Architecture, Urban Planning and Design	555
Architectural Studies Major	560
Bachelor of Arts in Urban Planning and Design	561
Bachelor of Arts: Urban Studies	565
Graduate Certificate in Historic Preservation	571
Minor in Urban Studies	572
Art and Art History	574
Bachelor of Arts: Art History	583
Bachelor of Arts: Studio Art	587
Master of Arts: Art History	592
Master of Arts: Studio Art	594
Minor in Art and Visual Communication	596

Minor in Art History	597
Minor in Studio Art	597
Black Studies	598
Bachelor of Liberal Arts: Black Studies Emphasis	603
Graduate Certificate in Black Studies	608
Master of Arts in Liberal Studies: Black Studies Interest Area	610
Minor in Black Studies	612
Classical and Ancient Studies Program	613
Foreign Languages and Literatures Department: Emphasis in Greek and Latin	617
History Department: Antiquity and Medieval History Concentration	617
Minor in Classical and Ancient Studies	617
Communication Studies	618
Bachelor of Arts: Communication Studies - Film and Media Studies	627
Bachelor of Arts: Communication Studies - Interpersonal and Public Communication Emphasis	632
Bachelor of Arts: Communication Studies - Journalism and Mass Communications Emphasis	637
Bachelor of Arts: Film and Media Arts	641
Minor in Communication Studies	646
Minor in Film Studies	647
Criminal Justice and Criminology	648
Minor in Criminal Justice and Criminology	654
Bachelor of Arts: Criminal Justice and Criminology	655
Master of Science: Criminal Justice and Criminology	660
Dual BA/MS Degree	661
Earth and Environmental Science	664
Bachelor of Arts: Environmental Studies	678
Bachelor of Science: Earth and Environmental Science	683
Bachelor of Science: Earth and Environmental Science - Environmental Science Emphasis	683
Bachelor of Science: Earth and Environmental Science - Geology Emphasis	688
Bachelor of Science: Earth and Environmental Science - Physical Geography Emphasis	693
Graduate Certificate: Geographic Information Systems (GIS)	698
Master of Science: Environmental and Urban Geosciences	698
Minor: Environmental Studies	700
Minor: Environmental Sustainability	701
Minor: Geography	702
Minor: Geology	702
Undergraduate Certificate: Geographic Information Systems (GIS)	703
Economics	703
Bachelor of Arts / Master of Arts: Economics - Dual Degree Program	713
Bachelor of Arts: Economics	714
Economics	719
Master of Arts: Economics	721
Minor in Economics	722

English Language and Literature	723
Bachelor of Arts: English	746
Bachelor of Arts: English American Literary and Cultural Studies Emphasis	751
Bachelor of Arts: English Classical, Medieval, & Early Modern Literature Emphasis	756
Bachelor of Arts: English Creative Writing Emphasis	761
Bachelor of Arts: English Language and Rhetoric Emphasis	766
Dual Degree: English BA-MA	771
Interdisciplinary Ph.D in English	773
Master of Arts: English	773
Master of Fine Arts: Creative Writing and Media Arts	777
Master of Fine Arts: Creative Writing & Media Arts - Creative Nonfiction Emphasis	779
Master of Fine Arts: Creative Writing and Media Arts - Playwriting Emphasis	781
Master of Fine Arts: Creative Writing and Media Arts - Poetry Emphasis	784
Master of Fine Arts: Creative Writing and Media Arts - Screenwriting Emphasis	786
MFA in Creative Writing and Media Arts: Fiction Emphasis	788
Minor in Creative Writing	791
Minor in English Language and Literature	792
Minor in Manuscript, Print Culture, and Editing	794
Minor in Writing	795
Teacher Certification in English	795
Foreign Languages and Literatures	795
Bachelor of Arts: Languages and Literatures	810
Bachelor of Arts: Languages and Literatures - Classical Languages and Cultures Emphasis	811
Bachelor of Arts: Languages and Literatures - French Language and Literature Emphasis	816
Bachelor of Arts: Languages and Literatures - International Studies Emphasis	820
Bachelor of Arts: Languages and Literatures - Spanish Language and Literature Emphasis	826
Master of Arts: Romance Language and Literature	830
Minor: French, German, Spanish	832
Minor: German Studies	833
Gerontology	834
Graduate Certificate in Gerontology	834
Minor in Gerontology	835
History	835
Bachelor of Arts: History	850
Interdisciplinary Ph.D. in History	856
Master of Arts: History	857
Accelerated BA-MA: History	861
Minor in History	861
Latinx and Latin American Studies Program	863
Liberal Studies Program	866
Bachelor of Liberal Arts	867
Master of Arts in Liberal Studies	871

Relationship of the MALS to Interdisciplinary Doctoral Degrees	873
Student Learning Outcomes	873
Mathematics and Statistics	873
Bachelor of Arts: Mathematics and Statistics	880
Bachelor of Science in Mathematics and Statistics	885
Bachelor of Science: Mathematics and Statistics / Master of Science: Mathematics - Dual Degree	890
Bachelor of Science: Mathematics and Statistics / Master of Science: Statistics - Dual Degree	891
Interdisciplinary Ph.D. in Mathematics	892
Master of Science in Mathematics	892
Master of Science in Statistics	894
Minor: Actuarial Science	895
Minor: Mathematics	896
Teacher Certification in Mathematics	896
Medieval and Early Modern Studies	897
Graduate Certificate in Medieval and Early Modern Studies	897
Minor in Medieval and Early Modern Studies	899
Military Science	900
Two-Year Instruction	903
Philosophy	903
Bachelor of Arts: Philosophy	907
Minor in Bioethics and Medical Humanities	911
Minor in Philosophy	911
Physics and Astronomy	912
Astronomy Minor	920
Physics Minor	921
Bachelor of Arts: Physics	922
Bachelor of Science: Physics	926
Bachelor of Science: Physics - Astronomy Emphasis	931
Master of Science: Physics	935
Interdisciplinary Ph.D. Program Regulations	937
Physics/Engineering Double Degree	937
Teacher Certification in Physics	938
Political Science	938
Bachelor of Arts: Political Science	944
Interdisciplinary Ph.D.	948
Minor in International Studies	948
Minor in Political Science	950
Teacher Certification in Social Studies	951
Pre-Law Program	951
Psychology	952
Bachelor of Arts: Psychology	961
Doctor of Philosophy in Psychology: Applied Cognitive and Brain Sciences	966

Doctor of Philosophy in Psychology: Clinical Psychology Option	968
Leadership, Employment, and Community Engagement Certificate (PROPEL)	971
Master of Arts: Psychology	972
Psychology Minor	974
Psychology/Music Therapy Double Major	974
Race, Ethnic, and Gender Studies	975
Religious Studies	975
Sociology	978
Bachelor of Arts: Sociology	986
Bachelor of Arts: Sociology - Cultural Anthropology Emphasis	991
Minor: Anthropology	995
Minor: Sociology	996
School of Social Work	997
Master of Social Work	1004
Women's, Gender, and Sexuality Studies	1006
Minor in Women's, Gender, and Sexuality Studies	1008
Special Opportunities	1009
Arts and Sciences Student Council	1010
Dual Credit High School/College Partnerships (HSCP)	1010
Fellowships and Awards	1010

Dance	1030
Music	1035
Graduate Programs	1035
Ph.D. (Interdisciplinary) Music Education	1035
Doctor of Musical Arts Degrees	1036
Doctor of Musical Arts: Conducting	1039
Doctor of Musical Arts: Music Composition	1041
Doctor of Musical Arts: Performance	1041

Graduate Certificates	1043
Artist's Certificate	1043
Performer's Certificate	1044
Master of Arts Degrees	1045
Master of Arts: Music	1045
Master of Arts: Music Therapy Emphasis	1045
Master of Music Degrees	1046
Master of Music: Conducting	1046
Master of Music: Music Composition	1048
Master of Music: Music Theory	1048
Master of Music: Musicology	1049
Master of Music: Performance-Keyboards	1050
Master of Music: Performance-Orchestral and Guitar	1051
Master of Music: Performance-Woodwinds	1051
Master of Music: Performance-Voice	1052
Master of Music Education	1053
Undergraduate Programs	1054
Bachelor of Arts: Music	1054
Bachelor of Arts: Music Therapy Emphasis	1058
Bachelor of Music Education	1063
Bachelor of Music Education - Choral Emphasis	1065
Bachelor of Music Education - Instrumental Emphasis	1070
Bachelor of Music: Jazz Studies	1077
Bachelor of Music: Music Composition	1081
Bachelor of Music: Music Performance - Guitar Emphasis	1085
Bachelor of Music: Music Performance - Piano Emphasis	1090
Bachelor of Music: Music Performance - Voice Emphasis	1094
Bachelor of Music: Music Performance - Wind, Strings, Percussion	1099
Bachelor of Music: Music Theory	1103
Theatre	1108
Bachelor of Arts: Theatre	1117
Master of Fine Arts: Acting and Directing	1122
Master of Fine Arts: Design and Technology	1122
Minor: Theatre	1123

HOME

Welcome to the University of Missouri-Kansas City 2020-2021 catalog! We are pleased to provide an interactive and searchable online catalog.

Use the left hand menus to navigate or search through the catalog. There is also a PDF version available through the Print Options link.

We welcome your feedback and suggestions to make this catalog better for the future. Feedback may be provided by sending an email to umkccatalog@umkc.edu.

Amy Cole (coleamy@umkc.edu), University Registrar

Amy Hall (amyhall@umkc.edu), UMKC Catalog Administrator

UMKC Summary Profile

Located in the heart of Kansas City, Mo., the University of Missouri-Kansas City is a public research university focused on urban issues. At UMKC, your mind will be opened to knowledge, diverse people and outstanding experiences, allowing you to further explore those areas of your life in which you are already engaged.

For more information about UMKC, please visit <https://www.umkc.edu/about/facts.html>.

INTRODUCTION

University of Missouri - Kansas City (UMKC)

General undergraduate academic rules and regulations and graduate academic regulations and information apply to all undergraduate and graduate programs, respectively.

Prospective students should be aware that the University reserves the right to make changes in admission requirements, fees and other specifications in the catalog.

The web site address for the UMKC catalog is <http://umkc.edu/catalog> (<http://www.umkc.edu/catalog/>).

The UMKC catalog is the official record of degree program requirements. Students are expected to become thoroughly familiar with all academic regulations and requirements of this catalog pertaining to their program of study and to comply with its provisions.

The University of Missouri-Kansas City (UMKC) is one of four campuses that constitute the University of Missouri (<http://www.umsystem.edu/ums/about/>). Established in Columbia in 1839 on the ideals of Thomas Jefferson, the University of Missouri became a land-grant institution upon passage of the Morrill Act by Congress in 1862.

The University is governed by the Board of Curators (<http://www.umsystem.edu/curators/>), whose members are appointed by the governor of Missouri and confirmed by the Missouri Senate. The University president (<http://www.umsystem.edu/president/>) directs and coordinates the programs of the four campuses, with staff assistance in finance, business management, research, extension, development, public information and other UM system services.

The activities of each campus are supervised by a chancellor, who directs campus affairs within policies established by the Board of Curators and the president.

Accreditation

"Accreditation" is the primary means of assuring and improving the quality of higher education institutions and programs in the United States. Active for the past 100 years, this private, voluntary system of self-examination and peer review has been central to the creation of a U.S. higher education enterprise that is outstanding in many respects.

– *Council for Higher Education Accreditation*

The University of Missouri - Kansas City is accredited by The Higher Learning Commission, a regional accreditation agency recognized by the U.S. Department of Education.

The Higher Learning Commission

230 South LaSalle Street, Suite 7-500, Chicago, IL 60604

(800) 621-7440

<http://www.hlcommission.org>

The Higher Learning Commission accredits UMKC as a whole. Specific undergraduate, graduate, and professional programs, are also accredited by other programmatic accrediting agencies. The accredited programs and their accrediting agencies are identified in the applicable academic unit and/or program information sections of the catalog.

Mission and Values

Mission (What We Do)

As an urban research university, our mission at the University of Missouri-Kansas City is to promote learning through the discovery, preservation and dissemination of knowledge of public value across a broad spectrum of disciplines and fields of study. UMKC celebrates the individual and embodies diversity and inclusion by intertwining these goals with innovation to enable transformational impact aimed at bringing cultural, social, health and economic prosperity to the metropolitan, regional and global communities we serve.

Vision (Why We Do What We Do)

UMKC aspires to be an exemplary public urban research university of the 21st Century, pursuing excellence as a human-centric learning and discovery community, fostering equity, diversity and inclusion to enrich the lives of the people and regions we serve.

Learn more about the Chancellor's Strategic Plan (<https://www.umkc.edu/about/strategic-plan.html>).

Values

We, the community members of UMKC, are proud to contribute to a student-centered urban university, serving our mission of learning, discovery, research and service, inspired by our commitment to equity, diversity, inclusion and respectful interaction.

Our key values:

- Accountability
- Learning
- Respect
- Diversity
- Collaboration
- Integrity

Learn more about the values of UMKC (PDF) (<https://www.umkc.edu/about/documents/UMKC-Values-Statement.pdf>).

ACADEMIC PROGRAMS

Areas of study are listed in the first column. The actual undergraduate and graduate degrees or certificates to be earned are listed to the right of each field of study. Degrees, emphasis areas (options), certificates, and minors will appear on students' official transcripts.

Pursuant to Missouri HB 1606 (2018), information regarding program lengths, costs, and students' median time-to-degree, as well as employment and wage outcomes, can be found at <https://jobs.mo.gov/jobseeker/training-and-education> (<https://jobs.mo.gov/jobseeker/training-and-education/>). Employment and wage outcomes are limited to completers found employed in Missouri. Students not found as employed may also be working out-of-state, self-employed, or enrolled in continuing education. Additional information on programs and program outcomes may be found by searching at <https://scorecard.mo.gov/Search> (<https://scorecard.mo.gov/Search/>).

(i)PhD Disciplines that participate in the Interdisciplinary Ph.D. program.

COURSE OFFERINGS

Graduate Course Offerings

Accounting (ACCTNG)

Courses

ACCTNG 5503 Financial Accounting for Decision Making Credits: 3

An introduction to the role of financial accounting in organizational decision making. The course provides students with an understanding of the process for reading, analyzing, and interpreting financial accounting data to make informed business decisions. Students will learn the strengths and limitations of accounting information and how it can be used to create value for the organization.

Prerequisites: Students must be enrolled in a Bloch School graduate program.

ACCTNG 5517 Survey Of Accounting Credits: 3

An overview of financial and managerial accounting. The course introduces the various reports that are used by stockholders, creditors, and managers to assess company performance and evaluate financial health. In addition, techniques are presented that assist firm managers in planning, control, and decision-making activities.

ACCTNG 5550 Accounting Information Systems Credits: 3

This course examines a number of systems employed to process accounting information, the internal control activities typically used in each system, and associated documentation tools.

Prerequisites: ACCTNG 310, MIS 202.

ACCTNG 5551 Governmental/Not-for-Profit Accounting Credits: 3

An overview of accounting for state and local governments and not-for-profit entities. Pronouncements of the accounting profession are emphasized where applicable. Recommended preparation: ACCTNG 310.

ACCTNG 5556 Cost Management Credits: 3

A study of the principles and techniques of cost accounting with emphasis on the structure of cost accounting systems and the processing, summarizing, and reporting of cost information. Topics include various issues relevant for manufacturing and service organizations, and introduction of situations that requires the application of cost information to managerial settings.

Prerequisites: ACCTNG 5517.

ACCTNG 5557 Introduction To Income Taxation Credits: 3

An investigation of the structure of federal, state, and local taxation, along with an examination of the impact of taxes on the management decision process. This course is not open to students who have completed ACCTNG 412.

ACCTNG 5558 Financial Accounting Theory Credits: 3

A study of the theory and practice of financial accounting with emphasis upon financial statement preparation and analysis of asset, liability, and equity measurement.

Prerequisites: ACCTNG 360.

ACCTNG 5559 Advanced Financial Accounting Theory Credits: 3

A study of advanced topics in financial accounting. Topics include business combinations and financial statement consolidation theory and practice. Recommended preparation: ACCTNG 310.

ACCTNG 5560 Introduction To Auditing And Accounting Systems Credits: 3

Fundamentals underlying the design of accounting systems and the processing of accounting data. Current auditing standards and procedures are extensively investigated, with emphasis on the nature of internal control, audit evidence, and audit reports.

Prerequisites: ACCTNG 5558.

ACCTNG 5564 Principles of Internal Auditing Credits: 3

A study of how the internal auditor determines the nature and amount of evidence that should be accumulated considering the unique aspects of an engagement, as well as some idea of how that evidence is evaluated in the context of a financial audit.

Prerequisites: ACCTNG 311 and ACCTNG 350.

ACCTNG 5568 Data Analytics for Accounting Credits: 3

Data Analytics is an investigation of the stories large data stores can tell if only we know how to unravel the story. As such, this course will investigate big data sources from both a data-mining and a hypothesis-testing approach.

Prerequisites: Admission to the MS Accounting degree program.

ACCTNG 5570 Fraud Examination Credits: 3

An examination of the elements of fraud and the fraud auditing process.

Prerequisites: Must be admitted to a graduate program in the Bloch School of Management.

ACCTNG 5572 Tax Theory And Business Applications Credits: 3

A study of substantive issues relating to the taxation of business entities including multi-jurisdictional considerations. Topics include business formation and dissolution, business valuation, selection of business entity, compensation of employees, sales or exchanges of business property, and business tax credits. Recommended preparation: ACCTNG 412 or ACCTNG 5557.

ACCTNG 5575 Managerial Accounting: Issues, Tools And Analysis Credits: 3

A look at various tools used to assist in the planning, control, performance evaluation, and decision-making activities of managers. Contemporary issues that confront management are introduced where appropriate.

Prerequisites: ACCTNG 307.

ACCTNG 5576 Tax Research, Procedure And Practice Credits: 3

An examination of the theory, practice, and research methodology of taxation as applied to individuals and business entities. Recommended preparation: ACCTNG 412 or ACCTNG 5557 or equivalent.

Prerequisites: MS Accounting program student.

ACCTNG 5577 Advanced Auditing Credits: 3

An analysis of real-world cases of audit problems with emphasis on red flags, pressures auditors face, and serious implications of audit failure (both perceived and real). Recommended preparation: ACCTNG 405 or ACCTNG 5560.

ACCTNG 5578 Current Problems In Accounting Credits: 3

This course will focus on an in-depth exploration of specific problems including, but not confined to those accounting problems which have resulted in official positions being published or considered by the accounting profession.

Prerequisites: ACCTNG 360.

ACCTNG 5580 Financial Reporting Systems Credits: 3

Executive decision making and leadership requires financial fluency. Using a blended format, students develop the necessary capacities to manage financial reporting systems. Case materials offer students the opportunity to build on their analytical skill in regards to financial statements.

Prerequisites: Admission to Executive MBA Program.

ACCTNG 5587 Special Topics Credits: 3

This course is designed to facilitate one of two purposes: an initial offering of a new course (prior to formal approval) or an initial and possible only offering of new topics.

ACCTNG 5595 Internship Credit: 1

An opportunity for students to integrate their academic studies via employment with a business/organization in the community.

ACCTNG 5597 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

ACCTNG 5899 Required Graduate Enrollment Credit: 1

Anesthesia (ANESTH)

Courses

ANESTH 5505 Anatomy for Anesthesiologist Assistants I Credit: 1

This course is designed to meet the needs of students seeking a Master of Science in Anesthesia degree at UMKC. A thorough understanding of anatomy provides a basic foundation for future coursework and for the profession of Anesthesiologist Assistant. This course covers gross anatomy from a regional (or systemic in some cases) perspective bringing together all body systems present in each defined area of study.

Prerequisites: Acceptance to the MSA program.

ANESTH 5506 Anatomy for Anesthesiologist Assistants II Credit: 1

In this course, students will learn anatomy that directly impacts clinical situations. Diagnostic skills will be enhanced through an understanding of radiologic tests, identification of common chest X-rays, and a basic understanding of transesophageal echocardiography. Students will learn to recognize the basic 4 chamber TEE views and diagnose the most common lesions and abnormalities in patients undergoing cardiac surgery. An ultrasound machine will be used to identify anatomy for a variety of clinical procedures, including intravenous line placement, central line placement, arterial line placement, and peripheral nerve block placement. Students will learn the principles of how to operate and manipulate the ultrasound monitor, and will learn the relevant anatomy and anesthetic implications and management for the most common peripheral nerve blocks used today. In addition, clinically significant anatomy case studies in anesthesia will be presented and discussed.

Prerequisites: Acceptance to the MSA program.

ANESTH 5518 Professionalism for the Anesthesiologist Asst I Credits: 0.5

Introduction to legal and ethical areas of Anesthesiologist Assistant practice; professional behavior, legal obligations of anesthetists and patient, and social and community contexts of health care.

Prerequisites: Acceptance to the MSA program.

ANESTH 5528 Professionalism for the Anesthesiologist Asst II Credits: 0.5

Special topics in Anesthesiologist Assistant practice; impact of substance abuse, cognitive deficiency and mental illness in creating an impaired provider.

Prerequisites: Acceptance to the MSA program.

ANESTH 5538 Professionalism for the Anesthesiologist Asst III Credits: 0.5

Special topics in Anesthesiologist Assistant practice; principles of evidence based medicine and approaches to mastering life long learning and maintaining professional competencies.

Prerequisites: Acceptance to the MSA program.

ANESTH 5540 Patient Monitoring and Instrumentation Credits: 3

This is a three credit hour course which integrates concepts of circuits and engineering with the clinical application of anesthesia instrumentation. To the extent possible, the material covered will be directly linked to clinical scenarios. In order for the monitors to be fully understood from a clinical management perspective, relevant physiology related to the monitors and to the field of anesthesia will be taught and practiced. In addition to the monitors, students will gain an in depth understanding of all parts of the anesthesia machine, anesthesia circuits, central line and arterial line equipment, and the properties of common intravenous and inhalational anesthetics.

ANESTH 5541 Methods of Anesthesia I Credits: 2

In this course, students will be prepared to give safe anesthesia in all types of cardiac surgery, learn how to interpret arterial blood gases, and obtain an in depth understanding of ACLS principles so that they will be prepared for any resuscitation scenario in the OR. A cardiac drug card will be administered. Videos and PPTs will be administered to help students understand the concepts of ACLS, acid base management, cardiac bypass, cardiac surgery monitoring, techniques, and anesthetic management.

Prerequisites: ANESTH 5540.

ANESTH 5548 Anesthesiologist Assistant Senior Seminar Credits: 0.5

This is 0.5 credit hour course taken in the final semester of the Master of Science in Anesthesia Program and is designed to prepare the student for their future roles. This course will prepare the student for the job market and placement and enforce the life-long learning needed within medical professions. The course will contain information on student loan payback, financial literacy after graduation, and leadership opportunities for the graduate. The course will also clinically update the students in basic life saving for the healthcare provider (BLS), advanced cardiac life saving (ACLS) and Pediatric advance life saving (PALS).

ANESTH 5556 Physiology for Anesthesiologist Assistants I Credits: 3

This course is the first of two parts of a human physiology series. The course is designed to provide an understanding of basic neurophysiology, autonomic nervous system, blood, respiratory and cardiovascular physiology. Topics of special interest to anesthesiologist assistants will be highlighted.

ANESTH 5557 Physiology for Anesthesiologist Assistants II Credits: 2

This course is the 2nd of two parts of a human physiology series. The course is designed to provide an understanding of endocrine, reproductive, neonatal, gastrointestinal, and neurophysiology. Topics of special interest to anesthesiologist assistants will be highlighted as it relates to the physiology.

Prerequisites: ANESTH 5556.

ANESTH 5558 Anesthesia & Co-existing Disease I Credits: 2

This course provides an essential anesthesia link to the basic anatomy and physiology classes in the Masters of Science in Anesthesia program. The content outline intentionally corresponds with and builds upon that of the Physiology for Anesthesiologist Assistants coursework. This course focuses on primary cardiac, respiratory and endocrine coexisting diseases that affect anesthetic care. It provides for the student a strategic plan in the management of patients with these disease processes.

Prerequisites: ANESTH 5556.

ANESTH 5559 Anesthesia & Co-existing Disease II Credits: 2

This is the second course that establishes an essential anesthesia link to the basic anatomy and physiology classes in the Masters of Science in Anesthesia program. The content outline intentionally corresponds with and builds upon that of the Physiology for Anesthesiologist Assistants coursework. This course focuses on a variety of coexisting diseases states but all focuses on pediatric and obstetric co-existing disease and how they affect anesthesia management.

Prerequisites: ANESTH 5558.

ANESTH 5560 Introduction to Anesthesia Credits: 2

Introduction to basic concepts dealing with clinical anesthesia. Medical terminology, human anatomy, medical chart interpretation and drug dosage calculations.

ANESTH 5561 Orientation to Simulation and Clinical Application Credits: 5

This skills based course is an introduction to the student's clinical experience in the operating room. The goal is to rapidly engage students in anesthesia patient care. Fundamental procedures and techniques used in administering anesthesia will be emphasized. Simulated clinical models are used to allow students to first practice anesthesia care in a safe, controlled, low pressure environment. Students are prepared for quality immersion into patient care. Operating room set up and etiquette, pre-operative assessment, IV placement techniques, airway management, intraoperative care, and postoperative management are emphasized. Course includes hands on introduction to the operating room and anesthetic management and students obtain 80-100 hours of clinical contact time.

ANESTH 5563 Anesthesia Clinical Experience I Credits: 4

During this course students gain clinical and professional experience in the operating room. In this course students are expected to perform program competencies with the level of assistance developed in the programs goals for skills development. Students will be one on one with a Certified Anesthesiologist Assistant or Anesthesiologist clinical supervisor while obtaining these goals. Students will complete a specific IV, pre-surgical testing and post anesthesia care unit rotation during their clinical experience courses.

Prerequisites: ANESTH 5561.

ANESTH 5564 Anesthesia Clinical Correlation II Credit: 1

This one credit course is designed to help students understand how to effectively research and apply current anesthesia journal articles, and to prepare for the NCCAA certification examination. The students will spend the entire semester studying 6 (Principles of anesthesia/ Instrumentation and monitoring, anesthesia delivery systems, physics / renal, genital urologic / respiratory system / clinical subspecialties) of the 16 topics that are included on the NCCAA certification examination. Homework will include submission of test questions based on their presentations and the 6 assigned NCCAA testing topics. The students will also receive an assignment to find and summarize a journal article from one of the 6 assigned topics. The students will cap off the semester with a clinical final examination, which includes submitted questions from assigned topics.

Prerequisites: ANESTH 5562.

ANESTH 5565 Anesthesia Clinical Experience II Credits: 8

During this course students gain clinical and professional experience in the operating room. In this course students are expected to perform program competencies with the level of assistance developed in the programs goals for skills development. Students will be one on one with a Certified Anesthesiologist Assistant or Anesthesiologist clinical supervisor while obtaining these goals. Students will complete a specific IV, pre-surgical testing and post anesthesia care unit rotation during their clinical experience courses.

ANESTH 5567 Anesthesia Clinical Experience III Credits: 16

Clinical clerkship component of program clinical phase. Students are in the operating room (OR) five days per week and through the combined clinical experience clerkships will receive extended exposure to all clinical subspecialties. Students complete 4 week or 8 week rotations at several hospitals to gain experience with general surgery, obstetrics, pediatrics, trauma surgery, neurosurgery, cardiovascular surgery, orthopedic surgery, intensive care unit and others. Students are expected to perform program competencies with the level of assistance developed in the programs goals for skills development. Students will be one on one with a Certified Anesthesiologist Assistant or Anesthesiologist clinical supervisor while obtaining these goals.

Prerequisites: ANESTH 5565, ACLS and PALS certification.

ANESTH 5568 Anesthesia Clinical Correlation III Credit: 1

This one credit course is designed to help students understand how to effectively research, apply, and prepare for the NCCAA certification examination. The students will spend the entire semester studying 4 (cardiovascular/ Hematology coagulation / Metabolism endocrine / Neurosciences neuromuscular) of the 16 topics that are included on the NCCAA certification examination. Homework will include submission of test questions based on the 4 assigned NCCAA testing topics. The students will cap off the semester with a clinical final examination, which includes submitted questions from the assigned topics. This course also includes a one week in person session where will identify risk management issues for anesthesia providers, learn key strategies when applying for a job and demonstrate key points of patient assessment in the ICU. Recertification for Basic Life Support (BLS) occurs during this course.

Prerequisites: ANESTH 5564.

ANESTH 5569 Anesthesia Clinical Experience IV Credits: 12

Clinical clerkship component of program clinical phase. Students are in the operating room (OR) five days per week and through the combined clinical experience clerkships will receive extended exposure to all clinical subspecialties. Students complete 4 week or 8 week rotations at several hospitals to gain experience with general surgery, obstetrics, pediatrics, trauma surgery, neurosurgery, cardiovascular surgery, orthopedic surgery, intensive care unit and others. Students are expected to perform program competencies with the level of assistance developed in the programs goals for skills development. Students will be one on one with a Certified Anesthesiologist Assistant or Anesthesiologist clinical supervisor while obtaining these goals.

Prerequisites: ANESTH 5567.

ANESTH 5570 Anesthesia Clinical Correlation IV Credit: 1

This one credit course is designed to help students understand how to effectively research and apply current anesthesia journal articles, and to prepare for the NCCAA certification examination. The students will spend the entire semester studying 6 (Peds the Neonatal Period / Pharmacology / Regional Anesthesia Pain Management/ GI Hepatic/ OB Perinatal Management) of the 16 topics that are included on the NCCAA certification examination. Homework will include submission of test questions based on their presentations and the 6 assigned NCCAA testing topics. The students will also receive an assignment to find and summarize a journal article from one of the 6 assigned topics. The students will cap off the semester with a clinical final examination, which includes submitted questions from assigned topics.

Prerequisites: ANESTH 5568.

ANESTH 5571 Anesthesia Clinical Experience V Credits: 16

Clinical clerkship component of program clinical phase. Students are in the operating room (OR) five days per week and through the combined clinical experience clerkships will receive extended exposure to all clinical subspecialties. Students complete 4 week or 8 week rotations at several hospitals to gain experience with general surgery, obstetrics, pediatrics, trauma surgery, neurosurgery, cardiovascular surgery, orthopedic surgery, intensive care unit and others. Students are expected to perform program competencies with the level of assistance developed in the programs goals for skills development. Students will be one on one with a Certified Anesthesiologist Assistant or Anesthesiologist clinical supervisor while obtaining these goals.

Prerequisites: ANESTH 5569.

ANESTH 5573 Anesthesia Clinical Experience VI Credits: 16

Clinical clerkship component of program clinical phase. Students are in the operating room (OR) five days per week and through the combined clinical experience clerkships will receive extended exposure to all clinical subspecialties. Students complete 4 week or 8 week rotations at several hospitals to gain experience with general surgery, obstetrics, pediatrics, trauma surgery, neurosurgery, cardiovascular surgery, orthopedic surgery, intensive care unit and others. Students are expected to perform program competencies with the level of assistance developed in the programs goals for skills development. Students will be one on one with a Certified Anesthesiologist Assistant or Anesthesiologist clinical supervisor while obtaining these goals.

Prerequisites: ANESTH 5571.

ANESTH 5575 Pharmacology for Anesthesiologist Assistants I Credits: 2

Basic concepts in pharmacology: principles of drug action, receptor theory, pharmacokinetics, pharmacodynamics and drug dose calculations. The course will emphasize the primary medications used to provide anesthesia and to support patients during the perioperative period.

ANESTH 5576 Pharmacology for Anesthesiologist Assistants II Credit: 1

This is a one credit hour course designed for the M.S. in Anesthesia Program. The course prepares students to apply knowledge of pharmacotherapy to anesthesia care by taking into account type of surgery and patient coexisting diseases.

ANESTH 5577 Methods of Anesthesia II Credits: 3

In this course, students will be prepared to manage anesthetics for more complex situations. Anesthetic management for certain patient conditions will include permanent implantable pacemakers, fluid electrolyte abnormalities, and congenital heart disease. Clinical management for individual patient populations will include obstetrics and pediatric advanced life support (PALS). In addition, clinically relevant information regarding advanced equipment and techniques will include 12 lead ECG interpretation, ultrasound guided peripheral nerve blocks, neuraxial anesthesia, and physics for anesthesiologist assistants.

ANESTH 5578 Pharmacology for Anesthesiologist Assistants III Credits: 2

This is a two credit hour course designed for the M.S. in Anesthesia Program. The course prepares students to apply knowledge of pharmacotherapy to anesthesia care by taking into account type of surgery and patient coexisting diseases.

Prerequisites: ANESTH 5575, ANESTH 5576.

ANESTH 5585 Physiological Model-based Simulation I Credits: 2

This is a two credit hour course, which utilizes physiological model-based simulation and procedure simulation to integrate anesthesia-associated basic science knowledge into a laboratory setting. The focus for this semester is designed to help student become proficient in central lines, pulmonary artery monitoring, epidural and spinal placement, and managing more complex anesthetic cases involving trouble shooting and crisis management via simulation. Advanced Cardiac Life Saving is obtained during this course.

ANESTH 5586 Physiological Model-based Simulation II Credits: 2

This is a two credit hour course, which builds upon the technical skills learned in ANES 5585. Students will be asked to manage complex anesthetic cases involving multiple co- existing diseases and methods of anesthesia. Pediatric Advanced Lifesaving Saving (PALS) is a certification required to be obtained during this course.

Prerequisites: ANESTH 5585.

ANESTH 5590 Special Topic Credits: 0.5-3

An opportunity to explore new topics or existing topics in greater detail and are not included in the usual course offerings.

Art (ART)

Courses

ART 5405 Practices in the Visual Arts Classroom Credits: 3

Students preparing to student teach in the spring semester read, reflect on and master the use of current research in art education and study, practice and master the use of general education thoughts of today.

ART 5506 Graduate Photography Credits: 3-6

Photography on the graduate level with individual selection of media and technique. May be repeated up to a total of 15 hours.

ART 5510 Graduate Painting Credits: 3-6

Painting on the graduate level with individual selection of medium and technique. May be repeated up to a total of 15 hours.

ART 5513 Graduate Graphic Design Credits: 3-6

Graphic design on the graduate level with individual selection of medium and technique. May be repeated up to a total of 15 hours.

ART 5515 Graduate Drawing Credits: 3-6

Drawing on the graduate level with individual selection of media and technique. Student may pursue selected projects on a group or individual basis. May be repeated up to a total of 15 hours.

ART 5520 Graduate Print Media Credits: 3-6

Print media on the graduate level with individual selection of medium and technique.

ART 5540 Graduate Digital Imaging Credits: 3-6

Digital imaging on the graduate level with individual selection of subject and technique.

Prerequisites: Departmental consent.

ART 5550 Graduate Performance Art Credits: 3-6

Performance art on the graduate level with individual selection of medium and technique. May be repeated up to a total of 15 hours.

ART 5576 Graduate Digital Video and Motion Design Credits: 3-6

Digital video and motion design on the graduate level with individual selection of subject and technique.

Prerequisites: Departmental consent.

ART 5588 Graduate Studio Art Seminar Credits: 3

Studio art seminar for graduate students in any medium. Course will focus on professional practices, as well as the development of a sustainable artistic career. Individual artistic production and shared critiques will be required.

Prerequisites: Studio Art Graduate Students.

ART 5591 Directed Technical Studies Credits: 2-4

Individually directed studies or research in selected projects of a technical nature in studio art. May be repeated up to a total of six hours applicable to a degree program.

ART 5599 Research And Thesis Credits: 1-9

Production and/or writing of thesis. Usually taken in the last term of candidacy.

ART 5899 Required Graduate Enrollment Credit: 1

Art History (ART-HIST)

Courses

ART-HIST 5501 Scope And Methods Of Art History Credits: 3

An exploration of the discipline of art history, including theoretical issues, guiding questions and problems, diverse approaches (historical and current), and research tools. Required of all Art History graduate students and best taken early in one's studies.

ART-HIST 5539 Paris in the Age of Rococo Credits: 3

In the early 18th century, Paris overtook Rome as the artistic center of Europe. We explore all of the visual arts during the vibrant "Rococo," the age of Watteau, Chardin, and Boucher.

ART-HIST 5540 Seminar in French Art: Renaissance and Baroque Credits: 3

A history of French art from the time of Louis XII through the Age of Louis XIV, with emphasis on painting and architecture.

ART-HIST 5541 Seminar in Northern Baroque Art: The Age of Rubens, Rembrandt, and Wren Credits: 3

The arts of England and the Low Countries in the 17th and early 18th centuries. Emphasis on painting and the graphic arts in the Spanish and Dutch Netherlands, and on architecture in England.

ART-HIST 5547 Seminar in Italian Baroque Art: The Age of Caravaggio, Bernini, and Borromini Credits: 3

Painting, sculpture, and architecture in Italy from the creation of the Baroque style in the late 16th century to the beginnings of the Barochetto era.

ART-HIST 5548 Seminar in Span Art: El Greco to Goya Credits: 3

A study of Spanish art from the later 15th Century to the Napoleonic invasion.

ART-HIST 5561 Traditional and Contemporary Native American Art Credits: 3

This course aims to inspire students to appreciate the history and aesthetics of traditional and contemporary Native North American arts. We examine cultural and aesthetic continuities between Meso-American and Native North American Arts. Then we explore how Native American arts reflect the history of North America, including influences from Europeans, and conclude with contemporary Native American artists and their incorporation of various global influences.

ART-HIST 5562 History of Modern Design Credits: 3

This course examines innovations in design, beginning with the Arts and Crafts movement in the 19th century, surveying all the major design trends of the twentieth century, and concluding with contemporary developments in the age of the computer.

ART-HIST 5563 Primitivism and Its Aftermath Credits: 3

This course explores one of the seminal movements of the modern era and its ramifications for the visual arts today. Class discussions will consider the complexities and contradictions of primitivism and its rejection through their appropriations from archaic, folk, and non-western art traditions, from 1800-on, while also situation these creative endeavors within the cultural and political contexts of the period.

ART-HIST 5564 Modern Art and the Grotesque Credits: 3

The course explores how the grotesque shaped the history, practice and theory of art in the nineteenth and twentieth centuries. The grotesque plays a major role in many modern styles, and its expressive possibilities encompass the capriccio, the carnivalesque and burlesque, the fantastic, and the abject and uncanny. Artists have incorporated the grotesque as a means to push beyond established boundaries, explore alternate modes of experience, and to challenge cultural and aesthetic conventions.

ART-HIST 5565 Seminar In American Art Credits: 3

Graduate-level seminar dealing with an announced area in American art. May be repeated once, provided there is a change in the area of concentration.

ART-HIST 5566 Seminar In 19th-Century Art Credits: 3

Graduate-level seminar dealing with an announced area in 19th-century art. May be repeated once, provided there is a change in the area of concentration.

ART-HIST 5567 Seminar In 20th-Century Art Credits: 3

Graduate-level seminar dealing with an announced area in 20th-century art. May be repeated once, provided there is a change in the area of concentration

ART-HIST 5568 Participatory Forms of Spectatorship in Contemporary Art Credits: 3

This course explores art practices from the second half of the 20th century that challenge spectators to become more actively involved in the reception and even in the production of art. The course will examine the sociopolitical conditions and technological developments which have contributed to the strengthening of participatory tendencies in contemporary art.

ART-HIST 5569 Sensing, Feeling, Thinking: Contemporary Art and the Mind Credits: 3

Contemporary artists are challenging viewers to reflect on how they perceive, feel and think. This seminar provides an introduction to the mental processes underlying emotion and visual cognition and familiarizes students with contemporary art practices that reveal the dynamic correlations between body, mind and subjectivity.

ART-HIST 5570 Seminar In Renaissance Art Credits: 3

Graduate-level seminar dealing with an announced area in Renaissance art. May be repeated once, provided there is a change in the area of concentration.

ART-HIST 5571 Seminar In Art Of Africa, Oceania And New World Cultures Credits: 3

Seminar in art of Africa, oceania and new world cultures. May be repeated once, provided there is a change in the area of concentration.

ART-HIST 5572 Seminar In Asian Art Credits: 3

Seminar dealing with an announced area in Asian Art. May be repeated once, provided there is a change in the area of concentration.

ART-HIST 5573 Visual Arts Administration Credits: 3

This course on professional arts administration includes assignments in: copyright laws, database management, ethics issues, evaluation design, gallery museum management, grant writing and budgeting, public relations, resume design, tax laws, and website design and management. Students are required to learn relevant computer programs. This course is also open to music and theatre majors. Research requirements for graduate credit are more comprehensive and professional.

ART-HIST 5575 Seminar In Baroque Art Credits: 3

Graduate-level seminar dealing with an announced area in Baroque art. May be repeated once, provided there is a change in the area of concentration.

ART-HIST 5576 Site-Specific Art: Within and Beyond the Museum Walls Credits: 3

At a time of increased transnational mobility, contemporary artists are conceiving artworks that catalyze an enhanced awareness of the geographical and socio-political conditions of existence and art making. This seminar examines artworks that are produced outside the studio and are inspired by specific natural environments, museum settings and public spaces.

ART-HIST 5577 Contemporary Artists of the African Diaspora Credits: 3

This course examines cultural and aesthetic continuities between traditional and contemporary arts and artists in Africa and in the Americas, including the study of contemporary Africans whose cultures had the greatest influence in the Americas, as well as contemporary African-American artists in Brazil, Cuba, Haiti, and the United States.

ART-HIST 5579 From the Parthenon to the Altar of Peace Credits: 3

The course centers on the many different styles of Greek and Roman art from the fifth century B.C. to the early first century A.D. Attention is also paid to the political and literary forces behind its imagery. Three monuments serve as the pillars upon which the course rests: the Parthenon, Pergamon Altar, and the Ara Pacis. The lessons learned about style, the interaction of politics, literature, and art and the foibles of scholarship are intended to be applied to other fields of art history.

ART-HIST 5580 Art Museums: History and Practice Credits: 3

This course will familiarize students with the history of art museums and collecting practices. It will cover theories of museum government, curating, and object interpretation. Students will explore changes in the functions of art museums and will develop practical skills for future museum employment.

ART-HIST 5590 Directed Studies In Art History Credits: 1-6

Individually directed studies or research in selected topics or problems in art history. May be repeated up to a total of six hours applicable to a degree program.

ART-HIST 5599 Research & Thesis Credits: 1-9

Production and/or writing of thesis. Usually taken in the last term of candidacy.

ART-HIST 5699 Research And Dissertation Credits: 1-12

Dissertation Research and writing in Art History.

ART-HIST 5899 Required Graduate Enrollment Credit: 1

Arts & Sciences - General (A&S)

Courses

A&S 5500 Interdisciplinary Colloquium On Aging Credits: 3

This course will introduce students to gerontology as a field of study and as a profession. The context for the emergence of the field is set in important demographic transitions of the 20th century. Identification and understanding of major issues and controversies in the field will help locate the contributions of a range of disciplines to aging studies. The connection of these issues with the development of social policies will be discussed.

A&S 5500C Interdisciplinary Colloquium On Aging III Credits: 1-2**A&S 5500L Special Readings Topics/Philosophy Credits: 1-3****A&S 5500P Special Topics-Readings Psychology Credits: 1-3****A&S 5500Q Special Readings/Topics Theatre Credits: 1-3****A&S 5501 Special Readings/Topics Credits: 1-3**

This is a designated Arts and Sciences course which gives all departments in the College the flexibility to offer, on demand and as the need arises, a graduate-level readings course in a particular area of specialization in any discipline in the College. The individual departments determine the content of the course in any given semester in the same manner as any reading course, special topics, or independent study is presently handled. The departments are responsible for approving individuals or groups for the course and determine whether or not the course will be included as a part of a post-baccalaureate degree in their disciplines.

A&S 5501B Special Topics: Critical Thinking In Social Studies Credits: 1-3**A&S 5501D Special Readings/Topics Credits: 1-3****A&S 5501E Special Readings/Topics Credits: 1-3****A&S 5501K Special Topics Credits: 1-4****A&S 5502 Introduction To African American Studies Credits: 3**

This course provides an introduction to the contexts, theories, and methodologies that undergird African American studies. In addition to substantial time spent covering particular research skills and resources, students will also be introduced to African American culture and the issues related to African studies from several perspectives: history, literature, sociology, communication studies, and the like. Influences and perspectives from Africa, the Caribbean, and South America will also be covered. The course will thus provide a broad background in African American culture and history, an introduction to the methodologies of several disciplines, and discussion of particular contemporary and historical issues such as slavery, segregation and integration, the Civil Rights Movement, Pan-Africanism, Afrocentrism, and current political debates.

A&S 5505 Career Education And Transition In Special Education Credits: 3

This course is designed to increase awareness and knowledge about current disabilities legislation, vocational education, vocational rehabilitation, quality transition programs, school to work, self advocacy, workplace accommodations and comprehensive life skills learning.

Prerequisites: EDUC-SP 407.

A&S 5509 Methods Of Inquiry: Research Issues And Methods In The Liberal Arts Credits: 3

This course serves as an introduction to various methods of inquiry and research in the humanities, social sciences, and sciences. This course includes graduate level instruction in library research use of computer generated research tools and a strong emphasis on academic writing.

A&S 5515 The Aging Body: Causes and Consequences Credits: 3

This course will explore biological changes that occur with aging. Plasticity, frailty, stress, coping, and chronic illness will be viewed through the bio-psycho-social lens. Biomedical discoveries and implications for the future of aging will be discussed.

A&S 5520 Critical Choices: Final Research Project And Capstone Seminar Credits: 3

This seminar is designed as a capstone experience for students in the last semester of their studies in the Master of Arts in Liberal Studies program. Each student defines a final research project, spends the semester developing it, and presents his or her findings to the seminar at the conclusion of the course. Each project is intended to be thought-provoking and to be researched from an interdisciplinary point of view.

A&S 5535 Directed Studies In Liberal Arts Credits: 1-3

Open to students in the Master of Arts in Liberal Studies Program, this course offers students the opportunity to pursue independent work at the graduate level on selected topics of an interdisciplinary nature, working with faculty members from at least two different departments. The course may not be repeated beyond a total of three credit hours.

A&S 5540 Liberal Arts Thesis Credits: 1-3

Open to students in the Masters of Arts in Liberal Studies Program who wish to include a written thesis in their program of studies. The course may not be repeated beyond a total of three credit hours.

A&S 5550 Seminar In Social Science Perspectives Study Of Community Credits: 3**A&S 5571A Seminar In The Social Sciences Credits: 1-6**

This is a designated Arts and Sciences course which gives all departments in the College the flexibility to offer, on demand and as the need arises, a graduate level seminar in a particular area of specialization in any discipline in the college. The individual departments determine the content of the course in any given term in the same manner as any seminar is currently handled.

A&S 5572 Seminar In Philosophy Of Science I Credits: 3**A&S 5591 Practicum In Community Social Science Research Credits: 3****A&S 5592 Field Practicum In Aging Credits: 3-8**

Students spend 180-480 hours in a field placement with the supervision in a community agency or organization which services or advocated for older persons and keep a journal documenting and reflecting on the practicum activities and experiences, particularly as related to gerontological theory and research. Students will study a particular subject relevant to their placement and describe this in a written project.

A&S 5899 Required Graduate Enrollment Credit: 1

Basic Medical Science (BMS)

Courses

BMS 5590 Special Topics Credits: 1-3

An opportunity to explore new topics or existing topics in modified or greater detail; topics which are not included in the usual course offerings.

BMS 9265 Human Biochemistry I - Medical Credits: 5

Presents basic principles of human biochemistry. Addresses structure, function, biosynthesis, degradation and utilization of the major constituents of living systems. Employs an integrative approach to the basic science and clinical medicine aspects of normal and defective metabolism.

BMS 9296 Human Structure Function I Credits: 6

Part 1 of a 4 part series (January-February). Integrated course in anatomy, histology, embryology, physiology and biochemistry. This unit covers introductory principles and the musculoskeletal system.

BMS 9297 Human Structure Function II Credits: 5

Part 2 of a 4 part series (February-April). Integrated course in anatomy, histology, embryology, physiology and biochemistry. This unit covers cardiopulmonary and gastrointestinal systems.

BMS 9298 Human Structure Function III Credits: 5

Part 3 of a 4 part series (April-May). Integrated course in anatomy, histology, embryology, physiology and biochemistry. This unit covers urinary and reproductive systems.

BMS 9300 Human Gross Anatomy I Credits: 5

Regional study of the anatomy of the chest, abdomen and pelvis. A systematic and regional study of the anatomy of the maxillofacial and anterior neck structures with emphasis on the biomedical applications of the anatomy studies.

BMS 9301 Human Gross Anatomy II Credits: 5

A continuation of BMS 9300.

BMS 93065 Anatomy of the Head & Neck Credits: 2

A regional approach to the study of the head and neck. Content will include a brief discussion of human anatomy and didactic information on the structures of the head and neck as they relate to the practice of dental hygiene.

BMS 9308 Histology Credits: 2.5

A motivative microanatomic study of the normal morphology of cells, tissues, organs and organ systems to stimulate the learning of terminology and basic cellular structure of the human body.

BMS 9310 Medical Neurosciences Credits: 9

Lecture-based course covering major neurological disorders and disease states. Specific neurologic diseases will be correlated to the didactic sessions by clinicians. Laboratory component is oriented around brain dissection sessions. Laboratory experience will demonstrate gross lesions and integrate the lesions with the clinical symptoms. A variety of supplemental audiovisual material also supports the class.

Prerequisites: BMS 9298.

Co-requisites: BMS 9399.

BMS 9311 Medical Microbiology Credits: 5

Covers basic scientific principles of virology, bacterial physiology and genetics. Presents information relevant to the pathogenesis of human infections caused by viruses, bacteria, fungi, protozoa and helminthes. Provides a concise presentation of basic immunological principles and their clinical relevance. Provides a concise review of antimicrobial therapeutic regimens including mechanism of action and clinical settings in which specific agents might be used. Utilizes case presentations to illustrate the manner in which reasonable differential diagnoses are developed and a rational approach toward empiric antimicrobial usage.

BMS 9399 Human Structure Function IV Credits: 6

Part 4 of a 4 part series (June-July). Integrated course in anatomy, histology, embryology, physiology and biochemistry. This unit covers the head and neck system. Includes a comprehensive examination for the Human Structure Function Series I-IV.

BMS 9701 Clinical Anatomy of Head and Neck Credits: 2-4

A detailed dissection of the maxillofacial and anterior neck regions, with the emphasis being placed on the clinical application of the surgical procedures used in these areas. This course may not be used to satisfy Cell Biology and Biophysics or Molecular Biology and Biochemistry discipline-specific requirements for the Interdisciplinary Ph.D. program.

Bassoon (BASSOON)

Courses

BASSOON 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons or recital.

BASSOON 5500A Graduate Bassoon-Secondary Credits: 2**BASSOON 5500B Special Applied Studies Credits: 2**

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

BASSOON 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

BASSOON 5501 Graduate Bassoon - Masters Performance Credits: 4**BASSOON 5601 Graduate Bassoon - Doctoral Performance Credits: 4**

Biological Sciences (BIO-SCI) - Oral & Craniofacial Sciences

Courses

BIO-SCI 5700 Biomaterials Teaching Credits: 2

Through this course, students will acquire teaching experience in graduate and undergraduate biomaterials.

BIO-SCI 5706 Growth and Development I Credit: 1

A course designed to teach the general principles of normal and abnormal physical, psychological and social growth and development of children and adolescents. The growth and development of the craniofacial structures is emphasized. The diagnosis of malocclusions is stressed. Consideration is given to possible approaches to their treatment.

BIO-SCI 5707 Growth and Development II Credits: 1-2

A comprehensive study of the genetical aspects of growth and development with special analysis of the molecular control of these processes by both intrinsic and epigenetic factors.

Prerequisites: BIO-SCI 5706.

BIO-SCI 5710 Genetics and Biochemistry of Cranial Facial Biology Credits: 2

Biochemistry of oral structures and the effect of oral diseases on these structures. This course may not be used to satisfy Cell Biology and Biophysics or Molecular Biology and Biochemistry discipline-specific requirements for the Interdisciplinary Ph.D. programs.

BIO-SCI 5739 Biomaterials for the Dental Specialist Credit: 1

Discussion of basic biomaterials principles and terminology including explanation of physical, mechanical and surface chemical properties, metallurgy, polymer chemistry, ceramics and composites. Clinical examples of how these principles apply to Prosthodontics, Endodontics and Orthodontics will be presented. Students cannot take both this course and BIO-SCI 5742 for credit.

BIO-SCI 5740 Oral Pathology I Credits: 2

A study of the clinical and histopathologic features of oral diseases, including inflammatory, degenerative, metabolic, and neoplastic diseases and developmental disturbances.

BIO-SCI 5742 Biomaterials for the Restorative and General Dentist Credits: 2

A thorough discussion of basic biomaterials principles and how they apply to the practice of general and restorative dentistry. Students cannot take both this course and BIO-SCI 5739 for credit.

BIO-SCI 5743 Advanced Seminar in Dental Biomaterials Credits: 1-2

The use and behavior of dental biomaterials in Pediatric Dentistry, Prosthodontics, Orthodontics, and Restorative Dentistry will be discussed in depth. Current basic and clinical literature related to these areas will be discussed and research information to improve dental practice will be presented.

Prerequisite: BIO-SCI 5739 (or BIO-SCI 5742).

BIO-SCI 5747 Research Instrumentation Used in Dental Biomaterials Credits: 2-4

A discussion and laboratory use of instrumentation employed in dental biomaterials research. Practical hands-on experience will include calibration and use of specific research equipment including the Instron, metallurgical mounting and polishing equipment, measuring microscope, metallograph, and contact angle goniometer.

BIO-SCI 5750 Special Problems in Dental Biomaterials Credits: 2-4

The student will select or be assigned a special research problem including appropriate literature reviews of a special topic in dental biomaterials. Emphasis will be placed on the correlation between basic and clinical research. The design and conduct of clinical research will be discussed.

BIO-SCI 5751 Elements of the Scientific Method Credits: 1-2

Through individualized instruction with thesis committee chair, student will conduct a literature review in preparation for developing a research question leading to the thesis research proposal. Students will select and rotate through a minimum of four laboratories in the Department of Oral Biology conducting a short research project in each. At the end of the semester, a report is required reviewing the research project and the instrumentation in each laboratory. Students are also required to attend the weekly Department of Oral Biology Seminar Series and the monthly Professional Development Seminar Series. Research presentations cover a variety of biological, engineering and psychological disciplines relevant to oral science education and the oral health care profession. Presentations will be by faculty, students, and invited guest lecturers.

BIO-SCI 5752 Research Methods in Oral and Craniofacial Sciences Credits: 1-5

Student will write the thesis research proposal in consultation with committee chair and members plus obtain appropriate IRB and/or IACUC approvals. For the MS degree qualifying exam, the student will write the research proposal, present the research proposal at a committee meeting, and answer related questions. Following the successful completion of the qualifying exam, the research proposal is the basis of the MS thesis project. As the student identifies a research focus for the dissertation project, they will begin reviewing the literature.

BIO-SCI 5759 Special Problems in Pharmacology Credits: 2

Pharmacologic and therapeutic problems of special interest in the practice of dentistry.

BIO-SCI 5760 Physiology of Oral Mineralized Tissues Credits: 2

A study of the physiology of the oral hard tissues with emphasis on the mechanisms of the growth, remodeling, and healing of maxillomandibular bones and on the mechanism of dentinogenesis. This course may not be used to satisfy Cell Biology and Biophysics or Molecular Biology and Biochemistry discipline-specific requirements for the Interdisciplinary Ph.D. program.

BIO-SCI 5780 Teaching Of Dentistry Credits: 1-2

A consideration of the problems of teaching in dental schools. Each department of the School of Dentistry will report on its teaching methods. The student will observe lectures and laboratory teaching in each department.

BIO-SCI 5790 Directed Research In Oral and Craniofacial Sciences Credits: 1-6

Student utilizes beginning research skills to design, conduct and report an individual research project under the direction of the faculty.

BIO-SCI 5799 Research And Thesis Credits: 1-9

The satisfactory completion of an original research project. Results of the research and critical review of the pertinent literature are incorporated into a thesis. Credit is awarded after the student's thesis is successfully defended and accepted by the School of Graduate Studies.

BIO-SCI 5801 Readings in Immunology Credits: 1-3

A detailed study of special topics in immunology. Specific topics to be arranged with the instructor. This course may be repeated by doctoral students for a maximum of 3 credit hours.

Prerequisites: BIOLOGY 435.

BIO-SCI 5802 Immunopathology Credits: 2

A detailed study of selected topics in immunopathology with emphasis on physicochemical barriers such as cutaneous and mucosal immune systems.

Prerequisites: BIOLOGY 435.

BIO-SCI 5805 Molecular Biology of Oral Microflora Credits: 2-3

Lecture and discussion. The course will provide an overview of the ecology of oral microbial flora and its role in oral health and disease. Students will examine the taxonomy and ecology of normal and pathogenic oral microbial flora, acquisition of the oral microbiota and the formation of dental plaque as a biofilm. The course will also explore other aspects of microbial biology, such as; bacterial virulence factors and pathogenesis; host defense mechanisms; systemic complications of periodontal disease; antibiotics and antibiotic resistance. The second part of the course will review the effect of recent advances in molecular biology and protein biochemistry on oral diagnosis and treatment.

BIO-SCI 5830 Structural Characterization of Dental Biomaterials Credits: 3

A detailed study of the techniques commonly used to determine the composition and structure of dental biomaterials. Surface and near-surface characterization techniques will be emphasized. The student will be expected to complete laboratory projects on the scanning and transmission electron microscopies available in the School of Dentistry.

BIO-SCI 5899 Required Graduate Enrollment Credit: 1

Biology (BIOLOGY)

Courses

BIOLOGY 5501 Proposal Writing Credit: 1

This course addresses how to develop a testable hypothesis, and write a NIH-style proposal to convince the reader of the significance of the proposed studies. Students will write a proposal that will form the basis of their oral comprehensive exam in the Cell Biology and Biophysics (CBB) and Molecular Biology and Biochemistry (MBB) disciplines. The is limited to doctoral students with CBB and MBB coordinating disciplines that have a plan of study filed with the School of Graduate Studies.

BIOLOGY 5510 Gross Anatomy for Nurse Anesthetists Credits: 3

This course will present and examine the anatomic concepts and conditions essential for critical thinking and decision making by the nurse anesthetist. Specifically, the course will provide the foundation upon which patient interventions may be based during the perioperative period.

Prerequisites: Graduate status.

Co-requisites: BIOLOGY 5510L.

BIOLOGY 5510L Gross Anatomy for Nurse Anesthetists Credit: 1

This laboratory course will present and examine the anatomic concepts and conditions essential for critical thinking and decision making by the nurse anesthetist. Specifically, the course will provide the foundation upon which patient intervention may be based during the perioperative period.

Prerequisites: Graduate status.

Co-requisites: BIOLOGY 5510.

BIOLOGY 5511 Professional Development Credit: 1

The purpose of this course is to facilitate a competitive application to professional health programs for student seeking the M.A. in Biology. Students will gain an understanding of the application process, including decisions for where to apply, assessing fit, developing a personal statement, strategies for letters of evaluation, and an execution of a successful interview.

Prerequisites: Admission to the M.A. Biology program, or by instructor consent.

BIOLOGY 5515 Biochemistry Credits: 4

The chemistry and mechanisms involved in biosynthesis, degradation and utilization of the major constituents of living systems and the biochemistry of specialized tissues, hormones, nutrition and regulation.

Prerequisites: Admission to the UMKC MA Biology program.

BIOLOGY 5516 Global Health: New and Emerging Infections Diseases Credits: 3

This course will discuss infectious diseases that are newly identified, or increasing in prevalence throughout the world. Several aspects of each disease will be discussed, including transmission, symptoms, treatment, prevention, and diagnosis. The course is meant for students interested in a health-related career (medicine, dental, pharmacy, public health), but other students with a basic biology background are welcome.

Prerequisites: BA or BS in Biology or related field

BIOLOGY 5517 From Bench to Bedside: Translational Research Credits: 3

This course explores the interplay between basic biological research and bedside clinical practice, delving into the topic “what is translational research?” By engaging with people from the community involved at all levels of translational research, students will gain an appreciation for the civic issues behind medical research, the interdisciplinary nature of research, and the part that Kansas City institutions play in regional life and health sciences. As part of the course, students will produce a “public service announcement” style video that explains a particular aspect of translational research for consumption by people within the broader Kansas City community.

Prerequisites: Must be in a graduate program in the School of Biological Sciences or instructor consent.

BIOLOGY 5518 Graduate Histology Credits: 2

Animal tissues and their specialization in the organism, with major emphasis on higher organisms.

Prerequisites: BA or BS in Biology or Chemistry, or permission of the instructor.

BIOLOGY 5519 Principles of Evolution Credits: 3

Synthesis of the modern concepts of evolution. Discussion of the biological processes that produce organic diversity through phyletic change.

Discussed are variation, mutation, population genetics, natural selection and adaptation.

Prerequisites: BIOLOGY 206.

BIOLOGY 5525 Bioinformatics and Data Analysis Credits: 3

Methods and procedures for the storage, retrieval and analysis of information in biomolecular and biological databases. Emphasis will be given to the use of database information in biological research and to recent developments in genomics and proteomics.

Prerequisites: BIOLOGY 441, LS-BIOC 360.

BIOLOGY 5528 Human Genomic Epidemiology Credits: 3

This course is designed for biological researchers and clinicians interested in studying common human diseases using state-of-the-art genomics/genetics epidemiological approaches. The course provides a basic yet comprehensive introduction to key topics in human genome epidemiological research, including basic concepts and methodologies of quantitative/statistical genetics, an introduction to emerging technologies and analytical methods for genomic science, basic study for various types of genomic research approaches, utilization of widely-used software packages for analyses of genomic data, and examples of human genome epidemiology information improving health, and ethical, legal and social issues in the design and conduct of human genome epidemiology studies.

BIOLOGY 5534 Cardiovascular Pulmonary Physiology Credits: 3

Function of the cardiovascular and pulmonary systems at the cellular, tissue, and system levels with particular emphasis on regulation, maintenance of homeostasis and integration with other systems.

Prerequisites: BIOLOGY 316.

BIOLOGY 5539 Mammalian Physiology Credits: 4

Study of the physiological functions and controls in human and related mammalian systems, with emphasis on fundamental processes that underlie normal and abnormal clinical conditions.

Prerequisites: BIOLOGY 316.

BIOLOGY 5540 Pathophysiology Credits: 4

Pathophysiology will focus on the physiological basis of cellular and tissue function, and the consequences of dysregulated metabolic/cellular expression on essential homeostatic processes in cells, cytoplasmic compartments and primary organ systems.

Prerequisites: BIOLOGY 5539.

BIOLOGY 5542 Neurobiology Credits: 3

Neurobiology will consist of the presentation of theory and data concerning cellular and molecular fundamentals of the nervous system, synaptic mechanisms, sensor-motor systems, and higher-order functions of the nervous system.

Prerequisites: LS-BIOC 304.

BIOLOGY 5591 Directed Individual Studies Credits: 1-6

Intensive readings and/or research in an area selected by the graduate student in consultation with the instructor. Not to be identified with thesis research.

BIOLOGY 5592 Master of Arts Topics in Biology Credits: 1-6

Special problems and topics in biology specifically intended to satisfy the project or report requirement for the master of arts degree in biology.

Prerequisites: Nine hours of graduate work in Biology.

BIOLOGY 5593 Master of Science Topics Credits: 1-4

Investigation of problems and topics to satisfy the M.S. topics requirement for the master of science degree in Cellular and Molecular Biology.

Prerequisites: LS-MBB 5561, LS-MBB 5562.

BIOLOGY 5899 Required Graduate Enrollment Credit: 1

Black Studies (BLKS)

Courses

BLKS 5502 Conceptual and Theoretical Foundations in African American Studies Credits: 3

This course will provide an in-depth examination of the theoretical and conceptual parameters of African American studies. We will study the evolution of the field, key scholars and creative intellectuals, and seminal categories of thought.

BLKS 5503 Writing for African American Studies Credits: 3

This course instructs students in how to produce advanced knowledge in the field of African American studies. It provides training in the construction of quality research papers for graduate, scholarly, and professional work and exposes students to a wide array of scholarly journals, databases, and authoritative resources in African American studies. Each time the course is taught, students will develop their research around a specific topic defined by the instructor.

BLKS 5504 Research Seminar Credits: 3

This course introduces the logic, theory, and techniques of empirical research and applies them to African American Studies. It exposes students to a variety of research approaches in order to examine their utility for producing knowledge within the field.

BLKS 5510 African American Art History: Part II, 1960-Present Day Credits: 3

This course presents a survey of African American visual arts from 1960 to the present. The Black Arts Movement, the Black Aesthetic, mainstream arts institutions and Black collectors are reviewed. Visual arts include new media and processes for Diaspora artists. Students investigate contemporary artists within African Diaspora visual culture.

BLKS 5520 Critical Health Issues in Black Communities Credits: 3

Beginning with the African context and the imposition of chattel slavery, this course examines social, cultural, and historical factors affecting the health status of African Americans to the present era.

BLKS 5521 The Black Family & Male-Female Relationships Credits: 3

The course examines the historical evolution and current status of the African American family in the United States. Utilizing the African experience as its starting point, the course conveys a broad understanding of the role of the family in human survival and progress. We investigate such issues as male-female relationships, sexual practices, dating, marriage, single parenting, the education issues, including institutionalized inequality, that affects the viability of today's African American family.

BLKS 5525 African American Business Development Credits: 3

This course investigates the various challenges to African American business development and entrepreneurship in the United States. We study the lives of successful, pioneering African American businesswomen and men in order to assess how they managed to transcend the barriers of racism and structured inequality. We explore why certain kinds of enterprises emerged among African Americans and why others did not, and we scrutinize the traditional business problems for African Americans of capitalization, distribution, market penetration, and wealth creation.

BLKS 5530 African American Migrations in Literature Credits: 3

The course examines representations of two different trajectories of migration in African American literature: African American journeys from the south to northern and mid-western regions of America, and concurrent migrations of Caribbean people to the US in the early twentieth century.

BLKS 5534 From Field Shout to Hip Hop: African American Poetic Traditions Credits: 3

This course examines the development of African American poetry from its early forms as field shouts, ballads, and blues to present forms including spoken word and hip hop. Includes authors such as Phillis Wheatley, Paul Lawrence Dunbar, Langston Hughes, Gwendolyn Brooks, Tupac Shakur, and Jessica Care Moore.

BLKS 5535 Stages toward Freedom: African American Dramatic Traditions Credits: 3

This course explores the development of African American dramatic traditions from the eighteenth century through the Harlem Renaissance, Black Arts Movement, to current postmodernism. Includes authors such as W.W. Brown, Zora N. Hurston, Amiri Baraka, Sonia Sanchez, August Wilson, Suzan-Lori Parks.

BLKS 5537 The Civil Rights Movement in African American Literature Credits: 3

This course examines how African American literature shaped ideas about freedom, rights, citizenship and race in the civil rights movement. It draws on a variety of literary forms—speeches, essays, autobiographies, fiction, drama, poetry and film—to explore the movement's impact on communities and cultures as well as its various debates and competing visions.

BLKS 5538 Women's Literature in Africa and the African Diaspora Credits: 3

This course is a comparative examination of the variety of literary works produced by women of African descent in the United States, the Caribbean and Africa. Students will explore the cross-cultural implications of texts in light of the intersections of gender, race and class.

BLKS 5539 Slave Narratives: Race, Gender and Writing Freedom Credits: 3

A truly American, home grown genre and powerful force in the development of American political and social realities, the African American Slave Narrative is an established, recognized influence in the development of African American and American literary history. You will have the opportunity to explore the historical trajectory of the Slave Narrative, looking at early formulations of its structure, purpose and conventions—especially in terms of gender and race, subsequent various permutations, and the eventual development of the Neo-slave Narrative as its resurrection, which adds to the complexity and theoretical impact of the literary autobiography from black perspectives.

BLKS 5549 Symbols and Codes from the Diaspora: African American Visual Arts Survey Credits: 3

This course provides an examination of the theoretical and conceptual parameters of African and African American visual aesthetics. Through the writings of key scholars in African American aesthetics, students will study symbolic forms and patterns from various African cultures throughout the Diaspora and investigate formal image categories within African Diaspora visual culture.

BLKS 5551 African American Art History: Part I, 1600-1960 Credits: 3

This course presents a comprehensive survey of African American visual art from 1600 through 1960. Critical issues in early American art history highlight the expressions of African American artists and scholars. The Negro Crafts Movement, New Negro Movement and Harlem Renaissance. Students will investigate artistic expressions of this period.

BLKS 5580 Special Topics/Seminar Credits: 1-3

In-depth exploration of special topics in Black Studies.

BLKS 5590 Directed Study/Research Credits: 1-6

Individual research and learning projects supervised by a faculty member.

BLKS 5596 Internship in Black Studies Credits: 1-6

This Internship course presents an opportunity for graduate students to integrate their academic studies in the discipline of Black Studies with community service and engagement. As a student intern within a business or professional organization in the urban Metropolitan community, the student gains critical information about the processes and procedures of this business entity in relation to African American community members.

BLKS 5599 Research Thesis Credits: 1-6

Individually directed research leading to preparation and completion of a thesis.

BLKS 5699 Research and Dissertation Credits: 1-12

Individually directed research leading to preparation and completion of a doctoral dissertation.

BLKS 5899 Required Graduate Enrollment Credit: 1

Enrollment required during the completion of a thesis/dissertation.

Cello (CELLO)

Courses

CELLO 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

CELLO 5500A Graduate Cello - Secondary Credits: 2

CELLO 5500B Special Applied Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

CELLO 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

CELLO 5501 Graduate Cello - Masters Performance Credits: 4

CELLO 5601 Graduate Cello - Doctoral Performance Credits: 4

Chemistry (CHEM)

Courses

CHEM 5511 Laboratory Safety And Health I Credit: 1

An introduction to laboratory safety and health. Topics to be discussed include good laboratory practice; laboratory hazards; safe chemical handling; storage and disposal; first aid; protective equipment; and federal regulations.

CHEM 5520R Survey Of Organic Chemistry Credits: 3

An intensive advanced survey of the structure, synthesis and reactions of organic compounds.

CHEM 5521R Mechanisms Of Organic Reactions Credits: 3

A comprehensive course in which the mechanisms of organic reactions are discussed in light of modern chemical principles.

Prerequisites: CHEM 322R and CHEM 432.

CHEM 5522 Synthetic Organic Chemistry Credits: 3

A critical approach to the synthesis and modification of organic molecules; newer methods will be emphasized.

Prerequisites: CHEM 322R and CHEM 432.

CHEM 5529 Selected Topics In Organic Chemistry Credits: 3

Selected topics from the chemistry and theories of organic structures with particular attention to recent developments.

CHEM 5530 Systematic Physical Chemistry Credits: 3

An intensive and comprehensive review of the principles of physical chemistry. This course may either emphasize thermodynamics with an introduction to principles of quantum mechanics or emphasize quantum mechanical description of atoms and molecules, molecular spectroscopy, statistical mechanics and kinetics.

CHEM 5530A Physical Chemistry I Credits: 3

This graduate course reviews principles of physical chemistry, focusing on thermodynamics, equilibria and electrochemistry.

CHEM 5530B Physical Chemistry II Credits: 3

This graduate course reviews principles of physical chemistry, focusing on quantum chemistry, molecular spectroscopy and structure, and kinetics.

CHEM 5531 Classical Thermodynamics Credits: 3

A rigorous treatment of the laws of thermodynamics and their application to ideal and non-ideal equilibrium systems.

CHEM 5532 Chemical Kinetics Credits: 3

Empirical analysis of chemical reaction rates. Theories of unimolecular and bimolecular reactions, reactions in solution and complex reactions. Review of modern and classical techniques used to study chemical kinetics.

CHEM 5533 Quantum Chemistry Credits: 3

Application of quantum mechanical methods to the study of systems of chemical interest. Exact solutions and approximate methods will be discussed.

CHEM 5534 Molecular Spectroscopy Credits: 3

A theoretical introduction to molecular spectroscopy and its relation to structure. Electronic, vibrational and rotational spectra of chemical systems will be discussed.

CHEM 5535 Statistical Thermodynamics Credits: 3

A rigorous treatment of the fundamental concepts of statistical thermodynamics, with applications to specific systems that reflect the interests of students participating in the course.

CHEM 5539 Selected Topics In Physical Chemistry Credits: 3

Selected topics and recent developments in physical chemistry.

Prerequisites: CHEM 5530.

CHEM 5541R Advanced Analytical Chemistry Credits: 3

An intensive review of modern concepts of analytical chemistry.

Prerequisites: CHEM 432.

CHEM 5551R Advanced Inorganic Chemistry I Credits: 3

A systematic treatment of bonding, structure, reactions and reaction mechanisms of inorganic compounds, with emphasis on classical transition metal compounds and organometallic compounds.

Prerequisites: CHEM 451R.

CHEM 5559 Selected Topics In Inorganic Chemistry Credits: 3

Various special topics in the inorganic area to be offered in different semesters.

Prerequisites: CHEM 5551R.

CHEM 5567 Advanced Bioorganic Chemistry Credits: 3

This course examines the organic chemistry and laboratory synthesis of the major biopolymers and organic chemistry related to biological systems. Emphasis is on literature and library research and natural product and solid phase organic synthesis, combinatorial synthesis, bioconjugates and applied bioorganic chemistry.

CHEM 5571R Introduction To Polymer Chemistry Credits: 3

Survey of organic and inorganic monomers and polymers; the occurrence, synthesis, structures and properties of natural and synthetic polymers; discussion of general properties of plastics, elastomers, fibers, resins and plasticizers.

Prerequisites: CHEM 432.

CHEM 5580R Computer Applications To Chemical Problems Credits: 3

The purpose of this course is to survey the field of computational chemistry, concentrating on methods, programs and general utility to the research chemist. The student will learn the principles of the theory underlying the methods and will use selected software to carry out chemical calculations.

Prerequisites: CHEM 320 / CHEM 320L or CHEM 322R / CHEM 322L with "C-" or better.

CHEM 5587 Environmental Chemistry I Credits: 3

A survey of how chemical principles can be applied to the environment. Included will be topics in aquatic chemistry, atmospheric chemistry and chemistry of the geosphere and soil.

CHEM 5588 Environmental Chemistry II Credits: 3

Discussion of selected topics in advanced environmental chemistry, such as environmental toxicology, environmental risk, the chemistry of hazardous wastes and their treatment, and environmental analytical chemistry.

CHEM 5590 Directed Studies Credits: 1-3

Intensive readings and/or research in an area selected by the graduate student in consultation with the instructor.

CHEM 5598 Research Methodology Conference Credits: 3

Student will meet on an individual basis with two faculty members who are involved in research. The student's adviser will coordinate this course.

CHEM 5599 Research And Thesis Credits: 1-9

Research for thesis.

CHEM 5611 Chemistry Seminar Credit: 1

Presentation and discussion of topics currently appearing in United States and foreign literature.

CHEM 5699 Research And Dissertation Credits: 1-16

Research for dissertation.

CHEM 5899 Required Graduate Enrollment Credit: 1

Civil Engineering (CIV-ENGR)

Courses

CIV-ENGR 5500 Problems Credits: 1-6

Supervised investigation in civil engineering to be presented in the form of a report.

Prerequisites: Graduate standing.

CIV-ENGR 5501 Advanced Topics in Civil Engineering Credits: 1-3

Current technical developments in civil engineering.

CIV-ENGR 5501AE Advanced Topics in Civil Engineering Credits: 1-3

CIV-ENGR 5504 Project Management of Integrated Design and Construction Credits: 3

Provide a body of knowledge that includes the principles, knowledge areas, skills, and tools applicable to successful project management for the performance of integrated design and construction of capital projects, specifically as applicable to the post-award period. This post-award period is the time from the formal Project award by the owner through Project design and construction, testing, commissioning, close-out and completion of the Project warranties.

CIV-ENGR 5505 Capital Project Delivery Methods Credits: 3

Provide a body of knowledge that acquaints students with the capital project delivery methods in both public and private business sectors of the U.S design – construction industry. Project delivery means how a capital project comprising both design and construction is planned, procured, contracted and implemented by an owner to achieve desired objectives. Delivery methods include traditional design – bid- build, design – build, design-build plus added services such as operations and maintenance, CM @ Risk and other approaches. Roles and responsibilities of owners, owner consultants, and design and construction firms are presented and discussed. Owner procurement approaches, project risk.

CIV-ENGR 5506 Construction Project Risk Management Credits: 3

Risk management skill sets are necessary tools for the successful project manager. Project Management Institute's (PMI) 6 steps of project risk management constitute the basis of the content, which includes an expanded knowledge of risk identification, qualitative and quantitative risk analysis, risk control, contract risks, and risk transfer options. Business and project risks such as client selection, project planning, and project execution, will be considered as well as legacy risks that remain with the business and participants beyond the project completion. Different risk management strategies will be discussed, including risk avoidance, risk mitigation, and risk transfer.

CIV-ENGR 5515 Engineering Leadership & Ethics Credits: 3

Analysis of leadership, including 360-degree assessment of students' leadership. Discussion of leadership cases and application to engineering careers. Frequent analysis of engineering ethics cases using the NSPE Code.

Prerequisites: Graduate status.

CIV-ENGR 5516 Advanced Engineering Mathematics Credits: 3

The class is a review of and introduction to advanced mathematical theories and methods for graduate students in Civil and Mechanical Engineering. The basic topics include 2nd-order ODE/PDEs, advanced linear algebra, continuous and discrete Fourier transform, advanced probability and statistics methods, and commonly numerical methods (e.g. linear and generalized linear regression, iterative methods, and maximum likelihood estimation. Successful completion of Calculus III and working knowledge of a mathematical software package (Matlab preferred) is recommended.

CIV-ENGR 5517 Advanced Structural Analysis Credits: 3

The course is designed as a continued study of structural analysis methods with emphases on indeterminate structures (trusses, beam/columns, and frames), advanced analysis methods, and introduction to nonlinear structural effects including geometric nonlinearity and inelasticity. Advanced structural analysis methods including force, displacement, matrix, energy, and limit analysis methods will be introduced and practiced. Both computer based and hands on analysis will be involved.

Prerequisites: Undergraduate coursework in structural analysis strongly recommended.

CIV-ENGR 5521 Matrix Methods of Structural Analysis Credits: 3

An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the computer programs to three dimensional structures.

Prerequisites: CIV-ENGR 321.

CIV-ENGR 5523 Advanced Structural Steel Design Credits: 3

Design of steel building structures. Topics include composite deck and beam design, stability design, plastic design, plate girder design, simple and eccentric shear connections, and partial and fully restrained moment resistant connections.

Prerequisites: CIV-ENGR 323.

CIV-ENGR 5526 Prestressed Concrete Credits: 3

Design and behavior of prestressed concrete structures; material and system or pretensioned and post tensioned systems; prestress losses; flexure, shear, bond, deflections and partial prestress in determinate structures; indeterminate beams-introduction.

Prerequisites: CIV-ENGR 422WI.

CIV-ENGR 5527 Advanced Reinforced Concrete Design Credits: 3

Advanced Topics in the design of footings, retaining walls two way floor slabs, torsion and continuous structures, shear friction, strut and tie design, precast design.

Prerequisites: CIV-ENGR 422WI.

CIV-ENGR 5529 Advanced Design of Structures for Blast and Fire Credits: 3

General overview of Blast Design; risk assessment and design criteria; simplified Blast Effects Analysis; ground shock, material response; antiterrorism design considerations; weapons effects and mitigation; internal explosions; progressive collapse analysis; and introduction to Fire Design.

CIV-ENGR 5531 Fund of Geomaterial Characterization Credits: 3

A geomaterial is any construction material comprised primarily of soil. This course overviews state-of-the-art instrumental techniques for analysis of the physio-chemical properties of soils, aggregates, hydraulic concrete, and asphaltic concrete. Evaluation techniques will be applied to determining beneficial reuse opportunities for industrial by-product materials from the Kansas City region. Prerequisites are CE 335 Soil Mechanics and CE378 Civil Engineering Materials, or equivalent. 3 credit hours.

Prerequisites: CIV-ENGR 335, CIV-ENGR 378WI.

CIV-ENGR 5532 Foundation Engineering Credits: 3

Design of basic foundation structures, footings, retaining walls, pile foundations, dams.

Prerequisites: CIV-ENGR 335.

CIV-ENGR 5536 Advanced Soil Mechanics Credits: 3

Theoretical soil mechanics as applied to solution of specific engineering problems.

Prerequisites: CIV-ENGR 335.

CIV-ENGR 5542 Hydraulic Structures Credits: 3

A review of the history and hydraulic design procedures for a variety of hydraulic structures including spillways, water measurement structures, canal structures and energy dissipation structures.

Prerequisites: CIV-ENGR 452 (or CIV-ENGR 5552).

CIV-ENGR 5544 Unit Processes in Environmental Engineering Credits: 3

Typical chemical and physical relationships are applied to unit processes of water and wastewater. Troubleshooting for operation problems is emphasized.

Prerequisites: CIV-ENGR 342.

CIV-ENGR 5545 Environmental Engineering Microbiology Credits: 3

Theory and application of fundamental principles of microbiology, toxicology, ecology, and aquatic biology of the microorganisms of importance to environmental engineers.

Prerequisites: CE342.

CIV-ENGR 5546 Limnology Credits: 3

A survey of the physical, biological, and chemical issues important in surface fresh waters. Includes carbonate chemistry, algal assay and Thermocline analysis.

Prerequisites: CHEM 211, MATH 345.

CIV-ENGR 5547 Contracts and Law for Engineers Credits: 3

This course covers a broad range of substantive legal topics giving the student a grounding in the legal implications of certain situations that they may encounter during their careers. The course includes coverage of basic contract law, environmental regulations and compliance, construction law, antitrust law, intellectual property law, civil procedure, employment law, business entities (corporate law) product liability and criminal law and procedure. The objective of the course is to provide students with a fundamental understanding of the wide range of federal and state laws governing behavior in our complicated and rule of law driven society.

CIV-ENGR 5549 Environmental Compliance, Auditing, & Permitting Credits: 3

This course provides a high level overview of the most important statutes that have been enacted to protect the environment. The course covers regulation of hazardous waste, the Clean Air and Clean Water Acts, the Resource Conservation and Recovery Act, the All Appropriate Inquiry Rule and the law addressing sites contaminated with hazardous substances and the technology options employed to remediate those sites. In addition, the course provides coverage of environmental audits and emergency planning for extremely hazardous substances, the regulation of underground storage tanks, safe drinking water and the National Environmental Policy Act among other statutes.

CIV-ENGR 5552 Hydraulics of Open Channels Credits: 3

This is a first course in the fundamentals of open channel (free surface) water flow. Over ninety-nine percent of all the water that is moved on the planet's surface is by free surface flow. Study of free surface flow is essential to the study of storm water drainage systems, flood control, water and wastewater treatment and the study of the form and processes of river evolution. This class provides the fundamental physical principles of free surface flow as a prelude to a significant number of other topics that pertain to engineering and geomorphic analysis.

Prerequisites: CIV-ENGR 351.

CIV-ENGR 5553 Hydraulics and Variability of Rivers Credits: 3

This course introduced concepts of alluvial channel behavior, evolution and change due to natural and man-induced modifications to streams and watersheds. Numerous case studies of river behavior are studied from the perspective of hydraulics, geomorphology and sediment transport.

Prerequisites: CIV-ENGR 357.

CIV-ENGR 5554 River Stability and Scour Credits: 3

Bridge hydraulics, stream stability, scour at bridge piers and abutments, hydraulic modeling of floods, countermeasures for protection of bridge infrastructure.

Prerequisites: CIV-ENGR 452 or CIV-ENGR 5552.

CIV-ENGR 5556 Urban Hydrology Credits: 3

Analysis of urban drainage systems in accordance with published municipal criteria. This course is an in-depth, follow on course for senior undergraduate students interested in the hydrological sciences and for graduate students specializing in water resources. Specifically this course will focus on the engineering procedures and techniques specified by municipalities to design and maintain efficient, safe, storm drainage systems. This course also focuses on the unique issues associated with estimating and designing for rainfall/runoff in urban metropolitan areas, including channel and reservoir routing of floods through stream channels, retention structures, culverts, and storm sewers.

Prerequisites: CIV-ENGR 357.

CIV-ENGR 5563 Construction Law Credits: 3

This course introduces professional, ethical, and legal concepts of the professional practice of engineering, and the role of the consulting engineer, specifically in the A/E/C industry during the design, procurement, and construction processes. A conceptual framework is developed for understanding the industry standard agreements (AIA, EJCDC, ConCensus) and the various participants roles and duties in project execution. The engineer's "professional standard of care" is examined and revisited throughout the semester, specifically what it means to be a "Professional Engineer". Emphasis is placed on project and contract management and the applicable law. Skills are developed in finding online resources of law, legal, and practice advice relevant to the practice of engineering and the construction industry

CIV-ENGR 5565 Project Finance Credits: 3

This class introduces students to the financial concepts faced by engineers in the businesses in which they work and for the projects to which they are assigned. Throughout the course students are reminded of the impact of two key variables – money and time – on their work. While not attempting to turn good engineers into mediocre accountants, the course includes a strong emphasis on managerial accounting. Students will learn how to read and apply financial statements and how to use these same financial concepts in developing pro formas to evaluate and support major capital investments. The effect of time on the value of money, appropriate discount factors, and the internal rate of return will be explored in the class. Students will learn to combine these financial factors with electronic spreadsheets to evaluate business opportunities and practices. All students will be required to develop a comprehensive financial model to evaluate/justify a real world capital project.

CIV-ENGR 5566 Green Building and Sustainable Infrastructure Credits: 3

This course provides a broad overview of what sustainability means to construction and our built environment. Specific green infrastructure rating systems of LEED and Envision will be discussed in detail to quantify the "greenness" of construction of buildings residential subdivisions, highways, roads, and airports. Upon completion of this course students will have a substantial background and understand the aspects needed for the LEED Green Associates and Envision ISI exams. Two major additional aspects of green building important to sustainable infrastructure include stormwater management using "green" techniques and methods to mitigate the urban heat island. The course will also discuss infrastructure project sustainability from a life cycle cost perspective and determining the life cycle inventory of various materials. Upon completion of the course, students will better understand what sustainability means and how it applies in the context of our built environment and have a good idea of how technology will impact our sustainable future.

CIV-ENGR 5567 Introduction to Construction Management Credits: 3

This course will introduce the students to basic construction management related topics including structure of the construction industry, construction drawings and specifications, estimating and bidding, construction contracts, bonds and insurance, planning and scheduling of construction operations, project management, computer techniques.

CIV-ENGR 5568 Construction Planning and Scheduling Credits: 3

This course is intended to provide an in-depth examination of the construction planning and scheduling process, as it relates to civil engineering projects. Topics will include planning and scheduling of construction operations by the critical path method, Network diagramming, scheduling computations, and time-cost trade-offs. Manpower and equipment leveling. Computer and noncomputer techniques.

Prerequisites: CIV-ENGR 467 or CIV-ENGR 5567.

CIV-ENGR 5569 Construction Methods and Equipment Credits: 3

Introduction to methods used to plan, construct and manage heavy civil projects. Topics will include development, project control, equipment productivity, earthmoving fundamentals, formwork design, and other issues in heavy civil projects.

Prerequisites: CIV-ENGR 467 or CIV-ENGR 5567.

CIV-ENGR 5570 Corrosion Engineering Credits: 3

This course will cover the physical interaction of metallic materials with their environments, called corrosion. Corrosion is an electrochemical process and the thermodynamics and kinetics of corrosion processes will be discussed. Students will be expected to identify different forms of corrosion and be able to select appropriate materials for their working environment to prevent corrosion related problems. Second half of the class will concentrate on corrosion of metals in concrete and prevention methods.

Prerequisites: CHEM 211, CHEM 211L, CIV-ENGR 378WI.

CIV-ENGR 5571 Advanced Portland Cement Concrete Credits: 3

This course will cover topics such as cement chemistry, concrete proportioning, aggregates, mineral and chemical admixtures, fresh and hardened properties of concrete, and durability of concrete. Design and proportioning of concrete mixtures for desired fresh and hardened properties will be emphasized. Specialty concrete types such as high strength/high performance concrete, lightweight concrete, pervious concrete, high volume fly ash concrete, and fiber reinforced concrete will also be covered.

Prerequisites: CHEM 211, CHEM 211L, CIV-ENGR 378WI.

CIV-ENGR 5573 Durability of Civil Engineering Materials Credits: 3

This course will explore the identification, causes of, and remediation of material-related durability deterioration in civil engineering projects. The primary focus will be on reinforced concrete, plain concrete, and soil for a variety of applications. Course content will be delivered primarily through laboratory activities and handouts. Lab activities will use advanced analysis techniques and help the students identify and measure deterioration mechanisms. Various non-destructive evaluation techniques will be discussed. Students have hands on experiences with samples production, data collection, and data analysis for all of the lab activities.

Prerequisites: CIV-ENGR 335, CIV-ENGR 378WI.

Cross Listings: CIV-ENGR 473.

CIV-ENGR 5575 Seismic Design of Structures Credits: 3

Introduction to basic analysis and design principles for the seismic design of buildings (concrete, steel, wood). General seismic principles, codes and loads, static lateral force procedure, dynamic lateral force procedure, topics in rigidities of buildings.

Prerequisites: CIV-ENGR 323 (or CIV-ENGR 422WI), MEC-ENGR 285.

CIV-ENGR 5582 Advanced Traffic Engineering Credits: 3

This course covers the review of traffic flow characteristics, the field survey practices and studies, traffic signal designs, freeway operation, and the introduction to Intelligent Traffic Systems (ITS).

Prerequisites: CIV-ENGR 319.

CIV-ENGR 5584 Pavement Materials, Design, Maintenance, and Rehabilitation Credits: 3

This course will explore the identification, causes of, and remediation of material-related durability deterioration in civil engineering projects. The primary focus will be on reinforced concrete, plain concrete, and soil for a variety of applications. Course content will be delivered primarily through laboratory activities and handouts. Lab activities will use advanced analysis techniques and help the students identify and measure deterioration mechanisms. Various non-destructive evaluation techniques will be discussed. Students have hands on experiences with samples production, data collection, and data analysis for all of the lab activities.

Prerequisites: CIV-ENGR 378WI.

CIV-ENGR 5585 Principles of Railroad Engineering Credits: 3

The engineering analysis and design of railroad systems including the study of the dynamics of track/trains; wheel/rail interaction related to acceleration and braking; horizontal and vertical geometric design of railroads and rail-bed design, rail structures; freight and passenger operations; and, rail-highway interaction and safety.

CIV-ENGR 5599 Thesis Research Credits: 1-6

Independent investigation in the field of civil engineering to be presented in the form of a thesis.

CIV-ENGR 5602 Directed Reading in Civil Engineering Credits: 1-3

Faculty supervised readings course.

Prerequisites: Graduate standing.

CIV-ENGR 5607 Numerical Methods in Engineering Credits: 3

Classification and numerical solution of engineering problems—ordinary and partial differential equations, algebraic equations. Includes initial, boundary, eigen-# and characteristic-value problems.

Prerequisites: MATH 345.

CIV-ENGR 5622 Theory of Elasticity Credits: 3

Stress and strain at a point. General equations of elasticity. Plane stress, plain strain problems; torsion of prismatic bars. Energy methods.

CIV-ENGR 5623 Theory of Plates and Shells Credits: 3

Bending of plates with various loading and boundary conditions. Deformations, stresses in thin shells.

Prerequisites: CIV-ENGR 5622.

CIV-ENGR 5624 Theory of Elastic Stability Credits: 3

Buckling of columns, beams, rings, curved bars, thin plates, shells.

Prerequisites: CIV-ENGR 5622.

CIV-ENGR 5625 Advanced Prestressed Concrete Credits: 3

Design and behavior of prestressed concrete structures; material and system of pretensioned and post tensioned systems; prestress losses; flexure, shear, bond, deflections and partial prestress in determinate structures; indeterminate beams-introduction.

Prerequisites: CIV-ENGR 422WI.

CIV-ENGR 5629 Adv. Design of Structures for Blast and Fire Credits: 3

General overview of Blast Design; risk assessment and design criteria; simplified Blast Effects Analysis; ground shock, material response; antiterrorism design considerations; weapons effects and mitigation; internal explosions; progressive collapse analysis; and introduction to Fire Design.

CIV-ENGR 5645 Water Quality Modeling Credits: 3

Derivation and application of models for describing oxygen budget, nutrient exchange, and biological productivity in streams, lakes and estuaries.

Prerequisites: CIV-ENGR 342.

CIV-ENGR 5646 Physiochemical Treatment Processes Credits: 3

Fundamental principles, analysis and modeling of physical and chemical processes for water and wastewater treatment.

Prerequisites: CIV-ENGR 342.

CIV-ENGR 5647 Biochemical Treatment Processes Credits: 3

Biochemical principles, kinetic models and energy considerations in the design of biological wastewater treatment processes.

Prerequisites: CIV-ENGR 342.

CIV-ENGR 5648 Environmental Engineering Practicum Credits: 3

Numerical water quality modeling of actual site data for wasteload allocation.

Prerequisites: CIV-ENGR 5645.

CIV-ENGR 5649 Design of Water and Wastewater Treatment Facilities Credits: 3

Development of design criteria and their application to the design of water and wastewater treatment facilities.

Prerequisites: CIV-ENGR 5646 or CIV-ENGR 5647.

CIV-ENGR 5651 Fundamentals of Fluid Mechanics Credits: 3

Fundamentals of fluid motion, lecture and laboratory. Instrumentation, technique and analysis for experimental studies in fluid mechanics.

CIV-ENGR 5655 Sediment Transport Credits: 3

The study of sediment transport in rivers: the relationship between sediment transport and the fundamentals of fluvial geomorphology. Computation of sediment transport and sediment transport modeling.

Prerequisites: CIV-ENGR 452 (or CIV-ENGR 5552).

CIV-ENGR 5656 Advanced Hydraulic Engineering Credits: 3

Rapidly varied flow and design of transition structures. Hydraulic design of spillways, reservoirs and related structures.

CIV-ENGR 5675 Advanced Seismic Design of Structures Credits: 3

Introduction to basic analysis and design principles for the seismic design of buildings (concrete, steel, wood). General seismic principles, codes and loads, static lateral force procedure, dynamic lateral force procedure, topics in rigidities of buildings.

Prerequisites: CIV-ENGR 323 (or CIV-ENGR 422WI), MEC-ENGR 285.

CIV-ENGR 5679 Dynamics of Structures Credits: 3

Study of the dynamic behavior of structures. Analysis of equivalent lumped parameter systems for the design of structures in a dynamic environment.

Prerequisites: CIV-ENGR 276 (or CIV-ENGR 421), MEC-ENGR 484 (or MATH 345, MEC-ENGR 285).

Cross Listings: MEC-ENGR 5679.

CIV-ENGR 5681 Traffic Flow Theory Credits: 3

This course covers the review of macroscopic and microscopic traffic flow characteristics, the traffic flow models, and the traffic simulation applications.

Prerequisites: CIV-ENGR 319.

CIV-ENGR 5682 Transportation Network Modeling Credits: 3

This course is about modeling, solving, and understanding network flow problems, especially in the transportation discipline. This course covers equilibrium traffic assignment, network design, fleet assignment, fleet routing, and crew scheduling.

Prerequisites: CIV-ENGR 319.

CIV-ENGR 5699 Research and Dissertation Credits: 1-9
 Doctoral dissertation research.

Clarinet (CLARINET)

Courses

CLARINET 5300 Studio Class Credits: 0
 Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

CLARINET 5500A Graduate Clarinet-Secondary Credits: 2

CLARINET 5500B Special Applied Studies Credits: 2
 One-hour lesson weekly. This courses is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

CLARINET 5500C Applied Study of a Second Instrument Credit: 1
 One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

CLARINET 5500JC Applied Jazz Study of a Second Instrument Credit: 1
 One half-hour lesson weekly. Applied study for those students who wish to pursue applied jazz study in an area other than, and in addition to, their primary performance study.
Prerequisites: Graduate status.

CLARINET 5501 Graduate Clarinet - Masters Performance Credits: 4

CLARINET 5601 Graduate Clarinet - Doctoral Performance Credits: 4

Communication Studies (COMM-ST)

Courses

COMM-ST 5554 Graduate Seminar: Screenwriting Credits: 3
 Students will complete their feature screenplay, focusing on acts two and three and then ready the script for submission to contests and industry contacts. We will focus on in-depth scene work, polishing dialogue and deepening theme.
Prerequisites: COMM-ST 454 or ENGLISH 429B.

COMM-ST 5597 Directed Graduate Studies: Readings Credits: 1-6
 Special Projects on the graduate level.

COMM-ST 5598 Directed Graduate Studies: Non-Thesis Research Credits: 1-6
 Special projects on the graduate level.

Computer Science & Electrical Engineering (CSEE)

Courses

CSEE 5110 Network Architecture I Credits: 3
 This course provides an introduction to fundamental concepts and principles in the design and implementation of computer communication networks, their protocols, and architectures. Topics to be covered include: layering, and addressing, naming, routing, internetworking, Internet protocols, reliable transfer, congestion control, link control, multiple media access, and network measurement and management.
Prerequisites: COMP-SCI 421A, COMP-SCI 431.

CSEE 5111 Network Architecture II Credits: 3
 In this course, advanced principles, protocols, and architectures of computer networks will be studied with specific emphasis on emerging technologies. The focus will be on the latest networking protocol designs with particular attention to the TCP/IP and application layers.
Prerequisites: CSEE 5110.

CSEE 5113 Network Routing Credits: 3
 Algorithms, protocols and analysis for network routing. Routing in different networks such as circuit-switched networks, Internet, broadband networks, and transmission networks are covered.
Prerequisites: CSEE 5110, CSEE 5112.

CSEE 5590 Special Topics Credits: 1-3
 This course is intended to allow faculty and visiting scholars to offer special courses in selected topics.

CSEE 5690 Advanced Special Topics Credits: 1-3

A lecture course presenting advanced research level topics. This course is intended to allow faculty and visiting scholars to offer special courses in selected research areas.

CSEE 5697 Directed Readings Credits: 1-3

Readings in an area selected by the doctoral student in consultation with a doctoral faculty member. Arrangements must be made prior to registration.

CSEE 5699 Research and Dissertation Research in Telecommunications and Computer Networking Credits: 1-12

Doctoral Research in Telecommunications and Computer Networking.

CSEE 5899 Required Graduate Enrollment Credit: 1

Required Graduate Enrollment.

Computer Science (COMP-SCI)

Courses

COMP-SCI 5101 Discrete Structures Review for Graduate Students Credits: 1-3

A review of mathematical logic, sets, relations, functions, mathematical induction, and algebraic structures with emphasis on computing applications. Recurrence relations and their use in the analysis of algorithms. Graphs, trees, and network flow models. Introduction to Finite state machines, grammars, and automata. Students must have completed College Algebra before taking this course.

COMP-SCI 5102 Operating Systems Review for Graduate Students Credits: 1-3

This course covers concurrency and control of asynchronous processes, deadlocks, memory management, processor and disk scheduling, parallel processing, and file system organization in operating systems.

Prerequisites: Data Structures, Computer Architecture.

COMP-SCI 5103 Advanced Data Structures and Analysis of Algorithms Review for Graduate Students Credits: 1-3

A review of linear and hierarchical data structures, including stacks, queues, lists, trees, priority queues, advanced tree structures, hashing tables, dictionaries and disjoint-sets. Asymptotic analysis techniques and algorithms: from design strategy (such as greedy, divide-and-conquer, and dynamic programming) to problem areas (such as searching, sorting, shortest path, spanning trees, transitive closures, graph algorithms, and string algorithms) arriving at classical algorithms with efficient implementation. Introduction to the basic concepts of complexity theory and NP-complete theory. Students must have taken courses in Linear Algebra, Discrete Structures, Data Structures, and Applied Probability before taking this course.

COMP-SCI 5514 Optical Fiber Communications Credits: 3

Fiber optic cable and its characteristics, optical sources and transmitters, optical detectors and receivers, optical components such as couplers and connectors, WDM and OFDM techniques, modulation and transmission of information over optical fibers, design of optical networks, single and multihop fiber LANs, optical carrier systems.

Prerequisites: COMP-SCI 411.

COMP-SCI 5525 Cloud Computing Credits: 3

Cloud computing systems operate in a very large scale, and are impacting the economics and the assumptions behind computing significantly. This special topics course provides a comprehensive overview of the key technical concepts and issues behind cloud computing systems such as compute, storage and network resource virtualization and management. We will cover a range of topics of cloud computing including: Cloud system architectures and taxonomy, Computing virtualization techniques, Virtual machine resource management, Data center networking issues, Big data transfer protocols and management, Large scale distributed file system examples (Google File System), Cloud programming.

Prerequisites: CSEE 5110, COMP-SCI 431.

COMP-SCI 5531 Advanced Operating Systems Credits: 3

Components of an operating system, scheduling/routing mechanisms, process control blocks, design and test various operating system components.

Prerequisites: COMP-SCI 431.

COMP-SCI 5540 Principles of Big Data Management Credits: 3

This course will introduce the essential characteristics of Big Data and why it demands rethinking how we store, process, and manage massive amounts of structured and unstructured data. It will cover the core technical challenges in Big Data management i.e., the storage, retrieval, and analysis of Big Data. It will emphasize on fundamental concepts, analytical skills, critical thinking, and software skills necessary for solving real-world Big Data problems. Tools such as Apache Hadoop, Pig, Hive, HBase, and Apache Spark will be covered. Extensive reading of research papers and in-class presentations will be heavily emphasized in this class.

Prerequisites: COMP-SCI 431 and COMP-SCI 470.

COMP-SCI 5542 Big Data Analytics and Applications Credits: 3

Big Data analytics focus on analyzing large amounts of data to find useful information and to make use of the information for better business decisions. This course introduces students to the practice and potential of big data analytics and applications. In this course, students will have hands-on experience with Big Data technologies (Hadoop and its ecosystems) and tools (Cloudera, RMAhout, HBase) for the analysis of large data sets across clustered systems. Students will learn how to develop highly interactive applications for business intelligence.

Prerequisites: COMP-SCI 451.

COMP-SCI 5543 Real-time Big Data Analytics Credits: 3

This course teaches students fundamental theory and practice in the field of big data analytics and real time distributed systems for real time big data applications. In this course, students will have hands-on experience for the development of real-time applications with various tools such as Twitter's Storm, Apache Flume, Apache Kafka for real time analysis of stream data such as twitter messages and Instagram images.

Prerequisites: COMP-SCI 451.

COMP-SCI 5551 Advanced Software Engineering Credits: 3

Current concepts in software architecture and design, comparative analysis for design, object-oriented software design, software quality criteria for evaluation of software design. Introduction to metrics, project management and managerial ethics.

Prerequisites: COMP-SCI 451R.

COMP-SCI 5552A Formal Software Specification Credits: 3

Formal modeling including specification and deviation of abstract data types, completeness issues in the design of data types and data structures, implementation of data structures from a formal data type specification, verification of abstract to concrete data mapping.

Prerequisites: COMP-SCI 291, COMP-SCI 303.

COMP-SCI 5553 Software Architecture and Design Credits: 3

The course introduces a number of basic concepts and enabling technologies of software architecture, including architecture styles, architecture description languages, architecture-implementation mapping, and product line architectures. It also covers some advanced topics, such as the REST architecture style and Web Services. Students will read research papers, analyze the existing results, write critiques, give presentations, and exercise the research results with real examples. In addition, students will have an opportunity to work in groups and study the architecture of some real software systems.

Prerequisites: COMP-SCI 451R.

COMP-SCI 5555 Software Methods and Tools Credits: 3

Software methods and tools are extensively used in current software production to improve software productivity and quality. In this course, we are going to learn a number of popular software methods and tools being used in industry. These methods include object-oriented design and analysis (e.g. UML, design patterns), architecture styles, code generation, and unit testing. The covered software tools include Microsoft Project, IBM Rational Systems Developer, Eclipse Plug-ins, Emacs, JUnit, Subversion, and GIT. The course emphasizes practice, and students will be using these methods and tools to develop a software system, from the initial planning to the final deployment.

COMP-SCI 5560 Knowledge Discovery and Management Credits: 3

This course teaches students fundamental theory and practice in the field of knowledge discovery and management and also provides them with hands-on experience through application development.

Prerequisites: COMP-SCI 5551, COMP-SCI 461.

COMP-SCI 5561 Advanced Artificial Intelligence Credits: 3

AI systems and their languages, implementations and applications, case studies of various expert systems, current research topics in AI, logic programming using PROLOG.

Prerequisites: COMP-SCI 461.

COMP-SCI 5565 Introduction to Statistical Learning Credits: 3

Introduction to Machine Learning; Multivariate Distributions; Information Theory; Linear Algebra (Eigenanalysis); Supervised/Unsupervised Learning, Classification/Regression; Linear/Non-linear Learning; Introduction to Bayesian Learning (Bayes rule, Prior, Posterior, Maximum Likelihood); Parametric/Non-parametric Estimation. Recommended preparation: MATH 300; Familiarity with MATLAB.

Prerequisites: COMP-SCI 394R.

COMP-SCI 5566 Introduction to Bioinformatics Credits: 3

This course introduces students to the field of Bioinformatics with a focus on understanding the motivation and computer science behind existing Bioinformatic resources, as well as learning the skills to design and implement new ideas.

Prerequisites: COMP-SCI 303, a course or background in Biology (Genomics or Meta Models preferred).

COMP-SCI 5567 Machine Learning for Data Scientists Credits: 3

This course teaches the theoretical basis of methods for learning from data, illustrated by examples of applications to several domains. Recommended preparation: COMP-SCI 5565.

Prerequisites: COMP-SCI 303, COMP-SCI 394R.

COMP-SCI 5568 Fundamentals of Probabilistic Graphical Models Credits: 3

Many real world systems are probabilistic in nature. Probability theory gives us the basic tools for modeling many real world systems, allowing us to understand complex behavior. Probabilistic graphical models allow us to model complex probabilistic relationships using graphs. This framework, which spans methods such as Bayesian networks and Markov networks, allows us to manipulate complex probability distributions that often involve hundreds or even many thousands of variables. These methods have been used for an enormous range of applications, which include: web search, turbo coding, robot navigation, image identification, epidemic identification in complex networks, medical diagnosis and speech recognition. Recommended preparation: COMP-SCI 5565.

Prerequisites: COMP-SCI 303, COMP-SCI 394R.

COMP-SCI 5570 Architecture of Database Management Systems Credits: 3

Covers in detail, architecture of centralized database systems, database processing, management of concurrent transactions, query processing, query optimization, data models, database recovery, datawarehousing, workflow, World Wide Web and Database performance, and reviews the architecture of some commercial centralized database systems.

Prerequisites: COMP-SCI 431, COMP-SCI 470.

COMP-SCI 5572 Mobile Computing Credits: 3

This course covers in detail the architecture of mobile and wireless network. It discusses and develops relevant concepts and algorithms for building mobile database systems (MDS), which is necessary for managing information on the air and E-commerce.

Prerequisites: COMP-SCI 5570.

COMP-SCI 5573 Information Security and Assurance Credits: 3

This course deals with information security and assurance and covers the concepts necessary to secure the cyberspace. It introduces security models, assurance policies, security policies and procedures, and technology. It enables students to understand the need for information assurance, identify security vulnerabilities, and devise security solutions that meaningfully raise the level of confidence in computer systems. It teaches students how to design secured database and computer systems.

Prerequisites: COMP-SCI 470.

COMP-SCI 5574 Large Scale Semistructured Data Management Credits: 3

This course will cover topics related to managing large scale semistructured data modeled using the Extensible Markup Language XML and the Resource Description Framework (RDF). This will include storing XML (e.g. natively, using a relational database), indexing XML (e.g. numbering schemes, structural indexes, sequencing paradigms), XML query processing algorithms (e.g. join-based, subsequence-based), RDF DATA STORAGE (e.g. triple stores, graph stores), RDF indexing and SPARQL query processing algorithms. The course will also cover emerging many core processor architectures (e.g. Intel Single-chip Cloud Computer) and the opportunities they provide for building next-generation semistructured data management solutions. Extensive reading of research papers and in-class presentations will be a core part of this class. Grades will be based on in-class presentations of research papers, exams, and a research project (to be done in groups).

Prerequisites: COMP-SCI 470.

COMP-SCI 5581 Parallel Computer Architecture I Credits: 3

Parallelism in computer architecture, pipelined processors, array processors and multi-processor systems, algorithms for SISD, SIMD, MISD and MIMD organizations, vectorization, pipelining algorithms.

COMP-SCI 5582 Computer Vision Credits: 3

The image is an essential form of information representation and communication in modern society. This course focuses on topics of computer vision, teaching computer how to understand images. Topics include image formation, color and texture features, key points detection, aggregation, subspace methods in image modeling, and deep learning image classification, with many applications in photography, media and entertainment, education, defense and medicine.

COMP-SCI 5590 Special Topics Credits: 1-6

Selected topics in specific areas of computer science. May be repeated for credit when the topic varies.

COMP-SCI 5590AW Special Topics Credits: 1-3**COMP-SCI 5590BD Special Topics Credits: 1-3****COMP-SCI 5590CC Special Topics In Computer Science Credits: 1-3****COMP-SCI 5590CI Special Topics Credits: 1-3****COMP-SCI 5590CN Special Topics Credits: 1-3****COMP-SCI 5590HI Special Topics Credits: 1-3****COMP-SCI 5590MT Special Topics Credits: 1-3****COMP-SCI 5590NN Special Topics Credits: 1-3**

Selected topics in specific areas of computer science. May be repeated for credit when the topic varies.

COMP-SCI 5590OS Special Topics Credits: 1-3

COMP-SCI 5590PB Special Topics Credits: 1-3
Special Topics

COMP-SCI 5590PG Special Topics In Computer Science Credits: 1-3

COMP-SCI 5590SA Special Topics In Computer Science Credits: 1-3

COMP-SCI 5590WW Special Topics Credits: 1-3

COMP-SCI 5590WX Special Topics Credits: 1-3

COMP-SCI 5590XX Special Topics Credits: 1-3

COMP-SCI 5590YL Special Topics Credits: 1-3

COMP-SCI 5592 Design and Analysis of Algorithms Credits: 3

Combinatorial analysis, searching and sorting, shortest path algorithms, spanning trees, search and traversal techniques, backtracking, branch and bound, heuristics, algebraic simplification and transformation.

Prerequisites: COMP-SCI 303 and COMP-SCI 404.

COMP-SCI 5596A Computer Security I: Cryptology Credits: 3

Study of theory, and algorithmic techniques, of the fields of number theory and cryptology, as they are applied in the general area of computer and network security.

Prerequisites: COMP-SCI 291.

COMP-SCI 5596B Computer Security II: Applications Credits: 3

Application of the algorithmic techniques learned in COMP-SCI 5596A to provide suitable security countermeasures to the variety of security threats across the spectrum of computing.

Prerequisites: COMP-SCI 5596A.

COMP-SCI 5597 Directed Readings Credits: 1-3

Readings in an area selected by the graduate student in consultation with a faculty member. Arrangements must be made prior to registration.

COMP-SCI 5598 Research Seminar Credits: 1-3

Graduate research based on intensive readings from the current research literature under the direction of a faculty member. Arrangements must be made prior to registration.

COMP-SCI 5599 Research and Thesis Credits: 1-6

A project investigation leading to a thesis, or written report under the direction of a faculty member. A prospectus must be accepted prior to registration.

COMP-SCI 5690 Advanced Special Topics Credits: 1-3

A lecture course presenting advanced research level topics. This course is intended to allow faculty and visiting scholars to offer special courses in selected research areas.

Prerequisites: Ph.D. Candidacy.

COMP-SCI 5690ND Advanced Special Topics Credits: 1-3

COMP-SCI 5697 Directed Readings Credits: 1-3

Readings in an area selected by the doctoral student in consultation with a doctoral faculty member. Arrangements must be made prior to registration.

COMP-SCI 5698 Advanced Research Seminar Credits: 1-3

Advanced research by a group of doctoral students based on intensive readings from the current research literature under the direction of one or more doctoral faculty. Original research results of each student are exchanged by presentations and group discussion. Arrangements must be made prior to registration.

COMP-SCI 5699A Research And Dissertation Research In Computer Science Credits: 1-12

Doctoral research in computer science.

COMP-SCI 5899 Required Grad Enrollment Credit: 1

Conservatory (CONSVTY)

Courses

CONSVTY 5042 Styles and Genres in Music Credits: 3

Styles and Genres in Music presents an overview of Western music history through three lenses: chronology, genre, and musical style. It is intended for students who have previously studied music history and wish to take a broader view of music history than the view offered through period-specific classes.

CONSVTY 5116 Minor Opera Role Credit: 1

This is a performance-based course of a minor role in the operatic repertoire and based on the specific repertoire chosen by the Vocal Studies Division. The student may choose to take this course as an elective and will be required to audition for the course at the beginning of the academic school year in order to take this course. Each student who is selected and has accepted the minor operatic role will work with the Conservatory faculty, including the stage director, vocal coaches, voice teachers, and musical director, towards the final staged performance of the selected opera production.

Prerequisites: You must be a graduate student in Vocal Performance in the Conservatory of Music and Dance

CONSVTY 5302 Orchestra Credit: 1

The Conservatory Orchestra comprises string, wind, brass and percussion students of the highest level in the Conservatory and performs repertoire of the highest caliber available to the medium. The repertoire includes the great works for orchestra considered the "standard repertoire" from approximately 1770 to today, and includes orchestral, opera, and choral/orchestral works. Sensitivity to outstanding musicianship, historical styles, and appropriate performance practices are required. In addition to the highest expectations as an instrumentalist, your ability to apply intellect and spirit in meaningful ways during rehearsals and concerts is also demanded. Membership is open to any student who qualifies through audition.

CONSVTY 5305A Principles of Chamber Music Credit: 1

The study and performance of chamber music for strings, piano, winds, brass, and voice. Weekly coaching.

CONSVTY 5305H Chamber Orchestra Credit: 1

The Conservatory Chamber Orchestra comprises instrumental students of the highest level in the Conservatory and performs repertoire of the highest caliber available to the medium. The repertoire includes the "standard repertoire" for chamber orchestra from the Baroque period to new works. The ensemble also "reads" "standard repertoire" for orchestras of all sizes, preparing students for playing these works in a professional setting. Sensitivity to outstanding musicianship, historical styles, and appropriate performance practices are required. Membership is open to any student who qualifies through audition.

CONSVTY 5306A Conservatory Wind Ensemble Credit: 1

A select concert band ensemble, designed for high-level, artistic, public performances of major literature for winds and percussion. As a member of this Wind Ensemble, you are contributing to the three hundred year legacy of concert band music in the western world. Sensitivity to outstanding musicianship, historical styles, and appropriate performance practices are required. In addition to the highest expectations as an instrumentalist, your ability to apply intellect and spirit in meaningful ways during rehearsals and concerts is also demanded. Membership in the Wind Ensemble is open to any student who qualifies through audition.

CONSVTY 5306C Wind Symphony Credit: 1

The Wind Symphony comprises wind, brass and percussion students of the highest level in the Conservatory and performs repertoire of the highest caliber available to the medium. The curriculum is well balanced between traditional, modern, and chamber music and requires advanced musical and technical facility amongst its members. The class is open to all UMKC students by audition.

CONSVTY 5307B Conservatory Singers Credit: 1

This select choir of 32 singers performs chamber chorus repertoire of the 16th-21st centuries at the highest possible artistic level. This class is open to all UMKC students by audition.

CONSVTY 5325 Graduate Piano Pedagogy I Credits: 3

This course will provide an introduction to piano pedagogy by focusing on best practices for teaching elementary piano students. Topics will include average-age piano methods, technical concepts for the elementary student, rote teaching strategies, learning modalities, motivation theories, andragogy, business practices, and technology for teaching. After briefly reviewing several historical piano methods, students will examine current piano methods and assemble a curriculum that will be used to teach a weekly 30-minute lesson to a beginning piano student.

CONSVTY 5326 Graduate Piano Pedagogy II Credits: 3

This course will examine pedagogical topics related to intermediate students. Topics will include intermediate repertoire by standard composers, technical considerations for intermediate students, effective practice strategies, sight reading, memorization, and strategies for teaching phrasing. After reading through a variety of standard repertoire from Levels 3-7, students will compile an anthology of intermediate pieces with annotated practice guides. They will also perform selections during an in-class recital.

CONSVTY 5395 Clinical Foundations I Credits: 3

This course provides the first-semester clinical graduate student practice and implementation of direct services, procedures, and documentation of the music therapy treatment process (assessment, setting goals and objectives, treatment plan, interventions, data collection, and evaluation). Students will participate in supervision and clinical experiences within the context of community-dwelling older adult populations.

CONSVTY 5444 The Teaching Performer Credits: 2

The class will focus on teaching techniques for the performing musician, highlighting the advantages of becoming distinguished as a performer and a pedagogue. Premised on the synergistic relationship between teaching and performing, the class will provide a structure for clarifying the essential elements of teaching and musical artistry, and connecting them to such tangible situations as setting up a studio, teaching a master class, interviewing for a job, judging competitions, and recruiting students. The class will provide resources for individuals interested in being university applied faculty, music pedagogy teachers, and professionals looking to add effective teaching to their artistic repertoire.

CONSVTY 5445 Teaching and Learning in Music Credits: 2

This course explores the fundamental principles of music learning and provides opportunities for students to practice applying those principles to music teaching. Students will analyze their effectiveness at structuring meaningful learning experiences when teaching others in authentic settings (by analyzing videos from rehearsals, lessons, or classrooms) and when structuring learning experiences for themselves (by analyzing videos of practice).

CONSVTY 5490 Independent Study Credits: 1-3

Intensive reading, research projects, creative work, or special performance in the student's major field, selected by the student in consultation with the appropriate faculty.

CONSVTY 5510 Studies in Music and Gender Credits: 3

Variable topics focusing on connections and intersections between music and gender; may include study of such topics in particular historical periods (e.g., Baroque, Classical), geographical locations, in specific areas of gender studies (e.g., queer studies, women in music), and/or noted musical works and composers.

Prerequisites: Graduate student in the Conservatory of Music and Dance.

CONSVTY 5512 Career Paths in Composition Credits: 3

This course is an introduction to career paths in composition. Two overlapping threads will be discussed which follow academic and entrepreneurial trajectories. Students will gain knowledge of aspects of college teaching, as well as aspects of freelance career building in composition.

Prerequisites: Graduate Composition Major in the Conservatory

CONSVTY 5516 Major Opera Role Credits: 2

This is a performance-based course of a major role in the operatic repertoire and based on the specific repertoire chosen by the Vocal Studies Division. The student may choose this course as an elective experience and will be required to audition at the beginning of the academic school year and be awarded a major role in order to take this course. Each student who is selected and has accepted the major operatic role will work with the Conservatory faculty, including the stage director, vocal coaches, voice teachers, and musical director, towards the final staged performance of the selected opera.

Prerequisites: You must be a graduate student in vocal performance at the Conservatory of Music and Dance.

CONSVTY 5517 Advanced Opera Workshop: Audition Techniques Credit: 1

Students will work on specific audition techniques for the operatic solo singer, which may include dramatic interpretation of repertoire, stage movement, resume building, and other aspects to assist the performer in the audition process.

Prerequisites: You must be a graduate student in the Conservatory of Music Dance to take this course.

CONSVTY 5518 Current Issues and Trends in American Music Theory Credits: 3

This course introduces graduate music majors to current issues and trends in American music theory. Through surveys of prominent journals, article reviews and presentations, class discussion, and a final research or review article, students will be introduced to the variety of music-theoretical subfields, learn about the types of questions music theorists explore, practice the conventions of academic writing, and explore the connections between music theory, music performance, teaching, and composition.

Prerequisites: Graduate music majors in the Conservatory who have passed both theory and aural skills matriculation exams or equivalents.

CONSVTY 5520 Theory Seminar in the Works of a Composer Credits: 3

Intensive analytical study of the music of a specific composer. Variable topic as selected by the instructor. May be repeated if a different topic.

Prerequisites: Graduate status in the Conservatory of Music and Dance.

CONSVTY 5523 Analytical Procedures Credits: 3

An introduction to recent methods of stylistic and formal analysis including twelve-tone, Schenkerian and set theoretic approaches.

Prerequisites: Graduate standing in the Conservatory. Passing grades on the written theory and aural skills matriculation exams or successful completion of CONSVTY 421A and/or CONSVTY 421B.

CONSVTY 5524B Advanced Analysis II: 1600-1900 Credits: 3

Theory and analysis of selected works from the 17th through the mid-19th century.

Prerequisites: CONSVTY 5523.

CONSVTY 5524C Advanced Analysis III: 20th Century to the Present Credits: 3

Theory and analysis of selected works from the late 19th century to the present.

Prerequisites: CONSVTY 5523.

CONSVTY 5526A Introduction to Schenkerian Theory and Analysis Credits: 3

An introduction to the theories and analytic methodology of Heinrich Schenker (1868-1935).

Prerequisites: Graduate standing in the Conservatory. Passing grades on the written theory and aural skills matriculation exams or successful completion of CONSVTY 421A and/or CONSVTY 421B.

CONSVTY 5526B Schenkerian Theory and Analysis Credits: 3

Continuation of CONSVTY 5526A, emphasizing the acquisition of advanced skills in Schenkerian analysis.

Prerequisites: CONSVTY 5526A.

CONSVTY 5527 18th-Century Counterpoint Credits: 3

Analysis and writing in 18th-century style and forms including canon, invention and fugue.

Prerequisites: Graduate music student in the Conservatory.

CONSVTY 5528 Introduction to Post-Tonal Theory Credits: 3

Analysis and writing in contemporary styles.

Prerequisites: CONSVTY 428.

CONSVTY 5529 Aspects of Time and Music Credits: 3

A course offering a broad-based, multi-disciplinary exploration of the natures of time preparatory to an in-depth study of some of music's primary temporal aspects; these focus on complex treatments of rhythm and meter in tonal music.

Prerequisites: Graduate standing in the Conservatory. Passing grades on the written theory and aural skills matriculation exams or successful completion of CONSVTY 421A and/or CONSVTY 421B.

CONSVTY 5531 Advanced Orchestration Credits: 3

Analysis of advanced orchestration techniques with a focus on relatively recent music for large instrumental ensembles. Discussion of student works-in-progress for orchestra or wind ensemble.

Prerequisites: CONSVTY 431.

CONSVTY 5532 Composition Seminar in the Works of a Composer or Genre Credits: 3

Intensive analytical and compositional study of a specific genre or compositional trend. Variable topic as selected by the instructor. May be repeated if a different topic.

Prerequisites: Graduate status in the Conservatory of Music and Dance

CONSVTY 5533 Advanced Composition Credits: 3

Intensive work in advanced composition in the large forms for various vocal and instrumental ensembles and orchestra. May be repeated for credit.

CONSVTY 5534 Advanced Electronic Music Composition Credits: 3

Creative, original composition of music in diverse styles utilizing the full range of equipment and techniques available. May be repeated for credit.

CONSVTY 5534B Advanced Computer Music Language Study Credits: 3

This course is designed to fulfill the computer language option of the foreign language requirement for DMA students in composition. Focus will be on development and mastery of skills in computer languages specifically related to musical composition, such as MAX or Csound, or in compositional uses of more general languages such as html, C, and Lingo.

Prerequisites: CONSVTY 335.

CONSVTY 5534C Electroacoustic Music Aesthetics and Analysis Credits: 3

An overview of the context and practice of electroacoustic music in two parts: 1) new aesthetic parameters of sonic composition made possible by technology; and 2) creating a cogent analysis of a work by developing individual, personalized analytical tools. Offered in rotation with CONSVTY 5534 and CONSVTY 5534B.

CONSVTY 5536 Improvisation in Music Therapy Credits: 3

This course is designed to learn, lead, and participate in the theory and practice of improvisation in music therapy for clients and therapists.

CONSVTY 5537 Administration of Music Therapy Credits: 3

This course is designed for the person who wishes to become a music therapy professor either entering into an existing program or starting one's own program. It also may be valuable to those considering academia or to be better informed about the academic process when dealing with music therapy programs.

CONSVTY 5540B Advanced Methods In Instrumental Music Credits: 2

Organizational and rehearsal techniques for programs from the beginning bands and orchestras through high school and college ensembles. Includes information regarding methods, materials and program building.

CONSVTY 5540C Advanced Methods In Choral Music Credits: 2

Addresses the organization of secondary and college choral classes and ensembles. Areas of study include methods, materials and program building.

CONSVTY 5541 Theories and Practice of Music Therapy Credits: 3

This course addresses the history and development of the music therapy profession in the United States and other countries. This course is open to music therapy graduate students.

CONSVTY 5542 Clinical Supervision in Music Therapy Credits: 3

This course prepares the music therapist for clinical supervision of music therapy students across training levels and situations. The course includes both theoretical background on supervisee development, issues of clinical supervision, and practical application and skill development in the area of clinical supervision of music therapy students.

CONSVTY 5543 Psychology of Music Credits: 3

The study of psychological aspects of music including acoustical phenomena and factors affecting musical preference, perception and taste. A review of related literature and basic methodology for experimental investigation and quantification of related variables will be included.

CONSVTY 5544 Advanced Clinical Experience Credits: 2

This course provides the graduate student with board certification in music therapy an opportunity to refine and enhance current clinical skills and to develop individually specified American Music Therapy Association Advanced Level Competencies. Students will demonstrate the ability to integrate advanced competencies in musicianship, theory and clinical practice. Students will conform to the AMTA Code of Ethics and standards for Clinical Practice and the CBMT Scope of Practice. The course includes a weekly seminar and clinical rotations at a mutually agreed upon clinical facility.

CONSVTY 5545 Seminar In Music Therapy Credits: 2

This course is designed to address relevant topics in the theory, practice and research of music therapy to promote an advanced level of practice in the music therapist. Topics will be based on faculty scholarship and advanced practice expertise, as well graduate student interest. Course structure will involve weekly meetings with the instructor and independent research and reading by the student.

CONSVTY 5546 Jazz Revolutions: A Historical Perspective Credits: 3

Jazz Revolutions surveys the styles and innovations of jazz musicians who are considered pioneers in the development of jazz. It then places those musicians in a rich cultural and musical context, showing the impact those innovators had on their contemporaries and the musical practices of today both inside and outside of jazz.

Prerequisites: CONSVTY 5593, CONSVTY 5593N.

CONSVTY 5547 Opera History Credits: 3

The history of opera from its origins to the present.

Prerequisites: CONSVTY 5593.

CONSVTY 5548 Opera Literature Credits: 2

A survey of opera literature, opera synopsis, and operatic stagecraft from 1600 to present.

Prerequisites: CONSVTY 5547.

CONSVTY 5550 Musicology Seminar in the Works of a Composer Credits: 3

Intensive study of the music, life, and culture of a specific composer. Variable topic as selected by the instructor. May be repeated if a different topic.

Prerequisites: Graduate status in the Conservatory of Music and Dance.

CONSVTY 5554 Music of the Medieval Era Credits: 3

Seminar in the music of the Middle Ages, from 800 to 1400.

Prerequisites: CONSVTY 5593.

CONSVTY 5555 Music Of The Renaissance Credits: 3

Seminar in the music of the Renaissance, from 1400 to 1600.

CONSVTY 5556 Music of the Baroque Era Credits: 3

Seminar in the music of the Baroque era, from 1600 to 1750.

Prerequisites: CONSVTY 5593.

CONSVTY 5557 Music of the Classical Era Credits: 3

Seminar in the music of the Classical era, from 1750 to 1828.

Prerequisites: CONSVTY 5593.

CONSVTY 5558 Music of the Romantic Era Credits: 3

Seminar in the music of the Romantic era from 1828 to 1914.

Prerequisites: CONSVTY 5593.

CONSVTY 5559A Music Since 1900: 1900-1945 Credits: 3

Seminar in music from 1900 to 1945.

Prerequisites: CONSVTY 5593.

CONSVTY 5559B Music Since 1900: 1945 to the Present Credits: 3

Seminar in music since 1945.

Prerequisites: CONSVTY 5593.

CONSVTY 5560A Seminar: History Of Russian Vocal Music Credits: 3**CONSVTY 5560B Seminar: Nineteenth-Century Nationalism In Music Credits: 3****CONSVTY 5560C Seminar: History Of American Music Credits: 3****CONSVTY 5560D American Musical Theater Credits: 3**

A survey of trends in the American musical theater from the 18th century to the present.

CONSVTY 5560E Music and Film Credits: 3

This course will survey the use of music in cinema. It will include sections on music, technology, the film medium and the various ways in which music adds to the cinematic experience.

Prerequisites: Graduate status.

CONSVTY 5560F Music of Asia Credits: 3

This course surveys music in East Asia, from historical styles to traditional music to contemporary composition.

Prerequisites: Graduate status.

CONSVTY 5560G Music of Latin America Credits: 3

Survey of selected musical traditions (sacred and secular, folk, traditional, and concert music) and representative composers of Central and South America.

Prerequisites: CONSVTY 5593.

CONSVTY 5564 History And Literature Of Chamber Music Credits: 3

A study of masterpieces of chamber literature, vocal and instrumental, from various periods, through research, listening, and performance.

CONSVTY 5566A Advanced Vocal Literature: French Melodies Credits: 2

In-depth study of the French melodies of Duparc, Faure, Debussy, Ravel, and Poulenc.

CONSVTY 5566B Advanced Vocal Literature: German Lieder Credits: 2

In-depth study of the German lieder of Schubert, Schumann, Brahms, Wolf, Mahler, and Strauss.

CONSVTY 5566C Advanced Vocal Literature: Nationalistic Art Songs Credits: 2

In-depth study of Nationalistic art songs of Russia, Scandinavia, Spain, and Middle Europe.

CONSVTY 5566D Advanced Vocal Literature: 20Th Century Amer & Engl Art Songs Credits: 2

In-depth study of the 20th Century American and English art songs.

CONSVTY 5569 Graduate Piano Literature Seminar Credits: 2

Advanced study of piano literature through research, analysis and performance. Topics will vary from semester to semester.

CONSVTY 5574 Contemporary Issues in Music Education Credits: 3

This course guides graduate students in exploration of philosophical and social/historical frameworks as a foundation for addressing opportunities and challenges as a music educator in contemporary American schools.

CONSVTY 5576 Professional Aspects Of College Teaching Credits: 2

Designed for graduate students planning a career in college teaching. Covers preparation of job application materials; presentation of a master class; interviews with a search committee and dean; faculty loads and evaluation procedures; tenure and rank, and relationships with students, colleagues and administrators.

CONSVTY 5577 Advanced Vocal Diction Credits: 2

This course is designed to review and hone diction skills in Italian, French and German on the level of professional opera, recital and oratorio performance; the vocal literature is approached through the text with both reading and singing practice, It is limited to graduate vocal majors.

CONSVTY 5578 Research for Music Teachers Credits: 3

This course examines common practitioner-based research designs used by music educators. During this class, students will learn about and complete projects that utilize rigorous research design procedures and concepts.

CONSVTY 5580 Advanced Choral Conducting-Masters Level Credit: 1

An overview of conducting topics, including score preparation technique, and performance problems. May be repeated for credit.

CONSVTY 5582A Advanced Choral Conducting - Technique Credits: 2

An introductory study of the techniques of choral conducting. An overview of conducting topics, including score preparation, rehearsal techniques and performance problems. May be repeated for credit.

CONSVTY 5582B Advanced Choral Conducting - Style Credits: 2

A study of conducting problems of music of the Renaissance, Baroque, Classic, Romantic and Twentieth century; further examination of performance problems associated with choral performances of madrigals, chamber music, a cappella works and music utilizing advanced compositional techniques. May be repeated for credit.

CONSVTY 5582C Advanced Choral Conducting-Rehearsal Techniques Credits: 2

An advanced study of methods and rehearsal procedures in the development and organization of choral performance; includes concepts of tone quality, diction, programming, and development of communication skills. May be repeated for credit.

CONSVTY 5583A Advanced Instrumental Conducting Credits: 2

An introductory study of the techniques of instrumental conducting. An overview of conducting topics, including score preparation, rehearsal techniques and performance problems.

CONSVTY 5583B Advanced Instrumental Conducting - Orchestra Credits: 2

A further study of the techniques of instrumental conducting, including such topics as string techniques, performance practice, baton technique and the art of accompaniment.

Prerequisites: CONSVTY 5583A.

CONSVTY 5583C Advanced Instrumental Conducting - Band Credits: 2

A further study of the technique of band conducting, including such topics as wind/percussion techniques, performance practice, baton technique, and contemporary wind chamber repertoire.

Prerequisites: CONSVTY 5583A.

CONSVTY 5584 Systematic and Integrated Reviews in Music Credits: 2

Maintaining an awareness of the vast array of information available in the literature and integrating it into practice is a vital skill for evidence-based and best practice in music-based professions. This course will introduce graduate students to a methodological system of analyzing and synthesizing high quality research to answer a relevant question. The pursuit of scholarly dissemination of information for the advancement of music-based professions will be encouraged.

CONSVTY 5585 Introduction to Descriptive Research in Music Credits: 3

This course examines common descriptive research designs and statistical concepts used by music therapists and music educators. During this class, students will learn about and complete projects that utilize nonparametric and parametric statistical tests.

CONSVTY 5586A Seminar In Orchestral Literature Credits: 2

Advanced study of a variety of styles, periods, and analytical procedures encountered by orchestral conductors. Content will vary from semester to semester. May be repeated for credit.

CONSVTY 5586B Seminar In Wind/Band Literature Credits: 2

Advanced study of a variety of styles, periods, and analytical procedures encountered by instrumental conductors of wind ensembles/bands. Content will vary from semester to semester. May be repeated for credit.

CONSVTY 5587 Seminar In Choral Literature Credits: 2

Each seminar is concerned with the conductor's viewpoint of a segment of the literature from the specified historical periods and styles, and explores the analysis, interpretation, historical context, and conducting problems of that literature. May be repeated for credit.

CONSVTY 5589 Academic Portfolio Credits: 1-3

Creative synthesis of coursework or clinical experience resulting in original products such as research documents, pedagogical materials, technology applications, music compositions or arrangements, and musical improvisation applications. Portfolio item may not include materials used to meet admission requirements. May be repeated for credit.

CONSVTY 5589A Academic Portfolio II Credits: 1-3

Additional coursework or clinical experience resulting in original products.

Co-requisites: CONSVTY 5589.

CONSVTY 5590 Special Topics Credits: 1-3

A seminar in selected topics in various fields and idioms of music. May be repeated for credit when the topic varies.

CONSVTY 5590AC Special Topics Credits: 1-3

CONSVTY 5590AD Special Topics Credits: 1-3

CONSVTY 5590BC Special Topics Credits: 1-3

CONSVTY 5590BJ Special Topics Credits: 1-3

CONSVTY 5590CA Special Topics Credits: 1-3

CONSVTY 5590CE Special Topics Credits: 1-3

CONSVTY 5590CF Special Topics Credits: 1-3

CONSVTY 5590CJ Special Topics Credits: 1-3

CONSVTY 5590CL Special Topics Credits: 1-3

CONSVTY 5590CT Special Topics Credits: 1-3

CONSVTY 5590CY Special Topics Credits: 1-3

CONSVTY 5590DC Special Topics Credits: 1-3

CONSVTY 5590EC Special Topics Credits: 1-3

CONSVTY 5590EP Special Topics Credits: 1-3

Special Topics

CONSVTY 5590FC Special Topics Credits: 1-3

CONSVTY 5590TT Special Topics Credits: 1-3

CONSVTY 5591E Group Piano Pedagogy Credits: 3

Study of teaching techniques and materials related to teaching group piano at the college level. Course responsibilities include both observation and supervised teaching.

CONSVTY 5591G Pedagogy of Music Theory Credits: 3

Study and application of methods, philosophies, materials and current trends in music theory pedagogy. Students engage in supervised teaching, research projects, and observations of music theory faculty.

CONSVTY 5591H Advanced Pedagogy I - Voice Credits: 2

CONSVTY 5591J Advanced Pedagogy I-General Credits: 2

An overview of basic pedagogical practice including modes of instruction, feedback, reinforcement, and assessment. Students will review current literature in this area and develop a project related to their own teaching.

CONSVTY 5591K Pedagogy of Music History Credits: 3

Techniques and materials related to teaching music history and music appreciation combined with supervised teaching.

CONSVTY 5591N Pedagogy of Instrumental Music Credit: 1

A study of the pedagogical materials and methods used in teaching applied instrumental music.

CONSVTY 5592E Advanced Piano Pedagogy Credits: 3

Study of teaching techniques and materials related to teaching applied piano at the collegiate level. Course responsibilities include both observation and supervised teaching.

CONSVTY 5592H Advanced Pedagogy II - Voice Credits: 2

CONSVTY 5593 Introduction To Research And Bibliography In Music Credits: 3

A survey of procedure in bibliography, research, and scholarly writing.

CONSVTY 5593N Introduction to Research and Bibliography in Music Credits: 3

A survey of procedures in bibliography, research, and scholarly writing.

CONSVTY 5594A Research and Analysis in Music and Behavior Credits: 3

This course provides students with an introduction to research in music and human behavior. Course topics include literature review, proposal writing, design, data analysis and scholarly writing styles used in music research.

CONSVTY 5594B Research Applications in Music and Behavior Credits: 3

Further study in the area of research in music and behavior. Data gathering procedures specific to music, research ethics in music, preparation for publishing in music journals and in-depth critiques of important literature in music education, music therapy and performance are addressed.

Prerequisite: CONSVTY 5594A

CONSVTY 5597 Master's Recital Credits: 4

For voice students, a one hour weekly participation in Vocal Performance Seminar is required.

CONSVTY 5597A Master's Conducting Performance Credits: 4

CONSVTY 5597B Master's Recital II Credits: 4

CONSVTY 5597CE Master's Recital Credits: 4

CONSVTY 5598 Research Problems Credits: 2

Individual study with a member of the graduate faculty that will culminate in a final project. The project must be completed within two consecutive semesters, submitted to and graded by the supervising professor, and submitted to the Associate Dean of Graduate Studies for archiving.

CONSVTY 5598B Research Problems In Computer Languages And Music Credits: 1-3

Individual study with a member of the adjunct, associate, or graduate faculty. Study will culminate in the production of a project (computer program, CD-ROM, composition, or other document) that demonstrates skills in computer languages specifically related to music. This course fulfills the computer language option of the foreign language for DMA students in composition.

CONSVTY 5599 Thesis Credits: 1-9

CONSVTY 5693 Advanced Research and Bibliography In Music Credits: 3

Advanced procedures in bibliography, research, and scholarly writing.

Prerequisites: CONSVTY 5593.

CONSVTY 5695 Practicum In Music Education Credits: 3-6

Individual conference course requiring the development of a research paper in a special subject and designed to resolve a practical problem of special interest to the student. Conference.

CONSVTY 5697 Doctoral Recital Credits: 4

For voice students, a one hour weekly participation in Vocal Performance Seminar is required.

CONSVTY 5697A Doctoral Lecture Recital Credits: 4

CONSVTY 5697B Doctoral Conducting Performance Credits: 1-4

CONSVTY 5697BP Doctoral Conducting Performance Paper Credit: 1

Individual study with the student's conducting teacher. Study will culminate in the writing of a formal paper addressing aspects of a doctoral conducting performance.

CONSVTY 5697C Additional Doctoral Recital Credits: 1-4

The additional doctoral recital is supervised by the applied professor. The recital is graded in the same manner as other recitals for the Performance degree and can count for one doctoral research point.

CONSVTY 5697CP Doctoral Recital Paper II Credit: 1

Additional individual study with the student's applied teacher. Study will culminate in the writing of another formal paper addressing aspects of a doctoral recital.

Co-requisites: CONSVTY 5697P.

CONSVTY 5697D Doctoral Conducting Performance II Credits: 1-4

CONSVTY 5697DP Doctoral Conducting Performance Paper Credit: 1

Additional individual study with the student's conducting teacher. Study will culminate in the writing of another formal paper addressing aspects of a doctoral conducting performance.

Co-requisites: CONSVTY 5697BP.

CONSVTY 5697P Doctoral Recital Paper Credit: 1

Individual study with the student's applied teacher. Study will culminate in the writing of a formal paper addressing aspects of a doctoral recital.

CONSVTY 5698 Research Problems Credits: 2

Individual study with a member of the adjunct, associate, graduate or doctoral faculty. Study will culminate in the writing of a scholarly paper.

CONSVTY 5698A Doctoral Research Problems II Credits: 2

Additional study with a member of the adjunct, associate, graduate or doctoral faculty. Study will culminate in the writing of another scholarly paper.

Co-requisites: CONSVTY 5698.

CONSVTY 5698B Doctoral Music Product Credits: 1-4

Individual study with a member of the adjunct, associate, graduate, or doctoral faculty. Study will culminate in the writing of a creative, original composition, arrangement or edition of music.

CONSVTY 5699 Dissertation Research Credits: 1-16

CONSVTY 5899 Required Graduate Enrollment Credit: 1

Counseling Psychology and Counselor Education (CPCE)

Courses

CPCE 5500 Introduction To Professional Counseling Credits: 3

This course introduces students to the professions of counseling and counseling psychology as practiced in a variety of settings. The course provides and overview of basic concepts of mental health, client problems, history of the profession, ethical and professional standards, counseling in a multicultural and pluralistic society, and licensure and credentialing. The course also orients students to the counseling program at UMKC. May be taken prior to admission.

CPCE 5502 Fndtns Of Elementary & Secondary School Counseling & Guidance Credits: 3

The course will present an overview of theory and practice in the field of school counseling and will examine the roles and functions of guidance counselors. For School Counseling Emphasis only.

CPCE 5503 Psychopathology: Diagnoses And Classification Credits: 3

This course is designed to provide students with an opportunity to study psychopathological patterns, mental disorders, and other reactions in client behavior, which are encountered by therapists, counselors, and psychologists in contemporary psychological service systems. The major focus of the course will be on learning current diagnostic criteria and making differential diagnoses. Attention will also be given to the etiology, development, dynamics, and treatment of psychopathology. In addition, the influence of culture on behavior and treatment will be discussed.

Prerequisites: CPCE 5500.

CPCE 5504 School Counseling Programs Credits: 3

This course will provide knowledge and skills in the development and management of school guidance programs, including program planning, implementing and evaluation.

CPCE 5505 Career Development I Credits: 3

Theories of career development and vocational choice and their implications in counseling. Emphasizes knowledge of occupational and career information sources and use of these data by counselors and counseling psychologists. Open to any student who has been admitted to an advanced degree program.

CPCE 5515 Assessment Methods In Professional Counseling Credits: 3

This course provides an understanding of assessment process and assessment techniques. Students will develop skills in selection, administration, and interpretation of representative assessment instruments.

Prerequisites: CPCE 5500.

CPCE 5520 Theories of Counseling Credits: 3

Theoretical positions in counseling; significance of these theories in professional practice. To be taken prior to CPCE 5531.

Co-requisites: CPCE 5500, CPCE 5530.

CPCE 5521 Special Counseling Methods - Substance Abuse Credits: 3

Theories and methods of counseling as applied to clients with substance abuse problems. Includes assessment, treatment strategies, and evaluation. Skills practice in implementing methods.

CPCE 5523 Counseling the Older Adult Credits: 3

This course provides an overview of the basic biological, psychological and social aspects of later life as preparation for counseling the diverse older adult population. Current evidence-based theory related to this specific population is presented along with refinement of interpersonal and counseling skills to support counseling intervention with older adults and their families in the multiple contexts they are served. Best practice examples for meeting the needs and providing mental health services to older adults are reviewed.

CPCE 5527 Theory And Methods Of Sexual Counseling Credits: 3

The focus of this course is on sexual development and the acquisition of therapeutic skills to work with problems relating to human sexual functioning and sexual dysfunctions.

Co-requisites: CPCE 5520.

CPCE 5528 Introduction to Play Therapy Credits: 3

Course covers the philosophy and rationale for using play media in counseling with children and the history of play therapy. The client-centered theoretical approach will be examined with an emphasis on creating and maintaining a relationship with the child that allows for the effective use of play media.

CPCE 5530 Methods Of Counseling Credits: 3

This course is designed to introduce students to the fundamental concepts and methods of counseling. Students will apply ethical and multicultural principles to the helping relationship while learning the basic methods of humanistic, psychodynamic, and cognitive behavioral approaches as they relate to the helping process. A main focus of this course is the acquisition of basic helping skills. Students will also become familiar with counseling outcome research and will increase their level of counselor self-awareness.

Prerequisites: CPCE 5520.

CPCE 5531 Counseling Practicum I Credits: 3

Closely supervised therapeutic counseling with individuals; translation of theory into practice; clinical and professional techniques and issues.

Prerequisites: CPCE 5553.

CPCE 5532 Counseling Practicum II Credits: 3

Supervised therapeutic counseling with individuals and consultation in professional settings.

Prerequisites: CPCE 5531.

CPCE 5533 Couples And Family Therapy Practicum Credits: 3-6

Supervised application of theories and methods of family therapy with individuals, couples and families.

Prerequisites: CPCE 5532 and CPCE 5542.

Co-requisites: CPCE 5541.

CPCE 5534 Practicum For The Assessment Of Children And Adolescents Credits: 3

The practicum for the assessment of children and adolescents covers the facilitation of psychological evaluations for this population and includes maintaining a caseload of assessment evaluations to complete through the CCS Assessment Center. Specialized assessment evaluations and conceptualization issues are covered in the second half of the course, with evaluations for ADHD and other learning disorders emphasized. Special topics will be discussed at the end of the course.

Prerequisites: CPCE 5515.

CPCE 5539 Continuing Counseling Practicum Credits: 1-6

Supervised therapeutic counseling with individuals.

Prerequisites: CPCE 5532.

CPCE 5540 Theories And Methods In Group Counseling Credits: 3

Theories and research in group counseling, including knowledge and skills in establishing and maintaining a counseling group; effective group leadership; therapeutic factors in groups; strategies for group development; and ethical and multicultural considerations in group work. Requires participation in a professional growth group.

Prerequisites: CPCE 5530.

CPCE 5541 Couples And Family Therapy Credits: 3

Introduction to family relationships and the application of life cycle stages to working with couples and families. Focus also includes the study of a range of family configurations and issues with attention to diversity.

CPCE 5542 Theories and Techniques of Family Systems Therapy Credits: 3

A study of major family systems theories and their applied practices in family therapy. Students will develop skills in family assessment techniques and family therapy processes.

Prerequisites: CPCE 5530.

CPCE 5547 Psychology of Stress and Trauma Credits: 3

This course is designed to introduce students to the psychology of stress and trauma. Students will learn about the effects of stress and trauma, as well as counseling interventions that address the effects of stress and trauma. Specifically, students will learn about vicarious trauma, the psychophysiology of stress and trauma, diagnostic and assessment-related issues with stress and trauma, therapeutic approaches to working with trauma survivors, multicultural and social justice considerations, and trauma therapy as applied to specific populations.

Prerequisites: Admission to a degree program in the Counseling and Educational Psychology (CEP) division at UMKC, or if from a program outside of CEP, approval from the course instructor.

CPCE 5550 Organization And Administration Of Counseling Programs Credits: 3

Organization, administration, and planning of counseling programs with emphasis on their practical aspect; counseling practice in schools and agencies; intraprofessional relationships; legal and ethical considerations. Course to be taken near completion of the master's program.

CPCE 5551 Counseling in a Pluralistic Society Credits: 3

Addresses the needs of diverse populations served by counselors and addresses developing intervention methods of working with these populations. Focuses on advocacy and change agent roles of counselors.

Prerequisites: CPCE 5520.

CPCE 5553 Ethics And Professional Issues In Counseling Credits: 3

This course is designed to examine the major ethical and professional issues within the counseling profession. More specific, ethical dilemmas and professional issues relevant to the practice of mental health, marriage and family, school and substance abuse counseling are the major foci of this course. In addition, instruction is designed to enhance student understanding of the ethical standards such that students can effectively apply the critical thinking necessary to practice ethical behavior with clients, professional colleagues, consultees, and the communities in which they work.

CPCE 5575A Internship In Counseling I Credits: 3-16

First semester of a sequence of applied experiences in a planned, supervised program. Seminar accompanies internship experiences. The following areas of specialization are available: a) Marriage and Family, b) Mental Health, c) School, and d) Substance Abuse.

Prerequisites: CPCE 5532.

CPCE 5575B Internship In Counseling II Credits: 3-16

Second semester of a sequence of applied experiences in a planned, supervised program. Seminar accompanies internship experiences. The following areas of specialization are available: a) Marriage and Family, b) Mental Health, c) School, and d) Substance Abuse.

Prerequisites: Admission to Educational Specialist program in counseling, CPCE 5575A.

CPCE 5575C Internship In Counseling III Credits: 3-16

Third semester of a sequence of applied experiences in a planned, supervised program. Seminar accompanies internship experiences. The following areas of specialization are available: a) Marriage and Family, b) Mental Health, c) School, and d) Substance Abuse.

Prerequisites: Admission to Educational Specialist program in counseling.

CPCE 5589 Special Topics Credits: 1-6

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed in the semester bulletin.

CPCE 5589CA Special Topics Credits: 1-6**CPCE 5589GC Special Topics Credits: 3****CPCE 5589NP Special Topics Credits: 1-6****CPCE 5589PL Special Topics Credits: 1-6****CPCE 5589SE Special Topics Credits: 1-6**

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed in the semester schedule.

CPCE 5590 Prevention, Consultation, and Program Evaluation in Community Settings Credits: 3

Course provides an overview of mental health consultation and collaboration in community settings. Models and theories of consultation and considerations for ethical practice in diverse settings are reviewed. The course also introduces prevention and program development and evaluation as roles for professional counselors. The course will briefly review the history of prevention, and allow students to develop a prevention program for a population of interest.

Prerequisites: CPCE 5532 or CPCE 5533.

CPCE 5598 Individual Studies Credits: 1-6

Review of the research and trends relative to selected problems.

CPCE 5599 Research And Thesis Credits: 1-9

Research and Thesis

CPCE 5600 Introduction To Counseling Psychology Credit: 1

This course is intended to assist new doctoral students in their orientation to UMKC and to the profession of Counseling Psychology. The course also introduces students to the ethical principles and code of conduct for psychologists.

CPCE 5605 Career Development II Credits: 3

Major theories and research in vocational psychology and career development and implications for the work of the counseling psychologist and counselor.

Prerequisites: CPCE 5505.

CPCE 5609 Assessment II: Intellectual And Cognitive Assessment Credits: 3

This course is designed to provide students with a foundation in the use of intellectual and cognitive assessment instruments in clinical evaluation. The course covers theoretical issues pertinent to intellectual and cognitive assessment as well as basic assessment skills including administration, scoring, interpretation, and communication of results for commonly used measures.

Prerequisites: Admission to the Ph.D Program in Counseling Psychology.

CPCE 5610 Theoretical And Professional Issues In Counseling Psychology Credits: 3

This course is designed to introduce first year doctoral students to the fundamental concepts and methods of psychology conceived as the application of scientific and ethical reasoning to human problems. It will provide an in-depth examination of the American Psychological Association code of ethics and its application to the conduct of psychologists. Critical and analytical thinking will be emphasized in all aspects of the course. The course will cover broad models of clinical and counseling psychology and their historical and scientific foundations, issues in diagnosis, cross-cultural applications and professional problems in light of ethical principles, professional standards, scientific data multi-cultural contexts.

CPCE 5611 Objective Personality Assessment Credits: 3

This course is designed to help students develop knowledge and skills related to the selection, administration, and interpretation of some representative objective personality assessment instruments used in counseling/clinical settings. Students will also learn to integrate data obtained from an assessment battery to write comprehensive psychological reports.

CPCE 5615 Survey Of Research In Counseling Psychology Credits: 3

Survey of significant research in counseling psychology. Critical evaluation of research procedures, instrumentation, and clinical application of results.

Prerequisites: EDUC-R&P 5605 and EDUC-R&P 5608.

CPCE 5620 Advanced Theories And Methods Of Counseling Credits: 3

Personality and learning theories and their implications for professional practice in counseling psychology. Emphasis on critical evaluation of assumptions, methods, comprehensiveness and usefulness of the theories, with reference to related research.

Prerequisites: CPCE 5532.

CPCE 5631 Advanced Counseling Practicum Credits: 3

Advanced supervised therapeutic counseling with individuals and supervised consultation in clinical settings.

Prerequisites: CPCE 5532.

CPCE 5632 Practicum In Group Counseling Credits: 3

Leading groups under supervision. Focus on problems and experiences of counselors and counseling psychologists when leading groups.

Prerequisites: M.A. in Counseling, CPCE 5540.

CPCE 5633 Advanced Couples & Family Practicum Credits: 3

Advanced supervised application of theories and methods of family therapy with individuals, couples and families.

Prerequisites: CPCE 5542.

CPCE 5634 Assessment Practicum Credits: 3

The practicum for assessment of children, adolescents, and adults covers the administration of psychological evaluations and includes maintaining a caseload of assessment evaluations. Specialized assessment evaluations and conceptualization issues as well as special topics are covered, with evaluations for ADHD and learning disorders emphasized.

Prerequisites: CPCE 5611, 5609, 5531, 5532.

CPCE 5639 Continuing Advanced Counseling Practicum Credits: 1-6

Supervised therapeutic counseling with individuals, beyond the advanced level.

Prerequisites: CPCE 5631.

CPCE 5640 Theories And Methods Of Counseling Supervision Credits: 2

This course offers an overview of counseling supervision theories and models, and contemporary research. It also addresses supervision process and tasks, diversity in supervision, and supervisor's ethical and legal responsibilities.

Prerequisites: CPCE 5631.

CPCE 5641 Supervision Practicum Credit: 1

This course is designed to provide students with an opportunity to practice supervision. Students will be assigned 2 to 3 counselors-in-training from a CPCE 5531 and CPCE 5532 practicum class to supervise over the course of a semester. The practicum instructor will provide weekly supervision.

Prerequisites: CPCE 5640.

CPCE 5645 Projective Testing Credits: 3

Course focuses on the diagnostic use of projective assessment techniques, with a special focus on the Rorschach Inkblot Test.

Prerequisites: CPCE 5515, Enrolled in Doctoral Psych. Program, and Measurement of Intelligence or Cognitive Assessment course.

CPCE 5650 Prevention and Consultation in Counseling Psychology Credits: 3

An overview of the psychologist's role in consultation, program development and evaluation in the context of prevention. Students will also apply their knowledge and develop skills in prevention and consultation by developing a prevention program for a real-life setting.

CPCE 5675 Internship In Counseling Psychology Credits: 1-16

Applied experiences in a professional setting under supervision of licensed psychologists.

CPCE 5690 Special Problems Credits: 1-6

Individual studies; thesis exploration; special reading.

CPCE 5699 Research And Dissertation Credits: 1-16
Research and Dissertation.

Criminal Justice and Criminology (CJC)

Courses

CJC 5500 Sociology Of Law Credits: 3

A sociological study of the legal system with focus on organizational analyses of the legal profession, courts as a social system, the bureaucratization of the legal process, stratification and the allocation of legal services and careers.

CJC 5511 Sociological Methods II Credits: 3

Quantitative research is the primary focus of the course; emphasis is placed on problem formulation; research design; sampling procedures, questionnaire construction and interviewing techniques; data collection; problems of scaling, computer statistical programs; linking appropriate statistical analyses with data analysis; and report writing.

Prerequisites: CJC 483.

CJC 5515 Qualitative Research Methods in Criminal Justice Credits: 3

This course focuses on qualitative research methods, such as interviewing techniques, focus groups, content analysis, and field observation. Emphasis is placed on research design, data collection, and data analysis.

Prerequisites: CJC 483.

CJC 5516 Intermediate Statistics Credits: 3

A systematic development of the logic and practice of selected statistical methods used in sociological research. Included are analysis of variance and covariance, regression analysis, multiple contingency, and non-parametric tests.

Prerequisites: CJC 363.

CJC 5518 Advanced Criminological Theory Credits: 3

This course provides an understanding of past as well as present criminological theories by examining each criminological tradition (beginning in the 18th century and continuing into the present.) The primary aim of the course is to determine the root causes of deviant and criminal behaviors. Moreover, this course offers special attention to how society has historically reacted and responded to crime and deviant behavior. Furthermore, by examining crime and deviant behavior from a historical context, the students are able to determine how criminological theories have influenced public policies designed to reduce and control criminal behavior. In the final analysis, students will examine the rationales that society use to justify efforts toward punishment and treatment.

Prerequisites: CJC 319.

CJC 5520 Juvenile Justice Credits: 3

This course provides a historical and contemporary overview of the juvenile justice system via a critical examination of the function of this system and theories explaining delinquency in adolescence. We will explore special topics within juvenile justice and proposals for juvenile justice reform.

CJC 5551 Seminar In Policing Credits: 3

This course addresses the important topics related to the institution of policing. Through readings and class discussions, students will gain a better understanding of both historical aspects of policing as well as the future of policing. Topics include selection, training and socialization, police management, deviance and corruption, use of force, community oriented policing.

CJC 5565 Seminar In Crime Prevention Credits: 3

This seminar examines variations in methods to reduce crime in America, including strategies from the criminal justice system as well as other institutions. Building on established criminological theory, this seminar will evaluate the best practices to prevent crime across a variety of social contexts.

CJC 5570 Contemporary Corrections And Correctional Policy Credits: 3

Present-day correctional alternatives are considered regarding the correctional policy that is, or potentially can be, carried out within the various programs. Prisons, probation, parole community-based programs are evaluated as to the theory of punishment demonstrated within these programs. Emphasis is placed on what constitutes a rational and workable corrections policy and the form of correctional programs needed to realize such policy.

CJC 5575 Correctional Rehabilitation And Treatment Credits: 3

This course will begin with a thorough examination of the rise, fall, and recent resurrection of "rehabilitation and treatment" in American correctional strategies. Both past and current treatment strategies will be studied regarding their effectiveness in reducing recidivism. This will be done through a survey of the quantitative literature base. There will be some emphasis on treating special needs offenders (e.g., sex offenders, juvenile offenders, offenders with developmental disabilities or mental illnesses.)

CJC 5576 Seminar In Criminal Justice And Criminology Issues Credits: 3

This course is an advanced exploration of the relationship between the criminal justice system and criminal behavior from at least one of the following perspectives: psychological, sociological, economic, legal, political or administration/ management. Will include discussions and analysis of contemporary readings and on-going research in the selected perspective.

CJC 5580 Seminar: Policy And Decision Making In Criminal Justice Credits: 3

The focus of the course is assessment of the character and recent crime trends in the United States, with attention to identifying elements that shape justice system policies in response to crime. Consideration is given to the nature and scope of policy and decision-making processes in legal institutions and law enforcement bureaucracies, how such policies have impacted crime, and alternative policies address the problem of crime.

CJC 5590 Directed Studies In Criminal Justice And Criminology Credits: 1-3

Individual research and study in the student's field of interest as approved and directed by major professors. The work involves examination and reporting of selected problems affecting the various agencies of our legal system. A. Law Enforcement B. Court Operations and Administration C. Corrections D. Legal Theory and Philosophy E. Criminological Theory F. Sociology of Law.

CJC 5592 Advanced GIS For Crime Analysis Credits: 3

This course provides an overview of crime mapping as it relates to the spatial and temporal analysis of crime. Utilizing theory related to criminal offending, this course will provide students with hands-on experience in geographic profiling and crime prevention strategies.

Prerequisites: GEOG 203.

CJC 5595 Crime Analysis Internship Credits: 3

This experience involves working with crime analysts in the field. Students will learn and hone practical skills while being supervised by department faculty or staff.

Prerequisites: CJC 5592.

CJC 5599 Research And Thesis Credits: 1-6

Directed specialized research. Before writing a thesis, the student must clear the topic and research design with the Supervisory Committee.

CJC 5699 Dissertation Research Credits: 1-12

Individual directed research leading to preparation and completion of doctoral dissertation.

Prerequisites: Ph.D. course requirements completed.

CJC 5899 Required Graduate Enrollment Credit: 1

Curriculum and Instruction (EDUC-C&I)

Courses

EDUC-C&I 5504 Social Studies In the Schools Credits: 3

Trends and curricular developments in social studies. Focus on the development of social studies concepts, the development of critical thinking skills, and analysis of values.

EDUC-C&I 5505 Introduction To Curriculum Theory Credits: 3

An introduction to curriculum theory with the recognition that knowledge, power, ideology and schooling are connected to patterns of complexity and contradictions. Emphasis will be placed on curricula that cultivate theoretical discourses about the quality and purpose of schooling and human life.

EDUC-C&I 5506 Curriculum Design Credits: 3

This course is designed to enhance educators' skills in the areas of curriculum design and interpretation. Students will apply and adapt strategies for curriculum development as well as for interpreting and adapting existing curricula.

EDUC-C&I 5508 Curriculum And Methods For Teaching The Non-Motivated Learner Credits: 3

Analysis of materials relevant to reluctant learners; student-teacher prepared consumable materials; current research; methods for presenting material.

EDUC-C&I 5509 Reducing Risk Factors For Students In Educational & Community Stn Credits: 3

The course offers an overview of current research and of special programs that deal with students who are likely to fail at school or in life. The roles of the larger society in helping create such problems will be considered. There will be an emphasis on early identification of such students and a consideration and evaluation of a number of programs designed to help them. The course will also present descriptions of the roles that educators can implement in programs designed for prevention and intervention.

EDUC-C&I 5510 Differentiating Instruction Through Teaching/Learning Styles Credits: 3

Teaching practices based upon teaching/learning styles are explored and modeled. Through differentiated instruction students learn to use style preferences to meet the needs of learners in a typical classroom including the culturally diverse, at-risk, the remedial, the learning disabled, the gifted, and the special needs students. Differentiation emphasizes learning centers, self-selection, self-pacing, subgrouping, contracting and peer tutoring. (K-12).

EDUC-C&I 5511 Developing Multidisciplinary Problem Solving Skills Credits: 3

Development of heuristic strategies in problem analysis, information processing, modeling and logical thinking. Study of methods and materials for teaching problem solving strategies, with applications from several school curriculum areas and instructional settings. Use of microcomputers to develop skills.

EDUC-C&I 5512 Strategies For Effective Classroom Management Credits: 3

The course presents several current approaches to classroom management and how they might be applied to the classroom. The approaches are evaluated in terms of psychological theory and research. Direct experiences with discipline problems are offered through simulation and role-playing.

EDUC-C&I 5513 Effective Communication In The Classroom Credits: 3

This course will emphasize the relationship between communication and classroom climate, and the influence of communication on motivation and student behavior. Communication with large groups, small groups, and individuals is studied and practiced.

EDUC-C&I 5514 Overview of Culturally Responsive Pedagogy Credits: 3

An introduction to ways of thinking about the relationship among teaching, learning, learner characteristics and experiences, and learning outcomes for traditionally underserved students. Particular attention will be given to a framework for understanding the meaning of culture in framing the curriculum and engaging students in meaningful learning experiences and tasks. A practice-based approach to improving learning for traditionally underserved students will be employed. Each participant will be required to participate in and facilitate discussion, develop a personal inventory, and conduct a historical analysis of her/his school and its relation to the community.

EDUC-C&I 5515 Integrated Arts As A Model For Classroom Instruction Credits: 3

This course provides background on theory, research and practice in arts education. Students will learn to integrate the arts across the curriculum and explore the value of the arts as conveyors of information, powerful tools of communication and bridges to the broader culture. This course will also give the students the opportunity to create, study and experience the arts as a model for classroom instruction.

EDUC-C&I 5516 Understanding the Crisis in Urban Schools Credits: 3

The participants in this course will develop deep knowledge of practices related to long-term and persistent challenges in urban schools. Participants will examine well-documented accounts of conditions and situations within and outside that influence the culture and learning outcomes in high performing and low performing urban schools. These accounts will represent multiple perspectives including those of teachers, administrators, students, parents, and other stakeholders. The insights gained from the documented accounts examined in this course will be used to conceptualize new context-specific approaches and frameworks for improving practices, policies, and learning outcomes in urban schools

EDUC-C&I 5517 Teaching Methods And Practices Credits: 3

This course is designed to present and evaluate basic instructional methods and techniques and to determine the ways in which instruction is affected by the social and cultural context of the school.

EDUC-C&I 5518 Assessment of Diverse Learners, Engagement and Motivation Credits: 3

A framework for assessing diverse learners and implementing culturally responsive pedagogy, leading to increased learner engagement and motivation. An overview of the purposes of assessments, how assessment measures are aligned to the principles of culturally responsive pedagogy, and implications for overall learner academic, personal and social growth. Finally, specific strategies for building engagement and motivation, particularly for learners living in poverty and those from ethnically diverse backgrounds are provided.

EDUC-C&I 5519 Discipline Specific Pedagogy for Diverse Learners Credits: 3

An introduction to the use of research-based, discipline specific pedagogy for traditionally under served students in core subject areas of reading, mathematics, science and social studies. Additionally, participants examine the philosophy and theoretical perspectives that support different pedagogical approaches and the social context for learning in classrooms with diverse students.

EDUC-C&I 5520 English Curriculum In The Middle And High School Credits: 3

Advanced study of contemporary programs and procedures in specialized sectors of the secondary school curriculum. Examination of program objectives, teaching methods, and instructional materials in English.

Prerequisites: valid regular teaching certificate, undergraduate special methods or equivalent, teaching experience.

EDUC-C&I 5522 Language Arts Curriculum In The Elementary And Middle School Credits: 3

Consideration of language concepts as they relate to the teaching of the Language Arts in Grades K through 8. Significant research and its application to current trends in teaching the language arts will be explored.

Prerequisites: an undergraduate course in Language Arts or reading.

EDUC-C&I 5523 Advanced Literature For Children Credits: 3

This course emphasizes the critical analysis and selection of a variety of genres of multicultural children's print, digital, and online literature in order to create "windows and mirrors" (Bishop, 1990) through literature for diverse educational settings. It will emphasize using literature with culturally and linguistically diverse groups of students, explicitly modeling literacy skills and teaching literacy strategies, and exploring prevalent myths and stereotypes in society that are often reflected in children's and young adult literature.

EDUC-C&I 5524 Advanced Methods of Teaching English Language Arts for Grades 5-9 Credits: 3

Students will study research-based, developmentally appropriate pedagogies for teaching English Language Arts in grades 5-9. Course will foreground processes of analytic inquiry and cycles of planning, enacting, interpreting and translating learning experiences to meet the needs of all students. Topics will include methods of teaching reading, literature, writing, language study, speaking/listening, research skills, as well as technology integration.

EDUC-C&I 5525 The Craft of Writing Credits: 3

Students will learn inquiry-based pedagogies for teaching writing in grades 5-9. The course will address the role of the ELA teacher as lead writer in the classroom, and students will develop their own writing process and practice across a range of genres. Students will learn how to create a classroom community of writers through a variety of evidence-based frameworks and practical strategies for effective writing instruction. Topics will address processes of conferencing for instruction, feedback and evaluation supported by current research. Students also will learn effective methods for embedding meaningful stylistic and mechanical instruction to support writer/writing development.

EDUC-C&I 5526 The Craft of Reading Credits: 3

Students will examine inquiry-based pedagogies for teaching reading in grades 5-9. The course will address the role of the ELA teacher as lead reader in the classroom, and students will examine their own reading process and strategies through a variety of interpretive and analytic approaches supported by current research, including reader response and close reading. Topics will address evidence-based frameworks for effective reading instruction, comprehension strategies of diverse readers, and methods of reading assessment, data analysis and reflective practice.

EDUC-C&I 5528 Teaching Nonfiction Texts for Grades 5-9 Credits: 3

Students will gain an understanding of pedagogies for teaching both the craft and criticism of nonfiction texts. Emphasis will be placed upon integration of nonfiction via thematic pairing with existing texts. Topics will include analysis and application of text structures, text features, rhetorical strategies and literary devices, as well as deconstruction and interrogation of state and national standards relating to the teaching of nonfiction texts.

EDUC-C&I 5531 Mathematics Learning Difficulties: Identification and Intervention Credits: 3

Designed for inservice and preservice teachers to explore the interrelation of mathematics concepts and instructional strategies to enhance the mathematical learning of students who underachieve in mathematics and/or struggle with mathematics.

Prerequisites: Any mathematics teaching methods course.

EDUC-C&I 5536 Specialized Secondary School Curriculum Mathematics Credits: 3

Advanced study of contemporary programs and procedures in specialized sectors of the secondary school curriculum. Examinations of program objectives, teaching methods and instructional materials in Mathematics.

Prerequisites: valid regular teaching certificate, undergraduate Special Methods or equivalent, teaching experience.

EDUC-C&I 5539 Mathematics Curriculum Development Credits: 3

Application of principles of curriculum development to the mathematics content and instructions. Development of a rationale for objectives and content selection and for evaluation. Study and evaluation of current programs, trends and experiments.

EDUC-C&I 5540 Evaluation Of Computer Software Credits: 3

The goals of the course are to provide students with a systematic evaluation process which analyzes the hardware resources and application needs of various user groups. This course provides the student with both an academic understanding of evaluation and requirement analysis for educational user groups. The course includes a practicum activity for application projects.

EDUC-C&I 5541 Teaching Mathematics With Computer Credits: 3

The use of a variety of technologies and the appropriate software in teaching secondary mathematics will be investigated and the resulting impact on curriculum will be covered.

Prerequisites: Mathematics teaching certificate or the equivalent of an undergraduate degree in mathematics.

EDUC-C&I 5542 Methods of Teaching English as a Second Language Credits: 3

This course covers the historical and current approaches, methods, and techniques of teaching English to speakers of other languages, from grammar translation to audiolingual and communicative approaches. Additionally, successful classroom practices that address the needs of culturally and linguistically diverse students will be presented.

EDUC-C&I 5543 English Grammar for ESOL Teachers Credits: 3

This course is about teaching English grammar and methods of teaching grammar for graduates, prospective and current teachers of English to speakers of other languages. It includes analysis of the major grammatical structures of American English, discussion of the role of teaching grammar, effective classroom methods and techniques for the English as a second/foreign language classroom.

EDUC-C&I 5544 Theory and Research in Second Language Teaching and Learning Credits: 3

This course covers both second language learning theories and second language research and design. It will also contain a survey of both qualitative and quantitative research literature.

EDUC-C&I 5545 Linguistics for ESOL Teachers Credits: 3

This course is an introduction to linguistic theories focusing on topics that are particularly relevant to ESOL teachers in culturally and linguistically diverse settings. It also covers applying these theories to practice in ESOL classrooms. The contents include basic practical knowledge in phonetics, phonology, morphology, syntax, pragmatics and semantics.

EDUC-C&I 5546 Intercultural communication Credits: 3

This course serves as an introduction to the background of English language learners (ELL) from many countries of the world. It also serves to facilitate ESOL students' success in ELL and mainstream classrooms. The course will introduce culture in general at first and then focus on how to better understand the ELL students' cultures. Class participants will learn to develop lessons that enhance intercultural communication and understanding among all students.

EDUC-C&I 5547 Second Language Acquisition Credits: 3

The course focuses on the foundations of second language learning and teaching. Major theoretical approaches to second language acquisition and second language learning will be discussed. The course is also one of the requirements for an endorsement to teach in English as a second language classroom.

EDUC-C&I 5548 English As A Second Language In Content Areas Credits: 3

Theoretical perspectives of teaching, learning and researching literacy development. The focus of this course will be on content based English as a second language instruction. The course is one of the requirements for an endorsement to teach in an English as a second language classroom.

