (Georgetown College); M.A. (Baylor University); Ph.D. (University of Tennessee).

1 Members of UMKC Graduate Faculty
2 Members of UMKC Doctoral Faculty

Undergraduate

Undergraduate Degrees:

- Bachelor of Arts: Philosophy (p. 480)
- Minor in Philosophy (p. 484)
- Minor in Bioethics and Medical Humanities (p. 483)

Courses

PHILOS 210 Introduction to Philosophy Credits: 3
An introduction to many of the central problems of philosophy. The various dimensions of philosophy are examined as it related to our relationships with each other, our understanding of our world and our understanding of ourselves. Connections between classical philosophers and contemporary issues are explored as philosophy is considered as a deeply personal and also as a social phenomenon.

PHILOS 210 - MOTR PHIL 100: Introduction to Philosophy

PHILOS 221 Contemporary Moral Issues Credits: 3
This course offers a philosophical examination of ethical issues in contemporary society. Topics for discussion include ethical conflicts arising in business and technology, engineering, healthcare, politics, and the environment. Moral concerns addressed may include reproductive rights and technologies, warfare, capital punishment, pornography, privacy, consumerism, euthanasia, sexuality, and animal welfare.

PHILOS 221 - MOTR PHIL 102: Introduction to Ethics
PHILOS 222 Foundations Of Logic and Scientific Reasoning Credits: 3
This course introduces the basic concepts and methods of modern logic, beginning with premise, inference, conclusion, and argument, with emphasis on understanding and reconstructing complex patterns of reasoning, and analysis and construction of valid arguments.

PHILOS 250 Special Readings In Philosophy Credits: 3
An investigation of readings on a topic, a philosophical movement, or a philosopher to be selected by the instructor. The course is designed to meet the needs of students who are interested in a specific issue or person in philosophy but do not yet possess the necessary background and skill demanded of those who have taken work beyond the introductory course(s) in philosophy.

Prerequisites: PHILOS 210 or PHILOS 222 (or equivalent).

PHILOS 250A Special Readings In Philosophy Credits: 3

PHILOS 310WI Ancient Philosophy Credits: 3
A survey of the central figures of classical philosophy: the pre-Socratics, Socrates, Plato, Aristotle, the Stoics, the Epicureans and other philosophers of antiquity. The contributions of major philosophers to the development of science, religion, and social and political theories are studied.

Prerequisites: PHILOS 210 or PHILOS 222, RooWriter.

PHILOS 320WI History of Modern Philosophy Credits: 3
A survey of the central figures of modern philosophy: Rene Descartes, Baruch Spinoza, G.W. Liebniz, Thomas Hobbes, John Locke, George Berkeley, David Hume and Immanuel Kant. In addition to the philosophical issues of the period, cultural, historical and political matters are considered. A secondary goal is the establishment of the pedigree of contemporary philosophical problems.

Prerequisites: PHILOS 210 or PHILOS 222, RooWriter.

PHILOS 321 Ethics Credits: 3
Attention is given to the nature of ethical ideas and the development and history of ethical theory.

Prerequisites: PHILOS 210, or PHILOS 221, or PHILOS 222.

PHILOS 322 Philosophy of Literature Credits: 3
A close study of the ancient problems at the intersection of philosophy and literature: what sort of truth, if any, do we find in literature? Does literature have ethical content? What makes a literary text beautiful? How do "literary" texts defer from philosophical and other kinds of texts? Should literary texts influence our thinking about politics and other social issues? We will study classic philosophers like Plato, Aristotle, Kierkegaard, and Nietzsche, great literary writers such as Sappho, Dante, Goethe, Dostoevsky, and Rilke, and harder to categorize figures like Freud. The class will include the study of several recent philosophers who worked specifically on the subject of the "philosophy of literature," such as Bakhtin, Benjamin, Lacan, Szondi.

PHILOS 325 Aesthetics Credits: 3
The basic problems of aesthetics are examined, with special emphasis on the character of the work of art, the aesthetic response of the viewer, the creative process of the artist, and the nature of aesthetic criticism. These topics are discussed in light of conflicting aesthetic theories.

Prerequisites: PHILOS 210 or PHILOS 222.

PHILOS 329 American Philosophy Credits: 3
The main trends of American thought are covered, with special emphasis on the philosophies of Peirce, James and Dewey.

Prerequisites: PHILOS 210 or PHILOS 222.

PHILOS 332 Existentialism Credits: 3
A study of the development of existentialism. Selections from the works of such thinkers as Kierkegaard, Nietzsche, Sartre, Heidegger, Camus and other related philosophers are considered. Special attention is devoted to the existential movements in literature, social science and medicine.

Prerequisites: PHILOS 210 or PHILOS 222.

PHILOS 333 Social And Political Philosophy Credits: 3
A consideration of representative views of the place of man in contemporary society. Contributions in psychology, political theory, economics, sociology and anthropology are investigated philosophically with a view toward offering a critical appraisal of the nature of man in the human community.

PHILOS 335 Philosophy Of Mind Credits: 3
A study of problems arising in connection with such topics as mental phenomena, the relation of mind to body, free will and determinism, the self and personal identity, and 'thinking' machines. Classical and contemporary treatments of such concepts as 'mind', 'intention', 'sensation', 'perception', 'stimulus', etc., and their relation to action and behavior are considered.

Prerequisites: PHILOS 210 or PHILOS 222.
PHILOS 337 Philosophy Of History Credits: 3
A discussion of methodological and substantive issues, including the nature of historical explanation, whether history can be a science, and various theories of history such as those of Vico, Hegel, Marx, and Collingwood.
Prerequisites: PHILOS 210 or PHILOS 222.

PHILOS 340 Philosophy Of Law Credits: 3
An analysis of major philosophies of law, including methods of justifying legal systems through natural law, legal positivism, sociological jurisprudence, theology, etc. Contemporary legal theories are critically analyzed.
Prerequisites: PHILOS 210 or PHILOS 222.

PHILOS 370 Environmental Ethics And Policy Credits: 3
Various philosophical approaches to issues such as the value of nature, human obligations to non-human animals, species, ecosystems and future generations; environmental justice; restoration; resource use; environmental politics; and the relation between environmental issues, policy and ethics will be discussed critically.

PHILOS 430 Plato Credits: 3
Selected dialogues of Plato are studied with a view to understanding Plato’s philosophy and its position in the world of Greece and antiquity. Plato’s philosophy is also examined with reference to his place in the Western tradition and in modern philosophy.
Prerequisites: PHILOS 210, PHILOS 222 (or equivalent).

PHILOS 431 Aristotle Credits: 3
Selected portions of Aristotle’s works on logic, metaphysics, science, ethics, politics, and poetics are studied with a view to understanding Aristotle’s philosophy and its position in the world of Greece and antiquity. Aristotle’s philosophy is examined with reference to its place in the Western tradition and in modern philosophy.
Prerequisites: PHILOS 210 or PHILOS 222.

PHILOS 436 Kant Credits: 3
A study of selected writings of Immanuel Kant, with particular emphasis on the epistemological, metaphysical and ethical aspects of Kant’s philosophy; an examination of Kant’s significance within contemporary thought.
Prerequisites: PHILOS 210 or PHILOS 222.

PHILOS 445 20Th-Century Philosophy Credits: 3
A study of the development of philosophy in the 20th-Century, treating such movements as Idealism, Realism, Logical Positivism, Existentialism, Phenomenology, Pragmatism, and Analytic Philosophy.
Prerequisites: PHILOS 210 or PHILOS 222.

PHILOS 448 Recent Ethical Theories Credits: 3
An analysis and investigation of modern and contemporary ethical theories. Among the theories considered are ethical relativity, the emotive theory, utilitarianism, neo Kantianism, and situation ethics.
Prerequisites: PHILOS 321.

PHILOS 451 History and Philosophy of Bioethics Credits: 3
This course will provide an overview of the history of medicine and bioethics from antiquity to the present. In addition to key historical events, the course will provide an overview of foundational ethical theories. The course will explore key events in bioethics and the responses to them in the bioethics literature.

PHILOS 452 Healthcare Law and Policy Credits: 3
This course will focus on basic issues in healthcare law and public policy. Issues such as confidentiality, informed consent, healthcare financing, and end-of-life decision making will be covered. In addition to key historical events, the course will provide an overview of foundational ethical theories. The course will explore key events in bioethics and the responses to them in the bioethics literature.

PHILOS 453 Clinical Ethics and Case Consultation Credits: 3
This course will focus on classic cases in bioethics and will expose students to contemporary trends in healthcare ethics consultation.

PHILOS 480 Selected Topics Credits: 1-3
Each time this course is offered a particular philosopher or particular area of philosophy will be the topic of discussion. The course may be repeated for credit when the topic varies.
Prerequisites: PHILOS 210 or PHILOS 222.
PHILOS 480A Selected Topics Credits: 1-3
PHILOS 480B Selected Topics Credits: 1-3
PHILOS 480E Selected Topics Credits: 1-3
PHILOS 490 Special Topics And Readings Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the instructor. May be repeated for credit when the topic varies.
Prerequisites: Departmental consent.

PHILOS 490B Special Topics And Readings Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies.
Prerequisites: PHILOS 222, PHILOS 310WI, PHILOS 320WI, PHILOS 321.

PHILOS 490F Special Topics and Readings Credits: 1-3
Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies.
Prerequisites: PHILOS 222, PHILOS 310WI, PHILOS 320WI, PHILOS 321.

PHILOS 5521 Managerial And Administrative Decision Making And Ethical Values Credits: 3
Methods of problem definition and decision making in ethics are presented with the goal of providing the student with a matrix for case review. A series of cases is offered that serve to integrate approaches to ethical reflection with management and administrative decision making. Cases are chosen on the basis of topical, curricular and conceptual relevance.

PHILOS 5540 Seminar On Philosophy And Law Credits: 2
An examination from a philosophical perspective of the historical and conceptual relationships present in the evolution, development and analysis of law. Among the systems of analysis examined will be natural law theory, legal positivism and legal realism. Ordinarily the seminar will focus on a specific area of controversy in the law.

PHILOS 5546 Ethics And Government Credits: 3
An examination of ethical issues related to government, with the primary focus on national and local governmental bodies in the United States. Ethics in the executive, legislative and judicial branches are examined. Ethical standards for elected officials and appointed public servants are reviewed. Attempts to "legislate morality" are considered. The course includes a historical review of ethics and government and an analysis of the legal implications of legislation regarding ethics in the executive branch.

PHILOS 5550 History and Philosophy of Bioethics Credits: 3
This course will provide an overview of the history of medicine and bioethics from antiquity to the present. In addition to key historical events, the course will provide an overview of foundational ethical theories. The course will explore key events in bioethics and the responses to them in the bioethics literature.

PHILOS 5551 Healthcare Law and Policy Credits: 3
This course will focus on basic issues in healthcare law and public policy. Issues such as confidentiality, informed consent, healthcare financing, and end-of-life decision making will be covered. In addition to key historical events, the course will provide an overview of foundational ethical theories. The course will explore key events in bioethics and the responses to them in the bioethics literature.

PHILOS 5552 Clinical Ethics and Case Consultation Credits: 3
This course will focus on classic cases in bioethics and will expose students to contemporary trends in healthcare ethics consultation.

PHILOS 5620 Descartes To Hume Credits: 3
PHILOS 5625 Aesthetics Credits: 3
PHILOS 5638 Philosophy Of Biology Credits: 3
PHILOS 5640 Philosophy Of Law Credits: 3
PHILOS 5690 Research In Selected Fields: Graduate Studies Credits: 3
Intensive research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies.

PHILOS H310 Ancient Philosophy - Honors Credits: 3
PHILOS H321 Honors: Introduction To Ethics Credits: 3
PHILOS H332 Existentialism Credits: 3
A study of the development of existentialism. Selections from the works of such thinkers as Kierkegaard, Nietzsche, Sartre, Heidegger, Camus and other related philosophers are considered. Special attention is devoted to the existential movements in literature, social science and medicine.
Prerequisites: PHILOS 210, PHILOS 222 (or equivalent).
PHILOS H333 Social And Political Philosophy Credits: 3
A consideration of representative views of the place of man in contemporary society. Contributions in psychology, political theory, economics, sociology and anthropology are investigated philosophically with a view toward offering a critical appraisal of the nature of man in the human community. No prerequisites.

PHILOS H370 Environmental Ethics And Policy Credits: 3
Various philosophical approaches to issues such as the value of nature, human obligations to non-human animals, species, ecosystems and future generations; environmental justice; restoration; resource use; environmental politics; and the relation between environmental issues, policy and ethics will be discussed critically.
Bachelor of Arts: Philosophy

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes

Students graduating from this program will:

• Have an understanding of the central figures and themes in the history of philosophy.
• Possess the critical reasoning skills necessary to effectively analyze and critique abstract concepts and arguments.
• Be able to develop and defend philosophical arguments, both orally and in writing.
• Be able to apply critical reasoning skills in a wide range of career settings.

‘Total credits’ in this section indicates the number of General Education Core credit hours that are not met by the degree specific requirements outlined below.

Total Credits 21

1 See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”
Courses at UMKC that satisfy this state requirement are:

<table>

</tr>
</tbody>
</table>

Total Credits: 3

1 Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

**College of Arts & Sciences Degree Requirements**

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

¹ ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.

² This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

**Major Requirements**

Philosophy majors are required to complete 30 credit hours of philosophy coursework.

Students must successfully complete the major requirements below with at least 12 hours of the noted upper division (300+) course requirements completed at UMKC.

Total Credits 30

No more than nine credit hours of the 30 required hours may be at the 100- or 200-level. To graduate with a major in philosophy, students must pass all courses included in the 30 credit hours required for the major with a grade of C or higher. This requirement also applies to transfer courses.

General Electives

Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

Code          Title       Credits
General Electives 35

Minimum GPA: 2.0

Total Credit Hours: 120

Tools for Planning and Fulfilling Academic Requirements

UMKC’s Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
## Minor in Bioethics and Medical Humanities

### Requirements for the Minor

Students wishing to complete the interdisciplinary minor in Bioethics and Medical Humanities must complete 18 hours of coursework.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</tbody>
</table>

Total Credits 18

¹ From the approved course list or as approved by the program director.

Students must receive a C or better in all coursework applied toward the minor.
Minor in Philosophy

Student Learning Outcomes

Students graduating from this program will:

- Have an understanding of the central figures and themes in the history of philosophy.
- Possess the critical reasoning skills necessary to effectively analyze and critique abstract concepts and arguments.
- Be able to develop and defend philosophical arguments, both orally and in writing.
- Be able to apply critical reasoning skills in a wide range of career settings.

Program Requirements

Philosophy minors are required to complete a total of 18 credit hours, including:

Total Credits 18

Students must achieve a grade of C or better in a course for it to count toward the minor. Students can work with the departmental advisor to tailor focused minors that coordinate with their major.
Department of Physics and Astronomy

Welcome
These catalog pages are here to guide you regarding the central facts of the degree programs offered by the Department of Physics and Astronomy. To learn about the student activities, faculty members, research programs, resources, and culture of the Department of Physics and Astronomy, please visit our Departmental Web Site (http://cas.umkc.edu/physics).

Degree Programs
Undergraduate
The Department of Physics and Astronomy offers programs of study leading to the Bachelor of Arts (BA) and Bachelor of Science (BS). The Physics BS degree may be taken with an Emphasis in Astronomy. Through coordination with the School of Computing and Engineering, a program of study can be designed for motivated students that results in a Physics BS and an Electrical & Computer Engineering BS double degree within five years. The department also offers minors in Physics or Astronomy and provides courses for students in the School of Education to meet the requirements for Teacher Certification in Physics.

Graduate
The Department of Physics and Astronomy offers a Master of Science (MS) degree in Physics with thesis and non-thesis options through the College of Arts and Sciences. The Department of Physics is an academic discipline that is eligible for full participation in UMKC’s Interdisciplinary Ph.D. (IPhD) program. Qualified students may select Physics as their coordinating unit or co-discipline when applying for admission or preparing their IPhD plan of study. (Visit the School of Graduate Studies (Catalog (p. 1185), Web (http://sgs.umkc.edu)) for details about the IPhD program.)

Student Support
Advising System
Students who wish to major or minor in Physics should seek the advice of the undergraduate advisor, Professor Elizabeth Stoddard (stoddarde@umkc.edu).

Students who wish to minor in Astronomy or pursue the Physics BS with an Emphasis in Astronomy should seek the advice of the undergraduate advisor for astronomy, Professor Dan McIntosh (mcintoshdh@umkc.edu).

Students who wish to pursue graduate studies (MS / IPhD) should seek the advice of the graduate advisor, Professor Paul Rulis (rulisp@umkc.edu).

Tutoring
Tutoring is freely available for undergraduate students taking courses from the department. The tutoring room is #259, Flarsheim Hall. Ask your instructor for the tutoring schedule.

Physics & Astronomy Faculty
Department Chair:
Fred M. Leibsle

Undergraduate Advisor (Physics):
Elizabeth P. Stoddard

Undergraduate Advisor (Astronomy):
Daniel H. McIntosh

Graduate Advisors:
Paul M. Rulis, Mark Brodwin

Curators’ Professors:
Wai-Yim Ching, Michael B. Kruger

Professors:
Da-Ming Zhu, Anthony N. Caruso

Associate Professors:
Fred M. Leibsle (chair), Elizabeth P. Stoddard, Daniel H. McIntosh, Mark Brodwin, Paul Rulis

Associate Teaching Professor:
Robert C. Riggs

Associate Research Professor:
Michelle M. Paquette

Professors Emeriti:
Paul J. Bryant, Richard D. Murphy, Marvin R. Querry (Curators’ Professor), George A. Russell (President Emeritus, University of Missouri), John R. Urani

Associate Professors Emeriti:
James R. Beacham, Richard C. Waring

James R. Beacham; associate professor emeritus of physics; B.S., M.S., Ph.D. (Purdue University).

Mark Brodwin; assistant professor of physics; B.S. (McGill University); M.S., Ph.D. (University of Toronto).

Paul J. Bryant; professor emeritus of physics; B.S. (Rockhurst College); M.S., Ph.D. (St. Louis University).

Anthony Caruso; associate professor of physics; B.A. (Bethany College); M.S., Ph.D. (University of Nebraska).

Wai-Yim Ching; curator’s professor of physics; B.S. (University of Hong Kong); M.S., Ph.D. (Louisiana State University).

Y. C. Jerry Jean; professor of chemistry and physics; B.S. (Taipei Institute of Technology Taiwan); Ph.D. (Marquette University).

Michael B. Kruger; chair, department of physics, and curators’ professor of physics; B.S. (State University of New York-Stony Brook); Ph.D. (University of California-Berkeley).

Fred M. Leibsle; associate professor of physics; B.S. (University of Wisconsin); Ph.D. (University of Illinois).

Daniel H. McIntosh; assistant professor of physics; B.S. (University of California, LA); Ph.D. (University of Arizona).

Richard D. Murphy; professor emeritus of physics; B.A. (University of Colorado); M.A., Ph.D. (University of Minnesota).

Marvin R. Querry; former vice chancellor, academic affairs, and curators’ professor emeritus of physics; B.S. (University of Missouri-Kansas City); M.S., Ph.D. (Kansas State University).

Paul Rulis; assistant professor of physics; B.S. (Virginia Tech); Ph.D. (University of Missouri-Kansas City).

George A. Russell; president emeritus, University of Missouri, and professor emeritus of physics; B.S. (Massachusetts Institute of Technology); M.S., Ph.D. (University of Illinois).
Undergraduate

Undergraduate Admissions

There are no special prerequisites for beginning either the Bachelor of Arts (BA) or the Bachelor of Science (BS) degree programs in Physics. High-school physics and a good working knowledge of algebra and arithmetic are desirable for entering the BS program. However, any deficiencies may be overcome by taking the appropriate coursework. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for physics (Professor Elizabeth Stoddard, stoddarde@umkc.edu) or the undergraduate advisor for astronomy (Professor Dan McIntosh, mcintoshdh@umkc.edu) before beginning the major.

Students that are interested in pursuing Teacher Certification in Physics should contact the School of Education (Catalog (p. 1018), Web (http://education.umkc.edu)) for admissions and advising.

Undergraduate Degrees

- Bachelor of Science: Physics (p. 495)
- Bachelor of Science: Physics with an Emphasis in Astronomy (p. 499)
- Bachelor of Science: Physics and Electrical & Computer Engineering Double Degree (p. 503)
- Bachelor of Arts: Physics (p. 505)
- Physics Minor (p. 509)
- Astronomy Minor (p. 510)
- Teacher Certification in Physics (p. 515)

Career Implications of the Bachelor's Degree in Physics

The BS/BA degree is recommended for students interested in seeking employment in any organization that requires a strong science or technology background. Graduates with a physics degree who enter fields other than science and technology generally find that the reasoning skills and quantitative problem-solving strategies that are developed in a physics program will help their career advancement.

Students that earn a BS degree in Physics are well positioned for continuing their education in graduate school and professional/medical school while those attaining a BS or BA degree in Physics are well positioned for entering the job market in virtually any field of endeavor. There are many career opportunities for holders of either the BS or BA degree in Physics including such possibilities as: researcher in a government/corporate lab, engineer (electrical, mechanical, etc.), science journalist, technology entrepreneur, financial/actuarial analyst, hardware/software developer, chemist, K-12 educator, materials scientist, meteorologist/seismologist, health practitioner, legal analyst, elected political official, etc.

Graduate

Graduate Degrees:

- Master of Science in Physics (p. 511)
- Interdisciplinary Ph.D. Program in Physics (School of Graduate Studies Catalog Section) (p. 1298)
Astronomy Courses
ASTR 150 Astronomy: Motions of the Cosmos Credits: 3
An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the fundamental laws of gravity and motion crucial to the formation of stars and planetary systems, the growth of black holes and galaxies, and the evolution of cosmic structure.

ASTR 150 - MOTR ASTR 100: Astronomy

ASTR 153L Introductory Astronomy Laboratory Credits: 2
An introductory exploration of astronomical phenomena and concepts through quantitative laboratory activities requiring data collection, analysis and interpretation. This course is open to students from all majors.
Cross Listings: NAT-SCI 153L, PHY-SCI 153L, PHYSICS 153L.

ASTR 153L - MOTR ASTR 100L: Astronomy with Lab

ASTR 155 Astronomy: Starlight and Star Stuff Credits: 3
An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the interactions between light and matter crucial to the life and death of stars, the analysis of starlight and interstellar chemistry, and the interpretation of cosmic history.

ASTR 155 - MOTR ASTR 100: Astronomy

ASTR 353 Practical Astronomy Credits: 3
A practical overview of the basic methods of observational astronomy research, including the principles of telescopes, detectors and measurement theory.
Prerequisites: PHYSICS 220 or PHYSICS 250; and MATH 250 or MATH 268.

ASTR 355 Stellar Astrophysics Credits: 3
A mathematical and conceptual overview of the observed properties of stars and the fundamental astrophysics of radiative transfer, hydrostatic equilibrium, atomic processes and thermonuclear energy production that govern their structure, atmospheres and remnants.
Prerequisites: PHYSICS 220 or PHYSICS 250; and MATH 250 or MATH 268.

ASTR 356 Galaxies Credits: 3
A mathematical and conceptual overview of the observed properties and astrophysics of galaxies highlighting star formation and evolution, the interstellar medium, the Milky Way, galaxy populations and demographics, active galactic nuclei, and galaxy formation and evolution.
Prerequisites: PHYSICS 220 or PHYSICS 250; and MATH 250 or MATH 268.

ASTR 465 Cosmology Credits: 3
This course provides a foundation in both physical and observational cosmology. Students will acquire both a mathematical and conceptual understanding of the formation and dynamics of the Universe.
Prerequisites: PHYSICS 220 or PHYSICS 250; and MATH 250 or MATH 268.

Physical Science Courses
PHY-SCI 110 Foundations Of Physical Sciences I Credits: 4
Fundamental principles and concepts of the various physical and mathematical sciences, integrated by the history and philosophy of science.

PHY-SCI 110 - MOTR PHYS 110L: Essentials Physical Sciences w/Lab

PHY-SCI 110L Foundations Of Physical Sciences, Laboratory I Credit: 1
General laboratory and discussion sessions on various topics in the physical and mathematical sciences.

PHY-SCI 110L - MOTR PHYS 110L: Essentials Physical Sciences w/Lab

PHY-SCI 130 Physics of Sports Credits: 3
A course intended for liberal arts students focusing on the physics involved in different sports. Physical laws and technological developments that impact sports will be studied.
PHY-SCI 140 How Things Work Credits: 3
A course intended for liberal arts students focusing on the principles of operations, histories, and relationships of objects from our daily environment. The areas of investigation include mechanical and thermal objects, electromagnetism, light, special materials and nuclear energy.
Co-requisites: PHY-SCI 140L.

PHY-SCI 140L How Things Work Laboratory Credit: 1
Simple experiments based on everyday experiences are analyzed in terms of conceptual physics. The material includes elements of mechanics of a rigid body, elastic properties of matter, fluid dynamics, thermodynamics, electromagnetism, optics and modern physics.
Co-requisites: PHY-SCI 140.

PHY-SCI 150 Astronomy: Motions of the Cosmos Credits: 3
An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the fundamental laws of gravity and motion crucial to the formation of stars and planetary systems, the growth of black holes and galaxies, and the evolution of cosmic structure.

PHY-SCI 153L Introductory Astronomy Laboratory Credits: 2
An introductory exploration of astronomical phenomena and concepts through quantitative laboratory activities requiring data collection, analysis and interpretation. This course is open to students from all majors. Concurrent enrollment in either PHY-SCI 150 or PHY-SCI 155 is encouraged but not required.

PHY-SCI 155 Astronomy: Starlight and Star Stuff Credits: 3
An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the interactions between light and matter crucial to the life and death of stars, the analysis of starlight and interstellar chemistry, and the interpretation of cosmic history.

PHY-SCI 171 Physics For Future Presidents Credits: 3
A course intended for liberal arts students focusing on the physics they need to be informed citizens in a democracy. Energy, global warming, terrorism, and health are examples of the important topics examined from the perspective of how science should inform policy.