EDUC-C&I 5549 Practicum In English As A Second Language Credits: 3

A four-week practicum for teachers and researchers in the field of second language learning and teaching. Students will have the opportunity to develop their own teaching plan of action according to the curriculum guidelines of the program in which they participate. Students will develop a portfolio and reflection piece about their own learning in the practicum.

EDUC-C&I 5551 Science Curriculum In The Middle And High School Credits: 3

Advanced study of contemporary programs and procedures in specialized sectors of the secondary school curriculum. Examination of program objectives, teaching methods and instructional materials in Natural Sciences.

Prerequisites: valid regular teaching certificate, undergraduate special methods or equivalent, teaching experience.

EDUC-C&I 5553 Curriculum And Instruction In Science Credits: 3

Advanced study of contemporary programs and practices in science education at all instructional levels. Examination of program objectives and teaching methods and development of instructional materials for classroom use.

Prerequisites: A science teaching methods course and teaching experience.

EDUC-C&I 5554 Assessment In Science Education Credits: 3

Advanced study of science education assessment with option for elementary or secondary emphasis.

EDUC-C&I 5560 Teaching And Learning In The Urban Classroom Credits: 3

Emphasis will be placed on examining cultural beliefs, assumptions, values and their influence on the processes of teaching, perception of the urban learner, understanding the characteristics of the urban learner, and transforming pedagogical practices.

Prerequisites: EDUC-UL 5525 MA Multic Ed Students Only with 15 Prog Credit hours

EDUC-C&I 5561 Teaching Diverse Populations In Today's Classrooms Credits: 3

This course focuses on culturally responsive pedagogies for meeting the academic needs and learning styles of culturally diverse students. Emphasis will be placed on critical investigation of the role of socio-cultural dynamics on learning and teaching, and design of curriculum, materials, and pedagogical and disciplinary practices that affirm student's culture. The ultimate goal of the course is to examine ways in which a culture-based curricular perspective provides powerful scaffolding for enabling and empowering educational experiences for diverse students.

Prerequisites: EDUC-UL 5525, EDUC-UL 5526, EDUC-UL 5527, or EDUC-UL 5528.

EDUC-C&I 5562 Teaching For Equity And Social Justice Credits: 3

This course examines a systems approach to the design, development, assessment, and implementation of school practices that support equity and social justice for all students. It investigates issues of educational inequities and educational empowerment. Practitioners will develop the knowledge, skills and dispositions needed for empowering self and students. Emphasis will be placed on social action learning, empowerment and agency.

Prerequisites: EDUC-UL 5525, EDUC-UL 5526, or EDUC-UL 5528 and EDUC-C&I 5560 or EDUC-C&I 5561 or EDUC-C&I 5562.

EDUC-C&I 5563 Multicultural Perspectives In Education Credits: 3

This course provides an opportunity for students to engage in a critical and in-depth study of multicultural education. Students will examine current theoretical, conceptual, ideological, and political positions that help frame the multicultural education debate. The ultimate goal of the course is to help students develop critical and multiple perspectives about education in a democratic society with the aim of transforming curricular and pedagogical practice.

Prerequisites: EDUC-UL 5525, EDUC-UL 5526, EDUC-UL 5527 or EDUC-UL 5528 and EDUC-C&I 5560 or EDUC-C&I 5561.

EDUC-C&I 5565 Social Studies Curriculum Elementary Education Credits: 3

Trends and new curricular developments in elementary school social studies. Focus on integration of social science concepts, the development of critical thinking skills, and analysis of values.

EDUC-C&I 5566 Social Studies Curriculum In The Middle And High School Credits: 3

Advanced study of contemporary programs and procedures in specialized sectors of the secondary school curriculum. Examinations of program objectives, teaching methods, and instructional materials in Social Studies.

Prerequisites: valid regular teaching certificate, undergraduate special methods or equivalent, teaching experience.

EDUC-C&I 5570 Curriculum And Instruction In Technology Credits: 3

Study of contemporary programs and practices of technology usage in education at all instructional levels. Examination and application of technologically enhanced teaching methods, assessment, and curriculum development for classroom use.

EDUC-C&I 5571 Cognition & Technology Credits: 3

The purpose of this course is to respond to current research in the field of cognition and educational technology and design an evaluative research response to a local technology program. The educators will define the concepts concerning implementation of new technologies into learning environments and the mediational effects on the types and quality of learning that result from that process.

EDUC-C&I 5572 Assessing The Role Of Technology In Education Credits: 3

The purpose of the course is to develop an understanding of changing role of technology in education by reviewing current and historical articles on the topic. This includes a historical analysis of trends and expectations within educational settings and outside educational settings and defining the educator's understandings of the role of technology in educational settings, past, present and future.

EDUC-C&I 5573 Development Learning Tech Progs:Traditional & Non-Trad Settings Credits: 3

The purpose of this course is to develop understandings of currently implemented educational technologies including both software and hardware configurations. The educators will review current use of a variety of current technologies integrated into traditional settings and non-traditional settings and evaluate their effectiveness in developing standards-based learning outcomes and constructivist-based learning outcomes.

EDUC-C&I 5575 Internship - Early Childhood Credits: 3-16

Applied experiences in a planned, supervised curriculum program. Seminar accompanies internship experiences.

EDUC-C&I 5576 Administration Of Early Childhood Programs Credits: 3

This course is designed to examine the administrative functions and decisions involved in effectively directing an Early Childhood Program. Students may plan their own Early Childhood Program incorporating philosophical values and beliefs.

EDUC-C&I 5577 Early Childhood Special Education Methods Credits: 3

EDUC-C&I 5577 provides an overview of the field of early childhood special education, with an emphasis on inclusive education for young children ages birth-third grade. This emphasis includes methods and practices for providing services for young children with special needs and their families and the adaptation of developmentally appropriate curriculum and the classroom environment. Historical, political, and theoretical contexts are provided as framework for the course.

EDUC-C&I 5578 Play In Early Childhood Education Credits: 3

The purpose of this course is to study the various play theories and developmental levels of play. Students plan play activities and participate in Early Childhood programs.

EDUC-C&I 5579 History, Theories, And Issues In Early Childhood Education Credits: 3

This course is designed to explore the historical and theoretical principles in early childhood education. Current issues in the field will be examined and discussed.

EDUC-C&I 5580 Curriculum In Early Childhood Education Credits: 3

The content of this course will include an exploration of appropriate curriculum and instruction of early childhood classrooms. Students will recognize, understand and analyze the differences and similarities between early childhood curriculum and instruction methods and elementary education instruction.

EDUC-C&I 5581 Infant-Toddler Programs: Research Theory And Practice Credits: 3

This course is designed to investigate the research relevant to infant and toddler programs, learn about the appropriate curriculum and teaching methods, and visit infant and toddler programs.

EDUC-C&I 5582 Program Models In Early Childhood Education Credits: 3

This course is designed to explore and analyze program models in early childhood education in terms of their theoretical and/or philosophical bases and their transformation into practice. During this process, students are encouraged to evaluate their own personal views and values concerning teaching/learning issues in early childhood education.

EDUC-C&I 5583 Supervision In Early Childhood Education Credits: 3

The purpose of this course is to study the process of effective supervision of staff in the diverse contexts of early childhood education. This course is designed to prepare students to supervise teachers, staff, paraeducators, or volunteers in early childhood education programs. Students will explore theories of adult development, the supervision process, professional development, and the evaluation process.

EDUC-C&I 5584 Early Childhood Culminating Project Credits: 1-6

This seminar is designed for graduate students to explore current issues and topics pertaining to the field of early childhood education. An in-depth investigation of ways to work with community agencies will be included.

EDUC-C&I 5585 Teaching and Learning with Technology Credits: 3

This is an introductory course that covers the fundamental of standard educational computer applications in addition to providing the basic concepts regarding classroom hardware and software integration. This course familiarizes students with the National Educational Technology Standards For Teachers and Students. Because of the computer's increasing importance in all phases of education, hands-on experiences are required throughout the course.

EDUC-C&I 5586 Multimedia in Education Credits: 3

This course will introduce students to a variety of methods for creating instructional multimedia materials for K-16 classroom use, with a particular emphasis on free and web-based digital editing and conversion programs.

Prerequisites: EDUC-C&I 5585 (or TCH-ED 385).

EDUC-C&I 5587 Facilitating Technology Implementation Credits: 3

This course will prepare students to facilitate the integration of educational technology in PK-12 settings. Skills taught will include planning and implementing educational technology professional development to classroom teachers and integration strategies that increase the potential for meaningful learning.

Prerequisites: EDUC-C&I 5585 (or TCH-ED 385).

EDUC-C&I 5589 Special Topics In Education Credits: 1-6

A course designed to deal with a curriculum topic which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed on the semester bulletin.

EDUC-C&I 5589AD Special Topics in Education Credits: 1-6

A course designed to deal with a curriculum topic which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed on the semester bulletin.

EDUC-C&I 5589AM Special Topics In Education Credits: 1-6

EDUC-C&I 5589CD Special Topics In Education Credits: 1-6

EDUC-C&I 5589EG Special Topics In Education Credits: 1-6

EDUC-C&I 5589ES Special Topics Credits: 3

EDUC-C&I 5589GR Special Topics Credits: 3

EDUC-C&I 5589HR Special Topics In Education Credits: 1-6

EDUC-C&I 5589IC Special Topics In Education Credits: 1-6

EDUC-C&I 5589ME Special Topics In Education Credits: 1-6

EDUC-C&I 5589SC Special Methods Science Credits: 5

EDUC-C&I 5589SE Special Methods English Credits: 5

EDUC-C&I 5589SM Special Methods Math Credits: 5

EDUC-C&I 5589SS Special Methods Social Studies Credits: 5

EDUC-C&I 5589TL Special Topics In Education Credits: 1-6

Special Topics In Education

EDUC-C&I 5589TM Special Topics In Education Credits: 1-6

A course designed to deal with a curriculum topic which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed on the semester bulletin.

EDUC-C&I 5589UC Sepcial Topics in Education Credits: 1-6

EDUC-C&I 5590 Seminar Credits: 3

Discussion and evaluation of literature in curriculum.

Prerequisites: EDUC-C&I 5505.

EDUC-C&I 5591 Curriculum & Instruction For The 21St Century Credits: 3

A seminar including critical examination of current issues affecting schools such as education for democracy and global interdependence in a diversified society, curriculum and instruction in a technological, post-industrial society; the changing demographics of the U.S. and the implications for curriculum and instruction; and the roles of teachers and administrators in the school of the future. Students will be actively involved in "research-in-action" study of both theory and practice.

EDUC-C&I 5595 Action Research For Practitioners Credits: 3

This course comprises a guided graduate research paper experience. Course participants will work together to plan individual action research studies related to diverse, urban schooling. This course is designed to enable practitioners to engage in systematic inquiry on some aspect of their practice in order to find out more about that practice and eventually improve it. Participants in the course are expected to put their assumptions, ideas and practices to the test by gathering, analyzing and drawing conclusions from evidence. This course is to be taken during the last year of degree study. Course enrollment requires faculty advisor approval and a minimum 3.0 GPA. Participation in this course entails a field placement for research purposes. If a placement in a school is required, students will need to complete a TB test and submit fingerprints for the standard Background Check process by the start of the semester. Any costs associated with these tests are the responsibility of the student. All course participants are further required to obtain a LiveText subscription.

EDUC-C&I 5596 Classroom Assessment Credits: 3

This course is designed to help practitioners develop an understanding of the various roles of classroom assessment, strengthen their own assessment strategies be able to better use data in the development of curriculum that is appropriate for all learners. Students will develop a more clear understanding of the relationship of curriculum, instruction assessment ways in which good assessments can help diverse learners.

EDUC-C&I 5598 Individual Studies Credits: 1-6

Review of the research and trends relative to curriculum in education.

EDUC-C&I 5618 Survey Of Research In Curriculum Credits: 3

Review and analysis of research in curriculum theory and methods.

EDUC-C&I 5619 Systemic Curriculum Evaluation and Review Credits: 3

This course focuses on current practices in systemic curriculum review at the grade, school, district or state level in order to better serve the needs of diverse learners. Emphasis will be placed on the processes of curriculum review, curriculum change, implementation, evaluation of changes, and on-going long-range curriculum planning and review.

EDUC-C&I 5620 Seminars In Theories Related To Curriculum Credits: 3

Study of major historical developments in curriculum and their influence on contemporary models and practices.

Prerequisites: EDUC-C&I 5504 or EDUC-C&I 5505.

EDUC-C&I 5626 Seminar in Multicultural Perspectives In Education Credits: 3

This seminar provides an opportunity for student engagement in critical and in-depth study of multicultural perspectives in education. Students will examine current demographic and achievement realities and the theoretical, conceptual, ideological, and political positions that frame multicultural education. The ultimate goal is to help students develop multicultural competence, critical and multiple perspectives about education for a democratic society, and comprehensive knowledge base, skills, and dispositions for transformative intellectualism and change agency.

Prerequisites: Interdisciplinary Ph.D. Student Status.

EDUC-C&I 5640 Curriculum and Teaching for the College Classroom Credits: 3

This course provides a foundation for preparing for and engaging in instruction at the college level. The emphasis is on curriculum planning, assessment, feedback, classroom interactions, and student motivation across a wide variety of discipline areas. This course may also be counted toward course credit allocation for the Preparing Future Faculty online graduate certificate program.

EDUC-C&I 5641 Apprenticeship and Conference in College Training Credits: 2-6

This course provides a foundation for preparing for and engaging in instruction at the college level. The emphasis is on apprenticeship experience in preparing, conducting, and evaluating college teaching under direction of and in conference with supervising professors.

EDUC-C&I 5690 Special Problems Credits: 1-6

Individual studies: thesis exploration, special reading.

EDUC-C&I 5697 Dissertation Curriculum And Instruction Credits: 1-16

Dissertation Curriculum And Instruction

Decision Science and Operations Management (DSOM)

Courses

DSOM 5508 Statistical Analysis In Business Credits: 3

Data analysis and statistical inference in the context of business management. Communication of analysis and conclusions using text, numbers, and graphics is emphasized. Understanding the conceptual framework of probability and statistics as it relates to statistical tests and procedures is emphasized more than computational methods. Most of the work will be done using a computer spreadsheet. The course includes the topics of estimation, tests of hypotheses, analysis of variance, and multiple regression.

DSOM 5509 Business Analytics for Strategic Decision Making Credits: 3

Business analytics has become a key component in accomplishing strategic and operational goals. Students will become familiar with the concepts and principles of analytics. Utilizing real world cases, students will apply current analytical concepts to help solve managerial problems and support decision processes.

Prerequisites: Admission to Executive MBA Program.

DSOM 5511 Global Supply Chain and Operations Management Credits: 3

Global Supply Chain and Operations Management (SCOM) provides a holistic investigation of how businesses produce goods and offer services. Strategic approaches to planning, scheduling, and controlling cost, time, and quality are discussed. Students are exposed to the full circle of supply chain management, including demand planning, sourcing and procurement, production decisions, inventory and handling, MRP and ERP systems, Lean/JIT, quality management, CSR and sustainability. Spreadsheet models for managing operations, analyzing performance, and forecasting expectations are examined.

Prerequisites: MIS 5507

DSOM 5540 Service Operations Management Credits: 3

This course focuses on the increasing importance and role of service in our economy. Topics studied are: the role of services in an economy, the nature of services, service strategy, the service delivery system, service facility location, the service encounter, service quality, productivity and quality improvement. Methods of process analysis in service organizations, methods improvement procedures, and work measurement techniques are developed to provide the basis for analyses of processes, layouts, and job design in a service organization.

Prerequisites: DSOM 5507 or DSOM 5511.

DSOM 5543 Project Management Credits: 3

Planning and control of projects, to include network models, risk analysis, time reduction, resource scheduling, leadership, and evaluation.

DSOM 5544 Global Supply Chain and Logistics Management Credits: 3

A study of integrated global supply chain management and logistics. Topics include integrating global ERP and forecasting systems, inventory management, distribution requirements planning, supply chain management, purchasing and supplier/vendor networks, logistics, transportation networks, and E-operations. ERP systems and network optimization are studied relative to both production and service operations.

Prerequisites: DSOM 5507 or DSOM 5511.

DSOM 5545 Strategic Sourcing & Supplier Relationship Management Credits: 3

This course explores the roles of procurement and strategic sourcing as components of an overall supply chain strategy, and the impact this strategy has on the competitive success and profitability of organizations. The course will be structured into three segments: before you source, how to source, and after sourcing. Topics will include spend analysis, supplier research, market analysis, supplier evaluation, global sourcing considerations, negotiating, and supplier relationship management. The students will also gain an appreciation of the ethical, contractual, risk management, sustainability, and legal issues faced by purchasing professionals.

DSOM 5566 Supply Chain and Operations Management Credits: 3

An examination of the basic principles and strategies used to manage the production and distribution of goods and services. This course positions operations management (OM) as an important tool for achieving strategic leadership through competitive advantage, and illustrates how the managerial integration of OM functions with corporate strategy improves business processes.

Prerequisites: DSOM 5509 or equivalent; Admission to the Executive MBA program.

DSOM 5587 Special Topics Credits: 3

Special topics in decision science and operations management.

DSOM 5595 Internship Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community.

DSOM 5597 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

DSOM 5899 Required Graduate Enrollment Credit: 1

Dental Hygiene (DENT-HYG)

Courses

DENT-HYG 5500 Introduction to Educational Methodology Credits: 3

This course is designed to introduce the student to basic educational methodologies and to provide participants with a better understanding of the teaching/learning process. The course includes units on instructor/student relationships, educational approaches, educational ethics and professionalism, the scholarship of teaching and learning and curriculum theory.

DENT-HYG 5502 Foundations of Teaching Credits: 2

This course provides an introduction to the evidence-based best practices in course design for students who are preparing for a career in teaching and for those who simply wish to learn more about classroom instruction. Students will explore outcomes centered course design. Content application activities include syllabus development, writing objectives, constructing lesson plans, preparing presentations, developing course management sites, and test development.

Prerequisites: Must be a student enrolled in the MSDHE program.

DENT-HYG 5510 Student Teaching and Conference I Credits: 2-4

Student teaching experience in classroom areas as selected by the student under the direction of a supervising professor. The student develops behavioral course objectives, test and examination items, classroom presentations, and prepares student evaluations in the selected classroom teaching areas. The student may select teaching assignments in one of the developed externship student teaching programs. Conferences will be held in conjunction with the course.

Prerequisites: DENT-HYG 4040, DENT-HYG 5500.

DENT-HYG 5512 Student Teaching and Conference II Credits: 2-4

This course is designed to provide the graduate dental hygiene student with additional experience in classroom teaching. Student teaching experiences will be selected by the student under the direction of and in conference with a supervising professor.

DENT-HYG 5516 Special Issues in Higher Education for Health Professional Credits: 3

This course is designed to introduce the student to matters encountered in higher education - specific to dental hygiene education. Weekly readings, assignments, and sessions will familiarize the student in topics such as: writing resumes and CVs, motivational interviewing, accreditation, promotion and tenure, and social media.

DENT-HYG 5530 Clinical Instruction and Conference I Credits: 2-4

Students will actively participate in clinical instruction under the supervision of a dental hygiene faculty member. Topics relative to clinical teaching will be discussed in weekly seminars. Students will be encouraged to apply knowledge gained in DENT-HYG 4620 and DENT-HYG 5500 during clinical instructional experiences. Additionally the student must participate in at least 1 day of clinic per week to equal another credit hour of course work.

DENT-HYG 5532 Clinical Instruction and Conference II Credits: 2-4

This course is a continuation of DENT-HYG 5530. Under the supervision of the dental hygiene faculty, the student will continue to develop skills as a dental hygiene clinical instructor.

Prerequisites: DENT-HYG 5530.

DENT-HYG 5553 Evidence Based Decision Making in the Clinical Practice of Dental Hygiene Credits: 2-4

This course is designed for the graduate and degree completion dental hygiene student and will expand on the student's basic knowledge of the dental hygiene process of care. Utilization of evidence based decision making skills will be explored in an effort to incorporate current scientific literature, personal clinical experience and patient preferences as it relates to the delivery of comprehensive patient care. Skills taught in this course will enhance background knowledge related to the dental hygiene process of care and help to foster an attitude of critical analysis and life-long learning.

DENT-HYG 5560 Practicum in Clinical Supervision and Management Credits: 2-4

Practical experience in functioning as a Clinic Supervisor. Clinical managerial projects will be assigned according to students' interests and goals by agreement between student and instructor.

DENT-HYG 5565 Advanced Special Patient Care Practicum I Credits: 1-4

This course is designed to familiarize the student with general principles of cancer therapy and the role of the dental team in the multidisciplinary care of patients undergoing oncology treatments. Special emphasis will be placed on the treatment of the patient with head and neck cancer, and preventive and palliative dental interventions for control of the oral complications associated with all cancer therapies. Cancer prevention issues and the psychosocial and economic impact of cancer diagnosis will also be discussed.

DENT-HYG 5566 Advanced Special Patient Care Practicum II Credits: 1-4

This course will provide the graduate dental hygiene student with the opportunity to explore the relationship of an oncology dental program to medical health care facilities.

DENT-HYG 5570 Administrative Practicum Credits: 1-4

Practical experience in administration. The student selects areas of responsibility based on their goals and interests in administration. Possible areas of involvement are: recruitment, admissions, curriculum and course development, course scheduling, grant and report writing and student advising.

DENT-HYG 5575 Practicing in the Dental Hygiene Public Safety Net Credits: 3

This course is designed to increase the knowledge base of practicing dental hygienists in the area of public health dentistry, including health promotion, disease prevention, current legislation, evidence based treatment, school based portable dentistry, coalitions, treating the geriatric and disabled populations, as well as how to write and secure grant monies. In addition, the course will expose dental hygienists to a variety of public health settings in which they can practice with an Extended Care Permit (in KS) or the Dental Hygiene Designation (in MO). Information on how to apply for the permits will also be shared.

DENT-HYG 5576 Extended Care Permit (ECP) III Training Course Credits: 2

The Extended Care Permit (ECP) III Training Course is designed to prepare a registered dental hygienist to apply for the Kansas Extended Care Permit III. Hygienists with the ECP III certificate can practice under the sponsorship of a dentist in a variety of public health settings including schools and long term care facilities in Kansas.

Prerequisites: Must be a student enrolled in the MSDHE program.

DENT-HYG 5585 Portfolio Capstone Course Credit: 1

This capstone course serves as the culminating experience for students in the MS in Dental Hygiene Education (MS in DHE). During the Capstone course, students will create a coherent and cohesive body of work reflective of attainment of the competencies for their respective programs - in the form of an e-Portfolio. This course should be taken in the semester of anticipated completion/graduation of the MS In DHE program.

DENT-HYG 5590 Independent Study Credits: 1-4

Independent study of a particular topic or area of interest to the student in dental hygiene/dentistry and/or higher education.

DENT-HYG 5595 Writing in Science Credits: 1-2

This seminar course is designed to provide advanced education students in the health professions the skills necessary to write and communicate in science. Course activities and topics include: critical analysis of the literature, literature summary tables, structure and organization of documents, style and usage, drafting, revising and finishing. Participants will practice the craft of scientific writing not only as the writer but also as the reader providing correction and reorganization where appropriate. While this course examines many writing tasks, exercise culminate with the development of a research protocol or scientific article.

DENT-HYG 5599 Research And Thesis Credits: 1-6

This course is designed to support the research process from protocol development through data collection and report of results. Research committee chairperson typically serves as the course director.

Dentistry Professional (DENT)

Courses

DENT 6305 Operative Dentistry I Lecture Credit: 1

An introduction to the prevention and principles of the restorative treatment of dental caries.

DENT 6305L Operative Dentistry I Laboratory Credits: 2

Restorative procedures discussed in DENT 6305 are performed on laboratory manikins.

DENT 6306 Transitions: An Introduction to the Profession and Practice of Dentistry Credits: 0.5

This course is the first in a sequence of courses throughout the dental education curriculum designed to prepare the graduate dentist in the knowledge, skills and values of ethics, professionalism and practice management. The courses use self-assessment and strategic planning as foundations and lead the students through identification of personal and professional aspirations, and culminate in building each student's competence in dental practice management.

DENT 6307 Transitions: Introduction to the Profession & Practice of Dentistry II Credits: 0.5

This course is the second in a sequence of courses throughout the dental education curriculum designed to prepare the graduate dentist in the skills and values of professionalism, practice management and ethics. This course builds on strategic planning foundation to gain an understanding of personal financial management in the context of personal and professional goals in the field of dentistry.

DENT 6310C Patient Care I Credits: 3

This course introduces the dental student to the foundation knowledge and skills and values for the provision of oral health care. This includes infection control, cubicle set-up and breakdown, dental assisting, patient/operator positioning, patient vital signs, radiographic techniques, patient communication and basic concepts of oral health and disease. Students will assist third and fourth year students in various clinical areas after appropriate preparation, and will provide oral hygiene instruction for elementary age students.

DENT 6312 Dental Behavioral Science Credits: 1-2

An introduction to the basic principles of behavioral science as they relate to oral self-care and professional practice. Topics include basic principles of human behavior, adherence, motivational interviewing, dental fears, chronic orofacial pain, and conflict management. Students will complete an in-depth motivational case report and a communication competency exam with selected patients.

DENT 6313 Applied Biochemistry Credits: 4

This is a course geared to the biomedical foundation knowledge of dental students. The course is composed of six sections focused on clinically important topic areas each cumulating with a clinical presentation. Course content will intentionally emphasize new knowledge areas in cancer, inflammation, genetic diseases, metabolic diseases, mineralized tissues in health and disease, oral health, hormone action, and blood coagulation/wound healing.

Prerequisites: an Undergraduate Biochemistry course.

DENT 6314C Patient Care II Credits: 2

This course builds on the skills introduced in DENT 6310C with a review and the continuation of the clinical rotations. In addition, students will learn the steps of a basic oral diagnosis, and will demonstrate their understanding with graded peer exams and by performing selected portions of a diagnosis on two clinic patients with the assistance of a 3rd or 4th year dental student.

DENT 6315C Patient Care III Credits: 3

This course introduces preventive theory necessary to provide patient care. Students are introduced to fundamental clinical procedures including dental deposits, gingival assessment, identification and classification of periodontal diseases, and periodontal probing. The information learned in this course continues in fall, second year (Patient Care IV) where student are introduced to basic periodontal instrumentation skills to assess and treat simple patients.

DENT 6316 Dental Morphology Credits: 3

This lecture/laboratory course introduces the student to the anatomy of the oral cavity and structures of the stomatognathic system. A thorough review of dental anatomy and dental terminology of the primary and permanent dentition will be presented. The students' knowledge of dental morphology will be reinforced by constructing wax models of permanent dentition.

DENT 6317 Fundamentals of Occlusion and Fixed Prosthodontics Credits: 3

This lecture laboratory course will review the fundamental principles of dental occlusion, the anatomy and function of the stomatognathic system, and foundational knowledge of fixed prosthodontics.

DENT 6319 Ethics and Professionalism Credit: 1

An introduction to basic concepts of ethics and professionalism. Systems of ethical decision making are introduced and applied in the context of oral health care and interprofessional practice. Students will explore their own ethical values and apply this knowledge to issues in professional education.

DENT 6328 Clinical Decision Making in Dentistry Credits: 1-2

An experiential course that uses current controversies in to facilitate development of skills needed for making valid decision in clinical dentistry. Students will apply basic principles of database searching, research design and methodology to the critical analysis of contemporary dental literature. This one-hour course will: 1) Provide you with sufficient information to perform week on the portions of the national boards that deal with research design and methodology; and , 2) give you skills sufficient to search for, locate, and evaluate valid information related to clinical questions in contemporary dentistry.

DENT 6350 Introduction To The Histopathology Of Oral Tissues Credits: 2

A comparison of the microscopic anatomy of healthy and diseased oral tissues.

DENT 6352 Patient Care IV Credits: 1-3

This course is a continuation of DENT 6310C, DENT 6314C, and DENT 6315C which introduces preventive theory and the instrumentation skills necessary to provide patient care. Students are introduced to fundamental clinical procedures including plaque control, gingival assessment, and periodontal probing. Review of radiology, radiographic technique and interpretation, assisting skills, diagnosis and periodontal instrumentation will be implemented in this course.

DENT 6390 Dental Research Experience Credit: 1

This independent study course focuses upon experience gained in both an area of dental research as well as the process of research in working with an established dental researcher.

DENT 6402 Transitions: Introduction to the Profession and Practice of Dentistry III Credits: 0.5

This course is the third in a sequence of courses throughout the dental education curriculum designed to prepare the graduate dentist in the skills and values of professionalism, practice management and ethics. This course builds on strategic planning foundation established in year one to gain an understanding planning for development of a dental practice.

DENT 6403 Transitions: Introduction to the Profession & Practice of Dentistry IV Credits: 0.5

This course is the fourth in a sequence of courses throughout the dental education curriculum designed to prepare the graduate dentist in the skills and values of professionalism, practice management and ethics. This course continues the strategic planning framework as the dental practice business plan is developed. The focus for this course is on managing the finances of a dental practice.

DENT 6410 Operative Dentistry II Lecture Credit: 1

A continuation of DENT 6305. Principles of cavity preparation, materials and techniques are stressed.

DENT 6410L Operative Dentistry II Laboratory Credits: 2

A continuation of DENT 6305L. Restorative procedures are performed on laboratory manikins and extracted teeth.

DENT 6411 Operative Dentistry III Lecture Credit: 1

A continuation of DENT 6410.

DENT 6412 Introduction to Oral Surgery & Pain Management I Credit: 1

This course introduces students to foundational concepts of oral surgery and pain management. The course consists of lectures, demonstration and pre-clinical practice and simulation in the safe and effective use of local anesthetics in dentistry and basic intraoral surgical procedures. This course includes patient assessment for intraoral procedures, and instrumentation and techniques required to anesthetize a patient and extract teeth. Students will participate in practical experiences to begin to build skills in the necessary techniques to manage patient's pain and perform basic surgical procedures.

DENT 6414 Pathology I Lecture Credits: 4

The general etiology of disease; circulatory and metabolic disorders; degenerative processes; inflammation; infection and immunity; tumors; and organ system pathology.

DENT 6415 Pathology II Credits: 2

A study of developmental defects, inflammatory diseases, and neoplasia of the oral region.

DENT 6416 Complete Removable Prosthodontics Credit: 1

This course will introduce the dental student to concepts and procedures involved in the rehabilitation of the completely edentulous patient. Information presented will include proper clinical examination techniques, an evaluation of the findings and their impact on treatment and treatment options. The student will become familiar with the clinical steps involved in the fabrication of complete dentures and the rationale supporting these procedures. Laboratory steps as they relate to clinical treatment procedures will also be discussed. There will be additional information presented regarding single complete dentures, immediate dentures, overdentures, implant-retained complete dentures, and rebasing and relining techniques.

DENT 6416L Complete Removable Prosthodontics I Laboratory Credits: 2

This course will introduce the student to the clinical and laboratory steps involved in the fabrication of complete dentures. Students will learn how to manipulate the materials involved as well as indications for their usage. The course will be structured to closely resemble the clinical experience in concept and techniques where feasible. The goal is to teach the skills necessary to manage edentulous patients and also to teach in detail the entire process of complete denture fabrication. This will enhance overall dental skills and provide a knowledge base with which to critically evaluate laboratory procedures and results. This laboratory course provides the student the opportunity to acquire the foundational skills, which must be mastered before clinical competency, can be attained. A goal of the course is to provide the opportunity for the student to acquire the hand/eye skills, which are necessary to treat the edentulous patient in a clinical setting.

DENT 6417 Removable Partial Prosthodontics Credit: 1

The study of the terminology, design, theory, and basic procedures in removable partial denture construction in addition to diagnosis and treatment planning will be stressed through the lectures.

DENT 6417L Removable Partial Prosthodontics Laboratory Credits: 2

In the laboratory the students will learn to plan, design, and prepare the mouth for a prosthesis. They will demonstrate understanding of concepts and methods by applying them to the solution of problems. The student will: develop critical thinking and problem solving related to diagnosis, planning and treatment; make decisions based on current empirical and published evidence; make custom trays for final impression, and record bases and wax rims for recording jaw relationship.

DENT 6420 Periodontics I Credits: 2

It is the scope of this course to introduce the basic disease mechanisms involved in the evolution of the inflammatory periodontal lesion; i.e., the interaction of the host tissues with the oral microbial flora. The course will cover the entire range of possible periodontal diseases, ranging from simple marginal gingivitis to AIDS related necrotizing ulcerative periodontitis. Further, the course will continually reinforce the science of periodontology and its overwhelming relationship to the clinical practice of periodontics.

DENT 6422 Fixed Prosthodontics I Lecture Credit: 1

This course is designed to provide the foundation knowledge needed by the novice to formulate clinical judgments in the areas of treatment planning, tooth preparation, and the selection and use of dental biomaterials for the restoration of single teeth with fixed prosthodontic restorations. The topics covered also include provisional restorations, impressions materials and technique, dental cements, and laboratory aspects involved in the fabrication of cast gold crowns.

DENT 6422L Fixed Prosthodontics I Laboratory Credits: 2

The second course in the fixed prosthodontic curriculum is designed to provide foundation knowledge needed by the novice to formulate clinical judgments in the areas of treatment planning, tooth preparation, and the selection and use of dental biomaterials for the restoration of missing teeth with fixed partial dentures and implants.

DENT 6423 Fixed Prosthodontics II Lecture Credit: 1

The second course in the fixed prosthodontic curriculum is designed to provide foundation knowledge needed by the novice to formulate clinical judgments in the areas of treatment planning, tooth preparation, and the selection and use of dental biomaterials for the restoration of missing teeth with fixed partial dentures and implants.

DENT 6423L Fixed Prosthodontics II Laboratory Credits: 2

The second laboratory course in fixed prosthodontics is focused on the replacement of missing teeth with fixed partial dentures and implant restoration. Projects build the skills to begin development of clinical competence in fixed partial dentures and implant restorations.

DENT 6424 Dental Management of the Medically Complex Patient Credits: 2

This course focuses on the understanding of medical conditions and compromised states that patients present with, enabling the clinician to develop dental treatment plans that are safe and compatible with their medical status.

DENT 6426 Oral Radiology Lecture Credits: 2

Radiation physics, radiation biology, quality assurance, imaging principles, radiation hygiene, radiographic interpretation and techniques of intra-oral survey are presented.

DENT 6431 Pediatric Dentistry I Lecture Credit: 1

The overall goal of this didactic course is to provide the student with the fundamental knowledge necessary to provide comprehensive dental care to pediatric patients. In addition, this course strives to develop an attitude towards learning such that the student will seek opportunities to further his/her knowledge and skills in pediatric dentistry subsequent to graduation. Finally, this course is intended to sensitize students to their responsibility as health care providers for the children in their community.

DENT 6435 Endodontics I Lecture Credit: 1

An introductory course in endodontics emphasizing pulp and periapical biology and pathology. Extra emphasis will be placed on endodontic diagnosis of non-odontogenic facial pain, problems with anesthesia in endodontics and treatment planning.

DENT 6436 Orthodontics: Growth And Development Credit: 1

Certain malocclusions and dental deformities can occur due variations in growth and normal developmental process. In order to treat and understand these problems, an in-depth and thorough understanding of craniofacial growth and development is necessary. Understanding how and when the face and head is actively growing will enable the clinician to redirect facial growth to reduce the severity of forming skeletal/ dental malocclusions. Since orthodontic treatment may involve the modification and/or manipulation of skeletal growth, it is important not only to understand dental development but also physical, physiologic and psychosocial development. This course is designed to address these needs.

DENT 6439 Medical Emergencies in the Dental Office Credit: 1

The purpose of this course is to comprehensively review the management of common medical emergency situations that a dentist is likely to encounter in the dental office. In this course, the students will gain a thorough understanding of the preventive measures and appropriate response to medical emergencies including the appropriate use of the Emergency Medical System. Moreover, pertinent information regarding the patho-physiology associated with common medical emergencies will be discussed.

DENT 6440 Introduction to Oral Surgery & Pain Management II Credit: 1

This course builds on the fundamental concepts in oral surgery and pain management presented in Dent 6412 to prepare students for patient care in oral surgery and management of pain for provision of dental care. The lectures will focus on treatment needs of the medically compromised surgical patient, ability to safely and adequately deliver local anesthesia, non-pharmacological management of pain as well as OTC and prescription medications for pain management. The course will also focus on appropriate case selection for a general dentist. In the pre-clinical lab portion of the course, students will participate in exodontia simulation and local anesthesia administration.

DENT 6442 Endodontics II Lecture Credit: 1

A continuation of the study of endodontics emphasizing non-surgical endodontics, surgical endodontics and post-endodontic treatment.

DENT 6442L Endodontics Laboratory Credits: 2

The preparation and filling of root canals of extracted teeth in the laboratory setting.

DENT 6460C Review of Pre-Clinical Dentistry Credits: 0.5

A combination of online lectures, selected readings and independent study designed to reinforce and integrate concepts contained in the pre-clinical dental curriculum.

DENT 6501C Intro to Comprehensive Patient Care Credits: 1-10

The purpose of this course is to introduce the student to the clinical environment and to familiarize him/her with comprehensive patient care. In addition, it allows the student to develop and interpret basic diagnostic aids that enable him/her to arrive at a diagnosis and treatment outline, the beginning steps of comprehensive care. Patient care is provided following the outlined treatment plan. The student will apply the principles/concepts of patient care. Students begin treatment of a "family" of patients under faculty supervision.

DENT 6502 Grand Rounds I Credits: 0.5

Students prepare to develop and present oral reports typically given at professional meetings such as case presentations, table clinics, research reports or presentations of new techniques (such as in Table Clinic requirements or Senior Grand Rounds). This course will expand on the student's basic knowledge of critical review of scientific literature and information literacy. Cases and problems in dentistry and oral health will be the context for identification and application of current valid scientific literature. This course seeks to foster an attitude of critical analysis and commitment to life-long learning.

DENT 6503 Clinical Decision Making II Credits: 0.5

Students will learn to critically appraise scientific literature associated with current issues in dentistry to develop critical thinking skills that result in evidence-based decision making.

DENT 6509C Comprehensive Patient Care I Credits: 1-10

Third and fourth year dental students will spend the majority of their curriculum time mastering the competencies required of a general dentist. This includes the ability to complete a dental diagnosis and treatment plan, present the case to the patient, implement and evaluate the dental care delivered. Comprehensive patient care courses foster development of skills through daily evaluation in technique, patient management, and diagnostic ability, supplemented by periodic mentor and team faculty evaluation. Semester evaluation will also take into account clinical productivity using a time unit system.

DENT 6510C Comprehensive Patient Care II Credits: 1-10

Third and fourth year dental students will spend the majority of their curriculum time mastering the competencies required of a general dentist. This includes the ability to complete a dental diagnosis and treatment plan, present the case to the patient, implement and evaluate the dental care delivered. Comprehensive patient care courses foster development of skills through daily evaluation in technique, patient management, and diagnostic ability, supplemented by periodic mentor and team faculty evaluation. Semester evaluation will also take into account clinical productivity using a time unit system.

DENT 6514 Pathology III Lecture Credit: 1

Continued study of pathological conditions of the oral region with emphasis on clinical signs and symptoms.

DENT 6515 Periodontics II Credit: 1

The overall goal of this course is to help the pre-doctoral students to recognize periodontal disease and treatment plan the needed periodontal therapy. Specific goals are to enhance the student's knowledge of the surgical aspects of periodontal therapy, and the relationship of periodontal disease and its treatment to the overall dental treatment plan.

DENT 6518 Transitions: Introduction to the Profession & Practice of Dentistry V Credit: 1

This course is the fifth course in a sequence of courses throughout the dental education curriculum designed to prepare the graduate dentist in the skills and values of professionalism, practice management and ethics. This course continues the strategic planning framework and focuses on practice building strategies.

DENT 6520 Transitions: Introduction to the Profession & Practice of Dentistry VI Credit: 1

This course is the sixth course in a sequence of courses throughout the dental education curriculum designed to prepare the graduate dentist in the skills and values of professionalism, practice management and ethics. This course continues with the strategic planning framework and focuses on the skills, knowledge and attitudes necessary for the day to day leadership of a dental practice.

DENT 6521 Oral Surgery III Credit: 1

This course is a continuation of the principles and techniques in Oral Surgery Pain Management II, but now relates to more advanced forms of oral surgical patient care. The areas to be covered are the diagnosis, treatment planning and management of impacted teeth, surgical complications, pre-prosthetic surgery, maxillary sinus in disease/dentoalveolar surgery, odontogenic infections, odontogenic cysts and odontogenic tumors afflicting the maxillofacial structures.

DENT 6521C Periodontics Clinical I Credits: 1-2

Clinical application of those principles taught in preceding terms.

DENT 6522 Oral Surgery IV Credit: 1

This course is a continuation of DENT 6521 Oral Surgery III. This course is structured to help the student acquire a basic understanding of the advanced aspects of the specialty of Oral and Maxillofacial Surgery. This includes the process of diagnosis, surgical and adjunctive management of diseases, deformities and malformations of the oral cavity, jaws and associated structures. Moreover, this course also covered principles and techniques of sedation used in oral and maxillofacial surgery.

DENT 6524 Principles of Oral Medicine and Diagnosis Credit: 1

This course expands upon the student doctor's knowledge of oral medicine, diagnosis, and pathology, and its interrelationship at times with systemic disease. Dental management, treatment and the appropriate use of consultations and referrals are emphasized.

DENT 6526 Orthodontics I Credit: 1

Orthodontics I is a course designed to introduce the student to the field of orthodontics. The lecture will introduce the student to basic orthodontic terminology, description, diagnosis, and mechanotherapy. This course will prepare the student for the clinical treatment of patients needing limited tooth movement.

DENT 6526L Orthodontics I Laboratory Credits: 2

This is a course designed to introduce the student to the field of orthodontics. The laboratory enables the student to master the materials of orthodontics in order to complete diagnostic records, to construct fixed and removable appliances, and to be familiar with tooth movement mechanics. This course will prepare the student for clinical treatment of patients needing limited tooth movement.

DENT 6527 Pharmacology and Therapeutics I Credits: 2

An introduction into the mechanisms of action, pharmacodynamics and relevant pharmacokinetics for drugs prescribed and used by patients seen by the dentist. The course is administered through the Blackboard Course Management System and will involve live and/or recorded lectures directed at "mastery learning" of introductory pharmacology where students receive objectives, attend class, and complete reading assignments expected to assist in achieving a high level of mastery.

DENT 6531C Oral Diagnosis Clinical I Credits: 1-2

Clinical application of diagnostic principles. Students will complete a diagnostic competency examination on a selected patient.

DENT 6534 Advanced Prosthodontics Credit: 1

This course reviews advanced principals in Fixed and Removable Prosthodontics. Using evidenced based concepts, information will be presented to aid the student clinician make well informed clinical choices which will help prepare them for the use of prosthodontic techniques in the practice of general dentistry. A variety of materials, devices, and concepts will be presented. Making intelligent choices in the selection and use of these restorative materials and concepts will be a focus.

DENT 6537 Oral Oncology Credits: 0.5

A lecture course on oral oncology will deal with the biologic aspects of cancer; the detection of oral cancer and the different modalities of treatment of cancer; the dental aspects both from surgical reconstruction and prosthetic reconstruction following cancer surgery; and management of the patient prior to, during, and following radiation therapy to the head and neck and during chemotherapy for systemic cancer.

DENT 6538 Orthodontics II Credit: 1

This course will present a variety of topics related to orthodontics, such as: normal development, abnormal occlusal deviations during the developing permanent dentition, diagnosis and treatment planning of orthodontic problems, biomechanical principles in orthodontics, adolescent vs. adult orthodontics, periodontal health during orthodontic treatment, complications associated with orthodontic treatment and controversial aspect of orthodontics. You should also be able to recognize which kind of cases exceed the scope of limited treatment and may require intervention by a specialist.

DENT 6542C Operative Dentistry Clinical I Credits: 1-2

Clinical application of those principles taught in preceding terms.

DENT 6551CR Oral Surgery Clinical Credit: 1

This is a course for application of principles taught in didactic courses and the Oral Surgery Rotations. Oral Surgery Clinical is designed to prepare the dental student with the necessary didactic and clinical skills to properly evaluate patients and provide Oral Surgery care in a safe effective and caring manner and to evaluate competency in two areas: managing medical emergencies and oral surgical skills expected of a general dentist.

DENT 6556 Radiographic Interpretation Credit: 1

This is a comprehensive multidisciplinary course in radiologic interpretation of normal anatomy, anomalies, dental caries, periodontal disease, periapical pathology and infections of the maxilla and mandible.

DENT 6558C Treatment Planning I Credit: 1**DENT 6559 Diagnosis and Management of Orofacial Pain Credit: 1**

Essential conceptual, clinical and technical information and skills necessary in the diagnosis and treatment of Orofacial Pain States. Diagnostic protocols and radiographic procedures and their integration as it relates to painful head and neck conditions are presented in depth. Differential diagnosis and special diagnostic techniques are also addressed. Behavioral factors associated with the development of chronic pain and complicating the management of pain states are identified and discussed.

DENT 6561C Removable Prosthodontics Clinical I Credit: 1

This course requires the clinical application of removable prosthodontics principles. By treating multiple and varied patients needing complete and removable partial dentures, the student should become competent to diagnose and treat the routine and uncomplicated edentulous and partially edentulous patients with removable prostheses.

DENT 6562C Removable Prosthodontics Clinical II Credit: 1

This course reflects the clinical aspects of Removable Prosthodontics. The application of didactic learning and foundational skills is practiced and evaluated. By treating multiple and varied patients needing complete dentures and those needing removable partial dentures, the student should become competent to diagnose and treat the routine and uncomplicated edentulous and partially edentulous patient with removable prostheses.

DENT 6564 Pharmacology and Therapeutics II Credits: 2

This course will provide the background necessary for the dentist to become knowledgeable about the drugs their patients may be taking and their related medical conditions. Lecture topics include the diseases and medical conditions commonly seen in dental patients on an outpatient basis. The course presents the effects, mechanisms of action, dosage forms, and relevant pharmacokinetics for the drugs used in the management of these diseases. The course will cover the important side-effects of precautions of drugs that are pertinent to the dental patient for their safe management.

DENT 6566 Bridge Course Credits: 2

This course is designed as a lecture and clinical course to provide a transition into the clinical phase of the dental curriculum for the third year dental student.

DENT 6591C Professional Development I Credits: 1-2

Clinical application of those principles taught in preceding terms.

DENT 6592C Professional Development II Credits: 1-2

Clinical application of those principles taught in preceding terms.

DENT 6593C Professional Development III Credits: 1-2

Clinical application of those principles taught in preceding terms.

DENT 6595 Introduction To Implant Dentistry Credit: 1

To provide the undergraduate student with a solid background into the role of implant dentistry in their profession. Advances in technique and materials which are responsible for improved predictability will be presented. Emphasis will be on patient selection, treatment planning and basic restorative techniques. The student will be able to initiate uncomplicated dental implant procedures with this information and will be prepared to enter into more advanced continuing education and graduate programs in this subject.

DENT 6600 Review Of Clinical Dentistry Credits: 1-2

A summative review of the basic areas of clinical dentistry.

DENT 6601C Endodontics Clinical Credits: 1-2

Clinical application of principles taught in preceding terms.

DENT 6602 Grand Rounds II Credit: 1

This course is a continuation of Grand Rounds I and its aim is similar to Grand Rounds I: expand on the dental student's basic knowledge of critical review of scientific literature and information literacy. Students will present a Table Clinic at Midwest Dental Conference and prepare a proposal for their senior Grand Rounds presentation.

DENT 6603 Grand Rounds III Credit: 1

The fourth year Grand Round course is an independent study courses designed to develop the evidence-based research skills required to keep abreast of current concepts in dentistry; develop case documentation skills necessary for continued professional development, and develop professional public speaking skills.

DENT 6604 Grand Rounds IV Credit: 1

The fourth year Grand Round course is an independent study courses designed to develop the evidence-based research skills required to keep abreast of current concepts in dentistry; develop case documentation skills necessary for continued professional development, and develop professional public speaking skills.

DENT 6605 Review Of Clinical Dentistry II Credits: 0.5

A review of foundation knowledge for clinical dentistry.

DENT 6606C Pediatric Dentistry Clinical I Credits: 1-2

Clinical application of those principles taught in preceding terms.

DENT 6607C Pediatric Dentistry Clinical II Credits: 1-2

Clinical application of those principles taught in preceding terms.

DENT 6608C Pediatric Dentistry Clinical III Credits: 1-2

Clinical application of those principles taught in preceding terms.

DENT 6609C Comprehensive Patient Care III Credits: 1-10

Third and fourth year dental students will spend the majority of their curriculum time mastering the competencies required of a general dentist. This includes the ability to complete a dental diagnosis and treatment plan, present the case to the patient, implement and evaluate the dental care delivered. Comprehensive patient care courses foster development of skills through daily evaluation in technique, patient management, and diagnostic ability, supplemented by periodic mentor and team faculty evaluation. Semester evaluation will also take into account clinical productivity using a time unit system.

DENT 6610C Comprehensive Patient Care Iv Credits: 1-10

Third and fourth year dental students will spend the majority of their curriculum time mastering the competencies required of a general dentist. This includes the ability to complete a dental diagnosis and treatment plan, present the case to the patient, implement and evaluate the dental care delivered. Comprehensive patient care courses foster development of skill through daily evaluation in technique, patient management, and diagnostic ability, supplemented by periodic mentor and team faculty evaluation. Semester evaluation will also take into account clinical productivity using a time unit system.

DENT 6611C Fixed Prosthodontics Clinical I Credits: 1-2
Clinical application of principles taught in preceding terms.

DENT 6613 Periodontal Treatment Planning Credit: 1
A case-based learning seminar designed to review concepts in Periodontics with emphasis on clinical application.

DENT 6614 Dentistry For The Special Patient Credits: 1-2
The purpose of this course is to acquaint the student with the dental treatment of three populations of patients who you may encounter in your dental career (and often have trouble finding adequate care). They include patients who are developmentally disabled, the elderly, and the medically-compromised. The course will present management techniques for in-office treatment and appropriate referral of those patients best treated in another setting. This course builds upon the skills and knowledge gained in previous courses in many disciplines, to provide an interdisciplinary experience with special patient populations. A required rotation at the Regional Center for the Developmentally Disabled gives practical experience to topics covered in lecture.

DENT 6614C Comprehensive Patient Care V Credits: 1-10
Third and fourth year dental students will spend the majority of their curriculum time mastering the competencies required of a general dentist. This includes the ability to complete a dental diagnosis and treatment plan, present the case to the patient, implement and evaluate the dental care delivered. Comprehensive patient care courses foster development of skill through daily evaluation in technique, patient management, and diagnostic ability, supplemented by periodic mentor and team faculty evaluation. Semester evaluation will also take into account clinical productivity using a time unit system.

DENT 6615 Transitions: Introduction to the Profession & Practice of Dentistry VII Credit: 1
This is the seventh course in a sequence of courses throughout the dental education curriculum designed to prepare the graduate dentist in the skills and values of professionalism, practice management and ethics. This course continues with the strategic planning framework and focuses on the development of a dental practice business plan.

DENT 6616 Transitions: Introduction to the Profession and Practice of Dentistry VIII Credits: 0.5
This course is a continuation of a sequence of courses throughout the dental education curriculum designed to prepare the graduate dentist in the skills and values of professionalism, practice management and ethics. This course allows fourth year dental students to apply concepts and principles presented in the previous practice management courses in the Innovation Center and in small group seminars. A series of small group seminars will allow for in-depth discussion of professional issues.

DENT 6617 Pediatric Dentistry Seminar Credits: 0.5
This course is designed to allow fourth year students to build on the concepts presented in DENT 6431. Using a seminar format, students will review pediatric dentistry concepts with emphasis on clinical application.

DENT 6620 Civic Engagement Credits: 0.25
Service learning experiences expose students with different opportunities to engage the community. Students can choose from approved experiences and participate based on their interest and skill level. Students will research, participate, and reflect on their experiences.

DENT 6621C Periodontics Clinical II Credits: 1-2
Clinical application of those principles taught in preceding terms.

DENT 6625 Oral Surgery Clinical II Credit: 1
Oral Surgery II is a continuation of Oral Surgery I and is designed to certify students' competency in oral surgery, including managing patient pain and anxiety, i.e. nitrous oxide-oxygen sedation

DENT 6626 Clinical Treatment Planning Credit: 1
This course builds on the didactic courses and clinical experiences in treatment planning. Each student will demonstrate competency in comprehensive treatment planning to earn credit in the course.

DENT 6633 Introduction To Dental Public Health Credit: 1
Discussion of contemporary issues in community health and community oral health with emphasis on preparing students for their roles as professional members of their communities.

DENT 6635 Community-Based Dental Education Credits: 3
Externship rotations expose students to alternative methods of dental care delivery and to populations at high risk for dental disease. Students are placed in an existing network of community health centers and Federally-Qualified Health Centers. Students serve on multi-disciplinary teams that meet primary health care needs of large segments of underserved populations

DENT 6636C Oral Radiology Clinical Credit: 1
Clinical application of those principles taught in preceding terms with emphasis on use of a variety of film holding devices. Radiographic quality assurance and darkroom maintenance will be reviewed during this course.

DENT 6642C Operative Dentistry Clinical II Credits: 1-2
Clinical application of those principles taught in preceding terms.

DENT 6650 Applied Ethics Credits: 0.5
Four or five case studies will be used during seminars. Basic ethical principles from DENT 6306 will be applied to the case studies. Two of the cases will involve ethical issues, and one of the cases will add community dentistry issues. Other cases will be used as generated or suggested by each seminar group.

DENT 6656C Orthodontic Clinical I Credit: 1

The purpose of this course is to allow each student to develop the skills, knowledge and values to diagnose potential or actual malocclusions and manage patient who need orthodontic intervention.

DENT 6690 Independent Study in Dentistry Credits: 1-6

This course provides students the opportunity to undertake independent study projects in specific areas of dentistry. Course may be repeated.

DENT 6691C Professional Development IV Credits: 1-3

Clinical application of those principles taught in preceding terms.

DENT 6692C Professional Development V Credits: 1-2

Clinical application of those principles taught in preceding terms.

Economics (ECON)

Courses

ECON 5501 Advanced Macroeconomic Analysis Credits: 3

Basic theoretical concepts of national income and statistical tools utilized in its measurement. Aggregate demand and supply as problems of economic dynamics. The course includes examination of the primary competing theoretical approaches: neoclassical, Keynesian, new classical, real business cycle, new Keynesian supply side, Austrian, and Post Keynesian. Topics covered include growth, money, labor markets consumption, investment, expectations formation, role of time and uncertainty, equilibrium and disequilibrium analysis, exchanges rates, international trade. and optimal currency areas. Policy implications of the various macroeconomic theories are explored.

Prerequisites: ECON 301 and ECON 302.

ECON 5502 Advanced Microeconomic Analysis Credits: 3

The course first provides a critical survey of neoclassical microeconomic theory, including methodology, demand theory, production and cost theory, theory of competitive and non-competitive markets, distribution, welfare, and general equilibrium. It then introduces heterodox microeconomic theory, covering its historical origins, methodology, structural organization of economic activity, in-put-output models, flow of funds, agency and institutions, and the business enterprise.

Prerequisites: ECON 302, ECON 5521.

ECON 5503 Advanced Heterodox Economics Credits: 3

The course examines various theoretical approaches and topics, both historically and currently, that constitute heterodox economics. In particular the course deals in depth with the mathematical and economic properties of heterodox production and price models. After reviewing the mathematics of linear production-price models, the module will examine Leontief, Sraffian, and other heterodox price and production models.

Prerequisites: ECON 301, ECON 302, and MATH 210.

ECON 5504R American Economic History Since 1865 Credits: 3

The course deals with the emergence of Industrial America since 1865. It will cover the rise to dominance of the large modern corporation, with the problem of economic and social instability and stability, with the rise of trade associations, cartels, and government regulation in an unstable economy, and with the evolution of American economic policy and national economic planning.

ECON 5504RR American Labor History Credits: 3

This course examines the history of work and the working class in the U.S. from 1750 to the present. We will focus on the transformation of the workplace, the rise of the union movement, the nature of cultural and political organizations, workers' relationships with other social groups, and the role played by gender, race, and ethnicity in uniting or dividing the working class.

Prerequisites: Graduate standing.

ECON 5505 Advanced Comparative Economic Systems Credits: 3

Contents vary depending upon the instructor's design for the course.

Prerequisites: ECON 301, ECON 302.

ECON 5506 Advanced History Of Economic Thought Credits: 3

This seminar uses issues raised in the reading of two 'classic' primary texts, Adam Smith's *An Inquiry into the Nature and Causes of the Wealth of Nations* (1776) and John Maynard Keynes's *The General Theory of Employment, Interest and Money* (1936), as points of departure for the examination of a series of topics in the history and development of economics and alternative paradigms in the discipline. These investigations will lead us to the study of a number of other seminal articles, representing alternative approaches in the field. Topics include competition, accumulation, path dependence and endogenous technical change, cumulative causation, the laws of return, money and credit, capital theory, and more.

Prerequisites: ECON 301, ECON 302.

ECON 5508 Controversial Issues In Recent Economic Literature Credits: 3

This course will focus on theoretical and policy-oriented controversies that have occurred in economic in the 20th century. The type of controversies covered include, but are not restricted to, money, unemployment, business cycles and economic growth, pricing and administered prices, capital controversy, labor theory of value controversy, and free trade vs. protectionism. While the course concentrates on recent debates, it identifies the origins of the modern disputes in earlier controversies. For each controversy, its real world importance and policy implications are discussed.

ECON 5511 Geographic Information Systems (GIS) for Urban Economic Development Credits: 3

An advanced quantitative methods course featuring the application of Geographic Information Systems (GIS) to the problems of urban economic development. Surveys federal, state, and local geospatial and attribute data resources, including Census Bureau TIGER files, and provides training in geodatabase construction and management. Geospatial processing, editing, and address geocoding are also covered. Formal analytical methods (cartographic aesthetics and visualization, spatial analysis, exploratory data analysis, network analysis, crime analysis, etc.) are all applied in the context of the problematics of urban and regional economic development.

Prerequisites: GEOG 203 or UPD 203.

ECON 5512 Advanced Economic Development Credits: 3

Contents vary depending upon the instructor's design.

Prerequisites: ECON 301, ECON 302.

ECON 5513 Economic Cycles And Growth Credits: 3

A critical review and evaluation of economic analysis and the forces of economic fluctuation and growth; and analysis of statics, dynamics, monopolistic competition, the role of the interrelationships of the market structure and other institutional forces as they relate to fluctuations and growth. An emphasis will be made on the critical evaluation of recent literature in the field of economic analysis related to fluctuations, growth, statics, dynamics, market structure and the reinterpretation of economic fluctuations, growth, forecasting and overall economic behavior. An analysis of the technological, monetary, and fiscal policy implied by economic trends and growth will also be discussed.

Prerequisites: ECON 5501.

ECON 5516L Law And Economics Credits: 3

This course will examine the use of economic principles in the analysis and applications of public and private law. Emphasis will be given to the efficiencies of laws in meeting social objectives, how laws can be modified to become more economically efficient, and the uses of economics in the actual practice of the law. Issues covered will include proofs of liability in antitrust, contracts and employment law using statistical and economic analysis, and the calculation of economic damages in commercial, employment and personal injury/death litigation.. Graduate students will be assigned a specific research paper.

Prerequisites: ECON 302.

ECON 5521 Mathematical Economics Credits: 3

An introduction to mathematical methods as applied to the questions addressed by economists. The principal methods to be applied are matrix algebra and differential calculus in the context of optimization. Other topics may include integral calculus, differential equations, difference equations or linear and nonlinear programming.

Prerequisites: ECON 301, ECON 302 and MATH 110.

ECON 5525 Econometric Methods Credits: 3

Continuation of ECON 425. The major problems encountered in building and testing economic models are treated and alternative solutions to these problems are discussed. Major topics include corrections for heteroscedasticity and autocorrelation, maximum likelihood and BLUE estimation, simultaneous equations methods, probit and logit analysis and distributed lags. Other topics may include ARIMA or other series analytic methods, three stage least squares and dynamic multipliers or simulation. Work with econometric software is stressed. No programming experience necessary.

Prerequisites: ECON 425 and ECON 5521.

ECON 5529 Readings In Quantitative Economics Credits: 3

Readings from the economic literature which stress advanced mathematical or econometric tools. A general subject matter is selected by the student with the consent of the instructor.

Prerequisites: ECON 5521, ECON 5525.

ECON 5531 Monetary Theory And Policy Credits: 3

A study of the nature and functions of money and the financial system, with emphasis on monetary theory and its application to current banking and financial problems; recent contributions to monetary theory and current literature.

Prerequisites: ECON 301.

ECON 5535 Theory Of Public Finance Credits: 3

An inquiry into the scope and nature of economics with emphasis on the nature of the public sector including a brief study of welfare criteria along with the study of ability to pay, benefit theory of taxation, and expenditure theories.

ECON 5537 State And Local Government Finance Credits: 3

This course investigates the role, problems and relative importance of municipal governments in the United States. Such areas as the demand for public services, tax and expenditure policies, and intergovernmental fiscal relations will be explored in detail. Case studies of state and local governments will be introduced to emphasize the problems and proposed solutions arising in modern municipal governments.

Prerequisites: ECON 302.

ECON 5538 Economic Policy Credits: 3

Analysis of the confluence of political and economic behavior, the economics of collective action.

Prerequisites: ECON 301 and ECON 302.

ECON 5540 Advanced International Trade Credits: 3

This course emphasizes the global allocation of resources and distribution of income under various commodity market conditions and government trade policies. Major topics include: comparative advantage; terms of trade; the distribution of gains and losses from trade; perfect vs. imperfect competition; tariffs, quotas and other barriers to trade; exchange rates and the balance of payments; preferential trading arrangements; international factor movements and multinational corporations.

Prerequisites: ECON 302; graduate standing.

ECON 5542 Advanced International Finance Credits: 3

This course emphasizes the global activity and balance of payments implications of government taxation, expenditure and monetary policies under various capital market conditions. Major topics include: exchange rates and the balance of payments; national income determination in an open economy; integrated and non-integrated capital markets; economic growth, stabilization policies and the quest for global economic stability.

ECON 5548 Advanced Socialist Economic Systems Credits: 3

The course will deal with the theoretical analysis of socialist economic theory, Marxian and non-Marxian, and/or of socialist economics systems such as those of Eastern Europe, the Chinese mainland and elsewhere. The emphasis of the course will vary depending upon the instructor's design for the course.

Prerequisites: ECON 301 and ECON 302.

ECON 5550 Regional Economics Credits: 3

The economics of spatial relations, emphasizing basic location and land utilization theory and the role of transport will be considered at the micro-level. Keynesian and neoclassical growth theories and contemporary policy approaches to regional growth and decline are analyzed.

Prerequisites: ECON 302.

ECON 5551 Advanced Institutional Theory Credits: 3

Evolution, organization and allocation functions of the modern industrial economy. Contributions and limitations of conventional economic concepts. Philosophical and theoretical interpretations of the economy in light of modern developments in philosophy and social science.

Prerequisites: ECON 451.

ECON 5558 Advanced Urban Economics Credits: 3

The study of the city as a dynamic system of interrelated and interdependent markets. Significant markets in cities include land, housing, labor, transportation and public services.

ECON 5560 Industrial Organization Credits: 3

The structure, conduct and performance of American industry. Historical evolution of American industry; alternative industrial systems, antitrust policies and their alternatives. Technological change and industrial performance.

Prerequisites: ECON 301, ECON 302.

ECON 5575 Labor Economics, Institutions and Policies Credits: 3

This course focuses on the economic analysis of labor market phenomena in the context of historical-institutional development and on labor market policies. This course is offered winter semester only.

Prerequisites: ECON 201 and ECON 202.

ECON 5583 Racial Inequality & Public Policy Credits: 3

This course will provoke open debate and discourse about public policy responses to racial inequality. The emphasis is on stimulating participants to think about and to analyze critically the range of strategies offered for reducing racism and racial economic inequality.

ECON 5587 Human Resource Economics Credits: 3

An analysis of the factors determining the productivity of human resource: education, nutrition, job training and work environment. An analysis of work patterns, wage patterns, and the impact of automation. Graduate students will be assigned a specific research paper on a topic to be decided with the instructor.

Prerequisites: ECON 302.

ECON 5588 Advanced Political Economy Credits: 3

This course gives students a comprehensive introduction to the history and modern practice of political economy, with particular emphasis on Marxian and Classical political economy. Topics include: value theory, class theory, economic reproduction, economic crisis, the theory of history, and methodology.

ECON 5589 Graduate Seminar In Labor Economics Credits: 3

Content of seminar will vary from semester to semester depending upon the instructor's design for the course.

ECON 5590 Special Topics Credits: 1-3

Selected topics in theoretical and applied economics.

ECON 5590A Special Topics Credits: 1-3

ECON 5590B Special Topics Credits: 1-3

ECON 5590C Special Topics Credits: 1-3

ECON 5591 Research And Planning Seminar Credits: 3

The objective of this research seminar is to apply the quantitative techniques and theoretical constructs of economics to an urban-regional problem. Students are required to formulate and evaluate present economic models, and then complete a research project.

Prerequisites: ECON 5502 and ECON 5521.

ECON 5599 Research And Thesis Credits: 1-6

Directed specialized research.

ECON 5601 Colloquium In Advanced Macroeconomics Credits: 3

The course will deal with analyses of topics in Macroeconomic analysis and Macroeconomic policies and investigation of current literature in divers areas of Macroeconomic analysis. A written report(s) will be made upon the selected assignment(s).

Prerequisites: ECON 5501.

ECON 5602 Colloquium In Advanced Microeconomics Credits: 3

As a continuation of Economics 502, this course deals with the business enterprises-including production, costs, pricing, and investment-markets, market demand, market governance, general price-quantity models of the economy, microfoundations of the heterodox macroeconomics, and social welfare.

Prerequisites: ECON 5502.

ECON 5606 Colloquium on Advanced History of Economic Thought Credits: 3

The course examines advanced topics in history of economic thought.

Prerequisites: ECON 5506.

ECON 5608 Topics In Economic Theory Credits: 3

This course deals with advanced topics in Institutionalism, Post Keynesian, and other heterodox economic theory. May be repeated with different topic.

ECON 5616 History Of Economics In The 20th Century Credits: 3

The history of 20th century economics is concerned with a number of interdependent issues, including the institutional organization of economics at universities; the historical development of the structures and social networks that make-up the economic paradigms of neoclassical economics, Marxian economics, Post Keynesian economics, and other heterodox economics; and the role of institutional and state power to maintain the dominance of the neoclassical paradigm. The aim of the course is to introduce students to this institutional/organizational history.

ECON 5625 Colloquium In Econometrics Credits: 3

This course treats advanced topics in econometrics such as non-linear estimation techniques, model development, simultaneous equation estimation techniques, and simulation. Topics are developed from theoretical and application perspectives. Familiarity with personal computer is necessary.

Prerequisites: ECON 5501, ECON 5502, ECON 5521, ECON 5525, or equivalents.

ECON 5631 Colloquium on Monetary Theory and Policy Credits: 3

This course explores advanced monetary theory and policy, examining recent debates and current research practices, as well as classic articles on monetary theory and policy.

Prerequisites: ECON 5601 or ECON 5501 and ECON 5531.

ECON 5645 Financial Macroeconomics Credits: 3

This course will introduce the student to the central role of financial analysis in macroeconomic analysis and to theories of macroeconomics instability based on the integration of finance and macroeconomics. It will examine modern finance theory and modern approaches to financial analysis, paying particular attention to the contributions made by Fisher and Keynes.

ECON 5660 Evolution Of American Industrial Society Credits: 3

Drawing on economic and organizational theory, the course will concentrate on the evolution of American industrial technology, the American business enterprise, and the organization of American industries and markets since 1870.

ECON 5665 Colloquium In Advanced Health Economics Credits: 3

This course is designed as a seminar with a special emphasis on analysis of econometric methods to assess issues in health care. The topics are developed from a theoretical and applied perspective. Familiarity with personal computers is necessary. Special emphasis will be given in the selection of course topics to the interests and backgrounds of participants.

Prerequisites: ECON 5521, ECON 5525, ECON 5565.

ECON 5680 Teaching Methods And Course Design Credits: 3

This course is designed to prepare students for the challenge of teaching economics. Students will be taught how to write a syllabus; how to prepare for class; how to plan learning activities; how to become skillful in leading discussion; how to present an effective lecture; how to test and assess student learning; how to develop effective group projects; how to motivate their students for lifelong learning. Students will be required to design a course to be taught at the 200-, 300 or 400-level. The student will prepare a complete set of course materials, including a lecture outline, a list of require readings, useful handouts, course materials, including a lecture outline, a list of require readings, useful handouts, course assignments, exams, etc. The course should incorporate an interdisciplinary approach and should emphasize an "active learning" component, designed to promote a "rich learning experience." The student will work closely with an appropriate member of the faculty.

Prerequisites: Must have completed/passed Comprehensive Exams.

ECON 5688 Colloquium On Political Economy Credits: 3

This course is designed as a seminar and will take into account theory and policy analysis from alternative perspectives. The topics covered will include philosophical foundations of contemporary theory and policy, the organization of production information and finance, resource and environment, wealth and income distribution, public and private policy and planning. Stress is placed on contemporary research and students are expected to become involved in research projects.

ECON 5690 Special Doctoral Readings In Economics Credits: 1-3

Special research topics in Economics at the Doctoral level.

ECON 5699 Doctoral Dissertation Credits: 1-12

Directed selected research for Economics in the interdisciplinary doctoral program.

ECON 5899 Required Graduate Enrollment Credit: 1

Education (EDUC)

Courses

EDUC 5428 Cultural Diversity And American Education Credits: 3

An examination of educational needs and strategies in a culturally diverse society based on a study of several major ethnic and nationality groups in America from historical, anthropological and sociological perspectives. This course may be team-taught.

EDUC 54896CI Special Topics Credits: 1-6

Electrical and Computer Engineering (E&C-ENGR)

Courses

E&C-ENGR 5316 Artificial Neural and Adaptive Systems Credits: 3

This graduate course is a hands-on introduction to theory and applications of neurocomputing, including: classification, function approximation, supervised and unsupervised learning, time series analysis, and adaptive filtering using different feed-forward and recurrent artificial neural networks.

Prerequisites: E&C-ENGR 341R (or COMP-SCI 5590CI).

E&C-ENGR 5318 Dynamical Systems and Complex Networks Credits: 3

An overview of classical dynamical systems, and its application in different fields such as Electrical Engineering (nonlinear circuits), Network Sciences, Epidemiology, and Ecology will be discussed. Phenomena such as chaos, bifurcation, and limit cycles will be examined. This course will also introduce and develop the mathematical theory of Complex Networks with applications to network-driven phenomena in the Internet, search engines, social networks, the World Wide Web, information and biological networks; spectral graph theory; models of networks including random graphs, preferential attachment models, and the small-world models.

E&C-ENGR 5501AP Special Topics In Electrical Engineering Credits: 1-4

E&C-ENGR 5501NN Special Topics In Electrical Engineering Credits: 1-4

E&C-ENGR 5512 Microwave Remote Sensing Credits: 3

Basic principles of remote sensing including scattering, absorption, transmission, and reflection of microwave energy. Basic radiative transfer theory. Microwave remote sensing systems including altimeters, scatterometers, radiometers, synthetic-aperture systems. Principle applications of remote sensing systems including imaging, atmospheric sounding, oceanographic monitoring, ice-sheet dynamics, etc.

Prerequisites: E&C-ENGR 414.

E&C-ENGR 5513 Advanced Principles of RF/Microwave Engineering Credits: 3

General aspects of TE, TM and TEM mode propagation in waveguides; circular waveguides; optical waveguides; wave propagation on dielectric backed conductors; wire antennas equivalence principle and aperture antennas; antenna impedance and mutual coupling in arrays; array beamforming; scattering matrix representations; impedance matching; resonators; filters, couplers and power-dividers; microstriplines and striplines; r.f. propagation in wireless and radar systems; conformal mapping techniques and applications (optional). Recommended preparation: Knowledge in Engineering Computation, Technical Writing Skills.

Prerequisites: E&C-ENGR 302, E&C-ENGR 380, E&C-ENGR 381.

E&C-ENGR 5516 Computer Networks Credits: 3

Concepts and goals of computer networking, structure of computer networks, OSI model and layers, network control, analysis, design and management, data communication techniques including fiber optics, WAN, MAN and LAN architecture and protocols, internetworking, case studies and hand-on studying the performance by analytic modeling and computer simulation.

E&C-ENGR 5518 Advanced Radar Systems & Techniques Credits: 3

Radar equation; MTI, Pulsed Doppler and Tracking Radars; Detection of and information from Radar Signals; Radar Antennas, Transmitters and Receivers; Radar Propagation and clutter.

Prerequisites: E&C-ENGR 302, E&C-ENGR 380.

E&C-ENGR 5528 Advanced Embedded Systems Credits: 3

This course examines the hardware/software aspects associated with developing microcontroller-based computer systems. The students learn about the architecture and assembly language for popular microcontrollers and how to take advantage of a variety of input/output options that include binary ports, A/D and D/A converters, communication ports, and interfacing techniques for various applications. Graduate students are required to do Embedded Systems lab experiments.

Prerequisites: E&C-ENGR 426, E&C-ENGR 427.

E&C-ENGR 5530 Digital Electronics Credits: 3

Electronic hardware aspects of digital systems. Includes state-of-the-art information on integrated-circuit logic devices and their applications.

E&C-ENGR 5532 Biomedical Instrumentation Credits: 3

Biomedical objectives, physical and engineering principles; optimal equipment design and actual performance of biomedical instrumentation; considers practical instrumentation problem solutions and unsolved problems.

Prerequisites: E&C-ENGR 330.

E&C-ENGR 5533 Analog Integrated Circuit Design Credits: 3

This course will cover the analysis and design of analog and mixed signal integrated circuits, with an emphasis on design principles for realizing state-of-the-art analog circuits. The course will provide the critical concepts by giving physical and intuitive explanations in addition to the quantitative analysis of important analog building block circuits. First-order hand calculations and extensive computer simulations are utilized for performance evaluation and circuit design. Students will be required to complete a final project which will involve the design at the layout level of an analog circuit. Successful designs will be fabricated through the MOSIS Educational Service.

Prerequisites: E&C-ENGR 276, E&C-ENGR 330.

E&C-ENGR 5534 Computer Arithmetic Credits: 3

Computer arithmetic is a sub field of digital computer organization. It deals with the hardware realization of arithmetic functions to support various computer architectures as well as with arithmetic algorithms for firmware/software implementation. A major thrust of digital computer arithmetic is the design of hardware algorithms and circuits to enhance the speed of various numeric operations. Verilog HDL is used as tool to simulate the algorithms and circuits.

Prerequisites: E&C-ENGR 226, E&C-ENGR 5535.

E&C-ENGR 5535 Hdl-Based Digital Systems Design Credits: 3

This course covers hardware design techniques using a Hardware Description Language (HDL). It also discusses several digital system design methodologies, including structural specifications of hardware, HDL-based simulations and testbenches. Courses focus on the synthesis methodologies for use-defined primitives (UPD), data types, operators, Verilog constructs multiplexed datapaths, buses, bus drivers, FSMs, assignments, case, functions, tasks, named events and rapid prototyping techniques with Verilog HDL, ASICs and FPGAs.

Prerequisites: E&C-ENGR 226.

E&C-ENGR 5536 Power Electronics II Credits: 3

Circuit concepts and analysis techniques for transistor switching regulators, thyristor choppers, transistor inverters, self-commutated thyristor inverters and cycloconverters.

Prerequisites: E&C-ENGR 436.

E&C-ENGR 5537 Mixed-Signal Integrated Circuit Design Credits: 3

Modern integrated circuit design often requires the integration of analog and digital circuits on the same chip. This integration provides numerous advantages over purely analog or digital approaches. This course will cover the analysis and design of mixed-signal integrated circuits and will address the challenges of having both analog and digital circuits on the same substrate. Important mixed-signal circuits such as data converters and filters will be studied in detail.

Prerequisites: E&C-ENGR 5533.

E&C-ENGR 5542 Introduction to VLSI Design Credits: 3

With a focus on CMOS Digital technology this course covers the basic concepts of integrated circuits, various methods of designing VLSI circuits, and techniques to analyze performance metrics (speed, area, power and noise). Clocking, interconnect and scaling issues of integrated circuit will also be discussed. It will cover device, interconnect and circuit level implementation issues of both logic and memory circuits. To familiarize students with the realities of design complexities and layout environment they will get exposure to VLSI CAD tools in the following levels - schematic, layout, extraction and circuit simulation through the labs and projects.

E&C-ENGR 5556 Advanced Instrumentation and Control Credits: 3

The instrumentation and control of industrial processes and systems. Introduction to Programmable Logic Controllers. Simulation modeling of various systems.

Prerequisites: E&C-ENGR 358 (or MEC-ENGR 415).

E&C-ENGR 5557 Fundamentals of Solar Photovoltaic Cells Credits: 3

The science and engineering of solar cell/solar photovoltaic (PV) spans several disciplines namely physics, chemistry, electronic and electrical engineering. Even though solar cell related researches are carried out in those traditional disciplines but it is not widely taught as a comprehensive course. This course highlights the fundamental science and engineering of solar PV devices, solar energy conversion as well as solar cell manufacturing issues. It covers from basic to modern solar PV devices, including typical solar cell materials, basic device physics, ideal and non-ideal models, device parameters and design, and device fabrication.

E&C-ENGR 5558 Automatic Control System Design Credits: 3

Techniques for feedback system design and analysis; computational aids, compensator design and examples, state variable methods, non-linear systems, and sampled-data control systems.

Prerequisites: E&C-ENGR 226, E&C-ENGR 358.

E&C-ENGR 5559 Introduction to Photovoltaic Systems Credits: 3

The course presents an updated background of world energy production and consumption, a summary of the solar spectrum, how to locate the sun and how to optimize the capture of its energy, as well as the various components that are used in PV systems. Some section of the course has also been added to explain why certain photovoltaic (PV) designs are done in certain ways, as well as how the design process is implemented. Economic and environmental issues as PV design criteria are discussed along with the most recently available technology and design and installation practice.

E&C-ENGR 5560 Electric Power Distribution Systems Credits: 3

Operation and design of utility and industrial distribution systems including distribution system planning; load characteristics; application of distribution transformers; design of subtransmission lines, distribution substations, primary systems, secondary systems, Smart Grid; application of capacitors; voltage regulation and reliability.

Prerequisites: E&C-ENGR 466.

E&C-ENGR 5563 Sustainable Energy System Engineering Credits: 3

This course focuses on understanding the theory and application of emerging energy technologies, including solar, wind, biomass, oceanic, geothermal, hydropower, fuel cell (hydrogen), nuclear, and other more exotic energy sources. A premise of the course is that a sustainable energy technology must both be technically feasible and economically viable. We consequently investigate the above energy technologies and the technological promise, progress, and application of each energy source, as well as its economic opportunities and challenges. Renewable energy sources will be highlighted with a focus on projections for a sustainable energy future.

E&C-ENGR 5565 Auxiliary Electric System Design Credits: 3

This course provides design, operation, contingency analysis and black start requirements of an Auxiliary Electric System (AES) for a coal fired power plant using industry standards (IEEE-666, NEMA MG-1, ANSI C57 and C37 as well as relevant IEC).

Prerequisites: E&C-ENGR 466 or Department Approval.

E&C-ENGR 5567 Power Systems II Credits: 3

This course covers power system matrices, power flow analysis, Gauss-Seidel and Newton-Raphson techniques, fast-decoupled load flow, economic dispatch, transient stability and operation, and power system control.

Prerequisites: E&C-ENGR 358, E&C-ENGR 466.

E&C-ENGR 5568 Economics of Power Systems Credits: 3

Transmission loss formula coefficients, incremental costs and losses, economic scheduling of generation, and applications.

Prerequisites: E&C-ENGR 466, E&C-ENGR 467.

E&C-ENGR 5569 Reliability of Electric Power Systems Credits: 3

Development and use of mathematical models for the calculation and estimation of various measures of reliability in electric power systems, Reliability restoration times and cost assessment of generation, transmission, distribution and composite systems are analyzed.

Prerequisites: COMP-SCI 394R.

E&C-ENGR 5570 Principles of Digital Communication Systems Credits: 3

Principles of random processes, information sources and source coding, modulation and demodulation, block and convolutional error control coding, and equalization.

Prerequisites: COMP-SCI 394R, E&C-ENGR 380.

E&C-ENGR 5572 Antennas & Propagation For Wireless Systems Credits: 3

This course introduces the mathematical aspects of the basic antenna parameters such as vector potential, gain, directivity, impedance, radiation patterns, and develops a comprehensive theory of antenna arrays including the effects of mutual coupling. In-depth modeling studies for wire, aperture and microstrip antennas, is presented; diffraction of plane electromagnetic (TE and TM) waves by perfectly conducting half-planes and wedges- applications to site-specific propagation path modeling in wireless systems.

Prerequisites: E&C-ENGR 341R, E&C-ENGR 412.

E&C-ENGR 5573 Advanced Electric Power Lab Credits: 3

Advanced applications of concepts experienced in Generating Plants, Substations and Power Plants of fundamentals and concepts of power systems to practical power plan and industrial applications. Operational limitations of all components of power system equipment. Single and Three Phase Circuits, Generators/Alternators, Transformers, Motors, and specialty items (Coronal mass Ejection, Ferroresonance, System Protection).

Prerequisites: E&C-ENGR 466 and Consent of the Department.

E&C-ENGR 5577 Wireless Communications Credits: 3

Principles of the design and analysis of wireless communications, Study of propagation mechanisms, statistical characterization of wireless channels, diversity and MIMO, spread spectrum and CDMA, Orthogonal Frequency Division Multiplexing (OFDM).

Prerequisites: COMP-SCI 394R.

E&C-ENGR 5578 Multimedia Communication Credits: 3

Visual communication is dominating the Internet and mobile networks. This class covers topics on video signal processing, modeling, compression, and communication. Includes information theory foundations on source coding, lossless coding schemes, video coding framework, as well as the current status of video coding standards and multimedia communication systems.

E&C-ENGR 5579 Digital Signal Processing in Telecommunications Credits: 3

Applications of digital signal processing in telecommunications systems; oversampling and quantization, Delta-Sigma modulation, linear predictive speech coding, adaptive filtering, echo canceller, adaptive receivers and equalizers for wireless communication, digital cellular, CDMA.

Prerequisites: E&C-ENGR 474, E&C-ENGR 480.

E&C-ENGR 5580 Digital Signal Processing Credits: 3

Analysis and representation of discrete-time signals and systems including a discussion of discrete-time convolution, difference equations, the z-transform and the discrete Fourier transform. Similarities with and distinctions between discrete-time and continuous-time signals and systems. Digital network structures for implementation of both recursive (infinite impulse response) and nonrecursive (finite impulse response) digital filters. FFT (Fast Fourier Transform) algorithm for computation of the discrete Fourier transform. Graduate students will be expected to successfully complete a number of additional projects as compared with E&C-ENGR 480.

Prerequisites: E&C-ENGR 380.

E&C-ENGR 5582 Computer Vision Credits: 3

The image is an essential form of information representation and communication in modern society. This course focuses on topics of computer vision, teaching computer how to understand images. Topics include image formation, color and texture features, key points detection, aggregation, subspace methods in image modeling, and deep learning image classification, with many applications in photography, media and entertainment, education, defense and medicine.

E&C-ENGR 5584 Advanced Digital Image Processing Credits: 3

Fundamentals of applied grayscale digital image processing, image sensing and acquisition and quantization, basic set and discrete convolution operations with images, intensity transformations and spatial domain filtering via convolutional masks (smoothing, Laplacian and gradient masks), frequency domain filtering via the two-dimensional discrete transform, two-dimensional sampling and Nyquist theory, frequency domain filtering using lowpass/highpass, rectangular, round, Gaussian and Butterworth filters, image restoration using noise filtering via mean order-statistic and adaptive filters, bandpass, band reject and notch filters, Weiner filters, image deblurring filters, computed aided tomography (i.e. CAT scans), morphological image processing and image segmentation.

Prerequisites: E&C-ENGR 380 and prior experience with MATLAB.

E&C-ENGR 5586 Pattern Recognition Credits: 3

Decision functions, distance measures, minimum distance classifiers, hard clustering methods, fuzzy clustering methods, statistical pattern recognition methods, Bayesian classifiers, error probabilities, estimation of density functions, perceptrons, least-mean-square algorithms, feature selection, dimensionality reduction and syntactic pattern recognition.

Prerequisites: COMP-SCI 394R (or STAT 436), a course in high-level programming language.

E&C-ENGR 5588 Communication Theory I Credits: 3

Generalized communication systems, signal processing, signals as random processes, optimum receivers.

Prerequisites: COMP-SCI 394R, a statistics course.

E&C-ENGR 5590 Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590AC Special Topics in Electrical and Computer Engineering Credits: 1-4

E&C-ENGR 5590AD Special Topics in Electrical and Computer Engineering Credits: 1-4
Special Topics in Electrical and Computer Engineering

E&C-ENGR 5590AE Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590AN Special Topics in Electrical and Computer Engineering Credits: 1-4

E&C-ENGR 5590AR Special Topics in Electrical and Computer Engineering Credits: 1-4
Special Topics in Electrical and Computer Engineering

E&C-ENGR 5590PD Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590PG Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590PL Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590PL2 Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590PL3 Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590PQ Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590PR Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590PS Special Topics in Electrical and Computer Engineering Credits: 1-4

Special Topics in Electrical and Computer Engineering.

E&C-ENGR 5590PV Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590RD Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590RE Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590RF Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590SC Special Topics in Electrical and Computer Engineering Credits: 1-4

E&C-ENGR 5590SD Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590SI Special Topics In Electrical And Computer Engineering Credits: 1-4

Special Topics In Electrical And Computer Engineering

E&C-ENGR 5590SL Special Topics in Electrical and Computer Engineering Credits: 1-4

E&C-ENGR 5590SP Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590T Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590TC Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590VL Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590WC Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590WW Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5590WX Special Topics Credits: 1-3

E&C-ENGR 5590XX Special Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5597 Directed Readings Credits: 1-3

Readings in an electrical and computer engineering areas selected by the graduate student in consultation with a faculty member. Arrangements must be made prior to registration.

E&C-ENGR 5598 Research Seminar Credits: 1-3

Graduate research and/or readings in an electrical and computer engineering area selected by the graduate student in consultation with a faculty member. Arrangements must be made prior to registration.

E&C-ENGR 5599 Research Credits: 1-6

Independent investigation in field of electrical engineering to be presented in the form of a thesis.

E&C-ENGR 5600 Problems Credits: 2-5

Supervised investigation in electrical engineering to be presented in form of report.

E&C-ENGR 5606 Electromagnetic Scattering and Antenna Theory Credits: 3

Dyadic analysis; integral equations and Green's functions; field theorems-uniqueness, induction equivalence, reciprocity; image and Babinet's Principles; applications to antennas; method of stationary phase and applications to aperture antennas; array antennas and mutual coupling analysis; method of moments; asymptotic techniques and applications to EM scattering from wedges, cylinders, and spheres; RF propagation path loss modeling and conformal antennas.

Prerequisites: E&C-ENGR 412.

E&C-ENGR 5616 Parallel and Distributed Processing Credits: 3

Covers the fundamental issues involved in designing and writing programs for simultaneous execution. Semaphores and monitor constructs are covered to provide a basis for critical section programming. Expansion of these concepts provide a basis for the analysis and design of control systems for multiprocessor devices and computer networks.

Prerequisites: A systems programming course.

E&C-ENGR 5617 Neural Network Based Computing System Credits: 3

The course will consider computing systems based on neural networks and learning models, along with implementations and applications of such systems.

E&C-ENGR 5618 Artificial Intelligence Credits: 3

Concepts, theories, and models pertaining to neural nets, pattern recognition, learning systems, and programmed problem solving.

E&C-ENGR 5619 Theory of Automata Credits: 3

Sequential machines: Turing machines; deterministic and stochastic automata; applications of automata.

E&C-ENGR 5624 Digital Software Systems Design Credits: 3

Characteristics and parameters of various software subsystem including assemblers, compilers, utility programs, special programming packages, interpreters, and operating systems; and principles of organization into efficient systems.

E&C-ENGR 5633 Nanoelectronics II: Nanoscale Integration & Manufacturing Credits: 3

This course is continuation of Nanoscale Devices and circuits course offered in Fall 2016. In this course students will learn theory about semiconductor processing, and their applications. Limitations of existing process techniques will be discussed, and advances in both physical implementation and circuit/integration techniques will be introduced. Some example of topics that will be covered are: optical lithography, EUV lithography, nanoimprint, implantation, manufacturing aware circuit design, etc. The laboratory work will include modeling and simulation with state-of-the-art semiconductor processing and device simulation tools such as: SRIM, Sentaurus TCAD Process, Sentaurus TCAD Device, etc. Research intensive course.

Co-requisites: E&C-ENGR 5542.

E&C-ENGR 5635 Vlsi Systems Design Credits: 3

Course discuss design of the MOSFETs (nFETs and pFETs), and high speed CMOS cascades in VLSI. It also covers the design of various arithmetic circuits, different fast adders, memories, and chip-level physical designs requirements in the VLSI subsystems are also the focus of this course. It uses Verilog HDL/VHDL as a tool to design VLSI systems.

Prerequisites: E&C-ENGR 5535 (or knowledge of VHDL).

E&C-ENGR 5642 Advanced VLSI Design Credits: 3

Course focuses on the issues and challenges of high performance VLSI circuits and systems. The course will be based on papers published in accredited journals and conference proceedings. The goals of this course: (1) Familiarize students with the current and emerging trends, issues and design alternatives of deep submicron and nanoscale IC technologies; (2) Help students acquire the knowledge and skills required for graduate study and research, and professional careers in IC industry; and (3) Teach students how to collect and survey technical materials, develop new research ideas, write research papers, and present technical contents in front of an audience.

E&C-ENGR 5644 Liapunov and Related Nonlinear Methods in Automatic Control Credits: 3

A study of nonlinear methods in automatic control including phase plane analysis, describing function techniques, basic definitions and theorems of Liapunov, methods of generating Liapunov functions, applications of Liapunov's methods, and Popov's methods.

E&C-ENGR 5645 Optimal Control Theory Credits: 3

Analysis and design of dynamic systems using optimal control theory parameter optimization, dynamic optimization, computational methods, differential games.

E&C-ENGR 5646 Stochastic Optimal Estimation and Control Credits: 3

Surveys random process theory; stochastic control and optimization; estimation and filtering based on Kalman-Bucy techniques; stochastic stability; adaptive and learning control systems.

E&C-ENGR 5647 Emerging Interdisciplinary Research in Nanotechnology Credits: 3

This cross-disciplinary course will focus on nanoscale materials, devices and circuit technologies, and its applications in the next generation computing, communication, electronics, biomedical, energy and environment sectors. The course will familiarize students with recent technological progresses and potential socio-economic impacts in the broader fields of nanotechnology. This will be a high level graduate course for students from diverse academic backgrounds. Instructor's prior approval is recommended.

E&C-ENGR 5660 Power-Systems Stability Credits: 3

Performance of synchronous machines under transient conditions, power system stability, system fault computations using symmetrical components; computer solutions of power system problems.

E&C-ENGR 5661 Solid State Energy Conversion Credits: 3

Solid state direct energy conversion; and design of thermoelectric generators and heat pumps.

E&C-ENGR 5662 Power Electronic Drives Credits: 3

Advanced study of dc and ac motor drives controlled by power electronic methods, including phase controlled rectifier de chopper, cycloconverter, variable frequency inverters.

Prerequisites: E&C-ENGR 5536.

E&C-ENGR 5664 Lightning and Switching Surges in Power Systems Credits: 3

Overvoltage, switching surge and lightning effects of a power system. Use of grounding and lightning arresters. Effects of surges off and on machines.

Prerequisites: E&C-ENGR 466 (or equivalent), E&C-ENGR 467 (or equivalent).

E&C-ENGR 5668 Advanced Computer Methods in Power System Analysis Credits: 3

Power system matrices. Sparse matrix methods. Advanced load flow analysis techniques and concepts. Contingency analysis. State estimation.

Prerequisites: E&C-ENGR 466, strong background in FORTRAN or C.

E&C-ENGR 5670 Direct Current Power Systems Credits: 3

Characteristic and performance analysis of DC transmission lines and associated conversion systems.

E&C-ENGR 5672 Power Systems Relaying Credits: 3

Theory of relaying systems for power system protection, improvement of power system stability. Relay coordination; performance of relays during transient swings and out-of-step conditions.

Prerequisites: E&C-ENGR 466.

E&C-ENGR 5674 Machine Intelligence Credits: 3

Formal languages in relation to natural language processing; formal languages, graphs, and image processing; formal logic and automated theorem proving; natural language processing; aspects of problem solving and heuristic programming.

E&C-ENGR 5675 Introduction to the Modeling and Management of Uncertainty Credits: 3

Theoretical and practical issues in the modeling and management of uncertainty. Topics include probabilistic uncertainty, belief theory and fuzzy set theory. Applications to computer vision, pattern recognition and expert systems.

E&C-ENGR 5676 Advanced Electric Circuit Analysis Credits: 3

Specialized study of mathematical analysis as applied to solutions of circuit networks with fixed and variable parameters.

E&C-ENGR 5677 Network Synthesis Credits: 3

Surveys linear active and nonreciprocal circuit elements, reliability conditions, methods for synthesizing active networks, and practical applications.

Prerequisites: E&C-ENGR 5676.

E&C-ENGR 5680 Digital and Sample-Data Systems Credits: 3

Introduces sampling and quantization, design of digital and sample-data systems, digital filters, adaptive sampling and quantization.

Prerequisites: E&C-ENGR 480.

E&C-ENGR 5681 Applications Of Transforms Credits: 3

Applications of Laplace and other transform methods of solution of circuit and field problems.

E&C-ENGR 5682 Coding Theory II Credits: 3

Further study of error-correcting codes; ring and cyclic codes, linear switching circuits, burst error codes, codes for arithmetic units, etc.

Prerequisites: E&C-ENGR 5579.

E&C-ENGR 5688 Communication Theory II Credits: 3

Probability theory of analog and digital communication in the presence of random process noise. Encoding systems, detection systems, optimum receivers.

E&C-ENGR 5690 Advanced Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5690EM Advanced Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5690ET Advanced Topics In Electrical And Computer Engineering Credits: 1-4

E&C-ENGR 5690ND Special Topics in Electrical and Computer Engineering Credits: 1-3

E&C-ENGR 5697 Advanced Directed Readings Credits: 1-5

Advanced readings in an electrical and computer engineering area selected by the graduate student in consultation with a faculty member. Arrangements must be made prior to registration.

E&C-ENGR 5698 Advanced Research Seminar Credits: 1-5

Advanced Graduate research and/or readings in an electrical and computer engineering area selected by the doctoral student in consultation with a faculty member. Arrangements must be made prior to registration.

E&C-ENGR 5699 Dissertation Research Credits: 1-9

Doctoral Dissertation

Endodontics (ENDO)

Courses

ENDO 5701 Endodontology 1 Credits: 1-6

This course is designed to introduce the first year endodontic postgraduate student to the field of advanced endodontics. It will provide introductory information and guidance which will serve as a basis for follow on course work in ENDO 5702 through ENDO 5706.

ENDO 5702 Endodontology 2 Credits: 1-6

This course is designed to continue the transition of the general dentist into a first year endodontic postgraduate student in the field of advanced endodontics. It will build upon material taught in previous courses of instruction as well as introduce completely new material to the resident.

ENDO 5703 Endodontology 3 Credits: 1-6

This course is designed to complete the transition of the general dentist into a first year endodontic postgraduate student in the field of advanced endodontics. It will build upon material taught in previous courses of instruction as well as introduce completely new material to the resident.

Prerequisites: ENDO 5701, ENDO 5702.

ENDO 5704 Endodontology 4 Credits: 1-6

This course is designed to transition the first year into a second year postgraduate student in the field of advanced endodontics. It will build upon material taught in previous courses of instruction as well as introduce completely new material to the resident.

Prerequisites: ENDO 5701, ENDO 5702, ENDO 5703.

ENDO 5705 Endodontology 5 Credits: 1-6

This course is designed to continue the transition of the general dentist into a more proficient second year postgraduate student in the field of advanced endodontics. It will build upon material taught in previous courses of instruction as well as introduce completely new material to the resident.

Prerequisites: ENDO 5701, ENDO 5702, ENDO 5703, ENDO 5704.

ENDO 5706 Endodontology 6 Credits: 1-6

This course is designed to complete the transition of the general dentist into a fully independently practicing endodontist. It will build upon material taught in previous courses of instruction as well as introduce completely new material to the resident.

Prerequisites: ENDO 5701, ENDO 5702, ENDO 5703, ENDO 5704, ENDO 5705.

English Language & Literature (ENGLISH)

Courses

ENGLISH 5447EM Early Modern Studies Credits: 3

Advanced study in Early Modern literature and culture. Subject varies and will be visible when students enroll.

ENGLISH 5477CS Classical Studies Credits: 3

Advanced study in Classical literature and culture. Subject varies and will be visible when students enroll.

ENGLISH 5477DH Studies in Digital Humanities Credits: 3

Advanced study in Digital Humanities. Subject varies and will be visible when students enroll.

ENGLISH 5477EM Early Modern Studies Credits: 3

Advanced study in Early Modern literature and culture. Subject varies and will be visible when students enroll.

ENGLISH 5477ES 18th-Century Studies Credits: 3

Advanced study in eighteenth-century British or American literature and culture. Subject varies and will be visible when students enroll.

ENGLISH 5477MS Medieval Studies Credits: 3

Advanced study in Medieval literature and culture. Subject varies and will be visible when students enroll.

ENGLISH 5477NS 19th-Century Studies Credits: 3

Advanced study in nineteenth-century British or American literature and culture. Subject varies and will be visible when students enroll.

ENGLISH 5477RC Studies in Rhetoric and Composition Credits: 3

Advanced study in rhetoric and composition. Subject varies and will be visible when students enroll.

ENGLISH 5477SA Studies in Authorship Credits: 3

Advanced study of individual authors or groups of authors in a variety of periods or literary and cultural movements. Subject varies and will be visible when students enroll.

ENGLISH 5477SG Studies in Genre Credits: 3

Advanced study in a single genre such as the novel, the short story, poetry, drama, or non-fiction. Subject varies and will be visible when students enroll.

ENGLISH 5477TS 20th- and 21st-Century Studies Credits: 3

Advanced study in twentieth- and twenty-first-century British or American literature and culture. Subject varies and will be visible when students enroll.

ENGLISH 5487FI Fiction Workshop Credits: 3

Advanced creative writing workshop in fiction. Subject varies and will be visible when students enroll.

ENGLISH 5487MG Multigenre Workshop Credits: 3

Advanced creative writing workshop in multiple genres. Subject varies and will be visible when students enroll.

ENGLISH 5487NF Nonfiction Workshop Credits: 3

Advanced creative writing workshop in nonfiction. Subject varies and will be visible when students enroll.

ENGLISH 5487PO Poetry Workshop Credits: 3

Advanced creative writing workshop in poetry. Subject varies and will be visible when students enroll.

ENGLISH 5500 Graduate Study In English Credits: 3

An introduction to methods of research and scholarship related to English studies. The course uses a wide spectrum of print and digital materials, library facilities (including archives and Special Collections), databases, and other resources to explore English studies as an academic discipline and profession.

ENGLISH 5500P Special Topics Credits: 3**ENGLISH 5501 Magazine Editing Credits: 3**

A course combining academic study of editorial management, publishing operations, and language skills, with "hands on" experience in article evaluation, editing, magazine production, and legal matters such as copy right and libel. Class work concentrates on authentic and effective language use, with attention given to copy editing, grammar, typography, printing processes, financing and distribution for commercial and small-press publications.

ENGLISH 5502 Magazine Nonfiction Credits: 3

This course emphasizes the origination and execution of nonfiction magazine articles for a variety of publications. Special attention is given to successful queries and the various writing techniques required for different kinds of articles. Students learn re-structuring and revision and the legalities affecting writers. Students are expected to complete three publishable articles.

ENGLISH 5503 Old English Credits: 3

This course is a study of Old English, its grammar, its poetic style, and its literature, both poetry and prose.

ENGLISH 5508 Harlem Renaissance Credits: 3

This course examines the period from 1920 to 1940, known as the Harlem Renaissance, a time of unprecedented literary and cultural creativity by Black artists. This course explores a variety of cultural productions, not only traditional forms of literature such as novels, short stories, plays and poetry, but also nonliterary objects of study such as painting, sculpture, and music.

ENGLISH 5510 Black Women Writers Credits: 3

This course explores the writings of African American Women Writers. The course examines how these writers have interacted with and often revised stereotypical representations of African American womanhood typically found within canonical and African American male literatures. The course will examine literature (which might include fiction, poetry, autobiography, and drama) of the 19th and 20th centuries; the majority of the works will be by modern and contemporary authors such as Nella Larsen, Zora Neale Hurston, Toni Morrison, and Terry McMillan. By placing the works in this sort of cultural and historical context, it will be possible to examine the unique tradition of African American women's writings as well as individual texts.

ENGLISH 5512 Chaucer Credits: 3

Readings from Chaucer's most important works, especially "The Canterbury Tales" and "Troilus and Criseyde" with emphasis on them as types of medieval genres and on the Middle English language. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5513 Renaissance Literature I Credits: 3

English literature from the time of Wyatt and Surrey to the beginning of the 17th century, including the works of Spenser, Marlowe, Sidney, Shakespeare and others. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5514 Milton Credits: 3

A study of Milton's prose and poetry, with special attention to "Paradise Lost". Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5515 Restoration And Early 18th-Century British Literature Credits: 3

British literature from the late 17th century to the mid-18th century. Selected writers may include Addison and Steele, Behn, Congreve, Defoe, Dryden, Finch, Pope, Rochester, Swift, and Wortley Montagu.

ENGLISH 5516 The Romantic Period Credits: 3

An extensive study of selected writers (such as Austen, Barbauld, Byron, Coleridge, Hazlitt, Hemans, Keats, Gilpin, the Shelleys, Wollstonecraft, and Wordsworth) organized around literary themes and/or cultural issues important to the Romantic period.

Prerequisites: ENGLISH 327.

ENGLISH 5517 Modern Poetry Credits: 3

Study of works by modernist poets such as Hopkins, Yeats, Frost, Stevens, Williams, Moore, Pound, H.D., Eliot, Millay, Hughes. Students will make in class presentations and submit papers requiring research and bibliographic work.

ENGLISH 5518 19th-Century American Literature Credits: 3

An intensive study of either selected major American writers in the 19th century or of 19th-century literary movements. Students will make in class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5519 Teaching Writing: Theories, Histories, Contexts, Practices Credits: 3

This course focuses on issues related to the teaching of English at the high school and college levels, with an emphasis on the teaching of writing. Issues addressed may include assignment design, teaching invention and revision, response to and evaluation of writing, collaborative learning, relationships between reading and writing, classroom uses of electronic media, and institutional contexts within which teachers work. The course is required of Graduate Teaching Assistants in the UMKC Composition Program, to be taken either prior to or concurrently with their first semester of teaching. Secondary English teachers and others interested in English teaching are also welcome.

ENGLISH 5520 Greater Kansas City Writing Project Credits: 3

Studies in methods and objectives for the teaching of English with special attention to secondary school teaching. This course is repeatable for credit with advisor approval.

ENGLISH 5520A Greater Kansas City Writing Project Credits: 3**ENGLISH 5520B Greater Kansas City Writing Project Credits: 3****ENGLISH 5520D Greater Kansas City Writing Project Credits: 3****ENGLISH 5522 Medieval Literature Credits: 3**

Western religious and secular verse and prose to the 15th century. Late Middle English works are read in the original; all other selections in translation. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5523 Renaissance Literature II Credits: 3

English literature from 1600 to the beginning of the Restoration, including the works of Donne, Jonson, Milton, and other contemporaries. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5526 The Victorian Period Credits: 3

An intensive study of selected writers (such as Arnold, Braddon, the Brontës, the Brownings, Dickens, Darwin, Eliot, Gaskell, Hardy, Ruskin, and the Rossetts) organized around literary themes and/or cultural issues important to the Victorian period.

Prerequisites: ENGLISH 327.

ENGLISH 5527 Contemporary Poetry Credits: 3

Study of works by contemporary poets (post- World War II), such as Auden, Bishop, Hayden, Berryman, Rukeyser, Larkin, Rich, Plath, Heaney, Boland, and Komunyakaa. Students will make in class presentations and submit papers requiring research and bibliographic work.

ENGLISH 5528 20th Century American Literature Credits: 3

Major American writers or literary movements of the 20th century. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5529 Graduate Seminar: Screenwriting Credits: 3

A seminar on advanced theory in narrative screenwriting, script analysis and constructive story editing. Students draft, revise and workshop a short film script or a feature screen play, and deliver a pitch, treatment, draft and revision of the first act and detailed outline of the whole script. Students workshop feature screenplays in small groups.

Prerequisites: ENGLISH 429B or COMM-ST 454.

ENGLISH 5531 Late 18th-Century British Literature Credits: 3

British literature from the mid to late 18th century. Selected writers may include Blake, Burney, Collins, Equiano, Fielding, Gray, Johnson, Sheridan, and Wollstonecraft.

ENGLISH 5532 Advanced Creative Writing: Fiction Credits: 3

A course for advanced students of fiction writing. The class will proceed through analysis of models, discussion of general principles, and critique of student work. Students will simultaneously be encouraged to experiment and to refine the form and subjects best suited to their talents. Emphasis will remain on the short story, though there may be units in other forms—novella, film script, the non-fiction essay. May be repeated once for credit.

Prerequisites: Graduate Standing.

ENGLISH 5533 Histories Of Writing, Reading, And Publishing Credits: 3

A study of selected topics concerning the material practices of writing, reading, and publishing within specific cultural and historical contexts. Issues examined may include authorship, education, information technologies, libraries, literacy, periodicals, popular literature, publishers, and communities of readers.

ENGLISH 5534 Postcolonial Literature Credits: 3

An exploration of postcolonialism through the study of literary and theoretical texts created by or representing peoples whose historical experience has been decisively shaped by the experience or legacies of colonialism. Texts will be drawn from a variety of genres and from several countries. The course will consider several definitions of postcolonialism and related terms such as cosmopolitanism, hybridity, diaspora, and nationalism.

ENGLISH 5535 Advanced Creative Writing: Poetry Credits: 3

An advanced poetry workshop that includes intensive reading of contemporary poetry and aims at each student creating a portfolio of publishable poems. The focus of the course will vary to address a variety of topics such as metaphor and closure; imitation and the line; form and voice. May be repeated once for credit.

Prerequisites: Graduate Standing.

ENGLISH 5536 Poetic Forms Credits: 3

An advanced creative writing course that focuses on intensive study of and practice in metrics and traditional and nonce forms. May be repeated once for credit.

Prerequisites: ENGLISH 315.

ENGLISH 5537 Prose Forms Credits: 3

This course covers techniques for planning and drafting major prose forms. Students will learn how to use content as a guide to inventing new forms (i.e. novella, novel, linked-story collection, episodic novel, essay novel, and creative nonfiction book).

Prerequisites: ENGLISH 432WI, ENGLISH 435WI.

ENGLISH 5538 Women's Literature in Africa and the African Diaspora Credits: 3

This course is a comparative examination of the variety of literary works produced by women of African descent in the United States, the Caribbean and Africa. Students will explore the cross-cultural implications of texts in light of the intersections of gender, race and class.

ENGLISH 5540 American Culture Credits: 3

Texts that offer perspectives on key historical themes of American culture. Texts may be grouped around any culturally significant principle (e.g. region, race, gender, class, ethnicity, religion) or theme (e.g. the mythology of the frontier, marriage and domesticity, the American Dream). Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5541 Girls And Print Culture Credits: 3

This course deals with girls' relationships to the continually evolving print culture. Students will examine various literary representations of girlhood by adult writers, explore texts directed at girls (e.g., conduct books, periodicals, textbooks), and study the writing and reading practices of girls themselves.

ENGLISH 5545 History And Principles Of Rhetoric Credits: 3

A study of selected writings of ancient and modern rhetoricians illustrating key issues in the development of Western discourse theory and practice. Issues examined include the relationships between rhetoric and knowledge, orality and literacy, and rhetoric and poetics. Attention will also be given to the implications of rhetorical theory for modern language instruction. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5546 From Field Shout to Hip Hop: African American Poetic Traditions Credits: 3

This course examines the development of African American poetry from its early forms as field shouts, ballads, and blues to present forms including spoken word and hip hop. Includes authors such as Phillis Wheatley, Paul Lawrence Dunbar, Langston Hughes, Gwendolyn Brooks, Tupac Shakur, and Jessica Care Moore.

ENGLISH 5547 Theory and Criticism in English Studies Credits: 3

A survey of major schools and methods of literary theory and criticism. Authors and texts to be determined by the instructor of the course.

ENGLISH 5548 External Internship Credits: 1-3

Students may complete an external internship involving writing and editing with a publishing company, trade magazine, literary or academic journal, other print or electronic media organization, or with advertising, public relations, or non-profit firms. Internships are granted on a competitive basis. Students will compile a portfolio of their work under the direction of the internship supervisor to be submitted for evaluation to the department's internship coordinator.

ENGLISH 5549A Publication Practicum Credits: 1-3

This course provides practical experience with New Letters magazine, New Letters on the Air, and BkMk Press in business analysis/reporting, copy-editing, manuscript evaluation, promotion/grant development, library research, market research, and other skills. The practicum is limited to three students per semester, to be chosen on the basis of demonstrated writing and organizational skills. References are required. May be taken for no more than three credit hours over a maximum of two semesters. Permission of the instructors required.

ENGLISH 5549B Publication Practicum Credits: 1-3

This course covers the basics of producing an issue of an academic journal. Students acquire hands-on experience at all stages of production.

ENGLISH 5549C Publication Practicum Credits: 1-3

This course allows students to work with a faculty member on an ad hoc project for publication such as a special journal issue or festschrift, book manuscript, a new scholarly edition of a primary text, or a digital edition. Course may be repeated once for continued work on the same project.

ENGLISH 5550 Graduate Seminar Credits: 3

Authors, works and intellectual currents which form the basis of these seminars may vary from semester to semester, depending upon the instructor's design for the course. May be repeated for credit. Continued in ENGLISH 5555.

ENGLISH 5550A Graduate Seminar Medieval Literature I Credits: 3

ENGLISH 5550B Graduate Seminar Renaissance Literature I Credits: 3

ENGLISH 5550C Graduate Seminar Neo-Classical Literature I Credits: 3

ENGLISH 5550D Graduate Seminar 19th Century Literature I Credits: 3

ENGLISH 5550E Graduate Seminar American Literature I Credits: 3

ENGLISH 5550F Graduate Seminar Modern Literature I Credits: 3

ENGLISH 5550G Graduate Seminar Literary Criticism Credits: 3

ENGLISH 5550H Graduate Seminar Studies In Fiction I Credits: 3

ENGLISH 5550I Graduate Seminar In Dramatic Literature I Credits: 3

ENGLISH 5550J Graduate Seminar: History Of The English Language Credits: 3

ENGLISH 5550K Graduate Seminar: Creative Writing Prose Credits: 3

ENGLISH 5550M Graduate Seminar In Rhetoric And Composition Credits: 3

ENGLISH 5550MA Greater Kansas City Writing Project: Invitational Credits: 3

ENGLISH 5550MC Greater K.C. Writing Project:Writing & The Teaching Of Literature Credits: 3

ENGLISH 5550MD Greater Kc Writing Project:Critical Thinking & Process Writing Credits: 3

ENGLISH 5550ME Greater K.C. Wrtg Project:Researching The Theories Of Tchng Wrtng Credits: 3

ENGLISH 5550N Graduate Seminar: Criticism Credits: 3

ENGLISH 5550P Graduate Seminar: Sociolinguistics And Dialectology Credits: 3

Seminar focusing on the role of social factors in language use, and on the origin and development of regional and urban dialects in English. Special attention will be paid to sociolinguistic motivations for change, variation and merger in dialects and languages in contact, and Black English.

ENGLISH 5551 Shakespeare Comedies And Histories Credits: 3

A study of Shakespeare's major comedies and history plays with special emphasis on his dramatic works before 1600. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5552 Early English Drama Credits: 3

English religious and secular drama prior to Shakespeare. Mystery and morality plays are studied with emphasis on their literary and social backgrounds. Close readings of such works as "Everyman," "The Wakefield Second Shepherd's Play," and "The Spanish Tragedy." Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5553 Modern Drama 1880-1945 Credits: 3

A study of modern drama: Continental, British, and American, including history and development, critical theory, and literary evaluation. This course will focus on the earlier modern playwrights from Ibsen to Shaw, with special attention to naturalism. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5554 The Civil Rights Movement in African American Literature Credits: 3

This course examines how African American literature shaped ideas about freedom, rights, citizenship and race in the civil rights movement. It draws on a variety of literary forms-speeches, essays, autobiographies, fiction, drama, poetry and film-to explore the movement's impact on communities and cultures as well as its various debates and competing visions.

ENGLISH 5555 Graduate Seminar Credits: 3

Graduate Seminar - second half.

Prerequisites: ENGLISH 5550.

ENGLISH 5555A Graduate Seminar Medieval Literature II Credits: 3

ENGLISH 5555B Graduate Seminar Renaissance Literature II Credits: 3

ENGLISH 5555C Graduate Seminar Neo-Classical Literature I Credits: 3

ENGLISH 5555D Graduate Seminar In 19th-Century Literature II Credits: 3

ENGLISH 5555E Graduate Seminar American Literature II Credits: 3

ENGLISH 5555F Graduate Seminar In Modern Literature II Credits: 3

ENGLISH 5555G Graduate Seminar Literary Criticism Credits: 3

ENGLISH 5555H Graduate Seminar Studies In Fiction II Credits: 3

ENGLISH 5555I Graduate Seminar In Dramatic Literature II Credits: 3

ENGLISH 5555J Graduate Seminar English Language Credits: 3

ENGLISH 5555K Graduate Seminar In Creative Writing:Poetry Credits: 3

ENGLISH 5555M Graduate Seminar: Composition Credits: 3

ENGLISH 5555N Graduate Seminar: Prose Fiction Credits: 3

ENGLISH 5556 Studies In The Novel 1740-1900 Credits: 3

An intensive study of no more than three major novelists of the eighteenth or nineteenth century. The content of the course will change, depending on the instructor. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5557 Stages toward Freedom: African American Dramatic Traditions Credits: 3

This course explores the development of African American dramatic traditions from the eighteenth century through the Harlem Renaissance, Black Arts Movement, to current postmodernism. Includes authors such as W.W. Brown, Zora N. Hurston, Amiri Baraka, Sonia Sanchez, August Wilson, Suzan-Lori Parks.

ENGLISH 5558 Slave Narratives: Race, Gender and Writing Freedom Credits: 3

A truly American, home grown genre and powerful force in the development of American political and social realities, the African American Slave Narrative is an established, recognized influence in the development of African American and American literary history. In this course you will have the opportunity to explore the historical trajectory of the Slave Narrative, looking at early formulations of its structure, purpose and conventions—especially in terms of gender and race, subsequent various permutations, and the eventual development of the Neo-slave Narrative as its resurrection, which adds to the complexity and theoretical impact of the literary autobiography from black perspectives.

ENGLISH 5559 African American Migrations in Literature Credits: 3

The course examines representations of two different trajectories of migration in African American literature: African American journeys from the south to northern and mid-western regions of America, and concurrent migrations of Caribbean people to the US in the early twentieth century.

ENGLISH 5560 Special Topics Credits: 1-4

The professor who gives this course determines what its content shall be. All aspects of English studies are within its possible range.

ENGLISH 5561 Shakespeare:Tragedies And Romances Credits: 3

A study of Shakespeare's major tragedies and late romances with special emphasis on his dramatic literature after 1600. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5562 Restoration And 18th- Century Drama Credits: 3

The drama after the restoration of the monarchy and the reopening of the theatres through the 18th century. Special emphasis is placed on the comedy of manners and the heroic drama in the Restoration and the sentimental comedy in the 18th-century. Includes such playwrights as Dryden, Congreve, Etherege, Wycherley, Steele, Lillo, Cumberland, Sheridan, and Goldsmith. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5563 Contemporary Drama Credits: 3

A study of contemporary drama: Continental, British, and American, including history and development, critical theory and literary evaluation. This course will focus on the more recent writers, including the absurdists, with special attention to experimental drama. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5564 Medieval Methods & Paleography Credits: 3

This course examines the methodology and historiography of Medieval Studies. Through an introduction to paleography, the study of medieval handwritings, it prepares students for advanced work in Medieval and Renaissance studies. Using an interdisciplinary approach, this course will examine the historical and cultural settings for medieval texts, their physical form and production, as well as the tradition of textual transmission in the medieval world. In addition to gaining familiarity with the many different types of primary sources, such as literary, artistic, legal, and notarial sources, students will be exposed to methods for practical archival work in various European nations.

Prerequisites: First Year Latin.

ENGLISH 5565 Studies In Modern Novel Credits: 3

An intensive study of no more than three major 20th- century novelists. The content of the course will change depending on the instructor. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5566CA Cluster Course: Images Of The Human Body In The Renaissance Credits: 3

Focusing on Renaissance conceptions of the human body, this cluster treats the following topics as they are reflected in Renaissance literature, art, astrology, astronomy, biology, anatomy, medicine, and politics: A) The dignity of the human body B) Microcosm and macrocosm. C) The human body and the heavens D) Stranger manifestations: freaks and beasts E) The humors F) Disorders of the human body G) The body politic H) The human body as an object of study.

ENGLISH 5566CF Courts And Culture In The Middle Ages Credits: 3

This cluster course offers an interdisciplinary approach to the study of the Middle Ages, focusing on medieval cultures in Europe. Arranged around a series of themes, the cluster will read a variety of documentary and literary texts to investigate not only the "high culture" of the courts but also the interactions of people from various social backgrounds in Western Europe.

ENGLISH 5575 Advanced Creative Writing: Creative Nonfiction Credits: 3

This course is devoted to the study and crafting of the personal essay. Students will explore - and - practice many different varieties of this diverse form. Whether in the guise of aesthetic appreciation, cultural critique, personal history, political reportage, or travelogue, our course readings are first and foremost PERSONAL narratives, both troubled and enriched by their subjectivity (the essay's 'I'). Students will study the many challenges particular to this form (most of which concern notions of truth, and its rendering) and strive to overcome them as they create vivid personal narratives of their own.

ENGLISH 5582 European Literature: 18th Century Credits: 3

The 18th-century course will focus on a representative sampling from authors such as Corneille, Racine, Moliere, Voltaire, Prevost, La Bruyere, La Rochefoucauld, Montesquieu, Diderot, Rousseau, Schiller, Goethe, and Grimmelshausen. Students will make in-class presentations and submit papers requiring research and bibliographical work.

ENGLISH 5591 Research In Selected Fields Credits: 1-3

Individual study under the direction of a senior member of the department, leading to the writing of a formal or scholarly paper. May be repeated for credit.

ENGLISH 5598A MFA Thesis Credits: 3-6

Under the guidance of a graduate MFA faculty member, students completing the MFA must complete and orally defend a publishable or producible manuscript. May be repeated for a maximum of six hours credit.

ENGLISH 5599 Research And Thesis Credits: 1-9

A student, with permission of the graduate committee, may write a thesis for 3 hours credit.

ENGLISH 5600 Introduction To Doctoral Study In English Credits: 3

Introduction to research skills necessary for doctoral work, particularly for writing the thesis; attention will be paid both to traditional skills such as bibliography and to computer skills.

ENGLISH 5601 Culminating Experience in Literature Credit: 1

Under the guidance of a graduate faculty member in English, students following the program of study in Literature must revise and orally defend a 20-30 page paper in Literature on a pass/no pass basis.

ENGLISH 5602 Culminating Experience in Language & Literature Credit: 1

Under the Guidance of a graduate faculty member in English, Students following the program of study in Language Literature must revise and orally defend a 20-30 page paper in Language Literature on a pass/no pass basis.

ENGLISH 5603 Culminating Experience in Manuscript, Print Culture, & Editing. Credit: 1

Under the guidance of a graduate faculty member in English, students following the program of Study in Manuscript, Print Culture, and Editing must revise and orally defend a 20-30 page paper in Manuscript, Print Culture, and Editing on a pass/no pass basis.

ENGLISH 5650 Doctoral Seminar Credits: 3**ENGLISH 5691 Doctoral Research In Selected Fields Credits: 3**

Individual study under the direction of a senior member of the department leading to the writing of a formal or scholarly paper. May be repeated for credit.

ENGLISH 5699 Research And Dissertation Credits: 1-15

Research and preparation for the doctoral dissertation.

ENGLISH 5899 Required Graduate Enrollment Credit: 1

Entrepreneurship (ENT)

Courses

ENT 5508 Corporate Entrepreneurship and Innovation: Meeting the Management Challenge Credits: 3

This course seeks to equip students with the skills required to develop new ideas and create viable new businesses within the context of an established organization. The course will address the development of an internal culture of innovation, processes for reviewing ideas and for developing business concepts, strategic analysis, and positioning for competitive advantage.

Prerequisites: Enrolled in a Bloch School graduate program.

ENT 5525 Entrepreneurship: Managing Creativity And Innovation Credits: 3

The course examines the nature of creativity and innovation and how entrepreneurship involves the ability to identify market opportunity based on new ideas. Detailed attention is given to the entrepreneurial process: the concepts, skills, know-how and know-who, information, attitudes, alternatives and resources that entrepreneurs need to manage creativity in the process of creating something with tangible economic value.

ENT 5529 Entrepreneurship Scholars Credits: 3

In this course, students will acquire the skills required to manage and grow a successful new venture through hands-on, real-world work on their own venture. Students will work with the instructor and at least one mentor to identify specific deliverables and a long term venture plan. Students will manage their enterprise, attend a series of workshops, and work with their peers, instructional coaches and mentors to further their venture.

ENT 5531 New Product Development Credits: 3

A systematic overview of the management issues that arise during the process of new product development (NPD). Students learn integration across the traditional management functions and the tools and concepts for linking development to strategy and for managing the development process for speed, efficiency, and market impact. Students will develop a physical prototype of a product that meets and exceeds real customer needs.

ENT 5533 Technology Management Credits: 3

This course introduces the student to formal frameworks for considering ethical, management, and commercial opportunities and challenges of new technologies. The student will consider the business model, business process, and commercial impact of cutting-edge technologies in a survey-style format. Technologies will be considered both from the perspective of an established organization seeking to innovate, as well as from the perspective of a new startup.

ENT 5535 Small Business Management And Entrepreneurship Credits: 3

This course focuses on the nature of the entrepreneurial organization; its volatility and flux, where standard operating procedures are lacking and organizational structure, culture and leadership style are created anew each day. Successful small business management requires that a series of developmental challenges be identified and addressed if the venture is to succeed.

ENT 5545 Entrepreneurship And New Venture Creation Credits: 3

The objectives of this course are: (1) to build personal appreciation for the challenges and rewards of entrepreneurship in an independent mode by examining/simulating its environment; (2) to present and examine, through the use of complex case studies and high level guest/lectures, economic, legal and managerial mechanisms proven useful in creating new wealth; and (3) to foster continued development of venture ideas, suitable as career entry options or for investments, using a tutorial approach to business plan development, presentation and evaluation.

ENT 5552 Entrepreneurial Marketing Credits: 3

This course exposes students to the objectives, challenges, and requirements for effective, results-oriented marketing activities and sales efforts for the entrepreneur/new venture. Key topics include the selection, design, and budgeting of entrepreneurial marketing and advertising programs, along with effective selling, customer acquisition, and service/retention efforts.

ENT 5561 Product and Service Innovation Credits: 2

Product and Service Innovation provides students with experience in new venture creation and product innovation management. Each learning team will be challenged to uncover opportunities in industry. In the process, students will explore customer preferences and translating preferences into the development process.

Prerequisites: Admission to the Executive MBA program.

ENT 5563 Social Entrepreneurship Credits: 3

This course introduces students to social entrepreneurship through lectures and discussions, key readings, guest speakers such as social entrepreneurs, case studies, videos, service-learning activities, and group assignments. Students will develop an understanding of the social entrepreneurship process, the differences between social entrepreneurship and business entrepreneurship, social enterprise, and different revenue streams including the importance of sustainability. In this course, students will develop a social entrepreneurship project proposal on a social problem in collaboration with a non-profit organization in the Kansas City area.

ENT 5567 Strategy and New Venture Creation Credits: 3

Strategy and New Venture Creation provides a capstone experience for Executive MBA students. Students are exposed to and experience entrepreneurship topics relevant to high-growth potential new ventures including the various stages, processes, and issues involved with creation through to venture harvest / exit. Through completion of the course students will understand and undergo the process for new venture creation, developing specific skills of benefit in both entrepreneurial and corporate environments.

Prerequisites: Admission to the Executive MBA program.

ENT 5576 Real Estate Property Management Credits: 3

This course explores the complexities and integration of property and portfolio management which are critical to the creation, control and capture of real estate value. Students learn how to approach real estate in a more holistic manner by integrating management functions that range from individual property types to portfolios of properties. Students learn how to incorporate marketplace factors in their decisions and apply modern portfolio theory and other tools to construct and manage properties and portfolios in a socially responsible manner. Using experiential methods students learn to apply critical thinking to solve complex property and portfolio management problems.

Prerequisites: ENT 5571.

ENT 5585 Entrepreneurial Finance and Venture Capital Investment Credits: 3

This course exposes students to the process of financing and investing in a new venture. The primary objective of this course is for students to develop a good understanding of the objectives, strategies, and challenges in financing and valuation of entrepreneurial firms through analyzing unique financial issues these firms and their investors face. Students will develop skills for assessing new venture financial viability, cash needs, funding sources, valuation, and funding structure.

ENT 5587 Special Topics Credits: 3

Special topics in entrepreneurship.

ENT 5591 Small Business Management Practicum Credits: 3

An integrated management course designed to examine the principles of business management applicable to solving the problems of small and medium size businesses and assisting in their development.

ENT 5595 Internship Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community.

ENT 5597 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

ENT 5681 Multivariate Statistical Methods-II Credits: 3

Theoretical and research applications of MANOVA, canonical correlation, multiple discriminant analysis, factor analysis, and introduction to structural equation modeling using appropriate software. Students are expected to undertake a major research project during this class and to apply appropriate multivariate statistical analyses to their chosen academic research topic.

ENT 5682 Structural Equation Modeling Credits: 3

This course presents structural equation modeling. It includes a review of regression, as well as the study of path analysis, including model specification, methods of estimation, recursive and non-recursive models; direct, indirect, and total effects methods of estimation; single and multi-group analyses; moderators; mediators; structural equation model specification; identification, methods of estimation, second-order factor analysis, and the assessment of casual structure. Students are expected to continue a research project started in ENT 5681.

ENT 5683 Mathematical Models For Entrepreneurship Credits: 3

The purpose of this course is to provide an introduction to mathematical models in entrepreneurship and related disciplines. Classes will focus on the use of mathematical models to characterize the nature of various entrepreneurship-related decisions in complex environments. For each topic considered (e.g., RD investment decisions in new product entry, diffusion, and marketing mix variables), students will examine select examples of scholarly articles. Presentations and discussions are designed to help students understand and critique existing models and stimulate the development of new theoretical viewpoints.

ENT 5691 Doctoral Seminar In Theoretical Foundations Of Entrepreneurship I Credits: 3

ENT 5691 is designed as a broad survey of major topics in the field of entrepreneurship. Its objective is to familiarize students with some of the primary theoretical underpinnings of the field as well as some of the common and/or promising methodological approaches to the study of entrepreneurial phenomena. Topics covered in the course include a theoretical overview, entrepreneurs, environment and organizational founding.

Prerequisites: Doctoral standing.

ENT 5692 Foundations Entrepreneurship Credits: 3

ENT 5692 is designed as a continuation of ENT 5691, providing a broad survey of major topics in the field of entrepreneurship. Its objective is to familiarize the student with some of the primary theoretical underpinnings of the field as well as some of the common and/or promising methodological approaches to the study of entrepreneurial phenomena. Topics covered in the course include: entrepreneurship's links with other disciplines, venture capital and venture capitalists, new venture strategy, new venture performance, growth processes and challenges, and entrepreneurial networks and alliances.

ENT 5693 Technology, Innovation, And Entrepreneurship Credits: 3

This seminar will explore academic literature of technology, innovation, and entrepreneurship. Specific topics include emerging technologies, evolutionary theory, building capabilities based on networks, organizational learning, technological innovation, institutional economics, network externalities, knowledge transfer, technological trajectories and path dependencies.

Prerequisites: Doctoral standing.

ENT 5694 Doctoral Seminar In Theories Of The Firm And Strategy Credits: 3

In this course, students will become familiar with and develop an in-depth understanding of the concepts, models, and paradigms that collectively form the foundation for strategic thinking. Students will develop the ability to critically integrate findings from strategic research programs. Employing an appreciation for the interdisciplinary nature of strategic marketing and management, the purpose is to develop a keen awareness of major gaps that exist in the strategic literature. Students will strengthen the skills needed to conduct original strategic marketing research that can be published in the leading academic journals.

Prerequisites: Doctoral Standing.

ENT 5699 Dissertation and Research in Entrepreneurship and Innovation Credits: 1-12

Dissertation research and writing in Entrepreneurship and Innovation Discipline.

ENT 5899 Required Graduate Enrollment Credit: 1

Environmental Sciences (ENV-SCI)

Courses

ENV-SCI 5550 Ecotoxicology Credits: 3

This course addresses the fundamentals of ecotoxicology, integrating the sciences of ecology and toxicology. Students will learn the biological basis for pollutant effects on individuals and populations of plants and animals, how pollutant intensity varies as a function of bioavailability, the basics of risk assessment, and how pollutant effects are modified by ecological interactions within communities and ecosystems. The ultimate goal of ecotoxicology is to predict the effects of pollution within an ecological context.

Prerequisites: BIOLOGY 108, CHEM 211, CHEM 212R.

Euphonium (EUPHNM)

Courses

EUPHNM 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

EUPHNM 5500A Graduate Euphonium-Secondary Credits: 2

EUPHNM 5500B Special Applied Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

EUPHNM 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

EUPHNM 5501 Graduate Euphonium - Master's Performance Credits: 4

EUPHNM 5601 Graduate Euphonium - Doctoral Performance Credits: 4

Finance (FIN)

Courses

FIN 5501 Economics For Administration Credits: 3

This course is designed for graduate students in the School of Business and Public Administration. Topics include the theory and determination of national income, fiscal policy, monetary theory and policy, production and cost theory, and market structure.

FIN 5502 Corporate Financial Management I Credit: 1.5

This course provides a rigorous distillation of time value of money analysis techniques, methods which form the basic quantitative approach used in corporation finance. The three main topic areas covered during the course are the principles of time value of money analysis itself, its application to the valuation of corporate bond and equity securities, and the quantitative decision making rules utilized in corporate capital budgeting analysis.

Prerequisites: ACCTNG 5501.

FIN 5509 Financial Management Credits: 3

An introduction to the role of financial management through the development of a conceptual framework appropriate for financial decision making. Generally, financial management is charged with the responsibility for obtaining and effectively utilizing the funds necessary for the operation of an enterprise. As such, the conceptual framework includes elements of financial planning (financial analysis, cash budgeting and profit planning), capital budgeting (rate of return and cost of capital), and basic considerations of alternative sources of funds.

Prerequisites: Student must be enrolled in a Bloch School graduate program.

FIN 5515 Managerial Economics Credits: 2

This course studies the relationships between the economic theory and system as a whole and the ways in which their functioning is affected by the behavior of the interdependent sectors of which they are composed. Students will explore the major factors and determinants of economic prospects relevant to profit-maximizing production and pricing decisions for the firm.

Prerequisites: admission to executive MBA program.

FIN 5532 Financial Management Credits: 3

An introduction to the role of financial management through the development of a conceptual framework appropriate for financial decision making. Generally, financial management is charged with the responsibility for obtaining and effectively utilizing the funds necessary for the operation of an enterprise. As such, the conceptual framework includes elements of financial planning (financial analysis, cash budgeting and profit planning), capital budgeting (rate of return and cost of capital), and basic considerations of alternative sources of funds.

Prerequisites: ACCTNG 5517, DSOM 5508, and FIN 5501.

FIN 5537 Enterprise Risk Management Credits: 3

Students conduct a comprehensive assessment of the physical, reputation, emotional, financial, and facilities risks associated with an organization and its events. They must also assess each risk based on its probability of occurrence and severity of consequences and make decisions about accepting, modifying, transferring, and/or eliminating risks based on those assessments.

Prerequisites: FIN 5532.

FIN 5550 Advanced Financial Management Theory And Policies Credits: 3

Advanced financial management covering topics such as working capital, financial structure, cost of capital, dividend policy and valuation. Discussions include both financial theory as well as financial policy. Includes exposure to literature central to the development of finance theory. Recommended preparation: FIN 235 or FIN 5509.

FIN 5551 International Financial Management Credits: 3

This course analyzes present and future international financial market conditions and extends the decision-making tasks of financial management into the context of problems of the international and foreign financial systems. The financial constraints of the international business environment and their effect on standard concepts of financial management are studied along with international currency flows, capital structure problems, working capital management, foreign investment, and international banking practices. Recommended preparation: FIN 235 or FIN 5509.

FIN 5552 Financial Markets and Institutions Credits: 3

This course introduces students to U.S. financial markets and institutions, explaining how they operate, how they promote economic growth and well-being, and how they malfunction in financial crises. Among the financial markets examined are those for short-term debt, mortgages, government and corporate bonds, and equity. Financial institutions studied include investment banks, commercial banks and savings institutions, pension plans, mutual funds, hedge funds, and private equity funds. The course also examines the role of the Federal Reserve in the financial system and the nature and purpose of financial regulation. Recommended preparation: FIN 325 or FIN 5509.

FIN 5553 Investment Analysis Credits: 3

Development of a theoretical framework applicable to the solution of problems related to creation and management of the investment portfolio. Consideration is given to the analysis of risk, functions of security markets, sources of information, evaluation of securities, and measurement of investment return. Recommended preparation: FIN 235 or FIN 5509.

FIN 5556 Management Of Financial Intermediaries Credits: 3

This course addresses the management operations of selected financial intermediaries including commercial banks and thrift institutions. Attention is given to asset-liability structure, the development and delivery of financial services, institutional structure, legal and regulatory factors, and the dynamics of the competitive environment. Recommended preparation: FIN 325 or FIN 5509.

FIN 5557 Derivative Securities Credits: 3

This course is designed to introduce students to the basic principles of financial risk management. The student should develop a working knowledge of issues regarding both the theoretical valuation and application of derivative securities. Applications will focus on techniques designed to manage financial risks in the corporate environment. Specifically, the course will focus on using futures, options, and swaps to hedge financial risks. Valuation issues will be explored to identify theoretical pricing fundamentals that can be applied toward valuing newly developed securities. Recommended preparation: FIN 235 or FIN 5509.

FIN 5560 Financial Modeling Credits: 3

The primary objective of this course is to introduce students to some of the fundamental quantitative methods used in investment analysis. The student should develop a working knowledge of measuring risk and return, probability theory, sampling and estimation, hypothesis testing, correlation analysis, regression and time series analysis. The course will emphasize experimental learning by applying these concepts to real data in a spreadsheet environment. Recommended preparation: FIN 235 or FIN 5509.

FIN 5561 Financial Statement Analysis Credits: 3

Students will take an in-depth look at the external financial statements that are prepared by corporations, including the tools needed to organize, summarize, and understand corporate financial data for use in decision making. Ratio analysis, trend analysis, earnings forecasting, bankruptcy predictors statistical methods important to finance, and financial data bases are among the topics that will be covered. Recommended preparation: FIN 235 or FIN 5509.

FIN 5562 Fixed Income Analysis Credits: 3

The primary objective of this course is to provide an overall view of the role of debt markets in the modern economy. The course will cover the characteristics of instruments traded in money and capital markets; determinants of and the relationships between different security prices; and international aspects of financial markets. Topics include: valuing fixed income securities, managing interest rate risk, interest rate theory, the organization of bond markets and the structure and pricing theory underlying the mortgage-related fixed income market. Recommended preparation: FIN 235 or FIN 5509.

FIN 5563 Valuation/Mergers and Acquisitions Credits: 3

The primary objective of this course is to introduce students to techniques used to value both exchange-traded and private firms. Students should apply these techniques to cases involving mergers and acquisitions, initial public offerings private firm valuation and the valuation of a publicly traded stock. Recommended preparation: FIN 235 or FIN 5509.

FIN 5564 Portfolio Management Credits: 3

The primary objective of this course is to introduce students to some of the fundamental portfolio management tools used by practicing investment professionals. The student should develop a working knowledge of issues regarding portfolio construction, asset allocation, mean-variance optimization, performance measurement, and client relationship management. Recommended preparation: FIN 235 or FIN 5509.

FIN 5565 Alternative Investments Credits: 3

The primary objective of this course is to introduce students to investing in alternative assets. The student should develop a working knowledge of various types of alternative investments and how they impact the risk-return profile of a portfolio. The course will cover investments in hedge funds, private equity, real estate, commodities, real assets, energy, and infrastructure. Recommended preparation: FIN 235 or FIN 5509.

FIN 5566 Financial Plan Development Credits: 3

Personal financial planning differs for each of us for a variety of reasons including age, family, wealth, needs, income, and personalities to name a few. Nonetheless the tax, financial, and risk environments which inspire us to set goals are similar for all of us. Financial planners must take all of these financial and nonfinancial factors into consideration as they devise a plan for their clients. Our objectives, therefore, are to study the personal financial planning process and environment, examine the questions of financial planning, learn financial planning techniques, and develop the ability to prepare integrated financial plans for our clients.

FIN 5567 Payment Systems Credits: 3

Payment systems are central to modern economies, underpinning nearly all economic exchange among consumers, businesses, and government entities. Payment systems in the U.S. have undergone fundamental changes recently. Yet, these systems are among the least studied and least understood components of our economy. The purpose of this course is to provide an in-depth knowledge of U.S. payment systems and an analytical framework for evaluating and responding to ongoing changes in the payments landscape.

FIN 5568 Organizational Finance Credits: 2

Organizational Finance covers the fundamentals of finance with an emphasis on learning how to critically think as a business leader with a financial mindset.

Prerequisites: Admission to the Executive MBA program.

FIN 5576 Fundamentals of Fintech Credits: 3

This course will introduce students to Fintech and provide an overview of the main areas in which it is disrupting finance. These areas include lending and equity investment (algorithmic lending, P2P lending and crowdfunding platforms); financial market infrastructure (cryptocurrencies, blockchain technology, smart contracts); portfolio management and financial advice (robo-investment); and financial trading (algorithmic trading, digital trading platforms). Students will learn how the new financial technologies work, how incumbents and new entrants might profit from the technologies, and how the technologies could affect the efficiency, accessibility, fairness, and security of the financial system.

Prerequisites: FIN 5532.

FIN 5580 Organizational Valuation & Financial Modeling I Credits: 2

This course will cover the concept of risk and reward and that to eliminate risk is to eliminate reward. We will delve into how management considers the entity's risk appetite in evaluating strategic alternatives, setting related objectives and developing mechanisms to manage related risks.

Prerequisites: Admission to Executive MBA program.

FIN 5582 Seminar In Finance Credits: 3

Advanced work in financial management, investment analysis, and financial markets and institutions will form the basis for the Seminar. Each topic selected will provide the opportunity for an investigative study on the part of the student. Major problems, hypotheses, and cases, together with the literature addressing the specific topic, will serve as the springboard for classroom activity. Both written and oral reports are required.

FIN 5587 Special Topics Credits: 3

Special topics in finance.

FIN 5595 Internship Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community.

FIN 5597 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

FIN 5899 Required Graduate Enrollment Credit: 1

Flute (FLUTE)

Courses

FLUTE 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

FLUTE 5500A Graduate Flute-Secondary Credits: 2**FLUTE 5500B Special Applied Studies Credits: 2**

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

FLUTE 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

FLUTE 5500JC Applied Jazz Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied jazz study in an area other than, and in addition to, their primary performance study.

Prerequisites: Graduate status.

FLUTE 5501 Graduate Flute - Masters Performance Credits: 4

FLUTE 5601 Graduate Flute - Doctoral Performance Credits: 4

Foreign Language (FRN-LNG)

Courses

FRN-LNG 5899 Required Graduate Enrollment Credit: 1

French (FRENCH)

Courses

FRENCH 5500CF Courts and Culture in the Middle Ages Credits: 3

This cluster course offers an interdisciplinary approach to the study of the Middle Ages, focusing on medieval cultures in Europe. Arranged around a series of themes, the cluster will read a variety of documentary and literary texts to investigate not only the "high culture" of the courts but also the interaction of people from various social backgrounds in Western Europe.

Prerequisites: admission to the graduate program in Romance Languages.

FRENCH 5512 17th-century French Literature Credits: 3

Selected readings in the literature of the 17th century, with an emphasis on non-dramatic works.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5513 18th-century French Literature Credits: 3

Emphasis on philosophical and social significance. Authors may include Marivaux, Beaumarchais, LeSage, L'Abbe Prevost, Montesquieu, Rousseau, Diderot.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5514 Medieval Literature Credits: 3

Selected readings in various genres including epic, romance, theater and lyric. Emphasis will be placed on the intertextual relations and the cultural and historical context surrounding text production in the Middle Ages.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5517 16th-century French Literature Credits: 3

Selected readings in prose and poetry from Marot through Astree. Authors may include Rabelais, Ronsard, du Bellay, Montaigne, Marguerite de Navarre.

FRENCH 5520 Non-Dramatic 17th-century French Literature Credits: 3

Evaluation and reading of the works of Malherbe and contemporaries, of Descartes and Pascal and contemporaries, and of the great authors at the height of the classical period.

FRENCH 5524 19th-century French Literature Credits: 3

Selected readings in various genres from Romanticism through symbolism.

FRENCH 5540 Medieval Romance Credits: 3

The various movements of French medieval romance from the 12th through 15th centuries with an emphasis on the 12th and 13th centuries. Analysis of literary technique and socio-historical context will be stressed. No knowledge of Old French is assumed.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5543 Early French Theater Credits: 3

An examination of the development of French theater from Late Antiquity through the Renaissance, including religious and secular drama. The focus is on literary analysis of the dramatic texts, with some consideration of theater history and dramaturgy.

Prerequisites: Admission to the MA in Romance Languages Literature program.

FRENCH 5544 Renaissance Poetry Credits: 3

French Poetry from the Grand Rhetoriqueurs through the Pleiade. Study of poetic forms, major poets and schools, and different approaches to analyzing poetry.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5545 Epistolarity and the Novel Credits: 3

Explorations of the genre through the analysis of 17th- and 18th- century French novels. Introduced by a theoretical review.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5546 17th-century French Drama Credits: 3

The classical period: Emphasis on Corneille, Racine and Moliere.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5547 19th-century French Poetry Credits: 3

The study of the poetry and dominant poetic movements of the 19th century, with special attention given to different approaches to its analysis.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5548 20th century French Theater Credits: 3

Analysis of major currents of French theater of the 20th Century, with emphasis upon the postwar period and its movements.

FRENCH 5552 Medieval Poetry Credits: 3

A study of medieval poetry including religious and secular poetry, Provençal and Old French lyric, the influence of poetry in other genres such as romance and theater, later medieval poetry of the 14th and 15th centuries, as well as a discussion of the origins of the lyric.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5553 Lyon, Crossroads of France and Europe Credits: 3

Lyon, Crossroads of France and Europe

FRENCH 5554 The Intellectual Origins of the French Revolution Credits: 3

Study of philosophical and political texts by Montesquieu, Rousseau, Voltaire, Diderot, etc. on government, society, language, freedom and equality. Critical study of the Enlightenment.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5555 Fin-De-Siecle and Belle Epoque Credits: 3

Study of the literary, cultural and historical context of this time period in French history, for example: Symbolism, Decadence, and the years 1900-1914.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5556 20th-century French Poetry Credits: 3

The study of 20th-century poetry with special consideration given to different approaches to its analysis.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5561 20th century French Narrative Credits: 3

The analysis of major currents in French 20th-century narrative, especially fiction and film. Courses will be organized around narrative themes or historical events and will include social and cultural components.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5563 19th-century French Fiction Credits: 3

Studies in the birth, development, and variation of French Romanticism. Readings include de Stael, Senancour, Constant, Hugo, Stendhal and Merimee. The advent of realism and naturalism in France. Readings include Balzac, Flaubert, Daudet, De Maupassant, and Zola.

FRENCH 5570 Studies in Critical Thought Credits: 3

Various currents of 20th-century literary criticism and their political and historical contexts.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5571 Autobiography Credits: 3

Analysis of autobiographies and autobiographical texts such as diaries and memoirs together with theoretical texts on the genre. The concentration of different periods or issues may change from semester to semester, i.e. the art of autobiography as practiced by 20th-century writers, especially women.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5572 Francophone Studies Credits: 3

Study of different national Francophone literatures. Reading may include writers from Quebec, Haiti, Africa, Louisiana, Vietnam, the French Indies, etc.

Prerequisites: Admission to M.A. in Romance Languages and Literature program.

FRENCH 5580 Special Topics Credits: 1-3

Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes.

FRENCH 5589 Survey of French Theater Credits: 3

A survey of the major French playwrights and their plays from the 17th through the 21st centuries. Historical and cultural influences will be covered as well as the specificities of the genre from the perspective of how the plays are performed and how we read them.

FRENCH 5590 Directed Studies in French Literature Credits: 1-3

Intensive readings in a field or literary figure to be selected by the student in consultation with the instructor. Available only when student cannot take regularly scheduled courses.

General Practice (G-PRAC)

Courses

G-PRAC 5721 General Practice Clinic I Credits: 1-10

G-PRAC 5722 General Practice Clinic II Credits: 1-10

G-PRAC 5723 General Practice Clinic III Credits: 1-10

G-PRAC 5728 Dental Implantology Credit: 1

The course is designed to include the following topics: history of implantology, implant materials and designs, fibrous and osseous integration theories, bioinert and bioactive retention, indication and case selection, technique methodology, anatomical considerations and reasons for failure, prosthetic considerations using several systems and necessary radiographic aids, surgical stent and laboratory with simulated insertion of an implant.

Geography (GEOG)

Courses

GEOG 5502 Environmental Remote Sensing and Digital Image Analysis Credits: 4

This course will provide students with innovative techniques for landscape-level environmental analysis, geographic and geological studies, earth science research, and environmental resources management using remotely sensed data including satellite images. Students will be taught basic remote sensing concepts and technical skills, including energy radiative transfer processes, in remote sensing, sensors and resolutions, computer-based image processing and classification, and remote sensing/GIS integration.

Prerequisites: GEOG 203.

GEOG 5503WI History and Philosophy of Geoscience Credits: 3

A survey of geoscientific thought since antiquity. The substance of geography will be sought primarily in scholarly treatises, formal analytical systems, and cartography, but the course also addresses geographical principles emerging from the history of such matters as government, law economy, religion, and material culture. Readings, lectures, discussions, research, writing.

GEOG 5504 Biogeography and Landscape Ecology Credits: 3

Principles and applications of biogeography and landscape ecology, emphasizing distribution of major ecosystems and related plants and animal species on earth, biodiversity, landscape patterns and processes, and physical, biological, and human interactions. The course explores ecosystem and landscape analyses using advanced GIS, remote sensing, and spatial modeling methods for real problem solving in environmental and biological research, ecosystem conservation, and urban planning and studies.

Prerequisites: GEOG 203, GEOG 402 (or GEOG 5502).

GEOG 5506 Global Environmental Change Credits: 3

This course will examine the current rates of global environmental change and potential causes in the context of Earth's natural climate variability. The course will follow a seminar format. Students will read and discuss published articles on current and emerging theories of forcing mechanisms in the Earth's systems. Additional in-depth research and written evaluation are required for graduate credit.

GEOG 5507 Advanced Geographic Information Science Credits: 4

Prerequisites: GEOG 203.

GEOG 5509 Urban Geography Credits: 3

Historical development, morphology and functions of urban places, including intercity relationships and the relationship between cities and their hinterlands; emphasis on American cities. Students will complete a series of reports and a term paper.

GEOG 5510 Landscape, Language, Literature, and Law Credits: 3

An examination of the geographic underpinnings and implications of languages, literatures, and jurisprudence. The course explores languages' historic rootedness in the interactions between human beings and their surroundings; the varying geographic expressiveness and discrimination of languages; the effect and significance of literary evocations of landscapes; and the cultural and environmental geographic content of the language of law. Readings, lectures, discussions, writing.

GEOG 5512 Global Tourism Credits: 3

This course is a regional survey of world tourism. Topics include the uniqueness of place, the marketing of tourist destinations, and the cultural, economic, and environmental impacts on host societies.

Prerequisites: GEOG 105 (or GEOG 200, or GEOG 202).

GEOG 5526 Paleocology: Microfossils and Climate Change Credits: 3

Paleocology will focus on questions addressing past environments and past climates based on the ecology of microfossils. Micro-organisms are very sensitive to a wide variety of environmental conditions including temperature, precipitation, hydrology, water chemistry, salinity, habitat, and pollution. The fossil remains of these organisms are used as proxy indicators for reconstructing past environmental conditions, climate change, vegetation dynamics, and human impacts. Students will have the opportunity to process microfossils and make interpretations based on analysis of data.

GEOG 5530 Location Theory Credits: 3

An analysis and evaluation of the basic theories that have been developed to account for the spatial arrangements of economic activity. Emphasis on urban areas as nodes of economic interaction. Three hours lecture and discussion per week.

Prerequisites: GEOG 311, six hours in economics or urban studies.

GEOG 5537 Population Geography Credits: 3

An analysis of human population: how they grow, their changing compositions, and how and why people migrate from one place to another. Basic demographic processes-mortality, fertility, and migrate- and theory and techniques for their study are discussed. The relationships between population growth and population planning, immigration, urbanization and cities, and the environment.

GEOG 5544 Advanced Spatial Data Analysis Credits: 4

This course will focus on advanced computation methods for the analysis and modeling of complex and often non-deterministic processes in the spatial and environmental sciences. Students will be introduced to innovative techniques for analyzing large datasets with attribute spaces of very high dimensionality, including hyper-spectral remote sensing data. Three hours lecture and one hour computer lab per week.

Prerequisites: GEOG 444, elementary statistics, or permission of instructor.

GEOG 5546 Global Water and Sustainability Credits: 3

This course examines the physical characteristics of water and its role in Earth systems. The challenges facing societies in an era of rapidly changing climate are explored.

GEOG 5548 Satellite Climatology Credits: 4

Use of satellite observations to study the climate system. Discussions consider the development of satellite climatology, sensors, platforms and methodologies use to estimate climate variables from radiance measurements. Aspects of climate that are emphasized include cloud climatologies, cloud systems, atmospheric moisture, radiation budget, and land-surface conditions. Three hours of lecture and one hour of lab per week.

GEOG 5597 Graduate Seminar in Geosciences Credits: 3

This graduate seminar examines emerging and current issues in Environmental and Urban Geosciences. Most environmental issues and their solutions are inherently multidisciplinary and are characterized by significant interactions between oceans, atmosphere, land, and society. In addition to examining these issues, this seminar engages students in the process of critically evaluating Earth and human systems studies. The course provides students with a fundamental background of today's important environmental challenges and experience doing the craft of science through critically reading, thinking, writing, and speaking.

GEOG 5598 Special Topics in Geography Credits: 1-3

Advanced independent research in Cultural or Physical Geography.

Prerequisites: Baccalaureate degree.

GEOG 5598A Special Topics in Cultural Geography Credits: 1-3

Advanced independent research in Cultural Geography.

Prerequisites: Baccalaureate degree.

GEOG 5598B Special Topics in Physical Geography Credits: 1-3

Advanced independent research in Physical Geography.

Prerequisites: Baccalaureate degree.

GEOG 5598D Special Topics in Advanced GIS and Remote Sensing Credits: 1-3

Advanced independent research in geographic information science (GIS) and remote sensing.

GEOG 5598F Special Topics: Geostatistics and Modeling Credits: 1-3

Advanced independent research in geostatistics and modeling techniques.

GEOG 5599 Research and Thesis Geography Credits: 1-9

Students will conduct research and writing in support of a thesis topic, which will have been approved in advance by the appropriate graduate advisory committee. Credit load will also be approved in advance by the student's graduate advisor.

Prerequisites: Baccalaureate degree.

GEOG 5690 Special Research Topics Credits: 1-3

Student will produce a major research paper suitable for publication under the direction of their instructor.

GEOG 5699R Research And Dissertation Credits: 1-10

Research for dissertation in partial fulfillment of the Geosciences requirements for the Ph.D. degree.

Geology (GEOLOGY)

Courses

GEOLOGY 5507 Archeological Resources Management Credits: 3

This class examines contemporary issues managing archaeological resources. This class is intended for students seeking work in Cultural Resources Management (CRM); those already working CRM, or student anthropology, environmental studies, geology, geography, public administration and other fields likely to deal with archaeological and historical research or employment setting. This class does not require a background in archaeology.

GEOLOGY 5508 Archaeological Field Survey Methods Credits: 3

this class offers instruction in the basic skills required to conduct field surveys in archaeology and other geosciences disciplines. In the classroom, students learn about the development of archaeology as a scientific discipline and how to recognize some of the basic field data sought by archaeologists. Students learn about mapping and land navigation techniques. The field phase of instruction includes visits to archaeological sites in the region.

GEOLOGY 5509 Field Study in Archaeology Credits: 1-5

This class offers students an opportunity to attend a field school in archaeology. Students will be taught how to: design archaeological research, set-up excavation, keep a wide range of excavation records, make maps and drawings, take photographs related to excavation problems, identify and recover a broad spectrum of artifact and faunal remains, collect samples for specialized analyses and use a wide range of excavation tools. This course will also introduce students to recording and analyzing excavated materials in the archaeological laboratory.

GEOLOGY 5512 Geology and Hazardous Waste Management Credits: 3

Nature, sources and characterization of hazardous waste; collection, transportation and disposal of hazardous wastes. Fundamentals of toxicology and risk assessment. Application of geologic principles and methods in the assessments and remediation of abandoned hazardous waste sites and contaminated aquifers. Review of selected case histories. Experts from government and private organizations will be invited to deliver guest lectures. An out-of-town field trip to a hazardous waste site is required. A term paper based on library research or an approved experimental project is required for graduate credit.

Prerequisites: GEOLOGY 325, GEOLOGY 342, GEOLOGY 350.

GEOLOGY 5513 Advanced Mineral Deposits Credits: 3

Distribution, origin and environmental implications of extractable resources including non-metallic deposits, ores, and selected energy resources.

Prerequisites: GEOLOGY 312, GEOLOGY 325, graduate standing.

GEOLOGY 5516 Understanding and Living with Volcanoes Credits: 3

This course will examine the distribution, tectonic setting, and morphology of a range of volcano types on Earth and a few examples from other planets. Students will study volcanic processes including explosive and passive processes and how we investigate them. This will involve discussion of volcanic hazards and hazard assessment, risk communication, and the challenges of volcanic crises response. The course will also cover how volcanoes impact the local and global economy and Earth's climate.

GEOLOGY 5521 Advanced Methods for Earth and Environmental Science Credits: 3

This course will provide students with an inquiry-based learning experience that focuses on the application of field methods for understanding surface and subsurface earth processes and environmental issues. Students will collect field data at off campus site, conduct periodic monitoring, and analyze samples using departmental instrumentation.

Prerequisites: GEOLOGY 220 (or ENV-SCI 110R), GEOLOGY 220L (or ENV-SCI 110L).

GEOLOGY 5525 Quaternary Geology Credits: 3

The study of Quaternary processes, surficial deposits, and land forms. Course content will cover both the glaciated and nonglaciated portions of the United States as well as the interrelations between Quaternary geology and urbanization. Three hour lecture. Field trips.

Prerequisites: GEOLOGY 314, baccalaureate degree in geology.

GEOLOGY 5531 X-Ray Diffraction and Fluorescence Methods: X-Ray Mthds Geol/Anly Credits: 2

Theory and practical application of x-ray diffraction and fluorescence methods in characterizing geologic materials. Two hours lecture and one 2-hour lab per week for 8 weeks.

GEOLOGY 5532 Icpms Applications in Geology Credits: 2

Theory and practical application of Inductively-Coupled Plasma Mass Spectrometry in the geosciences and environmental sciences. Two hours lecture and discussion, and one 2-hour lab per week for 8 weeks.

GEOLOGY 5534 Hazardous Waste Operation Management Credits: 2

Overview of federal regulations dealing with hazardous waste management, toxicology, hazard communication, site management, air monitoring, operating procedures, and health and safety. The course includes hands-on training on spill control, equipment use and emergency use and emergency response. Practical training involves physical stress and participants must be in good physical health. This course satisfies OSHA's 40 hour training requirement for hazardous waste personnel.

GEOLOGY 5535 Aqueous Geochemistry Credits: 3

This course is directed to two objectives. First it will equip the students with a basic understanding of the geochemical principles and calculations which are directly related to environmental problems and second, it will provide the student with a basic understanding of specific problem areas in environmental geochemistry.

Prerequisites: CHEM 211, CHEM 212R, Baccalaureate degree in geology.

GEOLOGY 5536 Introduction to Scanning Electron Microscopy Methods Credits: 2

Practical introduction to the use of the scanning electron microscope and its accessories, including image production, elemental analysis, and elemental mapping of solid materials. Geological applications will be emphasized, but the methods presented will be useful for microscopic examination of solid materials in any discipline. 2 hours of lecture and lab per week for 8 weeks.

Prerequisites: Permission of the instructor.

GEOLOGY 5541 Environmental Geophysics Credits: 3

Fundamental theory and near-surface applications of the geophysical methods including seismic methods, potential methods, and electrical methods. Emphasis will be placed on the use of these methods in environmental and engineering investigations, addressing such issues as water resources, contaminant transport, geotechnical properties, and archaeological protection. Course will include a field component illustrating application of selected techniques to a local environmental problem.

Prerequisites: Baccalaureate degree in Geology.

GEOLOGY 5542 Electrical Methods in Environmental Geophysics Credits: 3

Fundamental theory and near-surface applications of the electrical geophysical methods; (1) electrical resistivity, (2) electromagnetics, (3) ground penetrating radar, and (4) induced polarization. Emphasis will be placed on the use of these methods in environmental and engineering investigations, addressing such issues as water resources, contaminant transport, geotechnical properties and archaeological protection. Course will include a field component illustrating application of selected techniques to a local environmental problem.

Prerequisites: Baccalaureate degree in Geology.

GEOLOGY 5546 Petroleum Geology Credits: 3

This course addresses the geological habitat of oil and natural gas, the impacts of petroleum on society, subsurface mapping techniques, and the acquisition and interpretation of subsurface and production data.

Prerequisites: GEOLOGY 220, baccalaureate degree in geology.

GEOLOGY 5551 Geotechnics Credits: 4

Integration of the basic principles and concepts from material sciences, rock and soil mechanics, and civil engineering. Mechanical properties, geologic aspects and engineering classifications of earth materials and the effects of physical forces on their engineering behavior will be emphasized. Three hours of lecture and two hours of laboratory each week. Field trips.

Prerequisites: PHYSICS 210, PHYSICS 220, GEOLOGY 350.

GEOLOGY 5555 Environmental Impact Analysis Credits: 3

A systematic analysis of the spectrum of environmental changes related to human use and occupancy in urban settings. Study of the nature of activities such as industrialization, mining, urbanization and transportation, and their effect on the specific site and general region. Methods of measuring aesthetic and economic quality of the urban areas will be explored in an attempt to facilitate writing environmental impact statements.

Prerequisites: Baccalaureate degree in geology.

GEOLOGY 5559 Inquiry-Based Field Studies for Teachers Credits: 3-6

Inquiry-based studies in environmental science, environmental chemistry and geology involving collaborations between course participants, practicing scientists and professional educators. The course is designed especially for pre- and in-service teachers of all levels and contact areas to enhance critical thinking, problem solving and process skills as defined by state and national standards. Projects will balance field and lab studies with analysis and presentation of results through electronic, oral and written means.

GEOLOGY 5561 Geologic Mapping Credits: 3

Analysis of the stratigraphic section in the greater Kansas City area by field investigation. Compilation of descriptive data and the construction of detailed geologic maps. Practical problems to determine the most beneficial use of the land in an area that is rapidly becoming urbanized. Previous field mapping experience highly recommended.

Prerequisites: Baccalaureate degree in geology.

GEOLOGY 5570 Advanced Hydrogeology Credits: 3

This course will focus on advanced groundwater hydrology with emphasis on flow equations and computational modeling in various geologic settings. Students will be introduced to basic analytical skills to derive dynamics of groundwater flow, comprehensive understanding of aquifer characteristics, and interpretation of field based groundwater data using computational simulations.

Prerequisites: Baccalaureate degree in Geosciences, GEOL 370R, or permission of instructor.

GEOLOGY 5571 Tectonics Credits: 3

A detailed inquiry into plate tectonics and the geophysical and geological data that define the motion of lithospheric plates. Global examples of divergent, convergent, and transform plate boundaries will be studied through lectures, discussions, problem sets, and term papers.

Prerequisites: GEOLOGY 325, GEOLOGY 350.

GEOLOGY 5572 Earthquake Geology Credits: 3

This course is detailed inquiry into the study of present and past earthquakes as they are preserved in the seismological, geophysical, and geological record. Global examples of earthquakes will be studied through lectures, discussions, problem sets, term papers, field trips and field projects.

Prerequisites: GEOLOGY 350.

GEOLOGY 5597 Graduate Seminar in Geosciences Credits: 3

This graduate seminar examines emerging and current issues in Environmental and Urban Geosciences. Most environmental issues and their solutions are inherently multidisciplinary and are characterized by significant interactions between oceans, atmosphere, land, and society. In addition to examining these issues, this seminar engages students in the process of critically evaluating Earth and human systems studies. The course provides students with a fundamental background of today's important environmental challenges and experience doing the craft of science through critically reading, thinking, writing, and speaking.

GEOLOGY 5598 Special Topics in Urban Environmental Geology Credits: 1-3

Individual research into practical geoscience problems in the urban environment. Provides opportunity for individual research in applied geology. Topic and method to be established by student and academic supervisor prior to enrollment.

GEOLOGY 5598A Special Topics In Urban Environmental Geology: Petroleum Geology Credits: 1-3**GEOLOGY 5598B Spec Topics In Urban Environmental Geology: Soil/Rock Mechanics Credits: 1-3****GEOLOGY 5598C Sp Topics In Urban Environmental Geol: Stratigraphy/Paleontology Credits: 1-3****GEOLOGY 5598D Spec Topics In Urban Environmental Geology-Environmental Geology Credits: 1-3****GEOLOGY 5598E Special Topics in Energy and Mineral Resources Credits: 1-3**

This course provides students an opportunity for advanced independent research in energy and mineral resources.

GEOLOGY 5598H Special Topics in Urban Environmental Geology - Geochemistry and Mineralogy Credits: 1-3**Special Topics In Urban Environmental Geology - Geochemistry and Mineralogy****GEOLOGY 5598I Special Topics In Urban Environmental Geology Credits: 1-3****GEOLOGY 5598J Special Topics In Urban Environmental Geology: Environmental Sci Credits: 1-3****GEOLOGY 5598K Issues in Waste Management Credit: 1**

This course focuses on the critical problems of managing the waste materials generated in our society. The course includes discussion of various types of waste-municipal solid waste, hazardous (industrial) waste, nuclear and medical wastes. Sources, handling, storage, transportation, treatment and disposal of these wastes are reviewed. Experts from government and the waste management industry give guest lectures.

GEOLOGY 5598M Special Topics in Geostatistics and Modeling Credits: 1-3

Advanced independent research in geostatistics and modeling techniques.

GEOLOGY 5599 Research and Thesis: Geology Credits: 1-9

Individual directed research by the student leading to the preparation of a formal written thesis and oral defense.

GEOLOGY 5690 Special Research Topics Credits: 1-3

Student will produce a major research paper suitable for publication under the direction of their instructor.

GEOLOGY 5699R Research And Dissertation Credits: 1-10

Research for dissertation in partial fulfillment of the Geosciences requirements for the Ph.D. degree.

GEOLOGY 5899 Required Graduate Enrollment Credit: 1

Guitar (GUITAR)

Courses

GUITAR 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

GUITAR 5500A Graduate Guitar-Secondary Credits: 2**GUITAR 5500B Special Applied Studies Credits: 2**

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

GUITAR 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

GUIAR 5500JA Graduate Applied Jazz Studies Credits: 2

One hour lesson weekly. Jury examination is required.

Prerequisites: Graduate status.

GUIAR 5500JB Special Applied Jazz Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. A jury for comments only may be held at the discretion of the faculty.

Prerequisites: Graduate status.

GUIAR 5500JC Applied Jazz Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied jazz study in an area other than, and in addition to, their primary performance study.

Prerequisites: Graduate status.

GUIAR 5501 Graduate Guitar - Masters Performance Credits: 4

GUIAR 5601 Graduate Guitar - Doctoral Performance Credits: 4

Harpsichord (HRPCHD)

Health Administration (HLTH-ADM)

Courses

HLTH-ADM 5551 Leadership and Strategy in Healthcare Credits: 3

This course provides an overview of major leadership and strategic issues in healthcare organizations in the areas of: 1) leadership and organizational dynamics, 2) strategic thinking and planning, 3) population health and health policy, 4) human resources, 5) performance management, and 6) organizational ethics. The course is eligible for inclusion in the Executive MBA program.

Prerequisites: Instructor approval required.

HLTH-ADM 5552 Managing Healthcare Organizations Credits: 3

This course provides an overview of major issues and essential tools in managing healthcare organizations in the areas of: 1) legal and regulatory issues that confront a healthcare organization, 2) healthcare quality and data analysis, 3) patient safety, 4) risk management, 5) process management, 6) healthcare economics, 7) cost and comparative effectiveness, 8) fundamental principles of financial management. The course is eligible for inclusion in the Executive MBA program.

Prerequisites: Instructor approval required.

HLTH-ADM 5571 Financial Management Issues of Health and Human Services Organizations Credits: 3

This course is intended to provide an overview of the financial management problems of health and human services organizations. A broad range of topics is examined: financial statements, ratio analysis, cost accounting, reimbursement and pricing, management of working capital, budgeting and programming, capital financing, and cash management.

HLTH-ADM 5572 Quality and Safety in Health Care Credits: 3

Overview of the quality, safety, and process management concepts, approaches, and issues relevant to healthcare delivery settings, including use of analytical techniques used to identify and mitigate contributing factors and process management tools that enable healthcare organizations to achieve their quality and safety goals.

HLTH-ADM 5573 Health and Social Equity Credits: 3

Examines the complex relationship between the social and political environment and health outcomes. All policy is health policy – economic, transportation, natural and built environments, schools. This course examines how social equity shapes health behaviors and how the life odds in different communities expose the historical legacies of past injustices. Only ten percent of health disparities are explained by access to care, although health care and health insurance dominate the public conversation. Draws on guest speakers, books, journal articles, popular press, film and art; as varied as are the social determinants of health, so are media that explore those relationships.

HLTH-ADM 5577 Leadership and Management in Health Care Organizations Credits: 3

An overview of leadership and management in health care, reflecting the uniqueness of this sector, is provided. Concepts of interprofessional relationships and team-based care delivery are introduced. Approaches to aligning diverse perspectives and interests with organizational priorities, leading change and improvement efforts, and promoting organizational learning are discussed.

HLTH-ADM 5578 Data Analysis for Health Care Managers Credits: 3

Data analysis tools that are useful to health care managers are developed. Common health care data structures and coding systems are introduced using health care databases that track actual patients and providers. Methods of data analysis used in health care management decision-making are studied, including risk-adjustment, contract analysis, quality measurement, cost-effectiveness analysis, and competition analysis.

Prerequisites: PUB-ADM 5510 or equivalent

HLTH-ADM 5580 The Economics of Health and Medicine Credits: 3

We will study health care markets and how they function, with a particular focus on health care markets in the U.S. We will explore economic phenomena that distinguish health care markets, such as price discrimination, adverse selection, moral hazard, public goods, and supplier-induced demand. We will take an in-depth look at the U.S. markets for health insurance, hospitals, physicians, medical devices, and pharmaceuticals and compare the structure of these markets to their foreign counterparts. We will study government regulations and reform efforts and their impact on health care markets. Economic tools that are useful for health care managers (e.g., the analysis of risk, bargaining theory) will also be covered. Recommended preparation: Some mathematical social science.

HLTH-ADM 5581 Health Policy in the United States Credits: 3

This course helps students develop an understanding of the determinants of health, major current health policy issues, and health policy making in the United States. The public policy process and its effects on the organization, financing, and delivery of health care are examined in detail. The roles of key players in health policy formulation and the public policy responses to current health policy are also examined.

HLTH-ADM 5586 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

HLTH-ADM 5587 Special Topics Credits: 3

This course is designed to facilitate one of two purposes: an initial offering of a new course (prior to formal approval) or an initial and possible only offering of new topics.

HLTH-ADM 5595 Internship Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community.

Health Professions Education (HPRE)

Courses

HPRE 5500 Leadership and Administration in Health Professions Education Credits: 3

Current approaches to academic leadership within the context of health professions education. Topics include management skills, problem solving, communication, group skills, motivation, managing conflict, and delegating. Attention to developing skill in presenting, interviewing and in facilitating meetings. Focus on application within the context of health professions education.

HPRE 5508 Principles and Methods of Research Credits: 3

Investigate the role and importance of quantitative, qualitative and mixed-methods research in the health professions. Primary goals are to develop the knowledge and skills to read and interpret educational research in the health professions and to develop a plan to conduct research projects.

HPRE 5522 Curriculum Design in Health Professions Education Credits: 3

Examination of the theory and strategies for the development, implementation, and evaluation of of curricula in health professions education. Focus on contextual factors, learner needs, current models, outcome-based approaches, leadership, and faculty development for design and delivery.

HPRE 5530 Current Issues in Health Professions Education Credits: 3

Consideration of the major social, historical, educational, professional, and cultural issues that affect health professions education today. Focus on investigation of various topics as linked to learning and teaching in the health professions. This course will provide the foundations for the Certificate in Health Professions Curriculum and Evaluation.

HPRE 5535 Community Engagement in Education Credits: 3

Provides a foundation grounded in examination of the forces and factors that shape successful community engagement projects associated with measurable outcomes. Students will apply education concepts in developing a project with community partners to identify needs and implement a health improvement project.

HPRE 5540 Independent Study Credits: 1-3

Focused readings and/or special research project in an area selected by the graduate student in consultation with the advisor.

HPRE 5550 Assessment in Health Professions Education Credits: 3

Focus on the design, implementation and evaluation of tools for assessing student learning and performance in health professions education. Consideration of validity, reliability, writing test items, survey design, checklists, observational assessment, simulations and rubrics. Emphasis on best practices, assessment challenges, and on the effective implementation of comprehensive assessment programs in health professions education.

HPRE 5560 Teaching in Health Professions Education Credits: 3

Emphasis on learning and teaching theories and current research in health professions education as applied to instructional methods, delivery, learning contexts. Focus on individual differences, mentoring and tutoring, and on teaching in clinical, small group and large group situations.

HPRE 5565 Simulation for Health Professions Education Credits: 3

This course is designed to assist learners in developing the skills necessary to teach with simulation. Simulation is an educational methodology that leads to knowledge gains, which are transferrable to patient care settings. This course will focus on the core pedagogical principles and best-available evidence in simulation-based health professions education. The course is designed for adult learners with the goal of assisting each participant in expanding their existing knowledge base and learning to apply it in a meaningful way to everyday teaching and curriculum needs.

HPRE 5566 Teaching about Culture and Health Credits: 3

The course begins with a foundation in cultural competency for health profession educators including content about social determinants of health, health disparities and culturally appropriate care. Curriculum development and instructional design topics including small group facilitation, active learning, case-based learning, use of narrative and media, distance learning, debriefing and assessment are specifically tailored for teaching cultural competency in health professions education.

Prerequisites: HPRE 5560, HPRE 5522, HPRE 5550

HPRE 5580 Program Evaluation in Health Professions Education Credits: 3

Applied research as linked to program development and evaluation in health professions education. Topics include needs assessment, summative and formative evaluations, evaluation paradigms, methodologies, data collection, data analysis, reporting findings. This course is project-based.

Prerequisites: EDUC-R&P 5508.

HPRE 5588 Learning Portfolio in Health Professions Education Credits: 1-3

Learning Portfolio in Health Professions Education (HPRE) is an individualized course which provides the opportunity to document and reflect on academic and applied work related to the learning outcomes of the Master of Health Professions Education program. Students engage in a process of selection, documentation, reflection, and collaboration with the goal of developing deeper understandings regarding their educational development, accomplishments, and application. The course may be taken for 1-3 credit hours per semester, although the full three credit sequence is required.

Prerequisites: Enrollment in the Master's in Health Professions Education program.

HPRE 5599 Summer Conference in Health Professions Education Credits: 3

The Summer Conference in Health Professions Education provides an opportunity for second year students in the Masters in Health Professions Education program to design, deliver and assess a one day, "mini" conference for area health professions educators. Students will work collaboratively, under faculty guidance, to design objectives, organize resources, develop timelines, publicize, deliver and evaluate a conference designed to reflect a particular theme in health professions education. The conference will consist of educational research presentations, hands-on, skill-based workshops, consultations, and literature/resource dissemination. It will serve to showcase student accomplishments and skills and be open to the public.

HPRE 5899 Required Graduate Enrollment Credit: 1

Required enrollment for students who will graduate during a term when they are not enrolled in a course. Option for students who will complete assignments in order to be eligible for graduation.

History (HISTORY)

Courses

HISTORY 5500W Special Topics in History for Graduate Students Credits: 3

HISTORY 5500Z Special Studies: Labor In Industrial America Credits: 3

This course examines the history of work and the working class in the U.S. from 1877 to the present. We will focus on the transformation of the workplace, the rise of the union movement, the nature of cultural and political organizations, workers' relationships with other social groups, and the role played by gender, race, and ethnicity in uniting or dividing the working class.

HISTORY 5501A Religion in America Credits: 3

An in-depth examination of selected aspects of the history of religions in America from the colonial period to the present. Special emphasis will be given to methodological issues in the study of American religious history.

HISTORY 5502 America, 1000-1763: The Formative Era Credits: 3

Early American history encompasses the formative era of many institutions and attitudes which still persist in present-day America. A study of how these patterns and policies emerged will enlighten us as to our current ways our society seeks to adapt to change.

HISTORY 5503 America, 1763-1783: The Revolutionary Heritage Credits: 3

The American Revolution created American history by creating a new nation. What the American Revolution was depends to a large extent upon what Americans think they are or ought to be. The goals of this course, therefore, are twofold: (1) to probe the nature, causes and consequences of the American Revolution; (2) to assess the intentions and behavior of both the Framers of the Constitution in 1763-1783 and the inheritors of modern America.

HISTORY 5504 America, 1783-1828: The National Experience Credits: 3

HISTORY 5505 America, 1828-1852: The Jacksonian Period Credits: 3

HISTORY 5506 America, 1850-1877: Civil War and Reconstruction Credits: 3

HISTORY 5506A History of Christianity to Middle Ages Credits: 3

This course examines the historical and theological development of Christianity from its origins to the High Middle Ages. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major social, institutional, and intellectual force with a focus on pattern of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship.

HISTORY 5507 America 1877-1917: Development of Industrial America Credits: 3

HISTORY 5507A The History of Christianity from the Middle Ages to the Present Credits: 3

This course examines the historical and theological development of Christianity from the High Middle Ages to the present. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major social, institutional and intellectual force with a focus on patterns of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship.

HISTORY 5508A America 1914-1945: The Era of the World Wars Credits: 3

HISTORY 5508B America 1945-Present: Our Times Credits: 3

HISTORY 5511 Medieval Civilization I Credits: 3

Medieval Civilization I

HISTORY 5512 Medieval Civilization II Credits: 3

Medieval Civilization II

HISTORY 5512A Medieval Women & Children Credits: 3

This course explores the roles of women in the social, economic, political, and cultural environments of medieval and early modern Europe. We examine the lives of women in all areas of life, from the ordinary to the extraordinary, in urban and rural environments, from the centers of religious and political power to the margins of society. Focus will be on the world of work for urban and peasant women and on the social and legal institutions of marriage, kinship, and the family. The course makes extensive use of primary source by and about women during this period.

HISTORY 5513 Renaissance Credits: 3

HISTORY 5514 Reformation Credits: 3

HISTORY 5515B 17th And 18th Century European History Credits: 3

This course is designed to present the upper-division undergraduate with a firm grasp of the major intellectual, cultural, political and economic development of 17th and 18th century Europe. It considers the bitter Thirty Years War in Century Europe, the rise of the Netherlands, the fall of Italy and Spain, the rise of constitutional and absolutist styles of government, the scientific revolution, the colonization by Europeans of the Pacific and Indian Ocean Basins, Enlightenment political philosophy, the Agricultural Revolution, and the French Revolution. Also offered for undergraduates as 415B. Graduate students will be held to a higher standard in terms of additional, in-depth historiographic research, writing, and discussion.

HISTORY 5516 The French Revolution and Napoleon Credits: 3

HISTORY 5517 19th Century European History Credits: 3

This upper-division course will survey significant trends in warfare, politics, economics, social relations and culture in 19th century Europe, paying particular attention to the rise of modern ideologies and identities, world hegemony, and the social technologies of dehumanization that foreshadowed the unprecedented inhumanities of the 20th century. Graduates will be held to a higher standard in terms of additional, in-depth historiographic research, writing, and discussion.

HISTORY 5518 20th Century European History Credits: 3

This upper-division course traces the history of Europe in the 20th century. It will survey significant trends in warfare, politics, economics, social relations and culture, paying particular attention to the issues of modernity and postmodernity, imperialism and decolonization, dehumanization and genocide as well as the role of ordinary people in these systems of mass destruction. Graduate students will be held to a higher standard in terms of additional, in-depth historiographic research, writing, and discussion.

HISTORY 5519 Contemporary European History: 1950-2000 Credits: 3

This upper-division course traces the history of Europe in the period of living memory. It will survey significant trends in warfare, politics, economics, social relations and culture, paying particular attention to the rise of globalization and the condition of postmodernity, decolonization and neo-colonization, European unification and everyday life. Graduate students will be held to a higher standard in terms of additional, in-depth historiographic research, writing, and discussion.

HISTORY 5521 Oral History Credits: 3

This course focuses on the methods, theories, ethics, practices, and applications of tools in documenting and recovering the experiences of people hidden from the "traditional records." Through lectures, readings, discussions, and fieldwork, students will learn the various steps in developing a robust oral history project. Students will go out into the community to capture the histories of communities in Kansas City.

HISTORY 5525R European Criminal Justice History, 500-1900 Credits: 3

This course will survey European crime, criminal procedure, policing and punishment between 500 and 1900. Particular attention will be given to changing methods of proof (oaths, ordeals, juries); changing type of criminal activity (banditry, vagrancy, witchcraft, professional theft) and changing penal strategies (the stocks, breaking on the wheel, the workhouse, the prison, the penitentiary). English experiences are emphasized.

HISTORY 5526 Modern Latin America Credits: 3

This course studies social, political, economic and cultural trends in Latin America in the nineteenth and twentieth centuries. Discussion topics include nation building after Independence with an emphasis on gender and race in the creation of national identities and new forms of social stratification; integration of national economies into the world economic system; the expansion of political participation and citizenship; immigration (national and transnational) and the tensions caused by the forces of modernization and tradition. Although the purpose of the course is to provide a general background for a large and diverse region (more than 20 countries), case studies from Argentina, Mexico and Brazil will illustrate the above-mentioned themes and will provide the basis for a comparative regional perspective.

HISTORY 5526R The Scientific Revolution 1500-1700 Credits: 3

HISTORY 5527 The Darwinian Revolution, 1650-1900 Credits: 3

HISTORY 5528A History Of The Body Credits: 3

This advanced course will explore the new field of the history of the body, with particular attention to sexuality and gender. Topics will include the history of sexualities, the body and society, body disciplines, medical practices and representations of illness, beauty, and fashion, and the relationship between sexualities and nationalisms.

HISTORY 5528B Women & Medicine: Patients & Practitioners From Antiquity-Present Credits: 3

This course explores, in a selective fashion, the role of women in Western Medicine both as health care providers and patients. The subject of the history of medicine is too broad to be covered comprehensively in a semester, and so we will focus on diseases or physical conditions which were believed to be limited to women-childbirth, certain mental health conditions, reproductive health, breast cancer-as well as the increasing marginalization of women within the profession of health care providers to those branches concerned primarily with "women's problems."

HISTORY 5531 Medieval England, 1066 to 1485 Credits: 3

HISTORY 5532 Tudor-England, 1485-1688 Credits: 3

This course covers the history of England from the accession of Henry VII in 1485 to the crowning of William and Mary in the Glorious Revolution. Its main emphasis is the Tudor dynasty 1485-1603 with special reference to the transformation of England into a modern state, Re-Reformation, the role of Parliament, etc. The course concludes with the major characteristics of the early Stuart period.

HISTORY 5533 History of Britain 1603-1832 Credits: 3

This course analyzes the rise and fall of the Stuart dynasty and the effects of civil war, rebellion, and religious turmoil on the peoples of Britain. The domination of politics and culture by the aristocracy in the eighteenth century is examined. The rise of the Navy due to constant warfare and the exploration of the Pacific are discussed. The monarchy of George III, the loss of the American colonies, and the wars with Napoleon are examined. Finally, the Agricultural and early Industrial Revolutions are considered through an analysis of the social changes they brought in Britain and the Empire

HISTORY 5534 History of Technology Credits: 3

The course examines technology as it shapes and is shaped by human society. Students will consider technology as a product of historically-specific and sometimes overlapping contexts shaped by culture, economics, natural environments, and social processes.

HISTORY 5536 Modern German History: 1890-1990 Credits: 3

This course traces history of Central Europe from the fall of Bismarck to the reunification of Germany one century later. It will ask students to think critically about the relationship between state and society, elites and 'ordinary' Germans, in the various German-speaking regimes that existed over the course of this era: two empires, two interwar republics, two fascist dictatorships, and three post-fascist republics. All assigned readings will be in English; a background knowledge of European history is recommended.

HISTORY 5537 Nazi Germany Credits: 3

Nazi Germany

HISTORY 5544 Islam & the Arabs: The Formative Period Credits: 3

HISTORY 5545 The Ottoman Empire in the Middle East to WWI Credits: 3

Cross Listings: HISTORY 445.

HISTORY 5546 The Middle East from World War I to the Present Credits: 3

HISTORY 5548 Missouri/Kansas Border Wars Credits: 3

This course explores the history of the Civil War on the Missouri/Kansas border, where residents first shed blood over the issue slavery. An exploration of this most uncivil of wars provides insight into the ways in which societies can be fragmented by ideology and ultimately rebuilt upon different lines.

Prerequisites: undergraduate degree.

HISTORY 5549 Civil War in Memory and Film Credits: 3

This course explores how the era of the Civil War and Reconstruction has been portrayed in film, literature, and art, and if the popular memory of the war accurately reflects the history. We also will discuss how the understanding of this pivotal event in American History has changed over time and how cultural artifacts often say more about the time in which they were produced than the actual history of the Civil War.

HISTORY 5552 Latin American History through the Movies Credits: 3

This course explores the national cinemas and film industries of various regions in Latin America. Students will analyze films both as artistic endeavors and as sociological documents that provide a window into the socio-historical context of the nation in question. This course will also examine the history of Latin American cinema from the beginnings of sound to present.

HISTORY 5554 Women in Modern America Credits: 3

HISTORY 5556 Rise of the City in the U.S. Credits: 3

HISTORY 5556R Kansas City: History of a Regional Metropolis Credits: 3

HISTORY 5557 The American West Credits: 3

HISTORY 5558 Black Civil Rights in the 20th and 21st Centuries Credits: 3

This course examines the fight for black civil rights in the United States in the 20th and 21st centuries, focusing on the Jim Crow period, the fight to end segregation, and the enduring problem of race in the United States.

HISTORY 5558R History of the American South Credits: 3

History of the American South

HISTORY 5559 World War II Film and Propaganda Credits: 3

This course examines film and propaganda, including posters, political cartoons, speeches, and other media, created in prewar or wartime conditions by both the Allies and Axis powers from 1933 to 1945 as it affected World War II.

HISTORY 5561R American Foreign Relations Credits: 3

HISTORY 5562J Japanese Civilization Credits: 3

A survey of Japanese civilization and cultural history from the prehistorical period to the present. Emphasis on the interplay between religion, the arts, politics, and social structure.

HISTORY 5563R Military History of the U.S. Credits: 3

Military History of the U.S.

HISTORY 5566R American Economic History Since 1865 Credits: 3

The course deals with the emergence of Industrial America since 1865. It will cover the rise to dominance of the large modern corporation, with the problem of economic and social instability and stability, with the rise of trade associations, cartels, and government regulation in an unstable economy, and with the evolution of American economic policy and national economic planning.

HISTORY 5566RR American Labor History Credits: 3

This course examines the history of work and the working class in the U.S. from 1750 to the present. We will focus on the transformation of the workplace, the rise of the union movement, the nature of cultural and political organizations, workers' relationships with other social groups, and the role played by gender, race, and ethnicity in uniting or dividing the working class.

HISTORY 5569 Women and Work in Early America Credits: 3

This course examines the ways in which gender, race, region, and class have shaped the historical experiences of American women. Students will trace women's lives from pre-European contact to 1877 through an examination of a wide variety of social, cultural, economic, and political forces and factors.

HISTORY 5570 Introduction to Material Culture Credits: 3

HISTORY 5570R Ancient Egypt Credits: 3

HISTORY 5571 American History Through Film Credits: 3

This course will move through the twentieth century and highlight major themes and developments that reveal the contours of American history as depicted in film. Students will examine the ways in which filmmakers have presented history, paying particular attention to the presentation of political, cultural, and social conflicts.

HISTORY 5571R Ancient Greece Credits: 3

HISTORY 5572R Ancient Rome Credits: 3

HISTORY 5574 Late Antiquity: The Transformation of the Mediterranean World (200-600 AD) Credits: 3

The decline of the Roman Empire and the barbarian invasions transformed the Mediterranean and European worlds, forming the foundation of Europe and the Islamic world. Students will investigate the multicultural society of Late Antiquity and become familiar with the primary sources for the period.

HISTORY 5575 Ancient Israel Credits: 3

Judaism has had a tremendous impact on our civilization and yet most Americans are only dimly aware of its origins and development. This course will trace the roots of the Jewish religion in its historical context from its beginning through the formation of rabbinic culture. The rise of Christianity will be examined in its original Judaic context, and recent discoveries, particularly those pertaining to the Dead Sea Scrolls, will be interpreted.

HISTORY 5575R The History of Ancient Israel Credits: 3

The History of Ancient Israel

HISTORY 5576R Medieval Jewish History Credits: 3

HISTORY 5577R Modern Jewish History Credits: 3

HISTORY 5578R The Holocaust and the State of Israel Credits: 3

The Holocaust and the State of Israel

HISTORY 5579 Public History: Theory and Method Credits: 3

This course explores the theoretical and methodological challenges that surround the public preservation and presentation of history in spaces like museums and historical societies. Students will learn the skills professionals use to communicate historical scholarship to wider audiences and will grapple with the issues around expanding history's stakeholders.

HISTORY 5580 The History Of The American South I Credits: 3

A study of the political, intellectual, cultural, economic, and social development of the American South up to and including the Civil War. Special topics discussed will be the plantation system, slavery, abolition, secession, the Confederacy and the interaction of the region with the nation.

HISTORY 5581 Research Methodologies Credits: 3

An introduction to a variety of research tools and techniques including such topics as evidence, critical method, verification, bibliography, book review, computers, statistics, and archival methods.

HISTORY 5581GR How To - History I Credits: 3

This foundational course in the doing of history will use the "great books" of historical scholarship to introduce graduate students to historical questions, methods, theories, and rhetorical strategies. The goal of the course is for the student to learn how to engage in historical criticism and formulate historical questions for themselves. This required course must be taken in the first year of graduate study in history.

HISTORY 5582 Colloquium In American History I Credits: 3

These courses are designed to acquaint the graduate student with the writings and theories of major American historians. Faculty lectures are combined with student bibliographical essays and the reading of important historical works in order to prepare the student for the final examination taken upon completion of M.A. course work. Books read in the course compose a large proportion of the departmental reading list.

HISTORY 5582A How To - History II A Credit: 1

This course teaches research-proposal writing including how to ask and answer a viable question and become an autonomous researcher in a scholarly community. Students will learn about career paths and development.

Prerequisites: HISTORY 5581GR.

HISTORY 5582B How To - History II B Credit: 1

This course, the second in a two-part sequence, will introduce graduate students to professional obligations and research methodologies of academic and public historians as well as examine diverse career paths for historians. Students will focus primarily on career development curriculum and experiences.

HISTORY 5583 Colloquium In American History II Credits: 3

These courses are designed to acquaint the graduate student with the writings and theories of major American historians. Faculty lectures are combined with student bibliographical essays and the reading of important historical works in order to prepare the student for the final examination taken upon completion of M.A. course work. Books read in the course compose a large proportion of the departmental reading list.

HISTORY 5583GR Medieval Methods & Paleography Credits: 3

This course examines the methodology and historiography of Medieval and Renaissance Studies. Through an introduction to paleography, the study of handwritings, it prepares students for advanced work in these fields. Using an interdisciplinary approach, this course examines the historical and cultural settings for texts, their physical form and production, as well as the tradition of textual transmission in the medieval and early modern world. In addition to gaining familiarity with many different types of primary sources, such as literary, artistic, legal, and notarial sources, students will be exposed to methods for archival work in various European nations.

HISTORY 5584R Colloquium In European History I Credits: 3

The European History Colloquium I will examine some of the crucial problems or watersheds in European history from antiquity through the Reformation. Course requirements include weekly discussions on specific topics and a research paper or project due by the end of the semester.

HISTORY 5585 Colloquium In European History II Credits: 3

The European History Colloquium II will examine some of the crucial problems or watersheds in European history from the Reformation through the 20th century. The course seeks to provide an in-depth study of specific topics and of the associated bibliography.

HISTORY 5585GR Colloquium in U.S. History Credits: 3

Students read broadly in the historiography of a particular historical problem, place, period, or specialization in U.S. History in order to master the relevant literature and hone their skills of historical criticism.

Co-requisites: HISTORY 5581GR.

HISTORY 5586GR Colloquium in World History Credits: 3

Students read broadly in the historiography of a particular historical problem, place, period, or specialization in world history in order to master the relevant literature and hone their skills of historical criticism.

Co-requisites: HISTORY 5581GR.

HISTORY 5587R Research Seminar Credits: 3

Students in this course will produce a major research paper under the direction of the instructor: a self-contained thesis chapter, an article for publication, or the equivalent.

Prerequisites: HISTORY 5582A.

HISTORY 5587RA Research Seminar Credits: 3

HISTORY 5587RB Research Seminar Credits: 3

HISTORY 5590 History Of The American South II Credits: 3

A study of the political, intellectual, cultural, economic, and social development of the American South since the Civil War. Topics discussed will be the molding of a "New South," twentieth century internal developments and the interaction of the region with the nation.

HISTORY 5591 Archival Methods Credits: 3

HISTORY 5592 Public History Internship Credits: 1-3

HISTORY 5593 Museum Studies Credits: 3

This course is designed to acquaint students with specific careers in museums and historical agencies; to introduce students to the wide range of operating issues facing those working in the museum profession on a day-to-day basis; and to familiarize students with the organizations, reference works and resources available to develop the skills and training required for those who choose to make this their profession.

HISTORY 5594 Public History and New Media Credits: 3

This course provides students with an understanding of how new media can advance the work of cultural heritage. While contributing to an ongoing digital project, the course will consider how historians utilize digital technology to analyze primary sources as well as how museums use social media to reach broader audiences.

HISTORY 5597 Non-Thesis Research/Reading Credits: 1-6

Individual direction of student reading or research by selected, consenting faculty. This course can be taken only when faculty supervision is unavailable in colloquia or seminars.

HISTORY 5599R Thesis Credits: 1-6

A contribution to knowledge based upon extensive research and reflective of careful analysis. Before writing a thesis, the student must clear the topic and research design with the Supervisory committee.

HISTORY 5680 Doctoral Colloquium Credits: 3

This course will examine the writings and theories of major historians in a particular field of history. The authors, works and intellectual currents which form the basis of the colloquium will vary from semester to semester, depending upon the professor's expertise and design for the course.

HISTORY 5687 Doctoral Research Seminar Credits: 3

Students in this course will produce a major research paper under the direction of the instructor. This shall consist of a self-contained chapter of the dissertation or a work of publishable quality. May be repeated for credit.

HISTORY 5687RB Doctoral Research Seminar Credits: 3

Students in this course will produce a major research paper under the direction of the instructor. This shall consist of a self-contained chapter of the dissertation or a work of publishable quality. May be repeated for credit.

HISTORY 5697 Doctoral-Level Independent Reading Credits: 1-6

Individual reading under the supervision of members of the History Doctoral Faculty in preparation for the Comprehensive Examination for the Ph.D.

HISTORY 5699R Dissertation Credits: 1-15

Course credits in dissertation.

HISTORY 5899 Required Graduate Enrollment Credit: 1

HISTORY 5990 Capstone Credits: 1-6

Horn (HORN)

Courses

HORN 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

HORN 5500A Graduate Horn-Secondary Credits: 2

HORN 5500B Special Applied Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

HORN 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

HORN 5501 Graduate French Horn - Masters Performance Credits: 4

HORN 5601 Graduate Horn - Doctoral Performance Credits: 4

Humanities (HMNTY)

Courses

HMNTY 5510 Methods in Critical Theory Credits: 3

Course introduces students to influential modern techniques of reading and interpretation, not only of literature but also of culture or visual art. Methods will themselves be seen in historical and social context, and theoretical texts may be subject to rhetorical analysis. Undergraduates only with instructor's permission

Law (LAW)

Courses

LAW 8501 Contracts I Credits: 3

Formation and performance of simple contracts; consideration; express and constructive conditions, excuse of conditions; remedies for breach; contracts for benefit of third parties; assignment; impossibility of performance and discharge.

LAW 8502 Contracts II Credits: 3

Prerequisites: LAW 8501.

LAW 8511 Torts Credits: 3

Wrongs to the person and to property; legal remedies through which compensation or other relief may be obtained.

LAW 8521 Civil Procedure – Pleadings, Motions, and Related Matters Credits: 3

Pleading; joinder of parties and claims; pre-trial motions; discovery; summary judgment; pre-trial and trial procedure; post trial motions.

LAW 8522 Civil Procedure - Jurisdiction Credits: 2

Court systems; personal jurisdiction and venue; federal jurisdiction; choice of law; preclusion; appellate procedure.

LAW 8522D Discovery Practice in Civil Litigation Credits: 1-3

This course focuses on the various discovery techniques which are commonly used in federal civil practice, and also compares state procedures. General topics include the uses of discovery, informal discovery, building the discovery plan, ethical issues, privileges and protections, the discovery tools, electronic discovery, experts, motions to compel discovery, and sanctions.

LAW 8522E Electronic Discovery Credits: 1-2

Discovery practice and laws related to electronically stored information in litigation.

Prerequisites: LAW 8521 LAW 8522.

LAW 8522L Civil Procedure Skills Lab Credits: 1-3

Students are trained in practical skills necessary for pre-trial litigation, including client interviewing and drafting pre-trial documents such as pleadings.

Prerequisites: LAW 8521 (or co-requisite).

LAW 8522W Civil Procedure: War or Justice Credit: 1

Philosophical problem in civil dispute resolution: identifying relevant criteria for evaluating a civil dispute resolution system, and assessing the extent to which the current system and alternatives satisfy those criteria.

Prerequisites: LAW 8521 Civil Procedure – Pleadings OR LAW 8522 Civil Procedure – Jurisdiction

LAW 8531 Lawyering Skills I Credits: 3

Introduction to legal reasoning; case analysis and synthesis; case research; structure and style in legal writing with emphasis on expository writing, including office memoranda.

LAW 8531I Common Law, Legal Analysis & Writing Credits: 3

Introduction to legal reasoning; case analysis and synthesis; case research; structure and style in legal writing with emphasis on expository writing, including office memoranda.

LAW 8532 Lawyering Skills II Credits: 2

Introduction to advocacy; introduction to interviewing, counseling and negotiation; statutory and computerized research; writing to and on behalf of a client, including a trial or appellate brief; oral advocacy.

LAW 8532I Introduction to American Legal Skills Credits: 2-3

Introduction to oral and written advocacy; interviewing, counseling and negotiation; and alternative dispute resolution.

Prerequisites: LL.M. students.

LAW 8532R American Legal Research Credit: 1

Introduction to research resources in the U.S. and techniques to systematically process and solve basic research problems found in law practice.

LAW 8541 Property I Credits: 3

Introduction to the nature of property; basic personal property law; adverse possession; possessory estates; basic future interests; marital and concurrent interests; landlord-tenant relationships.

LAW 8542 Property II Credits: 3

Licenses, easements, real covenants, equitable servitudes; nuisances; basic water law; brokerage; financing, mortgages, deeds of trust; contract of sale, deeds, closing; title insurance, warranties; recording; eminent domain; zoning.

LAW 8543 Adverse Possession Credit: 1

Explores the ancient yet evolving subject of adverse possession as it applies to real property in the United States and around the world. Topics explored include: the ancient doctrine as developed under the common law, the variety of statutory refinements to adverse possession doctrine in the United States and modern attempts to statutorily limit the doctrine, and comparative perspectives on adverse possession including the abrogation of the doctrine in Canada, and the effects of that abrogation on resolution of property disputes there.

Prerequisite: Property I

LAW 8552 Federal Taxation Credits: 3

Theory, history, and principles of federal income taxation; basic concepts of income, classification of income and deductions.

LAW 8590 Special Topics Credits: 1-6

The study of a contemporary topic of interest. This course is designed to facilitate one of two purposes: an initial offering of a new course (prior to formal approval) or an initial and possible only offering of new topics.

LAW 8601 Business Organizations Credits: 3

Partnership, limited liability company and corporation law; choice of business forms, formation of partnerships, limited liability companies and corporations; rights, duties, and powers of partners, members, shareholders, directors, and officers; closely held corporations; proxy regulation; derivative suits; dividends and stock redemptions; introduction to the Securities Act of 1933 and Securities Exchange Act of 1934.

LAW 8601C International Criminal Tribunals Credit: 1

This course will examine the types of international criminal tribunals available for the prosecution of individuals accused of war crimes, the crime of aggression, crimes against humanity, and genocide. The course will begin with an introduction to the history of international criminal law and a comparative examination of various international criminal tribunals, including the Nuremberg trials, ad hoc criminal tribunals (ICTY and ICTR), the permanent International Criminal Court in The Hague, and hybrid criminal tribunals (Cambodia, Lebanon, and Sierra Leone). The course will then focus more specifically on the International Criminal Court (ICC), including the ICC's formation and jurisdiction and examples of individuals and situations investigated and prosecuted thus far by the court.

Prerequisites: Part of the Ireland Law Program.

LAW 8601L Transactional Lawyering Skills Lab Credit: 1

Students are trained in counseling clients and negotiating business formation, dissolution, and liability issues as well as drafting appropriate documents.

Co-requisites: LAW 8601.

LAW 8601R Doing Business In Ireland, Part I Credit: 1

A survey of International Trade Law and European and American Competition Law that impact on American multinational companies operating in the Republic of Ireland.

LAW 8601S Doing Business in Ireland, Part II Credits: 0.5

A survey of the Ireland Company Law and comparative United States Corporate Law and a survey of United States corporate taxation of multinational companies operating in Ireland.

LAW 8602 International Field Experience Credits: 1-2

In connection with relevant coursework, this limited international field experience will permit students to visit a foreign country to see the application of their coursework in a comparative perspective, including tours of legal facilities, visits with experts from the host country, and service learning opportunities.

Prerequisites: Permission of instructor and designated accompanying coursework.

LAW 8603 Taxation Of Business Organization Credits: 2-3

Survey course of the taxation of business enterprises, particularly partnerships, corporations and subchapter S corporations.

Prerequisites: LAW 8552, LAW 8601.

LAW 8605 Antitrust And Fair Competition Law Credits: 2-3

This course examines fair competition law as a body of law designed to protect consumers. Understanding fair competition law requires looking at Supreme Court case law but also lower court decisions, economic analysis, and government enforcement guidelines and policy statements.

LAW 8609 Ethical Issues In Family Law Representation Credits: 1-2

Advanced study of the ethical obligations of public and private attorneys in estate, family, and juvenile law representation. Topics may include identification of the client, ethical and legal obligations of confidentiality and disclosure, competence and client communication, respect for third persons (particularly obligations toward children of clients) and other related subjects. Paper and presentation required. When offered for 2 credit hours, the course fulfills the Schools Professional Responsibility graduation requirement.

Prerequisites: (or concurrent) LAW 8611, LAW 8751.

LAW 8610 Introduction to Trusts Credit: 1

This course explores the law of trusts, including the elements of a valid trust; its creation, administration and termination; the nature of a beneficiary's interest; and the fiduciary duties of trustees.

Prerequisites: Property I and Property II, Estates and Trusts

LAW 8611 Estates And Trusts Credits: 3

Intestate succession; testamentary dispositions; execution, modification, and revocation of wills; will contests; advancements, ademption, and exoneration; family allowances; rights of estate creditors; express, implied, resulting, and constructive trusts; basic tax aspects of estates and trusts; rule against perpetuities; will substitutes.

LAW 8611L Estates and Trusts Lab Credits: 1-3

This experiential course applies the knowledge acquired in the basic Estates and Trusts course to the process of gathering, evaluating, planning, drafting, and executing an estate plan in a non-tax environment.

Prerequisites: LAW 8611; LAW 8541; LAW 8542.

LAW 8613I Estate Planning and Drafting Lab Credits: 2

Students are assigned to attorneys at law firms or trust departments and will work on estate planning projects assigned by the supervising attorney. Exams may include drafting will and trust instruments, researching legal issues, and drafting memos.

Prerequisites: LAW 8611.

LAW 8614 Estate Planning and Drafting Credits: 1-4

Continuation of Estates Trusts I using problems and cases as a basis for class discussion. Working in teams, students engage in the planning of estates for actual clients, proceeding through the entire process and culminating in the execution of wills, trusts or other appropriate instruments.

Course is not open to students who have taken Estate Planning.

Prerequisites: LAW 8611.

LAW 8614R Estate Planning For Retirement Plan Benefits Credit: 1

The income, gift, estate and generation-skipping transfer tax consequences and rules related to the ownership, distribution and withdrawal of retirement plan benefits, including minimum required distributions, designating beneficiaries, spousal rights and rollover options

LAW 8615 Estate Planning and Practice Credits: 3-4

Tax-oriented examination of contemporary estate planning problems for the larger estates, with emphasis on issues of direct concern to practitioners. This course is designed for LL.M. students.

LAW 8615R Estate Planning For Charitable Giving Credit: 1

Survey of federal income tax and transfer tax laws governing gifts to charitable organizations, charitable remainder trusts and charitable lead trusts; procedural requirements to assure deductibility; and planning and drafting considerations.

LAW 8617R Elder Law For Estate Planners Credit: 1

An examination of the legal tools available for the elderly client for decision-making, both health care and financial, in the event of incapacity, and asset preservation, including Medicare and Medicaid qualification. The course will cover the use of trust; durable powers of attorney, and advance directives for health care and living wills and the relationship to court guardianship.

LAW 8621 Evidence Credits: 3

General principles relating to proof of facts in civil and criminal trials; presumptions; order of proof; relevancy; judicial notice; real and demonstrative evidence; authentication; best evidence rule; hearsay; competency; impeachment; rehabilitation.

LAW 8631 Constitutional Law Credits: 4

Core issues relating to the U.S. Constitution, including the doctrine of judicial review, the powers of Congress and the President, limitations on state power, and judicial protection of individual rights.

LAW 8633 First Amendment Law Credits: 2-3

Basic themes and advanced problems relating to the law of the First Amendment to the United States Constitution, including exploration of the values behind the protection, subversive advocacy, regulation of speech in the public forum, access to the media, regulation of the press, symbolic expression, libel, obscenity, commercial speech, picketing, right of association, loyalty oaths, legislative investigations and government demands for information, separation of church and state, free exercise of religion, state aid to the religious schools, regulation of religion-based conduct.

LAW 8633R Law and Religion Credits: 1-2

Explores the interaction of the legal system with religious beliefs and institutions. The course examines issues such as the establishment and free exercise clauses of the United States Constitution, the influence of religion in law making, and religion issues presented in famous trials.

LAW 8634 Criminal Law Credits: 3

Introduction to substantive criminal law, its role and purpose in our society; principles of liability, common law and statutory offenses; defenses; punishment.

LAW 8634I International Criminal Law Credits: 1-2

An introductory course in International Criminal Law focusing on the criminal prosecution of individuals under international law, primarily by international tribunals (or "hybrid" international/national tribunals) and secondarily by national tribunals applying international law. The course will include a consideration of aspects of criminal law that are common to most criminal legal systems, with a particular focus on those crimes that are "international;" will revisit the concept of criminal jurisdiction, how it is acquired, and its limitations, such as immunity for heads of state and diplomats; and will examine the elements of war crimes, crimes against humanity, and genocide, as well as a few other crimes of international concern; and excuses or justifications under international law, such as self-defense and insanity.

LAW 8635 Criminal Procedure I Credits: 3

Introduction to the administration of criminal justice; constitutional rights of the accused; due process; privilege against self-incrimination; right to counsel; arrest, search, and seizure; wire-tapping; police interrogation and confessions; pre-trial identification procedures.

LAW 8635S Wrongful Convictions Credits: 2-3

An examination of the causes of wrongful convictions, a consideration of systemic reforms that might minimize convicting the innocent and a focus on recurring ethical issues that confront prosecutors and criminal defense lawyers. Students also will work with The Midwestern Innocence Project on cases of possible actual innocence. This course provides an insider's look into the operation of the criminal justice system and is designed to help students gain insight into features of the criminal justice system that have a tendency to produce wrongful convictions. It should be of particular interest to any student interested in working in a prosecutor's office, public defender's office or for a firm doing defense work. It is a prerequisite for any student wishing to enroll in the Innocence Project clinic. Limited enrollment (normally, up to 16 students)

LAW 8635T Wrongful Convictions II Credits: 2-3

A follow-up class to Wrongful Convictions I, open only to students who have completed Wrongful Convictions I. The course will involve "hands on" work with cases that have passed through the first level of screening in Wrongful Convictions I with students receiving the transcripts and case documents in addition to the briefs and opinion in the case. Students will receive these documents and report on the likelihood that an inmate is innocent and the strategies available for pursuing the claim of innocence.

LAW 8636 Criminal Procedure II Credits: 3

Continuation of the study of the administration of criminal justice; exclusionary rules; bail; prosecutor's discretion; grand jury; preliminary hearing; jurisdiction, venue; joinder and severance of offenses and defendants; right to speedy trial; pleas of guilty; discovery; trial by jury; publicity; double jeopardy.

LAW 8636A Federal Trial Practice Credits: 2-3

A practical skills course involving consideration and application of the rules of procedure and evidence to civil and criminal cases brought in federal court, including, but not limited to the legal requirements of federal jury instructions, motions in limine, pretrial preparation, pretrial conferences, notice requirements, voir dire, opening statements, direct and cross, evidentiary foundations for exhibits, computerized and computer-related evidence, character and related evidence, witnesses (lay, lay opinion, summary, character, experts), and closing arguments.

LAW 8637R U.S. Attorney's Office Law Internship Credits: 3-6

US Attorney's Office Legal Interns work in the United States Attorney's Office directly with Assistant US Attorneys (AUSA's) in one of the Criminal Division units. Activities include legal research and drafting memoranda, motions and briefs; observations and participation in trials, pre-trial hearings, and motions, as appropriate; and general assistance with litigation.

Co-requisites: LAW 8749.

LAW 8638R Entrepreneurial Lawyering: Solo And Small Firm Practice Credits: 3

Course will focus on law practice management for solo and small firms. Topics include organizational structure, firm management, fee setting and allocation, and effective and ethical marketing. Course includes attendance at the Missouri Bar Solo and Small Firm Conference.

LAW 8639 Legal Practice Technology Skills Credits: 1-3

This course will facilitate technology competencies for students for use in practice settings, regardless of the size or setting of the law firm, business, or agency. The course will familiarize students with the basic legal technologies necessary for the twenty-first century lawyer, but will also include word-processing, spreadsheet and database skills appropriate for the legal setting. More advanced portions of the course include computer-assisted drafting, file architecture design, security protocols, and client communications.

LAW 8639B Legal Tech-Competency Training Credit: 1

This course provides students with the opportunity to gain advanced knowledge in the software skills needed by legal practitioners, including: word processing, visual communication, cloud computing, document automation, data analytics, and project management.

LAW 8639D Legal Document Assembly Credits: 1-3

Document automation and assembly can help attorneys more efficiently and accurately deliver legal services to the public and their employer—thus helping attorneys be more competitive in the legal services market place. This two-credit hour course will teach students the skills necessary for document automation and familiarize them with HotDocs, the predominant provider of document assembly applications. Students will produce programmed documents, interviews, and systems for estate planning, businesses planning, or such other projects as are suitable for document assembly. The course may be taught over an eight week period or a summer term. No computer programming experience is required.

LAW 8639L Practice Management Technology Lab Credits: 2-3

Building on theory of the role technology in law practices, students will learn how to use document assembly software and learn to be proficient with other software with hands on exercises and work.

LAW 8641R Legislation Credits: 2-3

This course explores a variety of topics under the broad heading of "Legislation." Included among them are: electoral and representational structures, legislative drafting, canons of statutory interpretation, identifying and utilizing legislative history, the role of referendums and initiatives as a supplement to representative institutions, public choice theory, and other theories of legislation. The course also includes an opportunity for students to participate in the drafting of legislation for the Kansas or Missouri State legislatures. Paper optional.

LAW 8643C Competitive Business Intelligence Credit: 1

Develops the skills necessary to search publicly available information to find vital facts about individuals, businesses, organizations, markets, and industries, and conduct so-called "due diligence" investigations. The first focus is on using public records, commercial services, and company information to gather information about parties. The second focus is on data and statistics, including finding, processing, and interpreting that information.

Prerequisites: Lawyering Skills 1

LAW 8643D European Union Data Protection & Privacy Credit: 1

This course will examine the history of global data protection and privacy, with a particular focus on the General Data Protection Regulation, essentials of a data privacy policy, enforcement, key privacy laws in the U.S., and an evaluation of the future of privacy law.

LAW 8643F Advanced Legal Research: Foreign, Comparative and International Law Credit: 1

The course is designed to familiarize students with the basic resources of international law by taking an in-depth look at foreign and comparative law resources, teaching students how to utilize and think systematically about those resources and instructing students in the strategies and processes necessary to conduct scholarly research and practice international law. Students taking the course will improve their research competency in authorizing scholarly papers with a comparative or international perspective.

LAW 8643L Advanced Legal Research-Litigation Credit: 1

Prepares students who wish to focus on advocacy and litigation (including students in litigation with respect to Family Law and Urban, Land Use and Environmental law). The course is also intended to facilitate research for the student's legal research and writing requirement. The course will refresh and refine research skills, help students to think systemically about legal research, and familiarize students with applicable resources. As the final project, students will have the opportunity to develop an in-depth research "path finder" or guide for an approved topic of their own choosing.

LAW 8643T Advanced Legal Research: Transactional Law Credits: 1-2

Prepares students who wish to focus on transactional law. The course is also intended to facilitate research for the student's legal research and writing requirement, although it does not satisfy the writing requirement. The course will refresh and refine research skills, help students to think systemically about legal research, and familiarize students with applicable resources relevant to transactional law including business organizations, tax, pension, labor and employment, competitive business intelligence, real estate, securities, sale of businesses, etc. As the final project, students will have the opportunity to develop an in-depth research "path finder" or guide for an approved topic of their own choosing.

LAW 8650 Race and the Law Seminar Credits: 1-3

In-depth examination of the role that race plays in American society as a whole and in judicial decision-making in particular. Course will examine the effect of race on various areas of the law, including torts, contracts, property, criminal law, and criminal procedure. Course will also examine the effect of race on jury decisions and explore the concept of implicit bias. Research paper.

LAW 8656 Public Defender Trials Internship Credits: 3-6

Public Defender Law Interns assist in the defense of indigent criminal defendants. Each intern is assigned to a single public defender to allow the intern to observe the life and practice of a public defender, including direct engagement with client (fact development and defense strategy), case file analysis, research, drafting, and exposure to all stages of court proceedings. This is a two-semester internship providing a progression of skill building. Students eligible for Rule 13 student practice authorization may present directly in court.

Co-requisites: LAW 8749.

LAW 8656A Missouri Attorney General's Office Internship Credits: 3-6

Law Interns work side by side with Assistant Attorneys General in the Kansas City regional office representing the State of Missouri in civil or criminal proceedings. Law Interns may be placed in one or more of the divisions of the AG's office: financial services, litigation, labor, consumer protection, public safety, or governmental affairs. Students eligible for Rule 13 student practice authorization may present directly in court. Students may appear in Jackson, Clay, Platte, and/or Cass Counties.

Co-requisites: LAW 8749.

LAW 8656C Jackson County Prosecutor Internship-Family Law Prosecution Credits: 1-3

Family Law Prosecution Interns assist Jackson County Prosecutor's Office, Child Support Division, in prosecuting cases involving paternity establishment and child support. The internship provides formalized instruction, and individual mentoring and supervision from assistant prosecutors.

Co-requisites: LAW 8749.

LAW 8656F Federal Public Defender Internship Credits: 3-6

Federal Defender Interns work in the Federal Public Defender's Office, under attorney supervision to engage with clients; undertake legal research; draft memoranda, motions and briefs; observe and participate in trials, pre-trial hearings and motion hearings; and assist, in general, with litigation.

Co-requisites: LAW 8749.

LAW 8656P Jackson County Prosecutor Internship Credits: 3-6

Law Interns work with attorneys of the Jackson County Prosecuting Attorney's Office in downtown Kansas City and Independence offices. Interns are assigned to specific units: General Crimes, Violent Crimes, Sexual Violence, Warrant Desk, or Independence Office. The internship provides practical experience, courtroom exposure, and an introduction to prosecution hearings and trials. The internship is a two-semester progression of fieldwork allowing students opportunity to build skills and confidence. Students eligible for Rule 13 student practice authorization may present directly in court.

Co-requisites: LAW 8749.

LAW 8662 Federal Court Internship Credits: 2-6

Federal Court Interns serve in a clerkship with a judge or magistrate in a federal court, principally in the Western District of Missouri. Students may also intern with federal judges in different states, with approval of the faculty director of the field placement program. Students generally undertake research, draft memoranda and other documents, observe court, and debrief with judges and clerks regarding the legal issues and lawyering styles in the matters before the court.

Prerequisites: LAW 8522.

Co-requisites: LAW 8749.

LAW 8662F Family Court Internship Credits: 2-6

Family Court Interns serve in the chambers of Family Law judges and commissioners and observe mediation, conciliation, adult abuse docket, and cross-court visits. The internship offers students an opportunity to gain practical legal skills, learn about the programs ordered by the judges to assist families in crisis, and develop a working knowledge of the Family Court Division. Family Court judges hear a wide range of matter concerning families, marriage, and children, including marriage (dissolution, annulments, maintenance), child custody, paternity, child support, adult abuse, juvenile delinquency, adoptions, and guardianships.

Prerequisites: LAW 8521, LAW 8522; LAW 8751 (completed or currently enrolled).

LAW 8662M Missouri Court of Appeals Internship Credits: 2-6

Appellate Court Interns work in the chambers of a Missouri Court of Appeals Judge. Students generally undertake research, draft memoranda, and produce substantial written work under the supervision of the judge or the judge's clerks. They also observe various proceedings (both in chambers and in the courtroom) and interact with the judges, their clerks, and court staff. Students debrief with judges and clerks regarding the legal issues and lawyering styles of the matters and advocates before the court.

Co-requisites: LAW 8749.

LAW 8665A Animal Law Credits: 2

This course will begin with a brief overview of the philosophical and cultural issues underlying human/animal relationships, including basic theories of the legal systems's responses to social change. Legal issues relating to food animals, companion animals, laboratory animals, wild animals, and performing animals will be examined with reference to: (1) federal statutes (Animal Welfare Act, Endangered Species Act, Marine Mammal Protection Act, Wild Horses and Burros Act, Animal Damage Control Act, National Wildlife Refuge System Administration Act, Refuge Recreation Act, National Environment Police Act, and Humane Slaughter Act); (2) state statutes (anti-cruelty, wills and trusts, hunting, racing and fighting statutes); (3) local animal control regulations; and (4) extensive common law (standing, rights, free exercise of religion, property, landlord-tenant disputes, torts, marital dissolution and custody, and bailment).

LAW 8700 Trial Advocacy I Credits: 2

A practical skills course in advocacy which introduces students to the fundamental components of a typical civil and criminal trial and requires students to perform exercises involving each component and try a mock civil or criminal case from provided problem materials.

Co-requisites: LAW 8621.

LAW 8700C Drafting Civil Jury Instructions Credits: 1-2

Covering the essential skills in drafting appropriate civil jury instructions and preserving objections for appeal in civil cases. This is a "skills course" in which students learn the fundamentals of drafting and arguing civil jury instructions.

LAW 8700D Taking and Defending Depositions Credits: 1-2

introduces the fundamentals of depositions, concluding with a mock deposition. Topical coverage includes: what is a deposition and what is the purpose of depositions; who may be deposed and when; deposition questioning; using exhibits; objections; preparing for the deposition; and producing a witness for deposition. Each student will take and/or defend a mock deposition.

LAW 8701 International Study Exchange Credits: 1-15

Semester study at foreign law school.

Prerequisites: by permission.

LAW 8702 Conflict of Laws Credits: 1-3

Domicile; jurisdiction and limitations on the exercise of jurisdiction; judgments; full faith and credit; choice of law; conflicts problems in federal and international settings; conflicts problems in selected areas.

Prerequisites: LAW 8521.

LAW 8703 Trial Advocacy II Credits: 2-3

A practical skills course in the art of trial advocacy with an emphasis on technique, style, and methods of persuasion. During class sessions, students perform exercises involving the various stages of a law suit, and are critiqued on their performances. Following performance of the exercises, students are divided into teams and try a mock case in a trial competition, from which the Law School's National Trial Competition Teams are selected. The trials are evaluated by trial lawyers and federal or state judges. Limited enrollment.

Prerequisites: LAW 8700.

LAW 8704A Lawyering Skills Competition-Appellate Credits: 1-4

This course is limited to students who represent the law school in faculty supervised regional, national or international lawyering skills competitions. These competitions require application of lawyering skills in a range of substantive law areas and intensive practice of lawyering skills, judged by faculty and practitioners in the field. Students enrolled in this course will be representing the school in various moot court appellate advocacy competitions. Students will research and draft briefs or equivalent advocacy documents, develop oral arguments, conduct practice oral arguments before a range of student, faculty, and practitioner judges, and represent the law school in regional national or international competitions.

LAW 8704C Lawyering Skills Competition-Client Counseling Team Credits: 1-2

The course is limited to students who represent the law school in faculty supervised regional, national or international lawyering skills competitions. Students enrolled in this course will be representing the school in the client counseling competitions. Students will research a problem from a range of areas of law and develop problem solving and client counseling strategies and documents and conduct mock client interviews.

LAW 8704I Lawyering Skills Competition Credits: 1-2

This course provides an overview of international commercial arbitration and focuses with more specifically on international investment protection law and bilateral investment treaty provisions. The course will provide preparation for the International LL.M. Commercial Arbitration Competition, but it is open to J.D. students.

LAW 8704N Lawyer Skills Competition-Negotiation Team Credits: 1-2

The course is limited to students who represent the law school in faculty supervised regional, national and international lawyering skills competitions. Students enrolled in this course will be representing the school in various negotiation competitions. Students will research a problem from a range of law and develop negotiation strategies and documents and conduct mock negotiations.

LAW 8704T Lawyer Skills Competition-Transactional Practice Teams Credits: 1-2

The course is limited to students who represent the law school in faculty supervised regional, national or international lawyering skills competition. Students enrolled in this course will be representing the school in various negotiation competitions and meets. Students will research a problem involving business transactions or tax and prepare analysis and problem solving strategies.

LAW 8705 Trial Advocacy III Credits: 2

Students, under the supervision of trial advocacy faculty, participate in trial competitions. Enrollment by invitation only.

Prerequisites: LAW 8700, LAW 8703.

LAW 8705I Comparative Advocacy in Ireland Credit: 1

This course will look into the comparative role of Advocacy both in the courtroom and the boardroom for European and U.S. systems. The course will introduce students to a comparative look at the basic structure and legal systems in Ireland and the US. The field of Advocacy is rapidly expanding as evidenced by the adoption of affirmative advocacy programs in Ireland as well as the U.S. An example of the topics covered include: A comparative overview of the Barrister/Solicitor and U.S. systems of justice. The students will be introduced to "access to justice" which is a comparative look at European and US approaches. The course will also focus on the prosecutions under both the European and US systems as well as a discussion of the influence of crimes on international trade, business and a comparative look at the role of advocacy in those systems. Students will be exposed to advocacy for persons with disabilities that include a comparative look at the Ireland and US systems with resulting effects on business and trade. Finally the course will involve review and discussion of the global considerations for Advocacy.

Prerequisites: Part of the Ireland Law Program.

LAW 8706 Class Actions and Multidistrict Litigation Credits: 2-3

As related to litigation of complex cases, study of special issues of party joinder and intervention, class action requirements and limitations, discovery, case management, and estoppel by verdict or judgment.

Prerequisites: LAW 8521, LAW 8522.

LAW 8707A Advanced Legal Writing: Practical Skills Development Credits: 2-3

Preparation of students for writing problems commonly encountered in the first two years of law practice: jury instructions, general correspondence, opinion letters, simple contracts, litigation motions and pleadings including a complaint, answer and some discovery documents. Individual feedback provided.

LAW 8707B Advanced Legal Writing: Business Contract Drafting Credits: 3

Preparation of transactional documents including, for example, confidentiality agreements, consulting agreements, employment agreements, technology licensing agreements.

Prerequisites: LAW 8501, LAW 8502, LAW 8601.

LAW 8707C Advanced Legal Writing: Litigation Drafting Credits: 2-3

Preparation of litigation documents and pleadings, including complaint or petition; cross-claim, counterclaim or third-party petition; answer; discovery documents such as a set of interrogatories or requests to admit; dispositive motions; and settlement agreements.

Prerequisites: LAW 8521, LAW 8522.

LAW 8707E Advanced Legal Writing: Scholarly Writing Credit: 1

Preparation of students for scholarly writing including independent study, law review, and seminar papers. Focus will be on topic identification and refinement; developing a thesis; research strategies including reiterative and mediated searching, systemic evaluation of resources, problem typing and solving, and resources for specific topics in the law; proper attribution and use of authority; developing a working draft; and creating a balanced, thorough, and carefully reasoned and supported analysis.

LAW 8707F Advanced Legal Writing: Appellate Brief Writing Credit: 1

Preparation of federal and state court appellate briefs, including the jurisdictional statement; statement of the case; statement of facts; points relied on; statement of the issues presented; summary of the argument; argument; and responses and replies to arguments. Prepares students to outline and organize arguments; edit and revise written work; and finalize an appellate brief.

LAW 8707G Advanced Legal Writing: Compliance Drafting Credits: 1-2

This course provides students the opportunity to prepare compliance-related documents to support businesses in highly-regulated industries like health care, higher education, and business and financial institutions. The course will include an overview of the current compliance landscape both domestically and internationally. Classes will include discussions of applicable laws and regulations governing corporate behavior. Students will draft a portfolio of documents—e.g., policies and procedures; codes of conduct—common to corporate compliance programs. Recommended preparation: LAW 8764, LAW 8731.

Prerequisites: LAW 8531, LAW 8532.

LAW 8707J Advanced Legal Writing: Compliance Drafting Credits: 3

Preparation of compliance-related documents to support businesses in highly-regulated industries like health care, higher education, and business and financial institutions. Drafting a portfolio of documents—e.g., policies and procedures; codes of conduct—common to corporate compliance programs.

Prerequisites: LAW 8531 Lawyering Skills 1; LAW 8532 Lawyering Skills 2

LAW 8707R Advanced Legal Research Administrative Regulations/Legislative History Credit: 1**LAW 8708 Master Clinical Advocacy Course Credits: 3-4**

This semester-long intensive course will introduce students to the law, advocacy and execution of trial strategy in active litigation. The course will function as a unique clinical course, with a law school professor and local counsel serving as the supervising attorneys. The professor will select an active case in local litigation, preferably in its early stages. The students will be responsible, with supervision, for all areas of the litigation process from drafting pleadings, motions, discovery and taking and attending depositions and trial.

LAW 8710 Lawyering Skills Teaching Assistant Methods Credits: 1-3

Legal analysis, research and writing; instruction and discussion of the research and writing process and related topics in legal method and legal education; supervised production of an expository writing, advocacy writing and scholarly writing; development of research and writing exercises for use in the first-year Legal Writing Program and service as Teaching Assistants in the Program; limited enrollment.

LAW 8710B Legal Analysis & Methods Credits: 2

Preparation of students for the bar review and exam process with a focus on improving analytical skills to approach and do well on practice bar exam questions, including essay, multiple-choice, and performance questions. The course will cover specific topics tested on the bar exam with additional emphasis on refining memorization skills and learning how to self-assess understanding of concepts.

LAW 8711 Remedies Credits: 2-3

Remedies for violation of legally protected interests; history and development of equity jurisdiction and modern equity practice; injunctions; declaratory judgments; rescission; reformation; restitution; contempt; damages.

Prerequisites: LAW 8521.

LAW 8712 Problems And Issues In The Death Penalty Credits: 1-2

Issues and problems in the administration of the death penalty; the Missouri capital sentencing scheme; constitutional limitations, statutory schemes, state review systems, procedural matters and collateral review of death sentences.

LAW 8713 Death Penalty Clinic Credits: 1-2

The post-conviction process of collateral review in death penalty cases; training in legal representation of the postconviction petitioner.

Co-requisites: LAW 8712.

LAW 8713C Capital Punishment in the Modern World: Constitutional & Human Rights Perspectives Credit: 1

A consideration of problems and issues in the death penalty, including the following topics: the historical and constitutional perspectives on the death penalty; the practical application of the death penalty in the United States; capital punishment and human dignity; and the future of capital punishment

LAW 8713P Wrongful Convictions Clinic Credits: 1-6

Students, under supervision, provide investigate and legal assistance to prisoners with persuasive actual innocence claims. Students meet weekly with the director of the program for training and evaluation. Assigned tasks depend on the needs of the Innocence Project, and may include interviewing potential clients, gathering records, investigating actual innocence claims, consulting with experts, drafting post-conviction and/or clemency pleadings, and appearing at court hearings. Clinical students work in conjunction with law and journalism students enrolled at the University of Missouri-Columbia. Limited enrollment (normally, 8 students).

Prerequisites: LAW 8634, LAW 8635, LAW 8635S.

LAW 8714 Gender and Justice Credits: 2-3

Students will examine and discuss legal issues of special importance to women. Topics will include (among others) sexual discrimination, sexual harassment, domestic violence, reproductive autonomy, and pornography. The course seeks to present each topic in its social context by supplementing legal readings with materials drawn from the social sciences, literature, and film. Paper required. Enrollment limited to fifteen students.

LAW 8715 Harry Potter and the Law Credit: 1

This course uses the narratives (stories) from the Harry Potter series to explore themes about the role of law and justice in society. The course is designed to help students become more familiar with narrative criticism and the use of narrative for persuasion.

LAW 8716 Cyberlaw Credits: 3

Survey of the areas of the law with existing or potential application to the internet and computers and how changes in the information environment affect law and its application. Areas of law include jurisdiction, contract law, intellectual property law, criminal law, and constitutional law.

LAW 8716C Cybercrime Credits: 1-4

Cyber threats are a global problem challenging all areas of business, and attorneys must be able to advise and defend clients from these threats. Criminal lawyers must be fluent in how new technologies work and how they impact investigations. In this course, students will learn how these new cyber threats and emerging technologies are challenging attorneys across the country. The course will prepare students to think as lawyers when confronting these threats. Course topics will include computer hacking, spamming, spear phishing, Internet fraud and social engineering, cyberstalking, and the rising use of computers and social media in violent crimes.

LAW 8720 Secured Transactions Credits: 3

Secured Transactions in personal property under Article 9 of the Uniform Commercial Code, function and form of a security agreement, process of perfecting a security interest, priority among unsecured parties; secured sales of goods under Article 2 of the Uniform Commercial Code.

LAW 8721 Commercial Transactions Credits: 3

This course offers a study of the Uniform Commercial Code provisions that deal with negotiable instruments (commercial paper)(Article 3), bank collections and deposits (Article 4), funds transfers (Article 4A), and letters of credit (Article 5), as well as the study of alternate payment systems (including electronic fund transfers, credit and debit card payments, and related federal law).

LAW 8723 Banking Law Seminar Credits: 2

Federal and state law governing banking activities; regulation of bank holding companies; formation of banks; the FDIC and FSLIC; interstate banking; deregulation of banking transactions; banking activities by non-banks; regulation of securities activities of banks. Paper required.

Prerequisites: LAW 8721.

LAW 8725 Water Law Credits: 2-3

Private acquisition of water rights through riparian ownership and prior appropriation; public rights to water existent in bed ownership easements and trusts; ground water management; water distribution organizations; federal allocation and control of water resources; interstate allocation.

LAW 8725E Energy Law Credits: 3

The course will deal with the legal, economic and environmental issues of energy production on federal lands and/or under federal jurisdiction. It will focus on a number of energy sources including: oil, coal, natural gas, oil shale, coal bed methane, geothermal, water, wind, and solar. It will also cover the special problems of hydraulic fracturing, air and water pollution, climate change spills, collapses, meltdowns and other disasters as well as liability for cleanup and reclamation.

LAW 8728 Law And The American Indian Credits: 2-3

An anthropological, historical and legal study of the American Indian, including a focus on American Indian traditional law and values, federal policy and current legal issues.

LAW 8729 Preservation Law Credits: 2-3

An exploration of the legal and economic issues impacting preservation of land, wilderness, buildings and archeological and historical sites, including a study of various federal and state preservation legislation, and private land use preservation measures.

LAW 8729C Cultural Preservation Law Credits: 3

This course will focus on Federal, State, and Local Law, directed at the preservation of Prehistoric, Historic, and Modern Culture. It will include sections on: The Values and Philosophy of Preservation, Archaeological Protection Law, the Native American Grave Protection and Reparation Law, Sacred Site Protection, Historic Protection in State and Local Government, the Takings Clause, Land trusts and Conservation Easements, Public-Private Partnerships and Modern Ethnic and Socio-economic Communities.

LAW 8730I Introduction to American Law & Culture Credits: 2-3

Introduction to the American legal system, including government structure, sources of law, common law development, and core substantive areas. Available to LL.M. International students only.

LAW 8731 Professional Responsibility Credits: 2

This course covers the Model Rules of Professional Conduct; role of the lawyer as a professional; confidentiality; conflict of interest; zeal within the bounds of the law; competency; providing legal services. The course explores the meaning of professional judgment and client-centered lawyering.

LAW 8731E Professional Responsibility in Context: Environmental and Resource Law Credits: 2

Covering the law governing lawyers and professional responsibility, setting the perspective and context in the practice of environmental law and resource law. The central focus relates to understanding the role of the lawyer and professional responsibility. The experiential focus is to achieve this goal in a practice context of environment and natural resource law.

LAW 8732C Cross-Cultural Dispute Resolution Credits: 2-3

This course examines the impact of culture on the dispute resolution process. Cultural differences are most pronounced in the international arena, but are also seen in the domestic setting, especially in the US jurisdiction. Students will begin to develop a "cultural fluency" in their law and dispute resolution practice. The subject is timely, and discussion thereof will benefit especially international LLM students, and J.D. students with interests in alternative dispute resolution or international practice. Cross-cultural Dispute Resolution is a blend of both a "course" and a "seminar," as it includes lecture, skills discussion, small-group exercises, independent research and intensive writing. Successful completion of the required research paper will satisfy the research and writing requirement.

LAW 8732I Cross-cultural Business Negotiation Credits: 1-3

This course will introduce students to the foundations of negotiation with several opportunities to participate in negotiation simulations. Negotiation exercises will focus on international business transactions. To create opportunities for cross-cultural interaction and work experience, negotiation teams will, to the extent possible, pair American J.D. students with an international LL.M. students.

LAW 8732R Intro to the Resolution of International Commercial Disputes Credit: 1

This course will introduce students to international commercial dispute resolution. While all forms of dispute resolution will be considered, the course will focus on introducing the fundamentals of arbitration, the use of arbitration between European Union members to resolve commercial disputes, and the use of arbitration between EU members and non-member states to resolve commercial disputes.

LAW 8733 Children In The Law Credits: 2-3

The ways in which the legal system treats children differently from adults and the justifications for such treatment, who should make decisions for the child, decisional authority that should be granted to parents, children and the state in various contexts (e.g., abuse and neglect, health care for the child, foster care, adoption and education).

LAW 8733E Elder Law Credits: 2-3

A course providing a basic foundation for legal practice with older persons, including the following substantive topics: The Older Americans Act, the delivery of legal services to the elderly, ethical considerations, consumer protection, discrimination, Social Security and Supplementary Security Income, Medicare, Medicaid, capacity issues, guardianship and alternatives to guardianship, elder abuse and neglect, adult protective services, nursing homes, long term care, housing, healthcare decisions, end-of-life decisions, estate planning and grandparents' rights.

LAW 8733R Juvenile Offenders & The Law Credits: 2-3

An examination of our justice systems's historical treatment of juvenile delinquent and status offenders, and how the goals and objectives of the past have evolved into today's juvenile offender laws; the rights of juvenile offenders in contrast to those of adult criminals; pre-trial and trial procedural issues under the juvenile code; certification of the juvenile offender as an adult; dispositional/treatment alternatives for juvenile offenders; schools and the juvenile offender.

LAW 8734 Mediation Credits: 2

The process in which a neutral third party assists others in resolving a dispute or planning a transaction; introduction to the nature of the process, its possibilities and limitations, its current and future uses, and how lawyers can and should be involved in it; public policy and political issues surrounding the mediation movement; professional responsibility and malpractice.

LAW 8735 Seminar In Famous Trials Credits: 2-3

Historical and jurisprudential issues involved in a number of "political trials.

LAW 8735R Law Of The European Union (Part I) Credit: 1

An in-depth study of the legal and political framework and institutions of the European Union; the Commission, Council of Ministers, Court of Justice, Court of Auditors, and the European Parliament. Course will examine the interlocking web of European treaties, the expansion of the European Union, the European Union as a trade block and Ireland as a gateway to the European Union for non-bloc nations.

LAW 8736 Debtor-Creditor Rights Credits: 2-3

Creditors' remedies and debtors' rights; provisional remedies; secured transactions (Article 9 of the Uniform Commercial Code); liens and exemptions; overview of bankruptcy law.

LAW 8736M Introduction to Bankruptcy Concepts Credits: 1-2

The course will introduce basic bankruptcy concepts and processes, with a focus on issues that arise in Chapter 7 bankruptcy cases.

LAW 8737R Law Of The European Union (Part II) Credits: 2

An examination of the substantive and procedural law governing the member states of the European Community including such topics as the nature and application of European Union Law, the relationship between European Union and national laws, remedies in national courts, enforcement actions, damages and money claims, free movement of goods and workers competition laws, intellectual property, equal treatment of women and men, and non-discrimination.

LAW 8738 Immigration Law And Process Credits: 2-3

Admission, exclusion, deportation, and naturalization of aliens; structure and powers of relevant federal agencies; categories of immigrant and non-immigrant visas and visa application procedures; asylum, extradition, and refugee status; rights of aliens; public policy issues and proposals for reform; practical problems in immigration.

LAW 8738C Employer Immigration Compliance Plans, Policies & Procedures Credits: 1-2

A practical lawyering skills course in which students learn how to help employers comply with employer immigration compliance requirements in order to avoid possible non-compliance fines, forfeiture of business and personal assets, and jail terms. This course includes an overview of the applicable immigration law and instructs in such matters as corporate client interviewing; Form I-9 Employment Eligibility Form; E-Verify and FAR E-Verify for federal contractors; ICE Best Employment Practices, drafting employer immigration compliance plan, policies and procedures; I-9 Self-Audits, and defending a corporate client in I-9 inspections/investigations by ICE/DHS.

LAW 8738P Immigration Law and Policy Credits: 2-3

A focus on the historical development of immigration law in the United States and fundamental questions of immigration policy. Immigration bills in Congress have been the subject of heated debate, particularly in recent years. This course provides a historical, statutory, and theoretical background for evaluating such proposals. Students will evaluate proposed federal and state legislation across the country and immigration reforms in foreign countries. Particular emphasis will be placed on post-9/11 reforms and the relationship between immigration law and the war on terrorism. The subject matter is useful for the student who intends to practice immigration law, as well as for the non-specialist interested in Immigration law as a policy matter.

LAW 8738R Chinese Law Credits: 4.5

A summer abroad program in Chinese law taught at the University of Peking, Peoples Republic of China by Chinese Professors. Subjects include such topics as: Cultural History and Political Systems of China, Organization of the Chinese Legal System, Chinese Contract Law, Civil Law, Trial Practice Rules of Evidence, Criminal Law Procedure, Family Law, Human Rights Issues, Business Organizations, Taxation, Intellectual Property Law, Banking and Finance, Real Estate Law, Investment Law Practice in China, and Alternative Dispute Resolution.

LAW 8738V Immigration Law & The Violence Against Women Act Credit: 1

A practical lawyering skills course in which students learn how to help abused immigrant women and children to apply for permanent residence in the United States, and how to help victims of violent crimes to apply for legal status. The course includes a short overview of the applicable immigration law and instructs in such matters as client interviewing; analysis of cases; working with victim advocates and experts; drafting affidavits, evidence indexes, petitions, motions and supporting documents; preparation of checklists for clients, case flowcharts, and case timelines; the review and development of evidence; and the drafting of letters to clients and the government.

LAW 8740A Missouri Appellate Procedure Credits: 1-2

Practical application of Missouri appellate procedure rules: appellate jurisdiction, what is appealable and when, appellate case process and the interplay between statutes, Missouri Court Rules and Missouri case law with regard to appellate issues.

Prerequisites: Law 8522 Civil Procedure II.

LAW 8740M Missouri Civil Procedure Credits: 2-3

Selected problems in Missouri civil procedure under Missouri statute and rules. Topics may include venue and personal jurisdiction, pleading and motion practice rules on joinder of parties and claims, statutes of limitation, trial procedure, post-trial motions appellate procedure, discovery, and preclusion.

LAW 8743 Global Legal Systems Credits: 1-3

A study of different legal traditions and systems, mainly within the Civil and the Common Law traditions, focusing on each tradition's history, legal structures, legal actors, procedures, and sources of law. Non-Western Legal traditions such as Islamic, Jewish, Hindu and Indigenous Law may also be considered, time permitting.

LAW 8743C Comparative Criminal Law Credit: 1

A comparative analysis of criminal law jurisprudence in the United States and Europe (especially Ireland and the United Kingdom) with respect to the exclusionary rule, the death penalty, the jury system and the reintegration of ex-offenders into society.

LAW 8743I Ireland Program: Selected Topics in Comparative Law Credits: 1-2

This course addresses a focused area of law from a comparative perspectives of United States, Ireland, and/or EU legal systems.

Prerequisites: part of Ireland Study Abroad Program

LAW 8743L Comparative Health Law Credit: 1

An examination of how the legal systems of several other nations address particular aspects of health law. Specifically, the focus of this course is on patent rights with respect to the health care they receive. This will include, for example, consideration of patient rights when the care received has caused injury due to professional negligence. If time permits, it will also look at how other legal systems address the controversial issues surrounding the "right to die" as well as assisted suicide and euthanasia.

LAW 8745 Law Review Credits: 1-4

Editorial work in connection with the "UMKC Law Review." Open to students selected on basis of scholarship. Ungraded.

LAW 8745R Law Review Board Credits: 1-5

The members of the Law Review Editorial Board edit articles and student notes and comments for publication in the University of Missouri Kansas City Law Review; and shepherd the articles and student pieces through the production process.

LAW 8746 Research & Writing Requirement Credits: 2

Completion of a paper of publishable quality, demonstrating intensive research and analysis under faculty supervision.

LAW 8746C Court Internship Credits: 3-6

Judicial Interns serve in a clerkship with a judge, magistrate, commissioner, or other judicial officer in a state court. Students generally undertake research, draft memoranda, observe hearings and other judicial proceedings, and debrief with judges and clerks regarding the legal issues and lawyering styles in the matters before the court.

Co-requisites: LAW 8749.

LAW 8746I Internship-Estate Planning Credits: 2-6

Estate Planning Interns are mentored by an attorney with an estates law practice, in a private firm or trust company. Law Interns undertake assignments such as review and analysis of estate planning documents, draft provisions for such documents or probate court filings, and/or conduct legal research. The objective of this internship is to expose student to the estate planning law practice.

Prerequisites: LAW 8611 AND LAW 8552.

Co-requisites: LAW 8749.

LAW 8746R Independent Study Credits: 1-3

Independent study, including research and writing projects, under faculty supervision.

LAW 8746W Introduction to Workers' Compensation Law and Practice Credits: 1-2

An introduction to the general history and purpose of the workers' compensation laws with a particular emphasis on Missouri law. Students will be presented with and guided through actual workers' compensation problems which will introduce them to the practical aspects of the practice in this specialized area. With permission from Jefferson City and the Department of Labor and Industrial Relations, the students will be exposed to actual workers' compensation hearings, mediations and other courtroom practices held at the law school and presided over by an Administrative Law Judge.

LAW 8747 Introduction to Appellate Advocacy Credit: 1

Preparation of memorandum (points relied on and summary of argument); presentation of two arguments before practicing attorneys.

LAW 8748 Appellate Advocacy - Ellison Moot Court Competition Credits: 2

Ellison Moot Court Competition; preparation of an appellate brief and presentation of two oral arguments before federal and state judges. Open to the 16 finalists from Appellate Advocacy II. Ungraded.

Prerequisites: 8747 Intro to Appellate Advocacy.

LAW 8749 Field Placement Seminar: Learning from Practice Credits: 1-2

Learning from Practice (LFP) is a seminar (tied to a field placement). The seminar will explore dimensions of professional development of an effective lawyer, including the capacity for reflection, deliberate skill acquisition, and ability to form meaningful professional relationships. Each LFP section has a different focus, but all are designed to complement and provide deeper context to the law interns' fieldwork. One LFP seminar, focused on attorney ethics and values, is catalogued under Professional Responsibility (LAW 8731). It covers the Model Rules of Professional Conduct and explores the dimensions of client-centered lawyering.

Prerequisites: Completion of 30 credit hours toward JD.

Co-requisites: Any field placement course.

LAW 8750C City of Kansas City Municipal Internship Credits: 1-6

City Law Interns work in the Law Department of the City of Kansas City, in municipal court litigation, legal advising, and legal aspects of policy development. Intern assignments include litigation and non-litigation based research and drafting. In litigation context, law interns draft briefs, conduct discovery and case file analysis, and prepare witnesses, and other aspects of trial preparation.

Co-requisites: LAW 8749.

LAW 8751 Family Law Credits: 3

Pre-marital contracts; marriage; annulment; paternity; parent and child; divorce; alimony; division of property; separation agreements; adoption.

LAW 8751F Family Law & Film Credit: 1

An exploration of the function of family law and lawyers in society by examining legal decisions, statutes and legal commentaries in the context of films, including classic, contemporary mainstream, foreign, documentary and independent films. The seminar entails participants viewing a film followed by discussion. During the discussion session students will critique the film in light of assigned reading materials. Using films as analytical tools, the seminar examines the ways in which pop culture products (such as film and television) both reflect and change the social views about family law and lawyers. A pass/fail course.

LAW 8751S Family Violence Credits: 2-3

An in-depth examination of family violence from a legal perspective. Course topics will include interdisciplinary study of the dynamics and psychology of family violence, of historical and social policies, specialized problems of family violence (including intimidated partner violence, child abuse and neglect, gay and lesbian battering, and elder abuse) and legal responses. Students will receive practical training in safety planning, intake, review of community resources, case logistics, and advocacy for temporary orders.

LAW 8752G Guardian Ad Litem Workshop Credits: 2

Advanced study of guardian ad litem practice. (GAL). Topics may include adult and child orders of protection, requirements for guardian ad litem appointments, role of the GAL, ethical considerations, working with social workers and other professionals, and best practices in investigation, recommendation, and representation. Students will partner with volunteer attorneys to act as guardians ad litem in order of protection cases.

Prerequisites: Rule 13 certification.

LAW 8752R Family Law Practice Credits: 2

A practical skills course in family law in which students participate in all phases of family law practice, including the initial client interview; the drafting of questionnaires, pleadings, motions custody and discovery plans, support and maintenance proposals, orders and other documents; negotiation, and preparation for litigation. Students work in teams and perform exercises which simulate "real world" situations.

Prerequisites: LAW 8751.

LAW 8752S Child & Family Services Clinic Credits: 1-6

Students represent the clients in obtaining legal rights to custody of children who are currently in foster care or otherwise under the authority of the Department. Students work under the supervision and direction of clinic faculty and faculty directors, receiving classroom instruction in the substantive law and procedure governing juvenile court actions.

Prerequisites: Rule 13 certification.

LAW 8753 International Law Credits: 2-3

Survey of international legal studies; nature and role of international law, its effectiveness in dealing with international problems and its application in domestic jurisdictions.

LAW 8754 International Business Transactions Credits: 2-3

Legal problems encountered in international business; jurisdiction and choice of law; enforcement of judgments; methods of protecting foreign investments; extra-territorial application of United States regulations, e.g. anti-trust law.

LAW 8757 Business Planning Credits: 2-3

Problem-method study of choice of entity and various other legal issues and planning challenges in forming a closely held business entity and in private and public financing of an existing enterprise. The course includes practical training from drafting organizational documents to conducting simulated client interviews and providing written advice concerning hypothetical transaction. Limited enrollment.

LAW 8757L Special Topics In Entrepreneurial Lawyering Credits: 2

Examination of issues related to ethical and effective management and marketing of law practice, emphasizing solo and small firm practice. Topics will vary from year to year, but will generally address issues such as forms of practice, dissolution of practice, practice management systems (including technology assistance), human resources management, advertisement and solicitation, insurance and malpractice.

LAW 8757N Entrepreneurship & New Venture Creation Credits: 3

Jointly-taught by Law School and Bloch (Business) School faculty, this interdisciplinary course provides education in entrepreneurship to a combined class of students from law, business, engineering and perhaps other graduate-level disciplines. Using a combination of readings lectures, electronic blackboard discussions, team business planning projects and presentations, and individual presentations on selected topics, the Course is designed, from a law student's perspective, to both (1) familiarize the student with substantive knowledge of issues from multiple disciplines involved in creating a new venture to commercialize technology and (2) train law students in techniques designed to effectively communicate and resolve legal issues inherent in such projects in a collaborative manner with clients and their advisors from other disciplines.

LAW 8757R Entrepreneurial Law & Practice Clinic Credits: 2

Under faculty supervision, students will counsel start-up companies and their owners and implement business planning advice by drafting articles of incorporation and organization, by-laws, partnership agreements and other business contracts. Other business-related matters ranging from regulatory, consumer, licensing, and taxation requirements; copyrights, trademark, and patent creation; and 501(C)(3) applications for non-profits may also be covered in this course. Clinic students will also receive classroom instruction in the areas of client counseling and business planning and drafting of business documents.

Prerequisites: LAW 8601 and LAW 8552.

LAW 8757V Social Entrepreneurship Ventures Credit: 1**LAW 8758S Securities Regulation Credits: 2-3**

Problem and policy method study of the Securities Act of 1933 and selected aspects of the Securities Exchange Act of 1934; financing of an enterprise; reorganizations; tender offers; proxy regulation; and securities fraud claims.

LAW 8760 Insurance Credits: 2

Life, fire, accident, and liability insurance; nature of insurance; nature of insurance contract; special rules of construction; standard policy provisions; regulation of insurance industry.

LAW 8761M Law, Medicine & Bioethics Credits: 2-3

A study of bioethics and selected legal and ethical issues in medicine with focus on decision-making at the beginning and end of life; reproductive rights and assisted reproductive technologies; the patient-provider relationship (fiduciary, treatment, confidentiality, and disclosure obligations); physician obligations of informed consent and patient care issues; potential hospital and physician liability for medical malpractice; and end of life decision-making (withdrawal and refusal of life sustaining treatment by individuals and their surrogates) and physician-assisted suicide.

LAW 8762 Personal Injury Tort Practice And Procedure Credits: 1-3

Advanced treatment of law of negligence; right of recovery and defenses; practice and procedure in negligence cases, including case intake, pre-discovery investigation, settlement demand packages and other communications with opposing counsel, injury petitions, initial discovery, depositions, retention of experts, pre-trial motions, and mediation.

Prerequisites: LAW 8521, LAW 8522, LAW 8511, LAW 8531 LAW 8532.

LAW 8763 Labor Law Credits: 2-3

Regulation of labor relations pursuant to the national Labor Relations Act, focusing on the establishment of collective bargaining relationships, unfair labor practices, collective bargaining, strikes, picketing and pre-emption.

LAW 8764 Administrative Law Credits: 1-3

Introduction to the administrative process; role, function, and processes of administrative agencies; policy issues of administrative government; judicial review.

LAW 8765 Federal Jurisdiction Credits: 2-3

Federal court system and jurisdiction of the federal courts; diversity of citizenship; removal of cases from state to federal courts; conflicts between state and federal judicial systems; original and appellate jurisdiction of the Supreme Court.

Prerequisites: LAW 8521.

LAW 8766 Land Use Law Credits: 2-3

Legal and administrative aspects of land use and the problems and techniques of urban planning; statutory anti-nuisance devices; controlling land use by private methods (restrictive covenants, easements, and servitudes); zoning; subdivision controls; public acquisition of land; building and housing; urban renewal and redevelopment; environmental quality control (air, water, and conservation); relationship of lawyers, planners, private builders, and owners to governmental policies.

LAW 8767 Land Title Clinic Credits: 1-6

Under supervision, students provide legal assistance to The Land Bank to bring quiet title actions and pursue other legal strategies necessary to return vacant and abandoned properties to productive use.

Prerequisites: Rule 13 eligibility.

LAW 8768R Department of Labor Internship Credits: 3-6

Department of Labor Law Interns assist agency attorneys in the Regional Solicitor's Office of the United States Department of Labor enforcing federal labor statutes, including the Fair Labor Standards Act, Occupational Safety and Health Act, and Office of Federal Contract Compliance Programs, among others. Students undertake legal research, draft discovery requests, review and analyze evidence, participate in client and staff conferences related to enforcement strategy, and assisting enforcement personnel in investigations.

Co-requisites: LAW 8749.

LAW 8769 Law & Poverty Credits: 1-3

Selected problems arising out of the relation of the law to the poor and its effect upon the individual and the family structure; income maintenance (e.g., welfare, social security); discrimination in employment and housing; delivery of professional services (legal, health); administrative and judicial remedies.

LAW 8770 State And Local Government Law Credits: 2-3

Structure, powers, and divisions of local governments in metropolitan areas; role and powers of cities, counties, towns, school and special districts; decentralized and neighborhood governmental units and other local governmental units; legislative, home-rule, and constitutional sources of power; sovereign immunity; boundary adjustments; public employee relations; citizen participation; reapportionment; licensing and permits; ethics and public access to records; regional governance; intergovernmental cooperation; interstate compacts and authorities; function of local government with reference to solution of problems created by urban growth; role of judicial, administrative, and political processes.

LAW 8771 Public Finance Credits: 2-3

Fiscal, economic, and taxation problems and powers of local government in metropolitan areas; constitutional limitations; spending and public finance; property taxes; special assessments and exactions; interstate tax acts; local income taxes; debt financing; debt adjustment; public expenditures and contracts; financing education.

LAW 8773 Environmental Law Credits: 2-3

This course covers law developed to control pollution and to protect our country's physical environment. The course provides introductions to ecological theories and to early common law efforts to protect the environment. But the course mainly focuses on current environmental statutes (for instance, the Superfund Act, the Resource Conservation and Recovery Act, the Clean Air Act, and the Clean Water Act) and on current federal constitutional issues involving the environment. (Priorities in this mix may vary from year to year, depending on current events and related course offerings). Enforcement policies, citizen activism the needs of private industry, and the administrative process are also considered.

LAW 8773C Environmental Compliance Auditing and Permitting Credits: 3

This course provides students with an overview of the key federal environmental statutes and their inter-relationships, including consideration of the Clean Water Act, the Clean Air Act, the Emergency Planning and Community Right to Know Act and the Resource Conservation and Recovery Act. Students will learn about inspections, enforcement and liability; environmental management systems and auditing; and generally, how Congress and the EPA formulate environmental laws and regulations and about the roles in the process of the legislature, the regulators, the regulated communities, citizens and public interest groups.

LAW 8773N Negotiating SuperFund Settlements Credits: 1-2

This course will engage students in the simulated resolution of one or more Superfund cases, with a particular focus on the skills required for negotiated resolution of these matters.

LAW 8773R Environmental Law Internship Credits: 3-6

Environmental Law Interns work with attorneys in government agencies, such as the U.S. Environmental Protection Agency or non-profit organizations focused on environmental protection, resource conservation, public health and related issues. The nature of the lawyering assignments will vary with the host office.

Co-requisites: LAW 8749.

LAW 8774 Citizen Suits under the Endangered Species Act Credit: 1

This course will cover the citizen suit provision of the federal Endangered Species Act, walk-through an example case from initiation to settlement, and consider possible reform to meet the goals of the statute.

Prerequisites: LAW 8521 LAW 8522.

LAW 8775 Appellate Advocacy National Moot Court Competition Credits: 1-2

Participation on National Moot Court competition team. Ungraded.

Prerequisites: LAW 8748, Ellison Moot Court Competition.

LAW 8778 American Academy Matrimonial Lawyers Board Credits: 2

Under direction of professor, students provide editorial assistance in publishing Journal of the American Academy of Matrimonial Lawyers, write a paper on selected topics and prepare summaries and bibliography of current works. Limited enrollment.

LAW 8783 Federal Public Land & Resource Law Credits: 2-3

Exploitation and conservation of natural resources; management of federal lands; water law; energy law; federal wildlife preservation; resolution of disputes involving use of natural resources.

LAW 8783B Buffalo National River: Issues in National Park Law & Management Credit: 1

Specialized study of topics in natural resources law as it relates to the Buffalo National River in northern Arkansas. Students will explore the history of the Buffalo River; the state and federal laws in operation governing the park (e.g., the wild and scenic rivers act, the endangered species act, national historic preservation, etc.); and planning and management issues presented by the multiple uses of the area and its surroundings.

LAW 8783P Preservation of Land & Natural Resources Credits: 2-3

This course will provide a survey of the law and policy of land and natural resource management, with an emphasis on preservation, conservation and sustainability.

LAW 8790 Legal Aid Internship Credits: 3-6

Legal Aid Interns are assigned to one of the practice groups in Legal Aid, focused on legal issues of people with limited means (housing (public and private), consumer protection, community development, government benefits, family law, municipal criminal defense). Principally, students work in one of the Kansas City offices, but may also intern in other offices in Missouri or another state, with approval of the faculty director of the field placement program. Students eligible for Rule 13 student practice authorization may present directly in court.

Co-requisites: LAW 8749.

LAW 8791 Civil Rights Credits: 2-3

Elements of a Section 1983 case, enforceable rights and available defenses; procedural aspects of civil rights cases; suits against federal and state governments.

Prerequisites: LAW 8631.

LAW 8793A Health Law I: Liability and Quality Issues in Health Care Credits: 2-3

Health Law I: Liability and Quality Issues in Health Care

LAW 8793B Health Law II: Regulation, Organization and Finance Credits: 2-3

Health Law II: Regulation, Organization and Finance

LAW 8796 Economics And The Law Credits: 2-3

Tools of economic analysis which have particular application in the law; equity and efficiency are weighed in regulation, pollution, discrimination, monopoly, financial markets, human resources and government expenditure and taxation policy. Principles will be introduced and expanded upon using both lecture and case study techniques.

LAW 8797 Business Torts and Unfair Competition Credits: 2-3

The common law applicable to relations between businesses that compete against each other or that cooperate with each other in the production and distribution of the same product. Tort, contract and property law principles as remedies not available in parallel statutory schemes, such as the antitrust or patent laws. Statutes that codify the common law or create statutory procedures or remedies for common law rights.

LAW 8798 Copyright Law Credits: 2-3

Surveys when copyright protections are extended, the exclusive rights included in copyright, and the limitations of those rights. Additional consideration is given to third-party liability, the challenges of digital technologies, and protections afforded by the Digital Millennium Copyright Act.

LAW 8798A Art Law Credits: 2-3

This course examines several key topics related to the protection of visual arts, including copyright and moral rights and their intersection with First Amendment protection.

LAW 8800 Legal Research Thesis Credits: 1-8

Research for LL.M. thesis.

LAW 8808 Intellectual Property Law Credits: 2-3

Substantive and procedural law of intellectual property. Coverage includes copyrights and patents and other areas at the option of the instructor.

LAW 8808I International Intellectual Property Credit: 1

This course focuses on the main principles of protection and obligations of the signatories to the World Trade Organization Trade Related Intellectual Property Agreement (GATT/TRIP's) - in particular focusing on the main intellectual property and Industrial property rights, including (1) Copyright, (2) Performers Rights, (3) Patents, (4) Trade Marks, and (5) Related rights such as unfair competition and the protection of geographical indications; and addresses what the obligations are that are imposed on signatories in respect of protection and enforcement of these rights.

LAW 8808L Intellectual Property Licensing Credits: 2-3

This course provides for advanced engagement with intellectual property concepts while also providing training in practical skills. The course will first entail reminding students of the differences among the three essential areas of intellectual property law (copyright, patent, and trademark) and indentifying how these differences translate into different standard license agreements. Additionally, students will consider the challenges in drafting a consolidated license agreement that transfers interests in multiple types of intellectual property. Second, the course will include considerable practice for students in drafting contract language.

LAW 8808S Intellectual Property Remedies Credits: 2-3

This course will explore the remedies available to intellectual property owners and the protections available to those accused of infringing copyrights, trademarks, trade secrets and patents. The course will delve into issues of how rapidly advancing technology has made it more difficult to apply the current remedies and explore whether they go too far or not far enough in protecting owners of intellectual property. It will also help students recognize that case evaluation does not end after analyzing whether liability exists.

LAW 8809 Missouri Cannabis Law Credit: 1

This miniterm course will survey the essential features of medical marijuana law in Missouri. It will cover the regulations regarding application for a medical marijuana license (cultivation, dispensary, and infusion/extraction).

Prerequisites: Administrative Law is recommended, but not required.

LAW 8813 Employment Discrimination Law Credits: 2

Substantive and procedural aspects of Equal Employment Opportunity Act and related matters.

LAW 8814R Employment Law Credits: 2-3

Survey of legal doctrines regulating the employment relationship, including the regulation of wages, hours and benefits; privacy in the workplace; workers' compensation; suits for wrongful termination; non-competition agreements; and unemployment compensation. May be offered as a seminar.

LAW 8814U Unemployment Compensation Clinic - Hearings Practice Credits: 1-3

Students represent claimants in administrative hearings appealing denials of their unemployment compensation claims. Students interview and counsel clients, investigate their cases, prepare evidence, and advocate for the clients in these hearings.

LAW 8815 Products Liability Credits: 2-3

Theory and practice in products liability cases; negligence; misrepresentation; strict liability; theories of product defect; applicability of the Uniform Commercial Code including warranties and disclaimers; actions among members of the distribution chain.

LAW 8815R Disabilities And The Law Credits: 2-3

An interdisciplinary study of the law relating to disabled persons in the areas of employment, education, and access to transportation, health, welfare and social services to provide an understanding of how the law affects individuals with disabilities and public and private entities. Legislation considered include the American with Disabilities Act, Section 504 of the Rehabilitation Act of 1973, the individuals with Disabilities Education Act, the Family and Medical leave Act, the Fair Housing Act, the Voting Accessibility for the Elderly and Handicapped Act, and the Title VII of the Civil Rights Act of 1964. The enrollment of graduate students from other disciplines, such as education, business, and health sciences is encouraged to allow for interdisciplinary discussion of the topics involved.

LAW 8815S Leadership In Disability Studies: A Multidisciplinary Approach Credits: 3-4

An overview of the history of disability issues, some individualized perspectives of persons with disabilities, the rationale for interdisciplinary approaches regarding disability studies, and opportunities for leadership development with regard to disability issues. The students will participate in a forum that encourages reflection, exchange of ideas, interaction with persons with disabilities and persons from various fields of study, and case analysis. After an orientation to the study of disabilities, various aspects of community membership for persons with disabilities will be addressed, particularly with regard to the workplace, the neighborhood, and the home. Emphasis with placed on vital leadership roles that facilitate community membership and contribution of persons with disabilities to society.

LAW 8820 Criminal Trial Techniques Credits: 2

Strategy and tactics in handling a criminal case; effective representation of the accused at various stages of the criminal process; securing pre-trial release; plea bargaining; motion practice; discovery; voir dire; opening and closing statements; examination of witnesses; use of the expert; sentencing; appeal; collateral attack.

LAW 8821 Sentencing Mitigation Clinic Credits: 1-6

Students will work in conjunction with practicing attorneys, paralegals, social workers, and investigators serving clients of the Federal Public Defender Offices in the District of Kansas and the Western District of Missouri. The focus of the client representation will be geared towards investigation, development and presentation of mitigating evidence to impact sentencing outcomes.

Prerequisites: LAW 8913.

LAW 8822 Post Conviction Remedies Credits: 2-3

Federal and state remedies for collateral attacks on criminal convictions; vacation of sentences and convictions; federal habeas corpus and similar devices. Paper required when course is offered as a seminar.

Prerequisites: LAW 8635.

LAW 8831R International Human Rights Law Credits: 1-3

Study of the law protecting individuals and groups against governmental violations of internationally guaranteed rights; historical antecedents and theoretical underpinnings; human rights in national law (the United States); post World War II developments; principal international human rights instruments; regional human rights arrangements; human rights of women, refugees, ethnic minorities; implementation of rights; international obligations of the United States; selected civil, political, economic and social rights.

LAW 8832 Law Of International Trade And Finance Credits: 3

Study of the World Trading System, focusing on policy and application, including the WTO, the NAFTA, U.S. trade remedies, foreign direct investments controls, and export controls.

LAW 8832I Introduction to International Trade Credits: 1-3

An examination of the structure and workings of the major global trade regimes, including the World Trade Organization ("WTO") and the North American Free Trade Agreement (the "NAFTA"). The role of international trade in such areas as the environment, labor rights, national security, the developing world, and non-market economies will also be considered. The course will also focus in depth on United States domestic trade remedies, including antidumping, countervailing duties, section 301 and 337 actions as well as on other international trade restricting practices.

LAW 8834 Tax Procedure Credits: 2

Problem-method study of procedures and taxpayers' rights when deficiencies are assessed by the Internal Revenue Service; tax liens; commencement of litigation in Tax Court, Federal District Court, and Court of Claims.

LAW 8834R Tax Clinic Credits: 1-4

Students in the Kansas City Tax Clinic represent low-income clients before the IRS and in United States Tax Court under the supervision of the Clinic Directors. Cases may include delinquent filers, examinations, administrative appeals, Tax Court litigation, innocent spouse, and collection cases including due process, installment agreements, and offers-in-compromise. Students also receive classroom instruction in tax procedure subjects and in client counseling. There is a ten hour orientation prior to the beginning of classes. There is also an additional five hour lecture held during the course of the semester.

LAW 8835 Blockchain, Cryptoassets and the Law Credits: 1-2

Covering blockchains, cryptoassets and related topics in the FinTech area. Blockchains are incorruptible decentralized digital ledgers maintained by a distributed network of computers. All transactions on a blockchain are recorded chronologically and publicly. Cryptoassets are digital assets that use blockchains and cryptography to regulate the creation of new units, verify transactions, and secure the transactions without the intervention of any middleman. Will address whether governments have the power to regulate blockchains and what is the right balance of regulation to protect the public but encourage innovation.

LAW 8837 Negotiating Mergers And Acquisitions Credits: 2-3

Problem-method study of corporate, tax, securities, and business problems entailed in buying and selling a corporation; fundamental corporate changes: recapitalizations, mergers, sale of assets, sale of stock, and tender offers; corporate finance and rehabilitation of financially distressed corporations.

LAW 8837R Mergers & Acquisitions Deals and Corporate Governance Issues Credit: 1

An introduction to the tactical and strategic complexities of litigation and client counseling arising from contested mergers and acquisitions and corporate tactics involving activist shareholders.

Prerequisites: Business Organizations

LAW 8838L Legal Accounting Credit: 1

Accounting as it relates to the work of a lawyer. Understanding financial statements (balance sheet, income statement, cash flow, shareholder's equity), analysis of financial statements; deferral concepts (inventory, depreciation, prepaid expenses), understanding accounting principles, valuation (present value, future value.).

LAW 8838R Tax Practicum I Credits: 1-3

Practical skills training in the sources and methods of tax research (including electronic database sources) using problem method approaches; analytical and planning skills are developed through in-depth case study research.

LAW 8843 Federal Income Taxation Of Estates And Trusts Credits: 2

Income tax problems of the fiduciary; grantor's trusts; income, estate, and gift tax problems relating to optional or discretionary acts of the fiduciary in retention and/or distribution of income or corpus.

LAW 8845 Deferred Compensation Credits: 2-3

Problem-method study of deferred compensation arrangements; qualified pension and profit sharing plans; individual retirement accounts; qualified stock option plans; other methods of deferred compensation.

LAW 8847 Personal Injury Tort Litigation Credits: 1-2

Introduction to the fundamentals of personal injury litigation, including case intake, pre-discovery investigation, settlement demand packages and other communications with opposing counsel, injury petitions, initial discovery, depositions, retention of experts, pre-trial motions, and mediation.

LAW 8848R State And Local Taxation Credits: 2-3

State and local taxation of income, sales and property, including the apportionment of tax obligations to multiple states. Restrictions imposed by constitutional doctrines such as the uniformity and equality requirement and the prohibition on interfering with interstate commerce.

LAW 8850 Applied Evidence Credits: 1-3

Problems and simulations in evidence; application of the rules of evidence in many of the following topic areas: objections to the form of the question; hearsay; lay and expert opinion; authentication, the introduction of real and demonstrative evidence, rules of relevance, cross-examination and impeachment.

LAW 8853 Seminar in Law Science & Technology Credits: 2-3

This class surveys a variety of current topics lying at the intersection of law, science, and technology. During the course of the semester each student will develop their own thesis relating to some specific issue arising out of the interaction of law, science, and technology.

LAW 8858 Consumer Protection Credits: 2-3

Protection of consumers from false advertising, unfair sales practices, and consumer credit and debt collection abuse. Topics which may be covered are Truth-in-Lending Act, Uniform Consumer Credit Code, Fair Debt Collection Practices Act; Interstate Land Sales Disclosure Act, Federal Trade Commission and Missouri Attorney General activity, Missouri consumer credit legislation, consumer warranties, consumer class actions, abusive collection practices.

LAW 8858L Consumer Protection Lab Credit: 1

This course provides students with skills needed for reviewing and investigating consumer complaints; developing problem solving strategies and drafting Attorney General letters, pleadings, and other documents necessary for the enforcement of the complaint. Students work with the Missouri Attorney General's office to screen consumer complaints and recommend actions.

Prerequisites: LAW 8858.

LAW 8861 Real Estate Finance Credits: 2-4

Real estate investment and development; basic financing instruments (e.g., mortgages, deeds of trusts, contracts for deed); foreclosure remedies; home finance, national housing market; financing of commercial and industrial properties; construction financing; mechanic's liens; priority disputes; bankruptcy issues affecting real estate security interests.

LAW 8863 Fair and Affordable Housing Seminar Credits: 1-3

This seminar course will explore issues of fair and affordable domestic housing law through a real property lens. It will be unique in its approach to housing law from an advanced property perspective. Through a mixture of classroom lectures and discussions, experiential exercises and scholarly writing, housing issues will be examined from many perspectives including that of residential and commercial owners, developers, homeowner associations, landlords, tenants, and government regulators.

Prerequisites: LAW 8541; LAW 8542.

LAW 8868 Trusts: Planning, Drafting, Administering & Litigating Credits: 2-3

Focus on advanced planning and drafting of inter vivos private express trusts for individuals, including proper use of readily available forms (tax-related drafting limited to marital and charitable deduction forms), consideration of trustee's duties, powers and liabilities pursuant to the Missouri Trust Code and related cases, and special emphasis on the recently-adopted Uniform Investor Act and the significant changes it has introduced to Missouri trust investment law.

Prerequisites: LAW 8611.

LAW 8870 Seminar in Educational Equality and the Law Credits: 1-3

This seminar will explore the legal aspects of providing educational equality in a nation of diverse ethnicities, cultures, religions, sexual identities, and socio-economic conditions. Through the lenses of legal scholarship and primary legal authorities, students will examine past and current attempts to address the inequities that have long plagued U.S. public education in the K-12 setting. In addition, the course will include extensive instruction in scholarly research, writing, and publication skills.

LAW 8870R Education Law: Government & Legal Aspects Of Education Credits: 2-3

This course is designed to give students an introduction to the major legal doctrines that affect K-12 schools, as well as the policies that underlie or are changing those doctrines. Students should gain a working understanding of the impact of federal and state law on the operation of schools, the rights and responsibilities of teachers and administrators, and the rights of the students who attend those schools.

LAW 8874 Tax-Exempt Organizations Credits: 2

An in-depth examination of the state and federal laws that govern the formation and operation of tax-exempt organizations, with emphasis on Sec. 501 (c) (3) charities; criteria for tax-exempt status; IRS application and reporting procedures; unreported business income tax issues.

LAW 8875 Real Estate Transactions Credits: 2-3

Practice-oriented course, including the development of drafting skills, in which questions involving basic residential and commercial real estate sales and civil and leasing transactions are considered, such as title, title insurance, contract conditions, contract remedies, commercial leasing (office and shopping center issues) and issues concerning and confronting brokers; special emphasis on Missouri and Kansas law.

LAW 8875L Legal Context of Real Estate Decision Making Credits: 1-3

A study of fundamental matters involved in real estate decision making, including an understanding of basic real estate terms of art; the unique attributes of commercial real estate the distinction between office, retail and industrial property leases; the significant business and legal issues that arise in lease negotiations; financing issues, including the negotiation of construction and permanent loan documents; loan application/brokerage agreements; the impact of bankruptcy on real estate transactions; an explanation of different types of insurance coverage applicable to commercial real estate; and construction issues, including how buildings are constructed and the "green" movement impact on current construction practices.

LAW 8876 Sales and Leasing Credits: 1-3

This course is a survey course on the law of sales leasing. The course will examine the sale of goods under Article 2 of the Uniform Commercial Code (UCC), studying the rights, duties, and liabilities of parties to modern sales transactions. The course will also analyze Article 2A (leasing) of the UCC and explore the rights, duties, and liabilities of parties to modern lease transactions. The course will also consider the United Nations Convention on Contracts for the International Sale of Goods (CISG). Topics encompassed will include sale and lease contract formation, establishment of express and implied contract terms,

LAW 8877 Bankruptcy Court Internship Credits: 2-6

Bankruptcy Court Interns serve in the chambers of US Bankruptcy Judge, principally in the Western District of Missouri. Students may also intern with bankruptcy judges in different federal districts, with approval of the field placement faculty director. Legal issues arise under the Bankruptcy Code, as well as secured transactions, contract law, labor law, and tax law. Students undertake research, draft memoranda, observe hearings and other judicial proceedings, and debrief with judges regarding legal issues and lawyering styles.

Co-requisites: LAW 8749.

LAW 8881 Seminar on the Supreme Court Credits: 2-3

Students simulate the work of the Supreme Court on nine cases presently pending before that court. The student justices study the briefs and related material filed in each case, discuss and vote on the cases, and write majority and dissenting opinions. Enrollment in the seminar is limited, fittingly, to nine justices.

LAW 8881P Seminar in Presidential Power Credits: 2

In this course students will examine unsettled and often controversial questions regarding the extent of presidential power in sensitive contexts. Emphasis is placed on how these issues are implicated in current national life. Students will examine and will be expected to actively discuss during class sessions issues such as the president's authority to decline enforcing federal law, the extent of the president's authority to engage in overseas military action without congressional approval (and, assuming approval is required, what form that "approval" must constitutionally take), presidential authority to indefinitely detain "enemy combatants" at Guantanamo Bay, Cuba (or similar locations), the legal effect of presidential signing statements, the extent of presidential oversight authority over administrative agencies, and the propriety of the Court's invocation of the "political question doctrine" when confronted with sensitive questions regarding presidential power.

LAW 8882 Patent Law Credits: 2-3

This course will focus primarily on substantive U.S. patent law, including the laws governing the patentability of particular inventions, the patent procurement process, the rights granted by a patent, and patent enforcement and litigation. As time permits, the course will explore policy issues raised by the current patent system, discuss proposals for reform and international harmonization, and consider alternatives to patent protection such as trade secret and regulatory exclusivity.

LAW 8882R Patent Prosecution Credits: 2-3

This course will focus primarily on the practical application of substantive U.S. patent law, including the laws governing the patentability of particular inventions, the patent procurement process, the rights granted by a patent, and patent enforcement and litigation. In particular, this class will focus on teaching students how to draft a patent application and how to prosecute the application in the U.S. Patent and Trademark office. This class will be designed to mirror the substantive patent law being taught in the Patent Law course. For example, the Patent Law course will present the law and theory of obviousness or novelty; the Patent Prosecution course will instruct in how to deal with and respond to an obviousness or novelty rejection from the U.S. Patent and Trademark Office.

Co-requisites: LAW 8882.

LAW 8884 White Collar Crime Credits: 2-3

Examines substantive federal law in the areas of fraud, public corruption, financial crimes and conspiracy; it also includes examination of procedural and policy issues related to business and white-collar investigations.

Prerequisites: LAW 8634.

LAW 8885 Seminar In Philosophy And Law Credits: 2

An examination from a philosophical perspective of the historical and conceptual relationships present in the evolution, development and analysis of law, including natural law theory, legal positivism and legal realism, and focusing on a specific area of controversy in the law.

LAW 8885H The Quest for a Satisfying Career in Law Credits: 1-2

An examination of what research suggests about the likelihood that a career in law will prove satisfying, including an exploration of the specific types of firms and work environments that are most likely to produce happy lawyers; a consideration of what studies from the fields of neuroscience and psychology suggest about steps that lawyers, law firms, and law schools can take to improve prospects for career satisfaction; and a consideration of how high happiness should rank among life's goals.

LAW 8886 Corporate Taxation I Credits: 2-3

Tax treatment of corporations and shareholders with respect to formation, non-liquidating distributions, stock dividends, redemptions and liquidations. The course may also cover the personal holding company tax, the accumulated earnings tax, collapsible corporations, multiple corporations and tax consequences of corporate reorganizations; survival of tax attributes; acquisition of loss corporations; and a survey of consolidated return reporting.

LAW 8887 Corporate Taxation II Credits: 3

Tax consequences of corporate reorganizations; survival of tax attributes; acquisition of loss corporations; and a survey of consolidated return reporting.

Prerequisites: LAW 8886.

LAW 8888A Partnership Taxation II Credits: 1-3

A study of selected topics in tax planning and in negotiating and drafting organizational documents (e.g. partnership agreements and operating agreements) for entities that will be classified as partnerships for tax purposes, including advanced exploration of issues relating to special allocations and book/tax disparities, optional adjustments to basis, payment to retiring and deceased partners, the impact of I.R.C. Section 751 on partnership distributions and on sales and exchanges of partnership interests, partnership mergers and divisions, partnerships with tax-exempt partners, and tiered partnerships.

Prerequisites: LAW 8888R.

LAW 8888R Partnership Taxation I Credits: 2-3

An in depth examination of the tax principles governing partnerships limited liability companies and other unincorporated organizations classified as partnerships for tax purposes, including questions involving the tax consequences of the formation of such organizations, operating distributions, basis computations, liquidating distributions, and sales of ownership interests.

LAW 8889R Subchapter S Taxation Credits: 1-2

An examination of the tax principles governing Subchapter S Corporations, including the tax consequences of their formation; the taxation of their income and the deductibility of their losses; operating distributions; basis computations; liquidations; distributions; and sales of S Corporation shares of stock.

Prerequisites: LAW 8886.

LAW 8890A Sports Law I, Amateur Sports Law Credits: 2

Coverage of various amateur sports law issues with a focus on the regulation of interscholastic, intercollegiate sports, Olympic and international sports, and sports broadcasting; including such topics as constitutional law, tort law, contract law, and Title IX gender discrimination; and a consideration of federal disability discrimination laws, the status of collegiate athletes who participate in big time sports programs, the regulatory authority of the National Collegiate Athletics Association, The National High School Athletic Association, international and Olympic sports organizations.

LAW 8890B Sports Law II, Professional Sports Law Credits: 2

A focus upon the multitude of legal issues and unique relationships in the sports industry, including, among other issues, professional team sports, other professional sports, facilities management in professional sports, legal implications and the practical realities of the unique labor-management relationships in professional sports. The most significant areas to be studied in the context are antitrust, labor, communications, taxation, contracts law, and intellectual property law.

LAW 8890C The Emergence and Transformation of Concussion Litigation Credits: 1-2

This course will examine the emergence, transformation and development of concussion litigation. Concussion litigation spans multiple areas of the legal landscape – from torts, civil procedure, sports law, labor and employment law and, inter alia, medical-legal aspects. We will begin with the theoretical underpinnings of the emergence of concussion litigation. We will then look at how society, the legislature and the courts have responded to sports concussions. This will require us to analyze what the concussion litigation landscape looks like currently and how it will be shaped in the future.

LAW 8890I Selected Topics in International and Comparative Sports Law Credit: 1

The course introduces students to the basic structure and techniques of dispute resolution utilized in international sports law. The field of international sports law is an ever-expanding area of the law and the term "international sports law" refers to an emerging and distinctive body of rules that govern transnational sports and sporting activities. Distinct bodies of international sports law have developed under the aegis of the Olympic Charter that applies to international sports competition well beyond Olympic competition itself, and encompasses both traditional Olympic sports and non-Olympic sports. Many international sports law disputes are now resolved in the Court of Arbitration For Sport (CAS), a body that may rightly be referred to as a Supreme Court for a very wide array of international sports disputes involving such matters as doping, eligibility, cheating, violence, discrimination, commercialization and intellectual property.

LAW 8890R Entertainment Law Credits: 2-3

An examination of the legal issues affecting the print and broadcast media. Topics covered may include copyright, antitrust, spectrum allocation, right of privacy, first amendment issues (prior restraint, obscenity, commercial speech, defamation and access to both information and judicial proceedings), licensing and new technologies including and beyond cable television.

LAW 8890X Sports Law Internship Credits: 2-6

Sports Law Interns work in offices focused on collegiate or professional sports to learn about the regulatory, compliance, and business aspects of sport and the sporting enterprise. Students analyze and apply regulatory standards, conduct legal research regarding novel legal issues, draft memoranda, legal documents, or other documentation.

Co-requisites: LAW 8749.

LAW 8892R Estate and Gift Tax Credits: 2-3

Problem method study of estate, gift and generation skipping transfer taxes and the income taxation of estates and gifts. Emphasis on lifetime and post-mortem planning as well as compliance requirements.

LAW 8893 International Taxation Credits: 2-3

An introduction to the taxation of income of U.S. citizens, residents and corporations from foreign sources and the income of foreign residents and non-residents from U.S. sources. Topics may include sources of income rules, foreign tax credit provisions, the earned income exclusion for foreign source income, income tax treaties and a survey of the tax treatment of U.S. investments made offshore.

LAW 8893R Taxation Of Property Transactions Credits: 2-3

Income taxation of property transactions. Detailed study of capital gains and losses, passive losses, the at-risk rules, and the alternative minimum tax.

LAW 8895S Jury Selection Credit: 1

Students study the purpose of voir dire and the law pertaining to jury selection and receive hands-on experience in selecting a jury role-playing as lawyers; jurors, and presiding judge in a concluding 2 1/2 hour courtroom simulation (where a jury is selected after making challenges for cause and exercising preemptory strikes); and learn that jury selection is an art not a science-which needs to be tailored to the facts of the case and the witnesses the attorney expects to present. An actual case involving a badly injured young plaintiff and a large corporate defendant-where liability is questionable-is used for the simulation. Students learn active listening skills and how to interpret non-verbal behavior. Examples from prominent, practicing lawyers are presented. The course is graded on a pass/fail basis.

LAW 8897 Seminar In Analytical Strategies Credits: 1-2

Pedagogical philosophy of legal education; common themes in first-year legal education; techniques of cooperative learning of legal materials. Students may act as study group leaders for various first-year course subjects. Ungraded.

LAW 8897B Building MBE Skills Credit: 1

Preparation of students for the bar exam by building bar exam multiple choice skills. Focus will be on strategies and tactics in the topics tested by multiple choice questions. Additional emphasis will be on learning how to self-assess understanding of concepts and judgment errors through intense review of errors. The course will require eight to ten hours a day of class and outside work.

LAW 8897E Introduction to Law Study Credits: 0

This course is designed to help incoming law students navigate the challenging transition to law study. The course is a rigorous, five-day introduction to law school. Each day focuses on a "stage" of law school learning; orientation, class preparation, class, after class review, exam preparation, and exam taking. The course addresses the skills of reading, writing, and thinking at each of these stages through simulated classes, direct teaching of study skills, written and oral exercises, and individual meetings with faculty.

LAW 8897R Governmental and Legal Aspects of Education Credits: 2-3

Study of legal issues within higher education. Focus is on state and federal law and regulations as they pertain to issues from academic freedom to governance and administration. Focus on strategies for preventive law is a major component of the course.

LAW 8898 Construction Law Credits: 2

The Construction Law course would emphasize state and federal construction law and would provide the students with practical experience in drafting contracts, negotiating disputes, and conducting a mock arbitration. The course would cover the contract responsibilities and remedies of contractors, subcontractors, design professionals, sureties and owners, including the United States Government. The course would emphasize the controlling state and federal statutes and regulations, as well as case law which illustrates the application of the statutes and other areas of law not covered by statute. The classroom sessions will include discussion of the practical aspects of legal practice in the construction industry, with instruction and examples regarding the drafting of documents and contracts, negotiation of disputes, and decision-making regarding the type of dispute resolution forum to recommend to a client.

LAW 8900 Takings Law Credits: 1-2

An examination of all aspects of takings law including the historical and constitutional basis for eminent domain, the public use requirement, regulatory takings, development exactions, and alternatives to takings. Comparisons between U.S. and state regimes and comparative takings law.

LAW 8901 Advising Life Sciences and Technology Entrepreneurs Credits: 1-2

A condensed study of the key legal issues for the entire cradle-to-grave (founding-to-exit transaction) life cycle of high-growth technology and life sciences ventures, focusing on these critical phases: structuring and organizing the high-growth venture; relationships with key constituencies; acquiring, protecting and licensing intellectual property assets; financing transactions and realizing wealth through exit transactions.

Prerequisites: LAW 8601.

LAW 8902 Topics and Cases Related to In-House Counsel Credit: 1

This course surveys a wide range of legal issues from the in-house counsel perspective, including those related to professional responsibility, corporate governance, transactions, compliance, risk management, intellectual property and litigation. Through the use of case studies, students will use legal principles and business judgement to analyze scenarios in various corporate settings.

Prerequisites: LAW 8601.

LAW 8903 Fundamentals of Legal Investigations Credits: 2

This course focuses on skills and methods needed to fully obtain facts so as to determine strategies and analyze possible outcomes for all stages of litigation, both criminal and civil. Detailed information on searching public records, Internet sites, and other document retrieval, as well as methods to locate and interview people, will be provided to students through an interactive format. Using an investigation on parallel tracks approach, i.e., paper and people, students will learn the relationship between documents/physical evidence and thorough, reliable interviewing of clients and witnesses.

LAW 8904 Multicultural Lawyering and Spanish for Lawyers Credits: 1-2

In this course, students acquire skills and knowledge needed to represent Spanish speaking clients, including mastering selected Spanish legal vocabulary, working with translators, conducting initial client interviews, and identifying cultural impacts on communication. Ethical dimensions of cross-linguistic and cross-cultural counseling are examined and students receive training in counseling skills.

Prerequisites: Audition with professor to determine minimum Spanish language ability.

LAW 8905 Intellectual Property Litigation Credits: 2

Advanced engagement with intellectual property concepts and practical skills in litigation of these cases. The course will address the three essential areas of intellectual property law concept (copyright, patent, and trademark) and explore how these differences translate into different procedural and substantive considerations in litigation. Simulations of various stages of litigation will focus on litigation strategy and drafting skills.

LAW 8907 Seminar in Advanced Trademark Credits: 2-3

This course examines advanced substantive topics in various trademark areas, some of which are not covered in prior classes and some of which explore areas of controversy in greater depth. Students will also be exposed to the trademark administrative process in greater depth.

LAW 8908 Family Tax Law Credit: 1

The study of federal tax issues relevant to attorneys who practice family law.

Prerequisites: LAW 8552.

LAW 8909 State and Local Government Law in a Nutshell Credit: 1

This course will examine the laws and structures through which Kansas City local government operates. Topics will include the context for local government functions, the city charter and structure of local government, and examination of the particular topics such as economic development tools, property tax abatement, and local agency interactions.

LAW 8910 Intellectual Property Clinic Credits: 2

Under the supervision of faculty who are licensed attorneys, students will counsel start-up companies and their owners and assist with intellectual property matters related to Trade Secrets, Copyright Trademark, Patent and planning in connection with concepts related to Business Torts. Students will conduct patentability and trademark searches, prepare patent landscape reports, trademark registrations, opposition and cancellation responses and assist Clinic clients in identifying trade secrets and potential patentable inventions and preparing invention disclosures as well as provide general intellectual property information and advice to Clinic clients.

Prerequisites: LAW 8808 or LAW 8797 and LAW 8798 or LAW 8882.

LAW 8911 Winning Voir Dire Credit: 1**LAW 8912 Client Interviewing Credits: 1-3**

Basics of client interviewing. Training will include the following components: a) Passive vs. Active Listening b) Forms of Questions c) Preliminary Problem Identification d) Techniques for conducting Initial Interviews e) Providing Information the Supervising Attorney Wants/Needs"

LAW 8913 Mental Health Investigation I Credits: 1-2

This is a one-week, one or two-credit hour practical skills course which focuses on skills and methods needed to identify and understand mental health issues and phenomena that every lawyer will encounter. Students will examine what mental illness is, how it affects sufferers, and how it presents to lay observers so that it can be understood and explored in relevant legal contexts. This course is offered in connection with the Mitigation Skills Workshop, which trains lawyers representing capital clients how to interview clients and witnesses for information relevant to developmental, cognitive and mental health issues; students will participate in role-playing a practical skills exercises with Workshop participants.

LAW 8913B Mental Health Investigations II Credits: 1-2

This is the second half of a practical skills course which focuses on skills and methods needed to identify and understand mental health issues and phenomena that every lawyer will encounter. This course is offered in connection with the Mitigation Skills Workshop, which trains lawyers representing capital clients how to interview clients and witnesses for information relevant to developmental, cognitive and mental health issues; students will participate in role-playing a practical skills exercises with Workshop participants.

LAW 8914 Selected Reading in Legal Scholarship Credit: 1

Students and faculty will read and discuss a substantial book by a legal scholar examining a contemporary issue in law and society from a historical, comparative, or jurisprudential perspective. The course will include discussions with the author and students will complete a short project related to the book topic.

LAW 8914F Law and Film Credits: 1-3

Exploration of the function of law and lawyers in society by examining legal decisions, statutes, and legal commentaries in the context of films, including classic, contemporary mainstream, foreign, documentary, and independent films. Students will view and critique films in light of assigned reading materials. Using films as analytical tools, the seminar examines the ways in which popular culture products (such as films and television) both reflect and change the social views about law and lawyers.

LAW 8915 Social Venture Creation Credit: 1**LAW 8917 Law and Human Trafficking Credits: 1-2**

Theory and legal structures relating to human trafficking, including practical skills in representing victims.

LAW 8919 The Insanity Defense Credits: 1-2

This course will review several aspects of the insanity defense: its history, how it works, and the public perception of the defense. The course will focus on the trial of John Hinckley Jr. for attempted murder of President Ronald Reagan as a vehicle for discussing how the defense is presented, the changes in the defense that the verdict in that trial brought about, recent significant cases and possible future changes in the defense.

LAW 8920 Introduction to Islamic Law Credits: 1-2

This course will provide a basic overview of Islamic law from its origins to the present. Students will study both primary and secondary sources of Islamic law. The course will also compare Islamic legal concepts to those in common law countries.

LAW 8921 Selected Projects in Law, Technology and Public Policy Credits: 1-6

This "studio" course involves the creation of interdisciplinary teams of law and graduate students from UMKC and other graduate and law schools and their media laboratories to work on cutting edge projects at intersections of law, technology and public policy.

LAW 8922 Access to Justice (A2J) Workshop Credits: 1-6

Students will identify an area of law or law process that can be made more accessible with the application of a technology solution. Specifically the students, after analyzing the area of law, will use the CALI A2J-Author guided interview software and document assembly software to create the forms and directions to assist self-represented litigants.

LAW 8923 Interdisciplinary Perspectives on Counseling an Aging Population Credits: 1-2

Study and practice of interdisciplinary perspectives of aging and core competencies in active listening, narrative translation, and service opportunity identification. Using a combination of readings, simulations, skills trainings, team preparations and presentations of case studies and individual reflective papers, the course is designed to engage professional students in understanding each discipline's approach to describing the problem, interacting with patients/clients in identifying the problem and sharing perspectives on developing plans to prevent and address the problem with and on behalf of these patients/clients.

LAW 8925 Entrepreneurial Urban Development Credits: 1-4

The projects-based Entrepreneurial Urban Development course will feature interdisciplinary teams of faculty and graduate or upper-level undergraduate students providing analysis on real estate-based projects relating to the development or redevelopment of properties in urban areas, with a particular focus in, but not necessarily limited to, Kansas City, MO and Kansas City, KS. Students enrolled in the course will receive classroom instruction through modules related to development, land use controls and entitlement processes, affordable housing law and policy, cost analysis, market analysis, feasibility analysis, investment analysis, finance, incentives, design, urban planning, and community engagement.

LAW 9740A Missouri Appellate Practice Credit: 1

Basic rules and procedures for preparing an appeal in Missouri.

Life Sciences (LIFE-SCI)

Courses

LIFE-SCI 5899 Required Graduate Enrollment Credit: 1

Life Sciences - Cell Biology and Biophysics (LS-CBB)

Courses

LS-CBB 5501 Graduate Biophysical Principles Credits: 3

The focus of this course is on the theoretical principles underlying the biophysical methods used by a wide range of biological chemists. The approaches covered include thermodynamics, chemical kinetics, molecular interactions, transport properties, quantum mechanics, optical spectroscopy, and molecular structural approaches involving nuclear magnetic resonance spectroscopy, X-ray diffraction, and Mass spectrometry.

LS-CBB 5504 Graduate Virology Credits: 3

Survey of the molecular biology of animal, plant, and bacterial viruses. The course will emphasize the molecular mechanisms of virus replication, viral pathogenesis, and the use of virus as model systems to study mammalian cells.

LS-CBB 5505 Molecular and Cellular Neurobiology Credits: 3

The molecular basis of chemical and electrical communication between nerve cells. Topics will include: neurotransmitters, neuropeptides, receptors, channels, second messengers, cytoskeleton, cell adhesion, development, neuronal plasticity and psychopharmacology.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-CBB 5520 Cell and Molecular Biology II Credits: 3

A presentation of the cellular and subcellular organization and function of eukaryotic cells. Discussions will emphasize basic concepts by which structure and functions are integrated.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-CBB 5530 Cell and Molecular Biology I Credits: 3

Molecular aspects of gene structure and function in prokaryotic and eukaryotic organisms and their viruses. Emphasis in genome structure and organization and regulation of gene expression.

Co-requisites: LS-MBB 5561.

LS-CBB 5538 Molecular Recognition in Cellular Biology Credits: 2

Graduate Research Seminar. Studies of the latest development leading to an increased understanding of cellular biology processes when the experimental tools for structure biology analysis and molecular genetics are applied.

Co-requisites: LS-MBB 5561.

LS-CBB 5566 Membrane Biochemistry and Biophysics Credits: 3

Structure and function of biological membranes including architecture, dynamics, models, biochemical compartmentation, energy transduction, transport mechanisms, membrane protein structures, and cell surface receptors.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-CBB 5569 Structural Biology, Methods and Strategies Credits: 3

Analysis of strategies and methodologies such as X-ray crystallography, nuclear magnetic resonance and advanced microscopy procedures including imaging analysis for the study of relationships of higher order macromolecular structures to biological functions.

Prerequisites: LS-MBB 5561, LS-MBB 5562.

LS-CBB 5583 Current Topics in Cell Biology and Biophysics Credits: 1-3

Current topics and recent developments in cell biology and biophysics with emphasis on rapidly developing research areas.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-CBB 5591 Directed Individual Studies in Cell Biology and Biophysics Credits: 1-6

Intensive reading and/or research in an area selected by the graduate student in consultation with the instructor.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-CBB 5596 Advanced Experimental Cell Biology I Credits: 2

Structured laboratory work with individual tutorial sessions designed to familiarize first year Interdisciplinary Ph.D. students with concepts and techniques of modern cell biology research. 1-2 hr/wk tutorial and 15-20 hr/wk of laboratory work.

Co-requisites: LS-MBB 5561.

LS-CBB 5597 Advanced Experimental Cell Biology II Credits: 2

Continuation of LS-CBB 5596.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-CBB 5599 Thesis Research in Cell Biology and Biophysics Credits: 1-12

Research and thesis preparation for M.S. degree candidates.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-CBB 5612 Seminar in Cell Biology and Biophysics Credit: 1

Presentation and discussion of selected areas in cell biology and biophysics. This course may be repeated by doctoral students for a maximum of 3 credit hours.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-CBB 5690 Analytical Methods in Cell Biology and Biophysics Credits: 1-4

A course that emphasizes the development of skills in experimental design, analytical methods and instrumentation as applied to problems of interest to modern cell biology and biophysics, and analysis of results. Can be repeated up to a maximum of eight hours total.

Prerequisites: LS-MBB 5561, LS-MBB 5562.

LS-CBB 5696 Dissertation Development Credits: 1-6

This course is individually directed research leading to the fulfillment of the Comprehensive Exam requirements for the Cell Biology and Biophysics primary discipline. This includes submission of the final, revised version of the NIH-style research proposal to committee members and (ii) successful oral defense of the proposal before the student's research advisory committee. **Prerequisites:** BIOLOGY 5501.

LS-CBB 5699 Dissertation Research in Cell Biology and Biophysics Credits: 1-12

Research and dissertation preparation for interdisciplinary Ph.D. degree students who have Cell Biology and Biophysics as a discipline.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

Life Sciences - Molecular Biology and Biochemistry (LS-MBB)

Courses

LS-MBB 5503 Eukaryotic Molecular Biology Credits: 3

Molecular aspects of gene structure and function in eukaryotic organisms and their viruses. Emphasis on genome structure and organization, gene expression and regulation and the molecular basis of growth and development.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-MBB 5509 Graduate Developmental Biology Credits: 3

Principles of development and differentiation of structure during embryology in animals. Molecular, cellular and organismal level concepts and mechanism will be considered.

LS-MBB 5510 Graduate Biochemistry for Nurse Anesthetists Credit: 1

This course will present the fundamentals of biochemistry necessary for the practice of nurse anesthesia, specifically, the structure and characteristics of biomolecules found in the cell, how molecules are metabolized to generate biochemical energy, and the basic mechanisms to regulate metabolic processes with regard to the nutritional state of the organism. The course is limited to graduate students in the nurse anesthetist program or in other disciplines where a fundamental understanding of biochemistry would be useful.

LS-MBB 5538 Molecular Recognition in Molecular Biology Credits: 2

Graduate Research Seminar. Analysis of the impact of most recent developments in molecular genetics and structural biology as related to fundamental molecular recognition events.

Co-requisites: LS-MBB 5561.

LS-MBB 5561 General Biochemistry I Credits: 4

The first semester of a two-semester sequence in general biochemistry. This course will emphasize the structure of biological molecules, thermodynamics and kinetics of biological reactions, and selected aspects of energy metabolism and metabolic pathways.

Prerequisites: CHEM 322R.

LS-MBB 5562 General Biochemistry II Credits: 3

The second semester of a two-semester sequence in general biochemistry. This course will emphasize selected aspects of the biochemistry of metabolism and macromolecular assemblies. The molecular basis of genetic and metabolic regulation will be discussed.

Prerequisites: LS-MBB 5561.

LS-MBB 5565 Structure And Function Of Proteins Credits: 3

This course will discuss structure-function relationships of proteins. Topics will include: methods of structure-function analysis, catalytic mechanisms, and regulation of enzyme activity.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-MBB 5567 Physical Biochemistry Credits: 3

Application of physical and chemical principles to elucidate structure and function of biochemical systems. The various modes of interactions between biologically important molecules and the specificity of their interaction will be examined through selected literature examples.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-MBB 5569 Current Topics in Molecular Biology and Biochemistry Credits: 1-3

Current topics and recent developments in biochemistry and molecular biology with emphasis on rapidly developing research areas.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-MBB 5591 Directed Individual Studies In Molecular Biology And Biochemistry Credits: 1-6

Intensive readings and/or research in an area selected by the graduate student in consultation with the instructor.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-MBB 5596 Advanced Experimental Molecular Biology I Credits: 2

Structured laboratory work with individual tutorial sessions designed to familiarize first year Interdisciplinary Ph.D. students with concepts and techniques of modern molecular biology research. 1-2 hr/wk tutorial and 15-20 hr/wk of laboratory work.

Co-requisites: LS-MBB 5561.

LS-MBB 5597 Advanced Experimental Molecular Biology II Credits: 2

Continuation of LS-MBB 5596.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-MBB 5599 Thesis Research in Molecular Biology and Biochemistry Credits: 1-12

Research and thesis preparation for M.S. degree candidates.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-MBB 5611 Seminar in Molecular Biology and Biochemistry Credit: 1

Presentation and discussion of selected areas in biochemistry and molecular biology. This course may be repeated by doctoral students for a maximum of 3 credit hours.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

LS-MBB 5690 Analytical Methods in Molecular Biology and Biochemistry Credits: 1-4

A course that emphasizes the development of skills in experimental design, analytical methods and instrumentation as applied to problems of interest to modern molecular biology and biochemistry, and analysis of results. Can be repeated up to a maximum of eight hours total.

Prerequisites: LS-MBB 5561, LS-MBB 5562.

LS-MBB 5696 Dissertation Development Credits: 1-6

This course is individually directed research leading to the fulfillment of the Comprehensive Exam requirements for the Molecular Biology Biochemistry primary discipline. This includes submission of the final, revised version of the NIH-style research proposal to committee members and (ii) successful oral defense of the proposal before the student's research advisory committee.

Prerequisites: BIOLOGY 5501.

LS-MBB 5699 Dissertation Research in Molecular Biology and Biochemistry Credits: 1-12

Research and dissertation preparation for interdisciplinary Ph.D. program students who have Molecular Biology and Biochemistry as a discipline.

Co-requisites: LS-MBB 5561, LS-MBB 5562.

Management (MGT)

Courses

MGT 5501 International Business Environment Credit: 1.5

The aim of this course is to provide a broad introduction of the international business environment. Students will develop understanding of different economic, cultural political and legal environments affecting international business activities. They will further explore why international trade and government interventions occur among and across countries and how world financial institution have developed historically.

MGT 5502 Leadership in Organizations Credit: 1.5

This course focuses on how organizations work and how leaders can help them work better, Its goal is to provide ideas, tools, and tactics that will help students become more effective leaders. The course is designed to challenge students conceptually through readings, discussions, and developmental assessments, and to challenge at the level of self-awareness and action through teamwork, reflective activities, role plays, case applications, ad "leadership challenges".

MGT 5503 Leadership Residency Credits: 2

The leadership residency engages students in the fundamentals of business and effective leadership practice during a one-week immersive experience. Using a business simulation, students learn the fundamentals of collaborative teamwork and basic concepts in the program's leadership curriculum. Additionally, the simulation introduces students to the core management areas of financial management and decision making, providing an overview of management strategy rooted in financial modeling and analysis.

Prerequisites: Admission to Executive MBA Program.

MGT 5507 Human Capital Management Credit: 1.5

This course seeks to provide managers with knowledge, skills, and resources to effectively manage human capital in organization of all sizes. It presents an overview of the theory, research, and practices used to strategically align HR policies and practices with the organization's overall business goals. The course highlights how HR policies and practices can support business objectives in a diverse, global environment while supporting ethical principles. Within a strategic HRM framework, functional areas of staffing, training and development, performance management, total rewards (compensation and benefits), and managing employment relationships are covered.

MGT 5512 Leading and Managing People, Teams and Organizations Credits: 3

Leading and Managing People, Teams and Organizations focuses on how aspiring leaders can enhance their effectiveness by addressing the human side of enterprise. It combines an exploration of key leadership tasks (e.g. shaping vision and purpose, engaging and influencing others, and sustaining momentum) with the study of essential human resources practices including hiring, developing, motivating, and creating a positive, rewarding workplace. Students will leave with concrete tools for understanding the organizational context, managing human capital, and bringing the best out of talented people.

Prerequisites: Students must be enrolled in a Bloch School graduate program.

MGT 5514 Strategic Management in the Globalized World Credits: 3

As the world has become increasingly integrated through globalization, today's business leaders must possess an awareness of global business environments and ability to navigate them. The aim of this course is to provide a broad introduction of the international business environment and strategic management concepts, and how a firm can gain competitive advantages. Upon completion of this course, students will possess an ability to recognize the opportunities and challenges and formulate strategies in the globalized business environment.

Prerequisites: FIN 5509 or concurrent enrollment; DSOM 5511 and MKT 5504.

MGT 5516 Leading Teams Credits: 3

This course is designed to enhance the student's understanding of designing, forming, developing, leading, and evaluating high-performing teams in traditional and virtual organizations. In-class projects will facilitate students' assessment and application of their own talents to the arts of member selection, coaching, and trust building to engage team members in productive and ethical group processes to achieve successful outcomes. Cases will be used to diagnose and potentially solve team difficulties considering intra-team, organizational, and extra-organizational factors.

Prerequisites: MGT 5512 or MGT 5502 or MGT 5507 or PUB-ADM 5548.

MGT 5517 Leading Through Influence and Persuasion Credits: 3

This course challenges students to think about power dynamics in organizations and the array of influence approaches leaders develop and use to build support for their ideas and strategies. Using reading, case studies, and self-reflection tools, this course engages students in critical thinking about business scenarios that require a variety of leader influence strategies beyond traditional "command and control" approaches. Through exploration of concepts such as mapping the terrain, building social capital, and managing across, students develop a toolkit of ethical strategies for enhancing their organizational credibility and influence.

Prerequisites: MGT 5512 or MGT 5502 or MGT 5507 or PUB-ADM 5548.

MGT 5518 Leadership & Motivation Credits: 3

The course explores leadership as a relationship between leaders and those they are leading that enables people to work together in the service of shared goals. The course focuses on five basic tasks of leadership: (1) diagnosis-understanding what's happening; (2) shaping purpose and values; (3) enlisting and engaging people (including coaching, building high-performance cultures, motivating and inspiring); (4) sustaining momentum; (5) reflection and assessment.

Prerequisites: MGT 5512 or MGT 5502 or MGT 5507 or PUB-ADM 5548.

MGT 5519 Conflict Management and Negotiation Strategies Credits: 3

This course explores the nature of successfully managing conflict in organizational settings, as well as the skills needed to be an effective negotiator. In this course, students will learn the difference between functional and dysfunctional conflict, how to stimulate functional conflict, various styles for managing conflict, ways to identify the desired outcomes of conflict, how to prepare for negotiations, various dispute resolution techniques, and the characteristics of effective negotiators. The course uses a variety of tools - readings, case studies, videos, and guest speakers - to engage students in real business scenarios related to managing conflict and negotiation strategies.

Prerequisites: MGT 5512 or MGT 5502 or MGT 5507 or PUB-ADM 5548.

MGT 5523 Negotiation, Conflict Management, and Influence Skills Credits: 2

Opportunities for negotiation, conflict management, and influence are everywhere. Effective negotiators use analytical skills, interpersonal sensitivity, and communication acumen to resolve conflicts, influence others, and reach agreements that serve their interests and preserve or enhance their reputations. Students will develop deep familiarity with fundamental negotiation concepts such as BATNA, reservation price, interests, and distributive and integrative negotiation. Students will also develop their practical knowledge and skills from pre-negotiation planning to post-negotiation evaluation through intensive experiential simulations with peer review and rapid feedback, personal journals, and coaching.

Prerequisites: Admission to Executive MBA Program.

MGT 5531 Leadership, Strategy and Human Resources Credits: 2

Focuses on the leader as a catalyst in developing high-performance, market-based cultures and as a human resource strategist in marshaling the workforce. Geared to the general manager, the course presents ideas and tools for building, bonding, and linking the workforce to accomplish the organization's mission. Topics include ideas and tools for identifying, recruiting, and retaining talent; developing and coaching subordinates; appraising and rewarding performance; and delegating to balance control and risk.

Prerequisites: Admission to Executive MBA program.

MGT 5533 Leading and Managing Change Credits: 3

This course provides students with analytical skills and insights to more effectively manage and lead change, especially within those organizations characterized by complexity and/or uncertainty. Using a variety of vehicles-including case studies, articles, and speakers-the course engages students in timely, real change scenarios and associated management challenges, such as adaptation in changing markets; turnarounds in troubled businesses; integrative change in acquisitions, and process change in stable businesses.

Prerequisites: MGT 5512 or MGT 5502 or MGT 5507 or PUB-ADM 5548.

MGT 5538 Strategic Management Credits: 3

Strategic Management sets the tone for year 2 of the Executive MBA. Students study the formulation and evaluation of strategy, including industry analysis, strategic positioning, and the boundaries of the firm. Students address the capacity of executive leadership to create and communicate a clear direction for a company's future. Additional focus areas include competition and innovation.

Prerequisites: Admission to the Executive MBA Program. Completion of Semester 1 and Semester 2 of the Executive MBA program.

MGT 5545 International Management Credits: 3

Examination of the management of contemporary international business organizations through a study of the political, economic, social and technological factors and their relationship and impact upon the administrative activities and strategies of the international firm.

MGT 5546 Seminar in International Management Credits: 3

This course focuses on the issues that business organizations face in a global economy. The instructor will introduce global strategic decisions via case studies.

Prerequisites: MGT 5545.

MGT 5547 Global Initiatives in Management Credits: 2

Global Initiatives in Management examines the complexity of management across national boundaries. The course explores the interrelationship and impact of political, economic, social, and technological factors when formulating and executing strategy internationally.

Prerequisites: Admission to the Executive MBA program

MGT 5552 International Study in Business Credits: 3

This course is designed to provide a study-abroad experience for the student. The course involves three components: study of international business through on-campus lectures and discussions; travel to a foreign country for visitations to business firms, government organizations, and cultural sites; and critique sessions of the international learning experience after travel completion.

Prerequisites: special application and selection process.

MGT 5557 Leadership And Organizations Credits: 3

Leadership and Organizations provides tools and tactics for assessing organizations' needs and constraints through multiple lenses, and assessing one's own leadership strengths and weaknesses for development and alignment with organization needs. Additionally, students will be introduced to a framework for ethical decision making, and how ethics is important to the strategic outcomes of an organization.

Prerequisites: Admission to Executive MBA Program.

MGT 5566 Attracting, Retaining, and Developing Human Capital Credits: 3

This course presents theoretical frameworks and practical applications for determining optimal person-organization fit and person-job fit within organizations. Emphasis will be placed on integrating recruitment, selection, retention, and training and development strategies and practices with overall business strategies. The importance of strategically planning and implementing staffing and development processes will be addressed as critical contributors to organizational effectiveness and sustainability. Recommended preparation: MGT 5512 or MGT 5502 or MGT 5507 or PUB-ADM 5548.

MGT 5567 Total Rewards Management Credits: 3

Total Rewards Management presents both theory and practice for designing effective rewards systems within organizations. The development of base pay and incentives and how they can be linked to performance will be covered. Characteristics of the work environment, such as recognition and development opportunities will also be considered in terms of their contribution to the total reward system. Recommended preparation: MGT 5512 or MGT 5502 or MGT 5507 or PUB-ADM 5548.

MGT 5568 Talent Management Credits: 2

Attraction, retention, motivation, and management of the organization's human resources is critical in our knowledge-based economy. This course will address strategic issues around sourcing, acquiring, motivation, retaining, and managing workers in domestic and global enterprises from a variety of industries.

Prerequisites: Admission to Executive MBA program.

MGT 5569 Leadership Accountability and the Legal Implications Credits: 2

Highlights the accountability of leaders and the challenges they face in the rapidly changing business environment. The course studies the political, social, ethical, and global environment in which American business organizations operate and the impact on today's leaders. Topics include creating and maintaining affiliate relationships and joint ventures, as well as prohibitions in anti-competitive behavior, protection of intellectual property, operating within a regulated environment, and securities law.

Prerequisites: Admission to Executive MBA Program.

MGT 5570 MBA Capstone-Global Management Consultancy Credits: 3

An integrative global management consulting experience for a real world organization that applies analytical skills in the areas of finance, marketing, information systems, supply chain management, human resources, leadership, innovation, international, and strategy. Course deliverables include written and oral reports for the client organization. The course requires travel to visit client organization's operations.

Prerequisites: MBA students must have completed all required core courses AND be in the last year of their program. MSA, MPA, MSF, MSERE, or MSGE program students may enroll with consent of instructor. Special application and selection process.

MGT 5571 Influence, Persuasion and Change Credits: 2

Presents ideas, strategies, and tools for leading change in complex organizations. This course challenges students to think about the execution of change strategies through assessment or organizational power dynamics and appropriate influence styles for achieving results. Emphasis is placed on analyzing these attributes and skills most critical for building influence, especially in change initiatives, and on defining an ethical approach to leading, influencing, and persuading others.

Prerequisites: Admission to the Executive MBA program.

MGT 5572 MBA Capstone-The Capstone Consulting Project Credits: 3

An integrative management consulting experience for a real world organization that requires application of conceptual models and analytical skills in multiple disciplines including areas such as finance, marketing, information systems, supply chain management, human resources, leadership innovation, international, and strategy. Course deliverables include written and oral reports for the client organization. The course requires interaction with senior managers in the client organization with anticipation of in-person or virtual visits to the firm.

Prerequisites: MBA students must have completed all required core courses AND be in the last year of their program. MSA, MPA, MSF, MSERE, or MSGE program students may enroll with consent of instructor.

MGT 5581 Current Issues in Management with Technology Credits: 2

Technology is being incorporated in all aspects of management. The current issues course explores the strategic deployment of technology in operational areas like supply chain, marketing, human resources and accounting. Students are exposed to technology as a strategic tool to be incorporated in core management functions.

Prerequisites: Admission to EMBA program.

MGT 5585 Integrated Business Strategies (Capstone) Credits: 2

Integrates the disciplines of business to help the student develop a comprehensive understanding of business planning and strategy. Students will use cases and simulation to plan and test alternative business strategies in a competitive environment. The course examines the critical factors involved in strategic decision making.

Prerequisites: Admission to the MBA Program.

MGT 5587 Special Topics Credits: 3

The study of a contemporary management topic of interest.

MGT 5595 Internship Credits: 1-3

An opportunity for students to integrate their academics studies via employment with a business/organization in the community.

MGT 5597 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

MGT 5899 Required Graduate Enrollment Credit: 1

Management Information Systems (MIS)

Courses

MIS 5507 Business Analytics and Statistics Credits: 3

Business Analytics is about the science and the art of using data for making well-informed business decisions. The course covers the techniques used for acquiring and preparing data, as well as various statistical methods and procedures for mining the data to identify and infer patterns, relationships, and trends. It discusses how these methods can be used by managers for descriptive, predictive, and prescriptive purposes. Upon the successful completion of this course, the student will have the knowledge and the hands-on skills to apply business analytics techniques to various business contexts.

Prerequisites: Bloch School graduate program student.

MIS 5529 Decision Support Systems Credits: 3

Information systems to support decision makers in organizations. This course focuses on influences of cognitive biases and group think on decision makers. Identification of both potential uses of information technology to support decision makers and potential effects of information technology on the decision making processes, and may include a number of computer-oriented assignments.

Prerequisites: MIS 5507.

MIS 5540 Information Technology as a Strategic Tool Credits: 2

This course examines the critical linkage between an organization's business, cultural, and information technology (IT) strategies. In organizations today, information technology has become a key component in accomplishing strategic and operational goals. The course provides concepts and a framework for understanding and enhancing the role IT can play in innovation, change, and continuous organizational learning.

Prerequisites: Admission to the Executive MBA program.

MIS 5552 Data Base Management Credits: 3

Data administration, including theory of relational databases and projects using relational data management packages. The course looks at data modeling and information engineering, entity-relationship modeling, database design, normalization, data dictionaries, distributed databases, database servers, data quality assurance, data integrity, SQL, and may include a number of computer-oriented assignments.

Prerequisites: MIS 5507.

MIS 5554 Systems Analysis, Design And Engineering Credits: 3

This course introduces tools for documenting information system requirements and design and implementation methods; organization of software projects; system specifications, documentation and diagramming standards; programming languages and methodology; costs and schedule estimation, project management; program verification, and internal control issues.

MIS 5557 Data Management and Data Mining for Business Analytics Credits: 3

Data are the major ingredient for making quality business decisions. Students are introduced to the major steps in storing and preparing data as the raw input for decision-making. This includes an introduction to relational databases and data warehouses. Students also learn data mining techniques and statistical methods for inferring and extracting actionable insight from data. These methods help identify relationships and trends in existing cases and provide predictive power about new, unseen cases. Upon successful completion of this course, students will have an understanding of how data can be used to support fact-based decision-making across various business functions and contexts.

Prerequisites: MIS 5507, or DSOM 5509, or PUB-ADM 5510, or ACCTNG 5568, or RL-EST 5573, or FIN 5560.

MIS 5558 Management of Information Technology Credits: 3

Topics to be covered include procurement and management of computer systems, economics of hardware and software, software acquisition, RFQs, RFPs, contract terms and conditions, end-user computing; capacity planning, contribution of computing to business objectives, control, audit, and security of information technology; legal and ethical perspectives; and international issues.

MIS 5587 Special Topics Credits: 3

Special topics in management information systems.

MIS 5597 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

MIS 5899 Required Graduate Enrollment Credit: 1

Marketing (MKT)

Courses

MKT 5501 Marketing Management Credit: 1.5

This course goes beyond the explanation of basic concepts of marketing. The goal is to present a strategic and integrative perspective of marketing in the contemporary digital, global and competitive marketing environment. The emphasis is on the interface between an organization's objectives, capabilities, resources and marketplace needs and opportunities. Examples of major topics to be covered are market-oriented philosophy and corresponding strategy, customer relationship management, branding and brand equity, services marketing, marketing ethics, defensive and offensive marketing strategies, product positioning, distribution and pricing strategies.

MKT 5504 Marketing Management Credits: 3

The course presents concepts of marketing, describes marketing strategy, and defines marketing tactics. Marketing law, fiduciary responsibilities, and marketing ethics for executives impacted by marketing success are identified. The goal is to present a strategic and integrative perspective of marketing in the contemporary digital, global and competitive marketing environment. The integration between an organization's objectives, capabilities, resources and marketplace needs and opportunities is described. Examples of major topics to be covered are marketing philosophies and their corresponding strategies, technology-driven customer relationship management, branding and brand equity, services marketing, product positioning, distribution and pricing strategies, and implementation of marketing tactics in.

Prerequisites: Students must be enrolled in a Bloch School graduate program.

MKT 5539 Social and Mobile Marketing Credits: 3

The course builds around Database Marketing principles, whether supporting marketing at a distance without requiring a physical wholesale or retail intermediary; or supporting physical retail. Social and Mobile media principles, on-line measurement, digital marketing strategy, and tactics by on-line platform are discussed across a variety of media and devices. Students must demonstrate competence in SEO (Search Engine Optimization) and on-line analytics. Students learn to calculate Lifetime Value, Break-Even, PL on a Campaign, and Payback period using industry accepted methodologies.

Prerequisites: MKT 5504.

MKT 5555 International Marketing Credits: 3

This course focuses on marketing problems confronting international business managers and the ways they may be analyzed and resolved. The course content includes concepts and techniques useful in international marketing; effects of national differences on marketing practices; organization for international marketing; and strategy formulation for international markets.

Prerequisites: MKT 5504.

MKT 5560 Customer Insights and Communication Strategy Credits: 3

A review of behavioral science concepts and related academic research to help understand customer behaviors and communications targeted to them. Special emphasis is placed on applications of these concepts to problems related to strategies of product, pricing, promotion, and place or distribution.

Prerequisites: MKT 5504.

MKT 5562 Marketing Research & Data Analysis Credits: 3

This course is designed to systematically introduce you to the most commonly used tools/techniques used to arrive at major business decisions from a consumer/customer perspective. The course emphasizes analysis of data using statistical software. Students will be taught to use designated software to analyze data to address real-world marketing problems.

Prerequisites: MKT 5504 and MIS 5507.

MKT 5565 Marketing Management Credits: 2

Marketing management examines the role of marketing in driving profitable revenue growth in companies. The focus is placed on tools and approaches to analyzing and understanding customer needs- including the roles of market research and brand equity- and the development of integrated marketing plans to deliver to those needs.

Prerequisites: Admission to Executive MBA Program.

MKT 5566 Customer Data Analytics Credits: 3

This course is designed to systematically introduce you to the most commonly used tools/techniques for the analysis of customer data for managerial decision-making in a wide variety of business settings. The course emphasizes tools for predictive analytics using statistical software. Students will be taught basic concepts pertaining to regressions, choice models, classification, and segmentation techniques together with hands-on training in designated software. Recommended preparation: Graduate level course in business statistics or decision science.

Prerequisites: MKT 5504 and MIS 5507.

MKT 5575 Applied Strategic Marketing Credits: 3

This course focuses on advanced marketing skills and practical techniques for defining and meeting the needs of the chosen market. The emphasis is on key drivers of marketing effectiveness, including creating a market-oriented culture, customer-focused information systems, the relationship of various components of marketing, and the response to marketing variables. A variety of pedagogical approaches, including applied projects, may be employed.

Prerequisites: MKT 5504.

MKT 5587 Special Topics Credits: 3

Special topics in marketing.

MKT 5595 Internship Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community.

MKT 5597 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

MKT 5899 Required Graduate Enrollment Credit: 1

Mathematics (MATH)

Courses

MATH 5509 General Algebra I Credits: 3

Groups, rings, modules, homology, fields and Galois theory, valuations, matrices, and multilinear algebra. Continued in MATH 5519.

Prerequisites: MATH 410, MATH 420.

MATH 5510 Complex Variables I Credits: 3

The group of linear fractional transformations, complex integration, Cauchy's theorem, the maximum modulus theorem, analytic continuation, Riemann surfaces. Continued in MATH 5520.

Prerequisites: MATH 402, MATH 407.

MATH 5513 Real Variables I Credits: 3

Theory of measure with applications to analysis. Riemann and Lebesgue integration. Continued in MATH 5523.

Prerequisites: MATH 402, MATH 412.

MATH 5514 Mathematics for Secondary Teachers: Algebra and Analysis Credits: 3

Designed for secondary-school teachers. Examine high school mathematics from a higher point of view. Real and complex numbers, functions, algebraic structures of equations, integers and polynomials, number system structures; analyses of alternate approaches, extensions and applications of mathematical ideas, discussion of historical contexts and connections between ideas that may have been studied separately in different courses, relationships of ideas studied in secondary-school to those students may encounter in later study. When taken for graduate credit as Math 5514, an extra project is required.

Prerequisites: MATH 300.

MATH 5517 Matrix Theory I Credits: 3

Unitary matrices, normal matrices, Jordan canonical form, nonnegative matrices and their applications, the symmetric eigenvalue problem.

Prerequisites: MATH 420.

MATH 5519 General Algebra II Credits: 3

Prerequisites: MATH 5509.

MATH 5520 Complex Variables II Credits: 3

Prerequisites: MATH 5510.

MATH 5521 Differential Equations Credits: 3

This course offers an introduction to the qualitative theory and applications of ordinary differential equations (ODE). The presentation of the course will be a blend of fundamental theory and examples. The basic results will be proved rigorously and more advanced results will be only illustrated by examples that demonstrate when and how they may be applied.

Prerequisites: MATH 345, MATH 412, MATH 420.

MATH 5523 Real Variables II Credits: 3

Prerequisites: MATH 5513.

MATH 5524 Mathematics for Secondary Teachers: Geometry Credits: 3

Designed for secondary-school teachers. Examine high school mathematics from a higher point of view. Congruence, distance and similarity, trigonometry, area and volume, axiomatics and Euclidean geometry; analyses of alternate approaches, extensions, and applications of mathematical ideas, discussion of historical contexts and connections between ideas that may have been studied separately in different courses, relationships of ideas studied in secondary-school to those students may encounter in later study. When taken for graduate credit as Math 5524, an extra project is required.

MATH 5527 Matrix Theory II Credits: 3

Prerequisites: MATH 5517.

MATH 5532 Advanced Numerical Analysis I Credits: 3

Error Analysis, Solving Systems of Linear Equations, Solutions of Nonlinear Equations, the Least-Squares Problems, and Approximating functions. Continued in MATH 5542.

Prerequisites: MATH 402, MATH 420.

MATH 5542 Advanced Numerical Analysis II Credits: 3

Eigenvalues and Eigenvectors, Linear Programming, Optimization, Numerical Differentiation and Integration, Numerical Solution of Ordinary and Partial Differential Equations.

Prerequisites: MATH 5532.

MATH 5545 Mathematical Methods In Science And Engineering Credits: 3

This course offers applied linear algebra and Fourier analysis which are indispensable tools in science and engineering. It is designed for beginning graduate students with moderate background in linear algebra and real analysis. Many of the results that are presented in the course will be proved rigorously from mathematical point of view.

Prerequisites: MATH 402, MATH 406, and MATH 420.

MATH 5557 Functional Analysis Credits: 3

Hilbert spaces, linear operators, compact operators, Banach spaces, the Hahn-Banach theorem, the open mapping and closed graph theorems, the principle of uniform boundedness, locally convex spaces.

Prerequisites: MATH 402 and MATH 420.

MATH 5575 Stochastic Calculus for Finance Credits: 3

This course presents the basic idea and theory of stochastic calculus with the focus on the applications to finance. Topics include Brownian motion, Ito integral, Ito formula, Black-Scholes equation and formula, risk-neutral pricing, connections with partial differential equations, exotic options, American derivative securities, and term structure models for interest rates.

Prerequisites: MATH 402 and STAT 436.

MATH 5590 Special Topics Credits: 1-3

Selected topics in various fields of mathematics. May be repeated for credit when the topic varies.

MATH 5699 Research And Thesis Credits: 1-16

Doctoral dissertation.

MATH 5899 Required Graduate Enrollment Credit: 1

Mechanical Engineering (MEC-ENGR)

Courses

MEC-ENGR 5500 Problems Credits: 1-6

Supervised investigation in mechanical engineering to be presented in the form of a report.

MEC-ENGR 5501 Advanced Topics In Mechanical Engineering Credits: 3**MEC-ENGR 5501AD Advanced Topics in Mechanical Engineering Credits: 3**

Advanced Topics in Mechanical Engineering

MEC-ENGR 5501CD Advanced Topics in Mechanical Engineering Credits: 3

Advanced Topics in Mechanical Engineering

MEC-ENGR 5501MS Advanced Topics in Mechanical Engineering Credits: 3

MEC-ENGR 5501SM Advanced Topics in Mechanical Engineering Credits: 2

This course is for high school science teachers who have attended the ASM International Second Year Teachers Camp and have demonstrated the use of camp material in the classroom.

MEC-ENGR 5501TC Advanced Topics in Mechanical Engineering Credits: 2

This course is for high school science teachers who have attended the ASM International Teachers camp and have demonstrated the use of camp material in the classroom.

MEC-ENGR 5505 Imaging Techniques in Materials Science Credits: 3

Introduction to imaging techniques, including x-rays, neutron beams, electron beams and acoustic energy, to study material properties and structure.

Prerequisites: MEC-ENGR 324.

MEC-ENGR 5507 Advanced Dynamics and Modeling Credits: 3

Fundamental principles of advance rigid body dynamics with applications. Special mathematical techniques including Lagrangian and Hamiltonian methods.

MEC-ENGR 5511 Introduction to Biomechanics Credits: 3

This course is to provide students with an introduction to the engineering principles of biomechanics.

MEC-ENGR 5512 Biodynamics Credits: 3

Introduction to musculoskeletal biomechanics including: computational biomechanics, movement simulation, motor control and musculoskeletal tissues.

Prerequisites: MEC-ENGR 5511.

MEC-ENGR 5513 Experimental Biomechanics of Human Motion Credits: 3

The purpose of this course is to provide an opportunity for students to gain a hands-on, in-depth understanding of the experimental measurement and analysis techniques used to quantify the biomechanics of human motion.

Prerequisites: MEC-ENGR 5511.

MEC-ENGR 5514 Material Science for Advanced Application Credits: 3

Study of the physical and mechanical metallurgy of alloy systems of interest in engineering applications.

Prerequisites: MEC-ENGR 324.

MEC-ENGR 5516 Biomedical Device Design Credits: 3

Project based course which exposes students to the entire design process from problem definition to prototype validation for biomedical device applications. Projects in the course are sponsored by real clients from the local biomedical industry, medical clinicians, and/or research labs. The course will cover the following main components: Problem Definition, Concept Generation and Evaluation, Detailed Design, Prototyping and Testing, Project Management, Regulations and Standards, and Technical Communication.

MEC-ENGR 5525 Failure Analysis Credits: 3

Organize and perform a failure investigation. In addition, the course will cover the general procedures for a failure investigation and various failure mechanisms such as ductile fracture, brittle fracture, fatigue, wear, corrosion and elevated temperature.

Prerequisites: MEC-ENGR 324, MEC-ENGR 380.

MEC-ENGR 5526 Introduction to Manufacturing Management Credits: 3

The objective of this course is to expose the student to various manufacturing management tools and techniques. Focus is on both the technical tools used in manufacturing as well as on the management tools needed to implement change in the manufacturing environment. As part of this course, students will research a successful company and present an analysis of manufacturing tools and techniques used.

MEC-ENGR 5533 Advanced Thermodynamics Credits: 3

Statistical methods of evaluating thermodynamic properties. Elements of quantum mechanics, statistical mechanics and kinetic theory applied to topics of engineering thermodynamics.

Prerequisites: MEC-ENGR 360, MEC-ENGR 399.

MEC-ENGR 5542 Introduction to Computational Fluid Dynamics and Heat Transfer Credits: 3

Introduction to the principles and development of the finite-difference approximations to the governing differential equations of viscous and inviscid fluid flow, as well as heat transfer. Introduction to discretization methods and the calculation of flow fields, convection, diffusion and conduction.

Prerequisites: MEC-ENGR 399, MEC-ENGR 441.

MEC-ENGR 5543 Industrial Refrigeration Credits: 3

Introduction to and analysis of the thermodynamic cycles and equipment used in Industrial Refrigeration. Applications of Industrial Refrigeration are also discussed.

Prerequisites: MEC-ENGR 299.

MEC-ENGR 5547 Contracts and Law for Engineers Credits: 3

This course covers a broad range of substantive legal topics giving the student a grounding in the legal implications of certain situations that they may encounter during their careers. The course includes coverage of basic contract law, environmental regulations and compliance, construction law, antitrust law, intellectual property law, civil procedure, employment law, business entities (corporate law) product liability and criminal law and procedure. The objective of the course is to provide students with a fundamental understanding of the wide range of federal and state laws governing behavior in our complicated and rule of law driven society.

MEC-ENGR 5549 Environmental Compliance, Auditing & Permitting Credits: 3

This course provides a high level overview of the most important statutes that have been enacted to protect the environment. The course covers regulation of hazardous waste, the Clean Air and Clean Water Acts, the Resource Conservation and Recovery Act, the All Appropriate Inquiry Rule and the law addressing sites contaminated with hazardous substances and the technology options employed to remediate those sites. In addition, the course provides coverage of environmental audits and emergency planning for extremely hazardous substances, the regulation of underground storage tanks, safe drinking water and the National Environmental Policy Act among other statutes.

Prerequisites: CIV-ENGR 211, MEC-ENGR 285.

MEC-ENGR 5554 Power Generation Systems Credits: 3

Fundamentals of the power industry in a format suitable for all engineering disciplines. Survey of electric power systems, including fossil and nuclear steam cycles, combustion turbines, combines cycles, and renewable such as solar and wind. Introduction to major machinery components, systems, controls, and an overview of fuels, emissions, and emission control technologies.

Prerequisites: MEC-ENGR 299.

MEC-ENGR 5557 Mechatronics System Design Credits: 3

Theory and application of mechatronic systems through course instruction, laboratory activities, and student projects.

Prerequisites: MEC-ENGR 352 and MEC-ENGR 415.

MEC-ENGR 5558 Intermediate Dynamics Credits: 3

Development of kinematics and dynamics of rigid bodies in three-dimensional space including: general theory of rotating coordinate frames, Eulers angles, Eulers equations of motion, angular momentum, work-energy principles, and Kane's method for creation and simulation of dynamic models.

Prerequisites: MEC-ENGR 285.

MEC-ENGR 5559 Robotics and Unmanned Systems Credits: 3

Students will develop, implement, and evaluate various path following (point mass, rigid body, and Dubin's) and trajectory generation (configuration spaces, roadmaps, cell decomposition, etc.) concepts on simulation and experimental platforms.

Prerequisites: MEC-ENGR 306, MEC-ENGR 457.

MEC-ENGR 5563 Engineer in Society - Construction Law Credits: 3

This course introduces professional, ethical, and legal concepts of the professional practice of engineering, and the role of the consulting engineer, specifically in the A/E/C industry during the design, procurement, and construction processes. A conceptual framework is developed for understanding the industry standard agreements (AIA, EJCDC, ConCensus) and the various participants roles and duties in project execution. The engineer's "professional standard of care" is examined and revisited throughout the semester, specifically what it means to be a "Professional Engineer". Emphasis is placed on project and contract management and the applicable law. Skills are developed in finding online resources of law, legal, and practice advice relevant to the practice of engineering and the construction industry

MEC-ENGR 5565 Project Finance Credits: 3

This class introduces students to the financial concepts faced by engineers in the businesses in which they work and for the projects to which they are assigned. Throughout the course students are reminded of the impact of two key variables – money and time – on their work. While not attempting to turn good engineers into mediocre accountants, the course includes a strong emphasis on managerial accounting. Students will learn how to read and apply financial statements and how to use these same financial concepts in developing pro formas to evaluate and support major capital investments. The effect of time on the value of money, appropriate discount factors, and the internal rate of return will be explored in the class. Students will learn to combine these financial factors with electronic spreadsheets to evaluate business opportunities and practices. All students will be required to develop a comprehensive financial model to evaluate/justify a real world capital project.

MEC-ENGR 5567 Fuel Cells and Renewable Energy Systems Credits: 3

This course will provide an overview of the fundamental phenomena that govern the design and operation of fuel cells. The thermodynamics of fuel cell systems will be explored including operation of ideal fuel cells and the physical and chemical phenomena that lead to losses within the fuel cell. The course will provide the methods and techniques required to analyze the performance of low, medium, and high temperature fuel cells within an overall energy system. The fueling of fuel cells from renewable resources will also be discussed.

Prerequisites: MEC-ENGR 399.

MEC-ENGR 5568 Introduction to Nuclear Engineering Credits: 3

This course provides an overview of nuclear engineering for non-nuclear engineers. The course deals primarily with nuclear reactors including topics dealing with nuclear and reactor physics, reactor kinetics and controls and radiation environment. The general reactor types are covered in some detail with other topics dealing with licensing, waste management, quality assurance, balance of plant systems (turbine island), and significant nuclear accidents are also covered. Recent design innovations including small modular reactors and fusion are discussed.

Prerequisites: MEC-ENGR 399.

MEC-ENGR 5570 Experimental Design & Analysis Credits: 3

Presentation of concepts and methods of statistical analysis and the design of experiments. Concepts, techniques, interpretation, and use of results are stressed. Focus is on experimental strategy and objectives, and the application of the methods discussed, rather than the mechanics of derivation. Major sections include: a review of hypothesis testing and basic analysis of variance techniques; single factor experiments including 2k and 3k design, confounding, and Taguchi philosophy; nested and split plot designs; analysis of covariance and an introduction to response surface methods.

MEC-ENGR 5572 Advanced Statistics Credits: 3

The objective of this course is to review the concepts and methods of undergraduate first course in statistical analysis and extend the student's understanding to cover topics typically covered in a second course in applied engineering statistics. Concepts, techniques, interpretation, and use of results are stressed. Focus is on the application of the methods discussed, rather than the mechanics of derivation.

Prerequisites: CIV-ENGR 319.

MEC-ENGR 5574 Linear Programming for Engineering Optimization Credits: 3

This course will cover techniques and applications of engineering optimization using linear programming techniques. The main topics will be the simplex algorithm, sensitivity analysis, duality, network models, and integer programming. Main applications will include transportation, shipments, and utility planning. Stochastic models, game theory, non-linear programming, and heuristic optimization techniques will be briefly mentioned, but not explored in detail. At the conclusion of the course the student should be able to formulate and solve optimization problems in several areas of engineering.

Prerequisites: MEC-ENGR 306.

MEC-ENGR 5586 Applied Finite Element Analysis Credits: 3

The study of advanced simulation techniques for the solution to engineering problems. The use of Finite Element Method toward solving mechanical, structural, vibration and potential flow problems will be explored. The use of current commercial simulation tools will be used extensively.

Prerequisites: CIV-ENGR 275, MATH 5517, MEC-ENGR 130.

MEC-ENGR 5594 Robotic System Identification Credits: 3

Students will develop, implement, and evaluate various system identification and parameter estimation techniques. Students will quantify estimation accuracy through both theoretical and experimental exercises. **Prerequisites:** MEC-ENGR 285, MEC-ENGR 306, MEC-ENGR 352.

MEC-ENGR 5595 Microscale Heat Transfer Credits: 3

Review of existing models. Concept of thermal lagging and the second-law admissibility. Applications to low temperatures, thermal processing of thin-film devices; amorphous materials; advanced composites.

Prerequisites: MEC-ENGR 399.

MEC-ENGR 5599 Research Credits: 1-99

Independent investigation in field of mechanical engineering to be presented as a thesis.

MEC-ENGR 5601 Doctoral Topics In Mechanical Engineering Credits: 3**MEC-ENGR 5603 Directed Readings in Mechanical Engineering Credits: 1-3**

Faculty supervised readings course.

Prerequisites: Graduate standing.

MEC-ENGR 5610 Seminar Credit: 1

Review recent investigations, projects of major importance in mechanical engineering.

MEC-ENGR 5616 Theory of Plasticity Credits: 3

Plastic yield conditions and stress-strain relations. Behavior of elastic-perfectly plastic members. Plain strain in plastic members.

Prerequisites: MEC-ENGR 5621, MEC-ENGR 5622.

MEC-ENGR 5618 Multibody System Dynamics Credits: 3

Fundamental principles of advanced rigid body dynamics with applications. Special mathematical techniques including Lagrangian and Hamiltonian methods.

Prerequisites: MEC-ENGR 285.

MEC-ENGR 5621 Continuum Mechanics Credits: 3

Introductory course in the mechanics of continuous media. Basic concepts of stress, strain, constitutive relationships; conservation laws are treated using Cartesian tensor notation. Examples from both solid and fluid mechanics investigated.

Prerequisites: CIV-ENGR 276, MATH 345, MEC-ENGR 351.

MEC-ENGR 5622 Theory of Elasticity Credits: 3

Stress and strain at a point. General equations of elasticity. Plane stress, plain strain problems; torsion of prismatic bars. Energy methods.

Prerequisites: MEC-ENGR 5621.

MEC-ENGR 5623 Theory Of Plates And Shells Credits: 3

Bending of plates with various loading and boundary conditions. Deformations, stresses in thin shells.

Prerequisites: MEC-ENGR 5621.

MEC-ENGR 5624 Theory of Elastic Stability Credits: 3
Buckling of columns, beams, rings, curved bars, thin plates, shells.
Prerequisites: MEC-ENGR 5621.

MEC-ENGR 5627 Dynamics of Machinery Credits: 3
Dynamic balancing or rotating and reciprocating components of turbo-machinery and internal combustion engines. Gas torque analysis, vibration stress analysis and equivalent systems. Numerical and graphical techniques.
Prerequisites: MEC-ENGR 484.

MEC-ENGR 5630 Boundary Layer Theory Credits: 3
Fluid motion at high Reynolds Number. Derivation of Navier-Stokes equations and boundary layer equations. Methods of solution. Transition to turbulent flow. Completely developed turbulent flow.
Prerequisites: MEC-ENGR 441.

MEC-ENGR 5636 Heat Transfer-Convection Credits: 3
Concepts including fluid dynamics, conservation laws, thermal boundary layer theory, forced convection in laminar and turbulent flows, and free convection will be developed and applied.
Prerequisites: MEC-ENGR 399

MEC-ENGR 5637 Heat Transfer-Radiation Credits: 3
Advanced study of engineering radiation heat transfer. Concepts of electromagnetic theory. Development of thermal radiation laws from thermodynamic laws. Analysis of grey and non-grey systems with intervening gases. Study of recent literature.
Prerequisites: MEC-ENGR 399.

MEC-ENGR 5639 Introduction to Two Phase Flow Credits: 3
The fundamental principles of two-phase flow with applications to a variety of homogeneous mixture as well as separated liquid-liquid, gas-solid, liquid-solid, and gas-liquid flow problems, including steady or transient, laminar or turbulent conditions.
Prerequisites: MEC-ENGR 441.

MEC-ENGR 5643 Industrial Refrigeration Credits: 3
Introduction to and analysis of the thermodynamic cycles and equipment used in Industrial Refrigeration. Applications of Industrial Refrigeration are also discussed.

MEC-ENGR 5660 Combustion Credits: 3
Study of advanced topics in flames and combustion. Detonation and deflagrations, supersonic combustion, air pollution.
Prerequisites: MEC-ENGR 441.

MEC-ENGR 5679 Dynamics of Structures Credits: 3
Study of the dynamic behavior of structures. Analysis of equivalent lumped parameter systems for the design of structures in a dynamic environment.
Prerequisites: CIV-ENGR 276 (or CIV-ENGR 421), MEC-ENGR 484 (or MATH 345, MEC-ENGR 285).

MEC-ENGR 5685 Advanced Vibration Analysis Credits: 3
Advanced topics in vibration theory and its application to Mechanical systems. Topics include vibration analysis of multi-degree of freedom, distributed and nonlinear systems, random vibration analysis, and vibration control.
Prerequisites: MEC-ENGR 484.

MEC-ENGR 5699 Research And Dissertation Credits: 1-9
Doctoral dissertation research.

Medical Bioinformatics (MEDB)

Courses

MEDB 5501 Applied Biostatistics I Credits: 3
Introduction to statistical concepts and analytic methods as applied to health science. Course includes lectures and hands on computer laboratory.
Prerequisites: graduate or professional students and an advanced math course (i.e. Calculus, statistics).

MEDB 5502 Applied Biostatistics II Credits: 3
The second in the Applied Biostatistics sequence and is intended for graduate, doctoral, and professional students in the biological, clinical and medical fields, and medical education. Statistical concepts, analysis methods, and research designs commonly used in these fields are included: diagnostic testing, hypothesis testing, power analysis, analysis of variance, analysis of covariance, multivariate analysis of variance, propensity scoring, simple and multiple regression, logistic regression, and survival analysis. Familiarity with basic statistics and the statistical techniques presented in Applied Biostatistics I is required. Statistical analyses involved in this course will be performed primarily using the SPSS statistical analysis package. The course will also cover the interpretation, presentation and the write up of analytical results and graphs.
Prerequisites: MEDB 5501.

MEDB 5503 Mixed-Effects Models Credits: 3

This course will cover the computational basis of mixed-effects models and how to apply these models to analyze data. Students will learn how to graph, investigate, and model data that are not independent and identically distributed, and how to evaluate model fit.

Prerequisites: MEDB 5507, MEDB 5501, MEDB 5502.

MEDB 5505 Introduction to R Credit: 1

Provides a working familiarity with R. No advanced programming or statistical analytic skills, other than the ability to create and modify text files are needed. Basic methods for data import, data management, simple graphics, and basic statistical analysis are introduced. Provides student with a firm foundation to address these areas in advanced statistics classes or in the student's research efforts, including thesis/dissertation research. A basic understanding of statistical terminology and a working familiarity with computer-based data files (e.g., Excel) is necessary. A basic understanding of the concepts of computer coding is recommended.

MEDB 5506 Introduction to SPSS Credit: 1

Session provides a working familiarity with SPSS. Students are not expected to have advanced programming or statistical analysis skills, other than the ability to create and modify text files. Basic methods for data import, data management, simple graphics, and basic statistical analysis are introduced. This class will not cover advanced statistical methods, but will provide the student with a firm foundation to address these areas in advanced statistics classes or in the student's research efforts, including thesis/dissertation research. A basic understanding of statistical terminology and a working familiarity with computer-based data files (e.g., Excel) is necessary.

MEDB 5507 Introduction to SAS Credit: 1

Course provides a working familiarity with SAS. Students are not expected to have advanced programming or statistical analysis skills, other than the ability to create and modify text files. Basic methods for data import, data management, simple graphics, and basic statistical analysis are introduced. This class will not cover advanced statistical methods, but will provide the student with a firm foundation to address these areas in advanced statistics classes or in the student's research efforts, including thesis/dissertation research. A basic understanding of statistical terminology and a working familiarity with computer-based data files (e.g., Excel) is necessary.