PHY-SCI 410A Selected Topics In Contemporary Science Credits: 3
PHY-SCI 410B Selected Topics In Contemporary Science Credits: 3
PHY-SCI 410C Selected Topics in Contemporary Science Credits: 3
PHY-SCI 410P Selected Topics In Contemporary Science Credits: 3
Selected Topics In Contemporary Science
PHY-SCI 410PF Selected Topics In Contemporary Science Credits: 3
PHY-SCI 435 Selected Topics In The History Of Science Credits: 3
Selected Topics In The History Of Science
PHY-SCI 435P Selected Topics In The History Of Science Credits: 3
PHY-SCI 435PF Selected Topics In The History Of Science Credits: 3

**Physics Courses**

PHYSICS 130 Physics of Sports Credits: 3
A course intended for liberal arts students focusing on the physics involved in different sports. Physical laws and technological developments that impact sports will be studied.

PHYSICS 131L Backyard Physics Credit: 1
This laboratory course uses readily available ingredients to develop a conceptual understanding of the laws of nature and mathematics. Experiments can be conducted in the residence hall, apartment, park or home using everyday, inexpensive equipment and materials.

PHYSICS 140 How Things Work Credits: 3
A course intended for liberal arts students focusing on the principles of operations, histories, and relationships of objects from our daily environment. The areas of investigation include mechanical and thermal objects, electromagnetism, light, special materials and nuclear energy.
Co-requisites: PHYSICS 140L.

PHYSICS 140L - MOTR PHYS 100L: Essentials in Physics with Lab
PHYSICS 140L How Things Work Laboratory Credit: 1
A course intended for liberal arts students focusing on the principles of operations, histories and relationships of objects from our daily environment. The areas of investigation include mechanical and thermal objects, electromagnetism, light, special materials and nuclear energy.
Co-requisites: PHYSICS 140.

PHYSICS 140L - MOTR PHYS 100L: Essentials in Physics with Lab

PHYSICS 150 Astronomy: Motions of the Cosmos Credits: 3
An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the fundamental laws of gravity and motion crucial to the formation of stars and planetary systems, the growth of black holes and galaxies, and the evolution of cosmic structure.

PHYSICS 153L Introductory Astronomy Laboratory Credits: 2
An introductory exploration of astronomical phenomena and concepts through quantitative laboratory activities requiring data collection, analysis and interpretation. This course is open to students from all majors.

PHYSICS 155 Astronomy: Starlight and Star Stuff Credits: 3
An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the interactions between light and matter crucial to the life and death of stars, the analysis of starlight and interstellar chemistry, and the interpretation of cosmic history.

PHYSICS 171 Physics for Future Presidents Credits: 3
A course intended for liberal arts students focusing on the physics they need to be informed citizens in a democracy. Energy, global warming, terrorism, and health are examples of the important topics examined from the perspective of how science should inform policy.

PHYSICS 210 General Physics I Credits: 4
Introduction to mechanics, wave motion and sound and heat and thermodynamics. Three hours lecture and two hours laboratory per week.
Co-requisites: MATH 110 or MATH 120.

PHYSICS 210 - MOTR PHYS 150L: Physics I with Lab

PHYSICS 220 General Physics II Credits: 4
Introduction to electricity and magnetism, light and optics and modern physics. Three hours lecture and two hours laboratory per week.
Prerequisites: PHYSICS 210.

PHYSICS 240 Physics For Scientists and Engineers I Credits: 5
Introduction to mechanics, wave motion and sound and heat and thermodynamics.

PHYSICS 240 - MOTR PHYS 200L: Advanced Physics I with Lab

PHYSICS 250 Physics For Scientists and Engineers II Credits: 5
Introduction to electricity and magnetism, light and optics and modern physics. Four hours lecture and two hours laboratory per week.
Prerequisites: PHYSICS 240.
Co-requisites: MATH 220.

PHYSICS 310 Mechanics I Credits: 3
Advanced statics and dynamics of particles and rigid bodies including gravitation.
Prerequisites: PHYSICS 220 or PHYSICS 250; and MATH 250 or MATH 268.

PHYSICS 311 Mechanics II Credits: 3
Continuation of Mechanics I, including mechanics of continuous media, Lagranges equations, tensor algebra and theory of small vibrations.
Prerequisites: PHYSICS 310.

PHYSICS 330 Methods Of Theoretical Physics I Credits: 3
Introduction to mathematical and numerical methods used in the theoretical modeling of physical systems. Treatments of linear systems in scientific and engineering applications will be emphasized.
Prerequisites: MATH 250.
PHYSICS 342 Physics of Science Fiction Credits: 3
This course will quantitatively explore the representation of physics in science fiction books, movies and television shows. Many popular science fiction concepts will be explored, spanning centuries of physics from Galileo to string theory.
Prerequisites: PHYSICS 210 and 220 or PHYSICS 240 and 250; MATH 120 or MATH 125.

PHYSICS 350 Modern Physics With Engineering Applications Credits: 3
An introduction to the theories that revolutionized science and technology in the twentieth century. Topics include special and general relativity, introductory quantum mechanics and atomic structure. Inventions and applications based on these are also examined.
Prerequisites: MATH 210 and MATH 220 and either PHYSICS 210 or PHYSICS 240 and PHYSICS 250.

PHYSICS 353 Practical Astronomy Credits: 3
A practical overview of the basic methods of observational astronomy research, including the principles of telescopes, detectors and measurement theory.
Prerequisites: PHYSICS 240 and PHYSICS 250, MATH 210 or MATH 220.

PHYSICS 355 Stellar Astrophysics Credits: 3
A mathematical and conceptual overview of the observed properties of stars and the fundamental astrophysics of radiative transfer, hydrostatic equilibrium, atomic processes and thermonuclear energy production that govern their structure, atmospheres and remnants.
Prerequisites: PHYSICS 240 and PHYSICS 250, MATH 210 or MATH 220.

PHYSICS 356 Galaxies Credits: 3
A mathematical and conceptual overview of the observed properties and astrophysics of galaxies highlighting star formation and evolution, the interstellar medium, the Milky Way, galaxy populations and demographics, active galactic nuclei, and galaxy formation and evolution.
Prerequisites: PHYSICS 240 and PHYSICS 250, MATH 210 or MATH 220.

PHYSICS 385L Physics of Electronics Credits: 3
An introduction to the solid state physics of basic electronic components and their operation through both theory and practical labwork.
Prerequisites: PHYSICS 220 or PHYSICS 250.

PHYSICS 395L Computer Interfacing Laboratory Credits: 3
An introduction to data acquisition and automation by computer interfacing transduction and control equipment through the serial and parallel buses. The course is multidisciplinary, balancing the physics of transduction to the computer science of automation programming to the electrical engineering of bus protocols. Both high- and low-level programming are taught within the context of automating an experimental procedure. Digital-to-analog and analog-to-digital conversion is also covered.
Prerequisites: PHYSICS 385L.

PHYSICS 410 Thermal Physics Credits: 3
A study of the laws of thermodynamics and their applications, with an introduction to kinetic theory. Statistical methods are emphasized.
Prerequisites: PHYSICS 220 or PHYSICS 250; and MATH 250 or MATH 268.

PHYSICS 420 Optics Credits: 3
Geometrical optics, physical optics and introduction to selected topics in modern optics.
Prerequisites: One year of physics and MATH 210 and MATH 216.

PHYSICS 437 Particle Physics Credits: 3
Essential aspects of modern physics are examined in a historical context, and also in terms of the standard model describing concisely the fundamental interactions among particles. Conservation laws are discussed, and recent developments such as String Theory are considered. Physics 437 is also offered as Physics 5537.
Prerequisites: PHYSICS 240, PHYSICS 250, PHYSICS 350 or PHYSICS 472.

PHYSICS 450 Introduction To Solid State Physics Credits: 3
Crystal structure and binding, elementary lattice dynamics and energy band theory. Free electron models, theory of semiconductors and metals.
Prerequisites: PHYSICS 310 or PHYSICS 410.

PHYSICS 460 Electricity And Magnetism I Credits: 3
Static electric fields in free space and material media; Kirchhoff's laws and direct current circuits; static magnetic fields.
Prerequisites: PHYSICS 220 or PHYSICS 250; and MATH 250 or MATH 268.

PHYSICS 461 Electricity And Magnetism II Credits: 3
Magnetostatics; alternating current circuits; Maxwell's equations and radiation; special relativity; topics in electromagnetism.
Prerequisites: PHYSICS 460.
PHYSICS 465 Cosmology Credits: 3
This course provides a foundation in both physical and observational cosmology. Students will acquire both a mathematical and conceptual understanding of the formation and dynamics of the Universe.
**Prerequisites:** PHYSICS 240 and PHYSICS 250, MATH 210 or MATH 220.

PHYSICS 472 Introduction To Quantum Mechanics Credits: 3
Introduction to the theory and applications of quantum mechanics with emphasis on the mathematical treatment of modern physics.
**Prerequisites:** PHYSICS 350.

PHYSICS 476LW Advanced Laboratory Credits: 3
This course offers a selection of important experiments in physics, performed with modern instrumentation. It is designed to give students a deeper understanding of physics and help them develop experimental abilities and improve their communication skills.
**Prerequisites:** RooWriter.
**Co-requisites:** PHYSICS 350.

PHYSICS 490 Special Problems Credits: 1-3
The kind of problem and the amount of credit to be given by arrangement with the department.

PHYSICS 499 Undergraduate Research Credits: 1-3
Independent student research on a physics/astrophysics project under the supervision of a faculty member. Projects will engage students in aspects of the scientific process including data collection and analysis, research methods and strategies, scientific discussion and written/oral communication. Requires a minimum of 3-4 hours of research per week for each credit hour.

PHYSICS 5500 Methods Of Mathematical Physics I Credits: 3
Intended to provide the student with the advanced mathematical techniques needed for beginning graduate studies in the physical sciences. Content includes real variables, infinite series, complex analysis, linear algebra and partial differential equations.

PHYSICS 5501 Methods Of Mathematical Physics II Credits: 3
A continuation of Physics 500 which includes Sturm-Liouville operators, special functions, Fourier transforms, distributions and Green functions, Laplace transforms, linear groups and tensor analysis.

PHYSICS 5505 Survey Of Recent Development In Physics Credits: 3
Specifically designed to help high school and junior college science teachers keep pace with current developments in various subdivisions of physics and their impact on society and technology. (Not applicable for graduate degree in Physics).
**Prerequisite:** Baccalaureate degree and one year science teaching experience.

PHYSICS 5510 Theoretical Mechanics I Credits: 3
A review of undergraduate mechanics precedes the study of generalized classical mechanics in this course. Topics include variational principles, Lagrangian and Hamilton methods, conservation laws and Hamilton-Jacobi theory.

PHYSICS 5511 Theoretical Mechanics II Credits: 3
A continuation of PHYSICS 5510, this course covers topics such as normal coordinates, small oscillations, continuum mechanics and special/general relativity.

PHYSICS 5520 Electromagnetic Theory And Applications I Credits: 3
Electrostatics, magnetostatics and various approaches in solving boundary value problems of electromagnetism, Green's functions, conformal transformations and polynomial expansions, Maxwell's equations and waves.

PHYSICS 5521 Electromagnetic Theory And Applications II Credits: 3
Waveguides, fiberoptics, radiation systems and antenna for wireless communications, scattering and diffraction of electromagnetic waves, multipole fields, special relativity and relativistic particle dynamics and radiation.

PHYSICS 5530 Quantum Mechanics I Credits: 3
Review of elementary methods, formal preliminaries, axioms, commuting operators, angular momentum, static perturbation theory, Wigner-Eckart theorem.

PHYSICS 5531 Quantum Mechanics II Credits: 3
Time dependent perturbation theory, scattering, applications to atoms, molecules and nuclei, reactions, relativistic methods.

PHYSICS 5535 Optical Properties Of Matter Credits: 3
Maxwell's equations and the dielectric function, absorption and dispersion, free-electron metals, interband transitions, dispersion relations and sum rules, self-consistent field approximation, current-current correlations and the fluctuation-dissipation theorem, plasmons and characteristic energy loss.
**Prerequisites:** PHYSICS 450, PHYSICS 460, PHYSICS 461, PHYSICS 472, PHYSICS 5500.
PHYSICS 5537 Particle Physics Credits: 3
Essential aspects of modern particle physics are examined in a historical context, and also in terms of the standard model describing concisely the fundamental interactions among particles. Conservation laws are discussed, and recent developments such as String Theory are considered.
Prerequisites: (for undergraduates) PHYSICS 240, PHYSICS 250, and PHYSICS 350 or PHYSICS 472.

Cross Listings: PHYSICS 437.

PHYSICS 5540 Statistical Physics I Credits: 3
Statistical mechanics as a basis for thermodynamics; classical distribution functions; quantum statistical mechanics, kinetic theory, transport phenomena; application to systems of interacting particles.
Prerequisites: PHYSICS 410, PHYSICS 472.

PHYSICS 5541 Statistical Physics II Credits: 3
Special topics in advanced statistical physics including: second quantization, modern many body theory, interacting Fermi and Bose systems, superfluidity and superconductivity, renormalization group and computer simulation techniques.
Prerequisites: PHYSICS 5540.

PHYSICS 5550 Atomic And Molecular Structure Credits: 3
Experimental results and theoretical models by quantum mechanics. Special emphasis on the interaction between radiation and matter.

PHYSICS 5553 Practical Astronomy Credits: 3
A practical overview of the basic methods of observational astronomy research, including the principles of telescopes, detectors and measurement theory, as well as hands-on experience with data reduction and analysis. This course is open to graduate students from all majors.

PHYSICS 5555 Stellar Astrophysics Credits: 3
A mathematical and conceptual overview of the observed properties of stars and the fundamental astrophysics of radiative transfer, hydrostatic equilibrium, atomic processes and thermonuclear energy production that govern their structure, atmospheres and remnants.

PHYSICS 5556 Galaxies Credits: 3
A mathematical and conceptual overview of the observed properties and astrophysics of galaxies highlighting star formation and evolution, the interstellar medium, the Milky Way, galaxy populations and demographics, active galactic nuclei, and galaxy formation and evolution.

PHYSICS 5560 Nuclear Physics Credits: 3
Fundamental properties of the atomic nucleus discussed in terms of experimental results and theoretical models. Quantum and statistical mechanics are used where appropriate.

PHYSICS 5565 Cosmology Credits: 3
This course provides a foundation in both physical and observational cosmology. Students will acquire both a mathematical and conceptual understanding of the formation and dynamics of the Universe.

PHYSICS 5570 Quantum Theory Of Solids I Credits: 3

PHYSICS 5571 Quantum Theory Of Solids II Credits: 3
Topics will include crystal imperfections, impurities and defects, optical properties of metals and semiconductors, electron-lattice interaction and transport theory, superconductivity and theory of disordered systems.

PHYSICS 5580 Physics Seminar Credit: 1
Contemporary publications and research.

PHYSICS 5585 Physics of Electronics Credits: 3
An introduction to the solid state physics of basic electronic components and their operation through both theory and practical lab work.

PHYSICS 5590 Topics In Physics Credits: 1-3
Contemporary publications and research.

PHYSICS 5590A Topics In Physics Credits: 1-3
Contemporary publications and research.

PHYSICS 5590B Special Topics Credits: 1-3

PHYSICS 5590R Topics in Physics Credits: 1-3
Contemporary publications and research.

PHYSICS 5595L Computer Interfacing Laboratory Credits: 3
An introduction to computer interfacing through the use of serial and parallel ports and digital-to-analog and analog-to-digital converters. The course also introduces digital filtering techniques, data analysis techniques, and graphical presentation of data. The programming techniques are taught using high level programming languages currently used in research and development labs.

PHYSICS 5599 Research And Thesis Credits: 1-9
Research for thesis in partial fulfillment of the master's degree in physics.
PHYSICS 5680 Research Seminar Credits: 1-2
Seminars on current research topics of research programs in the department and those of external distinguished scientists. (Must be taken by Physics Ph.D. students).

PHYSICS 5690 Special Research Topics Credits: 1-3
A lecture course presenting advanced research-level topics.
Prerequisites: Ph.D. candidacy. This course is intended to allow faculty and visiting scholars to offer special courses in selected research areas.

PHYSICS 5699 Research And Dissertation Credits: 1-9
Research for dissertation in partial fulfillment of the Ph.D. degree requirements in physics.

PHYSICS 5899 Required Graduate Enrollment Credit: 1

PHYSICS H150 Honors: Introduction To Astronomy Credits: 3
Honors: Introduction To Astronomy

PHYSICS H220 General Physics II Credits: 4
Fundamental principles of physics including sound, electricity, magnetism, optics, elementary modern physics, and applications of these principles to different interdisciplinary natural science.
Prerequisites: PHYSICS 210 (or equivalent).

PHYSICS H240 Physics For Science And Engineering I Credits: 5
Introduction to mechanics, wave motion and sound and heat and thermodynamics.

PHYSICS H250 Physics For Science And Engineering II Credits: 5
Introduction to electricity and magnetism, light and optics and modern physics.
Prerequisites: PHYSICS 240.
Co-requisites: MATH 220.
Bachelor of Science: Physics

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes

Students graduating from this program will:

- Have a functional knowledge of the basic areas of physics.
- Be able to integrate their knowledge with critical thinking skills in order to become quantitative problem solvers.
- Be able to clearly articulate scientific information, both orally and in writing.
- Be able to effectively use the scientific literature.

Description of the Bachelor of Science Program

The Bachelor of Science (BS) degree in Physics is recommended for students interested in seeking employment in industrial, governmental, or private organizations that require a strong scientific background and for those students that are seeking to continue their academic careers in either graduate school or professional/medical school.

Physics advising questions should be directed to Professor Elizabeth Stoddard (stoddarde@umkc.edu).

Students graduating with a BS degree in Physics will be prepared for entry into professional schools, graduate programs, or the job market for career employment.

**Constitution Course Requirement**

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

1. Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelor’s degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

**College of Arts & Sciences Degree Requirements**

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

1. ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.

2. This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.
Major Requirements

Students must successfully complete the major requirements below with at least 12 hours of the noted upper division (300+) course requirements completed at UMKC.

Formulating a Plan of Study

In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for physics (Professor Elizabeth Stoddard, stoddarde@umkc.edu) before beginning the major.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.
UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Bachelor of Science: Emphasis in Astronomy

University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes
Students graduating from this program will:

• Have a functional knowledge of the basic areas of astronomy, astrophysics, and physics.
• Be able to integrate their knowledge with critical thinking skills in order to become quantitative problem solvers.
• Be able to clearly articulate scientific information, both orally and in writing.
• Be able to effectively use the scientific literature.

Description of the Bachelor of Science Program with an Emphasis in Astronomy
The Bachelor of Science (BS) degree in Physics with an Emphasis in Astronomy is recommended for students that are seeking to continue their academic careers in graduate school or for those that are interested in seeking career employment in industrial, governmental, or private organizations that require a strong scientific background.

Astronomy advising questions should be directed to Professor Daniel McIntosh (McIntoshDH@umkc.edu).

Students graduating with a BS degree in Physics with an Emphasis in Astronomy will be prepared for entry into graduate programs or the job market for career employment.

1. Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

**College of Arts & Sciences Degree Requirements**

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

Physics/Engineering Double Degree

Description of the Physics and Electrical & Computer Engineering Double Degree Program

The combined Bachelor of Science (BS) degree in Physics and BS in Electrical & Computer Engineering five year double degree program is recommended for students interested in seeking employment in industrial, governmental, or private organizations that require a strong theoretical science and applied engineering background and for those students that are seeking to continue their academic careers in either graduate school or professional/medical school.

Physics advising questions should be directed to Professor Elizabeth Stoddard (stoddarde@umkc.edu).

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

College of Arts & Sciences Degree Requirements

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

1 ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.

2 This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

Student Learning Outcomes

Students graduating with a BS degree in Physics and a BS degree in Electrical & Computer Engineering will:
• Have a functional knowledge of the basic areas of physics and electrical & computer engineering.
• Be able to integrate their knowledge with critical thinking skills in order to become quantitative problem solvers.
• Be able to clearly articulate scientific information, both orally and in writing.
• Be able to effectively use the scientific literature.

Students graduating with a BS degree in Physics and a BS in Electrical & Computer Engineering will be prepared for entry into professional schools, graduate programs, or the job market for career employment.

Course Requirements for the Physics BS and Electrical & Computer Engineering BS Double Degree Program

Because of the condensed format of the program, students are strongly advised to contact the Physics undergraduate advisor (Prof. Elizabeth Stoddard (stoddarde@umkc.edu)) and the Electrical & Computer Engineering undergraduate advisor (p. 815) as early as possible before beginning this program.
Bachelor of Arts: Physics

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Student Learning Outcomes

Students graduating from this program will:

- Have a functional knowledge of the basic areas of physics.
- Be able to integrate their knowledge with critical thinking skills in order to become quantitative problem solvers.
- Be able to clearly articulate scientific information, both orally and in writing.
- Be able to effectively use the scientific literature.

Description of the Bachelor of Arts Program

The Bachelor of Arts (BA) degree in Physics is recommended for students interested in seeking employment in science, technology, engineering and math (STEM) areas that require a strong scientific and quantitative background. The BA degree offers greater flexibility than either the Physics BS or the Physics/Engineering Double Degree program because it requires fewer credit hours of physics in contrast to the BS.

Physics advising questions should be directed to Professor Elizabeth Stoddard (stoddarde@umkc.edu).

Students graduating with a BA degree in Physics will be prepared for entry into the high-tech job market.

### General Electives

Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

**Major Minimum GPA: 2.0**

**Minimum GPA: 2.0**
**Formulating a Plan of Study**

In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for physics (Professor Elizabeth Stoddard, stoddarde@umkc.edu) before beginning the major.

**Tools for Planning and Fulfilling Academic Requirements**

UMKC’s Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Physics Minor

Description of the Program
The minor in Physics is designed for students desiring a general background in Physics.

Physics advising questions should be directed to Professor Elizabeth Stoddard (stoddarde@umkc.edu).

Student Learning Outcomes
Students graduating from this program will:

- Have a functional knowledge of the basic areas of physics.
- Be able to integrate their basic scientific knowledge with critical thinking skills to quantitatively solve physics problems.

Program Requirements
Students majoring in any other discipline in the University may elect to minor in Physics.

The Physics minor requires a minimum of 18 credit hours in Physics courses, with a minimum of 9 credit hours at the 300-400 level. Students must receive grades of C or better in each course. Advising questions regarding the Physics minor should be directed to Professor Elizabeth Stoddard (stodarde@umkc.edu).

Total Credits 18

In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for physics, Professor Elizabeth Stoddard, (stodarde@umkc.edu (stodarde@umkc.edu)).
Astronomy Minor

Description of the Program

The minor in Astronomy is designed for students desiring a general background in Astronomy.

Astronomy advising questions should be directed to Professor Daniel McIntosh (McIntoshDH@umkc.edu).

Student Learning Outcomes

Students graduating from this program will:

- demonstrate competency in stellar astrophysics, galaxies, cosmology and practical astronomy in homework and exam questions.
- translate complicated mathematical expressions of astrophysics laws into concrete calculations and test these.
- clearly articulate scientific information both orally and in writing.

Program Requirements

Students majoring in any other discipline (including Physics) in the University may elect to minor in astronomy.

There are two tracks (Track One, Track Two) each requiring a minimum of 18 credit hours in Physics and Astronomy courses, with a minimum of 9 credit hours at the 300-400 level. It is highly recommended that students follow Track One because the upper level courses will be very challenging without the solid foundation obtained in the calculus-based physics courses (PHYSICS 240/PHYSICS 250). Students must receive grades of C or better in each course.

Track One (Recommended)

Master of Science: Physics

Admission to the Master of Science in Physics Program

Admissions Requirements

To be admitted to the graduate program, an undergraduate major in physics is not required, and deficiencies in completed coursework may be overcome by taking additional undergraduate-level courses for graduate credit. Applicants are encouraged to take both the Graduate Record Examination (GRE) aptitude test and physics test. International students must take the Test of English as a Foreign Language (TOEFL). Admission will be based on academic record and other information such as letters of reference, GRE score, and a personal interview.

Description of the Master of Science in Physics Program

Degree Options

The Master of Science (MS) degree in Physics may be earned by fulfilling the requirements for the MS with thesis or the MS without thesis. A full-time graduate student seeking the MS degree in physics is expected to take the thesis option and is required for Graduate Teaching Assistants (GTAs). The without-thesis option is designed specifically for part-time students who already have career employment.

Career Implications

The career implications for students with an MS degree in Physics and seeking employment are similar to those with a BS degree in Physics, except that they will have a more advanced standing and will be recognized as having more experience in science/technical activities. Similarly, for students that intend to pursue further academic or professional training, the MS degree in Physics will give greater weight to your applications.

Research Advisor

A student who is entering the graduate program with the objective of earning a MS degree in Physics with a thesis will select or be assigned an advisor. The student-advisor pairing should be made during the first semester, if possible. Together, the student and the advisor will work out the complete program of study for the MS degree in Physics.

Departmental Examination

All graduate students in physics who have completed more than 6 graduate credit hours must take the written departmental examination (p. ) that is offered each January.

Graduate Advising

Graduate student advising questions should be directed to Professor Mark Brodwin (brodwinm@umkc.edu), Flarsheim Hall 250L, (816) 235-2508 or Paul Rulis (rulisp@umkc.edu), Flarsheim Hall 250D, (816) 235-5945.

Scholarships, Fellowships, and Assistantships

Financial support is available through fellowships, teaching assistantships, research assistantships or hourly student wages. Students wishing to be considered for an assistantship must so specify in their letters and application forms.

Student Learning Outcomes

Students graduating from this program will:

• Have an advanced knowledge of the basic areas of physics.
• Be able to integrate their knowledge with critical thinking skills in order to become quantitative problem solvers.
• Be able to clearly articulate scientific information, both orally and in writing.
• Be able to effectively use the scientific literature.

Program Requirements

General Regulations for all MS Degree Seeking Students

1. All graduate students must maintain a grade-point average of 3.0 on a 4.0 scale.
2. Students must satisfy the general requirements set forth by the School of Graduate Studies.
3. Completion of the written departmental examination (p. ) passed at the "MS Comprehensive" level.

Additional Requirements Specifically for the MS Degree in Physics With Thesis

1. 30 graduate credit hours with the following constraints:
   a. Select a minimum of fifteen (15) credit hours from MS Core Courses;
   b. At least fifteen (15) hours of MS Elective Courses.
2. Maintenance of satisfactory progress toward completion of research project and the associated written thesis.
3. A satisfactory\(^1\) thesis defense with the following constraints:
a. The thesis defense is administered by the student’s supervisory committee and can be taken only after the student has passed the written departmental examination (p.) at the “MS Comprehensive” level.
b. The defense may be oral, written, or both and it may include the student’s thesis proposal and associated background material.

Additional Requirements Specifically for the MS Degree in Physics Without Thesis

1. 33 graduate credit hours with the following constraints:
   a. Select a minimum fifteen (15) credit hours of core MS courses;
   b. At least eighteen (18) credit hours of MS Elective courses.

Note: Graduate students should consult with either of the Department of Physics and Astronomy graduate advisors prior to enrollment.

Professor Mark Brodwin (brodwinm@umkc.edu), Flarsheim Hall 250L, 816-235-5945
Professor Paul Rulis (rulisp@umkc.edu), Flarsheim Hall 250D 816-235-5945

1 'Satisfactory’ is determined by the student’s committee.
2 No more than twelve (12) credit hours of 400-level courses.
3 No more than six (6) hours from PHYSICS 5599.

Written Departmental Examination
(a.k.a. MS Comprehensive Exam, PhD Qualifying Exam)
During January of each year, the Department of Physics and Astronomy will administer a written, MS Comprehensive/PhD Qualifying examination of all MS-level physics students and Interdisciplinary PhD students with physics as their primary discipline. The two-part examination will be given during two sessions (morning and afternoon) of four hours each on the first Saturday after the start of the Spring Semester. Each part of the examination will contain approximately eight questions at varying levels of difficulty (introductory to advanced undergraduate). The following subject areas will be addressed in the given order by the two examination sessions:

2. Quantum Mechanics and Thermodynamics.

Students may pass the written examination at the following ascending levels of achievement:

1. "MS Comprehensive" - necessary for the MS degree in physics.
2. "PhD Qualifying" - necessary for invitation to take the comprehensive examination in fulfillment of the Interdisciplinary PhD program requirements.

Students need only pass the written examination once at any given achievement level. But, all graduate students must attempt the exam every year until they pass it at the appropriate level, unless they are granted an exception via a petition to the physics and astronomy faculty.

A maximum of two attempts at each level (MS Comprehensive, PhD Qualifying) will be permitted, and any student who does not attempt the examination when required to do so will be deemed to have failed the examination on that attempt, unless they have been given prior permission to delay taking the exam. Students who are required to take this examination are encouraged to consult with the Department of Physics and Astronomy graduate advisor, Professor Paul Rulis (rulisp@umkc.edu), Flarsheim Hall 250D, 816-235-5945, for detailed information concerning procedures and regulations for the examination.
Interdisciplinary Ph.D. Program Regulations

Regulations

The Department of Physics and Astronomy is a full participant in the Interdisciplinary Ph.D. Program. The doctoral studies committee of the department has the primary responsibility for administering the program within the department. The committee consists of all physics doctoral faculty members with an elected committee chairperson.

See the School of Graduate Studies (p. 1185) section in this catalog and the departmental graduate brochure for general and discipline-specific regulations for Interdisciplinary Ph.D. study with physics as a coordinating unit discipline or co-discipline.
Teacher Certification in Physics

Description of the Teacher Certification in Physics Program

Certification as a middle school (grades 5-9) or secondary (grades 9-12) Physics teacher in either Kansas or Missouri requires that a student complete specific requirements from the School of Education and take coursework in Biology, Chemistry, Environmental Science, Geology, and Physics.

Students will enter this program through the School of Education. For further information about the program, consult the School of Education section of this catalog (p. 1018), visit the School of Education web site (http://education.umkc.edu), or contact the Education Student Services Office at (816) 235-2234.

Adjunct Faculty:
David Brichoux, David Sprick, Dan Stroud

Department Description
The Department of Political Science offers programs of study that lead to the Bachelor of Arts and Master of Arts degrees. The undergraduate major in Political Science equips students with the analytic, writing, and presentation skills to acquire, create and convey knowledge of the political and social environment. After completing two core introductory courses, students have complete flexibility in the substantive emphasis of their coursework. Some students focus on one of the main sub-disciplines of American politics, comparative politics, international relations and political theory, while others take a broad array of courses across these sub-disciplines. The political science minor is completely flexible with regard to substantive emphasis and requires only the completion of 18 credit hours of political science courses.

The Master of Arts degree provides students with analytic, quantitative and presentation skills to critically assess debates and arguments in the political science literature. After completing three core seminars in American politics, comparative politics and international relations, students have considerable flexibility in developing their program of study. The degree can be completed with a thesis or a non-thesis option.

Undergraduate Admissions
Students planning to major or minor in political science should declare their choice officially by filling out a Declaration of Major form (http://www.umkc.edu/registrar/forms/declaration-of-major.pdf), and consult the Department Chair for a signature and program advice as early as possible.

Career Implications of the Bachelor's Degree
Political science, in addition to serving as an excellent core discipline for a liberal arts education, may also serve as vocational and professional preparation for students with interests in the following areas:

- Law school and legal careers
- Electoral politics
- Government service
- Not-for-profit and public-interest organizations
- Business and finance
- Teaching and research
• Public and private political research and consulting services
• Electronic and print journalism
• International careers and non-governmental organizations

Department Activities

Advising
Undergraduates with questions about fulfilling Political Science requirements should meet with the Political Science advisor. Graduate students are advised by the Graduate Director.

Honor Society
UMKC has an active chapter of Pi Sigma Alpha, the national political science honor society. Each year Pi Sigma Alpha seeks to recognize the best students in political science in order to – according to its national constitution – "stimulate productive scholarship and intelligent interest in the subject of government.” The local Pi Sigma Alpha chapter regularly presents films and speakers, information sessions for law school and graduate school, and sponsors the department monthly informal discussion group known as the Lunch Bunch. Open to all students, the Lunch Bunch provides an informal environment for enjoying a pizza lunch and discussing current events among faculty and students.

Internships and Study Abroad
The department has an active internship program. Information on local, regional, national and international programs of interest to undergraduates in political science is posted on departmental bulletin boards and is available in the main office. Credit is given for successful completion of internship programs approved by the department. Further information regarding internship opportunities and requirements can be found at http://cas.umkc.edu/politicalscience/internships.asp.

UMKC has a large study abroad program, and the department strongly encourages students to participate in approved programs. Credit toward the degree can be earned for approved courses and competitive scholarships are available. For more information see http://info.umkc.edu/international/.

Research
Students are encouraged to participate in faculty research and/or to develop their own research project in conjunction with the undergraduate research program, UMKC SEARCH and SUROP (http://www.umkc.edu/searchsite/). Faculty invitation is required to assist with faculty research and course credit is available. Students who wish to develop their own research project should select a faculty mentor and develop a proposal in conjunction with the mentor. Successful proposals can receive up to $1250 to support student independent research through SEARCH and SUROP.

Independent Study
Independent study in the form of tutorials is available in two courses: POL-SCI 497 and POL-SCI 498 (depending on student qualifications). In either case, without exception, the student must propose a topic for study, have the approval of the advisor and have the written consent of the instructor with whom the tutorial is to be taken before registration for the course. UMKC Honors Program participants may take any course in the department for honors credit by making special arrangements with the instructor at the beginning of the semester.

Political Science Scholarships
The department awards six scholarships each year to outstanding sophomores and juniors. The Ruth L. Gant Memorial Scholarship, the Sallie Millard and Cornelius Roach, Sr. Scholarship, the Dan Bishop Scholarship in Public Policy, Delia Wong Stephens Scholarship, the Pat Gray Memorial Scholarship, and the David N. Atkinson Scholarship in Political Science are awarded specifically to political science majors and can provide from $500 to $4000 to exceptional students. Political Science students are also eligible for College of Arts and Sciences general scholarships.

Faculty
Rebecca Best Contact Information; assistant professor of political science; B.A. (East Carolina University); M.A., Ph.D. (University of North Carolina - Chapel Hill).

Robert K. Evanson Contact Information; associate professor emeritus of political science; B.A. (University of Illinois-Urbana); M.A., Ph.D. (University of Wisconsin-Madison).

Robert E. Gamer Contact Information; professor emeritus of political science; B.A. (Monmouth College); Ph.D. (Brown University).

Debra Leiter Contact Information; assistant professor of political science; B.A. (University of California - San Diego); M.A., Ph.D. (University of California - Davis).

Mona Lyne Contact Information; associate professor of political science; B.S. (University of California - Berkeley); M.A. (Monterey Institute of International Studies); Ph.D. (University of California - San Diego).

Dale Allen Neuman Contact Information; professor emeritus of political science; A.B. (Kenyon College); Ph.D. (Northwestern University).
Max J. Skidmore Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=skidmore); curators' professor of political science; B.S., B.S. Ed. (Southwest Missouri State); M.Ed. (University of Missouri-Columbia); Ph.D. (University of Minnesota).

Elizabeth Vonnahme Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=vonnahme); chair and associate professor of political science; B.A. (Angelo State University); M.A., Ph.D. (Rice University).

Greg Vonnahme Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=vonnahme); assistant professor of political science; B.S. (University of Iowa); M.A., Ph.D. (Rice University).

Benjamin Woodson Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=woodson); assistant professor of political science; B.S. (Indiana University); M.A., Ph.D. (Stony Brook University).

Undergraduate

Undergraduate Degrees:
• Bachelor of Arts: Political Science (p. 526)
• Minor in Political Science (p. 524)
• Teacher Certification in Social Studies (p. 534)

Graduate

Graduate Degrees:
• Master of Arts: Political Science (p. 530)
• JD / MA in Political Science Dual Degree Program
• Interdisciplinary Ph.D. (p. 533)

Courses

POL-SCI 210 American Government Credits: 3
American government and politics, with special reference to the U.S. Constitution. This course meets the state requirement for study of the U.S. and Missouri Constitutions.

POL-SCI 220 Introduction To Comparative Politics Credits: 3
Introduces students to general concepts of political authority and systematically analyzes the causes and consequences of variation in political institutions, processes and policies across countries, illustrating concepts and themes with case studies of major European and Asian countries.

POL-SCI 221 Introduction to Comparative Politics and Research Credits: 3
This course introduces students to general concepts of political authority, and systematically analyzes the causes and consequences of variation in political institutions, processes and policies across countries. This course also introduces students to research in comparative politics, with students developing an independent research project.

POL-SCI 230 International Relations Credits: 3
An analysis of relations among nations, with emphasis on structures of international power, causes of war, and approaches to peace.

POL-SCI 301 Western Political Philosophy Credits: 3
An examination of the major theories of politics from Plato to today.

POL-SCI 302 Political Research And Analysis Credits: 3
This class focuses on methods of analysis used in political science research. This course also covers research plans used to gather information about politics and effective ways of utilizing that information. As advances in computing technology expand the availability of politically-driven data, it is possible to bring an increasing amount of information to bear on more questions.
POL-SCI 303 Political Behavior Credits: 3
This course will survey research on conventional and unconventional forms of mass political behavior. Topics to be discussed include campaign participation, voting behavior, public opinion, the media, and participation in protests and revolutions. This course will also cover the methodological approaches to the study of political behavior.

POL-SCI 304 Politics of Developing Countries Credits: 3
The course examines the key arguments that have been advanced to account for differences across countries in rates and levels of economic and political development.

POL-SCI 308 Parties and Interest Groups Credits: 3
Introduction to parties and interest groups in the United States and their important role in the political process. Topics include the formation, organization, activities, and impact of political parties and interest groups in American politics.

POL-SCI 309 Public Opinion Credits: 3
Explores public opinion in the United States, surveying theories and empirical research on the measurement, formation, and distribution of public opinion.

POL-SCI 313 Politics In The American States Credits: 3
A study of the structures, functions, and politics of the institutions of American state governments and an assessment of their role in the federal system. This course is particularly interested in the extent to which political economy and political culture, broadly defined, influence public policy within the states.

POL-SCI 314 Politics of Kansas City Metro Credits: 3
This course will provide an understanding of politics in urban America through a study of metropolitan Kansas City. It will discuss the relationships between local governments, their decision making process, city-county consolidation, structure of regional council of governments, forming political alliances and current political issues affecting the metropolitan area. The course will discuss the politics of issues like transportation, sports facilities, environment and economic competitiveness.

POL-SCI 315 Public Policy Credits: 3
A broad introductory overview of decision theories, governmental structures, and policy processes. Emphasis on the organizational and societal context of public formulation, implementation, and evaluation.

POL-SCI 316 Terrorism And Political Violence Credits: 3
This course explores terrorism and armed struggle from theoretical and historical perspectives, and analyzes a number of violent movements with nationalist, ideological, and religious motivations.

POL-SCI 318 Political Psychology Credits: 3
The field of political psychology is an interdisciplinary field that draws on both psychology and political science to address topics in the political world. This course will focus on a variety of topics including inter-group conflict, stereotyping and prejudice, political socialization, attitude formation and change, political communication, decision heuristics and biases, public opinion, and the future of political psychology.

POL-SCI 319 Campaigns And Elections Credits: 3
This course will examine the role of campaigns in determining the outcome of both congressional and presidential elections and the way that electoral rules structure both campaign strategies and electoral outcomes. This course focuses on topics such as the role of the media, campaign advertising, campaign financing, public opinion, registration requirements, and the role of interest groups.

POL-SCI 326 Racial & Ethnic Politics Credits: 3
This course provides an analysis of the political behavior and roles of racial and ethnic groups in the American political system. Theoretical, empirical, and practical issues of race, racism, and race relations are examined (in the political context). Public policy, electoral behavior, and political institutions are also investigated with regards to the empowerment and political incorporation of communities of color.

POL-SCI 333 Social Networks in Politics Credits: 3
This class focuses on mass political behavior and social networks in the US. Particular attention will be devoted to how relations between individuals can affect political attitudes and participation. We will also consider how these individual relations combine to shape outcomes such as political attitudes, voter turnout, and election outcomes.

POL-SCI 336 American Foreign Policy Credits: 3
Understanding the contemporary debate over American foreign policy in terms of the premises and perspectives of several competing schools of thought.

POL-SCI 343 The Politics Of Social Security Credits: 3
A study of the American Social Security system, including its history, principles, and prospects for the future.

POL-SCI 348 Constitutional Law: The Federal System Credits: 3
A study of the president, congress and state governments from the perspective of the Constitution, emphasizing powers and limitations on the exercise of authority.

POL-SCI 349 Constitutional Law: Civil Liberties Credits: 3
A study of civil liberties in American society, emphasizing factors and forces that restrict or enlarge their scope, as understood through constitutional interpretation.
POL-SCI 357 Western European Politics Credits: 3
This course explores democratic representation and political institutions in Western Europe.

POL-SCI 359 Latin American Politics Credits: 3
In this course we will focus on the major periods in Latin American political history since the Great Depression. This includes the post-War period of optimism in which democratic governments promoted rapid economic development, the period of pessimism and authoritarism from the 1960s to the 1980s, and a new democratic renewal beginning in the 1990s. We will examine the consolidating democracies that emerged in the 1990s in depth. We will also examine case studies of recently failed democracy, Venezuela, and ask why this democracy failed.

POL-SCI 360 Labor, Politics and Society Credits: 3
This course explores many aspects of unions and the labor movement in society and the vital role organized labor plays as a pillar of democratic society. Unions impact the economy, growth, and the distribution of wealth, and the impact racial and gender equality, social security health and job safety, energy and the environment, and even foreign relations. As a social movement, labor has had a major impact on American history. This course covers these topics from a labor perspective. It examines current obstacles for union organizing, recent union campaigns, labor's political role, and the relationship between labor and the media. This course is part of the Certificate Program in Labor Studies and is offered on the University of Missouri Interactive Video Network at UMKC, UMSL, and UMC.

POL-SCI 361 Global Issues in a Changing World Credits: 3
Threats to national and international securing were once dominated by military force and interstate warfare. Threats are now seen in a much broader context. Non-state, transnational actors now pose a threat to transnational business, states, and even civilizations. Issues like global climate change and HIV/AIDS are seen as threats to national survival well beyond any single nation's ability to contain. For some, the deep phenomenon of globalization is seen as a threat to national sovereignty and, indeed, a threat to the international system of states. In this course, challenges and opportunities replace threat as the organizing principle, and the role of international institutions takes center stage.

POL-SCI 362 Latin America and International Relations Credits: 3
This course we will survey the relations between Latin American states and between Latin America and the world. Taking the Latin American states as the key actors, we examine the history of US-Latin American relations, including current issues such as drug trafficking, immigration and terrorism. We will also study the region as a player on the international stage, examining Latin America's changing role in the world arena related to trade, development, and the environment. Finally we examine the emergence of new leadership in Latin America.

POL-SCI 364 Designing American Elections Credits: 3
This course examines the role of elections in American politics. Topics include voter registration, campaign finance, redistricting, the electoral college, and primary elections. We will also evaluate how different electoral rules affect political outcomes such as voter turnout, participation, and representation.

POL-SCI 365 Congress and Parliaments Credits: 3
The objective of this course is to compare the American Congress to parliaments and legislatures in other countries. The course will examine how elections and institutions affect the behavior of legislators and the policy-making process in many countries.

POL-SCI 366 British Politics Credits: 3
This course focuses on the contemporary politics of the United Kingdom, particularly elections, institutions, and political parties.

POL-SCI 369 Politics Of The Middle East Credits: 3
The course is designed to provide students with a working knowledge of political systems and major political issues in the Middle East and North Africa. Topics to be covered in the course include the question of Middle east exceptionalism, democratization, the effect of religion and identity, political economy of the Middle East, the Arab-Israeli conflict, political violence, and the Arab Spring.

POL-SCI 370 Labor Law Credits: 3
In this course, participants will examine the role of government in the regulation of labor-management relations in the United States. While the focus of the course will be on federal laws regulating private sector labor relations, parallel issues addressed in the Railway Labor Act and state public sector labor relations law will also be covered. Specific topics include the legal framework for the organization of workers, definition of prohibited or unfair labor practices of employers and unions, legal regulation of the collective bargaining process, regulation of the use of economic weapons in labor disputes, enforcement of collective bargaining agreements and the regulation of internal trade union activities.

POL-SCI 380 Political Science And Politics Credits: 1-6
Offered as a special course in the individual faculty member's area of research specialization. The course may be repeated for credit when the topic varies. The topic and instructor will be announced in advance.
POL-SCI 380A Political Science And Politics Credits: 1-6
POL-SCI 380B Political Science And Politics Credits: 1-6
POL-SCI 380C Political Science And Politics Credits: 1-6
POL-SCI 380D Political Science And Politics Credits: 1-6
POL-SCI 380E Political Science And Politics Credits: 1-6
POL-SCI 380X Political Science And Politics Credits: 1-6

POL-SCI 381 Mock Trial Credit: 1
A study of the trial process in the U.S. judicial system focusing on the structure and rules of trials, including the role of attorneys. Combination of student performance with in-class lecture and discussion.

POL-SCI 403 Political Ideology Credits: 3
A critical examination of contemporary political ideologies including democratic and authoritarian theories.

POL-SCI 404 Conflict Resolution and Cooperation Credits: 3
This course examines theories of cooperation in the international system. Students will assess the challenges to international cooperation and the means through which states and non-state actors overcome those challenges. Students will critically evaluate theories of conflict resolution and cooperation, while learning to apply those theories to current events.

POL-SCI 406 Presidential Politics Credits: 3
This course will examine the American presidency as an institution, and will analyze its role in the American political system. It will also consider the administrations of the various presidents.

POL-SCI 407 Congressional Politics Credits: 3
Focus on the U.S. Congress and its role in the political process, surveying theories and empirical research on congressional campaigns, internal procedures, and the relationship between Congress and the other branches of government.

POL-SCI 408 Judicial Politics Credits: 3
An examination of the judiciary in the American political process, emphasizing the role of judges, lawyers and the Supreme Court.

POL-SCI 424 Urban Politics and Community Power Structures Credits: 3
This course surveys and analyzes the literature covering urban politics. Students will gain both a theoretical understanding of and empirical grounding in the politics of urban America. An array of important political, social and economic problems that impact urban politics will be examined.

POL-SCI 425 Seminar in Comparative Politics Credits: 3
A survey of the major research in comparative politics including state building, democracy, economic development, and political violence. 
Prerequisites: POL-SCI 220.

POL-SCI 427 Presidential Power: foundations, Growth, Issues Credits: 3
An intense examination of the growth of presidential power, from its constitutional foundations; the necessity of a strong presidency, but the potential for abuse. Appropriate for the general student, as well as for majors in political science.

POL-SCI 435 Politics Of The Environment Credits: 3
A survey of the political aspects of environmental issues. The course poses the problems of environmental damage and examines actual and proposed policies aimed at addressing them. Also offered through the PACE program.

POL-SCI 440 Contemporary Political Thought Credits: 3
Political philosophy from Nietzsche to today.

POL-SCI 442 American Political Thought Credits: 3
This course will focus on intellectual reactions to the major periods in American history (the movement for independence, the writing of the Constitution, the Jacksonian period, the Civil War debate, the growth of big business, the rise of the positive state and contemporary America). Contemporary theorists will be included along with Adams, Jefferson, Madison, Hamilton, Marshall, etc.

POL-SCI 451 International Politics In Europe Credits: 3
An examination of developments in international politics in Europe since the end of the Cold War. Issues are discussed in the context of relevant theories of international relations.

POL-SCI 452 Concepts in International Relations Credits: 3
This course exposes advanced undergraduate students to major conceptual and theoretical approaches to international relations. 
Prerequisites: Prior course in international relations, politics, economics, or history.

POL-SCI 480 Government And Politics Credits: 1-6
This variable credit course will explore different contemporary issues and problems related to government and politics. Credit may apply to the major but will not satisfy any of the four subfields distribution requirements.

POL-SCI 490 Senior Seminar Credits: 3
A review, analysis and integration of the literatures of the several sub-fields of the discipline. For senior political science majors only. 
Prerequisites: Senior standing.
POL-SCI 491 Internship Credits: 1-6
With the written consent of the department chairman, students may participate in structured internship programs approved by the department for a maximum of six hours.

POL-SCI 492WI Senior Seminar (Capstone) Credits: 3
This intensive survey of political science provides graduating seniors an opportunity for integration and review of their study of political values, behavior, and institutions. Satisfies both writing intensive and capstone requirements.

Prerequisites: Senior standing in political science, RooWriter.

POL-SCI 493 Study Abroad Credits: 1-6
With prior approval from the department advisor, students may complete coursework at an approved foreign university and receive up to 6 hours of political science credit.

POL-SCI 497 Political Science Tutorial Credits: 3
Senior political science majors may apply to do independent study under a selected professor. Must have written consent of the professor prior to registration. Only one tutorial will count toward the major.

POL-SCI 498 Honors Tutorial Credits: 1-3
Senior political science majors with a grade point average of 3.4 or above in political science may apply to do independent study under a selected professor. Must have written consent of professor prior to registration. Only one tutorial will count toward the major.

POL-SCI 5501 Seminar in American Government Credits: 3
A seminar involving intense examination of the foundations, development, and structure of American national government through study of a broad range of classic materials and current research findings; course will prepare a political science graduate student to teach an introductory college course in American government.

Prerequisites: Graduate Standing.

POL-SCI 5505 Scope And Methods Of Political Science Credits: 3
This seminar surveys the various descriptive and quantitative approaches to the study of politics, government and public policy. It covers the methods used in various sub-disciplines and the models employed in political analysis.

POL-SCI 5506 Research Design and Analysis Credits: 3
This course focuses on methods of data gathering, management, and analysis used in political science research. Students gain an understanding of different types of data including surveys, experiments, and archival records. The curriculum will also include ways that these data are managed and analyzed, and how the results are presented in a useful manner.

POL-SCI 5513 Seminar in Comparative Politics Credits: 3
A survey of the major research in comparative politics including state building, democracy, economic development, and political violence.

Cross Listings: POL-SCI 425.

POL-SCI 5521 Judicial Politics Credits: 3
This course addresses broad trends of current research in the area of the judicial process based on empirical studies and the various methodological tools currently used by researchers. Case studies may be used to illustrate in depth the institutional aspects of the judicial process. Biographies may also be used to emphasize the personal and environmental factors which affect judicial decision making.

POL-SCI 5522 Seminar In The Presidency Credits: 3
Critical examination of the American presidency, with in-depth research into selected themes and presidents.

Prerequisites: POL-SCI 406.

POL-SCI 5524 Urban Politics Credits: 3
A seminar on politics and government in urban areas with special attention to community leadership, power structures, interest group and party activity, political behavior, and movements toward local government reform.

POL-SCI 5530 Seminar in International Relations Credits: 3
This course examines major schools of thought and contemporary research in international relations. Topics discussed include international systems, the causes of war and peace, collective security, and international political economy.

POL-SCI 5541 American Political Thought Credits: 3
This course will focus on intellectual reactions to the major periods in American history (the movement for independence, the writing of the constitution, the Jacksonian period, the civil war debate, the growth of big business, the rise of the positive state and contemporary America). Contemporary theorists will be included along with Jefferson, Madison, Hamilton and Marshall.

POL-SCI 5542 Constitutional Interpretation Credits: 3
This course will provide an in-depth treatment of selected areas of constitutional development, related to various aspects of public policy developed under the Constitution through judicial interpretation, including federalism, equality, fundamental rights and freedom of expression.
POL-SCI 5570 The Politics Of Social Security Credits: 3
This course will concentrate upon the principles of social insurance in general, and of the American Social Security system in particular. It will consider the system in relation to the history and traditions of American society. It will analyze popular misconceptions and will pay special attention to the political, economic, and demographic issues relevant to Social Security's current operation and to the program's future.

POL-SCI 5575 Political Ideologies Credits: 3
Consideration of political ideologies and their effects, with in-depth research into selected topics.

POL-SCI 5580 Government And Politics Seminar Credits: 3
Offered as a special seminar in the individual faculty member's area of research specialization. The seminar may be repeated for credit when the topic varies. The topic and instructor will be announced in advance.

POL-SCI 5590 Directed Studies And Research Credits: 1-6
Under the direction of the instructor, students in this course will produce a major research paper: a self-contained thesis chapter, an article for publication or the equivalent. May be repeated for credit.

POL-SCI 5599 Thesis Credits: 1-6
Directed specialized research.

POL-SCI 5688 Doctoral Research Seminar Credits: 3
Students will produce a major research paper under the direction of the instructor. The research project will consist of a self-contained chapter of the dissertation or a work of publishable quality. May be repeated for credit.

POL-SCI 5697 Doctoral-Level Independent Readings Credits: 3
Individual readings under the supervision of members of the Political Science Graduate or Doctoral Faculty in the specified topic or topics. May be repeated. May not be taken during an academic year in which a graduate course or seminar is offered on the topic.