MEDB 5508 Introduction to SQL Credits: 2

This course is an introduction to SQL programming. The course is designed to teach students basic skills that will prepare them to use SQL for data analysis.

MEDB 5510 Clinical Research Methodology Credits: 3

This course trains the student to contribute to research design, planning, and implementation, and to manage and interpret health-related data. This course will provide a broad overview of clinical research in terms of definition, methodology, conduct and applications. The course will explore basic elements of clinical research including the hierarchy of clinical research design and the conduct of clinical research. Application of clinical research knowledge to specific health-related issues will also be explored. Course topics include: conceiving the research question; study designs; questionnaire construction; research methodology; research ethics; human subjects requirements; the role of statistical analysis in clinical research; research proposal preparation; and research based on analysis of secondary data. Both classroom and online asynchronous sections offered.

MEDB 5511 Principles and Applications of Epidemiology Credits: 3

This course will provide an introductory overview of the principles of epidemiology and illustrate applications in specialized topic areas. Course lectures will introduce measures of effect used to study disease in human populations, epidemiological study designs, concepts of causal inference, and threats to study validity. Specialized lectures will demonstrate the application of these concepts in select health and disease conditions.

MEDB 5512 Clinical Trials Credits: 3

Clinical Trials explores the knowledge and skills required to conduct clinical trials, and implications of clinical trials on practice in medicine and allied health.

MEDB 5513 Overview of Health Services Research Credits: 3

Provides an overview of the U.S. health care and public health systems including issues about cost, access, and quality of health care. This course focuses on the role of research and information in the process of redesigning of health care delivery in the U.S. for the purpose of improving the value of health services.

Prerequisites: MEDB 5501, MEDB 5510 or MEDB 5511.

MEDB 5514 Human Genome Epidemiology Credits: 3

Designed for biological researchers and clinicians interested in studying common human diseases using state of the art genomics/genetics epidemiological approaches. Comprehensive introduction to concepts and methodologies of quantitative/statistical genetics, emerging technologies and analytical methods for genomic science, basic study design, utilization of software packages for analyses of genomic data, successful examples of using human genome epidemiology information to improve health, and ethical, legal and social issues in the design and conduct human genome epidemiology research.

MEDB 5520 Introduction to Medical Informatics Credits: 3

This course provides an overview of Biomedical and Health Informatics. It describes the use of data, information and knowledge in improving healthcare and biomedical research. This includes the use of technology and computers to store, retrieve, and process data. Topics include clinical decision making, standards and clinical terminology, natural language processing, imaging, electronic health records, patient monitoring, consumer health informatics, public health informatics, clinical decision support, bioinformatics, translational bioinformatics and clinical research informatics.

MEDB 5521 Clinical Bioinformatics Credits: 3

Clinical bioinformatics will provide the foundation required for effective communication between computational, biological and clinical experts. This class uses a series of exercises to enable participants to independently perform gene and protein-based bioinformatics queries and analyses. Throughout the course, core biological principles are explained, as are the foundational technology and computational topics. Students will become proficient with public bioinformatics resources. This course will prepare students to apply the techniques to their research or participation in interdisciplinary clinical terms.

MEDB 5525 Social Determinants of Health Credits: 3

This course will describe how social, economic and political factors affect health. It will examine strategies to address social determinants of health to reduce health inequities. Students will explore how specific social determinants like socioeconomic status, race ethnicity, and lifestyle influence health, use a "life course" approach to look at different stages of life and the effect of social determinants on specific populations.

MEDB 5530 Independent Study I Credits: 1-3

Focused readings and/or special research project in an area selected by the graduate student in consultation with the advisor.

MEDB 5531 Independent Study II Credits: 1-3

Focused readings and/or special research projects in an area selected by the graduate student in consultation with the advisor.

MEDB 5535 Quantitative Aspects of Epidemiologic Research Credits: 3

This course offers students advanced training in the analysis of epidemiological data. Topics include application of common measures of frequency and association, confounding, effect modification, bias, misclassification, and sensitivity analysis in epidemiologic and clinical data sources.

Prerequisites: MEDB 5501, MEDB 5502 and one of the following: MEDB 5510 or MEDB 5511

MEDB 5540 Multidisciplinary Graduate Seminar Credit: 1

This course will be a combination of discussion, presentations, and didactic presentations that will allow students and faculty to exchange information and explore current research across the disciplines that make up the bioinformatics degree program. The course is designed to help student develop critical skills for evaluating published research, designing research projects, and communicating research findings.

MEDB 5550 Health Outcomes Seminar Credit: 1

The course content is guided by a series of seminars presented by research researchers who are actively engaged in health outcomes studies. It explores multiple topics that are unique relevant to clinical investigators. Faculty and peer discussion forums highlight key concepts and applications.

MEDB 5560 Medical Decision Making Credits: 3

This course will introduce the concept of medical decision making under uncertainty through an examination of disease probabilities and how they are altered by the characteristics of the diagnostic test being studies or used clinically. Decision trees will be introduced as a mechanism for communicating complex medical decisions and introductory level decision analysis will be presented. The measurement of patient values for alternative outcomes will be introduced as they pertain to direct payoff values as well as modifiers to cost payoffs.

MEDB 5561 Responsible Conduct of Research Credits: 3

An interdisciplinary course which covers principles and day-to-day practicalities of research ethics, information about regulatory requirements for conducting research including safety issues and the use of humans, animals and radioactive biohazardous materials; discuss current issues in the ethical aspects of research, such as scientists' obligations with respect to public policy and advocacy.

MEDB 5573 Biostatistical Consulting Practicum Credits: 2-4

This course is designed to provide students with an opportunity for statistical consulting training. Students will work on real consulting projects that were received through the Research and Statistical Consult Service. Projects may involve sample size calculation, study design, data analysis, generating statistical reports and manuscripts. Student will be able to apply their statistical knowledge and communication skills while learning how to work with other researchers.

Prerequisites: MEDB 5501, MEDB 5502, MEDB 5507 and MEDB 5503.

MEDB 5589 Special Topics Credits: 1-3

An opportunity to explore in depth topics not included in usual course offerings. One or more topics will be announced in advance of registration.

MEDB 5591 Internship I Credits: 1-3

Opportunity to apply knowledge and skills in clinical, computational, or genomics research and gain insight into potential career options. Students develop appreciation for teamwork and commitment in professional environments.

Prerequisites: MEDB 5501, MEDB 5502, MEDB 5510, MEDB 5513.

MEDB 5592 Internship II Credits: 1-3

Opportunity to apply knowledge and skills in clinical, computational, or genomics research and gain insight into potential career options. Students develop appreciation for teamwork and commitment in professional environments. Internship II is applicable to students who have previously completed 3 hours of internship.

Prerequisites: MEDB 5501, MEDB 5502, MEDB 5510, MEDB 5513, MEDB 5591.

MEDB 5595 Capstone Experience Credits: 3

This course is designed for the non-thesis student to demonstrate that they have mastered key learning objectives expected of the graduating master's student in the Clinical Research emphasis area. After completion of the core courses in the Masters of Bioinformatics curriculum, students will apply their learning to developing, implementing and presenting results from a project that demonstrates integration of the knowledge, abilities and values emphasized in the degree program.

MEDB 5599 Research and Thesis Credits: 1-6

Research for thesis.

MEDB 5696 Pre-Dissertation Research Credits: 1-6

This course is individually directed research leading to the preparation of a doctoral dissertation.

Prerequisites: Permission of the instructor.

Co-requisites: Completion of comprehensive exam.

MEDB 5699 Research and Dissertation Credits: 1-12

Research and dissertation preparation for IPhD degree students participating in Biomedical and Health Informatics primary and co-discipline.

Prerequisites: instructor approval

MEDB 5899 Required Graduate Enrollment Credit: 1

Medicine (MEDICINE)

Courses

MEDICINE 9110 Fundamentals of Medical Practice I Credits: 5

Introduces students to professional values, attitudes and skills required to practice medicine competently. Develops student competence in basic communication, relationship-building and patient centered interviewing skills. Provides self-awareness and personal growth strategies that facilitate the acquisition of professional behavior affecting honesty and integrity, compassion and altruism, as well as the management of stress. Explores non-biological factors influencing health and the appreciation of different value systems and life styles. Promotes ethical considerations relating to professional behavior and student conduct as a forerunner to professional behavior. Emphasizes the team approach in solving medical problems through direct small group activities as part of weekly onsite docent experiences. Integrates patient interviews and examinations with sciences fundamental to clinical medicine.

MEDICINE 9115 Medical Terminology Credit: 1

1 credit hour/twice weekly each semester. Methodical introduction to the language of medicine and its usage in modern clinical documentation.

Introduces word elements in a logical, graduated sequence correlated with laboratory practice. Encourages skills in etymological analysis based on the word elements presented to facilitate interpretation of composite medical terms.

MEDICINE 9119 Learning Basic Medical Sciences Credit: 1

1 credit hour/1 hour per week. Provides students with an understanding of their own learning processes and those study strategies that promote maximum learning efficiency. Active participation in course increases achievement in both science and non-science courses, smoothes transition to college-level work, and further develops reasoning and thinking skills that apply to medical school

MEDICINE 9120 Fundamentals of Medical Practice II Credits: 5

Introduces students to professional values, attitudes and skills required to practice medicine competently. Develops student competence in basic communication, relationship-building and patient centered interviewing skills. Provides self-awareness and personal growth strategies that facilitate the acquisition of professional behavior affecting honesty and integrity, compassion and altruism, as well as the management of stress. Explores non-biological factors influencing health and the appreciation of different value systems and life styles. Promotes ethical considerations relating to professional behavior and student conduct as a forerunner to professional behavior. Emphasizes the team approach in solving medical problems through direct small group activities as part of weekly onsite docent experiences. Integrates patient interviews and examinations with sciences fundamental to clinical medicine.

MEDICINE 9210 Fundamentals Of Medical Practice III Credits: 5

5 credit hours, 3 hours per week onsite, 2 hours lecture. Reinforces important concepts in diversity and professionalism. Continues the team approach in solving medical problems through direct small group activities as part of weekly onsite docent experience.

MEDICINE 9220 Fundamentals Of Medical Practice IV Credits: 5

5 credit hours, 3 hours per week onsite, 2 hours lecture. Reinforces important concepts in diversity and professionalism. Continues the team approach in solving medical problems through direct small group activities as part of weekly onsite docent experiences. Integrates patient interviews and examinations with sciences fundamental to clinical medicine, including biochemistry, anatomy, physiology, biochemistry and social sciences. Exposes students to a series of interviews with seasoned professionals who address issues of professionalism and career development.

MEDICINE 9221 Hospital Team Experience Credit: 1

1 credit hour/2-week assignment in hospital. Teaches students to make good observations, interact appropriately with patients, family, and hospital staff, assist with non-physician duties, and perform technical skills appropriate to assigned departments. Facilitates understanding of allied health care personnel roles in patient care, communication among health care professionals and its influence on the delivery of health care and patient outcomes, and the hospital process and structure of authority within the hospital.

MEDICINE 9308 Clinical Practice of Medicine I Credits: 3

Basic communication/clinical examination skills will be taught in the classroom with skills workshops. Students will learn to enhance their communication skills with patients and their families aligned with a systems-based approach to the physical examination. Students will also begin to practice complaint-based histories and a review of systems to prepare them for their Year 3 Continuing Care Clinic Clerkship and clinical decision-making. Students will practice communication and interpersonal skills in small groups and also have the opportunity to practice examination skills in workshops, with standardized patients, and linked to their experiences in the Continuing Care Clinic clerkship.

Prerequisites: Successful completion of HSF III, and enrollment in HSF IV.

MEDICINE 9309 Clinical Practice of Medicine II Credits: 5

Advanced communication/physical examination skills will be taught in the classroom with communication skills workshops. Students will learn/practice skills to communicate/examine patients aligned with a systems-based pathophysiology approach. Students will learn/practice a complaint-based HP exam by system aligned to their objectives in the Pathology II: Pathophysiology course. Students will learn/develop skills in clinical diagnosis and decision-making by system that includes instruction/practice on more advanced physical examination skills. Students will practice communication and interpersonal skills in small groups and also have the opportunity to practice examination skills in workshops, with standardized patients, and linked to their experiences in the Continuing Care Clinic.

Prerequisites: BMS 9298.

Co-requisites: BMS 9399.

MEDICINE 9310 History of Medicine Credit: 1

In this course students will learn the ways disease has altered history and that conceptions of disease undergo constant change. Topics covered include diseases and their relationships to other medical sciences, as well as the historical and scientific developments which led to our present understanding of diseases and medicine.

MEDICINE 9312 Pathology I: General Pathology, Genetics, and Immunology Credits: 10

Students will learn and be able to apply basic science education in the clinical practice of medicine. This application includes the areas of gross and microscopic anatomy, biochemistry, genetics, pathophysiology, and immunology. Students will develop a basic understanding of laboratory tests. They will develop competency in clinical diagnosis based on pathologic findings related to anatomic pathology, laboratory medicine and pathophysiology. Course materials will also cover prevention of disease and disability, global health issues, forensic medicine and pathology, age and gender-related issues in pathology and medicine, and appropriate utilization of Pathology and Laboratory Medicine Services.

MEDICINE 9313 Pathology II: Systems-Based Pathology and Pathophysiology Credits: 11

Students will learn and apply basic science education in the clinical practice of medicine through systems-based teaching about disease. This application includes the areas of biochemistry, genetics, pathophysiology, and medical microbiology. Students will expand their understanding of basic laboratory tests with a focus on interpretation and gain familiarity with more complex or specialized laboratory tests, enhancing their abilities in test selection and interpretation. They will also begin to approach a multi-system health problem in terms of its pathogenesis, the mechanisms of systemic interactions, and consequent/subsequent potential complications. Content areas emphasized include cardiovascular, lymphatic, hematologic, gastrointestinal, renal, hepatic, and genitourinary systems.

MEDICINE 9383 Continuing Care Clinic Credits: 5

Provides ambulatory and continuous care experience in general medicine clinics. The docent teams are assigned to a clinic in which students see and follow a panel of patients on a continuous basis for up to four years, where necessary, under the supervision of docents. Provides continuity of care from inpatient hospitalization to outpatient care, allowing longitudinal experience for the student and personalized care for the patients. Allows students to observe the natural progression of disease and experience the rewards and challenges of an ongoing doctor-patient relationship.

MEDICINE 9385 Introduction to Pharmacology Credits: 2

Consists of self-paced, independent learning, computer-based instruction. Introductory principles of pharmacology are covered that provide students with basic knowledge and skills necessary for upcoming didactic and clinical curriculum. Students become familiar with drug information resources, pharmaceutical calculations, and prescription writing skills, and learn basic mechanisms of drug action, preventive therapeutics and pharmacokinetic principles.

MEDICINE 9387 Extended Clinic I Credits: 5**MEDICINE 9390 Clinical Correlations Credits: 5**

5 credit hours. Case-based discussions provided by clinicians that serve to reinforce basic science concepts provided during BMS 9296, BMS 9297, and BMS 9298.

MEDICINE 9401 Internal Medicine/Docent Instruction Yr 4 Credits: 10

Students spend this eight-week rotation on the medical wards at Truman Medical Center, each working as a integral member of a docent team that includes the docent, residents and attending health care staff. Year 3 and 5, and Year 4 and 6 students are paired together in a junior-senior partnership. Rounds, conference and consultations.

MEDICINE 9401BR Internal Medicine/Docent Instruction Yr 4 Credits: 5

Students spend this eight-week rotation on the medical wards at Truman Medical Center, each working as a integral member of a docent team that includes the docent, residents and attending health care staff. Year 3 and 5, and Year 4 and 6 students are paired together in a junior-senior partnership. Rounds, conference and consultations. This section is a single four-week block of the rotation.

MEDICINE 9408 Pharmacology Credits: 10

Introduces the study of the interaction of drugs with biological systems. Provides the medical student with relevant basic pharmacology of the model drugs under clinical investigation and in use today. Includes extensive small group activities.

MEDICINE 9471 Family Medicine Credits: 5

Exposes students to the unique specialty that focuses on the family. Students experience the act of medicine as well as science, working with patients in the context of their family and community. Includes care of the child, the adolescent, pregnant women, young and middle aged adults, and the elderly. Addresses ambulatory medicine, prevention and health maintenance.

MEDICINE 9472 Behavioral Science in Medicine Credits: 5

Teaches the basic taxonomy, assessment methods and treatment interventions of chemical dependence and major psychiatric disorders. Serves as preparation for the psychiatry rotation. Examines relevant ethical issues commonly faced in current medical practice. Utilizes case studies and a problem-centered approach in addition to clinical experience including home health care visits, supervised interviewing, and time on an inpatient chemical dependency unit. Challenges the student to achieve an integrated theoretical understanding of various approaches in behavioral sciences as a background for meeting patients needs. Teaches communication skills including education of older patients.

MEDICINE 9482 Patient, Physician, Society I Credits: 2

Introduces students to a 7-week unit emphasizing medical decision making. Introduces students to a 6-week unit which focuses on public health. Activities include lecture, problem sets, small group projects.

MEDICINE 9483 Continuing Care Clinic Credits: 5

Provides ambulatory and continuous care experience in general medicine clinics. The docent teams are assigned to a clinic in which students see and follow a panel of patients on a continuous basis for up to four years, where necessary, under the supervision of docents. Provides continuity of care from inpatient hospitalization to outpatient care, allowing longitudinal experience for the student and personalized care for the patients. Allows students to observe the natural progression of disease and experience the rewards and challenges of an ongoing doctor-patient relationship.

MEDICINE 9483RC Year Four Repeat Clinic Credits: 5

Prerequisites: MEDICINE 9383.

MEDICINE 9484 Patient, Physician, Society II Credits: 2

Introduces students to a unit emphasizing medical ethics and palliative care. Activities include lecture, small group sessions, and assigned readings.

MEDICINE 9485 Ambulatory Care Pharmacology Credits: 2

Consists of a self-paced, independent learning, computer-based instruction. Focuses on integration of patient-related data with basic science data. Students obtain skills in assessing patient risk or disease staging and selecting appropriate pharmacotherapy based on such information. The selected topics focus on outpatient pharmacotherapy of common disease states for which there are established treatment guidelines, such as hypertension, heart failure, diabetes mellitus, asthma, pain, and hyperlipidemia.

MEDICINE 9487 Extended Clinic II Credits: 5**MEDICINE 9501 Internal Medicine/Docent Instruction Yr 5 Credits: 10**

Students spend this eight-week rotation on the medical wards at Truman Medical Center, each working as an integral member of a docent team that includes the docent, residents and attending health care staff. Year 3 and 5, Year 4 and 6 students are paired together in the junior-senior partnership. Rounds, conference and consultations.

MEDICINE 9501BR Internal Medicine/Docent Instruction Yr 5 Credits: 5

Students spend this eight-week rotation on the medical wards at Truman Medical Center, each working as a integral member of a docent team that includes the docent, residents and attending health care staff. Year 3 and 5, and Year 4 and 6 students are paired together in a junior-senior partnership. Rounds, conference and consultations. This section is a single four-week block of the rotation.

MEDICINE 9503 Pediatrics Rotation Credits: 10

This eight-week rotation is designed to help students master t skills necessary in assessing normal and abnormal development and behavioral variation in the newborn, infant and child in the outpatient clinical setting. History-taking and physical examination of infants, children and adolescents are emphasized.

MEDICINE 9503BR Peds Rotation Credits: 5**MEDICINE 9505 General Surgery Rotation Credits: 10**

Introduces students to the field of general surgery. Emphasizes the indications, contraindications, types of operative management, and the mortality and morbidity of various operations. Involves the student in several different kinds of learning experiences, such as preoperative and postoperative care, work in the operating room, outpatient clinic visits, night call, student conferences and resident conferences. Covers skills in surgical scrub, putting on gown and gloves, knot tying, vena puncture, proctoscopy, and suturing of the skin. Students assist in performing skills such as insertion of CVP catheters, insertion of a chest tube, thoracentesis, paracentesis and Swan-Ganz catheters.

MEDICINE 9506 Obstetrics-Gynecology Rotation Credits: 10

Provides the student with an opportunity to gain basic competence in obstetrics and gynecology, including proficiency in the history and physical examination related to the obstetric and gynecologic patient. Emphasizes outpatient gynecology, family planning and techniques for early detection of gynecologic cancer. Provides basic information in reproductive physiology and endocrinology, infertility, gynecologic oncology, and the psychologic aspect of diseases of women. Covers concepts of prenatal care and fundamentals of normal labor and delivery, and pregnancy complications.

MEDICINE 9506BR Obset-Gynecol Rotation Credits: 5**MEDICINE 9514 Medicine, War & Bioethics Credits: 5**

This course considers the continually evolving relationship between medicine, war, and the arts, from the slaughter of the American Civil War (1861-65) to today's conflicts in Iraq. Our focus is on the extraordinary difficult medical and ethical decisions faced by physicians in times of war, and the ways in which those experiences are reflected in the arts. Topics include the effects of disease on armies, biological warfare, the development of ambulance and hospital services in the Civil War, battlefield medicine, the diagnosis and treatment of shellshock victims in WWI, chemical warfare, the pioneering of plastic surgery, triage techniques in WWII, nuclear warfare, and the personal experiences of physicians in the Vietnam and Iraq wars.

MEDICINE 9515 Medicine and Music Credits: 5

This course will explore ways in which music and medicine interact, including the following topics: therapeutic applications of music (music therapy), current research on how the brain processes music, the treatment of medical themes (including illness and disease, patients, physicians, and human experimentation) in musical works, and how certain composers' medical conditions affected their creative output.

MEDICINE 9515A1 Independent Readings Month Credits: 5

Independent Readings Month

MEDICINE 9516 Medicine and Film Credits: 5

Movies are narratives that record, instruct, motivate, entertain and transform. This course investigates the ways in which physicians, patients, and medical students have been portrayed in Hollywood films over the course of the twentieth and the early twenty-first centuries. Compassion, idealism, and heroism were common traits in early doctor movies but there was also a recurrent theme of the greedy callous doctor who valued research over patient welfare, and profits over ethics. We discuss how films reflected, changed, and molded perceptions of physicians and patients in the past, and examine what contemporary portrayals of the medical profession can tell us about the expectations and fears of patients today.

MEDICINE 9517 Medicine and Literature Credits: 5

The aim of this course is to engage students in the process of self-reflection about their roles as health care professionals through the lens of literature. Reading about the ways in which people interact with professionals, patients, and disease can enrich our understanding of cultural, economic, and social issues. Medical literature is a diverse field and it increases our awareness of the different reactions to medicine and illness. This course is intended to improve our empathy for patients and peers.

MEDICINE 9518 Medicine, Law and Bioethics Credits: 5

This course provides the basic doctrines and principles of the law that form the foundation for legally and ethically sound medical practice. It includes the comprehensive coverage of the history of legal medicine in the United States and the dynamics of law applied to the practice of medicine. Current developments in the U.S. health care delivery and in the field of bioethics are identified along with the impact on practice of medicine. Lecture, discussion, and writing about legal and ethical issues related to the practice of medicine prepares students in Year 5 and Year 6 to assume the legal and ethical responsibilities of the M.D. degree. This course fulfills the requirement for a Medical Humanities course in year 5 or year 6.

MEDICINE 9519 Medicine and Philosophy Credits: 5

The class is constructed on three premises. First, everyone is a philosopher. Second, philosophy is not passive, it is an activity. In class, we will do philosophy. Students will be given some basic philosophic tools and they will then be asked to critically examine, refine and sharpen their thinking. Third, the practice of medicine requires critical and creative thinking. Students must acquire voluminous knowledge and information. Philosophy addresses wisdom, how to apply the knowledge and information wisely.

Prerequisites: Must be a professional student in the UMKC School of Medicine.

MEDICINE 9570 Family Medicine Preceptorship Credits: 5

Provides work experience with a rural Missouri physician. Helps students understand the responsibilities and importance of family physicians in the provision of health care. Provides continuing emphasis on the need for and importance of family practice.

MEDICINE 9571 Psychiatry Rotation Credits: 5

Gives each medical student a clinical assignment that involves responsibility for patient care under supervision on the adult inpatient service and experience in the clinic. Includes seminars in psychopathology, psychiatric syndromes, mechanisms of defense, psychopharmacology, drug and alcohol abuse and specific psychosocial assessment.

MEDICINE 9578 Medicine and Art Credits: 5

Lecture, discussion.

MEDICINE 9583 Continuing Care Clinic Credits: 5

Provides ambulatory and continuous care experience in general medicine clinics. The docent teams are assigned to a clinic in which students see and follow a panel of patients on a continuous basis for up to four years, where necessary, under the supervision of docents. Provides continuity of care from inpatient hospitalization to outpatient care, allowing longitudinal experience for the student and personalized care for the patients. Allows students to observe the natural progression of disease and experience the rewards and challenges of an ongoing doctor-patient relationship.

MEDICINE 9583RC Year Five Repeat Clinic Credits: 5

Monthlong course in which students repeat or complete outstanding requirements of Year 5 Continuing Care Clinic.

MEDICINE 9585 Prescribing for Special Populations Credits: 2

Consists of a self-paced, independent learning, computer-based instruction. Teaches principles of prescribing for special populations. Students learn to recognize special patients and to assess risks and benefits and individualize drug therapy in special patient situations. The course addresses concepts of pharmacology in five commonly-encountered special populations: pediatrics, elderly, patients with liver or kidney disease, and pregnant or breast-feeding patients.

MEDICINE 9587 Extended Clinic III Credits: 5**MEDICINE 9594 Medicine and Body Image Credits: 5**

Lecture, discussion, writing about ethical issues related to death.

MEDICINE 9601 Internal Medicine/Docent Instruction Yr 6 Credits: 10

Students spend this eight-week rotation on the medical wards at Truman Medical Center, each working as an integral member of a docent team that includes the docent, residents and attending health care staff. Year 3 and 5, and Year 4 and 6 students are paired together in a junior-senior partnership. Rounds, conference and consultations.

MEDICINE 9601BR Internal Medicine/Docent Instruction Yr 6 Credits: 5

Students spend this eight-week rotation on the medical wards at Truman Medical Center, each working as a integral member of a docent team that includes the docent, residents and attending health care staff. Year 3 and 5, and Year 4 and 6 students are paired together in a junior-senior partnership. Rounds, conference and consultations. This section is a single four-week block of the rotation.

MEDICINE 9678 Emergency Medicine Credits: 5

Based at Truman Medical Center Hospital Hill or Saint Luke's Hospital of Kansas City, the major affiliated adult hospitals for the School of Medicine. Emphasizes principles, concepts and skills necessary for the initial evaluation and care of medical and surgical emergencies. Teaches management of simple lacerations, burns, contusions, sprains, and infections, and recognition of life threatening emergencies and initiation of emergency care in response.

MEDICINE 9683 Continuing Care Clinic Credits: 5

Provides ambulatory and continuous care experience in general medicine clinics. The docent teams are assigned to a clinic in which students see and follow a panel of patients on a continuous basis for up to four years, where necessary, under the supervision of docents. Provides continuity of care from inpatient hospitalization to outpatient care, allowing longitudinal experience for the student and personalized care for the patients. Allows students to observe the natural progression of disease and experience the rewards and challenges of an ongoing doctor-patient relationship.

MEDICINE 9685 Rational and Safe Drug Prescribing Credits: 2

Consists of self-paced, independent learning, computer-based instruction. Teaches principles of clinical pharmacology that will assist the student in responsibly prescribing medications. Students develop skills in making informed clinical decisions through studying topics such as literature evaluation, medication errors, adverse drug reactions, drug allergies, drug interactions, overdose management, alternative therapies, and therapeutic drug monitoring.

MEDICINE 9687 Extended Clinic IV Credits: 5**MEDICINE 9714A2 Academic General Year I Credit: 1****MEDICINE 9715A1 Independent Readings Month Credits: 5****MEDICINE 9716A1 Independent Study Month Credits: 5****MEDICINE 9732 Academic-Biomedical and Health Informatics Credits: 5****MEDICINE 9816C11 Family Practice Sub-Internship Credits: 5**

Prerequisites: SOM Student

MEDICINE 9842-C21 Internal Medicine Sub-Internship Credits: 5

MEDICINE 9850-C31 Neurology Sub-Internship Credits: 5

MEDICINE 9852 Neurology Intensive Care Credits: 5
Intensive care in Neurology

Prerequisites: Must be a School of Medicine student.

MEDICINE 9870-C41 Obstetrics and Gynecology - Sub-Internship Credits: 5
Obstetrics and Gynecology - Sub-Internship.

MEDICINE 9898-C61 Internal Medicine/Pediatrics-Sub-Internship Credits: 5
Internal Medicine/Pediatrics-Sub-Internship.

Prerequisites: Successful completion of the core Internal Medicine and Pediatrics clerkships.

MEDICINE 9899-C61 Internal Medicine Pediatrics Clinic Credits: 5

MEDICINE 9921-C61 Pediatrics Sub-Internship Credits: 5
Pediatrics Sub-Internship.

MEDICINE 9922-C61 Neonatal Intensive Care Sub-Internship Credits: 5

MEDICINE 9923-C61 Pediatrics-Rehabilitation Credits: 5

MEDICINE 9924-C61 Pediatrics-Dermatology Credits: 5

MEDICINE 9925-C61 Pediatrics-Ophthalmology Credits: 5

MEDICINE 9926-C61 Pediatrics-Genetics Credits: 5

MEDICINE 9927-C61 Pediatrics-Neurology Credits: 5

MEDICINE 9928-C61 Pediatrics-Child and Adolescent Psychiatry Credits: 5

MEDICINE 9929-C61 Pediatrics-Plastic Surgery Credits: 5

MEDICINE 9930-C61 Pediatrics-Orthopedic Surgery Credits: 5

MEDICINE 9940-C61 Pediatrics-Allergy and Immunology Credits: 5
Pediatrics-Allergy and Immunology.

Prerequisites: Must be a School of Medicine Student.

MEDICINE 9945-C81 Anesthesiology-Sub-Internship Credits: 5

MEDICINE 9972-C81 Surgery-General Sub-Internship Credits: 5

MEDICINE 9973-C81 Surgery Orthopedics Sub-Internship Credits: 5
Surgery Orthopedics Sub-Internship.

MEDICINE 9974-C81 Surgery Neurological Sub-Internship Credits: 5
Surgery Neurological Sub-Internship.

MEDICINE 9975-C81 Surgery-Trauma Credits: 5
Surgery-Trauma

Prerequisites: Must be an SOM student

MEDICINE 9976-C81 Surgery - Oral and Maxillofacial Surgery Credits: 5

MEDICINE 9977-C81 Surgical Oncology Credits: 5
Elective in Surgical Oncology.

MEDICINE 9985 Miscellaneous - Medical Clinical Nutrition Credits: 5

Build upon basic (biochemistry/physiology) and clinical science knowledge and skills in order to be able to perform nutrition assessments in children/adults, counsel patients and families on nutrition, order medical nutrition therapy, work with multidisciplinary teams, and appropriately refer for specialized nutrition/feeding services. The elective utilizes didactic instruction, case studies, team projects, individual assignments, and outside reading combined with clinical/community experiences to facilitate student acquisition of knowledge/skills. Gain an appreciation of nutritional therapy from both the clinician and patient/family perspective. Didactic sessions, case studies, and clinical experiences are designed to augment students' outside reading of assigned and suggested references.

Nursing (NURSE)

Courses

NURSE 5503A Comparative Weight Loss I Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Specific topics that will be addressed include risks of overweight/obesity; common psychological issues for the overweight/obese; societal perceptions and barriers for overweight/obese individuals.

NURSE 5503B Comparative Weight Loss 2 Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Common medically recommended diets and diet programs will be compared on the basis of their efficacy/risks; exercise requirements for weight loss, and weight maintenance.

Prerequisites: NURSE 5503A.

NURSE 5503C Comparative Weight Loss 3 Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long and short term implications. Compare pharmacologic weight loss options and their efficacy/risks; non-prescription medications/nutraceuticals for weight loss and their efficacy/risks; and bariatric surgeries and efficacy/risks.

Prerequisites: NURSE 5503A.

NURSE 5508 Advanced Growth and Development Credit: 1

This course is designed to provide students with advanced comprehensive knowledge regarding the physical growth and psychosocial development from birth to 21 years of age within the context of the child's family and community. Analysis and interpretation of growth and development patterns will be examined as they relate to primary health care of children, birth to 21 years of age aiding in the determination of the health status.

NURSE 5509 Technical Foundations of Advanced Practice Credit: 1

This course will provide students with the advanced informatics skills necessary to develop an evidence-based reflective practice. Self-paced progressive modules will allow students to use advanced health care technologies to develop and apply informatics skills so that they can manage and communicate advanced clinical information and knowledge.

NURSE 5515NE Role of the Nurse Educator Credits: 2-3

This course will explore the role of the nurse educator within the academic, acute care, and outpatient settings. Emphasis will be on the development, evaluation, differences and implementation of the nurse educator in the functional roles. Students are introduced to the NLN Core Competencies of Nurse Educators to evaluate their own practice. Ethical and legal issues related to practice as a nurse educator are discussed.

NURSE 5516 Curriculum Development in Nursing Credits: 3

This course prepares the nurse educator to develop, review, and evaluate nursing curricula. Emphasis will be placed on theoretical foundations, principles of program evaluation, and issues in curriculum design.

Prerequisites: NURSE 5515NE.

NURSE 5517 Teaching Strategies in Nursing Credits: 2

This course examines principles and techniques in teaching nursing. Techniques concerning classroom management, writing objectives and implementing active teaching strategies are explored. Emphasis is placed on respecting the diverse learning needs of students in the educational environment.

Prerequisites: NURSE 5515NE.

Co-requisites: NURSE 5515NE.

NURSE 5526 Health Promotion Across the Lifespan Credits: 3

This course is designed to provide students with a strong knowledge base related to concepts of health promotion and health protection for clients across the life span. Clients are conceptualized as individuals, families and populations. An application of various developmental theories for the child, adult, older adult and family will provide the basis to individualize health-care needs for various age and family groups. Core concepts for the course include: theories of health and health promotion and protection, reasoned action, health belief model, epidemiology, disease and injury prevention, health education, growth and development, nutrition, and family systems theory.

Prerequisites: NURSE 5550 (or co-requisite).

NURSE 5527 Cultural Diversity & Values Credits: 3

This course explores how each individual's life context (social, political, historical, and economic) and culture construct their individual's values, beliefs and behaviors. Applying multi-disciplinary concepts and theory, the course expands students' basic knowledge of cultural diversity, approaches to culture and cultural competency, values and ethics, theories of moral development, cultural assessment skills, and ethical decision-making models for clinical practice. Ethical dilemmas created by differing cultural values and the role of health professionals in leading ethical decision-making are explored. Core concepts for the course include: cultural awareness, cultural knowledge, cultural skill, cultural encounter, values clarification, and ethical analysis.

NURSE 5528 Healthcare Policy & Advocacy Credits: 3

This course is designed to focus on the integral relationship between health care policy and advocacy. Content will include principles and processes related to U.S. health policy and politics in relation to the overall system and issues of cost, quality and access; interrelationships between policy, political trends, and quality of care and access at the point of service; elimination of health care disparities, ethical and obligatory values related to the role of the health care professional.

NURSE 5529 Ethics in Advanced Practice & Research Credits: 3

Advanced nursing practice, ethics, and research are intricately connected. This course is designed to explore the content necessary to apply ethical principles to complex issues encountered in advanced nursing practice. Essential ethical principles include assuring the common good through the continual presence of respect for human dignity, autonomy, beneficence, and distributive justice, as those apply to the integration of advanced practice and research. Graduate prepared nurses are responsible for impacting individual care, the care of populations, and environmental health, therefore advocacy for social justice and ethical health care policy are also discussed.

NURSE 5531 Graduate Pharmacology Specialty Credits: 2

This course builds on principles of pharmacology learned in Pharmacotherapeutics for Advanced Practice Nursing. This course focuses on principles and practices necessary for safe prescribing and medication management of a specialty population (e.g., pediatrics, acute care, mental health).

Prerequisites: NURSE 5548, NURSE 5549, NURSE 5550.

Co-Requisites: NURSE 5532.

NURSE 5532 Pediatric Acute Care I Credits: 3

This is the first of two courses in which the management of complex acute, critical, and chronically ill patients with urgent and emergent conditions is explored. The focus is on alterations in pathophysiology, advanced assessment, diagnosis, and collaborative management of infants, children and adolescents with selected episodic/chronic health problems in acute/critical care.

Prerequisites: NURSE 5548, NURSE 5549, NURSE 5544 NURSE 5547.

Co-requisites: NURSE 5534 NURSE 5531.

NURSE 5533 Pediatric Acute Care II Credits: 3

This is the second of two courses in which the management of complex acute, critical, and chronically ill patients with urgent and emergent conditions is explored. The focus is on alterations in pathophysiology, advanced assessment, diagnosis, and collaborative management of infants, children and adolescents with selected episodic/chronic health problems in acute/critical care.

Prerequisites: NURSE 5532 NURSE 5534.

Co-requisites: NURSE 5535.

NURSE 5534 Advanced Practice Clinical Practicum I (Pediatric Acute Care) Credits: 4

This practicum course focuses on the clinical management of the pathological alterations presented in the Pediatric Acute Care I course. The course is designed to provide clinical experience in the development and application of the roles of the pediatric acute care nurse practitioner. The clinical setting will be used for application and evaluation of pathophysiologic and psychosocial concepts in implementing and evaluating care in the clinical settings.

Prerequisites: NURSE 5544, NURSE 5547, NURSE 5548, NURSE 5549, NURSE 5564.

Co-requisites: NURSE 5531, NURSE 5532.

NURSE 5535 Advanced Practice Clinical Practicum II (Pediatric Acute Care) Credits: 4

The emphasis of this course is on the integration of theory, assessment, and advanced therapeutics in high acuity patient care. The student will gain the necessary management skills to provide specialized patient centered care across the entire pediatric age spectrum from complex chronic illness to physiologic deterioration and life threatening instability, including palliative and end of life care, while incorporating the family as a full partner in decision making.

Prerequisites: NURSE 5532, NURSE 5534.

Co-requisites: NURSE 5533.

NURSE 5544 Advanced Health Assessment Skills Credits: 2

This course provides a systematic approach to collection and documentation of advanced health/physical assessment, including the comprehensive history, physical, and psychological assessment of signs and symptoms, pathophysiological changes, psychosocial and cultural variations of the patient. The assessment should be conducted within the context of the family and community, incorporating cultural and developmental variations, and the needs of the patient.

Prerequisites: Undergraduate Health Assessment Course.

NURSE 5546 Foundations of Family Psychiatric Nursing Advanced Practice Credits: 3

This foundational course focuses on factors impacting mental health and the development of psychiatric disorders. The scope of practice and roles of the Psychiatric Mental Health Nurse Practitioner will be introduced. Both pharmacological and nonpharmacological therapeutic modalities will be explored. Comprehensive psychiatric evaluation skills will be developed. Attention will be given to the development of therapeutic relationships, assessment considerations across the lifespan, crisis evaluation and different types of diagnostic tools and approaches. Diagnostic reasoning skills will be applied to mental illness and students will begin to integrate assessment finding into diagnoses in the Diagnostic and Statistical Manual of Mental Disorders.

Prerequisites: NURSE 5547M.

Co-requisites: NURSE 5547M.

NURSE 5547 Diagnostic Reasoning/Advanced Assessment Credits: 3

This course emphasizes utilization of advanced health/physical assessment skills, interpretation of diagnostic testing and lab values, validation, documentation and analysis of findings through diagnostic reasoning to develop and process differential diagnosis.

Prerequisites: NURSE 5544.

NURSE 5547C Diagnostic Reasoning/Advanced Assessment-Children Credits: 3

This course emphasizes utilization of advanced health/physical assessment skills, interpretation of diagnostic testing and lab values, validation, documentation and analysis of findings through diagnostic reasoning to develop and process differential diagnosis. The course consists of two hours of didactic/ discussion and one hour of clinical/lab credit (45 clock hours).

Prerequisites: NURSE 5544.

NURSE 5547N Advanced Assessment of the Neonate Credits: 3

This course is designed to provide a systematic approach to advanced assessment of physiological, psychological, socio-cultural, developmental and spiritual assessment of the fetus, the mother during the prenatal period, and the neonate. This course builds on basic health assessment skills and emphasizes advanced assessment skills, diagnostic test interpretation, validation, documentation and analysis of perinatal, genetic and embryological factors impacting neonatal health and development.

Prerequisites: Admission into the MSN NNP program.

NURSE 5547NE Health Assessment & Clinical Reasoning for Nurse Educators Credits: 4

This course is designed to provide a systematic approach to teaching physiological, psychological, sociocultural, developmental and spiritual assessment. The course builds on basic health assessment skills and emphasizes: comprehensive assessment skills, interpretation of laboratory results, validation of findings, documentation and analysis of assessment findings; and teaching strategies – teaching methodologies, clinical application, and student evaluation.

Prerequisites: NURSE 401, NURSE 5548.

NURSE 5547PM Diagnostic Reasoning/Advanced Assessment Credits: 2

2 credit hours (1 didactic; 1 lab for a minimum of 45 contact/clock hours). This course is designed to provide a systematic approach to the advanced assessment of physiological, psychological, socio-cultural, developmental and spiritual assessment of individuals. The post-MSN student will build on previous advanced assessment skills and content with emphasis on adding advanced physical assessment skills, lab work interpretation, validation, documentation and analysis of assessment findings appropriate to their desired role area. Students will meet the same outcome standards of the track in which they are currently enrolled.

Prerequisites: Free-standing Health Assessment Course.

NURSE 5547W Diagnostic Reasoning/Advanced Assessment Credits: 3

This course emphasizes utilization of advanced health/physical assessment skills, interpretation of diagnostic testing and lab values, validation, documentation and analysis of findings through diagnostic reasoning to develop and process differential diagnosis. The course consists of two hours of didactic/ discussion and one hour of clinical/lab credit (45 clock hours).

Prerequisites: NURSE 5544.

NURSE 5548 Advanced Pathophysiology Across the Lifespan Credits: 3

Advanced pathophysiology is the study of the alterations of normal physiological functioning in cellular, tissue, organ and organ systems. These alterations form the basis for understanding a variety of pathophysiological conditions and the manifestations and impact of abnormal physiological functioning on clients across the life-span. Advanced pathophysiology deals with both generalized processes and major organ system dysfunctions. This course consists of three hours of lecture/discussion per week and individual self study.

NURSE 5548N Physiology/Pathophysiology Of The Neonate Credits: 2

Concepts of embryology, neonatal physiology and pathophysiology are used to provide an in-depth study of normal functioning and alteration of normal physiological functioning in cellular, tissue, organ, and organ systems. Alterations form the basis for understanding a variety of pathophysiological conditions and the manifestations and impact of abnormal physiological functioning on neonates. Both generalized processes and major system dysfunctions are addressed.

Prerequisites: Admission to the Neonatal Nurse Practitioner Track, NURSE 5548.

NURSE 5549 Pharmacology Across the Life Span for Advanced Nursing Practice Credits: 3

This is a course in clinical pharmacotherapeutics that builds on prior knowledge of drug classification, actions, interactions and adverse drug reactions. The major focus of the course is the pharmacotherapeutic prescribing of medications for primary health care management across the life span by advanced practice nurses. The Missouri laws for advanced practice nurse prescriptive authority will be addressed. This course consists of three hours of lecture/discussion/in-class clinical module work per week.

Prerequisites: NURSE 5548, NURSE 5549R.

NURSE 5549N Pharmacology for the Neonate Credits: 3

This course is designed to provide a systematic approach to advanced assessment of physiological, psychological, socio-cultural, developmental and spiritual assessment of the fetus, the mother during the prenatal period, and the neonate. This course builds on basic health assessment skills and emphasizes advanced assessment skills, diagnostic test interpretation, validation, documentation and analysis of perinatal, genetic and embryological factors impacting neonatal health and development.

Prerequisites: Admission into the MSN NNP program.

NURSE 5549R Pharmacokinetics & Pharmacodynamics: Application for Graduate-Prepared Nurses Credit: 1

This course builds on prior knowledge of anatomy, physiology, chemistry, microbiology, pathophysiology and pharmacology. Drug classes are reviewed in preparation for advanced clinical judgment. The principles for decision-making about drug selection, use and monitoring are explored. General principles of pharmacokinetics and pharmacodynamics are discussed. Pertinent patient education concerning select pharmacotherapeutics agents is reviewed.

Prerequisites: Admission to UMKC School of Nursing and Health Studies.

NURSE 5550 Theoretical Foundations in Nursing Credits: 3

This course focuses on critical analysis of theory and the utilization of various levels of nursing and related theories as a base for nursing at the graduate level. It further examines the inter-relationship of theory, research and practice in the development of a scientific body of nursing knowledge. The student will analyze methods by which knowledge is gained and validated. Students will synthesize several different theories from which to form the basis of their practice. Relationships of theory, practice and research will be discussed.

Prerequisites: Completion of BSN.

NURSE 5551B Pharmacology for Women's Health: Common Medical Conditions Credits: 2

This course in clinical pharmacology builds on current knowledge of drug classification, actions, interactions, and adverse drug reactions. The focus is the use of medications by advanced practice providers in the management of common medical conditions in women's health. Emphasis will be placed on the evidence based pharmacological management of women with medical conditions such as cardiovascular conditions, autoimmune disorders, diabetes, gastrointestinal conditions, lower urinary tract disorders, drugs that promote mental health, dermatological conditions, and an overview of chemotherapeutics. This four-week course consists of online discussion, case studies and quizzes.

Prerequisites: NURSE 5549.

NURSE 5555 Nursing Research Credits: 3

This course is designed to prepare graduate nursing students to utilize research findings in order to provide high quality health care and improve nursing practice. This knowledge includes fundamentals of research methods, procedures for the evaluation of research and the application of research findings to clinical practice and organizational decision making.

Prerequisites: NURSE 5550, a graduate level statistics course.

NURSE 5557 Qualitative Methods in Nursing Research Credits: 3

This course is designed to provide the student with the skills necessary to the understanding and conduct of qualitative research. Various methods, including ethnographic, phenomenologic, historic, grounded theory and aesthetic inquiry are presented and discussed. Emphasis is placed upon the appropriateness of each method for different research problems. This course consists of three hours of lecture/discussion per week.

Prerequisites: NURSE 5550, NURSE 5555.

NURSE 5558 Research Design Credits: 3

This course is designed to provide the student with experience in the development of a research proposal. Research skills acquired in previous courses will be synthesized to produce the components of a proposal.

Prerequisites: NURSE 5555.

NURSE 5559 Evaluation Methods in Nursing Credits: 2

This course examines principles of assessment and evaluation in nursing education. Techniques concerning formative and summative evaluation, test writing, clinical evaluation, and test item analysis will be explored. Emphasis is placed on respecting the diverse learning needs of the students in the educational environment.

Prerequisites: NURSE 5517.

NURSE 5564A Primary Care of Adults I Credits: 5

This course is designed to prepare nurse practitioner students to manage common health problems of adults. The focus is on developmentally appropriate preventive health care and management of common acute/episodic illnesses. Students will integrate role competencies, professional standards, and legal requirements essential to the NP role. Core content includes differential diagnosis, therapeutic management, adherence, anticipatory guidance, patient/family education, legal and professional issues, standards of practice, and advanced practice role competencies.

Prerequisites: NURSE 5526, NURSE 5548, NURSE 5550, NURSE 5547A and N5555.

Co-requisites: NURSE 5549.

NURSE 5564AG Advanced Practice Clinical Practicum I Credits: 4

Advanced Practice Clinical Practicum I.

NURSE 5564C Primary Care of Children I Credits: 5

This course is designed to prepare nurse practitioner students to manage common pediatric health problems. The focus is on evidence-based developmentally appropriate preventive health care and management of common acute/episodic illnesses. Students will integrate role competencies, professional standards, and legal requirements essential to the NP role. Core content includes differential diagnosis, therapeutic management, adherence, anticipatory guidance, patient/family education, legal and professional issues, standards of practice, and advanced practice role competencies. Clinical practice and clinical seminar comprise the clinical experience.

Prerequisites: NURSE 5526, NURSE 5547C, NURSE 5548, NURSE 5550.

Co-requisites: NURSE 5549, NURSE 5555.

NURSE 5564F Primary Care of Families I Credits: 5

This course is designed to prepare nurse practitioner students to manage common health problems across the life span. The focus is on developmentally appropriate preventive health care and management of common acute/episodic illnesses. Students will integrate role competencies, professional standards, and legal requirements essential to the NP role. Core content includes differential diagnosis, therapeutic management, adherence, anticipatory guidance, patient/family education, legal and professional issues, standards of practice, and advanced practice role competencies.

Prerequisites: NURSE 5526, NURSE 5547F, NURSE 5548, NURSE 5550.

Co-requisites: NURSE 5549.

NURSE 5564M Family Psychiatric Nursing Advanced Practice I Credits: 5

This course is designed to prepare students to manage psychiatric illness in individuals. Emphasis will be given to psychiatric disorders commonly encountered such as thought disorders, mood disorders, anxiety disorders, personality disorders and substance abuse. Special attention will be given to illnesses occurring in childhood and older age. Focus will be on strengthening mental health diagnostic skills and management of psychiatric illness in individuals. Students will learn to identify and treat short term mental health issues, chronic disorders and acute exacerbations. Psychotropic medication management skills will be developed. Students will begin their clinical hours during this course with a minimum of 165 in total. Patients seen in clinical settings will be across the lifespan.

Prerequisites: NURSE 5526, NURSE 5546, NURSE 5547M, NURSE 5548, NURSE 5550.

Co-requisites: NURSE 5549.

NURSE 5564N Neonatal Nursing I Credits: 3

This course integrates the physiologic, pharmacologic, and assessment skills and principles in determining appropriate care of the ill neonate. This course covers case management of respiratory, cardiovascular and neurologic disorders. Current research and evidenced-based practices are used as the course framework. The effects of critical conditions on the growth and development of the neonate, including subsequent chronic health problems as well as the short and long term consequences to the child's family are emphasized. The use of specific interventions and diagnostic procedures are demonstrated and applied in laboratory/clinical settings.

Prerequisites: NURSE 5549N.

Co-requisites: NURSE 5566N.

NURSE 5564NE Clinical for Nurse Educators Credits: 5

This clinical course provides students an opportunity to develop advanced knowledge and clinical skills in an acute care clinical setting. Clinical practice hours will be spent in a variety of settings providing the students the opportunity to provide clinical education and advanced patient care in a specialty population. The students demonstrate their clinical development and clinical reasoning skills by evaluating the process of nursing care (assessment, intervention/management, evaluation) from an evidenced-based perspective.

Prerequisites: All required courses except NURSE 5572 and NURSE 5598.

NURSE 5564W Primary Health Care of Women Credits: 5

This course is designed to prepare the woman's health nurse practitioner student to manage the primary health care of women. The course will focus on the etiology, symptomatology, diagnosis and management of gynecologic and non-gynecologic primary health care problems throughout the lifespan. Emphasis will be placed on caring for women within a holistic, collaborative framework and recognizing how the changing roles of women in today's society can affect their lives and their health status. Concepts, theories and evidence-based practice related to health promotion and maintenance, and illness prevention are addressed.

Prerequisites: NURSE 5526, NURSE 5547W, NURSE 5548, and NURSE 5550; NURSE 5549 and NURSE 5555 (pre or co-req).

NURSE 5566A Primary Care of Adult-Gerontology II Credits: 5

This course is designed to prepare adult-gerontology nurse practitioner (NP) students in the care and management of adults with chronic health problems. The focus is on the differentiation and therapeutic management of chronic health problems encountered in various health care settings. The course enables students to develop a research and theory based practice for disease state management of health care for adults. Core concepts: theories, grief and loss, chronicity and pain; and advanced nursing skills.

Prerequisites: NURSE 5549, NURSE 5564A.

NURSE 5566C Chronic Child Health Care (Clinical II) Credits: 5

This course is designed to apply knowledge and skill to advanced evidence-based nursing care of children experiencing complex/chronic health problems. The organizing framework is case management of chronic health states. Students will apply several theoretical models to acute and chronic conditions of children at different developmental stages representing various socioeconomic and cultural groups, in primary or specialized care settings. Core concepts are stress, coping, adaptation, pain management, grief, loss, nutritional support, ethical decision-making, and symptom management.

Prerequisites: NURSE 5549 and NURSE 5564C.

NURSE 5566F Primary Care of Families II Credits: 5

This course is designed to prepare family nurse practitioner (NP) students in the care and management of families with chronic health problems. The focus is on the differentiation and therapeutic management of chronic health problems encountered in various health care settings. The course enables students to develop a research and theory based practice for disease state management of health care for families. Core concepts: theories, grief and loss, chronicity and pain; and advanced nursing skills.

Prerequisites: NURSE 5549, NURSE 5564F.

NURSE 5566M Family Psychiatric Nursing Advanced Practice II Credits: 5

In this course, management of mental health problems will expand beyond the individual to include families, groups and the greater community. This course will emphasize development of psychotherapy skills by the advanced practice nurse. Theoretical foundations and intervention approaches for individuals, group and family therapies will be explored. Unique or modified approaches for pediatric and older adult populations will be covered. Students will be exposed to the common psychotherapy modalities and will identify which approaches they will adopt and utilize in psychotherapy clinical experiences. Clinical management will also expand from outpatient settings to include crisis evaluation and inpatient care.

Prerequisites: NURSE 5549, NURSE 5546, NURSE 5564M.

NURSE 5566N Neonatal Nursing II Credits: 3

This course integrates physiologic, pharmacologic, and assessment skills and principles determining appropriate care of the ill neonate. This course covers case management of gastrointestinal, renal, endocrine, hematologic, orthopedic, ophthalmologic, dermatologic and immune disorders. Current research and evidenced-based practices are used as the course framework. The effects of critical conditions on the growth and development of the neonate, including subsequent chronic health problems as well as the short and long term consequences of the child's family are emphasized. The use of specific interventions and diagnostic procedures are demonstrated and applied in laboratory/clinical settings.

Prerequisites: NURSE 5549.

NURSE 5566W Care of the Childbearing Woman Credits: 5

This course is designed to prepare the woman's health nurse practitioner students in the care and management of the childbearing woman. The focus of the course is on the normal adaptation and pathologic alterations throughout the childbearing period. Emphasis is placed on management of women and families from preconception through the puerperium. Concepts, theories and evidence-based research related to the biopsychosocial and cultural aspects of childbearing are addressed. Core concepts include adaptation, stress and coping, grief and loss, pain and symptoms management.

Prerequisites: NURSE 5564W.

NURSE 5572 Advanced Nursing Practice: Synthesis Practicum Credits: 5

This course is a concentrated, experiential, supervised clinical opportunity to function in an advanced practice nursing role. The focus of this intensive clinical practicum is on the synthesis and application of previous theory and clinical courses under the guidance of a preceptor. Students will be expected to apply advanced clinical decision-making skills and evidence-based practice guidelines to the assessment, management, and evaluation of complex healthcare problems. Core concepts include advanced nursing practice, functional role responsibilities, ethical, legal and health policy issues, and activities with the emphasis on their relationship to patient outcomes. The patient systems for this experience include individuals and families within the context of community.

Prerequisites: All required courses except NURSE 5598, NURSE 5599, and electives.

NURSE 5572II Preceptorship II Credits: 5

This course provides opportunities to apply knowledge and skills from advanced nursing role, theory, research and neonatal clinical courses to the advanced therapeutic management of high-risk neonates. This is the second of two preceptorship courses which builds upon acquired clinical skills of NURSE 5572NI and can be taken concurrently or in consecutive semesters. Emphasis is placed on therapeutic measures within a conceptual framework or model applying findings from research relevant to comprehensive care of neonates. The client system will be the neonate and family.

Co-requisites: NURSE 5572NI.

NURSE 5572M Advanced Nursing Practice: Synthesis Practicum Credits: 5

This course is a concentrated, experiential, supervised clinical opportunity to function in a psychiatric advanced practice nursing role. The focus of this intensive clinical practicum is on the synthesis and application of previous theory and clinical courses under the guidance of a preceptor. Students will be expected to apply advanced clinical decision making skills and evidence based practice guidelines to the assessment, management, and evaluation of complex healthcare problems. Core concepts include advanced nursing practice, functional role responsibilities, ethical, legal and health policy issues, consultation/collaboration and activities with the emphasis on their relationship to patient outcomes. A minimum of 330 clinical hours is required. Patients seen in clinical settings will be across the lifespan.

Prerequisites: All required courses except NURSE 5598.

NURSE 5572NE Synthesis Practicum for Nurse Educators Credits: 3

3 Credit Hours (3 clinical for a minimum of 180 contact/clock hours). This course provides the student a concentrated, experiential opportunity to function in the role as nurse educator. Core concepts include functional role responsibilities, teaching strategies and theory utilization. Emphasis is placed on professional role development and the concept of life-long learning.

Prerequisites: All required courses except NURSE 5598.

NURSE 5572NI Preceptorship I Credits: 5

This course provides opportunities to apply knowledge and skills from advanced nursing role, theory, research and neonatal clinical courses to the advanced therapeutic management of high-risk neonates. This is the first of two preceptorship courses. The other course, NURSE 5572II, can be taken concurrently or in consecutive semesters. Emphasis is placed on therapeutic measures within a conceptual framework or model applying findings from research relevant to comprehensive care of neonates. The client system will be the neonate and family.

Prerequisites: NURSE 5564N, NURSE 5566N.

NURSE 5581A Simulation in Healthcare-State of the Science, Ethical, and Theoretical Foundations Credit: 1

This course provides an introduction to principles, ethics, and theory guiding simulation education in healthcare. Emphasis is on analysis of the evidenced-based research related to simulation, and regulatory processes through interprofessional discussions.

NURSE 5581B Simulation in Healthcare-Development and Curricular Integration Credit: 1

This course introduces students to simulation center design, scenario development, and curriculum integration. Through inter-professional collaboration, students will examine the process of developing simulations and developing realistic, measurable objectives.

NURSE 5581C Simulation in Healthcare-Debriefing and Evaluation Methods Credit: 1

This course prepares students to evaluate learning in the simulation environment and facilitate debriefing. Evaluation methods based on simulation learning domains and objectives are explored.

NURSE 5583A Accreditation in Nursing Education –Procedural Overview and Accreditation Credit: 1

The course provides a foundational understanding of the accreditation process for the Accreditation Commission for Education in Nursing (ACEN) and Commission on Collegiate Nursing Education (CCNE). Procedural overview includes discussion on the accreditation self-study process, standards, on-site evaluation, and the accreditation decision-making process and accreditation. Emphasis will be placed on guidelines for assessment of student learning outcomes and preparation for continuing review.

NURSE 5583B Accreditation in Nursing Education –Accreditation Commission for Education in Nursing (ACEN) Credit: 1

This course builds upon foundational principles of accreditation by exploring the process as related to the Accreditation Commission for Education in Nursing (ACEN). Emphasis is placed on how to implement the accreditation process to successfully complete a self-study report.

Prerequisites: NURSE 5583A.

NURSE 5583C Accreditation in Nursing Education –Commission on Collegiate Nursing Education (CCNE) Credit: 1

This course builds upon foundational principles of accreditation by exploring the process as related to the Commission on Collegiate Nursing Education (CCNE). Emphasis is placed on how to implement the accreditation process to successfully complete a self-study report.

Prerequisites: NURSE 5583A.

NURSE 5587 Research Utilization in Nursing Credits: 3

This course will prepare nurses to implement a research utilization model to validate practice. The theoretical basis for research utilization and practical instances of its application in nursing will be examined. Opportunities will be provided to develop a research utilization plan to address a clinical area of practice.

Prerequisites: NURSE 5550, NURSE 5555.

NURSE 5590 Directed Scholarly Activity Credits: 1-2

This course provides individualized experiences to prepare the student for their comprehensive examination.

Prerequisites: Permission of the instructor.

Co-requisites: Completion of core course requirements.

NURSE 5597A Independent Study in Nursing/Patient Care-Elective Credits: 1-6

Guided study of selected topics and/or areas in nursing and/or patient care.

Prerequisites: NURSE 5550.

NURSE 5597AHA Independent Study in Nursing Credits: 1-6

NURSE 5597AS Independent Study In Nursing Credits: 1-6

Independent Study In Nursing

NURSE 5597B Independent Study in Nursing/Patient Care-Equivalent Credits: 1-6

Guided study of selected topics and/or areas in nursing and/or patient care.

Prerequisites: NURSE 5550.

NURSE 5597EPR Independent Study in Nursing Credits: 1-6

NURSE 5597HA Independent Study in Nursing Credits: 1-6

NURSE 5597LS Independent Study In Nursing Credits: 1-6

NURSE 5597P1 Independent Study in Nursing Credits: 1-6

NURSE 5597P2 Independent Study in Nursing Credits: 1-6

NURSE 5597PCF Independent Study In Nursing Credits: 1-6

NURSE 5597PF Independent Study In Nursing Credits: 1-6

NURSE 5597PN Independent Study Nursing Credits: 1-6

NURSE 5597ST Independent Study In Nursing Credits: 1-6

NURSE 5597WLA Indep Study in Nursing Credits: 1-6

Indep Study in Nursing

NURSE 5597WLB Indep Study in Nursing Credits: 1-6

Indep Study in Nursing

NURSE 5597WLC Indep Study in Nursing Credits: 1-6

Indep Study in Nursing

NURSE 5598 Directed Research Credits: 1-6

Individual research project for students to utilize beginning research skills in designing and conducting independent studies under the direction of the faculty.

Prerequisites: NURSE 5550, NURSE 5555.

NURSE 5599 Research Thesis Credits: 1-9

Individual study under the direction of a member of the faculty leading to the preparation and oral defense of a thesis.

Prerequisites: NURSE 5550, NURSE 5555.

NURSE 5601 Clinical Institute I Credit: 1

1 credit hour (1 didactic) This course provides an introduction to the knowledge and skills essential to becoming a graduate student. Students utilize theory, evidence based practice/research, and clinical expertise to become expert practitioners in their population foci. Content includes relevant UMKC policies and procedures, technology utilization to conduct library literature searches, access to course content on electronic platforms, and planning for success in graduate school. The literature review search progresses to application of the content, through written and verbal communication. Techniques building on critical thinking skills to start clinical diagnostic reasoning skills are introduced along with graduate school expectations and outcomes.

Prerequisites: Admission to the MSN or DNP programs.

NURSE 5602 Healthcare Systems & Leadership Credits: 3

This course focuses on the DNP as leader within the complex health care industry. Utilizing information technology, an in-depth study of the socio-political, economic, cultural and historical background of the American health care system the system of health professions will form the foundation for exploration of leadership needs the DNP leadership role.

Prerequisites: Admission to the DNP program.

NURSE 5603 Research Institute I Credits: 2

This course will provide a hands-on introduction to the process of becoming a research scientist. Content will include the responsible conduct of research, its core element, the emerging guideline, relevant UMKC policies and procedures, and the impact to the Researcher in his/her day-to-day activities. This course also includes literature reviews, scholarly writing, technology in the Research process, developing a program of scholarship and effective time management.

Prerequisites: Admission to the PhD program at the School of Nursing and Health Studies.

NURSE 5604 Research Institute II Credits: 2

This course will provide interactive sessions to develop skills necessary for the synthesis of research findings, the identification of funding sources and the initiation of the grant writing process. Also included will be the opportunity to develop and present research findings in multiple venues.

Prerequisites: NURSE 5603, Completion of 6 credit hours of PhD coursework.

NURSE 5607NA Health Care Policy and Leadership for the Nurse Anesthetist Credits: 2

This course provides an in-depth study of the health care policy process, emphasizing ways that Doctor of Nursing Practice (DNP) prepared Certified Registered Nurse Anesthetists (CRNAs) can incorporate health policy advocacy into their practice. The content prepares DNP CRNAs to be effective, innovative leaders in nurse anesthesia and health care. Students will participate in a leadership experience in one of four areas: education, research, administration, or politics.

Prerequisites: Active status in both UMKC SoNHS BSN-DNP NA program and the TMC School of Nurse Anesthesia.

NURSE 5608 Theory Development I Credits: 3

The philosophical underpinnings of nursing and the theoretical development of nursing science will be explored in this course. The discipline of nursing and the relationship between nursing theory, research, and practice will be discussed. Students will analyze nursing and non-nursing theories for research or clinical questions. Students will identify a theoretical framework to guide their research or evidence-based practice project.

Prerequisites: Twelve credit hours of graduate level course work, including NURSE 5550 and NURSE 5555, or their equivalents.

NURSE 5610 Theory Development in Nursing II Credits: 3

Nursing and non-nursing models, frameworks and theories will be analyzed and critically evaluated. Philosophical tenants will be debated. Students will identify the range of applicable theories for their area of research. Appropriate application of theories to independent and dependent variables, mediators and moderators, cofactors, correlates and outcomes will be explored. Students will develop concepts, hypotheses, and research goals that utilize an identified theory for nursing research.

Prerequisites: NURSE 5608.

NURSE 5611 Healthcare Economics & Quality Credits: 3

This course focuses on the principles of, and complex relationship between, cost and efficiency and effectiveness and health care quality outcomes. Economic perspectives and needs from industry, organizations, providers and consumers will all be examined. Throughout the course, issues regarding the inextricable link between cost and quality within the complex healthcare environment will be examined and addressed, with emphasis on DNP nurse intervention and leadership.

Prerequisites: Admission to the DNP program.

NURSE 5612 Statistics I Credits: 3

This graduate statistics online course is designed for students in the graduate programs. The course provides a comprehensive understanding of: describing data, logic of sampling, and test statistics; hypothesis testing, type 1 and type 2 errors; power; one-way ANOVA (analysis of variance); planned comparison, post-hoc tests and trend analysis; factorial ANOVA; repeated measures designs and mixed randomized repeated designs; simple and multiple regression; and ANCOVA (analysis of co-variance).

Prerequisites: Upper division undergraduate statistics course.

NURSE 5613 Application of Evidence-based Practice I Credits: 3

This course is designed to provide an analytic and systematic approach to evaluate evidence-based research and guidelines used in clinical practice. The course builds on methods of evidence-based practice (EBP), theoretical foundations, ethical principles, research design, and statistical analyses. The student will develop an evidence-based approach to address a clinical question and to construct an integrative literature review. In the course, an EPB project is designed to provide quality health care. The project plan incorporates the integrative literature review, scientific methods, outcome measurement, and data analysis.

Prerequisites: NURSE 5555, NURSE 5608.

NURSE 5614 Health Policy & Ethics Credits: 2

This course examines health policy and ethics as they intersect with other public policies. Legal, financial, and ethical issues associated with policy development and evaluation are critically examined.

Prerequisites: Admission into the Ph.D. in Nursing Program.

NURSE 5615NA Chemistry and Physics for the Nurse Anesthetist Credits: 3

This course is designed to provide the nurse anesthesia student a foundational knowledge needed for the provision of anesthesia. This course will review elements of general, organic, and biochemistry pertinent to understanding structure, characteristics and basic mechanisms of metabolic pathways and pharmacology routinely administered during the anesthetic period. Pertinent laws and principles of physics will be presented. The student will be prepared to apply pertinent laws and principles of physics to the provision of anesthesia services.

Prerequisites: Acceptance into School of Nurse Anesthesia Program.

NURSE 5616NA Anesthesia Crisis Resource Management Credit: 1

This course is designed for the graduate nurse anesthesia student to optimize their expert clinical judgement during low-frequency, high-acuity anesthesia crisis events. The history, importance, and theory of patient safety during dynamic anesthetic situations will be discussed, as well as specific skills and practices that improve performance. The goal of this course is for the student to develop knowledge and skills of Anesthesia Crisis Resource Management (ACRM) prior to graduation.

Prerequisites: NURSE 5619NA3.

NURSE 5617 Application of Evidence-based Practice II Credits: 3

This course is designed to provide an analytic and systematic approach to incorporation of evidence-based research into clinical practice. The course builds on the underpinnings of evidence-based practice (EBP) including theoretical foundations, ethical and cultural principles, quality, policy and economic considerations, design and methods, and statistical analysis of outcomes. In this course, the student will use the integrated literature review and principles of human subject protection to develop an evidence-based practice project proposal and submit the proposal for approval. Support for the EBP improvement plan includes technology and information systems.

Prerequisites: NURSE 5613.

NURSE 5617B Application of Evidence-based Practice II Credits: 3

In this course, the student will use the integrated literature review and principles of human subject protection to develop an evidence-based practice (EBP) project proposal. Students will collaborate with a site in preparation for the project. Support for the EBP improvement plan includes technology and information systems.

Prerequisites: NURSE 5617.

NURSE 5619NA1 Principles of Nurse Anesthesia Practice I Credits: 2

This course introduces the nurse anesthesia student to concepts necessary to plan and execute safe individualized anesthetics. Content includes assessment of co-morbid conditions and patient populations in anesthesia, appropriate plans of care, anesthetic techniques, prevention of complications, fluid management, monitoring and utilization of anesthesia equipment. Fundamental concepts and techniques essential to clinical anesthesia practice focus on theoretical, practical and professional considerations involved in the administration of general anesthesia, conscious sedation and regional anesthesia, inside and outside the operating room. Content includes evidence based student led conferences, anesthetic literature, morbidity and mortality, inter-disciplinary and intra-disciplinary conferences and use of informatics systems.

Prerequisites: NURSE 5619NAB.

NURSE 5619NA2 Principles of Nurse Anesthesia II Credits: 3

This course is designed to provide the nurse anesthesia student a broad knowledge base in multiple concepts, topics and techniques. This course builds on concepts learned in Principles I and delineates techniques of anesthesia management that are considered more situation specific with specialized diagnostic and anesthetic procedures. Primarily focused on patients and existing co-morbidities, the course intensively covers more advanced concepts and principles of anesthetic management including neurosurgical, thoracic, vascular and trauma procedures. Content includes evidence based student led morbidity and mortality conferences, inter-disciplinary and intra-disciplinary conferences, use of informatics systems and simulation based learning.

Prerequisites: NURSE 5619NA1.

NURSE 5619NA3 Principles of Nurse Anesthesia Practice III Credits: 3

The course covers advanced concepts and principles of anesthetic management with emphasis on cardio-thoracic anesthesia and anesthetic emergencies. The course builds on Principles I and II and focuses more on critical thinking, skill development, specific procedures utilized in anesthetic practice including advanced airway techniques and placement of invasive monitoring modalities as well as crisis management in anesthesia. Content includes evidence based student led conferences, utilization of anesthetic literature, morbidity and mortality, inter-disciplinary and intra-disciplinary conferences, use of medical informatics systems and simulation based learning.

Prerequisites: NURSE 5619NA2.

NURSE 5619NAB Basic Principles of Nurse Anesthesia Practice Credits: 2

This course is designed to build on topics introduced in orientation and provides the student with the knowledge needed to begin the delivery of anesthesia. This course encompasses a variety of topics including pharmacology and equipment utilized in the provision of anesthesia, airway anatomy and management, commonly administered fluid, colloids, non-colloids, and blood products and an overview of anesthesia and trauma. Lecture topics will be assimilated into high fidelity simulation scenarios to prepare the student for clinical residency courses.

Prerequisites: NURSE 5619NAO.

NURSE 5619NAO Orientation to Nurse Anesthesia Practice Credits: 2

This course is designed to give the first year nurse anesthesia student a broad field orientation to anesthesia topics. The course will provide a foundation of knowledge for the safe practice of anesthesia. This will be an initial introduction to the art and science of anesthesia. The course content will include: patient assessment of cardiac status for anesthesia, anesthetic equipment and workplace safety. The anesthesia machine is incorporated into the learning process to reinforce principles introduced in class. Institutional policies/procedures will be reviewed along with interprofessional communication skills. Education regarding personal wellness and substance abuse risks will be discussed.

Prerequisites: Admission into the DNP-NA program.

NURSE 5620 Advanced Practice V - DNP Clinical Credits: 5

This course is designed to increase the clinical expertise of the student by fostering the development of a specific area of focus. It allows the student to investigate specific procedures, skills or clinical knowledge that will be later utilized in the DNP practicum course. The course is designed to be self-directed allowing the student to focus on her/his own specific clinical interests and/or area of expertise. This five credit hour course consists of one credit hour of didactic and four credit hours of clinical (120 hours).

Prerequisites: All DNP coursework except NURSE 5624.

NURSE 5621A Clinical III Credits: 4

This course will provide students with the opportunity to apply knowledge from previous graduate courses to advanced primary care nursing of adults and geriatrics. The focus is to demonstrate refined advanced assessment, diagnosis, and treatment skills in clinical practice as appropriate in areas of specialization related to multiple disease processes associated in the care of adults and geriatrics. This practice will be based on the application of evidence in the biophysical, psychosocial, behavioral, sociopolitical, cultural, economic, interprofessional practice and nursing science arenas.

Prerequisites: NURSE 5564A- Ambulatory Care Of Adults

NURSE 5621C Clinical III Credits: 4

This course will provide students with the opportunity to apply knowledge from previous graduate courses to advanced primary care nursing of children. The focus is to demonstrate refined advanced assessment, diagnosis, and treatment skills in clinical practice as appropriate in areas of specialization related to multiple disease processes associated in the care of children. This practice will be based on the application of evidence in the biophysical, psychosocial, behavioral, sociopolitical, cultural, economic, interprofessional practice and nursing science arenas.

Prerequisites: NURSE 5566C.

Co-requisites: NURSE 5617B.

NURSE 5621F Clinical III Credits: 4

This course will provide students with the opportunity to apply knowledge from previous graduate courses to advanced primary care nursing of individuals and families. The focus is to demonstrate refined advanced assessment, diagnosis, and treatment skills in clinical practice as appropriate in areas of specialization related to multiple disease processes associated in the care of individuals and families. This practice will be based on the application of evidence in the biophysical, psychosocial, behavioral, sociopolitical, cultural, economic, interprofessional practice and nursing science arenas.

Prerequisites: NURSE 5566F.

Co-requisites: NURSE 5617B.

NURSE 5621W Clinical III Credits: 4

This course will provide students with the opportunity to apply knowledge from previous graduate courses to advanced primary care nursing of women. The focus is to demonstrate refined advanced assessment, diagnosis, and treatment skills in clinical practice as appropriate in areas of specialization related to multiple disease processes associated in the care of women. This practice will be based on the application of evidence in the biophysical, psychosocial, behavioral, sociopolitical, cultural, economic, interprofessional practice and nursing science arenas.

Prerequisites: NURSE 5566W.

Co-requisites: NURSE 5617B.

NURSE 5622 Statistics II Credits: 3

This graduate statistics on-line course is designed to provide a conceptual understanding of the statistical procedures associated with: advanced multiple regression; moderators and mediators in multiple regression; path analysis; logistic regression; factor analysis; MANCOVA; MANOVA; cluster analysis; and canonical correlation.

Prerequisites: NURSE 5612.

NURSE 5623A Advanced Nursing Practice: Synthesis Practicum Credits: 5

This course is a concentrated, experiential, supervised clinical opportunity to function at the highest level of advanced nursing practice. The focus is on the synthesis and application of previous theory, primary care, and specialty clinical courses. Students will be expected to apply advanced clinical decision making skills and evidence based practice guidelines to the assessment, management, and evaluation of complex healthcare problems. Core concepts include integrated nursing science with knowledge of ethical, legal, and health policy issues.

Prerequisites: NURSE 5621A.

Co-requisites: NURSE 5629.

NURSE 5623C Advanced Nursing Practice: Synthesis Practicum Credits: 5

This course is a concentrated, experiential, supervised clinical opportunity to function at the highest level of advanced nursing practice. The focus is on the synthesis and application of previous theory, primary care, and specialty clinical courses. Students will be expected to apply advanced clinical decision making skills and evidence based practice guidelines to the assessment, management, and evaluation of complex healthcare problems. Core concepts include integrated nursing science with knowledge of ethical, legal, and health policy issues.

Prerequisites: NURSE 5621C.

Co-requisites: NURSE 5629.

NURSE 5623F Advanced Nursing Practice: Synthesis Practicum Credits: 5

This course is a concentrated, experiential, supervised clinical opportunity to function at the highest level of advanced nursing practice. The focus is on the synthesis and application of previous theory, primary care, and specialty clinical courses. Students will be expected to apply advanced clinical decision making skills and evidence based practice guidelines to the assessment, management, and evaluation of complex healthcare problems. Core concepts include integrated nursing science with knowledge of ethical, legal, and health policy issues.

Prerequisites: NURSE 5621F.

Co-requisites: NURSE 5629.

NURSE 5623M Advanced Nursing Practice: Synthesis Practicum Credits: 5

This course is a concentrated, experiential, supervised clinical opportunity to function at the highest level of advanced nursing practice. The focus is on the synthesis and application of previous theory, mental health care, and specialty clinical courses. Students will be expected to apply advanced clinical decision making skills and evidence based practice guidelines to the assessment, management, and evaluation of complex healthcare problems. Core concepts include integrated nursing science with knowledge of ethical, legal, and health policy issues.

Prerequisites: NURSE 5621M.

Co-requisites: NURSE 5629.

NURSE 5623W Advanced Nursing Practice: Synthesis Practicum Credits: 5

This course is a concentrated, experiential, supervised clinical opportunity to function at the highest level of advanced nursing practice. The focus is on the synthesis and application of previous theory, primary care, and specialty clinical courses. Students will be expected to apply advanced clinical decision making skills and evidence based practice guidelines to the assessment, management, and evaluation of complex healthcare problems. Core concepts include integrated nursing science with knowledge of ethical, legal, and health policy issues.

Prerequisites: NURSE 5621W.

Co-requisites: NURSE 5629.

NURSE 5624 Advanced Practice VI-DNP Practicum Credits: 5

This course is designed to synthesize all previous coursework through the implementation and evaluation of a "tangible and deliverable academic product that is derived from the practice immersion experience" (DNP essentials, p.20). Individual student work may take a variety of forms, but will include the elements of evidence evaluation and utilization, systems analysis, and dissemination of best practice information.

Prerequisites: NURSE 5620.

NURSE 5627NA Regional Anesthesia Credit: 1

This course is designed for graduate nurse anesthesia students to review anatomy, pharmacodynamics, pharmacokinetics and physiological effects of local anesthetics and to learn techniques to administer various types of regional anesthesia.

Prerequisites: NURSE 5619NAB.

NURSE 5628NA1 Advanced Physical Health Assessment for the Nurse Anesthetist I Credits: 2

This is the first of a two course series that will present the various elements required to perform a systematic assessment with an emphasis on the patient preparing to undergo anesthesia throughout the lifespan. Integration of in-depth health history, physical and psychological signs and symptoms, diagnostic testing, pathophysiologic changes, psychosocial, and cultural characteristics of the individual are emphasized. Professional documentation and communication of findings will be practiced. The student will integrate knowledge and advanced assessment skills to perform a comprehensive pre-anesthesia assessment.

Prerequisites: NURSE 5619NA0.

Co-requisites: NURSE 5619NAB.

NURSE 5628NA2 Advanced Physical Health Assessment for the Nurse Anesthetist II Credit: 1

This is the second of a two course series. This course will integrate the student's knowledge and skills to work effectively and efficiently within the healthcare team to formulate an anesthesia plan of care which takes into consideration assessment findings related to underlying pathology, life circumstance, culture, and ethnicity. Content will include advanced diagnostic testing pertinent to the patient preparing for anesthesia. Assessment skills and critical thinking will be refined through clinical experiences. This course consists of 0.5 credit hours of didactic and 0.5 credit hours of clinical (45 hours).

Prerequisites: NURSE 5628NA1.

NURSE 5629 Clinical Institute III Credits: 3

This course is designed to synthesize all previous course work. The students will utilize education, knowledge and experiences to complete their final DNP project data collection and evaluation of a “tangible and deliverable academic product that is derived from the practice immersion experience” (AACN Essentials 2006, p. 20). Individual student work may take a variety of forms, but will include the multi-faceted elements required of evidence evaluation and utilization, systematic analysis, and dissemination of project data to support best practice.

Prerequisites: NURSE 5617B, NURSE 5621.

Co-requisites: NURSE 5623.

NURSE 5630 Health Care Systems Credits: 3

This course is a guided, in-depth exploration, analysis and evaluation of selected health care systems literature. Other nursing literature will be reviewed as appropriate.

Prerequisites: Admission into Ph.D. in Nursing program.

NURSE 5631 State of the Science Credits: 3

This course is a guided in-depth exploration of literature on a selected focus area. Appropriate contextual system literature will be reviewed as appropriate. Scholarly writing for a variety of contexts will be presented.

Prerequisites: Admission into a doctoral program and completion of a doctoral level theory course or permission of instructor

NURSE 5632 Health Restoration & Support Credits: 3

This course is a guided, in-depth exploration, analysis and evaluation of selected health restoration support literature. Other nursing literature will be reviewed as appropriate.

Prerequisites: Admission into Ph.D. in Nursing program.

NURSE 5636NA Obstetrical Anesthesia Credit: 1

This course is designed to provide the graduate nurse anesthesia student with a broad knowledge base in the field of obstetrical anesthesia. Anatomy and physiology of pregnancy, co-morbidities in the pregnant patient and anesthesia procedures for the pregnant patient will be presented. Lecture topics will be assimilated into high fidelity simulation scenarios to prepare the student for clinical residency courses.

Prerequisites: NURSE 5619NA1.

Co-requisites: NURSE 5619NA2.

NURSE 5637 Healthcare Outcomes and Epidemiology Credits: 2-3

This course is an application of basic epidemiologic principles. This course provides the foundation for assessment and evaluation of health outcomes in a variety of populations, clinical settings, and systems. Concepts introduced include fundamentals of epidemiology, determinants of health, screening, outbreak investigation, and disease surveillance. The course includes content on descriptive and analytic epidemiology. CRNA students enroll for 2-credits; all other DNP students are required to enroll for 3-credits.

Prerequisites: NURSE 5612 or equivalent.

NURSE 5638NA1 Pharmacology of Anesthesia I Credit: 1

The course is the first in a two semester sequence designed to provide the graduate nurse anesthesia student with the knowledge of pharmacology and the human physiologic responses to pharmacologic agents when administered to the patient perioperatively.

Prerequisites: NURSE 5619NA3.

NURSE 5638NA2 Pharmacology of Anesthesia II Credits: 2

This course is the second in a two semester sequence designed to provide the graduate nurse anesthesia student with the knowledge of pharmacology and the human physiologic responses to pharmacologic agents when administered to the patient perioperatively.

Prerequisites: NURSE 5638NA1.

NURSE 5640NA Pediatric Anesthesia Credit: 1

This course is designed for the graduate nurse anesthesia student to learn anatomy and physiology specific to the pediatric patient. The most common pathophysiologic states found in the pediatric surgical patient will be discussed as well as fluid management and pharmacology as it relates to the pediatric patient. The goal of this pediatric course is to give the student the basic knowledge of pediatric anesthesia as a foundation, prior to their pediatric clinical rotation.

Prerequisites: NURSE 5619NA2.

Co-requisites: NURSE 5619NA3.

NURSE 5641NA Acute and Chronic Pain Management Credits: 2

The student will develop a basic understanding of pain management as it relates to the field of anesthesia. Relevant anatomy, physiology, and pharmacology will be reviewed to evaluate the risks, benefits, and options of various pain management approaches. Students will be required to demonstrate proficiency in regional anesthesia techniques and management of pain in patients of all ages and varying stages of wellness.

Prerequisites: Nurse 5619NA1, Nurse 5619NA2.

NURSE 5642NA Comprehensive Review Credit: 1

This is a comprehensive review course that covers all areas of anesthesia, as well as all anesthesia techniques. This course will discuss normal physiology and pathophysiology of all organ systems and how various anesthesia techniques and pharmacology affect these systems. The student will be equipped with the knowledge of how to choose appropriate anesthetic techniques for various disease states and surgical procedures.

Prerequisites: NURSE 5619NA2.

Co-requisites: NURSE 5619NA3.

NURSE 5643NA Professional Practice for the Nurse Anesthetist Credits: 2

This course is designed to explore a range of non-clinical issues in nurse anesthesia practice. Students will gain an appreciation of the professional ideals of the Doctor of Nursing Practice (DNP) prepared Certified Registered Nurse Anesthetist (CRNA) through both online and on-site group discussion. In addition, students will attend professional meetings including: Student Registered Nurse Anesthetist (SRNA) Leadership Luncheon, Missouri Association of Nurse Anesthetists (MoANA) Lobby Day; Wellness in the Workplace, an event highlighting the risks of chemical dependency in nurse anesthesia practice; and one additional state or national professional meeting.

Prerequisites: Active status in both the UMKC SONHS DNP-NA Track and TMC School of Nurse Anesthesia.

NURSE 5650NA1 Clinical Anesthesia I Credits: 0

The first of three clinical anesthesia practicums designed to provide the nurse anesthesia student simulated learning and complete hands on, supervised clinical practice on adult patients. The foci are skill development and safe anesthetic practice throughout the perioperative period. Students are assigned day experiences and call shifts at Truman Medical Center. Experiences progress in acuity and include, but are not limited to, general, gynecological, orthopedic, oral maxillary facial, urologic, dental, ophthalmic and endoscopic procedures. Core content includes formulation and management of perianesthesia plan of care, utilization of technology, application of EBP, technical skill development and advanced practice role competencies.

Prerequisites: NURSE 5650NA0, NURSE 5619NAB.

NURSE 5650NA2 Clinical Anesthesia II Credits: 0

The second of three clinical anesthesia practicums designed to provide the nurse anesthesia student simulated learning and complete hands on, supervised clinical practice on adult patients. The foci are skill development and safe anesthetic practice throughout the perioperative period. Students are assigned day experiences and call shifts at Truman Medical Center. Experiences progress in acuity and include, but are not limited to, general, gynecological, orthopedic, oral maxillary facial, urologic, dental, ophthalmic and endoscopic procedures. Core content includes formulation and management of perianesthesia plan of care, utilization of technology, application of EBP, technical skill development and advanced practice role competencies.

Prerequisites: NURSE 5650NA1.

NURSE 5650NA3 Clinical Anesthesia III Credits: 0

The third of three clinical anesthesia practicums designed to provide the nurse anesthesia student simulated learning and complete hands on, supervised clinical practice on adult patients. The foci are skill development and safe anesthetic practice throughout the perioperative period. Students are assigned day experiences and call shifts at Truman Medical Center. Experiences progress in acuity and include, but are not limited to, general, gynecological, orthopedic, oral maxillary facial, urologic, dental, ophthalmic and endoscopic procedures. Core content includes formulation and management of perianesthesia plan of care, utilization of technology, application of EBP, technical skill development and advanced practice role competencies.

Prerequisites: NURSE 5650NA2.

NURSE 5650NA4 Clinical Anesthesia IV Credits: 0

This course is the first of a three semester nurse anesthesia residency/practicum designed to provide concentrated, experiential, supervised, high acuity, perioperative experiences. The focus is on the synthesis and application of all previous courses. Students will be expected to apply advance clinical decision-making skills and evidence-based practice guidelines to the assessment, management and evaluation of complex procedures and patients across the lifespan. Students attend specialty rotations at up to 9 different sites. Core concepts include nurse anesthesia practice, technical skill development, integration of technology and evidence based practice to the patient and/or healthcare system, and ethical, legal and professional issues.

Prerequisites: NURSE 5619NA3 and NURSE 5650NA3.

NURSE 5650NA5 Clinical Anesthesia V Credits: 0

This course is the second of a three semester nurse anesthesia residency/practicum designed to provide concentrated, experiential, supervised, high acuity, perioperative experiences. The focus is on the synthesis and application of all previous courses. Students will be expected to apply advance clinical decision-making skills and evidence-based practice guidelines to the assessment, management and evaluation of complex procedures and patients across the lifespan. Students attend specialty rotations at up to 9 different sites. Core concepts include nurse anesthesia practice, technical skill development, integration of technology and evidence based practice to the patient and/or healthcare system, and ethical, legal and professional issues.

Prerequisites: NURSE 5650NA4.

NURSE 5650NA6 Clinical Anesthesia VI Credits: 0

This course is the third of a three semester nurse anesthesia residency/practicum designed to provide concentrated, experiential, supervised, high acuity, perioperative experiences. The focus is on the synthesis and application of all previous courses. Students will be expected to apply advance clinical decision-making skills and evidence-based practice guidelines to the assessment, management and evaluation of complex procedures and patients across the lifespan. Students attend specialty rotations at up to 9 different sites. Core concepts include nurse anesthesia practice, technical skill development, integration of technology and evidence based practice to the patient and/or healthcare system, and ethical, legal and professional issues.

Prerequisites: NURSE 5650NA5.

NURSE 5650NAO Clinical Anesthesia Orientation Credits: 0

Orientation to clinical practice during which students participate in hands on, supervised clinical practices and simulated clinical learning experiences. Students orient to the Hospital, OR, and Anesthesia department. Clinical education focus is on safe anesthetic practice and skill development throughout the entire perioperative period. Experiences include basic airway management, equipment procurement, anesthesia assessment process, induction and emergence from anesthesia. Clinical orientation experiences include multiple patient populations, ages and sub specialties within anesthesia practice.

Prerequisites: NURSE 5619NAO.

Co-requisites: NURSE 5619NAB.

NURSE 5659NA Health Systems, Economics and Quality in Nurse Anesthesia Practice Credits: 2

This course is designed to introduce the nurse anesthesia student to the fundamental principles of healthcare economics and healthcare systems. The effects of economics will be discussed from a broad viewpoint and from the various perspectives of anesthesia care delivery models. This course will also discuss the impact of quality indicators on anesthesia practice. The course will begin with a leadership summit and continue with online content and discussion forums.

Prerequisites: NURSE 5674NA1.

NURSE 5661NA1 Anesthesia & Co-Existing Diseases I Credits: 2

This course is the first in a two semester series designed to provide senior nurse anesthesia students with the knowledge of pathophysiology of various disease states and their anesthesia implications.

Prerequisites: NURSE 5619NA3.

NURSE 5661NA2 Anesthesia & Co-Existing Diseases II Credit: 1

This course is the second in a two semester series designed to provide senior nurse anesthesia students with the knowledge of pathophysiology of various disease states and their anesthesia implications.

Prerequisites: NURSE 5661NA1.

NURSE 5662 Psychometrics Credits: 3

This course focuses on application of psychometric theories and practices related to instrumentation in nursing research. The basic methodologies and techniques for constructing, testing, and evaluating instruments will be discussed and applied by students. Content will focus on theoretical foundations of measurement, item construction, instrument design, item analysis, validity and reliability assessment. Criteria for evaluating existing instruments will also be discussed.

Prerequisites: NURSE 5612; NURSE 5622; NURSE 5668.

NURSE 5666 Designing Nursing Research Credits: 3

This doctoral level course directs the student to develop research writing skills necessary for developing their dissertation and future program of research. Critical analyses of methodologies and design are accomplished. The strengths and weakness of various research designs (non-experimental, quasi-experimental, experimental and randomized clinical trial) are evaluated via in-depth discussions.

Prerequisites: NURSE 5610, NURSE 5612, NURSE 5622, NURSE 5662, NURSE 5668, NURSE 5670.

NURSE 5668 Quantitative Research Credits: 3

Quantitative research methods used to build nursing's body of knowledge are explored. Experimental, quasi-experimental, and correlational designs and clinical trials are analyzed. Emphasis is placed on design, data generation, analysis, and dissemination of findings. Issues pertaining to the use of quantitative methods will also be explored.

Prerequisites: NURSE 5610, PSYCH 5516.

NURSE 5670 Qualitative Research Methods Credits: 3

Qualitative research methods used to build nursing's body of knowledge are explored in this seminar course. Emphasis is placed on design, data generation and analysis, and dissemination of findings. Issues regarding qualitative research are identified and analyzed.

Prerequisites: Admission to the Nursing Ph.D. program.

NURSE 5671 Advanced Qualitative Research and Mixed Methods Credits: 3

This graduate level course is designed for students who have had an introduction to qualitative research methods and want to pursue more in-depth study of these methodologies, with emphasis on a chosen methodology that they hope to use in their own research. Appropriateness of methodological choice in relation to research question, application of theory, rhetorical style and author presence, and criteria for judging quality will be among the topics explored for various methodologies and data generation (collection) and data analysis skills will be practiced. The course will also acquaint students with the growing literature on mixed methods research.

Prerequisites: Admission to the Nursing Ph.D. program, an introductory qualitative research course.

NURSE 5674NA1 Scholarly Project in Nurse Anesthesia I Credits: 3

This is the first in a series of four courses that culminate in a scholarly project in nurse anesthesia that demonstrates the scholarship of integration and application. This is a distance education course. The student will identify a complex problem in their area of interest and expertise, design, implement, and evaluate an innovative solution to this problem. The student will use the breadth of knowledge and scholarship skills gained through their program of study to improve practice and/or patient outcomes. It validates the student's ability to translate research evidence into practice. This project lays the foundation for future scholarship.

Prerequisites: NURSE 5555.

NURSE 5674NA2 Scholarly Project in Nurse Anesthesia II Credits: 2

This is the second in a series of four courses that culminate in a scholarly project in nurse anesthesia that demonstrates the scholarship of integration and application. This is a distance education course. The student will identify a complex problem in their area of interest and expertise, design, implement, and evaluate an innovative solution to this problem. The student will use the breadth of knowledge and scholarship skills gained through their program of study to improve practice and/or patient outcomes. It validates the student's ability to translate research evidence into practice. This project lays the foundation for future scholarship.

Prerequisites: NURSE 5674NA1.

NURSE 5674NA3 Scholarly Project in Nurse Anesthesia III Credits: 2

This is the third in a series of four courses that culminate in a scholarly project in nurse anesthesia that demonstrates the scholarship of integration and application. This course is a face-to-face course. The student will identify a complex problem in their area of interest and expertise, design, implement, and evaluate an innovative solution to this problem. The student will use the breadth of knowledge and scholarship skills gained through their program of study to improve practice and/or patient outcomes. It validates the student's ability to translate research evidence into practice. This project lays the foundation for future scholarship.

Prerequisites: NURSE 5674NA2.

NURSE 5674NA4 Scholarly Project in Nurse Anesthetist IV Credits: 2

This is the fourth in a series of four courses that culminate in a scholarly project in nurse anesthesia that demonstrates the scholarship of integration and application. This course is a face-to-face course. The student will identify a complex problem in their area of interest and expertise, design, implement, and evaluate an innovative solution to this problem. The student will use the breadth of knowledge and scholarship skills gained through their program of study to improve practice and/or patient outcomes. It validates the student's ability to translate research evidence into practice. This project lays the foundation for future scholarship.

Prerequisites: NURSE 5674NA3.

NURSE 5696 Pre-Dissertation Credits: 1-2

This course is individually directed research leading to the preparation of a doctoral dissertation.

Prerequisites: Permission of the instructor.

Co-requisites: Completion of the comprehensive examination.

NURSE 5697A Special Topics Nursing Elective Credits: 1-6

This course consists of the guided study of special topics in areas of nursing theory and/or research.

Prerequisite: Admission into PhD in Nursing Program

NURSE 5697APP Special Topics Nursing Credits: 1-6**NURSE 5697AR Special Topics Nursing Credits: 1-6****NURSE 5697B Special Topics Nursing-Equivalent Credits: 1-6**

This course will cover guided study of course equivalent topics in areas of nursing theory and/or research.

Prerequisites: Admission into Ph.D. in Nursing program.

NURSE 5697CI Special Topics Nursing Credits: 1-6**NURSE 5697CP Special Topics Nursing Credits: 1-6****NURSE 5697CR Special Topics Credits: 1-6**

This course will cover guided study of course equivalent topics in areas of nursing theory and/or research.

Prerequisites: Admission into Ph.D. in Nursing program.

NURSE 5697DP Special Topics Nursing Credits: 1-6

NURSE 5697HER Special Topics in Nursing Credits: 1-6

NURSE 5697RD Special Topics Nursing Credits: 1-6

NURSE 5699 Dissertation Research Credits: 1-12

Individual directed research leading to preparation and completion of doctoral dissertation.

NURSE 5899 Required Graduate Enrollment Credit: 1

Oboe (OBOE)

Courses

OBOE 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

OBOE 5500A Graduate Oboe-Secondary Credits: 2

OBOE 5500B Special Applied Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

OBOE 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

OBOE 5501 Graduate Oboe-Master Performance Credits: 4

OBOE 5601 Graduate Oboe - Doctoral Performance Credits: 4

Oral & Craniofacial Sciences (OR-BIO)

Courses

OR-BIO 5699 Dissertation Research Credits: 1-12

Ph.D. dissertation research.

OR-BIO 5702 Biomechanics of Mineralized Tissue Credits: 3

The physical principles underlying mineralized tissue biomechanics will be presented at multiple hierarchies. Details of bone, tooth and joint (with a special emphasis on the TMJ) anatomy and function will be outlined as related to mechanical loading.

Organ (ORGAN)

Orthodontics (ORTHOD)

Courses

ORTHOD 5704 Orthodontics And Dentofacial Orthopedics I Credits: 1-6

Orthodontic theory, treatment techniques and treatment of patients; includes current and historical concepts.

ORTHOD 5705 Orthodontic and Dentofacial Orthopedics II Credits: 1-6

Clinical orthodontics with relevant didactics and seminars. Orthodontic theory, treatment techniques and treatment of patients; includes current and historical concepts.

Prerequisites: ORTHOD 5704.

ORTHOD 5706 Orthodontics and Dentofacial Orthopedics III Credits: 1-6

Clinical orthodontics with relevant didactics and seminars. Orthodontic theory, treatment techniques and treatment of patients; includes current and historical concepts.

Prerequisites: ORTHOD 5705.

ORTHOD 5707 Orthodontics and Dentofacial Orthopedics IV Credits: 1-6

Clinical orthodontics with relevant didactics and seminars. Orthodontic theory, treatment techniques and treatment of patients; includes current and historical concepts.

Prerequisites: ORTHOD 5706.

ORTHOD 5708 Orthodontic and Dentofacial Orthopedics V Credits: 1-6

Clinical orthodontics with relevant didactics and seminars. Orthodontic theory, treatment techniques and treatment of patients; includes current and historical concepts.

Prerequisites: ORTHOD 5707.

ORTHOD 5709 Orthodontic and Dentofacial Orthopedics VI Credits: 1-6

Clinical orthodontics with relevant didactics and seminars. Orthodontic theory, treatment techniques and treatment of patients; includes current and historical concepts.

Prerequisites: ORTHOD 5708.

ORTHOD 5710 Orthodontic and Dentofacial Orthopedics VII Credits: 1-6

Clinical orthodontics with relevant didactics and seminars. Orthodontic theory, treatment techniques and treatment of patients; includes current and historical concepts.

Prerequisites: ORTHOD 5709.

ORTHOD 5711 Orthodontics and Dentofacial Orthopedics VIII Credits: 1-6

Clinical orthodontics with relevant didactics and seminars. Orthodontic theory, treatment techniques and treatment of patients; includes current and historical concepts.

Prerequisites: ORTHOD 5710.

ORTHOD 5726 Cephalometric I Credits: 2

An introductory lecture and laboratory course in the principles of radiographic cephalometry and integrated cephalometric analysis.

ORTHOD 5727 Cephalometric II Credits: 2

An advanced lecture and laboratory course with emphasis on the use of a computer in cephalometric analysis.

Percussion (PERCSN)

Courses

PERCSN 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

PERCSN 5500A Graduate Percussion-Secondary Credits: 2**PERCSN 5500B Special Applied Studies Credits: 2**

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

PERCSN 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

PERCSN 5500JA Graduate Applied Jazz Studies Credits: 2

One-hour lesson weekly. Jury examination is required.

Prerequisites: Graduate standing.

PERCSN 5500JB Special Applied Jazz Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. A jury for comments only may be held at the discretion of the faculty.

Prerequisites: Graduate standing.

PERCSN 5500JC Applied Jazz Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied jazz study in an area other than, and in addition to, their primary performance study.

Prerequisites: Graduate standing.

PERCSN 5501 Graduate Percussion - Masters Performance Credits: 4

PERCSN 5601 Graduate Percussion - Doctoral Performance Credits: 4

Periodontics (PERIO)

Courses

PERIO 5701 Periodontal Residency I Credits: 1-6

Clinical Periodontics with Related Didactics and Seminar. This first year course introduces the incoming advanced education student to the principles and techniques in the field of advanced periodontics.

PERIO 5702 Periodontal Residency II Credits: 1-6

Clinical Periodontics with Related Didactic and Seminar. This first year course continues the instruction of the advanced education student to the principles and techniques in the field of advanced periodontics.

Prerequisites: PERIO 5701.

PERIO 5703 Periodontal Residency III Credits: 1-6

Clinical periodontics, with related didactics and seminar. This first year course continues the instruction of the advanced education student to the principles and techniques in the field of advanced periodontics, and builds upon the material taught in previous courses as well as introduces new information.

PERIO 5704 Periodontal Residency IV Credits: 1-6

Clinical periodontics with related didactics and seminar. This second year course is designed to transition the first year student into a second year advanced education student and builds upon the material taught in previous courses as well as introducing new information.

Prerequisites: PERIO 5701, PERIO 5702, PERIO 5703.

PERIO 5705 Periodontal Residency V Credits: 1-6

Clinical Periodontics with Related Didactics and Seminar. This second year course continues the instruction of the advanced education student to the principles and techniques in the field of advanced periodontics, and builds upon the material taught in previous courses as well as introducing new information.

Prerequisites: PERIO 5704.

PERIO 5706 Periodontal Residency VI Credits: 1-6

Clinical Periodontics with Related Didactics and Seminar. This second year course is designed to build upon the In-depth knowledge base of the advanced education student, as well as introducing new information, transitioning the student into a more proficient student in advanced periodontics.

Prerequisites: PERIO 5705.

PERIO 5707 Periodontal Residency VII Credits: 1-6

Clinical Periodontics with Related Didactics and Seminar. This third year course serves to transition the student into a clinician who by repeated action exhibits in depth levels of knowledge and skill. It builds upon material previously taught.

Prerequisites: PERIO 5706.

PERIO 5708 Periodontal Residency VIII Credits: 1-6

Clinical Periodontics with Related Didactics and Seminar. This third year course builds upon information previously taught and completes the transition of the student into a proficient specialist in Periodontology.

Prerequisites: PERIO 5707.

PERIO 5709 Periodontal Residency IX Credits: 1-6

Clinical Periodontics with Related Didactics and Seminar. This third year course is designed to build upon the in-depth information and knowledge base previously taught and completes the transition of the student into a proficient specialist in periodontology.

Prerequisites: PERIO 5708.

PERIO 5719 Implantology Credits: 2

This 2 credit hour seminar is designed for a student in the Advanced Education Program in Periodontology to develop in-depth knowledge of the concepts and theories of implant dentistry as they relate to periodontist. It will provide basic and advanced information and guidance which will serve to complement course work in PERIO 5702 through PERIO 5709, and the clinical implant dentistry experience offered in the program, at a minimum to a level of competency.

PERIO 5720 General Anesthesia Credit: 1

A rotation to the Department of Anesthesiology of K.C. Veterans Administration Medical Center. Students become familiar with operating room procedures, medical emergencies, venipuncture, airway maintenance and pharmacophysiology of sedative, analgesic and anesthetic agents as well as drug interactions.

PERIO 5799 Research And Thesis Credits: 1-6

PERIO 5899 Required Graduate Enrollment Credit: 1

Pharmacy (PHARM)

Courses

PHARM 5507 Basic Pharmacology Credits: 3

Basic pharmacological concepts and important classes of pharmacologic agents.

Prerequisites: BIOLOGY 218, LS-PHYS 217.

PHARM 5508 Medicinal Chemistry of Drug Classes Credits: 3

This course will focus on major drug classes, both natural and synthetic, with emphasis on their chemical properties, their mode of action, their structure-activity relationships, and their metabolic fate. Structure-activity relationships and the influence of organic functional groups on physicochemical properties of drugs and their pharmacological activities will be emphasized. Drug metabolism will also be covered, with a focus on organic functional group transformations.

PHARM 5509 Toxicology Credits: 3

Principles of general toxicology and toxicology of industrial and household chemicals, agricultural agents, social poisons, and selected therapeutic agents.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 5519 Pharmacology I Credits: 2

Basic pharmacological principles of drug absorption, distribution, metabolism and elimination; concept of drug-receptor interactions; dose-response relationships and mechanism of action; and signaling mechanisms.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 5520 Pharmacology II Credits: 4

Principles of and advances in chemotherapy, biology, mechanism of action; clinical applications and adverse effects of various drug groups.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 5521 Advanced Organic Medicinal Chemistry Credits: 3

The focus of this course is an examination of the physical-chemical basis of drug action, particularly focusing on the formation of drug-target complexes. This includes the mathematical description of this binding, as well as an advanced description of the physical forces responsible for binding. In addition we will examine the energetic and entropic factors that contribute to complex stability, examining real world examples when possible.

PHARM 5527 Analytical Methods Credits: 3

A detailed study of the methods used to detect, identify, and quantitate drugs, small molecules, enzymes, proteins, and biological molecules. The statistical foundation, core concepts, and practical implementation of analytical methods are areas of emphasis. State-of-the-art instrumentation and recent technological developments are also presented, including biotechnology based methods such as proteomics methods and quantitative PCR.

PHARM 5530 Pharmacology III Credits: 4

Mechanism of action; therapeutic uses; and adverse effects of drugs affecting different organ systems.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 5531 Physical Pharmacy Equilibria Credits: 3

Advanced principles of aqueous solutions, acid-base equilibria, solubility and complexation. Mathematical solutions and state-of-the-art research applications.

Prerequisites: B.S. in pharmacy.

PHARM 5533 Advanced Pharmacokinetics and Biopharmaceutics Credits: 3

This course involves the study of the rates at which drug absorption, distribution, metabolism, and excretion occur in the body following medication administration. The student will be expected to kinetically model a given physiological process associated with the disposition of a drug in any tissue, write a series of equations, and then solve those equations to produce a final set of equations that can be used to predict the concentrations of drug in the biological matrix of interest. Knowledge of derivation of equations is expected, along with real-world application of resulting equations.

Prerequisites: PHARM 7303 and MATH 345 (both with a grade of B or better).

PHARM 5550 Stability of Pharmaceuticals Credits: 3

The course provides instruction in the processes responsible for instability of pharmaceuticals. Course content includes, but is not limited to, instability due to light, oxygen, and metal ions; the effect of temperature on the rate of drug decomposition; the effect of dielectric constant and ionic strength on degradation; and physical and chemical instability of newer polypeptide drugs. In addition, practical strategies to prevent instability of the active compound and excipients used in pharmaceutical formulations is provided.

Prerequisites: MATH 210, PHARM 7202, PHARM 7203.

PHARM 5555 Religion, Culture and Health Credits: 3

This course addresses the impact of religious beliefs on the culture practices of contemporary society, and aims at examining the relationship between these beliefs, modern sciences and health.

PHARM 5560 Discussions in Pharmacology Credit: 1

Discussions in Pharmacology (also called Pharmacology Journal Club), is a graduate course. It is designed to provide graduate student the opportunity to read, interpret and present literature to fellow peers, post-docs and faculty. The Journal Club presentations promote active and lively discussion and exchange of ideas. The class is a mandatory requirement for all graduate students in the Division of Pharmacology Toxicology.

Prerequisites: B.S. (or equivalent) in biology, chemistry, pharmacy or related biomedical sciences.

PHARM 5580A Seminar in Pharmaceutical Sciences Credit: 1

Enrollment and participation required of all graduate students in the School of Pharmacy during each semester of graduate study.

PHARM 5580C Seminar in Pharmacology/Toxicology Credit: 1

Enrollment and participation required of all graduate students in the School of Pharmacy during each semester of graduate study.

PHARM 5588 Biotechnology Credits: 3

In this graduate course, the principle theories, techniques and strategies to conduct experiments using common biotechnology/molecular biology techniques will be discussed. The course material has been designed to provide up to date information on techniques in biotechnology. Knowledge on these basic biotechnology/molecular biology techniques will be useful in diverse fields like biochemistry and pharmaceutical sciences to work with nucleic acid and proteins (or equivalent) in biology, chemistry, pharmacy or related discipline.

PHARM 5590A Special Topics Pharmacy Credits: 1-3**PHARM 5599A Research And Thesis Pharmacy Credits: 1-9****PHARM 5599C Research And Thesis Pharmacology Credits: 1-9****PHARM 5605 Fundamentals of Pharmaceutical Sciences Credits: 3**

This is an entry-level graduate course for all incoming graduate students who select Pharmaceutical Sciences either as the primary discipline or co-discipline. The course will teach the fundamentals of the Pharmaceutical Science discipline. The fundamentals include drug discovery, drug absorption and metabolism, formulation development, physical pharmacy, pharmaceuticals, drug delivery, molecular biology, cell biology, medicinal chemistry, and pharmacokinetics.

PHARM 5615 Methods In Pharmacology And Toxicology Credits: 3

Exposure to some of the techniques employed in research in pharmacology and toxicology. There are eight one-hour introductory lectures for the course, followed by six hours of laboratory per week.

PHARM 5630 Cytochrome P450: Drug Metabolism, Bioavailability, Interactions and Toxicity Credits: 3

This course is designed to provide students up-to-date scientific facts on drug metabolism, bioavailability interactions, and toxicity (DMBIT) in perspective of cytochrome P450 (CYP) and the factors that affect DMBIT. The course will also include prospects of CYP applications for various purposes in reference to drug metabolism. The course will include lectures, lab experience, and student seminar/report.

Prerequisites: B.S. (or equivalent) in chemistry, biology, pharmacy, or related subject.

PHARM 5631 Pharmaceutical Formulations I Credits: 3

Advanced theory and practice of Pharmaceutical formulations, including classical and current research. This course will introduce the principles of biomaterial based drug delivery systems and unify knowledge from the fields of biology, materials science, and pharmaceuticals.

Prerequisites: B.S. in Pharmacy.

PHARM 5632 Novel Drug Delivery Systems Credits: 3

The course offers up-to-date information about drug transport mechanisms and drug absorption processes across various absorptive membranes ie., buccal, nasal, dermal, corneal, pulmonary, and oral mucosae. The course material has been designed to provide current ideas and thinking about gene delivery, drug targeting to tumor cells and lipid and carrier mediated drug delivery. It provides unique information about cell culture models as a predictor of drug delivery as well as physical chemistry of surfaces in various microparticulates and lipid emulsion systems.

PHARM 5633 Receptor Pharmacology and Signal Transduction Credits: 3

Molecular characterization of drug receptors involving quantitative description of functional studies with agonists and antagonists and binding of ligands to receptors; the molecular structure of receptors and the signaling systems that couple receptors to their pharmacologic functions.

Prerequisites: LS-BIOC 370, PHARM 5519, PHARM 5520, PHARM 5530.

PHARM 5634 Protein and Nucleic Acid Drug Delivery Credits: 3

In the graduate course, the principle theories, techniques and strategies in developing protein and nucleic acid drugs will be discussed. The course material has been designed to provide up to date information in protein and nuclear acid drug delivery. It offers unique information on how to combine knowledge of chemistry, molecular biology and pharmaceutical sciences to achieve successful therapeutic application of protein and nucleic acid.

Prerequisites: B.S. in bioengineering, biology, chemistry, pharmacology, or pharmacy.

PHARM 5640 Biochemical and Molecular Toxicology Credits: 3

This course will provide students with a comprehensive mechanistic understanding of various molecular events that lead to and/or are associated with chemically/environmentally induced degenerative or proliferative diseases. The course will include lectures student presentations of recent advances in biochemical and molecular toxicology and student report on a topic of interest as it pertains to the subject being taught. The title of the report has to be approved by the course coordinator.

Prerequisites: B.S. (or equivalent) in biochemistry, biology, chemistry, or molecular biology.

PHARM 5645 Cancer Biotechnology I Credits: 3

This course is designed to provide a basic understanding of tumor progression, molecular events and signaling mechanisms underlying tumor formation. Epidemiological approaches, etiology, and current methods of detection and diagnosis of cancer will be discussed. Current pharmacological management strategies of cancer and future therapeutic interventions will also be reviewed.

Prerequisites: BIOLOGY 202 (or equivalent).

PHARM 5690BB Special Topics Toxicology Credits: 1-3**PHARM 5690C Special Topics Pharmacology Credits: 1-3****PHARM 5690PCII Special Topics Pharmacy Credits: 1-3**
Special Topics Pharmacy**PHARM 5699 Research and Dissertation Credits: 1-16**

Available for Doctorate program with the following emphasis areas: (A) Pharmacy, (B) Pharmaceutical Chemistry, (C) Pharmacology, (AA) Pharmacy Administration, and (BB) Toxicology.

PHARM 5699A Research And Dissertation - Pharmacy Credits: 1-16**PHARM 5699B Research And Dissertation Pharmaceutical Chemistry Credits: 1-16****PHARM 5699BB Research And Dissertation Toxicology Credits: 1-16****PHARM 5699C Research And Dissertation Pharmacology Credits: 1-16****PHARM 5899 Required Graduate Enrollment Credit: 1****PHARM 7100A Introductory Topics in Pharmacy I Credit: 1**

These courses include presentations and discussions on the profession of pharmacy including: the roles and responsibilities of the pharmacist, educational requirements to obtain the degree, career opportunities, student life, legal and ethical issues, and study skills development.

PHARM 7101 Introduction to the Professional Degree Program and Pharmacy Practice Credits: 2

This course introduces students to the profession of pharmacy by communicating drug names, defining drug-related problems and discussing professional responsibilities and roles of a pharmacist. Students will examine and reflect on personal knowledge, skills, abilities, beliefs, biases, motivation, and emotions that could enhance or limit personal and professional growth following completion of various self-assessments. This course also assists students to assume responsibility for their own learning. One 2-hour class session is held per week.

Prerequisites: Admission to the Pharm.D. Program.

PHARM 7110 Professional Skills II: Pharmacy Calculations Credits: 2

This course provides instruction in performing and applying the necessary calculations involved in pharmacy practice and the dispensing, manufacturing and preparation of dosage forms. Topics covered include but are not limited to: fundamentals of pharmaceutical calculations, exponents, ratios, percentages, proportions and fractions); International System of Units; pharmaceutical measurements; interpretations of medication orders and prescriptions; density, specific gravity and specific volume; patient specific parameters involved in dosing (surface area, weight and age); isotonicity and buffer solutions; milliequivalents, millimoles and milliosmoles; dilution, concentration and allegation; and reduction/enlargement of formulas. Students must have an understanding of mathematical principles to include algebra and calculus.

Prerequisites: MATH 210.

PHARM 7151 Introduction to Pharmacy Law Credit: 1

This course will examine the federal laws that pertain to the practice of pharmacy.

PHARM 7199 Pharmacy Grand Rounds Credits: 0.25

The School of Pharmacy offers Grand Rounds seminars for the student body regarding timely and important topics and issues facing the profession of the School.

PHARM 7202 Pharmaceutics I Credits: 3

Overall, in this course, the principles of chemistry, physics and mathematics are applied to the pharmaceutical sciences. Elements of mathematics, states of matter, acid-base chemistry, solubility, partitioning, isotonicity, interfacial phenomena, rheology, reaction kinetics, incompatibilities, and stabilization of pharmaceutical formulations and dispersed systems will be considered.

Prerequisites: MATH 210, PHYSICS 210, CHEM 322R, PHARM 7110.

PHARM 7203 Pharmaceutics II Credits: 3

Discussion of pharmaceutical processes, equipment and material used in drug delivery systems and the preparation and evaluation of various drug delivery systems and formulations.

Prerequisites: PHARM 7202.

PHARM 7203L Pharmaceutics II Lab Credit: 1

In this lab course, students will perform hands-on pharmaceutical processes, use manufacturing equipment, and prepare formulations in which selected dosage forms are manufactured and evaluated. This is a professional elective option for Pharm.D. students.

Prerequisites: PHARM 7202.

Co-requisites: PHARM 7203.

PHARM 7223 Rural Health and Agricultural Medicine Credits: 2

Intended to introduce inter-professional health professions students to agricultural health and rural medicine in order to prepare them to serve rural populations. Provided in collaboration with the Great Plains Center for Agricultural Health Safety, this course will provide a solid foundation in prevention strategies for safety and health in production agriculture. Students will recognize relevant demographic, socioeconomic and social determinants of health. Participants will be equipped with resources and tools that can support them in their future service to rural communities and emphasize the importance of interdisciplinary collaboration among health professions in order to reduce risks and optimize health.

Prerequisites: Students must be enrolled in health professions coursework.

PHARM 7224 Introduction to Cannabis Medicine Credit: 1

The course will serve as an introduction to the endogenous cannabinoid system and explore the clinical potential and the clinical, social, and legal problems associated with medicinal use of cannabis and cannabinoid medicines.

PHARM 7231 Drug Development and Pharmaceutical Career Opportunities Credits: 2

An introduction to the drug development industry and the process by which a new drug is brought to market. Students will use knowledge gained in previous coursework to deepen their understanding of how the biopharma and pharmaceutical industry functions. There will be an overview of discovery, preclinical, clinical, regulatory, drug safety, marketing, and medical affairs functions within the pharmaceutical industry. Opportunities that exist for Doctor of Pharmacy graduates to develop careers in these areas will also be discussed.

Prerequisites: PHARM 7101 or PHARM 7489.

PHARM 7233 U.S. Health Care System and Marketing Credits: 3

U.S. Health Care System and Marketing is a required course for the Doctor of Pharmacy degree program at The University of Missouri -Kansas City School of Pharmacy. It consists of two modules: U.S. Health Care System and Medication Safety (Module I) , and Health Care Marketing (Module 2). The learning objectives of the course are to (1) characterize components of the U.S. health care system at the macro level, including public health programs; (2) discuss medication errors and management within the U.S. health care system; (3) manage patients' health care needs using technological resources to optimize safety and efficacy of medication use systems; and (4) analyze the marketing process for health care projects and services, including business ethics in marketing activities. This course provides the context and builds the knowledge base for future required courses in economic, social, and administrative sciences.

PHARM 7244 Introduction to Drugs of Abuse Credits: 2

As a health professional in training, it is important to know the mental and behavioral effects of abusing both prescription and illicit substances. This knowledge will help the health professional to be more understanding of their patients who may be suffering with a substance abuse problem. Introduction to Drugs of Abuse will focus on both the physical and psychological effects of substances such as hallucinogens, amphetamines, alcohol, and nicotine among others. The course will also be discussing important topics such as behavioral modification, the controversies of treatment, and the role of the pharmacist in the treatment of substance abuse. A substantial focus will also be placed on patient experiences and the psycho-social aspects of substance abuse.

Prerequisites: BIOLOGY 218, BIOLOGY 218L.

Co-requisites: LS-PHYS 399, LS-PHYS 400.

PHARM 7245 Top Drugs I Credit: 1

This 1.0 hour course is designed as an introduction to up to 300 of the most commonly prescribed medications. This course will provide students with the opportunity to learn basic drug knowledge including brand (trade) and generic names, narcotic class, therapeutic class, common dosage forms, and FDA approved indications, dosing, pharmacology/pharmacokinetics, drug interactions, contraindications/precautions, and adverse effects.

Prerequisites: Successful completion of the P1 year in the Pharm.D. Program

PHARM 7266 Medical & Medication Error Evaluation & Management Credit: 1

A course designed to discuss the current body of evidence with respect to medical quality, medication errors, and strategies used to improve quality minimize error rates. At the completion of the course, the student should be able to (1) review and synthesize evidence within the literature; (2) describe the policy framework designed to improve health care quality; (3) describe characteristics and factors that enable encourage providers to improve the quality of care; (4) describe common causes of medication errors; (5) differentiate strategies to prevent errors; (6) correlate medication errors and specific disease states.

PHARM 7275 The Pharmacists' Role in Global Health Credits: 2

This course is designed to introduce students to the global context of public health. "Global Health" is defined as the application of principles of public health to health issues and challenges that transcend geopolitical boundaries, and to the complex array of global and local forces that affect these health issues.

PHARM 7277 Zoonotic Illnesses Credit: 1

A zoonotic illness is a disease that can be transmitted from animals to humans – over 60% of all human infections are zoonotic. The purpose of this course is to increase student knowledge relative to infectious diseases caused by zoonotic transmission/pathogens. Topic discussion will include background evolution of the disease, diagnostic considerations, management, monitoring and reporting of the infectious diseases to the local health department. This course will serve to reinforce the principles of infectious diseases pharmacotherapy and further expose students to diseases encountered in rural Missouri (i.e. tick bites, farm animals). Classes are didactic in nature.

Prerequisites: Microbiology course from any accredited college or university.

PHARM 7289 Introduction to Complementary and Alternative Medicine Credit: 1

An elective course designed to introduce a variety of the most common complementary and alternative medicine (CAM) modalities. Each modality will be defined and explained and any clinical evidence for or against will be discussed. An important emphasis will be on how patient use of these therapies may affect their needs for medication therapy management and counseling. For example, patients who see a naturopathic physician may be more likely to use herbal therapies that may interact with their prescription medications.

Prerequisites: Good standing in the P2 Doctor of Pharmacy year; P1 students may enroll with instructor approval.

PHARM 7303 Pharmacokinetics and Biopharmaceutics Credits: 3

This course involves the study of the rates at which drug absorption, distribution, metabolism, and excretion occur in the body following medication administration. The student will be taught to calculate pharmacokinetic parameters, and then utilize those values to optimize pharmacotherapy in his/her patient. So as to promote inter-professional healthcare dialogue, this course will demonstrate how to make informed recommendations associated with both drug administration and monitoring to medical and nursing healthcare providers. Recommendations include, but are not limited to, suggesting changes in the dose, dosing frequency, infusion rate, steady-state plasma drug concentrations, 'peak' and 'trough' plasma drug concentrations, drug/drug interactions, drug/food interactions, and dosing adjustment in the context of diminished kidney or liver function.

PHARM 7307 Advanced Pathophysiology Credits: 4

Advanced pathophysiology I is the study of the alterations of normal physiological functioning in cellular, tissue, organ, and organ systems. These alterations form the basis for understanding a variety of pathophysiological conditions and the manifestations and impact of abnormal physiological functioning on patients across the life span. Advanced pathophysiology I deals with both generalized disease processes and major organ system dysfunction. Students will have the opportunity to identify clinical signs and symptoms for various disease states and associate those symptoms with pathophysiological changes. The focus of this course is not on the pharmacologic management of disease, though medication management categories may be briefly introduced as it relates to mechanism of action and the physiologic abnormality contributing to the disease state.

Prerequisites: LS-BIOC 370, LS-PHYS 400.

Co-requisites: PHARM 7362, PHARM 7245.

PHARM 7308 Advanced Pathophysiology II Credits: 3

Advanced pathophysiology II is the study of the alterations of normal physiological functioning in cellular, tissue, organ, and organ systems. These alterations form the basis for understanding a variety of pathophysiological conditions and the manifestations and impact of abnormal physiological functioning on patients across the life span. Advanced pathophysiology II deals with both generalized disease processes and major organ system dysfunction. Students will have the opportunity to identify clinical signs and symptoms for various disease states and associate those symptoms with pathophysiological changes.

Prerequisites: LS-BIOC 370, LS-PHYS 400, PHARM 7307.

Co-requisites: PHARM 7363, PHARM 7345.

PHARM 7310 Academic Service Learning I Credit: 1

Academic Service Learning is a professional elective course where students are assigned to either an area clinic in Kansas City or the MedZou program in Columbia. A minimum of 30 contact hours must be completed during the assigned semester. Health education will be the primary focus.

PHARM 7311 Pharmacy in the 21st Century Technology Credits: 2

This course allows students to develop the skills to evaluate and use Health Care Information Technology (HCIT) in contemporary pharmacy practice. The elective course is offered in the winter semester only.

Prerequisites: Third year status or higher in the Pharm. D. program.

PHARM 7313 Career Planning Credit: 1

This course enables students to engage in the study of career opportunities in the areas of industry, hospital/clinic practice, retail and managed care settings. Pharmacy opportunities are explored through lecture and discussion, guest speakers in the various areas and student exploration with business contacts and research. Topics include understanding career opportunities, achieving one's professional goals, compensation packages and negotiations, and designing a path to accomplish career objectives.

PHARM 7316 Introduction to Pharmaceutical Policy Analysis Credits: 2

This course addresses multiple key influential pharmaceutical policy areas shaping pharmacy practice, and will teach critical thinking skills required to measure both federal and state level policy impact in patient safety and access to medications.

Prerequisites: PHARM 7151, PHARM 7325.

PHARM 7317 Drug Induced Diseases Credits: 2

Drug-induced disease is an unintended effect if a drug that results in mortality or morbidity with symptoms sufficient to prompt a patient to seek medical attention and/or require hospitalization. This course will aid students in the identification, management, and prevention of drug-induced diseases.

Prerequisites: PHARM 5519, PHARM 7307.

PHARM 7318 Introduction to Critical Care Medicine Credits: 2

Critical Care is a multidisciplinary healthcare specialty that cares for patients with acute, life-threatening illness or injury. The management of these patients requires advanced knowledge in various disease states, pathophysiological changes as a result of the illness or injury, as well as the pharmacologic agents used in their treatment. The course will serve as an introduction to Critical Care medicine and will allow students to gain exposure to all that encompasses caring for the critically ill. It will not only focus on specific disease states, but also delve into the negative outcomes associated with such illnesses and provide an introduction to both medical and pharmacologic management of them. The course is not meant to provide students with a comprehensive review but rather provide a glimpse into the specialty of Critical Care Medicine.

Prerequisites: Successful completion of all pharmacy didactic and experiential courses through semester four.

PHARM 7324 Medication Management in Transitions of Care Credit: 1

Transitions of care is an important aspect of patient care in all pharmacy practice settings. The pharmacist plays a crucial role in medication management during the transitions of care process. The purpose of this course is to increase student knowledge and skills relative to the pharmacist's role in transitions of care. Students will learn strategies to effectively develop and implement pharmacy-led transitions of care services in various healthcare settings.

Prerequisites: PHARM 7414. PHARM 7414L.

PHARM 7325 Patient Assessment and Professional Communication Credits: 2

In this course, students will continue developing necessary skills to provide patient-centered care. Students will be introduced to health informatics and an electronic medical record. Students will be taught the four components of a SOAP note, a method of documentation used by healthcare providers. Students will learn how to physically assess patients and document findings in SOAP format in a patient's record. Students will also learn how to effectively communicate with other healthcare professionals and document the interactions.

Prerequisites: PHARM 7101, PHARM 7414.

Co-requisites: PHARM 7325L.

PHARM 7325L Applied Skills Lab: Patient Assessment and Professional Communication Credits: 0.5

This applied skills lab is associated with the Patient Assessment and Professional Communication course. Learning activities are designed to complement didactic instruction while allowing students to apply knowledge in a simulated environment. Students are expected to perform physical assessments on each other while under supervision and document patient information accurately and periodically within the electronic medical record system. Student achievement of core abilities will be assessed through an Objective Structured Clinical Examination. One 2-hour lab session is held every other week or weekly but no more than 10 sessions per semester.

Prerequisites: PHARM 7101, PHARM 7414.

Co-requisites: PHARM 7325.

PHARM 7326 Evidence Based Medicine Credits: 4

Pharmacists, if they are to assume the role of "medication expert," must learn how to evaluate the reliability of information relevant to healthcare options and choices. A pharmacist then can develop a clinical recommendation with justifications based on this evidence. Students will be taught a rigorous 5-Step systematic methodology assisting them with integrating this process into multidisciplinary healthcare decision-making for improved patient care.

Prerequisites: PHARM 7325, PHARM 7405.

Co-requisites: PHARM 7420.

PHARM 7331 Aseptic Technique & Compounded Sterile Preparations Credit: 1

In 7331, students will gain knowledge necessary to prepare sterile compounds including review of environmental requirements, proper aseptic technique, and dose calculations as well as legal and regulatory issues.

Prerequisites: Successful completion of all prior professional Pharm.D. program coursework through semester three and OSHA Bloodborne Pathogen Safety Training.

Co-requisites: PHARM 7331L.

PHARM 7331L Applied Skills Lab: Aseptic Technique & Compounded Sterile Preparations Credits: 0.5

The learning activities in 7331L are designed to complement didactic instruction and allow students to apply knowledge in a simulated environment. In 7331L, students will also demonstrate proper aseptic technique skills to compound and label, sterile preparations for safe and effective use.

Prerequisites: Successful completion of prior professional program coursework and OSHA Bloodborne Pathogen Safety Training.

Co-requisites: PHARM 7331.

PHARM 7334 Pharmacy Based Immunization Delivery Credit: 1

Pharmacy-based Immunization Delivery is an interactive training program that teaches student pharmacists the skills necessary to become a primary source for vaccine information and administration. The program teaches the basics of immunology and focuses on practice implementation, administration technique and legal/regulatory issues.

Prerequisites: PHARM 7307, PHARM 7361.

PHARM 7339 Business Plan and Entrepreneurship in Community Pharmacy Credits: 2

Business Plan and Entrepreneurship in Community Pharmacy course is designed to provide an opportunity for students enrolled in the School of Pharmacy to further explore business plan development and entrepreneurship in the community pharmacy setting. Upon course completion, the student will be able to understand and complete the necessary components of a full business plan and proposal that involves innovation and creativity in pharmacy practice. Students are expected to participate in a team approach to delegate all aspects of the business plan, as well as participate in classroom activities and discussions of innovative practice.

Prerequisites: PHARM 7101, PHARM 7151, PHARM 7233, PHARM 7414, PHARM 7414L, PHARM 7465.

PHARM 7341 Medicinal Chemistry I Credits: 3

This course is the study of medicinally active substances, both natural and synthetic, which describes their chemical properties, their mode of action, their structure-activity relationships and their metabolic rate. Starting with their origin, it is shown how drugs in a series are developed by chemical modification, quantitative structure activity relationships and receptor theory. The chemical properties of a drug are described and explained. The mode of action of the drug is explained on a biochemical basis whenever possible. Once a drug has had its medicinal effect, it is excreted or metabolized. Reasons for excretion or metabolism are explained.

Prerequisites: CHEM 322R.

PHARM 7344 Medicinal Chemistry II Credits: 3

This course is a continuation of PHARM 7341. This course will focus on major drug classes, both natural and synthetic, including their chemical properties, their mode of action, their structure-activity relationships and their metabolic fate. Structure-activity relationships and the influence of organic functional groups on physicochemical properties of drugs and their pharmacological activities will be emphasized. Drug metabolism will also be covered, with a focus on organic functional group transformations.

Prerequisites: PHARM 7341.

PHARM 7345 Top Drugs II Credit: 1

This 1.0 hour course is designed as an introduction to up to 300 of the most commonly prescribed medications. This course will provide students with the opportunity to learn basic drug knowledge including brand (trade) and generic names, narcotic class, therapeutic class, common dosage forms, and FDA approved indications, dosing, pharmacology/pharmacokinetics, drug interactions, contraindications/precautions, and adverse effects.

PHARM 7353 Investigative Toxicology Credits: 2

The science of investigative toxicology is an emerging science that plays a central role in forensic toxicology and pathology regarding conditions of and for exposure of many different kinds of environmental, biological, chemical, or physical agents. Investigative toxicology may include criminal or civil legal matters. The duties of an investigative toxicologist include the qualitative and quantitative analysis of drugs or poisons in biological systems and other physical evidence collected at the scene of the investigation. This also includes the interpretation of the exposure scene evidence and findings in regard to the physiologic and behavioral effect of those exposed to the detected/suspected chemical(s) at time of exposure. The complete investigation of the cause or causes of sudden or chronic chemical exposure and its potential aftermath is an important civic responsibility. The use of toxicologic information in investigation assessment requires careful field and laboratory analysis, evaluation of data.

PHARM 7361 Pharmacology I Credits: 2

Basic pharmacological principles of drug absorption, distribution, metabolism and elimination; concept of drug-receptor interactions; dose-response relationships and mechanism of action; and signaling mechanisms.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 7362 Pharmacology II Credits: 4

Principles of and advances in chemotherapy, biology, mechanism of action; clinical applications and adverse effects of various drug groups.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 7363 Pharmacology III Credits: 4

Mechanism of action; therapeutic uses; and adverse effects of drugs affecting different organ systems.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 7364 Concepts of Epidemiology and Statistics In Research Credits: 3

This course introduces students to study design, principles, concepts, and application of epidemiological and statistical methods in research. First part of the course will cover understanding the epidemiological principle, measuring the occurrence of disease, measures of disease association, and types of study designs, interpretation and evaluation of epidemiologic research. Second part will provide hands-on experience for students on developing skills to analyze research data using appropriate statistical methods by means of statistical software to calculate the measures of disease association. This course will help students to evaluate health care studies with respect to study design, statistical analysis, interpretation, and evidences of association. During this course students will develop an epidemiologic study proposal. Students will learn to analyze and interpret the output of these analyses using the Statistical Package for the Social Science (SPSS).

Prerequisites: STAT 436.

PHARM 7366 Oncology and Hematology Pharmacotherapy Credits: 3

This course provides disease-oriented and pharmacy-oriented insight into the pathophysiology, diagnosis, and rational drug treatment of malignancy. The pharmacist's role in selecting drug products, individualizing dosages, supportive care, and monitoring patients is emphasized, with additional emphasis on safety and handling.

Prerequisites: PHARM 7361, PHARM 7420.

PHARM 7369 Advanced Psychiatry Credits: 2

This course aims to expand student pharmacist knowledge in regards to psychiatric pharmacy practice. Students will develop skills in patient assessment, treatment plan development, and professional communication. Course content and projects are aimed at expanding the students' understanding of a wide range of psychiatric disorders and developing their ability to discuss and analyze these disorders and their implications for patients and society as a whole.

Prerequisites: Successful completion of all pharmacy coursework through semester five.

Co-requisites: PHARM 7485P, PHARM 7485L.

PHARM 7377 Principles of Nutrition Support Credits: 2

Clinical nutrition, a multidisciplinary field, has become an important practice area for the hospital pharmacist. Its growth has been the result of an awareness of the high incidence of malnutrition among hospitalized patients and its effects on morbidity and mortality. Nutrition support is an important therapy provided to patients in the acute care, homecare and long term care settings. This course will introduce the student to the fundamentals of nutrition support and prepare him/her for future involvement in this important practice area.

PHARM 7378 Introduction to Community Pharmacy Practice Credits: 3

This course is a required Introductory Pharmacy Practice Experience (IPPE) in which students will spend three weeks during the summer after their first year providing patient-centered care in a community pharmacy practice setting. The experience will emphasize application of knowledge gained in didactic coursework at the student's level in the curriculum. This IPPE provides a blend of activities that focus on both the delivery of care to patients as well as the dispensing of medications. The Introductory Pharmacy Practice Experiences seek to establish a solid practice foundation on which students will continually build as they progress through the Doctor of Pharmacy curriculum.

Prerequisites: Successful completion of all professional program coursework through semester two. Proof of current pharmacy non-credit requirements and immunization documentation.

PHARM 7379 Introduction to Health Systems Pharmacy Practice Credits: 3

This course is a required Introductory Pharmacy Practice Experience (IPPE) in which Pharm.D. students will spend three weeks during the summer after their second year providing patient-centered care in a health systems pharmacy practice setting. The experience will emphasize application of knowledge gained in didactic coursework at the student's level in the curriculum. Activities focus on understanding the medication use system and delivering care to patients in a hospital setting. The Introductory Pharmacy Practice Experiences seek to establish a solid practice foundation on which students will continually build as they progress through the Doctor of Pharmacy curriculum.

Prerequisites: Successful completion of all professional program coursework through semester four. Proof of current pharmacy non-credit requirements and immunization documentation.

PHARM 7389 Advances In Drug Therapy Credits: 2

This course provides the fundamentals of recent advances in drug delivery and therapy. Concepts covered include advanced and novel drug delivery systems, modern drug analysis tools, the role of efflux proteins in drug kinetics, and transporter/receptor mediated drug delivery.

Prerequisites: PHARM 7303.

PHARM 7397 Home Health Care Credits: 2

Anything a patient does in the home concerning their healthcare is considered Home Health Care. All aspects of Home Health Care are covered in this class. Diabetic Ostomy products care, Durable Medical Equipment (Wheelchair, cane, crutches, etc.), home Renal Dialysis, Wound Care, Respiratory Therapy, IV accesses, Home Infusion Therapy, Hospice Care, and Enteral Nutrition are presented and discussed. Reimbursement issues are not discussed due to constantly changing regulations. This is a "hands-on" class with participation in, for example, ostomy fitting, crutches fitting, enteral nutrition taste testing, and a tour of a Home Infusion Pharmacy.

Prerequisites: PHARM 7362, PHARM 7405.

Co-requisites: PHARM 7420.

PHARM 7398 Comprehensive Diabetes Management Credits: 4

The purpose of the course is to provide the student with a multidisciplinary foundation in the principles of diabetes management. The student will develop his/her knowledge and ability to assess, manage, educate and monitor patients with diabetes. The faculty are comprised of a multidisciplinary team of experts for the online lectures. The in-class discussion will be led by a faculty member who specializes in diabetes management.

Prerequisites: PHARM 7303.

PHARM 7399 Required Enrollment Credit: 1

Required enrollment for international students in pharmacy training sites.

PHARM 7405 Pharmacotherapy I: Emphasis on Self-Care and Nonprescription Medications Credits: 4

Pharmacotherapy I integrates the fundamentals of pathophysiology and pharmacology to help develop the student's ability to provide patient-centered care. Upon course completion, students will be able to assess and provide pharmaceutical care for patients with illnesses commonly encountered in community pharmacy practice utilizing the QuEST/SCHOLAR MACS process to assess a patient's condition systematically and completely, as well as following the Pharmacist Patient Care Process (PPCP). Students are expected to identify medical and medication-related problems, recommend nonprescription drug therapy, prescription drug therapy when appropriate, and monitor for safe and effective drug use. Students are also expected to provide accurate medication counseling. In general, three hours per week are devoted for traditional didactic, classroom based instruction, teaching and learning and two hours for case recitation.

Prerequisites: PHARM 7279, PHARM 7307, PHARM 7325, PHARM 7361, PHARM 7414.

Co-requisites: PHARM 7405L.

PHARM 7405L Applied Skills Lab Pharmacotherapy I: Emphasis on Self-Care and Nonprescription Medications Credits: 0.5

Students enrolled in this applied pharmacotherapy lab will gain skills necessary to provide care for patients with illnesses commonly encountered in community practice. Learning activities are designed to complement didactic instruction while allowing students to apply knowledge in a simulated environment. Students will be afforded opportunities to provide patient-centered care utilizing the QuEST/SCHOLAR MACS process. Student achievement of core abilities will be assessed through an Objective Structured Clinical Examination.

Prerequisites: PHARM 7307, PHARM 7325, PHARM 7361, PHARM 7414.

Co-requisites: PHARM 7405.

PHARM 7406P IPPE: General Medicine I Credits: 2

This course is a required Introductory Pharmacy Practice Experience (IPPE) which provides a continuum of patient care activities throughout the third professional year. The student will spend one academic year (Fall and Spring Semesters) in a patient care setting with a minimum of 90 contact hours (45 contact hours each semester). The Pharmacist's Patient Care Process will be emphasized in the care of patients with commonly seen illnesses. Students are expected to become involved in the provision of direct patient care collaborating with other healthcare professionals and improving rational drug therapy in a practice environment. Students will take part in rounds, conferences, consultations and other activities as determined by the supervising faculty. General Medicine I practice site time allows maximum time and opportunity to engage IPPE students in patient care activities; interactions with patients, caregivers, and other health care professionals; and to apply their patient care knowledge and skills in authentic practice settings.

Prerequisites: PHARM 7420, PHARM 7485P.

PHARM 7407P APPE Patient Care Selective Credits: 4

The student will spend one month actively participating in the delivery of direct patient care in an interprofessional practice setting where there are ongoing clinical pharmacy services. Students will take part in rounds, conferences, consultations and other activities as directed by the faculty preceptor. Faculty preceptors may add site-specific objectives as indicated.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7409P APPE Health Systems Credits: 4

The student will spend one month assigned to a health system site. Emphasis of study will be on the pharmacy systems of hospital/health systems, medication safety and quality, and professional practice. Clinical applications will be maintained throughout the rotation. Students will take part in department activities to enhance understanding of the integration of all aspects of patient-centered care within the department and other services in the facility/health system. Faculty preceptors may add site-specific objectives as indicated.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7410P APPE Ambulatory Patient Care Credits: 4

The student will spend one month actively participating in the delivery of direct patient care in an interprofessional ambulatory patient care practice setting where there is an ongoing program of clinical pharmacy services. Students will take part in rounds, conferences, consultations and other activities as directed by the faculty preceptor. Faculty preceptors may add site-specific objectives as indicated.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential coursework through semester six.

PHARM 7412P APPE Advanced Community Pharmacy Credits: 4

The student will spend one month in a progressive community pharmacy setting. Emphasis of study will be on the clinical aspects of providing comprehensive patient care services to diverse patient populations in a community practice. Patient-centered care activities will be emphasized throughout the rotation. Students will take part in all aspects of patient care within the practice. Faculty preceptors may add site-specific objectives as indicated.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7414 Patient-Centered Care and Ethical Practice Credits: 2

Students will understand the concept as well as the pharmacist's role in providing patient-centered care. Students will learn how to build relationships through consideration of the patient's personal values, preferences and beliefs. Students will learn how to effectively communicate with patients to obtain health and medication histories and to counsel for medication adherence. Drug knowledge for the most commonly prescribed medications will be learned, assessed and applied throughout this course and the associated applied skills lab (7414L). One 2-hour class session is held per week.

Prerequisites: PHARM 7101.

Co-requisites: PHARM 7414L.

PHARM 7414L Applied Skills Lab: Patient-Centered Care and Ethical Practice Credits: 0.5

This applied skills lab is associated with Patient-Centered Care and Ethical Practice course. Learning activities are designed to complement didactic instruction while allowing students to apply knowledge to patient care in a structured lab environment. Student achievement of core abilities will be assessed through completion of assigned activities and an Objective Structured Clinical Examination (OSCE). One 2-hour lab session is held on designated weeks as outlined in the course schedule.

Prerequisites: PHARM 7101.

Co-requisites: PHARM 7414.

PHARM 7418P APPE Elective I Credits: 4

Elective experiences give students the opportunity to mature professionally, secure the breadth and depth of experiences needed to achieve curricular outcomes, and explore various sectors of practice. Students may repeat required rotations as electives if space is available or may approach a preceptor to tailor an elective experience to develop an area of interest. Faculty preceptors may add site-specific objectives as indicated. Electives may include a maximum of two experiences without a patient care focus.

Prerequisites: Successful completion of all pharmacy required non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7419P APPE Acute Patient Care Credits: 4

The student will spend one month actively participating in the delivery of direct patient care in an interprofessional acute practice setting where there are ongoing clinical pharmacy services. Students will take part in rounds, conferences, consultations and other activities as directed by the faculty preceptor. Faculty preceptors may add site-specific objectives as indicated.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7420 Pharmacotherapy II Credits: 7

Pharmacotherapy II is designed to develop the student's ability to assess patients and provide pharmaceutical care. The course focuses on developing and applying problem-solving strategies for complex illnesses commonly encountered in pharmacy practice. Students are expected to identify medical and medication-related problems, recommend drug therapy and monitor for safe and effective drug use. Students are also expected to provide medication counseling. Throughout the semester, students are expected to retrieve and utilize relevant patient data from an electronic medical record system to make patient care decisions. Six hours of large group and two hours of small group discussions occur weekly.

Prerequisites: PHARM 7279, PHARM 7280, PHARM 7307, PHARM 7325, PHARM 7361, PHARM 7362, PHARM 7405, PHARM 7414.

Co-requisites: PHARM 7420L, PHARM 7406P.

PHARM 7420L Applied Skills Lab: Pharmacotherapy II Credits: 0.5

Students enrolled in this applied pharmacotherapy lab will gain skills necessary to provide care for patients with illnesses commonly encountered in pharmacy practice. Learning activities are designed to complement didactic instruction while allowing students to apply knowledge in a simulated environment. Students will be afforded opportunities to utilize home monitoring tests, conduct medication reviews, and therapeutically manage patients at a distance (telepharmacy). Student achievement of core abilities will be assessed through an Objective Structured Clinical Examination (OSCE).

Prerequisites: PHARM 7279, PHARM 7280, PHARM 7307, PHARM 7325, PHARM 7361, PHARM 7362, PHARM 7405, PHARM 7414.

Co-requisites: PHARM 7420, PHARM 7406P.

PHARM 7420P APPE Elective II Credits: 4

Elective experiences give students the opportunity to mature professionally, secure the breadth and depth of experiences needed to achieve curricular outcomes, and explore various sectors of practice. Students may repeat required rotations as electives if space is available or may approach a preceptor to tailor an elective experience to develop an area of interest. Faculty preceptors may add site-specific objectives as indicated. Electives may include a maximum of two experiences without a patient care focus.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7421P APPE Elective III Credits: 4

Elective experiences give students the opportunity to mature professionally, secure the breadth and depth of experiences needed to achieve curricular outcomes, and explore various sectors of practice. Students may repeat required rotations as electives if space is available or may approach a preceptor to tailor an elective experience to develop an area of interest. Faculty preceptors may add site-specific objectives as indicated. Electives may include a maximum of two experiences without a patient care focus.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7422P APPE Elective IV Credits: 4

Elective experiences give students the opportunity to mature professionally, secure the breadth and depth of experiences needed to achieve curricular outcomes, and explore various sectors of practice. Students may repeat required rotations as electives if space is available or may approach a preceptor to tailor an elective experience to develop an area of interest. Faculty preceptors may add site-specific objectives as indicated. Electives may include a maximum of two experiences without a patient care focus.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7424 Introduction To Dietary Supplement Therapeutics Credits: 2

This course is intended to provide students with an awareness of important issues about dietary supplements to consider when providing pharmaceutical care to patients. Students will become familiar with regulations for dietary supplements, learn communication skills specific to discussing supplement use with patients, and the skills to retrieve and interpret reliable information to be able to make decisions about new or unfamiliar supplements.

Prerequisites: PHARM 7361.

PHARM 7427 Hospital Pharmacy Credits: 2

This course in Hospital Pharmacy is designed to expose students to the daily operation of a typical hospital pharmacy, integration of informatics and automation, and understanding of historical concepts in hospital pharmacy management. The course consists of one, two-hour lecture per week. The course will be delivered via traditional didactic lecture format and interactive group discussions.

PHARM 7434 Pharmacy Preparations: Compounding Credit: 1

In the Pharmacy Preparations: Compounding Course, students will gain knowledge and skills necessary to compound extemporaneous non-sterile preparations. The course will cover regulations governing pharmaceutical compounding in Missouri, ethical considerations applicable to compounds, various dosage forms including advantages and disadvantages of each, techniques used in preparing compounds, and the counseling information to be included for each type of dosage form covered in the course. Students will utilize their knowledge of pharmaceutical calculations in the preparation of the formulations such as calculating doses and ingredient quantities.

Prerequisites: PHARM 7110.

Co-requisites: PHARM 7434L.

PHARM 7434L Applied Skills Lab: Pharmacy Preparations: Compounding Credit: 1

Students enrolled in this compounding lab will apply knowledge gained in the associated course necessary to compound extemporaneous non-sterile preparations. Students are expected to accurately prepare, dispense, and label a variety of the most commonly prescribed extemporaneous formulations, including liquid, solid, semi-solid, and topical preparations.

Prerequisites: PHARM 7110.

Co-requisites: PHARM 7434.

PHARM 7439 Pediatric Pharmacotherapy Credits: 3

Pediatric Pharmacotherapy provides disease-oriented and pharmacy-oriented insight into the pathophysiology, diagnosis, and rational drug treatment of diseases primarily encountered in the pediatric population. The pharmacist's role in selecting drug products, individualizing dosages, and monitoring patients is emphasized.

Prerequisites: PHARM 7361, PHARM 7362, PHARM 7420.

PHARM 7451 Pharmacy Law Credit: 1

State laws impacting pharmacy practice.

Prerequisites: PHARM 7151.

PHARM 7463 Basic and Clinical Toxicology Credits: 2

Fundamentals of toxicology, including discussion of the general classes of poisonous substances, their physiological effects, and methods of treatment.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 7465 Health Economics and Medicine Credits: 3

This course introduces major economic dimensions of healthcare system and public health practices. Covers concepts necessary to understand provider and consumer behavior, health care market structure, government involvement in health care, reimbursement strategy, determinants of health, distribution channels for biopharmaceuticals, pharmacovigilance, economic evaluation of healthcare services, and comparative-effectiveness research.

Prerequisites: PHARM 7233.

PHARM 7466 Pharmacy Practice Leadership, Management, and Innovation Credits: 3

Pharmacy Practice Leadership, Management, and Innovation is a required course for the Doctor of Pharmacy degree program. The goals of the course are to teach basic leadership and management principles and apply them to pharmacy practice in a variety of situations and settings. Leadership principles are related to broad personal and organizational missions and visions. Management principles are related to operational details of managing human resources, inventory, and finances. In order to achieve these goals, this course will review specific topics, including but not limited to, leadership and professional development, entrepreneurship, operations management, application of reimbursement mechanisms, pay-for-performance, and innovative pharmacist services. Pharmacists need to understand these principles and applications as a means of providing optimum care for patients, especially when pharmacists emerge as important contributors to the future of the U.S. health care system.

Prerequisites: PHARM 7465.

PHARM 7467 Religion, Culture and Health Credits: 3

This course addresses the impact of religious beliefs, education, and cultural practices on health and healthcare issues pertinent to various segments of our society.

PHARM 7484P Pharmacy Seminar Credit: 1

Pharm. D. Student Seminar course is designed to provide students with examples and reasoning behind the fundamentals of seminar preparation and delivery and opportunity to utilize their knowledge by presenting a seminar. This experience will be achieved through identification of a topic, development and presentation of a seminar. The student is expected to complete two 40-minute seminars over two semesters.

Prerequisites: PHARM 7485P.

PHARM 7485L Applied Skills Lab: Pharmacotherapy III Credits: 0.5

Students enrolled in this applied pharmacotherapy lab will gain skills necessary to provide care for patients with illnesses commonly encountered in pharmacy practice. Learning activities are designed to complement didactic instruction while allowing students to apply knowledge in a simulated environment. Students will be afforded opportunities to provide pharmacy services, including but not limited to, Medication Therapy Management, therapeutic Drug Utilization Review, Patient Centered Medical Home and telepharmacy. Multiple activities will incorporate concepts of interprofessional team-based care. Student achievement of core abilities will be assessed through an Objective Structured Clinical Examination.

Prerequisites: PHARM 7279, PHARM 7280, PHARM 7307, PHARM 7325, PHARM 7361, PHARM 7362, PHARM 7405, PHARM 7414, PHARM 7420.

Co-requisites: PHARM 7485P, PHARM 7406P.

PHARM 7485P Pharmacotherapy III Credits: 7

Pharmacotherapy III is designed to develop the student's ability to assess patients and provide pharmaceutical care. The course focuses on developing and applying problem-solving strategies for complex illnesses commonly encountered in pharmacy practice. Students are expected to identify medical and medication-related problems, recommend drug therapy and monitor for safe and effective drug use. **Prerequisites:** PHARM 7279, PHARM 7280, PHARM 7307, PHARM 7325, PHARM 7361, PHARM 7362, PHARM 7405, PHARM 7414, PHARM 7420, 7420L.

Co-requisites: PHARM 7485L, PHARM 7406P.

PHARM 7489AB Introduction to Nuclear Pharmacy & Nuclear Medicine Credits: 2

Nuclear pharmacy employs the safe and effective use of radiopharmaceuticals and other drugs with the purpose of improving patient health. The purpose of this course is to educate students regarding the diagnostic and therapeutic roles of radiopharmaceuticals in healthcare and teach the proper procedures and techniques that go into safely compounding and handling these products. Students will visit Cardinal Health Nuclear Pharmacy where they will be able to demonstrate the techniques they have learned. Students will attend four two-hour lectures and have the opportunity to witness the utilization of a radiopharmaceutical during a diagnostic scan at Truman Medical Center.

PHARM 7489CC Special Topics-Pharmacy Credits: 1-5

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors and prerequisites to be listed in the term bulletin. Elective.

PHARM 7489CE Special Topics in Pharmacy Credits: 1-5

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors and prerequisites to be listed in the term bulletin. Elective.

PHARM 7489RB Special Topics Pharmacy Credits: 1-5

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors and prerequisites to be listed in the term bulletin. Elective

PHARM 7489SI Special Topics in Pharmacy Credits: 1-5

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors and prerequisites to be listed in the term bulletin. Elective.

PHARM 7497E Directed Individual Study-Clinical Pharmacy Credits: 1-4

Study in areas of special interest under individual faculty direction. Elective. Not to exceed five semester credits.

Philosophy (PHILOS)

Courses

PHILOS 5521 Managerial And Administrative Decision Making And Ethical Values Credits: 3

Methods of problem definition and decision making in ethics are presented with the goal of providing the student with a matrix for case review. A series of cases is offered that serve to integrate approaches to ethical reflection with management and administrative decision making. Cases are chosen on the basis of topical, curricular and conceptual relevance.

PHILOS 5540 Seminar On Philosophy And Law Credits: 2

An examination from a philosophical perspective of the historical and conceptual relationships present in the evolution, development and analysis of law. Among the systems of analysis examined will be natural law theory, legal positivism and legal realism. Ordinarily the seminar will focus on a specific area of controversy in the law.

PHILOS 5546 Ethics And Government Credits: 3

An examination of ethical issues related to government, with the primary focus on national and local governmental bodies in the United States. Ethics in the executive, legislative and judicial branches are examined. Ethical standards for elected officials and appointed public servants are reviewed. Attempts to "legislate morality" are considered. The course includes a historical review of ethics and government and an analysis of the legal implications of legislation regarding ethics in the executive branch.

PHILOS 5620 Descartes To Hume Credits: 3**PHILOS 5625 Aesthetics Credits: 3****PHILOS 5638 Philosophy Of Biology Credits: 3****PHILOS 5640 Philosophy Of Law Credits: 3****PHILOS 5690 Research In Selected Fields: Graduate Studies Credits: 3**

Intensive research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies.

Physical Education (PHYS-ED)

Courses

PHYS-ED 5530 Organization And Administration Of Athletics Credits: 3

Organization and management of a program of competitive athletics for schools and colleges.

PHYS-ED 5561 Social-Cultural Aspects of Sport and Physical Activity Credits: 3

The social significance of sport in modern societies. Research on the social structure, social relations and social problems of sport from several subcultural perspectives will be reviewed.

PHYS-ED 5570 Sport Psychology Credits: 3

Analysis of research and theory focused on the psychological aspects associated with participation in sport and physical activity.

Prerequisites: PHYS-ED 370.

Physician Assistant Program (MEDPA)

Courses

MEDPA 5501 Anatomy for the Physician Assistant Credits: 3

This course studies the anatomy of the human body and its correlation and relationship of anatomic configuration to diagnosis of clinical problems.

Prerequisites: MMSPA student.

MEDPA 5502 Foundations in Basic Medical Science Credits: 4

This course introduces the basic principles of biochemistry, microbiology, immunology, and pharmacology which prepares the student for Science and Practice of Medicine I - IV.

Prerequisites: MMSPA student.

MEDPA 5503 Research Applications in Medicine Credit: 1

This course introduces the student to clinical research in medicine and its application to clinical decision making through the concepts and principles of evidence-based medicine.

MEDPA 5504 Ethics, Law and Policy Credit: 1

This course examines ethical rules, principles, and theories as they relate to health care.

MEDPA 5505 Clinical Assessment for the PA Credits: 2

This course will focus on developing foundational physical exam and history taking skills for the physician assistant.

MEDPA 5511 Clinical Practicum I Credit: 1

The Clinical Practicum course series will develop professional behaviors, reinforce effective communication with classmates, patients and preceptors, introduce patient safety concepts and give the student clinical experience under preceptor supervision to develop and apply the skills learned in the curriculum.

MEDPA 5512 Clinical Practicum II Credit: 1

This course will consist of a variety of activities including lectures, clinical exposure, interprofessional education activities, service learning, and community health experiences. Emphasis will be on developing communication skills, exhibiting professional behaviors, recognizing diversity and needs of the community, and identifying attributes of a health care team.

Prerequisites: MEDPA 5511.

MEDPA 5513 Clinical Practicum III Credit: 1

This course will consist of a variety of activities including lectures, clinical exposure, interprofessional education activities, service learning, and community health experiences. Emphasis will be on developing communication skills, exhibiting professional behaviors, recognizing diversity and needs of the community, and identifying attributes of a health care team.

Prerequisites: MEDPA 5512.

MEDPA 5514 Clinical Practicum IV Credit: 1

This course will consist of a variety of activities including lectures, clinical exposure, interprofessional education activities, service learning, and community health experiences. Emphasis will be on developing communication skills, exhibiting professional behaviors, recognizing diversity and needs of the community, and identifying attributes of a health care team.

Prerequisites: MEDPA 5513.

MEDPA 5521 PA Professions I Credit: 1

This course in the PA Professions series that will focus on the history of the PA profession including the social, regulatory, ethical and professional aspects. Instruction will also be provided in clinical management practices and procedures including coding systems for diagnosis and reimbursement, quality assurance and risk management.

MEDPA 5522 PA Professions II Credit: 1

This course focuses on the impact of racial, ethnic and socioeconomic health disparities on health care delivery. The student will become aware of differing health beliefs, values and expectations of patients and other health care professionals that can affect communication, decision-making, compliance and health outcomes.

MEDPA 5523 PA Professions III Credit: 1

This course in the PA Professions series will provide basic doctrines and principles of the law to serve as a foundation for legally and ethically sound medical practice. It will include a comprehensive coverage of the history of legal medicine in the United States, the dynamics of the law applied to medical issues and the recent developments in health care delivery and biomedical issues. The legal and ethical issues of narrative medicine in medical practice and its practical applications will be explored and discussed.

MEDPA 5524 PA Professions IV Credit: 1

This course in the PA Professions will give students knowledge of the evolution of the health care industry's components and describe the technical, economic, political and social forces that shaped their development. Principles of health policy and public health will be discussed so the student will have a systematic way of thinking about health care in the United States, its problems and the alternatives for managing these problems.

MEDPA 5531 Science and Practice of Medicine I Credits: 9

This is a first of four series course that will address the physiology, pathophysiology, basic medical science, clinical presentation, pharmacotherapeutics, physical exam and clinical skills of disease processes presented in a systems format.

MEDPA 5532 Science and Practice of Medicine II Credits: 12

This is the second of a four series course that will address the physiology, pathophysiology, basic medical science, clinical presentation, pharmacotherapeutics, physical exam and clinical skills of disease processes presented in a systems format.

Prerequisites: MEDPA 5531.

MEDPA 5533 Science and Practice of Medicine III Credits: 20

This is the third of a four series course that will address the physiology, pathophysiology, basic medical science, clinical presentation, pharmacotherapeutics, physical exam and clinical skills of disease processes presented in a systems format.

Prerequisites: MEDPA 5532.

MEDPA 5534 Science and Practice of Medicine IV Credits: 19

This is the fourth in a four series course that will address the physiology, pathophysiology, basic medical science, clinical presentation, pharmacotherapeutics, physical exam and clinical skills of disease processes presented in a systems format.

Prerequisites: MEDPA 5533.

MEDPA 5580 Senior Seminar Credit: 1

This course will focus on discussion, study, and review of previously covered health topics in preparation for the Physician Assistant National Certification Exam (PANCE).

MEDPA 5581 Professional Development for the PA Credits: 0.5

This course focuses on professional development topics for the graduating PA students. Students attend and participate in seminars and discussions pertinent to employment and practice as a PA. Students enroll in the course each of the three semesters that make up the program clinical phase (semesters 5, 6, and 7).

Prerequisite: Must be a student in the MMS Physician Assistant program.

MEDPA 5589 Special Topics Credits: 1-3

An opportunity to explore in depth topics not included in usual course offerings. One or more topics will be announced in advance of registration.

MEDPA 5595 Capstone Credit: 1

This course will align didactic, clinical and professional instruction as well as Graduate Learning Competencies into a project that will have lasting impact for patients, clinical practice, PA education and/or the PA profession.

MEDPA 5610 Family Medicine I Rotation Credits: 4

This is a required 4-week rotation in an ambulatory family medicine setting.

MEDPA 5611 Family Medicine II Rotation Credits: 4

This is a required 4-week rotation in an ambulatory family medicine setting.

MEDPA 5612 Elective Family Medicine Rotation - 4 week Credits: 4

This is an elective 4-week rotation in an ambulatory family medicine setting.

MEDPA 5613 Elective Family Medicine Rotation II - 4 week Credits: 4

This is an elective 4-week rotation in an ambulatory family medicine setting.

MEDPA 5614 Elective Family Medicine Rotation I-2 week Credits: 2

This is an elective 2-week rotation in an ambulatory family medicine setting.

MEDPA 5615 Elective Family Medicine Rotation II - 2 week Credits: 2

This is an elective 2-week rotation in an ambulatory family medicine setting.

MEDPA 5620 Internal Medicine Rotation I Credits: 4

This is a required 4-week rotation in inpatient and/or outpatient adult medicine setting.

MEDPA 5621 Internal Medicine Rotation II Credits: 4

This is a required 4-week rotation in inpatient and/or outpatient adult medicine setting.

MEDPA 5622 Elective Internal Medicine Rotation I Credits: 4

This is an elective 4-week rotation in inpatient and/or outpatient adult medicine setting.

MEDPA 5623 Elective Internal Medicine Rotation II Credits: 4

This is an elective 4-week rotation in inpatient and/or outpatient adult medicine setting.

MEDPA 5624 Elective Internal Medicine Rotation I - 2 week Credits: 2

This is an elective 2-week rotation in inpatient and/or outpatient adult medicine setting.

MEDPA 5625 Elective Internal Medicine Rotation II - 2 week Credits: 2

This is an elective 2-week rotation in inpatient and/or outpatient adult medicine setting.

MEDPA 5630 Emergency Medicine Rotation Credits: 4

This is a required 4-week rotation in an emergency medicine setting.

MEDPA 5632 Elective Emergency Medicine I - 4 week Credits: 4

This is an elective 4-week rotation in the emergency medicine setting.

MEDPA 5633 Elective Emergency Medicine II - 4 week Credits: 4

This is an elective 4-week rotation in the emergency medicine setting.

MEDPA 5634 Elective Emergency Medicine I - 2 week Credits: 2

This is an elective 2-week rotation in the emergency medicine setting.

MEDPA 5635 Elective Emergency Medicine II - 2 week Credits: 2

This is an elective 2-week rotation in the emergency medicine setting.

MEDPA 5640 Women's Health Rotation Credits: 4

This is a required 4-week rotation in a women's health setting.

MEDPA 5642 Elective Women's Health Rotation I - 4 week Credits: 4
This is an elective 4-week rotation in a women's health setting.

MEDPA 5643 Elective Women's Health Rotation II - 4 week Credits: 4
This is an elective 4-week rotation in a women's health setting.

MEDPA 5644 Elective Women's Health I - 2 week Credits: 2
This is an elective 2-week rotation in a women's health setting.

MEDPA 5645 Elective Women's Health II - 2 week Credits: 2
This is an elective 2-week rotation in a women's health setting.

MEDPA 5650 Pediatrics Rotation Credits: 4
This is a required 4-week rotation in a pediatric medicine setting.

MEDPA 5652 Elective Pediatrics Rotation I Credits: 4
This is an elective 4-week rotation in a pediatric medicine setting.

MEDPA 5653 Elective Pediatrics Rotation II Credits: 4
This is an elective 4-week rotation in a pediatric medicine setting.

MEDPA 5654 Elective Pediatrics Rotation I - 2 week Credits: 2
This is an elective 2-week rotation in a pediatric medicine setting.

MEDPA 5656 Elective Pediatrics Rotation II 2 week Credits: 2
This is an elective 2-week rotation in a pediatric medicine setting.

MEDPA 5660 General Surgery Rotation Credits: 4
This is a required 4-week rotation in a general surgery setting.

MEDPA 5662 Elective Surgery Rotation I Credits: 4
This is an elective 4-week rotation in a surgery setting.

MEDPA 5663 Elective Surgery Rotation II Credits: 4
This is an elective 4-week rotation in a surgery setting.

MEDPA 5664 Elective Surgery Rotation I - 2 week Credits: 2
This is an elective 2-week rotation in a surgery setting.

MEDPA 5665 Elective Surgery Rotation II - 2 week Credits: 2
This is an elective 2-week rotation in a surgery setting.

MEDPA 5670 Behavioral Medicine Rotation Credits: 4
This is a required 4-week rotation in a behavioral health setting.

MEDPA 5671 Behavioral Medicine Rotation - 2 week Credits: 2
This is a required 2-week rotation in a behavioral health setting.

MEDPA 5672 Elective Behavioral Medicine I Credits: 4
This is an elective 4-week rotation in the behavioral medicine setting.

MEDPA 5673 Elective Behavioral Medicine II Credits: 4
This is an elective 4-week rotation in the behavioral medicine setting.

MEDPA 5674 Elective Behavioral Medicine I - 2 week Credits: 2
This is an elective 2-week rotation in the behavioral medicine setting.

MEDPA 5675 Elective Behavioral Medicine II - 2 week Credits: 2
This is an elective 2-week rotation in the behavioral medicine setting.

MEDPA 5680 Geriatrics Rotation Credits: 4
This is a required 4-week rotation in a geriatric specialty care setting.

MEDPA 5681 Geriatrics Rotation - 2 week Credits: 2
This is a required 2-week rotation in a geriatric specialty care setting.

MEDPA 5682 Elective Geriatrics Rotation I Credits: 4
This is an elective 4-week rotation in the geriatric medicine setting.

MEDPA 5683 Elective Geriatrics Rotation II Credits: 4
This is an elective 4-week rotation in the geriatric medicine setting.

MEDPA 5684 Elective Geriatrics Rotation I - 2 weeks Credits: 2
This is an elective 2-week rotation in the geriatric medicine setting.

MEDPA 5685 Elective Geriatrics Rotation II - 2 weeks Credits: 2
This is an elective 2-week rotation in the geriatric medicine setting.

MEDPA 5690 Elective Clinical Rotation I Credits: 4

This is a 4-week clinical rotation experience in a new setting or an established area that students wish to gain additional experience.

MEDPA 5691 Elective Clinical Rotation II Credits: 4

This is a 4-week rotation in a newly or recently established clinical setting.

MEDPA 5692 Elective Clinical Rotation I - 2 week Credits: 2

This is a 2-week clinical rotation experience in a new setting or an established area that students wish to gain additional experience.

MEDPA 5693 Elective Clinical Rotation II - 2 week Credits: 2

This is a 2-week clinical rotation experience in a new setting or an established area that students wish to gain additional experience

MEDPA 5899 Required Graduate Enrollment Credit: 1

Required Graduate Enrollment.

Physics (PHYSICS)

Courses

PHYSICS 5500 Methods Of Mathematical Physics I Credits: 3

Intended to provide the student with the advanced mathematical techniques needed for beginning graduate studies in the physical sciences. Content includes real variables, infinite series, complex analysis, linear algebra and partial differential equations.

PHYSICS 5501 Methods Of Mathematical Physics II Credits: 3

A continuation of Physics 500 which includes Sturm-Liouville operators, special functions, Fourier transforms, distributions and Green functions, Laplace transforms, linear groups and tensor analysis.

PHYSICS 5505 Survey Of Recent Development In Physics Credits: 3

Specifically designed to help high school and junior college science teachers keep pace with current developments in various subdivisions of physics and their impact on society and technology. (Not applicable for graduate degree in Physics).

Prerequisite: Baccalaureate degree and one year science teaching experience.

PHYSICS 5510 Theoretical Mechanics I Credits: 3

A review of undergraduate mechanics precedes the study of generalized classical mechanics in this course. Topics include variational principles, Lagrangian and Hamilton methods, conservation laws and Hamilton-Jacobi theory.

PHYSICS 5511 Theoretical Mechanics II Credits: 3

A continuation of PHYSICS 5510, this course covers topics such as normal coordinates, small oscillations, continuum mechanics and special/general relativity.

PHYSICS 5520 Electromagnetic Theory And Applications I Credits: 3

Electrostatics, magnetostatics and various approaches in solving boundary value problems of electromagnetism, Green's functions, conformal transformations and polynomial expansions, Maxwell's equations and waves.

PHYSICS 5521 Electromagnetic Theory And Applications II Credits: 3

Waveguides, fiber optics, radiation systems and antenna for wireless communications, scattering and diffraction of electromagnetic waves, multipole fields, special relativity and relativistic particle dynamics and radiation.

PHYSICS 5530 Quantum Mechanics I Credits: 3

Review of elementary methods, formal preliminaries, axioms, commuting operators, angular momentum, static perturbation theory, Wigner-Eckart theorem.

PHYSICS 5531 Quantum Mechanics II Credits: 3

Time dependent perturbation theory, scattering, applications to atoms, molecules and nuclei, reactions, relativistic methods.

PHYSICS 5535 Optical Properties Of Matter Credits: 3

Maxwell's equations and the dielectric function, absorption and dispersion, free-electron metals, interband transitions, dispersion relations and sum rules, self-consistent field approximation, current-current correlations and the fluctuation-dissipation theorem, plasmons and characteristic energy loss.

Prerequisites: PHYSICS 450, PHYSICS 460, PHYSICS 461, PHYSICS 472, PHYSICS 5500.

PHYSICS 5537 Particle Physics Credits: 3

Essential aspects of modern particle physics are examined in a historical context, and also in terms of the standard model describing concisely the fundamental interactions among particles. Conservation laws are discussed, and recent developments such as String Theory are considered.

Prerequisites: (for undergraduates) PHYSICS 240, PHYSICS 250, and PHYSICS 350 or PHYSICS 472.

PHYSICS 5540 Statistical Physics I Credits: 3

Statistical mechanics as a basis for thermodynamics; classical distribution functions; quantum statistical mechanics, kinetic theory, transport phenomena; application to systems of interacting particles.

Prerequisites: PHYSICS 410, PHYSICS 472.

PHYSICS 5541 Statistical Physics II Credits: 3

Special topics in advanced statistical physics including: second quantization, modern many body theory, interacting Fermi and Bose systems, superfluidity and superconductivity, renormalization group and computer simulation techniques.

Prerequisites: PHYSICS 5540.

PHYSICS 5550 Atomic And Molecular Structure Credits: 3

Experimental results and theoretical models by quantum mechanics. Special emphasis on the interaction between radiation and matter.

PHYSICS 5553 Practical Astronomy Credits: 3

A practical overview of the basic methods of observational astronomy research, including the principles of telescopes, detectors and measurement theory, as well as hands-on experience with data reduction and analysis. This course is open to graduate students from all majors.

PHYSICS 5555 Stellar Astrophysics Credits: 3

A mathematical and conceptual overview of the observed properties of stars and the fundamental astrophysics of radiative transfer, hydrostatic equilibrium, atomic processes and thermonuclear energy production that govern their structure, atmospheres and remnants.

PHYSICS 5556 Galaxies Credits: 3

A mathematical and conceptual overview of the observed properties and astrophysics of galaxies highlighting star formation and evolution, the interstellar medium, the Milky Way, galaxy populations and demographics, active galactic nuclei, and galaxy formation and evolution.

PHYSICS 5560 Nuclear Physics Credits: 3

Fundamental properties of the atomic nucleus discussed in terms of experimental results and theoretical models. Quantum and statistical mechanics are used where appropriate.

PHYSICS 5565 Cosmology Credits: 3

This course provides a foundation in both physical and observational cosmology. Students will acquire both a mathematical and conceptual understanding of the formation and dynamics of the Universe.