POL-SCI 5697A Doctoral-Level Ir: American National Politics And Institutions Credits: 3

POL-SCI 5697B Doctoral-Level Ir: International Politics And Processes Credits: 3

POL-SCI 5697C Doctoral-Level Ir: Public Law Credits: 3

POL-SCI 5697D Doctoral-Level Ir: Public Opinion And Voter Behavior Credits: 3

POL-SCI 5697E Doctoral-Level Ir: Research Methods Credits: 3

POL-SCI 5697F Doctoral-Level Ir: Political Theory Credits: 3

POL-SCI 5697G Doctoral-Level Ir: Urban And State Politics Credits: 3

POL-SCI 5699 Research And Dissertation Credits: 1-12
Directed specialized research.

POL-SCI 5899 Required Graduate Enrollment Credit: 1
Minor in Political Science

Student Learning Outcomes

Students graduating from this program will:

- critically evaluate their political and social environment.
- obtain an understanding of the workings of government and politics.
- develop skills in critical thinking, analysis and communication.

Requirements

A minor in political science requires the successful completion of 18 hours of coursework within the discipline. At least 9 hours must be at the 300- to 400-level. In addition, at least 9 hours must be earned at UMKC. Only courses in which a grade of C- or better is earned will count towards the minor. It is advisable for students to talk with the department advisor regarding course selection as some are offered on a rotation basis.

Bachelor of Arts: Political Science

University Requirements

General Education

The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment

Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations

Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes

Students graduating from this program will:

• Compare and contrast American government with democratic and non-democratic regimes.
• Enumerate the key questions that animate the field of political science.
• Analyze both positive and normative questions of power and governance.
• Analyze a key political debate.
• Communicate effectively in oral presentations of their analyses of key political debates.

'Total credits' in this section indicates the number of General Education Core credit hours that are not met by the degree specific requirements outlined below.

Total Credits 21

1 See the UMKC General Education Core (p. 2250) section of the catalog for available Anchor and Focus course options.
**Constitution Course Requirement**

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

</tbody>
</table>

1. Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

**College of Arts & Sciences Degree Requirements**

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

1. ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.
2. This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

**Major Requirements**

The department requirement for a major is 30 hours of political science credit. Students must achieve a GPA of at least 2.0 in political science and no credit will be given for courses in which the grade is below C-.

At least 21 hours of political science coursework must be at the 300- to 400- level. Students transferring from other institutions should check as soon as possible to determine transferability.

Students must successfully complete the major requirements below with at least 12 hours of the noted upper division (300+) course requirements completed at UMKC.

General Electives
Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

Tools for Planning and Fulfilling Academic Requirements
UMKC’s Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC’s Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC’s Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Master of Arts: Political Science

Student Learning Outcomes

Students graduating from this program will:

- Describe the fundamental theories and key concepts in American politics, comparative politics, and international relations.
- Synthesize and critique the literature in American politics, comparative politics, and international relations.
- Assess a research question by defining concepts, and collecting, measuring, and analyzing data.

Program Requirements

The Master of Arts degree in political science requires the successful completion of either of the following sets of requirements:

- Non-Thesis Option - 30 semester hours of approved coursework.
- Thesis Option - 24 semester hours of approved coursework and 6 hours of thesis (POL-SCI 5599). Students must gain permission to write a thesis. Permission to do so depends on the quality of the thesis proposal, the student's writing skills, and the ability of the Department to supervise the student in the subject area of the proposed thesis. An oral defense of the thesis is required.

Required Coursework

All M.A. candidates must successfully complete the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>POL-SCI 5501</td>
<td>Seminar in American Government</td>
<td>3</td>

<td>Seminar in Comparative Politics</td>
<td>3</td>
</tr>
<tr>
<td>POL-SCI 5530</td>
<td>Seminar in International Relations</td>
<td>3</td>
</tr>
</tbody>
</table>

With permission of the principal M.A. advisor, students may transfer six credit hours of graduate work from other institutions, and may count no more than six credit hours of pre-approved graduate coursework in other UMKC departments.

Candidates also may take up to six credit hours of 300- or 400-level coursework in political science at UMKC and count them toward the M.A. degree. For a 300- or 400-level course to be accepted for graduate credit, a student must arrange with the instructor in advance to do supplementary work (such as additional reading, writing, and contact hours) and earn at least a B in the course. In addition, the student must not have previously taken an equivalent course at UMKC or elsewhere.

In either the thesis option or the non-thesis option, no more than six hours of readings, independent study or directed studies credit (other than thesis hours) may be counted toward the requirements for the M.A.

In all cases, students in the M.A. program must take at least 15 hours of graduate-level (5500-level) courses in political science at UMKC in fulfillment of their degree requirements. In addition, University of Missouri rules mandate that students in graduate programs must take at least 60% of their course work at the graduate level. Applied to the M.A. program in political science, this means that students must complete at least 18 graduate hours. Graduate courses taken at UMKC in political science and other programs, graduate transfer hours, and thesis hours all count toward fulfillment of this requirement.

Students should consult the MA program faculty advisor upon enrolling to develop a program of study, and meet regularly with the advisor to ensure timely progress toward completion of the degree while meeting their needs and interests in graduate study.

Other information about the Master of Arts in Political Science may be found on the department’s website: http://cas.umkc.edu/politicalscience/degree-programs/graduate/master-of-arts-in-political-science/

JD/MA in Political Science Dual Degree Program

The Department of Political Science and the UMKC School of Law offer a dual degree program for the J.D. and M.A. Students must satisfy the admission and degree requirements for each school and program. Students fully admitted to the School of Law are exempt from the GRE requirement for admission to the M.A. program. For further information, contact the School of Law or the Department of Political Science. Additional information can be found on the department’s website: http://cas.umkc.edu/politicalscience/degree-programs/graduate/jd-ma/.
Dual BA/MA Program in Political Science

Student Learning Outcomes

Students graduating from this program will:

• Compare and contrast American government with democratic and non-democratic regimes.
• Enumerate the key questions that animate the field of political science.
• Analyze both positive and normative questions of power and governance.
• Analyze a key political debate.
• Communicate effectively in oral presentations of their analyses of key political debates.
• Describe the fundamental theories and key concepts in American politics, comparative politics, and international relations.
• Synthesize and critique the literature in American politics, comparative politics, and international relations.
• Assess a research question by defining concepts, and collecting, measuring, and analyzing data.

BA Requirements

The requirement for a major in political science is 30 hours of political science credit. Students must achieve a GPA of at least 2.0 in political science and no credit will be given for courses in which the grade is below C-.

At least 21 hours of political science coursework must be at the 300- to 400-level, and at least 12 hours must be earned at UMKC. Students transferring from other institutions should check with the department's undergraduate advisor as soon as possible to determine which of their hours will transfer for political science credit.

Required Coursework (12 hours)

Students must complete the following four courses:

• POL-SCI 210 American Government
• POL-SCI 220 Introduction To Comparative Politics
• POL-SCI 302 Political Research And Analysis
• POL-SCI 492WI Senior Seminar (Capstone)

Remaining Coursework (18 hours)

Students are required to take at least one course in three of four subfields, which include American Politics, Comparative Politics, International Relations, and Political Theory. Nine additional political science hours must be completed. As part of their additional nine hours, students may complete an internship, study abroad, or an independent study. Please see your major advisor for more information.

2. Comparative Politics (304, 316, 355, 357, 359, 365, 369, 425)
4. Political Theory (301, 341, 344, 403, 440, 442)

MA Requirements

Students pursuing the MA as part of the dual BA/MA program will complete 30 hours of political science coursework; 9 hours of coursework at the 300/400 level from the undergraduate degree may be counted toward the graduate degree.

Required Coursework (18 hours)

All BA/MA students must complete the following six courses:

• POL-SCI 5501 Seminar in American Government
• POL-SCI 5530 Seminar in International Relations
• POL-SCI 5580 Government And Politics Seminar
• POL-SCI 55XX Research Design
• POL-SCI 302 Political Research And Analysis
• POL-SCI 55XX Quantitative Analysis II

Remaining Coursework (12 hours)

Students are required to complete an additional twelve hours. Please see the graduate advisor for more information.
Restrictions

With the permission of the graduate advisor, students may count no more than six credit hours of pre-approved graduate coursework in other UMKC departments.

No more than six hours of readings, independent study, or directed studies credit (other than thesis hours) may be counted toward the requirements for the MA.

As part of the BA/MA degree, students may count nine hours of undergraduate coursework toward their BA and their MA. For a 300- or 400-level course to be accepted for graduate credit, a student must arrange with the instructor to do supplementary work such as additional reading, writing, and contact hours. In addition, the student must register and pay for the course at the graduate student rate.

In all cases, students in the MA program must take at least 15 hours of graduate-level (5500-level) courses in political science at UMKC in fulfillment of their degree requirements.
Interdisciplinary Ph.D.
Program Opportunities
The Department of Political Science participates as a co-discipline in the Interdisciplinary Ph.D. program. Detailed information on the general and discipline-specific requirements (p. 1300) appears in the School of Graduate Studies (p. 1185) section of this catalog.
Teacher Certification in Social Studies

Certification as a middle school (grades 5-9) or secondary (grades 9-12) social studies teacher in either Kansas or Missouri requires that a student complete specific requirements in History, Political Science, Economics, Geography, Behavioral Sciences and the School of Education. A separate application for teacher education is required. For further information about the program, consult the School of Education (p. 1018) section of this catalog or contact the Education Student Services Office at (816) 235-2234.

UMKC Pre-Law Program

The UMKC Pre-law Program is designed to help you make wise decisions about becoming a lawyer. It provides advice and information concerning the best possible path for each individual student, from the first semester of undergraduate courses to admission into law school.

The first thing to note about joining the Program is that it is not a major. There is no one major that prepares you for law school. In fact, there are over 30 majors at UMKC that a student may choose from and be on track for entrance into law school.

To garner the skills necessary for success, the pre-law student should select a curriculum that hones and develops superior writing skills, along with excellent oral communication, logical reasoning, and critical reading skills.

It is not enough, however, to be prepared for the academic rigors of law school. You’ll want to ask yourself the following questions:

• Do you really want to become a lawyer?
• What law schools should you apply to?
• What does it mean to be a lawyer?
• What area of the law do you want to practice in?
• What are the alternative careers available to someone with a law degree?

When you have made the decision to pursue acceptance into law school, you’ll need details on how to go about successfully presenting yourself to the admissions committee in your application. The Program provides answers to the following questions:

• What do you need to do to apply to law school?
• What do you need to do to succeed in law school?
• How can you afford law school?

90+ Program

UMKC’s School of Law and The College of Arts and Sciences offer the motivated student a faster track to a legal education. While an undergraduate degree is usually a requirement for admission into law school, UMKC offers students the opportunity to start law school after completing as little as 90 undergraduate credit hours. Students then complete their undergraduate degree with law school credits. By overlapping credits, students can shorten the length of time necessary for completing their education by as much as one year.

90+ Participation

A student’s first 30 hours at UMKC’s School of Law may fulfill as many as 30 credit hours of non-Arts and Sciences electives towards an undergraduate degree. Therefore, if a student completes all of the general education, major, and upper-level requirements, leaving only elective credits to receive an undergraduate degree, the student may apply to the law school at UMKC.

If accepted, the student can start law school without having actually received an undergraduate bachelor’s degree. The student will receive the undergraduate degree after earning the requisite amount of law school credits necessary to fulfill the remaining amount of undergraduate elective credits (up to 30 hours).

Any student who is pursuing a degree in The College of Arts and Sciences may participate. The 90+ program does not guarantee admission into UMKC’s School of Law. Participants must apply and otherwise qualify for law school admission by having a competitive undergraduate GPA and LSAT score.
Road to Admission

Any interested student should meet early and often with the pre-law advisor. Given the number of requirements that must be satisfied in such a short period of time, potential 90+ students must monitor their progress with great care.

There are a number of necessary tasks to be completed by the student in order to qualify for the 90+ Program:

• The final 30 hours prior to enrolling in UMKC’s School of Law must be from courses in UMKC’s College of Arts and Sciences.
• Requirements to be completed prior to enrollment at UMKC’s School of Law:
  • All general education requirements
  • All major requirements (and those for a minor if student chooses to complete a minor)
  • 36 hours of junior/senior (300/400-level) coursework
• Application for Graduation: After earning approximately 60-75 credit hours, the interested student should apply for graduation in the College of Arts and Sciences Student Services Office (Scofield Room 9). A student will review their degree audit(s) with the pre-law advisor as well as faculty advisors in major/minor programs to confirm status towards degree completion. This should be completed by the end of the fall semester prior to starting law school.
• Letter of Interest: After applying for graduation and completing the audit review, students must contact the pre-law advisor to arrange to have a letter sent to UMKC’s School of Law stating that there is a plan in place that will allow the student to complete all requirements prior to enrolling in the law school the following fall. This process should be done during the student’s last year of undergraduate study.

Six-Year Law Scholars

The Six-Year Law Scholars Program allows high-achieving high school students to prepare for their application to UMKC School of Law through a selective cohort as part of the 90+ Program described above while earning their undergraduate degrees.

• First-time college freshmen who have a minimum comprehensive ACT score of 26 or an equivalent SAT score, and a minimum high school core GPA of 3.5 may apply for admission to this program by completing the general application for admission to UMKC.
• Six-Year Law Scholars will meet regularly with an advisor to ensure that they can complete their undergraduate requirements prior to application to early entry into UMKC School of Law.

Admission Expectations for the UMKC School of Law under the Six-Year Law Scholars Program

• Students who have completed at least 90 degree-acceptable undergraduate hours of credit may be admitted to the UMKC School of Law as long as they have completed all non-elective course work towards their bachelor’s degree.
• Competitive applicants to the Law School will have a cumulative grade point average of 3.3 or higher at the point at which the student applies to the Law School and an LSAT score that is equal to or greater than UMKC Law School’s 50th percentile of the most recent entering class (in 2017, 152).
• All candidates for this program must, during the Law School application process, complete a satisfactory interview with the UMKC School of Law Admissions Committee. Candidates must also demonstrate potential to be a successful law student and an absence of disqualifying character or fitness issues.
• Applicants must otherwise complete all the normal requirements of the law school application process, including but not limited to application through LSAC, personal statement, transcript, letters of recommendation, etc.
• Students admitted under this program must be able to document completion of an undergraduate degree prior to starting their second year of study at the UMKC School of Law.

Associate Professors:
Kymberly K. Bennett, Seung-Lark Lim, Ricardo Marte, Melisa Rempfer

Assistant Professors:
Oh-Ryeong Ha, Erin P. Hambrick, Joah L. Williams

Department Description
The Department of Psychology is focused on behavioral science contributions to health and well-being. Our faculty members are national and international leaders in research on areas such as HIV/AIDS, tobacco use, obesity and eating disorders, neuropsychological functioning, safety and violence and community factors in health. We have strong and active collaborations with important community partners such as Saint Luke's Hospital, Mid America Heart Institute, KC Care, University of Kansas Medical Center, Truman Medical Center and the Calvary Community Outreach Network. At the undergraduate level, the department offers a general program of study leading to the bachelor of arts degree in psychology. A minor in psychology is available to students majoring in other disciplines. Graduate programs are also offered by the Department of Psychology. See the "Degree Programs" (http://cas.umkc.edu/psychology) link at the Department of Psychology website for information on current graduate degree offerings.

Career Implications of the Degree
Psychology is a broad discipline incorporating material from the natural sciences, other social sciences and the humanities. The study of psychology entails an examination of the human condition that is relevant to a wide range of occupations. A psychology major serves as the basis for an excellent liberal arts education and also serves as an excellent introduction to the world of scientific inquiry. Psychology students learn about the important concepts that underlie current scientific thought and they receive training in the application of psychological research methods.

The educational background obtained by a student majoring in psychology will prove useful in a variety of professional settings and will provide adequate preparation for entry-level positions in a variety of fields. Graduates with bachelor's degrees in psychology have established careers in such diverse areas as:

- Business and industry
- Child care
- General healthcare
- Gerontology
- Mental health services
- Probation and parole
- Public relations and marketing
• Research or laboratory assisting
• Services for people with developmental disabilities
• Social services

For students interested in pursuing a career in the field of psychology, a psychology major is clearly a logical beginning. There are positions available to job candidates with bachelor’s degrees in psychology; however, most professional opportunities in psychology require advanced degrees (i.e., master’s, doctorate). Students who want to pursue a career in psychology are advised to prepare for graduate study. The psychology major at UMKC offers a solid educational foundation for students who plan to work toward advanced degrees in the field.

Department of Activities

Honor Society
The department has a chapter of Psi Chi, the national honor society in psychology. Each year Psi Chi presents a variety of educational and social programs. Membership is open to students at both undergraduate and graduate levels. Regular meetings are held throughout the academic year. Information about membership and current events is available on RooGroups.

Psychology Club
The department also has a Psychology Club. The members of the Psychology Club join with the members of the Honor Society for educational social programs. Membership is open to students at both undergraduate and graduate level who have an interest in psychology. Regular meetings are held throughout the academic year jointly with PsiChi. Information about membership and current events is available on RooGroups.

Bernard Lubin Memorial Speaker Series
This speaker series is sponsored by UMKC’s Department of Psychology and is named in memory of Dr. Bernard Lubin, Curators’ Professor Emeritus, to honor his contributions and dedication to the field of psychology.

Graduate Psychology Activities Committee
The focus of the Graduate Psychology Activities Committee (GPAC) is to coordinate graduate student and student-faculty social events, enhance communication between the members of various graduate programs in the department, and coordinate educational events to support the professional development of students in the graduate programs. The committee and the events planned are open to graduate students within the Department of Psychology.

Advising System
For Undergraduate Psychology Program information, please contact the Psychology Advising Office at umkcpuga@umkc.edu or (816) 235-1092.

For UMKC College of Arts & Sciences general education requirements, please contact the College of Arts & Sciences Student Services Office directly at (816) 235-1148.

See the Undergraduate Psychology Program Advising website (http://cas.umkc.edu/psychology/undergrad/advising.asp) for more information.

Financial Aid
Financial aid information can be found on the UMKC Financial Aid website at: http://www.sfa.umkc.edu/site2/

Part-time graduate teaching and research assistantship positions may be available to Psychology doctoral students. These opportunities will be discussed with students at the time of their acceptance into the program.

• Doctor of Philosophy: Clinical Program (Health Emphasis) Option (p. 557)
• Doctor of Philosophy: Experimental Health Psychology Option (p. 561)

Courses
PSYCH 151 College Study Skills and Resources Credits: 3
Course helps Propel students develop critical thinking, time management and academic skills, necessary for success in college and future employment. Students will learn about their individual learning styles and skills as well as the academic resources available to help them develop new skills. They will also explore and use various software and apps to help them stay organized and build self-sufficiency.
Prerequisites: Propel Student.

PSYCH 152 Developing a Person-Centered Life Plan Credits: 3
In this course students in the Propel Program will develop a person-centered plan that will serve as a foundation for their college experience and their future. The course approaches the topic with the belief that people with disabilities are people first and therefore the person-centered life engages the whole person and ensures person-centered supports.
Prerequisites: Propel Student.
PSYCH 153 Communication Skills for Networking, Employment, and Friendship Credits: 3
Through this course, students in the Propel program will gain communication skills, networking skills; learn how to build friendships; and gain important insight on personal safety.
Prerequisites: Propel Student.

PSYCH 154 Personal Finance and Disability Services Credits: 3
This course will introduce Propel students to disability services and systems that they will need in their adult lives. A second focus on personal finance will help students understand how disability benefits affect their personal finances.
Prerequisites: Propel Student.

PSYCH 155 Developing a Career Credits: 3
Career development is a journey of self-assessment and decision-making. Using an interactive discovery process, students identify possible careers that would match personality type, strengths, interests, skills, and/or values. With Career Center resources, Propel students identify strategies for leveraging the college experience to jumpstart a career.
Prerequisites: Propel Student.

PSYCH 156 Transition Skills Credits: 3
Propel students will learn how to identify, report and avoid abuse, neglect, and exploitation. They will also learn about their personal rights, including the right to confidentiality.
Prerequisites: Propel Student.

PSYCH 207 Orientation to the Psychology Major Credit: 1
This course provides an introduction to the field of Psychology, and to the Department of Psychology at UMKC. Students will explore major requirements, behaviors associated with academic success, campus resources, and faculty research and teaching interests.

PSYCH 210 General Psychology Credits: 3
A survey of the fundamental principles, theories, and methods of psychological science.

PSYCH 252 Psychology of Communicating Your Lived Experience Credits: 3
This course provides frameworks for people interested in communicating their lived experiences with disabilities. This course will not satisfy the College of Arts and Sciences' Social and Behavioral Science distribution or Humanities distribution degree requirements.

PSYCH 253 Disability Civil Rights Movements Credits: 3
A survey of disability civil rights movements. The course includes such topics as institutionalization and deinstitutionalization, education, protests, civil rights advocacy, and the Americans with Disabilities Act. Students will develop a timeline of disability history milestones and conduct oral history interviews with Kansas City area individuals with disabilities.
Prerequisites: Propel Student.

PSYCH 255 Accessible, Inclusive Internships Credits: 3
Through this experiential learning opportunity, students complete an internship with a company, non-profit, governmental or community-based organization. Through a combination of direct observation, reflection, and evaluation, students relate the experience to their academic study and to their career exploration.
Prerequisites: Propel Student.

PSYCH 257 Disability History and Culture Credits: 3
An examination of selected political, cultural, economic and social forces shaping disability from historical and present day perspectives. The course is taught with discussions and reflections with local disability leaders.
Prerequisites: Propel Student.

PSYCH 258 Leadership and Disabilities Credits: 3
Students learn about leadership theories and develop leadership skills as they apply theory to practical situations.
Prerequisites: Propel Student.

PSYCH 270P Compulsive Gambling And Other Addictions Credits: 3
Course will focus on compulsive gambling and the psychology of addiction. Alcohol, drug, food and sex addiction will also be explored. After attending this course, the student will be able to understand the problem gambling continuum, the phases of the problem gambler and how this addiction affects the family.

PSYCH 302 Experimental Psychology Credits: 4
The rationale and methodology of experimentation in psychology, emphasizing interpretation of data and the design of experiments.
Prerequisites: PSYCH 210 with a C- or better.
PSYCH 302WI Experimental Psychology Credits: 4
The rationale and methodology of experimentation in psychology, emphasizing interpretation of data, the design of experiments, and writing. Lecture laboratory each week.
Prerequisites: PSYCH 210 with a C- or better; RooWriter.

PSYCH 304 Learning Credits: 3
Survey course of the fundamental principles of contemporary theories of learning.
Prerequisites: PSYCH 210 with a C- or better.

PSYCH 305 Psychology Of Women Credits: 3
A critical examination of studies of the psychology and behavior of women.
Prerequisites: PSYCH 210.

PSYCH 307 Academic and Career Opportunities in Psychology Credits: 2
This course explores post-BA career options for students majoring in Psychology. Students will examine psychology-related career opportunities with a bachelor's degree, and options for psychology-related careers after earning a graduate degree. Emphasis will be placed on students developing academic plans that will prepare them for professional success.
Prerequisites: PSYCH 207 (or co-requisite) and PSYCH 210 with C- or better. Must be Psychology BA major and have completed a minimum of 15 credit hours.

PSYCH 308 Sensation and Perception Credits: 3
The study of how we perceive the world through our senses, including the anatomy and function of the sense organs and the effect of normal and altered sensory experience on behavior.
Prerequisites: PSYCH 210 with a C- or better.

PSYCH 311 Applied Psychology Credits: 3
The major applications of scientific psychology to human problems and behavior, such as business, mental health, and education are covered. May not be taken for graduate credit.
Prerequisites: PSYCH 210.

PSYCH 312 Social Psychology Credits: 3
Survey of behavior in the actual, imagined, and implied presence of others, including attitudes, the self, conformity, altruism, aggression, prejudice, and group processes. May not be taken for graduate credit.
Prerequisites: PSYCH 210 with a C- or better.

PSYCH 316 Quantitative Methods In Psychology Credits: 3
Introduction to the use, calculation, reporting, and interpretation of descriptive and elementary inferential statistical techniques in psychological science. Prerequisites: PSYCH 210 with a C- or better; and MATH 110 or higher.

PSYCH 320 Ethnic and Minority Perspectives in Psychology Credits: 3
The theory, methods and content of psychology relevant to the interests and needs of ethnic minorities, and the contributions of ethnic groups and other minorities to psychology.
Prerequisites: PSYCH 210 with a C- or better.

PSYCH 322 Child Psychology Credits: 3
Survey of child development from conception to adolescence, including major theories, developmental milestones and research related to the physical, cognitive, social and emotional growth of children. May not be taken for graduate credit.
Prerequisites: PSYCH 210 with a C- or better.

PSYCH 323 Theory and Methods of Personality Credits: 3
The development, organization, dynamics and determinants of personality. May not be taken for graduate credit.
Prerequisites: PSYCH 210 with a C- or better.

PSYCH 328 Psychology Of Human Sexual Behavior Credits: 3
The psychological, biological and social factors that contribute to human sexuality, and a review of human sexual development across the lifespan.
Prerequisites: PSYCH 210.

PSYCH 331 Introduction to Health Psychology Credits: 3
A survey of the role of psychological factors in physical health and well-being including in health promotion, disease prevention, and adjustment to illness.
Prerequisites: PSYCH 210 with a C- or better.
PSYCH 405 Motivation and Emotion Credits: 3
A review of the principles of both human and animal motivation from classical drive, behavioral, and cognitive perspectives. May not be taken for graduate credit.
Prerequisites: PSYCH 210 with a C- or better.

PSYCH 406P Introduction To Developmental Disabilities Credits: 4
Principles of human development, causes of disability, and the effects of disability on individuals and families over the life span.
Prerequisites: PSYCH 210.

PSYCH 407 Cognitive Psychology Credits: 3
Historical foundations and current state of knowledge regarding human information processing and the mental processes that underlie human behavior.
Prerequisites: PSYCH 210 with a C- or better.

PSYCH 407P Developmental Disabilities And Community Life Credits: 4
Focus is on developmental disabilities in community life and interdisciplinary process as a means of coordinating services and supports in community settings. Students will learn about specific disciplines and professions and how they must work together in the community. Topics include the State developmental disabilities network and service system, the principles of person-centered planning, the effects of severe disability on families, and the dynamics surrounding community inclusion of persons with severe disabilities.

PSYCH 415 History And Systems Of Psychology Credits: 3
The historical development of the field of psychology, including a review of its major theoretical schools and methodological advances.
Prerequisites: PSYCH 302WI and PSYCH 316 (C- or better).

PSYCH 418 Brain and Behavior I Credits: 3
Introduction to the neural bases of human behavior, including movement, learning and memory, sensation and perception, emotion, cognition, psychological, and neurological disorders.
Prerequisites: PSYCH 210 with a C- or better.

PSYCH 419 Biopsychology II Credits: 3
Advanced study of the neural bases of behavior.
Prerequisites: PSYCH 418.

PSYCH 433 Abnormal Psychology Credits: 3
Introduction to major psychological problems and disorders as well as consideration of some of the many interacting biopsychosocial influences viewed from an empirically-informed perspective. May not be taken for graduate credit.
Prerequisites: PSYCH 210 with a C- or better.

PSYCH 440 The Psychology Of Aging Credits: 3
Survey of concepts, theory, and methods in the psychology of aging, including biological and social influences on behavior.
Prerequisites: PSYCH 210.

PSYCH 441 Adult Development and Aging Credits: 3
Major developmental theories of adult development and aging are reviewed, including the impact of cohort, gender, race/ethnicity, socioeconomic status, and culture on development.
Prerequisites: PSYCH 210 with a C- or better.

PSYCH 450 Special Topics Credits: 1-3
Offered as the result of student demand, specialized faculty interests, or the availability of a visiting expert in a field related to psychology.

PSYCH 453P Family Life Cycle: Dev Approach Understanding Family Dynamic Credits: 4
The primary purpose of this course is to enhance the student’s understanding of the dynamics of healthy families. After receiving a historical overview of the development of families and the cultural roots and traditions behind family structures, child-rearing values and other factors, the student will be given a framework to understand how healthy families establish a dynamic balance between individual and group needs, and between needs to establish structure and to be flexible in the face of change. A second framework will also be presented to provide students with an understanding of how families use their internal resources to cope with life stressors. Given these basic cultural, interactional, and coping frameworks as foundation for understanding, students will explore how families change as they move through time from formation as a couple through early child-rearing, adolescence, mid-life, and post retirement. Implication for human service professionals will be presented.

PSYCH 461 Field Practicum Credits: 1-6
Provides supervised human services experience in an external community agency or organization that addresses human or social problems.
Prerequisites: PSYCH 210 with a C- or better.
PSYCH 461A Field Practicum Credits: 4
Provides supervised experience working in community agencies/organizations which address various human and social problems. A minimum of ten hours per week at practicum site and class attendance are required. **Prerequisites:** PSYCH 302WI; at least 15 credit hours of psychology.

PSYCH 490 Directed Individual Research Credits: 1-6
Students work on an individual research project under the supervision of a departmental faculty member.

PSYCH 491 Psychology Research Externship Credits: 1-6
Provides supervised research experience in an external community agency or organization that examines basic or applied research questions. **Prerequisites:** PSYCH 210 with a C- or better.

PSYCH 495WI Contemporary Issues in Psychology Credits: 3
In-depth analysis of a contemporary issue in psychology. Emphasis will be placed on reading and writing about empirical approaches to contemporary challenges in psychological science. **Prerequisites:** PSYCH 210 with a C- or better; PSYCH 302; Roo Writer.

PSYCH 5504 Contemporary Issues In Learning Credits: 3
A discussion and analysis of recent research and theoretical papers in learning. The student will have to demonstrate undergraduate competence in learning in the first few weeks of this course in order to remain enrolled.

PSYCH 5505 Motivation Credits: 3
The definition of the concept of motivation is explored. Emphasis is placed upon integration of the concept of motivation into comprehensive theoretical explanations of phenomena. Students should have in their background a foundation in Learning Theory (or at least Theory Construction) and Experimental (Scientific Method). Previous laboratory experiences are desired.

PSYCH 5507 Cognitive Psychology Credits: 3
An overview of the cognitive approach to the study of human behavior. Recent research and theoretical issues in the areas of perception, memory, and concept formation are emphasized.

PSYCH 5509 Assessment 1: Intellectual And Cognitive Assessment Credits: 3
This course is designed to provide students with a foundation in the use of intellectual and cognitive assessment instruments in clinical evaluation. The course covers theoretical issues pertinent to intellectual and cognitive assessment, as well as basic assessment skills including administration, scoring, interpretation, and communication of results for commonly used measures.

PSYCH 5510 Assessment Methods In Professional Counseling Credits: 3
This course provides an understanding of assessment process and assessment techniques. Skills and practice in selection, administration, and interpretation of representative assessment instruments. Two semester hours lecture, two semester hours lab experience per week. **Prerequisites:** Course on assessment of intellectual functioning.

**Cross Listings:** CPCE 5515.

PSYCH 5511 Principles Of Assessment In Psychology Credits: 3
This will be a field practicum course in which test batteries will be used to assess and evaluate the intelligence, personality, and aptitude of the individual. **Prerequisites:** PSYCH 5510.

PSYCH 5512 Contemporary Issues In Social Psychology Credits: 3
A critical survey of the recent literature in social psychology with emphasis on experimental investigations.

PSYCH 5515 Advanced Systems And History Of Psychology Credits: 3
In depth review of the major theoretical systems of psychology in terms of historical assumptions, methodologies and developments with the goal of enabling the student to better evaluate current theories and assumptions in psychology.

PSYCH 5516 Quant Analysis 1: Regression And Analysis Of Variance Credits: 3
This graduate level statistics course for students in education and the behavioral sciences provides a strong conceptual understanding of two major statistical procedures with the context of the general linear model: multiple regression and numerous analysis of variance (ANOVA) models. Students will learn to select appropriate statistical techniques, tests the assumptions of the techniques, analyze data using statistical software, and report the results of their analyses in the format of the American Psychological Association (APA, 2002). **Prerequisites:** EDUC-R&P 5505, PSYCH 316.

**Cross Listings:** EDUC-R&P 5605.
PSYCH 5517 Quantitative Analysis II: Advanced Topics In Regression And Mda Credits: 3
This graduate level statistics course for students in the behavioral sciences and education provides a strong conceptual understanding of advanced topics in regression (interaction effects, logistic regression, path analysis) and various multivariate techniques (MANOVA, canonical correlation, factor analysis). Students will complete a series of data based projects that allow them to demonstrate their skills in analysis, reporting and interpretation of findings.
**Prerequisites:** EDUC-R&P 5605 / PSYCH 5516 and EDUC-R&P 5505.

Cross Listings: EDUC-R&P 5606.

PSYCH 5518 Advanced Biopsychology Credits: 3
This course assumes that the student has mastered the basics of biopsychology, and deals with this topic in greater depth and scope than PSYCH 418. It will begin with a brief review and update of basic materials of neuroanatomy, neuronal conduction, and synaptic transmission but will quickly turn to an emphasis on biological influences on human psychology, in particular those biological factors that are of practical significance in the lives of patient and non-patient populations.
**Prerequisites:** PSYCH 418 (or equivalent).

PSYCH 5521 Advanced Social Psychology Credits: 3
The study of the individual in a social context. How social structure and interaction influence the behavior of an individual. Several contemporary systematic positions will be compared.

PSYCH 5522 Contemporary Issues In Developmental Psychology Credits: 3
A discussion of recent research literature in developmental psychology leading to an individual research project in this area.

PSYCH 5523 Seminar Personality Theory And Methodology Credits: 3
A study of the social-cultural, trait, learning, perceptual, motivational, and field theories of personality with special emphasis on research studies and the methodology of personality research.
**Prerequisites:** PSYCH 323.

PSYCH 5530 Addressing Health Disparities through Community-based Participatory Research Credits: 3
The purpose of this course is to familiarize students with the principles of community-based participatory research as a strategy to reduce health disparities. Students will learn how CBPR principles are applied across the research continuum for developing new community partnerships, conducting needs assessments, developing culturally-appropriate health promotion interventions in collaboration with community-based organizations, and packaging health interventions for dissemination in minority communities. This class is organized with a service learning component which will require students to work with a local community-based organization on a health issue for which there is joint interest.

PSYCH 5533 Psychopathology Credits: 3
A review of the experimental-clinical literature concerning the behavior disorders with special reference to their classification and etiology. Course generally will be restricted to students enrolled in license-eligible specialties who have had an undergraduate course in abnormal psychology.

PSYCH 5538 Development And Evaluation Of Assessment Tools Credits: 3
This survey course examines test theories, construction, and measurement theories. Within the context of a variety of conceptual frameworks and examples, students become knowledgeable about the various purposes, approaches, and computer software tools for measurement.
**Prerequisites:** PSYCH 5516 and PSYCH 5517.

PSYCH 5540 The Psychology Of Aging Credits: 3
This course will identify major issues concerning psychology related to aging. The major influences on the behavior, cognitive functioning and emotions of older adults will be examined. Consideration will be given to individual, group and environmental influences. Possible interventions will be identified. Cross-sectional and longitudinal research will be reviewed in order to examine the changes in individuals due to aging and the differences between cohort groups. Three major areas of information will be the focus: concepts, theory and methods in psychology of aging; biological and social influences on behavior; and behavioral processes. There will be a review of current literature.

PSYCH 5543 Adult Development And Aging Credits: 3
This course will identify major themes and issues of mid-life and older adults. It will examine major developmental theories of adult development and aging. A contextual approach is stressed, including research and theory on the impact of cohort, gender, race/ethnicity, socioeconomic status, and culture on development. Application to real life is integrated throughout the course. There will be a review of current literature.

PSYCH 5550 Field Practicum Credits: 4
Provides supervised experience working in community agencies/ organizations which address various human and social problems. Students receive training in community service oriented skills and approaches, e.g., advocacy, community organizing, program assessment, development and evaluation, outreach, and applied research. Ten hours per week at practicum site and class attendance are required.

PSYCH 5575 Professional Issues And Ethics In Psychology Credits: 3
Ethical and legal problems of research and practice will be discussed. Professional organizations in psychology and their publications will be reviewed.
PSYCH 5575A Professional Issues & Ethics Credits: 3
PSYCH 5580 Special Topics Credits: 1-3
PSYCH 5580AD Special Topics Credits: 1-3
PSYCH 5580SM Special Topics Credits: 1-3
PSYCH 5582 Community Mental Health Credits: 3
A review of current theory and research. The emphasis is on prevention rather than treatment of mental health problems. The assets and liabilities of neighborhood communities for mental health problems will be discussed. Recent methods in crisis intervention are reviewed. Each student will be required to become familiar with a neighborhood with a high incidence of application for mental health care.

PSYCH 5586 Theory, Research And Practice Of Consultation Credits: 3
Theory and research on community, mental health, organizational and agency consultation. Entry, process, outcome and ethical issues surrounding each model of intervention will be explored. Each student will be expected to conduct and report on a consultation project.

PSYCH 5590 Directed Research Credits: 1-6
PSYCH 5597 Directed Readings In Psychology Credits: 3
Intensive readings in areas of joint interest to the enrolled student and the cooperating faculty.

PSYCH 5599 Research And Thesis Credits: 1-9
PSYCH 5601 Experimental Methods In Design And Analysis I Credits: 3
An examination of multifactor and multilevel designs and interactions. Topics covered will include randomized block designs. Latin square designs, complex trend analysis designs, covariance designs and multiple comparison of treatment means.

PSYCH 5604 Field Practicum In Community Psychology Credits: 3
Supervised experience in health care, social welfare, correctional, political, ethnic, and neighborhood agencies. May be repeated six times for up to 18 credit hours.

PSYCH 5611 Theories & Methods Of Assessment & Intervention/Community Psych Credits: 3
Review of the assessment and intervention literature in social situations will be conducted. Students will design and carry out an assessment and an intervention project.

PSYCH 5612 Program Evaluation And Research Dissemination Credits: 3
A study of the area of applied research in which process and outcome characteristics of programs are related explicitly to a set of values, such as program goals, objectives and costs.

PSYCH 5614 Prevention Science I: Theories, Principles And Methods Credits: 3
Course provides a comprehensive overview of the field of prevention emphasizing basic concepts, conceptual models, and approaches associated with prevention in the field of psychology. The goal is to provide knowledge that will allow students to critically evaluate prevention programs in their communities. Students apply their learning by conducting a critical analysis of an existing community prevention and/or health promotion initiative.

PSYCH 5615 Prevention Science II: Applications Credits: 3
This advanced seminar is the follow-up course to Prevention Science I. Emphasis is placed on the application of prevention science to specific content areas (e.g., substance abuse, violence in schools physical or sexual abuse, AIDS/HIV infection, infant mortality, cardiovascular disease, promoting social competence.) A semester project involves an in-depth review of prevention efforts in the chosen area of interest, resulting in a comprehensive research proposal and/or public policy analysis.

Prerequisites: PSYCH 5614.

PSYCH 5622 Theoretical And Ethical Issues In Professional Psychology Credits: 3
This course is designed to introduce first year doctoral students to the fundamental concepts and methods of psychology conceived as the application of scientific and ethical reasoning to human problems. It will provide an in-depth examination of the American Psychological Association code of ethics and its application to the conduct of psychologists. Critical and analytical thinking will be emphasized in all aspects of the course. The course will cover broad models of clinical and counseling psychology and their historical and scientific foundations, issues in diagnosis, cross-cultural applications and professional problems in light of ethical principles, professional standards, scientific data multicultural contexts.

PSYCH 5623 Methods Of Counseling In Professional Psychology Credits: 3
This course is designed to introduce students to the fundamental concepts and methods of counseling in professional psychology. Students will apply ethical and multicultural principles to the helping relationship while learning the basic methods of humanistic, psychodynamic, and cognitive behavioral approaches as they related to the helping process. A main focus of this course is the acquisition of basic helping skills. Students will also become familiar with counseling outcome research and will increase their level of counselor self-awareness.

Prerequisites: PSYCH 5622.

Cross Listings: CPCE 5530.
PSYCH 5625 Health Research Methods: Intro To Epidemiology & Clinical Trials Credits: 3
This course will introduce graduate students in health-related disciplines to research methods utilized in understanding disease and health risk in humans and conducting intervention trials. Students will learn about how epidemiology contributes to: 1) identifying factors that cause diseases; 2) assessing the public health importance of diseases; 3) describing the natural history of diseases; and 4) evaluating procedures for preventing or treating diseases. After completing this course, students should be able to read and summarize epidemiological research papers and answer questions about a study's purpose, design, methods of procedure, results, and major strengths and weaknesses.
Prerequisites: graduate standing; PSYCH 5601, (or equivalent).

PSYCH 5631 Theoretical Foundations Of Health Psychology Credits: 3
This course will introduce students to the theoretical foundations of health psychology, including the Biopsychosocial model, individual and systems level theories of behavior change, stress and coping, disease prevention and health promotion, as well as adherence and relapse models. Upon completion of this course students will possess a broad understanding of how cognitive, behavioral, and social factors interact with biological parameters in influencing morbidity and mortality. In addition, students will become familiar with several substantive areas (e.g., chronic pain, HIV/AIDS, cancer, sleep disorders, cardiovascular risk reduction), research methods, and multicultural and ethical issues in health psychology.

PSYCH 5632 Health Psychology Interventions Credits: 3
This course will introduce students to a wide range of psychological assessment and intervention strategies that can be used in health care settings. Individual, group, community and policy interventions will be discussed. This course may be used for credit in the Health Psychology Discipline of the Interdisciplinary Ph.D. Program.
Prerequisites: PSYCH 5631.

PSYCH 5638 Seminar In Health Care Leadership Credits: 3
This course is designed to offer an educational experience that fosters both the knowledge and skills needed for leaders of healthcare in the future. The instructors will guide students through the process of generating new thinking, creating new knowledge, and enhancing interpersonal and professional effectiveness. Course topics will include what creates health and quality of life, social capital and health, healthcare policy, collaborative problem-solving, and transformational leadership and systems thinking.

PSYCH 5650 Clinical Practicum Credits: 1-6
Advanced supervised assessment and psychotherapy with individuals and groups in applied settings. Preregistration by application to instructor at least 60 days prior to the beginning of the semester. Approval by Psychology Director of Clinical training required.
Prerequisites: PSYCH 5623.

PSYCH 5660 Clinical Health Psychology Internship Credits: 1-6
Planned sequence of training experiences in an organized program designed to prepare students for the practice of professional psychology.

PSYCH 5696 Pre-Dissertation Credits: 1-12
Individualized research experiences to prepare students for the conduct of the dissertation.

PSYCH 5699 Research And Dissertation Credits: 1-16

PSYCH 5899 Required Graduate Enrollment Credit: 1

PSYCH H210 General Psychology Credits: 3
A survey of the fundamental principles, theories, and methods of psychological science.
Bachelor of Arts: Psychology

University Requirements

General Education
The UMKC General Education Core (p. 2250) is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour core curriculum includes three course types designated as Anchor, Discourse and Focus and is detailed in the General Education (p. 2250) section of the catalog.

Constitution Course
Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

RooWriter Assessment
Candidates for all baccalaureate degrees must complete the online UMKC RooWriter Writing Assessment after they have passed Discourse 200 (or its equivalent) but before they have attained 90 credit hours. Incoming transfer students with more than 90 credit hours must complete the RooWriter by the end of their first semester of enrollment or within one semester after passing Discourse 200 (or its equivalent). Students who have not completed the RooWriter Writing Assessment within two semesters after passing Discourse 200 (or its equivalent) will be blocked from enrollment until they successfully complete the RooWriter. Additional information is available in the Undergraduate Academic Regulations and Information (p. 2349) section of the catalog.

Exit Examinations
Information on exit examinations and/or major field exams is available in the Undergraduate Academic Regulations and Information (p. 2341) section of the catalog.

Student Learning Outcomes
Students graduating from this program will:

- Describe psychology’s content domains.
- Engage in integrative, science-based reasoning to interpret behavior and solve problems.
- Apply ethical standards to science and practice, and promote community at local, national, and global levels.
- Effectively write, speak, and interact with others.
- Apply psychological content and skills to career goals, and develop professional direction for life after graduation.

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

Total Credits 3

Course may satisfy both the UMKC General Education Core (Focus C) and Constitution requirements.

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

College of Arts & Sciences Degree Requirements

Students pursuing the bachelor of arts and bachelor of science degrees must complete a major. Students pursuing the bachelor of liberal arts degree must complete a minor. Additional details are available in the Student Services (p. 622) section of the catalog.

1 ENGLISH 110, ENGLISH 225, COMM-ST 110, and foreign language courses at 211 or below do not fulfill this requirement.

2 This requirement may be fulfilled by courses from either the UMKC General Education Core or the College of Arts and Sciences Degree Requirements.

Major Requirements

Majors are required to complete a minimum of 34 hours of coursework in psychology. The major is comprised of general, core area, and elective courses.

PSYCH 316  Quantitative Methods In Psychology  3

**Core Area and Elective Courses**

**Core Area A**
- PSYCH 312  Social Psychology  3
- or PSYCH 322  Child Psychology

**Core Area B**
- PSYCH 323  Theory and Methods of Personality  3
- or PSYCH 433  Abnormal Psychology

**Core Area C**
- PSYCH 308  Sensation and Perception  3
- or PSYCH 418  Brain and Behavior I

**Core Area D**
Select one of the following:
- PSYCH 405  Motivation and Emotion  3
- PSYCH 407  Cognitive Psychology

**Major Electives**
Select a minimum of three elective courses in psychology
- PSYCH 320  Ethnic and Minority Perspectives in Psychology
- PSYCH 331  Introduction to Health Psychology
- PSYCH 441  Adult Development and Aging
- PSYCH 450  Special Topics
- PSYCH 461  Field Practicum
- PSYCH 490  Directed Individual Research
- PSYCH 491  Psychology Research Externship
- PSYCH 495WI  Contemporary Issues in Psychology

**Total Credits**  34

---

1. The remaining hours comprise a minimum of four core area courses and three elective courses. A minimum of one course must be taken from each core area.

2. See Undergraduate Advising (http://cas.umkc.edu/psychology/undergrad/advising.asp) for a complete list of undergraduate psychology courses that may serve as these electives. A maximum combination of 3 credit hours of PSYCH 490 and PSYCH 491 and a maximum of 3 credit hours of PSYCH 461 may be used toward fulfilling elective requirement.

**General Electives**
Students must take elective credit hours to meet the minimum credit hour requirement for their degree, including at least 36 credit hours of coursework at the 300-level or above. The minimum required by the university is 120 credit hours, of which at least 30 credit hours must be taken at UMKC, but some degree programs require more.

**Other Requirements**

Double majors with Sociology or Criminal Justice & Criminology may use the statistics courses taught in those departments (SOCIOL 263 or CJC 210) to fulfill PSYCH 316.

Double majors with the Conservatory may apply up to 6 credits from CONSVTY 342, CONSVTY 395, or CONSVTY 435 toward their psychology electives.

A grade of "C" or higher must be achieved for any course to apply toward the major in psychology. The Undergraduate Psychology Advising Office encourages students to visit each semester to check on degree requirements and registration for courses, and to discuss professional development issues that will prepare students for their careers post-graduation.

**Minimum GPA: 2.0**
Total Credit Hours: 120

**General Advice for Developing a Plan of Study**

Note that the Department of Psychology varies course offerings each semester. Not all courses are offered every year. Students, with the required prerequisite courses, who are interested in a particular elective or core area course should enroll when it is offered.

**Do not plan to complete coursework by taking courses during the summer.** The department usually offers some courses during the summer term, but doesn't guarantee that all required courses will be offered.

Make sure the prerequisites for courses are met prior to enrollment. Students who do not meet course prerequisites will not be allowed to enroll through Pathway.

For questions regarding the Undergraduate Psychology Program, or to schedule an appointment with a Psychology Advisor, please contact the Psychology Advising Office at umkcpuga@umkc.edu or (816) 235-1092.

The Undergraduate Psychology Program is designed to provide majors with a base of scientific knowledge in psychology, as well as a broad background in the field for students who want to pursue graduate study.

See Undergraduate Advising (http://cas.umkc.edu/psychology/undergrad/advising.asp) for more information.

**Tools for Planning and Fulfilling Academic Requirements**

UMKC's Major Maps (https://cf1.umkc.edu/majormaps) are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student’s evaluation of progress and major “fit”. In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major.

UMKC's Degree Audit System (https://www.umkc.edu/registrar/majors-degrees/planmydegree.asp) provides an individual evaluation of all degree requirements (General Education Core, Degree Specific, Major Specific, etc.) for student’s officially recorded (Office of Registration and Records) and “what if” plans of study. This evaluation is used to certify all graduation requirements.

UMKC's Transfer Guides (https://www.umkc.edu/transferguides) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.
Psychology Minor
Student Learning Outcomes

Students graduating from this program will:

• Describe psychology’s content domains.
• Engage in integrative, science-based reasoning to interpret behavior and solve problems.
• Apply ethical standards to science and practice, and promote community at local, national, and global levels.
• Effectively write, speak, and interact with others.
• Apply psychological content and skills to career goals, and develop professional direction for life after graduation.

Program Requirements

Eighteen hours of coursework in psychology are required for a psychology minor with at least 9 of those hours at the upper-division level. Of the 18 hours a minimum of nine hours must be completed at UMKC. A grade of "C-" or higher must be achieved for any course to apply toward the minor in psychology.

The following is required of all psychology minors:

<table>

1 See Undergraduate Advising (http://cas.umkc.edu/psychology/undergrad/advising.asp) for a complete list of undergraduate psychology courses that may serve as these electives. A maximum combination of 3 credit hours of PSYCH 490 and PSYCH 491 and a maximum of 3 credit hours of PSYCH 461 may be used toward fulfilling elective requirement.

Minimum GPA: 2.0

Total Credit Hours: 18
Leadership, Employment, and Community Engagement Certificate (PROPEL)

Student Learning Outcomes

Students graduating from this program will:

• Be able to advocate for their disability needs effectively.
• Be able to apply academic knowledge and social proficiencies in a work-based setting.
• Be able to create networks with peers and others.
• Be able to identify possible careers that would match personality type, strengths, interest, skills, and/or values.

The Propel Program is a comprehensive college experience for young adults with intellectual developmental disabilities. Students enrolled in Propel attend UMKC for two years, full-time (12 credit hours/semester; fall and spring semesters) and participate in college courses with students without intellectual disabilities 60% to 70% of the time. The curriculum focuses on the following domains: academic learning; work-based learning and career exploration; social learning; independent living skills; and self-determination. In addition to full-time coursework, students will also have the option of participating in other student activities such as student organizations and service-learning/community engagement. Propel Undergraduate Certificate is housed in the UMKC College of Arts and Sciences, Department of Psychology, and has as its collaborative partner UMKC Institute for Human Development (IHD). This interdepartmental cooperation is between an academic department and the University Center for Excellence in Developmental Disability for the state of Missouri, housed at UMKC IHD. Propel is supported through a grant from the Office of Postsecondary Education, US Department of Education to build a model comprehensive transition program for college students with intellectual developmental disabilities.

To complete the program, the Propel student needs to finish required Propel certificate courses with a 2.0 GPA or better. Elective courses may be taken pass/fail.
Psychology/Music Therapy Double Major

Student Learning Outcomes

Students graduating with a double major will:

- Describe psychology’s content domains.
- Engage in integrative, science-based reasoning to interpret behavior and solve problems.
- Apply ethical standards to science and practice, and promote community at local, national, and global levels.
- Effectively write, speak, and interact with others.
- Apply psychological content and skills to career goals, and develop professional direction for life after graduation.

Program Requirements

Conservatory of Music and Dance students in the bachelor of arts in music with a music therapy emphasis program, who also want to major in psychology, may apply CONSVTY 342 toward the psychology major as an elective.
Master of Arts: Psychology

Note. Beginning academic year 2012-2013, The Department of Psychology is no longer accepting new students into the Master of Arts in Psychology program. The information that follows is applicable to students accepted to the program prior to Fall 2012. Students enrolled in the Doctor of Philosophy (PhD) in Psychology degree program are eligible for a Master of Arts in Psychology degree as part of the PhD in Psychology degree program. A detailed list of requirements for obtaining a Master of Arts in Psychology degree as part of the PhD in Psychology degree program can be found in the PhD program handbook.