PHYSICS 5570 Quantum Theory Of Solids I Credits: 3

Lattice dynamics and thermal conductivity. Neutron scattering. Symmetry principles in crystals and consequences. Point group, space group and irreducible representations. Energy band theory and methods of band calculation. Elementary Theory of Magnetism. Spin wave theory.

PHYSICS 5571 Quantum Theory Of Solids II Credits: 3

Topics will include crystal imperfections, impurities and defects, optical properties of metals and semiconductors, electron-lattice interaction and transport theory, superconductivity and theory of disordered systems.

PHYSICS 5580 Physics Seminar Credit: 1

Contemporary publications and research.

PHYSICS 5585 Physics of Electronics Credits: 3

An introduction to the solid state physics of basic electronic components and their operation through both theory and practical lab work.

PHYSICS 5590 Topics In Physics Credits: 1-3

Contemporary publications and research.

PHYSICS 5590A Topics In Physics Credits: 1-3

Contemporary publications and research.

PHYSICS 5590B Special Topics Credits: 1-3**PHYSICS 5590R Topics in Physics Credits: 1-3**

Contemporary publications and research.

PHYSICS 5595L Computer Interfacing Laboratory Credits: 3

An introduction to computer interfacing through the use of serial and parallel ports and digital-to-analog and analog-to-digital converters. The course also introduces digital filtering techniques, data analysis techniques, and graphical presentation of data. The programming techniques are taught using high level programming languages currently used in research and development labs.

PHYSICS 5599 Research And Thesis Credits: 1-9

Research for thesis in partial fulfillment of the master's degree in physics.

PHYSICS 5680 Research Seminar Credits: 1-2

Seminars on current research topics of research programs in the department and those of external distinguished scientists. (Must be taken by Physics Ph.D. students).

PHYSICS 5690 Special Research Topics Credits: 1-3

A lecture course presenting advanced research-level topics.

Prerequisites: Ph.D. candidacy. This course is intended to allow faculty and visiting scholars to offer special courses in selected research areas.

PHYSICS 5696 Dissertation Research Credits: 1-3

This course is individually directed research leading to the fulfillment of the Comprehensive Exam requirements of the Department of Physics and Astronomy. These include (i) completion of an NSF-style research proposal and (ii) successful oral defense of it before the student's research advisory committee.

Prerequisites: Completion of at least 80% of coursework hours, as per the student's Plan of Study and Permission of the instructor.

PHYSICS 5699 Research And Dissertation Credits: 1-9

Research for dissertation in partial fulfillment of the Ph.D. degree requirements in physics.

PHYSICS 5899 Required Graduate Enrollment Credit: 1

Piano (PIANO)

Courses

PIANO 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

PIANO 5500A Graduate Piano-Secondary Credits: 2**PIANO 5500B Special Applied Studies Credits: 2**

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

PIANO 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

PIANO 5500JA Graduate Applied Jazz Studies Credits: 2

One-hour lesson weekly. Jury examination is required.

Prerequisites: Graduate standing.

PIANO 5500JB Special Applied Jazz Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. A jury for comments only may be held at the discretion of the faculty.

Prerequisites: Graduate standing.

PIANO 5500JC Applied Jazz Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied jazz study in an area other than, and in addition to, their primary performance study.

Prerequisites: Graduate standing.

PIANO 5501 Graduate Piano - Masters Performance Credits: 4**PIANO 5601 Graduate Piano - Doctoral Performance Credits: 4**

Political Science (POL-SCI)

Courses

POL-SCI 5501 Seminar in American Government Credits: 3

A seminar involving intense examination of the foundations, development, and structure of American national government through study of a broad range of classic materials and current research findings; course will prepare a political science graduate student to teach an introductory college course in American government.

Prerequisites: Graduate Standing.

POL-SCI 5506 Research Design and Analysis Credits: 3

This course focuses on methods of data gathering, management, and analysis used in political science research. Students gain an understanding of different types of data including surveys, experiments, and archival records. The curriculum will also include ways that these data are managed and analyzed, and how the results are presented in a useful manner.

POL-SCI 5513 Seminar in Comparative Politics Credits: 3

A survey of the major research in comparative politics including state building, democracy, economic development, and political violence.

POL-SCI 5522 Seminar In The Presidency Credits: 3

Critical examination of the American presidency, with in-depth research into selected themes and presidents.

Prerequisites: POL-SCI 406.

POL-SCI 5530 Seminar in International Relations Credits: 3

This course examines major schools of thought and contemporary research in international relations. Topics discussed include international systems, the causes of war and peace, collective security, and international political economy.

POL-SCI 5541 American Political Thought Credits: 3

This course will focus on intellectual reactions to the major periods in American history (the movement for independence, the writing of the constitution, the Jacksonian period, the civil war debate, the growth of big business, the rise of the positive state and contemporary America). Contemporary theorists will be included along with Jefferson, Madison, Hamilton and Marshall.

POL-SCI 5570 The Politics Of Social Security Credits: 3

This course will concentrate upon the principles of social insurance in general, and of the American Social Security system in particular. It will consider the system in relation to the history and traditions of American society. It will analyze popular misconceptions and will pay special attention to the political, economic, and demographic issues relevant to Social Security's current operation and to the program's future.

POL-SCI 5575 Political Ideologies Credits: 3

Consideration of political ideologies and their effects, with in-depth research into selected topics.

POL-SCI 5580 Government And Politics Seminar Credits: 3

Offered as a special seminar in the individual faculty member's area of research specialization. The seminar may be repeated for credit when the topic varies. The topic and instructor will be announced in advance.

POL-SCI 5590 Directed Studies And Research Credits: 1-6

Under the direction of the instructor, students in this course will produce a major research paper: a self-contained thesis chapter, an article for publication or the equivalent. May be repeated for credit.

POL-SCI 5599 Thesis Credits: 1-6

Directed specialized research.

POL-SCI 5688 Doctoral Research Seminar Credits: 3

Students will produce a major research paper under the direction of the instructor. The research project will consist of a self-contained chapter of the dissertation or a work of publishable quality. May be repeated for credit.

POL-SCI 5697 Doctoral-Level Independent Readings Credits: 3

Individual readings under the supervision of members of the Political Science Graduate or Doctoral Faculty in the specified topic or topics. May be repeated. May not be taken during an academic year in which a graduate course or seminar is offered on the topic.

POL-SCI 5699 Research And Dissertation Credits: 1-12

Directed specialized research.

POL-SCI 5899 Required Graduate Enrollment Credit: 1

Psychology (PSYCH)

Courses

PSYCH 5504 Contemporary Issues In Learning Credits: 3

A discussion and analysis of recent research and theoretical papers in learning. The student will have to demonstrate undergraduate competence in learning in the first few weeks of this course in order to remain enrolled.

PSYCH 5505 Motivation Credits: 3

The definition of the concept of motivation is explored. Emphasis is placed upon integration of the concept of motivation into comprehensive theoretical explanations of phenomena. Students should have in their background a foundation in Learning Theory (or at least Theory Construction) and Experimental (Scientific Method). Previous laboratory experiences are desired.

PSYCH 5507 Cognitive Psychology Credits: 3

An advanced study in the intersection of cognition and emotion, focusing on the topics of attention, memory, and executive function, and how these abilities influence and are influenced by emotional processes and by individual difference variables such as health, mental health, age, gender, and ethnicity.

PSYCH 5509 Assessment 1: Intellectual And Cognitive Assessment Credits: 3

This course is designed to provide students with a foundation in the use of intellectual and cognitive assessment instruments in clinical evaluation. The course covers theoretical issues pertinent to intellectual and cognitive assessment, as well as basic assessment skills including administration, scoring, interpretation, and communication of results for commonly used measures.

PSYCH 5510 Assessment Methods In Professional Counseling Credits: 3

This course provides an understanding of assessment process and assessment techniques. Skills and practice in selection, administration, and interpretation of representative assessment instruments. Two semester hours lecture, two semester hours lab experience per week.

Prerequisites: Course on assessment of intellectual functioning.

PSYCH 5511 Principles Of Assessment In Psychology Credits: 3

This will be a field practicum course in which test batteries will be used to assess and evaluate the intelligence, personality, and aptitude of the individual.

Prerequisites: PSYCH 5510.

PSYCH 5512 Contemporary Issues In Social Psychology Credits: 3

A critical survey of the recent literature in social psychology with emphasis on experimental investigations.

PSYCH 5515 Advanced Systems And History Of Psychology Credits: 3

In depth review of the major theoretical systems of psychology in terms of historical assumptions, methodologies and developments with the goal of enabling the student to better evaluate current theories and assumptions in psychology.

PSYCH 5516 Quant Analysis I: Regression And Analysis Of Variance Credits: 3

This graduate level statistics course for students in education and the behavioral sciences provides a strong conceptual understanding of two major statistical procedures with the context of the general linear model: multiple regression and numerous analysis of variance (ANOVA) models. Students will learn to select appropriate statistical techniques, tests the assumptions of the techniques, analyze data using statistical software, and report the results of their analyses in the format of the American Psychological Association (APA, 2002).

Prerequisites: EDUC-R&P 5505, PSYCH 316.

PSYCH 5517 Quantitative Analysis II: Advanced Topics In Regression And Mda Credits: 3

This graduate level statistics course for students in the behavioral sciences and education provides a strong conceptual understanding of advanced topics in regression (interaction effects, logistic regression, path analysis) and various multivariate techniques (MANOVA, canonical correlation, factor analysis). Students will complete a series of data based projects that allow them to demonstrate their skills in analysis, reporting and interpretation of findings.

Prerequisites: EDUC-R&P 5605 / PSYCH 5516 and EDUC-R&P 5505.

PSYCH 5518 Advanced Biopsychology Credits: 3

This course assumes that the student has mastered the basics of biopsychology, and deals with this topic in greater depth and scope than PSYCH 418. It will begin with a brief review and update of basic materials of neuroanatomy, neuronal conduction, and synaptic transmission but will quickly turn to an emphasis on biological influences on human psychology, in particular those biological factors that are of practical significance in the lives of patient and non-patient populations.

Prerequisites: PSYCH 418 (or equivalent).

PSYCH 5521 Advanced Social Psychology Credits: 3

The study of the individual in a social context. How social structure and interaction influence the behavior of an individual. Several contemporary systematic positions will be compared.

PSYCH 5522 Contemporary Issues In Developmental Psychology Credits: 3

A discussion of recent research literature in developmental psychology leading to an individual research project in this area.

PSYCH 5523 Seminar Personality Theory And Methodology Credits: 3

A study of the social-cultural, trait, learning, perceptual, motivational, and field theories of personality with special emphasis on research studies and the methodology of personality research.

Prerequisites: PSYCH 323.

PSYCH 5530 Addressing Health Disparities through Community-based Participatory Research Credits: 3

The purpose of this course is to familiarize students with the principles of community-based participatory research as a strategy to reduce health disparities. Students will learn how CBPR principles are applied across the research continuum for developing new community partnerships, conducting needs assessments, developing culturally-appropriate health promotion interventions in collaboration with community-based organizations, and packaging health interventions for dissemination in minority communities. This class is organized with a service learning component which will require students to work with a local community-based organization on a health issue for which there is joint interest.

PSYCH 5533 Psychopathology Credits: 3

A review of the experimental-clinical literature concerning the behavior disorders with special reference to their classification and etiology. Course generally will be restricted to students enrolled in license-eligible specialties who have had an undergraduate course in abnormal psychology.

PSYCH 5538 Development And Evaluation Of Assessment Tools Credits: 3

This survey course examines test theories, construction, and measurement theories. Within the context of a variety of conceptual frameworks and examples, students become knowledgeable about the various purposes, approaches, and computer software tools for measurement.

Prerequisites: PSYCH 5516 and PSYCH 5517.

PSYCH 5540 The Psychology Of Aging Credits: 3

This course will identify major issues concerning psychology related to aging. The major influences on the behavior, cognitive functioning and emotions of older adults will be examined. Consideration will be given to individual, group and environmental influences. Possible interventions will be identified. Cross-sectional and longitudinal research will be reviewed in order to examine the changes in individuals due to aging and the differences between cohort groups. Three major areas of information will be the focus: concepts, theory and methods in psychology of aging; biological and social influences on behavior; and behavioral processes. There will be a review of current literature.

PSYCH 5543 Adult Development And Aging Credits: 3

This course will identify major themes and issues of mid-life and older adults. It will examine major developmental theories of adult development and aging. A contextual approach is stressed, including research and theory on the impact of cohort, gender, race/ethnicity, socioeconomic status, and culture on development. Application to real life is integrated throughout the course. There will be a review of current literature.

PSYCH 5550 Field Practicum Credits: 4

Provides supervised experience working in community agencies/ organizations which address various human and social problems. Students receive training in community service oriented skills and approaches, e.g., advocacy, community organizing, program assessment, development and evaluation, outreach, and applied research. Ten hours per week at practicum site and class attendance are required.

PSYCH 5575 Professional Issues And Ethics In Psychology Credits: 3

Ethical and legal problems of research and practice will be discussed. Professional organizations in psychology and their publications will be reviewed.

PSYCH 5575A Professional Issues & Ethics Credits: 3**PSYCH 5580 Special Topics Credits: 1-3****PSYCH 5580AD Special Topics Credits: 1-3****PSYCH 5580SM Special Topics Credits: 1-3****PSYCH 5582 Community Mental Health Credits: 3**

A review of current theory and research. The emphasis is on prevention rather than treatment of mental health problems. The assets and liabilities of neighborhood communities for mental health problems will be discussed. Recent methods in crisis intervention are reviewed. Each student will be required to become familiar with a neighborhood with a high incidence of application for mental health care.

PSYCH 5586 Theory, Research And Practice Of Consultation Credits: 3

Theory and research on community, mental health, organizational and agency consultation. Entry, process, outcome and ethical issues surrounding each model of intervention will be explored. Each student will be expected to conduct and report on a consultation project.

PSYCH 5590 Directed Research Credits: 1-6**PSYCH 5597 Directed Readings In Psychology Credits: 3**

Intensive readings in areas of joint interest to the enrolled student and the cooperating faculty.

PSYCH 5599 Research And Thesis Credits: 1-9**PSYCH 5601 Experimental Methods In Design And Analysis I Credits: 3**

An examination of multifactor and multilevel designs and interactions. Topics covered will include randomized block designs. Latin square designs, complex trend analysis designs, covariance designs and multiple comparison of treatment means.

PSYCH 5604 Field Practicum In Community Psychology Credits: 3

Supervised experience in health care, social welfare, correctional, political, ethnic, and neighborhood agencies. May be repeated six times for up to 18 credit hours.

PSYCH 5610 Structural Equation Modeling Credits: 3

Students will learn core techniques in structural equation modeling, including path analysis, confirmatory factor analysis, structural regression models; and be introduced to advanced topics such as multi-group SEM and latent growth models. There will be multiple lab sessions using appropriate computer applications.

Prerequisites: PSYCH 5517 (or EDUC-R&P 5606) and PSYCH 5538 (or EDUC-R&P 5609).

PSYCH 5611 Theories & Methods Of Assessment & Intervention/Community Psych Credits: 3

Review of the assessment and intervention literature in social situations will be conducted. Students will design and carry out an assessment and an intervention project.

PSYCH 5612 Program Evaluation And Research Dissemination Credits: 3

A study of the area of applied research in which process and outcome characteristics of programs are related explicitly to a set of values, such as program goals, objectives and costs.

PSYCH 5614 Prevention Science I: Theories, Principles And Methods Credits: 3

Course provides a comprehensive overview of the field of prevention emphasizing basic concepts, conceptual models, and approaches associated with prevention in the field of psychology. The goal is to provide knowledge that will allow students to critically evaluate prevention programs in their communities. Students apply their learning by conducting a critical analysis of an existing community prevention and/or health promotion initiative.

PSYCH 5615 Prevention Science II: Applications Credits: 3

This advanced seminar is the follow-up course to Prevention Science I. Emphasis is placed on the application of prevention science to specific content areas (e. g., substance abuse, violence in schools physical or sexual abuse, AIDS/HIV infection, infant mortality, cardiovascular disease, promoting social competence.) A semester project involves an in-depth review of prevention efforts in the chosen area of interest, resulting in a comprehensive research proposal and/or public policy analysis.

Prerequisites: PSYCH 5614.

PSYCH 5620 Hierarchical Linear Models Credits: 3

Students will be introduced to hierarchical linear modeling techniques. Foundational topics include the rationale for using hierarchical linear models, issues related to assumptions and data screening, and a dissection of the components of a two-level organizational effects hierarchical linear model. Special topics to be discussed include growth modeling, three-level models, dyadic models, and models with categorical outcome variables (i.e., hierarchical generalized linear models). Multiple class sessions will be devoted toward use of software to build and analyze these models.

Prerequisites: PSYCH 5517 (or EDUC-R&P 5606) and PSYCH 5538 (or EDUC-R&P 5609).

PSYCH 5622 Theoretical And Ethical Issues In Professional Psychology Credits: 3

This course is designed to introduce first year doctoral students to the fundamental concepts and methods of psychology conceived as the application of scientific and ethical reasoning to human problems. It will provide an in-depth examination of the American Psychological Association code of ethics and its application to the conduct of psychologists. Critical and analytical thinking will be emphasized in all aspects of the course. The course will cover broad models of clinical and counseling psychology and their historical and scientific foundations, issues in diagnosis, cross-cultural applications and professional problems in light of ethical principles, professional standards, scientific data multicultural contexts.

PSYCH 5623 Methods Of Counseling In Professional Psychology Credits: 3

This course is designed to introduce students to the fundamental concepts and methods of counseling in professional psychology. Students will apply ethical and multicultural principles to the helping relationship while learning the basic methods of humanistic, psychodynamic, and cognitive behavioral approaches as they related to the helping process. A main focus of this course is the acquisition of basic helping skills. Students will also become familiar with counseling outcome research and will increase their level of counselor self-awareness.

Prerequisites: PSYCH 5622.

PSYCH 5625 Health Research Methods: Intro To Epidemiology & Clinical Trials Credits: 3

This course will introduce graduate students in health-related disciplines to research methods utilized in understanding disease and health risk in humans and conducting intervention trials. Students will learn about how epidemiology contributes to: 1) identifying factors that cause diseases; 2) assessing the public health importance of diseases; 3) describing the natural history of diseases; and 4) evaluating procedures for preventing or treating diseases. After completing this course, students should be able to read and summarize epidemiological research papers and answer questions about a study's purpose, design, methods of procedure, results, and major strengths and weaknesses.

Prerequisites: graduate standing; PSYCH 5601.

PSYCH 5631 Theoretical Foundations Of Health Psychology Credits: 3

This course will introduce students to the theoretical foundations of health psychology, including the Biopsychosocial model, individual and systems level theories of behavior change, stress and coping, disease prevention and health promotion, as well as adherence and relapse models. Upon completion of this course students will possess a broad understanding of how cognitive, behavioral, and social factors interact with biological parameters in influencing morbidity and mortality. In addition, students will become familiar with several substantive areas (e.g., chronic pain, HIV/AIDS, cancer, sleep disorders, cardiovascular risk reduction), research methods, and multicultural and ethical issues in health psychology.

PSYCH 5632 Health Psychology Interventions Credits: 3

This course will introduce students to a wide range of psychological assessment and intervention strategies that can be used in health care settings. Individual, group, community and policy interventions will be discussed. This course may be used for credit in the Health Psychology Discipline of the Interdisciplinary Ph.D. Program.

Prerequisites: PSYCH 5631.

PSYCH 5638 Seminar In Health Care Leadership Credits: 3

This course is designed to offer an educational experience that fosters both the knowledge and skills needed for leaders of healthcare in the future. The instructors will guide students through the process of generating new thinking, creating new knowledge, and enhancing interpersonal and professional effectiveness. Course topics will include what creates health and quality of life, social capital and health, healthcare policy, collaborative problem-solving, and transformational leadership and systems thinking.

PSYCH 5650 Clinical Practicum Credits: 1-6

Advanced supervised assessment and psychotherapy with individuals and groups in applied settings. Preregistration by application to instructor at least 60 days prior to the beginning of the semester. Approval by Psychology Director of Clinical training required.

Prerequisites: PSYCH 5623.

PSYCH 5660 Clinical Health Psychology Internship Credits: 1-6

Planned sequence of training experiences in an organized program designed to prepare students for the practice of professional psychology.

PSYCH 5696 Pre-Dissertation Credits: 1-12

Individualized research experiences to prepare students for the conduct of the dissertation.

PSYCH 5699 Research And Dissertation Credits: 1-16**PSYCH 5899 Required Graduate Enrollment Credit: 1**

Public Administration (PUB-ADM)

Courses

PUB-ADM 5507 Management in Context Credits: 3

This course introduces students to management in business, public, and nonprofit organizations, with an emphasis on the political, legal, regulatory, social, and global contexts. Students will take this course at the beginning of their M.B.A. program and will learn to integrate the course content into their other courses. They will apply theories and concepts to organizational issues, legal, and ethical problems. They will be exposed to the major differences between U.S. and international approaches regarding many management issues.

Prerequisites: Students must be enrolled in a Bloch School graduate program.

PUB-ADM 5510 Research Methods in Public Administration Credits: 3

This introductory course focuses on quantitative empirical research design and statistical analyses in relation to public administration issues and concerns.

PUB-ADM 5523 Public Policy and Industry Credits: 3

Private sector organizations are subject to the public policy process and decisions from executive agencies of the government. Public policy and industry enables students to build business acumen, cultivating an understanding of how public sector decisions impact strategic objectives. Specific attention will be devoted to the impact economic policies have on private sector organizations.

Prerequisites: Admission to the Executive MBA program.

PUB-ADM 5525 Financial Accountability And Policy Development Credits: 3

Modern fiscal policy and its administrative implications to planning, budgeting, revenue administration, accounting and appraisal, and the process for assuring accountability in the development, timing, and execution of public programs.

Prerequisites: PUB-ADM 5510.

PUB-ADM 5526 The Politics of Administration Credits: 3

This course will introduce the subject of public administration from a political perspective. Special attention will be given to an examination of the administrative branch of government. More specifically, the course will focus on the demands directed to administrators from various sectors of the political system, the ways in which administrators respond to those demands, and methods available for the analysis of public policies that help us assess the impacts that flow from administrators' actions.

PUB-ADM 5528 Supervision, Performance Leadership, & Human Resource Management Credits: 3

Focuses on the public service leader as a catalyst in developing and sustaining high-performance, outcome-based cultures and as a human resource strategist in marshaling the workforce. Geared to the work of nonprofit, health care, and government executives and managers, the course addresses strategies for developing, organizing, and mobilizing the workforce to accomplish the organization's mission. Topics include recruiting, engaging and retaining talent, including volunteers; developing and coaching subordinates; appraising and rewarding performance; delegation; and legal dimensions of HR, including anti-discrimination law.

Prerequisites: PUB-ADM 5548.

PUB-ADM 5529 Social Responsibility and Social Entrepreneurship Credits: 2

Using the social enterprise concept, students learn the theory that major companies can move social responsibility from a cost center to a profit center. In this evolving landscape, social entrepreneurs are at the vanguard of creating new business models for neglected markets that corporations can emulate, partner with or acquire to take to scale. As the traditional lines blur among nonprofits, government and business, it is critical that business students understand the opportunities and challenges in this new landscape.

PUB-ADM 5530 Capstone Seminar in Public Administration Credits: 3

This course examines theories of public organizational design, structure and change, including various issues in the administration of public organizations. Questions of professional ethics and management in the public interest are also considered. This is the final course in the MPA core curriculum.

Prerequisites: PUB-ADM 5525, PUB-ADM 5526, PUB-ADM 5544, PUB-ADM 5548 (or equivalents), or concurrent enrollment. Health-services students can substitute HLTH-ADM 5571 for PUB-ADM 5525, and HLTH-ADM 5578 for PUB-ADM 5544.

PUB-ADM 5535 Urban Policy and Administration Credits: 3

An examination of contemporary problems and issues found in urban environments. This includes exploration of the historical, political, economic, and social foundations of contemporary urban problems. Students will use general knowledge of public policy processes to develop skills, strategies, and knowledge necessary to analyze urban problems and develop policy solutions. An explicitly multi-sector focus will inform urban policy analysis and solutions.

PUB-ADM 5536 Managing Urban Economic Development Credits: 3

This course explores what managers in the public, nonprofit and private sectors need to know about urban economic development. Topics include (a) theories of urban economic development, (b) varying forms of development (e.g., attraction of new industries, central business district development, neighborhood economic development), (c) policy managerial tools for stimulating development, and (d) issues of equity in economic development.

PUB-ADM 5538 Comparative Urban Administration Credits: 3

An analysis of urban administration and planning in different comparative political, economic, and cultural settings. Analytical techniques will be applied to case studies of selected urban administrative processes involving American and other cities.

PUB-ADM 5539 Urban Planning for Public Administrators Credits: 3

This course is designed to provide students in urban administration with a comprehensive overview of the planning process. Course topics include a review of planning and the problems of effective planning implementation.

PUB-ADM 5540 Local Government Management Credits: 3

An examination of the challenges encountered in the local government management function and its role. Topics covered include political and organizational structure, service delivery, finance, personnel policies, intergovernmental relations, urban development, and leadership. The course includes presentations by practicing professionals, an emphasis on the case study method, and opportunities to analyze real-world issues and prepare recommendations for addressing them.

PUB-ADM 5541 Public Policy Development and Analysis Credits: 3

Public, nonprofit, and health organizations must navigate dense systems of complementary and contradictory public policies. These policies assign value to the actions of citizens, and are designed through a process of negotiation and analysis. In this course students will develop the frameworks and analytical methods necessary to understand the process of policy creation as well as the costs and benefits associated with any given policy, including the economic foundations for policy and the impact of policy on management decisions.

PUB-ADM 5544 Program Evaluation Credits: 3

Survey of the tools and procedures for evaluating and analyzing policies and programs in the public sector, including nonprofit and human services organizations. Consideration of such topics as definition of goals, developing measures of effectiveness, evaluation research designs, benefit-cost analysis, and the special problems of rational analysis in a political environment.

Prerequisites: PUB-ADM 5510.

PUB-ADM 5546 Socially Responsible Management and Ethics Credits: 2

An introduction to the context of management in business, public, and nonprofit organizations with a specific emphasis on the political, regulatory, social, natural and global environment of management. Students gain an understanding of organizations and management that can be used in day-to-day work environments, apply theories and concepts to identify organizational issues, problems, and/or ethical considerations. Working individually and in groups, students explain in written and oral formats, and in general and specific terms, what an organization is, how it works, and how it relates to them, to other organizations, and the environment.

PUB-ADM 5548 Leadership, Change and Social Impact Credits: 3

The two core purposes of this course are for students to learn about effective and ethical leadership, and for students to understand and develop their own capacity for leadership in dynamic, complex, and multisector environments. The course is organized around three general themes: 1) leadership as relations with subordinates, including issues of work motivation; 2) leadership as lateral relations, including organizational politics and conflict management and resolution; and 3) leadership as influence in the organization's environment.

PUB-ADM 5551 Managing Nonprofit Organizations Credits: 3

Managing Nonprofit Organizations is designed to prepare students for a career in executive management in private, nonprofit/nongovernmental organizations. The course examines the overall concepts of management and strategy in the nonprofit setting, and the role of board and executive leadership in providing strategic direction for the organization. The course addresses topics of special importance in the governance and strategic management of charitable nonprofit organizations, including organization development, board leadership, strategic planning, human resource management, organizational performance and effectiveness, and marketing.

PUB-ADM 5552 Community Organizations and Public Policy Credits: 3

This course includes examination of both neighborhood organizations and organizations intended to promote other communities of interest. In relation to neighborhood organizations, topics considered include the varieties of neighborhoods, the role of neighborhood organizations in local politics, the use of neighborhoods in administrative and political decentralization, and federal policy toward neighborhood issues. In relation to other community organizations, topics considered include the basis of such organizations, their roles in public affairs and their effects on policy processes.

PUB-ADM 5553 Legal Framework & Financial Management of Nonprofit Organizations Credits: 3

Utilizing a comparative approach the course examines the legal basis and tax treatment of private, nonprofit organizations in the U.S. Related topics also considered include concepts of fund and cost accounting, budgeting processes, earned income strategies, employee compensation and benefits practices, laws and regulations affecting lobbying, competition with business and unrelated business income tax.

PUB-ADM 5554 Seminar on Social Entrepreneurship Credits: 3

Seminar on Social Entrepreneurship is a graduate-level special-topics seminar that offers students from across the university the opportunity to engage in an In-depth examination of social entrepreneurship and how it is being understood, developed and practiced in the nonprofit sector. Students will gain a broad understanding of the various conceptions, types and aspects of social entrepreneurship, learn about processes for engaging in entrepreneurial nonprofit organization development, and discuss design and implementation issues with nonprofit leaders who have implemented various forms of social entrepreneurship.

PUB-ADM 5555 Topics In Nonprofit Fundraising Credits: 1-3

In order to flexibly treat the variety of strategies and techniques of charitable fundraising, these courses will usually be offered in variable credit hour segments, covering traditional and emerging fundraising topics. Each semester, two two-credit-hour segments and two one credit-hour segments will be offered. The two credit hour courses - "Organizing for Successful Fund Raising" and "Creating and Implementing the Annual Development Plan" - cover the basics of fund raising. The one-credit hour courses allow students to explore several different issues related to fund raising such as direct marketing and planned giving. These courses are recommended for nonprofit management students.

PUB-ADM 5555A Topics in Nonprofit Fund Raising: Organizing for Successful Fund Raising Credits: 2

Organizing for successful fundraising.

PUB-ADM 5555B Topics In Nonprofit Fund Raising: Creating & Implementing Annual Development Plans Credits: 2

Creating and implementing annual development plans.

Prerequisites: PUB-ADM 5555A.

PUB-ADM 5555C Topics in Nonprofit Fund Raising: Direct Marketing & Direct Mail in Fundraising Credit: 1

Direct marketing and direct mail in fundraising.

PUB-ADM 5555D Topics In Nonprofit Fund Raising: Planned Giving and Major Gift Solicitation Credit: 1

Planned Giving and Major Gift Solicitation.

PUB-ADM 5555E Topics in Nonprofit Fund Raising: Contemporary Trends/Ethical Issues in Fund Raising Credit: 1

Contemporary trends/ethical issues in fundraising.

PUB-ADM 5555F Topics in Nonprofit Fund Raising: Prospect Research and Proposal Writing Credit: 1

Prospect research and proposal writing.

PUB-ADM 5555G Developing Campaigns and Working with Consultants Credit: 1

In this course, various fund development campaigns and strategies will be explored; students will understand the differences between construction, renovation, equipment, program development and endowment as gift objectives. The phases of a campaign will be reviewed along with background on committee structures, goal-setting, leadership, timing and gift tables. The role of fund raising counsel will be explored. Participants will have an understanding of campaigns as important, episodic exercises for nonprofit agencies.

PUB-ADM 5555H Measurement and Evaluation for Fundraising Success and Social Impact Credit: 1

Nonprofit leaders can spend an enormous amount of time and effort creating evaluation models and reporting relevant data to funders to demonstrate positive social impact. Demonstrating success of a program or initiative is the basis for ensuring that a nonprofit has been a good steward of its mission and donated funds. However, the investment in building and fulfilling evaluation models must be commensurate with the funds awarded. This course will provide an overview of the planning and development of evaluation approaches that align well with the organization's and funder's needs. The course will introduce participants to the development and use

PUB-ADM 5555X Topics in Nonprofit Fundraising Credit: 1

Special topics in nonprofit fundraising.

PUB-ADM 5556 Innovation in Nonprofit Management and Leadership Credits: 3

This course provides an opportunity for students in the nonprofit management specialization to examine "breaking" innovations in nonprofit management and leadership. Intra- and inter-sectoral collaborative strategies and total quality management are illustrative examples. Other topics will be considered as warranted. Recommended preparation: PUB-ADM 5525, PUB-ADM 5548, and at least six hours of nonprofit management coursework.

PUB-ADM 5557 Nonprofit Fundraising and Development Credits: 3

Examines the processes and functions by which nonprofit organizations plan, organize, implement and evaluate the work of fundraising and development to secure the financial resources needed to support and sustain their programs and activities. Students gain an understanding of and practical experience in employing the basic approaches and techniques used by nonprofits to raise and deploy philanthropic resources, including annual and multi-year giving programs, major gift solicitation, planned giving initiatives, capital campaigns, and prospect research and proposal writing.

PUB-ADM 5558 Ethics for Nonprofit and Public Administrators Credits: 3

It is essential that organization and community leaders and managers understand the imperatives of ethical practice and ethical leader and manager behavior in nonprofit and governmental settings. Students are prepared to identify and assess the ethical implications of management and policy alternatives, to spot ethical issues before they become crises, and to competently and confidently develop and implement ethical decisions and actions in policy and practice. The ethical dimensions of democracy, political loyalty, pressure politics, interest group issues, pluralism, diversity and multi-cultural challenges, corruption and evil, honesty, the limits of ethical codes, whistle-blowing are included.

PUB-ADM 5559 Nonprofit Organizations in Context Credits: 3

This course provides a survey of the origins, development and contemporary functioning of the private, nonprofit sector in the U.S. The course explores theories and concepts that describe the social, political, legal and economic meaning of voluntarism, philanthropy and the nonprofit sector.

PUB-ADM 5565 Topics In Urban Administration Credits: 1-3

To flexibly treat the variety of strategies, information, and techniques in urban administration and leadership, these courses will be offered in variable credit hour segments. Each semester, courses will be offered around traditional and emerging topics. An initial "basics" series will be offered on community development organizations, urban economic development and community development strategies.

PUB-ADM 5565A Community Economic Development: The Planning Context Credit: 1

PUB-ADM 5565B Community Economic Development Tools & Techniques Credit: 1

PUB-ADM 5565C Implementing Effective Community Economic Development Credit: 1

PUB-ADM 5565D Topics in Urban Administration Credits: 1-3

To flexibly treat the variety of strategies, information, and techniques in urban administration and leadership, these courses will be offered in variable credit hour segments. Each semester, courses will be offered around traditional and emerging topics. An initial "basics" series will be offered on community development organizations, urban economic development and community development strategies.

PUB-ADM 5566 Urban Environmental Policy Credits: 3

Our cities are a first line of action in our efforts to sustain our environment. Many have begun to examine and address the connection between city problems and environmental and climate change, and the disproportionate impacts that they often have on the disadvantaged, yet these initiatives address only the surface of the issue. It is essential for scientists, public administrators, environmentalists, and policy thinkers to pay greater attention to the environmental challenges of our cities. Students examine and assess the challenge of understanding, developing and implementing coherent environmental policy to address such challenges in urban communities.

PUB-ADM 5567 Managing for Sustainability in an Urban Environment Credits: 3

Managing for sustainability requires an understanding of theories of organization, environmental management, and sustainability, including how to define and achieve sustainability. Students examine the complexities associated with issues of sustainability and the interrelationship between the global, the local and the personal. This includes consideration of how organizations function, the obstacles to sustainability confronted by sustainability managers, and specific management strategies and tools available to sustainability managers. It also involves the study of change models and their application by managers faced with the challenge of moving an organization from an old operational model to a more sustainable new organizational design.

PUB-ADM 5570 Diversity in the Workplace Credits: 3

This course explores the many issues raised by the growing diversity of backgrounds (e.g., race, gender, culture) employees bring to the workplace. The course will examine diversity issues including demographics, relevant legislation, values questions, demands on management, and effects on service delivery to clients. To better illustrate the issues, some class sessions will feature guest lecturers representing a diversity of backgrounds and work settings.

PUB-ADM 5573 Health and Social Equity Credits: 3

Examines the complex relationship between the social and political environment and health outcomes. All policy is health policy – economic, transportation, natural and built environments, schools. This course examines how social equity shapes health behaviors and how the life odds in different communities expose the historical legacies of past injustices. Only ten percent of health disparities are explained by access to care, although health care and health insurance dominate the public conversation. Draws on guest speakers, books, journal articles, popular press, film and art; as varied as are the social determinants of health, so are media that explore those relationships.

PUB-ADM 5581 Seminar In Urban Administration Credits: 3

Advanced work on special topics in urban administration. Topics will vary.

Prerequisites: PUB-ADM 5535.

PUB-ADM 5582 Developing the Social Enterprise Credits: 3

Developing the Social Enterprise is the offering of a new seminar that has been developed to provide an in-depth exploration and examination of nonprofit entrepreneurship and how it is being understood, implemented and practiced in the nonprofit sector. Developing the Social Enterprise is a graduate-level course that offers the opportunity to study in depth this oft-discussed yet often misunderstood phenomenon. Students will gain a broad understanding of the various conceptions, types and aspects of nonprofit enterprise, learn about processes for engaging in entrepreneurial nonprofit organization development, and discuss design and implementation issues with nonprofit leaders who have implemented some form of social entrepreneurship in their own organizations.

PUB-ADM 5585 Seminar In Public Affairs Credits: 3

Advanced work on special topics in public affairs.

PUB-ADM 5585A Seminar In Public Affairs Credits: 3

Advanced work on special topics in public affairs.

PUB-ADM 5585B Seminar In Public Affairs Credits: 3

Advanced work on special topics in public affairs.

PUB-ADM 5585C Seminar In Public Affairs Credits: 3

Advanced work on special topics in public affairs.

PUB-ADM 5587 Special Topics Credits: 3

Special topics in public administration.

PUB-ADM 5595 Internship Seminar Credits: 1-3

Combined classroom study and field internship. To be offered only when government agency internships approved by the Public Administration Committee are available.

Prerequisites: 18 credit hours of completed courses.

PUB-ADM 5598A Supervised Research: Nonprofit Management Credits: 1-6

PUB-ADM 5598C Supervised Research: Urban Administration Credits: 1-6

PUB-ADM 5598G Supervised Research: Unspecified Credits: 1-6

PUB-ADM 5599 Thesis Credits: 1-9

PUB-ADM 5610 Inquiry In Public Administration And Affairs Credits: 3

This course is designed to provide Ph.D. students a thorough grounding in strategies of inquiry. Issues considered include competing metatheoretical paradigms and alternative conceptions of explanation in the social and policy sciences, the implications of such alternatives for empirical research, the variety and standards of qualitative and quantitative approaches to theory and research, theory construction, and research ethics. Contemporary problems in public administration and affairs research and theory are emphasized.

Prerequisites: Doctoral student in the Interdisciplinary Ph.D. program.

PUB-ADM 5620 Literature of Public Affairs and Administration Credits: 3-6

This course grounds the student in the central ideas of the public affairs and administration literature and in the prominent themes of the discipline.

The course is offered in two versions: A, in which the political science approach to public affairs and administration is emphasized; and B, in which the organizational theory and behavior approaches to public affairs and administration are emphasized. Ph.D. students whose primary discipline is public affairs and administration are ordinarily expected to complete both versions.

Prerequisites: Doctoral student in the Interdisciplinary Ph.D. program.

PUB-ADM 5620A Literature Of Public Affairs And Administration: Political Science Credits: 3-6

Literature Of Public Affairs And Administration: Political Science. Prerequisites: PUB-ADM 5525, PUB-ADM 5526, and PUB-ADM 5544.

PUB-ADM 5620B Literature Of Public Affairs And Administration:Organizational Theory & Behavior Credits: 3-6

Literature Of Public Affairs And Administration:Organizational Theory Behavior.

Prerequisites:PUB-ADM 5530 and PUB-ADM 5548.

PUB-ADM 5699 Dissertation And Research In Public Affairs And Administration Credits: 1-12

Dissertation research and writing in the Public Affairs and Administration discipline.

PUB-ADM 5899 Required Graduate Enrollment Credit: 1

Reading (EDRD)

Courses

EDRD 5439 Language and Literacy Across the Disciplines Credits: 3

Principles and application of disciplinary literacy in the middle and secondary classroom. Class will be primarily composed of discussion and lecture.

As a part of the course, teacher candidates will inquire into and analyze disciplinary practices in 5-12 schools.

Prerequisites: Admission to the school of education.

EDRD 5501 Teaching Of Reading Credits: 3

This graduate language and literacy course explores foundational theories and research that have influenced literacy instruction and assessment in the United States. In particular, this course examines critical sociocultural theories and high leverage literacy practices for diverse learners.

Prerequisites: TCH-ED 415; No pre-requisites for students at the MA or EdSpec level.

EDRD 5502 Early Literacy and Language Development Credits: 3

This graduate language and literacy course emphasizes learning theories related to language acquisition, continuums of emergent literacy development, and corresponding teaching methods for literacy instruction and assessment of diverse learners. This course also prepares teachers and reading professionals to implement continuous professional learning related to language acquisition and emergent literacy with other teaching professionals.

EDRD 5510 Adolescent Practicum in Literacy Assessment and Intervention Credits: 3

This course ensures learners understand the purposes, strengths, and limitations of different literacy assessments in order to assess adolescent students' proficiencies. The course will focus on identifying cognitive, motivational, and sociocultural factors that contribute to literacy success for the adolescent student in order to design and teach literacy intervention lessons with a struggling adolescent reader. As part of the practicum experience, learners are trained on communicating assessment results and implications to a variety of audiences.

EDRD 5511 Advanced Literacy Assessment and Evaluation Credits: 3

This graduate language literacy course engages teachers and literacy specialists in building foundational knowledge, analyzing, and administering intelligence and achievement tests focusing on a range of skills and abilities. The course foregrounds research-based, developmentally-appropriate theoretical frameworks and measures of cognitive functioning and academic achievement, as well as formative and summative literacy assessment practices through a variety of advanced level methods.

EDRD 5515 Seminar In Reading Credits: 3

In this seminar, candidates will be introduced to the discourse of literacy research, understand commonly used practitioner research designs, become critical consumers of literacy research, and expand their knowledge of the extant body of literature on literacy and literacy for diverse learners.

Prerequisites: EDRD 5510.

EDRD 5520 Elementary Practicum in Literacy Assessment and Intervention Credits: 3

This culminating elementary practicum is designed for graduate students in Language Literacy. This course prepares teachers to demonstrate proficiency in meeting the literacy needs of struggling readers and diverse learners in an elementary school setting and engaging in peer coaching and active self-peer analysis in order to improve their own instructional practices. Note: As this is the culminating course in the degree program, students are encouraged to implement learning concepts, practices, and assessments from previous coursework as appropriate during this practicum course.

Prerequisites: EDRD 5502

EDRD 5530 Reading Instruction for K-12 English Language Learners Credits: 3

This course investigates ways to differentiate reading instruction to meet needs of English Language Learners with different levels of language proficiency and at different developmental and academic levels. The course focuses on research findings related to literacy development of diverse learners and ways to strengthen diverse classroom communities. This is an elective course in Language Literacy and does not have prerequisites.

EDRD 5540 African American English in Society and Schools Credits: 3

This course deals with the distinctive varieties of English used by and among African Americans, particularly in big-city settings, and their parallels elsewhere in Africa and the New World, especially in the Caribbean. The subject is approached from four perspectives that will be covered in the course: (1) Present-Day Features of African American Vernacular English (AAVE), its phonology, syntax, lexicon; (2) History and origins of AAVE; (3) Speech Events and Expressive Language Use (SEELU) Structure and function of such expressive African American Speech Events ; (4) Educational Issues connected with the use of AAVE.

Prerequisites: Open to graduate students enrolled in Language and Literacy Program. Open to graduate students enrolled in other programs or undergraduate students with permission of professor.

EDRD 5541 Teaching Reading Improvement: Secondary, College, and Adult Levels Credits: 3

Classroom and laboratory techniques for upper level reading instruction; including study skills; reading speed and flexibility, and vocabulary improvement.

EDRD 5601 Organizing And Guiding The Reading Program Credits: 3

This course examines, analyzes, and develops effective K-12 schoolwide literacy programs that include intervention support systems for responding to the needs of all students in diverse contexts. In addition, the course will focus on program goals, the roles and responsibilities of personnel, materials, fostering collaborative leadership, and creating a school culture that focuses on literacy.

EDRD 5650 Dyslexia and Related Learning Differences Credits: 3

This advanced level graduate language and literacy course analyzes theories of atypical literacy development, with a specific focus on identification and awareness of the ways that language processing affects speech, reading and spelling. Students will explore the coexistence of dyslexia with related learning differences and will plan instructional interventions for students with literacy special needs.

Real Estate (RL-EST)

Courses

RL-EST 5556 Entrepreneurial Real Estate Process Credits: 3

This interdisciplinary course adopts an entrepreneurial approach to the real estate process spanning concept generation, planning, research, acquisition, design, construction, finance, and investment. The course is open to students from various units across campus. Students will engage in experiential learning to sensitize them to the breadth of inquiry, critical thinking and analysis involved in contemporary real estate. Instruction focuses on creation of optimal spatial solutions for targeted users on targeted sites that are economically viable, sustainable and environmentally responsible. The course emphasizes the importance of focusing on value creation, control and capture across the full life cycle of real estate.

RL-EST 5571 Real Estate Finance Credits: 3

This course introduces students to the full spectrum of real estate finance and investment analysis. It helps students quantify the financial implications of various real estate decisions for individual properties as well as more strategic decision-making applied to real estate portfolios. Using a combination of experiential and incremental learning students develop the foundation skills necessary to support more advanced concepts and financial theory. The course explores time value of money, law, leverage, underwriting, discounted cash flow, investment analysis, and capital markets. Students also develop advanced modeling skills and learn how to apply state-of-the art financial packages to support decisions.

Prerequisites: RL-EST 5556.

RL-EST 5573 Real Estate Feasibility and Market Analysis Credits: 3

This course helps students develop entrepreneurial, fact-based approaches to problem-solving and decision support. It incorporates experiential learning to help students deploy quantitative and qualitative approaches that incorporate the perspectives of space users, space producers, and market facilitators. Students learn how to address the goals and objectives of a particular client, while also considering the externalities and impacts such decisions have on the built environment. Students will integrate critical thinking with spatial and financial analytical methods and state-of-the-art tools to quantify market demand and to translate that demand to a spatial solution that is marketable and financially feasible.

Prerequisites: RL-EST 5556.

RL-EST 5574 Real Estate Construction and Development Credits: 3

This course explores principles and techniques of construction project management and real estate development. Adopting a holistic perspective it places the production of real estate in a broader context of product life cycles drawing on systems analysis, planning, programming, budgeting and staffing, controlling major projects. Students apply experiential learning and assume the role of a developer who marshals the resources needed to produce real estate. It explores new projects and renovation of existing space with emphasis on customizing products to fit user needs. The course sensitizes students with emphasis on creating sustainable products that are socially responsible and economically viable.

Prerequisites: RL-EST 5556.

RL-EST 5576 Real Estate Property and Portfolio Management Credits: 3

This course explores the complexities and integration of property and portfolio management which are critical to the creation, control and capture of real estate value. Students learn how to approach real estate in a more holistic manner by integrating management functions that range from individual property types to portfolios of properties. Students learn how to incorporate marketplace factors in their decisions and apply modern portfolio theory and other tools to construct and manage properties and portfolios in a socially responsible manner. Using experiential methods students learn to apply critical thinking to solve complex property and portfolio management problems.

Prerequisites: RL-EST 5571.

RL-EST 5577 Real Estate Valuation Credits: 3

This course provides students with an understanding of real estate appraisal garnered through a combination of lectures, projects and discussions. Students explore valuation theory, behavioral processes, and the unique nature of the inefficient real estate market. Through hands on exercises that constitute the experiential learning students apply best practices embedded in the three approaches to value that underpin real estate appraisal: cost, income and sales comparisons. Students also analyze the impact of macroeconomic conditions, supply/demand conditions, capital flows, and investor behavior. Students develop proprietary valuation models and apply appropriate quantitative tools and software for predicting most probable prices.

Prerequisites: RL-EST 5556.

RL-EST 5578 Legal Context of Real Estate Credits: 3

This interdisciplinary course acquaints business and law school students with legal issues in development, ownership and operation of commercial real estate. It also explores the roles of various professionals in real estate transactions. Students will learn legal concepts and terminology, and acquire familiarity with key issues and documents relating to real estate decisions and entrepreneurship, including leasing, insurance, negotiations, construction and architect's contracts, transactions, regulation, financing and bankruptcy. Students learn how to apply risk management to design and construction contracts, insurance, bonding and indemnification, as well choice of business entity, income tax planning and negotiation of joint ventures.

RL-EST 5587 Special Topics Credits: 3

Special topics in real estate.

RL-EST 5595 Internship Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community.

RL-EST 5597 Real Estate: Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

RL-EST 5899 Required Graduate Enrollment Credit: 1

Religious Studies (RELIG-ST)

Courses

RELIG-ST 5500 Special Topics In Religious Studies Credits: 1-3

Special topics in religious studies. The focus of the course will vary by semester and instructor.

RELIG-ST 5500A Special Topics In Religious Studies Credits: 1-3

RELIG-ST 5500B Special Topics In Religious Studies Credits: 1-3

RELIG-ST 5500C Special Topics In Religious Studies Credits: 1-3

RELIG-ST 5500D Special Topics in Religious Studies Credits: 1-3

RELIG-ST 5500E Special Topics In Religious Studies Credits: 1-3

RELIG-ST 5500F Special Topics In Religious Studies Credits: 1-3

RELIG-ST 5501A Religion In America Credits: 3

An in-depth examination of selected aspects of the history of religions in America from the colonial period to the present. Special emphasis will be given to methodological issues in the study of American religious history.

RELIG-ST 5502 Religion & Colonialism in Latin America Credits: 3

The study of selected aspects of the history of religions in the Americas. Primary focus is on the complex ways that European, Native American Africans religions helped to structure and negotiate the experiences and the significance of cultural contact and colonialism through lived worlds of meaning.

RELIG-ST 5503 Visions, Dreams, and Prophecies as Religious Phenomena Credits: 3

This course explores the way visions, dreams, and prophecies have acquired religious significance in Western and non-western contexts from the ancient to the present.

RELIG-ST 5504 Gender and Religion Credits: 3

Cross-cultural and comparative study of how religious groups create and transmit gender roles and expectations.

RELIG-ST 5506 The History of Christianity to the Middle Ages Credits: 3

This course examines the historical and theological development of Christianity from its origins to the the High Middle Ages The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major social, institutional and intellectual force with a focus on patterns of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship.

RELIG-ST 5507 The History of Christianity from the Middle Ages to the Present Credits: 3

This course examines the historical and theological development of Christianity from the High Middle Ages to the present. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major social, institutional and intellectual force with a focus on patterns of crisis and reform. This course is based on the study of primary sources (both texts and objects) and modern scholarship.

Cross Listings: HISTORY 5507A.

RELIG-ST 5508 Anthropology of Religion Credits: 3

This course explores the ways anthropologists have gone about studying religion from the opening decades of the 20th century to present. The course introduces students to the diversity of human religious expression and experience through anthropological literature and to the diversity of anthropological expression especially as it has been revealed in social scientific studies of religious life. The course is designed to generate a critical dialogue about the special role that religion has played in the ongoing anthropological engagement with "other" societies and cultures over time.

RELIG-ST 5510 Religions Of The World Credits: 3

This course is designed to introduce graduate students to the major religions of the world, as well as to selected small-group religions. Our goal will be to learn to appreciate the similarities and differences in the structure and history of these religions. A primary focus will be on using the categories of the history of religions to examine and analyze the various dimensions of religion (e.g., historical, sociological, ritual, mythological, aesthetic). In addition, methodological issues of comparison will be addressed.

RELIG-ST 5567 Myth and Ritual Credits: 3

Myth and "ritual" have long been fundamental categories in the study of religion. This course will briefly survey some of the major theories and approaches to the study of myth and ritual from the Enlightenment to the present. Will not only trace the shifting meanings of "myth" and "ritual," but will critically evaluate the utility of diverse approaches to the study of religious phenomena designated by these terms. Reading will include theoretical works, as well as selected case studies.

RELIG-ST 5584RS Sacred Narratives And Texts Credits: 3

This course will study the "social lives" of sacred narratives and texts as they circulate within religious communities. Among the topics to be studied are methods of exegesis in different religious traditions, orality and literacy (including the reoralization of written texts), the canonization process, the emergence of interpretive specialists, text as amulets, reading and meditative practices and techniques, and narratives and the arts. The course is comparative, cross-cultural, and interdisciplinary in nature.

RELIG-ST 5586RS Methodological Approaches To The Study Of Religion Credits: 3

This course examines the various disciplines that undertook the critical, objective study of religion beginning in the second half of the nineteenth century and continuing into the present. The course examines how the disciplines of the social sciences and humanities emerged in the last century and how the study of religion emerged from its roots in Jewish scholarship and Christian theology to be included under the umbrella of the humanities and social sciences. The historical development of religious studies as a historical and intellectual contexts.

RELIG-ST 5587 Contemporary Approaches to the Study of Religion Credits: 3

A survey of major scholars and theorists of religion from 1950 to the present, with an emphasis on significant shifts in the field.

RELIG-ST 5587RS Research Seminar Credits: 3

Students in this course will produce a major research paper under the direction of the instructor: a self-contained thesis chapter, an article for publication or the equivalent.

RELIG-ST 5592 Cults Sects, And New Religious Movements Credits: 3

In this course, students will experience: (a) a variety of methods for analyzing and understanding new religious movements in society: sociological, historical, and textual; (b) an introduction to the broad spectrum of religious beliefs which exist (and flourish) outside the cultural mainstream; and (c) an introduction to some of the means by which dominant religious and secular culture has confronted the presence of NRMs-e.g., deprogramming exit counseling, and theologically oriented countermovement.

RELIG-ST 5593 Sex And Religion Credits: 3

The course is designed to highlight issues related to the various ways in which religions of the world have integrated, embraced, or repressed one of the basic human experiences sexual expression. This is an elective course designed for graduate students with Religious Studies either as their coordinating or co-discipline. This is an advanced seminar, and as such does assume a certain measure of theoretical familiarity and background of study.

RELIG-ST 5594RS Death In The History Of Religions Credits: 3

As a biological "fact," death would appear to be a human universal. Yet, human beings have imagined--and, thus experienced--the meaning of death in many diverse ways in different cultures and over time. This course explores the conceptualization and representation of death and dying, as well as the ritual activities surrounding death, found in selected religious communities. The goals are to gain insight into how people have sought to (re) create a world of meaning in the face of death and to gain a critical perspective on our own contemporary situation.

RELIG-ST 5595RS Time And Space In The History Of Religions Credits: 3

Time and space are essential components of the lived worlds of human beings, yet the cultural and historical constructions of these are remarkably diverse and, moreover, are subject to change. This course is a cross-cultural, interdisciplinary, and comparative exploration of the constructions and experiences of time and space found in selected religious communities and historical periods. In addition, it investigates the pivotal role the categories of "sacred and profane time and space" have played in theorizing religion and in the study of religious myths and rituals in the modern period. Time and space are essential components of the lived worlds of human beings, yet the cultural and historical constructions of these are remarkably diverse and, moreover, are subject to change. This course is a cross-cultural, interdisciplinary, and comparative exploration of the constructions and experiences of time and space found in selected religious communities and historical periods. In addition, it investigates the pivotal role the categories of "sacred and profane time and space" have played in theorizing religion and in the study of religious myths and rituals in the modern period.

RELIG-ST 5596RS Body In The History Of Religions Credits: 3

The human body is the site of extensive imaginal and ritual activities in all religious traditions. This course explores some of the diverse ways religious communities have imagined and experienced the human body, as well as how the body had been manipulated and worked on in an effort to transform the human situation in the world.

RELIG-ST 5597RS Non-Thesis Research/Reading Credits: 1-6

Individual direction of student reading or research by selected, consenting faculty. This course can be taken only when faculty supervision is unavailable in colloquia or seminars.

RELIG-ST 5598RS Seminar In The History Of Religions Credits: 3

Advanced graduate seminar on a selected topic or problem in the History of Religion. Topic varies, but the seminar will have a methodical or theoretical focus. May be repeated for credit when topic is different.

RELIG-ST 5680RS Doctoral Colloquium Credits: 3

This course will examine the writings and theories of major scholars in a particular area of Religious Studies. The authors, works and intellectual currents which form the basis of the colloquium will vary from semester to semester depending upon the professor's expertise and design for the course.

RELIG-ST 5687RS Doctoral Research Seminar Credits: 3

Students in this course will produce a major research paper under the direction of the instructor. This shall consist of a self-contained chapter of the dissertation or a work of publishable quality. May be repeated for credit.

RELIG-ST 5697RS Doctoral-Level Independent Readings Credits: 1-6

Individual reading under the supervision of members of the Religious Studies Doctoral faculty and adjuncts in preparation for the Comprehensive Examination for the Ph.D.

RELIG-ST 5699RS Dissertation Credits: 1-15

Course credits in dissertation.

RELIG-ST 5899 Required Graduate Enrollment Credit: 1

Research and Psychology (EDUC-R&P)

Courses

EDUC-R&P 5502 Advanced Educational Psychology Credits: 3

Critical examination of the contributions of psychological principles and findings to the field of education.

EDUC-R&P 5505 Statistical Methods I Credits: 3

Non-theoretical approach to statistical procedure, including introduction to simple analysis of variance.

EDUC-R&P 5508 Principles And Methods Of Research Credits: 3

Introduction to the analysis of research literature including types of research, methodology, design and data analysis.

EDUC-R&P 5510 Child Behavior And Development Credits: 3

Growth, maturation, and learning processes in children.

EDUC-R&P 5512 Adolescent Development and the School Credits: 3

An overview of development from preadolescence to adulthood, focusing on major theories and aspects of development, contemporary critical issues of the transitions from childhood to adolescence and into adulthood, and the role of professional educators in facilitating positive development .

EDUC-R&P 5513 Life Span Human Development Credits: 3

This course introduces students to the theories and research of biological, cognitive, social and personality development across the lifespan, within the layers of context of people's lives. Special attention is given to the role in development of social class, gender, ethnicity and culture.

EDUC-R&P 5522 Principles Of Testing Credits: 3

Measurement theory, uses and limitation of assessment procedure.

EDUC-R&P 5555 Statistical Methods II Credits: 3

Non-theoretical approach to statistical procedure, including introduction to factorial ANOVA and multiple regression.

Prerequisites: EDUC-R&P 5505.

EDUC-R&P 5564 Instructional Design Credits: 3

Overview of learning theories and pedagogical models as related to the principles and methods of instructional design. Emphasis on the planning, design, implementation and evaluation of instructional systems including focus on technology integration.

EDUC-R&P 5575 Internship Credits: 3-16

Applied experiences in a planned, supervised program in research or educational psychology.

EDUC-R&P 5589 Special Topics In Education Credits: 1-6

A course designed to deal with a topic in educational research or educational psychology which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed on the semester bulletin.

EDUC-R&P 5589AD Special Topics in Education Credits: 1-6

EDUC-R&P 5589AT Special Topics in Education Credits: 1-6

EDUC-R&P 5589CH Special Topics in Education Credits: 1-6

Special Topics in Education

EDUC-R&P 5589CP Special Topics In Education Credits: 1-6

EDUC-R&P 5589DB Special Topics In Education Credits: 1-6

A course designed to deal with a topic in educational research or educational psychology which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed on the semester bulletin.

EDUC-R&P 5589HL Special Topics in Education Credits: 1-6

EDUC-R&P 5589IS Special Topics in Education Credits: 1-6

EDUC-R&P 5589LP Special Topics in Education Credits: 1-6

EDUC-R&P 5589PE Special Topics In Education Credits: 1-6

EDUC-R&P 5589PR Special Topics In Education Credits: 1-6

EDUC-R&P 5589SC Special Topics in Education Credits: 1-6

EDUC-R&P 5589SE Special Topics In Education Credits: 1-6

EDUC-R&P 5590 Individual Studies Credits: 1-6

Review of the research and trends relative to selected problems in educational research or psychology.

EDUC-R&P 5605 Quantitative Analysis I: Regression And Analysis Of Variance Credits: 3

This graduate level statistics course for students in education and the behavioral sciences provides a strong conceptual understanding of two major statistical procedures within the context of the general linear model: Multiple regression and numerous analysis of variance (ANOVA) models. Students will learn to select appropriate statistical software, and report the results of their analyses in the format of the American Psychological Association.

Prerequisites: EDUC-R&P 5505 and EDUC-R&P 5508.

EDUC-R&P 5606 Quantitative Analysis II : Multivariate Data Analysis Credits: 3

This graduate level statistics course for students in the behavioral sciences and education provides a strong conceptual understanding of advanced topics in regression (interaction effects, logistic regression, path analysis) and various multivariate techniques (MANOVA, canonical correlation, factor analysis). Students will complete a series of data based projects that allow them to demonstrate their skills in analysis, reporting, and interpretation of findings.

Prerequisites: EDUC-R&P 5605 (or PSYCH 5516) and EDUC-R&P 5508.

EDUC-R&P 5608 Introduction To Graduate Research Credits: 3

This course provides an introduction to qualitative and quantitative research methods. It is designed for students beginning their study in a doctoral program.

Prerequisites: EDUC-R&P 5508 and doctoral student status.

EDUC-R&P 5609 Development and Evaluation of Assessment Tools Credits: 3

This survey course examines test theories, construction, and measurement theories. Within the context of a variety of conceptual frameworks and examples, students become knowledgeable about the various purposes, approaches, and computer software tools for measurement.

Prerequisites: EDUC-R&P 5606 or PSYCH 5517.

EDUC-R&P 5611 Structural Equation Modeling Credits: 3

Students will learn core techniques in structural equation modeling, including: path analysis, confirmatory factor analysis, structural regression models; and be introduced to advanced topics such as multi-group SEM and latent growth models. There will be multiple lab sessions using appropriate computer applications.

Prerequisites: EDUC-R&P 5606 (or PSYCH 5517) and EDUC-R&P 5609 (or PSYCH 5538).

EDUC-R&P 5612 Applied Quantitative Research in Education Credits: 3

This class provides an in-depth examination of experimental and non-experimental quantitative research techniques, with a focus on their application in educational research. Students develop a proposal for a quantitative research study, including review of literature, development of research questions and hypotheses; and selection of appropriate research design, data collection techniques, and statistical analyses.

Prerequisites: One semester of statistics at the doctoral level.

EDUC-R&P 5613 Hierarchical Linear Models Credits: 3

Students will be introduced to hierarchical linear modeling techniques. Foundational topics include the rationale for using hierarchical linear models, issues related to assumptions and data screening, and a dissection of the components of a two-level organizational effects hierarchical linear model. Special topics to be discussed include growth modeling, three-level models, dyadic models, and models with categorical outcome variables (i.e., hierarchical generalized linear models). Multiple class sessions will be devoted toward use of software to build and analyze these models.

Prerequisites: EDUC-R&P 5606 and EDUC-R&P 5609.

EDUC-R&P 5615 Qualitative Research Theory & Design Educational Setting. Part 1 Credits: 3

Students will be introduced to qualitative research theory and design.

Prerequisites: EDUC-R&P 5505 and EDUC-R&P 5508.

EDUC-R&P 5616 Qual Data Collection And Analysis In Educational Settings. Part 2 Credits: 3

Students will gain experience in qualitative data collection and analysis.

Prerequisites: EDUC-R&P 5615.

EDUC-R&P 5625 Program Evaluation For Education & Social Credits: 3

Program evaluation is an applied research area that focuses on providing summative and formative data about the progress of an organization or program. This doctoral seminar will focus on learning to identify the goals, objectives and assumptions inherent in a program, and on designing a methodology to assess progress towards the goals. All students will develop a comprehensive evaluation plan for a program of their choice.

Prerequisites: EDUC-R&P 5505, EDUC-R&P 5522, and EDUC-R&P 5508 or EDUC-R&P 5608.

EDUC-R&P 5639 Educational Psychology: Focus on Teaching in Higher Education Credits: 2-3

An introduction to theories and principles from educational psychology as they relate to learning, motivation, assessment, and instruction.

Prerequisites: Doctoral Student Status.

EDUC-R&P 5640 Apprenticeship And Conference In College Training Credits: 1-3

Apprenticeship experience in preparing, conducting, and evaluating college teaching under the direction of and in conference with supervising professors.

Prerequisites: EDUC-R&P 5639.

EDUC-R&P 5690 Special Problems Credits: 1-6

Individual studies; thesis exploration, special reading.

EDUC-R&P 5698 Dissertation In Educational Research & Psychology Credits: 1-16

Dissertation In Educational Research Psychology

Research Methodology - Dentistry (RES-ME)

Courses

RES-ME 5700 Introduction To Research Methodology Credits: 2-3

This lecture/discussion course will facilitate student's understanding of terminology and key concepts of research methodology and design. Assigned exercises are designed to demonstrate application of research design principles, and to increase advanced education students' competency in evaluating and planning scientific studies. This knowledge is indispensable for conducting meaningful research in advanced education certificate, masters of doctoral level programs.

RES-ME 5703 Thesis Writing Credit: 1

The methods of preparing, organizing, and presenting research findings using scientific writing format will be reviewed for completing a thesis. This course is required for the Master of Science degrees in Oral Biology and Dental Hygiene Education.

RES-ME 5704 Introduction to Biostatistics Credits: 2-3

A lecture/seminar course required for students pursuing a master's degree. This course focuses on an in-depth coverage of statistical designs commonly found in dental research, statistical techniques associated with these designs, application to them via the use of a computer based statistical software analysis package, and the interpretation of statistical tests.

Prerequisites: RES-ME 5700.

Saxophone (SAXOPH)

Courses

SAXOPH 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

SAXOPH 5500A Graduate Saxophone-Secondary Credits: 2

SAXOPH 5500B Special Applied Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

SAXOPH 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

SAXOPH 5500JA Graduate Applied Jazz Studies Credits: 2

One-hour lesson weekly. Jury examination is required.

Prerequisites: Graduate standing.

SAXOPH 5500JB Special Applied Jazz Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. A jury for comments only may be held at the discretion of the faculty.

Prerequisites: Graduate standing.

SAXOPH 5500JC Applied Jazz Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied jazz study in an area other than, and in addition to, their primary performance study.

Prerequisites: Graduate standing.

SAXOPH 5501 Graduate Saxophone - Masters Performance Credits: 4

SAXOPH 5601 Graduate Saxophone - Doctoral Performance Credits: 4

School of Graduate Studies (SGS)

Courses

SGS 5501 Disability and Community Support Credits: 3

This is an academic service-learning course that will integrate 15 classroom contact hours with 60 service hours within a framework of Disability Studies.

Prerequisites: LAW 8815S.

SGS 5590A Special Topics Credits: 1-6**SGS 5651A Preparing Future Faculty I Credit: 1**

Course is the first in a 6-course series focusing on teaching at a college or university and exploring the opportunities at, and differences among, various types of institutions of higher education. Course development and exploring the various roles and responsibilities of university faculty members are the emphases of the first two courses.

Prerequisites: Year I Preparing Future Faculty Fellow or doctoral student recommended by two faculty members in student's doctoral program.

SGS 5651B Preparing Future Faculty II Credit: 1

Course is the second in a 6-course series focusing on teaching at a college or university and exploring the opportunities at, and differences among, various types of institutions of higher education. Course development and exploring the various roles and responsibilities of university faculty members are the emphases of the first two courses.

Prerequisites: SGS 5651A.

SGS 5652A Preparing Future Faculty III Credit: 1

Course is the third in a 6-course series focusing on teaching at a college or university and exploring the opportunities at, and differences among, various types of institutions of higher education. The emphasis in SGS 5652A and SGS 5652B is on the teaching/classroom experience including using technology effectively. Students may enroll simultaneously in SGS 5651A and SGS 5652A.

Prerequisites: Year 2 Preparing Future Faculty Fellow, or recommendation by two faculty members in student's doctoral program.

SGS 5652B Preparing Future Faculty IV Credit: 1

Course is the fourth in a 6-course series focusing on teaching at a college or university and exploring the opportunities at, and differences among, various types of institutions of higher education. The emphasis in SGS 5652A and SGS 5652B is on the teaching/classroom experience with a focus on using technology effectively. Students who have completed SGS 5651A and SGS 5652A may enroll simultaneously in SGS 5651B and SGS 5652B.

Prerequisites: SGS 5652A.

SGS 5653A Preparing Future Faculty V Credit: 1

Course is the fifth in a 6-course series focusing on teaching at a college or university and exploring the opportunities at, and differences among, various types of institutions of higher education. The emphasis in SGS 5653A and SGS 5653B is on academic collaboration and preparing for the academic job market. Students may enroll simultaneously in SGS 5652A and SGS 5653A.

Prerequisites: EDUC-R&P 5639 and either Preparing Future Faculty Fellow or recommendation by two faculty members in student's doctoral program.

SGS 5653B Preparing Future Faculty VI Credit: 1

Course is the last in a 6-course series focusing on teaching at a college or university and exploring the opportunities at, and differences among, various types of institutions of higher education. The emphasis in SGS 5653A and SGS 5653B is on academic collaboration and preparing for the academic job market. Students who have completed SGS 5652A and SGS 5653A may enroll simultaneously in SGS 5652B and SGS 5653B.

Prerequisites: SGS 5653A.

Social Sciences (SOC-SCI)

Courses

SOC-SCI 5610 Philosophy Of Social Science Credits: 3

This course examines the development of the philosophy of science since the end of the 19th century. In this regard, Positivism, Conventionalism, and Realism as the three major conceptions of science will be studied and their significance as philosophical foundations of the social sciences will be assessed. Particular attention will be given to the emerging philosophy of science (i.e., Scientific Realism) which has profoundly challenged the more established Positivism.

SOC-SCI 5621 Consensus Social Theory Credits: 3

This course explicates the connections between mainstream (or orthodox) approaches in the various social sciences, which can be collectively viewed as Capitalist interdisciplinary social theory. Explication entails positivist philosophy of science, classic liberal political philosophy, neo-classical economics, pluralist political science, human ecology and functionalist sociology.

Prerequisites: SOC-SCI 5610.

SOC-SCI 5622 Pragmatism & Evolutionary Social Theory Credits: 3

Drawing on the classical pragmatism of Peirce and Dewey as the philosophical framework for inquiry, and the institutional economics of Veblen, Commons, Mitchell, and Ayres, this course develops Evolutionary Social Theory as a paradigm for interdisciplinary social science.

SOC-SCI 5630 Seminar in Research Methodology Credits: 3

This course assists students with the establishment of a framework for their dissertation research that represents a substantive integration of their coordination discipline with the SSC program. The ultimate goal of the seminar is a defensible dissertation proposal for each student. Includes opportunity for participation by supervisory committee members.

Prerequisites: SOC-SCI 5610, SOC-SCI 5621, and a course in Critical Theory.

SOC-SCI 5641 History of a Social Science Discipline Econ Credits: 3

The course examines the social and political development of economics that underpins the development of economic theory in the 20th century.

Prerequisites: SOC-SCI 5610.

SOC-SCI 5690 Special Doctoral Reading in Social Science Credits: 1-3

Special Research Topic in Interdisciplinary Social Science at The Doctoral Level

SOC-SCI 5690A Special Topics Credits: 1-3

SOC-SCI 5690B Special Topics Credits: 1-3

SOC-SCI 5690C Special Topics Credits: 1-3

SOC-SCI 5899 Required Graduate Enrollment Credit: 1

Social Work (SOC-WK)

Courses

SOC-WK 5510 Foundation Field Practicum I Credits: 3

Field practicum is a central component in the student's professional education. Field placements provide the student with a range of practice experience to incorporate theoretical learning and to develop the knowledge, values, and skills for professional social work practice. Learning takes place in community settings (16.25 hours weekly/260 hours per semester).

Prerequisites: SOC-WK 5530; SOC-WK 5534 (or as co-requisites).

Co-requisites: SOC-WK 5532, SOC-WK 5536.

SOC-WK 5511 Foundation Field Practicum II Credits: 3

The field practicum experience is continued from Foundation Field Practicum I (SOC-WK 5510), students will complete 16.25 hours weekly/260 hours in the spring semester. The foundation field practicum places emphasis on the application of skills for generalist social work practice in community settings preparing students for generalist social work practice within the micro, mezzo and macro frameworks.

Prerequisites: SOC-WK 5510; SOC-WK 5532; SOC-WK 5536; SOC-WK 5531 (or co-requisite); SOC-WK 5565 (or co-requisite).

Co-requisites: SOC-WK 5533; SOC-WK 5550.

SOC-WK 5512 Advanced Field Practicum I Credits: 3

The focus of the advanced field practicum is to develop mastery in the area of concentration by increasing skills in practice approaches, examining relevant policies, integrating theoretical learning and applying research knowledge. Field instruction takes place in community agency settings (16.25 hours weekly/260 hours per semester).

Prerequisites: SOC-WK 5511 or SOC-WK 5538.

Co-requisites: SOC-WK 5540, SOC-WK 5578.

SOC-WK 5513 Advanced Field Practicum II Credits: 3

The field practicum experience continues from Advanced Field Practicum I (SOC-WK 5512), completing 16.25 hours weekly/260 hours in the spring semester. The advanced field practicum places emphasis on the student's ability to select and use multiple approaches to social work within micro, mezzo and macro frameworks.

Prerequisites: SOC-WK 5512, SOC-WK 5540, SOC-WK 5578.

Co-requisites: SOC-WK 5541, SOC-WK 5579.

SOC-WK 5530 Human Behavior Theory Credits: 3

This course focuses on the critique, contextualization, and application of human behavior theory to social work practice with individuals in the social environment. The perspectives of social justice, empowerment, and strengths are emphasized.

SOC-WK 5531 Human Behavior: Macro Perspectives in the Social Environment Credits: 3

This theory course applies macro social work perspectives to the broader understanding of human behavior within large systems, organizations, communities, and society. Social justice, empowerment, and strengths perspectives are emphasized.

Prerequisites: SOC-WK 5530 (or co-requisite).

SOC-WK 5532 Foundation Social Work Practice I Credits: 3

This course examines the fundamental ethics, values, knowledge, and skills of generalist social work practice. In this course the first three steps of the Generalist Intervention Model are applied to effectively pre-plan, engage, and assess across all levels of practice (micro, mezzo, and macro).

Prerequisites: SOC-WK 5530, SOC-WK 5534 (or as co-requisites).

Co-requisites: SOC-WK 5510, SOC-WK 5536.

SOC-WK 5533 Foundation Social Work Practice II Credits: 3

This second generalist social work practice course involves interacting with evidence based practice models and group facilitation. Application of the final steps of the Generalist Intervention Model (planning, implementation/intervention, evaluation, termination, and follow-up) will be deployed across all levels of practice (micro, mezzo, and macro).

Prerequisites: SOC-WK 5510, SOC-WK 5532, SOC-WK 5536, SOC-WK 5531 (or co-requisite), SOC-WK 5565 (or co-requisite).

Co-requisites: SOC-WK 5511, SOC-WK 5550.

SOC-WK 5534 Social Welfare Programs and Policies Credits: 3

This course examines social policies that direct current social service trends at local, state, and federal levels. This course teaches a model of analysis that examines the context in which policy decisions are made and the effects that social service programs and policies have on people's lives.

SOC-WK 5536 Social Work Research Methods Credits: 3

This course introduces students to the fundamental knowledge and skills of social work research such as practice evaluation, program planning, and other facets of professional social work practice. Emphasis on application of social research methods in actual practice situations will be used to assist students in skill development.

Prerequisites: SOC-WK 5530; SOC-WK 5534 (or as co-requisites).

Co-requisites: SOC-WK 5510; SOC-WK 5532.

SOC-WK 5538 Advanced Standing Seminar Credits: 6

The Advanced Standing Seminar will provide a bridge between the bachelor of social work and the advanced level MSW Concentration year. This course is practice-centered and emphasizes knowledge, values, and skills, which are unique to social work and form our approach to generalist practice, human behavior, and research.

Prerequisites: Advanced Standing MSW Student.

SOC-WK 5540 Advanced Social Work Practice I Credits: 3

This course prepares students with an advanced generalist practice perspective in order to evaluate and integrate theory, values, and skills in a rapidly changing social work environment.

Prerequisites: SOC-WK 5511 or SOC-WK 5538.

Co-requisites: SOC-WK 5512.

SOC-WK 5541 Advanced Social Work Practice II Credits: 3

The course examines leadership, organizational, and management competencies for professional practice in social service agencies and skills for community organizing.

Prerequisites: SOC-WK 5540.

Co-requisites: SOC-WK 5512.

SOC-WK 5542 Gerontological Social Work Credits: 3

This course provides an overview of social service practice with older adults. The course examines population demographics, contextual aspects of aging, and approaches to effective advanced generalist practice in treatment and community settings.

SOC-WK 5544 Children, Families and their Communities: The Child Welfare System Credits: 3

This course examines child centered, family centered and neighborhood based child welfare policy and practice. Institute of Medicine reports and the Family First Prevention Services Act that funds evidence-based, research-informed and promising practices are closely examined in light of adoption of new programs and practices by Missouri and Kansas.

SOC-WK 5546 Behavioral Health and Addictions in Social Work Practice Credits: 3

This course provides the knowledge and skills necessary to effectively address mental illness, substance misuse or abuse, and co-occurring disorders within the framework of advanced generalist practice. In the course students will apply social work values, ethics, and competencies to advanced generalist practice skills with individuals, families, and groups experiencing mental health and substance abuse disorders.

SOC-WK 5547 Grief and Loss in Social Work Practice Credits: 3

This course provides a comprehensive study of grief and loss from a professional social work perspective that includes current theories, evidence-based frameworks, and intervention strategies from a strengths-based perspective. The course will address many forms of special losses, such as suicide, homicide, HIV/AIDS, war-related grief, bankruptcy, divorce and other life transitional events that may or may not involve death and dying.

SOC-WK 5549 Social Work Practice with Immigrants and Refugees Credits: 3

This course advances knowledge, skills and professional values for social work practice with immigrants and refugees covering the U.S. immigration system, migration processes, barriers to readjustment and cultural competency, and effective intervention on behalf of immigrants and refugees.

SOC-WK 5550 Program Evaluation Credits: 3

This course builds on the content of Research Methods and is designed to enable students to apply the methods of social research to the evaluation of Generalist Social Work Practice. This course employs an experiential learning technique that places students in an immersive experience that involves collaboration, research design, critical analysis of program intervention, and group process.

Prerequisites: SOC-WK 5510, SOC-WK 5532, SOC-WK 5536.

Co-requisites: SOC-WK 5531, SOC-WK 5565.

SOC-WK 5560 Psychopathology in Social Work Practice Credits: 3

This course utilizes the DSM to teach diagnostic criteria, while simultaneously examining ecological and systemic factors that contribute to diagnostic rates. Explore of the biopsychosocial factors which contribute to the accuracy and effectiveness of diagnosis and treatment will be covered.

Prerequisites: SOC-WK 5511 or SOC-WK 5538.

SOC-WK 5561 Social Work in Health Care Credits: 3

This course builds on a foundation of direct social work practice in the context of the health care systems in the United States. The social work role in the medical model will be analyzed along with the roles of nursing and allied health professionals.

Prerequisites: SOC-WK 5511 or SOC-WK 5538.

SOC-WK 5562 Family Organization and Development Credits: 3

This course focuses through The Family Life Cycle, a developmental stage theory that supports family-centered practice. The course provides skills to assess competent and constraining interactions and to use this assessment to identify contributing factors to family achievements and behaviors of concern.

SOC-WK 5563 Life Span Issues in Developmental Disabilities Credits: 3

The need for interdisciplinary process in the human services sector, which supports inclusiveness and quality of life of individuals, is covered. The course covers cultural competence, person-centered and community-based application of services for their implications in planning and delivery of services.

SOC-WK 5564 Advanced Group Interventions in Social Work Credits: 3

This course provides specialized learning in group interventions from an advanced generalist perspective. The course includes the broad spectrum of clinical uses for group as well as the application of group skills within community and administrative practice.

SOC-WK 5565 Systemic-Oppression: Social and Economic Justice Credits: 3

This course presents theoretical concepts that relate issues of social and economic injustice to structural and systemic oppression. This course examines formal and informal social policy that fosters the creation of support of oppressive social structures. A generalist and structural approach to social work engages the student in the examination of the barriers to justice and equality; ranging from internalization to globalization.

Prerequisites: SOC-WK 5534.

SOC-WK 5566 Family and Community Violence Credits: 3

This course examines the sources and forms of community and family violence and its impact on individuals, families and communities. Prevention and intervention models will be studied and developed.

Prerequisites: SOC-WK 5511 or SOC-WK 5538.

SOC-WK 5567 Collaborative Family-Centered Practice Credits: 3

This course presents the emergence, activities, and elements of collaborative family-centered practice. Multi-systemic Therapy and Wraparound are critically examined along with their implementation supports and challenges. Research supporting each model and its theory of change are closely examined.

SOC-WK 5568 School Social Work Practice Credits: 3

This course examines the knowledge and skills required for the roles and functions of school social work in K-12 settings. Students will apply various theories and evidence based practices to school social work, while developing an understanding of how to address the needs of students and their families within the context of school.

SOC-WK 5569 Core Concepts of Child and Adolescent Trauma Credits: 3

This course prepares students for trauma-informed, evidence-based practice. Based on core concepts, the course uses a problem-based learning approach through the use of in-depth case studies.

Prerequisites: SOC-WK 5511 or SOC-WK 5538.

SOC-WK 5575 Advanced Generalist Community Practice Credits: 3

This course covers community social work practice, addressing values, knowledge, and skills essential for community social change. Models of community practice are addressed to facilitate the development of skills in social planning, community development, and community collaboration strategies.

SOC-WK 5577 Sexuality in the Helping Professions Credits: 3

This course is a survey of issues related to integrating human sexuality across a lifespan in the practice of social services. Using a biopsychosocial perspective, emphasis will be placed on historical, political, social, cultural, familial, and individual differences in sexual and reproductive attitudes, values, and behaviors.

SOC-WK 5578 Capstone I Credits: 3

This course is the first half of a yearlong cohort-style course that provides concentration level MSW students the opportunity to critically and creatively present their field of interest in Social Work. The Capstone Course will integrate and apply all knowledge and skills learned previously in classroom, and will culminate in the student preparing for and presenting in the annual UMKC School of Social Work Conference held during the spring semester.

Prerequisites: SOC-WK 5512 (or co-requisite), SOC-WK 5540 (or co-requisite).

SOC-WK 5579 Capstone II Credits: 3

This course is the second half of a yearlong cohort-style course that provides concentration level MSW students the opportunity to critically and creatively present their field of interest in Social Work. The Capstone Course will integrate and apply all knowledge and skills learned previously in classroom, and will culminate in the student preparing for and presenting in the annual UMKC School of Social Work Conference held during the spring semester.

Prerequisites: SOC-WK 5513 (or co-requisite).

SOC-WK 5580 Special Topics In Social Work Credits: 1-3

These seminars are designed to examine relevant and innovative areas emerging in social work practice which are not available in the regular course offerings. Topics, instructors, and prerequisites are listed in the semester bulletin.

Prerequisites: Completion of foundation year.

SOC-WK 5590 Readings And Investigations In Social Work Credits: 1-3

Under the direction of a faculty member, individual students may pursue an in-depth area of study in generalist social work practice, including a research project of the student's choice.

SOC-WK 5899 Required Graduate Enrollment Credit: 1

One Hour Course required to remain continuously enrolled while the student finishes requirements for the Social Work degree.

Prerequisites: Permission of the Department

Sociology (SOCIOL)

Courses

SOCIOL 5501 Social Theory I Credits: 3

Examines the development of social theory in Europe up to the beginning of the twentieth century, with a focus on its intellectual precursors of social theory, debates over the nature of society, and controversies over the distinct features of sociology as an emerging academic discipline. The major perspectives covered include the intellectual origins of sociological thought in Great Britain, France, and Germany, and the debates as reflected in the writings of Karl Marx, Emile Durkheim, Max Weber, and Georg Simmel.

Prerequisites: undergraduate course in Sociological Theory.

SOCIOL 5502 Social Theory II Credits: 3

Examines the major sociological theories developed during the twentieth century and contemporary debates over the nature of society and the nature of our knowledge about society. Theories to be examined include behaviorism, symbolic interactionism, structural functionalism, phenomenology, conflict theory, postmodernism, those that attempt to integrate social agency and structure, and feminist theory.

Prerequisites: SOCIOL 5501.

SOCIOL 5503 Controversies In Contemporary Social Theory And Practice Credits: 3

This course critically examines central issues in contemporary debates among social theorists over the nature of society and how it should be studied.

SOCIOL 5510 Sociological Methods I Credits: 3

A survey of methods used by sociologists: selection and formulation of problem, research design, survey research, participant observation, sampling, reliability and validity, use of scales, and data analysis.

Prerequisites: SOCIOL 362.

SOCIOL 5511 Sociological Methods II Credits: 3

Quantitative research is the primary focus of the course; emphasis is placed on problem formulation; research design; sampling procedures; questionnaire construction and interviewing techniques; data collection; problems of scaling, validity and reliability; uses of secondary data sets; data analyses and report writing.

Prerequisites: SOCIOL 362.

SOCIOL 5516 Intermediate Statistics Credits: 3

A systematic development of the logic and practice of selected statistical methods used in sociological research. Included are analysis of variance and covariance, regression analysis, multiple contingency, and non-parametric tests.

Prerequisites: SOCIOL 363 or CJC 303.

SOCIOL 5530 Anthropology Of Gender Credits: 3

This class explores theories of the social construction of gender in cross-cultural contexts. It will also explore global issues of diversity, local and international politics, the economy and work, education, etc.

SOCIOL 5531 Feminist Theories Credits: 3

This class introduces the major feminist theories and their primary authors over the last 200 years. The class takes both an historical (we begin with two millennia of male-centered theories about women) and a conceptual approach (theories are grouped by common ground) and familiarizes the student with both the historical processes that necessitate feminist theories as well as with the breadth of the historically and currently available scholarship. Graduate students are expected to fulfill all undergraduate requirements at graduate-level quality, including independent research components; in addition, graduate students are required to be prepared to lead class discussions.

Prerequisites: WGS 201.

SOCIOL 5534 Spatial Thinking in Social Science Credits: 3

This course will review ways in which social scientists have incorporated the concepts of space, place, and distance into their theories and research. Readings will be drawn from interdisciplinary work in the areas of urban sociology, criminology, health and demography that deal with spatial organization of communities and cities, spatial disparity of health and crimes, and mobility. Generic computer file management skills are required and knowledge of research methods is desirable.

SOCIOL 5537 Anthropology of Religion Credits: 3

This course explores the ways anthropologists have gone about studying religion from the opening decades of the 20th century to present. The course introduces students to the diversity of human religious expression and experience through anthropological literature and to the diversity of anthropological expression especially as it has been revealed in social scientific studies of religious life. The course is designed to generate a critical dialogue about the special role that religion has played in the ongoing anthropological engagement with "other" societies and cultures over time.

SOCIOL 5538 Gender, Work And Social Change Credits: 3

This course examines the role of gendered work and consumption in global social change. Drawing from sociological perspectives on gender and work, this course foregrounds a global comparative analysis of societal development and working contexts, including tourism employment, sex work, domestic work, and agricultural, garment, and informatics production. Graduate students are required to carry out independent research or complete work in the area of public sociology and academic-service learning. Students will write a conference paper or journal quality article from this research.

SOCIOL 5540 Urban Social Structure Credits: 3

An examination of the social structure of the American city with special reference to the historical development of American cities. Attention will be focused on the role of social institutions as they have changed in relation to urban problems.

SOCIOL 5550 Sociology Of Aging Credits: 3

A seminar in which theoretical orientations, methodologies, and findings from crosscultural and community research in gerontology are systematically reviewed, within a social change framework.

SOCIOL 5554 Sociology Of The Aging Woman Credits: 3

An exploration of the intersection of gender and aging issues with special attention to cultural images of women, the development of self-concept and identity in mid-life and beyond, caring roles in the family, work and retirement, and health and mental health issues. These issues are examined within the context of social class, race, and ethnicity. Implications for community programs and social policy are considered. Graduate students will be expected to carry out a research project and to lead a class session.

SOCIOL 5556 Aging And Developmental Disabilities Credits: 2

This course explores the experience of aging with a developmental disability or mental retardation within the context or normative aging. Among the comparisons made between older persons with and without developmental disabilities are their demographic characteristics, physical and cognitive functioning, role transitions and losses, identities and self-concepts, and family and caregiving issues. Policies, programs, and emerging concepts of best practices are considered within the context of quality of life, ethical, and community inclusion bases.

SOCIOL 5557 Practicum In Aging And Developmental Disabilities Credit: 1

Students gain experience in working with and defining issues of older persons with developmental disabilities through placements in sheltered workshops, senior centers, residential group homes, and other community-based programs.

Co-requisites: SOCIOL 5556.

SOCIOL 5560 Sociology Of Death And Dying Credits: 3

This course examines attitudes, behaviors, and institutions related to death and dying in contemporary American society. Topics include the meanings of death in American society, social settings for dying, interaction with the dying, customs and practices surrounding death, role transitions of survivors, and suicide. Special attention is given to issues of aging and dying.

SOCIOL 5573 Latin American Immigrants and Refugees in the U.S. Credits: 3

This course is the study of history, culture and societies of immigrants and US citizens of Latin American heritage living in the U.S.

SOCIOL 5580 Special Studies In Sociology Credits: 1-3

An opportunity to explore in depth topics not included in usual course offerings. One or more topics will be announced in advance of registration.

SOCIOL 5595 Directed Research Experience Credits: 3

Research project supervised by faculty.

SOCIOL 5597 Independent Readings Credits: 1-3

Intensive readings in an area selected by the student with prior consultation with the instructor.

SOCIOL 5599 Thesis And Research Credits: 1-6

Directed specialized research. Before writing a thesis, the student must clear the topic and research design with the Supervisory Committee. The course also involves the writing of the thesis.

SOCIOL 5699 Dissertation Research Credits: 1-12

Individual directed research leading to preparation and completion of doctoral dissertation.

SOCIOL 5899 Required Graduate Enrollment Credit: 1

Spanish (SPANISH)

Courses

SPANISH 5503 History of the Spanish Language Credits: 3

An introduction to the history of the Spanish language from Latin to the present, with an overview of dialects in the Peninsula and in the Americas.

Prerequisites: SPANISH 325 or higher grammar class.

SPANISH 5514 Spanish Literature Credits: 3

Selected readings in Spanish narrative, poetry, drama and philosophical essay from the beginning of the 20th Century to the Avant-Garde movements in the 1930's.

SPANISH 5516 Medieval Spanish Literature Credits: 3

A study of selected medieval masterpieces in their Old Spanish form, with special emphasis on Romances, the Cantar de Mio Cid La Celestina, El Corbacho, Libro del buen amor, etc. Includes a short history of the Spanish language.

SPANISH 5519 Federico Garcia Lorca Credits: 3

A study in depth of the poetry and drama of Federico Garcia Lorca.

SPANISH 5520 Cervantes' Don Quixote, Part 1 Credits: 3

An intensive reading of the first part of Cervantes' novel, Don Quixote.

SPANISH 5521 Cervantes' Don Quixote, Part II Credits: 3

An intensive reading of the second part of Cervantes' novel, Don Quixote. Part One is not a prerequisite.

SPANISH 5526 Golden Age Drama Credits: 3

A study in depth of the creation of national theater by Lope de Vega and his followers.

SPANISH 5527 Pre-Columbian and Spanish Colonial Literature Credits: 3

A study of pre-Columbian works in drama, narrative, and poetry (Popol Vuh, Apu-Ollantay, Incan and Aztec poetry) along with a survey of Spanish-American colonial literature.

SPANISH 5528 Contemporary Spanish Poetry Credits: 3

A comprehensive and intensive study of 20th-century Spanish poetry. The poets and their poetry will be studied in the light of literary movements, foreign influences, political tendencies and philosophical ideas.

SPANISH 5529 Novel of the Mexican Revolution Credits: 3

The revolution as the principal focus of 20th-century Mexican fiction. The course will examine both the evolving understanding of the event/process and the sophistication of narrative technique employed in its presentation. Among the writers to be studied are Azuela, Guzman, Lopez y Fuentes, Yanez, Revueltas, Rulfo and Fuentes.

SPANISH 5530 Spanish Mysticism Credits: 3

An examination of the development of mysticism in Oriental and Occidental civilizations, with emphasis on the great periods of mystic experience as reflected in the literary production of the Spanish Golden Age. Readings could include the works of Fray Luis de Granada, Fray Luis de Leon, Saint John of the Cross and Saint Teresa of Avila.

SPANISH 5531 The Golden Age Novel Credits: 3

A study of major prose works of the Golden Age. Possible topics include authorship, innovative narrative techniques, textual strategies and metafiction issues. Readings could include works by Alfonso Martinez de Toledo, Diego de San Pedro, Fernando de Rojas, Francisco Delicado, Cervantes, and Lope de Vega.

SPANISH 5532 Pastoral Literature Credits: 3

A study of the development of pastoral literature during the Spanish Golden Age. Possible texts: Juan del Encina's Eclogues, Montemayor's Los siete libros de la Diana and Cervantes' Galatea. These works will be examined within their historical and cultural context.

SPANISH 5533 Cervantes' Exemplary Novels Credits: 3

A study of Cervantes' Exemplary Novels within the context of 17th Century Spain. Attention will be paid to interpretive possibilities and how knowledge of historical contexts might influence readings of this rich and varied cultural output.

SPANISH 5534 The Picaresque Novel Credits: 3

A study of the development of picaresque fiction during the Spanish Golden Age. The course deals with novelists principally active during the Baroque period such as Mateo Aleman, Francisco Lopez de Ubeda, Miguel de Cervantes, and Francisco de Quevedo.

SPANISH 5535 Peninsular Poetry Credits: 3

This course is a survey of poetics and poetry in Spain from the Reconquest to the present, with emphasis on sociohistorical contexts and movements. It examines theoretical and methodological approaches to literary analysis and also provides practical experience in exploring poetic texts. Students will analyze a wide spectrum of poems, while discussing the cultural philosophical, linguistic, political and ethical considerations that surround the reception of a text.

SPANISH 5536 Spain's Transition to Democracy: Literature and Film Credits: 3

This course reviews the cultural production between the death of Francisco Franco in 1975 and the entrance in the European Union, in film, literature and music, within its historical and political context.

SPANISH 5550 Modern Classics of Latin American Literature Credits: 3

The goal of the course is to familiarize the student with the principal Latin American writers of the modern period. The focus will be dual: the progressive sophistication of literary technique, and the refinement of social conscience. Among the authors to be studied are: Asturias, Borges, Carpentier, Cortazar, Donoso, Fuentes, Garcia Marques, Paz, Rulfo, and Vargas Llosa. Pre requisite: SPANISH 315 or SPANISH 325.

SPANISH 5553 Spanish-American Short Story Credits: 3

A study of Spanish-American short stories from Romanticism to the present.

SPANISH 5580 Special Topics Credits: 1-3

Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes.

SPANISH 5580D Special Topics Credits: 1-3**SPANISH 5590 Directed Studies in Spanish & Latin American Literature Credits: 1-3**

Intensive readings in a field or literary figure to be selected by the student in consultation with the instructor. Available by permission of graduate advisor or instructor, as appropriate, only when student cannot take regularly scheduled courses.

Special Education (EDUC-SP)

Courses

EDUC-SP 5506 Special Education Law, Individualized Education Programs (IEP's), and Transition Credits: 3

This course provides students with knowledge of special education law, the individualized education program (IEP), and transition-related instruction i.e., preparation for post-high school education employment, independent living, and community integration) for students with disabilities. Prior to taking the course, a background check must be completed in order to do the required 10-hour field experience for this course. The field experience will include observation of meetings with families and other professionals.

Prerequisites: Master's student status.

EDUC-SP 5507 Introduction To Mild/Moderate Cross-Categorical Disabilities Credits: 3

This is the initial foundations course in the master's degree sequence in special education of children and youth with mild/moderate disabilities including learning disabilities (LD), emotional/behavioral disorders (EBD), mental retardation (MR), and physical and other health impairments (POHI). It is designed to provide candidates who are new to the field of special education with a foundation for working with students who have exceptional learning needs. Prior to taking the course, a background check must be completed in order to do the required 10-hour field experience for this course. The field experience will include observations and working with children and youth with disabilities.

Prerequisites: TCH-ED 404.

EDUC-SP 5508 Assessment for Special Educators Credits: 3

This is a foundations course in the master's degree sequence in special education of children and youth with mild/moderate disabilities. The purpose of this course is to provide understanding and practice in formal and informal evaluation. This course is applicable to candidates who plan to work either directly (special educators) or indirectly (special education administrators) with students with exceptional learning needs and to engage in critical analysis of assessment issues confronting the field of special education. Prior to taking the course, background check must be completed in order to do the required 10-hour field experience for this course. The field experience will include observations and working with children and youth with disabilities.

Prerequisites: EDUC-SP 5507, EDUC-SP 5513.

EDUC-SP 5509 Cognition & Lang Dev In Mild/Mod Cross-Categorical Disabilities Credits: 3

This is a specialized methods course in the master's degree sequence in special education of children and youth with mild/moderate disabilities. This course examines normal and atypical development and cultural and linguistic diversity of students with exceptional learning needs. Candidates will practice collaborative and reflective decision-making and problem solving in areas such as: (a) developmentally sequenced activities, (b) receptive and expressive language, and (c) communication and augmentative communication skills. The field experience will include working observations and working with children and youth with disabilities.

Prerequisites: Background check, EDUC-SP 5507, EDUC-SP 5513.

EDUC-SP 5510 Practicum in Special Education Credit: 1

The purpose of this course is to provide a field-based experience in a setting with students with mild/moderate cross-categorical disabilities. This field experience affords candidates classroom experience either in their own instructional settings or under the tutelage of a master teacher. Placement sites reflect the multicultural diversity found in special education classrooms (K-12). The practicum will include observations, working with children and youth with disabilities individually and in small groups, as well as lesson preparation and presentation.

EDUC-SP 5511 Practicum II – Special Education Credit: 1

Provides second tier field-based experience in a setting with students with mild/moderate cross-categorical disabilities. This field experience affords candidates classroom experience either in their own instructional settings or under the tutelage of a master teacher. Placement sites reflect the multicultural diversity found in special education classrooms (K-12). Experiences include observations, working with children and youth with disabilities individually and in small groups, as well as lesson preparation and presentation.

Prerequisites: EDUC-SP 5510.

EDUC-SP 5512 Methods I: Introduction to Teaching Students with Mild/Moderate Cross-Categorical Credits: 3

Examines theories and practices which are effective in addressing learning difficulties of students with mild-moderate disabilities. Focuses on understanding learner characteristics with the purpose of differentiating instruction related to academic, behavioral, and social skills presented by students with mild/moderate disabilities.

Prerequisites: Admission to the Special Education program.

EDUC-SP 5513 Methods II: Teaching Students with Mild/Moderate Cross-Categorical Disabilities Credits: 3

Candidates learn academic and behavioral strategies to plan instruction, deliver instruction, and evaluate student and teacher performance in order to promote critical thinking and content literacy across all content areas, including science, mathematics, reading, writing, and social science. Prior to taking the course, a background check must be completed in order to do the required 10-hour field experience for this course. The field experience will include observations and working with children and youth with disabilities.

Prerequisites: EDUC-SP 5512.

EDUC-SP 5514 Understanding and Addressing Challenging Behavior in the Classroom Credits: 3

An examination of validated practices based on principles of Applied Behavior Analysis for managing challenging behaviors, facilitating formal behavioral assessment, creating positive behavioral supports, conducting functional behavioral assessments, and developing behavior intervention programs. Candidates reflect critically on social/affective curricular goals for children and youth with mild-moderate cross-categorical (MM/CC) disabilities and relate the theoretical, research, and practical strategies of behavior change models in an applied setting. Experiences include interactions with teachers, parents, and paraprofessionals, in order to understand and remediate student behavior problems. **Prerequisites:** Admission to program, EDUC-SP 5515.

Prerequisites: Prior to taking the course a background check must be completed in order to do the required 10 hour field experience for this course. The field experience will include observations and working with children and youth with disabilities.

EDUC-SP 5515 Applied Behavior Analysis for Teachers: Understanding and Applying Theories of Behavior Credits: 3

This course is designed as an introductory graduate level class on behavior and is the first of two courses on behavior. The course addresses aspects of managing and motivating learners with special needs placed in general education settings based upon the principles of Applied Behavior Analysis (ABA). Topics include student acquisition of knowledge and skills related to ABA behavior principles theory and history of ABA, ethical considerations of ABA, understanding the principles of reinforcement and punishment, identifying the nature of consequences maintaining or decreasing specific behaviors; and operationally defining behavior. Prior to taking the course a background check must be completed in order to do the required 10 hour field experience for this course. The field experience will include observations and working with children and youth with disabilities.

EDUC-SP 5516 Collaborating with Families and Other Professionals Credits: 3

This is a methods course in the master's degree sequence in special education of children and youth with mild/moderation disabilities. The course presents principles and procedures for fostering collaborative partnerships among family members, caregivers, educators, and human service personnel that lead to outcomes of individual and mutual empowerment. Candidates will engage in reflective thinking on their personal philosophical beliefs and interweave these beliefs with the skills needed to work with the multicultural issues facing families of children and youth with mild/moderate cross-categorical disabilities and other professionals. Prior to taking the course a background check must be completed in order to do the required 10 hour field experience for this course. The field experience will include observations and working with families of children and youth with disabilities and education professionals.

EDUC-SP 5517 Characteristics, Hist & Thrys: Emotional Disturbance In Children Credits: 3

An investigation of theories, classification, etiology, incidence, and characteristics of children with emotional/ behavioral disorders.

EDUC-SP 5570 Student Teaching in Special Education Credits: 8

This is the final clinical course in the master's degree sequence in special education of children and youth with mild/moderate disabilities. The purpose of this course is to provide a field-based experience in a setting where candidates will be fully responsible for designing curriculum and teaching students with mild/moderate cross-categorical disabilities. Placement sites reflect the multicultural diversity found in special education classrooms (K-12). This course requires candidates to apply content learned throughout the master's degree program in an authentic setting. Student teaching involves a full time commitment to the field for 16 weeks.

Prerequisites: EDUC-SP 5510, EDUC-SP 5511, Background check.

EDUC-SP 5589 Special Topics In Education Credits: 1-6

A course designed to deal with a special education topic which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed on the semester bulletin.

EDUC-SP 5598 Individual Studies Credits: 1-6

Review of the research and trends relative to selected problems in special education.

Statistics (STAT)

Courses

STAT 5501 Statistical Design Of Experiments Credits: 3

This course is designed to present a variety of experimental design techniques to students with moderate mathematical and statistical background. The course includes three major components: efficient factorial designs, linear and quadratic process optimization of the location parameter, and variability reduction. Students will be trained to use the SPSS statistical software package.

Prerequisites: STAT 436.

STAT 5537 Mathematical Statistics I Credits: 3

Probability theory, distribution functions, sampling, statistical inference, topics in advanced applied statistics. Continued in STAT 5547.

Prerequisites: MATH 402.

STAT 5547 Mathematical Statistics II Credits: 3

Continuation of STAT 5537.

STAT 5551 Applied Statistical Analysis Credits: 3

Methods for analyzing data from experiments and observational studies; design-based and model-based inferences; model assessment; ANOVA; power analysis; SAS procedures.

Prerequisites: STAT 441.

STAT 5561 Time Series Analysis Credits: 3

This course is intended to present the basis knowledge (including models, methods and concepts) of time series analysis to students with a good background in intermediate mathematical statistics. Some elementary knowledge of basic linear regression analysis would be helpful but not necessary. The presentation will be balanced between theory and data analysis, with sufficient theory to understand the basis of methods and a broad variety of models and many real data examples. Case studies will be drawn from business and economics, network traffic and meteorology, and data will be analyzed by students using existing computer programs (SAS, Minitab and R). Students are also expected to understand proper use and limits of time series models.

Prerequisites: STAT 441.

STAT 5565 Regression Analysis Credits: 3

Simple linear regression; multiple linear regression; correlation analysis; model selections; checking assumptions; regression diagnostics; combating multi-collinearity; nonlinear regression.

Prerequisites: STAT 441.

STAT 5572 Multivariate Analysis Credits: 3

Random vectors; multivariate normal distributions; Hotelling's T-square distribution; Wishart distribution; inferences on one mean vector; MANOVA; inferences on covariance matrices; profile analysis.

Prerequisites: MATH 420 and STAT 441.

STAT 5575 Stochastic Calculus for Finance Credits: 3

This course presents the basic idea and theory of stochastic calculus with the focus on the applications to finance. Topics include Brownian motion, Ito integral, Ito formula, Black-Scholes equation and formula, risk-neutral pricing, connections with partial differential equations, exotic options, American derivative securities, and term structure models for interest rates.

Prerequisites: MATH 402 and STAT 436.

STAT 5576 Probability Credits: 3

Existence and extension of measure, random variable, expectation and its properties, types of convergence, law of large numbers, weak convergence, central limit theorem, and martingale.

Prerequisites: STAT 436 and MATH 5513.

STAT 5578 Advanced Mathematical Statistics Credits: 3

Exponential and location families, principles of data reduction, asymptotic distributions, advanced theory of estimation and hypothesis testing.

Prerequisites: STAT 5547.

STAT 5588 Theory of Linear Model Credits: 3

This course covers vector space, full rank linear model, general inverse, estimation under linear constraints interval estimation, hypothesis testing, distributions of quadratic forms, general distribution theory, estimability, Gauss-Markov theorem, Best Linear Unbiased Estimation (BLUE), regression on dummy variables, estimation of variance components, Scheffe and Turkey intervals, and non-full rank linear model.

Prerequisites: MATH 420, STAT 5537, and STAT 5565.

STAT 5590 Special Topics Credits: 1-3

Selected topics in various fields of mathematics. May be repeated for credit when the topic varies.

String Bass (STR-BASS)

Courses

STR-BASS 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

STR-BASS 5500A Graduate String Bass-Secondary Credits: 2

STR-BASS 5500B Special Applied Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

STR-BASS 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

STR-BASS 5500JA Graduate Applied Jazz Studies Credits: 2

One-hour lesson weekly. Jury examination is required.

Prerequisites: Graduate standing.

STR-BASS 5500JB Special Applied Jazz Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. A jury for comments only may be held at the discretion of the faculty.

Prerequisites: Graduate standing.

STR-BASS 5500JC Applied Jazz Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied jazz study in an area other than, and in addition to, their primary performance study.

Prerequisites: Graduate standing.

STR-BASS 5501 Graduate String Bass - Masters Performance Credits: 4

STR-BASS 5601 Graduate String Bass - Doctoral Performance Credits: 4

Teacher Education (TCH-ED)

Courses

TCH-ED 5312 Legal and Ethical Aspects of Teaching Credits: 3

This course provides an introduction to landmark court cases, federal and state laws, and regulations that frame students' and teachers' rights and responsibilities and that provide guidance for ethical professional practices.

TCH-ED 5314 Cultural Diversity and Teaching English Language Learners Credits: 3

Foundational knowledge on teaching diverse populations and practical instructional approaches for meeting the needs of linguistically and culturally diverse learners. Emphasis on studying and applying instructional strategies that are appropriate for addressing the unique needs of children whose primary language may not be English.

TCH-ED 5315 Assessment and Data Literacy Credits: 3

Data collection and assessment strategies—including formative, summative, formal, and informal—to be used in developing student learning profiles, planning learning experiences, and monitoring student progress toward academic goals. Topics include the impact of assessment on equitable education for diverse learners, critical observation and questioning, basic qualitative and quantitative data analysis, working with data teams, collaboration/communication with families and other educational stakeholders, setting and monitoring learning goals, and the ethics of data collection and sharing.

TCH-ED 5385 Teaching and Learning with Technology Credits: 3

This course addresses the fundamentals of using technology in education and planning instruction to engage PK-12 students in problem solving and critical thinking using technology. Topics within the course are informed by International Society for Technology in Education Standards (ISTE), InTASC Model Core Teaching Standards and Learning Progressions for Teachers 1.0, Missouri Teacher Standards and Quality Indicators, and Missouri Learning Standards.

TCH-ED 5396 English Language Study for Middle and High School Teachers Credits: 3

Explores the fundamentals of teaching English language and grammar study, emphasizing patterns in the English language including sounds, words, sentences, meaning, and discourse as they are manifested in daily lives. Educationally relevant topics, such as applications of sociolinguistics to the teaching of English language and literature, varieties of grammar, and linguistic descriptions of styles and registers are an integral part of the course.

TCH-ED 5404 Education of the Exceptional Child and Youth Credits: 3

Students will be introduced to identification and educational intervention strategies for educating exceptional children and adolescents in inclusive classroom situations. This course requires a 10-hour field experience.

TCH-ED 5412 Language Arts in the Elementary and Middle School Credits: 3

Provides instruction in planning, implementing and assessing language arts activities. Critical analysis in classroom settings is emphasized. Other issues discussed include: literature-based instruction, multicultural perspectives, special needs students and professional behaviors.

TCH-ED 5413 Mathematics in the Elementary School I Credits: 3

Mathematics-specific pedagogy. Methods, techniques, tools and materials for the effective teaching of mathematics. Focus on the principles, methods, and materials of elementary school mathematics instruction and state curriculum in the context of diverse student backgrounds.

TCH-ED 5417 Science Methods In The Elementary School Credits: 3

The course prepares pre-service teachers to teach science from a constructivist, inquiry-oriented perspective.

TCH-ED 5418 Social Studies Methods in the Elementary and Middle Schools Credits: 3

A critical analysis of current practices, teaching methods, materials and the relationship of the social sciences to social studies. Emphasis is on understanding cultural diversity and cultural influences on learning. The planning, implementation and evaluation of an interdisciplinary social studies unit of instruction, focusing on competencies and skills needed for the 21st Century.

TCH-ED 5419 Student Teaching in Elementary School Credits: 3-12

Observation and student teaching under supervision in an elementary school. Elementary majors must enroll in 12.0 credit hours. Music education majors enroll in 3.0 or 7.0 hours; art education and foreign language education majors enroll in 7.0 hours.

TCH-ED 5422 Practicum I - Middle and High School Credit: 1

The purpose of this field experience is to apply theoretical and practical knowledge gained in concurrent courses.

Co-requisites: TCH-ED 312; TCH-ED 430; TCH-ED 420.

TCH-ED 5423 Practicum II - Middle and High School Credit: 1

The purpose of this field experience is to apply theoretical and practical knowledge gained in concurrent courses.

Prerequisites: TCH-ED 422.

Co-requisites: TCH-ED 385, TCH-ED 314.

TCH-ED 5424 Practicum III - Middle and High School Credit: 1

The purpose of this field experience is to apply theoretical and practical knowledge gained in concurrent courses.

Co-requisites: TCH-ED 315, TCH-ED 463, TCH-ED 438, Content specific methods courses.

TCH-ED 5427 Reading in the Secondary School Credits: 3

An examination of the reading process and study of methods and materials used by the secondary school classroom teacher in assessing student reading ability, determining the readability of content area materials and teaching students of all reading levels how to comprehend their textbooks and other printed instructional materials in various content area subjects.

TCH-ED 5430 Analyzing Learning Environments in Urban Contexts Credits: 3

This course serves as the major vehicle for articulating a programmatic construction of classroom management as establishing productive learning environments, facilitating social interaction, and planning relevant and engaging learning experiences based upon deep knowledge of individual students' contexts and cultures.

TCH-ED 5431 Summer Community Experience Credits: 3

This field-based course provides an in-depth examination into both the evolution of urban communities and dynamics of community building in inner cities, with special emphasis on Kansas City, Missouri. In addition, theories of educational psychology as well as child and adolescent behavior will be infused to assist participants in developing age appropriate mentoring/teaching strategies and activities. Students in the course are engaged with the community through field trips, simulations, course events, and community service.

Prerequisites: Admission into Elementary Education program or Institute for Urban Education.

TCH-ED 5432 Special Methods of Teaching English in Middle and High Schools Credits: 3

This course stresses the skills, knowledge, and dispositions pertinent to teaching English Language Arts in middle schools and high schools.

TCH-ED 5433 Special Methods of Teaching Mathematics in Middle and High Schools Credits: 3

This course stresses the skills, knowledge, and dispositions pertinent to teaching mathematics in middle schools and high schools.

Co-requisites: TCH-ED 315, TCH-ED 463, TCH-ED 438.

TCH-ED 5434 Seminar in Social Science Curriculum Credits: 3

This seminar course is designed to strengthen teacher candidates' content knowledge for designing and enacting transformative social science curriculum and pedagogy. Students will actively examine key content, concepts, themes, issues, multiple perspectives, and enduring questions embedded in the social science disciplines such as history, geography, economics, anthropology, sociology, political science and psychology and cultural and social contexts to enhance their knowledge, skills, and confidence for designing and enacting a transformative social science curriculum for diverse middle and high school students' development of civic competence.

TCH-ED 5435 Special Methods of Teaching Science in Middle and High Schools Credits: 3

Provides an opportunity for future science teachers to refine their skills as science educators and at the same time to reflect upon the ways and whys of teaching science.

TCH-ED 5436 Special Methods of Teaching Social Science in Middle and High Schools Credits: 3

This course will assist teacher candidates in developing the knowledge, skills, and dispositions needed to design and enact powerful transformative social studies curricular experiences, to foster middle and secondary school students' abilities to make informed, reasoned decisions and actions for the public good. Students will be introduced to powerful teaching practices, issues, and resources in secondary school social science.

TCH-ED 5437 Student Teaching in Secondary School Credits: 3-9

Culminating experience in a secondary school (grades 9-12). Enrollment hours vary for teacher candidates in Music, Art, and Foreign Languages.

Secondary majors in English, Mathematics, Science, and Social Science enroll for 9 semester credit hours.

Prerequisites: TCH-ED 5424.

Co-Requisite: Seminar.

TCH-ED 5438 Culturally Responsive Strategies for Teaching Diverse Learners Credits: 3

This course is designed to move students from cultural awareness to the application of culturally responsive practice. Specifically, this course will heighten students' understanding of cultural characteristics and their relationships to teaching and learning. Students will learn culturally responsive strategies and their enactment in instruction for diverse learners.

TCH-ED 5440 Introduction To Early Childhood Education Credits: 3

Introduction to the field of early childhood care and education, birth to age 8. Designed to familiarize future practitioners with the unique characteristics of early childhood education and its practice.

TCH-ED 5441 Literacy Development I Credits: 3

An introduction to how language is acquired and how to facilitate oral language expression in early childhood classrooms.

TCH-ED 5442 Observation, Assessment & Screening in Early Childhood Classrooms Credits: 3

This course is designed to identify developmentally appropriate ways to measure and evaluate child growth and development.

TCH-ED 5444 Mathematics In Early Childhood and Elementary Schools Credits: 3

The course prepares teachers who can create a learning environment in which mathematical concepts are drawn from and modeled within the child's active investigation of his or her own surroundings and views of the world. The emphasis is upon mathematics as a sense-making tool through which observation, action, classification, ordering, seeking patterns and common features, and testing of ideas come together to organize experiences and solve problems in the immediate environment. Stress is placed on methods and materials to make mathematics learning active and hands-on. A variety of materials, physical models, and tools are studied in terms of the way they can be used to help children explore, develop and test ideas, construct meaning, and communicate ideas.

TCH-ED 5445 Science In Early Childhood and Elementary Schools Credits: 3

Focus on ways of involving young children in science activities and experiences designed to promote curiosity, investigation and self-awareness as they explore their world.

TCH-ED 5447 Social Studies In Early Childhood and Elementary Schools Credits: 3

This course is designed to help students understand basic social studies concepts and pedagogy for young learners.

TCH-ED 5448 Literacy Development II Credits: 3

This course is designed to introduce the student to the different theories on literacy development. Students will examine different approaches but focus on a developmental perspective to literacy development.

TCH-ED 5449 Literacy Development III Credits: 3

This course is designed to help students identify effective and developmentally appropriate practices, strategies and experiences that foster literacy development.

TCH-ED 5450 Integrating The Curriculum In Early Childhood Education Credits: 3-4

A culminating curriculum course for early childhood students. The overall goal is to help students become more aware, skilled and informed about developmentally and educationally appropriate practice and curriculum for children during early childhood. Its focus is on constructing an integrated curriculum. A field-based experience is included.

TCH-ED 5451 Child Guidance Within The Classroom Credits: 3

Designed to help students examine and evaluate guidance techniques and teaching strategies used in classrooms for young children. Preventive measures in classroom management will be stressed.

Co-requisites: TCH-ED 481.

TCH-ED 5452 Family and Program Relationships in Early Childhood Education Credits: 4

Provides insight into the challenge of parenting, knowledge about the development and implementation of parent education and support programs, and the significance of school-family relationships. In addition, this course seeks to facilitate students' understanding of and sensitivity to parents' perspectives regarding the care and education of their young children.

Co-requisites: TCH-ED 453.

TCH-ED 5453 Learning From Parents Credits: 2

Designed to provide students with direct interactions with parents whose children are participating in early childhood programs, birth to age 8. Emphasis is placed upon students' understanding of, and sensitivity to, parents' perspectives regarding the care and education of their young children and recognition of parents as significant informants about their children.

Co-requisites: TCH-ED 542.

TCH-ED 5454 Human Relations In The Early Childhood Classroom Credits: 3

Students will analyze the connections between an effective helping relationship and effective teaching in the early childhood classroom. Effective interpersonal communication skills will be identified and practiced. The development of self-concept will be discussed.

TCH-ED 5455 Student Teaching In Preschool Credits: 6-10

Observation and student teaching under supervision in a preschool setting.

TCH-ED 5456 Student Teaching In Elementary, K Through 3 Credits: 6-12

Observation and student teaching under supervision in an elementary school, grades K through 3.

TCH-ED 5457 Infant And Toddler Care And Education Credits: 3

In this course, students will investigate infant and toddler care and education theories and practices. Students will learn about appropriate curriculum and teaching methods, visit infant and toddler programs, learn about state regulations and national standards for quality, and complete an environment rating scale.

TCH-ED 5458 Practicum For Learning About Infants And Toddlers Credit: 1

The purpose of this course is to learn about child care and education practices in various centers. We will discuss how practices are influenced or constrained by human biology and developmental stages, as they are by ecological and environment pressures such as mothers' work roles. The central themes of the course can be summarized by the phrases purposeful care practices and the optimal practices for infants and toddlers.

TCH-ED 5459 Early Childhood Program Management and Advocacy Credits: 2

Students will begin to explore basic early childhood program components. Different types of advocacy will be presented, discussed, and implemented.

Prerequisites: TCH-ED 440.

TCH-ED 5460 Middle School Curriculum Credits: 2

This course offers the pre-service teachers an overview of middle school goals, basic principles, and organizations. The course explores interdisciplinary teaming, flexible scheduling, exploratory and advisory programs, and other aspects of the organization within the context of middle school goals and practices.

TCH-ED 5461 Student Teaching In Middle School Credits: 6-9

Culminating field experience in a middle school setting. Student teachers engage in an all-day, full semester placement in a middle school classroom. Middle School Education (English, Mathematics, Science, Social Science) majors must enroll in 9 credit hours. Hours for other programs using this field experience vary. Teacher candidates should seek advisor approval.

Prerequisites: TCH-ED 5424.

Co-Requisite: Seminar.

TCH-ED 5462 Middle School Philosophy and Organization Credits: 3

This course offers teacher candidates an overview of middle school goals, basic principles, and organizations. Topics include interdisciplinary teaming, flexible scheduling, exploratory and advisory programs, and other aspects of the organization within the context of middle school goals and practices.

TCH-ED 5463 Literacy Intervention across the Disciplines Credits: 3

Examination of research, policy, and effective practice of literacy intervention in middle and secondary disciplinary classrooms (i.e. English/language arts, mathematics, science, and social studies). Topics will include recognition of reading and writing difficulties, response-to-intervention (RTI), scaffolding instruction for grade level reading comprehension, metacognition, and culturally responsive literacy instruction.

TCH-ED 5464 Math Methods for Urban Teachers Credits: 3

Mathematics-specific pedagogy for urban teachers. Methods, techniques, tools and materials for the effective teaching of mathematics. Emphasis on problem solving and reasoning skills in applying mathematics and on teaching in the context of diverse student backgrounds. Portions of this course will occur in urban school classrooms. Students will apply learning to urban classrooms.

TCH-ED 5465 Urban Education VI: Teaching Diverse Students Credit: 1

This interactive course will investigate and examine the principles of teaching diverse students and factors influencing effectiveness of instruction, including empowering African American males, teaching students from diverse populations and working with students with special needs. Some of the class sessions will be taught electronically and work will be submitted electronically.

Prerequisites: Admission into the Institute of Urban Education.

TCH-ED 5466 Field Experience: Diverse Learners Credit: 1

Students will spend a minimum of 90 hours in an urban school classroom. Students will have the opportunity to apply learning and lessons designed in the semester's pedagogical courses, particularly Best Practices for Teaching Math, Science, and strategies for working with diverse learners. Students will work with their seminar leader, having the opportunity to be observed and conference about their teaching.

Prerequisites: Admission into the Institute for Urban Education.

Co-requisites: TCH-ED 465.

TCH-ED 5470 Philosophy and History of Science and Technology Credits: 3

This course uses an historical survey to introduce the main philosophical interpretations of the nature and structure of both science and technology. Core concepts such as prediction, explanation, progress, truth, and utility will be examined in light of various philosophical perspectives. Following this, case study methodology will be used to examine interactions among science, technology, and society. Although the major focus will be upon modern Western culture, some attention will be paid to earlier and non-Western cultures. Case studies to be examined include: Perception and Estimation, nuclear power and pesticides; the impact of high technology upon medicine; and the estimated cost/benefit of computer-mediated communications, for example, the Internet.

TCH-ED 5475 Working with Families and Communities Credits: 3

This course provides an in-depth examination of research and theory relative to children, family, and community which have implications for and application to learning and instruction. Emphasis will be placed on the exploration and critical examination of and insights into the challenge or parenting, knowledge about the development and support programs, and the significance of school-family relationships. In addition, this course seeks to facilitate students' understanding of and sensitivity to families' perspectives regarding the care and education of their children and adolescents. The course is for students in the elementary education program and Institute for Urban Education.

Prerequisites: Admission into Teacher Education or IUE.

TCH-ED 5480 Practicum I Early Childhood Credit: 1

Early Childhood students will participate in observation, assessment, and screening activities as they explore the complex nature of primary school settings. Students will be expected to spend 60 hours at classroom sites during the semester.

Co-requisites: TCH-ED 442.

TCH-ED 5481 Practicum II Early Childhood Credit: 1

Early Childhood students will participate in classroom management and guidance practices as they explore the complex nature of pre-kindergarten settings. Students will be expected to spend 60 hours at classroom sites during the semester.

Prerequisites: TCH-ED 480, admission into teacher education program.

Co-requisites: TCH-ED 451.

TCH-ED 5482 Seminar in Teaching and Evaluating Writing Credits: 3

This course is designed to provide future teachers with a framework for success in the teaching of writing within the English Language Arts curriculum. The goal is to help students turn sound theory provided by the National Writing Project, the National Council of Teachers of English, and other experts in the field of rhetoric and composition into effective practice in the classroom.

TCH-ED 5483 Early Childhood Reading I: Introduction to Literacy and Reading Education Credits: 4

This course introduces concepts about literacy processes: i.e., social, cultural, cognitive and linguistic foundations of reading and writing processes. The major focus of the course is on learning components of comprehensive reading curriculum and a range of instructional approaches and methods appropriate for early childhood learners at different stages of literacy development.

TCH-ED 5484 Early Childhood Reading II: Assessing and Teaching Diverse Learners Credits: 4

This course introduces focuses on understanding the major components of reading processes (Phonemic awareness, word identification and phonics, vocabulary and background knowledge, fluency, comprehension strategies, and motivation) and how they are integrated in fluent reading for individual students at different stages of literacy development. The major projects for the course involves assessing and teaching an individual student over the course of the semester. Teacher candidates should also assess and teach in small groups of readers.

Prerequisites: Admission into the teacher education program.

TCH-ED 5485 Language Arts in the Early Childhood Classroom Credits: 3

This course provides instruction in planning, implementing, and assessing early childhood (birth through third-grade) language arts activities. Critical analysis in classroom settings is emphasized. Other issues discussed include: literature-based instruction, multicultural perspectives, special needs students and professional behaviors.

TCH-ED 5492 Language Arts Capstone Credits: 2

Designed for students in their last professional semester of the TE program, and are in a full-time student teaching placement. The course will serve as a culminating experience of the major concepts from the previous three semesters. Topics covered include school law, classroom management, working with special needs students, building critical thinking activities into the curriculum, planning and implementing authentic assessments, and examining the obligations, challenges, and realities of the teaching profession.

Prerequisites: TCH-ED 432.

Co-requisites: student teaching.

TCH-ED 5493 Seminar - Mathematics Credits: 3

Supports the culminating mathematics student teaching experience and the submission of a final professional teaching portfolio. Student teachers analyze the effectiveness of the teaching strategies they are applying in their student teaching experiences for their effectiveness in facilitating learning in classrooms, and adapt lessons and assessments for individual learners. Peer and mentor collaboration in the analytical process are fundamental to the course objectives.

Prerequisites: TCH-ED 5433.

Co-requisites: Student Teaching.

TCH-ED 5494 Seminar - English/Language Arts Credits: 3

Designed for students in their last professional semester of the TE program, and are in a full-time student teaching placement. The course will serve as a culminating experience of the major concepts from the previous three semesters. Topics covered include: school law, classroom management, working with special needs students, building critical thinking activities into the curriculum, planning and implementing authentic assessments, and examining the obligations, challenges, and realities of the teaching profession. Supports the culminating English/Language Arts student teaching experiences, and the submission of a final professional teaching portfolio. Student teachers analyze the effectiveness of the teaching strategies they are applying in their student teaching experiences, for their effectiveness in facilitating learning in classrooms, and adapt lessons and assessment for individual learners. Peer and mentor collaboration in the analytical process are fundamental to the course objectives.

Prerequisites: TCH-ED 5432.

Co-requisites: Student teaching.

TCH-ED 5495 Seminar - Science Credits: 3

Supports the culminating Science Education student teaching experience and the submission of a final professional teaching portfolio. Student teachers analyze the effectiveness of teaching strategies they apply in their student teaching experiences, their effectiveness in facilitating learning in classrooms, and adaption of lessons and assessment for individual learners. Peer and mentor collaboration in the analytical process are fundamental to the course objectives.

Prerequisites: TCH-ED 5435.

Co-requisites: Student teaching.

TCH-ED 5496 Seminar – Social Science Credits: 3

Supports the culminating Social Science Education student teaching experience and the submission of a final professional teaching portfolio. Student teachers analyze the effectiveness of the teaching strategies they are applying in their student teaching experiences, for their effectiveness in facilitating learning in classrooms, and adapt lessons and assessment for individual learners. Peer and mentor collaboration in the analytical process are fundamental to the course objectives.

Prerequisites: TCH-ED 5436.

Co-requisites: Student Teaching.

TCH-ED 5497 Teaching Internship Credits: 3-8

Teacher candidates will work 3 to 5 days at the school site in which the candidate will complete the year-long teaching internship.

Prerequisites: TCH-ED 398.

TCH-ED 5498 Urban Education Seminar VII Credit: 1

This seminar meets weekly for 2 hours and is led by a clinical professor who serves as a mentor for the students throughout their program. Students will work closely with mentor teachers in the application and integration of social justice and the elementary school curriculum. A critical analysis of current practices, teaching methods, materials and how social justice manifests in curriculum and instruction. Emphasis is on understanding cultural diversity and cultural influences on learning. Concepts of a classroom community, parental relations and democratic classroom processes will be addressed. Students will have opportunities to apply their learning to urban classrooms.

Prerequisites: Admission into the Institute for Urban Education.

TCH-ED 5499 Capstone Credits: 2

This seminar is designed to complement the student teaching experience through the discussion and analysis of school-based issues. It is intended to help further develop a reflective, critical and analytical approach to pedagogical decision making through supportive collaboration.

Theatre (THEATRE)

Courses

THEATRE 5500RA Theatre Collaboration Credits: 1-2

A course for M.F.A. students exploring the collaboration/ communication process in preparing a production. Must be elected by all students assigned to design, direct, technical direct or stage manage within the current or the following semester. Maximum of 8 hours applicable towards degree.

THEATRE 5501R Voice Training Credits: 2

(A,B,C,D) Training for the speaking and singing voice, development of skills in vocal dynamics, physical control, and relaxation for the actor, dialects and verse structure. Four semesters required for acting emphasis.

THEATRE 5506RR French Drama And Theatre Credits: 3

Study of significant plays and production methods in France from medieval times to the present. Particular emphasis will be given to the plays of Moliere, Racine, and Corneille, and to internationally renowned contemporary directors.

THEATRE 5507 19Th-Century Continental Theatre Credits: 3

Production of significant French, German, Russian, Spanish, and Scandinavian plays and playwriting of the 19th century. Particular emphasis will be given to plays representative of romanticism, realism, naturalism, fin-de-siecle decadence, and intensive study of production history.

THEATRE 5508 20Th-Century Continental Theatre Credits: 3

Study of the production of significant plays of Continental Europe from Strindberg to the present. Dramatic literature will be related to artistic currents such as expressionism, surrealism, the absurd, and where applicable, to political currents.

THEATRE 5509 Russian Drama And Theatre Credits: 3

Study of the production of Russian and Soviet plays with reference to the development of theatre art from the Christianization of Russia to contemporary post-Soviet drama.

THEATRE 5510 History Of The American Theatre I Credits: 3

An exploration of the trends in and the development of the American theatre from Colonial times to 1900.

THEATRE 5511 History Of The American Theatre II Credits: 3

An exploration of the trends in and the development of the American theatre for 1900 to the present.

THEATRE 5512R History Of The English Stage I Credits: 3

The English stage and its arts, crafts and literature from the medieval cycles through the Restoration.

THEATRE 5513 History Of The English Stage II Credits: 3

Development of English and Irish theatre art and dramatic literature from the 18th century to the present.

THEATRE 5514 History of Design And Technology I Credits: 3

The study of period style and scenic, costume, lighting, and technical production practices from the ancient world through the 17th century. The course will emphasize the application of research toward the presentation of period plays and contemporary production.

THEATRE 5515R History of Design And Technology II Credits: 3

The study of period style and scenic, costume, lighting, and technical production practices from the 18th century to the present. The course will emphasize the application of research toward the presentation of period plays and contemporary production.

THEATRE 5516A Technical Production for The Practitioner Credits: 3

The course is an in-depth review of technologies in scenery, lighting and stage operations, expansion of that knowledge, and application of it to the individual class member's particular theatre. Classroom material is augmented by hands-on experience in a controlled laboratory situation. Students should have a prerequisite of a basic technical theatre course or considerable practical experience. This course can be repeated for credit.

THEATRE 5516B Technical Production for The Practitioner Credits: 3

See course description for THEATRE 5516A.

THEATRE 5517A Professional Stage Management I Credits: 3

A functional analysis of the responsibilities of the professional stage manager. Requires the student to be an assistant stage manager on a University or KC Rep production.

THEATRE 5517B Professional Stage Management II Credits: 2

Practical course in stage management. Requires student to stage-manage or assistant stage-manage a production.

Prerequisites: THEATRE 5517A.

THEATRE 5517C Equity Assistant Stage Management Credits: 2

This course develops a skill set for professional assistant stage managers. Class will discuss duties and paperwork and how to supplement the work of the stage manager.

THEATRE 5517D Opera Stage Management Credits: 3

Class covers duties of the opera stage manager, including how to follow an opera score.

THEATRE 5517E Union Contracts for Actors and Stage Managers Credits: 2

Students study and discuss all the rules in the Equity Rule Book.

THEATRE 5517F Professional Production Management in Theatre Credits: 2

This course is a seminar on the duties, planning, negotiations, and problem solving techniques of the professional theatre production manager.

Prerequisites: THEATRE 5517A.

THEATRE 5520 Individual Performance Studies Credits: 1-2

(A,B,C) Private instruction for the advanced student.

THEATRE 5520L Individual Performance Studies Credits: 1-2**THEATRE 5521A Professional Sound Design Credits: 3**

Professional Sound Design is a series of four courses constructed to develop the designer's skills from research and initial sound collection, into interpretation, collaboration and idea development, concluding with the production of finished designs for the MFA productions. Each section deals with problems of increasing complexity beginning with "found" design material for early production and leading to indigenous designs created and layered for complex production support. The course may be taken once or twice for non-sound designers with the full cycle being required for the sound design emphasis.

THEATRE 5521B Professional Sound Design Credits: 3**THEATRE 5521C Professional Sound Design Credits: 3**

Professional Sound Design is a series of four courses constructed to develop the designer's skills from research and initial sound collection, into interpretation, collaboration and idea development, concluding with the production of finished designs for the MFA productions. Each section deals with problems of increasing complexity beginning with "found" design material for early production and leading to indigenous designs created and layered for complex production support. The course may be taken once or twice for non-sound designers with the full cycle being required for the sound design emphasis.

THEATRE 5521D Professional Sound Design Credits: 3

Professional Sound Design is a series of four courses constructed to develop the designer's skills from research and initial sound collection, into interpretation, collaboration and idea development, concluding with the production of finished designs for the MFA productions. Each section deals with problems of increasing complexity beginning with "found" design material for early production and leading to indigenous designs created and layered for complex production support. The course may be taken once or twice for non-sound designers with the full cycle being required for the sound design emphasis.

THEATRE 5522 History of Costuming I Credits: 3

The study of the history of European costume, with emphasis on the social and economic ramifications of costuming through the ages.

THEATRE 5523 History of Costuming II Credits: 3

The study of the history of Non-Western costume, with emphasis on the social and economic ramifications of costuming through the ages.

THEATRE 5524 Rendering Techniques for the Theatre Designer I Credits: 3

Introduces the mechanics of handling black and white media to develop two and three-dimensional techniques with an emphasis on observational training and object drawing, as well as white model and/or maquette construction, materials and techniques.

THEATRE 5530 Drafting for The Theatre Credits: 3

Practical laboratory course in drafting for the theatre encompassing floor plans, sections, designer's evaluations, front and rear elevations, working drawings, and problems in communicating design ideas.

THEATRE 5531R Rendering Techniques for the Theatre Designer II Credits: 3

Continuation of Rendering Techniques with the introduction of color, pastels, watercolor and gouache. Skills are applied in developing projects for design in the theatre.

THEATRE 5532 Professional Costume Design Credits: 3

(A, B, C, D) The courses in Professional Costume Design are intended to develop the costume designer's skills in research, rendering and drawing. Each section will deal with specific problems of design, such as period, line, silhouette, color and texture. Specific problems in design from realistic to stylized productions will be worked on by the students. The course may be taken once or twice by non-costume designers with the full cycle being required for costume emphasis.

THEATRE 5534 Costume Construction I Credits: 3

(A,B,C) Research and methodology into one or more of the following areas of costume construction for the stage: period pattern and tailoring adaptation, work with non-woven materials, and the cutting and finishing of costumes for the stage. May be repeated up to six hours with content change and permission of instructor.

THEATRE 5535 Technical Studies In Costuming And Makeup Credits: 3

(A,B,C) Concentration in one or more of the arts and crafts necessary to costume design. Areas to be chosen from include: fabric dyeing and painting, millinery, wig design and construction, latex prosthetic, and decorative accessories for the stage. May be repeated up to six hours with content change and permission of instructor.

THEATRE 5536 Professional Scene Design Credits: 3

(A,B,C,D) Professional Scene Design is a series of courses constructed to develop the designer's skills from research and initial sketches to finished renderings, models and working drawings. Each successive section deals with problems of increasing complexity beginning with one-set realistic productions through unit-settings, stylization and multiple setting problems. The course may be taken once or twice for non-set designers with the full cycle being required for the scene design emphasis.

THEATRE 5538 Scene Painting Credits: 3

A practicum course in scene painting techniques and execution. Introduction to painting equipment and supplies, priming and preparation of surfaces and materials, standard techniques for painting ornament.

THEATRE 5539 Scene Painting II Credits: 3

A practicum course in scene painting techniques with emphasis on painting interior drops, exterior landscapes and three-dimensional pieces.

THEATRE 5540 Pattern Drafting And Cutting Credits: 3

Theory and laboratory study of the techniques and methods employed in drafting patterns for the professional stage.

THEATRE 5545 Professional Acting Techniques I Credits: 3

Theatre games, exercises, mask work, and some scene study to develop the first year acting/directing class into a training ensemble, instill a clear and uniform vocabulary, heighten awareness, and begin concentrated skill work. The semester will culminate in a class project.

THEATRE 5546 Professional Acting Techniques II Credits: 3

Continuation of THEATRE 5545 with emphasis on the application of the first semester's work through scene study of contemporary plays and monologues.

THEATRE 5547 Professional Acting Techniques III Credits: 3

Concentration on non-naturalistic styles. Work on scenes from Shakespeare and other classical playwrights.

THEATRE 5548 Professional Acting Techniques IV Credits: 3

Work on audition material and further scene work dealing with specific individual acting problems.

THEATRE 5549 Master Class In Acting Credits: 2

(A,B,C,D) Class in advanced studies in acting. May be repeated for credit up to eight hours as content and guest artist change. Permission of instructor or head of area required. Required for third year graduate acting students in the fall semester and may be repeated subsequently as elective.

THEATRE 5551 Rendering Techniques for the Theatre Designer III Credits: 3

Developing techniques for rendering in realistic settings: interiors, landscapes, fabric and furnishings.

THEATRE 5552R Rendering Techniques for the Theatre Designer IV Credits: 3

Developing techniques for rendering in non-realistic styles with the emphasis on imaginative designs, light and air, created textures, etc.

THEATRE 5557 Theatre History I Credits: 3

Development of theatre art-including dramatic literature, staging, and performance styles-from the beginning through the 17th century. This course also looks at Asian theatre forms. Students read approximately 20 plays.

Prerequisites: Graduate Status.

THEATRE 5560 Theatre History II Credits: 3

Development of western theatre art-including dramatic literature, staging, and performance styles-from the 18th century to the present. Students will read approximately 24 plays.

Prerequisites: Graduate status.

THEATRE 5562 Actor Practicum Credits: 3

A contemporary scene study class for actors. Actors test their acquired process skills with major emphasis placed on characterization.

THEATRE 5563 Text Analysis I Credits: 3

Linear analysis of selected prose dramas with concentration on character delineation, images and motivation for actors and directors.

THEATRE 5564 Text Analysis II Credits: 3

Continuation of THEATRE 5563 with emphasis on verse plays. Selected playwrights from the Greek and Elizabethan periods will be included along with modern verse dramatists.

THEATRE 5565 Introduction To Professional Directing Credits: 3

The first part of the class is devoted to an intensive study of various and diverse concepts related to the dramatic experience by dramatists, critics, and directors. The class also examines current production methods and practices for today's functioning professional director. Systems related to stage management and actors are investigated.

THEATRE 5567 Professional Directing Practicum Credits: 3

This class will move from concept to production. Work will revolve around the presentation of production concept statements in which the director will select, organize and articulate the theatrical substance in support of his or her chosen concept. Intensive analysis will lead to the development of an image/metaphor for production. Term will include presentation of a full book justifying concept choices for scenic, costume, music and dance, and, finally, full production.

THEATRE 5568 Seminar In Dramaturgy Credits: 3

Critical analysis of dramatic structure and techniques, with special reference to modern and contemporary drama.

THEATRE 5569 Master Class in Directing Credits: 2

(A,B,C,D) Class in advanced studies in directing. May be repeated for credit up to eight hours as new material and guest artist change. Graduate students elect THEATRE 5569.

THEATRE 5570 Professional Lighting Design Credits: 3

(A, B, C, D) Professional Lighting Design is a series of courses concerned with the study of light as a design element. Projects to implement design theory are primarily selected from the areas of dramatic, musical and opera theatre, and dance. Emphasis is on the design process with each successive section dealing with problems of increasing complexity. Areas of study and projects are chosen on the basis of individual levels of development. When elected by non-lighting designers the course may be elected for a maximum of two semesters.

THEATRE 5571A Professional Projections Design I Credits: 3

This course examines the techniques of theatrical projection design. Focus will be on the manipulation of projected images, and the fundamental use and control of automated projectors. This hands-on laboratory class will instruct students in the use of state of the art projection equipment and control consoles.

THEATRE 5571B Professional Projections Design II Credits: 3

This class will teach students how to design projections. Students will learn the practical applications of projection design as well as the theoretical and critical thinking necessary to successfully complete a projection design assignment. This class will culminate with the presentation of an assigned projection design or a realized projection design.

Prerequisites: THEATRE 5571A

THEATRE 5572 Stage Lighting Technology Credits: 2

This course is a comprehensive study of contemporary technical equipment and its usage to actualize lighting design. Areas of emphasis include photometric, color and color theory, lighting control systems, lighting control operations, cueing techniques, data control of intelligent lighting equipment, lighting fixtures, dimming system, hand drafted light plot standards, CAD light plot drafting, lighting specific software programs, video and image projections, and optical special effects. Theatrical genres will vary by semester.

THEATRE 5573 Professional Technical Production Credits: 3

Detailed study and experimentation with recent scenic materials, scenery construction, rigging systems, use of metal and special effects.

THEATRE 5574 Theatre Regulations, Laws and Safety Credit: 1

Survey of fire, city and Equity codes, and insurance, liability, health rules and regulations related to theater operation. Union and legal contracts, philosophy and relations with theatre facilities and operations.

THEATRE 5575R Property Construction Credits: 3

Construction techniques and materials used to make and modify set and hand properties and set dressing.

THEATRE 5577 Advanced Materials Credits: 3

(A,B,C,D) The theatre technician and designer are dependent on a wide range of materials in the creation of their art. Each semester the student will pursue detailed study of a material area (i.e., wood, metal, plastics, textiles), the processes of its usage and its related process-products (i.e., adhesives, paints, dyes, etc.). Field trips and hands-on laboratory work are integral to the course.

THEATRE 5578 Professional Theatre Administration Credits: 3

Theories, problems and techniques preparing the student for effective interaction with professional theater administration, offering a foundation for potential theatre administrators as well as enrichment for students of directing, design, technical and stage management.

THEATRE 5579R Master Class In Design Credits: 2

(A,B,C,D) Class in advanced studies in design. May be repeated for credit up to eight hours as content and guest artist change.

THEATRE 5580R Graduate Technical Student Seminar Credits: 2

(A,B,C,D,E,F) Required in every semester for Design/Tech M.F.A. candidates choosing a technology emphasis. This continuing seminar course serves as a forum for all graduate technical students to analyze and discuss problems and solutions on current academic and KCRep productions. The course develops collaborative skills through the sharing of ideas and experiences. In addition, topics of general interest to the technician will be studied through guest lecturers and/or individual projects prepared by the faculty and students and presented to the class.

THEATRE 5583 Seminar on Technical Production Management Credits: 2

Seminar involving shop organization, scheduling, purchasing, lending and borrowing, rentals, personnel, job description, organizing structure, etc. Emphasis upon organization and techniques for repertory theatre operation.

THEATRE 5584 Master Class In Technology Credits: 2

(A,B,C,D) Class in advanced studies in technology. May be repeated for credit up to eight hours as content and guest artist change.

THEATRE 5585 Advanced Technical Drafting Credits: 3

An intensive drafting course required for Design/Tech M.F.A. candidates with emphasis in technology. The course aims to equip the student to prepare clear shop working drawings from designer elevations. Topics include both conceptual planning techniques and developing mechanical drawing skills. One hour lecture, four lab hours, and extensive outside preparation.

THEATRE 5586 Structural Design for the Stage Credits: 3

A course in the structural design of scenic elements. The student learns to work within the visual restrictions imposed by the designer to build structures that will bear given load requirements with a minimum of deflection. Basic engineering and load analysis principles are studied and applied in the design procedure to find the best possible solutions in terms of strength, weight, safety and cost.

THEATRE 5587 Structural Design for the Stage II Credits: 3

This course is designed to give an introduction to the physics behind structural design and to guide the student through the process of designing safe, effective structural scenery for the theatre.

Prerequisites: THEATRE 5586.

THEATRE 5590 Directed Graduate Studies Credits: 3-6

Individual projects on the graduate level. No more than three hours with any one instructor. Only one 590 each semester.

THEATRE 5590A Directed Graduate Studies Credits: 3-6**THEATRE 5590B Directed Graduate Studies: Design Credits: 3-6****THEATRE 5590C Directed Graduate Studies: Costumes Credits: 3-6****THEATRE 5590D Directed Graduate Studies: Scenic Design Credits: 3-6****THEATRE 5590E Directed Graduate Studies: Directing Credits: 3-6****THEATRE 5590F Directed Graduate Studies Credits: 3-6****THEATRE 5590G Directed Graduate Studies: Lighting Credits: 3-6****THEATRE 5590H Directed Graduate Studies: Playwriting Credits: 3-6****THEATRE 5590I Directed Graduate Studies Credits: 3-6****THEATRE 5590J Directed Graduate Studies: Stage Management Credits: 3-6****THEATRE 5590K Directed Graduate Studies: Technical Production Credits: 3-6****THEATRE 5590L Directed Graduate Studies: Theatre Management Credits: 3-6****THEATRE 5590M Directed Graduate Studies: Theory And Criticism Credits: 3-6****THEATRE 5590N Directed Graduate Studies: Dramaturgy Credits: 3-6****THEATRE 5590R Directed Graduate Studies Credits: 3-6****THEATRE 5590S Directed Graduate Studies Credits: 3-6****THEATRE 5590T Directed Graduate Studies Credits: 3-6****THEATRE 5592A Seminar on Stage Management Practice Credit: 1**

MFA student stage managers meet one hour a week with the Production Manager of both Kansas City Repertory Theatre and Department of Theatre (and head of stage management training), to discuss current management problems and solutions for productions in progress. The seventeen productions mounted each year by the Department and the Rep will be examined. Students will become aware of problem solving procedures in both the professional and the academic theatre.

Prerequisites: Graduate Stage Management Student.

THEATRE 5592B Seminar on Stage Management Practice Credit: 1

MFA student stage managers meet one hour a week with the Production Manager of both Kansas City Repertory Theatre and Department of Theatre (and head of stage management training) to discuss current management problems and solutions for productions in progress. The seventeen productions mounted each year by the Department and the Rep will be examined. Students will become aware of problem solving procedures in both the professional and the academic theatre.

Prerequisites: Graduate Stage Management Student.

THEATRE 5592C Seminar on Stage Management Practice Credit: 1

MFA student stage managers meet one hour a week with the Production Manager of both Kansas City Repertory Theatre and Department of Theatre (and head of stage management training) to discuss current management problems and solutions for productions in progress. The seventeen productions mounted each year by the Department and the Rep will be examined. Students will become aware of problem solving procedures in both the professional and the academic theatre.

Prerequisites: Graduate Stage Management Student.

THEATRE 5592D Seminar on Stage Management Practice Credit: 1

MFA student stage managers meet one hour a week with the Production Manager of both Kansas City Repertory Theatre and Department of Theatre (and head of stage management training) to discuss current management problems and solutions for productions in progress. The seventeen productions mounted each year by the Department and the Rep will be examined. Students will become aware of problem solving procedures in both the professional and the academic theatre.

Prerequisites: Graduate Stage Management Student.

THEATRE 5592E Seminar on Stage Management Practice Credit: 1

MFA student stage managers meet one hour a week with the Production Manager of both Kansas City Repertory Theatre and Department of Theatre (and head of stage management training) to discuss current management problems and solutions for productions in progress. The seventeen productions mounted each year by the Department and the Rep will be examined. Students will become aware of problem solving procedures in both the professional and the academic theatre.

Prerequisites: Graduate Stage Management Student.

THEATRE 5597 Repertory Theatre: Internship Credits: 3-6

Assignments available in the following areas: directing, design, carpentry, lighting, costume, props, acting, stage management. Technical interns will be assigned by the appropriate heads of those areas. Acting interns may understudy and/or play roles with the Kansas City Repertory Theatre on the Spencer stage or in showcase productions. Also, interns will have some responsibility in technical areas such as change-over, props, costume, running crew, and stage management. Directing interns may assist director or assistant stage manager.

Prerequisites: Selection by chairman of department.

THEATRE 5598R Research And Performance Credits: 1-6

Primarily for the M.F.A. student. Permission of the graduate faculty.

THEATRE 5599 Research And Thesis Credits: 1-6

THEATRE 5697 Repertory Theatre: Residency Credits: 6

The residency consists of authorized participation with the Kansas City Repertory Theatre, the Department of Theatre, or an approved outside professional company, and is arranged under departmental advisement, with the chairman of the department, and in consultation with the artistic director of KCRP. The assignment will be determined by matching interest and degree emphasis with available production assignments.

THEATRE 5899 Required Graduate Enrollment Credit: 1

Trombone (TROMB)

Courses

TROMB 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

TROMB 5500A Graduate Trombone-Secondary Credits: 2

TROMB 5500B Special Applied Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

TROMB 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

TROMB 5500JA Graduate Applied Jazz Studies Credits: 2

One-hour lesson weekly. Jury examination is required.

Prerequisites: Graduate standing.

TROMB 5500JB Special Applied Jazz Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. A jury for comments only may be held at the discretion of the faculty.

Prerequisites: Graduate standing.

TROMB 5500JC Applied Jazz Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied jazz study in an area other than, and in addition to, their primary performance study.

Prerequisites: Graduate standing.

TROMB 5501 Graduate Trombone - Masters Performance Credits: 4

TROMB 5601 Graduate Trombone - Doctoral Performance Credits: 4

Trumpet (TRUMPET)

Courses

TRUMPET 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

TRUMPET 5500A Graduate Trumpet-Secondary Credits: 2

TRUMPET 5500B Special Applied Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

TRUMPET 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

TRUMPET 5500JA Graduate Applied Jazz Studies Credits: 2

One-hour lesson weekly. Jury examination is required.

Prerequisites: Graduate standing.

TRUMPET 5500JB Special Applied Jazz Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. A jury for comments only may be held at the discretion of the faculty.

Prerequisites: Graduate standing.

TRUMPET 5500JC Applied Jazz Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied jazz in an area other than, and in addition to, their primary performance study.

Prerequisites: Graduate standing.

TRUMPET 5501 Graduate Trumpet - Masters Performance Credits: 4

TRUMPET 5601 Graduate Trumpet - Doctoral Performance Credits: 4

Tuba (TUBA)

Courses

TUBA 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

TUBA 5500A Graduate Tuba-Secondary Credits: 2

TUBA 5500B Special Applied Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

TUBA 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

TUBA 5501 Graduate Tuba - Masters Performance Credits: 4

TUBA 5601 Graduate Tuba - Doctoral Performance Credits: 4

Urban Leadership (EDUC-UL)

Courses

EDUC-UL 5501 Foundations Of School Leadership & Organization Credits: 3

Participants will study as cohort team members actively engaged in clinical/practical endeavors in schools, concepts and theories focused: 1) to understand and apply modern leadership and organization development theory in relation to school organizational cultures; 2) to understand both the development of productive school relationships and the theoretical concepts of the legal responsibilities of schools in the society; 3) to develop a plan for principal certification based upon participant needs and experiences; and 4) to build school cultures that are collaborative, participative, reflective, and self renewing.

EDUC-UL 5502 Building Administration And Management Credits: 3

Participants will study and apply theories and concepts as members of a Cohort Team doing clinical work in schools designed to study, learn, and practice the management and administrative responsibilities of building level leaders including principal roles, personnel issues, school business management, community relations, supervision of staff, and to know the legal responsibilities relating to teachers, student and public rights.

Prerequisites: EDUC-UL 5501.

EDUC-UL 5503 Student, Staff And Organization Development Credits: 3

Participants will study as a member of a cohort team doing clinical work in school and developing the ability: 1) to gain knowledge of, and practice in developing "learning organizations"; 2) to assist teachers and other staff members of a school in structuring classrooms around the learning and development of all students; 3) to lead and develop urban schools that are culturally diverse where learner outcomes and performance are not related to race, class, or gender; and 4) to provide leadership related to developing school structures that are outcome oriented.

Prerequisites: EDUC-UL 5501 and EDUC-UL 5502.

EDUC-UL 5504 Elementary School Administration Credits: 3

Contemporary knowledge, understanding, and competencies for elementary administration. Focus on leadership, communication, group processes, organization, fiscal, and political areas. In addition, basic roles and responsibilities of the school principalship are addressed.

EDUC-UL 5505 Middle School Administration Credits: 3

Middle school goals, effective middle school leadership, change models for staff development, relevant curricula, auxiliary and support systems.

EDUC-UL 5506 Secondary School Administration Credits: 3

Organization and objectives of secondary education; curriculum trends; role analysis; principal-staff relations.

Prerequisites: EDUC-UL 5501.

EDUC-UL 5507 Instructional Supervision Credits: 3

Principles of supervision, factors influencing effectiveness of instruction, including the evaluation of teachers.

EDUC-UL 5508 Special Education Administration Credits: 3

Provides special educators, special education and regular education administrators with knowledge and experience in the areas of special education process, policy development, data collection and funding, legal issues and program organization. Special emphasis is given to dealing with common problems which arise in public school special education programs.

EDUC-UL 5510 Planning Educational Facilities Credits: 3

Analysis of educational specifications; cooperative planning processes; analysis of trends in school facilities; financial considerations and construction research. Visitation of selected facilities included.

EDUC-UL 5511 Public School Business Administration Credits: 3

The business related aspects of administering a school district including budgeting and accounting, purchasing, transportation, insurance, and facilities management.

EDUC-UL 5512 School Finance Credits: 3

Sources of revenue for public education; distribution of monies for education; budget construction; accounting procedures; and theories for financing education.

EDUC-UL 5513 School Personnel Administration Credits: 3

Study of processes, policies and theory concerned with the personnel function in educational administration. Emphasizes the importance of human resources in developing effective educational systems.

EDUC-UL 5514 Public Relations In Education Credits: 3

Analysis of various public views on education; mass communications and social change; public relations programs.

EDUC-UL 5515 Governmental And Legal Aspects Of Education Credits: 3

Current and recent legislation affecting education; court cases related to education; emerging patterns of modern juris-prudence; administrators' responsibilities regarding legal decisions.

EDUC-UL 5516 Governmental And Legal Aspects Of Special Education Credits: 3

An examination of current and recent legislation affecting special education; emerging patterns of modern jurisprudence; and special education teacher and administrator legal responsibilities.

EDUC-UL 5518 Leadership for School Improvement Credits: 3

The content of this course has a focus on identifying and using data to make school improvement decisions. Students will be engaged in readings, activities, and reflections that discuss the importance of using data for decision-making at the building and district levels of school leadership.

Prerequisites: Admission into the Educational Administration Program.

EDUC-UL 5520 Data Driven Leadership for Reculturing Schools Credits: 3

The challenges facing urban education are complex and may be understood from a myriad of perspectives including historical and socio-cultural underpinnings, economic and political contexts, and pedagogical/achievement orientations. This course will bring together some of these arguments as they relate to what school leaders can do to promote a community of adult leaders who use data to make decisions for the success of all children. Such a challenge includes working as educational leaders to reculture schools to increase opportunities for all students to learn. For some schools this task involves closing the persistent achievement gap that may exist among groups of students which requires disaggregating data by race, ethnicity, socioeconomic status, gender, and special educational needs.

EDUC-UL 5522 School Organizational Culture As The Context Of Change Credits: 3

This course is designed to enable students to understand that schools as organizations develop cultures and that this culture establishes relationships and conditions in schools for students, teachers, and administrators. Students will develop an understanding of the culture of a school and its influence on efforts to achieve substantive change or reform.

EDUC-UL 5523 Administrative Roles For Instructional Leadership Credits: 3

This course meets a requirement for administrator certification in Missouri and Kansas in the area of school improvement and leadership. The course focuses upon leadership roles necessary for creating a supportive climate for change and for implementing improved instructional programs.

EDUC-UL 5524 Philosophical Inquiry And Education Credits: 3

An examination of issues, problems and controversies discussed in educational and related literature, utilizing criteria and techniques of logical and philosophical analysis. The focus is on the development of critical thinking abilities as applied to theories, positions and arguments in educational and related contexts.

EDUC-UL 5525 Cultural Foundations Of Education Credits: 3

Examines education and schooling as cultural phenomena. This course focuses on an analysis of education and schooling as both cultural transmission and cultural change and the practical implications. Also included is a philosophical/ theoretical examination of varying relationships between dominant and minority cultures.

EDUC-UL 5526 Philosophical Foundations Of Education Credits: 3

Introduction to the study of philosophical problems implicit in educational issues. Focuses on the application of a number of philosophical concepts and skills to a variety of controversies, policies, and theories in education.

EDUC-UL 5527 Historical Foundations Of Education Credits: 3

Study of the development of educational policy, practice, and theory in relation to changes in social institutions and thought. Focuses on the analysis of contemporary educational problems in the light of historical perspectives.

EDUC-UL 5528 Sociological Foundations Of Education Credits: 3

An analysis of issues involving the role of schools in society, the relationship between education and other social institutions, and contemporary social developments which have major implications.

EDUC-UL 5531 Educational Leadership and Human Resources Credits: 3

This course has been designed to develop students' proficiencies in school human resource management and its importance to positive outcomes for student learning. The course focuses on human resource components that are essential to effective schools.

Prerequisites: Admission into the Educational Administration EdD Program.

EDUC-UL 5532 Educational Leadership and Organizational Behavior Credits: 3

This course has been designed to develop the students' proficiencies in school organization and management to provide positive outcomes for student learning. The course focuses upon organizational behavior and development and its components that are essential to effective school.

Prerequisites: Admission into the Educational Administration EdD Program.

EDUC-UL 5534 English Language Learner Program Administration Credits: 3

Provides educators, administrators, and district officials with knowledge, skills, and dispositions necessary to supervise/manage programs and teachers in elementary, middle, or secondary schools that serve students with limited English proficiency. Participants will study and apply theories and practices related to language acquisition cultural pluralism, multicultural education, family and community engagement, acculturation, assessment, and legal rights and responsibilities relating to English language learners and the school.

Prerequisites: Bachelor's degree.

EDUC-UL 5535 Current Topics in Urban School Leadership Credits: 3

Current Topics in Urban School Leadership

EDUC-UL 5550 Organization And Administration Of Higher Education Credits: 3

Organizational patterns; administrative roles and procedures; establishment of policies, institutional development; and public and private financing of higher education.

EDUC-UL 5551 Student Affairs Administration In Higher Education Credits: 3

Study of the objectives, organizational structure, and current issues of student affairs administration as they relate to the academic program, the campus environment, and the needs of students; analysis of the functions of different services.

EDUC-UL 5553 Supervision and Management of People Credits: 3

The purpose of this course is to provide a broad overview of staffing practices in the field of higher education, especially student affairs. The course will assist students to be better professionals, to learn the literature as it relates to supervision, and to begin basic skill development. Other course content includes issues surrounding staff selection, staff orientation. The course is open to any graduate student.

EDUC-UL 5556 The College Student Credits: 3

An examination of today's college students. Review and study of demographics, relationships of students and colleges, nature of student communities, new student populations and the impact of college on students and their educational development.

EDUC-UL 5557 Legal Aspects Of Higher Education Credits: 3

Study of legal issues within higher education. Focus is on state and federal law and regulations as they pertain to issues ranging from academic freedom to governance and administration. Focus on strategies for preventive law is a major component of the course.

EDUC-UL 5558 Advanced Student Development Theory Credits: 3

A focused and in-depth examination of developmental theories related to the college student. This course builds on information presented in EDUC-UL 5556.

Prerequisites: EDUC-UL 5556.

EDUC-UL 5559 Current Issues In Community Colleges Credits: 3

A course responsive to the contemporary issues in community college administration, addressing interesting and important topics that fall outside the scope of other courses in the higher education curriculum. Students will have an overview of the role of community colleges within the larger organization of colleges and universities in the U.S. higher education system.

Prerequisites: Graduate student status.

EDUC-UL 5560 Leadership In Higher Education Credits: 3

Focus on leadership, connections among different approaches to leadership, different forms of power, and different leadership behaviors. A series of opportunities to think systematically about leadership and to increase a student's personal leadership capacities in higher education will be provided.

EDUC-UL 5562 Gender & Leadership In Educ: Implications For Prof. Effectiveness Credits: 3

This course is for women and men who want to understand better the unique challenges and opportunities facing leaders in today's educational organizations. Exploration of connections between gender and leadership is the focus of study. Students will probe linkages between gender and leadership for their own leadership and for organizational policy and practice.

EDUC-UL 5564 History Of Higher Education Credits: 3

Study of the evolution of the constituencies within different types of American higher education institutions. The development of professional, practical, and graduate education will be examined as will 20th century alternatives to the liberal arts colleges and research university models.

EDUC-UL 5566 Racial And Ethnic Diversity, And Cultural Understanding Credits: 3

An exploration of the ideological and historical construction of education for social equality, and subsequent issues of race, ethnicity, and class that influence colleges and universities in the U.S. today.

EDUC-UL 5567 Higher Education Capstone Credits: 3

This course will provide a culminating experience for students in the Higher Education Masters program. All aspects of higher education administration will be examined and synthesized to enhance student ability to understand and operate in a complex setting.

EDUC-UL 5570 Administrative Practicum Higher Education Credits: 3-6

Assigned administrative responsibilities under supervision of practicing higher educational administrator, seminar and written project accompany field experiences.

EDUC-UL 5571 Internship In Higher Education Credits: 3-16

Applied experiences in a planned, supervised program. Seminar accompanies internship experiences.

EDUC-UL 5572 Higher Education Administration: The Profession Credits: 3

A course to introduce the prospective or new student affairs professional to all facets of higher educational administration. The course provides a balance of presentations by student affairs professionals, participation and observation in a variety of higher education offices and individual research projects. It is anticipated that students will visit several institutions of higher education and will participate in a service-learning project.

EDUC-UL 5574 Administrative Practicum Credits: 1-6

Assigned administrative responsibilities under supervision of practicing educational administrators seminar and written project accompany field experiences.

EDUC-UL 5575 Internship In Administration Credits: 1-16

Applied experiences in a planned, supervised educational administration program. Seminar accompanies internship experiences.

EDUC-UL 5589 Special Topics In Educational Leadership Credits: 1-6

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed on the semester bulletin.

EDUC-UL 5589AD Special Topics In Educational Leadership Credits: 1-6

EDUC-UL 5589BE Special Topics in Educational Leadership Credits: 1-6
Special Topics in Educational Leadership

EDUC-UL 5589CP Special Topics In Educational Leadership Credits: 1-6**EDUC-UL 5589EA Special Topics In Educational Leadership Credits: 1-6**

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed on the semester bulletin.

EDUC-UL 5589ED Special Topics In Educational Leadership Credits: 1-6

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed on the semester bulletin.

EDUC-UL 5589EL Special Topics In Educational Leadership Credits: 1-6

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed on the semester bulletin.

EDUC-UL 5589ET Special Topics In Educational Leadership Credits: 1-6

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors, and prerequisites to be listed on the semester bulletin.

EDUC-UL 5589HR Special Topics In Educational Leadership Credits: 1-6**EDUC-UL 5589LR Special Topics In Educational Leadership Credits: 1-6****EDUC-UL 5589OB Special Topics In Educational Leadership Credits: 1-6****EDUC-UL 5589SM Special Topics In Educational Leadership Credits: 1-6****EDUC-UL 5590 Seminar Credits: 3**

Discussion and evaluation of literature in Education Administration.

EDUC-UL 5598 Individual Studies Credits: 1-6

Review of the research and trends relative to selected problems in education.

EDUC-UL 5601 Research In Education Administration: Qualitative Theory & Design Credits: 3

First of two courses in advanced qualitative research in higher education and educational administration. Focus is on the theory and design of qualitative work. Students will become familiar with the various ontological, epistemological, and methodological assumptions that guide research in the social sciences and be able to make informed choices about inquiry techniques for dissertation and future research.

EDUC-UL 5602 Seminar In The History Of American Urban Education Credits: 3

A study of the historical development of American urban educational institutions and ideas and of how that development is embedded within the broader context of social, political, and economic change in the United States.

EDUC-UL 5603 Research In Education Administration: Qualitative Data & Analysis Credits: 3

Second of two courses in advanced qualitative research in higher education and educational administration. Focus is on data collection and analysis in qualitative work. Students will become familiar with various data gathering techniques and devices for interpreting qualitative data and drawing meaningful conclusions. This information will guide students in dissertation and future research.

Prerequisites: EDUC-UL 5601.

EDUC-UL 5604 Introduction to Doctoral Study Credits: 3

This course is designed as an introductory course in the doctoral sequence for the EdD in Educational Administration with an emphasis in Higher Education. The course is designed to introduce students to the tasks and processes involved in the completion of the doctoral requirements. It is required for all entering doctoral students.

Prerequisites: Admission to the doctoral program.

EDUC-UL 5616 Analysis Of Educational Theory Formation Credits: 3

Study and application of criteria for evaluating the adequacy of educational theories and evaluating the relevance to theories of research studies.

EDUC-UL 5626 Theory In Educational Administration Credits: 3

Leadership theories and research; bureaucracy and organizational processes; new directions in organizational analysis; sociological and psychological concepts in school administration.

Prerequisites: EDUC-UL 5501.

EDUC-UL 5627 Advanced Educational Supervision Credits: 3

Principles and concepts of educational supervision and implementation.

Prerequisites: EDUC-UL 5507.

EDUC-UL 5628 The Superintendency Credits: 3

Analysis and overview of the nature, functions and activities of the public school superintendency including: historical and philosophical foundations; board-staff and other governing body relationships and functions; professional staff relations and management; public relations and communication; inter-governmental relations and responsibilities, and the functions of planning, direction and supervision of the instructional enterprise.

EDUC-UL 5634 Faculty & Curricular Issues Higher Education Credits: 3

This course will explore different facets of college and university curricula. This course will include varying ways curriculum has been structured and the debates that have surrounded the structure and content. Faculty issues will be explored via the curriculum and will include a focus on workload policies and practices.

Prerequisites: Admission to the doctoral program.

EDUC-UL 5635 Topics In Higher Education Credits: 3

Organization of higher education, public and private financing; accreditation; academic freedom; policy development; community relations; curricular patterns, selected current issues.

Prerequisites: EDUC-UL 5550 (or equivalent).

EDUC-UL 5636 Policy Issues in Higher Education Credits: 3

This course is intended for those whose roles as educational leaders requires them to participate in the analysis and development of policies associated with educational programs and practice. Students will be able to understand the characteristics of a well developed policy agenda, obstacles to policy implementation, and interpretations related to policy implementation. Concurrently, institutional, political, economic, social, and moral consequences of various policies will be explored.

Prerequisites: Admission to the doctoral program.

EDUC-UL 5637 Community College Credits: 3

Investigation of the purposes, programs, and the problems in the American community college movement; analysis of the structure, governance, and financial support of community colleges.

Prerequisites: Doctoral status.

EDUC-UL 5640 Apprenticeship And Conference In College Training Credits: 2-5

Apprenticeship experience in preparing, conducting, and evaluating college teaching under the direction of and in conference with supervising professors. Some attention to student personnel and administration in higher education.

EDUC-UL 5652 Financial Aspects Of Higher Education Credits: 3

This course is designed for graduate students with a basic understanding of the area of Higher Education Administration. The course examines basic concepts and principles of finance in higher education in the United States. Students are expected to: Develop an understanding of 1) the issues and fiscal problems of higher education, 2) the roles and responsibilities of financial officers in higher education, and 3) possible future trends in the financing of higher education.

Prerequisites: Doctoral status.

EDUC-UL 5655 Studies In Philosophy Of Education Credits: 3

Study of special topics in the philosophy of education.

Prerequisites: EDUC-UL 5523, EDUC-UL 5526.

EDUC-UL 5660 Effective Practices II Credits: 3

This course builds on the general understanding of leadership and professional practices developed in Leadership in Education Effective Practices I. The course addresses key leadership challenges and decision making in today's complex work world. The course uses reading on selected issues, case discussions, and role plays to move beyond theory and understanding to application and effectiveness.

EDUC-UL 5665 The Urban University Credits: 3

This course examines the development and unique aspects, characteristics and role of the urban university. In addition to an exploration of the historical relationship between urbanization in American society and university development and evolution, seminars will focus attention on undergraduate and graduate education, faculty development, community relations, and regional and economic development for urban institutions.

Prerequisites: Doctoral status.

EDUC-UL 5685 Problems And Issues In Education & Urban Leadership Credits: 3

This course serves as the capstone class for all doctoral students in education. The course requires analysis of successful dissertations in urban education and prepares students to write their own dissertation relative to urban study and education.

EDUC-UL 5690 Special Problems Credits: 1-6

Individual studies; thesis exploration, special reading.

EDUC-UL 5690A Special Problems Credits: 1-6

Individual studies; thesis exploration, special reading.

EDUC-UL 5696 Dissertation Administration And Community Leadership Credits: 1-16

Culminating written research project for doctoral students in Urban Leadership and Policy Studies.

Urban Planning and Design (UPD)

Courses

UPD 5526 History of Urban Planning & Design Credits: 3

The course provides a survey of the history of urban planning and design with emphasis on the nineteenth and twentieth centuries in the United States. The course also teaches basic historic research methods.

UPD 5596 Directed Study In Urban Planning And Design Credits: 1-3

Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5596A Directed Study In Urban Planning And Design Credits: 1-3

Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5596B Directed Study In Urban Planning And Design Credits: 1-3

Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5596C Directed Study In Urban Planning And Design Credits: 1-3

Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5599 Special Topics In Urban Planning And Design Credits: 1-3

Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5599A Special Topics In Urban Planning And Design Credits: 1-3

Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5599B Special Topics In Urban Planning And Design Credits: 1-3

Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5599C Special Topics In Urban Planning And Design Credits: 1-3

Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 5630 Quantitative Planning Methods I Credits: 3

This course introduces graduate students to quantitative methods in urban planning analysis. Topics include relating built form to function, demographic forecasting, economic impact analysis, trip generation, and housing market dynamics.

Prerequisites: STAT 235.

UPD 5700 Advanced Planning Theory & Practice Credits: 3

Exploration of contemporary planning theory and practice, including planning knowledge, skills, values, and ethics.

UPD 5710 Historic Preservation Studio Credits: 3

Studio instruction in historic preservation planning focusing on research, context, evaluation, policy, and plan creation for historic resources.

UPD 5740 Advanced GIS for Urban Planning Credits: 3

This advanced level GIS course is designed to expose graduate students to high level GIS techniques and geospatial analysis in the urban planning context. Students will learn data management skills in GIS and advanced geoprocessing tools with hand-on experiences. Students will also have an opportunity to work on a real world GIS project as part of course requirements.

Prerequisites: UPD 203.

UPD 5742 Transportation Planning Credits: 3

This course provides fundamental theories, methods, and contemporary issues in transportation planning. The topics covered in this course include the transportation planning process, transportation systems, travel demand analysis, and policy issues such as the linkage between land use and transportation and environmental impacts, and traffic congestion.

UPD 5743 Introduction to Historic Preservation Credits: 3

The course introduces the history and theory of historic preservation through a survey of major issues in the field from a planning perspective. The course focuses on preservation through cultural, social, historical, legal, policy, and economic lenses, primarily in the United States.

UPD 5744 History of the Built Environment Credits: 3

Survey of the built environment concentrating on nineteenth and twentieth century design in the United States.

UPD 5745 Historic Preservation Methods Credits: 3

Exploration of historic preservation methods, including survey, documentation, policy, and management approaches used in practice.

UPD 5746 Urban Environmental Planning Credits: 3

Urban environmental planning examines ecological change due to urbanization. It looks at ways to measure and demonstrate ecological change at the site, neighborhood, and regional scales. Students incorporate environmental ideas and policies into plans developed for a client.

UPD 5747 Urban Redevelopment Credits: 3

This course examines techniques of urban redevelopment within urban planning and real estate. Graduate students learn about the development process, real estate markets, techniques of development finance and local policy approaches to urban redevelopment incentives.