Program Description

Contact Person:
Cathy Rawlings Contact Information (https://cf1.umkc.edu/intapps/lookup/?LastName=rawlings)

The Master of Arts in Psychology Program prepares students for research careers in academic or community psychology settings. The program involves training in theory, research design and statistics, and the application of principles to real world situations. The program provides advanced training both for recent graduates and for individuals who have been in the work force for a number of years. Although some students subsequently enter doctoral programs and complete Ph.D.s, many immediately accept challenging jobs in the public, private or non-profit sector. Students may complete the program on a full- or part-time basis. However, to ensure the timeliness of training, all program requirements must be completed within five years from admission.

The program is research oriented and provides many opportunities to gain valuable experience in conducting research and includes experimental studies working with human participants in a variety of areas. See faculty interests and on-going projects on the Department of Psychology website. (http://cas.umkc.edu/psychology)

Potential applicants should be aware that the Master of Arts in Psychology program is not designed to prepare students for professional practice as a psychologist. Further, completion of the Master of Arts in Psychology program is not adequate preparation for either the practice of psychology or use of the term “psychologist,” both of which are regulated by state statute. Students interested in the practice of psychology should consider the Clinical Psychology Ph.D. program described under the Department of Psychology listing.

Student Learning Outcomes

Students graduating from this program will:

• To provide students with knowledge and skills in the evaluation, conduct, and dissemination of psychological research.
• To provide students with knowledge of ethical principles and to promote ethical conduct and high professional standards in research and applied situations.
• To provide students with knowledge and skills working with diverse individuals in professional contexts.

Suggested Plan of Study

The program is designed for students who seek rigorous training in research design and statistical analysis. Acquiring skills in these areas will prepare students for additional graduate training as well as for immediate application in a work setting. Quantitatively skilled professionals are employed in a variety of settings including: university departments such as psychology, marketing, management, education, medical and biological research programs, personnel management programs, government, industry, market research firms, large-scale mental testing corporations, software development companies and consulting firms.

One key component of training is six credit hours of a capstone research project, either research and thesis or directed research program evaluation, in which students will, under the direct supervision of faculty, apply the skills they have learned in the classroom to real-world problems and research questions.

1. Psychology electives must be 5500 level or above, unless prior written approval is obtained from your psychology advisor and the course instructor. Documentation of completion of additional work in undergraduate courses must be filed with the department in order to obtain graduate credit. Refer to the MA in Psychology handbook for elective options.

2. Courses at the 5500 level or above from other UMKC departments may be used to fulfill these requirements; however, prior written approval from your psychology advisor is required.

Requirements for Retention

Note. Beginning academic year 2012-2013, The Department of Psychology is no longer accepting new students into the Master of Arts in Psychology program. The information that follows is applicable to students accepted to the program prior to Fall 2012. Students enrolled in the Doctor of Philosophy (PhD) in Psychology degree program are eligible for a Master of Arts in Psychology degree as part of the PhD in Psychology degree program. A detailed list of requirements for obtaining a Master of Arts in Psychology degree as part of the PhD in Psychology degree program can be found in the PhD program handbook.

A detailed list of requirements for retention can be found in the Master of Arts Psychology Degree Program Handbook.
Doctor of Philosophy in Psychology: Clinical Psychology Option

Contact Person: Cathy Rawlings http://cas.umkc.edu/psychology/GCPPhD.asp

Note: The information on the Department of Psychology web pages (link above) supersedes information in this Department of Psychology catalog section, as the catalog is updated only once per year.

The Clinical Psychology (Health Emphasis) Option provides full-time Ph.D. study in the science and practice of clinical psychology. Within this broader context, it also integrates clinical and epidemiological research with the health and life sciences, providing specialized training in clinical health psychology. Our doctoral training seeks to enhance public health, broadly defined, through rigorous training of students (education mission); provide an accessible resource for the integration of behavioral sciences and health research and healthcare (service mission); develop knowledge and enhance health outcomes through empirical research (research and evaluation mission); and incorporate integrity and respect for human and intellectual diversity in all our activities (human mission). Based on a scientist-practitioner model, our clinical training and services are grounded in a commitment to the integration of science and practice. Consistent with the mission of our University to lead in the life and health sciences, our faculty and students are actively involved in research, communities, and healthcare systems to promote a high quality of life for all.

Note: UMKC also offers a Ph.D. in Counseling Psychology through the School of Education. For information on that program, please see http://education.umkc.edu/CEP.

Admission Criteria

Our doctorate is designed for applicants with a prior bachelor’s or master’s level degree. New students are admitted in fall semester only. Because we receive applications from many more qualified individuals than can be admitted, admission is highly competitive (see links to detailed information below). All application materials must be received by December 5 to be considered for admission the following fall. Visit the Clinical Psychology (Health Emphasis) Option (http://cas.umkc.edu/psychology/GCPPhD.asp) web page for current application procedures and links to other helpful application resources.

The following are minimum criteria recommended for admission:

1. A bachelor’s degree in Psychology, Counseling, Special Education or other health-related discipline such as Pre-Med or Nursing. Satisfactory completion of prior coursework in Introductory/General Psychology, Experimental Methods/Research Design and Statistics/Quantitative Methods is required. Satisfactory completion of prior coursework in at least two of the following areas is also strongly recommended: Abnormal Psychology, Personality, Biopsychology, Sensation and Perception, Cognitive Psychology, Motivation, Social Psychology.

2. Undergraduate GPA of 3.0 or graduate GPA of 3.5. Alternative criteria may be accepted at the discretion of the admissions committee if there is good reason to believe the regular criteria do not adequately portray the student’s potential to do quality work in the doctoral degree. However, admission to the doctorate is highly competitive, and we seek to admit students with a general history of excellence. A disclosure of the average GPA of students recently admitted to the program can be accessed through the doctorate’s web page.

3. Competitive Graduate Record Examination scores from the general test (GRE Math + Verbal greater than 300; Analytical Writing score of at least 4.5). Students whose scores fall below this recommended minimum may present additional evidence of their capacity to do quality doctoral-level work. Such additional evidence will be considered and accepted at the discretion of the Clinical Admissions Committee. A disclosure of the GRE scores of students recently admitted (http://cas.umkc.edu/psychology/grad/full-disclosure10.asp) can be accessed through our web page.

4. Demonstrated evidence of interest in clinical health research. Our training follows a mentorship model. Therefore, applicants whose research interests are similar to those of the faculty will be given higher consideration. A listing of faculty interests and research can be accessed through the Department of Psychology People (http://cas.umkc.edu/psychology/People.asp) web page.

5. History of personal conduct consistent with the ability to adhere to high standards of student conduct, as outlined in the UMKC Standard for Student Conduct (p. 2286), and professional conduct as outlined by the American Psychological Association (http://www.apa.org) and state licensure boards.

Because clinical and health psychology are empirically-based disciplines, our training emphasizes continuous involvement in research and practice. For this reason, students primarily interested in psychotherapy and clinical or counseling practice without a strong interest in the scientific aspect of the scientist/practitioner model would be better served by other programs.

Typically four students are accepted each year. Applicants are evaluated based on the following dimensions:

1. Academic potential
2. Research potential
3. Interpersonal skills and other indications of potential for clinical work
4. Professional identity and involvement
5. Evidence of high ethical standards

Our training follows the American Psychological Association (http://www.apa.org) Guidelines for Graduate School Offers and Acceptances.
Admission Procedure

New students are admitted in fall semester only. Because we receive applications from many more qualified individuals than can be admitted, admission is highly competitive. A disclosure of relevant data for students recently admitted (http://cas.umkc.edu/psychology/grad/full-disclosure10.asp) can be accessed through the Clinical Psychology (Health Emphasis) Option web page. All application materials must be received by December 5 to be considered for admission in the following fall. Please see the Clinical Psychology (Health Emphasis) Track (http://cas.umkc.edu/psychology/GCPPhD.asp) web page for current application procedures (http://cas.umkc.edu/psychology/GCPPhD_apply.asp).

Our training follows the American Psychological Association (http://www.apa.org) Guidelines for Graduate School Offers and Acceptances.

Student Learning Outcomes

The Clinical Psychology (Health Emphasis) Option is organized around the following training goals and student learning outcomes:

**Training Goal 1:** To provide students with knowledge and skills in the evaluation, conduct, and dissemination of general psychological and clinical health related research

**Student Learning outcomes:**

1. Students will demonstrate the ability to critically evaluate literature relevant to the science and practice of psychology
2. Student will demonstrate the ability to conduct empirically sound research, including research design and implementation and statistical analysis

**Training Goal 2:** To provide students with entry-level skill in the delivery of evidence-based psychological and clinical health services

**Student Learning outcomes**

1. Students will demonstrate the ability to select, administer, and interpret assessment and diagnostic tools in the context of clinical service delivery
2. Students will demonstrate the ability to select, administer, and evaluate evidence-based psychological and clinical health interventions

**Training Goal 3:** To provide students with knowledge of ethical and professional principles and to promote ethical conduct and high professional standards in research and clinical situations

**Student Learning outcomes**

1. Student will demonstrate the ability to identify and appropriately respond to ethical issues raised in research contexts
2. Student will demonstrate the ability to identify and appropriately respond to ethical issues raised in clinical contexts

**Training Goal 4:** To provide students with knowledge and skills in working with diverse groups of individuals in professional contexts

**Student Learning outcomes**

1. Student will demonstrate the ability to identify the nature and impact of diversity on the administration and interpretation of assessments and the delivery of health services
2. Student will demonstrate the ability to identify the nature and impact of diversity in the conduct of research and its dissemination

Students are required to officially enroll and accumulate 6 hours of research credit over their first 2 years in the program (6 credit hours of graduate level research credit are required to receive the M.A.). If the master’s thesis project has been waived or completed, **formal enrollment in directed research is still required**. It is expected that all students will be actively involved in research and evaluated on their research performance every fall and winter semesters. Students who have had the M.A. requirement waived need only take 1 credit hour of research in each semester of the second year. However, students will still need to accumulate the additional 8 research credit hours required over and above the master’s thesis requirement to reach the graduate school minimum of 12 research credit hours for the Ph.D.

The program requires that students enroll in practicum each regular Fall and Winter semester of the second, third, and fourth years. Students may complete additional clinical hours in summer practicum to improve their competitiveness for internships. Official enrollment is optional, although documentation of supervised hours is required for those to be included.

This may be taken during the third year (same semester) instead of the second year.

Evidenced Based Clinical Practice and Health Psychology Interventions are both required, however, these courses will offered in alternate years.

There are 5 core course requirements (see list at the bottom of the table). In some areas (e.g., Developmental) alternative courses may be used to fulfill the requirement.

The graduate school requires at least 12 hours of graduate research credit to graduate with a Ph.D. Our program requires a total of 8 research credit hours (pre-dissertation and dissertation) beyond the 6 required for the master’s thesis for graduation. You may accumulate these hours in any way you wish as long as you complete the additional 8 hours prior to graduation. However you must first pass comps before enrolling in dissertation units.

Due to variable internship start and end dates you may only officially complete you internship after the end of the Spring semester. In these cases an incomplete grade will be given until official completion of the internship. Note that the university generally requires students to be enrolled in the semester that they graduate. However, providing all other program requirements have been completed by the end of the spring semester (such as the dissertation) the DCT will request that summer enrollment be waived for students graduating in the summer. If all other requirements are not completed you will be required to enroll in at least one credit (for example, if you dissertation is not yet defended you will enroll in 1 credit of research for the summer semester).

### Footnotes about the Core Curriculum

Note: A course number of 5580 denotes a "Special Topics" course. If more than one special topics course is offered in a semester, individual courses will be denoted with letters (e.g., 5580A, 5580B).

+ This represents the currently recommended sequencing of courses. Students may be allowed to alter this sequencing, with prior approval of the faculty advisor and DCT. This sequencing is also subject to change based on course availability in a given semester as determined by the DCT and committee.

### Requirement for Retention

A detailed description of policies and procedures, including the requirements for retention, is available in the student handbook which can be accessed through the Clinical Psychology (Health Emphasis) Option (http://cas.umkc.edu/psychology/GCPHd.asp) web page.
Doctor of Philosophy in Psychology: Experimental Health Psychology Option

Contact Person:
Cathy Rawlings Contact Information (http://cas.umkc.edu/psychology/EHPPhD.asp)

Note: The information on the Department of Psychology web pages (link above) supersedes information in this Department of Psychology catalog section, as the catalog is updated only once per year.

The mission of the Experimental Health Psychology Option at UMKC is to enhance health outcomes, broadly defined, for individuals and communities. In service of this mission, we offer advanced training in the fundamental areas of experimental psychology, health psychology, and quantitative and methodological approaches for applied psychology. The doctorate training emphasizes the development of research skills and empirical investigation of real-world problems in the life and health sciences. Graduates are prepared for careers in academia, allied health, industry, and government agencies.

The Experimental Health Psychology Option at UMKC provides full time Ph.D. study. Didactic instruction is integrated with research from the beginning of students' training. Students are paired with a faculty mentor and become part of a lab where they learn how basic research is applied to practical problems and develop the knowledge and skills to carry out original research. These experiences are graded in complexity and designed to foster the development of cumulative knowledge and skill as the student progresses through their training.

Admission Criteria

Our doctoral training is designed for applicants with a prior bachelor's or master's level degree. The following are minimum criteria recommended for admission:

1. A bachelor’s degree in Psychology or related discipline. Satisfactory completion of prior coursework in Introductory/General Psychology, Experimental Methods/Research Design and Statistics/Quantitative Methods is required. Satisfactory completion of prior coursework in at least two of the following areas is also strongly recommended: Biopsychology, Cognitive Psychology, Learning, Motivation, Neuroscience, Sensation and Perception, and Social Psychology.
2. Undergraduate GPA of 3.0 or graduate GPA of 3.5. Alternative criteria may be accepted at the discretion of the admissions committee if there is good reason to believe the regular criteria do not adequately portray the student’s potential to do quality work while in the doctorate degree. However, admission is highly competitive, and we seek to admit students with a general history of excellence.
3. Competitive Graduate Record Examination scores from the general test (GRE Math + Verbal greater than 300; Analytical Writing score of at least 4.5). Students whose scores fall below this recommended minimum may present additional evidence of their capacity to do quality doctoral-level work. Such additional evidence will be considered and accepted at the discretion of the Admissions Committee.
4. Demonstrated evidence of interest in health research. The training follows a mentorship model. Therefore, applicants whose research interests are similar to those of the faculty will be given higher consideration. A listing of faculty interests and research can be accessed through the Department of Psychology (http://cas.umkc.edu/psychology/default.asp) People web page.
5. History of personal conduct consistent with the ability to adhere to high standards of student conduct, as outlined in the UMKC Standard for Student Conduct.

A detailed description of the doctorate policies and procedures, including the requirements for retention, is available in the student handbook that can be accessed through the Experimental Health Psychology Option (http://cas.umkc.edu/Psychology/EHPPhD.asp) web page.

Admission Procedure

New students are admitted in fall semester only. Because we receive applications from many more qualified individuals than can be admitted, admission is competitive. All application materials must be received by December 5 to be considered for admission the following fall. Visit the Experimental Health Psychology Option (http://cas.umkc.edu/Psychology/EHPPhD.asp) web page for current application procedures and links to other helpful application resources.

Student Learning Outcomes

Students completing the Experimental Health Psychology Option will demonstrate:

1. Competence in the evaluation, conduct, and dissemination of research to support independent activity at the next level (e.g., post-doctoral research, academic research, applied research),
2. Ethical conduct and high professional standards in research, including sensitivity to issues of diversity,
3. Knowledge of the theoretical and scientific foundations of health psychology, and
4. Understanding of the breadth of scientific psychology and its application to health psychology.

Description of Program
The Center for Religious Studies offers an interdisciplinary, cross-cultural and socio-historical approach to the study of religion. The Center is a consortium of several area institutions of higher education that have pooled their resources to participate in the UMKC Interdisciplinary Ph.D. program. Students in religious studies are introduced to the many dimensions of religious belief, practice and expression found in human cultures across time and space.

In addition to graduate courses, the Center offers a number of undergraduate courses on topics such as gender and religion, women and religion, the anthropology of religion, and religion in America. Related courses relevant to the study of religion will be found under the listings of other departments and programs.

Courses
RELIG-ST 100 Introduction To Comparative Religion Credits: 3
An introduction to the major religious traditions of the world and small group or tribal religions. Emphasis on the comparative study of selected myths, rituals, types of religious specialists, and types of religious communities.
RELIG-ST 100 - MOTR RELG 100: World Religion

RELIG-ST 306 History of Christianity to the Middle Ages Credits: 3
This course examines the historical and theological development of Christianity from its origins to the High Middle Ages. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major social, institutional, and intellectual force with a focus on patterns of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship.
Cross Listings: HISTORY 306A.

RELIG-ST 307 History of Christianity from Middle Ages to Present Credits: 3
This course examines the historical and theological development of Christianity from the High Middle Ages to the present. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major social, institutional, and intellectual force with a focus on patterns of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship.
Cross Listings: HISTORY 307A.

RELIG-ST 400 Special Topics In Religious Studies Credits: 1-3
Special topics in religious studies which are not offered regularly. The focus of the course varies by semester and instructor.
RELIG-ST 400A Special Topics In Religious Studies Credits: 1-3
RELIG-ST 400B Special Topics In Religious Studies Credits: 1-3
RELIG-ST 400C Special Topics In Religious Studies Credits: 1-3
RELIG-ST 400D Special Topics In Religious Studies Credits: 1-3
RELIG-ST 400E Special Topics In Religious Studies Credits: 1-3
RELIG-ST 400F Special Topics in Religious Studies Credits: 1-3
RELIG-ST 401 Religion in America Credits: 3
An in-depth examination of selected aspects of the history of religions in America from the colonial periods to the present. Special emphasis will be given to methodological issues in the study of American religious history.
RELIG-ST 402 Religion and Colonialism in Latin America Credits: 3
The study of selected aspects of the history of religions in the Americas. Primary focus is on the complex ways that European, Native American African religions helped to structure and negotiate the experiences and the significance of cultural contact and colonialism through lived worlds of meaning.
RELIG-ST 403 Vision, Dreams and Prophesies as Religious Phenomena Credits: 3
This course explores the ways visions, dreams, and prophesies have acquired religious significance in Western and non-Western contexts from the ancient period to the present.
RELIG-ST 404 Gender and Religion Credits: 3
Cross-cultural and comparative study of how religious groups create and transmit gender roles and expectations.
RELIG-ST 467 Myth And Ritual Credits: 3
Myth and "ritual" have long been fundamental categories in the study of religion. This course will briefly survey some of the major theories and approaches to the study of myth and ritual from the Enlightenment to the present. The course will not only trace the shifting meanings of "myth" and "ritual", but will critically evaluate the utility of diverse approaches to the study of religious phenomena designated by these terms. Reading will include theoretical works, as well as selected case studies.
RELIG-ST 484 Sacred Narratives and Texts Credits: 3
This course addresses the "social lives" of sacred narratives and texts in selected religions of the world. Areas of study include methods of exegesis in different religious traditions, orality and literacy (including the reoralization of written text), the canonization process, text as amulets, reading and meditative practices and techniques, and narratives and the arts. The course is comparative, cross-cultural, and interdisciplinary in nature.
RELIG-ST 487 Contemporary Approaches to the Study of Religion Credits: 3
This course which is the second installment in a two course series, charts the historical development of religious studies as an academic discipline, paying particular attention to the models, methods and assumptions that have informed it past and present. In this course, particular emphasis will be placed upon the ways the objects and aims of religious studies have shifted from the Second World War to the present.
RELIG-ST 493 Sex & Religion: The Erotic & The Anti-Erotic In Comparative Persp Credits: 3
This course is designed to highlight issues related to the various ways in which religions of the world have integrated, embraced, or repressed one of the most basic human experiences sexual expression.
Cross Listings: RELIG-ST 5593.
RELIG-ST 494RS Death In The History Of Religions Credits: 3
As a biological "fact," death would appear to be a human universal. Yet, human beings have imagined--and, thus experienced--the meaning of death in many diverse ways in different cultures and over time. This course explores the conceptualization and representation of death and dying, as well as the ritual activities surrounding death, found in selected religious communities. The goal is to gain insight into how people have sought to (re) create a world of meaning in the face of death and to gain a critical perspective on our own contemporary situation.
RELIG-ST 495RS Time And Space In The History Of Religions Credits: 3
Time and space are essential components of the lived worlds of human beings, yet the cultural and historical constructions of these are remarkably diverse and, moreover, are subject to change. This course is a cross-cultural, interdisciplinary, and comparative exploration of the constructions and experiences of time and space found in selected religious communities and historical periods. In addition, it investigates the pivotal role the categories of "sacred and profane time and space" have played in theorizing religion and in the study of religious myths and rituals in the modern period.
RELIG-ST 496RS The Body In The History Of Religions Credits: 3
The human body is the site of extensive imaginal and ritual activities in all religious traditions. This course explores some of the diverse ways religious communities have imagined and experienced the human body, as well as how the body had been manipulated and worked on in an effort to transform the human situation in the world.
RELIG-ST 497RS Special Topics And Readings Credits: 1-6
Intensive reading and/or research in an area selected by the student in consultation with the instructor. May be repeated for credit when the topic varies.
RELIG-ST 5500 Special Topics In Religious Studies Credits: 1-3
Special topics in religious studies. The focus of the course will vary by semester and instructor.
RELIG-ST 5500A Special Topics In Religious Studies Credits: 1-3
RELIG-ST 5500B Special Topics In Religious Studies Credits: 1-3
RELIG-ST 5500C Special Topics In Religious Studies Credits: 1-3
RELIG-ST 5500D Special Topics In Religious Studies Credits: 1-3
RELIG-ST 5500E Special Topics In Religious Studies Credits: 1-3
RELIG-ST 5500F Special Topics In Religious Studies Credits: 1-3
RELIG-ST 5501A Religion In America Credits: 3
An in-depth examination of selected aspects of the history of religions in America from the colonial period to the present. Special emphasis will be
given to methodological issues in the study of American religious history.

RELIG-ST 5502 Religion & Colonialism in Latin America Credits: 3
The study of selected aspects of the history of religions in the Americas. Primary focus is on the complex ways that European, Native American
Africans religions helped to structure and negotiate the experiences and the significance of cultural contact and colonialism through lived worlds of
meaning.

RELIG-ST 5503 Visions, Dreams, and Prophesies as Religious Phenomena Credits: 3
This course explores the way visions, dreams, and prophesies have acquired religious significance in Western and non-western contexts from the
ancient to the present.

RELIG-ST 5504 Gender and Religion Credits: 3
Cross-cultural and comparative study of how religious groups create and transmit gender roles and expectations.

RELIG-ST 5506 The History of Christianity to the Middle Ages Credits: 3
This course examines the historical and theological development of Christianity from its origins to the the High Middle Ages The main themes follow
the mechanisms and conditions shaping Christianity's expansion into a major social, institutional and intellectual force with a focus on patterns of
and crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship.

Cross Listings: HISTORY 5506A.

RELIG-ST 5507 The History of Christianity from the Middle Ages to the Present Credits: 3
This course examines the historical and theological development of Christianity from the High Middle Ages to the present. The main themes follow the
mechanisms and conditions shaping Christianity's expansion into a major social, institutional and intellectual force with a focus on patterns of crisis
and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship.

Cross Listings: HISTORY 5507A.

RELIG-ST 5508 Anthropology of Religion Credits: 3
This course explores the ways anthropologists have gone about studying religion from the opening decades of the 20th century to present. The
course introduces students to the diversity of human religious expression and experience through anthropological literature and to the diversity of
anthropological expression especially as it has been revealed in social scientific studies of religious life. The course is designed to generate a critical
dialogue about the special role that religion has played in the ongoing anthropological engagement with "other" societies and cultures over time.

RELIG-ST 5510 Religions Of The World Credits: 3
This course is designed to introduce graduate students to the major religions of the world, as well as to selected small-group religions. Our goal will
be to learn to appreciate the similarities and differences in the structure and history of these religions. A primary focus will be on using the categories
of the history of religions to examine and analyze the various dimensions of religion (e.g., historical, sociological, ritual, mythological, aesthetic). In
addition, methodological issues of comparison will be addressed.

RELIG-ST 5567 Myth and Ritual Credits: 3
Myth and "ritual" have long been fundamental categories in the study of religion. This course will briefly survey some of the major theories and
approaches to the study of myth and ritual from the Enlightenment to the present. Will not only trace the shifting meanings of "myth" and "ritual," but
will critically evaluate the utility of diverse approaches to the study of religious phenomena designated by these terms. Reading will include theoretical
works, as well as selected case studies.

RELIG-ST 5584RS Sacred Narratives And Texts Credits: 3
This course will study the "social lives" of sacred narratives and texts as they circulate within religious communities. Among the topics to be studied
are methods of exegesis in different religious traditions, orality and literacy (including the reoralization of written texts), the canonization process, the
emergence of interpretive specialists, text as amulets, reading and meditative practices and techniques, and narratives and the arts. The course is
comparative, cross-cultural, and interdisciplinary in nature.

RELIG-ST 5586RS Methodological Approaches To The Study Of Religion Credits: 3
This course examines the various disciplines that undertook the critical, objective study of religion beginning in the second half of the nineteenth
century and continuing into the present. The course examines how the disciplines of the social sciences and humanities emerged in the last century
and how the study of religion emerged from its roots in Jewish scholarship and Christian theology to be included under the umbrella of the humanities
and social sciences. The historical development of religious studies as a historical and intellectual contexts.

Department Description

The School of Social Work offers a program of study leading to the master’s in social work degree and a professional career in social work. Started in 1999, the MSW program is the result of collaborative efforts by the University of Missouri System, UMKC and many social service agencies in the Kansas City metropolitan area. The MSW program received initial accreditation in May 2003 with reaffirmation of accreditation granted in 2007.

Mission of the School of Social Work

The mission of the School of Social Work is to "Prepare competent, advanced generalist social work practitioners to meet the needs of multicultural diverse populations in a dynamic mid-western metropolitan context; to be culturally proficient, ethical leaders and service providers engaged in knowledge-driven, inter-professional, multi-systemic, community-based practice; who advocate for social and economical justice, enhance human well being, and support individuals' capacity to address their own needs."