UPD 5750 American Housing Credits: 3

Students will explore housing in cultural, design, and historical terms and examine contemporary American housing policy.

UPD 5790 Historic Preservation Internship Credits: 3

Off-campus work experience with an approved professional, government, or nonprofit agency sponsor.

Prerequisites: UPD 5743.

Viola (VIOLA)

Courses

VIOLA 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

VIOLA 5500A Graduate Viola-Secondary Credits: 2

VIOLA 5500B Special Applied Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

VIOLA 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

VIOLA 5501 Graduate Viola - Masters Performance Credits: 4

VIOLA 5601 Graduate Viola - Doctoral Performance Credits: 4

Violin (VIOLIN)

Courses

VIOLIN 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

VIOLIN 5500A Graduate Violin-Secondary Credits: 2

VIOLIN 5500B Special Applied Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

VIOLIN 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

VIOLIN 5501 Graduate Violin - Masters Performance Credits: 4

VIOLIN 5601 Graduate Violin - Doctoral Performance Credits: 4

Voice (VOICE)

Courses

VOICE 5200 Vocal Coaching: Recital and Operatic Repertoire Credit: 1

The purpose of vocal coaching is to aid singers in refining their performance in terms of musical style, nuance, language, and character. It is intended to amplify the singer's understanding of aspects of performance including musical shaping, dynamic contrasts, poetic/textual architecture, traditional approaches to literature of various periods and styles, and appropriate performance practices.

Prerequisites: You must be a graduate student in vocal performance at the Conservatory of Music Dance.

VOICE 5300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

VOICE 5311 University Singers Credit: 1

Mixed chorus specializing in choral-orchestral literature. May be repeated for credit. Open by audition to University students, regardless of major.

VOICE 5500A Graduate Voice-Secondary Credits: 2

VOICE 5500B Special Applied Studies Credits: 2

One-hour lesson weekly. This course is for pedagogical or review purposes. An audition is required, and a jury for comments only may be held at the discretion of the division. May be repeated for credit.

VOICE 5500C Applied Study of a Second Instrument Credit: 1

One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

VOICE 5501 Graduate Voice - Masters Performance Credits: 4

One hour weekly participation in Vocal Performance Seminar is required

VOICE 5502 Applied Voice Credits: 2

Applied instruction in voice, focusing primarily on the pedagogical aspects of proper solo vocal singing technique for the graduate level singer.

VOICE 5601 Graduate Voice - Doctoral Performance Credits: 4

One hour weekly participation in Vocal Performance is required.

Undergraduate Course Offerings

Accounting (ACCTNG)

Courses

ACCTNG 210 Introduction To Financial Accounting Credits: 3

An overview of basic concepts and terminology associated with reporting financial information to parties outside of an organization. This course requires students to take an accompanying lab that meets one day a week.

Prerequisites: MATH 110 or MATH 120 or higher; or ALEKS score of 61 or higher; or ACT MATH sub-score of 28 or higher; or SAT MATH sub-score of 660 or higher; and 30 hours completed.

ACCTNG 211 Introduction To Managerial Accounting Credits: 3

An introduction to the use of cost accounting concepts and information in managing the activities of a business.

Prerequisites: ACCTNG 210 and completion of 45 hours.

ACCTNG 306 Introduction to the Accounting Profession and Procedures Credits: 3

A study of the profession of accounting, the accounting process, and tools used in implementing that process.

Prerequisites: ACCTNG 210 and completion of 45 hours.

ACCTNG 307 Cost Management Credits: 3

A study of the principles and techniques of cost accounting with emphasis on the structure of cost accounting systems and the processing, summarizing and reporting of cost information. Topics include various issues relevant for manufacturing and service organizations, and introduction of situations that require the application of cost information to managerial settings.

Prerequisites: ACCTNG 211 and junior standing Bloch student.

ACCTNG 310 Intermediate Accounting Credits: 3

A study of theory and application of external corporate reporting. The course covers a variety of financial accounting issues including assets, liabilities, revenue recognition, and accounting change analysis. Publications and pronouncements of the accounting professions are emphasized where applicable.

Prerequisites: ACCTNG 306 and Bloch student.

ACCTNG 318 Introduction to Data Analysis in Accounting Credits: 3

With the proliferation of large data sets, the ability to use a variety of software tools to gain understanding of this data has become an invaluable skill set in modern accounting. The statistical concepts and spreadsheet versatility presented in earlier course work will be augmented with graphical presentation types and best practices, database structure and usability, and statistical application here. These skills will be embedded in the methodology of data analysis commonly found in accounting environments.

Co-requisites: ACCTNG 310.

ACCTNG 350 Accounting Systems And Controls Credits: 3

This course examines a number of systems employed to process accounting information, the internal control activities typically used in each system and associated documentation techniques.

Prerequisites: ACCTNG 310 (or co-requisite, ACCTNG 306, and Pre-MSA student).

ACCTNG 360 Accounting Research and Communications Credits: 3

A study of solving accounting issues by conducting research in the professional literature and communicating the results of that research to users. Students practice oral and written communication skills.

Prerequisites: ACCTNG 310.

ACCTNG 405 Auditing Credits: 3

A study of how the auditor determines the nature and amount of evidence that should be accumulated considering the unique aspects of an engagement, as well as some idea of how that evidence is evaluated in the context of a financial audit.

Prerequisites: ACCTNG 311 and ACCTNG 350.

ACCTNG 412 Introduction to Income Taxation Credits: 3

An examination of the theory, practice, and research methodology of taxation as applied to individuals and business entities.

Prerequisites: ACCTNG 211.

ACCTNG 418 Data Analytics for Accounting Credits: 3

Data Analytics is an investigation of the stories that large data stores can tell if only we know how to unravel them. As such, this course will examine big data sources from both a data-mining and a hypothesis-testing approach.

Prerequisites: Senior standing and BS Accounting student.

ACCTNG 420 Advanced Accounting Credits: 3

A study of the accounting for business combinations and the preparation of consolidated financial statements.

Prerequisites: ACCTNG 310.

ACCTNG 421 Governmental/Not-For-Profit Accounting Credits: 3

An overview of accounting for state and local governments and not-for-profit entities. Pronouncements of the accounting profession are emphasized where applicable.

Prerequisites: ACCTNG 310.

ACCTNG 464 Principles of Internal Auditing Credits: 3

A study of how the internal auditor determines the nature and amount of evidence that should be accumulated considering the unique aspects of an engagement, as well as some idea of how that evidence is evaluated in the context of a financial audit.

Prerequisites: ACCTNG 311 and ACCTNG 350.

ACCTNG 470 Fraud Examination Credits: 3

An examination of the elements of fraud and the fraud auditing process.

Prerequisites: Junior standing Bloch student.

ACCTNG 487 Special Topics Credits: 3

Special topics in accounting.

ACCTNG 496 Internship: Accounting Credit: 1

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Internship coursework is evaluated on a credit/no credit basis.

Prerequisites: Departmental consent.

ACCTNG 497 Special Topics In Accounting Credits: 1-3

Study and research in accounting areas of special student interest, under individual faculty supervision and guidance.

Prerequisites: Departmental consent.

Anchor (ANCH)

Courses

ANCH 101 University College Seminar Credits: 3

The purpose of ANCH 101 is to help new students make a successful transition to the University of Missouri-Kansas City, both academically and personally. This course aims to help students develop and apply critical thinking skills (Interdisciplinary and Innovative Thinking and Valuing and Reasoning), engage in the curricular and co-curricular life of the university, articulate to students the expectations of the University and its faculty, understand the value of a liberal education in the 21st century, and continue to clarify their purpose, meaning, and direction. First-time, year-one students admitted into the University College will enroll in ANCH 101.

Co-requisites: DISC 100.

ANCH 102 Introduction to Urban Studies Credits: 3

Introduction to Urban Studies is a lecture and discussion course that provides the undergraduate student with an overview of the interdisciplinary field of urban social science. The student who successfully completes this course will have a broad understanding of the major issues, vocabulary, basic methods, and prominent scholars in urban studies. We will explore current events of relevance, including the opportunities and problems facing major cities in the United States including Kansas City.

Co-requisites: DISC 100.

ANCH 102 - MOTR URBN 202: Intro to Urban Studies**ANCH 103 Muse Credits: 3**

This course merges a variety of academic platforms and student activities so that collaboration among disciplines becomes a natural, logical solution to academic, professional, and performing arts challenges. Course content is derived from music history as it relates to Kansas City in the 21st century through examining the ethics of creating the canon. Activities are drawn directly from music history to achieve understanding in Human Values and Ethical Reasoning as they relate to our community.

Co-requisites: DISC 100.

ANCH 104 The Countercultural Experience Credits: 3

This interdisciplinary course examines countercultures, groups whose shared values and practices set them apart from mainstream culture. Students will explore how and why countercultures form, transform and decline; how they reason out, articulate and practice their shared cultural values; their function as distinctive discourse communities; and how individual members negotiate their identities and values within and between cultural groups.

Co-requisites: DISC 100.

ANCH 105 The Value of Beauty Credits: 3

This class surveys European aesthetics, defining what counts as beautiful and the roles art plays in society.

Co-requisites: DISC 100.

ANCH 106 Money, Medicine and Morals Credits: 3

This course will improve the student's understanding of and ability to critically evaluate complex moral dilemmas in medicine, business, law and other professions. Students will learn critical thinking, arguing, writing and presentation skills through examining moral issues for professionals. Guest speakers will introduce students to practical aspects of professional life.

Co-requisites: DISC 100.

ANCH 107 Global Inequality: Slavery in Historical and Archaeological Perspective Credits: 3

Using archaeological and historical evidence from around the world, including the state of Missouri and the Kansas City region, students will explore the conditions which gave rise to inequality. By exploring slavery in various forms, students will understand its historical development, as well as its continued impact on society today.

Co-requisites: DISC 100.

ANCH 108 Surfing the Matrix: Keeping Your Head Above Water in a Sea of Information Credits: 3

Students will analyze, interpret and/or reconstruct human events, experiences, actions and interactions, through case studies that will help them to understand the principles of value and civic duty in a wide range of settings. Students will be able to identify ethical problems in business, apply critical thinking concepts to better synthesize their understanding of ethical issues and moral reasoning, and be able to articulate implications and consequences that emerge from critical thinking constructs when filtering, analyzing and synthesizing multiple variables.

Co-requisites: DISC 100.

ANCH 109 Education and Urban Society Credits: 3

This course is designed to introduce students to the social and philosophical issues in urban education and will include an emphasis on culture, race, class, and ethnicity as they relate to schooling in urban America. Students will engage in thinking and rethinking problems, issues and solutions that complicate our collective understanding of the intersection of urban society and education.

Co-requisites: DISC 100.

ANCH 150 Computing and Engineering in Society Credits: 3

This course provides a broad and general introduction to the practice and history of engineering and computing fields; their impact on humanity and society and their relationship to the ecosystem, professionalism and ethics. The course introduces important concepts relevant to the fields of engineering and computing, including the engineering approach to solving problems, communications and computations, ethics, environmental responsibility and teamwork. Particular attention will be paid to how technology, engineering and pervasive computing impacts society. The course also introduces academic skills and strategies for success as a student and in a professional career.

Co-requisites: DISC 100.

ANCH 199 Anchor I Special Topics Credits: 3

Anchor I Special Topics

ANCH 201 Race in American Film Credits: 3

This course examines representations of race and ethnicity in American film from the silent era onward in mainstream and countercultural traditions. It explores how social, political, and economic conditions contribute to constructions of race and ethnicity.

Prerequisites: Anchor I, DISC 100.

Co-requisites: DISC 200.

ANCH 202 Crossing Boundaries Credits: 3

This course examines the Latina/o immigrant experience from the immigrants' diverse origins in the Americas to the communities they shape. Students will examine how empire, war, and economic integration have pushed people to migrate and how work, family, and immigration policy have shaped patterns of migration and settlement as well as integration and exclusion.

Prerequisites: DISC 100 and Anchor I.

Co-requisites: DISC 200.

ANCH 204 Women in the Ancient World Credits: 3

This course focuses on the history, representation, literature, social lives, and political roles of women in ancient civilization including Egypt, Mesopotamia, the Biblical World, Greece, and Rome. It integrates methodologies from history, art history and archaeology, literary studies, and women's studies.

ANCH 205 Self in a Multicultural Society Credits: 3

This course will focus on what it means for the individual to live in a multicultural, urban, and increasingly global society. Students will examine their own cultural identity, including values and worldviews as well as assumptions and biases regarding others' diversity. In addition, the course will focus on learning about different cultures and issues associated urbanism, globalization, cultural conflicts and social advocacy.

ANCH 206 Queer in the City/An Introduction to LGBT Studies Credits: 3

This course introduces queer theory within the context of gender studies and urban studies. We will read, discuss, and react to classic text in queer theory, lesbian and gay studies, and sexuality and space studies. There will be an emphasis on finding "otherness" within everyday spaces, places, texts, and discourses.

Prerequisites: Anchor I and DISC 100.

Co-requisites: DISC 200.

ANCH 207 The Classical Mediterranean World Credits: 3

This course examines the history, literature, and culture of Ancient Greece and Rome in the context of the Mediterranean world, from its origin until the Barbarian invasion. Students will read poetry, philosophy, history, rhetoric, and letters from primary text sources and they will study material evidence such as architecture, graffiti, and physical objects as representative survivals of these cultures.

Prerequisites: Anchor I, DISC 100.

Co-requisites: DISC 200.

ANCH 208 Women in the Medieval World Credits: 3

This course offers an interdisciplinary approach to the study of women during the Middle ages (ca. 600-1500), focusing on the different cultures of Europe. Arranged around a series of themes, the cluster will read a variety of documentary and literary texts to investigate the ways in which women experienced agency, were depicted and imagined, and acted within the social and cultural contexts of the era.

Prerequisites: Anchor I, DISC 100.

Co-requisites: DISC 200.

ANCH 209 World Cultures, Histories and Ideas Credits: 3

This interdisciplinary course will explore the cultures, histories, and ideas of one or more regions of the world as well as dynamics of interaction between them. Students will be exposed to a very wide range of disciplinary approaches to this topic and learn how to engage critically in an interdisciplinary dialogue within this field. Topics will vary depending on the instructors.

Prerequisites: Anchor I, DISC 100.

Co-requisites: DISC 200.

ANCH 210 American Cultures, Histories & Ideas Credits: 3

This interdisciplinary course will explore the cultures, histories, and ideas of the United States. Students will be exposed to a very wide range of disciplinary approaches to this topic and learn how to engage critically in an interdisciplinary dialogue within this field. Topics will vary depending on the instructors.

Prerequisites: Anchor I, DISC 100.

Co-requisites: DISC 200.

ANCH 211 Cities of the World Credits: 3

This course will focus on urban issues to help students develop global perspectives. Urbanization has been a global phenomenon, and more than half of the world population lives in urban areas. Students will learn past, present and future urban issues and challenges on the global scale and about how cities of the world have coped and will cope with these issues and challenges.

Prerequisites: Anchor I, DISC 100.

Co-requisites: DISC 200.

ANCH 212 Critical Issues in Women's, Gender, and Sexuality Studies Credits: 3

This class is an interdisciplinary course that will examine critical issues in women's, gender and sexuality studies by focusing on the intersections of gender, race, class, sexuality, and social context. Through their study of these intersections, students will become more sensitive to the impact of social structures on gender and the experiences of women and men.

Prerequisites: Anchor I, DISC 100.

Co-requisites: DISC 200.

ANCH 213 Empire Credits: 3

This is an interdisciplinary, team-taught course designed to teach students ways to think about the complexities of human cultures, past and present, helping them examine how imperialism continues to shape contemporary understandings of personal, institutional, and cultural identities (both of selves and others). The course analyzes global cultures with a focus on the economic, environmental, political and social consequences of specific imperial regimes and the ongoing impact of these regimes on particular groups that continue to live with the legacies of empire.

Prerequisites: Anchor I, DISC 100.

Co-requisites: DISC 200.

ANCH 214 European Cultures, Histories & Ideas Credits: 3

This interdisciplinary course will explore the cultures, histories, and ideas of a particular region of Europe. Students will be exposed to a wide range of disciplinary approaches to this topic and learn how to engage critically in an interdisciplinary dialogue within this field. Topics will vary depending on the instructors.

Prerequisites: Anchor I, DISC 100.

Co-requisites: DISC 200.

ANCH 215 Crossing Boundaries: The Latina/o Immigrant Experience Credits: 3

This course examines the Latina/o immigrant experience from the immigrants' diverse origins in the Americas to the communities they shape. Students will examine how empire, war, and economic integration have pushed people to migrate and how work, family, and immigration policy have shaped patterns of migration and settlement as well as integration and exclusion.

Prerequisites: DISC 100 and Anchor I.

Co-requisites: DISC 200.

ANCH 216 Intersections of Race, Class, Gender, and Sexuality Credits: 3

This course explores the complex, interconnected dynamics of and between race, (social) class, gender and human sexuality. As an interdisciplinary course, it explores how these concepts are understood holistically and how they are constructed and positioned within US society. This class emphasizes investigations, via critical thinking, about how these different systems of inequality interact with and through each other, while also being sensitive to different theoretical and methodological frameworks from several disciplines employed to analyze those systems.

Prerequisites: Anchor I, DISC 100.

Co-Requisites: DISC 200.

ANCH 218 Introduction to Ethnic Studies Credits: 3

An interdisciplinary course that uses a comparative perspective to examine the history, social issues, and cultural productions of African Americans, Arab Americans, Asian Americans, Latina/os, and Native Americans. Students will be introduced to key concepts and methods used in the study of race in an American context.

Prerequisites: Anchor I, DISC 100.

Co-requisites: DISC 200.

ANCH 218 - MOTR LITR 105: Multicultural Literature**ANCH 220 We Shall (All) Overcome: Civil Rights Movements in Contemporary America Credits: 3**

This course examines the fight for civil rights in America in the 20th and 21st centuries in order to emphasize the importance of culture and diversity in American society. Using interdisciplinary methods, the course addresses various local and national movements among the African American, Latino/a, LGBT, and Native American communities, as well as the women's rights movement.

Prerequisites: Anchor I, DISC 100.

Co-Requisites: DISC 200 (or satisfy DISC 200 with credit from two of ENGLISH 110, ENGLISH 225, or COMM-ST 110).

ANCH 299 Anchor II Special Topics Credits: 3

Anchor II Special Topics.

Prerequisites: Anchor I and DISC I.

ANCH 301 Environmental Sustainability Credits: 3

This course will introduce the concept of environmental sustainability and review examines how sustainability might work at the individual, neighborhood, state, nation and global scales. Students will participate in some form of community engagement on sustainability as well as reflect upon how their own practices impact the environment.

Co-requisites: DISC 300.

ANCH 302 Archaeology of Ancient Disasters Credits: 3

Remarkable human achievements are revealed by archaeological research, but the human past was frequently shaped as well by disasters of natural and human origin. Drawing on case studies that include data from the geosciences, archaeological excavations, and historical sources, this class examines how earth processes, the biosphere, and human cultural behavior were all sources of catastrophe.

Co-requisites: DISC 300.

ANCH 303 Film Adaptation Credits: 3

The class will explore the process of adapting both fiction and non-fiction literary works into motion pictures. Students will examine the original literary source, then the interim screenplay and finally the completed motion picture. This class will also explore the practical aspects of creating a film adaptation in Kansas City. Students will interact with Kansas City area film professionals and learn about the practical aspects of filming and exhibiting films in Kansas City.

Prerequisites: Anchor II, DISC 200.

Co-requisites: DISC 300.

ANCH 304 Telling Stories: History, Memory, and American Life Credits: 3

How we remember the past is shaped not only by academic historians but also by collectors, curators, librarians, archivists, artists, architects, urban planners and ordinary people. This course will invite students to participate in the shaping of history and memory through civic engagement in their community. Students will use resources available in local institutions to raise critical awareness about historical issues relevant to the present.

Prerequisites: Anchor II, DISC 200.

Co-requisites: DISC 300.

ANCH 305 The Artist in Society Credits: 3

This interdisciplinary anchor III course explores the various roles of artists in society. Using historical examples and building on current best practices, students will engage critically with the interplay between artistic pursuits, social justice, and community engagement.

Prerequisites: Anchor II, DISC 200.

ANCH 306 From Bench to Bedside: Translational Research Credits: 3

This course explores the spectrum between basic biological research and bedside clinical practice, delving into the topics “what is translational research?” and “how does a drug get to the market”. By engaging with people from the community involved at all levels of translational research, students will gain an appreciation for the civic issues behind medical research, the interdisciplinary nature of research, and the part that Kansas City institutions play in regional life and health sciences.

Prerequisites: Anchor I, Anchor II.

Co-Requisites: DISC 300.

ANCH 307 Frauds, Myths and Mysteries in Archaeology Credits: 3

Using archaeological hoaxes, myths, and mysteries from around the world – including local and regional examples - students will use science to make good judgments about information they receive in today’s world. This course will demonstrate how science approaches questions about human antiquity and will show where pseudoscience falls short.

Co-requisites: DISC 300.

ANCH 308 Ethical Issues in Computing & Engineering Credits: 3

Societal and ethical obligations of computer science, IT, and electrical/computer engineering practice. Topics include ethical obligations of professional practice, electronic privacy, intellectual property, software and system security and reliability, and whistle-blowing. This course teaches the principles of ethical analysis and how technology, law, and ethics interact in society, to help the graduate confront and deal with the ethical challenges that arise in professional practice.

Co-requisites: DISC 300.

ANCH 309 Mechanical Design Synthesis I Credits: 3

Introduction to and application of the Engineering Design Process including: product development, needs identification, benchmarking, information gathering, intellectual property, concept generation, creativity methods, concept selection, professional, ethical and legal responsibilities, and computer-aided design and rapid prototyping applications. A comprehensive design project requiring community engagement and an interdisciplinary design approach is required for each student. Recommended preparation: MEC-ENGR 130 or MEC-ENGR 131 or comparable non-engineering 3D CAD course.

Prerequisites: Anchor II.

Co-Requisites: DISC 300.

ANCH 310 Innovation and the Aging Population Credits: 3

Students in this course will explore the problems, challenges, and opportunities of an aging urban population and the role of the University in that context.

Prerequisites: ANCH I (Reasoning and Values) or equivalent, ANCH II (Culture and Diversity) or equivalent.

Co-requisites: DISC 300 (Civic and Community Engagement).

ANCH 311 Civil Engineering Capstone Design II Credits: 3

Comprehensive and realistic design project for area municipalities. Design choices and their effect upon the environment. Design constraints include constructability, minimization of environmental impact and cost-effectiveness. Managerial and professional aspects of design practice. Demonstrate understanding of engineering ethics. Includes interdisciplinary, community engagement within the context of civil engineering practice. Recommended preparation: CIV-ENGR 411.

Prerequisites: ANCH II.

Co-Requisites: DISC 300.

ANCH 314 Interdisciplinary Community Oral Health Field Experiences Credits: 3

Students will practice skills/principles learned in Anchor I-II by participating in interdisciplinary community projects and clinical activities targeting Kansas City's urban and surrounding rural environments. Students will use strategies of assessment, program planning, implementation and evaluation to improve existing, develop new, and reflect on service projects' purposes, methods, and consequences. Major emphases include team collaboration/leadership of civic action, community programming to enact measurable and meaningful change, respectful communication considering health literacy and associated disparities among patients and health care providers, to express ideas supporting wellness through improved oral health.

Prerequisites: Anchor I, Anchor II.

ANCH 315 Application to Practice I Credits: 3

This is the first of two clinical application courses designed to complement didactic content from the four-course block sequence (N481-N484). Students will integrate an increasingly complex knowledge base with an emphasis on developing effectiveness: personally, interpersonally, and in the health management of populations of clients within systems of community and professional organizations and practice settings. Student cohort groups, in collaboration with personnel from health related organizations and faculty, assess population health needs, identify outcomes and develop action plans based on real need. The practice experience learning processes and outcomes will be collective and provide solutions for the health care community.

Prerequisites: NURSE 481.

Co-requisites: NURSE 482 or NURSE 483.

ANCH 317 Science, Technology, and Society Credits: 3

This course examines how practitioners of science and innovators of technology have engaged with society throughout the past and up to the present. The central question that will frame our examination of their activities is, "What is civic engagement?" Through readings and research, we will examine how science and technology have influenced public policy and thus democracy itself. Students will take advantage of the close proximity of the Linda Hall Library to work with professionals at this unique repository of scientific and technological source material.

Prerequisites: ANCHOR I, ANCHOR II.

Co-requisites: DISC 300.

ANCH 318 From Oil Gushers to Fracking: A History of American Petroleum Credits: 3

This course asks students to consider civic engagement by studying how the history of oil production and consumption has influenced people's relationships to their communities and environments at the local, regional, and global scale. Bringing together the fields of geology and history, this interdisciplinary course explores how carbon fuels shapes life on the planet. Students will use civic engagement as a lens to examine how the use of fossil fuels has impacted societies and to learn how their actions as individuals and community members presently leave carbon footprints.

Prerequisites: ANCHOR I, ANCHOR II.

Co-requisites: DISC 300.

ANCH 319 Immersion in Urban Communities Credits: 3

This course is an experiential course where in much of the learning occurs through the student's interaction with their community and the student's thoughtful reflection on those activities. This course provides an in-depth examination into both the evolution of marginalized communities and dynamics of community building in inner cities, with special emphasis on Kansas City, Missouri. Students will be expected to explore their own role as an active citizen of their community through volunteerism and participation at civic events.

Prerequisites: ANCHOR II.

Co-requisites: DISC 300.

ANCH 320 Visual Culture and Civic Engagement Credits: 3

In this course students explore civic engagement through visual culture as both consumers and producers of information, and through both historical and contemporary examples. Areas of study include political communication and propaganda, public art, infographics and data visualization, performance, signage, monuments and mass media.

Prerequisites: Anchor II.

ANCH 399 Anchor III Special Topics Credits: 3

Students will explore the role of socially responsible citizens and leaders in a democratic society and contribute towards the betterment of the community. More specifically, this course will introduce students to concepts and strategies that will enable them to collaborate with classmates to analyze a social problem, develop a solution to that problem, and implement the solution. Group work is a significant component of this class and attendance is mandatory

ANCH H199 Anchor I Special Topics Credits: 3

Anchor I Special Topics

ANCH H214 European Cultures, Histories & Ideas Credits: 3

This interdisciplinary course will explore the cultures, histories, and ideas of a particular region of Europe. Students will be exposed to a wide range of disciplinary approaches to this topic and learn how to engage critically in an interdisciplinary dialogue within this field. Topics will vary depending on the instructors.

Prerequisites: Anchor I, DISC 100.

Co-requisites: DISC 200.

ANCH H298 Great Ideas: The Idea of Culture Credits: 3

Course will follow the evolution of ideas of culture from Classical Antiquity to the present, discussing different notions of culture across the world, whether anthropological, political or otherwise. We will begin by considering how culture is opposed to nature, and then move to the idea of comparative cultural anthropology in the Enlightenment, and finish with discussing current ideas of “cultural technologies.” Culture has also been opposed to technology (particularly in old European ideas of high culture), yet it increasingly depends on material mediation, whether through book-printing, the public institutions of newspaper and symphony orchestra, or radio, film and TV.

Co-requisites: DISC 200.

ANCH H299 Anchor II Special Topics Credits: 3

Anchor II Special Topics

ANCH H397 Public Urban Education Credits: 3

Is public urban education a “wicked problem,” an unparalleled opportunity, or a complex challenge that can be met during the twenty-first century in the United States? This interdisciplinary course will interrogate that question by surveying the history of public urban education, by considering contemporary educational issues, and by sending students into public urban schools to make their own observations and recommendations. Students will volunteer at least twelve hours during the semester at designated Kansas City schools.

Co-requisites: DISC H300.

ANCH H398 CITYLAB: ADDRESSING URBAN POLICY AND PUBLIC HEALTH THROUGH COMMUNITY ENGAGEMENT Credits: 3

This CITYLAB course engages the undergraduate student as an active participant in the life of an Urban-Serving University through the research and community partnerships developed through a collaborative, community-based process. The purpose of the course is to familiarize students with community-based participatory research (CBPR), to develop a community-based project, and to experience the ethics of civic and community engagement firsthand. The purpose of the CITYLAB approach is to: a) Identify and tackle a complex urban challenge that impacts people's everyday lives and b) Look at urban problems in new ways through a university-community partnership.

Prerequisites: Anchor 1 and Anchor 2 or equivalent.

Co-requisites: DISC 300.

ANCH H399 Anchor III Special Topics Credits: 3

Students will explore the role of socially responsible citizens and leaders in a democratic society and contribute towards the betterment of the community. More specifically, this course will introduce students to concepts and strategies that will enable them to collaborate with classmates to analyze a social problem, develop a solution to that problem, and implement the solution. Group work is a significant component of this class and attendance is mandatory

Anthropology (ANTHRO)

Courses

ANTHRO 103 Introduction To Cultural Anthropology Credits: 3

An introduction to culture and the basic concepts of anthropology. Topics include kinship, language, and cultural change.

ANTHRO 103 - MOTR ANTH 201: Cultural Anthropology

**ANTHRO 300 Special Topics in Anthropology Credits: 1-3**

Each time this course is offered, a different area of anthropology, to be announced, will be examined.

ANTHRO 302 Social Stratification Credits: 3

The distribution of power, privileges and prestige are examined in a historical and comparative perspective. The process whereby distribution systems develop, become institutionalized, and become transformed are analyzed.

ANTHRO 305 Language and Culture Credits: 3

This course is designed to familiarize students with the basic objects, aims, and methods of linguistic anthropology. Students will acquire this familiarity by studying both theoretical and ethnographic articles that focus on some of the major areas of concern within the field including: the evolution of human language, linguistic particularity and universality, the relationship of language to thought, structuralism and semiotics, trope theory, language and emotion, sociolinguistics, the development of writing systems, and language conservation and change.

ANTHRO 306 Culture, Emotion, and Identity Credits: 3

This course introduces students to some of the key theoretical perspectives and debates within the field of psychological anthropology. By drawing upon cross-cultural studies of emotion, personhood, sexuality, illness, and consciousness it seeks to understand some of the ways that culture and society influence human psychology and experience.

ANTHRO 308 The Social Life of Things Credits: 3

This course examines the connections between people and things. It explores how social relationships are created and changed through the use and exchange of objects, and how objects themselves take on particular meanings and values in these processes.

ANTHRO 322 Race And Ethnic Relations Credits: 3

The nature, origin and dynamics of ethnic and race relations in the U. S. and other societies. Specific attention will be given to the historical and contemporary contexts of prejudice, discrimination and confrontation.

ANTHRO 326 Consumer Society Credits: 3

This course explores the emergence of Consumer Society as both a sociohistorical development and as an object of social scientific inquiry. Students will explore how the study of Consumer Society has been animated by different scholarly questions, debates, and analytic approaches.

ANTHRO 328 Body and Society Credits: 3

Body and Society is an interdisciplinary and comparative approach to the study of the body as the subject and object of social processes. Interdisciplinary approaches to topics such as meaning, ritual, performance, and practice will provide a framework for classical as well as contemporary explorations of bodily representation and experiences across a variety of cultural contexts.

Prerequisites: ANTHRO 103.

ANTHRO 331 Urban Anthropology Credits: 3

A course designed to apply anthropological methods to the study of various urban environments. The approach to the subject is comparative, seeking to spell out those features of the urban setting which vary from culture to culture as well as those which are common to all.

ANTHRO 348 Latinx Immigrants, Migrants, and Refugees in the U.S. Credits: 3

This course addresses the culture of societies of U.S. citizens, immigrants, and refugees of Latin American heritage living in the U.S. The course emphasizes recent anthropological, historical, cultural, and sociological studies.

ANTHRO 358 Culture and Society Credits: 3

This course examines the "culture concept" at the heart of the contending theories of society, which is used to describe a society or way of life, a whole social order, or particular aesthetic styles and objects. The course links these various topics together in a concluding section on culture in the age of the Internet and globalization.

ANTHRO 359 Media and Society Credits: 3

This course examines the rise, development, and change of mass media in American society from broadsheets and news flyers through contemporary media formats.

ANTHRO 373 Anthropology of Religion Credits: 3

This course explores the ways anthropologists have gone about studying religion from the opening decades of the 20th century to present. The course introduces students to the diversity of human religious expression and experience through anthropological literature and to the diversity of anthropological expression especially as it has been revealed in social scientific studies of religious life. The course is designed to generate a critical dialogue about the special role that religion has played in the ongoing anthropological engagement with "other" societies and cultures over time.

ANTHRO 380 Technology and Society Credits: 3

This course will help students explore the ways technology shapes and is shaped by human interaction. Students will read interdisciplinary literature that builds theoretical and interpretive frameworks around classical and contemporary case studies. A fundamental question to be addressed throughout the course: how does the comparative study of technology help us understand what it means to be human?

ANTHRO 397 Independent Readings in Anthropology Credits: 1-3

Intensive readings in an area selected by the student with prior consultation with instructor.

Prerequisites: Twelve hours of anthropology.

ANTHRO 407 Writing Culture: The Craft of Ethnography Credits: 3

This course will explore the ways anthropologists document and write about cultural practices, processes, and beliefs. Students will become familiar with debates about representation while they consider differences in the ways ethnographic writing rhetorically conveys culture. Students will also compare ethnographic methods, theories, and styles of writing as these have changed over time.

ANTHRO 441 Globalization and Development Credits: 3

Focuses on issues of economic development, social stratification, political institutions, and political mobilization in societies where colonialism provided the context for their long-term disadvantages in the international economic order. Specific attention is paid to the intersection of the international components that define the options and limits for societal development (e.g., market shifts, international institutions and contracts, foreign policies, and migration) and the distinct social, political and cultural implications of these factors for developing societies.

Arabic (ARABIC)

Courses

ARABIC 110 Elementary Arabic I Credits: 5

Fundamentals of the language, essentials of conversation, grammar, practical vocabulary, useful phrases, and the ability to understand, read and write simple classical Arabic.

ARABIC 110 - MOTR LANG 105: Foreign Language I

**ARABIC 120 Elementary Arabic II Credits: 5**

Continuation of ARABIC 110.

ARABIC 120 - MOTR LANG 106: Foreign Language II

**ARABIC 211 Second Year Arabic I Credits: 3**

Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language.

ARABIC 221 Second Year Arabic II Credits: 3

Continuation of ARABIC 211.

ARABIC 280 Special Intermediate Arabic Topics I Credits: 1-3

Instruction of Arabic on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit.

ARABIC 290 Special Intermediate Arabic Topics II Credits: 1-3

Continuation of ARABIC 280. May not be repeated for credit.

Architectural Studies (ENV-DSN)

Courses

ENV-DSN 110 The Meaning Of Architecture Credits: 3

Architecture is a visual and physical expression of civilization. This course will introduce to the student an understanding and appreciation of architecture and our built environment through a broad examination of cultural and aesthetic paradigms. May not be taken for credit by students enrolled in the Architectural Studies curricula.

ENV-DSN 201 Environmental Design Studio I Credits: 4

Foundation studies introducing the principles, processes and vocabularies of environmental design. Instruction in two and three dimensional visualization of objects and spaces. Instruction in the use of instrument-aided drawing, freehand drawing and model building to represent and communicate design ideas at different scales of observation.

ENV-DSN 202 Environmental Design Studio II Credits: 4

Continuation of ENV-DSN 201.

Prerequisites: ENV-DSN 201.

ENV-DSN 203 Survey of the Design Professions Credit: 1

Overview of the design professions. Comparative study of the roles of the architect, interior architect, interior designer, landscape architect, and planner; their working methods, collaborative endeavors, and interaction with consultants and specialists. Description of career paths, educational alternatives, licensure, and professional organizations.

ENV-DSN 248 Fundamentals of Architectural Technology Credits: 3

Instruction in the fundamentals of architectural technology with emphasis on the concepts and principles necessary for developing an integrated approach to building design.

ENV-DSN 250 History of the Designed Environment I Credits: 3

This course will present an overview of the developments in architectural, urban, landscape and interior design which have had an impact on the physical environment from ancient times through the medieval up to the gothic period. A central objective of the course is to gain an understanding of why these developments occurred and how the needs and aspirations of a given time were manifested in physical form.

ENV-DSN 251 History of the Designed Environment II Credits: 3

This course will present an overview of the developments in architectural, urban, landscape and interior design which have had a consequential impact on the physical environment of the Western world from the Italian Renaissance (starting in the 15th century) up to the present day.

ENV-DSN 252 History of the Designed Environment III Credits: 3

The history of the designed environment from the mid-18th century to the present.

ENV-DSN 301 Architectural Design Studio I Credits: 5

Instruction in architectural design focusing on the application of elements and principles of form and space in design. Instruction in the use of techniques for visually representing design ideas.

Prerequisites: ENV-DSN 202.

ENV-DSN 302 Architectural Design Studio II Credits: 5

Instruction in architectural design focusing on the synthesis of basic social, functional, technical, and aesthetic factors in design. Continued instruction in techniques for visually representing ideas.

Prerequisites: ENV-DSN 301.

ENV-DSN 347 Structural Systems in Architecture I Credits: 4

Introduction to structure as a building system. Overview of contemporary structural systems and their components, including wood, timber, steel, concrete, masonry, and hybrid structures. Discussion of building code requirements for structure, general guidelines for building structures, including appropriate application, and methods for schematic estimation of structural member sizing. Basic understanding of how gravity and lateral forces are propagated through a structural frame from load to building foundation. Recommended preparation: PHYSICS 210.

Prerequisites: MATH 110 or MATH 120 or higher.

ENV-DSN 433 Building Construction Systems in Architecture I Credits: 3

In this lecture course, students develop an understanding of how materials and systems assembly reinforce and extend the intentions of the designer as well as an understanding of the strategies and techniques for integration and coordination of the building components.

Prerequisites: ENV-DSN 248.

Art (ART)

Courses

ART 105 Introduction to Photography Credits: 3

An introduction to the general practice of photography. The course centers on the basic technical and aesthetic aspects of the medium. A fully adjustable digital camera is required.

ART 112 Foundation Drawing Credits: 3

This course focuses on developing skills and techniques of observational drawing. No previous drawing experience required.

ART 114 Foundation Digital Design Credits: 3

This is an introductory course on techniques, practical applications, and aesthetic considerations for digital arts, graphic design, and computer multimedia. Students will create visual projects and learn to participate in a creative class community.

ART 114 - MOTR PERF 105GA: Studio Art-Graphic Arts**ART 121 Foundation 2D Design Credits: 3**

The principles of visual thinking with emphasis on color theory and perception of form and space.

ART 206 Photography I Credits: 3

An introduction to photography as a means of creative self-expression. The course centers on the technical and aesthetic aspects of the medium. A fully adjustable digital camera is required.

Prerequisites: ART 105 or ART 114.

ART 212 Intermediate Drawing Credits: 3

Continuation of foundation drawing. Emphasis is on gaining technical facility with various drawing mediums and expanding conceptual approaches.

Prerequisites: ART 112.

ART 218 Graphic Design I Credits: 3

A beginning level introduction to Graphic Design principles, such as layout, design, concept, basis design theory, graphic design production, and use of industry-level design software and tools.

Prerequisites: ART 112, ART 114, and ART 121.

ART 221 Painting I Credits: 3

Exploration of the visual language in paint with continued emphasis on color and design.

Prerequisites: ART 112, ART 114, and ART 121.

ART 224 Print Media I Credits: 3

Through hands-on lessons, students will learn printmaking methods, including relief and screen printing, to practice historical and contemporary approaches.

Prerequisites: ART 112, ART 114, and ART 121.

ART 230 Fibers I Credits: 3

From altering the surface of fabric to three-dimensional construction, students are taught the basics of fiber arts. This is a hands-on introduction to surface design and soft sculptural hand processes. The course will cover dyeing, shibori, screen-printing, knitting, crochet, and basic sewing. Projects are individualized by expertise, availability of supplies, and students' own objectives.

ART 230 - MOTR PERF 105M: Studio Art-Multimedia Crafts

**ART 309 Print Media II Credits: 3**

A continuation of ART 224, this course deepens students' understanding of the historical conventions of and contemporary approaches to print media. Explores concepts and techniques through material involvement.

Prerequisites: ART 224.

ART 310 Digital Video and Motion Design Credits: 3

This course provides an overview of techniques and concepts in contemporary video and animation practices for art and graphic design. Intended for studio art majors and minors, the course features lectures, demonstrations, discussions and projects.

Prerequisite: ART 114.

ART 311 Painting II Credits: 3

Painting in oil or acrylic on the intermediate level with continued emphasis on color.

Prerequisites: ART 221.

ART 312 Figure Drawing I Credits: 3

A study of the structure of the human figure with emphasis on the dynamics of figure movement.

Prerequisites: ART 212.

ART 330 Fibers II Credits: 3

Intermediate study of surface design and soft sculptural hand processes. Projects are individualized by expertise, availability of supplies, and students' own objectives.

Prerequisites: ART 230.

ART 337 Graphic Design and Typography I Credits: 3

This course is an introduction to the theory and practice of graphic design and typography. It covers page layout, type, concept development, basic design history and theory, and the use of industry-standard design software. Students will create their own designs based on lectures and demonstrations.

Prerequisites: ART 114 and ART 121.

ART 338 Graphic Design II Credits: 3

Intermediate study of graphic design theory, methodology and techniques, stressing a visual approach to problem solving in design, image making techniques, materials, and production processes standard to the industry.

Prerequisites: ART 218.

ART 340 3D Modeling and Animation Credits: 3

This course addresses the usage of virtual three-dimensional modeling and animation in the contemporary art and design fields.

ART 348 Introduction To Typography Credits: 3

This course explores the formal and applied aspects of typography as tools for design and artistic expression. Focus is on how type relates to art, layout, and design. Both hand produced typography and computer assisted design software will be incorporated.

Prerequisites: ART 112, ART 114, and ART 121.

ART 375 Interdisciplinary Studio Projects Credits: 3

This course explores and combines a variety of media to investigate and examine relevant topics across visual arts. Students develop their creative expression and professional practices through individual and collaborative projects in the classroom and community engagement.

Prerequisites: At least one of the following: ART 206, ART 212, ART 224, ART 221, ART 230, ART 310, ART 337, ART 312, ART 340.

ART 405 Practices in the Visual Arts Classroom Credits: 3

Candidates preparing to student teach will master the use of current research in art education, and apply theoretical and practical educational knowledge.

Prerequisites: Departmental consent.

ART 411 Painting III Credits: 3

Painting on the intermediate level with a focus on experimentation and developing a personal visual language and expression.

Prerequisites: ART 311.

ART 412 Figure Drawing II Credits: 3

A continuation of ART 312. Drawing on the advanced level with study of the figure in environmental context.

Prerequisites: ART 312.

ART 421 Painting IV Credits: 3

Painting on the advanced level with supervised individual selection of technique and subject matter.

Prerequisites: ART 411.

ART 439 Egghead: Student Advertising Agency Credits: 3

This course operates as a faculty-supervised advertising/design agency that works with clients to produce visual marketing materials.

Prerequisites: ART 337.

ART 488 Creative Project Development Credits: 3

In this class students evaluate their creative goals and styles, as well as artistic abilities, in relation to their professional aspirations. Specific artistic and appropriate technological skills are developed through projects.

Prerequisites: ART 114 and ART 121.

ART 492 Advertising Campaigns Credits: 3

This course focuses on branding, re-branding or development of an identity program, and combines advertising planning with creative execution.

Students will learn how to develop advertising/marketing/creative campaign plans for a specific client(s), conceptualize, design and develop all creative aspects including but not limited to logo/identity, copy, advertising, website development, app design, etc., and complete a presentation of the plans/briefs and final creative developments of the plans/briefs and creative to the client(s).

ART 493 Directed Projects in Studio Art Credits: 1-6

With permission of instructor, advanced students pursue independent research and production of a significant semester-long project. Acceptable for graduate credit with approval.

ART 495 Special Topics in Studio Art Credits: 1-6

In-depth exploration of a special topic in Studio Art. Course may be repeated if topic is unique for each repeated effort. Acceptable for graduate credit with approval.

ART 498Q Special Studies in Art: Internship Credits: 1-6

Advanced students gain invaluable practical experience in a professional setting in the field of art.

ART 499WI Senior Seminar Credits: 3

Capstone course for studio majors in all media. Course addresses contemporary theoretical and practical issues in studio art practice, and prepares students for graduation. Multiple papers, class presentations, and a portfolio preparation are required.

Art History (ART-HIST)

Courses

ART-HIST 110 Introduction to the History of Art: Pyramids to Picasso Credits: 3

This is an introduction to the history of art, with in-depth discussions of painting, sculpture, prints, and architecture. Students will be introduced to significant works from major historical periods; their cultural roles, style and composition, and the artistic processes involved in their creation. Emphasis is placed upon Western art history, with attention paid to important interactions with other world traditions, including the arts of Islam, Japan, and Africa. The comprehensive collections of The Nelson-Atkins Museum of Art contribute an important component to the course.

ART-HIST 110 - MOTR ARTS 100: Art Appreciation

**ART-HIST 201 From Cave Paintings to Cathedrals Credits: 3**

Students will learn to analyze and place in an art historical context Western art and architecture from approximately 35,000 BCE to 1250 CE. Art and architecture from all relevant cultures and religions - pagan, Christian, and Islamic - will be covered; particular emphasis will be placed on the accomplishments of Egyptian and Greek artists.

ART-HIST 201 - MOTR ARTS 101: Art History I

ART-HIST 202 From Michelangelo to Modernism Credits: 3

This course will examine major monuments of Western art and architecture during the late Middle Ages through the Modern period. Art will be examined in its cultural context stressing artistic intent, issues of gender, changing patterns of patronage, and the ascending status of the artist in society.

ART-HIST 202 - MOTR ARTS 102: Art History II

**ART-HIST 264 The Grotesque in Art and Culture Credits: 3**

This course explores the vibrant and subversive role of the grotesque in the visual arts from 1500 to the present day. The grotesque comprises an alternate image tradition that is often overlooked, or even actively suppressed. This course will explore the distinct strands of the grotesque: witty and inspired improvisation, from Michelangelo to Picasso; rowdy and subversive carnivalesque, from Bruegel to Hogarth to DeKooning; and the monstrous and uncanny, from Bosch to Goya to Kahlo.

ART-HIST 303 World Currents of Contemporary Art Credits: 3

This survey course provides an introduction to the densely interconnected trajectories of contemporary art in different parts of the world. It explores the continuities and discontinuities between modern and contemporary art in the context of intensifying transnational exchanges since the 1960s. Students will become familiar with the intersections of contemporary art with everyday life, mass media, politics and technology.

ART-HIST 315 Arts Of African and New World Cultures Credits: 3

This historical survey of ethnographic arts examines the diasporas of African art and the influences of Africans on the arts of new world cultures (in Brazil, Surinam, Cuba, Haiti, and the United States) and Meso-American art and the influence of Meso-Americans on the arts of the Native North American cultures.

ART-HIST 319 Asian Art Credits: 3

The survey will emphasize the philosophical and cultural context of the arts of India, Southeast Asia, China, Korea and Japan. The course will stress the elements that give an underlying unity to the arts as well as those qualities which distinguish the art of each country as unique.

ART-HIST 421 Made in the USA: Latinx Art and Experience Credits: 3

This course focuses on art of and by members of the U.S. Latinx community. Students in this course will engage with the politics of representation, gender, sexuality, race, class, and ethnicity in Latinx art, as well as visual and popular culture.

ART-HIST 469 Sensing, Feeling, Thinking: Contemporary Art and the Mind Credits: 3

Contemporary artists are challenging viewers to reflect on how they perceive, feel and think. This seminar provides an introduction to the mental processes underlying emotion and visual cognition and familiarizes students with contemporary art practices that reveal the dynamic correlations between body, mind and subjectivity.

ART-HIST 470 Art Museums: History and Practice Credits: 3

This course will familiarize students with the history of art museums and collecting practices. It will cover theories of museum government, curating, and object interpretation. Students will explore changes in the functions of art museums and will develop practical skills for future museum employment.

ART-HIST 476 Site-Specific Art: Within and Beyond the Museum Walls Credits: 3

At a time of increased transnational mobility, contemporary artists are conceiving artworks that catalyze an enhanced awareness of the geographical and socio-political conditions of existence and art making. This seminar examines artworks that are produced outside the studio and are inspired by specific natural environments, museum settings and public spaces.

Prerequisites: ART-HIST 303.

ART-HIST 482 Scope & Methods Of Art History Credits: 3

An exploration of the discipline of art history, including theoretical issues, guiding questions and problems, diverse approaches (historical and current), and research tools. The undergraduate capstone course for art history majors.

ART-HIST 493 Directed Studies in Art History Credits: 1-6

With permission of instructor, advanced students pursue independent research and production of a significant semester-long research project. Acceptable for graduate credit with approval.

ART-HIST 495 Special Topics in Art History Credits: 1-6

In depth exploration of a special topic in Art History. Course may be repeated for up to 18 credit hours if topic is unique for each repeated effort. Acceptable for graduate credit with approval.

ART-HIST 497Q Special Studies in Art History: Internship Credits: 1-6

Advanced art history students gain invaluable practical experience in a professional setting in the field of art.

Arts & Sciences - General (A&S)

Courses

A&S 100 Methodologies In Liberal Arts & Sciences: Theories & Application Credits: 3

This three hour course is designed for freshmen and transfer students, to be taken during their first semester of study at UMKC. The curriculum provides students an introduction to the major disciplines and methodologies of the liberal arts and sciences (the humanities, social sciences, and sciences), including sessions on choosing majors and careers. Additional emphases will include learning to use the library, writing and computational skills, oral presentations, cultural diversity, stress management, and study strategies.

A&S 115 Career Possibilities Credit: 1

This course introduces career development as a complex process of self-assessment and decision-making. Students analyze their personal interests motivation, conduct self-assessment, identify their personal values, and discuss ethical considerations as they relate to possible career choices. Visiting professionals will provide insight into career options as students explore possible career paths.

A&S 210 Cross-Cultural Interaction: Experience and Understanding Credits: 3

This course focuses on the social and cultural context of interactional patterns. U.S. and international students are paired in academic activities to encourage mutual understanding and self-awareness. They will draw on a variety of resources and learning modalities to examine aspects of their own and one another's societies, cultures, religions, and family relations. Making use of intercultural theories, students will reflect upon and explore cultural myths and stereotypes and develop a general understanding of cultural similarities and differences.

A&S 215 Career Explorations Credit: 1

The primary focus of this course is to complete an in-depth self-assessment and the generation of personalized list of career paths. Personal values will inform these possibilities, which are then explored through job shadowing, informational interviews, visiting lecturers, and independent career research. Ethical considerations of chosen career paths are explored. Students reflect on the professional experiences of others and relate them to their own personal values.

Prerequisites: A&S 115.

A&S 310 Cross-Cultural Interaction II: Social Relations Credits: 3

This course will match international students with U.S. students to prepare them to interact more effectively in multilingual and/or intercultural settings. Students learn through readings on cultural theory and cultural relations, in-class small group activities, discussions and lectures, how issues of identity, such as age, sexual orientation, and ethnicity; impact cross-cultural interaction. Papers written for this course will help students integrate theory with previous experience, leading to an understanding of oppression in cross-cultural interaction.

Prerequisites: A&S 210.

A&S 315 Career Methods Credit: 1

In this course students begin to map out the realization of their career paths. They analyze their career choices, how these choices inform their life plans, articulate the ethical and moral requirements of these careers, and understand how their personal values and strengths match these requirements. Independent career research and entry preparation along with job shadowing, informational interviews, mock interviews, and other preparations required for the selected career choices are included in this class.

Prerequisites: A&S 215.

A&S 350 Special Topics Credits: 1-4

An undergraduate course designed to deal with a topic which is not available in the regular course offerings.

A&S 400 Special Readings/Topics Credits: 1-6

A&S 415 The Aging Body: Causes and Consequences Credits: 3

This course will explore biological changes that occur with aging. Plasticity, frailty, stress, coping, and chronic illness will be viewed through the bio-psycho-social lens. Biomedical discoveries and implications for the future of aging will be discussed.

A&S 490 Special Topics Credits: 1-3

Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only.

A&S 492 Field Practicum In Aging Credits: 3-8

Students spend 180-480 contact hours in a field placement with supervision in a community agency or organization which services or advocates for older persons, and keep a journal documenting and reflecting on the practicum activities and experiences particularly as they relate to gerontological theory and research.

Astronomy (ASTR)

Courses

ASTR 150 Astronomy: Motions of the Cosmos Credits: 3

An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the fundamental laws of gravity and motion crucial to the formation of stars and planetary systems, the growth of black holes and galaxies, and the evolution of cosmic structure.

ASTR 150 - MOTR ASTR 100: Astronomy

ASTR 155 Astronomy: Starlight and Star Stuff Credits: 3

An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the interactions between light and matter crucial to the life and death of stars, the analysis of starlight and interstellar chemistry, and the interpretation of cosmic history.

ASTR 155 - MOTR ASTR 100: Astronomy

ASTR 353 Practical Astronomy Credits: 3

A practical overview of the basic methods of observational astronomy research, including the principles of telescopes, detectors and measurement theory.

Prerequisites: PHYSICS 220 or PHYSICS 250; and MATH 250 or MATH 268.

ASTR 355 Stellar Astrophysics Credits: 3

A mathematical and conceptual overview of the observed properties of stars and the fundamental astrophysics of radiative transfer, hydrostatic equilibrium, atomic processes and thermonuclear energy production that govern their structure, atmospheres and remnants.

Prerequisites: PHYSICS 220 or PHYSICS 250; and MATH 250 or MATH 268.

ASTR 356 Galaxies Credits: 3

A mathematical and conceptual overview of the observed properties and astrophysics of galaxies highlighting star formation and evolution, the interstellar medium, the Milky Way, galaxy populations and demographics, active galactic nuclei, and galaxy formation and evolution.

Prerequisites: PHYSICS 220 or PHYSICS 250; and MATH 250 or MATH 268.

ASTR 465 Cosmology Credits: 3

This course provides a foundation in both physical and observational cosmology. Students will acquire both a mathematical and conceptual understanding of the formation and dynamics of the Universe.

Prerequisites: PHYSICS 220 or PHYSICS 250; and MATH 250 or MATH 268.

Bassoon (BASSOON)

Courses

BASSOON 100A Preparatory Applied Study Credits: 2

One hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit toward the major.

BASSOON 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One-half hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

BASSOON 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

BASSOON 101 Freshman Bassoon I Credits: 2-4

BASSOON 102 Freshman Bassoon II Credits: 2-4

BASSOON 201 Sophomore Bassoon I Credits: 2-4

BASSOON 202 Sophomore Bassoon II Credits: 2-4

BASSOON 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

BASSOON 301 Junior Bassoon I Credits: 2-4

BASSOON 302 Junior Bassoon II Credits: 2-4

BASSOON 401 Senior Bassoon I Credits: 2-4

BASSOON 402 Senior Bassoon II Credits: 2-4

Biology (BIOLOGY)

Courses

BIOLOGY 102 Biology and Living Credits: 3

Introduction to structural organization and functional processes of living systems. For non-biology majors only. Does not count toward biology degree.

BIOLOGY 102 - MOTR BIOL 100L: Essentials in Biology with Lab

BIOLOGY 102L Biology and Living Laboratory Credit: 1

Exploration of basic biological concepts through laboratory activities requiring data collection and analysis. For non-majors only; does not count toward Biology degree requirements.

Corequisite: BIOLOGY 102 (or prerequisite).

BIOLOGY 102L - MOTR BIOL 100L: Essentials in Biology with Lab

BIOLOGY 108 General Biology I Credits: 3

Fundamental studies in biology emphasizing the unity and diversity of life. Topics include the basic chemistry of biological processes, cell types and organelles, energy harvesting and energy producing pathways, cell and life cycles, genetics, DNA structure, genes, transcription, translation, natural selection, population genetics, speciation, and phylogenetic analysis.

BIOLOGY 108 - MOTR BIOL 150: Biology

BIOLOGY 108L General Biology I Laboratory Credit: 1

Basic laboratory studies in Biology emphasizing the unity and diversity of life. Structure, function, heredity, development, ecology and evolution will be explored.

Co-requisites: BIOLOGY 108.

BIOLOGY 108L - MOTR BIOL 150L: Biology with Lab

BIOLOGY 109 General Biology II Credits: 3

Fundamental studies in biology emphasizing the unity and diversity of life. Topics include prokaryotes, fungi, invertebrate-vertebrate zoology and phylogeny, human evolution, plant structure and development, animal development and physiology, ecology (population and ecosystems).

BIOLOGY 109L General Biology II Laboratory Credit: 1

Basic laboratory studies in Biology emphasizing the unity and diversity of life. Structure, function, heredity, development, regulation of growth and evolution will be explored.

Co-requisites: BIOLOGY 109.

BIOLOGY 112 Microbiology and Living Credits: 3

Lectures and demonstrations concerning the cell structure, genetics and physiology of microorganisms and the role microorganisms play in the world around man with an emphasis on medical and clinical aspects of the significance of various groups of bacteria, viruses fungi and other microorganisms. This course is intended for nursing and other allied health students and for non-biology majors interested in life sciences and does not count toward Biology major requirements.

BIOLOGY 115 First Year Seminar Credit: 1

This course is designed to provide students with the skills necessary to achieve success at the university. The curriculum includes time management, study, reading, note-taking and test-taking strategies, health and wellness, and student support services. Additional emphasis will include career exploration, including professionalism, writing a resume, and developing plan of study for degree completion.

BIOLOGY 122 Human Genetics Credits: 3

This is a non-majors biology course in human genetics designed for those with little classroom training in the sciences. The focus will be on the nature of human genetic variation and how variation shapes and affects our lives. This includes the structure and function of genes and how genes create traits. The discussion will focus on how genes function in human development through sex determination. The inclusion of human genomic sequencing technology and personal genomics will emphasize several issues related to knowledge and privacy.

BIOLOGY 122 - MOTR LIFS 100G: Essentials in Human Biology - Gene

**BIOLOGY 125L Guided Research in Biology Credits: 2**

An introduction to basic principles and methods of scientific research in the biological sciences. Students will engage in experimental design, use of bioinformatic tools, molecular graphics, and specialized tools related to different biology disciplines to characterize a specific gene or cell system under the guidance of a faculty member. Recommended preparation: BIOLOGY 108.

BIOLOGY 199L Methods in Biological Research Credits: 2

The course will provide an introduction to laboratory safety and common research methods used in modern biological research. It is intended for students that wish to gain research experience in the School or a career in research.

Prerequisites: BIOLOGY 108 or BIOLOGY 109.

BIOLOGY 201 Preparing for Careers in Biology Credit: 1

This course will help students prepare for their post-undergraduate future. Topics will include communication, skills identification and marketing, how to find employment or internship opportunities, a review of the application process for graduate education and the role of undergraduate research.

Prerequisites: Sophomore standing (or higher).

BIOLOGY 202 Cell Biology Credits: 3

Basic concepts of cellular and subcellular structure and function, including supramolecular and organelle structure and organization, bioenergetics, cell growth and cellular communication.

Prerequisites: BIOLOGY 108 (or MOTRBIOL 150L), BIOLOGY 109 (or MOTRBIOL 150LZ), and CHEM 212R, (or CHEM 212R, LS-ANATO 219, LS-ANATO 219L, and LS-MCRB 121).

BIOLOGY 206 Genetics Credits: 3

A modern approach integrating molecular and organismal studies of the general genetics of lower and higher organisms. Chromosomal structure and function, gene transmission, heredity, plasticity and population genetics will be discussed.

Prerequisites: BIOLOGY 108 (or MOTRBIOL 150L), BIOLOGY 109 (or MOTRBIOL 150LZ or MOTRBIOL 100LZ), and CHEM 212R or LS-ANATO 219.

BIOLOGY 217L Human Physiology Laboratory Credit: 1

This course is designed to illustrate the important principles of human physiology in a laboratory setting. Using an organ systems approach, the course will feature microscopic work, audio-visual presentations, and student experiments when possible. For non-majors only; does not count toward biology degree requirements.

Prerequisites: LS-PHYS 117.

BIOLOGY 218 Introductory Anatomy Credits: 3

Description and discussion of the cells, organs, organ systems and basic tissues of vertebrates with special emphasis on their interrelationships in functional anatomy.

Prerequisites: BIOLOGY 102 or BIOLOGY 108 or BIOLOGY 109.

Co-requisites: BIOLOGY 218L.

BIOLOGY 218L Introductory Anatomy Laboratory Credits: 2

Laboratory investigation of cells, tissues, and organs with special emphasis on their interrelationship in vertebrates.

Co-requisites: BIOLOGY 218.

BIOLOGY 250 Careers in Biological & Chemical Sciences I Credit: 1

This course will introduce students to a variety of careers in the biological and chemical sciences. Guest speakers will share information including day-to-day activities on the job, educational requirements, career advancement, and necessary interests and abilities.

BIOLOGY 251 Careers in Biological & Chemical Sciences II Credit: 1

This course will help students prepare for their post-undergraduate future. Topics will include communication, skills identification and marketing, how to find employment or internship opportunities, a review of the application process for graduate education and the role of undergraduate research.

BIOLOGY 285 Special Topics Credits: 1-3

In depth exploration of a topic in biology

BIOLOGY 302 General Ecology Credits: 3

Introduction to the study of populations, communities, and ecosystems by examining the interrelationships between living organisms and their environments. The role of natural selection and evolution will also be considered. Prerequisites: BIOLOGY 108 (MOTR 150L), BIOLOGY 109 (MOTR 150LZ), or BIOLOGY 102 (MOTR 100L).

Prerequisites:**BIOLOGY 302L Ecology Laboratory Credits: 2**

This course provides laboratory and field experience in ecology. The course will cover topics including statistical analysis and data presentation, terrestrial and aquatic sampling, experimental design and scientific writing.

Co-requisites: BIOLOGY 302.**BIOLOGY 303 Invertebrate Zoology Credits: 3**

Taxonomy, evolutionary relationships, behavior, reproduction, morphology and ecology of the invertebrates. Recommended preparation: BIOLOGY 108, BIOLOGY 109, and CHEM 212R.

BIOLOGY 304 Biostatistics 1 Credits: 3

Introduction to the concepts of probability, statistical reasoning, and experimental design in the biological sciences. The course emphasizes the application of inferential statistics to biological experiments including the use of relevant statistical computer packages.

Prerequisites: MATH 110 or STAT 235; or ACT Math sub-score of 28 or higher; or SAT Math sub-score of 660 or higher.**BIOLOGY 305 Marine and Freshwater Biology Credits: 3**

Introduction to the study of marine ecology, deep-sea biology, oceanic nekton, inter-tidal ecology, estuaries, mangroves and salt marshes, as well as ecology of rivers, lakes, streams, wetlands and human impact on aquatic habitats.

Prerequisites: BIOLOGY 108, BIOLOGY 109, CHEM 211.**BIOLOGY 308 Vertebrate Zoology Credits: 3**

Taxonomy, evolutionary relationships, behavior, reproduction, morphology and ecology of the vertebrates.

Prerequisites: BIOLOGY 108, BIOLOGY 109, CHEM 212R.**BIOLOGY 312WL Laboratory in Developmental Biology, Genetics and Cell Biology Credits: 3**

Experimental studies of genetics and development in selected eukaryotic model organisms with an emphasis on the molecular and cellular mechanism of inheritance.

Prerequisites: BIOLOGY 441.**Co-requisites:** BIOLOGY 409.**BIOLOGY 313 Microbiology Credits: 3**

Fundamental and applied aspects of microbial structure, metabolism, genetics and diversity. Experimental approaches to studying the microbial world will be emphasized.

Prerequisites: BIOLOGY 202, BIOLOGY 206.**Co-requisites:** BIOLOGY 441.**BIOLOGY 313L Laboratory in Microbiology Credits: 3**

General microbiological procedures plus advanced work in the areas of microbial physiology and genetics, pathogenic microbiology, virology, applied microbiology and biotechnology.

Co-requisites: BIOLOGY 313, BIOLOGY 441.**BIOLOGY 313WL Laboratory in Microbiology Credits: 3**

General microbiological procedures plus advanced work in the areas of microbial physiology and genetics, pathogenic microbiology, virology, applied microbiology, and biotechnology.

Co-requisites: BIOLOGY 313, BIOLOGY 441.**BIOLOGY 314 Entomology Credits: 3**

Anatomy, physiology and identification of insects with emphasis on their environmental adaptations.

Prerequisites: BIOLOGY 109 (or LS-ANATO 219).**BIOLOGY 316 Principles of Physiology Credits: 3**

Physiological functions and processes of animals at the organ and organ systems levels, including concepts of integrated and homeostatic mechanisms. The relationship between organ function and underlying cellular mechanisms in vertebrates will be emphasized.

Prerequisites: BIOLOGY 202, BIOLOGY 206, BIOLOGY 441.

BIOLOGY 319 Global Health: New and Emerging Infectious Diseases Credits: 3

This course will discuss infectious diseases that are newly identified, or increasing in prevalence throughout the world. Several aspects of each disease will be discussed, including transmission, symptoms, treatment, prevention, and diagnosis. The course is meant for students interested in a health-related career (medicine, dental, pharmacy, public health), but other students with a basic biology background are welcome.

Prerequisites: BIOLOGY 108, BIOLOGY 109 (or BIOLOGY 102).

BIOLOGY 322 General Parasitology Credits: 3

Parasitic protists, worms and arthropods and the disease states they may induce, will be examined in relationship to human, animal and plants hosts.

Prerequisites: BIOLOGY 109 (or LS-ANATO 219).

BIOLOGY 326 Biological Conservation Credits: 3

Applications of ecology and genetics to the conservation of communities and individual species, including discussion of the Endangered Species Act, extinction processes, and the effects of habitat fragmentation.

Prerequisites: BIOLOGY 108, BIOLOGY 109.

BIOLOGY 327 Biogeography and Biodiversity Credits: 2

Evolutionary and climatological effects on the geographic distribution of organisms, including areas of endemism as well as preservation of biodiversity.

Prerequisites: BIOLOGY 108, BIOLOGY 109.

BIOLOGY 328 Histology Credits: 2

Animal tissues and their specialization in the organism, with major emphasis on higher organisms.

Prerequisites: BIOLOGY 202.

BIOLOGY 328L Laboratory in Histology and Cellular Ultrastructure Credits: 3

Examination of structure/function relationships at the subcellular, cellular and organ levels. Both plants and animals will be examined with emphasis on vertebrates.

Co-requisites: BIOLOGY 328.

BIOLOGY 328WL Laboratory in Histology and Cellular Ultrastructure Credits: 3

Examination of structure/function relationships at the subcellular, cellular and organ levels. Both plants and animals will be examined with emphasis on vertebrates.

Co-requisites: BIOLOGY 328.

BIOLOGY 329 Endocrinology Credits: 3

Study of the physiological functions and controls in human and related mammalian systems, with emphasis on endocrine-directed processes that underlie normal and abnormal metabolic and clinical conditions. The course will be presented in traditional lecture format, and focus on the molecular, chemical, membrane and cellular basis of metabolic homeostatic processes in cells, cytoplasmic compartments and primary organ systems.

Prerequisites: BIOLOGY 202.

Co-requisites: BIOLOGY 316.

BIOLOGY 331 Reproductive Biology Credits: 2

Comprehensive overview of current concepts and knowledge regarding male and female reproductive processes, from gametogenesis through early placentation. Includes structural, developmental, physiological and pathophysiological aspects of reproduction.

BIOLOGY 338L Comparative Vertebrate Anatomy Laboratory Credits: 3

This class explores anatomical similarities and differences that exist between the major vertebrate groups and relates aspects of anatomy to evolutionary history and function. Students will gain hands-on experience of anatomy through dissection and examination of several model vertebrates. Recommended preparation: BIOLOGY 108, BIOLOGY 109, and BIOLOGY 109L.

BIOLOGY 346 Plant Biology Credits: 3

An integrative study of growth, development, and reproduction of plants, including structure and function of plant tissues and organs, as well as a survey of the recent advances in genetic engineering, plant defense mechanisms, and medical botany and the usefulness of plants to humans.

Co-requisites: BIOLOGY 202.

BIOLOGY 350 Assisting Undergraduate Learning in Biology Credits: 1-3

This course addresses current issues and pedagogy of teaching biology and providing instructional support for designated undergraduate courses in the School of Biological Sciences. Students meet weekly with the course instructor and assist in the classroom, studio, or laboratory.

Prerequisites: BIOLOGY 108, BIOLOGY 109, BIOLOGY 202, BIOLOGY 206.

BIOLOGY 360L Laboratory in Biochemistry and Molecular Biology Credits: 3

Laboratory studies in biochemistry and molecular biology with an emphasis on modern techniques and quantitative relationships.

Prerequisites: BIOLOGY 441.

BIOLOGY 360WL Laboratory in Biochemistry and Molecular Biology Credits: 3

Laboratory studies in biochemistry and molecular Biology with an emphasis on modern techniques and quantitative relationships.

Prerequisites: BIOLOGY 441.

BIOLOGY 385 Special Topics Credits: 3

In depth exploration of a topic in biology. Repeatable toward the major only when the topic changes.

BIOLOGY 397 Experience Based Education Credits: 1-3

This course will allow students to earn credit for experience gained through educational experiences such as service, shadowing, leadership, employment and study abroad.

BIOLOGY 405 Introduction to Evolution Credits: 3

Discussion of the biological processes that produce organic diversity through phyletic change, including variation, mutation, adaptation, population genetics, natural selection, genetic drift, gene flow, and macroevolution.

Prerequisites: BIOLOGY 206.

BIOLOGY 409 Developmental Biology Credits: 3

Principles of development and differentiation of structure during embryology in animals. Molecular, cellular and organismal level concepts and mechanisms will be considered.

Prerequisites: BIOLOGY 202, BIOLOGY 206.

BIOLOGY 415 Pathophysiology Credits: 3

Pathophysiology will focus on the physiological basis of cellular and tissue function, and the consequences of dysregulated metabolic/cellular expression on essential homeostatic processes in cells, cytoplasmic compartments and primary organ systems. Recommended preparation: BIOLOGY 316.

BIOLOGY 430 Molecular Biology and Genetic Engineering Credits: 3

Molecular aspects of gene structure and function, including macromolecular synthesis, gene regulation, genetic transfer and biotechnology will be discussed in prokaryotes and eukaryotes.

Prerequisites: BIOLOGY 202, BIOLOGY 206.

Co-requisites: BIOLOGY 441.

BIOLOGY 435 Immunology Credits: 3

A study of the cellular and humoral aspects of the immune response, with emphasis upon the mechanisms involved and the relationship of this response to disease processes.

Prerequisites: BIOLOGY 441 and LS-MCRB 121 (or BIOLOGY 313).

BIOLOGY 441 Biochemistry Credits: 3

One semester course covering the properties of organic compounds important to biological systems. Structures, characterization and reactions of common compounds and their relationship to the building blocks of biological systems will be discussed.

Prerequisites: BIOLOGY 202, CHEM 320 (or CHEM 321).

BIOLOGY 442 Neurobiology Credits: 3

Neurobiology will consist of the presentation of theory and data concerning cellular and molecular fundamentals of the nervous system, synaptic mechanisms, sensory-motor systems, and higher-order functions of the nervous system.

Prerequisites: BIOLOGY 316, BIOLOGY 441.

BIOLOGY 445 Evolutionary Ecology Credits: 3

This class explores the scientific concepts and methods underpinning modern understanding of evolutionary ecology as it relates to organisms. Students will gain hands-on experience using techniques that are central to quantitative and qualitative studies of organismal evolutionary ecology.

Prerequisites: BIOLOGY 302, BIOLOGY 405.

BIOLOGY 452 Bioinformatics Credits: 3

Study of the acquisition, storage, retrieval, analysis, modeling, and distribution of information in biomolecular databases. Recent developments in genomics and proteomics and how these databases are used in modern biological research will be emphasized.

Co-requisites: BIOLOGY 441.

BIOLOGY 485 Special Topics Credits: 1-3

In depth exploration of a topic in biology. Repeatable toward the major only when the topic changes.

BIOLOGY 498WI Critical Analysis of Biological Issues Credits: 3

Reading and analysis of scientific literature, including original papers, on a topic of broad biological interest. Critical discussion of experimental methods and results. Writing of scientific reviews and a term paper. Taking the MFAT test is a requirement of this course, and the course satisfies the general education synthesis requirement.

Co-requisites: BIOLOGY 441.

BLKS 201 Global Systems and the Origins of Black American Culture and Institutions Credits: 3

This multidisciplinary course examines global capitalism, European contact with Africa, the development of the African Diaspora, and the origins of Black American institutions and culture. Applying a Black studies perspective, the course explores such themes as cultural and gendered oppression, institutional destabilization, economic dislocation, liberation struggles, and creative impulses and aesthetics and the social and historical experiences of Black people in the Americas.

BLKS 302 Conceptual and Theoretical Foundations in African American Studies Credits: 3

This course will provide an in-depth examination of the theoretical and conceptual parameters of African American studies. We will study the evolution of the field, key scholars and creative intellectuals, and seminal categories of thought.

Prerequisites: BLKS 201.

BLKS 315 Arts of African and New World Cultures Credits: 3

This historical survey of ethnographic arts examines the diasporas of African art and the influences of Africans on the arts of new world cultures (in Brazil, Surinam, Cuba, Haiti, and the United States) and Meso-American art and the influence of Meso-Americans on the arts of the Native North American cultures.

BLKS 320 Critical Health Issues in Black Communities Credits: 3

Beginning with the African context and the opposition of chattel slavery, this course examines social, cultural and historical factors affecting the health status of African Americans to the present era.

Prerequisites: BLKS 201.

BLKS 321 The Black Family and Male-Female Relationships Credits: 3

This course examines the historical evolution and current status of the African American family in the United States. Utilizing the African experience as its starting point, the course conveys a broad understanding of the role of the family in human survival and progress. We investigate such issues as male-female relationships, sexual practices, dating, marriage, single parenting, the education and socialization of children, and so on. We also examine an array of social and economic issues, including institutionalized inequality, that affect the viability of today's African American family.

Prerequisites: BLKS 201.

BLKS 325 African American Business Development Credits: 3

This course investigates the various challenges to African American business development and entrepreneurship in the United States. We study the lives of successful, pioneering African American businesswomen and men in order to assess how they managed to transcend the barriers of racism and structured inequality. We explore why certain kinds of enterprises emerged among African Americans and why others did not, and we scrutinize the traditional business problems for African Americans of capitalization, distribution, market penetration, and wealth creation.

Prerequisites: BLKS 201.

BLKS 330 African American Migrations in Literature Credits: 3

The course examines representations of two different trajectories of migration in African American literature: African American journeys from the south to northern and mid-western regions of America, and concurrent migrations of Caribbean people to the US in the early twentieth century.

Prerequisites: DISC 200 or ENGLISH 225.

BLKS 331 African American Literature I Credits: 3

This course provides a survey of African American literature from its beginnings to the Harlem Renaissance of the 1920s and 1930s. Areas of interest will include abolitionist literature (especially slave narratives), turn-of-the-century literature and the Harlem Renaissance. This course will examine any or all of the following literary forms: fiction, poetry, drama, autobiography and essay. It will view African American literature in its historical and cultural contexts.

Prerequisites: DISC 200 or ENGLISH 225.

BLKS 332WI African American Novel Credits: 3

This course will examine the African American novel in the 19th and 20th centuries; the emphasis will be on the period from the 1920s to the present. The novels will be examined in their historical and cultural contexts.

BLKS 333 African American Literature II Credits: 3

A survey of African American literature from the end of the Harlem Renaissance to the present, covering a range of authors, texts, and contexts.

Prerequisites: DISC 200 or ENGLISH 225.

BLKS 334 From Field Shout to Hip Hop: African American Poetic Traditions Credits: 3

This course examines the development of African American poetry from its early forms as field shouts, ballads, and blues to present forms including spoken word and hip hop. Includes authors such as Phillis Wheatley, Paul Lawrence Dunbar, Langston Hughes, Gwendolyn Brooks, Tupac Shakur, and Jessica Care Moore.

Prerequisites: DISC 200 or ENGLISH 225.

BLKS 335 Stages Toward Freedom: African American Dramatic Traditions Credits: 3

This course explores the development of African American dramatic traditions from the eighteenth century through the Harlem Renaissance Black Arts Movement, to current postmodernism. Includes authors such as W.W. Brown, Zora N. Hurston, Amiri Baraka, Sonia Sanchez, August Wilson, Suzan-Lori Parks.

Prerequisites: DISC 200 or ENGLISH 225.

BLKS 337 The Civil Rights Movement in African American Literature Credits: 3

This course examines how African American literature shaped ideas about freedom, rights, citizenship and race in the civil rights movement. It draws on a variety of literary forms-speeches, essays, autobiographies, fiction, drama, poetry and film-to explore the movement's impact on communities and cultures as well as its various debates and competing visions.

Prerequisites: DISC 200 or ENGLISH 225.

BLKS 338 Women's Literature in Africa and the African Diaspora Credits: 3

This course is a comparative examination of the variety of literary works produced by women of African descent in the United States, the Caribbean and Africa. Students will explore the cross-cultural implications of texts in light of the intersections of gender, race and class.

Prerequisites: DISC 200 or ENGLISH 225.

BLKS 349 Symbols and Codes from the Diaspora: African American Visual Arts Survey Credits: 3

This course provides an examination of the theoretical and conceptual parameters of African and African American visual aesthetics. Through the writings of key scholars in African American aesthetics, students will study symbolic forms and patterns from various African cultures throughout the Diaspora and investigate formal image categories within African Diaspora visual culture.

Prerequisite: BLKS 201.

BLKS 351 African American Art History: Part I, 1600-1960 Credits: 3

This course presents a comprehensive survey of African American visual art from 1600 through 1960. Critical issues in early American art history highlight the expressions of African American artists and scholars. Students will investigate artistic expressions of this period.

Prerequisite: BLKS 201.

BLKS 403WI Writing for African American Studies Credits: 3

This course instructs students in how to produce advanced knowledge in the field of African American studies. It provides training in the construction of quality research papers for graduate, scholarly, and professional work and exposes students to a wide array of scholarly journals, databases, and authoritative resources in African American studies. Each time the courses taught, students will develop their research around a specific topic defined by the instructor.

BLKS 404 Research Seminar Credits: 3

This course introduces the logic, theory, and techniques of empirical research and applies them to African American Studies. It exposes students to a variety of research approaches in order to examine their utility for producing knowledge within the field.

Prerequisite: BLKS 201.

BLKS 410 African American Art History: Part II, 1960-Present Day Credits: 3

This course presents a survey of African American visual arts from 1960 to the present. Visual arts include new media and processes for Diaspora artists. Students investigate contemporary artists within African Diaspora visual culture.

Prerequisite: BLKS 201.

BLKS 458 Slave Narratives: Race, Gender, and Writing Freedom Credits: 3

A truly American, home grown genre and powerful force in the development of American political and social realities, the African American Slave Narrative is an established, recognized influence in the development of African American and American literary history. In this course you will have the opportunity to explore the historical trajectory of the Slave Narrative, looking at early formulations of its structure, purpose and conventions—especially in terms of gender and race, subsequent various permutations, and the eventual development of the Neo-slave Narrative as its resurrection, which adds to the complexity and theoretical impact of the literary autobiography from black perspectives.

Prerequisites: DISC 200 or ENGLISH 225.

BLKS 480 Special Topics/Seminar Credits: 1-3

In-depth exploration of special topics in Black Studies. When available, topics will be announced prior to registration. Course may be repeated for up to six credit hours.

Prerequisite: BLKS 201.

BLKS 490 Directed Study/Research Credits: 1-3

Individual research and learning projects supervised by a faculty member. Course may be repeated for up to six credit hours.

Prerequisite: BLKS 201.

BLKS 496 Internship in Black Studies Credits: 1-3

This Internship course presents an opportunity for undergraduate students to integrate their academic studies in the discipline of Black Studies with community service and engagement. As a student intern within a business or professional organization in the urban Metropolitan community, the student gains critical information about the processes and procedures of this business entity in relation to African American community members.

Prerequisite: Departmental consent.

BLKS 5XX Grad Black Studies Elective Credits: 99
Transfer credit

BLKS 5XY Grad Black Studies Elective Credits: 99
Transfer credit

Cello (CELLO)

Courses

CELLO 100A Preparatory Applied Study Credits: 2

One hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit toward the major.

CELLO 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

CELLO 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

CELLO 101 Freshman Cello I Credits: 2-4

CELLO 102 Freshman Cello II Credits: 2-4

CELLO 201 Sophomore Cello I Credits: 2-4

CELLO 202 Sophomore Cello II Credits: 2-4

CELLO 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

CELLO 301 Junior Cello I Credits: 2-4

CELLO 302 Junior Cello II Credits: 2-4

CELLO 401 Senior Cello I Credits: 2-4

CELLO 402 Senior Cello II Credits: 2-4

Chemistry (CHEM)

Courses

CHEM 111 Physical Basis Of Chemistry Credits: 3

An introductory course in the basic principles applicable to chemistry for students who intend to take but are not adequately prepared to take CHEM 211. The emphasis is on quantitative relationships and problem solving. NOTE: This course does not count towards a Chemistry major or minor.

Prerequisites: Departmental consent.

CHEM 115 Elements Of Chemistry I Credits: 4

A one-term course in general chemistry with special emphasis on organic chemistry and biochemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course. NOTE: This course does not count towards a Chemistry major or minor.

Co-requisites: CHEM 115L.

CHEM 115L Elements Of Chemistry, Laboratory I Credit: 1

A one-term course in general chemistry with special emphasis on organic chemistry and biochemistry. A terminal course that does not meet requirements as a prerequisite for any higher level chemistry course. NOTE: This course does not count towards a Chemistry major or minor.

Co-requisites: CHEM 115.

CHEM 160 Chemistry, Society, And The Environment Credits: 3

This course is intended to offer a survey of chemical and scientific concepts surrounding current issues. The emphasis will be on the application of fundamental chemical knowledge to allow a full understanding of these issues in the context of currently known facts and theories. Through classroom discussion and application of the scientific method, the ramifications of the issues will be examined. Topics will include pollution, the importance of the chemical industry, its responsibilities to society, and other items of current scientific and environmental interest. NOTE: This course does not count towards a Chemistry major or minor.

CHEM 160L Laboratory For Chemistry, Society, And The Environment Credit: 1

This course is offered in support of CHEM 160. It will consist of field activities, experiments, and demonstrations to reinforce the concepts and ideas presented in that course. NOTE: This course does not count towards a Chemistry major or minor.

CHEM 206 Human Nutrition Credits: 3

Introduction to nutrition for health and wellness and the use of chemical energy in the breakdown and synthesis of biomolecules. Nutrition as it applies to a variety of life situations from infancy to older adults. Learning encompasses elements of anatomy and physiology related to nutrition and health. NOTE: This course does not count towards a Chemistry major or minor.

CHEM 211 General Chemistry I Credits: 4

Stoichiometry, gas laws, thermochemistry, atomic structure, molecular shapes and bonding theories. Recommended preparation: working knowledge of College Algebra.

Co-requisites: CHEM 211L.

CHEM 211 - MOTR CHEM 150L: Chemistry I with Lab

**CHEM 211L Experimental General Chemistry I Credit: 1**

Introduction to the laboratory techniques used in studying the chemical properties of substances. Some quantitative techniques are included.

Co-requisites: CHEM 211.

CHEM 211L - MOTR CHEM 150L: Chemistry I with Lab

**CHEM 212LR Experimental General Chemistry II Credit: 1**

Introduction to analysis and synthesis. Descriptive chemistry of the more common elements.

Prerequisites: CHEM 211 and CHEM 211L (each with a grade of C- or better).

Co-requisites: CHEM 212R.

CHEM 212R General Chemistry II Credits: 4

Liquids and solids, solutions, equilibrium, kinetics, electrochemistry and thermodynamics. Introductory course to all advanced work in chemistry.

Prerequisites: CHEM 211 and CHEM 211L (each with a grade of C- or better).

Co-requisites: CHEM 212LR.

CHEM 311 Laboratory Safety And Health I Credit: 1

An introduction to laboratory safety and health. Topics to be discussed include good laboratory practice; laboratory hazards; safe chemical handling, storage and disposal; first aid; protective equipment; and federal regulations.

Prerequisites: CHEM 320 or CHEM 321.

CHEM 320 Elementary Organic Chemistry Credits: 4

This one-semester course covers all fundamental principles of organic chemistry, including modern bonding theory, analytical techniques, physical properties, and chemical reactions. This course is designed to satisfy requirements for students in the UMKC Six-Year Medical Program or certain Biology B.A. majors. This course is not recommended for pre-medical, pre-dental, pre-pharmacy or other pre-health students.

Prerequisites: CHEM 212R and CHEM 212LR (each with a grade of C- or better).

Co-requisites: CHEM 320L.

CHEM 320L Experimental Organic Chemistry Credit: 1

Elementary organic chemistry experiments to teach basic laboratory operations.

Prerequisites: CHEM 212R and CHEM 212LR (each with a grade of C- or better).

Co-requisites: CHEM 320.

CHEM 321 Organic Chemistry I Credits: 3

The two terms (CHEM 321, CHEM 322R) constitute an integrated unit in which the chemistry of aliphatic, aromatic, and some heterocyclic compounds are studied. The study begins with simple monofunctional compounds and ends with polyfunctional natural products.

Prerequisites: CHEM 212R and CHEM 212LR (each with a grade of C- or better).

Co-requisites: CHEM 321L.

CHEM 321L Organic Chemistry Laboratory I Credit: 1

Introduces the student to basic techniques and procedures in isolation, purification, and characterization of organic compounds and simple reactions used in the organic chemistry laboratory. The student will also be trained in the proper way to write a scientific laboratory report.

Prerequisites: CHEM 212R and CHEM 212LR (each with a grade of C- or better).

Co-requisites: CHEM 321.

CHEM 322L Organic Chemistry Laboratory II Credit: 1

An extension of CHEM 321L. This course builds from the basic techniques, procedures, and writing to more advanced organic operations.

Prerequisites: CHEM 321 and CHEM 321L (or equivalents; each with a C- or better).

Co-requisites: CHEM 322R.

CHEM 322R Organic Chemistry II Credits: 3

Continuation of CHEM 321.

Prerequisites: CHEM 321 and CHEM 321L (each with a grade of C- or better).

Co-requisites: CHEM 322L.

CHEM 330 Elementary Physical Chemistry Credits: 3

An introductory course in the principles of physical chemistry for students who have not had calculus.

Prerequisites: CHEM 320 or CHEM 322R (each with a grade of C- or better).

CHEM 341 Analytical Chemistry I: Quantitative Analysis Credits: 4

Principles of gravimetric, volumetric, electrolytic, and other methods of analysis.

Prerequisites: CHEM 212R and 212LR (each with a C- or better).

CHEM 341WI Analytical Chemistry I: Quantitative Analysis Credits: 4

Principles of gravimetric, volumetric, electrolytic, and other methods of analysis.

Prerequisites: CHEM 212R and CHEM 212LR (each with a grade of C- or better).

CHEM 345R Instrumental Analysis Credits: 3

An introductory course on the use of instruments for chemical analysis with particular reference to applications of interest to medical technologists and other students in the sciences. Emphasis will be placed on optical, electrochemical and separation methods.

Prerequisites: CHEM 341WI (with a grade of C- or better).

CHEM 367 Bioorganic Chemistry Credits: 3

An examination into the current topics at the interface between chemistry and biology. Emphasis will be on the current literature and will include such topics as nucleic acid chemistry, protein chemistry, and carbohydrate chemistry.

Prerequisites: CHEM 320 and CHEM 320L; or CHEM 322R and CHEM 322L (each with a grade of C- or better).

CHEM 382 Inorganic And Organic Synthesis Credits: 2

A number of inorganic, organic, and organometallic compounds will be prepared using a variety of synthetic techniques.

Prerequisites: CHEM 320 and CHEM 320L; or CHEM 322R and CHEM 322L (each with a grade of C- or better).

CHEM 387 Environmental Chemistry I Credits: 3

A survey of how chemical principles can be applied to the environment. Included will be topics in aquatic chemistry, atmospheric chemistry and chemistry of the geosphere and soil.

Prerequisites: CHEM 320 and CHEM 320L; or CHEM 322R and CHEM 322L (each with a grade of C- or better).

CHEM 390 Special Topics In Chemistry Credits: 1-3

This course will focus on an area of chemistry of contemporary significance. The amount of credit is to be determined by arrangement with the department. May be repeated for credit when the topic varies but no more than three hours of credit may be applied to major course requirements. Recommended preparation: CHEM 212R and CHEM 212LR (each with a grade of C- or better).

Prerequisites: Departmental consent.

CHEM 392 Chemistry Internship/Practical Training Credits: 1-3

Practical work in chemistry in an industrial, academic or other professional setting. Prior to the start of work, the department must approve the internship/practical training.

Prerequisites: CHEM 212R and CHEM 212LR (each with a C- or better).

CHEM 395 Directed Readings In Chemistry Credits: 1-3

Intensive readings in areas of joint interest to the enrolled student and the cooperating faculty member. Readings may not duplicate or substitute for current course offerings. Recommended preparation: CHEM 322R and CHEM 322L (each with a grade of C- or better).

Prerequisites: Departmental consent.

CHEM 399 Intro To Research Credits: 1-3

Special problems to introduce undergraduate chemistry majors to research methods. A comprehensive written report is required and a copy of the report is to be retained in the chemistry office. Recommended preparation: CHEM 212R and CHEM 212LR (each with a grade of C- or better).

Prerequisites: Departmental consent.

CHEM 410 Chemical Literature Credit: 1

A systematic introduction to the efficient use of the chemical literature. Topics will include both classical search methods and computer search methods.

Prerequisites: CHEM 320 and CHEM 320L; or CHEM 322R and CHEM 322L (each with a grade of C- or better).

CHEM 431 Physical Chemistry I Credits: 3

A first course in physical chemistry having a calculus base. This course emphasizes thermodynamics with an introduction to the basic principles of quantum mechanics.

Prerequisites: MATH 250; and PHYSICS 220 or PHYSICS 250.

CHEM 432 Physical Chemistry II Credits: 3

A second course in physical chemistry having a calculus base. This course emphasizes the quantum mechanics description of atoms and molecules, molecular spectroscopy, statistical mechanics, and kinetics.

Prerequisites: CHEM 431 (with a grade of C- or better).

Co-requisites: CHEM 437WI.

CHEM 434 Molecular Spectroscopy Credits: 3

A theoretical introduction to molecular spectroscopy and its relation to structure. Electronic, vibrational and rotational spectra of chemical systems will be discussed.

Prerequisites: CHEM 432 (with a grade of C- or better).

CHEM 437WI Experimental Physical Chemistry I Credits: 3

Experimental methods in physical chemistry. One hour lecture and six hours laboratory each week. Satisfies writing intensive requirements for the B.A. or B.S. degree.

Co-requisites: CHEM 432.

CHEM 442R Analytical Chemistry II: Instrumental Analysis Credits: 3

The experimental and theoretical aspects of optical and electrochemical, chromatographic and other physicochemical methods of analysis.

Prerequisites: CHEM 341WI (with a grade of C- or better).

CHEM 445 Introduction To Principles Of Forensic Investigation Credits: 2

A survey of the physicochemical forensic techniques employed in the detection, examination, processing, preservation and court presentation of evidence.

Prerequisites: CHEM 212R and CHEM 212LR (each with a grade of C- or better).

CHEM 451R Inorganic Chemistry Credits: 3

Modern concepts and theories of inorganic chemistry.

Prerequisites: CHEM 320 and CHEM 320L; or CHEM 322R and CHEM 322L (each with a grade of C- or better).

CHEM 471 Introduction To Polymer Chemistry Credits: 3

Survey of organic and inorganic monomers and polymers; the occurrence, synthesis, structures and properties of natural and synthetic polymers; discussion of general properties of plastics, elastomers, fibers, resins, and plasticizers.

Prerequisites: CHEM 320 and CHEM 320L; or CHEM 322R and CHEM 322L (each with a grade of C- or better).

CHEM 480 Computer Applications To Chemical Problems Credits: 3

The course will survey the field of computational chemistry, concentrating on methods, programs and general utility to the research chemist. The student will learn the principles of the theory underlying the methods and will use selected software to carry out chemical calculations.

Prerequisites: CHEM 320 and CHEM 320L; or CHEM 322R and CHEM 322L (each with a grade of C- or better).

CHEM 490 Special Topics In Chemistry Credits: 1-3

This course will focus on an area of chemistry of contemporary significance. The amount of credit is to be determined by arrangement with the department. May be repeated for credit when the topic varies but no more than three hours of credit may be applied to major course requirements.

Prerequisites: CHEM 431 (with a grade of C- or better).

CHEM 495 Directed Readings In Chemistry Credits: 1-3

Intensive readings in areas of joint interest to the enrolled student and the cooperating faculty member. Readings may not duplicate or substitute for current course offerings. Recommended preparation: CHEM 431 with a grade of C- or better.

Prerequisites: Departmental consent.

CHEM 499 Senior Research Credits: 1-9

The student is given an original research problem and will be held responsible for all previous experience in working toward its solution. A well-written, comprehensive, and well documented research report is required, and a copy of the report is to be retained in the Chemistry department. Recommended preparation: CHEM 431 with a grade of C- or better.

Prerequisites: Departmental consent.

CHEM H206 Human Nutrition Credits: 3

Introduction to nutrition for health and wellness and the use of chemical energy in the breakdown and synthesis of biomolecules. Nutrition as it applies to a variety of life situations from infancy to older adults. Learning encompasses elements of anatomy and physiology related to nutrition and health.

CHEM H212R Honors: General Chemistry II Credits: 4

Liquids and solids, solutions, equilibrium, kinetics, electrochemistry and thermodynamics. Introductory course to all advanced work in chemistry.

CHEM H321 Honors: Organic Chemistry I Credits: 3

The two terms (CHEM H321, CHEM H322R) constitute an integrated unit in which the chemistry of aliphatic, aromatic, and some heterocyclic compounds are studied. The study begins with simple monofunctional compounds and ends with polyfunctional natural products.

CHEM H321L Organic Chemistry Laboratory I - Honors Credit: 1

Introduces the student to basic techniques and procedures in isolation, purification, and characterization of organic compounds and simple reactions used in the organic chemistry laboratory. The student will also be trained in the proper way to write a scientific laboratory report.

CHEM H322L Organic Chemistry Laboratory II Credit: 1

An extension of CHEM 321L. This course builds from the basic techniques, procedures, and writing to more advanced organic operations.

Prerequisites: CHEM 321 and CHEM 321L (each with a C- or better).

Co-requisites: CHEM 322R.

CHEM H322LR Organic Chemistry Laboratory II-Honors Credits: 2

A more intense version of CHEM 322L. See course description for CHEM 322L.

Prerequisite: CHEM 321L.

CHEM H322R Honors: Organic Chemistry II Credits: 3**CHEM H399 Introduction To Research Credits: 1-3**

Special problems to introduce undergraduate chemistry majors to research methods. A comprehensive written report is required and a copy of the report is to be retained in the chemistry office. May be taken only after consultation with a member of the chemistry staff.

Prerequisites: CHEM 212R.

CHEM H499 Senior Research - Honors Credits: 1-9

Course frequency subject to enrollments, staffing and financial exigency.

Chinese (CHINESE)

Courses

CHINESE 110 Elementary Chinese I Credits: 5

Introduction to the sound system of modern Chinese, aural comprehension, oral expression, basic structural patterns, writing systems.

CHINESE 110 - MOTR LANG 105: Foreign Language I

**CHINESE 120 Elementary Chinese II Credits: 5**

Dialogue practice and conversation, reading of simple stories and essays, comparative study of Chinese and English grammar and syntax.

Prerequisites: CHINESE 110.

CHINESE 120 - MOTR LANG 106: Foreign Language II**CHINESE 211 Second Year Chinese I Credits: 3**

Introductory readings of colloquial Chinese, literature, conversation, simple composition, and comparison between written and spoken styles in modern Chinese.

Prerequisites: CHINESE 120 or equivalent.

CHINESE 221 Second Year Chinese II Credits: 3

Readings of modern Chinese with emphasis on expository writings, analysis of syntactic structure, composition and translation.

Prerequisite: CHINESE 211 or equivalent.

Civil Engineering (CIV-ENGR)

Courses

CIV-ENGR 111 First Year Cornerstone Credit: 1

An exploration of the diverse emphasis specific career opportunities of Civil Engineers, with a goal of providing students the needed fundamental skills, knowledge and resources for identifying the most appropriate career path(s) consistent with the student's interests, skills, and objectives.

CIV-ENGR 113 Engineering Measurements Credit: 1

This course provides a fundamental introduction to the elements of surveying. Basics including terminology, coordinate systems, equipment, legal descriptions, and calculations will be taught in the classroom. Field laboratory sessions will introduce the students to setting up basic equipment, running a level loop, and laying out a site based on plan designs.

CIV-ENGR 190 Special Topics Credits: 1-3

Selected introductory topics in the area of computing. May be repeated for credit when topic varies.

CIV-ENGR 275 Engineering Statics Credits: 3

Fundamentals of statics; static equilibrium; internal forces; introduction to elements of mechanics of elastic materials, and properties of areas.

Prerequisites: PHYSICS 240.

CIV-ENGR 276 Strength Of Materials Credits: 3

The course introduces and emphasizes the concepts and analysis methods for stress and strain, torsion, bending and shear stresses in beams, combined stresses, and deflection theory using a calculus based methodology. Introduction to buckling and energy methods may be included.

Prerequisites: CIV-ENGR 275.

CIV-ENGR 318 GIS for Engineers Credits: 3

This course covers the fundamental concepts and methods for use of GIS software used to solve engineering applications and problems. The course uses module based practical learning to apply and integrate foundational knowledge, develop the skills required to model various types of imagery data, incorporate this data into projects for management and design, and provide the skills necessary for students to depict ideas and design graphically. A personal computer capable of running the software is required for the course. Non-engineering majors by instructor permission only.

Prerequisites: SCE Student.

CIV-ENGR 319 Engineering Computation and Statistics Credits: 3

A review of descriptive statistics, statistical distribution functions and application to engineering problems. Introduction to hypothesis testing, analysis of variance, correlation/regression and design of factorial experiments.

Prerequisites: MATH 268 or MATH 220.

CIV-ENGR 321 Structural Analysis Credits: 4

This course introduces the basic analysis and computer methods that are required to analyze basic structural elements and simple structures. Topics covered in this course include design loads, analysis of statically determinate beams, frames and trusses, shear and moment diagrams, influence diagrams, beam deflections, statically indeterminate structures (beams and frames), displacement methods, introduction to energy and matrix methods.

Prerequisites: CIV-ENGR 276.

CIV-ENGR 323 Structural Steel Design Credits: 3

Basic principles of structural steel design. Design of beams, axially loaded members, columns, and bolted and welded connections.

Prerequisites: CIV-ENGR 321.

CIV-ENGR 335 Soil Mechanics Credits: 3

Detailed study of physical and mechanical properties of soil governing its behavior as an engineering material. Machine Shop Safety is required prior to taking this class.

Prerequisites: CIV-ENGR 276, CHEM 211, CHEM 211L.

CIV-ENGR 342 Water and Wastewater Treatment Processes Credits: 3

Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineering systems for the distribution, collection and treatment of water and wastewater.

Prerequisites: CIV-ENGR 351 or MEC-ENGR 351; and CHEM 211 and CHEM 211L.

CIV-ENGR 351 Fluid Mechanics Credits: 3

Concepts of the statics and dynamics of fluids, with emphasis on principles of continuity, momentum and energy. Boundary layers, dimensional analysis and drag are covered briefly. Thorough treatment of pipe flow.

Prerequisites: CIV-ENGR 275.

Co-requisites: MATH 345 or MEC-ENGR 272.

CIV-ENGR 357 Engineering Hydraulics Credits: 3

Analysis and design of closed conduit systems for water supply; fundamentals of open channel flow; principles of pumping and hydropower generation; transients and control of surge pressures in pipelines.

Prerequisites: CIV-ENGR 351 or MEC-ENGR 351.

CIV-ENGR 378WI Civil Engineering Materials Credits: 3

This course provides students with a working knowledge of the design and performance of Asphaltic Concrete (AC) and Portland Cement Concrete (PCC) mixtures through understanding the properties and requirements of the component materials and their effects on subsequent performance. An understanding of the design, production process, construction, durability, and operations and maintenance will be provided. A significant portion of this course requires hands-on laboratory testing and analysis. Roadway and highway pavements will provide a primary context within which these concrete systems will be studied. Machine Shop Safety is required prior to taking this course.

Prerequisites: CHEM 211, CHEM 211L, CIV-ENGR 276.

CIV-ENGR 390 Engineering Coop/Internship Credits: 0

Students may participate in structured Engineering Coop/Internship under the supervision of employer. They must carry out significant professional responsibilities and whatever additional assignments are determined by the employer.

Prerequisites: Departmental consent.

CIV-ENGR 400 Problems Credits: 1-4

Directed investigation of civil engineering problems.

Prerequisites: Departmental consent.

CIV-ENGR 401ES Special Topics in Civil Engineering Credits: 3

Hydraulic conductivity measurements. Seepage analysis and control. Earth dam and embankment design. Computer applications.

Prerequisites: CIV-ENGR 335.

CIV-ENGR 401HA Hydrologic Analysis and Design Credits: 3

Practical implementation of hydrologic and hydraulic system design in accordance with published design criteria and using methods and numerical modeling accepted by local, state, and national government agencies.

Prerequisites: CIV-ENGR 357.

CIV-ENGR 401SD Special Topics In Civil Engineering Credits: 3

Study of soil behavior under cyclic and dynamic loading conditions. Foundation design for vibratory loadings. Introductory earthquake engineering including dynamic ground response for determination of dynamic soil properties. Evaluation of soil liquefaction potential during earthquakes by both laboratory and in situ field methods. Design consideration for embankments and earth retaining structures under seismic loading conditions. Construction blasting and vibration effects on underground systems.

Prerequisites: CIV-ENGR 335.

CIV-ENGR 401SV Topics in Civil Engineering Credit: 1

This course provides a fundamental introduction to the elements of surveying. Basics including terminology, coordinate systems, equipment, legal descriptions, and calculations will be taught in the classroom. Field laboratory sessions will introduce the students to setting up basic equipment, running a level loop, and laying out a site based on plan designs.

CIV-ENGR 404 Project Management of Integrated Design and Construction Credits: 3

Provide a body of knowledge that includes the principles, knowledge areas, skills, and tools applicable to successful project management for the performance of integrated design and construction of capital projects, specifically as applicable to the post-award period. This post-award period is the time from the formal project award by the owner through project design and construction, testing, commissioning, close-out and completion of the project warranties.

CIV-ENGR 405 Capital Project Delivery Methods Credits: 3

Provide a body of knowledge that acquaints students with the capital project delivery methods in both public and private business sectors of the U.S design – construction industry. Project delivery means how a capital project comprising both design and construction is planned, procured, contracted and implemented by an owner to achieve desired objectives. Delivery methods discussed in this class include traditional design – bid- build, design – build, design-build plus added services such as operations and maintenance, CM @ Risk and other approaches. Roles and responsibilities of owners, owner consultants, and design and construction firms are presented and discussed.

CIV-ENGR 406 Construction Project Risk Management Credits: 3

Risk management skill sets are necessary tools for the successful project manager. Project Management Institute's (PMI) 6 steps of project risk management constitute the basis of the content, which includes an expanded knowledge of risk identification, qualitative and quantitative risk analysis, risk control, contract risks, and risk transfer options. Business and project risks such as client selection, project planning, and project execution, will be considered as well as legacy risks that remain with the business and participants beyond the project completion. Different risk management strategies will be discussed, including risk avoidance, risk mitigation, and risk transfer.

Prerequisites: Senior Standing.

CIV-ENGR 409 Fundamentals of Engineering Review Credit: 1

This course consists of a series of lectures and is intended as a review class for all the subjects included in the Fundamentals of Engineering exam. Classes specifically focus on the review of equations and formulas included in the reference handbook published by NCEES.

CIV-ENGR 411 Civil Engineering Systems Design I Credits: 2

Comprehensive and realistic design project using the systems approach. Design choices and their effect upon the environment. Design constraints include constructability, minimization of environmental impact and cost-effectiveness. Managerial and professional aspects of design practice.

Prerequisites: CIV-ENGR 467 and CIV-ENGR 497.

Co-requisites: CIV-ENGR 422WI and CIV-ENGR 432.

CIV-ENGR 412 Civil Engineering Systems Design II Credits: 3

Continuation of CIV-ENGR 411.

Prerequisites: CIV-ENGR 411 and departmental consent.

CIV-ENGR 415 Engineering Leadership and Ethics Credits: 3

Analysis of leadership, including 360-degree assessment of students' leadership. Discussion of leadership cases and application to engineering careers. Frequent analysis of engineering ethics cases using the NSPE Code.

CIV-ENGR 417 Advanced Structural Analysis Credits: 3

The course is designed as a continued study of structural analysis methods with emphases on indeterminate structures (trusses, beam/columns, and frames), advanced analysis methods, and introduction to nonlinear structural effects including geometric nonlinearity and inelasticity. Advanced structural analysis methods including force, displacement, matrix, energy, and limit analysis methods will be introduced and practiced. Both computer based and hands-on analysis will be involved.

Prerequisites: CIV-ENGR 321

CIV-ENGR 421 Matrix Methods of Structural Analysis Credits: 3

The basic components of this class are matrix theories and applied computer analysis methods using a computer-based structural analysis software. These include: (1) study of matrix formulation of direct stiffness method, virtual work principle and formulation of displacement-based frame elements, theories and significance of geometric and material nonlinearity; (2) Sap2000-based analysis of 2D/3D trusses and 2D/3D frames considering different loading and material/geometric nonlinearity.

Prerequisites: CIV-ENGR 321.

CIV-ENGR 422WI Reinforced Concrete Design Credits: 3

Basic principles of reinforced concrete design. Design of beams for flexure and shear; design of short and slender columns. Bond stress development. Footing design.

Prerequisites: CIV-ENGR 321.

CIV-ENGR 423 Advanced Structural Steel Design Credits: 3

Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections.

Prerequisites: CIV-ENGR 323.

CIV-ENGR 425 Prestressed Concrete Credits: 3

Design and behavior of prestressed concrete structures; material and system of pretensioned and post tensioned systems; prestress losses; flexure, shear, bond, deflections and partial prestress in determinate structures; indeterminate beams-introduction.

Prerequisites: CIV-ENGR 422WI.

CIV-ENGR 427 Advanced Reinforced Concrete Design Credits: 3

Advanced topics in the design of footings, retaining walls, two-way floor slabs, torsion and continuous structures, shear friction, strut and tie design, precast design.

Prerequisites: CIV-ENGR 422WI.

CIV-ENGR 429 Design of Structures for Blast and Fire Credits: 3

General overview of Blast Design; risk assessment and design criteria; simplifies Blast Effects Analysis; ground shock, material response; antiterrorism design considerations; weapons effects and mitigation; internal explosions; progressive collapse analysis; and introduction to Fire Design.

CIV-ENGR 431 Fundamentals of Geomaterial Characterization Credits: 3

A geomaterial is any construction material comprised primarily of soil. This course overviews state-of-the-art instrumental techniques for analysis of the physio-chemical properties of soils, aggregates, hydraulic concrete, and asphaltic concrete. Evaluation techniques will be applied to determining beneficial reuse opportunities for industrial by-product materials from the Kansas City region.

Prerequisites: CIV-ENGR 335, CIV-ENGR 378WI.

CIV-ENGR 432 Foundation Engineering Credits: 3

Design of basic foundation structures, footings, retaining walls, pile foundations, dams.

Prerequisites: CIV-ENGR 335.

CIV-ENGR 436 Advanced Soil Mechanics Credits: 3

Theoretical soil mechanics as applied to solution of specific engineering problems.

Prerequisites: CIV-ENGR 335.

CIV-ENGR 442 Hydraulic Structures Credits: 3

A review of the history and hydraulic design procedures for a variety of hydraulic structures including spillways, water measurement structures, canal structures and energy dissipation structures.

Prerequisites: CIV-ENGR 357.

CIV-ENGR 446 Limnology Credits: 3

Physical, biological and chemical issues important in surface fresh waters. Includes carbonate chemistry, algal assay and thermocline analysis.

Prerequisites: CHEM 211, MATH 345.

CIV-ENGR 447 Contracts and Law for Engineers Credits: 3

This course covers a broad range of substantive legal topics giving the student a grounding in the legal implications of certain situations that they may encounter during their careers. The course includes coverage of basic contract law, environmental regulations and compliance, construction law, antitrust law, intellectual property law, civil procedure, employment law, business entities (corporate law) product liability and criminal law and procedure. The objective of the course is to provide students with a fundamental understanding of the wide range of federal and state laws governing behavior in our complicated and rule of law driven society.

Prerequisites: Senior standing.

CIV-ENGR 449 Environmental Compliance, Auditing and Permitting Credits: 3

This course provides a high level overview of the most important statutes that have been enacted to protect the environment. The course covers regulation of hazardous waste, the Clean Air and Clean Water Acts, the Resource Conservation and Recovery Act, the All Appropriate Inquiry Rule and the law addressing sites contaminated with hazardous substances and the technology options employed to remediate those sites. In addition, the course provides coverage of environmental audits and emergency planning for extremely hazardous substances, the regulation of underground storage tanks, safe drinking water and the National Environmental Policy Act among other statutes.

Prerequisites: Senior standing.

CIV-ENGR 452 Hydraulics of Open Channels Credits: 3

This is a first course in the fundamentals of open channel (free surface) water flow. Over ninety-nine percent of all the water that is moved on the planet's surface is by free surface flow. Study of free surface flow is essential to the study of storm water drainage systems, flood control, water and wastewater treatment and the study of the form and processes of river evolution. This class provides the fundamental physical principles of free surface flow as a prelude to a significant number of other topics that pertain to engineering and geomorphic analysis.

Prerequisites: CIV-ENGR 357.

CIV-ENGR 453 Hydraulics and Variability of Rivers Credits: 3

Introduction to the concepts of alluvial channel behavior, evolution and change due to natural and man-induced modifications to streams and watersheds. Numerous case studies of river behavior are studied from the perspective of hydraulics, geomorphology and sediment transport.

Prerequisites: CIV-ENGR 357.

CIV-ENGR 454 River Stability and Scour Credits: 3

Bridge hydraulics, stream stability, scour at bridge piers and abutments, hydraulic modeling of floods, countermeasures for protection of bridge infrastructure.

Prerequisites: CIV-ENGR 357.

CIV-ENGR 456 Urban Hydrology Credits: 3

Analysis of urban drainage systems in accordance with published municipal criteria. This course is an in-depth course for senior undergraduate students interested in the hydrological sciences and for graduate students specializing in water resources. Specifically this course will focus on the engineering procedures and techniques specified by municipalities to design and maintain efficient, safe, storm drainage systems. This course also focuses on the unique issues associated with estimating and designing for rainfall/runoff in urban metropolitan areas, including channel and reservoir routing of floods through stream channels, retention structures, culverts, and storm sewers.

Prerequisites: CIV-ENGR 357.

CIV-ENGR 463 Construction Law Credits: 3

This course introduces professional, ethical, and legal concepts of the professional practice of engineering, and the role of the consulting engineer, specifically in the A/E/C industry during the design, procurement, and construction processes. A conceptual framework is developed for understanding the industry standard agreements (AIA, EJCDC, ConCensus) and the various participants roles and duties in project execution. The engineer's "professional standard of care" is examined and revisited throughout the semester, specifically what it means to be a "Professional Engineer". Emphasis is placed on project and contract management and the applicable law.

CIV-ENGR 466 Green Building and Sustainable Infrastructure Credits: 3

This class will discuss various green rating systems for buildings and infrastructure. Upon completion of this course students will be prepared for the LEED Green Associate Exam. The course will also discuss infrastructure project sustainability from a life cycle perspective. A semester project will involve stormwater management using "green" techniques and methods to mitigate the urban heat island. Upon completion of the course, students will better understand what sustainability means and how it applies in the context of our built environment and have a good idea of how technology will impact our sustainable future.

Prerequisites: Junior standing.

CIV-ENGR 467 Introduction to Construction Management Credits: 3

Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques.

CIV-ENGR 468 Construction Planning and Scheduling Credits: 3

This course is intended to provide an in-depth examination of the construction planning and scheduling process, as it relates to civil engineering projects. Topics will include planning and scheduling of construction operations by the critical path method, Network diagramming, scheduling computations, and time-cost trade-offs. Manpower and equipment leveling. Computer and noncomputer techniques.

Prerequisites: CIV-ENGR 467.

CIV-ENGR 469 Construction Methods and Equipment Credits: 3

Introduction to methods used to plan, construct, and manage heavy civil projects. Topics will include development, project control, equipment productivity, earthmoving fundamentals, formwork design, and other issues in heavy civil projects.

Prerequisite: CIV-ENGR 467.

CIV-ENGR 470 Corrosion Engineering Credits: 3

This course will cover the physical interaction of metallic materials with their environments, called corrosion. Corrosion is an electrochemical process and the thermodynamics and kinetics of corrosion processes will be discussed. Students will be expected to identify different forms of corrosion and be able to select appropriate materials for their working environment to prevent corrosion related problems. Second half of the class will concentrate on corrosion of metals in concrete and prevention methods.

Prerequisites: CHEM 211, CHEM 211L, CIV-ENGR 378WI.

CIV-ENGR 471 Advanced Portland Cement Concrete Credits: 3

This course will cover topics such as cement chemistry, concrete proportioning, aggregates, mineral and chemical admixtures, fresh and hardened properties of concrete, and durability of concrete. Design and proportioning of concrete mixtures for desired fresh and hardened properties will be emphasized. Specialty concrete types such as high strength/high performance concrete, lightweight concrete, pervious concrete, high volume fly ash concrete, and fiber reinforced concrete will also be covered.

Prerequisites: CHEM 211, CHEM 211L, CIV-ENGR 378WI.

CIV-ENGR 473 Durability of Civil Engineering Materials Credits: 3

This course will explore the identification, causes of, and remediation of material-related durability deterioration in civil engineering projects. The primary focus will be on reinforced concrete, plain concrete, and soil for a variety of applications. Course content will be delivered primarily through laboratory activities and handouts. Lab activities will use advanced analysis techniques and help the students identify and measure deterioration mechanisms. Various non-destructive evaluation techniques will be discussed. Students have hands on experiences with samples production, data collection, and data analysis for all of the lab activities.

Prerequisites: CIV-ENGR 335, CIV-ENGR 378WI.

CIV-ENGR 475 Seismic Design of Structures Credits: 3

Introduction to basic analysis and design principles for the seismic design of buildings (concrete, steel, wood). General seismic principles, codes and loads, static lateral force procedure, dynamic lateral force procedure, topics in rigidities of buildings.

Prerequisites: CIV-ENGR 323 (or CIV-ENGR 422WI), and MEC-ENGR 285.

CIV-ENGR 484 Pavement Materials Design, Maintenance, and Rehabilitation Credits: 3

Traffic loading and volume, stress and deflection, characterization of pavement materials, design of flexible and rigid pavements, design of overlays, evaluation of pavement performance, maintenance techniques, and rehabilitation options.

Prerequisites: CIV-ENGR 335, CIV-ENGR 378WI.

CIV-ENGR 487 Applied Finite Element Analysis Credits: 3

The study of advanced simulation techniques for the solution to engineering problems. The use of Finite Element Method toward solving mechanical, structural, vibration and potential flow problems will be explored. Current commercial simulation tools will be used extensively.

Prerequisites: MEC-ENGR 272 and MEC-ENGR 130.

CIV-ENGR 491 Internship Credits: 6

For International students who must register to cover off-campus employment which is approved as related to their degree by their departmental advisor and ISAO.

Prerequisites: Departmental consent.

CIV-ENGR 497 Engineering Hydrology Credits: 3

Fundamental concepts of hydrology in engineering; computation principles of runoff from rainfall; measurement of hydrologic quantities; quantitative and statistical estimation of design stream-flow magnitude and frequency; principles of unsteady routing of hydrographs.

Prerequisites: CIV-ENGR 319; and CIV-ENGR 351 or MEC-ENGR 351.

Clarinet (CLARINET)

Courses

CLARINET 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit toward the major.

CLARINET 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

CLARINET 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

CLARINET 101 Freshman Clarinet I Credits: 2-4

CLARINET 102 Freshman Clarinet II Credits: 2-4

CLARINET 201 Sophomore Clarinet I Credits: 2-4

CLARINET 202 Sophomore Clarinet II Credits: 2-4

CLARINET 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

CLARINET 301 Junior Clarinet I Credits: 2-4

CLARINET 302 Junior Clarinet II Credits: 2-4

CLARINET 401 Senior Clarinet I Credits: 2-4

CLARINET 402 Senior Clarinet II Credits: 2-4

Classics (CLASSICS)

Courses

CLASSICS 119 Myth and Literature Credits: 3

A study of classical myth including readings from Homer to Ovid, analysis of selected myths in later literature, art, and music, and a study of contemporary definitions and approaches to myth.

CLASSICS 119 - MOTR LITR 201: Mythology

CLASSICS 131 Seven Wonders and Beyond: Archaeological Wonders of the Ancient World Credits: 3

This is a survey of the archaeology of Egypt and the Near East, the Aegean cultures of Crete and Mycenae, and the world of classical Greece and Italy. In addition, archaeological wonders of Europe and the New World will be discussed.

CLASSICS 210 Foundations Of Ancient World Literature I Credits: 3

This course studies ancient world literature such as The Descent of Inanna, Egyptian love poetry, Hebrew Scriptures, the epics of Homer and Virgil, the Analects of Confucius, and the wisdom of Laozi. The course also considers ancient creation epics such as the cosmic battle between Marduk and Tiamat, the Metamorphosis of Ovid, and the great Indian epic The Ramayana.

CLASSICS 210 - MOTR LITR 200A: World Lit-Beg w/Antiquity End 1660

CLASSICS 300 Special Topics Credits: 1-3

A course about a selected field, genre or individual figure from the ancient world that is not part of the program's regular offerings. May be repeated for credit.

CLASSICS 300CY Ancient World in Cinema Credits: 3

This course will explore the tradition of depicting the ancient Mediterranean world in film from the early silent era to the present. Topics to be covered include the ways that filmmakers respond to literary and historical sources from the ancient world, interact with the artistic tradition of films about the ancient world, the relation of these films to other works by the same creative personnel (directors, actors, writers, producers, etc.), and the political and cultural contexts in which the films were released.

CLASSICS 300CZ Archaeology Of Ancient Disasters Credits: 3

Remarkable human achievements are revealed by archaeological research, but the human past was frequently shaped as well by disasters of natural and human origin. Drawing on case studies that include data from the geosciences, archaeological excavations, and historical sources, this class examines how earth processes, the biosphere, and human cultural behavior were all sources of catastrophe. The study of ancient disasters not only gives us a wider understanding of human history, it may offer lessons for coping with future catastrophes.

CLASSICS 340AWI Classical Literature In Translation Credits: 3

This course will focus on representative authors and works from the Greek and Roman Classical periods, such as Homer, Sophocles, Euripides, Aeschylus, Aristophanes, Plato, the Greek Lyrics, Virgil, Horace, Juvenal, Ovid and Plautus.

CLASSICS 369 Introduction to Prehistoric and Classical Archaeology Credits: 3

An introduction to archaeological research methods that traces human origins and cultural development from the earliest fossil evidence to the threshold of written history and civilization. This class emphasizes the evolutionary and cultural developments that allowed our ancestors to colonize the continents and develop lifeways involving hunting and gathering, farming and urbanism.

CLASSICS 384 Frauds, Myths and Mysteries in Archaeology Credits: 3

Using archaeological hoaxes, myths, and mysteries from around the world – including local and regional examples - students will use science to make good judgments about information they receive in today's world. This course will demonstrate how science approaches questions about human antiquity and will show where pseudoscience falls short. (Lecture/on-line asynchronous).

CLASSICS 391WI Ancient Greek and Roman Medicine Credits: 3

This course explores the practice of medicine in the Ancient Greek and Roman Worlds from 800 BCE until 300 CE. Students will read primary sources in English and will also be introduced to Greek and Latin grammar and medical vocabulary so that they can understand and study essential terms from the history of medicine in their original language.

CLASSICS 471 Ancient Greece Credits: 3

This course begins with a survey of the pre-classical Minoan and Mycenaean civilizations and then describes the rise of prominent Greek city-states (with particular emphasis upon the evolution of Sparta and the political, social and cultural contributions of Athens). The course concludes with the rise of Macedon and Alexander's conquests and significance.

CLASSICS 499 Senior Tutorial Credits: 3

A three-hour comprehensive reading and research tutorial leading to the writing of a senior paper. It consist of tutorial sessions and independent research leading to a major paper using original source materials.

Communication Studies (COMM-ST)

Courses

COMM-ST 110 Fundamentals Of Effective Speaking And Listening Credits: 3

An introduction to the dimensions of effective platform speaking with special emphasis on developing critical listening skills. Lecture, performance, and discussion.

COMM-ST 110 - MOTR COMM 110: Fundamentals of Public Speaking

**COMM-ST 140 Principles Of Communication Credits: 3**

An interdisciplinary introduction to the study of contemporary communication studies including a consideration of intrapersonal, interpersonal and public communication.

COMM-ST 140 - MOTR COMM 100: Introduction to Communications

**COMM-ST 203 Introduction to Journalism Credits: 3**

Introduction to the styles and techniques of reporting and writing basic news through assignments in straight news, features and in-depth stories. Exposure to the history and principles of American journalism. Practical application in writing news and news feature articles.

COMM-ST 212 Argumentation And Debate Credits: 3

A study of the nature of logical discourse generated through the preparation and presentation of oral argument within the framework of the debate format. Lecture, performance and discussion.

COMM-ST 212 - MOTR COMM 220: Argumentation Debate

**COMM-ST 220 Introduction: Modern Communications Media Credits: 3**

A comprehensive survey of the content, structure and control of the communications media in American society--newspaper, motion pictures, radio and television; providing an informational frame of reference that will enable discerning students to formulate and apply useful critical concepts in evaluating America's media environment.

COMM-ST 220 - MOTR SBSC 100: Intro to Mass Communications

**COMM-ST 230 Introduction to Film Studies Credits: 3**

The course is an introduction to the study of film as an art form and industrial practice. Students will study the basics of film analysis, cinematic formal elements, genre, narrative structure and the cultural functions of cinema.

COMM-ST 230 - MOTR FILM 100: Introduction to Film Studies

**COMM-ST 250 Introduction to Film and Video Production Credits: 3**

This course teaches the fundamentals of media making using digital video. Students will learn techniques in pre-production planning, camera, sound, and editing by creating a series of short videos. Students will also learn to think analytically about film, and to apply insights about what gives an image impact and meaning to their own work. It is the foundation and prerequisite for all film and video production courses in the department.

COMM-ST 260P Introduction To Web Communications Credits: 4

This four credit hour web-based multimedia course will examine the process of critically evaluating information delivered on the Internet. It is designed as an introduction for adults and students who use Internet information for work and/or school. The process of critically evaluating Internet information will be described in four modules: traditional evaluation techniques; searching and researching strategies; Internet evaluation techniques and Internet evaluation resources.

COMM-ST 270 Introduction to Digital and Mobile Journalism Credits: 3

An introduction to the practices and principles of creating video, combined with audio, graphics, and data information, by newsgathering in the field, for both current and emerging mobile, non-broadcast, digital and social media platforms.

COMM-ST 277 Interpersonal Communication Credits: 3

An intensive analysis of the dimensions of intrapersonal and interpersonal communication designed to identify the philosophies and methods which underwrite effective human communication.

COMM-ST 277 - MOTR COMM 120: Interpersonal Communication

**COMM-ST 300CY Ancient World in Cinema Credits: 3**

This course will explore the tradition of depicting the ancient Mediterranean world in film from the early silent era to the present. Topics to be covered include the ways that filmmakers respond to literary and historical sources from the ancient world, interact with the artistic tradition of films about the ancient world, the relation of these films to other works by the same creative personnel (directors, actors, writers, producers, etc.), and the political and cultural contexts in which the films were released.

COMM-ST 308 Introduction To The Study Of Human Communication Credits: 3

This course serves to introduce students to the basic theories, perspectives and methodologies used (historically and currently) in the study of speech, interpersonal and mass communication.

COMM-ST 311 Radio & Television Performance Credits: 3

A study of the specialized radio and television performing and operating situations and techniques simulated and evaluated in studio sessions. Lecture, discussion and performance.

COMM-ST 312 Advanced Public Speaking Credits: 3

Advanced study of rhetorical theory and its application to the presentation and criticism of public discourse.

Prerequisites: COMM-ST 110.

COMM-ST 317 Persuasion Credits: 3

A study of the rhetorical, psychological and ethical principles of influencing and controlling individuals and groups, and of the methods of adapting to various attitudes and audiences through the preparation, presentation and evaluation of persuasive speeches. Lecture, discussion and performance.

Prerequisites: COMM-ST 110.

COMM-ST 323 Concepts of the Hero in Ancient Literature and World Cinema Credits: 3

This course explores how concepts of heroism are related to the principles of values and civic duty in a wide range of ancient world cultures and contemporary world cinemas. Students will also demonstrate an understanding of how these values impact individual heroes and their interactions with others in their society.

COMM-ST 339 Introduction to Film Theory Credits: 3

A survey of the history of theoretical and critical approaches to film theory/philosophy. Students will be introduced to major foundational and contemporary theoretical approaches to cinema that may include but are not limited to formalism, realism, auteurism, psychoanalysis, genre studies, structuralism, feminism, semiotics, cultural studies, post-structuralism, queer theory and digital studies.

COMM-ST 341WI Rhetorical Theory And Criticism Credits: 3

Writing intensive. An analysis of significant public discourse within the context of social protest and political rhetoric with attention to applying methods of communication criticism in evaluating the effectiveness of persuasive advocacy aimed at social change.

COMM-ST 343 Group Dynamics Credits: 3

A study of strategies and communication relationships unique to non-dyadic situations, with an emphasis on the integral structure of leadership, roles, norms and task functions.

COMM-ST 344 Communication In Organizational Settings Credits: 3

An examination of the major elements of interpersonal, group, and oral communication competence essential to human interaction in organizational settings. The course focuses on developing communication competencies and increasing theoretical understanding of the communication process within the organizational context.

COMM-ST 344WI Communication In Organizational Settings Credits: 3

An examination of the major elements of interpersonal, group, and oral communication competence essential to human interaction in organizational settings. The course focuses on developing communication competencies and increasing theoretical understanding.

Prerequisites: COMM-ST 110 or COMM-ST 308.

COMM-ST 345 German Film Credits: 3

This course introduces students to the important contributions of German films to the development of movies as a unique literary art form. The class will cover important terms and concepts in film theory, the specifically German context of film, and important themes and periods in German film history. Taught in English with subtitled films.

COMM-ST 346 Art of the Short Film Credits: 3

Art of the Short Film examines the social, economic and aesthetic histories of narrative, documentary and experimental short form films from the birth of cinema to today.

COMM-ST 347 Topics in Film Genre Credits: 3

A topics course that examines the history and theory of film genres. Repeatable up to six hours when the topic changes.

COMM-ST 348 The Art of the Interview Credits: 3

This course will introduce students to the styles and techniques of conducting professional interviews with the goal of eliciting insightful, thoughtful answers fit for print or broadcast. Students will prepare QA interviews and articles for publication while gaining the confidence needed to work in professional newsrooms or office settings.

COMM-ST 351WI Fundamentals Of Writing For The Media Credits: 3

Analysis of individual differences and common characteristics of copy for eye and ear, with emphasis on the application of both verbal and visual imagery in the process of communicating the writer's ideas and intentions. Weekly written assignments and critical analysis of the student's work.

COMM-ST 353 Covering Urban Latinx Communities Credits: 3

This course focuses on journalistic methods of reporting Latinx communities in urban areas and bringing the voice of the Latinx communities into news stories. It covers topics on immigration, health care, policy, cultural diversity, race, legal issues, and education. Skills taught in this course will prepare students to cover the Latinx communities in urban areas and beyond.

COMM-ST 354 Introduction to Screenwriting Credits: 3

An introduction to the form and language of the motion picture screenplay. Students will learn to create a workable blueprint for a movie and undertake an in-depth examination of visual storytelling. This will include understanding the basics of dramatic structure, scene and sequence construction and the role of dialogue. Emphasis will be placed on students mastering the accepted movie industry format of the screenplay. They will also adapt a short story and revise it after giving and receiving feedback in small groups.

COMM-ST 355WI The New Feature Writing Credits: 3

An intensive practicum in the art of writing feature stories with a special emphasis on shorter stories that will grab reader interest in an era of short-attention spans.

Prerequisites: COMM-ST 203 or ENGLISH 203.

COMM-ST 356 U News Practicum Credits: 3

This course is workshop-based for students producing UMKC's weekly newspaper, U News. It also focuses on contemporary issues in American journalism and engaging with the university community.

Prerequisites: COMM-ST 203 or ENGLISH 203.

COMM-ST 363 Radio Production I Credits: 3

A study of the techniques of producing audio material for use in radio, in concerts, on film, on television and in the recording studio.

COMM-ST 373 Intermediate Media Production Credits: 3

An intermediate-level production course emphasizing hands-on skills in cinematography and lighting, sound, and editing.

Prerequisites: COMM-ST 250.

COMM-ST 376 History Of The Film Industry Credits: 3

A history of the development of the American film industry from 1900 to the end of the studio era. The course will stress such issues as studio production, censorship, the economics of production and the selling of mass culture through the film medium. Term paper required.

COMM-ST 380 Contemporary Media Topics Credits: 3**COMM-ST 381 Narrative Production Credits: 3**

This course covers the creative, technical, and practical aspects of short-form narrative film production.

Prerequisites: COMM-ST 250.

COMM-ST 383 Cross-Cultural Journalism & Mass Media Credits: 3

Cross-Cultural Journalism Mass Media provides journalistic tools for traditional and new media coverage of diverse ethnic, gender, ability and ideological groups inside and outside the United States. The critical role of diverse voices in a democracy will be discussed. Students at UMKC and the Missouri School of Journalism participate in joint lectures transmitted by UMKC and MU instructors from their respective campuses.

COMM-ST 384 Documentary Film History Credits: 3

Documentary Film History is an overview of the history and theory of documentary cinema. The course surveys the documentary tradition with special attention to the relationship between content and style and the issues central to documentary film making, including ethical and legal questions, the relationship between representation and power and the ways in which film speaks to notions of truth and truth telling.

COMM-ST 385 Documentary Production Credits: 3

This course is designed to familiarize students with the basics of documentary production from an artistic, ethical, and practical results-oriented perspective.

Prerequisites: COMM-ST 250.

COMM-ST 386 Animation Credits: 3

This course provides an introduction to animation production techniques and an overview of the history of American animation arts. We will address both stop-motion and computer animation using industry standard software.

Prerequisites: COMM-ST 250.

COMM-ST 387 Strategic Communication Research Credits: 3

This course will examine different research methods and research stages in advertising and public relations, including quantitative and qualitative research methods. Students will learn how to plan, conduct, and evaluate strategic communication research. Students are also expected to develop a greater appreciation for the role that research plays in effective campaigns.

COMM-ST 388 Media Ethics Credits: 3

This course is designed to sensitize the ethical considerations the underlie the conventions and practices of print, broadcast, and internet media. By placing traditional and new media in a wider intellectual context than is generally possible under the daily demands of producing news, information, and entertainment, it seeks to produce a larger sense of media as industry and as a career choice.

COMM-ST 390 Forensic Activities Credits: 1-4

Participation in the intercollegiate forensic program. A practicum in debate, discussion, oratory and other forensic activities.

COMM-ST 392 Topics in World Cinema Credits: 3

A variable topics course focused on the histories and theories of international cinemas. Repeatable up to 6 hours when the topic changes.

COMM-ST 393 Topics in Sound & Cinema Credits: 3

A variable topics course that focuses on the histories and aesthetics of sound in cinema. Repeatable up to 6 hours when the topic changes.

COMM-ST 394 Topics in Gender and Cinema Credits: 3

A course focused on the relationship between popular culture, film history and the construction of gender and sexuality. Repeatable up to 6 hours when the topic changes.

COMM-ST 400 Special Studies Credits: 1-3

(A-N) This is an upper-level course on a subject which is not a part of the regular department offering. The course results from one or more of the following: (1) the expressed desire of students (2) the broadened or refocused scholarship of a member of the communication studies faculty (3) the temporary presence of a scholar whose specialization is not reflected in the department's regular offerings (4) the conclusion by the department that the course meets a community need (5) the effort of the Communication Studies faculty to provide an interdisciplinary approach to an era or topic.

COMM-ST 406CD CC: Film Adaptation Credits: 3

The class will explore the process of adapting both fiction and non-fiction literary works into motion pictures. Students will examine the original literary source, then the interim screenplay and finally the completed motion picture.

COMM-ST 411 Seminar in Film and Media Arts Credit: 1

This course covers special topics and professional practices within Film and Media Arts. Course is repeatable. Required of B.A. in Film and Media Arts majors for every semester enrolled.

Prerequisites: B.A. in Film and Media Arts Major.

COMM-ST 415 Global Journalism: Cultures, Trends, & Conflicts Credits: 3

This course examines media coverage of international issues including the dissemination of news and information throughout the world. The course has both a practical and academic focus. It introduces students to best practices of global journalism and to the enormous challenges of covering world events and issues. Research on global media trends are applied to current reporting methods and include diverse international perspectives. The course assists students who plan to pursue careers in global journalism and allied fields like international non-profit agencies or non-governmental organizations. The course also prepares students to become effective communicators in global communities.

Prerequisites: COMM-ST 314.

COMM-ST 431 Colloquium In Interpersonal Dynamics Credits: 3

An examination of the practical application of communication principles and theories, with focus on one of the following: health, organizational, nonverbal, intrapersonal, conflict management, computer mediated, or intercultural communication.

COMM-ST 432 Press, Politics And Public Policy Credits: 3

An advanced course in the study of the press and political establishments in the formation of public policy.

COMM-ST 439 Egghead: Student Advertising Agency Credits: 3

This course operates as a faculty-supervised advertising/design agency that works with clients to produce visual marketing materials.

Prerequisites: ART 337.

COMM-ST 441 Applications of Interpersonal Communication Theory Credits: 3

This course examines interpersonal communication theory as it pertains to a variety of interpersonal relationships. The course employs class discussions of theory and assignments that apply those theories to real life interactions.

Prerequisites: COMM-ST 277.

COMM-ST 444WI Intercultural Communication Credits: 3

A consideration of communication phenomena in multicultural settings. A study of the public forum with an emphasis on the interpersonal aspects of international, intercultural, and co-cultural communication.

Prerequisites: Junior standing.

COMM-ST 446 Principles Of Advertising Credits: 3

A survey of advertising as an industry and a career field, examining its history and development in America, and its application in mass and special media. Specific procedures are studies for linking the development of advertising strategies, messages and campaigns to the marketing process, and for evaluation and selection of appropriate media to carry the advertising message.

COMM-ST 447 Interactive and Social Media Advertising Credits: 3

This course examines advertising on the Internet as a form of interactive communication, with a special focus on social media and search engines. It addresses basic concepts, current issues, and the development of interactive advertising strategies and plans. The coverage includes interactivity, pricing models, online targeting strategies, search engine optimization and advertising, social media advertising, and online video advertising.

COMM-ST 448 Principles Of Public Relations Credits: 3

An overview, presenting the function, purposes, procedures and practices of public relations, its role in society, industry, government and politics, and its potential as a career field. This is a survey course with primary emphasis on theory, supplemented with applied techniques.

COMM-ST 453 Urban Journalism Practicum Credits: 4

This course engages student journalists to produce stories with an urban focus across radio, online, and television platforms. By practicing convergence journalism, students gain practical story-telling experience for professional news organizations.

Prerequisites: COMM-ST 203 or ENGLISH 203.

COMM-ST 454 Advanced Screenwriting Credits: 3

This course provides students with advanced theory in narrative screenwriting, training in industry standard script analysis (called "coverage") and story editing. Students will be required to draft, revise and workshop a short film screenplay or will focus on a feature screenplay, delivering a draft and revision of the first act and a detailed outline for the rest of the script. Students will workshop feature screenplays in small groups, emphasizing the art of constructive story editing.

Prerequisites: COMM-ST 354.

COMM-ST 456 Electronic Journalism Credits: 3

A practical approach to the practices and principles of broadcasting news media, including preparing copy for microphone and camera, editing wire copy, reporting public affairs and public relations, and an intensive scrutiny of the concepts of freedom and responsibility as they apply to the press and current legislation.

COMM-ST 457 Client-Based Media Production Credits: 3

This course teaches the process of creating media for a professional client. Students will take on specialized crew positions and work together to plan, write, direct, shoot, edit, and distribute a short video for a local non-profit client.

Prerequisites: COMM-ST 250.

COMM-ST 466 Advanced Electronic Journalism Credits: 3

An advanced study of television and Internet news gathering, field production and performance for electronic media.

Prerequisites: COMM-ST 456.

COMM-ST 471 Advanced Media Production Credits: 3

An advanced course in media production techniques focused on the creation of a significant individual media work and professional development.

Prerequisites: COMM-ST 373.

COMM-ST 473 Directing Actors and Scenes Credits: 3

This intensive workshop class seeks to deepen the student director's understanding of the acting process and provide ways of clearly and creatively communicating with actors. The course will deepen students' understanding of blocking scenes and designing camera coverage. It will explore the role of the director as a guiding creative force in the making of a film through collaboration and provide techniques for scene analysis and preparation. Students will cast, rehearse and present a live performance for their final project and design appropriate camera coverage.

Prerequisites: COMM-ST 250.

COMM-ST 483 Research Seminar In Communication Studies Credits: 3

This is the departmental capstone course and is required for majors in their last semester of their senior year. The course summarizes and extends student's theoretical and applied understanding of the role of communication competence in the work place and beyond. The course also focuses on refining student's research competencies and their appreciation of the cultural role of modern communication methods.

Prerequisites: Senior standing.

COMM-ST 484 Communication Studies Activities Credits: 1-4

Internships opportunities for advanced students involved in community and campus activities. Student must receive approval of advising professor in semester prior to enrollment. No more than four hours with any one project.

COMM-ST 492 Advertising Campaigns Credits: 3

The course content focuses on branding, re-branding or development of an identity program, and combines advertising planning with creative execution. Students will learn how to develop advertising/marketing/creative campaign plans for a specific client(s), conceptualize, design and develop all creative aspects including but not limited to logo/identity, copy, advertising, website development, app design, etc., and complete a presentation of the plans/briefs and final creative developments of the plans/briefs and creative to the client(s).

Prerequisites: Sophomore standing.

COMM-ST 498 Special Problems In Communication Studies Credits: 1-3

Research and/or projects for advanced upper class students. Student must receive approval of advising professor in semester prior to enrollment. No more than three hours with any one instructor.

Computer Science (COMP-SCI)

Courses

COMP-SCI 100 Computer Fundamentals and Applications Credits: 3

The course covers essential computer concepts and skills. The emphasis is on using the computer as a tool to enhance productivity. Topics include basic computer concepts such as what to look for when buying a computer and how to avoid hackers and viruses when operating one. Students will also learn how to create word processing, spreadsheet, database, and presentation documents using the Microsoft Office suite of applications. The course prepares students to succeed in both college and business by enabling them to write reports, analyze and chart data, prepare presentations and organize large data sets.

Prerequisites: MATH 110 (or higher) or ALEKS score of 51 (or higher); or ACT Math sub-score of 28 or higher; or SAT Math sub-score of 660 or higher.

COMP-SCI 101 Problem Solving and Programming I Credits: 3

Problem solving, algorithms, and program design. Use of structured programming, lists, control structures, recursion, objects and files in Python. Introduction to graphical interface programming. Coding, testing and debugging using a modern development environment.

Prerequisites: MATH 110 or MATH 120 (or higher) or ALEKS score of 51 (or higher); ACT Math sub-score of 28 or higher; or SAT Math sub-score of 660 or higher.

Co-requisites: COMP-SCI 101L.

COMP-SCI 101L Problem Solving & Programming I Lab Credit: 1

Programming exercises and demonstrations to reinforce concepts learned in COMP-SCI 101 and provide additional practice in Python programming.

Prerequisites: MATH 110 or MATH 120 (or higher); ACT Math sub-score of 28 or higher; or SAT Math sub-score of 660 or higher.

Co-requisites: COMP-SCI 101.

COMP-SCI 191 Discrete Structures I Credits: 3

Mathematical logic, sets, relations, functions, mathematical induction, algebraic structures with emphasis on computing applications.

Prerequisites: MATH 110 or MATH 120 (or higher) or ALEKS score of 51 (or higher); or ACT Math sub-score of 28 or higher; or SAT Math sub-score of 660 or higher.

COMP-SCI 201L Problem Solving and Programming II - Lab Credit: 1

Programming exercises and demonstrations to reinforce concepts learned in COMP-SCI 201R and provide additional practice in C++ programming.

Prerequisites: COMP-SCI 101.

Co-requisites: COMP-SCI 191 and COMP-SCI 201R.

COMP-SCI 201R Problem Solving and Programming II Credits: 3

Problem solving and programming using classes and objects. Algorithm efficiency, abstract data types, searching and sorting, templates, pointers, linked lists, stacks and queues implemented in C++.

Prerequisites: COMP-SCI 101.

Co-requisites: COMP-SCI 191 and COMP-SCI 201L.

COMP-SCI 281R Introduction to Computer Architecture and Organization Credits: 3

Digital Logic and Data Representation, process architecture and instruction sequencing, memory hierarchy and bus-interfaces and functional organization.

Prerequisites: COMP-SCI 101, COMP-SCI 191.

COMP-SCI 291 Discrete Structures II Credits: 3

Recurrence relations and their use in the analysis of algorithms. Graphs, trees, and network flow models. Introduction to Finite state machines, grammars, and automata.

Prerequisites: COMP-SCI 191.

COMP-SCI 303 Data Structures Credits: 3

Linear and hierarchical data structures, including stacks, queues, lists, trees, priority queues, advanced tree structures, hashing tables, dictionaries and disjoint-set. Abstractions and strategies for efficient implementations will be discussed. Linear and hierarchical algorithms will be studied as well as recursion and various searching and sorting algorithms. Programming concepts include Object Orientation, concurrency and parallel programming. Several in-depth projects in C++ will be required.

Prerequisites: COMP-SCI 191, COMP-SCI 201R, and COMP-SCI 201L.

COMP-SCI 304WI Ethics and Professionalism Credits: 3

Societal and ethical obligations of computer science, information technology, and electrical/computer engineering practice. Topics include obligations of professional practice, electronic privacy, intellectual property, ethical issues in networking, computer security, computer reliability, and whistle-blowing.

Prerequisites: Departmental consent.

COMP-SCI 371 Database Design, Implementation and Validation Credits: 3

This course discusses in detail all aspects of database management systems. It covers in detail database design, implementation, and validation. In addition to these, it briefly covers implementation, tuning, database security, and implementation. The course is suitable for undergraduates and professionals alike.

Prerequisites: COMP-SCI 303.

COMP-SCI 394R Applied Probability Credits: 3

Basic concepts of probability theory. Counting and measuring. Probability, conditional probability and independence. Discrete, continuous, joint random variables. Functions of random variables. Sums of independent random variables and transform methods. Random number generation and random event generation. Law of large numbers, central limit theorem, inequalities. Their applications to computer science and electrical and computer engineering areas are stressed.

Prerequisites: COMP-SCI 201R and COMP-SCI 201L (or E&C-ENGR 216), MATH 220, and STAT 235 (or E&C-ENGR 241).

COMP-SCI 404 Introduction to Algorithms and Complexity Credits: 3

A rigorous review of asymptotic analysis techniques and algorithms: from design strategy (such as greedy, divide-and-conquer, and dynamic programming) to problem areas (such as searching, sorting, shortest path, spanning trees, transitive closures, and other graph algorithms, string algorithms) arriving at classical algorithms with supporting data structures for efficient implementation. Throughout, the asymptotic complexity is studied in worst case, best case, and average case for time and/or space, using appropriate analysis techniques (recurrence relations, amortization). Introduction to the basic concepts of complexity theory and NP-complete theory.

Prerequisites: COMP-SCI 291 and COMP-SCI 303.

COMP-SCI 420 Introductory Networking and Applications Credits: 3

This introductory course examines the systems aspects of the different LAN/MAN/WAN models, including topics such as protocols, network operating systems, applications, management and wireless communication systems. It also examines how the different models are interconnected using bridges and routers.

Prerequisites: COMP-SCI 303.

COMP-SCI 421A Foundations of Data Networks Credits: 3

This introductory course examines the analytical aspects of data communications and computer networking. Topics cover protocol concepts and performance analysis that arise in physical, data link layer, MAC sub layer, and network layer.

Prerequisites: COMP-SCI 291, COMP-SCI 303, COMP-SCI 394R.

COMP-SCI 423 Client/Server Programming and Applications Credits: 3

Fundamentals of Client/Server programming using socket interface; features of network programming including connection oriented and connectionless communication in multiple environments (Windows, UNIX, and Java); other client/server mechanisms, such as RPC and RMI) and formal object environments designed to facilitate network programming (CORBA, COM and Beans).

Prerequisites: COMP-SCI 303, COMP-SCI 431.

COMP-SCI 424 Software Methods and Tools Credits: 3

This course covers a number of software methods and tools that are widely used in industry. These methods include architecture patterns and styles, software frameworks, unit testing, and version control. The covered software tools include Microsoft Project, IBM Rational Systems Modeler, Eclipse Plug-ins, JUnit, Subversion, and GIT. The course emphasizes practice. Students will use these methods and tools to develop a software system from the initial planning to final deployment.

COMP-SCI 431 Introduction to Operating Systems Credits: 3

This course covers concurrency and control of asynchronous processes, deadlocks, memory management, processor and disk scheduling, x86 assembly language, parallel processing, security, protection, and file system organization in operating systems.

Prerequisites: COMP-SCI 303, COMP-SCI 281R.

COMP-SCI 441 Programming Languages: Design and Implementation Credits: 3

This course covers programming language paradigms (object-oriented programming, functional programming, declarative programming, and scripting) and design tradeoffs in terms of binding, visibility, scope, lifetime, type-checking, concurrency/parallelism, and abstraction. It also covers programming language specification, grammar, lexical analysis, exception handling, and runtime considerations.

Prerequisites: COMP-SCI 303.

COMP-SCI 449 Foundations of Software Engineering Credits: 3

The course introduces concepts of software engineering (e.g. definitions, context) and the software development process (i.e. life cycle). Students will get a solid foundation in agile methodology, software requirements, exceptions and assertions, verification and validation, software models and modeling, and user Interface design. Various software architectures will be discussed.

Prerequisites: COMP-SCI 303.

COMP-SCI 451R Software Engineering Capstone Credits: 3

The course will focus on the requirements and project planning and managing of medium sized projects with deliverables of each phase of the software life cycle. Additional studies of system integration and architecture, software modeling, requirements specifications, configuration management, verification, validation, software evolution and quality and finally measurement, estimation and economics of the software process.

Prerequisites: COMP-SCI 303, COMP-SCI 449.

COMP-SCI 456 Human Computer Interface Credits: 3

Design of human-computer interfaces considering the psychological and physical abilities of the user. User interface design from a functional and ergonomic perspective. Contents organization, visual organization, navigation. Use of graphical user interface (GUI) and the development of high quality user interfaces.

Prerequisites: COMP-SCI 449.

COMP-SCI 457 Software Architecture: Requirements & Design Credits: 3

Introduction to requirements and design engineering with emphasis on organization and presentation of system requirements and designs for customers, users and engineers; validation of requirements and design with needs of system customer; examination of requirement and design changes during the lifetime of a system; transformation of informal ideas into formal detailed descriptions; examination of the different stages in the design process including architectural design, interface design and data structure design, database design, program and transaction design; examination of domain modeling criteria and examination of design quality attributes; non-functional attributes and project resource allocation.

Prerequisites: COMP-SCI 303.

COMP-SCI 458 Software Testing and Verification Credits: 3

Introduction to principles and techniques of software testing and verification for quality assurance in software development processes.

Prerequisites: COMP-SCI 303.

COMP-SCI 461 Introduction to Artificial Intelligence Credits: 3

This course provides an overview of the field of artificial intelligence. Topics include guided and unguided search, adversarial search, generation and use of heuristics, logic programming, probabilistic reasoning, and neural networks. Application areas studied include game playing, automated proofs, expert systems, and data mining. Recommended preparation: One or more of COMP-SCI 394R, COMP-SCI 404, or an advanced programming elective.

Prerequisites: COMP-SCI 303.

COMP-SCI 465R Introduction to Statistical Learning Credits: 3

This course provides a practical introduction to analytical techniques used in data science and prepares students for advanced courses in machine learning. Topics covered include multivariate distributions, information theory, linear algebra (eigenanalysis), supervised/unsupervised learning, classification/regression, linear/non-linear learning, introduction to Bayesian learning (Bayes rule, prior, posterior, likelihood), parametric/non-parametric estimation.

Prerequisites: COMP-SCI 394R.

COMP-SCI 470 Introduction to Database Management Systems Credits: 3

This course covers database architecture, data independence, schema, Entity-Relationship (ER) and relational database modeling, relational algebra and calculus, SQL, file organization, relational database design, physical database organization, query processing and optimization, transaction structure and execution, concurrency control mechanisms, database recovery, and database security.

Prerequisites: COMP-SCI 303.

Co-requisites: COMP-SCI 431.

COMP-SCI 479 Introduction to Computer Vision Credits: 3

Image is an essential form of information representation and communication in modern society. This course focuses on topics of computer vision, teaching computers how to understand images. Introductory topics include image formation, color and texture features, homograph, key points detection, aggregation, subspace methods in image modeling, and deep learning based image segmentation and classification, with applications in photography, media and entertainment, education, defense and medicine. The course is project based and emphasis hands on experiences for students to solve real world problems.

Prerequisites: E&C-ENGR 484.

COMP-SCI 490 Special Topics Credits: 3

Selected topics in specific areas of computer science. May be repeated for credit when the topic varies.

Prerequisites: Junior standing.

COMP-SCI 490CR Special Topics Credits: 1-3

Special topics in Computer Science.

COMP-SCI 490R Special Topics Credits: 1-3

Selected topics in specific areas of computer science. May be repeated for credit when the topic varies.

COMP-SCI 491 Internship Credits: 6

Students may participate in structured internships under the joint supervision of an employer and a faculty member. The student must carry out significant professional responsibilities that also have academic merit. The number of credit hours is based on the quality of the academic experience. Available for credit/no credit only and students must be in good standing with at least 18 credit hours of CS/IT counting towards the degree.

Registration by consent number only: petition forms for CS/IT491 Internships are available in the office of CSEE Division and on the web.

Prerequisites: Junior standing, Departmental consent.

COMP-SCI 497 Directed Readings Credits: 1-3

Readings in an area selected by an undergraduate student in consultation with a faculty member. Arrangements must be made prior to registration.

Prerequisites: Departmental consent.

COMP-SCI 498 Research Seminar Credits: 1-3

Undergraduate research based on intensive readings from the current research literature under the direction of a faculty member. Arrangements must be made prior to registration.

Prerequisites: Departmental consent.

COMP-SCI 499 Undergraduate Research Credits: 1-3

Completion of project, including a final written report, under the direction of a faculty member. A prospectus must be accepted prior to registration.

Prerequisites: Departmental consent.

Conservatory (CONSVTY)

Courses

CONSVTY 101C Voice Class I Credits: 2

A course in the fundamentals of correct voice productions; breathing, breath control, study of vowel forms and consonants. Elementary songs. Poise, posture, and stage presence. This course covers two points of view: development of the student's own voice and the pedagogy of voice-class instruction. A voice audition is required before registration.

CONSVTY 103 Fundamentals of Music Theory for Musicians Credits: 2

An introduction to the rudiments of music theory and aural skills. Designed primarily as a review course for Conservatory students. Non-music majors who desire an accelerated theory fundamentals class may also enroll in this course with the approval of the instructor.

CONSVTY 103 - MOTR MUSC 101: Music Fundamentals

CONSVTY 103N Fundamentals of Music Credits: 3

An introduction to the basic elements of music and music notation, including the study of melody, rhythm, scales and keys, triads, 7th chords, the piano keyboard and the musical staff. Designed primarily for those interested in learning about music but with little or no formal study of music theory.

CONSVTY 104 Jazz Improvisation I Credits: 2

A systematic approach to the art of jazz improvisation. Emphasis upon performance as well as analysis.

CONSVTY 108 Beginning Piano for Non-Music Majors Credits: 2

A class for non-music majors to acquire basic piano skills. Popular arrangements and group techniques designed to encourage students to play the piano for pleasure.

CONSVTY 110 Keyboard Skills I Credit: 1

Group instruction focused on developing basic keyboard skills in sight-reading, transposition, harmonization, accompanying, improvisation, technique, and repertoire. Music theory concepts will be reinforced through keyboard applications.

CONSVTY 111 Introduction to Collaboration for Pianists I Credit: 1

Introductory study of collaborative techniques and vocal and instrumental literature with piano collaboration, for piano students. The class is designed to introduce students to basic principles of collaborative piano playing.

CONSVTY 112 Introduction to Collaboration for Pianists II Credit: 1

Continuing study of basic collaborative techniques and vocal and instrumental literature with piano collaboration for piano students. The class is designed to develop basic principles of collaborative piano playing for piano students. Continuation of Introduction to Collaboration for Pianists I.

Prerequisites: CONSVTY 111.

CONSVTY 114 Keyboard Skills I for Piano Majors Credit: 1

Techniques of sight reading, transposition, improvisation and open-score reading.

CONSVTY 115 Keyboard Skills II for Piano Majors Credit: 1

Continuation of CONSVTY 114.

CONSVTY 118 Electronica Credits: 3

An overview of the vast body of music that falls under the label "electronica". Course consists of a historical survey as students acquire language to talk about music, learn how technology informs the creation of the music, and summarize musical trends and cultural influences on the music. Final project is the creation of a piece of electronica using a musical app on a mobile device or a computer.

CONSVTY 120 Music Appreciation Credits: 3

Designed for the general University student with little or no music background (non-music majors) and required for Dance Majors. An emphasis on the basic elements of music and the historical and stylistic periods, illustrated by examples from different genre, such as instrumental and vocal ensembles, large and small, solo literature for voice and instruments, and dance. Three class sessions a week with frequent live performance and guest speakers.

CONSVTY 120 - MOTR MUSC 100: Music Appreciation

CONSVTY 120N Music Appreciation Credits: 3

A distance learning class designed for the general University student with little or no music background (non-music majors). Video lectures, interviews, performances, and discussion threads, are all delivered online. Course emphasizes historical and stylistic periods, genres, and music listening. Interviews with guest professors and performances of Conservatory faculty and students are included. Students may access the course at any time of the day or night, but exams must be taken on campus unless otherwise arranged.

CONSVTY 123 Keyboard Skills II Credit: 1

Continued group instruction focused on developing basic keyboard skills in sight-reading, transposition, harmonization, accompanying, improvisation, technique, and repertoire. Music theory concepts will be reinforced through keyboard applications. Recommended preparation: CONSVTY 110.

CONSVTY 125 History and Development of Rock and Roll Credits: 3

Designed for students with little or no music background, the course is an exploration of American popular music from early Rhythm and Blues and Country Western through Woodstock. Examines in detail the social/racial issues most important to the music and the cultural history of twentieth-century America. The course features online video lectures and numerous interviews with professors and scholars from other disciplines, presenting a perspective of the influence of this music on nearly every area of American life. Students are required to participate in online discussion groups as part of the class. Music majors may enroll for music elective credit.

CONSVTY 125 - MOTR MUSC 100RP. Music Appreciation-Rock/Pop**CONSVTY 126 Introduction to World Music Credits: 3**

Introduction to World Music provides tools and paths for you to see the world differently and to enhance diversity by exploring musical traditions from around the world, many of which exist in Kansas City. Through lectures, videos, and live performances, Introduction to World Music will provide insight into the musical cultures of Africa, North America, the Caribbean, India, East Asia, Korea and Latin America and transform your view of our rapidly changing society. Open to all students.

CONSVTY 126 - MOTR MUSC 102: World Music**CONSVTY 133 Beginning Composition I Credits: 3**

Introduction to the compositional process, including notation, calligraphy and score preparation, styles and forms, and related topics. A weekly one-hour lab is required.

CONSVTY 133A Beginning Composition I for Non-Composition Majors Credits: 2

An introductory course in music composition, with exercises in instrumentation, notation, orchestration, form, melodic construction, harmony, counterpoint, and rhythm. Discussion and analysis of current works, trends and techniques in music composition. Final project is an original composition. A weekly one-hour lab is required.

CONSVTY 133B Beginning Composition I for Prospective Composition Majors Credits: 3

A class for students wishing to work toward major status in the music composition program. Exercises and projects as in 133A, with an extra hour per-week of in-depth, guided exercises and portfolio development. A weekly one-hour lab is required.

CONSVTY 134 Beginning Composition II Credits: 3

Continuation of CONSVTY 133.

Prerequisites: CONSVTY 133.

CONSVTY 134A Beginning Composition for Non-Composition Majors II Credits: 2

A weekly one-hour lab is required.

Prerequisites: CONSVTY 133A (with a grade of C or better).

CONSVTY 134B Beginning Composition for Prospective Composition Majors II Credits: 3

Continuation of CONSVTY 133B. Exercises and projects as in CONSVTY 134A, with an extra hour per-week of in-depth, guided exercises and portfolio development. A weekly one-hour lab is required.

Prerequisites: CONSVTY 133B (with a grade of C or better).

CONSVTY 138 Music Therapy Foundations Credits: 2

This course provides students with foundational information pertaining to the music therapy profession. Course topics include the history of music therapy, populations that music therapists serve, and an introduction to the use of music in therapeutic settings.

CONSVTY 141 Musicianship I Credits: 4

Musicianship I focuses on diatonic harmony through an integration of theory and aural skills. It covers a music fundamentals review, principles of chord construction, four-part writing and harmonic syntax, as well as the application of concepts in analytical assignments and projects, dictation, and singing. Particular attention is given to the development of critical writing skills and the creation of stylistic compositions.

Prerequisites: CONSVTY 103 (with a C or higher) or entrance by placement exam.

Co-requisites: CONSVTY 110.

CONSVTY 142 Musicianship II Credits: 4

Continuation of CONSVTY 141 with attention to phrase structure, small forms, and an introduction to chromaticism including such topics as applied chords, simple modulation, and modal mixture. Particular attention is given to the development of critical writing skills and the creation of stylistic compositions.

Prerequisites: CONSVTY 141 (with a grade of C or better).

Co-requisites: CONSVTY 123.

CONSVTY 185B Foreign Language For Singing II Credits: 2

A course for Italian diction. Emphasis is placed on sung rather than conversational pronunciation. Required for BM voice.

CONSVTY 185C Foreign Language For Singing III Credits: 2

A course for German diction. Emphasis is placed on sung rather than conversational pronunciation. Required for BM voice.

CONSVTY 185D Foreign Language For Singing IV Credits: 2

A course for French diction. Emphasis is placed on sung rather than conversational pronunciation. Required for BM voice.

CONSVTY 202 Basic Techniques of Audio Recording I Credits: 3

A study of the philosophy, history, and development of audio recording. Practical application of recording techniques and development of recording skills.

CONSVTY 203 Basic Techniques of Audio Recording II Credits: 3

Continuation of study of recording techniques and development of recording skills.

Prerequisites: CONSVTY 202 (with a grade of C or better).

CONSVTY 204 Jazz Improvisation II Credits: 2

Prerequisites: CONSVTY 104 (with a grade of C or better).

CONSVTY 210A Clinical Experience: I Credit: 1

Clinical Experience I.

CONSVTY 210B Clinical Experience: II Credit: 1

Primarily assists the site coordinator with some leadership responsibilities.

CONSVTY 210C Clinical Experience: III Credit: 1

Equal assisting and leading responsibilities on-site

CONSVTY 210D Clinical Experience: IV Credit: 1

Some assisting and primarily leading responsibilities on-site.

CONSVTY 210E Clinical Experience: V Credit: 1

Clinical Experience V.

CONSVTY 210F Clinical Experience VI Credit: 1

Clinical Experience VI.

CONSVTY 223 Keyboard Skills III Credit: 1

Group instruction focused on developing intermediate keyboard skills in sight-reading, transposition, harmonization, accompanying, improvisation, technique, and repertoire. Music theory concepts will be reinforced through keyboard applications. Recommended preparation: CONSVTY 123.

CONSVTY 233 Intermediate Composition I Credits: 3

Continuation of CONSVTY 134. A weekly one-hour lab is required.

Prerequisites: CONSVTY 134.

CONSVTY 233A Intermediate Composition for Non-Composition Majors I Credits: 2

Continuation of CONSVTY 134A. A weekly one-hour lab is required.

Prerequisites: CONSVTY 134A.

CONSVTY 234 Intermediate Composition II Credits: 3

Continuation of CONSVTY 233.

Prerequisites: CONSVTY 233 (with a grade of C or better).

CONSVTY 234A Intermediate Composition for Non-Composition Majors II Credits: 2

Continuation of CONSVTY 233A. A weekly one-hour lab is required.

Prerequisites: CONSVTY 233A.

CONSVTY 235 Digital Media for Composing Credits: 3

This course is designed to give students a thorough grasp of studio hardware and software used in composing with digital audio and other media. Topics include digital audio, mixing, MIDI, and synthesis techniques, as well as working with other contemporary media such as video. In addition to three 50-minute lecture/demo sessions per week, 3-5 hours minimum of in-studio work time is expected. Open to anyone regardless of musical training.

CONSVTY 236 Music Performance Systems Credits: 3

Course builds upon studio techniques gained in Digital Media for Composing to conceptualizing and practicing the computer as an instrument. Students will be exposed to a variety of live performance systems which could include Ableton Live, MAX, PD, and other languages based on the expertise of the instructor. The outcome of the class is for students to perform a concert with the computer and/or other technology as their instrument. In addition to three 50-minute lecture/demo sessions per week, 3-5 hours minimum of in-studio time is expected. Open to anyone regardless of musical training.

Prerequisites: CONSVTY 235.

CONSVTY 238 Woodwind Techniques and Pedagogy Credit: 1

This course will discuss the fundamentals of playing and teaching woodwind instruments in an authentic setting. In order to achieve this, students are required to develop some performance ability as well as teaching techniques and strategies for each particular woodwind instrument. Basic principles, such as embouchure formation and development, fingerings, transposition, intonation, teaching materials, and teaching techniques will be covered. Flute, Clarinet, Saxophone, Oboe and Bassoon will be discussed during this course.

CONSVTY 239 Brass Techniques and Pedagogy Credit: 1

This course will discuss the fundamentals of playing and teaching brass instruments in an authentic setting. In order to achieve this, students are required to develop some performance ability as well as teaching techniques and strategies for each particular brass instrument. Basic principles, such as embouchure formation and development, fingerings, transposition, intonation, teaching materials, and teaching techniques, will be covered. Trumpet, French Horn, Trombone, Baritone, and Tuba will be discussed during the course.

CONSVTY 241 Musicianship III Credits: 4

Continuation of CONSVTY 142. Study of harmonic structures such as Neapolitan and augmented sixth chords, chromatic modulation, and symmetry. Detailed examination of larger forms and genres such as sonata, rondo, art song, and fugue. Particular attention is given to the development of critical writing skills and the creation of stylistic compositions.

Prerequisites: CONSVTY 142 (with a grade of C or better).

CONSVTY 242 Musicianship IV Credits: 4

Study of late-nineteenth century chromaticism and analytical and compositional methods of twentieth and twenty-first century music, including set theory and twelve-tone theory. Particular attention is given to the development of critical writing skills and the creation of stylistic compositions.

Prerequisites: CONSVTY 241 (with a grade of C or better).

CONSVTY 270 Marching Band & Jazz Ensemble Techniques Credit: 1

This course is designed to prepare pre-service teachers with pedagogical and organizational techniques for marching band and jazz ensembles in the schools. The course will include developing practical rehearsal techniques for teaching body manipulation in space, designing and evaluating marching band field design and maneuvers, jazz ensemble pedagogy, jazz improvisation pedagogy, and the use of appropriate materials. A field experience component will further student interaction with an active band program that will allow continued examination and development of a philosophy on the role of marching band and jazz ensembles within the school curriculum.

CONSVTY 278 Music Teaching Matters: A Professional Beginning Credits: 3

A Professional Beginning allows students to explore the professional world of teaching music. Students will begin the process of thinking and acting as professional music educators using readings, discussions, presentations, field experiences, interviews, reflections, and opportunities to practice the skill of teaching.

Prerequisites: CONSVTY 123 and CONSVTY 142.

CONSVTY 285 Elementary Music Methods Credits: 3

Laboratory course for classroom teachers in which principles of instructional design will be applied to music teaching. Students who have extensive music background may elect CONSVTY 385 in place of CONSVTY 285.

CONSVTY 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

CONSVTY 301B Men's Chorus Credit: 1**CONSVTY 301C Bella Voce Credit: 1****CONSVTY 301E Opera Theater Ensemble Credits: 0**

An introduction to opera performance techniques for opera chorus/ensemble. Major literature for opera choruses may also be surveyed. Course participants are required to perform in the chorus of a UMKC Opera production. This course can be taken at any time during the BM Voice Performance student's degree, and will count towards the requirement of 2 semesters of performing in a UMKC opera production.

Prerequisites: Vocal Audition.

CONSVTY 301F Opera Production Credits: 0

An introduction to the non-performance, production-related aspects of Opera. Students will assume various production responsibilities in a UMKC Opera. Students will be overseen by Opera and Theatre faculty and receive instruction related to the student's designated production responsibility. This course requirement can be fulfilled at any time during the BM - Voice Performance degree, but not in the same semester the student registers for CONSVTY 301E (Opera Theatre Ensemble) and/or CONSVTY 319 (Opera Role).

CONSVTY 301G Ensemble for Composers Credit: 1

Observation, score analysis, non-performance participating during a semester's rehearsals and performance by a participating Conservatory ensemble. Students a.) keep journals that are periodically reviewed and graded by the composition faculty, and b.) meet with composition faculty periodically to review and discuss issues raised in the ensemble settings.

Prerequisites: CONSVTY 234 (with a grade of C or better).

CONSVTY 301H Musica Nova Credit: 1**CONSVTY 302 Orchestra Credit: 1**

Required of all qualified music majors and open to all interested students by audition.

CONSVTY 303B Jazz Band Credit: 1

The Jazz Band comprises saxophone, trombone, trumpets and rhythm section students and performs traditional, modern, and original music. The ensemble is open to all UMKC students by audition.

CONSVTY 303C Percussion Ensemble Credit: 1**CONSVTY 303E Jazz Workshop Credit: 1**

Jazz Workshop

CONSVTY 303G Jazz Orchestra Credit: 1

The Jazz Orchestra comprises saxophone, trombone, trumpets and rhythm section students of the highest level in the Conservatory and performs repertoire of the highest caliber available. The curriculum is well balanced between traditional, modern, and original music and requires advanced musical and technical facility amongst its members. The class is open to all UMKC students by audition.

CONSVTY 303J Large Ensemble Rhythm Section Workshop Credits: 2

This weekly private lesson includes the study of advanced concepts used to compose spontaneously. Includes the analyses of harmonic progressions, applications of scales and rhythmic interpretation.

CONSVTY 303K Piano Accompanying Credit: 1

This course is designed to improve undergraduate piano students' collaborative piano skills through intensive coaching. The class will investigate the historical/stylistic context of each work covered, as well as issues common to the musical genre, instrument type, or time period of each assigned piece. Issues inherent to collaborative piano playing will be explored, including score preparation, pedaling, voicing, balance, practice and rehearsal techniques, orchestral reductions, ensemble skills, and professional issues.

Prerequisites: CONSVTY 112.

CONSVTY 303MP Improvisational Music/Media Performance Ensemble Credits: 2

IMP Ensemble explores improvisation in the broadest definition, where listening and responding become a way of real-time creation. IMP is a think-tank of people willing to risk and fail quickly, so a show can go on, using any new individual media to explore the boundaries of the medium and improvisation. No particular instrumental skill is needed, only an open mind. Non Conservatory students by instructor approval.

CONSVTY 304 Jazz Improvisation III Credits: 2

Jazz Improvisation III.

Prerequisites: CONSVTY 204 (with a grade of C or better).

CONSVTY 305A Principles Of Chamber Music Credit: 1

Collaborative music-making in groups of like-instruments (piano ensembles, flute quartets, sax quartets, etc., plus beginning experiences in string quartets, woodwind and brass quintets, etc.). Weekly coaching.

CONSVTY 305E Principles Of Chamber Music Credit: 1

Collaborative music-making in groups of like-instruments (piano ensembles, flute quartets, sax quartets, etc., plus beginning experiences in string quartets, woodwind and brass quintets, etc.). Weekly coaching.

CONSVTY 305H Chamber Orchestra Credit: 1**CONSVTY 305J Chamber Music Guitar Credit: 1****CONSVTY 306A Conservatory Wind Ensemble Credit: 1**

A select concert band ensemble, modeled on Frederick Fennell's Eastman Wind Ensemble concept, designed for high-level, artistic, public performances of major literature for winds and percussion. Membership in the Wind Ensemble is open to any student who qualifies through audition.

CONSVTY 306C Wind Symphony Credit: 1

The Wind Symphony comprises wind, brass and percussion students of the highest level in the Conservatory and performs repertoire of the highest caliber available to the medium. The curriculum is well balanced between traditional, modern, and chamber music and requires advanced musical and technical facility amongst its members. The class is open to all UMKC students by audition.

CONSVTY 307A Canticum Novum Credit: 1

CONSVTY 307A - MOTR PERF 102C: Music Performance-Choir

CONSVTY 307B University Singers Credit: 1

Mixed chorus specializing in choral-orchestral literature. May be repeated for credit. Open by audition to University students, regardless of major.

CONSVTY 307B - MOTR PERF 102C: Music Performance-Choir

CONSVTY 307C Conservatory Singers Credit: 1

CONSVTY 307C - MOTR PERF 102C: Music Performance-Choir

CONSVTY 308A Conservatory Concert Choir Credit: 1

CONSVTY 309 Audio Recording III Credits: 3

Continuation of study of recording techniques and music production skills.

Prerequisites: CONSVTY 203 (with a grade of C or better).

CONSVTY 310 Keyboard Skills IV Credit: 1

Group instruction focused on developing intermediate keyboard skills in sight-reading, transposition, harmonization, accompanying, improvisation, technique, and repertoire. Music theory concepts will be reinforced through keyboard applications. The Piano Proficiency Exam is administered as part of this course.

Prerequisites: CONSVTY 223 (with a grade of C or better).

CONSVTY 311 Jazz Theory Credits: 2

The basics of written jazz harmony and its nomenclature will be addressed. Topics covered will include chords, harmonic progressions, reharmonization, voice leading, dissonance, melody, transcription, analysis and the study of form(s). Notation will be addressed throughout. Students will acquire the fundamentals to pursue jazz improvisation, arranging and composition on a more informed level.

CONSVTY 315 Music Therapy Piano Techniques Credits: 2

Course covers techniques of leading piano stylists from early ragtime to the present. Includes listening, analysis, arranging, and performing. A piano proficiency exam is required.

CONSVTY 316 Music Therapy Guitar Techniques Credits: 2

Course covers techniques of leading guitar styles from the 1920's to present. Includes listening, analysis, transcription, and performing.

Prerequisites: CONSVTY 373G (with a grade of C or better).

CONSVTY 317 Music Therapy Ensemble and Improvisation Techniques Credits: 3

Playing and Improvising in free form and from a variety of popular genres from Swing to the present day.

Prerequisites: CONSVTY 316 (with a grade of C or better).

CONSVTY 318 Jazz Ear Training and Listening Credits: 2

This course offers the student basic fundamental techniques needed to improve aural perceptions in both the translation of hearing into writing and the performance of reading into singing and playing in the jazz idiom. Introduction and practice in singing, aural recognition and writing of intervals and short, simple melodies. Also including rhythm, memory and improvisational drills.

Prerequisites: CONSVTY 329 (with a grade of C or better).

CONSVTY 319 Opera Role Performance Credit: 1

Preparation, rehearsal and performance of a role in an opera production at UMKC. This course may count toward the 2 semester opera performance requirement for the BM in Vocal Performance degree. Credit for non-performing duties such as assistant directing or assistant stage managing may be available with approval of the Vocal Studies faculty and the current Stage Director.

Prerequisites: Vocal Audition.

CONSVTY 325 Piano Pedagogy I Credits: 2

Instructional strategies for teaching the beginning piano student including methods, materials, repertoire, technique and the use of music technology. Various aspects of establishing and managing a piano studio will also be addressed.

CONSVTY 325A Piano Pedagogy - Supervised Teaching I Credit: 1

Supervised practicum designed to demonstrate lesson planning and activities for beginning students through the observation of experienced teachers and various supervised teaching experiences.

CONSVTY 326 Piano Pedagogy II Credits: 2

Instructional strategies for teaching the intermediate and advanced piano student, including methods, materials, repertoire, technique, and the use of music technology.

Prerequisites: CONSVTY 325 (with a grade of C or better).

CONSVTY 326A Piano Pedagogy - Supervised Teaching II Credit: 1

Supervised practicum designed to demonstrate lesson planning and activities for students of various levels through observation of experienced teachers and various supervised teaching experiences.

Prerequisites: CONSVTY 325A (with a grade of C or better).

Co-requisites: CONSVTY 326.

CONSVTY 329 Advanced Ear Training Credits: 2

Study of atonal and highly chromatic tonal aural problems, complex rhythms, and recognition of instruments. May be repeated for credit.

Prerequisites: CONSVTY 242 (with a grade of C or better).

CONSVTY 331 Instrumentation Credits: 2

An introduction to the instruments of the symphony orchestra and rudiments of scoring. Classification of instruments and learning to write for all Western transposing instruments.

Prerequisites: CONSVTY 242.

CONSVTY 331A Orchestration I Credits: 3

An introduction to the instruments of the symphony orchestra and rudiments of scoring. Meets concurrently with CONSVTY 331; the third credit hour is required for music composition and music theory majors.

Prerequisites: CONSVTY 242 (with a grade of C or better).

CONSVTY 333 Advanced Composition Credits: 3

May be repeated for credit.

Prerequisites: CONSVTY 234 (with a grade of C or better).

CONSVTY 335 Electronic Music Composition Credits: 3

This course focuses on creating an original music composition in any style utilizing the full range of digital audio or MIDI hardware, software and techniques available to the student. In addition to weekly meetings arranged with the instructor, 5-8 hours per week of studio time is required. May be repeated for credit.

Prerequisites: CONSVTY 235 or CONSVTY 236 (with a grade of C or better).

CONSVTY 341 Principles of Arts Business Credits: 3

This Arts Business course is in an online format and will provide an overview of the many different careers and business practices in the arts industries. The course content will highlight the variables considered when creating, selling, and marketing a variety of items in different mediums.

CONSVTY 341A Arts Entrepreneurship Credits: 3

This course will teach students how to design a business model, refine that business model, and take action. This course will take students through several models and frameworks that can be used to create new ventures (for-profit, not-for-profit, social ventures), create value within existing organizations, and pursue an entrepreneurial career in the arts.

CONSVTY 342 This is Your Brain on Music Credits: 3

This is an introductory course on the connections among music, the brain, and learning. The course provides a basic understanding of the relationship between the brain, music, and human behavior in the physiological, motor, social, emotional, and cognitive domains.

CONSVTY 344 Anatomy for Music Therapy Practice Credits: 2

This course is an introduction to basic human anatomy and pathology with an emphasis on applicability to multiple aspects of music therapy practice.

Prerequisites: Music Therapy Major.

CONSVTY 351 History of Music in Western Civilization I Credits: 3

A chronological study of music in Western civilization with emphasis on periods and styles from early times to the death of Bach. Outside listening required.

Prerequisites: CONSVTY 242 (with a grade of C or better).

CONSVTY 352 History of Music in Western Civilization II Credits: 3

A chronological study of music in Western civilization from 1750 to the present. Outside listening required.

Prerequisites: CONSVTY 351 (with a grade of C or better).

CONSVTY 352WI History of Music in Western Civilization II-Writing Intensive Credits: 3

A chronological study of music in Western Civilization from 1750 to the present. Outside listening and writing projects required.

CONSVTY 353A History And Development Of Jazz I Credits: 3

History of Jazz from its beginning through the present, using recordings, films and musical examples. Emphasis on the major historical trends in Jazz, including Early Jazz, Ragtime, Dixieland, Swing, Bebop, Cool Jazz, Hard Bop, Free Jazz, Jazz-Rock Fusion and modern developments. This course makes use of the Marr Sound Archive, and is appropriate for all students throughout the UMKC Campus.

CONSVTY 353WI History and Development of Jazz II Credits: 3

This course aims to contextualize jazz within the musical culture of the twentieth century. It is designed to develop the students understanding of jazz from a writing and research perspective. This course concentrates on the lives, bands, and works of people who have been instrumental in the development of the various jazz styles. In-depth analysis of major jazz figures including Louis Armstrong, Duke Ellington, Count Basie, Charlie Parker, Dizzy Gillespie, Thelonious Monk, Clifford Brown, Sonny Rollins, John Coltrane, Miles Davis, Wayne Shorter, and many others. This course is most appropriate for Jazz Studies majors, and other conservatory students with some jazz background and knowledge of the fundamentals of music. This course makes use of the Marr sound Archive.

Prerequisites: CONSVTY 353A (with a grade of C or better).

CONSVTY 357 Choral Literature Credits: 2

Includes listening and analysis as they relate to programming and educational issues in choral ensemble setting. May be repeated for credit.

Prerequisites: CONSVTY 380 (with a grade of C or better).

CONSVTY 358 Wind Band Literature and Lab Credits: 2

Designed for the student working with beginning and intermediate levels of wind/percussion students. Includes critical analysis and evaluation of literature and literature selection as it relates to educational issues and programming in wind/percussion ensemble settings. Includes an application phase in a wind band rehearsal/performance setting providing opportunities realistic opportunities for observation and teaching.

Co-requisites: CONSVTY 381.

CONSVTY 359 String Literature Credits: 2

Includes listening and analysis as they relate to programming and educational issues in string ensemble settings. May be repeated for credit.

Prerequisites: CONSVTY 381 (with a grade of C or better).

CONSVTY 361 Piano Literature I Credits: 3

A survey of study through analysis, reading, listening and performance of literature for stringed keyboard instruments from the Renaissance period to 1850. Special attention given to the development of instruments, forms, techniques, performance practices and idiomatic styles.

CONSVTY 362 Piano Literature II Credits: 3

A study through analysis, reading, listening, and performance of piano repertoire from 1850-present day. Special attention given to the development of instruments, forms, techniques, performance practices and idiomatic styles.

CONSVTY 363 Music Therapy in Wellness and Intergenerational Settings Credits: 3

This course provides students with foundational information pertaining to the music therapy profession. course topics include the history of music therapy, populations that music therapists serve and an introduction to the use of music in therapeutic settings.

CONSVTY 364 Yeah, Yeah, Yeah: The Cultural and Musical Impact of the Beatles Credits: 3

This course will explore the career and music of the Beatles by examining their impact on popular culture in Britain and the United States. Students will learn about popular song forms, recording techniques, and lyric writing and analysis. They will also employ video and audio media for projects, and engage with readings that approach the Beatles both historically and culturally.

CONSVTY 366 Clinical Foundations II Credits: 3

This course provides the music therapy clinical student practice of direct services, procedures, and documentation of the music therapy treatment process (assessment, setting goals, and objectives, treatment plan, interventions, data collection, and evaluation). Students will participate in supervision and clinical experiences within the context of community-dwelling older adult populations.

Prerequisites: CONSVTY 395, Music Therapy Major.

CONSVTY 367 Music Therapy Capstone Credit: 1

This seminar course assists students in creating a research or clinical-based capstone project.

Prerequisites: CONSVTY 435 (with a grade of C or better).

CONSVTY 368 Orchestral Literature for Trumpet Credit: 1

Intended to introduce students to the standard repertoire for orchestral trumpet; class meets once weekly for an hour. Students will be expected to prepare and play approximately a dozen works per semester, rotating parts in a full trumpet section.

CONSVTY 369 Clinical Skills Lab Credit: 1

This course provides students with development, practice, and mastery of clinical music therapy skills. Course topics include, clinical musicianship, repertoire development, and group leadership skills.

CONSVTY 370 Choral/Vocal Techniques Credits: 2

Laboratory applications of vocal pedagogy, ensemble rehearsal technique, literature selection, and performance practice. Students will participate in singing and observation activities in a large ensemble setting with an emphasis on critical analysis of technical and pedagogical issues.

Prerequisites: CONSVTY 380 (with a grade of C or better).

CONSVTY 373E Instrumental Techniques Percussion Credit: 1

CONSVTY 373G Instrumental Techniques Guitar Credit: 1

CONSVTY 373N Survey Of Wind And Percussion Instruments Credit: 1

An overview of basic wind and percussion instruments used in public school settings. Includes embouchure formation, hand position, sound production, and pedagogical issues encountered in beginning situations.

CONSVTY 373P Survey Of String Instruments Credit: 1

An overview of basic string instruments used in public school settings. Includes hand position, bowing, sound production, and pedagogical issues encountered in beginning situations.

CONSVTY 376 Collaborative Piano I Credit: 1

Study of collaborative techniques and vocal literature.

CONSVTY 377 Collaborative Piano II Credit: 1

Continuation of CONSVTY 376.

Prerequisites: CONSVTY 376.

CONSVTY 378 Instrumental Ensemble Rehearsal Techniques & Lab Credits: 2

Laboratory applications of large instrumental ensemble (strings, winds, percussion) pedagogy, ensemble rehearsal technique, and performance practice. Students will participate in playing, observation, rehearsal activities in a large ensemble setting with an emphasis on critical analysis of technical pedagogical issues and ensemble performance preparation. Includes an off-campus course meeting.

Prerequisites: CONSVTY 358, CONSVTY 381 and Large Ensemble (each with a grade of C or better).

Co-requisites: CONSVTY 383.

CONSVTY 378L Instrumental Ensemble Rehearsal Lab Credit: 1

Laboratory applications of wind/percussion pedagogy, ensemble rehearsal technique, literature selection, and performance practice. Students will participate in playing, observation, and rehearsal activities in a large ensemble setting with an emphasis on critical analysis of technical pedagogical issues and ensemble performance preparation. This course may meet off-campus.

Prerequisites: CONSVTY 358, CONSVTY 381, large ensemble requirement (each with a grade of C or better).

Co-requisites: CONSVTY 383.

CONSVTY 379A Music Therapy Clinical Applications - Group Leading Techniques Credits: 2

This course provides an opportunity for music therapy students to apply learned skills to musical situations they will encounter as music therapists. Course will include a range of group leading skills applicable for varied music therapy settings and with distinct populations including special education, older adults, medical, neurologic, and wellness.

Prerequisites: CONSVTY 138, CONSVTY 373G.

CONSVTY 379B Music Therapy Clinical Applications - Music Therapy Interventions Credits: 2

This course provides an overview of music therapy techniques (i.e. songwriting, lyric analysis, relaxation, music videos, and rhythmic stimulation) as utilized with various ages and populations for therapeutic goal achievement. Course content includes leadership, musical, and therapeutic relationship skills as well as community project components for skill application.

Prerequisites: CONSVTY 379A.

CONSVTY 379C Music Therapy Clinical Applications: Music Therapy Singing Techniques Credit: 1

This course provides students with specific training in singing varied vocal styles that apply to the diverse musical settings they will encounter as professional music therapists.

Prerequisites: CONSVTY 379A, CONSVTY 379B.

CONSVTY 379D Music Therapy Clinical Applications - Music Therapy Repertoire Credit: 1

This course provides a survey of song repertoire used within music therapy practice across various client/patient populations, and within different therapeutic interventions. The study of accompaniment skills necessary to play suggested repertoire is also included.

Prerequisites: CONSVTY 379A, CONSVTY 379B, CONSVTY 379C.

CONSVTY 380 Basic Conducting - Choral Credits: 2

A study of the basic techniques of all rhythms, patterns, subdivision of beats, dynamics, starting, stopping, and giving cues through conducting in class. Elementary study of the score as to form and harmonic content will be discussed.

Prerequisites: CONSVTY 242 (with a grade of C or better).

CONSVTY 381 Basic Conducting - Instrumental Credits: 2

A study of the basic techniques of all rhythms, patterns, subdivision of beats, dynamics, starting, stopping, and giving cues through conducting in class. Elementary study of the score as to form and harmonic intent will be discussed.

Prerequisites: CONSVTY 242 (with a grade of C or better).

CONSVTY 382 Choral Conducting Credits: 2

A study of choral techniques including voice tryouts, placement, attack, release, blend, vocal development, diction, and rehearsal techniques through actual experience of conducting in class.

Prerequisites: CONSVTY 380 (with a grade of C or better).

Co-requisites: CONSVTY 387.

CONSVTY 383 Instrumental Conducting Credits: 2

A study of instrumental conducting techniques through actual conducting situations in instrumental groups. Primary objective will be the study of instrumental rehearsal techniques.

Prerequisites: CONSVTY 381 (with a grade of C or better).

Co-requisites: CONSVTY 386.

CONSVTY 385 Elementary Music Methods Credits: 3

Basic principles of curriculum planning for music education, investigation of current methods and approaches, and practical teaching experience in laboratory setting. For music majors and non-majors who have extensive musical backgrounds.

Prerequisites: CONSVTY 242, CONSVTY 411C (each with a grade of C or better).

CONSVTY 386 Secondary Music Methods - Instrumental Credits: 3

The organization, scheduling and program building techniques of middle school and high school band and orchestral programs. Areas of study will include curriculum, pedagogical techniques, classroom management, music library organization, budgeting procedures, and basic instrumental techniques.

Co-requisites: CONSVTY 383, CONSVTY 411B.

CONSVTY 387 Secondary Music Methods - Choral Credits: 3

The organization, scheduling and program building techniques of middle school and high school choral programs. Areas of study will include curriculum, pedagogical techniques, classroom management, music library management, budgeting procedures, and basic vocal techniques.

Co-requisites: CONSVTY 382, CONSVTY 411B.

CONSVTY 390 Analysis Credits: 3

Analysis offers students the opportunity to learn and apply multiple analytical techniques to complete movements and larger pieces of music by focusing on the study of pitch, rhythm, form, aesthetics, and issues of performance.

Prerequisites: CONSVTY 242 (with a grade of C or better).

CONSVTY 395 Clinical Foundations I Credits: 3

This course provides the clinical student practice of direct services, procedures, and documentation of the music therapy treatment process (assessment, setting goals and objectives, treatment plan, interventions, data collection, and evaluation). Students will participate in supervision and clinical experiences within the context of community-dwelling older adult populations.

CONSVTY 399A Omni Ensemble (A) Credit: 1

Omni ensemble focuses on the fundamental principles of playing violin, viola, cello, and bass effectively within an ensemble setting. The curriculum is centered on the tenets of fine musicianship, including expressivity, characteristic tone, precise intonation, and healthy posture. The Omni ensemble provides instruction and group playing experience to all members of the UMKC community who demonstrate basic proficiency on a string instrument, and to Conservatory of Music and Dance students studying a secondary string instrument.

CONSVTY 399B Omni Ensemble (B) Credit: 1

Omni ensemble focuses on the fundamental principles of playing violin, viola, cello, and bass effectively within an ensemble setting, and this course is designed to refine students' performance skills on a secondary string instrument and teaching skills through planning and leading rehearsal segments. The central goals of the course are to: refine skills needed to teach effectively in a string ensemble setting; recognize strengths and weaknesses as a string player and teacher of string players; and implement strategies to continue to improve teaching.

CONSVTY 399C Omni Ensemble (C) Credits: 2

Omni ensemble focuses on the fundamental principles of playing violin, viola, cello, and bass effectively within an ensemble setting. The curriculum is centered on the tenets of fine musicianship, including expressivity, characteristic tone, precise intonation, and healthy posture. The central goals of the course are recognition of strengths and weaknesses as a string player; implementation of strategies to improve performance through daily practice; and refinement of expressivity, tone, intonation, and posture on a primary string instrument.

CONSVTY 404 Jazz Improvisation IV Credits: 2

This class is a continuation of Jazz Improvisation III. This course features in-depth analyses of the blues and free improvisation focusing on rhythm changes and bi-tonal/polytonal chords. Course includes an in-depth analysis of styles from Dixieland to contemporary jazz. A strong emphasis is placed on solo construction and development of individual styles.

Prerequisites: CONSVTY 304 (with a grade of C or better).

CONSVTY 405 Philosophical and Pragmatic Foundations of Music Education Credits: 3

This course experience guides students in developing philosophical and social/historical frameworks along with practical skills to assist them in addressing varied opportunities and challenges as a music educator in contemporary American schools.

CONSVTY 407 Audio Intern Program Credits: 1-3

Practical recording experience interning with Conservatory recording and music production labs with one lecture weekly.

CONSVTY 407A Music Therapy Principles and Applications Credits: 3

This course provides knowledge of music therapy services for people with behavioral, neurological, motor, and medical problems. Course content will focus on population characteristics and needs, literature on music therapy to address these needs and applications to clinical work in music therapy.

Prerequisites: CONSVTY 395, CONSVTY 366.

CONSVTY 408 Music in Therapy: Adults Credits: 3

Lecture and clinical demonstration of theory and practice of music therapy with adult clients.

Co-requisites: CONSVTY 369.

CONSVTY 409 Music in Therapy: Children Credits: 3

Lecture and clinical demonstrations of theory and practice of music therapy with children.

Co-requisites: CONSVTY 369.

CONSVTY 410 Internship Credit: 1

A minimum of 900 hours of supervised clinical experience at a Rostered site approved by the American Music Therapy Association or an Affiliate site approved by UMKC Conservatory Music Therapy faculty, to be taken after all other course work for the music therapy degree, excepting any advanced coursework, is completed.

CONSVTY 410A Advanced Music Therapy Principles and Applications Credits: 3

This course provides knowledge of music therapy services for wellness as well as people with emotional, social, and behavioral problems. Course content will focus on population characteristics and needs, literature on music therapy to address these needs and applications to clinical work in music therapy. Additionally, instruction in music therapy program development and implementation will be provided.

Prerequisites: CONSVTY 407A.

CONSVTY 411A Field Experience in Music Credit: 1

To introduce music students to a critical examination of the complex nature of teaching, learning, children, and the music classroom/ensemble setting. Students will be expected to spend 30 hours observing, participating, planning and teaching in an assigned music classroom environment during the semester.

CONSVTY 411B Field Experience in Music Credit: 1

To introduce music students to secondary school settings and further develop observation, planning and teaching skills. Students will be expected to spend 30 hours in a middle/ junior high school music classroom and 30 hours in a high school music classroom for a total of 60 hours during the semester.

Prerequisites: CONSVTY 411A (with a grade of C or better).

Co-requisites: CONSVTY 386 (or CONSVTY 387).

CONSVTY 411C Field Experience in Music Credit: 1

To introduce music students to elementary school music settings and continue to refine observation, planning and teaching skills in secondary school music settings. Students will be expected to spend 30 hours in an elementary school music classroom and 30 hours in either a middle school/junior high or high school music classroom.

Prerequisites: CONSVTY 411B (with a grade of C or better).

Co-requisites: CONSVTY 385.

CONSVTY 412A Student Teaching Music in Elementary School Credits: 3-12

Observation, planning and teaching in an elementary music classroom setting. Students will be expected to spend a minimum of seven weeks teaching full-time under supervision.

Prerequisites: CONSVTY 411C (with a grade of C or better).

CONSVTY 412B Student Teaching Music in Secondary School Credits: 3-12

Observation, planning and teaching in a middle school/junior high or high school music classroom setting. Students will be expected to spend a minimum of seven weeks teaching full-time under supervision.

Prerequisites: CONSVTY 411C (with a grade of C or better).

CONSVTY 417 Opera Workshop Credit: 1

Introduction to stagecraft, movement and acting for opera. Special emphasis on creating active aria, recitative and art song performances.

CONSVTY 417E Scene Study Credit: 1

Preparation, rehearsal and performance of scenes from opera, operetta and music theatre. Scenes will be determined and assigned based on student's needs and development. One-act operas may also occasionally be produced in this class.

Prerequisites: Voice Audition.

CONSVTY 417F Opera Role Preparation and Audition Techniques Credit: 1

Students will work on specific audition techniques for the operatic solo singer, which may include dramatic interpretation of repertoire, stage movement, resume building, and other aspects to assist the performer in the audition process.

Prerequisites: CONSVTY 417 (with a grade of C or better).

CONSVTY 421A Music Theory Review For Graduate Students Credits: 1-3

An intensive review with emphasis placed on analysis.

CONSVTY 421B Aural Skills Review for Graduate Students Credits: 1-3

An intensive review of ear training and sight singing.

CONSVTY 421C Musicianship Enrichment Credits: 1-2

An intensive review of the essential skills and ideas necessary to attain fluency in Western music theory with an emphasis on analysis and aural skills.

Prerequisites: Must be a graduate music student in the Conservatory.

CONSVTY 422A Music History Review (early) Credits: 1-3

Graduate-level review of music in Western civilization from antiquity to 1750. Outside listening is required.

CONSVTY 422B Music History Review (Late) Credits: 1-3

Graduate-level review of music in Western civilization from 1750 to the present. Outside listening is required.

CONSVTY 422C Music History Review Credits: 1-3

Graduate-level review of music in Western civilization from antiquity to the present. Outside listening is required.

CONSVTY 423 Business Jazz And Commercial Music Credits: 3

An introduction to the various elements of the music industry, including production, marketing, unions, contracts, broadcasting, licensing agreements and copyrights.

CONSVTY 425A Arranging for Choral Groups Credits: 2

Practice in transcribing vocal music of the current pop idiom. Analysis and writing in contemporary harmonic idioms. Stylistic analysis of solo and choral writing in operettas and musical plays. Scoring for mixed voices, men's voices, and women's voices.

Prerequisites: CONSVTY 242 (with a grade of C or better).

CONSVTY 425B Arranging Instrumental Credits: 2

Arranging Instrumental.

Prerequisites: CONSVTY 242 (with a grade of C or better).

CONSVTY 426B Jazz Arranging for Small Ensembles Credits: 2

This course will teach the art of Calligraphy as well as the techniques of arranging and orchestration for small jazz ensembles for up to five horns. The course will also include an in-dept study of basic voicings, instrumental sonorities, and some extended forms using intensive listening and score study. UMKC combos, or top Kansas City professionals, will perform final assignments.

Prerequisites: CONSVTY 311 (with a grade of C or better).

CONSVTY 426D Jazz Arranging for Big Bands Credits: 2

This course is a continuation of Jazz Arranging for small ensembles. It will cover the basics of arranging and orchestration techniques for big bands. It includes an in-depth study of basic voicing and instrumental sonorities using intensive listening and score study. The students will have a chance to hear their final arrangements performed at the end of the semester by the Concert Jazz Band.

Prerequisites: CONSVTY 426B (with a grade of C or better).

CONSVTY 427 18th-Century Counterpoint Credits: 2

Analysis and writing in 18th century style and forms including canon, invention and fugue.

Prerequisites: CONSVTY 242 (with a grade of C or better).

CONSVTY 428 Introduction to Post-Tonal Theory Credits: 3

Analysis and writing in contemporary styles.

Prerequisites: CONSVTY 242 (with a grade of C or better).

CONSVTY 431 Orchestration Credits: 3

A detailed study of the scores of major orchestral and wind ensemble works, plus the application of orchestrational concepts in the creation or orchestration of an original piece of music.

Prerequisites: CONSVTY 331 or CONSVTY 234 (with a grade of C or better).

CONSVTY 433 Composition Recital Credits: 3

Preparation and performance of the student's original compositions at one or more concerts sponsored by UMKC Conservatory of Music, with a total of 50 to 60 minutes performance time.

Prerequisites: CONSVTY 333 (with a grade of C or better).

CONSVTY 434 Composition Capstone Credits: 3

Preparation and performance of the student's original compositions at one or more events sponsored by UMKC Conservatory, with a total of 50 to 60 minutes of performance time.

Prerequisites: CONSVTY 433.

CONSVTY 435 Psychological Foundations of Music Credits: 3

The study of the psychological aspects of music including perception, cognition, affect, and preference. An introduction measurement and experimental research including statistical techniques.

CONSVTY 437 Computer Literacy for Musicians Credit: 1

Computing skills for the music teacher. Study of the computer as a tool for music majors who will teach in public school music classes, direct ensembles, or teach at the college or university level. Hands-on practice with file creation and editing, graphics and character set generation, data analysis, preparation of computer based instruction, and data retrieval. For upper level undergraduate and graduate students.

CONSVTY 440 Jazz Keyboard Techniques I Credit: 1

This course is designed for jazz majors to develop skills needed to harmonize tunes at the piano and effectively comp in the mainstream jazz group. It is meant to give the student an organized approach for exploring any harmonic style at the keyboard. Co-requisites: CONSVTY 142.

Prerequisites: CONSVTY 110; must be a jazz major.

CONSVTY 441 Jazz Keyboard Techniques II Credit: 1

This course builds upon techniques in accompaniment, improvisation, and composition at the keyboard begun in CONSVTY 440 (Jazz Keyboard Techniques I) with a move toward more advanced repertoire and harmonic complexity.

Prerequisites: CONSVTY 440 - Jazz Keyboard I

CONSVTY 450 Music and Film Credits: 3

Designed for the general university student, this course will survey the use of music in cinema. It will include sections on music, technology, the film medium and the various ways in which music adds to the cinematic experience. Music majors may enroll for elective credit.

CONSVTY 454 Advanced Seminar in Music Theory Credits: 3

Advanced Seminar in Music Theory offers a rotating option of topics in advanced music theory drawn from the research interests and expertise of the music theory faculty.

Prerequisites: CONSVTY 390 (with a grade of C or better).

CONSVTY 457 Vocal Literature I Credits: 2

Literature for the solo voice. A course covering the literature from 1600 to present times, illustrated by recordings and members of the class and the instructor. Required for B.M. voice majors.

CONSVTY 458 Vocal Literature II Credits: 2

A continuation of CONSVTY 457.

CONSVTY 471 Jazz/Commercial Music Pedagogy Credits: 2

This course is designed to develop skills in the teaching of jazz and commercial music. Students will be exposed to a variety of materials, techniques and philosophies and trained in various techniques of rehearsing and conducting jazz ensembles, including the study of scores and recordings of different styles and rehearsal of the Conservatory's jazz ensembles. Includes an emphasis on structuring jazz and studio music curriculum at the College level.

Prerequisites: CONSVTY 381 (with a C or better).

CONSVTY 490 Independent Study Credits: 1-3

Intensive reading, research projects, creative work, or special performance in the student's major field, selected by the student in consultation with the appropriate faculty.

CONSVTY 491B Pedagogical Practices I Voice Credits: 2**CONSVTY 491K Pedagogy of Music Theory Credits: 3**

Pedagogy of Music Theory

CONSVTY 491N Pedagogy of Instrumental Music Credit: 1

A study of the pedagogical materials and methods used in teaching applied instrumental music.

CONSVTY 497 Seminar-Workshop in Music Credits: 1-4

Special courses in techniques, theory, and repertoire taught by the Conservatory staff and visiting specialists.

CONSVTY 497AR Seminar-Workshop In Music Credits: 1-4

CONSVTY 497HDJ Seminar-Workshop In Music Credits: 1-4
Seminar-Workshop In Music

CONSVTY 497JIM Seminar-Workshop in Music Credits: 1-4

Special courses in techniques, theory, and repertoire taught by the Conservatory staff and visiting specialists.

CONSVTY 497PL Seminar Workshop In Music Credits: 1-4

CONSVTY 498 Research Problems Credits: 2

Individual study under the direction of a faculty adviser, leading to the writing of a formal paper. A public, non-graded presentation of the paper with performance examples is required.

Counseling Psychology and Counselor Education (CPCE)

Courses

CPCE 230 Effective Interpersonal Communication Credits: 3

Theory, and research on interpersonal relationships; students will learn effective communication skills, including understanding verbal and nonverbal behavior, listening, and empathy.

CPCE 425 Positive Psychology Credits: 3

Introduction to current theory and empirical research in positive psychology. Topics explored include happiness, self-esteem, empathy, friendship, optimism, love, achievement, strengths, mindfulness, spirituality, and hope.

Criminal Justice and Criminology (CJC)

Courses

CJC 101 Introduction To Criminal Justice Credits: 3

This introductory overview course is designed to familiarize students with the three main components of the adult criminal justice system: police, courts, and corrections. The course will investigate the viewpoints of offenders, victims, social scientists, the general public, and workers in the system on diverse issues of social control, criminal behavior, treatment and punishment.

CJC 101 - MOTR CRJS 101: Introduction to Criminal Justice

CJC 280 Gangs and Crime Credits: 3

This course will provide students with an overview of what is known about street gangs. Specifically, the course will cover definitional issues, gang organization and structure, gang culture, gang member onset and desistance, among other issues related to criminal street gangs. This course will also encourage students to think critically about communities, crime, and group formation.

CJC 282 Criminal Justice & Criminology in Popular Media Credits: 3

This course examines criminology and criminal justice as it is represented in popular film to explore critically the impact media has on the public's perception of the criminal justice system, the origin of criminal behavior, and the broad sociological constructs of criminology. A key focus is the media's power to shape criminal justice policy and practice.

CJC 301 Theoretical Criminology Credits: 3

A comprehensive examination of the major criminology theories, their philosophical assumptions, and the socio-historical context in which they were articulated.

CJC 302 Methods of Criminological Research Credits: 3

A seminar which explores the interrelationships between sociology theory, research methods, and statistics. May focus on major contemporary issues building on and integrating knowledge obtained in previous courses.

CJC 303 Introduction to Statistics in Sociology and Criminal Justice Credits: 3

A first course in the statistical analysis of quantitative data. Course emphasizes descriptive statistics, probability theory, parameter estimation, bivariate hypothesis testing, and computer applications.

Prerequisites: MATH 110 or MATH 116 or STAT 115 or MOTRMATH 110 or higher level math (with a grade of C- or higher); or ALEKS Score of 61 or higher.

CJC 332 Race, Class and Justice Credits: 3

This course examines the intersection of race and class as it relates to crime and justice. Specifically, the course focuses on race and class in relation to criminological theory and the application of justice system practices and policies.

CJC 335 Blackness as Threat Credits: 3

This course examines from a criminological and socio-legal perspective the historical and contemporary influence of race on perceptions of threat/danger, violence, and justice. The class focuses particularly on the experiences of African Americans in these regards, using recent high-profile cases as empirical lenses through which to discuss this topic.

CJC 338 Immigration and Crime Credits: 3

This course examines concerns regarding a purported connection between immigration and crime in the United States. We will begin through an examination of how immigrants have become increasingly criminalized, shaping an overlap between immigration and criminalization. This class explores the threat narrative regarding the Latinx population, generally, and explore gender disparities in these depictions of Latina women compared to Latino men. Discussions will incorporate details about the immigrant population in the Kansas City metropolitan area and look at examples of how local community agencies and activists are working to address human rights issues.

CJC 351 Policing In The Community Credits: 3

The purpose of this class is to introduce the student to police operations and the effectiveness of different police programs. The material discussed in class focuses on empirical evaluations of police effectiveness, and the role of the police in today's society. This class is divided into four broad areas: the nature and effectiveness of patrol; criminal investigations; special operations including crackdowns, responses to domestic assaults, and hot spot policing; and the latest crime prevention strategies, such as community oriented policing and problem solving.

CJC 354 Policing in America Credits: 3

A comparison of law enforcement and peace-keeping functions of the police provides a basic theme for the course, with examination of several topics related to police accomplishing these functions. Some of the topics covered include police discretion, police professionalism, the police officer as a bureaucratic agent, and police-community relations.

CJC 357 Crime Scene Investigation Credits: 3

This course will examine contemporary issues in crime scene investigation and its relevance to the criminal justice system. It will include an overview of legal issues, proper evidence collection techniques, and the preservation of evidence. Several different types of crime scenes will be explored.

CJC 361 Principles & Practices of Criminal Courts Credits: 3

The course examines the American criminal judicial system, including the history, philosophy, and changing nature of criminal courts. The activities of lawyers, judges, and related professionals are emphasized, and current topics involving the criminal court are discussed.

CJC 364 The Supreme Court And The Criminal Process Credits: 3

Course examines recent Supreme Court decisions on the constitutional aspects of the administration of justice. Topics include the nationalization of the Bill of Rights and jurisdiction with an emphasis on problems involving the Fourth, Fifth, Sixth, Eighth, and 14th Amendments.

CJC 370 Principles Of Corrections Credits: 3

This course explores adult institutional and community-based corrections in the United States. Major areas examined include the evolution of corrections, the process of correctional reform, adult offenders and prison culture, treatment and rehabilitation of offenders, intermediate sanctions, and correctional workers.

CJC 371 Community Corrections Credits: 3

This course will examine intermediate sanctions in the United States, such as probation, halfway houses, boot camps, among others. Specifically, the origin and proliferation of the use of corrections in the community will be explored in depth. The effectiveness of several major community correctional strategies will be explored through a review of the research literature base. Several issues will be highlighted including (but not limited to) ethical constraints, political problems, and treatment effectiveness in light of the use of community sanctions.

CJC 381 Advocacy and Crisis Intervention Credits: 3

This course focuses on the dynamics of sexual violence, advocacy skills, and how communities respond. The course will examine sexual violence in America, dynamics and trauma response to sexual violence, advocacy skills, and the role of community responders, including new strategies for response.

CJC 382 Human Trafficking Credits: 3

This course is designed to equip prospective Criminal Justice professionals with a comprehensive, trauma informed understanding of the issue of human trafficking, as it exists within the context of a modern, developed society. Students will learn the elements of a comprehensive strategy to address this crime; identification, exit, restoration, legal reforms, and prevention.

CJC 385 Victimology Credits: 3

This course addresses the study of crime, criminals and victims. It examines the relationship between victims and offenders. Special treatment is given to criminological as well as victimological theories. A segment of the course will address the sporadic nature of juvenile crime. The course will examine viable strategies to reduce levels of victimization. In the final analysis the course will offer crime prevention strategies.

CJC 390 New Dimensions In Criminal Justice Credits: 3

Examination of contemporary topics, issues or problems related to the development of justice and/or operations in response to criminal and related behaviors addressed by the justice system. May be repeated for credit when the topic changes.

CJC 395 Criminal Justice and Criminology Career Exploration Credits: 3

The course examines opportunities in US Criminal Justice and Criminology within law enforcement, courts, and corrections, local, state, federal, private sector and academia. Students will learn ethics and professionalism, securing internships, preparing for interviews, effective networking and career-building.

CJC 430 Women, Crime And Criminal Justice Credits: 3

This course will focus on the experiences of women and girls with crime in America. The primary areas studied will be females as victims, offenders, and professionals in the criminal justice system. Various criminological theories and research will also be examined in light of gender.

CJC 431 Hate & Bias Crimes Credits: 3

The purpose of this course is to examine the development and enforcement of hate crime law within our legal system. Discussion focuses on the causes and consequences of hate crimes, the constitutional issues associated with bias crime statutes, and the effectiveness of formal and informal social controls for eliminating hate and bias crimes.

CJC 481 Restorative Justice Credits: 3

This course is an introduction to the concept of restorative justice. The course examines the roots of the concept, its theoretical perspective, and its applications in juvenile justice, mediation and correctional settings.

CJC 488 Mentoring Juvenile Justice System-Involved Youth Credits: 3

Youth mentoring experience in a juvenile justice setting with required training and classroom study. Requires successful background check completion.

CJC 490 Directed Studies In Criminal Justice And Criminology Credits: 1-5

Individual research and study in the student's field of interest as approved and directed by major professors. The work involves examination and reporting of selected problems affecting the various agencies of our legal system. Only two of the 490 sequence courses and up to 3 credit hours can be applied to the major. A. Law Enforcement B. Court Operations and Administration C. Corrections D. Legal Theory and Philosophy E. Criminological Theory F. Sociology of Law.

CJC 491 Internship In Criminal Justice Credits: 3-6

Intern experience under faculty supervision in local, state, federal or private agencies working with justice system involved offenders.

Prerequisites: Junior or Senior CJC student.

CJC 492 Topics In Criminal Justice Credit: 1

Specialized, short courses with focused examination of particular topics germane to the study of the justice system. May be repeated for credit.

CJC 495WI Capstone: Criminal Justice And Criminology Credits: 3

This course is designed to integrate student's program of study in the major of criminal justice and criminology. The class examines current conditions of the justice system with respect of race, gender and social class.

Prerequisites: Senior CJC student.

Curriculum and Instruction (EDUC-C&I)

Courses

EDUC-C&I 497 Individual Study Credits: 1-6

Guided study of a selected topic in curriculum and instruction.

Dance (DANCE)

Courses

DANCE 107 Dance Production I Credit: 1

A study of the fundamentals of dance production including sound design and recording techniques, video and video editing, lighting design for dance, stage make-up, and costume design and construction. Laboratory projects will be coordinated with actual dance productions.

DANCE 108 Dance Production II Credit: 1

Continuation of DANCE 107.

DANCE 118 Analysis of Movement Credit: 1

This course in movement analysis will explore various aspects of modern dance. The topics that will be introduced are related to: the differences between ballet vocabulary and modern dance vocabulary, the reason and method behind the creation of modern dance, codified modern dance techniques versus non-codified modern dance techniques, Laban Movement Analysis, the principles of the Graham technique versus folding/unfolding, the Doris Humphreys technique and Lester Horton's fortification. Class discussions, readings, and examples of various works will be used to analyze these topics. Basic improvisational techniques will be utilized to explore these topics.

DANCE 120 Ballet Pedagogy and Analysis Credit: 1

A study of ballet pedagogy, the structure of classical ballet steps, and analysis of movement including basic anatomy, vocabulary and the aesthetics of ballet.

DANCE 141B Ballet Technique and Theory I Credits: 3

Fundamentals of technique of classical ballet at the intermediate level with attention given to strengthening, stretching, anatomical alignment, and developing the ballet aesthetic. This course includes pointe work. Non-Majors by audition.

DANCE 141M Modern Dance Technique and Theory I Credits: 3

This intermediate level dance course is based on the technique and theory of Lester Horton and fundamental elements of Martha Graham. Designed to fortify, stretch, and strengthen the body, the technique is codified into a series of studies designed to cover a wide range of movement vocabulary. Non-Majors by audition.

DANCE 142B Ballet Technique And Theory II Credits: 3

Continuation of DANCE 141B.

DANCE 142M Modern Dance Technique and Theory II Credits: 3

Continuation of DANCE 141M.

DANCE 213C Men's Class I Credit: 1

This course is designed to meet the needs of the male dancer and will focus on developing the technique, strength, and agility needed for a professional career.

DANCE 213D Men's Class II Credit: 1

Continuation of DANCE 213C.

DANCE 216 Composition I Credits: 2

An introduction to dance composition focused on the exploration of improvisation, spatial design, sources of movement, and the basic elements of space, time, shape, and motion with additional emphasis on dynamics, rhythm, and sound sources for choreography. With these skills, students are building a foundation and developing tools in creating choreography.

DANCE 218A Composition II Credits: 2

Continuation of Composition I, further exploring of the fundamentals of choreography including locomotion studies, categories of motion, axial movement and sequential and non-sequeter movement. Focusing on the development of solo works and developing choreographic process.

DANCE 218B Composition III Credits: 2

An introduction to the fundamentals of choreography, including the development of dance compositions through the exploration and definition of specific studies, including floor design, shape design, motion design, and time design. Restricted to dance majors.

DANCE 241B Ballet Technique And Theory III Credits: 3

Continuation of DANCE 142B at the intermediate/advanced level including pointe. Restricted to dance majors.

DANCE 241M Modern Dance Technique And Theory III Credits: 3

Continuation of DANCE 142M, on the intermediate/advanced level. Restricted to dance majors.

DANCE 242B Ballet Technique And Theory IV Credits: 3

Continuation of DANCE 241B, at the intermediate/advanced level including pointe work.

DANCE 242M Modern Technique And Theory IV Credits: 3

Continuation of DANCE 142M, on the intermediate/advanced level.

DANCE 260 Jazz I Credit: 1

A study of Western Theatrical Dance focusing on Jazz and Afrp-Caribbean based forms.

DANCE 261 Jazz II Credit: 1

Continuation of DANCE 260 with a more in deapth study of Western Theatrical Dance focusing on Jazz and Afro-Caribbean based dance forms.

DANCE 301 Dance Science and Kinesiology Credits: 3

Dance Science and Kinesiology is a study of the body which relates specifically to the needs of dancers. Emphasis is placed upon an understanding of the skeletal system, the muscular system, their specific importance to dance technique, kinesiology, and dance injuries and prevention.

DANCE 303 Pilates Credit: 1

A non-impact body conditioning method based on principles of abdominal and scapular stabilization. Introduction to the essential and intermediate mat work, which consists of non-weight bearing exercises. Designed to give the student an understanding of the principles and muscular emphasis behind the Pilates method. Proper alignment, full range of motion, and patterned breathing will be emphasized.

Prerequisites: DANCE 301.

DANCE 304 Fundamentals of Body Alignment and Pilates Credit: 1

A course that is designed for students to develop a greater understanding of body alignment and how to strengthen body alignment through muscular conditioning and Pilates. Non-impact body conditioning exercises that focus on proper alignment, full range of motion, muscular strengthening, core strengthening, muscular imbalances, patterned breathing, and injury prevention will be emphasized. Developing total body strength, alignment, and flexibility through a series of researched dance specific exercises that are carefully designed to reach all muscle groups are presented.

Prerequisites: DANCE 301.

DANCE 305 History Of Dance I Credits: 3

A study of the development of Western theatrical dance forms, from its roots in the European court through the 20th century. Beginning with a brief overview of "early dance," emphasis will be placed on the study of Renaissance theatre spectacles to the rise of the professional dancer culminating with the 20th century contemporary ballet. This course includes outside reading and writing intensive requirements.

DANCE 306 History Of Dance II Credits: 3

Continuation of DANCE 305 exploring the development of dance as a 20th century Western theatre dance form. Development of modern dance, modern dance pioneers, modern dance development in Europe, African-American contribution to modern dance, modern dance influence on the ballet and the Avant-Garde and Post Modern movements will be studied. Outside reading and writing intensive requirements included.

DANCE 307 Every Body Dances Credits: 3

From Dancing with the Stars and So You Think You Can Dance to Dancing in One World. This classroom—based lecture course will explore what dance is and why people dance from a cultural and historical perspective. The course will include reading, video viewing, lectures, discussions, and participation in dance experiences.

DANCE 310 Conservatory Dance Ensemble Credit: 1

A course designed for the performance component of the BFA degree. Students develop and refine professional performance skills through a diverse repertory of choreographic works and backstage theatre activities. All aspects of a complete performance experience including rehearsals, backstage operations, crew activities, sound operation, stage management, costume management, videography, and company class are developed, culminating with fully produced theater performances, special projects, collaborations, and lecture demonstrations.

Prerequisites: DANCE 107, DANCE 108.

DANCE 313A Partnering/Pas De Deux I Credit: 1

This course is designed to meet the needs of the 300/400 level ballet student and will teach the elementary skills of partnering such as turns, lifts, promenades, and balances.

Prerequisites: DANCE 341B (or higher).

DANCE 313B Partnering/Pas De Deux II Credit: 1

Continuation of DANCE 313A.

Prerequisites: DANCE 341B (or higher).

DANCE 319A Composition IV Credits: 2

An intermediate course in Dance Composition focusing on choreographic clarity and intent. Topics such as abstraction, motif and development, and prop and costumes will be explored.

Prerequisites: DANCE 218B.

DANCE 319B Composition IV Credits: 2

An advanced course in Dance Composition focusing on choreographic clarity and intent. Topics such as motif and development, props, music and costumes will be explored. Focus on group work exploration.

Prerequisites: DANCE 218B.

DANCE 341B Ballet Technique And Theory V Credits: 3

Continuation of DANCE 242B, at the advanced level including pointe work. Restricted to dance majors. Repeatable up to 6 credit hours.

DANCE 341M Modern Dance Technique And Theory V Credits: 3

Continuation of DANCE 242M on the advanced level. Restricted to dance majors. Repeatable up to 6 credit hours.

DANCE 342B Ballet Technique And Theory VI Credits: 3

Continuation of DANCE 341B. Repeatable up to 6 credit hours.

DANCE 342M Modern Dance Technique And Theory VI Credits: 3

Continuation of DANCE 341M. Repeatable up to 6 credit hours.

DANCE 403A Modern Technique For Non-Majors Credit: 1**DANCE 404A Ballet Technique Non-Majors I Credit: 1**

The applied and theoretical study of ballet including traditional ballet vocabulary. Written assignments required.

DANCE 405A Modern Dance Repertory I Credit: 1

Modern Dance Repertory is an advanced course for modern dance majors to study and perform the repertoire and works of renowned contemporary choreographers. It is a parallel to the Ballet Variations course which teaches the repertoire of ballet master works.

Prerequisites: DANCE 341M (or higher).

DANCE 405B Modern Dance Repertory II Credit: 1

Continuation of DANCE 405A.

Prerequisites: DANCE 341M (or higher).

DANCE 405C Modern Dance Repertory III Credit: 1

Continuation of DANCE 405B.

Prerequisites: DANCE 341M (or higher).

DANCE 405D Modern Dance Repertory IV Credit: 1

Continuation of DANCE 405C.

Prerequisites: DANCE 341M (or higher).**DANCE 413A Advanced Pas De Deux I Credit: 1**

Advanced pas de deux is designed to meet the needs of the 400 level ballet student with emphasis placed on perfecting advanced partnering skills. Students will have opportunity to learn pas de deux from great ballets giving students the experience and stamina of dancing entire pas de deux. The course provides coaching on both a stylistic approach and a technical approach to the performance of materials presented in class.

Prerequisites: DANCE 441B (or higher).**DANCE 413B Advanced Pas De Deux II Credit: 1**

Continuation of DANCE 413A.

Prerequisites: DANCE 441B (or higher).**DANCE 414A Men's Variations I Credit: 1**

Men's Variations is designed for the male ballet dancer. Students will have the opportunity to learn and perform renowned variations from the Romantic, Classical, and Neo-Classical periods of ballet. This class will give the male student a true professional coaching experience in their training as they prepare for stage.

Prerequisites: DANCE 341B.**DANCE 414B Men's Variations II Credit: 1**

Continuation of DANCE 414A.

Prerequisites: DANCE 341B.**DANCE 415A Variations I Credit: 1**

Variations is designed for the 400 level ballet student. The course will teach female variations to the pre-professional student. Students will have the opportunity to learn and perform renowned variations from Romantic, Classical and Neo-Classical periods of ballet. Students will also work in traditional practice tutus/costumes in order to give them a true professional experience in their training as they prepare for the stage.

Prerequisites: DANCE 342B.**DANCE 415B Variations II Credit: 1**

Continuation of DANCE 415A.

Prerequisites: DANCE 342B.**DANCE 416A Dance Forms I Credit: 1**

Dance Forms I is a two-part course that allows a more diverse study of dance technique styles. The first portion of this course is the study of Hip Hop. Emphasis is placed on Hip Hop vocabulary, style, and culture. The second portion of the course offers Contemporary Dance based on the techniques of ballet and modern movement using collective information as a tool to apply movement investigation.

Co-requisites: DANCE 341M.**DANCE 416B Dance Forms II Credit: 1**

Dance Forms II is a continuation of Dance Forms I offering another two-part course that allows a more diverse study of dance technique styles. The first portion of this course is the study of dances from the African Diaspora, based movement of dances from Continental Africa, the Caribbean, and the Americas. The second portion of the course is Acting for Dancers, which explores imaginative means of communication through purely physical terms.

Prerequisites: DANCE 416A.**DANCE 428 Professional Experience IV Credits: 4**

Continuation of DANCE 427 – Professional Experience III.

Prerequisites: DANCE 427.**DANCE 441B Ballet Technique And Theory VII Credits: 3**

Continuation of DANCE 342B at the pre-professional level including pre-professional pointe work. Restricted to dance majors. Repeatable up to 9 credit hours.

DANCE 441M Modern Dance Technique And Theory VII Credits: 3

Continuation of DANCE 342M at the pre-professional level. Additionally, this course is designed to prepare the student for auditioning and acquiring a performing career. Longer combinations with an emphasis on quick retention of material presented in class will be stressed. Restricted to dance majors. Repeatable up to 9 credit hours.

DANCE 442B Ballet Technique And Theory VIII Credits: 3

Continuation of DANCE 441B, on the pre-professional level including pre-professional pointe work. Repeatable up to 9 credit hours.

DANCE 442M Modern Dance Technique And Theory VIII Credits: 3

Continuation of DANCE 441M on the pre-professional level. Repeatable up to 9 credit hours.

DANCE 493 Senior Capstone Project I Credit: 1

The first semester of the Senior Capstone Project includes planning, organization, and preparation of the final senior project of performance and choreography. Utilization of production techniques, creation or selection of repertoire of a solo work, and beginning the creation of original choreographic work in group form utilizing the tools previously developed from the student's work in composition will be presented during two scheduled showings during the semester. Recommended preparation: DANCE 319B and appropriate technique levels.

DANCE 494 Senior Capstone Project II Credit: 1

A continuation of DANCE 493, the second semester of the Senior Capstone Project, is the culmination and juried public performance of a fully produced concert on the main stage to fulfill the requirements of the BFA in Dance. The student will present an original choreographic group work. In addition, the student will perform in two different dance idioms; including a solo that is self-choreographed or an approved masterwork.

Prerequisites: DANCE 493.

Decision Science and Operations Management (DSOM)

Courses

DSOM 211 Business Analytics I Credits: 3

Business Analytics I is an engaging, interactive course, ensuring the student has relevant, useful analytic skills applicable in both coursework and workplace. The student will learn in an interdisciplinary fashion, by analyzing practical business scenarios from Accounting, Finance, Marketing, Operations, and Supply Chain Management. The student will become proficient in spreadsheet use for data administration, analysis, and visual presentation. The statistical analysis focus in Business Analytics I is on descriptive and predictive measures, equipping the student for analysis, reporting, and business forecasting.

Prerequisites: MATH 110 with a grade of C- or higher; or MATH 120 or higher with a grade of C- or higher; or ALEKS Score of 61 or higher; or ACT Math Sub-score of 28 or higher; or SAT Math Sub-score of 660 or higher.

DSOM 309 Intermediate Business Statistics Credits: 3

This course emphasizes statistical applications in business, and students will complete research projects using one or more multivariate statistical techniques. Topics covered will include statistical software (such as SAS or SPSS), multiple regression, Chi-Square, analysis of variance, non-parametric methods, multidiscriminant analysis, factor analysis, and a brief introduction to structural equation models.

Prerequisites: MATH 206 and STAT 235.

DSOM 311 Business Analytics II Credits: 3

Business Analytics II explores data science, including database access/query, big data, cloud computing, and the internet of things (IoT). The student will consider business ethics, information security, and privacy concerns in today's virtual/gig economy. The student will learn to integrate data from outside sources into various platforms, including Excel, Tableau, and Domo. The student will learn prescriptive analytics and will practice useful optimization methods. Practical interdisciplinary business exercises will draw from Accounting, Finance, Marketing, Operations, and Supply Chain Management, for future use.

Prerequisites: DSOM 211 or STAT 235 or STAT 115 or MOTRMATH 110 and completion of 45 hours.

DSOM 326 Production/Operations Management Credits: 3

This course presents an introduction to the concepts, models, and methods of operations management. Students will study approaches to planning, scheduling, and controlling product and service facilities, processes, cost, quality, quantity, production, capacity, inventory, and distribution requirements. Computer applications and computer-based operations control systems will be introduced as a means to effectively manage the operations functions of both product and service organizations.

Prerequisites: ECON 202 and STAT 235 and completion of 45 hours.

DSOM 340 Supply Chain and Operations Management Credits: 3

The student will become familiar with and appreciate the concepts, models, methods, and technologies of supply chain and operations management in modern enterprises. Students will become familiar with the integrated view of procurement, operations and logistics management. Students will also understand the management of the flow of products from raw material sourcing and acquisition through delivery to the final user. Students will also become familiar with the modern technologies used in supply chain and operations management.

Prerequisites: DSOM 211 (or STAT 235 or STAT 115 or MOTRMATH 110) and ECON 202 and completion of 45 hours.

DSOM 346 Service Industry Analytics Credits: 3

This course presents an introduction to the concepts, models, and methods of decision making in service operations management. Students will study approaches to project management, decision analysis, scheduling, queuing systems, optimization/allocation models, forecasting, and profitability analysis. Computer applications and computer-based operations control systems will be introduced as a means to effectively manage the operations functions of service organizations.

Prerequisites: DSOM 326 or DSOM 340.

DSOM 431 Quality Management and Process Improvement Credits: 3

A study of planning and managing effective quality and processes in organizations. Students are expected to master important quality management and process improvement tools including Six Sigma, Statistical Process Control, TQM, Theory of Constraints, and other contemporary tools via appropriate software, case studies, and projects.

Prerequisites: DSOM 309 or DSOM 311; and DSOM 326 or DSOM 340.

DSOM 432 Spending Analytics, Contracts, and Risk Management Credits: 3

Students will advance to competency their understanding of the role of contracting, sourcing and supply management to support firm strategies. A comprehensive review of the process of costing, pricing, supplier evaluation and development and product cost aggregation will be used in analyzing spend and improving the supply chain partnerships, transactional relationships and intermediary distributors, agents and brokers with the goal of risk mitigation, cost efficiency and value added.

Prerequisites: DSOM 326 or DSOM 340.

DSOM 442 Logistics, Transportation, Warehousing, and Distribution Credits: 3

Logistics, Transportation, Warehousing and Distribution teaches effective, efficient design and management of supply chain networks, including complexities and challenges of warehousing, channel distribution and transportation, global logistics, value chains and performance management. We focus on practical examples of integrated networks of activity and data-driven performance-based logistics decisions.

Prerequisites: DSOM 326 or DSOM 340.

DSOM 443 Project Management Credits: 3

Planning and control of projects, to include network models, risk analysis, time reduction, resource scheduling, leadership, and evaluation.

DSOM 444 Digital Transformations and Supply Chain Credits: 3

This course provides the foundation for understanding the key issues associated with the digital transformation in the supply chain landscape and its implications for security and business continuity. Students learn about emerging technologies such as artificial intelligence (AI), blockchain, cloud computing, and the Internet of things (IOT) as they relate to operations and supply chain management. They learn how these technologies can contribute to the flexibility, traceability, compliance, and accountability in production, transportation, warehousing, and distribution. They also learn about the security risks associated with the use of these technologies.

Prerequisites: DSOM 326 or DSOM 340.

DSOM 445 Strategic Sourcing and Supplier Relationship Management Credits: 3

This course explores the roles of procurement and strategic sourcing as components of an overall supply chain strategy, and the impact this strategy has on the competitive success and profitability of organizations. The course is structured into three segments: before you source, how to source, and after sourcing.

Prerequisites: DSOM 326 or DSOM 340.

DSOM 487 Special Topics Credits: 3

Special topics in decision science and operations management.

Dental Hygiene (DENT-HYG)

Courses

DENT-HYG 3000 Dental Morphology And Occlusion Credits: 2

Designed to provide the dental hygiene student with a sound knowledge base in dental morphology and occlusion through discussion and laboratory experiences. Students will learn to identify anatomical structures of each tooth and be able to communicate these findings effectively with colleagues and patients in both verbal and written forms. The clinical application and relevance of dental morphology in the practice of dental hygiene will be emphasized. Special consideration will be given to root morphology as it relates to periodontal instrumentation. Activities will include: identification of extracted teeth, terminology exercises, dental charting experiences and identifying classifications of occlusion.

DENT-HYG 3020 Dental Radiology Credits: 2

Lecture and clinical practice of dental radiographic procedures. Topics included are radiation hygiene, taking and developing radiographs, processing and mounting films, and radiographic interpretation. Clinical experience is required throughout the remaining semesters.

DENT-HYG 3030 Introduction to Histopathology of Oral Tissues Credits: 2

A comparison of the microscopic anatomy of healthy and diseased oral tissues. The major goal of this course is to integrate basic sciences (embryology, descriptive histology, and cell biology of oral tissues) with clinical sciences. The gap between the basic and clinical sciences is not always easy to bridge; this course is designed to bridge the "gap." This course provides students with an introduction to orofacial histology and embryology and pathology that may arise from the tissues of the head, neck, and oral cavity.

Prerequisites: Dental hygiene student.

DENT-HYG 3080 Introduction to the Preventive Practice of Dental Hygiene Credits: 4

This course will introduce theories and rationales for basic clinical dental hygiene care (infection control, oral examination and fundamentals of instrumentation) in diverse populations. Practical application of specific clinical skills will be introduced in the classroom and applied in the clinical setting.

DENT-HYG 3080L Preclinical Dental Hygiene Credits: 2

This course emphasizes the practical application of the fundamental concepts and principles of patient care in a diverse society discussed in DENT-HYG 3080. Emphasis is placed on patient assessment and techniques of instrumentation for examination and dental hygiene treatment. After the student has mastered basic skills, he/she will begin to provide direct dental hygiene services.

DENT-HYG 3200 General and Oral Pathology Credits: 2-3

An introduction to the principles of general pathology and organ system pathology including inflammation, immunity and diseases of immune origin, genetic diseases, neoplasia with emphasis on oral cancer, and diseases of selected organ systems including pulmonary, cardiovascular, hematopoietic, endocrine, skeletal, gastrointestinal, hepatic, pancreatic and other systems as time permits.

DENT-HYG 3210 Applied Nutrition and Biochemistry Credits: 2

This course introduces biochemistry and nutrition, encouraging identification of sources and application of specific nutrients for health. Contents familiarize students with roles of nutrition and places emphasis on the hygienist's role as nutritional educator- utilizing skills of recognition, prevention and treatment of related disease(s) and support of good oral health. Topics build on previous knowledge of chemistry, biology and physiology in application to health, coupled with deficient/optimal nutrition. Students will utilize motivational interviewing pertaining to counseling to help patients assign values, prioritize, and meet agreed upon goals. The format will include face-to-face lectures, online supplements, short labs, and group assignments/presentations.

Prerequisites: CHEM 211 and CHEM 211L; LS-PHYS 217.

DENT-HYG 3220 Dental Biomaterials Credits: 2

This course is designed to provide the dental hygiene student with a sound knowledge base in the science and manipulation of dental biomaterials. Through lectures and laboratory session, the student's ability to make clinical judgments regarding the application of dental biomaterials and the ways in which materials react to the oral environment will be enhanced.

DENT-HYG 3260 Principles Of Periodontics Credits: 2

This course in Periodontics will cover the biological and clinical aspects of periodontal health and pathology. An introduction to the supporting structures of the teeth will provide the foundation of understanding pathogenesis, histopathology and subsequent therapeutic treatment of periodontal diseases. The dental hygienist's role in recognition, prevention and treatment of periodontal diseases and maintenance of periodontal health is examined.

DENT-HYG 3280C Dental Hygiene Clinic I Credits: 3

Students will further develop clinical skills and techniques learned in DENT-HYG 3080L and previous courses by providing services to patients.

DENT-HYG 3285 Seminar In Dental Hygiene I Credits: 2-3

This course expands on theory and background presented in DENT-HYG 3080. Topics include expanding dental hygiene skills required for the care of patients and continued development of problem solving abilities and critical thinking skills as they relate to the provision of dental hygiene care. Provide students with a more insightful view of the role of the dental hygienist in the delivery of comprehensive patient care.

DENT-HYG 3300 Radiographic Interpretation Credits: 0.5

The purpose of the course is to introduce interpretation of radiographic anomalies and pathology just prior to the clinical experience. Since there was little time for an emphasis on radiographic interpretation during your second year radiology course, this lecture and participation course supplement clinic instruction in diagnosis of the patient's oral needs and formulation of a treatment plan. Upon completion of this course, the student should be able to recognize simple pathology and radiographic anomalies.

DENT-HYG 3320 Oral Health Behavior Change Credits: 3

The purpose of this hybrid course is to prepare the junior dental hygiene student to effectively assess and individualize preventive oral health care through the use of brief motivational interviewing. The course will include evidenced based information in dental caries and caries risk assessment, caries preventive measures, introduction to periodontal disease, dental stains, and management of xerostomia, halitosis, and dentinal sensitivity, oral healthcare products and how to care for an oral appliance. The student will subsequently apply course concepts to facilitate patient behavior change in the clinical setting. Recommended preparation: a course in General Psychology.

DENT-HYG 3340 Principles Of Public Health Credits: 2

This course introduces the student to principles of public health, the field of epidemiology, health care delivery systems, public health terminology and teaching methodologies to use in culturally diverse community settings. Students will have the opportunity to assess a target population, plan, implement and evaluate appropriate programs. Students will also apply theories and skills of communication and education while preparing and presenting oral health education programs for various population groups.

DENT-HYG 3620 Civic Engagement Credits: 0.25

Service learning experiences expose students with different opportunities to engage the community. Students can choose from approved experiences and participate based on their interest and skill level. Students will research, participate, and reflect on their experiences.

DENT-HYG 4001 Clinical Oral Radiology Credit: 1

Clinical application of radiology principles taught in preceding terms. To provide clinical skills to safely make and interpret radiographic images for the provision of oral health care.

DENT-HYG 4020 Local Anesthesia And Pain Control Credits: 3

This course is designed to prepare dental hygiene students for the safe, effective administration of local anesthesia and nitrous oxide sedation. Included are content areas in anatomy, physiology, pharmacology, and emergency management as they relate to the administration of local anesthetics, nitrous oxide, and pain control. Laboratory sessions are structured to develop actual experiences in administration of local anesthetics and nitrous oxide. Various mechanisms for pain control are also covered. Methods of presentation include lecture, large group discussion, laboratory and clinical participation.

DENT-HYG 4040 Foundations of Teaching Credits: 2

This course provides an introduction to the evidence-based best practices in course design for students who are preparing for a career in teaching and for those who simply wish to learn more about classroom instruction. Students will explore outcomes centered course design and practical and effective instructional strategies. Content application activities include syllabus development, writing objectives, constructing lesson plans, preparing presentations and developing course management sites.

DENT-HYG 4050 Periodontics II Credit: 1

This course in Periodontics will provide an introduction to Phase II and III therapy. Periodontal decision making will be emphasized. The dental hygienists' role in recognition, prevention and treatment of periodontal diseases and maintenance of periodontal health is further examined.

Prerequisites: DENT-HYG 3260.

DENT-HYG 4060C Dental Hygiene Clinic II Credits: 2

The student will continue to develop competency in basic dental hygiene skills. Principles of periodontal techniques, such as non-surgical periodontal therapy, supportive treatment procedures and comprehensive patient care in a diverse society will be emphasized. The student will be asked to demonstrate professional management skills and productivity.

DENT-HYG 4065 Seminar in Dental Hygiene II Credit: 1

This seminar course is offered in conjunction with DENT-HYG 4060C, and expands upon theory and background presented in other dental hygiene courses within the curriculum which will involve further development of their critical thinking/problem solving skills regarding patient care. Students will be provided with further instruction regarding advanced instrumentation, cultural diversity, motivational interviewing and other technological advancements utilized in dental hygiene care.

Co-requisites: DENT-HYG 4060C.

DENT-HYG 4080 Introduction to Research and Evidence Based Decision Making Credits: 2

This is a lecture/discussion course with assigned exercises in the research process and evaluating scientific studies. Students will apply basic principles of research design and methodology to the critical analysis of contemporary oral health related literature focusing on the review and evaluation of literature as it relates to the practice and profession of dentistry and dental hygiene with the intent of utilizing an evidence-based approach to care.

DENT-HYG 4100 Pharmacology Credits: 3

An overview and introduction to the major drug groups and common drugs taken by dental outpatients. Course includes the basic principles and general theories of drug action, basic pharmacokinetics, their mechanisms of action and therapeutic uses and the relative dental significance of each.

DENT-HYG 4110 Introduction to Research Methodologies Credits: 2

This is a lecture/discussion course with assigned exercises in the research process and evaluating scientific studies. Students will learn the basic principles involved in research design and methodology and will apply those principles to the critical analysis of contemporary health related literature. Focus on the review and evaluation of literature as it relates to the practice and profession of dentistry with the intent of utilizing an evidence-based approach to care will be stressed.

DENT-HYG 4115 Practicing in the Dental Hygiene Public Health Safety Net Credits: 3

The course is designed to increase the knowledge base of the practicing dental hygienist in the area of public health dentistry, including health promotion, disease prevention, current legislation, evidence based treatment, school based portable dentistry, coalitions, treating the geriatric and disabled populations, as well as how to write and secure.

DENT-HYG 4120C Dental Hygiene Clinic III Credits: 4

The student will continue to develop competency in intermediate dental hygiene skills. Principles of periodontal techniques, such as root planning, pain control and supportive techniques will be stressed. Comprehensive treatment planning and implementation of comprehensive care to a diverse patient population will be the focus of this course. Continued development of professionalism, management and critical thinking skills will be emphasized.

DENT-HYG 4125 ECP III Training Course Credits: 2

The ECP III Training Course is designed to prepare a registered dental hygienist to apply for the Kansas Extended Care Permit III. Hygienists with the ECP III certificate can practice under the sponsorship of a dentist in a variety of public health settings including schools and long term care facilities in Kansas.

DENT-HYG 4130 Introduction to Instructional Technologies and Online Learning Credit: 1

The web-based multimedia course will examine the mediated communication process using Internet tools and is designed to help the incoming student become prepared to succeed in their degree program using online technologies. Students will examine the changes and challenges associated with mediated synchronous and asynchronous technologies. The course will be delivered in four different modules.

DENT-HYG 4150 Portfolio Capstone Credit: 1

The capstone course serves as the culminating experience for students in the BSDH Degree Completion Program. During the Capstone course, students will create a coherent and cohesive body of work reflective of attainment of the competencies for the BSDHDC program—in the form of an e-Portfolio.

DENT-HYG 4210 Practice Management Credits: 3

Current relevant issues impacting dental hygiene practice are discussed. Dental practice economics, communicating and management in a diverse society are included. Also included in this course is the study of jurisprudence as it relates to the practice of dental hygiene.

DENT-HYG 4220 Interdisciplinary Community Oral Health Field Experiences Credits: 3

Students will practice skills/principles learned in Anchor I-II by participating in interdisciplinary community projects and clinical activities targeting Kansas City's urban and surrounding rural environments. Students will use strategies of assessment, program planning, implementation and evaluation to improve existing, develop new, and reflect on service projects' purposes, methods, and consequences. This course is taught with DENT-HYG 4120. Major emphases include team collaboration/leadership of civic action, community programming to enact measurable and meaningful change, respectful communication considering health literacy and associated disparities among patients and health care providers, to express ideas supporting wellness through improved oral health.

Co-requisites: DENT-HYG 4120.

DENT-HYG 4240 Ethics In Professional Practice Credit: 1

Study of ethics and ethical issue related to the practice of dental hygiene within a diverse society. Includes application of ethical principles to real-life situations.

DENT-HYG 4260 Senior Seminar Credits: 2

This course serves as a means of synthesizing information from all courses in the dental hygiene curriculum and applying content to patient cases and practice management issues. Case-based learning (CBL) will be utilized to review significant content areas as well as to introduce subjects not previously encountered during previous clinical experiences. Case based/problems based learning (PBL) with faculty facilitation will assist students in managing patient cases. This course is also designed to assist in preparing senior dental hygiene students for the written and clinical examinations required for licensure.

DENT-HYG 4260C Dental Hygiene Clinic IV Credits: 4

The student will have the opportunity to reach competency in all clinical skills. Emphasis will be placed on decision-making, problem-solving, critical thinking, appointment and time management. The course will focus on comprehensive dental hygiene care to a diverse population.

DENT-HYG 4320 Special Patient Care Practicum Credits: 2-4

Through outside agency affiliation, students will have the opportunity of applying the course content from Principles of Public Health, Dental Health Education and DHE-Practicum. Sites for participation include hospitals, nursing homes, and residential and day activity centers for developmentally disabled.

DENT-HYG 4340 Community Dentistry Practicum Credits: 2-4

The community dentistry practicum provides the student with an opportunity for personal exploration of the many settings of community dentistry. These experiences may lead the students into clinical activities or design and implementation of dental health educational programs. The student will have the opportunity to work with various community health professionals in the Kansas City area. The student will need reliable transportation and should expect some experiences to require travel.

DENT-HYG 4350 Periodontal Therapy Practicum Credits: 1-4

This course is designed for the dental hygiene student who desires increased experience with periodontal skills. The course involves practical experience in the graduate periodontics clinic working with a periodontology resident. Two clinic sessions per week; one seminar scheduled weekly.

DENT-HYG 4360 Practice Management Practicum Credits: 3

Current relevant issues impacting dental hygiene practice are discussed. Dental practices, economics, communication and management are included. Practical application of course would include the development of a dental office operating manual.

DENT-HYG 4380 Research Practicum Credits: 2-4

This course provides an opportunity to apply the content in the previous course Introduction to Research Design. The protocol identified may be a basic science, clinical or community dental hygiene problem. The field experience may deal with a basic or applied, descriptive or explanatory research question.

DENT-HYG 4500 Seminar on Issues in Higher Education for Health Professionals Credits: 2-4

This course is designed to introduce the student to matters encountered in higher education. specific to dental hygiene education. Weekly readings, assignments, and sessions will familiarize the student in topics such as: writing resumes and cvs, case-based learning, accreditation, promotion and tenure, and assessment.

DENT-HYG 4600 Evidence Based Decision Making in the Clinical Practice of Dental Hygiene Credits: 2-4

This course is designed for the graduate and degree completion dental hygiene student and expand on the student's basic knowledge of the dental hygiene process of care. Utilization of evidence based decision making skills will be explored in an effort to incorporate current scientific literature, personal clinical experience and patient preferences as it relates to the delivery of comprehensive patient care. Skills taught in this course will enhance background knowledge related to the dental hygiene process of care and help to foster an attitude of critical analysis and lifelong learning.

DENT-HYG 4620 Introduction to Educational Methodology Credits: 3

This course is designed to introduce the student to basic educational methodologies and to provide participants with a better understanding of the teaching/learning process. The course includes units on instructor/student relationships, educational approaches, educational ethics and professionalism, the scholarship of teaching and learning and curriculum theory.

DENT-HYG 4625 Dental Hygiene Administration Credits: 2

This course is designed for the post-certificate dental hygiene student. Major topic areas include accreditation of dental hygiene programs, the impact of National and State Board examinations on curriculum planning, selective admissions policies and procedures, faculty evaluation, promotion and tenure and students' rights.

DENT-HYG 4630 Practicum in Dental Hygiene Administration Credits: 2-4

Under the supervision of the Director of Dental Hygiene, the student will gain actual experiences in the daily administration of a dental hygiene program. The student may contract for responsibilities such as admissions, budget preparations, course scheduling, report writing and student academic counseling.

DENT-HYG 4635 Practicum In Clinical Supervision Credits: 2-4

Under the supervision and permission of the Dental Hygiene Clinical Supervisor, the student will gain actual experience in the duties involved in coordinating the clinical education of a dental hygiene student. The student may contract for responsibilities such as, coordinating mock board examinations, maintaining student clinical records, developing faculty and student clinic schedules and report writing.

DENT-HYG 4640 Student Teaching and Conference I Credits: 2-4

Under the direction of a supervising professor, the student may select teaching experience in the classroom areas of their choice. The student develops behavioral course objectives, comprehensive lesson plans, test and examination items, classroom presentations, and prepares student evaluations in the selected classroom teaching areas. The student may select teaching assignments in one of the developed externship student teaching programs. Conferences will be held in conjunction with the course.

Prerequisites: DENT-HYG 4040, DENT-HYG 4620.

DENT-HYG 4650 Student Teaching and Conference II Credits: 2-4

The student will continue to develop teaching skills in laboratory and/or classroom areas as selected by the student under the direction of a supervising professor.

Prerequisites: DENT-HYG 4640.

DENT-HYG 4660 Independent Study in Dental Hygiene Credits: 1-4

This course is designed for the dental hygiene student who desires independent study of a particular problem or area of interest in dental hygiene education.

DENT-HYG 4680 Dental Hygiene Clinical Instruction I Credits: 2-4

Continued development of competency as a clinical instructor under the supervision of the dental hygiene faculty. Requires a half-day in clinic student instructor.

Prerequisites: DENT-HYG 4640.

DENT-HYG 4685 Dental Hygiene Clinical Instruction II Credits: 1-4

A continuation of DENT-HYG 4680. Under the supervision of the dental hygiene faculty, students may continue to develop skills as a dental hygiene clinical instructor.

Prerequisites: DENT-HYG 4680.

Discourse (DISC)

Courses

DISC 100 Discourse I: Reasoning and Values (Speech and Writing) Credits: 3

"Discourse" refers to the language, images, styles, genres, behaviors and other forms of communication used by specific social and professional groups. The techniques of discourse analysis and language awareness taught in this course will enable you to position yourself socially and professionally, helping you understand the discourse conventions, reasoning, and "commonsense" assumptions that create and define academic, political, professional, and other discourse formations and communities. Students will produce, perform, and analyze college-level, oral and written texts; and they will learn how written and oral performances function together in specific discourse communities.

Co-requisites: Anchor I.

DISC 200 Discourse II: Culture and Diversity (Writing and Speech) Credits: 3

Students will produce, perform, and analyze college-level, oral and written texts that are based on sustained academic research. Students will continue to develop their understanding of discourse analysis and language awareness in the context of a range of discursive forms. Students will interpret and synthesize college-level scholarship that addresses how diverse discourse communities define, evaluate, and transform individual, institutional, and cultural identities.

Prerequisites: DISC 100.

Co-requisites: Anchor II.

DISC 300 Discourse III: Civic and Community Engagement (Speech and Writing) Credits: 3

Students will put the knowledge and skills learned in Discourse I and II into practical use by engaging in a service-learning project that is interdisciplinary and intercultural. Students will use strategies of critical discourse analysis and critical language awareness to target the appropriate audience/recipients for their research project, to develop innovative and rhetorically effective texts, and to reflect on their project's purpose, methods, and consequences.

Prerequisites: DISC 200.

Co-requisites: Anchor III.

DISC H100 Discourse I: Reasoning and Val Credits: 3

"Discourse" refers to the language, images, styles, genres, behaviors and other forms of communication used by specific social and professional groups. The techniques of discourse analysis and language awareness taught in this course will enable you to position yourself socially and professionally, helping you understand the discourse conventions, reasoning, and "commonsense" assumptions that create and define academic, political, professional, and other discourse formations and communities. Students will produce, perform, and analyze college-level, oral and written texts; and they will learn how written and oral performances function together in specific discourse communities.

Co-requisites: Anchor I.

DISC H200 Discourse II: Culture and Diversity (Writing and Speech) Credits: 3

Students will produce, perform, and analyze college-level, oral and written texts that are based on sustained academic research. Students will continue to develop their understanding of discourse analysis and language awareness in the context of a range of discursive forms. Students will interpret and synthesize college-level scholarship that addresses how diverse discourse communities define, evaluate, and transform individual, institutional, and cultural identities. This course is associated with the anchor course Culture and Diversity and prepares students for DISC 300.

Prerequisites: DISC 100.

Co-requisites: Anchor II.

DISC H300 Discourse III: Civic and Community Engagement (Speech and Writing) Credits: 3

Students will put the knowledge and skills learned in Discourse I and II into practical use by engaging in a service-learning project that is interdisciplinary and intercultural. Students will use strategies of critical discourse analysis and critical language awareness to target the appropriate audience/recipients for their service project, to develop innovative and rhetorically effective texts, and to reflect on their project's purpose, methods, and consequences. This course is taught in close connection with the anchor course Civic and Community Engagement.

Prerequisites: DISC 200.

Co-requisites: Anchor III.

Economics (ECON)

Courses

ECON 100 Economics Explained Credits: 3

Everything you need to know about how the economy works and where it's going. This course simplifies and clarifies the vocabularies and concepts used to describe all the important economic phenomenon in our society today: unemployment, trade deficits, government budget deficits or surpluses, inflation, investments, and customer debt. It describes where we've been (economically) and assess the future of the economic system we call capitalism.

ECON 100 - MOTR ECON 100: Introduction to Economics

**ECON 150 Introduction To Labor Studies Credits: 3**

This interdisciplinary course offered by The Institute for Labor Studies, covers the role of workers and the labor movement in society and the American political and economic system. Students will gain an overview, from a labor viewpoint, of the organization of work and workers, collective bargaining and representation, and labor's rights, roles, and strategies in a democracy and in the global economy. A particular focus will be the image of the working class and organized labor in the media and among public perception.

ECON 201 Introduction to Economics I Credits: 3

Economics I deals primarily with macroeconomic or national economic concepts, the economics of the determination of recession, inflation, maintenance of full employment and economic growth, with an emphasis upon the economics of modern Keynesian analyses. It further introduces the economics of Marx and Ayres and discusses relevant and current economic issues. ECON 201 and ECON 202 are prerequisites for most other economics courses.

ECON 201 - MOTR ECON 101: Introduction to Macroeconomics

ECON 202 Introduction To Economics II Credits: 3

Economics II deals primarily with microeconomics, firm analysis, the principles of demand, supply, elasticity, price determination, costs, income distribution, market structures, trade, and other related social, economic issues. ECON 201 and ECON 202 are prerequisites for most other economics courses.

ECON 202 - MOTR ECON 102: Introduction to Microeconomics**ECON 301 Macroeconomic Analysis Credits: 3**

This course provides more in-depth analysis of the macroeconomy. It examines the economic system as a whole and the ways in which its functioning is affected by the behavior of the interdependent sectors of which it is composed. It details the major factors affecting national income and the use of sectoral accounts in analyzing economic prospects and policies.

Prerequisites: ECON 201.

ECON 302 Microeconomic Analysis Credits: 3

This course provides in-depth analysis of the microeconomy. It examines the functioning of the individual enterprise and households. It specifically details problems confronting business enterprises operating under different types of market situations. It features analyses of the influence of the prices factors of production on methods of production and the effects that changes in income levels and in relative prices have on sales of different types of goods and services.

Prerequisites: ECON 202.

ECON 303H Special Issues In Economic Credits: 3

Readings and discussions of selected economic topics. Content varies over time as economic conditions change. Designed for outstanding students in Principles of Economics.

ECON 314 Political Economy of Race, Class And Gender: Theory, History, And Policy Credits: 3

Analyzes how the political economy of race, class and gender discrimination result in differences in opportunities and outcomes in society. Begins with an introduction to political economy. Then moves to an historical overview of the origins of oppression based on gender (patriarchy), class and race and their relation to the rise and development of capitalism. Discursive and non-discursive factors are investigated. Alternative theoretical approaches to understanding the intersections of race, class, and gender are evaluated. Policy debates on issues related to affirmative action, education, welfare, employment, and others are considered.

ECON 331 Money And Banking Credits: 3

A study of the structure, operations and problems of banks and other financial institutions with emphasis on their macroeconomic performance. The importance of banking in the financial system and the influence of Federal Reserve monetary policies are also studied.

Prerequisites: ECON 301.

ECON 336 The Kansas City Economy Credits: 3

This course explores the Kansas City economy in depth from both a micro and macro perspective. The macro approach details how important the Kansas City economy is to the state of Missouri, to the US economy, and in the international arena. The micro approach details the contribution of the many different sectors of the KC area to the overall local economy.

ECON 340 Collective Bargaining Credits: 3

This course involves a study of the economics and process of collective bargaining in the labor sphere, including contract negotiations, contract enforcement, and methods to resolve bargaining disputes. Both theoretical and applied issues in collective bargaining will be addressed. Students will participate in a contract bargaining simulation.

ECON 341 Union Leadership and Administration Credits: 3

This course focuses on the roles and challenges of union leadership in a changing environment. Topics include the union leaders' role as a representative, organizer and educator as well as administrative responsibilities within the union and the relationship with enterprise management in both adversarial and participatory situations. Options for leadership styles and organizational models will be discussed and explored in both theory and practice. Leaders will develop their skills of motivation, speaking, strategic planning and managing complex campaigns and diverse organizations.

ECON 353 Financial Analysis And The Economy Credits: 3

This course examines techniques of financial evaluation used by individuals, corporate managers, and portfolio analysts. Focus of the course will be on the interaction of the mechanics of analytical methods and economic activity. Topics covered will include individual portfolio building, asset evaluation, and financial market theory.

Prerequisites: ECON 301.

ECON 395A Economic Issues Credit: 1**ECON 395C The Economics Of Energy Credit: 1****ECON 402 Labor and the Global Political Economy Credits: 3**

This course will examine current issues, trends, and developments which are shaping labor in today's global economy. Students will analyze the shifting balance of power between labor and capital, the role of government, and evaluate the strategic options for workers and unions operating in a global environment.

ECON 404R American Economic History Since 1865 Credits: 3

The course deals with the emergence of Industrial American since 1865. It covers the rise to dominance of the large modern corporation, the problem of economic and social instability and stability, the rise of trade associations, cartels, and government regulation in an unstable economy, and the evolution of American economic policy and national economic planning.

ECON 404RR American Labor History Credits: 3

This course examines history of work and the working class in the U.S. from 1750 to the present. We will focus on the transformation of the workplace, the rise of the union movement, the nature of cultural and political organizations, workers' relationships with other social groups, and the role played by gender, race, and ethnicity in uniting or dividing the working class.

ECON 406WI History Of Economic Thought Credits: 3

Analysis of basic concepts of economic thought, their historical sources and significance.

ECON 411 Geographic Information Systems (GIS) for Urban Economic Development Credits: 3

An advanced quantitative methods course featuring the application of Geographic Information Systems (GIS) to the problems of urban economic development. Surveys federal, state, and local geospatial and attribute data resources, including Census Bureau TIGER files, and provides training in geodatabase construction and management. Geospatial processing, editing, and address geocoding are also covered. Formal analytical methods (cartographic aesthetics and visualization, spatial analysis, exploratory data analysis, network analysis, crime analysis, etc.) are all applied in the context of the problematics of urban and regional economic development.

Prerequisites: GEOG 203 or UPD 203.

ECON 412 International Trade And Development Credits: 3

This course emphasizes the global allocation of resources and distribution of income in the analysis of economic development and international trade. Major topics include various theories of economic development, comparative advantage, terms of trade, tariffs, quotas, economic integration and the use of trade to foster economic development.

Prerequisites: ECON 301.

ECON 416 Law And Economics Credits: 3

This course will examine the use of economic principles in the analysis and application of public and private law. Emphasis will be given to the efficiencies of laws in meeting social objectives, how laws can be modified to become more economically efficient, and the uses of economics in the actual practice of the law. Issues covered will include proofs of liability in antitrust, contracts and employment law using statistical and economic analysis, and the calculation of economic damages in commercial, employment and personal injury/death litigation. Graduate students will be assigned a specific research paper.

ECON 420 Environment, Resources And Economic Growth Credits: 3

This course focuses on the theory and policy issues involved in resource recreation and depletion; environmental destruction, preservation and recreation; and the interrelation of these problems of and prospects for economic growth.

ECON 421 Mathematical Economics Credits: 3

An introduction to mathematical methods as applied to the questions addressed by economists. The principal methods to be applied are matrix algebra and differential calculus in the context of optimization. Other topics may include integral calculus, differential equations, difference equations, or linear and non-linear programming.

Prerequisites: ECON 301, ECON 302 and (MATH 206 or MATH 210).

ECON 425 Intermediate Economic Statistics Credits: 3

An introduction to the empirical side of economics. Estimation theory and the properties of commonly used estimators are covered. Some of the more important topics dealt with are: multiple regression, heteroscedasticity and autocorrelation in regression analysis, analysis of variance and the use of qualitative variables in regression analysis. Hands-on work with computer software designed for econometrics is stressed. No experience with computers necessary.

Prerequisites: ECON 301 and ECON 302.

ECON 429 Environment, Resources And Economic Growth Credits: 3

This course focuses on the theory and policy issues involved in resource creation and depletion; environmental destruction, preservation and recreation; and the interrelation of these problems of and prospects for economic growth.

Prerequisites: ECON 201, ECON 202.

ECON 431 Monetary Theory And Policy Credits: 3

A study of the nature and functions of money and the financial system, with emphasis on monetary theory and its application to current banking and financial problems. Recent contributions to monetary theory and current literature.

Prerequisites: ECON 201, ECON 202, ECON 301.

ECON 435 Public Finance Credits: 3

Problems of public and private sector decision making of revenue-expenditure policies and an examination of the actual legal, political and economic policies for revenues and expenditures of federal, state and local governments.

Prerequisites: ECON 201, ECON 202, ECON 302.

ECON 437 State And Local Government Finance Credits: 3

This course investigates the role, problems and relative importance of municipal governments in the United States. Such areas as the demand for public services, tax and expenditure policies, and intergovernmental fiscal relations will be explored in detail. Case studies of state and local governments will be introduced to emphasize the problems and proposed solutions arising in modern municipal governments.

Prerequisites: ECON 201, ECON 202, ECON 302.

ECON 438 Economic Policy Credits: 3

Analysis of the confluence of political and economic behavior, the economics of collective action.

Prerequisites: ECON 201, ECON 202, ECON 301 and ECON 302.

ECON 442 International Finance Credits: 3

This course emphasizes the global activity and balance of payments implications of government taxation, expenditure and monetary policies under various capital market conditions. Major topics include: exchange rates and the balance of payments; national income determination in an open economy; integrated and non-integrated capital markets; economic growth stabilization policies and the quest for global economic stability.

Prerequisites: ECON 201, ECON 202, ECON 301.

ECON 451 Institutional Economic Theory Credits: 3

Analysis of impact of modern philosophy and developments in social sciences on economic theory.

ECON 458 Urban Economics Credits: 3

An inquiry into the economics of location decisions and the influence of these on urban growth and on the real estate market; the evaluation of urban transportation and other public services; an examination of economic development of ghetto neighborhoods.

Prerequisites: ECON 302.

ECON 460 Industrial Organization Credits: 3

The structure, conduct, and performance of American industry. Historical evolution of American industry; alternative industrial systems. Antitrust policies and their alternatives. Technological change and industrial performance.

Prerequisites: ECON 302.

ECON 475 Economics Institutions and Policies Credits: 3

This course focuses on the economic system analysis of labor market phenomena in the context of historical-institutional development and labor market policies, this course is offered winter semester only.

Prerequisites: ECON 201 and ECON 202.

ECON 486 Labor Economics Credits: 3

An examination of the theories of wage determination, the economic effects of wage determination upon the wage structure, the distribution of national income, employment, and an introduction to collective bargaining.

Prerequisites: ECON 301 and ECON 302.

ECON 488 Radical Political Economy Credits: 3

This course will cover the ideas that constitute radical political economy. It will show how radical political economy can be used to examine current economics and social problems and will outline possible economic structures of utopian visions.

Prerequisites: ECON 201, ECON 202.

ECON 490 Readings In Economics Credits: 1-3

Intensive reading and/or research in an area selected by the student in consultation with the professor in any of the following fields: (a) economic theory, (b) history of economic thought, (c) labor economics, (d) urban economics, (e) monetary and fiscal policy and theory, (f) international economics, (g) economic development. (h) comparative economic systems, (i) public finance, (j) public policy toward business, (k) quantitative economics.

Prerequisites: ECON 201, ECON 202.

ECON 496 Practicum in Urban Economic Development Credits: 3

The Practicum in Urban Economic Development provides students with the opportunity to integrate and apply the knowledge and skills developed through previous coursework to real-world problems of urban economic development. Working on collaborative, service-learning projects in partnership with both community and metropolitan-level organizations, students will engage with the process of applied urban economic development in a team-structured context. Student teams will be each be responsible for one term project over the course of the semester. The course will culminate with the public presentation of project outcomes.

Prerequisites: ECON 336, ECON 458.

ECON 497 Internship Credits: 1-6

The course allows the student to participate in cognate, approved internships of a professional nature.

Prerequisites: ECON 201 and ECON 202; completion of 75 credit hours and undergraduate major or graduate student in Economics.

Education (EDUC)

Courses

EDUC 149 Economics In The K-8 Classroom Credits: 3

This course is designed to help students develop an understanding of economic concepts and principles and to raise their level of comfort for infusing these concepts throughout the K-8 curriculum. Special attention will be given to both national and state economic standards.

EDUC 160 Career And Life Planning Credits: 3

Skill development in career planning through processes of self-assessment and self-development and analyzing the structure of the world of work and occupational information, values, clarification and decision making, vocational exploration and preparation for employment.

EDUC 180 Introduction To Education Credits: 2

The course will present an overview of education today for those who have a general interest in education or are considering becoming educators. The curriculum provides students with an introduction to current issues in education while incorporating skills needed for academic success. Students will also have the opportunity to gain experience in a K-12 classroom setting (2 credit hours).

EDUC 189 Special Topics Credits: 1-6

An undergraduate course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors and prerequisites to be listed in the semester bulletin.

EDUC 289 Special Topics Credits: 1-6

An undergraduate course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors and prerequisites to be listed in the semester bulletin.

EDUC 389 Special Topics Credits: 1-6

An undergraduate course designed to deal with a topic which is not available in the regular course offerings.

EDUC 402R Algebraic Thinking for Teachers Credits: 3

Designed for middle and secondary school mathematics teacher candidates to [re]evaluate conceptions of learning and teaching algebraic concepts across elementary, middle, and high school levels. Course topics include mathematical habits of mind, defining algebra, building number sense to develop algebraic thinking, generalizing functional relationships, and representing mathematical ideas.

EDUC 414 English Language Study In Elementary And Secondary Schools Credits: 3

Designed as a review of traditional as well as descriptive and historical approaches to grammar, usage and syntax - focusing upon teaching strategies for elementary, junior high, middle school, and senior high English/language arts classrooms.

EDUC 428 Cultural Diversity And American Education Credits: 3

An examination of educational needs and strategies in a culturally diverse society based on a study of several major ethnic and nationality groups in America from historical, anthropological and sociological perspectives. This course may be team-taught.

EDUC 434 Classroom Diagnosis And Correction Of Reading Problems Credits: 3

Procedures for the diagnosis and correction of reading problems which are appropriate for classroom teachers.

Prerequisites: TCH-ED 415.

EDUC 440 Literature For Adolescents Credits: 3

Focus upon literature for adolescents and ethnic literature, specifically, and upon the special reading interests of the adolescent in relation to the methods and materials of reading in grades 7-12, generally. Attention to literature selection standards, censorship, individualized instruction, and reader response.

EDUC 489 Special Topics Credits: 1-6

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors and prerequisites to be listed in each semester's bulletin.

EDUC 497 Individual Study Credits: 1-6

Guided study of a selected topic in education.

Education Research and Psychology (EDUC-R&P)

Courses

EDUC-R&P 255 Understanding Data Through Sports: Sabermetrics Credits: 3

Non-theoretical approach to data analysis using applications and examples from the world of sports.

Electrical and Computer Engineering (E&C-ENGR)

Courses

E&C-ENGR 130 Engineering Graphics Credits: 3

Introduction to Engineering Graphics with the use of the Computer Aided Design tools AutoCAD and SolidWorks. Introduction to 2D design with AutoCAD and introduction to 3D design with SolidWorks. Also an introduction to electrical circuit diagrams. No previous 2D or 3D CAD experience is necessary to take this class.

E&C-ENGR 216 Engineering Computation Credits: 4

Development, analysis and synthesis of structured computer programs for solving engineering problems in the Python, MATLAB, and C languages. Introduction to algorithms and data structures.

Prerequisites: MATH 110 or MATH 120 (or higher) or ALEKS score of 51 (or higher); or ACT Math sub-score of 28 or higher; or SAT Math sub-score of 660 or higher.

E&C-ENGR 217 Engineering Computation Credits: 2

Students learn to develop, analyze and synthesize structured computer programs for solving engineering problems in the Python, MATLAB, and C languages. This course also provides an introduction to algorithms and data structures. This course is available by approval of the degree program committee if transfer credit has been approved for one of the listed programming languages.

Prerequisites: MATH 110 or MATH 120 (or higher) or ALEKS score of 51 (or higher); or ACT Math sub-score of 28 or higher; or SAT Math sub-score of 660 or higher.

E&C-ENGR 226 Logic Design Credits: 3

Design of combinational logic circuits, logic minimization techniques, design of sequential logic circuits, state machine design techniques, digital system design.

Co-requisites: E&C-ENGR 227.

E&C-ENGR 227 Logic Design Laboratory Credit: 1

Laboratory for E&C-ENGR 226. Experimental topics related to the design of combinational and sequential logic systems and small digital systems.

Co-requisites: E&C-ENGR 226.

E&C-ENGR 228 Introduction to Computer Design Credits: 3

This course covers computer organizations and fundamental computer design techniques. It also discusses design of computer data unit, control unit, input-output, microprogramming. Memory systems (RAM memory, Cache memory, interrupts, secondary memory) and direct memory access design is also discussed. Verilog HDL design is introduced and applied to small digital systems.

Prerequisites: E&C-ENGR 226 and E&C-ENGR 227.

Co-requisites: E&C-ENGR 229.

E&C-ENGR 229 Introduction to Computer Design Laboratory Credit: 1

This laboratory course covers experimental topics related to the design of digital computer systems and arithmetic circuits which students study in the E&C-ENGR 228.

Prerequisites: E&C-ENGR 226 and E&C-ENGR 227.

Co-requisites: E&C-ENGR 228.

E&C-ENGR 241 Applied Engineering Analysis I Credits: 3

Partial differentiation, multiple integrals, first and second order ordinary differential equations, partial fractions, and Laplace transform solution of Ordinary Differential Equations.

Prerequisites: MATH 220 or MATH 268 (with a grade of C or better).

E&C-ENGR 250 Engineering Mechanics and Thermodynamics Credits: 3

This course concentrates on practical concepts in mechanics and thermodynamics for EC-ENGR majors, such as the practical use of forces, moments, couples, centroids, and moment of inertia, friction, manipulating systems of rigid bodies in motion and applying conservation of energy to gases, liquids, and solids. Materials will also be addressed.

Prerequisites: MATH 220 or MATH 266; and PHYSICS 240 (both with a grade of C or better).

E&C-ENGR 276 Circuit Theory I Credits: 3

Kirchoff's circuit laws, Ohm's Law, nodal and mesh analyses, source transformations, superposition, Thevenin and Norton equivalents, transient analysis of 1st and 2nd order systems. AC circuit analysis, phasors, impedance, sinusoidal steady-state responses, operational amplifiers and PSpice.

Prerequisites: PHYSICS 250 and E&C-ENGR 241 (or MATH 345 as a pre or co-req) with a grade of C or better.

E&C-ENGR 277 Circuit Theory I Lab Credit: 1

Introduction to the use and limitations of basic instruments used in electrical testing and measurement. Experimental techniques and laboratory safety. Data gathering, interpretation and presentation. Preparation of laboratory reports. Experimental work supporting theoretical concepts developed in E&C-ENGR 276.

Co-requisites: E&C-ENGR 276.

E&C-ENGR 302 Electromagnetic Waves and Fields Credits: 3

Elements of vector calculus: curl, gradient and divergence differential operations; vector identities; integration of vectors Stokes and Gauss's theorems, laplacian; review of electrostatic and magnetostatic fields; boundary value problems; boundary conditions; time-harmonic fields and phasors; Maxwell's equations, Poynting vector; vector and scalar wave equations; electromagnetic wave propagation in free-space, lossy and lossless dielectrics and conductors; polarization; reflections at normal and oblique incidences; transmission line parameters; telegraphers equations; input impedance and VSWR; Smith Chart and impedance matching; transients on transmission lines.

Prerequisites: E&C-ENGR 341R, E&C-ENGR 376.

Co-requisites: E&C-ENGR 303.

E&C-ENGR 303 Electromagnetic Waves and Fields Lab Credit: 1

The goal of the lab is to complement and demonstrate the main concepts of transmission line and microwave theory using hands on experiments. The experiments will introduce students to microwave sources, components, and transmission lines. Moreover, the experiments will demonstrate the concepts of wave propagation, attenuation, power splitting, reflection, and standing waves. Moreover, students will design and conduct experiments to characterize unknown loads and antennas. Recommended preparation: MATLAB knowledge/proficiency.

Co-requisites: E&C-ENGR 302.

E&C-ENGR 330 Electronic Circuits Credits: 3

Application of operational amplifiers, semiconductor device physics, elementary analysis and design of analog electronic circuits that utilize diodes, BJT's, and MOSFET's in single and multistage amplifiers with passive loads and power amplifiers; DC biasing, small signal analysis and calculation of frequency responses. The use of CAD (Spice) in the analysis and design of electronic circuits.

Prerequisites: E&C-ENGR 276 and E&C-ENGR 334.

Co-requisites: E&C-ENGR 331.

E&C-ENGR 331 Electronic Circuits Laboratory Credit: 1

Laboratory experiments in the application of operational amplifiers, the analysis, design, and testing of single and multistage amplifiers with passive loads, and the measurement of frequency response. Recommended preparation: E&C-ENGR 276, E&C-ENGR 277.

Co-requisites: E&C-ENGR 330.

E&C-ENGR 334 Semiconductors and Devices Credits: 3

Junction theory, semiconductor diodes and models, bipolar transistors and models, field-effect transistors and models, selected electron devices and models.

Prerequisites: E&C-ENGR 341R, PHYSICS 250.

E&C-ENGR 341R Applied Engineering Analysis II Credits: 3

Complex numbers; Euler's formulas, analytic functions, Taylor and Laurent series; Cauchy residue theorem and application to evaluation of integrals; linear algebra, eigenvalue and eigenvectors; Fourier series and transforms.

Prerequisites: E&C-ENGR 241 (with a grade of C or better).

E&C-ENGR 358 Introduction to Control Systems Credits: 3

Study of feedback techniques, with applications to control systems. Includes modeling, applications of Bode plot, root locus, state-variable, and Nyquist methods.

Prerequisites: E&C-ENGR 376.

E&C-ENGR 376 Circuit Theory II Credits: 3

Power, transformers, three-phase circuits, two-port networks, the theory and application of Laplace Transforms.

Prerequisites: E&C-ENGR 276.

Co-requisites: E&C-ENGR 377.

E&C-ENGR 377 Circuit Theory II Lab Credit: 1

Continuation of E&C-ENGR 277 introducing the use of additional instruments used in electrical testing and measurements. Statistical data evaluation methods. Experimental work supporting concepts developed in E&C-ENGR 376.

Prerequisites: E&C-ENGR 277.

Co-requisites: E&C-ENGR 376.

E&C-ENGR 380 Signals and Systems Credits: 3

Continuous and discrete-time signals and systems, frequency response, Fourier analysis of discrete and continuous signals and systems and use of z, Fourier, Discrete Fourier, and Fast Fourier Transforms.

Prerequisites: E&C-ENGR 341R.

Co-requisites: E&C-ENGR 381.

E&C-ENGR 381 Signals and Systems Lab Credit: 1

Computer Laboratory for E&C-ENGR 380. Various signal processing software programs (MATLAB and DSP) are used to investigate properties and applications of continuous and discrete time signals and systems.

Co-requisites: E&C-ENGR 380.

E&C-ENGR 400 Problems in Electrical and Computer Engineering Credits: 1-4

Analytic or experimental problems pertaining to electrical or computer engineering.

Prerequisites: Departmental consent.

E&C-ENGR 401 Topics In Electrical And Computer Engineering Credits: 1-4

Topics covering current and new technical developments in electrical or computer engineering.

Prerequisites: Senior standing.

E&C-ENGR 401PQ Topics in Electrical Engineering Credits: 1-4

Topics covering current and new technical developments in electrical or computer engineering.

Prerequisites: Senior standing.

E&C-ENGR 402 Senior Design I Credits: 2

First capstone design course in electrical and computer engineering. Provides and accounts for laboratory, library, research and other work needed for the development of the project. Stresses oral presentations.

Prerequisites: E&C-ENGR 330 and E&C-ENGR 420 or E&C-ENGR 466.

E&C-ENGR 403 Senior Design II Credit: 1

Second capstone design course in electrical and computer engineering. Project management, professional practice, ethical and engineering economic considerations and development of written and oral presentation skills. Provides laboratory experience in prototyping, fabrication, and troubleshooting of the design project. Stresses written and oral presentation.

Prerequisites: E&C-ENGR 402.

E&C-ENGR 412 Principles of RF/Microwave Engineering Credits: 3

General aspects of TE, TM and TEM mode propagation in waveguides; circular waveguides; optical waveguides; wave propagation on dielectric backed conductors; wire antennas; equivalence principle and aperture antennas; antenna impedance and mutual coupling in arrays; array beamforming; scattering matrix representations; impedance matching; resonators; filters, couplers and power-dividers; microstriplines and striplines; r.f. propagation in wireless and radar systems; conformal mapping techniques and applications (optional). Recommended preparation: MATLAB proficiency.

Prerequisites: E&C-ENGR 302, E&C-ENGR 380, E&C-ENGR 381.

E&C-ENGR 414 Microwave Engineering for Wireless Systems Credits: 3

Microwave networks; s-, z-, y- and abcd matrices; signal flow graphs; circular waveguides; stripline microstrip characteristics; impedance transformers; power dividers and directional couplers; microwave filters; microwave resonators; active microwave circuits.

Prerequisites: E&C-ENGR 302, E&C-ENGR 380, MATLAB proficiency.

E&C-ENGR 415 Microwave Engineering for Wireless Systems Lab Credit: 1

Design performance simulation of microwave filters and active microwave circuits; comparative analysis of impedance transformers; use of CAD tools in microwave circuit design.

Prerequisites: E&C-ENGR 414.

E&C-ENGR 416 Neural and Adaptive Systems Credits: 3

A hands-on introduction to the theory and applications of neurocomputing. Includes classification, function approximation, supervised and unsupervised learning, time series analysis, and adaptive filtering using different feed-forward and recurrent artificial neural networks.

Prerequisites: COMP-SCI 394R, E&C-ENGR 341R.

E&C-ENGR 418 Introduction to Radar Systems Credits: 3

Radar equation; MT, Pulsed Doppler and Tracking Radars; detection of and information from radar signals; radar antennas; transmitters and receivers; radar propagation and clutter.

Prerequisites: E&C-ENGR 302, E&C-ENGR 380, E&C-ENGR 381.

E&C-ENGR 420 Advanced Engineering Computation Credits: 2

Programming and computational analysis principles and techniques for various problems in embedded programming, applied computation, and signal processing.

Prerequisites: E&C-ENGR 216.

E&C-ENGR 426 Microcomputer Architecture and Interfacing Credits: 3

Advanced microprocessor architecture and programming; interfacing and programming of peripherals. Parallel and serial communication, interrupts, direct memory access, coprocessors.

Prerequisites: E&C-ENGR 226.

E&C-ENGR 427 Microcomputer Laboratory Credit: 1

Laboratory for E&C-ENGR 426. Microprocessor hardware and software involving interfacing of peripherals to 8-bit and 16-bit microprocessor. Simple D/A conversion, music composition, and various programmable controllers.

Prerequisites: E&C-ENGR 227.

Co-requisites: E&C-ENGR 426.

E&C-ENGR 428R Embedded Systems Credits: 3

This course examines the hardware/software aspects associated with developing microcontroller-based computer systems. The students learn about the architecture and assembly language for popular microcontrollers and how to take advantage of a variety of input/output options that include binary ports, A/D and D/A converters, communication ports, and interfacing techniques for various applications.

Prerequisites: E&C-ENGR 426, E&C-ENGR 427.

Co-requisites: E&C-ENGR 429.

E&C-ENGR 429 Embedded Systems Laboratory Credit: 1

The laboratory introduces the students to a variety of challenging design projects using microcontroller interfacing techniques to develop real world applications, such as digital thermometer and digital pressure monitoring systems. Students must produce an individual design project.

Prerequisites: E&C-ENGR 426, E&C-ENGR 427.

Co-requisites: E&C-ENGR 428R.

E&C-ENGR 436 Power Electronics I Credits: 3

Power electronic device characteristics, important circuit and component concepts, phase controlled rectifiers, line communicated inverters and AC phase control. Includes laboratory projects.

E&C-ENGR 442 Introduction to VLSI Design Credits: 3

The goal of this course is to familiarize students with the design fundamentals and layout of Very Large Scale Integrated (VLSI) Circuits. The primary focus of this course is complementary MOSFET (CMOS) based digital integrated circuits design and analysis. However, the topics regarding transistor, interconnect, and circuit implementation are relevant to digital, analog and mixed-signal integrated circuits. This course is designed to be a comprehensive foundation for advanced micro- and nano-electronics courses. To familiarize the students with the realities of design complexities they will get exposure to commercial CAD tools in a separate lab co-requisite class. Recommended preparation: Basic Electronics.

Prerequisites: E&C-ENGR 330.

E&C-ENGR 443 Introduction to VLSI Design Laboratory Credits: 3

The goal of this course is to teach basic design concepts and implementation issues of digital integrated circuits. Various methods of designing and optimizing very large scale integrated (VLSI) circuits will be introduced in the lab projects. To familiarize students with the realities of integrated circuit design and layout, they will get exposure to industry-standard computer aided design (CAD) and simulation tools for VLSI circuits and systems. The students will be using these CAD tools in the following levels – schematic, layout, parasitic extraction, and circuit simulation.

Co-requisites: E&C-ENGR 330.

E&C-ENGR 454 Robotic Control and Intelligence Credits: 3

Introduces robotics; robot system characteristics; robot motive power systems; geometric structure of robots; sensors and feedback; control applications and algorithms; data acquisition and output actuation functions; robots and Artificial Intelligence; microprocessor applications in robotics.

Prerequisites: E&C-ENGR 226 (or E&C-ENGR 426), E&C-ENGR 358.

E&C-ENGR 455 Instrumentation and Control Credits: 3

The instrumentation and control of industrial processes and systems, introduction to Programmable Logic Controllers, and simulation modeling of various systems.

Prerequisites: E&C-ENGR 358.

E&C-ENGR 457 Fundamentals of Solar Photovoltaic Cells Credits: 3

The science and engineering of solar cell/solar photovoltaic (PV) spans several disciplines namely physics, chemistry, electronic and electrical engineering. Even though solar cell related researches are carried out in those traditional disciplines but it is not widely taught as a comprehensive course. This course highlights the fundamental science and engineering of solar PV devices, solar energy conversion as well as solar cell manufacturing issues. It covers from basic to modern solar PV devices, including typical solar cell materials, basic device physics, ideal and non-ideal models, device parameters and design, and device fabrication.

Prerequisites: E&C-ENGR 330 or E&C-ENGR 334.

E&C-ENGR 458 Automatic Control System Design Credits: 3

Techniques for feedback system design analysis: compensator design examples, state variable methods, non-linear systems, and sampled-data control systems.

Prerequisites: E&C-ENGR 380, E&C-ENGR 358.

E&C-ENGR 459 Introduction to Photovoltaic Systems Credits: 3

The course presents an updated background of world energy production and consumption, a summary of the solar spectrum, how to locate the sun, and how to optimize the capture of its energy, as well as the various components that are used in PV systems. Also studied are why certain photovoltaic (PV) designs are used in certain ways, as well as how the design process is implemented. Economic and environmental issues involved in PV design criteria are discussed along with the most recently available technology, design, and installation practices.

E&C-ENGR 460 Introduction to Power Systems Credits: 3

Magnetic circuitry in general and in machinery; DC machine theory, operation, applications, transformer circuits, synchronous machine theory, operation applications, basic principles of energy conversion, introduction to power electronics, and basic principles of power transmission and control.

Prerequisites: E&C-ENGR 376.

E&C-ENGR 463 Advanced Sustainable Energy Systems Engineering Credits: 3

Sustainable Energy Systems Engineering focuses on understanding the theory and application of emerging energy technologies, including solar, wind, biomass, oceanic, geothermal, hydropower, fuel cell (hydrogen), nuclear, and other more exotic energy sources. A premise of the course is that a sustainable energy technology must both be technically feasible and economically viable. Renewable energy sources will be highlighted with a focus on projections for a sustainable energy future. Graduate students will be assigned an additional project to work.

Prerequisites: E&C-ENGR 466.

E&C-ENGR 466 Power Systems I Credits: 3

Electric power system fundamentals, rotating machines in general, synchronous, induction and DC machines, methods of power system analysis and design, modeling of power systems components such as transmission lines, transformers and generators, and analysis of steady state operation of power system under balanced conditions.

Prerequisites: E&C-ENGR 376.

E&C-ENGR 467 Power Systems II Credits: 3

Power system matrices. Power flow analysis. Gauss-Seidel and Newton-Raphson techniques. Fast-decoupled load flow. Economic dispatch. Voltage control system. Power system control.

Prerequisites: E&C-ENGR 358, E&C-ENGR 466.

E&C-ENGR 468 Electric Power Distribution Systems Credits: 3

Operation and design of utility and industrial distribution systems including distribution system planning; load characteristics; application of distribution transformers; design of subtransmission lines, distribution substations, primary systems, secondary systems; application of capacitors; voltage regulation and reliability.

Prerequisites: E&C-ENGR 466.

E&C-ENGR 474 Introduction to Communication Systems Credits: 3

Introduction to principles and fundamentals of communication systems. Signal representation and analysis, Fourier transform and applications, probability and random variables, analog and digital modulation techniques.

Prerequisites: COMP-SCI 394R, E&C-ENGR 380.

E&C-ENGR 477 Introduction to Wireless Networking Credits: 3

Principles of the design and analysis of wireless networks. Study of medium access control, administration routing and adaptation to the complexities of the wireless environment. Investigation of networking issues in the IEEE 802.11 family of standards, IEEE 802.15 (Bluetooth), Long Term Evolution, cellular, satellite, ad hoc, and sensor networks.

Prerequisites: COMP-SCI 394R.

E&C-ENGR 480 Digital Signal Processing Credits: 3

Concepts, analytic tools, design techniques used in computer processing of signals: signal representation, sampling, discrete-time system analysis, recursive/non-recursive filters, design/implementation of digital filters.

Prerequisites: E&C-ENGR 380.

E&C-ENGR 484 Digital Image Processing Credits: 3

Fundamentals of digital image processing hardware and software, including digital image acquisition, display, compression, transforms and segmentation. Recommended preparation: Experience in a high-level programming language.

Prerequisites: E&C-ENGR 380.

E&C-ENGR 486 Pattern Recognition Credits: 3

Pattern recognition techniques of applications such as automatic recognition for speech, visual inspection systems, clinical medicine, automatic photographic recognition systems and advanced automation systems.

Prerequisites: E&C-ENGR 380.

E&C-ENGR 491 Internship Credits: 6

Students may participate in structured internships under the joint supervision of an employer and a faculty member. The student must carry out significant professional responsibilities that also have academic merit. The number of credit hours is based on the quality of the academic experience. Available for credit/nocredit only and students must be in good standing with at least 18 credit hours of EC-ENGR courses counting towards the degree. Registration by consent number only; petition forms for E&C-ENGR 491 internships are available in the office of CSEE Division and on the web.

Prerequisites: At least 18 hours of EC-ENGR courses toward the degree.

E&C-ENGR 497 Directed Readings Credits: 1-4

Readings in an area selected by an undergraduate student in consultation with a faculty member. Arrangements must be made prior to registration.

Prerequisites: Departmental consent.

E&C-ENGR 499 Undergraduate Research Credits: 1-3

Completion of a project, including a final written report, under the direction of a faculty member. A prospectus must be accepted prior to registration.

Prerequisites: Departmental consent.

English Language & Literature (ENGLISH)

Courses

ENGLISH 100T TOEFL Preparation Credits: 1-3

This course will prepare students to take the TOEFL (Test of English as a Foreign Language), in either the paper-based (PBT) or internet-based (iBT) form, and/or to improve their scores from previous attempts. Exercises focus on developing the skills and strategies necessary for navigating TOEFL questions while continuing to develop the general English language skills that support success on the TOEFL. The course will provide students with a personal awareness of strengths and weaknesses so they may focus their test preparation work in and outside of class. This course carries no credit toward graduation in the College of Arts and Sciences.

ENGLISH 110 English I: Introduction To Academic Prose Credits: 3

This course introduces students to college-level reading, writing, and discourse analysis: it engages students in the analysis and creation of texts that reveal multiple perspectives about specific rhetorical situations and cultural issues. In addition to learning how to revise by analyzing their own writing, students will learn to edit their own work and use proper academic documentation.

ENGLISH 110 - MOTR ENGL 100: Composition I

**ENGLISH 119 Myth and Literature Credits: 3**

A study of classical myth including readings from Homer to Ovid, analysis of selected myths in later literature, art, and music, and a study of contemporary definitions and approaches to myth.

ENGLISH 120 Literary Monstrosities Credits: 3

This course explores representations of monsters in literature. Students are introduced to different ways of thinking about monstrosities from a range of cultural and historical perspectives, as well as through a variety of materials in order to approach this question from an interdisciplinary perspective.

ENGLISH 123 True Lives: Autobiographical Arts and Acts Credits: 3

This course explores life writing and other autobiographical practices. Students will read and analyze a variety of life writing forms and think critically about life writing in various cultural, historical, and social contexts. They will also examine autobiography as a form of self-expression, as an articulation of personal and social values, as a public art, and as a way to study human experience in different contexts. Genres may include memoir, autobiography, diaries, etc., at the discretion of the instructor.

ENGLISH 124 Writing About Literature Credits: 3

This course is designed to be taken either prior to or concurrent with a student's first literature course. It introduces students to literary criticism in its broadest, most generic sense, as a stylized response to reading. Students in the course will be introduced to different approaches to writing about literature, to methods of generating ideas, and focusing and developing a topic.

ENGLISH 126 Popular Literature Credits: 3

This course is designed to help students develop a fuller understanding of the human condition by exploring a range of accessible, bestselling fiction and non-fiction from a variety of periods and places, historic and contemporary. The course may include popular stories, songs and ballads, the scripts of blockbuster plays and films, best-selling novels, and widely distributed nonfictional prose.

ENGLISH 126 - MOTR LITR 100: Introduction to Literature

**ENGLISH 141 Women and Literary Culture/The Heroine in Literature Credits: 3**

This course explores the role of the heroine in literature. Students will examine how the heroine is crafted by a variety of writers and think critically about the role of the heroine in various cultural, historical, and social contexts. Genres may include science fiction/fantasy, mystery, romance, etc. at the discretion of the instructor.

ENGLISH 200 Introduction To Undergraduate Study In English Credits: 3

An investigation of reading, writing, and research practices associated with studies in English. Students will learn about multiple forms, genres, and critical approaches, as well as encounter texts from various historical periods and places.

ENGLISH 200 - MOTR LITR 100: Introduction to Literature

**ENGLISH 203 Introduction to Journalism Credits: 3**

Introduction to the styles and techniques of reporting and writing basic news through assignments in straight news, features and in-depth stories. Exposure to the history and principles of American journalism. Practical application in writing news and news feature articles.

ENGLISH 207 World Literature in English Credits: 3

This course helps students develop a fuller understanding of the human condition by exploring accessible literary texts in English by non Euro-American writers. The course provides historical, economic and political contexts and is designed for students who enjoy learning about global cultures by reading and discussing a diverse range of bestselling literature.

ENGLISH 207 - MOTR LITR 200: World Literature

**ENGLISH 213 Introduction To Drama Credits: 2-3**

Beginning with an intensive study of a few plays analyzed to elicit general principles, the course moves on to consider several representative examples of each of the major periods and types of Western drama, from the Greeks to the present.

ENGLISH 213 - MOTR LITR 100D: Introduction to Literature-Drama

**ENGLISH 214 Introduction To Fiction Credits: 3**

Students will be introduced to the study of fiction as a literary art form. Students will continue to develop their understanding of fiction-writing in preparation for more advanced courses in literature and creative writing. Coursework will focus on close reading of short and long forms of fiction selected from a range of literary periods and world literature. Students are expected to interpret and analyze various forms of fiction and write critically about the role of fiction as a form of cultural discourse.

ENGLISH 214 - MOTR LITR 100F: Introduction to Literature-Fiction

**ENGLISH 215 Introduction To Poetry Credits: 3**

An introduction to the study of poetry for students desiring a basic course either to develop a greater appreciation of poetry or to prepare for more advanced courses in literature or creative writing. Class discussions will focus on close readings of poems and analysis of poetic techniques. Writing assignments will complement reading and class discussion and will enable students to develop their own critical and creative skills.

ENGLISH 215 - MOTR LITR 100P: Introduction to Literature-Poetry

**ENGLISH 216 The Craft of Creative Writing Credits: 3**

This course introduces students to the key techniques that writers of imaginative literature use. Students will develop skills at writing and reading in multiple genres.

ENGLISH 225 English II: Intermediate Academic Prose Credits: 3

This course extends the work of ENGLISH 110 with an additional emphasis on research. Each section of ENGLISH 225 uses a combination of book-length and shorter texts on focus on specific historical and/or cultural issues. As they learn to participate in scholarly conversations, students will find and evaluate library and internet sources. As with ENGLISH 110, this course emphasizes revision, editing, and proper academic documentation.

Prerequisites: ENGLISH 110 or DISC 100 or ACT sub-score of 30 or SAT writing sub-score of 690.

ENGLISH 225 - MOTR ENGL 200: Composition II**ENGLISH 242 Women Writing/Women Reading Credits: 3**

This course investigates women as producers and consumers of literature. Students will become acquainted with diverse women writers, explore women's reading practices, and interrogate the cultural, historical, and social contexts that influence women's writing and reading.

ENGLISH 242 - MOTR LITR 106: Women's Literature**ENGLISH 250 Introduction to Language Acquisition and Diversity Credits: 3**

Investigation of the basic principles of first and second language acquisition. Topics addressed include language competency, socio-cultural factors in language, dialects, acquisitional principles, and language diversity. Students will take part in monitored classroom observations in public schools, and will critically analyze how the topics addressed in class apply to real life and to teaching situations.

ENGLISH 270 Writing Tutor Training Seminar Credits: 3

This course covers the basics of serving as a tutor for writers. Students acquire hands-on experience in consulting with writers at all stages of the writing process, including invention work, drafting, revising, documenting, and editing. Students will also become conversant in theories of peer tutoring and research on Writing Centers.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 273 Science Fiction Credits: 3

This course focuses on a range of science fiction texts from a variety of periods and traditions. Students will examine the relationship between different types of science fiction from various periods and the related social, economic, and political contexts.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 278 Asian American Literature Credits: 3

This course examines literary and cultural texts produced by Asian Americans from the nineteenth century to the present. Texts will be drawn from a variety of genres and from several Asian American groups in order to examine how Asian American literature engages, challenges, revises, and reinvents American literary traditions. The course will identify and explore specific cultural and political issues that have shaped the writings, including trans-nationalism, immigration, racial identity, group identity, and community. Authors may include Carlos Bulosan, Maxine Hong Kingston, John Okada, Bienvenido Santos, and Hisaye Yamamoto.

ENGLISH 278 - MOTR LITR 105AS: Multiculture Literature**ENGLISH 300CB Women in the Ancient World Credits: 3**

This course focuses on the history, representation, literature, social lives, and political roles of women in ancient civilization including Egypt, Mesopotamia, the Biblical World, Greece, and Rome. It integrates methodologies from history, art history and archaeology, literary studies, and women's studies.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 300CD American Social Film: Silver Screen & American Dream Credits: 3

This course will combine American social history and film history in the sound era. Using Hollywood entertainment films, the course will look at Hollywood as an indicator of social, political and economic conditions in the United States since the 1930s. The main topics are representations of the American dream and nightmare, poverty and affluence, success and failure.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 300CE Radical Changes Since 1945 Credits: 3

This course will focus on modernism, post-modernism and expressionism in the visual arts and literature since World War II. Common lectures will address intellectual movements such as existentialism and formalism—and cultural development—such as the increased impact of technology and mass media—in contemporary society. By focusing on these movements, the cluster course hopes to provide an integrated view of the literature and visual arts of the period and to draw upon analogous developments in contemporary architecture, music, philosophy and film.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 300CW Critical Issues in Women's & Gender Studies Credits: 3

This class is an interdisciplinary upper-level course that will examine critical issues in women's and gender studies by focusing on the intersections of gender, race, class, sexuality, and social context. Through their study of these intersections, students will be more sensitive to the impact of social structures on gender and the experiences of women and men.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 300CX Empire Credits: 3

This is an interdisciplinary, team-taught course designed to teach students ways to think about the complexities of human cultures, past and present, helping them examine how imperialism continues to shape contemporary understandings of personal, institutional, and cultural identities (both of selves and others). The course engages students in the analysis of global cultures with a focus on the economic, environmental, political and social consequences of specific imperial regimes and the ongoing impact of these regimes on particular groups that continue to live with the legacies of empire.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 300CY Ancient World in Cinema Credits: 3

This course will explore the tradition of depicting the ancient Mediterranean world in film from the early silent era to the present. Topics to be covered include the ways that filmmakers respond to literary and historical sources from the ancient world, interact with the artistic tradition of films about the ancient world, the relation of these films to other works by the same creative personnel (directors, actors, writers, producers, etc.), and the political and cultural contexts in which the films were released.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 300F SS:Academic English/International Grad Teaching Assistants Credits: 3

The study and practice of standard spoken English combined with the study and practice of classroom teaching techniques. Exercises focusing on improvement of pronunciation, and formal (classroom presentation) and informal (conversation) English speaking are combined with techniques for lecture organization, strategies for clear content presentation, and with analysis of the American post-secondary educational culture. This course is designed for prospective International Graduate Teaching Assistants who need to improve their English communication skills and obtain an understanding of American educational culture.

ENGLISH 301WI Writing And The Academy Credits: 3

This course examines social and ethical issues raised by academic reading and writing. While some attention is paid to the formal aspects of academic prose within specific disciplines, the main emphasis of the course is on the cultural consequences of the different ways that academic knowledge is created and taught. In addition to studying the language and structure of academic reading and writing, the course explores the various rhetorics of the academy in terms of a broad range of subjects including economics, gender, education, history, and myth. This course satisfies the junior-level writing requirement and counts towards the writing minor.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 304WI Workplace Writing Credits: 3

This writing intensive course focuses on the rhetorical principles of workplace communication, providing students with opportunities to analyze complex rhetorical situations, to study various workplace genres, and to compose texts that meet the needs of diverse stakeholders.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 305WI Theory And Practice Of Composition Credits: 3

A course in expository writing that will include reading on composition theory and the nature of literacy. Frequent short essays and a long paper.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 306WI Advanced Composition Credits: 3

Further study of writing for those who wish to continue the study beyond the two semesters of composition. Emphasis will be placed on translating critical thinking into effective writing. Required of business and public administration majors.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 307WI Language, Literacy, Power Credits: 3

This course uses discourse analysis to investigate language and literacy. Students will explore how the discourses of institutional and cultural identities act as instruments of power and legitimacy.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 308 Rhetorics of New Media Credits: 3

This course will focus on the rhetorical study of new media texts (such as hypertext, networked multimedia, multimedia art and performance, virtual spaces, and so on) and theories of new media. The course will consider the rhetorical possibilities and constraints of new media and critically examine their impact on democratic discourse and literacy in the public sphere. Specialized knowledge of multimedia equipment and software is neither expected nor required.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 309WI Rhetorics of Public Memory Credits: 3

This course explores how museums and other cultural institutions function as rhetorical agents in creating and preserving public memory. Students will explore how processes of collection, arrangement, and visual display operate as modes of persuasion and make arguments about civic identities and community values.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 310 Introduction To Linguistics/Language Science Credits: 3

This course is a comprehensive introduction to the theory, methodology, and applications of the science of language. It examines properties of human language, covers all branches of language science, and provides a foundation for a critical understanding of language issues.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 311 American Literature I Credits: 3

A survey of American literature and culture from its beginnings to 1865. This course will cover a range of authors, several genres, and culture forms, which may include fiction, poetry, drama, autobiography, oral, contact and/or slave narratives, folklore, and songs.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 311 - MOTR LITR 101A: American Literature-Pre-Civil War**ENGLISH 312 Creative Writing I Fiction Credits: 3**

A course centered on the short story. Emphasis is placed on three areas: general principles governing the writing of fiction; practice in short fiction (primarily the short story, but including the novella); criticism; and technical skills (including editing and rewriting).

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 313WI Reporting Credits: 3

A seminar of practical application in advanced reporting. Assignments to cover news events and to pursue in-depth news reports on the campus and off.

Prerequisites: COMM-ST 203 or ENGLISH 203.

ENGLISH 315 Creative Writing Poetry Credits: 3

Writing and rewriting poems, with discussion of techniques needed to produce desired effects. Analysis and evaluation of student work. Examination of technical means utilized in selected poems by accomplished poets.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 316 Literary Nonfiction Credits: 3

Literary Nonfiction studies the reading and writing of nonfiction prose as a literary art. We'll survey the historical development of literary nonfiction (especially the essay), sample contemporary authors of the genre, write critical commentary on works we read, and compose personal essays of our own. The course is not exclusively a literary seminar nor a creative writing workshop, but seeks to mix and make connections between these modes, in the tradition of the essay itself.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 316WI Literary Nonfiction Credits: 3

Literary Nonfiction is a writing intensive course in the reading and writing of nonfiction prose as a literary art. We'll survey the historical development of literary nonfiction (especially the essay), sample contemporary authors of the genre, write critical commentary on works we read, and compose personal essays of our own. The course is not exclusively a literary seminar nor a creative writing workshop, but seeks to mix and make connections between these modes, in the tradition of the essay itself.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 317 British Literature I Credits: 3

A survey of British Literature and culture from its beginnings to the 18th century, including works by Chaucer and Milton.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 317 - MOTR LITR 102A: British Lit-Beg to 18th Cent.**ENGLISH 318 Bible As Literature Credits: 3**

A critical study of the major portions of the Old and New Testaments and the Apocrypha, with special attention to the development of literature from oral tradition, the literary genres, themes and archetypes represented in the collection, and the diction and style which have influenced later literature. Consideration also of the relation of Biblical literature to the historical, religious, and cultural milieu of the ancient Near East.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 320 Structure Of English Credits: 3

Not a remedial grammar course. Methods of linguistic inquiry and grammatical description. Study of traditional and modern schools of syntax, especially transformational grammar. Practice describing the structure of sentences. Application to the teaching of grammar in high schools.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 321 American Literature II Credits: 3

A survey of American literature and culture from 1865 to the present. This course will cover a range of authors, several genres, and culture forms, which may include fiction, poetry, drama, autobiography, essay, lyrics, and film.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 321 - MOTR LITR 101B: American Literature-Post-Civil War**ENGLISH 323 Shakespeare Credits: 3**

An intensive critical study of William Shakespeare's writings in various contexts (historical, social, political, literary, contemporary, for example). Readings will encompass at least eight plays and will include at least one comedy, history, tragedy, and romance. Required of all English majors.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 325 Arthurian Legends Credits: 3

Focusing on writers such as Marie de France, Chretien de Troyes, Sir Thomas Malory, Alfred, Lord Tennyson, Sara Teasdale, Bernard Malamud, and Marion Zimmer Bradley, this course examines the legend of King Arthur and his Round Table as a recurring myth, repeatedly manifested in time through literature, art, history, music, and film.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 326 Modern And Contemporary Irish Literature Credits: 3

This course examines a range of texts written by Irish-born writers from the end of the nineteenth century on. While it is likely the course will include texts by the most famous Irish writers, such as Yeats, Joyce, Beckett, O'Brien, Heaney, and Friel, course materials will vary from semester to semester and may focus on a specific genre, historical period, or area of interest.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 327 British Literature II Credits: 3

A survey of British Literature and culture from the late 18th century to the present. This course will cover a range of authors and genres, including at least one novel.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 327 - MOTR LITR 102B: British Lit-Late 18th Cent-Present**ENGLISH 330 History Of The English Language Credits: 3**

The study of English beginning with the Indo-European language family up to and including varieties of English spoken around the world today. Both outer history and the inner history of phonology, morphology, syntax, and lexicon will be addressed.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 331 African American Literature I Credits: 3

This course provides a survey of African American literature from its beginnings to the Harlem Renaissance of the 1920's and 1930's. Areas of interest will include abolitionist literature (especially Slave Narratives), turn-of-the-century literature and the Harlem Renaissance. This course will examine any or all of the following literary forms: fiction, poetry, drama, autobiography and essay. It will view African American literature in its historical and cultural contexts.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 331 - MOTR LITR 105AA: Multiculture Lit-African American**ENGLISH 332WI African American Novel Credits: 3**

This course will examine the African American Novel in the 19th and 20th centuries. The novels will be examined in their historical and cultural contexts.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 333 African American Literature II Credits: 3

A survey of African American literature from the end of the Harlem Renaissance to the present, covering a range of authors, texts, and contexts.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 336 Contemporary American Literature Credits: 3

This course focuses on contemporary American literature, concentrating on literary and cultural change. Topics, genres, and authors discussed will vary each semester.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 337 Introduction to American Literary and Cultural Studies Credits: 3

This course focuses on American literary and cultural production in an interdisciplinary manner. It explores how social, political, and economic conditions interact with the fields of art, film, history, and literature from colonial times to the present.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 339 Introduction to Screenwriting Credits: 3

An introduction to the form and language of the motion picture screenplays. Students create a blueprint for a movie and examine visual storytelling in-depth, including basic dramatic structure, scene and sequence construction and dialogue. Students will master the industry screenplay format, adapt a short story for the screen, and learn to receive feedback in small groups.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 342WI Women And Rhetoric Credits: 3

A study of the position of women within the traditions of western rhetoric. Students will examine the rhetorical practices of women as they pursue both public and private goals. Christine de Pizan, Sor Juana Ines de la Cruz, Hannah More, Maria Stewart, Frances Willard, Ida Wells-Barnett, Meridel Le Sueur, and Gloria Anzaldua are among the female rhetorians who may be studied in this course.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 344WI Women & Literary Culture: Genre Focus Credits: 3

A study of women writers that focuses on genre, i.e., texts that share a common set of conventions. The course will explore the conventions associated with a particular genre in various historical periods and consider the ways in which gender and genre intersect in shaping texts and their interpretation.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 345WI Women And Literary Culture: Historical Focus Credits: 3

A study of women's literary culture in a specific historical period either as broadly defined as Medieval or Renaissance or as narrowly defined as a decade or movement (e.g., 1960's, abolitionist movement). This course includes women writers across multiple boundaries (e.g., national, generic, racial, sexual, socio-economic). Content will change depending on the instructor.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 350 The 18th Century Novel Credits: 3

A detailed examination of the development of the novel in the 18th century. The course emphasizes the evolution of the novel from such predecessors as rogue literature, the picaresque story and the romance, due to changing social realities. The novelists studied may include Austen, Behn, Fielding, Godwin, Haywood, Richardson, Smollett, and Sterne.

Prerequisites: ENGLISH 110 or DISC

ENGLISH 351 Special Readings Credits: 1-3

Readings in a period, genre or theme to be selected by the instructor with attention to the needs of students who are interested in literary topics not covered in regular offerings. Proposals for a course in such readings require the approval of the department.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 351A Special Readings: Detective Fiction Credits: 3

This course will focus on a specific period, sub-genre, or theme related to Detective fiction.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 355 The Novel Before 1900 Credits: 3

Intensive attention to novels in English written before 1900, which may include comparative or analytical studies of genre; critical reception of novels; serialization, gender issues; authors and editors; and valuation.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 356 Studies in Poetry Credits: 3

An intensive study of poetry through the examination of a specific topic or the works of particular poets, for instance: Love, Seduction, and Betrayal; Form and Change; Death, Grief, and Consolation; Whitman, Dickinson, and the Soul; Sacred Poetry; Poetry and Metaphysics; The Long Poem; The Comic Poem; Sonnet, Sonnet Sequence and the Lyric; The Voyage; Nature, Self, and the Romantic Poet.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 360 The Modern Novel Credits: 3

This course focuses on selected novelists between 1900 and 1945 and is organized around particular literary themes, sub-genres, or contemporary issues.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 365WI Contemporary Novel Credits: 3

This course focuses on selected novelists since 1945 and is organized around particular literary themes, sub-genres, or contemporary issues.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 367 Introduction to Latinx Literature Credits: 3

An introduction to the literary production by US Latinx, the course introduces students to writings by authors from various Latinidades—such as Chicana/Chicano, Puerto Rican, Chilean American, Cuban American, Dominican American, and Mexican American—in multiple genres, including poetry, fiction, drama, personal essay, and film.

Prerequisites: ENGLISH 110 or DISC 100.

ENGLISH 380 Composing in the Digital Age Credits: 3

This course will focus on the study and creation of multimodal texts (such as webpages that include hypertext, video, and images). The course will consider the rhetorical possibilities and constraints of various modalities. Specialized knowledge of multimedia equipment and software is neither expected nor required.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 381 Writing for Social Media Credits: 3

This course will focus on the rhetorical study of social media and practical strategies for using social media effectively. The course will critically examine how the design and use of popular and emergent social media platforms affect democratic discourse and the public sphere. Specialized knowledge of social media platforms and software is neither expected nor required.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 400TC Advanced Studies in 20-21st Century Works Credits: 3

Advanced Studies in 20-21st Century Works. Approved topics include: Modern and Contemporary Irish Literature, Modern Poetry, Contemporary Poetry, Postcolonial Literature, and The Romantic Period.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 404 Old English Credits: 3

This course is a study of Old English, its grammar, its poetic style, and its literature, both poetry and prose.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 405 Magazine Editing Credits: 3

A course combining academic study of editorial management, publishing operations and language skills, with "hands on" experience in article evaluation, editing, magazine production, and legal matters such as copyright and libel. Class work concentrates on authentic and effective language use, with attention given to copy editing, grammar, typography, printing processes, financing and distribution for commercial and small-press publications.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 408 Harlem Renaissance Credits: 3

This course examines the period from 1920 to 1940, known as the Harlem Renaissance, a time of unprecedented literary and cultural creativity by Black artists. This course explores a variety of cultural productions, not only traditional forms of literature such as novels, short stories, plays and poetry, but also nonliterary objects of study such as painting, sculpture, and music.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 410 Black Women Writers Credits: 3

This course explores the writings of African American Women Writers. The course examines how these writers have interacted with and often revised stereotypical representations of African American womanhood typically found within canonical and African American male literatures. The course will examine literature (which might include fiction, poetry, autobiography, and drama) of the nineteenth and twentieth centuries; the majority of the works will be by modern and contemporary authors such as Nella Larsen, Zora Neale Hurston, Toni Morrison, and Terry McMillan. By placing the works in this sort of cultural and historical context, it will be possible to examine the unique tradition of African American women's writing as well as individual texts.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 412 Chaucer Credits: 3

Readings from Chaucer's most important works, especially "The Canterbury Tales" and "Troilus and Criseyde" with emphasis on them as types of medieval genres and on the Middle English language.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 413 Renaissance Literature I Credits: 3

English literature from the time of Wyatt and Surrey to the beginning of the 17th century, including the works of Spenser, Marlowe, Sidney, Shakespeare and others.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 414 Milton Credits: 3

A study of Milton's prose and poetry, with special attention to "Paradise Lost".

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 415 Restoration And Early 18th-Century British Literature Credits: 3

British literature from the late 17th century to the mid 18th century. Selected writers may include Addison and Steele, Behn, Congreve, Defoe, Dryden, Finch, Milton, Pope, Rochester, Swift, and Wortley Montagu.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 416 The Romantic Period Credits: 3

An extensive study of selected writers (such as Austen, Barbauld, Byron, Coleridge, Hazlitt, Hemans, Keats, Gilpin, the Shelleys, Wollstonecraft, and Wordsworth) organized around literary themes and/or cultural issues important to the Romantic period.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 417 Modern Poetry Credits: 3

Study of works by modernist poets such as Hopkins, Yeats, Frost, Stevens, Williams, Moore, Pound, H.D., Eliot, Millay, Hughes.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 418 19th-Century American Literature Credits: 3

An intensive study of either selected major American writers in the 19th century or of 19th -century literary movements.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 422 Medieval Literature Credits: 3

Western religious and secular verse and prose to the 15th century. Late Middle English works are read in the original; all other selections in translation.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 423 Renaissance Literature II Credits: 3

English literature from 1600 to the beginning of the Restoration, including the works of Donne, Jonson, Milton and other contemporaries.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 425 18th-Century British Literature II Credits: 3

British literature in its critical and historical context from 1750 to 1798. The writers studied may include Blake, Burney, Collins, Johnson, and Gray.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 426 The Victorian Period Credits: 3

An intensive study of selected writers (such as Arnold, Braddon, the Brontes, the Brownings, Dickens, Darwin, Eliot, Gaskell, Hardy, Ruskin, and the Rossetts) organized around literary themes and/or cultural issues important to the Victorian period.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 427 Contemporary Poetry Credits: 3

Study of works by contemporary poets (post World War II), such as Auden, Bishop, Hayden, Berryman, Rukeyser, Larkin, Rich, Plath, Heaney, Boland, Komunyakaa.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 428 20th-Century American Literature Credits: 3

An intensive study of either selected major American writers in the 20th century or of 20th-century literary movements.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 429B Advanced Screenwriting Credits: 3

This course provides students with advanced theory in narrative screenwriting, training in industry standard script analysis (called "coverage") and story editing. Students will be required to draft, revise and workshop a short film screenplay or will focus on a feature screenplay, delivering a draft and revision of the first act and a detailed outline for the rest of the script. Students will workshop feature screenplays in small groups, emphasizing the art of constructive story editing.

Prerequisites: ENGLISH 225 or DISC 200, and ENGLISH 339 or COMM-ST 354.

ENGLISH 430WI Advanced Technical Writing Credits: 3

This course is designed for those who plan to do or teach professional, business, or technical writing. Beginning with a brief background in the history of technical writing, the course will deal with current theories and methods of teaching technical and professional writing, and will cover such areas as business usage; technical linguistic problems and theories; the language of contracts, specifications, and other binding documents; and computer-oriented problems.

Prerequisites: ENGLISH 225 (or equivalent) or DISC 200.

ENGLISH 431 18th-Century British Literature Credits: 3

British literature from the mid to late 18th century. Selected writers may include Blake, Burney, Collins, Equiano, Fielding, Gray, Johnson, Sheridan, and Wollstonecraft.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 432WI Advanced Creative Writing Prose Credits: 3

A course for advanced students of fiction writing. Open to students who have taken English 312 or its equivalent. The class will proceed through analysis of models, discussion of general principles, critique of student work. Students will simultaneously be encouraged to experiment and to refine the form and subjects best suited to their talents. Emphasis will remain on the short story, though there may be units in other forms--novella, film script, the non-fiction essay.

Prerequisites: ENGLISH 225 or DISC 200, and ENGLISH 312 or ENGLISH 315 or ENGLISH 316WI.

ENGLISH 433 Histories Of Writing, Reading, And Publishing Credits: 3

A study of selected topics concerning the material practices of writing, reading, and publishing within specific cultural and historical contexts. Issues examined may include authorship, education, information technologies, libraries, literacy, periodicals, popular literature, publishers, and communities of readers.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 434 Postcolonial Literature Credits: 3

An exploration of postcolonialism through the study of literary and theoretical texts created by or representing peoples whose historical experience has been decisively shaped by the experience or legacies of colonialism. Texts will be drawn from a variety of genres and from several countries. The course will consider several definitions of postcolonialism and related terms such as cosmopolitanism, hybridity, diaspora, and nationalism.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 435WI Advanced Creative Writing Poetry Credits: 3

An advanced poetry workshop that includes intensive reading of contemporary poetry and aims at each student creating a portfolio of publishable poems. The focus of the course will vary to address a variety of topics such as metaphor and closure; imitation and the line; form and voice. May be repeated once for credit.

Prerequisites: ENGLISH 225 or DISC 200, and ENGLISH 312 or ENGLISH 315 or ENGLISH 316WI.

ENGLISH 436WI Poetic Forms Credits: 3

An advanced creative writing course that focuses on intensive study of and practice in metrics and traditional and nonce forms. May be repeated once for credit.

Prerequisites: ENGLISH 225 or DISC 200, and ENGLISH 312 or ENGLISH 315 or ENGLISH 316WI.

ENGLISH 437WI Prose Forms Credits: 3

The making of a work of prose requires expertise with the structure of the chosen form, and an understanding of the relationship of form to content. This class teaches the techniques for planning and drafting major prose forms which could include the very-short story, the story, novella, novel, linked-story collection, episodic novel, essay novel, the play, the creative nonfiction book, and others. Students will learn how to create particular prose forms and how to use content as a guide to inventing new forms. We will examine some of the best examples of both traditional and newly invented forms by writers such as Anton Chekhov, Katherine Anne Porter, Tim O'Brien, and Sandra Cisneros.

Prerequisites: ENGLISH 225 or DISC 200, and ENGLISH 312 or ENGLISH 315 or ENGLISH 316WI.

ENGLISH 438 The "New Letters" Writing Conference Credits: 1-3

An intensive weekend conference for creative writers of varying genres and levels of experience, published and unpublished – fiction, poetry, nonfiction, stage and screen. The conference includes creative and interdisciplinary sessions on writing and publishing, genre-specific workshops, socializing and networking opportunities, and private manuscript consultations. The course of study for two- and three-credit students includes selected reading and post-weekend tutorial time conducted by accomplished, working writers. The conference may be repeated once for credit. Two- and three-credit students need the instructor's consent and must have taken a 300-level creative-writing course in the focus genre prior to enrolling.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 439 Shakespeare and Film Credits: 3

Grounded in the close analysis of texts, this course examines film adaptations of Shakespeare's plays across the range of dramatic genres (history plays, tragedy, comedy, and romance). This course is open to seniors and graduate students only. Graduate students will be responsible for supplemental critical readings.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 440 American Culture Credits: 3

Texts that offer perspectives on key historical themes of American culture. Texts may be grouped around any culturally significant principle (e.g. region, race, gender, class, ethnicity, religion) or theme (e.g. the mythology of the frontier, marriage and domesticity, the American Dream). The course may be taken twice for credit, provided substantive changes in topic.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 441 Girls And Print Culture Credits: 3

This course deals with girls' relationships to the continually evolving print culture. Students will examine various literary representations of girlhood by adult writers, explore texts directed at girls (e.g., conduct books, periodicals, textbooks), and study the writing and reading practices of girls themselves.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 442 Playwriting I Credits: 3

Theory and practice of writing for the theatre with emphasis on the basic techniques.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 443 Playwriting II Credits: 3

Theory and practice of writing for the theatre with emphasis on advanced techniques.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 445 History And Principles Of Rhetoric Credits: 3

A study of selected writings of ancient, and modern rhetoricians illustrating key issues in the development of Western discourse theory and practice. Issues examined include the relationships between rhetoric and knowledge, orality and literacy, and rhetoric and poetics. Attention will also be given to the implications of rhetorical theory for modern language instruction.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 447 Theory and Criticism in English Studies Credits: 3

A survey of major schools and methods of literary theory and criticism. Authors and texts to be determined by the instructor of the course.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 448 External Internship Credits: 1-3

Students may complete an external internship involving writing and editing with a publishing company, trade magazine, literary or academic journal, other print or electronic media organization, or with advertising, public relations, or non-profit firms. Internships are granted on a competitive basis. Students will compile a portfolio of their work under the direction of the internship supervisor to be submitted for evaluation to the department's internship coordinator.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 449A Publication Practicum Credits: 1-3

This course provides practical experience with New Letters magazine, New Letters on the Air, and BkMk Press in business analysis/reporting, copy-editing, manuscript evaluation, promotion/grant development, library research, market research, and other skills. The practicum is limited to three students per semester, to be chosen on the basis of demonstrated writing and organizational skills. References are required. May be taken for no more than three credit hours over a maximum of two semesters.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 449B Publication Practicum Credits: 3

This course covers the basics of producing an issue of an academic journal. Students acquire hands-on experience at all stages of production.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 449C Publication Practicum Credits: 1-3

This course allows students to work with a faculty member on an ad hoc project for publication such as a special journal issue or festschrift, book manuscript, a new scholarly edition of a primary text, or a digital edition. Course may be repeated once for continued work on the same project.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 450 Special Readings Credits: 1-3

Intensive individual readings in a field, genre, or individual figure to be selected by a student or a group of students in consultation with an instructor willing to direct the project. Generally limited to graduating seniors who have completed the majority of the work for their major. Not open to students in their first semester at UMKC. May be repeated for credit.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 451 Shakespeare Comedies And Histories Credits: 3

A study of Shakespeare's major comedies and history plays with special emphasis on his dramatic works before 1600.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 452 Early English Drama Credits: 3

English religious and secular drama prior to Shakespeare. Mystery and morality plays are studied, with emphasis on their literary and social backgrounds. Close reading of such works as "Everyman," "The Wakefield Second Shepherd's Play," and "The Spanish Tragedy."

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 453 Modern Drama, 1880-1945 Credits: 3

A study of modern drama: Continental, British, and American, including history and development, critical theory, and literary evaluation. This course will focus on the earlier modern playwrights from Ibsen and Shaw, with special attention to naturalism.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 454 The Civil Rights Movement in African American Literature Credits: 3

This course examines how African American literature shaped ideas about freedom, rights, citizenship and race in the civil rights movement. It draws on a variety of literary forms—speeches, essays, autobiographies, fiction, drama, poetry and film—to explore the movement's impact on communities and cultures as well as its various debates and competing visions.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 455 Studies In The Novel 1740-1900 Credits: 3

An intensive study of no more than three major novelists of the eighteenth or nineteenth century. The content of the course will change, depending on the instructor.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 456 From Field Shout to Hip Hop: African American Poetic Traditions Credits: 3

This course examines the development of African American poetry from its early forms as field shouts, ballads, and blues to present forms including spoken word and hip hop. Includes authors such as Phillis Wheatley, Paul Lawrence Dunbar, Langston Hughes, Gwendolyn Brooks, Tupac Shakur, and Jessica Care Moore.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 457 Stages Toward Freedom: African American Dramatic Traditions Credits: 3

This course explores the development of African American dramatic traditions from the eighteenth century through the Harlem Renaissance Black Arts Movement, to current postmodernism. Includes authors such as W.W. Brown, Zora N. Hurston, Amiri Baraka, Sonia Sanchez, August Wilson, Suzan-Lori Parks.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 458 Slave Narratives: Race, Gender, and Writing Freedom Credits: 3

A truly American, home grown genre and powerful force in the development of American political and social realities, the African American Slave Narrative is an established, recognized influence in the development of African American and American literary history. In this course you will have the opportunity to explore the historical trajectory of the Slave Narrative, looking at early formulations of its structure, purpose and conventions—especially in terms of gender and race, subsequent various permutations, and the eventual development of the Neo-slave Narrative as its resurrection, which adds to the complexity and theoretical impact of the literary autobiography from black perspectives.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 459 African American Migrations in Literature Credits: 3

The course examines representations of two different trajectories of migration in African American literature: African American journeys from the south to northern and mid-western regions of America, and concurrent migrations of Caribbean people to the US in the early twentieth century.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 460 Special Offerings Credits: 1-4

The instructor who gives this course determines what its content shall be. All aspects of literature and linguistics are within its possible range.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 461 Shakespeare Tragedies And Romances Credits: 3

A study of Shakespeare's major tragedies and late romances with special emphasis on his dramatic literature after 1600.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 462 Restoration And 18th-Century Drama Credits: 3

The drama after the restoration of the monarchy and the reopening of the theaters through the 18th century. Special emphasis is placed on the comedy of manners and the heroic drama in the Restoration and the sentimental comedy in the 18th century. Includes such playwrights as Dryden, Congreve, Etherege, Wycherley, Steele, Lillo, Cumberland, Sheridan, and Goldsmith.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 463 Contemporary Drama II Credits: 3

A study of contemporary drama: Continental, British, and American, including history and development, critical theory and literary evaluation. This course will focus on the more recent writers, including the absurdist, with special attention to experimental drama.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 464 Medieval Methods & Paleography Credits: 3

This course examines the methodology and historiography of Medieval Studies. Through an introduction to paleography, the study of medieval handwritings, it prepares students for advanced work in Medieval and Renaissance studies. Using an interdisciplinary approach, this course will examine the historical and cultural settings for medieval texts, their physical form and production, as well as the tradition of textual transmission in the medieval world. In addition to gaining familiarity with the many different types of primary sources, such as literary, artistic, legal and notarial sources, students will be exposed to methods for practical archival work in various European nations. Recommended preparation: First Year Latin.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 465 Studies In The Modern Novel Credits: 3

An intensive study of no more than three major 20th-century novelists. The content of the course will change, depending on the instructor.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 468 Women's Literature in Africa and the African Diaspora Credits: 3

This course is a comparative examination of the variety of literary works produced by women of African descent in the United States, the Caribbean and Africa. Students will explore the cross-cultural implications of texts in light of the intersections of gender, race and class.

Prerequisites: ENGLISH 225 or DISC 200.

ENGLISH 470 Introduction To Descriptive Linguistics Credits: 3

General introduction to linguistics science. Linguistic analysis, structures and change. Language families. Historical reconstruction. Generative grammar.

Prerequisites: ENGLISH 225 or DISC 200, and ENGLISH 310.

ENGLISH 475 Creative Nonfiction Credits: 3

This course emphasizes the study and crafting of creative nonfiction. special attention is given to developing the writing techniques required to shape publishable narratives out of experience.

Prerequisites: ENGLISH 225 or DISC 200, and ENGLISH 312 or ENGLISH 315 or ENGLISH 316WI.

ENGLISH 477CS Classical Studies Credits: 3

Advanced study in Classical literature and culture. Subject varies and will be visible when students enroll.

ENGLISH 477DH Studies in Digital Humanities Credits: 3

Advanced study in in Digital Humanities. Subject varies and will be visible when students enroll.

ENGLISH 477EM Early Modern Studies Credits: 3

Advanced study in Early Modern literature and culture. Subject varies and will be visible when students enroll.

ENGLISH 477ES 18th-Century Studies Credits: 3

Advanced study in eighteenth-century British or American literature and culture. Subject varies and will be visible when students enroll.

ENGLISH 477MS Medieval Studies Credits: 3

Advanced study in Medieval literature and culture. Subject varies and will be visible when students enroll.

ENGLISH 477NS 19th-Century Studies Credits: 3

Advanced study in nineteenth-century British or American literature and culture. Subject varies and will be visible when students enroll.

ENGLISH 477RC Studies in Rhetoric and Composition Credits: 3

Advanced study in rhetoric and composition. Subject varies and will be visible when students enroll.

ENGLISH 477SA Studies in Authorship Credits: 3

Advanced study of individual authors or groups of authors in a variety of periods or literary and cultural movements. Subject varies and will be visible when students enroll.

ENGLISH 477SG Studies in Genre Credits: 3

Advanced study in a single genre such as the novel, the short story, poetry, drama, or non-fiction. Subject varies and will be visible when students enroll.

ENGLISH 477TS 20th- and 21st-Century Studies Credits: 3

Advanced study in twentieth- and twenty-first-century British or American literature and culture. Subject varies and will be visible when students enroll.

ENGLISH 487FI Creative Writing Workshop Credits: 3

Advanced creative writing workshop. Subject varies and will be visible when students enroll.

ENGLISH 487MG Multigenre Workshop Credits: 3

Advanced creative writing workshop in multiple genres. Subject varies and will be visible when students enroll.

ENGLISH 487NF Nonfiction Workshop Credits: 3

Advanced creative writing workshop in nonfiction. Subject varies and will be visible when students enroll.

ENGLISH 487PO Creative Writing Workshop Credits: 3

Advanced creative writing workshop. Subject varies and will be visible when students enroll.

ENGLISH 499 Senior Tutorial Credits: 3

A comprehensive tutorial for students who have a faculty-approved research project. The project will culminate in a critical study of 20-25 pages or a creative writing portfolio of similar length. This course is appropriate for students who intend to continue their studies at the graduate level.

Prerequisites: ENGLISH 225 or DISC 200.

Entrepreneurship (ENT)

Courses

ENT 301 Entrepreneurship Toolkit Credits: 3

This course is for non-business majors (majors outside of the Bloch School) working towards an entrepreneurship minor. In this course students learn the basic elements of organizational functions including management, accounting, finance, and economics as foundational principles of entrepreneurship.

ENT 315 Entrepreneurial Mindset and Opportunity Recognition Credits: 3

This course teaches students how to develop an entrepreneurial mindset. Students will utilize play, creative problem solving, design thinking, and creativity tools while developing skills to mitigate risk and recognize opportunities.

ENT 321 Real Estate Principles Credits: 3

Starting with the basics of real estate terminology, students learn real estate's role in the economy, it's legal foundations, government controls, appraisal processes, valuation processes, brokering and closing transactions, time value of money, basic management issues and lease clauses, and basic standard form purchase contracts.

ENT 326 Creativity, Innovation, and Problem Solving Credits: 3

This course examines creativity and innovation, and their application to problem solving and developing new initiatives. Students will develop the ability to understand and solve problems and initiate opportunities by thinking new things. They will understand the concepts, skills, information, attitudes, and resources that leaders need to create valuable ideas, products, or initiatives.

ENT 327 Designing the Business Model Credits: 3

This course will teach students how to design a business model, refine that business model, and create a plan for a new venture. This course will take students through several different toolkits that can be used to create for-profit startups, social ventures, or create value within an existing organization.

Prerequisites: ENT 315.

ENT 329 Entrepreneurship Scholars Credits: 3

In this course, students will acquire the skills required to manage and grow a successful new venture through hands-on, real-world work on their own venture. Students will work with the instructor and at least one mentor to identify specific deliverables and a long term venture plan. Students will manage their enterprise, attend a series of workshops, and work with their peers, instructional coaches and mentors to further their venture. Special application and selection process.

Prerequisites: Departmental consent.

ENT 332 Managing the New Venture: Experiential Learning Credits: 3

In this course, students will acquire the skill sets needed to manage and grow a successful new venture, and will actually manage a new enterprise.

Prerequisites: ENT 327.

ENT 341 Technology Entrepreneurship Credits: 3

This course is designed to familiarize students with the creation of successful, high-value enterprises, with an emphasis on markets for technology and venture capital. Students identify a business opportunity, create a technology-based solution, and assess the commercial and technological viability of the business opportunity. Case studies will emphasize life sciences, engineering, and information technologies.

ENT 361 New Product Development Credits: 3

This course introduces students to a formal process used to develop new physical products. Throughout the process, students learn how an abstract idea can be transformed into concrete product concepts that will in turn be translated into tangible working prototypes.

ENT 364 Entrepreneurial Management and Innovation Credits: 3

Students are exposed to the unique entrepreneurial experience of conceiving, evaluating, creating, managing, and eventually selling a business. The goal is to provide a comprehensive background with practical application of important concepts applicable to an entrepreneurial environment. Key business areas of finance, accounting, marketing, and management will be addressed from an entrepreneurial perspective.

ENT 412 Entrepreneurial Finance Credits: 3

This course examines the financing and valuation of new ventures from the perspectives of entrepreneurs and venture capitalists. The focus is on financial thinking, tools, and techniques that are relevant for seeking new venture financing and making investment decisions. The course is suitable for anyone with an interest in startup companies, venture capital, or private equity firms.

Prerequisites: ACCTNG 210; or ENT 301 and ENT 327.

ENT 421 Real Estate Finance Fundamentals Credits: 3

This course will provide a fundamental understanding of basic financial concepts of real estate including compounding and discounting, construction of amortization tables and after-tax yield analysis for a simple real estate investment. It also touches on the basics of title insurance, ownership issues, fixed rate versus variable rate mortgages in residential real estate, understanding housing bubbles, and trends in valuation of residential real estate. In addition, the student will complete mathematical comparisons of leasing versus owning a home.

ENT 425 Corporate Entrepreneurship Credits: 3

This course seeks to equip students with the skills required to develop new ideas and create viable new businesses or processes within the context of an established organization. The course will address the development of an internal culture of innovation, processes for reviewing ideas and for developing business concepts, strategic analysis, and positioning for competitive advantage.

ENT 432 Entrepreneurial Marketing and Selling Credits: 3

This course exposes students to the objectives, challenges, and requirements for effective, results-oriented marketing activities and sales efforts for the entrepreneur/new venture. Key topics include the selection, design, and budgeting of entrepreneurial marketing and advertising programs, along with effective selling, customer acquisition, and service/retention efforts.

ENT 460 Creating the Enterprise Credits: 3

This course looks at the processes and skills individuals require in order to create their own enterprise, manage a new business, or work within an entrepreneurial organization. Students will learn how to take a good idea, assess that idea, and develop an appropriate business model, and will work in teams to develop a full-length business plan.

Prerequisites: (or concurrent) ACCTNG 211, FIN 325, MKT 324, MGT 330, DSOM 326.

ENT 461 Social Entrepreneurship Credits: 3

This course introduces students to social entrepreneurship through lectures and discussions, key readings, guest speakers such as social entrepreneurs, case studies, videos, service-learning activities, and group assignments. Students will develop an understanding of the social entrepreneurship process, the differences between social entrepreneurship and business entrepreneurship, social enterprise, and different revenue streams including the importance of sustainability. By the end of the course, students will be able to develop a social entrepreneurship project proposal on a social problem they are compassionate about and make a presentation to the class.

ENT 462 Entrepreneurial Experience Credits: 3

In this course students integrate skillsets and apply an entrepreneurial mindset to a practical experience. The process includes identifying an opportunity, taking action, and evaluating outcomes of actions taken. The experience will be through project based consulting for a startup or entrepreneurial organization or within the context of a student's own venture with prior approval.

Prerequisites: ENT 327, ENT 412.

ENT 487 Special Topics Credits: 3

Special topics in entrepreneurship.

ENT 496 Internship: Entrepreneurship Credits: 1-3

This course provides an opportunity for students to integrate their academic studies via employment with a business or organization in the community.

Prerequisites: Departmental consent.

ENT 497 Special Topics: Entrepreneurship Credits: 1-3

Study and research in areas of special interest under individually faculty direction.

Prerequisites: Departmental consent.

Environmental Sciences (ENV-SCI)

Courses

ENV-SCI 110L Understanding the Earth Laboratory Credits: 2

Laboratory and field demonstration and exercises in environmental science. Weekly exercises or field trips.

ENV-SCI 110L - MOTR PHYS 110LES: Essent. Physical Sciences w/Lab

**ENV-SCI 110R Understanding the Earth: Introduction to Environmental Science and Laboratory Credits: 3**

This introductory course surveys the processes that shape our planet. Topics include: plate tectonics and mountain-building, rivers and oceans, atmospheric circulation, weather and climate, and the amazingly complex relationships between life on Earth and the physical environment.

ENV-SCI 110R - MOTR PHYS 110ES: Essentials in Physical Sciences

ENV-SCI 210 Issues in Environmental Science Credits: 3

Explores important environmental issues such as air and water pollution, water supply, climate change, agriculture and food supply, environmental health, ecosystem disruption, environmental management, environmental ethics, and energy resources. Topics may vary depending on current events.

ENV-SCI 220 Ecosystem Science for Decision Makers Credits: 3

This course addresses the fundamentals of ecosystem science with an emphasis on human-induced change in natural systems. Course content characterizes the biological patterns found in nature emphasizing application of underlying principles. Scientific tools are provided to evaluate ecosystem concerns and make informed decisions.

ENV-SCI 303 Weather and Climate Credits: 4

Overview of weather processes and the main components of the climate system. Emphasis is on the physical basis of daily weather patterns, seasonal climate variability and longer-term climate change at local, regional, and global scales. The theme throughout the course will be the importance of weather and climate as major drivers of environmental change.

Prerequisites: ENV-SCI 110R or GEOLOGY 220.

ENV-SCI 321 Climate Change Impact Assessment and Policy Response Credits: 3

This course introduces how scientists assess observed climate change and predict future climate change. Lectures, discussions, problem sets, and term papers help students explore interactions among climate change, human activities and policy responses. It helps students achieve an appreciation for the role of accurate scientific information as foundation for shaping political agreements and policies on climate change.

Prerequisites: ENV-SCI 110R.

ENV-SCI 332CZ Environmental Sustainability Credits: 3

This course will introduce the concept of sustainability and review how sustainability might work at the individual, neighborhood, state, nation and global scales. Students will participate in some form of community engagement on sustainability as well as reflect upon how their own practices impact the environment.

ENV-SCI 416 Understanding and Living with Volcanoes Credits: 3

This course will examine the distribution, tectonic setting, and morphology of a range of volcano types on Earth and a few examples from other planets. Students will study volcanic processes including explosive and passive processes and how we investigate them. This will involve discussion of volcanic hazards and hazard assessment, risk communication, and the challenges of volcanic crises response. The course will also cover how volcanoes impact the local and global economy and Earth's climate. Recommended preparation: GEOG 314 / GEOLOGY 314 or GEOLOGY 325 or GEOLOGY 342.

Prerequisites: GEOLOGY 220 or ENV-SCI 110R/ENV-SCI 110L, and GEOG 203 or GEOG 402.

ENV-SCI 449 Global Water and Sustainability Credits: 3

This course examines the physical characteristics of water and its role in Earth systems. The challenges facing societies in an era of rapidly-changing climate are explored.

ENV-SCI 496 Environmental Internship Credits: 1-4

Students obtain practical experience working for local engineering and environmental firms, or governmental agencies. Specific duties and application requirements will vary depending on the funding organization's needs. Junior or senior standing required for undergraduates.

Environmental Studies (ENV-STDY)

Courses

ENV-STDY 325 Cultural Perspectives on the Environment Credits: 3

This course explores the history of conservation practices in American agriculture from the 1700s through the present. Additionally, the course examines the past and present legal implications of environmental statutes for minority farmers from a social and environmental justice perspective.

ENV-STDY 412 Global Tourism Credits: 3

This course is a regional survey of world tourism. Topics include the uniqueness of place, the marketing of tourist destinations, and the cultural, economic, and environmental impacts on host societies.

Prerequisites: GEOG 105 or GEOG 200 or GEOG 202.

ENV-STDY 450 Ecotoxicology Credits: 3

This course addresses the fundamentals of ecotoxicology, integrating the sciences of ecology and toxicology. Students will learn the biological basis for pollutant effects on individuals and populations of plants and animals, how pollutant intensity varies as a function of bioavailability, the basics of risk assessment, and how pollutant effects are modified by ecological interactions within communities and ecosystems. The ultimate goal of ecotoxicology is to predict the effects of pollution within an ecological context.

Prerequisites: BIOLOGY 108, CHEM 211, CHEM 212R.

ENV-STDY 499WI Environmental Studies Practicum Credits: 3

Students conduct research, participate in discussions, and prepare written reports on selected topics concerning the environment.

Prerequisites: Senior standing, RooWriter.

Euphonium (EUPHNM)

Courses

EUPHNM 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit towards the major.

EUPHNM 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

EUPHNM 100C Applied Study for the Non-Music Major. Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

EUPHNM 101 Freshman Euphonium I Credits: 2-4

EUPHNM 102 Freshman Euphonium II Credits: 2-4

EUPHNM 201 Sophomore Euphonium I Credits: 2-4

EUPHNM 202 Sophomore Euphonium II Credits: 2-4

EUPHNM 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

EUPHNM 301 Junior Euphonium I Credits: 2-4

EUPHNM 302 Junior Euphonium II Credits: 2-4

EUPHNM 401 Senior Euphonium I Credits: 2-4

EUPHNM 402 Senior Euphonium II Credits: 2-4

Finance (FIN)

Courses

FIN 325 Financial Management Credits: 3

This course provides an overview of the relationship between business decisions and the value of the firm, as determined by the marketplace. Students will study the composition of capital structure, capital budgeting, and cost of capital theory, including incremental analysis of investment situations.

Prerequisites: ACCTNG 210 and completion of 45 hours.

FIN 326 Financial Management 2 Credits: 3

Explores leverage and capital structure, dividend policy, raising capital, short-term financial planning, working capital management and international financial management. FIN 326 builds on the content of FIN 325. A cursory knowledge of accounting principles is assumed, as well as fluency with simple algebra and arithmetic skills.

Prerequisites: FIN 325.

FIN 340 Financial Markets and Institutions Credits: 3

This course introduces students to U.S. financial markets and institutions, explaining how they operate, how they promote economic growth and well-being, and how they malfunction in financial crises. Among the financial markets examined are those for short-term debt, mortgages, government and corporate bonds and equity. Financial institutions studied include investment banks, commercial banks and savings institutions, pension plans, mutual funds, hedge funds, and private equity funds. The course also examines the role of the Federal Reserve in the financial system and the nature and purpose of financial regulation.

Prerequisites: FIN 325.

FIN 345 Investments Credits: 3

The course develops the theoretical framework necessary for a systematic approach to portfolio management. Content includes consideration of investment objectives, measurement of risk and returns, alternative uses of invested funds, analysis of securities markets, and the techniques of security analysis. Students will have an opportunity for the creation and management of an investment portfolio.

Prerequisites: FIN 325.

FIN 350 Introduction to Risk Management and Insurance Credits: 3

This course introduces students to the principles of personal and corporate risk management. Personal risk management topics include: personal insurance planning, annuity investing and personal liability management. Corporate risk management topics include: managing corporate risk, reducing risk through hedging, and legal liability risk.

FIN 351 International Financial Management Credits: 3

The world's business activities and economics are becoming more integrated. This course provides an introduction, appreciation and understanding of how this process impacts financial decisions for global business. Students should expect to develop an integrated analytical and decision making perspective that will enable them to extend financial concepts such as capital budgeting and risk management, and instruments such as forwards, swaps, fixed income analysis, arbitrage, etc. to their international analogs.

Prerequisites: FIN 325.

FIN 369 Payment Systems Credits: 3

The payment system is central to virtually all economic transactions. The payment system also has been undergoing fundamental changes over the past two decades. Yet, the payment system is one of the least understood parts of the economic system. The purpose of this course is to examine the payment system from economic, business, and regulatory standpoints.

FIN 419 Financial Statement Analysis Credits: 3

Students will take an in-depth look at the external financial statements that are prepared by corporations, including the tools needed to organize, summarize, and understand corporate financial data for use in decision making. Ratio analysis, trend analysis, earnings forecasting, bankruptcy predictors, statistical methods important to finance, and financial data bases are among the topics that will be covered.

Prerequisites: FIN 325.

FIN 428 Commercial Bank Management Credits: 3

This course presents an overview of financial management of the interest spreads, credit risk, liquidity, and capital positions of commercial banks. Topics to be covered include analysis of bank profitability, lending functions and policy, securities investment strategies, fund attraction, regulatory examination, capital adequacy, and integrated asset/liability management. Instructional media includes cases and computerized bank management simulation.

Prerequisites: FIN 325.

FIN 435 Advanced Corporate Finance Credits: 3

The course focuses on the finance function of the firm from the managerial perspective. Topics include working capital management, capital budgeting, financial structure, merger and reorganization, capital rationing, and analysis of risk. Students will use cases and computer techniques.

Prerequisites: FIN 326.

FIN 445 Advanced Investments Credits: 3

Students take an in depth look at some of the advanced investment analysis tools used by practicing portfolio managers. This course covers the valuation of both derivative securities and fixed-income securities. There is also a strong focus on managing price risk, interest rate risk, and exchange rate risk. In addition there is an emphasis on bond portfolio management and derivative security applications.

Prerequisites: FIN 345.

FIN 451 Life & Health Insurance Credits: 3

This course focuses on insurance issues related to life and health insurance. Content includes consideration of life insurance needs, annuities, disability insurance, long-term care insurance, and personal and corporate health insurance issues.

Prerequisites: FIN 350.

FIN 452 Property and Casualty Insurance Credits: 3

This course focuses on insurance issues related to commercial property and liability insurance. Content includes consideration of issues related to managing risks such as loss of business income, employer liability, management liability, environmental liability and cyber-liability.

Prerequisites: FIN 350.

FIN 453 Risk Management Credits: 3

This course focuses on insurance issues related to managing corporate risk. Content includes consideration of issues related to managing risk such as enterprise risk management, reinsurance, corporate property and liability, and corporate uses for death and disability insurance for key employees.

Prerequisites: FIN 350.

FIN 454 Principles of Surety and Corporate Liability Credits: 3

This course focuses on insurance issues related to surety bonding and corporate liability. Content includes consideration of issues related to managing risk such as mitigating environmental liability, corporate safety programs, and surety bonding.

Prerequisites: FIN 350.

FIN 476 Introduction to Fintech Credits: 3

This course will introduce students to Fintech and provide an overview of the main areas in which it is disrupting finance. These areas include lending and equity investment (algorithmic lending, P2P lending and crowdfunding platforms); financial market infrastructure (cryptocurrencies, blockchain technology, smart contracts); portfolio management and financial advice (robo-investment); and financial trading (algorithmic trading, digital trading platforms). Students will learn how the new financial technologies work, how incumbents and new entrants might profit from the technologies, and how the technologies could affect the efficiency, accessibility, fairness, and security of the financial system.

FIN 487 Special Topics Credits: 3

Special topics in finance.

FIN 496 Internship: Finance Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Internship coursework is evaluated on a credit/no credit basis.

Prerequisites: Departmental consent.

FIN 497 Special Topics: Finance Credits: 1-3

Study and research in areas of special interest under individual faculty direction.

Prerequisites: Departmental consent.

Flute (FLUTE)

Courses

FLUTE 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit towards the major.

FLUTE 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

FLUTE 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

FLUTE 101 Freshman Flute I Credits: 2-4

FLUTE 102 Freshman Flute II Credits: 2-4

FLUTE 201 Sophomore Flute I Credits: 2-4

FLUTE 202 Sophomore Flute II Credits: 2-4

FLUTE 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

FLUTE 301 Junior Flute I Credits: 2-4

FLUTE 302 Junior Flute II Credits: 2-4

FLUTE 401 Senior Flute I Credits: 2-4

FLUTE 402 Senior Flute II Credits: 2-4

Foreign Language (FRN-LNG)

Courses

FRN-LNG 180 Special Elementary Foreign Languages Topics I Credits: 2-5

Instruction in foreign languages at the elementary level. Essentials of grammar, basic conversation and reading, practical vocabulary. May include introduction of new methods of foreign language teaching, special texts, and languages not offered through regular courses.

FRN-LNG 190 Special Elementary Foreign Languages Topics II Credits: 2-5

Special Elementary Foreign Languages Topics II.

FRN-LNG 230 Themes in World Cultures Credits: 3

Introduction to themes, topics, and traditions in world cultures with emphasis on historical or contemporary transnational and global issues.

FRN-LNG 231 Themes in World Languages Credits: 3

A survey of the world's human languages with a focus on typology, geography and sociolinguistics.

FRN-LNG 280 Special Intermediate Foreign Languages Topics I Credits: 1-4

Instruction in foreign languages at the second-year intermediate level. Further development of comprehension and communicative skills. Readings of moderate difficulty and grammar review. May include introduction of new methods of foreign language teaching, special texts and topics, and new languages not offered through regular courses.

FRN-LNG 290 Special Intermediate Foreign Languages Topics II Credits: 1-4

Continuation of FRN-LNG 280.