Mission-derived goals of the School of Social Work are to:

- Prepare culturally proficient advanced generalist social work leaders and practitioners to provide human services for diverse populations.
- Prepare advanced generalist social work leaders and practitioners to engage in interdisciplinary scientific inquiry, and critical thinking.
- Prepare advanced generalist social work leaders and practitioners to develop and implement multi-systemic, multilevel, evidence-based practices.
- Prepare advanced generalist social workers that understand and identify with the social work profession and are committed to upholding the values and ethics of the profession that serve to guide professional practice.
- Prepare advanced generalist social workers to advocate for social and economic justice through collaboration with multicultural diverse communities.
Vision of the School of Social Work

UMKC School of Social Work will become a model urban, professional school recognized for its partnership within diverse communities to effectively collaborate and sustain a safe, more economically secure, and socially just quality of life.

Career Implications

Why consider an advanced degree in social work? Above all, the degree is flexible and versatile. For example, social workers are employed in public social service agencies, nonprofit organizations, medical settings, schools, community-based clinics and residential settings. The social work perspective looks not only at individual thoughts, feelings and actions, but also at the social environment as a primary arena for opportunities for change. On behalf of the people they serve, social workers have strong interests in social policy and advocacy, as well as social science research and policy and program evaluation.

- Social workers have the right education, experience, and dedication to help people help themselves whenever and wherever they need it.
- Social workers help people in all stages of life, from children to the elderly, and from all situations from adoption to hospice care.
- Professional social workers are the nation’s largest providers of mental health services.
- According to the Bureau of Labor Statistics, the need for social workers is expected to grow twice as fast as any other occupation, especially in gerontology, home healthcare, substance abuse, private social service agencies, and school social work (BLS, 2010).

Program Description

The program educates Advanced Generalist Social Work practitioners for professional responsibilities at various levels with complex and dynamic human service organizations. To accommodate working students’ schedules, many classes are scheduled for late afternoons, evenings and weekends.

Faculty members and students co-create empowering learning environments through group discussions, role play, experiential occurrences and readings that enable transformational learning.

The practice-oriented curriculum is focused on advanced generalist social work practice in an urban environment. The curriculum provides: theoretically based understanding to assess diverse human behaviors in varied social environments; skills for operating in a multidisciplinary agency and community environment; research methods with practical application to agency practice; and approaches to working with culturally diverse populations.

The full-time, regular MSW program offers a two-year, 60-credit curriculum combining classroom and field experience. For students who already have a B.S.W. degree, the full-time Advanced Standing program includes 36 credits during a spring or summer semester and one full-time year of coursework with a supervised field practicum. Students may attend the part-time program schedule, but must complete the MSW in four years.

The foundation year curriculum includes coursework in generalist social work practice, theory and skills, social policy, human behavior in the social environment, social work research and a generalist field practicum experience in a human service agency approximately 16 hours a week.

The concentration year curriculum focuses on advanced generalist methods within an urban context. The required curriculum includes courses in program evaluation, advance practice methods, and a capstone course (Integration Seminar). Under the guidance of their academic advisor and in light of their career plans, students select four electives with a requirement of at least one elective in Integrative content area and at least one elective in Advanced Methodological approaches to Social Work practice. Finally, a second field practicum for approximately 16 hours a week provides advanced generalist experience and supervision.

Field Practicum

The practicum program uses agencies throughout the metropolitan area to offer experiences at both foundation and advanced levels. Students typically spend approximately two days in the field and are mentored by an MSW practitioner employed by the agency. Students spend a required number of hours in face-to-face contact with clients, in agency meetings, in individual or group supervision, and in the community. In some cases, students who already are social service employees can arrange to complete one year of their field placements at their own agencies. Practicum can also be completed in a student’s human service oriented work site, provided the Director of Field Education approves the same.

Admissions

The majority of applicants to MSW programs have a variety of undergraduate degrees. Some people have life or work experience in other fields and are ready for a career change. Others have worked in the human service field and are ready to pursue an MSW degree to advance in their careers.

- Applicants who hold a baccalaureate degree that, preferably, reflects a broad liberal arts base in the social, behavioral, or psychological sciences, or related disciplines, are encouraged to apply. The baccalaureate degree should be from an institution accredited in a manner accepted by UMKC.
- B.S.W. degrees from accredited programs may be considered for the advanced standing program if students have received a B.S.W. degree within the last five years.
- A minimum cumulative GPA of 3.0 is preferred. However, lower GPAs will be considered for provisional admission when combined with volunteer and work experience, or when there are extenuating circumstances.
• GRE is not required.
• The UMKC application and School of Social Work application are both required. Applicants must provide narratives addressing the following:
  a. Statement of Values and Ethics
     Attach a brief essay (2-5 typewritten, double-spaced pages) in which you address the following: The NASW Code of Ethics may be found at http://www.socialworkers.org/pubs/code/default.asp
     i Discuss your purpose for pursuing a Master's in Social Work.
     ii Compare and contrast your personal value framework with the NASW Code of Ethics’ values and principles.
     iii In light of the Code of Ethics, what human needs do you hope to address as a professional social worker?
     iv In light of the Code of Ethics, how will you infuse all of the six ethical principles into your future social work practice?
     v Describe a personal life experience that challenged your values and ethics. How did you respond to this challenge?
  b. Preparation for Professional Training
     Read the prompts below and provide complete answers including specific examples (2-5 typewritten, double-spaced pages).
     i Please explain any particular difficulties or successes in your undergraduate academic career.
     ii How would you evaluate your academic experience up to this point in time?
     iii Identify how you manage personal and professional challenges in your life.
     iv What social supports do you have in place (or can you put in place) to assist with managing work, family and academic commitments?
     v Identify the areas in which you need further learning and growth.
• Advanced Standing Only
  Please provide a 3-5 page typewritten, double-spaced response to the following:
  a. Provide an overview of your field practicum experiences.
  b. Describe lessons learned from your field experiences. Provide specific examples.
  c. How do you think these lessons-learned will affect your future social work field experiences?
  d. In relation to the social work profession, in what areas do you need to further your personal and professional growth?
• Additional Information
  a. Use the forms provided to supply three references. Include a person able to judge your potential for social work (a social worker who has supervised you, an employer, or field instructor) and a person able to judge your writing, critical thinking, and academic potential.
  b. While personal interviews are not required, the MSW Admissions Committee may request a meeting with an applicant. Applicants with questions about the program may attend public information sessions, which are scheduled once a month in the Social Work office. See website for details (cas.umkc.edu/socialwork).
  c. The program is inclusive and draws from a diverse applicant pool. Toward this end, program faculty members make regular community presentations to diverse groups. The program works with student organizations representing women, people of color, gay, lesbian, bisexual, and transgender people, international students, and students with disabilities. Individuals from diverse groups are encouraged to apply.
  d. For additional details, please refer to the Student Handbook pdf file at the School of Social Work website.
  e. UMKC University Application for Admission and its application fee are required. In addition you are required to submit all of the School of Social Work application material.
• Application Checklist
  Please refer to the following checklist before sending materials:
  a. Send to the School of Social Work:
     • Social Work Application for Admission: Online application for both the regular and advanced standing programs is available at http://cas.umkc.edu/socialwork.
     • Statement of Values and Ethics Narrative
     • Preparation for Professional Training Narrative
     • Advanced Standing Narratives (if applicable)
     • Letters of Reference (3): References are submitted with the name of the applicant written across the flap of the envelope.
     • Mailing Address:
       University of Missouri-Kansas City
       School of Social Work
       5053 Cherry Street
       Cherry Hall Room 225
       Kansas City, MO 64110-2499
  b. Send to UMKC Office of Admissions:
     • All undergraduate and graduate transcripts.
     • University Application for Admission: Go to https://www.umkc.edu/apply to begin the online application process.
     • Application fee
You must personally request transcripts from previous schools you have attended. Requests for official transcripts should be made as soon as possible to ensure timely receipt of these documents. In addition, applicants who either currently attend or have attended UMKC must make a new request for transcripts to be reported to the School of Social Work. For transcript assistance, please call (816) 235-1125. Individuals with speech or hearing impairments may call Relay Missouri at (800) 735-2966 (TT) or (866) 735-2460 (voice).

Application Deadlines

Advanced Standing
- October 1 to begin courses in Spring Semester
- February 1 to begin courses in Summer Semester

Regular Program
- March 1 to begin courses in Fall Semester

Note: All completed applications will be reviewed on a first-come, first-served basis

Midwest Student Exchange Program (MSEP)
MSEP is an interstate initiative established by the Midwestern Higher Education Commission to increase educational opportunities for students in its member states. MSEP enables residents of Kansas, Michigan, Minnesota, Missouri, Nebraska and North Dakota to enroll in designated institutions and selected programs outside their home state at reduced tuition levels.

Student Advising
Upon admission into the program, students must:

1. Read student handbook available on our website: cas.umkc.edu/socialwork. (http://cas.umkc.edu/socialwork)
2. Attend student orientation in the Fall/Spring semester.
3. Schedule a meeting with their academic advisor during the academic year to develop a plan of study.
4. Report any changes they make to the plan of study to their advisor.
5. Full-time students must meet the Director of Field Education and complete a field application form to select and finalize field placement.
6. Part-time students must meet the Director of Field Education at the end of their first year in the program, fill out the field application form and finalize field placement before the beginning of their second year in the program.

Professional Status
After graduation, students are well prepared to accept professional social work positions with populations at-risk in a variety of human service, mental health, medical, or community settings.

Both Missouri and Kansas offer an exam to license specialist clinical social workers after two years of supervised practice in direct services. For social workers who plan to practice at this level, Kansas statutes require completion of graduate or continuing education courses in psychopathology and diagnostic skills. Students who are considering clinical licensure in Kansas are encouraged to take SOC-WK 5560 as an elective prior to graduation from the MSW program.

Both Missouri and Kansas offer the following licenses for professional social workers:

- LBSW - Licensed Bachelor’s Social Worker
- LMSW - Licensed Master Social Worker
- LAMSW - Licensed Advanced Macro Social Worker

Graduate
Graduate Degree:
• Master of Social Work (p. 576)

Courses
SOC-WK 5510 Foundation Field Practicum I Credits: 3
Students spend 16-hours weekly in a generalist field practicum setting under MSW supervision Participation in a 12-hour integrated field seminar on campus led by faculty is required.
Prerequisites: SOC-WK 5530 or SOC-WK 5531.

Co-requisites: SOC-WK 5532.

SOC-WK 5511 Foundation Field Practicum II Credits: 3
Students continue the field practicum experience from SOC-WK 5510 and participation in the integrated seminar on campus. Focus on generalist knowledge, values, and skills.
Prerequisites: SOC-WK 5510 and SOC-WK 5532.

Co-requisites: SOC-WK 5533.

SOC-WK 5512 Advanced Field Practicum I Credits: 3
Students are placed in a field setting in their chosen field-of-practice concentration approximately 16 hours per week under the supervision of an MSW field instructor. One concentration seminar must be taken prior to or concurrently with entering this field placement.
Co-requisites: SOC-WK 5540.

SOC-WK 5513 Advanced Field Practicum II Credits: 3
Students complete a final semester in their field-of-practice concentration agency setting approximately 16 hours weekly under MSW supervision.
Co-requisites: SOC-WK 5541.

SOC-WK 5530 Human Behavior: Individuals In The Social Environment Credits: 3
This theory course focuses on the interactional context of human behavior essential to all social work practice. A variety of perspectives are considered in the understanding of the individual; developmental, ecosystemic, biopsychosocial, traditional, and alternative. Diversity and resiliency are the key concepts.

SOC-WK 5531 Human Behavior: Families, Groups, Organizations, And Communities Credits: 3
This theory course applies social work's ecosystemic framework to the understanding of human behavior in families, groups, organizations, and communities. Knowledge and applied theories and paradigms are examined that honor social justice, human diversity, strengths/assets, and community-building to enhance effective social work practice.
Prerequisites: SOC-WK 5530.
SOC-WK 5532 Foundations Of Social Work Practice I Credits: 3
This course examines the fundamental knowledge, values, and skills of generalist social work practice with a focus on person-in-environment. Course topics include values and ethics, collaborative approaches to helping, stages of the helping process, and beginning practice skills with at-risk populations.
Co-requisites: SOC-WK 5510.

SOC-WK 5533 Foundations Of Social Work Practice II Credits: 3
This second generalist social work practice course examines effective helping approaches with small groups and communities of identity and/or place. The course also introduces values and working styles for professional practice in organizations.
Prerequisites: SOC-WK 5532 and SOC-WK 5510.
Co-requisites: SOC-WK 5511.

SOC-WK 5534 Social Welfare Programs And Policies Credits: 3
This course examines social policies that direct current social service trends at local, state, and federal levels. Students learn a model of analysis that examines the context in which policy decisions are made and the effects that social service programs and policies have on people's lives.

SOC-WK 5535 Social Welfare Policy Practice Credits: 3
This course prepares students with a social justice/empowerment orientation and the knowledge, skills and values needed to become an effective policy advocate, particularly with people who experience the effects of poverty, discrimination, exclusion, and oppression.
Prerequisites: SOC-WK 5534.

SOC-WK 5536 Social Work Research Methods Credits: 3
This course introduces students to the fundamental knowledge and skills of social work research such as practice evaluation, program planning, and other facets of professional social work practice. Emphasis on application of social research methods in actual practice situations will be used to assist students in skill development.
SOC-WK 5537 Quantitative Social Work Research Methods Credits: 3
This course is designed to prepare graduate level students to develop a comprehensive understanding of statistical method application to social work research. Students will gain a basic understanding of the research and statistical procedure that are needed for clinicians/researcher to operate within the field today. Students will become proficient in reading analyzing and assessing the results of social work publications.
Prerequisites: SOC-WK 5536.

SOC-WK 5538 Advanced Standing Seminar: Contemp Trends In Social Work Practice Credits: 3
This required seminar is designed for BSW's entering the Advanced Standing Program and serves to update and integrate social work practice approaches with contemporary perspectives of human behavior in the social environment.
Prerequisites: Advanced Standing Student.

SOC-WK 5539 Adv Standing Sem: Emerging Iss In Soc Welfare Policy And Research Credits: 3
This required seminar in the Advanced Standing Program examines emerging policy issues and research developments in the field. Students prepare to choose a field-of-practice concentration and to enter the Advanced-level year of study.
Prerequisites: Advanced Standing Student.

SOC-WK 5540 Advanced Social Work Practice I Credits: 3
This course prepares students with an advanced generalist social work perspective and to evaluate and integrate theory, values, and skills for assessment and direct practice with complex case situations in a rapidly changing service environment.
Prerequisites: Completion of foundation year.
Co-requisites: SOC-WK 5512.

SOC-WK 5541 Advanced Social Work Practice II Credits: 3
This course extends the advanced generalist model of social work practice to working with challenging families and small groups. The course introduces leadership, organizational, and management competencies for professional practice in social service agencies and skills for coalition-building and collaboration in communities.
Prerequisites: Completion of foundation year.
Co-requisites: SOC-WK 5513.

SOC-WK 5542 Social Services With Older Adults Credits: 3
This course provides an overview of social service practice with older adults. Students examine population demographics, identify normal and abnormal aspects of aging, and examine methods, paradigms, and approaches to effective advanced generalist practice in treatment and community settings.
Prerequisites: Completion of foundation year.
SOC-WK 5544 Families, Communities and Child Welfare Credits: 3
This course examines child centered, family centered and neighborhood based approaches to child welfare.
Prerequisites: Completion of Social Work Foundation Sequence.

SOC-WK 5546 Mental Health and Substance Abuse in Social Work Practice Credits: 3
This course examines current practice approaches and policy/research issues in mental health and in the dually diagnosed. Students focus on service delivery systems of care with a variety of adult populations from an empowerment perspective.
Prerequisites: Completion of year.

SOC-WK 5547 Grief and Loss in Social Work Practice Credits: 3
This course provides a comprehensive study of grief and loss from a professional social work perspective that includes current theories, evidence-based frameworks, and intervention strategies from a strengths-based perspective. The course will address many forms of special losses, such as suicide, homicide, HIV/AIDS, war-related grief, bankruptcy, divorce and other life transitional events that may or may not involve death and dying.
Prerequisites: Completion of all Foundation-level courses.

SOC-WK 5550 Program Evaluation and Management Credits: 3
This course is designed to train students in evaluation of direct practice, community needs and underserved populations. Students develop a new or enhanced model of service delivery to address needs. Strategic planning, management in theories and grant writing and major components of this course.
Prerequisites: Completion of Foundation year.

SOC-WK 5560 Psychopathology: A Competency Based Assessment Model in Social Work Practice Credits: 3
The DSM will be used in conjunction with a competency-based assessment model that includes an ecological approach and systems theory to determine what biopsychosocial factors have contributed to the client’s problem. The multi-axial system become a tool to gather information, that supports the competency-based assessment.
Prerequisites: Foundation Coursework.

SOC-WK 5561 Social Work in Health Care Credits: 3
This course builds on a foundation of direct social work practice in the context of the health care systems in the United States. The social work role in the medical model will be analyzed along with the roles of nursing and allied health professionals. Collaborative practice will be discussed.
Prerequisites: Completion of Foundation Social Work Courses and a practicum experience.

SOC-WK 5562 Family Organization and Development Credits: 3
This course examines developmental and structural theory that supports family-centered social work practice. Within this theory, the course explores how culture and social class shape family values, beliefs and behavior and how these are manifest in family structure as the family responds to developmental tasks in the context of its community.
Prerequisites: Completion of Social Work Foundation Sequence.

SOC-WK 5563 Life Span Issues in Developmental Disabilities Credits: 3
The need for interdisciplinary process in the human services sector, which supports inclusiveness and quality of life of individuals, is covered. The course covers cultural competence, person-centered and community-based application of services for their implications in planning and delivery of services.
Prerequisites: Students in good standing with the Master of Social Work Program, registered with the Interdisciplinary Leadership in Disability Studies graduate certificate Program.

SOC-WK 5564 Advanced Group Interventions in Social Work Credits: 3
This course provides both a didactic and experiential introduction to advanced group therapy for social work practice, explores the therapeutic factors, norms and their creation, the role of leader and termination as a group experience.

SOC-WK 5565 Systemic Oppression and Social Justice Advocacy Credits: 3
This course presents theoretical concepts of oppression, privilege, and social justice advocacy. Students will examine their social principles and their personal experiences. Social work's core values of social practice will be critically analyzed.
Prerequisites: Completion of Social Work Foundation Sequence.

SOC-WK 5566 Family and Community Violence Credits: 3
Students will consider the sources of interpersonal violence. The causes and forms of community and family violence will be examined in relationship to the impact of individuals, families and communities. Prevention and intervention models will be studied and developed.
Prerequisites: Completion of Social Work Foundation Sequence.

SOC-WK 5567 Collaborative Strengths-Based Practice: Multi-System Interventions Credits: 3
This course examines collaborative models of strengths-based, family-centered social work practice that receive significant funding from SAMHSA NIH. Two models are explored in depth to compare and contrast program implementation when a model is based in values and philosophy vs. a theory-based model. The theory of change for each model is closely examined, as well as research supporting it and related ethical questions regarding assessment and intervention.
SOC-WK 5568 School Social Work Practice Credits: 3
Students will learn the knowledge and skills required for performing roles and functions of school social work in K-12 settings. They will apply social systems and the strengths perspectives within the context of school as organizations interconnected to community environments.

SOC-WK 5569 Core Concepts of Child and Adolescent Trauma Credits: 3
This course prepares students for trauma-informed, evidence-based practice. Based on core concepts, the course uses a problem-based learning approach through the use of in-depth case studies.

Prerequisites: All MSW Foundation Courses.

SOC-WK 5575 Advanced Generalist Community Practice Credits: 3
This seminar covers community social work practice at the advanced level addressing values, knowledge and skills essential for community social change. Models of community practice are addressed to facilitate student skill application in social planning, community development, and community collaboration strategies. Each model requires knowledge of large systems practice.

Prerequisites: Completion of 30 hrs or Required Foundation.

SOC-WK 5577 Sexuality and Social Work Practice Credits: 3
This course is a survey of issues that will provide knowledge for integrating human sexuality across a lifespan in the practice of social work. Using a biopsychosocial perspective, emphasis will be placed on historical, political, social, cultural, familial and individual differences in sexual and reproductive attitudes, values and behaviors.

Prerequisites: You must be a student in the Master of Social Work program to take this course.

SOC-WK 5579 Integration Seminar In Advanced Generalist Practice Credits: 3
This course, taken in the last semester, serves as a final integration of advanced generalist competencies in direct practice, organization/management, social action/community building and advocacy, research/evaluation and leadership skills. Students prepare a major project for presentation.

Prerequisites: All other program requirements must be completed or concurrent with Soc-Wk 5579

SOC-WK 5580 Special Topics In Social Work Credits: 1-3
These seminars are designed to examine relevant and innovative areas emerging in social work practice which are not available in the regular course offerings. Topics, instructors, and prerequisites are listed in the semester bulletin.

Prerequisites: Completion of foundation year.

SOC-WK 5580D Special Topics In Social Work Credits: 1-3

SOC-WK 5590 Readings And Investigations In Social Work Credits: 1-3
Under the direction of a faculty member, individual students may pursue an in-depth area of study in generalist social work practice, including a research project of the student’s choice.

SOC-WK 5899 Required Graduate Enrollment Credit: 1
One Hour Course required to remain continuously enrolled while the student finishes requirements for the Social Work degree.

Prerequisites: Permission of the Department
Master of Social Work

Student Learning Outcomes

Students graduating from this program will:

- Conduct and articulate ongoing, autonomous self-evaluation of professional practice.
- Articulate and demonstrate the NASW Code of Ethics in professional practice.
- Assess and apply multiple sources of knowledge and information to make practice and program decisions.
- Demonstrate diversity-related knowledge, values, and skills to improve practice and practitioner growth.
- Promote social and economic justice in practice through policy and programmatic advocacy.
- Evaluate practice and use results of research and evaluation to improve programs, policy, and service delivery.
- Use a theoretical framework addressing context, population, and culture in order to analyze, evaluate, assess, and intervene with client systems.
- Integrate policy practice within and across systems to make intervention more effective and comprehensive.
- Provide leadership to recognize and respond to ever-changing population needs.
- Establish a process that encourages participants to be equal partners.
- Select and modify multi-systemic assessment of contributing factors to a practice situation.
- Demonstrate the use of appropriate interventions to address assessed contributing factors to a practice situation.
- Use evaluation of process and outcomes to refine or develop evidence-based practice interventions.
- Utilize personal power and professional privilege for ethical leadership.

Plan of Study

The following course of study is a typical schedule for a full-time student. Enrollment in some elective courses require completion of all foundation study. The plan of study is subject to change.

Advanced Standing Program

Students who have received a Bachelor of Social Work degree from a Council on Social Work Education accredited program, may apply to our MSW program as "Advanced Standing." Advanced standing students must enroll in the following required spring or summer courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC-WK 5538</td>
<td>Advanced Standing Seminar: Contemp Trends In Social Work Practice</td>

<td>3</td>
</tr>
</tbody>
</table>

Advanced standing students then complete concentration level courses.

The graduate social work program grants the M.S.W. degree when students have completed the following degree requirements:

1. 60 credit hours of class (48 hours) and field (12 hours) for regular program students.
2. 36 credit hours of class (30 hours) and field (6 hours) for advanced standing students.
3. To remain in good standing, students must maintain a cumulative GPA of 3.0.
4. Part-time students must complete the program within four years.
5. Students take four electives (12 credit hours) in the concentration year.

Department Description

The Department of Sociology offers programs of study leading to:

• Bachelor of Arts in Sociology - two emphasis options:
  • General Sociology
  • Cultural Anthropology Emphasis
• Master of Arts in Sociology

Program minors are available in:

• Sociology
• Anthropology

Sociology is a wide-ranging discipline that strives to understand how the organization of society affects people’s lives and experiences. Our mission is to help students develop a sociological perspective and use this perspective to question and understand the world around them. Students in our program have opportunities to develop critical thinking and research skills and to apply classroom learning through experiences in community organizations and agencies. Department faculty members are committed to excellence in teaching and work to assist students in developing a foundation for moving into a career.

Department Activities

Academic Advising

Student academic advising is a continuous process in the department. Undergraduate advisors are available for consultation throughout the academic year. The department recommends that students check the program requirements in the department office before filing the Declaration of Major form. Undergraduate majors are encouraged to consult with the department to establish a tentative plan of study and to meet with a
department advisor each semester. Students should leave their mail and email addresses with the department office so they can receive notifications concerning the class time table, new classes, and other departmental information of interest to majors.

Financial Assistance
Students can receive financial assistance through various campus scholarships, loan programs, grants and the work-study program. Students who are interested should contact the Financial Aid and Scholarships Office.

Sociology/Anthropology Club and Sociology Honor Society
The Sociology Club is open to all students majoring in Sociology as well as students who are interested in this field but have not yet declared a major. Club activities include service projects in the community, sponsorship of community speakers on campus, participation in local and regional professional meetings, and learning about internships and research opportunities. The department has a chapter of Alpha Kappa Delta, a national honorary society for Sociology students.

Undergraduate Student Award
A special award was established as a memorial to Edward Tomich, Ph.D., professor of Sociology from 1964 to 1976. Students must submit an application to the department to be considered for the award. On the recommendation of the department faculty, the Edward Tomich Award is given annually to a senior student majoring in Sociology who exemplifies an indomitable spirit; a commitment to the struggle for human welfare; an unquenchable thirst for knowledge and personal growth; an unwillingness to be cowed by authority or the superficialities of status; a readiness to ask the more difficult questions while being ready to accept the uncertainty of answers; and an appreciation of the value of theoretical knowledge about human interaction in everyday life.

Cooperative Programs
The department cooperates with other programs frequently by jointly listing courses at the undergraduate level. Students may benefit from combining one of these areas of study with their major in sociology:

- Black Studies
- Family Studies
- Gerontology
- Honors
- Latina/Latino Studies
- Women’s, Gender, and Sexuality Studies

Desirable Preparation for Undergraduate Admission Requirements
High school students are encouraged to take a general college preparatory curriculum. Additional courses in mathematics, English, foreign languages and the social sciences, such as economics, anthropology, psychology and sociology are recommended. Students planning to transfer from a community college are encouraged to take at least 6 credit hours of sociology (including introductory sociology), and college algebra. A maximum of 12 hours of transfer credits, including introductory sociology, can be counted toward satisfaction of the major field requirements.

Anthropology Courses

ANTHR 103 Introduction To Cultural Anthropology
Credits: 3
An introduction to culture and the basic concepts of anthropology. Topics include kinship, language, and cultural change.

ANTHR 103 - MOTR ANTH 201: Cultural Anthropology

ANTHR 300 Special Topics in Anthropology
Credits: 1-3
Each time this course is offered, a different area of anthropology, to be announced, will be examined. Prerequisite(s): None.

ANTHR 302 Social Stratification
Credits: 3
The distribution of power, privileges and prestige are examined in a historical and comparative perspective. The process whereby distribution systems develop, become institutionalized, and become transformed are analyzed.

ANTHR 303CN Cluster Course: Terrorism, Civil War and Trauma
Credits: 3
This interdisciplinary course examines the modern experience of terrorism and civil war in the light of art, film, history, literature, and philosophy. It explores a number of traumatic events, historic and contemporary, challenging us to think about such contemporary issues as violence and identity formation, civil rights and state-sponsored terrorism, pacifism and patriotism, resistance and collaboration, fundamentalism and fascism, neo-colonialism and anti-imperialism.

Cross Listings: ENGLISH 300CN.
ANTHRO 305 Language and Culture Credits: 3
This course is designed to familiarize students with the basic objects, aims, and methods of linguistic anthropology. Students will acquire this familiarity by studying both theoretical and ethnographic articles that focus on some of the major areas of concern within the field including: the evolution of human language, linguistic particularity and universality, the relationship of language to thought, structuralism and semiotics, trope theory, language and emotion, sociolinguistics, the development of writing systems, and language conservation and change.

ANTHRO 306 Culture, Emotion, and Identity Credits: 3
This course introduces students to some of the key theoretical perspectives and debates within the field of psychological anthropology. By drawing upon cross-cultural studies of emotion, personhood, sexuality, illness, and consciousness it seeks to understand some of the ways that culture and society influence human psychology and experience.

ANTHRO 308 The Social Life of Things Credits: 3
This course examines the connections between people and things. It explores how social relationships are created and changed through the use and exchange of objects, and how objects themselves take on particular meanings and values in these processes.

ANTHRO 322 Race And Ethnic Relations Credits: 3
The nature, origin and dynamics of ethnic and race relations in the U.S. and other societies. Specific attention will be given to the historical and contemporary contexts of prejudice, discrimination and confrontation.

ANTHRO 324 Diversity And You Credits: 3
This course will examine diversity from the perspectives of race, ethnicity, class and gender. Emphasis will be placed on the impact of racism, classism and sexism on interpersonal relationships and strategies to encourage diversity in schools, neighborhoods, and the work place. Students may also enroll in "directed research" in conjunction with his course.

ANTHRO 326 Consumer Society Credits: 3
This course explores the emergence of Consumer Society as both a sociohistorical development and as an object of social scientific inquiry. Students will explore how the study of Consumer Society has been animated by different scholarly questions, debates, and analytic approaches.

Cross Listings: SOCIOL 326.

ANTHRO 327 US Government's Indian Policies: Practices Of A Colonizing Nation Credit: 1
This class will convey information about the implementation of US Government policies, from treaty making, establishing reservations, removing, confronting tribes militarily, and abolishing reservations through allotment resulted in consequences detrimental to tribal welfare. The colonization process created ramifications and consequences that Indian people contend with to this day. This class will provide a historical overview of the consequences associated with political, social, and economic processes that divested Indian people of control over their lives and land they originally lived on.

Cross Listings: SOCIOL 327.

ANTHRO 328 Body and Society Credits: 3
Body and Society is an interdisciplinary and comparative approach to the study of the body as the subject and object of social processes. Interdisciplinary approaches to topics such as meaning, ritual, performance, and practice will provide a framework for classical as well as contemporary explorations of bodily representation and experiences across a variety of cultural contexts.

Prerequisites: ANTHRO 103.

ANTHRO 329 The Imagery Of The American Indian In Film Credit: 1
This course will trace the imagery of the American Indian used by film makers through the years and how this has played a role in reinforcing certain inaccurate perceptions of American Indian cultural, social, and economic life. The course examines the sociological implications created by persistently showing misrepresented images of American Indians. The goal is to measure and compare the reality of American Indian life (values, traditions, and beliefs) with the images created by film makers from the early years of the 20th century to the present.

Cross Listings: SOCIOL 329.

ANTHRO 331 Urban Anthropology Credits: 3
A course designed to apply anthropological methods to the study of various urban environments. The approach to the subject is comparative, seeking to spell out those features of the urban setting which vary from culture to culture as well as those which are common to all.

ANTHRO 339 American Indian Leaders: Past And Present Credit: 1
This course will examine the definition of leadership as it relates to American Indian issues. Consideration will be given to the nuances of leadership by examining the social, cultural, economic, and political situations that gave cause for particular individuals to assume roles of leadership. The course will compare and contrast the notions of leadership within American Indian ranks with those practiced by non-Indian leaders. It will trace the evolving nature of leadership within tribal nations and American Indian communities from past to present, as well as looking at Indian leadership roles in time of war and peace. Lives of the major characters of American Indian historical record will be reviewed, such as Geronimo, Crazy horse, Sitting Bull, Osceola, Tecumseh, Pontiac, Black Hawk, Quannah Parker, and Captain Jack.

Cross Listings: SOCIOL 339.
ANTHRO 340R Social Change Credits: 3
Examines the key dimensions that bring about change in societies, including revolutions and evolutionary processes. Attention is given to the global context of social change, as well as the role of social actors and social movements.
Cross Listings: SOCIOL 340R.

ANTHRO 347 The American Indian Image: Stereotype Vs. Reality Credit: 1
This class will take a historical, sociological, and cultural approach to review how society at large views American Indians. The course will trace the origin and continued use of American Indian stereotyped views, and assess the sociological and psychological complications that result when judging Indians solely on stereotyped imagery. The course will review the historical content of American Indian life as portrayed in early plays, films, and newspaper accounts and compare these stereotyped images with the reality of American Indian life by providing a depiction of a series of historical events that will offer a more balanced and accurate consideration for American Indian life past and present.
Cross Listings: SOCIOL 347.

ANTHRO 348 Latinx Immigrants, Migrants, and Refugees in the U.S. Credits: 3
This course addresses the culture of societies of U.S. citizens, immigrants, and refugees of Latin American heritage living in the U.S. The course emphasizes recent anthropological, historical, cultural, and sociological studies.

ANTHRO 358 Culture and Society Credits: 3
This course examines the "culture concept" at the heart of the contending theories of society, which is used to describe a society or way of life, a whole social order, or particular aesthetic styles and objects. The course links these various topics together in a concluding section on culture in the age of the Internet and globalization.

ANTHRO 373 Anthropology of Religion Credits: 3
This course explores the ways anthropologist have gone about studying religion from the opening decades of the 20th century to present. The course introduces students to the diversity of human religious expression and experience through anthropological literature and to the diversity of anthropological expression especially as it has been revealed in social scientific studies of religious life. The course is designed to generate a critical dialogue about the special role that religion has played in the ongoing anthropological engagement with "other" societies and cultures over time.

ANTHRO 381 Archaeological Resources Management Credits: 3
This course examines contemporary issues managing archaeological resources. The class is intended for students seeking work in Cultural Resources Management (CRM); those already working CRM, or student anthropology, environmental studies, geology, geography, public administration and other fields likely to deal with archaeological and historical resources in a research or employment setting. This class does not require a background in archaeology.
Cross Listings: GEOLOGY 407.

ANTHRO 382 Archaeological Field Survey Methods Credits: 3
This course offers instruction in the basic skills required to conduct field surveys in archaeology and other geosciences disciplines. In the classroom, students learn about the development of archaeology as a scientific discipline and how to recognize some of the basic field data sought by archaeologists. Students learn about mapping and land navigation techniques. The field phase of instruction includes visits to archaeological sites in the region.
Cross Listings: GEOLOGY 408.

ANTHRO 383 Field School in Archaeology Credits: 3
This course offers students an opportunity to attend a field school in archaeology. Students will be taught how to: design archaeological research, set-up excavation, keep a wide range of excavation records, make maps and drawings, take photographs related to excavation problems, identify and receive a broad spectrum of artifact and faunal remains, collect samples for specialized analysis and use a wide range of excavations tools. This course will also introduce students to recording and analyzing excavated materials in the archaeological laboratory.
Cross Listings: GEOLOGY 409.

ANTHRO 384 North American Prehistory Credits: 3
This course offers instruction in the archaeological survey of prehistoric North America from the Arctic to northern Mexico. The course outlines cultural developments within this region from the peopling of the Americas near the end of the last Ice Age to the arrival of Europeans over 10,000 years later. The diversification of Native American societies across this time span is examined in relation to social and environmental challenges, including the transformation of hunter-gatherer groups into chiefdoms and complex agricultural societies.
Cross Listings: GEOG 457.

ANTHRO 385 Archaeology as Anthropology: The Development of Human Societies Credits: 3
This course examines the development of archaeology as a distinctive branch of anthropology, and archaeology's role in a centuries-long debate about the causes of cultural variation and the development of human societies. This class examines how the Enlightenment, colonialism, the geological discovery of Deep Time and the Darwinian Revolution not only give rise to anthropology and archaeology, but launched an enduring debate about how and why we study cultural behavior.

ANTHRO 386 Introduction to Prehistoric and Classical Archaeology Credits: 3
An introduction to archaeological research methods that traces human origins and cultural development from the earliest fossil evidence to the threshold of written history and civilization. This class emphasizes the evolutionary and cultural developments that allowed our ancestors to colonize the continents and develop lifeways involving hunting and gathering, farming and urbanism.
ANTHRO 397 Independent Readings in Anthropology Credits: 1-3
Intensive readings in an area selected by the student with prior consultation with instructor.
Prerequisites: Twelve hours of anthropology.

ANTHRO 407 Writing Culture: The Craft of Ethnography Credits: 3
This course will explore the ways anthropologists document and write about cultural practices, processes, and beliefs. Students will become familiar with debates about representation while they consider differences in the ways ethnographic writing rhetorically conveys culture. Students will also compare ethnographic methods, theories, and styles of writing as these have changed over time.

ANTHRO 441 Globalization and Development Credits: 3
Focuses on issues of economic development, social stratification, political institutions, and political mobilization in societies where colonialism provided the context for their long-term disadvantages in the international economic order. Specific attention is paid to the intersection of the international components that define the options and limits for societal development (e.g., market shifts, international institutions and contracts, foreign policies, and migration) and the distinct social, political and cultural implications of these factors for developing societies.
Cross Listings: SOCIOL 441.

Sociology Courses

SOCIOL 101 Sociology: An Introduction Credits: 3
An introduction to the study of society and the basic concepts of sociology.
SOCIOL 101 - MOTR SOCI 101: General Sociology

SOCIOL 201 Introduction To Social Psychology Credits: 3
Exploration of the relationships between human behavior and social context. The course focuses on how realities are socially constructed and sustained, the role of symbol systems, definitions of the situation, the self as a product of interaction, and the relationship between language, thought and culture.

SOCIOL 203 Social Problems Credits: 3
An examination of major social problems of modern Western society, including issues of racial conflict, war, civil rights, youth movements, the mass media, urban poverty, and crime. The topics will vary from year to year depending upon the instructor.

SOCIOL 211 Social And Psychological Development Through The Life Cycle Credits: 3
A survey of significant psychosocial issues, events and crises throughout the human life span. The life cycle of the family is examined as the primary context within which individual development occurs. Although the primary emphasis will be on normal adjustment and development, attention will also be given to the occurrence of special problems and deviations at each life stage.

SOCIOL 263 Introduction to Statistics in Sociology/Criminal Justice Credits: 3
A first course in the statistical analysis of quantitative data. Course emphasizes descriptive statistics, probability theory, parameter estimation, bivariate hypothesis testing, and computer applications.
Prerequisites: MATH 110 or higher.

SOCIOL 300 Special Topics in Sociology Credits: 1-3
Each time this course is offered, a different area of sociology, to be announced, will be given. On demand.

SOCIOL 300A Special Topics In Sociology Credits: 1-3
Each time this course is offered, a different area of sociology, to be announced, will be given.

SOCIOL 302 Social Stratification Credits: 3
The distribution of power, privileges and prestige are examined in a historical and comparative perspective. The process whereby distribution systems develop, become institutionalized, and become transformed are analyzed.
Cross Listings: ANTHRO 302.

SOCIOL 306 Culture, Emotion, and Identity Credits: 3
This course introduces students to some of the key theoretical perspectives and debates within the field of psychological anthropology. By drawing upon cross-cultural studies of emotion, personhood, sexuality, illness, and consciousness it seeks to understand some of the ways that culture and society influence human psychology and experience.
Cross Listings: ANTHRO 306.

SOCIOL 308 The Social Life of Things Credits: 3
This course examines the connections between people and things. It explores how social relationships are created and changed through the use and exchange of objects, and how objects themselves take on particular meanings and values in these processes.

SOCIOL 310R Families And The Life Course Credits: 3
This course is an upper level introduction examining the sociological, historical, and social psychological research on the family, focusing primarily on the United States. The course examines families of varied ethnicity, as well as family compositions at different stages of the life course. Emphasis is placed on the interdependence of family members, as well as how society and policy influence the family.
SOCIOLOGY 313R Sociology Of Gender Credits: 3
This course is an introduction to the sociological study of gender in contemporary U.S. society. Special attention is directed to how gender is experienced inter-sectionally with other social categories, including social class, race, sexuality, and age.

SOCIOLOGY 316 Sociology Of Death And Dying Credits: 3
Examination of attitudes, behaviors and institutions related to death and dying in contemporary American society. Topics include the status of death in American society, effects of the setting on dying, interaction with the dying, funeral practices, bereavement customs, surviving spouse, and suicide.

SOCIOLOGY 317 Policies Of Drug Use And Control Credits: 3
Utilizing both historical and contemporary information, this course provided an assessment of the "drug problem" in the U.S. and policies of control developed in response to the problem. Drug use criminalization, legalization, medical treatment and prevention strategies and related issues are considered in regard to scientific knowledge related to the patterns, causes and impact of substance abuse.

SOCIOLOGY 318 Sociology Of The Aging Woman Credits: 3
An exploration of the intersection of gender and aging issues with special attention to cultural images of women, the development of self-concept and identity in mid-life and beyond, caring roles in the family, work and retirement, and health and mental health issues. These issues are examined within the context of social class, race, and ethnicity. Implications for community programs and social policy are considered.

SOCIOLOGY 319 Theoretical Criminology Credits: 3
A comprehensive examination of the major criminological theories, their philosophical assumptions, and the sociohistorical context in which they were articulated.

SOCIOLOGY 320 Social Deviance Credits: 3
The dominant sociological perspectives on deviance will be discussed with special attention given to the processes that define behavior and persons as deviant and the impact of such definitions on social relationships and identity.

SOCIOLOGY 322 Race And Ethnic Relations Credits: 3
The nature, origin and dynamics of ethnic and race relations in the U.S. and other societies. Specific attention will be given to the historical and contemporary contexts of prejudice discrimination and confrontation.

SOCIOLOGY 324 Diversity And You Credits: 3
This course will examine diversity from the perspectives of race, ethnicity, class and gender. Emphasis will be placed on the impact of racism, classism and sexism on interpersonal relationships and strategies to encourage diversity in schools, neighborhoods, and the work place. Students may also enroll in "directed research" in conjunction with his course.

Cross Listings: ANTHRO 324.

SOCIOLOGY 326 Consumer Society Credits: 3
This course explores the emergence of Consumer Society as both a sociohistorical development and as an object of social scientific inquiry. Students will explore how the study of Consumer Society has been animated by different scholarly questions, debates, and analytic approaches.

Cross Listings: ANTHRO 326.

SOCIOLOGY 327 US Government’s Indian Policies: Practices Of A Colonizing Nation Credit: 1
This class will convey information about the implementation of US government policies toward American Indians and how each of the policies, from treaty making, establishing reservations, removing, confronting tribes militarily, and abolishing reservations through allotment resulted in consequences detrimental to tribal welfare. The colonization process created ramifications and consequences that Indian people contend with to this day. This class will provide a historical overview of the consequences associated with political, social, and economic processes that divested Indian people of control over their lives and land they originally lived on.

Cross Listings: ANTHRO 327.

SOCIOLOGY 328 Body and Society Credits: 3
Body and Society is an interdisciplinary and comparative approach to the study of the body as the subject and object of social processes. Interdisciplinary approaches to topics such as meaning, ritual, performance, and practice will provide a framework for classical as well as contemporary explorations of bodily representation and experiences across a variety of cultural contexts.

Prerequisites: ANTHRO 103.

SOCIOLOGY 329 The Imagery Of The American Indian In Film Credit: 1
This course will trace the imagery of the American Indian used by film makers through the years and how this has played a role in reinforcing certain inaccurate perceptions of American Indian cultural, social, and economic life. The course examines the sociological implications created by persistently showing misrepresented images of American Indians. The goal is to measure and compare the reality of American Indian life (values, Traditions, and beliefs) with the images created by film makers from the early years of the 20th century to the present.

Cross Listings: ANTHRO 329.

SOCIOLOGY 332 Sociology Of Political Life Credits: 3
The concept of power, community power structure and decision making. The social basis of liberal democracy; consensus and legitimacy; political stability and instability. Power and politics in a mass society; elites and masses; democracy and oligarchy; alienation; bureaucracy; pluralism and totalitarianism. Ideology and social movements.
SOCIOL 335R Introduction To Social Work: Principles And Practice Credits: 3
An introductory course to social work, its history and current role in the delivery of social welfare services. Designed to give the student insight into the body of knowledge, theory, values, principles, and techniques of the social work process. Investigation into the varieties of practice methods, i.e., casework, group work, community organization, and the present trend toward the generic approach.

SOCIOL 336 Society And Community Service Credits: 3
This course explores the history and increasing importance of the non-profit sector and volunteerism. Applying theoretical approaches from development and community organizing, the course analyzes the uses of volunteerism and NGOs nationally and internationally. Students’ understanding will be enhanced through the inclusion of applied methods needed to manage a non-profit organization and by serving in an internship in a local non-profit during the semester.

SOCIOL 337 Community Development In Urban America Credits: 3
The focus in this course is on experiential learning in which the student participates in several urban community development projects that allow for learning about collaboratives, networking, problem-solving, and requisite skills to successfully manage a project. Principles of community development are presented to give the student background for understanding the projects visited.

SOCIOL 338 The World of Latino Youth and Adolescents in the U.S. Credits: 3
This course will provide a general introduction and in-depth understanding to the largest group of racial/ethnic adolescents in the United States: Latino youth. An historical examination of Latino youth will provide a better understanding of their present status, with emphasis on their contact and interactions within social institutions. Additionally, students will analyze the experiences Latino youth have within and among other groups in the broader social context based on past, present, and possible future interactions.

Cross Listings: LLS 310.

SOCIOL 340R Social Change Credits: 3
Examines the key dimensions that bring about change in societies, including revolutions and evolutionary processes. Attention is given to the global context of social change, as well as the role of social actors and social movements.

Cross Listings: ANTHRO 340R or SOCIOL 340R.

SOCIOL 347 The American Indian Image: Stereotype Vs. Reality Credit: 1
This class will take a historical, sociological, and cultural approach to review how society at large views American Indians. The course will trace the origin and continued use of American Indian stereotyped views, and assess the sociological and psychological complications that result when judging Indians solely on stereotyped imagery. The course will review the historical content of American Indian life as portrayed in early plays, films, and newspaper accounts and compare these stereotyped images with the reality of American Indian life by providing a depiction of a series of historical events that will offer a more balanced and accurate consideration for American Indian life past and present.

Cross Listings: ANTHRO 339.

SOCIOL 348 Latinx Immigrants, Migrants, and Refugees in the U.S Credits: 3
This course addresses the culture of societies of U.S. citizens, immigrants, and refugees of Latin American heritage living in the U.S. The course emphasizes recent anthropological, historical, cultural, and sociological studies.

SOCIOL 351 Gender, Work And Social Change Credits: 3
This course examines the role of gendered work and consumption in global social change. Drawing from sociological perspectives on gender and work, this course foregrounds a global comparative analysis of societal development and working contexts, including tourism employment, sex work, domestic work, and agricultural, garment, and informatics production. Academic-service learning constitutes a primary course assignment.

SOCIOL 357 Social Movements Credits: 3
This course focuses on the link between social movements and political change in the modern world. Social movements arise outside official channels and against established political orders. Students will develop an understanding of the relation between social mobilization and institutional change in various countries, especially in the United States.

SOCIOL 358 Culture and Society Credits: 3
This course examines the "culture concept" at the heart of the contending theories of society, which is used to describe a society or way of life, a whole social order, or particular aesthetic styles and objects. The course links these various topics together in a concluding section on culture in the age of the Internet and globalization.

SOCIOL 361 Social Theory Credits: 3
A survey of the major orientations in social theory, their historical development, and contemporary issues and controversies in social theory. Recommended preparation: A course in social science.
SOCIOL 362 Methods Of Sociological Research Credits: 3
Experimental and observational schemes; survey analysis; interview and questionnaire designs; scaling techniques; sampling. Recommended preparation: A course in Social Science.

SO CIOL 390R Directed Field Experience I Credits: 1-6
The student will work within one or more social agencies or organizations in the city under the joint supervision of a professional within the organization and a member of the Sociology Department. In-class discussion will cover the major problems of social organization.

SO CIOL 391 Directed Field Experience II Credits: 1-6
A continuation of SO CIOL 390R.

SO CIOL 397 Independent Readings In Sociology Credits: 1-3
Intensive readings in an area selected by the student with prior consultation with instructor. Recommended preparation: Twelve hours of sociology coursework.

SO CIOL 398 Independent Research In Sociology Credits: 1-6
Intensive research in an area selected by the student with prior consultation with instructor.

Prerequisites: Twelve hours of sociology.

SO CIOL 404WI The Sociology Capstone: Senior Seminar Credits: 3
A seminar which explores the interrelationships between sociology theory, research methods and statistics. May focus on major contemporary issues building on and integrating knowledge obtained in previous courses.

Prerequisites: SO CIOL 362, Roewriter.

SO CIOL 410R Aging In Contemporary Society Credits: 3
Attitudes and stereotypes, the status of the aged in American society; the social psychology of the aging process; the response of societal institutions such as the family and political system to the aging of the population as a whole. Applications and potentials of research are considered.

SO CIOL 411 Sociology Of Human Sexuality Credits: 3
A cross cultural examination of the most fundamental dichotomy in human society: male and female. Considering sex both as a biological and social category, this course compares diversity and similarity in the interrelationships of male and female in patterns of behavior and social organization found in human societies across time and space.

SO CIOL 418 Feminist Theories Credits: 3
This class introduces the major feminist theories and their primary authors over the last 200 years. The class takes both a historical view (beginning with two millennia of male-centered theories about women) and a conceptual approach (theories are grouped by common ground) and familiarizes the student with both the historical processes that necessitate feminist theories as well as with the breadth and depth of the historically and currently available scholarship.

Prerequisites: WGS 201.

SO CIOL 431 Social Organization Of The City Credits: 3
An examination of the social structure of the American city with special reference to the historical development of American cities. Attention will be focused on the role of social institutions as they have changed in relation to urban problems.

SO CIOL 433 Immigration and the City Credits: 3
This course examines key issues and controversies in immigration research. Special attention will be paid to the social, economic, and historical developments of urban immigrant communities.

SO CIOL 434 Spatial Thinking in Social Science Credits: 3
This course will review ways in which social scientists have incorporated the concepts of space, place, and distance into their theories and research. Readings will be drawn from interdisciplinary work in the areas of urban sociology, criminology, health and demography that deal with spatial organization of communities and cities, spatial disparity of health and crimes, and mobility.

Prerequisites: junior, senior, or graduate standing.

SO CIOL 440R Sociology Of Medicine Credits: 3
Relationship of basic concepts in sociology to health and medical care. Cultural and class variations in health status. Social and cultural aspects of health. Recommended preparation: A course in social science.

SO CIOL 441 Globalization and Development Credits: 3
Focuses on issues of economic development, social stratification, political institutions, and political mobilization in societies where colonialism provided the context for their long-term disadvantages in the international economic order. Specific attention is paid to the intersection of the international components that define the options and limits for societal development (e.g., market shifts, international institutions and contracts, foreign policies, and migration) and the distinct social, political and cultural implications of these factors for developing societies.

Cross Listings: ANTHRO 441.
SOCIOL 5501 Social Theory I Credits: 3
Examines the development of social theory in Europe up to the beginning of the twentieth century, with a focus on its intellectual precursors of social theory, debates over the nature of society, and controversies over the distinct features of sociology as an emerging academic discipline. The major perspectives covered include the intellectual origins of sociological thought in Great Britain, France, and Germany, and the debates as reflected in the writings of Karl Marx, Emile Durkheim, Max Weber, and Georg Simmel.
Prerequisites: undergraduate course in Sociological Theory.

SOCIOL 5502 Social Theory II Credits: 3
Examines the major sociological theories developed during the twentieth century and contemporary debates over the nature of society and the nature of our knowledge about society. Theories to be examined include behaviorism, symbolic interactionism, structural functionalism, phenomenology, conflict theory, postmodernism, those that attempt to integrate social agency and structure, and feminist theory.
Prerequisites: SOCIOL 5501.

SOCIOL 5503 Controversies In Contemporary Social Theory And Practice Credits: 3
This course critically examines central issues in contemporary debates among social theorists over the nature of society and how it should be studied.

SOCIOL 5510 Sociological Methods I Credits: 3
A survey of methods used by sociologists: selection and formulation of problem, research design, survey research, participant observation, sampling, reliability and validity, use of scales, and data analysis.
Prerequisites: SOCIOL 362 (or equivalent).

SOCIOL 5511 Sociological Methods II Credits: 3
Quantitative research is the primary focus of the course; emphasis is placed on problem formulation; research design; sampling procedures; questionnaire construction and interviewing techniques; data collection; problems of scaling, validity and reliability; uses of secondary data sets; data analyses and report writing.
Prerequisites: SOCIOL 362 (or equivalent).

Cross Listings: CJC 5511.

SOCIOL 5516 Intermediate Statistics Credits: 3
A systematic development of the logic and practice of selected statistical methods used in sociological research. Included are analysis of variance and covariance, regression analysis, multiple contingency, and non-parametric tests.
Prerequisites: SOCIOL 263.

Cross Listings: CJC 5516.

SOCIOL 5530 Anthropology Of Gender Credits: 3
This class explores theories of the social construction of gender in cross-cultural contexts. It will also explore global issues of diversity, local and international politics, the economy and work, education, etc.

SOCIOL 5531 Feminist Theories Credits: 3