FRN-LNG 302 Love and Death in European Medieval Literature Credits: 3

This course explores the intertwined themes of love and death in medieval European literature. Students will read key works from the medieval European traditions in English and will also be introduced to key concepts in the comparative study of medieval culture.

FRN-LNG 380 Special Topics Credits: 1-3

Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes.

FRN-LNG 459 Foreign Languages Teacher Education Seminar Credits: 3

Supports the culminating Foreign Languages student teaching experiences, and the submission of a final professional teaching portfolio. Student teachers analyze the effectiveness of the teaching strategies they are applying in their student teaching experiences, for their effectiveness in facilitating learning in classrooms, and adapt lessons and assessment for individual learners. Peer and mentor collaboration in the analytical process are fundamental to the course objectives.

FRN-LNG 470A Internship in Foreign Languages Credits: 1-3

Intern experience under faculty supervision involving the use of the appropriate foreign language with a local firm, non-profit organization, etc. students will compile a portfolio of their work under the direction of the internship supervisor to be submitted for evaluation by their chosen faculty mentor.

Prerequisites: Junior standing.

FRN-LNG 470B School/Education Related Internship in Foreign Languages Credits: 1-3

Intern experience under faculty supervision involving the use of the appropriate foreign language at a local school. Students will keep a journal in the foreign language.

FRN-LNG 480 Special Topics Credits: 1-3

Each time this course is offered a particular genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes.

FRN-LNG 494 Methods of Teaching Foreign Languages Credits: 3

Teaching methods and materials for beginning and advanced classes in French, German, and Spanish. Modern language teaching methodology and material will be evaluated and demonstrated, together with effective use of the Language Resource Center, tapes, slides, film strips, and other audio-visual materials. Does not count toward a major in foreign language.

French (FRENCH)

Courses

FRENCH 110 Elementary French I Credits: 3

The goals of this course are an ability to speak and to understand simple (spoken) French as well as to read and write simple prose.

FRENCH 110 - MOTR LANG 101: French I

**FRENCH 120 Elementary French II Credits: 3**

Continuation of FRENCH 110.

FRENCH 120 - MOTR LANG 102: French II

**FRENCH 211 Second Year French I Credits: 3**

Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language.

FRENCH 221 Second Year French II Credits: 3

Continuation of FRENCH 211.

Prerequisites: FRENCH 211.

FRENCH 280 Special Intermediate French Topics I Credits: 1-4

Instruction of French on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses.

FRENCH 290 Special Intermediate French Topics II Credits: 1-4

Continuation of FRENCH 280.

FRENCH 301 Introduction to French Literary Studies Credits: 3

An introduction to the study of French literature and techniques of textual criticism. Readings include representative works from various periods. Strongly recommended for all majors, to be taken before or concurrently with other upper-level courses. Taught in French.

Prerequisites: FRENCH 221.

FRENCH 304 French Literature and Culture II Credits: 3

An introduction to the history of French literature from 1800 to the present stressing historical and cultural context, the major literary movements and the developments of the various genres and historical periods. Selected readings of the works of major authors of the period. Taught in French.

Prerequisites: FRENCH 221.

FRENCH 315 Intermediate Composition and Conversation I Credits: 3

Grammar review, practice in speaking and writing French, emphasis on writing. Required for major.

Prerequisites: FRENCH 221.

FRENCH 325 Intermediate Conversation and Composition II Credits: 3

Grammar review, practice in speaking and writing French; emphasis on speaking. Required for major.

Prerequisites: FRENCH 221.

FRENCH 340WI French Texts in Translation Credits: 3

Seminar on French texts in translation. Class will be conducted in English and no knowledge of French is necessary. May be taken for major credit.

FRENCH 351 Introduction to French Phonetics Credits: 3

Introduction to the fundamentals of pronunciation and intonation patterns in modern French.

Prerequisite: FRENCH 221.

FRENCH 352 French Civilization II: Contemporary French Civilization Credits: 3

An in-depth survey of contemporary French culture, including major historical events and movements that have shaped modern France, as well as geography, the political system, family life and education, economics, etc.

Prerequisites: FRENCH 221.

FRENCH 354 French Civilization III: Lyon, Crossroads of France and Europe Credits: 3

An introduction to French culture and civilization through the history, geography, culture and arts of Lyon and its region. Offered during the Study Abroad Program in Lyon.

Prerequisites: FRENCH 221.

FRENCH 380 Special Topics Credits: 1-3

Treatment of a particular aspect of literature, language, or culture normally not offered through regular courses. May be repeated for credit when the topic changes.

Prerequisites: FRENCH 221.

FRENCH 414 Medieval Literature & Culture Credits: 3

Selected topics in medieval French literature and culture. Emphasis will be placed on the cultural and historical contexts surrounding text production in the Middle Ages. May be repeated for credit when the topic changes.

Prerequisites: FRENCH 315 or FRENCH 325.

FRENCH 415 Advanced Conversation and Composition I Credits: 3

Practice in speaking and writing French, with attention to advanced grammar topics and the elements of style.

Prerequisites: FRENCH 315 or FRENCH 325.

FRENCH 417 Renaissance French Literature and Culture Credits: 3

Selected topics in Renaissance (16th c.) French literature and culture. May be repeated for credit when the topic changes.

Prerequisites: FRENCH 315 or FRENCH 325.

FRENCH 424 19th-Century French Literature Credits: 3

Selected readings in various genres from Romanticism through Symbolism.

Prerequisites: FRENCH 315 or FRENCH 325.

FRENCH 426 20th- and 21st-Century French Literature and Culture Credits: 3

Selected readings from the Belle Epoque to the contemporary period. Special attention given to historical, cultural, and theoretical perspectives on the texts. May be repeated for credit when the topic changes.

Prerequisites: FRENCH 315 or FRENCH 325.

FRENCH 449 Survey of French Theater Credits: 3

A survey of the major French playwrights and their plays from the 17th through the 21st centuries. Historical and cultural influences will be covered as well as the specificities of the genre from the perspective of how the plays are performed and how we read them.

Prerequisites: FRENCH 315 or FRENCH 325.

FRENCH 472 Francophone Studies Credits: 3

Study of different national Francophone literatures. Reading may include writers from Quebec, Haiti, Africa, Louisiana, Vietnam, the French Indies, etc.

Prerequisites: FRENCH 315 or FRENCH 325.

FRENCH 473 The Francophone World Credits: 3

This course is an introduction to a large spectrum of Francophone literatures cultures around the world with a focus on North and West Africa, Belgium, Quebec, French Antilles and Haiti.

Prerequisites: FRENCH 315 or FRENCH 325.

FRENCH 480 Special Topics Credits: 1-3

Each time this course is offered a particular author, genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes.

Prerequisites: FRENCH 315 or FRENCH 325.

FRENCH 490 Special Readings Credits: 1-3

Intensive readings in field or literary figure to be selected by the student in consultation with the instructor. Available to advanced students of French; available only when student cannot take regularly scheduled courses.

Prerequisites: FRENCH 315 or FRENCH 325.

FRENCH 499 Senior Seminar (Capstone) Credits: 3

Required for major. Covers seminal works of French literature in their historical and cultural context. Course content varies, but will include such elements as geography, politics, folklore, history of the language, architecture, art and music.

Prerequisites: FRENCH 315 or FRENCH 325.

General Education

Culture and Diversity Courses

GECDV 201 Culture and Diversity Credits: 3

Students engage in investigation and reflection of their own backgrounds and cultures, examining their own worldview and implicit bias. Through engagement with self and others, students begin recognizing the culture and worldview of those different from themselves. Students develop an awareness of self and how this self-knowledge manifests in interactions with others. Through dialogue and engagement with others in addition to reflection of self, students develop a critical consciousness of self and society.

Critical Thinking in the Arts and Humanities Courses

GECHT-AH 101 Making Meaning in A Changing World Credits: 3

Students appreciate the Arts and Humanities and the importance of the creative and human experience by learning how to analyze artifacts (e.g., texts) to make meaning out of their world.

GECHT-AH 102 Visual Art & Media Culture Credits: 3

An introduction to theory and practice in visual art and media culture, this course focuses on methods of understanding and creating images to reflect the cultural issues they represent, with focus put on how art represents the human condition.

GECHT-AH 103 Children's Literature and the Arts Credits: 3

This course introduces the critical analysis and evaluation of multicultural children's and young adult literature across a range of genres. Students will analyze the purposes and cultural meanings of print, digital, and online texts created specifically for children and adolescents and explore how readers meaningfully interact with this literature.

GECHT-AH 106 Kansas City as Text Credits: 3

Students appreciate the Arts and Humanities and the importance of the creative and human experience by learning how to analyze artifacts (e.g., texts) to make meaning out of their world. In this class, you will investigate important local topics, problems, or issues.

GECHT-AH 108 Making Meaning in A Changing World Credits: 3

Students appreciate the Arts and Humanities and the importance of the creative and human experience by learning how to analyze artifacts (e.g., texts) to make meaning out of their world.

Critical Thinking in the Natural and Physical Sciences Courses

GECHT-SC 101 How Do I Live in A Changing World Credits: 3

Students will investigate the natural and physical world through testable questions, models, hypotheses or discoveries and evaluate different lines of evidence including observations and measurements. Students will apply natural and physical science techniques and use results and conclusions to explain and appreciate the natural and physical phenomena that impact our lives, our community and the world in which we live.

Critical Thinking in the Behavioral and Social Science Courses

GECHT-SS 101 Why Though? Credits: 3

What is human behavior? How do humans influence and are influenced by the world around them? How can we study the "why" behind human behavior in a meaningful way given just how complex humans and societies are? In this course, students apply perspectives and critical thinking processes from the social sciences to identify and explore relevant questions. In particular, students collect and evaluate evidence and draw conclusions about the human experience in individual, social, and cultural contexts.

GEERT-SS 102 Culture through the Camera Lens Credits: 3

What is human behavior? How do humans influence and are influenced by the world around them? How can we study the "why" behind human behavior in a meaningful way given just how complex humans and societies are? In this course, students apply perspectives and critical thinking processes from the social sciences to identify and explore relevant questions. In particular, students collect and evaluate evidence and draw conclusions about the human experience in individual, social, and cultural contexts. This course provides an introductory survey of documentary film making.

Civic and Urban Engagement Courses

GECUE 201 Civic and Urban Engagement Credits: 3

Students participate in engagement with communities in which they investigate an issue of personal and public concern. Students analyze this community-defined issue or need by synthesizing knowledge from primary sources and/or secondary sources. Students discern and discuss the tension between individual and collective needs, and demonstrate ability and commitment to work actively within community contexts and structures to achieve a civic aim or remediate a problem or issue. In doing this, students develop decisions/ actions/ solutions that benefit the most people within a society while also not oppressing those in a minority. In short, students analyze issues and solutions that contribute to the greater good for the greatest number of diverse groups and people.

First Semester Experience Courses

GEFSE 101 First Semester Experience Credits: 3

The First Semester Experience will introduce students to the people, systems, and resources that foster success at UMKC. Students will participate in weekly Impact Seminars to learn about the research and teaching that takes place across campus and how to engage with faculty in your time at UMKC. They will also participate in small group sections for students pursuing related majors to explore big ideas, academic programs and career paths. The course also includes a range of co-curricular activities to connect students with a wide range of activities and events on campus and in the broader Kansas City community.

Geography (GEOG)

Courses

GEOG 105 Introduction to the Elements of Geography Credits: 3

A survey of major elements of physical and human geography, with a concise overview of the world's regions. Emphasis on global relationships and distributions, both environmental and cultural. Climates, natural vegetation, land forms, cultural origins and diffusions, economic patterns.

GEOG 105 - MOTR GEOG 101: World Regional Geography

GEOG 150 Introduction to Physical Geography Credits: 3

This course is an introduction to the study of the natural environmental systems of earth—the atmosphere, the hydrosphere, the biosphere, and the lithosphere. The primary objective of the course is to provide a broad overview of these systems at a global scale. This overview will entail descriptions of natural systems and the variations they exhibit both from place to place and through time. It will also entail explaining how natural systems operate and interact with each other, thereby providing a necessary foundation for understanding the tremendously diverse physical geography of earth.

Applies to natural science requirement.

GEOG 150 - MOTR GEOG 100: Physical Geography

GEOG 200 World Geography I Credits: 3

A survey of the physical and human geography of the regions and nations of Europe and the Americas, with Australia and New Zealand. The approach is strongly historical, emphasizing interconnections, shared colonial backgrounds and broader global contexts in the modern world. The course is aimed at non-specialists.

GEOG 202 World Geography II Credits: 3

A survey of the physical and human geography of the regions and nations of Russia and the other former Soviet republics, the Middle East, Africa, South Asia, East Asia Southeast Asia and the Pacific Realm. The approach is strongly historical emphasizing interconnections shared colonial backgrounds, and broader global contexts in the modern world. The course is aimed at non-specialists.

GEOG 203 Introduction to Geographic Information Systems Credits: 4

An introductory course covering the basic principles of geographic information systems focusing on such software programs as ARC-INFO and ARC-VIEW.

GEOG 210 Human Geography Credits: 3

A study of the geographical underpinnings and distribution of the main elements of culture, including population patterns, language, religion, political territorial organization, settlement, and economic livelihood. The environmental settings, geographic origins, diffusion, and geographic interrelationships of these culture traits are emphasized.

GEOG 215 Weather and Climate Credits: 4

Overview of weather processes and the main components of the climate system. Emphasis is on the physical basis of daily weather patterns, seasonal climate variability, and longer-term climate change at local, regional, and global scales. The theme throughout the course will be the importance of weather and climate as major drivers of environmental change.

GEOG 309 Urban Geography Credits: 3

Historical development, morphology and functions of urban places, including intercity relationships and the relationship between cities and their hinterlands; emphasis on American cities.

GEOG 311 Economic Geography Credits: 3

A systematic study of the modern world economy that includes discussion of the location of production and consumption, the nature and role of multinational enterprises in trade, resource limitations to growth, and cultural responses to globalization.

GEOG 314 Principles of Geomorphology Credits: 4

Explores the processes that shape the earth's surface. Focuses on the development and description of fluvial, glacial, eolian, and coastal landforms. Studies the influence of tectonic and climatic factors. Field trip.

Prerequisites: ENV-SCI 110R (or GEOLOGY 220).

GEOG 321 Climate Change Impact Assessment and Policy Response Credits: 3

This course introduces how scientists assess observed climate change and predict future climate change. Lectures, discussions, problem sets, and term papers help students explore interactions among climate change, human activities and policy responses. It helps students achieve an appreciation for the role of accurate scientific information as foundation for shaping political agreements and policies on climate change.

Prerequisites: ENV-SCI 110R.

GEOG 325 Cultural Perspectives on the Environment Credits: 3

This course explores the history of conservation practices in American agriculture from the 1700s through the present. Additionally, the course examines the past and present legal implications of environmental statutes for minority farmers from a social and environmental justice perspective.

GEOG 329 World Political Geography Credits: 3

An analysis of the influence of geographic factors (both physical and human) on the economic and political relationships of the nations of the world. Emphasis will be placed on population size and political viability of states, boundaries and frontiers as limits of national space, problems related to the spatial integration of states, and the independence and interdependence of states within the larger world political system.

GEOG 332 Cultural Geography Credits: 3

A study of the distribution and interpretation of cultural patterns throughout the world. Examined are material and non-material elements of culture such as settlement, land use, technology and belief systems. The geographic origins and diffusion of culture traits are emphasized.

GEOG 333 Geographic Elements of Urban Planning Credits: 3

Analysis of the changing form and structure of urban places from a planning viewpoint. The focus will be on land-use trends on both the intraurban and interurban levels. Covered will be such topics as planning for urban transportation, new towns, land-use planning, urban renewal, and environmental planning.

GEOG 340 Geography of the United States and Canada Credits: 3

A survey of the physical and human geography of the United States and Canada. The approach is strongly historical emphasizing interconnections, shared colonial backgrounds, and broader international contexts in the Americas and around the globe. This course is aimed at non-specialists.

GEOG 341 Geography of South America Credits: 3

A study of the physical and human geography of South America, with an emphasis on cultural processes and the historical record. Contemporary issues such as economic development, trade, urbanization, and geopolitical conflicts are discussed.

GEOG 342 Geography of Mexico, Central America and the Caribbean Credits: 3

A study of the physical and human geography of Middle America, with an emphasis on cultural processes and the historical record. Contemporary issues such as economic development, trade urbanization, and geopolitical conflicts are discussed.

GEOG 350 Geography of Europe Credits: 3

A survey of the physical and human geography of the regions and nations of Europe. The approach is strongly historical, emphasizing international interconnections and broad global contexts. The course is aimed at non-specialists.

GEOG 351 Regional Geography of the Middle East Credits: 3

A study of human imprint upon the land through settlement patterns, institutions of land organization, and types of economy. Strategies for the economic development of various regions in the Middle East are discussed.

GEOG 360 Principles of Biogeography Credits: 4

This course is an introduction to biogeography that explores the patterns of plant and animal distributions from both ecological and historical perspectives. We examine past geologic and climatic conditions, as well as interactions between organisms and their environment to explain modern distributions of flora and fauna. Human interactions with plants and animals have increasingly profound consequences on distributions of flora and fauna from destruction to management. We explore the increasing importance of issues and strategies in conservation. The laboratory portion of the course builds on core ecological concepts and provides experiences of field observation, data collecting and data analysis.

Prerequisites: ENV-SCI 110R.

GEOG 398 Field Trip Credit: 1

Three-day field trip in March or April (at student's expense) for department majors. An opportunity to observe and study physical and cultural features and collect materials. Brief descriptive report of trip required. Recommended preparation: 6-9 hours of upper-level geography.

GEOG 401 Advanced Geographic Information Science Credits: 4

This course is designed for the students knowledgeable in the fundamentals of geographic information systems, who wish to gain expertise in advanced topics and applications in geographic information systems, remote sensing, and related environmental informatics. Classes are organized to encourage active learning. Students are encouraged and guided to develop their research projects by integrating related techniques of geographic information science.

Prerequisites: GEOG 203 or GEOG 450.

GEOG 402 Environmental Remote Sensing and Digital Image Analysis Credits: 4

This course will provide students with innovative techniques for landscape-level environmental analysis, geographic and geological studies, earth science research, and environmental resources management using remotely sensed data including satellite images. Students will be taught basic remote sensing concepts and technical skills, including energy radiative transfer processes in remote sensing, sensors and resolutions, computer-based image processing and classification, and remote sensing/GIS integration.

Prerequisites: GEOG 203 or GEOG 450.

GEOG 403WI History and Philosophy of Geoscience Credits: 3

A survey of geoscientific thought since antiquity. The substance of geography, geology, and environmental studies will be sought primarily in scholarly treatise and formal analytical systems including cartography, but the course also addresses geoscientific principles emerging from the history of environment, government, law, economy, religion, literature, and material culture. Readings, lectures, discussions, research, writing.

GEOG 406 Global Environmental Change Credits: 3

This course will examine the current rates of global environmental change and potential causes in the context of Earth's natural climate variability. The course will follow a seminar format. Students will read and discuss published articles on current and emerging theories of forcing mechanisms in the Earth's systems.

GEOG 412 Global Tourism Credits: 3

This course is a regional survey of world tourism. Topics include the uniqueness of place, the marketing of tourist destinations, and the cultural, economic, and environmental impacts on host societies. Recommended preparation: GEOG 105 or GEOG 200 or GEOG 202.

GEOG 416 Understanding and Living with Volcanoes Credits: 3

This course will examine the distribution, tectonic setting, and morphology of a range of volcano types on Earth and a few examples from other planets. Students will study volcanic processes including explosive and passive processes and how we investigate them. This will involve discussion of volcanic hazards and hazard assessment, risk communication, and the challenges of volcanic crises response. The course will also cover how volcanoes impact the local and global economy and Earth's climate.

Prerequisites: GEOLOGY 220 or ENV-SCI 110R/110L, and GEOG 203 or GEOG 402.

GEOG 417 Special Topics Credits: 1-3

Individual research and study of a selected topic in geography, meteorology or earth science.

GEOG 426 Paleocology: Microfossils and Climate Change Credits: 3

Paleocology will focus on questions addressing past environments and past climates based on the ecology of microfossils. Micro-organisms are very sensitive to a wide variety of environmental conditions including temperature, precipitation, hydrology, water chemistry, salinity, habitat, and pollution. The fossil remains of these organisms are used as proxy indicators for reconstructing past environmental conditions, climate change, vegetation dynamics, and human impacts. Students will have the opportunity to process microfossils and make interpretations based on analysis data.

GEOG 437 Population Geography Credits: 3

This course analyzes human populations: how they grow, how their compositions change, and how and why people migrate from one place to another. Students will study basic demographic processes- mortality, fertility, and migration- and underline theory and techniques. Students will also examine relationships between population growth and population planning, immigration, urbanization and cities, and the environment.

GEOG 444 Spatial Data Analysis Credits: 4

Quantitative techniques and applications of spatial data analysis. The course will cover basic geospatial analysis techniques including hypothesis testing, kriging, variogram analysis, multivariate analysis and reliability analysis. Emphasis is on practical applications rather than theories. Intended for Geology, Geography, Environmental Studies, and relevant fields. Three hours lecture and one hour computer lab per week.

GEOG 448 Satellite Climatology Credits: 4

Use of satellite observations to study the climate system. Discussions consider the development of satellite climatology, sensors, platforms and methodologies used to estimate climate variables from radiance measurements. Aspects of climate that are emphasized include cloud climatologies, cloud systems, atmospheric moisture, radiation budget, and land-surface conditions. Three hours lecture and one hour lab per week.

Prerequisites: GEOG 303.

GEOG 449 Global Water and Sustainability Credits: 3

This course examines the physical characteristics of water and its role in Earth systems. The challenges facing societies in an era of rapidly changing climate are explored.

GEOG 450 Gis Fundamentals for Research Applications Credits: 4

This course will address the needs of upper level undergraduate and graduate students who desire to learn and apply fundamental Geographic Information Systems concepts and techniques for their research projects. This course will draw on the content of the Introductory GIS course offered by the department but will also be flexible such that the individual needs or interest of students can be met through guided reading and/or tailored laboratory sessions. The Department of Geosciences GIS computer laboratory, with a variety of GIS and Remote Sensing software, will be available for this course. Only for upper-level undergraduate and graduate students.

GEOG 460 Transportation Geography Credits: 3

Relation between transportation and spatial organization, selected analytical models dealing with traffic demand, network configuration, and allocation of transport facilities; application to specific problem areas including commuting. Seminar with discussions of briefs and term paper.

GEOG 496 Geography Internship Credits: 1-6

Students obtain directed practical experience working with non-profits, governments, or private enterprises. Duties will vary based on contractual agreement between the student, host organization, and the professor.

Prerequisites: Junior standing or higher.

GEOG 499WI Geography Seminar Credits: 3

Students critique geographic research and prepare a paper and an oral presentation on an approved topic.

Prerequisites: Senior standing.

Geology (GEOLOGY)

Courses

GEOLOGY 220 General Geology Credits: 3

Geology is the study of Earth, the materials that make up the Earth, and the forces and processes that build and shape the continents, oceans, and life on Earth. The goal of this course is for students to gain an understanding of the fundamental concepts and scientific principles that underlie the physical, chemical, and biological processes that shape our Earth and to learn to think critically about scientific information and how geologic processes affect us every day.

GEOLOGY 220 - MOTR GEOL 100: Geology

**GEOLOGY 220L General Geology Laboratory Credits: 2**

Laboratory and field investigations of principles of the geology designed to complement the topics covered in GEOLOGY 220 through the use of inquiry-based investigations in the laboratory and field.

GEOLOGY 220L - MOTR GEOL 100L: Geology with Lab

**GEOLOGY 250L Field Methods in Earth and Environmental Science Credits: 3**

A field-based course covering basic methods used by earth scientists for environmental, geographic, and geologic investigations. Students will collect field data at off-campus sites, conduct periodic monitoring, and analyze samples using departmental and personal instrumentation. Students will work on collaborative projects and will present their results. Class will meet weekly for four hours in the field.

GEOLOGY 250L - MOTR PHYS 110LES: Essent. Physical Sciences w/Lab

**GEOLOGY 251L Field Methods in Earth and Environmental Science: Off-Campus Credits: 3**

This course will provide students with an introductory, inquiry-based learning experience that focuses on the application of field methods for understanding surface and subsurface earth processes and environmental issues. Students will collect field data at off-campus sites, conduct periodic monitoring, and analyze samples using departmental Instrumentation. Students will work on collaborative projects and will present their results. Class will meet at an off campus location during break (added cost) plus have four on campus meetings.

GEOLOGY 313 Evolution and the Geologic Record Credits: 4

An introduction to the history of life by studying the geologic record. Students will examine major features of the fossil record including: invertebrates, vertebrates, and plants. Students explore what the fossil record tells us about geologic time, evolution, past environments and distributions of organisms. Three hours of lecture and two hours of laboratory a week. The course will include field trips to collect and interpret fossils and paleoenvironments.

GEOLOGY 314 Principles of Geomorphology Credits: 4

Explores the processes that shape the earth's surface. Focuses on the development and description of fluvial, glacial, eolian, and coastal landforms. Studies the influence of tectonic and climatic factors. Three hours lecture and two hours lab per week. Field trip.

Prerequisites: ENV-SCI 110R (or GEOLOGY 220).

GEOLOGY 321 Climate Change Impact Assessment and Policy Response Credits: 3

This course introduces how scientists assess observed climate change and predict future climate change. Lectures, discussions, problem sets, and term papers help students explore interactions among climate change, human activities and policy responses. It helps students achieve an appreciation for the role of accurate scientific information as foundation for shaping political agreements and policies on climate change.

Prerequisites: ENV-SCI 110R.

GEOLOGY 322 Earth Materials Credits: 4

Introduction to the formation, occurrence, and classification of minerals and igneous and metamorphic rocks. Three hours lecture and discussion with two hours laboratory a week.

Prerequisites: CHEM 212R, GEOLOGY 220 OR ENV-SCI 110.

GEOLOGY 325 Sedimentology/Stratigraphy Credits: 4

Study of sedimentary rocks with special emphasis given to hand specimen identification based on mineral composition and textural features. Characteristics of sediments, transportation and environment of sediment deposition. Principles of stratigraphy, facies analysis and interpretation. Measurement and description of stratified rocks. Three hours lecture and two hours lab per week. Field trips.

Prerequisites: GEOLOGY 220.

GEOLOGY 326CZ Archaeology of Ancient Disasters Credits: 3

Remarkable human achievements are revealed by archaeological research, but the human past was frequently shaped as well by disasters of natural and human origin. Drawing on case studies that include data from the geosciences, archaeological excavations, and historical sources, this class examines how earth processes, the biosphere, and human cultural behavior were all sources of catastrophe. The study of ancient disasters not only gives us a wider understanding of human history, it may offer lessons for coping with future catastrophes.

GEOLOGY 335 Introduction to Waste Management Credits: 3

Overview of issues in waste management. Nature and classification of waste. Municipal solid waste: disposal methods, design, construction and maintenance of sanitary landfills. Nature and sources of hazardous waste, storage, transportation, treatment and disposal of hazardous waste. Types and sources of nuclear waste; disposal of high level and low level nuclear wastes. Sources, nature, handling and disposal of biologic waste. Pollution prevention, recycling and resource conservation.

Prerequisites: ENV-SCI 110R, GEOG 150, GEOLOGY 220.

GEOLOGY 350 Earth Structures and Tectonics Credits: 4

This course is designed to teach students the basic techniques and approaches for problem solving in structural geology. The course will cover the fundamentals of crustal deformation and discuss joints, faulted and folded rocks in their plate tectonic context. Two hours of lectures and three hours of laboratory a week. Course will include local field trips and one weekend field trip.

Prerequisites: GEOLOGY 220, PHYSICS 210 (or PHYSICS 240).

GEOLOGY 370R Hydrogeology Credits: 3

Geology and hydrologic factors controlling the occurrence, movement, quality, recovery and development of water supply and distribution. Problems relating to urbanization of flood plains.

GEOLOGY 398 Geology Midcontinent Field Trip Credit: 1

A study of a selected area of the midcontinent U.S. with emphasis on locations to be visited during a three-day field trip (at the student's expense). An opportunity to observe and study physical features and collect materials. Several scheduled one-hour meetings in addition to field trip. Lectures, discussion and reading assignments provide a background to place the area covered by the field trip into the overall geologic framework of the Midcontinent U.S. Descriptive report or written examination. Limited enrollment.

Prerequisites: Junior or senior level.

GEOLOGY 411 Mineral Deposits Credits: 3

Distribution, origin and environmental implications of extractable resources including non-metallic deposits, ores, and selected energy resources.

GEOLOGY 416 Understanding and Living with Volcanoes Credits: 3

This course will examine the distribution, tectonic setting, and morphology of a range of volcano types on Earth and a few examples from other planets. Students will study volcanic processes including explosive and passive processes and how we investigate them. This will involve discussion of volcanic hazards and hazard assessment, risk communication, and the challenges of volcanic crises response. The course will also cover how volcanoes impact the local and global economy and Earth's climate. Recommended preparation: GEOG 314 / GEOLOGY 314 or GEOLOGY 325 or GEOLOGY 342.

Prerequisites: GEOLOGY 220 or ENV-SCI 110R/110L, and GEOG 203 or GEOG 402.

GEOLOGY 434 Hazardous Waste Operations Management Credits: 2

Overview of federal regulations dealing with hazardous waste management, toxicology, hazard communication, site management, air monitoring, operating procedures, and health and safety. The course includes hands-on training on spill control, equipment use and emergency response. Practical training involves physical stress and participants must be in good physical health. This course satisfies OSHA's 40 hour training requirement for hazardous waste personnel.

GEOLOGY 441 Environmental Geophysics Credits: 3

Fundamental theory and near-surface applications of the geophysical methods; (1) seismic refraction, (2) seismic reflection, (3) gravity, and (4) magnetics. Emphasis will be placed on the use of these methods in environmental and engineering investigations, addressing such issues as water resources, contaminant transport, geotechnical properties and archaeological protection. Course will include a field component illustrating application of selected techniques to local environmental problem.

GEOLOGY 446 Petroleum Geology Credits: 3

Study of the origin, concentration, exploration for and recovery of petroleum.

Prerequisites: GEOLOGY 220.

GEOLOGY 456 Field Methods in 3D Imaging of the Environment Credits: 3

This course is designed to teach students techniques to create high-resolution, 3D images of the environment and detailed topographic maps using digital technologies. The class will include instruction on various aerial systems and hand-held photography and the software required for data acquisition, processing, and interpretation.

GEOLOGY 460 Introduction to Geochemistry Credits: 3

Basic principles governing the origin, distribution and migration of the elements and the geochemical cycles operating in the earth's atmosphere, hydrosphere and lithosphere.

Prerequisites: CHEM 212R, GEOLOGY 312.

GEOLOGY 471 Tectonics Credits: 3

A detailed inquiry into plate tectonics and the geophysical and geological data that define the motion of lithospheric plates. Global examples of divergent, convergent, and transform plate boundaries will be studied through lectures, discussions, problem sets, and term papers.

Prerequisites: GEOLOGY 325, GEOLOGY 350.

GEOLOGY 472 Earthquake Geology Credits: 3

A detailed inquiry into the study of present and past earthquakes as they are preserved in the seismological, geophysical, and geologic record. Global examples of earthquakes will be studied through lectures, discussions, problem sets, term papers, field trips and field projects.

GEOLOGY 490 Geology Field Camp Credits: 6

Study and practical involvement in the methods of geological mapping. The six-week course is conducted during the summer, partially in a field camp away from the Kansas City area. Students pay their own travel expenses to and from the field. Participation in the course involves individual mapping in the field area and field reports.

GEOLOGY 498 Undergraduate Field Research Credits: 1-5

The student will collaborate with fellow students and instructors in collection of original field geologic data at a location remote from campus. Field research will be carried out during semester intersessions or summer semesters.

GEOLOGY 499WI Geology Seminar Credits: 3

Students participate in discussions; present formal talks; and prepare written papers on selected topics.

Prerequisites: Senior standing.

German (GERMAN)

Courses

GERMAN 110 Elementary German I Credits: 3

The goals of this course are an ability to speak and to understand simple (spoken) German as well as to read and write simple prose.

GERMAN 110 - MOTR LANG 105: Foreign Language I

**GERMAN 120 Elementary German II Credits: 3**

Continuation of GERMAN 110.

GERMAN 120 - MOTR LANG 106: Foreign Language II

**GERMAN 211 Second-Year German I Credits: 3**

Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language.

GERMAN 221 Second-Year German II Credits: 3

Continuation of GERMAN 211.

Prerequisites: GERMAN 211.

GERMAN 280 Special Intermediate German Topics I Credits: 1-4

Instruction of German on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses.

GERMAN 290 Special Intermediate German Topics II Credits: 1-4

Continuation of GERMAN 280.

GERMAN 301 Introduction to Literary Studies Credits: 3

An introduction to the study of the different genres of German literature and techniques of criticism. Readings include representative works of major authors from various periods. Strongly recommended for all majors. To be taken before or concurrently with other literature courses. Taught in German.

Prerequisites: GERMAN 221.

GERMAN 315 Intermediate Conversation and Composition I Credits: 3

Practice in speaking and writing German; emphasis on idiomatic usage. Required for major.

Prerequisites: GERMAN 221.

GERMAN 325 Intermediate Conversation and Composition II Credits: 3

Continuation of GERMAN 315. Required for major.

Prerequisites: GERMAN 221.

GERMAN 330 Graphic Narratives Credits: 3

In this class, we will read graphic narratives with a dual focus: we will investigate the literary character of these narratives and explore the ways in which text and illustration help us learn German.

GERMAN 380 Special Topics Credits: 1-3

Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes.

Prerequisites: GERMAN 221.

GERMAN 415 Advanced Conversation and Composition I Credits: 3

Practice in speaking and writing German, with attention to the elements of style. First semester required of all majors and second semester recommended. Both semesters required of prospective high school teachers. Either or both semesters may be repeated. No more than six hours of credit may be applied toward a degree.

Prerequisites: GERMAN 221.

GERMAN 420 German Enlightenment Drama Credits: 3

This course covers plays, dramatic theories and theater history in the German-speaking countries 1730-1780. Emphasis will be placed on the theater as a bourgeois instrument of public discourse.

Prerequisites: GERMAN 221.

GERMAN 453 Women's Voices in Germany and Austria Credits: 3

The course focuses on the role of women in German and Austrian society from the Roman era to the present, primarily through the examination of literary texts by women.

Prerequisites: GERMAN 221.

GERMAN 480 Special Topics Credits: 1-3

Each time this course is offered a particular author, genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes.

Prerequisites: GERMAN 221.

GERMAN 490 Special Readings Credits: 1-3

Intensive readings in a field or literary figure to be selected by the student in consultation with the instructor. Available only to advanced students of German when students cannot take regularly scheduled courses.

Prerequisites: GERMAN 221.

GERMAN 499 Senior Seminar (Capstone) Credits: 3

Required for major. Covers seminal works of German literature in their historical and cultural context. Course content varies, but will include such elements as geography, politics, folklore, history of the language, architecture, art and music.

Prerequisites: GERMAN 221.

Greek (GREEK)

Courses

GREEK 110 Elementary Ancient Greek I Credits: 3

The goal of this course is an ability to read classical Greek. The student will be introduced to the fundamentals of grammar and the basic vocabulary of the language and will do exercises in the reading and writing of sentences. Continuous passages of Greek will be presented by the end of the semester.

GREEK 110 - MOTR LANG 105: Foreign Language I

GREEK 120 Elementary Ancient Greek II Credits: 3

A continuation of the study of the grammar and vocabulary of classical Greek, with an increasing emphasis on developing skills in translation. By the middle of the semester students will be introduced to selections from Plato, Herodotus or Homer.

Prerequisites: Greek 110 or MOTR Equivalent.

GREEK 120 - MOTR LANG 106: Foreign Language II

GREEK 211 Intermediate Ancient Greek I Credits: 3

Instruction of Greek on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit.

Prerequisites: Greek 120 or MOTR Equivalent.

GREEK 221 Intermediate Ancient Greek II Credits: 3

Continuation of GREEK 211. May not be repeated for credit.

Prerequisites: Greek 211 or MOTR Equivalent.

GREEK 301 Herodotus Credits: 3

Selected readings in Ancient Greek from Herodotus' Histories.

Prerequisites: GREEK 211.

GREEK 302 Homer Credits: 3

Selected readings in Ancient Greek from Homer's Iliad or Odyssey.

Prerequisites: GREEK 211.

GREEK 310 Selected Readings in Ancient Greek and Rhetoric Credits: 3

Selected readings in Ancient Greek from works by Plato, Aristotle, or the Attic Orators.

Prerequisites: GREEK 211.

GREEK 311 Drama and Lyric Poetry Credits: 3

Selected readings in Ancient Greek from plays by Aeschylus, Sophocles, Euripides, or the Lyric Poets.

Prerequisites: GREEK 211.

GREEK 312 Greek Narrative Prose Credits: 3

Selected readings in Ancient Greek from Herodotus, Thucydides, Xenophon, Lucian, etc.

Prerequisites: GREEK 211.

GREEK 490 Special Readings in Greek Credits: 1-3

Intensive readings in period or genre or literary figure to be selected by the student in consultation with the instructor. Available only to advanced Greek students.

Guitar (GUITAR)

Courses

GUITAR 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit toward the major.

GUITAR 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

GUIITAR 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

GUIITAR 101 Freshman Guitar I Credits: 2-4

GUIITAR 101J Freshman Guitar I (Jazz) Credits: 2-4

GUIITAR 102 Freshman Guitar II Credits: 2-4

GUIITAR 102J Freshman Guitar II (Jazz) Credits: 2-4

GUIITAR 201 Sophomore Guitar I Credits: 2-4

GUIITAR 201J Sophomore Guitar I (Jazz) Credits: 2-4

GUIITAR 202 Sophomore Guitar II Credits: 2-4

GUIITAR 202J Sophomore Guitar II (Jazz) Credits: 2-4

GUIITAR 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

GUIITAR 301 Junior Guitar I Credits: 2-4

GUIITAR 301J Junior Guitar I (Jazz) Credits: 4

GUIITAR 302 Junior Guitar II Credits: 2-4

GUIITAR 302J Junior Guitar II (Jazz) Credits: 4

GUIITAR 401 Senior Guitar I Credits: 2-4

GUIITAR 401J Senior Guitar I (Jazz) Credits: 4

GUIITAR 402 Senior Guitar II Credits: 2-4

GUIITAR 402J Senior Guitar II (Jazz) Credits: 4

Harpsichord (HRPCHD)

Health Sciences (HLSC)

Courses

HLSC 100 Student Success Strategies Credit: 1

Topics will include setting goals for academic success, anticipating obstacles, problem solving solutions, and time management. Students will practice improving their listening, note-taking, and reading skills. They will practice communication, public speaking, and writing skills. Students will begin self-evaluation strategies to learn more about their motivation for successfully completing their academic program.

HLSC 101 Introduction to Health Sciences Credits: 2

This course introduces students to career options in health sciences. Students will explore basic concepts related to understanding one's role and scope of practice, professional responsibilities, and education and credentialing requirements for various careers in health. The course will explore basic concepts required by any health professional including history, safety, ethics, interpersonal skills, general well-being, as well as special skills and aptitudes required in various health career clusters. Students will explore health career paths in medical, government, business, non-profit, and many other sectors.

HLSC 110 Personal Wellness Credits: 3

This course presents an overview of health behaviors and actions needed to achieve a combination of physical, mental, and social well-being through intelligent lifestyle choices. Effective strategies for staying healthy and improving one's health will be explored. Elements of stress management, preservation of physical and mental well-being, personal hygiene and strong social relationships will be discussed.

HLSC 120 Anatomy & Physiology I Credits: 4

This course examines the structure and function of the human body from the molecular to the organism level as they interact among all body systems across the life span. Instructors also attempt to correlate course materials with the clinical aspects of the application of physiological knowledge.

Co-requisite laboratory exercises provide practical application of theoretical concepts. In this first term of two-term course, molecular biology, biochemistry, cellular biology, and histology are studied as well as the integumentary, musculoskeletal, and nervous systems.

HLSC 125 Medical Terminology Credit: 1

This course is designed to provide the student with a foundation in medical terminology and the components of health records. Course content will include how medical terms are formed; how medical terms are applied to organs, body systems and pathological conditions; how common medical abbreviations are used; and how health records are organized and compiled.

HLSC 160 Anatomy and Physiology II Credits: 4

This course is a continuation of HLSC 120. Co-requisite laboratory exercises provide practical application of theoretical concepts. Physiologic systems including endocrine, cardiovascular, immune, respiratory, digestive, renal, and reproductive are studied as well as embryology and genetics.

Prerequisites: HLSC 120 or NURSE 120.

HLSC 200 First Aid / CPR Credit: 1

This course is designed to certify students with the American Heart Association (AHA) in Basic Life Saving for Healthcare Providers and bloodborne pathogens. Students will be exposed to critical concepts of high quality Cardiopulmonary Resuscitation (CPR), the AHA's Chain of Survival, and 1 and 2 rescuer CPR and Automatic External Defibrillator (AED) for adult, child and infants. Bag-mask technique, rescue breathing, relief of choking will be covered. Adult and pediatric first aid basics, medical emergencies, injury emergencies, and environmental emergencies will be covered. The course will include information on bloodborne pathogens (protection, action, proper cleaning and reporting).

HLSC 230 Health Issues in Aging Credits: 3

This course focuses on promotion and maintenance of the health and well-being of the older adult population. Current trends and needs of the ever changing and diversifying older adult population are discussed. The physiological and psychological domains, socio-cultural influences, legal and ethical issues, and health care resources pertaining to older adults in relationship to their health and quality of life are explored. Assessments, problems and strengths, interventions, and outcomes specific to the older adult population are discussed. Opportunities are provided for interaction with the older adult population through service learning.

HLSC 252 Human Growth and Development Credits: 3

This course provides a basic introduction to the theory for human growth and development across the life span. Emphasis is placed upon the biological and the psychosocial aspects of growth and development. Content is organized in a modified chronological order dividing information into major stages of growth and development across the lifespan.

HLSC 252 - MOTR PSYC 200: Lifespan Human Development

**HLSC 255 Spanish for Health Care Pre-Professionals Credits: 3**

This course focuses on conversational Spanish, medical terminology in Spanish, and written/read Spanish. This course will provide the student with basic knowledge that will allow communication with clients who speak/read/write Spanish. This is a fast paced course and will require practice of the language outside of the classroom in order to master the material presented. Recommended preparation: SPANISH 110.

HLSC 300 Diversity in Health Credits: 3

This course will explore social determinants of health, i.e. how social, cultural, political, historical, and economic influences shape the individual's own values, beliefs, and behaviors. This course expands students' basic knowledge of cultural diversity to provide special focus on health disparities among marginalized populations. Students will examine diversity by exploring health inequities related to race and ethnicity, immigration status, disabilities, gender, access, poverty, sexual identity, and veteran status. The course includes experiential learning with organizations focused on reducing health disparities.

Prerequisites: HLSC 101 or PBHL 158.

HLSC 310 Healthcare Systems Credits: 3

The course is designed to provide a description and overview of the organization, financing, and delivery of healthcare in the United States. The historical background and the impact of socio-political, economic, and cultural influences will be explored. The purpose of the course is to provide a framework of understanding of the healthcare system through examination of public and private sectors, market competition, and government regulation. Major issues currently facing the healthcare system will be examined.

Prerequisites: HLSC 101 (or co-requisite) or PBHL 158 (or co-requisite).

HLSC 315 Health Literacy Credit: 1

In this course participants will explore the fundamentals of health literacy and demonstrate the impact on health outcomes. Students will be introduced to tools that health care professionals can use to assess the health literacy of their patients/clients. Tools and resources to provide health information at the correct health literacy level will be presented. Students will explore interventions that can increase an individual's health literacy.

HLSC 323 Bluford Healthcare Leadership Institute Phase I Credits: 3

This course is a leadership development program designed to expose students to dynamic leadership principles while analyzing challenging issues in today's healthcare landscape with leading national and local executives in the field. Topics covered include social determinants of health, delivery of healthcare in the U.S., for profit and not for profit healthcare systems, public health, public policy, and health law. The course includes site trips to an urban core safety net hospital and its behavioral health department, a community health center, and a healthcare informational technology corporation among others. Students will need to be accepted into the Bluford program to take this course.

HLSC 325 Human Sexuality Credits: 3

This course is designed to introduce students to the field of human sexuality. Course content will include sexual anatomy and physiology, sexuality across a life-span, sexually transmitted infections, contraception, pregnancy and childbirth, sexual orientation, love and relationships, sexual therapy, sex education, gender identity and gender roles and social and legal issues related to sex. Recommended preparation: HLSC 110.

HLSC 345 Quantitative Analysis in the Health Sciences Credits: 3

This course focuses upon the skills required for the utilization of scientific findings in evidence-based care. The conceptual basis of descriptive and inferential statistics found in the properties of the normal distribution, comprise the core of these skills. Using the normal distribution as a structure for understanding descriptive and inferential procedures, the course presents information necessary to the selection, computation and interpretation of basic statistics relevant to evidence based-care in the health sciences. Discussions of variables, measurement and tabular and graphic presentation of data precede the development of computation skills.

Prerequisites: MATH 110 or MATH 116 or STAT 115 or MOTRMATH 110 or higher level math course; or ALEKS score of 61 or higher; or ACT Math sub-score of 28 or higher; or SAT Math sub-score of 660 or higher.

HLSC 403A Comparative Weight Loss I Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Specific topics that will be addressed include risks of overweight/obesity; common psychological issues for the overweight/obese; societal perceptions and barriers for overweight/obese individuals. This course consists of one hour of didactic work with one module per week for four weeks.

HLSC 403B Comparative Weight Loss II Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Comparison of common medically recommended diets and diet programs and their efficacy/risks; exercise requirements for weight loss and weight maintenance. This course consists of one hour of didactic education with one module per week for four weeks.

Co-requisites: HLSC 403A.

HLSC 403C Comparative Weight Loss 3 Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Comparison of pharmacologic weight loss options and their efficacy/risks; non-prescription medications/nutraceuticals for weight loss and their efficacy/risks; and bariatric surgeries and efficacy/risks. This course consists of one hour of didactic work with one module per week for four weeks.

Co-requisites: HLSC 403A.

HLSC 404 Introduction to Social Justice Credit: 1

This course is designed to increase a student's knowledge regarding personal and social biases based on race, ethnicity, culture, religion, age, sex, sexual orientation, social and economic status, political ideology, disability and how these entities contribute to social injustice. The focus of the course will center on issues involving diversity, prejudice and oppression that impacts social justice. During the course, students will be introduced to tools for developing social justice literacy in order to take action towards establishing a more just society.

HLSC 408 Gender, Health and Development in Senegal Credits: 3

This course examines women's economic empowerment, health education initiatives, philanthropy, and social entrepreneurship in West Africa and Senegal in particular. In the main city of Dakar we will visit indigenous and global nonprofits to study their policies and processes. The culture, both urban and rural, will be experienced in order to provide a unique perspective on the Senegalese and their culture.

Prerequisite: Departmental consent.

HLSC 410 Epidemiology Credits: 3

This course is an introduction to epidemiology with an emphasis on applications in public health. Students will learn basic principles of epidemiology, including the relationship of simple statistics to epidemiology and public health, methods of disease investigation, epidemiological study designs and their uses and measures of effects. Through the course, students will be able to apply measures of disease incidence and prevalence, and explain the uses of screening tests and criteria for their evaluation, including measures of validity. The class will explore epidemiology in environmental health and social sciences.

Prerequisites: HLSC 101 or PBHL 158; HLSC 345, NURSE 345, or STAT 235.

HLSC 417 Information Systems and Technology for Improved Health Care Credits: 3

This course provides a basic introduction to health information technology across health care settings. Students will acquire an understanding of key concepts associated with health informatics and network models, systems and management strategies, health information strategic planning, clinical and public health application, data retrieval and analytics, public policy, research, and one's professional responsibility to protect electronic health care records.

HLSC 419 Introduction to Social Epidemiology Credit: 1

This course is designed to increase a student's knowledge of Social Epidemiology, which is the branch of epidemiology that studies the social determinants of health. Social processes will be explored that center on social networks, social support, social capital, social cohesion, and contributing ecological factors that influence health and wellness. Students will discover how social relationships and institutions, such as familial relationships, group culture, policies, and global economic forces, promote or undermine the health of populations. Students will also explore how social inequity indicators involving income, health insurance, and access to care inter-relate and often lead to negative health outcomes.

HLSC 423 Bluford Healthcare Leadership Institute Phase II Credits: 3

This course provides students opportunities to build upon and apply the healthcare knowledge learned during the first phase of the Bluford Healthcare Leadership Institute in an internship in a notable healthcare organization. Throughout the internship, students will be mentored by members of the organization's leadership team and be afforded unique opportunities to learn effective leadership practices, skills, and characteristics. Students will complete an internship project and at the conclusion of the internship will deliver their findings to the organization's leadership.

HLSC 430 Health Program Management Credits: 3

This course is designed to acquaint students with assessment, planning, implementation, and evaluation of health programs. Issues of health financing, health policy, health delivery, and population health will be explored. The course provides a broad introduction to key concepts in health program management, common issues, evidence-based tools, and usable strategies, regardless of the health settings. Vocabulary relevant to policy makers, managers, administrators, and consumers will be studied. Students will develop mock health programs using provided outlines and budgetary restrictions, while considering human resource restraints, climate, relevance of health issue, and readiness for change.

Prerequisites: HLSC 310.

HLSC 440 Ethics and Policy of Public Health Promotion Credits: 3

This course distinguishes biomedical ethics from public health ethics, highlighting the driving principle of justice in public health policy. Historical and present ethical issues will be explored within a variety of health based organizations and settings. The relationship of how ethics drives policy decisions and improves health outcomes will be discussed. The course will also examine how health policy is created in relationship to core ethical theories and public health justifications.

Prerequisites: HLSC 300.

HLSC 450 Urban Health Credits: 3

This course focuses on the unique health needs and outcomes of individuals and communities located within an urban core. Included in the course, are the specific ways in which health interventions can be delivered to urban populations to promote better health outcomes and quality of life. The course provides information on urban characteristics including crowding, poverty and crime in exacerbating the health and wellness needs of this historically underserved community.

Prerequisites: HLSC 300.

HLSC 460 Global Health Credits: 3

This course discusses the complexity of health in a global context. It is designed as an overview of the biological, social and environmental contributors to health and diseases in populations around the world. Course content will include case studies of various global organizational structures and systems relative to population health, selected infectious diseases, nutritional deficiencies and health effects of environmental change.

Prerequisites: HLSC 300.

HLSC 470 Technology, Marketing and Media in Health Credits: 3

This course will focus on past, present, and future trends in health marketing and messaging. Technology's role in marketing health will be explored. Marketing principles will be used to evaluate strategies to promote health behavior change and social policy. Course content will link current trends in consumer health and how these trends are marketed to the public. Examples include mobile apps and devices, personal health data collection, health data storage, and health risk assessment tools. Students will discuss the philosophical, social and legal issues in the use and abuse of health technology, health marketing, and health in the media.

Prerequisites: HLSC 440 (or co-requisite).

HLSC 476 Research Methods in Health Sciences Credits: 3

This course focuses upon the development of inquiry skills necessary to identify relevant research-based literature and apply findings from research to practice. Students will develop an understanding of basic research concepts and evidence based practice in addition to skills in finding, appraising, and using health related literature.

Prerequisites: HLSC 345, NURSE 345, or STAT 235.

HLSC 480 Leadership and Management in Health Professions Credits: 3

This course will provide the student with a theoretical foundation of leadership and management in health professions. The principles of authority, power, politics, decision making, and influence will be explored. Organizational philosophies will be examined within the context of current health issues. The leadership skills of negotiation, delegation, conflict resolution, coaching and mentoring will be discussed, as related to health professions. The role of communication will be examined across organization systems. The effect on gender and cultural diversity on communication will be discussed.

Prerequisites: HLSC 300.

HLSC 490 Special Topics Credits: 1-9

A course of study in a special area of interest in health sciences under individual faculty direction.

Prerequisites: Departmental consent.

HLSC 492 Health Sciences Specialty Course Credits: 3

This course provides students an opportunity to develop advanced knowledge and skills in health sciences. Concepts and topics covered throughout the course of the Bachelor of Health Sciences program will be revisited and practiced through a variety of applied assignments and experiences. Students will integrate examples and case studies from their Health Sciences Internship settings into the course.

Prerequisites: Departmental consent.

Co-requisites: HLSC 494.

HLSC 494 Health Science Internship Credits: 6

An experience-based internship for the senior student. Depending upon the health professions career selected, the student will complete a service learning, research, or problem-based experience under the guidance of a site supervisor within the agency or organization that is mutually agreed upon.

Prerequisites: Departmental consent.

Co-requisites: HLSC 492.

History (HISTORY)

Courses

HISTORY 101 U.S. History to 1877 Credits: 3

This course offers a broad survey of American history up to 1877.

HISTORY 101 - MOTR HIST 101: American History I

**HISTORY 102 U.S. History Since 1877 Credits: 3**

This course covers American history from the end of Reconstruction to the present.

HISTORY 102 - MOTR HIST 102: American History II

**HISTORY 201 European History to 1600 Credits: 3**

This course surveys the political, social and cultural history of Europe from ancient times to 1600. Beginning with a brief description of the riverine civilizations of the ancient Near East, the course then examines the political and cultural evolution of classical Greco-Roman civilization, the medieval world, the rise of the national state, and the essential characteristics of the eras of the Renaissance and Reformation.

HISTORY 201 - MOTR WCIV 101: Western Civilization I

**HISTORY 202 European History since 1600 Credits: 3**

This course surveys the political, economic, social, intellectual, and cultural history of Europe from about 1600 to the present. Emphasis is given to themes of continuity and change in European culture through the experience of political, scientific and industrial revolutions, conservative reactions, liberal reforms, nation building, imperialism, two world wars, fascism, communism and the Cold War.

HISTORY 202 - MOTR WCIV 102: Western Civilization II

**HISTORY 206 World History To 1450 Credits: 3**

This course surveys the cultural, social, economic, and political history of the world to 1450. It studies the development of civilizations in isolation as well as the origins, nature, and consequences of global forms of interaction and exchange.

HISTORY 206 - MOTR HIST 201: World History I

**HISTORY 208 World History since 1450 Credits: 3**

This course surveys the social, economic, political history of the world from 1450 to the present. It studies the development of civilizations in isolation as well as the origins, nature, and consequences of global forms of interaction and exchange.

HISTORY 208 - MOTR HIST 202: World History II

HISTORY 215 Getting High: Alcohol & Drugs in American History Credits: 3

This class will investigate historical transformations in how American society has defined and responded to problematic drinking and drug use. The class will analyze what controversies surrounding various forms of intoxication indicate about the nature of American society and culture.

HISTORY 300AM Special Topics in Antiquity and Medieval History Credits: 3

This course addresses special topics in Antiquity and Medieval History. Topics are focused and specialized based on faculty interests and change from semester to semester. Special topics courses are repeatable for credit when the topic changes. See notes in Pathway each semester for the specific topic.

HISTORY 300EM Special Topics in Early and Modern European History Credits: 3

This course addresses special topics in Early and Modern European History. Topics are focused and specialized based on faculty interests and change from semester to semester. Special topics courses are repeatable for credit when the topic changes. See notes in Pathway each semester for the specific topic.

HISTORY 300HW Special Topics in World History Credits: 3

This course addresses special topics in World History. Topics are focused and specialized based on faculty interests and change from semester to semester. Special topics courses are repeatable for credit when the topic changes. See notes in Pathway each semester for the specific topic.

HISTORY 300P Special Studies Credits: 1-3**HISTORY 300PH Special Topics in Public History Credits: 3**

This course addresses special topics in Public History. Topics are focused and specialized based on faculty interests and change from semester to semester. Special topics courses are repeatable for credit when the topic changes. See notes in Pathway each semester for the specific topic.

HISTORY 300US Special Topics in United States History Credits: 3

This course addresses special topics in United States History. Topics are focused and specialized based on faculty interests and change from semester to semester. Special topics courses are repeatable for credit when the topic changes. See notes in Pathway each semester for the specific topic.

HISTORY 300WY Decade of Dissent: The 1960s Credits: 3

The social movements and conflicts that developed during the 1960s continue to define American culture. Questions of racial and gender equity, a greater willingness to challenge authority, concerns about the environment, and a new openness about issues of sexuality all developed during the sixties and remain as arenas of debate today. This course will examine the origins, contexts, and major themes of these social and cultural movements.

HISTORY 301WI Historiography and Method Credits: 3

This basic course is required of all history majors at the beginning of the junior year. Content includes: 1) what history is; 2) its value and usefulness; 3) the diversity of our fields, approaches, and methods; and 4) the techniques of preparing and writing history papers. Texts and reading are approved by the Department (i.e.: Turabian for style). Although the emphasis is general instead of particular, the instructor will be assisted by other historians representing their main special interest areas.

HISTORY 302 Colonial North America, 1492–1763 Credits: 3

This course examines European colonization in North America, from the voyage of Christopher Columbus to the eve of the American Revolution. Students will consider the Atlantic-world context of colonization, the environmental factors that shaped colonial development, and the complex interactions of European, African, and Indian peoples.

HISTORY 303 The American Revolution, 1763-1789 Credits: 3

This course examines the history of the American Revolution, from the explosive political crisis of the 1760s to the struggle over ratification of the Constitution. Students will consider the origins and conduct of the war, as well as the Revolution's far-reaching political, social, and economic consequences.

HISTORY 304 The Early American Republic, 1789–1850 Credits: 3

This class will survey major themes in the history of the early American republic, from the passage of the Constitution in 1789 to the California Gold Rush of 1849.

HISTORY 305 America, 1828-1852: The Jacksonian Period Credits: 3

An analysis of the political, social, economic, and intellectual factors in American society, 1828-1852. The period featured the presidency of Andrew Jackson, the shaping of a new democratic ideology, the culmination of manifest destiny, the quickening of the antislavery impulse, the Mexican War, the growing sectional split, and the Compromise of 1850.

HISTORY 306 America, 1850-1877: Civil War and Reconstruction Credits: 3

A survey of the political, social and economic factors leading to the dissolution of the federal union is followed by a consideration of the major features and developments of the war period. This, in turn, leads to an analysis of the major factors and relationships involved in the "reconstruction" of the federal union. The course covers the years 1850 to 1877.

HISTORY 306A History of Christianity to the Middle Ages Credits: 3

This course examines the cultural, historical and theological development of Christianity from its origins to the High Middle Ages. The main themes follow the mechanisms and conditions shaping Christianity's expansion into a major cultural, social, institutional, and intellectual force in Western Europe with a focus on patterns of crisis and reform.

HISTORY 307A History of Christianity from the Middle Ages to Present Credits: 3

This course examines the cultural, historical and theological development of Christianity from the High Middle Ages to the present. The main themes follow the development of foundational Christian theological thought and practice into what are now mainstream Western Christian theologies, the institutional histories of Western Christianity, and the cultures of Western civilization.

HISTORY 309 World War II Film and Propaganda Credits: 3

This course examines film and propaganda, including posters, political cartoons, speeches, and other media, created in prewar or wartime conditions by both the Allies and Axis powers from 1933 to 1945 as it affected World War II.

HISTORY 334 History of Technology Credits: 3

The course examines technology as it shapes and is shaped by human society. Students will consider technology as a product of historically-specific and sometimes overlapping contexts shaped by culture, economics, natural environments, and social processes.

HISTORY 343 Oral History Credits: 3

This course focuses on the methods, theories, ethics, practices, and applications of tools in documenting and recovering the experiences of people hidden from the "traditional records." Through lectures, readings, discussions, and fieldwork, students will learn the various steps in developing a robust oral history project. Students will go out into the community to capture the histories of communities in Kansas City.

HISTORY 348 Missouri/Kansas Border Wars Credits: 3

This course explores the history of the Civil War on the Missouri/Kansas border, where residents first shed blood over the issue slavery. An exploration of this most uncivil of wars provides insight into the ways in which societies can be fragmented by ideology and ultimately rebuilt upon different lines.

HISTORY 349 Civil War in Memory and Film Credits: 3

This course explores how the era of the Civil War and Reconstruction has been portrayed in film, literature, and art, and if the popular memory of the war accurately reflects the history. We also will discuss how the understanding of this pivotal event in American History has changed over time and how cultural artifacts often say more about the time in which they were produced than the actual history of the Civil War.

HISTORY 356 Rise of the City in the U.S. Credits: 3

This course treats the background and major developments of the urbanization of the United States. Includes the American urban tradition, the scope of urbanization, colonial beginnings, urban rivalries, promotion, case studies of cities, the growth of urban services, the slum, problems of government, population trends, urban planning, and suburban growth. Consideration is also given to the methods and techniques of urban research and history of the development of this field.

HISTORY 357 The American West Credits: 3

This course deals with the relationship of the American West to the social and economic development of the United States. Major emphasis is placed on the role of the trans-Mississippi West in the economic growth of the national economy. Related cultural and political events are evaluated in the terms of the many Western frontiers. Emphasis will be placed on the Turner thesis, the Indian heritage, frontier violence, and the cow town experience.

HISTORY 358 History of the American South I Credits: 3

A study of the political, intellectual, cultural, economic, and social development of the American South up to and including the Civil War. Special topics discussed will be the plantation system, slavery, abolition, secession, the Confederacy, and the interaction of the region with the nation.

HISTORY 360R Constitutional History of the United States Credits: 3

The general question covered is: how does American society govern itself? Topics include the fusion of Anglo traditions and American environment, creation of the American republic under the Constitution of 1787, the struggle for sovereignty during the Marshall-Taney era, and the Supreme Court's utilization of the 14th Amendment to adapt the Constitution to modernity.

HISTORY 364R Nature, Culture And The Human Experience Credits: 3

This course is an introduction to various interpretations of nature with a focus on American culture and society. We will consider ideas about nature from diverse perspectives including history, literature, philosophy and religion in order to understand how human perceptions and uses shape relations with the natural world. Specific themes include such diverse topics as the aesthetic tradition, environmental thought, and environmental justice.

HISTORY 365A American Environmental History Credits: 3

This course examines the changing relationships between human beings and the natural world through time. The main argument of this course will be that American History looks very different through an environmental lens. Nature is an important category of historical analysis as well as a topic worthy of historical study itself and this course will examine themes as diverse as Native American ecology to the modern environment crusade.

HISTORY 366RR American Labor History Credits: 3

This course examines the history of work and the working class in the U.S. from 1750 to the present. We will focus on the transformation of the workplace, the rise of the union movement, the nature of cultural and political organizations, workers' relationships with other social groups, and the role played by gender, race, and ethnicity in uniting or dividing the working class.

HISTORY 369 Women and Work in Early America Credits: 3

This course examines the ways in which gender, race, region, and class have shaped the historical experiences of American women. Students will trace women's lives from pre-European contact to 1877 through an examination of a wide variety of social, cultural, economic, and political forces and factors.

HISTORY 370 Introduction to Material Culture Credits: 3

This course will consider the ways in which material culture contributes to our understanding of history. Scholars have increasingly recognized the significance of "the things they left behind," particularly as they provide insights to the lives of those who did not leave extensive written records. Students will consider all aspects of material culture, drawing largely on examples from American history: architecture, domestic utensils and furnishings, clothing, tools, and good agricultural practices. The courses will emphasize the process of handicraft technology as well as the product, and will consider the impact of modernization upon both process and product.

HISTORY 371 American History Through Film Credits: 3

This course will move through the twentieth century and highlight major themes and developments that reveal the contours of American history as depicted in film. Students will examine the ways in which filmmakers have presented history, paying particular attention to the presentation of political, cultural, and social conflicts.

HISTORY 375 Success and Failure in Nineteenth Century America Credits: 3

This course traces the social history and cultural significance of success, failure, and poverty in nineteenth-century America. The class will investigate how diverse Americans made sense of the rapidly growing disparities of wealth that accompanied the rise of industrial capitalism.

HISTORY 379 Museums, Monuments, and American Life: An Introduction to Public History Credits: 3

This course will investigate the ways America commemorates, invokes, and misremembers its history—what scholars call public history. Students will learn the skills professionals use to communicate historical scholarship to wider audiences, and will grapple with the political and ethical issues that arise when we expand the discipline's stakeholders.

HISTORY 392A Archival Internship Credits: 1-3

Students work directly with professional archivists and other personnel at the Kansas City Federal Records Center, the Truman Library, Jackson County Historical Society, and similar facilities in the area. Emphasis will be given to areas of arrangement, description and preservation of archival materials. Each student must make individual arrangements through the department.

Prerequisites: Departmental consent.

HISTORY 392B Public History Internship Credits: 1-3

Students work directly with public history and editorial personnel at the Kansas City Museum, the Kansas City Pitch Weekly, the Truman Library, and similar facilities in the area. Depending on the institutional affiliation, emphasis will be given to museum operations and displays, editing, fund-raising, historical research and writing. Each student must make individual arrangements through the department.

Prerequisites: Departmental consent.

HISTORY 398 Black Civil Rights in the 20th and 21st Centuries Credits: 3

This course examines the fight for black civil rights in the United States in the 20th and 21st centuries, focusing on the Jim Crow period, the fight to end segregation, and the enduring problem of race in the United States.

HISTORY 400 Special Studies Credits: 1-3

Courses on subjects which are not a part of the regular department offering. The courses result from one or more of the following: (1) The expressed desire of students; (2) the broadened or refocused scholarship of a member of the history faculty; (3) the temporary presence of a scholar whose specialization is not reflected in the department's regular offerings; (4) the conclusion by the department that the course meets a community need; (5) the effort of the history faculty to provide an interdisciplinary approach to an era or topic. The course is experimental in the sense that it is a one-time offering with the potential of repetition or modification—depending upon student, faculty and community response.

HISTORY 400CW Cluster Course: Critical Issues in Women's & Gender Studies Credits: 3

What does it mean to grow up female in America? How does being female influence the body, the mind, identity? This course is an interdisciplinary exploration of the issues that have shaped the lives of American women throughout the life cycle and across the timeline. This course examines the role that culture and society have played in shaping and defining what it means to be an American girl and woman.

HISTORY 400WI Special Studies Credits: 1-3

Special studies in History. Writing Intensive.

HISTORY 404 Women and Gender in Latin America Credits: 3

This course studies gender in Latin America from the eve of conquest by the Portuguese and Spanish in the fifteenth century to the present. It examines how ideas about gender affected the lives of Latin American men and women. This course additionally analyzes how gender and race contributed to the creation of a hierarchical social order. Finally, it discusses the exercise of authority within and outside households and its impact on private and public spaces.

HISTORY 405 Colonial Latin America (From the Encounter to the Early 19th Century) Credits: 3

This course discusses the conquest and colonization of Latin American by the Spanish and the Portuguese imperial powers from the time of the encounter to the early nineteenth century. It studies the Iberian, Indigenous and African cultures and their influence in the creation of a hierarchical imperial order. Emphasis is given to the impact of the conquest, the economics of exploitation, race, sexual and gender identities and, religious and legal domination.

HISTORY 406 Modern Latin America Credits: 3

This course studies social, political, economic and cultural trends in Latin America in the nineteenth and twentieth centuries. Discussion topics include nation building after independence with an emphasis on gender and race in the creation of national identities and new forms of social stratification; integration of national economies into the world economic system; the expansion of political participation and citizenship; immigration and the tensions caused by the forces of modernization and tradition.

HISTORY 407 Latin American Crises and Opportunities Credits: 3

This course studies why Latin America has experienced in the 20th and 21st centuries recurrent economic and political crises – and why it is still a land of enormous opportunity. While this is primarily a history course, it undertakes a multidisciplinary examination of the region's strengths and weaknesses by discussing theories of economic development, political and sociological models as well as the influence of crime and violence. Case studies anchored in representative countries will be used to illustrate historical trends and theories.

HISTORY 411A Medieval Civilization I Credits: 3

This course covers the period between the decline of the Roman Empire in the West and the Investiture Controversy. Topics include the rise of Christianity and early church-state relationships; the barbarian invasions and the various Germanic kingdoms; the age of Charlemagne; monasticism and feudalism. There will also be special sessions on the civilizations of Islam and Byzantium.

HISTORY 411B Medieval Civilization II Credits: 3

Medieval Civilization II.

HISTORY 412A Medieval Women & Children Credits: 3

This course explores the roles of women in the social, economic, political and cultural environments of medieval and early modern Europe. We examine the lives of women in all areas of life, from the ordinary to the extraordinary, in urban and rural environments, from the centers of religious and political power to the margins of society. Focus will be on the world of work for urban and peasant women and on the social and legal institutions of marriage, kinship and the family. The course makes extensive use of primary sources by and about women during this period.

HISTORY 414 Reformation Credits: 3

Beginning with a description and analysis of the social, intellectual and political aspects of the later Middle Ages, the course continues with an examination of those profound religious, social and political changes which mark the 16th century as the end of the Middle Ages and the beginning of the modern secular era.

HISTORY 416R The French Revolution and Napoleon Credits: 3

Narrative history concentrating on the explosive and colorful events and personalities in France, but also showing the European and Western context and impact of the revolution and Napoleon. Illustrated accounts cover such "great days" as the storming of the Bastille, the fall of Robespierre, and Napoleon's Coup of 18 Brumaire, and great battles. Main periods are: the origins of the revolution (economic, social, political, intellectual); revolution and reconstruction (1789-92); through terror to Thermidor (Jacobins and sans-culottes); Napoleon's wars and reconstruction (France and Europe). Cinema, slides and martial music periodically. Discussion of major authors and interpretations.

HISTORY 420CC World War I in Film: The World made Modern Credits: 3

This cluster course examines World War I and its legacy through the lenses of international history and film studies. It explores the origins and conduct of the "Great War," as it was called at the time, as well as its transforming effects on the modern international relations and the ongoing process of globalization. It also examines how the war spurred the growth of an infant motion picture industry, and how movies produced during the decades that followed helped shaping popular memories of the conflict-reflecting and shaping cultural discourses regarding the myth or reality of modern civilizational progress; the ethics of modern weaponry; the individual's placed in mass society; constructions of class, race, and gender; and the meaning of national identity in a globalizing world. The class will draw on selected history texts and an array of films and film clips.

HISTORY 425R European Criminal Justice History, 500-1900 Credits: 3

This course will survey European crime, criminal procedure, policing and punishment between 500 and 1900. Particular attention will be given to changing methods of proof (oaths, ordeals, juries); changing type of criminal activity (banditry, vagrancy, witchcraft, professional theft) and changing penal strategies (the stocks, breaking on the wheel, the workhouse, the prison, the penitentiary). English experiences are emphasized.

HISTORY 428B Gender & Medicine: Patients & Practitioners From Antiquity to Present Credits: 3

This course explores, in a selective fashion, the role of women in Western medicine both as health care providers and patients. The subject of the history of medicine is too broad to be covered comprehensively in a semester, and so we will focus on diseases or physical conditions which were believed to be limited to women—childbirth, certain mental health conditions, reproductive health, breast cancer— as well as the increasing marginalization of women within the profession of health care providers to those branches concerned primarily with "women's problems."

HISTORY 430RA 'We Are The Dead': The Great War Experience Through its Artifacts Credits: 3

World War One was the "war to end all wars"; all previous wars were indeed eclipsed by its scale of destruction. And yet, it was a war that initiated a century of continual bloodshed and crimes against humanity. This course will explore the causes, nature and consequences of the Great War of 1914-18. It will be taught on different themes each Winter semester at the National World War One Memorial Museum at Liberty Memorial.

HISTORY 431R Medieval England, 1066 To 1485 Credits: 3

Beginning with the Norman conquest of England in 1066, this course traces the history of Medieval England through the establishment of the Tudor dynasty. Covered will be such items as the rise of the Angevin Empire, the conflict between monarch nobility, the evolution of Parliament, as well as the Anglo-French rivalry which culminated in the Hundred Years' War.

HISTORY 432R Tudor England, 1485-1603 Credits: 3

This course covers England from the accession of Henry VII, the first Tudor, to the death of Elizabeth I in 1603. Topics to be covered are: transformation of England into a modern state, the Reformation, the role of Parliament, conflicts with European powers, especially Spain, etc.

HISTORY 433R History of Britain 1603-1832 Credits: 3

This course surveys the history of Britain from the rise of the Stuart dynasty through the Industrial Revolution, with particular emphasis on the cultural aspects of political, social, economic, and military changes. Topics include: the domination of the aristocracy; the rise of the Navy; the exploration of the Pacific; the monarchy of George III; the loss of the American colonies; the wars with Napoleon; the Agricultural and early Industrial Revolutions; and the social changes they brought in both Britain and the Empire.

HISTORY 436R Modern German History Credits: 3

This course traces the history of Central Europe from the fall of Bismarck to the reunification of Germany one century later. It will ask students to think critically about the relationship between state and society, elites and 'ordinary' Germans, in the various German-speaking regimes that existed over the course of this era: two empires, two interwar republics, two fascist dictatorships, and three post-fascist republics. All assigned readings will be in English; a background knowledge of European history is recommended.

HISTORY 437AWI Imperial Germanies, 1848-1918 Credits: 3

This course traces the history of German-speaking Central Europe from the Revolutions of 1848 to the collapse of the Hohenzollern and Habsburg empires at the end of World War One. It will ask students to think critically about the relationship between state and society and the role played by 'elite' and 'ordinary' people in shaping German history. This reading and writing intensive course will be run as a seminar. Final grades will be based on a portfolio of assignments of which students will select what they consider to be the best examples of their work.

Prerequisites: HISTORY 202, HISTORY 208.

HISTORY 437BWI First German Republics, 1917-1935 Credits: 3

This course traces the history of the two German Republics during the inter-war years—the First Austrian Republic and the so-called Weimar Republic—from the peace movements of the First World War to the solidification of fascist dictatorships. It will ask students to think critically about the relationship between state and society and the role played by "elite" and "ordinary" people in shaping German history. This reading-and writing-intensive course will be run as a seminar. Final grades will be based on a portfolio of assignment of which students will select what they consider to be the best portfolio of assignments of which students will select what they consider to be the best examples of their work.

Prerequisites: HISTORY 202, HISTORY 208, RooWriter.

HISTORY 437DWI Cold War Germanies, 1941-1991 Credits: 3

This course traces the history of the three postwar German Republics—the Second Austrian Republic, the German Democratic Republic, and the Federal Republic of Germany—from the initial plans of the Allies for postwar reconstruction to the Reunification of Germany in 1991. It will ask students to think critically about relationship between state and society and the role played by 'elite' and 'ordinary' people in shaping, and in the remembering, of German history. This reading-and writing-intensive course will be run as a seminar. Final grades will be based on a portfolio of assignments of which students will select what they consider to be the best examples of their work.

Prerequisites: HISTORY 202, HISTORY 208, RooWriter.

HISTORY 444R Islam and the Arabs: The Formative Period Credits: 3

The first semester of a three-semester sequence begins with a brief overview of the geography and topography of the Middle East. The course proceeds with a discussion of the conditions of pre-Islamic Arabia; the appearance of Muhammad and his mission; the rise and spread of Islam; the establishment and consolidation of the Arab dynasties in the Middle East, North Africa and Spain; Islamic institutions; and Islamic society and culture. The time span will be approximately 500 A.D. to the Mongol conquest of Baghdad in 1258.

HISTORY 445 The Ottoman Empire in the Middle East to World War I Credits: 3

The second semester of a three-semester sequence covers the transition from Arab to Turkish hegemony in most of the Middle East as well as the restoration of native Persian dynasties in Iran and their subsequent development. The emphasis is on the rise and decline of the Ottoman Turkish Empire. Attention is given to the Ottoman provinces and to the national movements of subject peoples. The course ends with an overview of World War I and the peace treaties which marked the dissolution of the Ottoman Empire.

HISTORY 446R The Middle East from World War I to the Present Credits: 3

The third semester of a three-semester sequence deals with the emergence of the modern countries of the Middle East after World War I and their history and course of development to the present day. There will be a general survey of the government and politics, economic situation, and social and cultural characteristics of each important country in the area. In addition, special topics will be discussed such as the modernization process, ideological alternatives, relations with the great powers, the economics and politics of oil, and the Arab-Israeli conflict.

HISTORY 464 Medieval Methods and Paleography Credits: 3

This course examines the methodology and historiography of Medieval Studies. Through an introduction to paleography, the study of medieval handwritings, it prepares students for advanced work in Medieval and Renaissance studies. Using an interdisciplinary approach, this course will examine the historical and cultural settings for medieval texts, their physical form and production, as well as the tradition of textual transmission in the medieval world. In addition to gaining familiarity with the many different types of primary sources, such as literary, artistic, legal, and notarial sources, students will be exposed to methods for practical archival work in various European nations.

HISTORY 468R Archaeology and the History of Antiquity Credits: 3

This course will analyze the contributions of archaeology to the understanding of ancient history. It will cover archaeological excavations and their pertinence to classical civilization in the Near East and Greece. The techniques and methodology of field archaeologists will be discussed and demonstrated. Archaeological excavations relating to the Hittite capital, to the Ugaritic tablets, to the Minoan-Mycenaean civilization and its link to the Near East will be treated.

HISTORY 469 Archeology and Biblical History Credits: 3

An examination of ancient Israel as she emerges from the ruins of the past, both lapidary and literary. Through a study of the "mute documents," artifacts man-made (storied cities, household utensils, inscribed shards from Jericho to Jerusalem) we gain an insight indispensable for Biblical studies, for ancient Near Eastern history.

HISTORY 470 Ancient Egypt Credits: 3

This course describes the political, social and cultural evolution of ancient Egypt from pre-dynastic times, with major emphasis upon the Old, Middle, and New Kingdoms (especially the 18th dynasty and the reign of Akhenaton).

HISTORY 471 Ancient Greece Credits: 3

This course begins with a survey of the pre-classical Minoan and Mycenaean civilizations and then describes the rise of prominent Greek city-states (with particular emphasis upon the evolution of Sparta and the political, social and cultural contributions of Athens). The course concludes with the rise of Macedon and Alexander's conquests and significance.

HISTORY 471P Ancient World: The Political Structure Of The Ancient World Credits: 4

The four-hour lecture period on weeknights will emphasize the historical aspects of the ancient civilizations. The lectures will be chronologically organized to focus upon their evolution from their rise to their collapse.

HISTORY 472 Ancient Rome Credits: 3

This course covers Roman history from its origins (including the Etruscans) to the decline of the imperial system. Particular emphasis is placed upon the political, social and economic developments in the Republic, the death of the Republic, the early Principate, and the factors that led to Rome's decline in the ancient world.

HISTORY 472P Ancient World: The Cul/Intellectual Dimension Of Ancient Civi Credits: 4

The four weekend periods will provide the students with a general picture of these civilizations: society, religion, economics, and culture (w.f., arts, literature, philosophy, science, etc.). Guest lecturers, slides, films and video cassettes will be used to introduce the varied aspects of these ancient peoples.

HISTORY 474 Late Antiquity: The Transformation of the Mediterranean World (200–600 AD) Credits: 3

The decline of the Roman Empire and the barbarian invasions transformed the Mediterranean and European worlds, forming the foundation of Europe and the Islamic world. Students will investigate the multicultural society of Late Antiquity and become familiar with the primary sources for the period.

HISTORY 475WI The History of Ancient Israel Credits: 3

Judaism has had a tremendous impact on our civilization and yet most Americans are only dimly aware of its origins and development. This course will trace the roots of the Jewish religion in its historical context from its beginnings through the formation of rabbinic culture. The rise of Christianity will be examined in its original Judaic context, and recent discoveries, particularly those pertaining to the Dead Sea Scrolls, will be interpreted.

Prerequisites: RooWriter.

HISTORY 476 Medieval Jewish History Credits: 3

This course covers the general period from the decline of the Roman Empire to the dawn of early modern times. It is concerned with Jewish centers of life and learning in the Diaspora, both East and West. The course considers the Jews under Islamic rule from the time of Mohammed through the Golden Age of Moorish Spain. The focus then shifts to the situation of the Jews in Christian Europe, from the period of Constantine to the expulsions from England, France and Christian Spain. The Jews in the Ottoman Empire are mentioned and the course ends with the episode of Sabbatai Zevi, the false Messiah.

HISTORY 477 Modern Jewish History Credits: 3

This course surveys modern Jewish history from the Napoleonic period to World War II. Analyzing the social status of the Jews in Medieval Europe, it proceeds towards a discussion of the growth of the national state and the breakup of the Holy Roman Empire and analyzes the growth of socialism, integral nationalism, and liberalism as they affected the Jewish communities in Europe and America. The course serves as a survey of modern political and economic trends as they affect a distinct group.

HISTORY 496 Historical Research Project Credits: 1-3

Working extensively with an individual faculty member actively engaged in his/her research, students practice the multiple facets of investigating the sources of history, developing a comprehensive analysis from such sources, and composing a persuasive interpretation.

Prerequisites: Departmental consent.

HISTORY 497 Special Topics and Readings Credits: 1-6

Intensive reading and/or research in an area selected by the student in consultation with the instructor. May be repeated for credit when the topic varies.

HISTORY 498WI Senior Capstone Credits: 3

This is the capstone course in the department and is required for majors in the senior year. It consists of tutorial sessions with a regular faculty member and independent research leading to a major paper using original source materials. Performance in this course will weigh heavily in the award of departmental honors.

Prerequisites: HISTORY 301WI.

HISTORY H497 Special Topics and Readings Credits: 1-6

Intensive reading and/or research in an area selected by the student in consultation with the instructor. May be repeated for credit when the topic varies.

Honors (HONORS)

Courses

HONORS 215 Researching Kansas City Credits: 3

Researching Kansas City is an interdisciplinary undergraduate research course open to honors and other high-achieving students. It will introduce students to scholarly research and analysis through the exploration of important issues of the past and present in Kansas City.

Prerequisites: Honors College Student, or a 3.5 GPA or higher, or a 28 ACT score or higher.

HONORS 230 Honors American Government Credits: 3

This course will analyze the structure and operation of American government. Major topic areas include the historical development of American democracy, mass political behavior, political institutions, public policy, and their connections. The US and Missouri Constitutions provide a framework for the class and are examined in-depth throughout the class.

Prerequisites: Honors student, or a 3.5 GPA or higher, or a 28 ACT score or higher.

HONORS 330 Senior Honors Thesis/Project Practicum Credit: 1

The Senior Honors Practicum is a graded one-credit-hour course that will prepare honors students to undertake a Senior Honors Thesis or Project. In this class, students will explore different options for theses or projects; identify a topic and faculty advisor; plan the production of the thesis or project; produce a component of the thesis or project; and collaborate effectively with other honors students to develop their plans.

Prerequisites: Admission to the Honors College.

HONORS 350 Honors Tutorial Credits: 1-3

Independent Study.

Prerequisites: Admission to the Honors College.

HONORS 490 Special Topics Credits: 3

An advanced undergraduate course designed to deal with a topic that is not available in the regular course offerings. May be repeated for credit when the subject changes.

Prerequisites: Admission into Honors College.

HONORS 495A Senior Thesis-Criminal Justice and Criminology Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495AA Senior Thesis Anthropology Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495B Senior Thesis-Art History Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495C Senior Thesis Biology Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495D Senior Thesis-Chemistry Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495E Senior Thesis-Communication Studies Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisite: Departmental consent.

HONORS 495EE Senior Thesis-Electrical and Computer Engineering Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495F Senior Thesis-Economics Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495G Senior Thesis-English Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495H Senior Thesis-Foreign Languages Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495I Senior Thesis-Geosciences Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495J Senior Thesis-History Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495L Senior Thesis-Mathematics Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495M Senior Thesis - Business Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495ME Senior Thesis-Medicine Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495N Senior Thesis-Philosophy Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495NH Senior Thesis-Health Sciences Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495NN Senior Thesis-Nursing Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495O Senior Thesis-Political Science Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495P Senior Thesis-Psychology Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495PA Senior Thesis-Public Administration Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar. Pre-requisites: Departmental consent.

HONORS 495Q Senior Thesis-Sociology Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495R Senior Thesis-Theatre Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495S Senior Thesis-Education Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495U Senior Thesis-Classics/Ancient Studies Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495V Senior Thesis-Physics Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 495X Senior Thesis-Music Credits: 1-6

Students who have completed the requirements for the Honors College may choose to do independent research and then write or create a senior thesis. If the thesis is acceptable as an honors thesis, the student will then graduate as an Honors Scholar.

Prerequisites: Departmental consent.

HONORS 496 Honors Internship Credits: 1-6

This course is an academic internship that requires written assignments in addition to the work performed in a professional workplace. Internships are individually arranged with the sponsoring organization, which may be a business, school, nonprofit agency or government office. Academic credit may range from 1 to 6 credit hours (for 0 credit hours see HONORS 496A). There will be a Learning Agreement established in the first week of the semester that states the contractual responsibilities of the student, the workplace supervisor and the internship coordinator.

HONORS 496A Honors Internship Credits: 0

This course is an academic internship that requires written assignments in addition to the work performed in a professional workplace. Internships are individually arranged with the sponsoring organization, which may be a business, school, nonprofit agency or government office. Academic credit for this course is 0 credit hours (for variable 1-6 credit hours see Honors 496). There will be a Learning Agreement established in the first week of the semester that states the contractual responsibilities of the student, the workplace supervisor and the internship coordinator. This Learning Agreement will outline the job responsibilities, workload expectations, assignments and anticipated learning outcomes of the internship experience.

HONORS 499 Senior Thesis/Project Writing Group Credit: 1

This course is open to honors students and high-achieving students who are working on senior theses, projects, or capstone papers. The group meets twice a month to offer peer response to the work of members, who set goals and deadlines for producing their theses or projects. A faculty member of the Honors College advises the group. Non-honors students who meet the Honors College admission criteria may receive permission to enroll.

Horn (HORN)

Courses

HORN 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit toward the major.

HORN 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

HORN 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

HORN 101 Freshman Horn I Credits: 2-4

HORN 102 Freshman Horn II Credits: 2-4

HORN 201 Sophomore Horn I Credits: 2-4

HORN 202 Sophomore Horn II Credits: 2-4

HORN 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

HORN 301 Junior Horn I Credits: 2-4

HORN 302 Junior Horn II Credits: 2-4

HORN 401 Senior Horn I Credits: 2-4

HORN 402 Senior Horn II Credits: 2-4

Information Technology (INFO-TEC)

Courses

INFO-TEC 222 Multimedia Production and Concepts Credits: 3

Multimedia production and concepts will give an overview of multimedia technology and communication theory needed to deliver information and to produce interactive presentations for the web, portable media, and for in-person presentations and demos. The course offers exposure to software, hardware, other multimedia technologies, authoring and copyright matters.

Prerequisites: COMP-SCI 101.

INFO-TEC 321 Introduction to Computing Resources Administration Credits: 3

This introductory course is designed to give an overview of a wide variety of technical, interpersonal, documentation, and managerial skills needed to become an effective systems administrator.

Prerequisites: COMP-SCI 201R.

INFO-TEC 426 Practical Network Security Credits: 3

This course examines common threats to computer network security and discusses various techniques to mitigate those threats. The course material is supplemented with lab assignments that implement network security tools and use them to build a small secure network. It discusses information hiding, traffic monitoring and control, intrusion detection, and security policy. Note: NOT FOR GRADUATE CREDIT.

Prerequisites: COMP-SCI 420.

INFO-TEC 429 Introduction to Cybersecurity Credits: 3

This course introduces students to cybersecurity and its domains. The course will cover topics such as cryptography, software development security, access control, security architecture, security operations, disaster recovery, and physical and environmental security.

Prerequisites: INFO-TEC 321.

INFO-TEC 490 Special Topics Credits: 1-3

Selected topics in specific areas of Information Technology/ Computer Science. May be repeated for credit when the topic varies.

Prerequisites: Departmental consent.

INFO-TEC 490DC Introduction to Data Compression Credits: 3

This course provides an introduction to information theory, first-order entropy; lossless methods such as Huffman coding, arithmetic coding, and dictionary methods; and lossy and transform coding including image, audio, and video formats. The emphasis in this course is on algorithmic understanding and applications rather than derivation from first principles. Not for graduate credit.

Prerequisites: MATH 210, COMP-SCI 303, or equivalent.

INFO-TEC 491 Internship Credits: 1-6

Students may participate in structured internships under the joint supervision of an employer and a faculty member. The student must carry out significant professional responsibilities that also have academic merit. The number of credit hours is based on the quality of the academic experience. Available for credit/no credit only, and students must be in good standing with a least 18 credit hours of CS/IT counting towards the degree.

Prerequisites: Departmental consent.

Integrated Studies (INTGR)

Courses

INTGR 200 Intermediate Pre-Hospital Life Support Credits: 4

This course is designed to increase the scope of practice for the Emergency Medical Technician who is considering becoming a paramedic. It encompasses EMS operations, and the management of various medical and trauma emergencies at the Intermediate level.

Prerequisites: School of Medicine, Paramedic Program Student.

INTGR 200L Intermediate Pre-Hospital Life Support Laboratory Credits: 2

Laboratory applications for emergency medical science.

Prerequisites: School of Medicine, Paramedic Program Student.

INTGR 201 Advanced Pre-Hospital Life Support I Credits: 4

This course encompasses EMS operations, as well as roles and responsibilities. Airway management, IV therapy, and management of various medical emergencies will be addressed. Students acquire the skills necessary to perform paramedic-level skills. These skills are practiced in the laboratory and clinical setting under close supervision.

Prerequisites: INTGR 200.

INTGR 202 Advanced Pre-Hospital Life Support II Credits: 4

This course encompasses the management of patients in the prehospital setting. Students acquire skills to perform interventions in the paramedic scope of practice. Skills are practiced in the laboratory and clinical settings under supervision, and during field internship with an ambulance provider.

Note: Admitted students in the UMKC Paramedic Program.

Prerequisites: INTGR 201.

Italian (ITALIAN)

Courses

ITALIAN 110 Elementary Italian I Credits: 3

Intended to give the student the ability to read prose of ordinary difficulty and to understand and speak simple Italian.

ITALIAN 110 - MOTR LANG 105: Foreign Language I

ITALIAN 120 Elementary Italian II Credits: 3

Continuation of ITALIAN 110.

Prerequisites: ITALIAN 110.

ITALIAN 120 - MOTR LANG 106: Foreign Language II

ITALIAN 211 Second Year Italian I Credits: 3

Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language.

Prerequisites: ITALIAN 120.

ITALIAN 221 Second Year Italian II Credits: 3

Prerequisites: ITALIAN 211.

ITALIAN 280 Special Intermediate Italian Topics I Credits: 1-3

Instruction of Italian on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit.

Prerequisites: ITALIAN 110, ITALIAN 120.

ITALIAN 290 Special Intermediate Italian Topics II Credits: 1-3

May not be repeated for credit.

Prerequisites: ITALIAN 280.

Latin (LATIN)

Courses

LATIN 110 Elementary Latin I Credits: 3

Elementary Latin I introduces students with no previous Latin experience to the fundamentals of Latin grammar. The course is continued with LATIN 120.

LATIN 110 - MOTR LANG 105: Foreign Language I

LATIN 120 Elementary Latin II Credits: 3

Elementary Latin II is a continuation of LATIN 110. This course focuses on the fundamentals of Latin grammar and morphology, and students will read longer Latin passages.

Prerequisites: LATIN 110 or MOTR Equivalent.

LATIN 120 - MOTR LANG 106: Foreign Language II

LATIN 211 Second Year Latin Readings I Credits: 3

This course introduces students to extended readings from Roman authors in Latin. Students' knowledge of basic Latin grammar, vocabulary, and morphology will be reviewed and reinforced.

Prerequisites: LATIN 120 or MOTR Equivalent.

LATIN 221 Second Year Latin Readings II Credits: 3

Prerequisites: LATIN 211 or MOTR Equivalent.

LATIN 280 Special Intermediate Latin Topics I Credits: 2-4

Instruction of Latin on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses. May not be repeated for credit.

Prerequisites: LATIN 120.

LATIN 290 Special Intermediate Latin Topics II Credits: 2-4

Continuation of LATIN 280. May not be repeated for credit.

LATIN 301 Virgil Credits: 3

Selected readings in Classical Latin from the works of Virgil.

Prerequisites: LATIN 211.

LATIN 302 Ovid Credits: 3

Selected readings in Classical Latin from Ovid's Metamorphoses.

Prerequisites: LATIN 211.

LATIN 314 Lyric and Elegiac Poetry Credits: 3

Selected readings in Classical Latin from Catullus, Horace, Martial, Ovid, etc.

Prerequisites: LATIN 211.

LATIN 490 Special Readings In Latin Credits: 1-3

Intensive readings in period or genre or literary figure to be selected by the student in consultation with the instructor. Available only to advanced Latin students.

Latina / Latino Studies (LLS)

Courses

LLS 201 Introduction to Latinx and Latin American Studies Credits: 3

This course addresses and examines the social, economic, and political factors that have influenced the historical experiences of Latinx in the U.S. and Latin Americans. Attention will focus on the major concepts, issues and debates in the field of Latinx and Latin American Studies. Particular consideration will be given to an analysis of and understanding as to how these factors have influenced the past and present status of Latinxs in U.S. society. Given the diversity existing within the Latinx population, the course will be comparative, cross-cultural, and interdisciplinary in nature.

LLS 300 Special Topics in Latinx and Latin American Studies Credits: 3

A variable content course offered in the area of Latinx and Latin American studies.

LLS 310 The World of Latinx Youth and Adolescents in the U.S. Credits: 3

This course will provide a general introduction and in-depth understanding to the largest group of racial/ethnic adolescents in the United States: Latinx youth. An historical examination of Latinx youth will provide a better understanding of their present status, with emphasis on their contact and interactions within social institutions. Additionally, students will analyze the experiences Latinx youth have within and among other groups in the broader social context based on past, present, and possible future interactions.

LLS 315 Arts Of African and New World Cultures Credits: 3

This historical survey of ethnographic arts examines the diasporas of African art and the influences of Africans on the arts of new world cultures (in Brazil, Surinam, Cuba, Haiti, and the United States) and Meso-American art and the influence of Meso-Americans on the arts of the Native North American cultures.

LLS 320 Ethnic and Minority Perspectives in Psychology Credits: 3

The theory, methods and content of psychology relevant to the interests and needs of ethnic minorities, and the contributions of ethnic groups and other minorities to psychology.

Prerequisites: PSYCH 210 with a C- or better.

LLS 322 Race and Ethnic Relations Credits: 3

The nature, origin and dynamics of ethnic and race relations in the U. S. and other societies. Specific attention will be given to the historical and contemporary contexts of prejudice discrimination and confrontation.

LLS 346 Urban Latin America Credits: 3

Introduction, overview, and analysis of major contemporary urban issues in Latin America.

LLS 348 Latinx Immigrants, Migrants, and Refugees in the U.S. Credits: 3

This course addresses the culture of societies of U.S. citizens, immigrants, and refugees of Latin American heritage living in the U.S. The course emphasizes recent anthropological, historical, cultural, and sociological studies.

LLS 353 Covering Urban Latinx Communities Credits: 3

This course focuses on journalistic methods of reporting Latinx communities, which are part of major urban areas. It covers topics on immigration, health care, policy, cultural diversity, race, legal issues, and education. It brings the voice of the Latinx communities into news stories. Various story-telling skills and ideas taught in this course will prepare students to cover the Latinx communities in urban areas and beyond.

LLS 397 Independent Readings in Latinx and Latin American Studies Credits: 1-3

Students will complete extensive readings in an area selected by the student with prior consultation with instructor.

LLS 400 Advanced Special Topics in Latinx and Latin American Studies Credits: 3

This course is a variable content course and offered as a result of specialized faculty interest, student demand, or the availability of a visiting expert in a field closely related to Latinx and Latin American Studies.

LLS 404 Women and Gender in Latin America Credits: 3

This course studies gender in Latin America from the eve of conquest by the Portuguese and Spanish in the fifteenth century to the present. It examines how ideas about gender affected the lives of Latin American men and women. This course additionally analyzes how gender and race contributed to the creation of a hierarchical social order. Finally, it discusses the exercise of authority within and outside households and its impact on private and public spaces.

LLS 405 Colonial Latin America (From the Encounter to the Early 19th Century) Credits: 3

This course discusses the conquest and colonization of Latin American by the Spanish and the Portuguese imperial powers from the time of the encounter to the early nineteenth century. It studies the Iberian, Indigenous and African cultures and their influence in the creation of a hierarchical imperial order. Emphasis is given to the impact of the conquest, the economics of exploitation, race, sexual and gender identities and, religious and legal domination.

LLS 406 Modern Latin America Credits: 3

This course studies social, political, economic and cultural trends in Latin America in the nineteenth and twentieth centuries. Discussion topics include nation building after independence with an emphasis on gender and race in the creation of national identities and new forms of social stratification; integration of national economies into the world economic system; the expansion of political participation and citizenship; immigration and the tensions caused by the forces of modernization and tradition.

LLS 407 Latin American Crises and Opportunities Credits: 3

This course studies why Latin America has experienced in the 20th and 21st centuries recurrent economic and political crises – and why it is still a land of enormous opportunity. While this is primarily a history course, it undertakes a multidisciplinary examination of the region's strengths and weaknesses by discussing theories of economic development, political and sociological models as well as the influence of crime and violence. Case studies anchored in representative countries will be used to illustrate historical trends and theories.

LLS 421 Made in the USA: Latinx Art and Experience Credits: 3

This course focuses on art of and by members of the U.S. Latinx community. Students in this course will engage with the politics of representation, gender, sexuality, race, class, and ethnicity in Latinx art, as well as visual and popular culture.

LLS 431 Hate & Bias Crimes Credits: 3

The purpose of this course is to examine the development and enforcement of hate crime law within our legal system. Discussion focuses on the causes and consequences of hate crimes, the constitutional issues associated with bias crime statutes, and the effectiveness of formal and informal social controls for eliminating hate and bias crimes.

LLS 497 Directed Research Credits: 1-3

Students will develop and conduct a research project in an area selected by the student under the supervision of a faculty member. Students may only enroll in 6 total credits of LLS 497 during their time at UMKC.

Prerequisites: Junior or Senior Level Standing.

Life Sciences (LIFE-SCI)

Courses

LIFE-SCI 201 Careers in Health I Credit: 1

This course will introduce students to various healthcare professions. Guest speakers will cover topics including day-to-day activities on the job, educational requirements, career advancement, and necessary interests and abilities.

LIFE-SCI 202 Careers in Health II Credit: 1

Students will gain an understanding of the role and scope of practice of health professionals, patient privacy, professionalism, professional school applications and a deeper appreciation of what it means to be a patient through facilitated shadowing experiences.

LIFE-SCI 310 Fundamentals of Medicine I Credits: 2

This course introduces students to various aspects of women's health care. In addition, students will consider the cultural diversity of caring for patients with various medical conditions, and will integrate information from the basic sciences, the, and the social sciences as they learn about health care. Recommended preparation: BIOLOGY 202 and BIOLOGY 206.

Prerequisites: Bachelor of Science, Biomedical Sciences Emphasis Student.

LIFE-SCI 320 Fundamentals of Medicine II Credits: 2

This course introduces students to the aging process and various medical conditions in the elderly. Cultural diversity within aging patient populations will be discussed. Students will experience personal growth and reflection. Recommended preparation: LIFE-SCI 310.

Prerequisites: Bachelor of Science, Biomedical Sciences Emphasis Student.

LIFE-SCI 330 Fundamentals of Medicine III Credits: 2

This course introduces students to various aspects of pediatric health care. Students will become familiar with medical symptoms and clinical findings while integrating knowledge in anatomy, physiology, and pathophysiology of infants, children, and adolescents. Recommended preparation: LIFE-SCI 320.

Prerequisites: Bachelor of Science, Biomedical Sciences Emphasis Student.

LIFE-SCI 340 Fundamentals of Medicine IV Credits: 2

This course introduces students to aspects of adult health care, including bioethics, conflict resolution, informed consent, and human subject research. Presentations on various medical symptoms and clinical findings will be provided to integrate anatomy, physiology, and pathophysiology for learning about acute and chronic medical conditions. Recommended preparation: LIFE-SCI 330.

Prerequisites: Bachelor of Science, Biomedical Sciences Emphasis Student.

LIFE-SCI 399 Introduction to Research Credits: 1-3

Introduction to the theory and practice of research in modern biological sciences. Requires minimum of 3-4 hours per week in the laboratory for each credit hour.

Prerequisites: Departmental consent.

LIFE-SCI 497 Directed Studies—Biological Sciences Credits: 3

Individual or small group study of topics in an area of the biological sciences including class room work, presentation, library work, and writing of term papers or other reports.

Prerequisites: CHEM 320 (or CHEM 322R).

LIFE-SCI 497A Directed Studies-Bioinformatics Credits: 1-3

Individual or small group study of topics in the area of bioinformatics including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours toward Biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 497B Directed Studies-Genetics Credits: 1-3

Individual or small group study of topics in the area of genetics including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours toward Biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 497BB Directed Studies: Behavioral Biology Credits: 1-3

Individual or small group study of topics in the area of behavioral biology including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours toward Biology course degree requirements.

Prerequisites: BIOLOGY 206 and LS-BIOC 441.

LIFE-SCI 497C Directed Studies-Microbiology Credits: 1-3

Individual or small group study of topics in the area of microbiology including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours toward Biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 497D Directed Studies-Physiology Credits: 1-3

Individual or small group study of topics in the area of physiology including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours toward Biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 497E Directed Studies - Biochemistry Credits: 1-3

Individual or small group study of topics in the area of biochemistry including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours toward Biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 497F Directed Studies - Biophysics Credits: 1-3

Individual or small group study of topics in the area of biophysics including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours toward Biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 497G Directed Studies-Cell Biology Credits: 1-3

Individual or small group study of topics in the area of cell biology including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours toward Biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 497H Directed Studies - Neuroscience Credits: 1-3

Individual or small group study of topics in the area of neuroscience including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours toward Biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 497I Directed Studies-Botany Credits: 1-3

Individual or small group study of topics in the area of botany including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours toward Biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 497J Directed Studies-Zoology Credits: 1-3

Individual or small group study of topics in the area of zoology including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours toward Biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 497K Directed Studies - Ecology Credits: 1-3

Individual or small group study of topics in the area of ecology including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours toward Biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 497L Directed Studies - Biological Sciences Credits: 1-3

Individual or small group study of topics in the area of biological sciences including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours toward Biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 497P Directed Studies - Biotechnology Credits: 1-3

Individual or small group study of topics in the area of biotechnology including class room work, presentation, library work, and writing of term papers or other reports. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 courses may not exceed 4 credit hours toward Biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 497WI Directed Studies—Biological Sciences Credits: 3

Individual or small group study of topics in an area of the biological sciences including class room work, presentation, library work, and writing of term papers or other reports.

Prerequisites: CHEM 320 (or CHEM 322R).

LIFE-SCI 499 Undergraduate Research-Biological Sciences Credits: 3

Independent research, including the writing of research reports in the area of biological sciences.

Prerequisites: CHEM 320 (or CHEM 322R).

LIFE-SCI 499A Undergraduate Research-Bioinformatics Credits: 1-3

Independent research, including the writing of research reports in the area of bioinformatics. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours toward biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 499B Undergraduate Research-Genetics Credits: 1-3

Independent research, including the writing of research reports in the area of genetics. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours toward biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 499C Undergraduate Research-Microbiology Credits: 1-3

Independent research, including the writing of research reports in the area of microbiology. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours toward biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 499D Undergraduate Research-Physiology Credits: 1-3

Independent research, including the writing of research reports in the area of physiology. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours toward biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 499E Undergraduate Research-Biochemistry Credits: 1-3

Independent research, including the writing of research reports in the area of biochemistry. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours toward biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 499F Undergraduate Research- Biophysics Credits: 1-3

Independent research, including the writing of research reports in the area of biophysics. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours toward biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 499G Undergraduate Research-Cell Biology Credits: 1-3

Independent research, including the writing of research reports in the area of cell biology. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours toward biology course degree requirements. Recommended preparation: BIOLOGY 206 and LS-BIOC 441.

Prerequisites: Departmental consent.

LIFE-SCI 499H Undergraduate Research-Neuroscience Credits: 1-3

Independent research, including writing of research reports in the area of neuroscience. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours toward biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 499I Undergraduate Research-Botany Credits: 1-3

Independent research, including the writing of research reports in the area of botany. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours toward biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 499J Undergraduate Research-Zoology Credits: 1-3

Independent research, including the writing of research reports in the area of zoology. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours toward biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 499K Undergraduate Research-Ecology Credits: 1-3

Independent research, including the writing of research reports in the area of ecology. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours toward biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 499L Undergraduate Research-Biological Sciences Credits: 1-3

Independent research, including the writing of research reports in the area of biological sciences. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours toward biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 499M Undergraduate Research-Biological Sciences Honors Credits: 1-3

Independent research, including the writing of research reports in the area of biological sciences.

Prerequisites: Departmental consent.

LIFE-SCI 499P Undergraduate Research-Biotechnology Credits: 1-3

Independent research, including the writing of research reports in the area of biotechnology. Combined credit for LIFE-SCI 497 and LIFE-SCI 499 may not exceed 4 credit hours toward biology course degree requirements.

Prerequisites: Departmental consent.

LIFE-SCI 499WI Undergraduate Research-Biological Sciences Credits: 3

Independent research, including the writing of research reports in the area of biological sciences.

Prerequisites: CHEM 320 (or CHEM 322R).

LIFE-SCI H490WI Honors Senior Seminar Credits: 3

Discussion, writing and specific readings to coordinate with and amplify topics covered in School of Biological Sciences seminars; must include a term paper on a specific topic. Writing Intensive.

Life Sciences - Anatomy (LS-ANATO)

Courses

LS-ANATO 219 Functional Anatomy I Credits: 3

An introduction to the functional anatomy of vertebrates with emphasis on organs, organ systems and tissues.

Prerequisites: Pharmacy or Medicine Student.

LS-ANATO 219L Functional Anatomy I Laboratory Credit: 1

An introduction to the functional anatomy of vertebrates with emphasis on organs, organ systems and tissues.

Prerequisites: Pharmacy or Medicine Student.

Life Sciences - Biochemistry (LS-BIOC)

Courses

LS-BIOC 341 Basic Biochemistry Credits: 3

One semester course covering the properties of organic compounds important to biological systems. Structures, characterization and reactions of common compounds and their relationship to the building blocks of biological systems will be discussed. Recommended preparation: BIOLOGY 202, CHEM 320 (or CHEM 322R).

LS-BIOC 360 Biochemistry Credits: 3

Introduction to modern biochemistry. Structure and function of biologically important compounds, major biochemical pathways and their regulation in animals, plants and microorganisms, and the molecular and biochemical basis of gene function will be studied. Recommended preparation: BIOLOGY 202, BIOLOGY 206, BIOLOGY 441, CHEM 320 (or CHEM 322R).

LS-BIOC 370 Pharmacy Biochemistry Credits: 4

The chemistry and mechanisms involved in biosynthesis, degradation and utilization of the major constituents of living systems, and the biochemistry of specialized tissues, hormones, nutrition and regulation with a focus on application to clinical pharmacy practice.

Life Sciences - Microbiology (LS-MCRB)

Courses

LS-MCRB 114L Introductory Microbiology Laboratory Credits: 2

Introductory laboratory studies in microbiology and infection to correlate with LS-MCRB 113. For non-majors only; does not count toward biology degree requirements. Recommended preparation: BIOLOGY 112 or LS-MCRB 113.

LS-MCRB 121 Human Biology III (Microbiology) Credits: 3

Basic concepts of microbiology with emphasis on infectious diseases and host defenses. Recommended preparation: CHEM 211.

Prerequisites: LS-ANATO 219 or BIOLOGY 108.

LS-MCRB 121L Human Biology III (Microbiology) Lab Credit: 1

Laboratory exercises demonstrating basic concepts of microbiology with emphasis on infectious diseases and host defenses.

Co-requisites: LS-MCRB 121.

LS-MCRB 4180 Microbiology Credits: 4

Study of infectious diseases, their etiology, symptoms, prevention and treatment. Special emphasis is placed on plaque formation, caries development, periodontal and other oral diseases that relate to dentistry.

Prerequisites: School of Dentistry Student.

LS-MCRB 431 Virology Credits: 3

Survey of the molecular biology of animal, plant, and bacterial viruses. The course will emphasize the molecular mechanisms of virus replication, viral pathogenesis, and the use of virus as model systems to study mammalian cells.

Prerequisites: BIOLOGY 202, BIOLOGY 206.

Co-requisites: BIOLOGY 441.

Life Sciences - Physiology (LS-PHYS)

Courses

LS-PHYS 217 Human Physiology Credits: 3

Introduction to body functions presented from an organ systems approach. For non-majors only.

Prerequisites: BIOLOGY 102 (or BIOLOGY 108 or BIOLOGY 109).

LS-PHYS 217 - MOTR LIFS 100P. Essentials in Human Biology - Phys**LS-PHYS 3070 Oral Physiology Credits: 3**

Concepts of general physiology will be discussed as they relate to the clinical practice of dental hygiene. Emphasis will be placed on the normal and abnormal physiology of oral structures, including such topics as neurophysiology, muscle function, salivation, and endocrinology.

Prerequisites: Dental Hygiene Student.

LS-PHYS 399 Pharmacy Physiology I Credits: 3

LSPHYS 399 is an introduction to integrated physiology of the human body, beginning with an emphasis on understanding the foundations of physiologic principles followed by an in depth study of the physiology of the nervous, endocrine, and muscle systems. Recommended preparation: BIOLOGY 202 and CHEM 320.

Prerequisites: School of Pharmacy Student.

LS-PHYS 400 Pharmacy Physiology II Credits: 3

LS-PHYS 400 is a continuation into the study of integrated human physiology. Topics covered include the cardiovascular, respiratory, renal, digestive and reproductive systems. Recommended preparation: LS-PHYS 399.

Prerequisites: School of Pharmacy Student.

LS-PHYS 401 Physiology Lecture Credits: 5

An integrated study of normal functions of various organ systems of the human body with special consideration of the physiology of the oral cavity and its related structures.

Prerequisites: School of Dentistry Student.

Management (MGT)

Courses

MGT 100 Foundations of Business Credits: 3

Provides an introduction to the functional areas of business (e.g., accounting, systems, finance, marketing, human resources, and entrepreneurship) as well as a number of contemporary business topics, including social responsibility, diversity, ethics, and globalization. Additionally, students will be exposed to various topics that facilitate a successful transition from high school to college. Examples include an overview of University and Bloch School resources, development of effective study habits, time and stress management, selection of a major and career options.

MGT 256 Legal and Regulatory Contexts of Organizations Credits: 3

An examination of the legal, regulatory, and ethical environment in which businesses operate. Students are introduced to our legal system, focusing on selected areas of business law. Not available for credit for students who have completed MGT 306.

MGT 301 Effective Business Communication Credits: 3

The instructor introduces students to the strategic nature of business communication. By the end of the course, students should be able to analyze business situations, prepare messages that fulfill the intended purpose of their communication, and meet the needs and expectations of business audiences. Students will develop the tools to deliver effective, professional written and oral communications, and will learn how to use library and electronic business research tools.

Prerequisites: DISC 200 or ENGLISH 225 or equivalent and Bloch School student with 45 hours earned.

MGT 301A Effective Business Communication for Non-Native Speakers Credits: 3

Students will learn the strategic nature of business communication with a focus on building business English language skills and understanding U.S. business terminology and culture. By the end of the course, students should be able to analyze business situations, prepare messages that fulfill the intended purpose of their communication, and meet the needs and expectations of business audiences. Students will develop the tools to deliver effective, professional written and oral communications, in addition to cultivating their English language abilities in the business environment.

Prerequisites: DISC 200 or ENGLISH 225 or equivalent and Bloch School student with 45 hours earned.

MGT 306 Legal, Ethical And Regulatory Environment Of Business Credits: 3

The course looks at legal and moral thought, with attention to ethical issues in business. Students are introduced to our common law system; selected areas of law, with attention to the inclusion of cultural and moral values; and an introduction to government regulation of business.

Prerequisites: Bloch or BIT student with sophomore standing.

MGT 320 Law Of Commercial Transactions Credits: 3

Study of major areas of law included in the Uniform Commercial Code. Topics may include sales, commercial paper, bank deposits and collections, aspects of property law, documents of title, investment securities, and secured transactions.

Prerequisites: MGT 306.

MGT 330 Understanding the Individual in the Organization Credits: 3

This course explores the micro dynamics of organizations: the individual and his/her relationship to other people, teams, and work groups. Topics will include: individual traits, behaviors, and skills for effective performance; self-assessment and professional development; staffing; motivation; individual and group dynamics; multicultural understanding and diversity; and ethical decision making.

Prerequisites: MGT 301 or MGT 301A or concurrent enrollment (for BBA and BSA students); Bloch business minor or BIT student with sophomore standing.

MGT 332 Principles of Organizational Behavior Credits: 3

A study of the principles and foundations of managing individuals, groups, and organizations. This course seeks to develop students' understanding of the concepts and approaches that constitute the fields of organizational behavior and management and how these concepts and approaches may be applied effectively in the workplace. Not available for credit for students who have completed MGT 330.

Prerequisites: MGT 301 or MGT 301A or ACCTNG 360 or concurrent enrollment (for BBA and BSA students); Bloch minor or BIT student with sophomore standing.

MGT 337 Managing Human Capital Credits: 3

Building on prior coursework, this course will provide students with advanced human resource concepts and practices as well as practical experience in how human resources should be managed in successful businesses. Student groups will work with a local organization to diagnose, analyze, and make recommendations regarding effective programs in staffing, developing, rewarding, motivating, and managing its personnel.

Prerequisites: MGT 330 or MGT 332.

MGT 355 Organizational Effectiveness and Leadership Credits: 3

Students will study the macro dynamics of organizations: broad knowledge of how organizations work and the various ethical means of impacting outcomes. Topics will include: structure, culture, and politics of organizations; human resources and linkages to organizational culture and success; organization influence and political savvy; managing change and learning in a global context; organizational governance, codes of conduct, and internal controls; the role of business in society; and various professional development issues.

Prerequisites: MGT 330 or MGT 332.

MGT 360 Groups and Teams Credits: 3

Teamwork has become increasingly popular in many organizations. Whether formally integrated into the organizational structure, or temporarily created around specific projects, teams can be an important competency of organizations. They are considered an effective performance unit, and expected to efficiently cope with the fast changes and demands of today's business environment. Attaining the full advantages from teamwork requires effective management of team processes and dynamics. This course focuses on issues in team development, internal processes, and members' behavior, as well as management skills needed to effectively lead teams in organizations.

Prerequisites: Bloch student and completion of 45 hours.

MGT 365 Managing in a Virtual Environment Credits: 3

This course builds on the fundamentals of individual and group behavior to emphasize how organizational design and management practices have been dramatically affected by the proliferation of social media and other internet technologies. Students examine cases and engage in virtual exercises to experience ethical and mindful ways to engage in the virtual environment. Virtual-appropriate variations of interaction, collaboration, conflict management, decision-making, problem-solving, and leadership are introduced. Students also examine geographic and cultural issues potentially encountered in a global virtual organization.

Prerequisites: MGT 330 or MGT 332.

MGT 367 Human Resource Analytics Credits: 3

A survey of analytical methods necessary to understand critical HR topics and make effective human capital decisions. Analytical methods in staffing, rewards, benefits, performance management, diversity, legal issues, safety, and current HR topics will be explored.

Prerequisites: MGT 337 and DSOM 211 (or STAT 235 or STAT 115 or MOTRMATH 110).

MGT 370 International Management Credits: 3

Students receive an introduction to management in an international environment, addressing the management functions and behaviors necessary to develop global vision and management skills at a strategic (macro) and interpersonal (micro) level. Cross-cultural management and competitive strategy are evaluated in the context of global changes.

Prerequisites: Bloch student and completion of 45 hours.

MGT 372 Ethics and Leadership Credits: 3

Students use a variety of frameworks and approaches to address ethics both abstractly (via case studies) and as a practical matter, as it will affect them and how they approach life in the workplace and other organizations. Students analyze (1) the role of values and ethics in decisions that individuals, managers, and organizations make on a daily basis, as well as the responsibility of each party in these decisions, as well as (2) the impact of individual, relational, and cultural differences on how individuals, managers, and organizations recognize, understand, make, and sometimes revisit ethical choices.

Prerequisites: MGT 332 or MGT 330 or concurrent enrollment.

MGT 374 Leading a Positive Workplace Credits: 3

Students will build their understanding of the dynamics of relationships, organizations, and organizational life in building and maintaining a positive workplace. Students will incorporate individual, interpersonal, organizational, and societal foci for managing at an individual and organizational level. Strengths-based leadership, values, ethics, diversity, managing within and across levels, negotiation, conflict management, and other broad areas of leading a positive workplace will be covered. Not available for credit for students who have completed MGT 355.

Prerequisites: MGT 332 or MGT 330.

MGT 375 Global Mindset for Managers Credits: 3

Students receive an in-depth look at the major geopolitical and cultural factors that have forged the international conflicts, relations, and identities that international business managers should thoroughly comprehend to effectively navigate cross-border ventures. In-depth regional and country business and cultural profiles will be investigated to provide students with multiple contrasting perspectives to their own upbringing or sense of identity (a global mindset), allowing them to better sympathize, communicate, and collaborate when working in cross-cultural business environments.

Prerequisites: MGT 370.

MGT 410 Corporate Social Responsibility Credits: 3

Students will examine the role of corporate social responsibility (CSR) in modern society. Students will learn that being able to respond to needs and values of stakeholders is a key to success in the globalized business environment. This course also offers opportunities for students to apply knowledge to practical decision-making using case studies, research projects, or other course activities.

Prerequisites: MGT 332 or MGT 330 or concurrent enrollment; MGT 301 or MGT 301A or ACCTNG 360 or concurrent enrollment.

MGT 470 International Study in Business Credits: 3

This course is designed to provide a study-abroad experience for the student. The course involves three components: study of international business through on-campus lectures and discussions; travel to a foreign country for visitations to business firms, government organizations, and cultural sites; and critique sessions of the international learning experience after travel completion.

Prerequisites: Departmental consent with special application and selection process.

MGT 471 Strategic Management Credits: 3

The study of business strategy concepts and application using case studies representing "real world" situations. The course stresses the formulation of business strategies to achieve organizational objectives using strategic analysis and models based upon external and internal assessments of the organization's environment.

Prerequisites: Junior standing and completion of ACCTNG 211; FIN 325; MGT 330 or MGT 332; MKT 324; and completion of or concurrent enrollment in DSOM 326 or DSOM 340.

MGT 487 Special Topics Credits: 3

Special topics in management.

Prerequisites: Departmental consent.

MGT 496 Internship: Management Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Internship coursework is evaluated on a credit/no credit basis.

Prerequisites: Departmental consent.

MGT 497 Special Topics: Management Credits: 1-3

Study and research in areas of special interest under individual faculty direction.

Prerequisites: Departmental consent.

Management Information Systems (MIS)

Courses

MIS 202 Computer Applications In Management Credits: 3

A comprehensive coverage of computer tools for personal productivity in a management context, including spreadsheets and databases.

Prerequisites: MATH 110 or MATH 120 or higher; or ALEKS score of 61 or higher; or ACT MATH sub-score of 28 or higher; or SAT MATH sub-score of 660 or higher.

MIS 402 Information Management Credits: 3

This course introduces students to the impact of information technologies and systems on the enterprise. Business Intelligence and decision support capabilities are explored as well.

Prerequisites: MIS 202 and junior standing Bloch student.

MIS 415 Managing the Information Systems Resource Credits: 3

All organizations today have information systems, and managing the related resources (systems personnel, software applications, databases, networks, computing hardware) is a necessary skill for many employees. This course is aimed at developing the non-technical skills that business-school graduates need to make appropriate decisions about the deployment of information systems throughout the firm.

Prerequisites: MIS 202 and junior standing Bloch student.

MIS 487 Special Topics Credits: 3

Special topics in management information systems.

Prerequisites: Departmental consent.

MIS 496 Internship: Management Information Systems Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Internship coursework is evaluated on a credit/no credit basis.

Prerequisites: Departmental consent.

MIS 497 Special Topics: Management Information Systems Credits: 1-3

Study and research in areas of special interest under individual faculty direction.

Prerequisites: Departmental consent.

Marketing (MKT)

Courses

MKT 324 Principles of Marketing Credits: 3

The course focuses on the processes involved in the marketing of goods and services, including the meaning and importance of marketing terminology, the marketing mix, the marketing concept, consumerism, market segmentation, market and marketing research, and the impacts of different competitive structures on marketing decision making.

Prerequisites: Completion of 45 hours.

MKT 335 Customer Insights Credits: 3

This course draws upon findings from various disciplines including cognitive psychology, social psychology, sociology, economics, and anthropology to understand and predict buying behavior. Structured around applications in marketing strategy, topical coverage includes motivation, perception, attitude change, choice decisions and the consumption process, as well as post-purchase satisfaction.

Prerequisites: MKT 324.

MKT 348 Marketing Research Credits: 3

Marketing Research is designed to systematically introduce students to the most commonly used tools/techniques used to arrive at major business decisions from a consumer/customer perspective. The course emphasizes analysis of data using statistical models. Students will use designated software to analyze data to address real-world marketing problems pertaining to market entry decisions, new product development, product positioning, and pricing.

Prerequisites: MKT 324; and DSOM 211 (or STAT 235 or STAT 115 or MOTRMATH 110) or DSOM 309.

MKT 390 Customer Data Analytics Credits: 3

Customer Data Analytics is designed to systematically introduce students to contemporary tools/techniques pertaining to the analysis of customer data to assist with business decision-making. The course emphasizes analysis of data using statistical models. Students will use designated software to analyze a wide variety of customer data for business purposes such as assessing customer response to marketing intervention, classification, clustering (for market segmentation), etc.

Prerequisites: MKT 324 and DSOM 211 or DSOM 309.

MKT 418 Advertising and Branding Credits: 3

Students receive exposure to the planning, implementation, and evaluation of various advertising and promotion strategies. Topics covered will include communication process, brand positioning, branding strategies, creative strategies; media planning, and promotional effectiveness.

Prerequisites: MKT 324.

MKT 420 Sales Management Credits: 3

This course examines the strategic management of the boundary-spanning function of the organization, the sales force. Topics include the selling process, customer relationship management, organizing the sales effort, utilizing sales force automation technology, understanding the salesperson's role, selecting appropriate salespeople, motivating the sales force, conducting training programs, and evaluating the efficacy of individual salespeople and the overall sales function.

MKT 430 Personal Selling Credits: 3

Regardless of what career you choose, sales will be a part of your life. Sales is an extremely common first job for graduating students and more than half of business graduates hold their first job in sales. The skills you will learn in this course are especially applicable to the professional selling context, however, they are also very relevant in non-sales applications. For example, this class will provide guidance in how to effectively conduct a job interview, make a sales proposal, deal with objections, manage your managers, and much more. These skills are valuable in any job regardless of major.

MKT 442 Social Media and Mobile Marketing Credits: 3

The course builds around Database Marketing principles, whether supporting marketing at a distance without requiring a physical wholesale or retail intermediary; or supporting physical retail. Social and Mobile media principles, on-line measurement, digital marketing strategy, and tactics by on-line platform are discussed across a variety of media and devices. Students must demonstrate competence in SEO (Search Engine Optimization) and on-line analytics.

Prerequisites: MKT 324.

MKT 465 Introduction to Retailing and Pricing Credits: 3

This course presents an approach to retail and pricing management. Topics covered in the course include: retail strategy development, understanding the customer, retail information systems, market location selection, merchandise buying and handling, financial operations management, human resource management, operations management, store layout and design, laws ethics, and retail tactics.

Prerequisites: MKT 324

MKT 480 Strategic Marketing Credits: 3

Marketing 480 is the capstone course in the marketing curriculum. The intent of this course is to review and integrate the important concepts you have learned in your other marketing and general business classes into a unified whole. This class is very intensive as well as interactive.

Prerequisites: MKT 324.

MKT 487 Special Topics Credits: 3

Special topics in marketing.

MKT 496 Internship: Marketing Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Internship coursework is evaluated on a credit/no credit basis.

Prerequisites: Departmental consent.

MKT 497 Special Topics: Marketing Credits: 1-3

Study and research in areas of special interest under individual faculty direction.

Prerequisite: Departmental consent.

Mathematics (MATH)

Courses

MATH 109 Precalculus Algebra Fundamentals Credits: 2

This course is required for students not meeting full placement requirements for MATH 110 (Precalculus Algebra) in order to concurrently enroll in MATH 110. Fundamental topics and skills that are necessary for success in MATH 110 will be developed in close alignment with the material covered in MATH 110 over the course of the semester. Students enrolling in this co-requisite course must remain enrolled in both courses for the semester. Students will not be permitted to withdraw from one of the courses (either MATH 109 and MATH 110) and not the other. Grades are not counted toward GPA. Does not fulfill Arts and Sciences mathematics requirement. Does not count toward graduation.

Prerequisites: ALEKS Score of 35 or higher; or ACT Math Sub-score of 18 or higher; or SAT Math Sub-score of 500 or higher.

Co-requisites: MATH 110.

MATH 110 Precalculus Algebra Credits: 3

Functions and graphs. Inverses, compositions, and transformation of functions. Solving equations, systems of equations, and inequalities. Linear, quadratic, polynomial, and rational functions. Exponential and logarithm functions and applications.

Prerequisite: MATH 100 with a grade of B- or higher; or ALEKS Score of 51 or higher; or ACT Math Sub-score of 22 or higher; or SAT Math Sub-score of 540 or higher; or concurrent enrollment in MATH 109.

MATH 110 - MOTR MATH 130: Pre-Calculus Algebra**MATH 116 Mathematics For Liberal Arts Credits: 3**

A survey of elementary mathematics covering such topics as: logic, sets, counting methods, introduction to probability theory, introductory statistics, plane and coordinate geometry. The course will emphasize mathematical concepts and does not require the level of computational skill of College Algebra. Topics from the history of mathematics will be presented as well as the influence of mathematics on a variety of disciplines. Recommended preparation: Three units of high school mathematics Algebra I and higher.

MATH 116 - MOTR MATH 120: Mathematical Reasoning Modeling**MATH 120 Precalculus Credits: 5**

Functions and graphs. Inverses, compositions, and transformation of functions. Solving equations and systems of equations, and inequalities. Linear, quadratic, polynomial, and rational functions. Exponential and logarithm functions and applications. Trigonometric functions, trigonometric identities, triangles. Credit will be given for either MATH 110 or MATH 120, and for either MATH 120 or MATH 125.

Prerequisites: ALEKS Score of 56 or higher; ACT Math Sub-score of 24 or higher; or SAT Math Sub-score of 580 or higher.

MATH 120 - MOTR MATH 150: Pre-Calculus**MATH 125 Trigonometry Credits: 2**

Trigonometric functions, trigonometric identities, triangles, and complex numbers. Credit will be given for either MATH 120 or MATH 125.

Prerequisites: MATH 110 with a grade of C- or higher; or ALEKS Score of 63 or higher; or ACT Math Sub-score of 28 or higher; or SAT Math Sub-score of 660 or higher.

MATH 206 Brief Calculus And Matrix Algebra Credits: 3

Brief review of selected topics in algebra. Introduction to matrix algebra. Introduction to differential calculus and optimization. Applications to problems in business.

Prerequisites: MATH 110 with a grade of C- or higher; or MATH 120 or higher with a grade of C- or higher; or ALEKS Score of 63 or higher.

MATH 210 Calculus I Credits: 4

Functions and graphs, rational, trigonometric, exponential functions, composite and inverse functions, limits and continuity, differentiation and its applications, integration and its applications.

Prerequisites: MATH 120 with a grade of C- or higher; or both MATH 110 and MATH 125 both with a grade of C- or higher; or ALEKS score of 76 or higher.

MATH 220 Calculus II Credits: 4

Techniques of integration, applications of the definite integral, improper integrals, sequences and series, power series. Taylor series and convergence, analytic geometry in calculus. Recommended preparation: MATH 210 or MATH 216.

MATH 250 Calculus III Credits: 4

Vectors, solid analytic geometry, vector functions and multiple variable functions, partial derivatives, multiple integrals, line and surface integrals with applications.

Prerequisites: MATH 220 or MATH 268.

MATH 266 Accelerated Calculus I Credits: 4

An accelerated first course in calculus focusing on application of differential calculus and basic vector and matrix calculations. Enrollment in this course requires permission from the School of Computing and Engineering.

Prerequisites: MATH 120 with a grade of B or higher; or both MATH 110 MATH 125 with a grade of B or higher; or ALEKS assessment score of 76% or higher.

MATH 268 Accelerated Calculus II Credits: 3

An accelerated second course in calculus focusing on application of integral calculus, analytic geometry, and vector analysis.

Prerequisites: MATH 266; School of Computing Engineering Student.

MATH 300 Linear Algebra I Credits: 3

Linear equations, matrix algebra, real vector spaces, linear transformations, determinants, eigenvalues and eigenvectors, orthogonality, and applications.

Prerequisites: MATH 250, (or MATH 220 and COMP-SCI 191).

MATH 301 On Solid Ground: Sets and Proof Credits: 3

This course is a transition from procedural mathematics, such as calculus, to advanced mathematics where proofs are the professional language of discourse. It covers basic set theory and logic, relations and functions, and how to analyze, construct, and write clearly reasoned, well-structured elementary proofs using universal techniques. This course satisfies a state requirement for teacher certification.

Prerequisites: MATH 220.

MATH 345 Ordinary Differential Equations Credits: 3

Students will study first order equations, linear second order differential equations, Taylor series and power series solutions, Laplace transforms, elementary systems of differential equations, numerical methods, and Fourier series and boundary value problems.

Prerequisites: MATH 250.

MATH 345L Ordinary Differential Equations Lab Credit: 1

This laboratory will enable the students to numerically solve first order, second order and systems of ordinary differential equations. Topics include Curve Fitting, Parameter Estimation, Numerical Solutions of Initial and Boundary Value Problems, and Model Specification.

Prerequisites: MATH 250.

MATH 402 Advanced Analysis I Credits: 3

Numerical sequences and completeness of the real numbers, numerical series, continuity and differentiation of real-valued functions of a real variable, integration and the fundamental theorem of calculus.

Prerequisites: MATH 250, MATH 301 (with a grade of B- or better).

MATH 406 Partial Differential Equations Credits: 3

Separation of variables, boundary value problems, Fourier series and integrals, wave equation, heat equation, potential equation, problems in several dimensions, and Bessel's differential equation.

Prerequisites: MATH 345 (or E&C-ENGR 241, or MEC-ENGR 272).

MATH 407 Introduction to Complex Variables Credits: 3

Complex numbers, complex differentiation, elementary functions, contour integration and the Cauchy integral formula, Taylor series and Laurent series, residue calculus and its applications, and special functions.

Prerequisites: MATH 250 and MATH 300 (or MATH 301 or MATH 345 or E&C-ENGR 241 or MEC-ENGR 272) with a grade of B- or better.

MATH 410 Modern Algebra Credits: 3

Groups, rings, integral domains, fields and polynomial rings.

Prerequisites: MATH 300, MATH 301 (with a grade of B- or better).

MATH 412 Advanced Analysis II Credits: 3

Topics in advanced analysis such as sequences and series of functions, power series and elementary functions, Fourier series, metric spaces, analysis in Euclidean spaces, or advanced integration.

Prerequisites: MATH 402.

MATH 420 Linear Algebra II Credits: 3

The topics of MATH 300 are expanded and presented in the context of vector spaces over a field, with rigorous justification. Vector spaces and linear transformations, determinants, eigenvalues and eigenvectors, inner product spaces and orthogonality.

Prerequisites: MATH 300, MATH 301 (with a grade of B- or better).

MATH 434 Introduction to Scientific Computing Credits: 3

This course provides a comprehensive introduction to numerical methods used in scientific computing. It focuses on solving math models arising from other fields such as physics, engineering, biology, and economics. The topics include mathematical foundations, numerical linear algebra, finite difference method, finite volume method, finite element method, and parallel computing. Recommended preparation: MATH 300.

MATH 464WI History Of Mathematics Credits: 3

Topics in the History of Mathematics from Babylonian times through the invention and consolidation of Calculus, with some modern subjects as time permits. The course will emphasize proofs, ideas, and arguments as given in original sources (in translation) from around the world and throughout history. In this writing intensive course, one or two term papers, in addition to several short essays and historical proof explications are required.

A field trip will be taken to the Linda Hall Library Rare Book Room. This course is of special interest to secondary mathematics teachers as well as mathematics majors. Recommended preparation: MATH 301.

MATH 469 Mathematical Modeling Credits: 3

This course introduces analytical and numerical techniques for modeling and analysis of real-world problems in areas such as economics, engineering, biology and physics. It is designed for students with basic knowledge of linear algebra and differential equations. Interdisciplinary modeling projects are the integral part of this course. Recommended preparation: MATH 300 and MATH 345.

MATH 490 Special Topics Credits: 1-3

Selected topics in various fields of mathematics. May be repeated for credit when the topic varies.

MATH 496 Internship/Practical Training in Mathematics or Statistics Credits: 1-3

This course provides an internship or other practical training arrangement using mathematics or statistics in an industrial, academic or other professional setting. Department approval of internship experience or practical experience required. Repeatable with up to a combined 3 credits toward the major. Recommended preparation: MATH 250.

Mechanical Engineering (MEC-ENGR)

Courses

MEC-ENGR 130 Engineering Graphics Credits: 3

Introduction to Engineering Graphics with the use of the Computer Aided Design tools AutoCAD and SolidWorks. Introduction to 2D design with AutoCAD includes: basic features, layer control, geometric constructions, orthographic projections, dimensioning and notes, tolerancing, section views, and working drawings. Introduction to 3D design with SolidWorks includes: part modeling, revolved features, sweeps, lofts, assembly modeling and engineering drawings. No previous 2D or 3D CAD experience is necessary to take this class.

Prerequisites: School of Computing and Engineering Student.

MEC-ENGR 131 Engineering Graphics-3D design Credit: 1

Introduction to Engineering Graphics using the 3D Computer Aided Design tool SolidWorks. Introduction to 3D design with SolidWorks includes: part modeling, revolved features, sweeps, lofts, assembly modeling, and engineering drawings. Some previous 2D AutoCAD experience is required to take this class. NOTE: This class starts halfway through the semester by joining in with MEC-ENGR 130 when they finish AutoCAD and begin SolidWorks.

Prerequisites: Departmental consent.

MEC-ENGR 219 Computer Programming for Engineers Credits: 3

Analysis and synthesis of structured computer algorithms for solving engineering problems using high level programming tools such as Excel, Matlab, Fortran and/or C++.

Prerequisites: MATH 266 (preferred) or MATH 220.

MEC-ENGR 270 Engineering Analysis I Credits: 3

This is an applied course with emphasis on physics and engineering applications. Topics include engineering applications using conics, parametric equations, polar coordinates, vectors, solid analytic geometry, vector valued functions, multi-variable functions, partial derivatives (including applications), multiple integration, vector calculus including Green's Theorem, Curl and Divergence, line and surface integrals and Stoke's Theorem.

Prerequisites: MATH 268.

MEC-ENGR 272 Engineering Analysis Credits: 3

An applied course using differential equations in solutions to engineering problems. Topics include applications in first-order differential equations, linear higher-order equations, Laplace transform, Series solutions of linear ODEs (Taylor, Power, and Fourier), Numerical solutions, introduction to systems of differential equations.

Prerequisites: MATH 268 or MATH 220.

MEC-ENGR 285 Engineering Dynamics Credits: 3

Fundamentals of engineering dynamics, including kinematics and kinetics of particles and rigid bodies. Analysis based on forces and accelerations as well as energy and momentum methods.

Prerequisites: CIV-ENGR 275.

MEC-ENGR 299 Engineering Thermodynamics Credits: 3

Fluid properties, work and heat, first law, second law, entropy, applications to vapor and ideal gas processes.

Prerequisites: MATH 268 (preferred) or MATH 220; and PHYSICS 250.

MEC-ENGR 306 Computer-Aided Engineering Credits: 3

Principles, analysis and application of numerical methods for the solution of engineering problems. Computer implementation.

Prerequisites: MEC-ENGR 272 and E&C-ENGR 216.

MEC-ENGR 324 Engineering Materials Credits: 3

The nature of the structure of engineering materials. The relationship of material structure to the physical properties. Mechanical behavior of engineering materials.

Prerequisites: CHEM 211, CHEM 211L, CIV-ENGR 276.

MEC-ENGR 324L Engineering Materials Lab Credit: 1

Introduction to the laboratory techniques used in studying the physical and mechanical properties of engineering materials. The material testing in this course is primarily of metallic materials. Physical and mechanical property variations as a result of various processing techniques are studied. Recommended preparation: Machine Shop Safety.

Co-requisites: MEC-ENGR 324.

MEC-ENGR 351 Fluid Mechanics Credits: 3

Concepts of the statics and dynamics of fluids, with emphasis on principles of continuity, momentum and energy. Boundary layers, dimensional analysis and drag are covered briefly. Thorough treatment of pipe flow.

Prerequisites: MEC-ENGR 272 or MATH 345 and CIV-ENGR 275.

MEC-ENGR 352 Mechanical Instruments Lab Credits: 2

Students will investigate random and systematic errors, and their effects on measurement uncertainty. Students will be introduced to various instrumentation equipment used in measuring displacement, velocity, acceleration, force, strain, fluid pressure, fluid velocity, fluid flow rate, and temperature.

Prerequisites: CIV-ENGR 276.

MEC-ENGR 353 Heat Transfer and Fluid Mechanics Lab Credits: 2

The course emphasis is on experiments related to thermodynamics, heat transfer, and fluid mechanics. Proper experimental methods, data and uncertainty analysis related to thermal and fluids measurements are discussed.

Prerequisites: MEC-ENGR 351.

Co-requisites: MEC-ENGR 399.

MEC-ENGR 356 Mechanical Component Design Credits: 3

Introduction to mechanical engineering design and its impact on human history, principles of design with ductile and brittle materials for static and dynamic loading, classical and reliability-based factors of safety, fracture mechanics in design, application to the design of selected machine components.

Prerequisites: CIV-ENGR 276.

MEC-ENGR 360 Applied Thermodynamics Credits: 3

Gas and vapor mixtures, cycles, availability, imperfect gases, thermodynamic relations, combustion, chemical equilibrium, power systems and design projects. Effects of design choices on the earth and living systems.

Prerequisites: MEC-ENGR 299.

MEC-ENGR 380 Manufacturing Methods Credits: 3

Introduction to manufacturing processes with emphasis on those aspects most relevant to methods, problems in force analysis, and practicum and experimentation in machine tool applications.

Prerequisites: MEC-ENGR 324.

Co-requisites: MEC-ENGR 324L.

MEC-ENGR 385 System Dynamics Credits: 3

Kinematics of mechanical systems. Introduction to the modeling and analysis of dynamic mechanical systems. Computer analysis.

Prerequisites: MEC-ENGR 272, MEC-ENGR 285.

MEC-ENGR 399 Heat and Mass Transfer Credits: 3

Fundamentals of conduction, convection, and radiation heat transfer. Use of nondimensional parameters. Theory of heat exchangers. Mass transfer.

Prerequisites: MATH 250 or MEC-ENGR 270; and MEC-ENGR 299, MEC-ENGR 351.

MEC-ENGR 400 Problems Credits: 1-6

Special design, experimental and analytical problems in mechanical engineering.

Prerequisites: Departmental consent.

MEC-ENGR 401CD Topics in Mechanical Engineering -- Applied CFD Credits: 3

The fundamentals of computational fluid mechanics. Introduction to the governing equations and boundary conditions of viscous fluid flows, turbulence and its modelling, and how to solve a fluid flow problem using commercially available CFD software.

Prerequisites: MEC-ENGR 399.

MEC-ENGR 401T Topics in Mechanical Engineering Credits: 3

This course covers the application of Newton's laws and thermodynamics to analysis of fluid flow in turbomachinery.

Prerequisites: MEC-ENGR 399.

MEC-ENGR 407 Advanced Dynamics and Modeling Credits: 3

Fundamental principles of advanced rigid body dynamics with applications. Special mathematical techniques including Lagrangian and Hamiltonian methods.

Prerequisites: MEC-ENGR 285 and MEC-ENGR 306.

MEC-ENGR 411 Introduction to Biomechanics Credits: 3

This course is to provide students with an introduction to the engineering principles of biomechanics.

Prerequisites: MEC-ENGR 219 or E&C-ENGR 216; or MEC-ENGR 285.

Co-requisites: MATH 300 or CIV-ENGR 319.

MEC-ENGR 412 Biodynamics Credits: 3

Introduction to musculoskeletal biomechanics including: computational biomechanics, movement simulation, motor control and musculoskeletal tissues. Recommended preparation: MEC-ENGR 411.

MEC-ENGR 413 Experimental Biomechanics of Human Motion Credits: 3

The purpose of this course is to provide an opportunity for students to gain a hands-on, in-depth understanding of the experimental measurement and analysis techniques used to quantify the biomechanics of human motion.

Prerequisites: MEC-ENGR 411.

MEC-ENGR 414 Material Science for Advanced Applications Credits: 3

Study of the physical and mechanical metallurgy of alloy systems of interest in engineering applications.

Prerequisites: MEC-ENGR 324.

MEC-ENGR 415 Control Systems Theory Credits: 3

Introduction to feedback control theory for linear dynamic systems. Topics include root locus analysis, frequency response analysis, and controller design.

Prerequisites: MEC-ENGR 385.

MEC-ENGR 416 Biomedical Device Design Credits: 3

Project based course which exposes students to the entire design process from problem definition to prototype validation for biomedical device applications. Projects in the course are sponsored by real clients from the local biomedical industry, medical clinicians, and/or research labs. The course will cover the following main components: Problem Definition, Concept Generation and Evaluation, Detailed Design, Prototyping and Testing, Project Management, Regulations and Standards, and Technical Communication. **Prerequisites:** Senior standing.

MEC-ENGR 420 Human Powered Vehicle Design Lab Credits: 3

Introduction to the science of human powered vehicles (HPV) providing the background necessary for the design of such vehicles. Students will learn and utilize engineering design practices and apply them toward the creation of an aerodynamic, highly engineered land based HPV.

Prerequisites: MATE111A Machine Shop Safety, Consent of instructor.

MEC-ENGR 424 Non-Metallic Engineering Materials Credits: 3

Structures, properties and applications of ceramics, glasses, cermets, polymers and composite materials.

Prerequisites: MEC-ENGR 324.

MEC-ENGR 425 Failure Analysis Credits: 3

Organize and perform a failure investigation. In addition, the course will cover the general procedures for a failure investigation and various failure mechanisms such as ductile fracture, brittle fracture, fatigue, wear, corrosion and elevated temperature.

Prerequisites: MEC-ENGR 324, MEC-ENGR 380.

MEC-ENGR 426 Introduction to Manufacturing Management Credits: 3

The objective of this course is to expose the student to various manufacturing management tools and techniques. Focus is on both the technical tools used in manufacturing as well as on the management tools needed to implement change in the manufacturing environment. As part of this course, students will research a successful company and present an analysis of manufacturing tools and techniques used.

MEC-ENGR 440 Heating and Air Conditioning Credits: 3

General principles of thermodynamics, heat transfer, and fluid dynamics are used to calculate building loads, size equipment and ducts, and evaluate system performance in maximizing human comfort. Consideration of indoor air quality and human health.

Prerequisites: MEC-ENGR 360, MEC-ENGR 399.

MEC-ENGR 441 Intermediate Fluid Mechanics Credits: 3

Topics in potential and viscous flow theory, and computational fluid dynamics.

Prerequisites: MEC-ENGR 351.

MEC-ENGR 444 Composite Materials Credits: 3

A survey of composite materials used in engineering, emphasizing fiber-reinforced composites as well as laminate and particulate composites.

Prerequisites: MEC-ENGR 324.

MEC-ENGR 451 Power Plant Design Credits: 3

Preliminary component and system design. Optimum design of boilers, steam turbines, condensers and cooling towers and their integration into a system to minimize production costs and impact on the environment.

Prerequisites: MEC-ENGR 360, MEC-ENGR 399.

MEC-ENGR 452 Advanced Mechanics of Materials Credits: 3

Shear center; unsymmetric bending; curved beams; beams on elastic foundations; thick-walled cylinders. Energy methods. Torsion of noncircular sections. Theories of failure. Plate theory.

Prerequisites: CIV-ENGR 276.

MEC-ENGR 454 Power Generation Systems Credits: 3

Fundamentals of the power industry in a format suitable for all engineering disciplines. Survey of electric power systems, including fossil and nuclear steam cycles, combustion turbines, combines cycles, and renewable such as solar and wind. Introduction to major machinery components, systems, controls, and an overview of fuels, emissions, and emission control technologies.

Prerequisites: MEC-ENGR 299.

MEC-ENGR 455 Digital Control of Mechanical Systems Credits: 3

Introduction to digital control systems. Topics include Z-transforms, sampling, stability analysis, and digital controller design.

Prerequisites: MATH 345, MEC-ENGR 415.

MEC-ENGR 457 Mechatronic System Design Credits: 3

Theory and application of mechatronic systems through course instruction, laboratory activities, and student projects.

Co-requisites: MEC-ENGR 415.

MEC-ENGR 458 Modern Control Systems Credits: 3

Controller design for multiple-input/multiple-output systems; controllability and observability; stochastic control problems; regulators and tracking controllers; observers.

Prerequisites: MEC-ENGR 415.

MEC-ENGR 459 Robotics and Unmanned Systems Credits: 3

Students will develop, implement, and evaluate various path following (point mass, rigid body, and Dubin's) and trajectory generation (configuration spaces, roadmaps, cell decomposition, etc.) concepts on simulation and experimental platforms.

Prerequisites: MEC-ENGR 306, MEC-ENGR 457.

MEC-ENGR 460 Electromechanical Conversion Credits: 3

This course describes the operation and control of electro-mechanical devices such as motors transformers to mechanical civil engineering students, including an introduction to programmable logic controllers and variable speed drives.

Prerequisites: MEC-ENGR 220, MEC-ENGR 285.

MEC-ENGR 466 Applied Optimization and Decision Modeling Credits: 3

Introduction to mathematical programming techniques and applications. Linear and integer programming, transportation models, multiple objective and goal programming.

Prerequisites: MEC-ENGR 306.

MEC-ENGR 467 Fuel Cells and Renewable Energy Systems Credits: 3

This course will provide an overview of the fundamental phenomena that govern the design and operation of fuel cells. The thermodynamics of fuel cell systems will be explored including operation of ideal fuel cells and the physical and chemical phenomena that lead to losses within the fuel cell. The course will provide the methods and techniques required to analyze the performance of low, medium, and high temperature fuel cells within an overall energy system. The fueling of fuel cells from renewable resources will also be discussed.

Prerequisites: MEC-ENGR 399.

MEC-ENGR 470 Experimental Design & Analysis Credits: 3

Presentation of concepts and methods of statistical analysis and the design of experiments. Concepts, techniques, interpretation, and use of results are stressed. Focus is on experimental strategy and objectives, and the application of the methods discussed, rather than the mechanics of derivation. Major sections include: a review of hypothesis testing and basic analysis of variance techniques; single factor experiments including 2k and 3k design, confounding, and Taguchi philosophy; nested and split plot designs; analysis of covariance and an introduction to response surface methods.

MEC-ENGR 484 Vibration Analysis Credits: 3

Vibration theory with application to mechanical systems.

Prerequisites: MEC-ENGR 306, MEC-ENGR 385.

MEC-ENGR 486 Applied Finite Element Analysis Credits: 3

The study of advanced simulation techniques for the solution to engineering problems. The use of Finite Element Method toward solving mechanical, structural, vibration and potential flow problems will be explored. The use of current commercial simulation tools will be used extensively.

Prerequisites: MEC-ENGR 306, MEC-ENGR 324, MEC-ENGR 385, MEC-ENGR 399.

MEC-ENGR 491 Internship Credits: 6

For International students who must register to cover off-campus employment which is approved as related to their degree by their departmental advisor and ISAO.

Prerequisites: Departmental consent.

MEC-ENGR 492 Mechanical Design Synthesis I Credits: 3

Introduction to and application of the Engineering Design Process including: product development, needs identification, benchmarking, information gathering, concept generation, creativity methods, concept selection, professional and ethical responsibilities, and computer-aided design and rapid prototyping applications. A comprehensive design project including 3D CAD models and functioning prototypes is required.

Prerequisites: MEC-ENGR 130 or MEC-ENGR 131; and departmental consent.

MEC-ENGR 493 Intermediate Dynamics Credits: 3

Theoretical discussion of kinematics and dynamics of rigid bodies in three-dimensional space. General theory of rotating coordinate frames, Euler's angles, Euler's equations of motion, angular momentum, work-energy principles, and Kane's method.

Prerequisites: MEC-ENGR 285.

MEC-ENGR 494 Robotic System Identification Credits: 3

Students will develop, implement, and evaluate various system identification and parameter estimation techniques. Students will quantify estimation accuracy through both theoretical and experimental exercises.

Prerequisites: MEC-ENGR 285, MEC-ENGR 306, MEC-ENGR 352.

MEC-ENGR 496WI Mechanical Design Synthesis Credits: 3

Modern design theories and methodologies, with emphasis on the initial stages of the design process. Effect of design choices on the earth and living systems. Principles of embodiment design and life-cycle considerations. A comprehensive group design project is required. The course satisfies the Writing Intensive requirement.

Prerequisites: ANCH 309 or MEC-ENGR 492; MEC-ENGR 356.

Military Sciences (MIL-SCI)

Courses

MIL-SCI 102 Leadership Practicum Credits: 2

Examines leadership in basic tactical and patrolling operations, Includes a tactical application exercise and participation in physical fitness conditioning as a course requirement. Students practice leadership according to 16 principles and learn basic soldier skills.

Co-requisites: MIL-SCI 116.

MIL-SCI 112 Leadership Practicum Credits: 2

Examines advanced squad and platoon tactical operations with emphasis on patrolling operations. Topics include: leadership techniques, basic first aid, and problem-solving exercises. A tactical field application exercise and physical fitness conditioning program are included as course requirements. Students perform duties as leaders of small units.

Co-requisites: MIL-SCI 126.

MIL-SCI 116 Foundations of Officership Credit: 1

The course introduces the student to issues and competencies that are central to a commissioned officer's responsibilities. These initial lessons establish a framework for understanding officership, leadership, and Army values. Additionally, the semester addresses life skills, including physical fitness and time management. This course is designed to give the student an accurate insight into the Army profession and the officer's role in the Army.

Co-requisites: MIL-SCI 102.

MIL-SCI 126 Basic Leadership Credit: 1

This course focuses on leadership theory and decision making. "Life skills" lessons in this course include: problem solving, critical thinking, leadership theory, followership, group interaction, goal setting, and feedback mechanisms. Upon completion of this course, students are prepared to advance to more complex leadership instruction concerning the dynamics of organization. Additionally, students will be increasingly required to demonstrate knowledge of leadership fundamentals and communications (written and oral).

Co-requisites: MIL-SCI 112.

MIL-SCI 202 Leadership Practicum Credits: 2

Course examines squad and platoon offensive and defensive operations and leadership procedures in patrolling operations. Includes a tactical application exercise and participation in physical fitness conditioning as a course requirement. Students will perform various leadership roles and present classroom instruction.

Corequisite: MIL-SCI 216

MIL-SCI 212 Leadership Practicum Credits: 2

Examines advanced squad and platoon offensive and defensive operations, reaction to obstacles, and leadership procedures in patrolling operations. Includes a tactical application exercise and participation in physical fitness conditioning as a course requirement. Students will perform in various leadership roles and present classroom instruction.

Co-requisites: MIL-SCI 226.

MIL-SCI 216 Individual Leadership Series Credits: 2

This course is designed to develop within the student a knowledge of self, self-confidence and individual skills. Through experiential learning activities, students will develop problem-solving and critical-thinking skills, apply communication, feedback and conflict-resolution skills. This course delves into several aspects of communication and leadership theory. The focus of the course is on critical life skills which enable the students future success. The course concludes with a major leadership and problem-solving case study which draws upon previous instruction.

Prerequisites: MIL-SCI 126.

Co-requisites: MIL-SCI 202.

MIL-SCI 226 Leadership and Teamwork Credits: 2

This course focuses on self-development guided by knowledge of self and group processes. Experiential learning activities are designed to challenge students current beliefs, knowledge and skills. This semester takes the approach of placing students in a wide variety of group exercises designed to emphasize various leadership competencies and insights. The instructor, acting as a facilitator, helps guide student processing of the events to derive the leadership, group dynamics and problem-solving lessons that the exercises offer. Practical life skills are emphasized throughout.

Prerequisites: MIL-SCI 216.

Co-requisites: MIL-SCI 212.

MIL-SCI 302 Leadership Practicum Credits: 2

Examines squad and platoon offensive and defensive operations, the patrol leader in patrolling operations, and a tactical application exercise. Participation in physical fitness conditioning and a tactical application exercise is required. Students will perform in various leadership roles and present classroom instruction. Recommended preparation: MIL-SCI 226.

Prerequisites: Departmental consent.

Co-requisites: MIL-SCI 316.

MIL-SCI 312 Leadership Practicum Credits: 2

Familiarization with military firearms; includes assembly and disassembly; tactical communications; and the field artillery request and a tactical application exercise. Participation in physical fitness conditioning and a tactical application exercise is required. Students will perform in various leadership roles and present classroom instruction.

Prerequisites: MIL-SCI 316.

Co-requisites: MIL-SCI 326.

MIL-SCI 316 Leadership and Problem Solving Credits: 3

Following an introduction to the principles of physical fitness and healthy lifestyles, lessons will cover: the Leader Development Program, planning and conducting individual and small unit training, basic tactical principles, reasoning skills and the military-specific application of these skills in the form of the Army's troop-leading procedures. The course concludes with a detailed examination of officership, which culminates in a five-hour officership case study.

Prerequisites: MIL-SCI 226.

Co-requisites: MIL-SCI 302.

MIL-SCI 326 Leadership and Ethics Credits: 3

Continues the focus from MIL-SCI 316 on doctrinal leadership and tactical operations at the small unit level. Instructional modules include: Army branches, Army leadership, philosophy, dynamics of a group environment, oral and written presentation skills, culminating in instruction in national and Army values and ethics. This critical semester synthesizes the various components of training, leadership and team building.

Prerequisites: MIL-SCI 316.

Co-requisites: MIL-SCI 312.

MIL-SCI 397 US Military History Credits: 3

This course examines the beginnings of human military history from pre-colonial through the birth of America and into the post-Cold War era. The course focuses on the origins of tactics and techniques and emphasizes the military as an aspect of American society and its role in political, social, economic, and international environments.

Prerequisites: Departmental consent.

MIL-SCI 402 Leadership Practicum Credits: 2

Practical applications in problem analysis, decision making, planning and organization, delegation and control, and development of interpersonal skills required for effective management. Participation in physical fitness conditioning and tactical application exercise is required. Students will perform in various leadership positions and present classroom instruction.

Co-requisites: MIL-SCI 416.

MIL-SCI 412 Leadership Practicum Credits: 2

Practical applications in problem analysis, decision making, planning and organization, delegation and control, and development of interpersonal skills required for effective management, includes a tactical application exercise. Participation in physical fitness conditioning is required. Students will perform various leadership roles and conduct classroom instruction.

Prerequisites: MIL-SCI 416.

Co-requisites: MIL-SCI 426.

MIL-SCI 416 Leadership And Management Credits: 3

A series of lessons designed to enable students to make informed career decisions as they prepare for commissioning and service as Second Lieutenants. Classes concentrate on Army operations and training management, and communications and leadership skills, which support the final transition from cadet/student to Lieutenant/leader. Subjects include: The Army Training Management System, coordinating activities with staffs, and counseling skills. At the end of this semester, students should possess the fundamental skills, attributes and abilities to operate as a competent leader in the cadet battalion.

Prerequisites: MIL-SCI 326.

Co-requisites: MIL-SCI 402.

MIL-SCI 426 Officership Credits: 3

A series of lessons that provide a review of the ethical dimensions of leadership, law in leadership, organizing for military operations to include historical case studies, personnel, supply and maintenance administration and management, personal financial planning and entering the service, The semester concludes with a 12-lesson experiential exercise simulating assignment as a new Lieutenant in a unit.

Prerequisites: MIL-SCI 416.

Co-requisites: MIL-SCI 412.

MIL-SCI 497 Leadership And Management Practicum - Directed Study Credits: 1-3

Practical application in military problem analysis, decision making, planning and organization, delegation and control, and development of interpersonal skills required for effective management.

Prerequisites: Departmental consent.

Natural Sciences (NAT-SCI)

Courses

NAT-SCI 130 Physics of Sports Credits: 3

A course intended for liberal arts students focusing on the physics involved in different sports. Physical laws and technological developments that impact sports will be studied.

NAT-SCI 140 How Things Work Credits: 3

A course intended for liberal arts students focusing on the principles of operations, histories, and relationships of objects from our daily environment. The areas of investigation include mechanical and thermal objects, electromagnetism, light, special materials and nuclear energy.

Co-requisites: NAT-SCI 140L.

NAT-SCI 140L How Things Work Laboratory Credit: 1

Simple experiments based on everyday experiences are analyzed in terms of conceptual physics. The material includes elements of mechanics of a rigid body, elastic properties of matter, fluid dynamics, thermodynamics, electromagnetism, optics and modern physics.

Co-requisites: NAT-SCI 140.

NAT-SCI 150 Astronomy: Motions of the Cosmos Credits: 3

An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the fundamental laws of gravity and motion crucial to the formation of stars and planetary systems, the growth of black holes and galaxies, and the evolution of cosmic structure.

NAT-SCI 153L Introductory Astronomy Laboratory Credits: 2

An introductory exploration of astronomical phenomena and concepts through quantitative laboratory activities requiring data collection, analysis and interpretation. This course is open to students from all majors. Concurrent enrollment in either NAT-SCI 150 or NAT-SCI 155 is encouraged but not required.

NAT-SCI 155 Astronomy: Starlight and Star Stuff Credits: 3

An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the interactions between light and matter crucial to the life and death of stars, the analysis of starlight and interstellar chemistry, and the interpretation of cosmic history.

NAT-SCI 171 Physics For Future Presidents Credits: 3

A course intended for liberal arts students focusing on the physics they need to be informed citizens in a democracy. Energy, global warming, terrorism, and health are examples of the important topics examined from the perspective of how science should inform policy.

NAT-SCI 375P Nature Of Science Credits: 4

Selected topics from the natural sciences. Provides students fundamental principles and concepts of various physical and mathematical sciences. Lectures, demonstrations and discussions provide an integrated approach to the natural sciences.

NAT-SCI 425P Introduction To Quantitative Methods Credits: 3

Topics addressed are the scientific approach to study of behavior (goals of science, research terminology, variables, distributions, measures of central tendency, confidence intervals, use of research methods and ethics in research), experimental design (validity, reliability, design and sampling techniques), and interpretation of research results. Course includes in-class computer data entry and analysis. Recommended preparation: COMP-SCI 101 and MATH 110 or MATH 116.

Nursing (NURSE)

Courses

NURSE 101 Introduction to Nursing Credits: 2

This introductory two-hour course is designed to facilitate role socialization into professional nursing. Beginning with a brief historical overview of professional nursing, nursing is defined and the philosophical and practice standards of the profession are discussed. The student explores nursing's image and power bases in relationship to professional accountabilities and roles. The value and tenets of evidence-based care are emphasized and integrated with use of nursing process in professional, reflective decision-making. A review of educational paths in professional nursing leads the student into a comprehensive survey of the multiple roles, responsibilities, and requisite skills of the professional nurse today and in the future.

NURSE 120 Anatomy & Physiology I Credits: 4

This course examines the structure and function of the human body from the molecular to the organismal level as they interact among all body systems across the life span. Instructors also attempt to correlate course materials with the clinical aspects of the application of physiological knowledge. Co-requisite laboratory exercises provide practical application of theoretical concepts. In this first term of two-term course, molecular biology, biochemistry, cellular biology, and histology are studied as well as the integumentary, musculoskeletal, and nervous systems.

Prerequisites: Pre-Nursing or Bachelor of Health Sciences Student.

NURSE 125 Medical Terminology Credit: 1

This course is designed to provide the student with a foundation in medical terminology and the components of health records. Course content will include how medical terms are formed; how medical terms are applied to organs, body systems and pathological conditions; how common medical abbreviations are used; and how health records are organized and compiled.

NURSE 127 Drug Calculations Credit: 1

The drug calculation course is designed to introduce the student to methods of drug dosage calculation needed for medication administration in the health care setting. This course will review basic mathematical concepts, introduce medication specific terminology, discuss interpretation of medication orders, identify key elements of the medication label and enable the student to calculate appropriate and accurate drug dosages.

NURSE 160 Anatomy and Physiology II Credits: 4

This course is a continuation of NURSE 120. Co-requisite laboratory exercises provide practical application of theoretical concepts. Physiologic systems including endocrine, cardiovascular, immune, respiratory, digestive, renal, and reproductive are studied as well as embryology and genetics.

Prerequisites: Pre-Nursing or Bachelor of Health Sciences Student.

NURSE 220 Fundamental Concepts & Skills Credits: 6

This course focuses on fundamental concepts, skills, and techniques that provide a foundation for clinical practice. The beginning student will identify factors that may influence the human system and applies the nursing process in health care setting using basic nursing interventions.

Prerequisites: Pre-Licensure or Direct Admit Nursing Program Student.

NURSE 230 Health In Aging Credits: 2

This course focuses on the role of the nurse in promoting and maintaining the health of the older adult population. Evidence based nursing care of the older adult that includes physiological, psychological, pharmacological, and nutritional considerations as affected by theories on aging, socio-cultural influences, legal and ethical issues, and health care resources are explored. Nursing assessment, diagnoses, interventions, and outcomes specific to a diverse older adult population are discussed. Opportunities are provided for interaction with the older adult population.

Prerequisites: Pre-Licensure or RN to BSN Student.

NURSE 250 Health Assessment for Nursing Practice Credits: 3

This course is designed to provide a systematic approach to the physiological, psychological, sociocultural and developmental assessment of individuals emphasizing findings considered to be within normal limits. The health history is emphasized as a tool for assessing mental and physical status. This course is designed for pre-licensure students. This three credit hour course consists of two didactic and one credit hour of clinical/lab per week.

Prerequisites: Pre-Licensure or Direct Admit Nursing Program Student.

NURSE 252 Human Growth and Development Credits: 3

This course provides a basic introduction to the theory for human growth and development across the life span. Emphasis is placed upon the biological and the psychosocial aspects of growth and development. Content is organized in a modified chronological order dividing information into major stages of growth and development across the lifespan.

Prerequisite: Pre-Licensure Nursing Program Student.

NURSE 255 Spanish for Health Care Pre-Professionals Credits: 3

This course focuses on conversational Spanish, medical terminology in Spanish and written/read Spanish. This course will provide the student with basic knowledge that will allow basic communication with clients who speak/read/write Spanish. This is a fast-paced course and will require practice of the language outside of the classroom in order to master the material presented. Recommended preparation: SPANISH 110.

NURSE 256 Pharmacology Credits: 3

This is a course in pharmacology that builds on prior knowledge of anatomy, physiology, chemistry, microbiology and pathophysiology. The major focus of the course is the basic and clinical concepts of pharmacology in evidence-based care. This course covers drug knowledge in the areas of pharmacotherapeutics, pharmacodynamics, pharmacokinetics, adverse reactions and contraindications, therapeutics indications and nursing implications.

Prerequisites: NURSE 127, NURSE 220, NURSE 230, NURSE 250, and NURSE 395.

NURSE 262 Management of Adult Health I Credits: 5

This medical-surgical course focuses on utilization of the nursing process to the specific illnesses of the adult client in the acute care setting. High volume disease processes with associated nursing care are emphasized. The effects on the individual as a holistic system are explored. Skills are developed in caring for persons with biological, psychological and social system alterations to facilitate optimal client outcomes.

Prerequisites: NURSE 127, NURSE 220, NURSE 230, NURSE 250, and NURSE 395.

NURSE 315 Health Literacy Credit: 1

In this course participants will explore the fundamentals of health literacy and demonstrate the impact on health outcomes. Students will be introduced to tools that health care professionals can use to assess the health literacy of their patients/clients. Tools and resources to provide health information at the correct health literacy level will be presented. Students will explore interventions that can increase an individual's health literacy.

NURSE 326 Applied Physiology Credits: 3

In this course, clinical applications to physiologic concepts are highlighted and emphasized among all body systems across the life span. Discussion will include anatomical landmarks critical to health assessment and clinical manifestations related to physiological processes. This three credit hour course consists of two credit hours of didactic and one hour of lab work that will further demonstrate these concepts through dissection, laboratory experiments, and case studies.

Prerequisites: Departmental consent.

NURSE 342 Legal & Ethical Issues Credits: 2

This course is designed to investigate medical-legal issues and explore the implications that legal intervention and interpretation as well as litigation have on the scope of nursing practice and the delivery of patient care. Ethical standards of nursing practice and diverse individual and group values are explored, and various ethical systems, concepts and principles used in ethical decision making are introduced.

Prerequisites: Pre-Licensure Nursing Program Student.

NURSE 345 Quantitative Analysis In The Health Sciences Credits: 3

This course focuses upon the skills required for the utilization of scientific findings in evidence-based care. The conceptual basis of descriptive and the inferential statistics found in the properties of the normal distribution, comprise the core of these skills. Using the normal distribution as a structure for understanding descriptive and inferential procedures, the course presents information necessary to the selection, computation and interpretation of basic statistics relevant to evidence based-care in the health sciences. Discussions of variables, measurement and tabular and graphic presentation of data precede the development of computation skills.

Prerequisites: MATH 110 or MATH 116 or STAT 115 or MOTRMATH 110 or higher level math course; or ALEKS score of 61 or higher; or ACT Math sub-score of 28 or higher; or SAT Math sub-score of 660 or higher.

NURSE 360 Management of Mental Health Credits: 4

This course is designed to introduce psychiatric mental health nursing through the study of sound psychiatric nursing theory. This course will focus on the nursing process framework, and the establishment and maintenance of a therapeutic nurse-client relationship. Emphasis is placed on assessment, therapeutic communication, neurobiological theory, and pharmacology. Nursing interventions will focus on all aspects of client care, communication, client/family teaching, and community resources and their practical application in a variety of clinical settings.

Prerequisites: Pre-Licensure or Direct Admit Nursing Program Student.

NURSE 362 Management of Adult Health II Credits: 5

This medical-surgical course focuses on application of the nursing process to the delivery and the management of adult clients across the care continuum. This course builds on Adult Health I content to include high risk disease processes with associated nursing care. Emphasis is placed on the interaction between the client, family, nursing, and the environment to result in optimal client outcomes.

Prerequisites: Pre-Licensure or Direct Admit Nursing Program Student.

NURSE 364 Management of Maternal & Family Health Credits: 4

This course focuses on the application of the nursing process in the adaptation of the childbearing family. Emphasis is placed on adaptation during pregnancy, labor, birth and the postpartum period. Key concepts to be addressed include maternal, fetal, neonatal and family adaptation throughout the maternity cycle, common alterations during the cycle and culturally sensitive, family-centered nursing care. Maternal, fetal and neonatal physiology, pathophysiology and pharmacology will be addressed.

Prerequisites: Accelerated or Pre-Licensure or Direct Admit Program Student.

NURSE 366 Management of Child & Adolescent Health Credits: 4

This course focuses on the application of the nursing process in the care of the pediatric client. Emphasis is placed on providing developmentally appropriate care to healthy, acutely ill and chronically ill pediatric clients holistically within the context of a family system. Key concepts to be explored include age appropriate anatomy, physiology, pathophysiology, and pharmacology and their application to the nursing strategies of health assessment, health promotion, disease prevention, pain management, family-centered and culturally sensitive care.

Prerequisites: Accelerated or Pre-Licensure or Direct Admit Program Student.

NURSE 395 Pathophysiology Credits: 3

This course will focus on alterations in biological processes that affect the body's internal homeostasis. A conceptual approach will be used to emphasize general principles of pathophysiology. The etiology, pathogenesis, clinical manifestations, and sequelae of various alterations of human structure and function will be examined. Knowledge from the basic and clinical sciences will be integrated.

Prerequisites: Pre-Licensure or RN to BSN Nursing Program Student.

NURSE 401 Health Assessment for Clinical Practice Credits: 3

This course is designed to provide a systematic approach to the physiological, psychological, socio-cultural and developmental assessment of individuals emphasizing findings considered to be within normal limits. The health history is emphasized as a tool for assessing mental and physical status. This course is designed for students with previous health care education, including knowledge of biochemical functions of systems and concepts of normal. This course consists of guided self-study and on-site clinical practicum.

Prerequisites: RN-BSN or Graduate Nursing Program Student.

NURSE 403A Comparative Weight Loss I Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Specific topics that will be addressed include risks of overweight/obesity; common psychological issues for the overweight/obese; societal perceptions and barriers for overweight/obese individuals. This course consists of one hour of didactic work with one module per week for four weeks.

NURSE 403B Comparative Weight Loss II Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Comparison of common medically recommended diets and diet programs and their efficacy/risks; exercise requirements for weight loss and weight maintenance. This course consists of one hour of didactic education with one module per week for four weeks.

NURSE 403C Comparative Weight Loss 3 Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Comparison of pharmacologic weight loss options and their efficacy/risks; non-prescription medications/nutraceuticals for weight loss and their efficacy/risks; and bariatric surgeries and efficacy/risks. This course consists of one hour of didactic work with one module per week for four weeks.

NURSE 404 Introduction to Social Justice Credit: 1

This course is designed to increase a student's knowledge regarding personal and social biases based on race, ethnicity, culture, religion, age, sex, sexual orientation, social and economic status, political ideology, disability and how these entities contribute to social injustice. The focus of the course will center on issues involving diversity, prejudice and oppression that impacts social justice. During the course, students will be introduced to tools for developing social justice literacy in order to take action towards establishing a more just society.

NURSE 408 Gender, Health and Development in Senegal Credits: 3

This course examines women's economic empowerment, health education initiatives, philanthropy, and social entrepreneurship in West Africa and Senegal in particular. In the main city of Dakar we will visit indigenous and global nonprofits to study their policies and processes. The culture, both urban and rural, will be experienced in order to provide a unique perspective on the Senegalese and their culture.

NURSE 417 Information Systems and Technology for Improved Health Care Credits: 3

This course provides a basic introduction to health information technology across health care settings. Students will acquire an understanding of key concepts associated with health informatics and network models, systems and management strategies, health information strategic planning, clinical and public health application, data retrieval and analytics, public policy, research, and one's professional responsibility to protect electronic health care records.

NURSE 419 Introduction to Social Epidemiology Credit: 1

This course is designed to increase a student's knowledge of Social Epidemiology, which is the branch of epidemiology that studies the social determinants of health. Social processes will be explored that center on social networks, social support, social capital, social cohesion, and contributing ecological factors that influence health and wellness. Students will discover how social relationships and institutions, such as familial relationships, group culture, policies, and global economic forces, promote or undermine the health of populations. Students will also explore how social inequity indicators involving income, health insurance, and access to care inter-relate and often lead to negative health outcomes.

NURSE 462 Special Topics Credits: 2

This course is designed to explore current issues and trends influencing nursing practice. Economical, political, social and cultural issues are analyzed as they relate to interdisciplinary healthcare topics. Special Topics is aimed at preparing nursing students for immediate and long term milestones in their practice, which includes NCLEX licensure study, current clinical and practice issues, and exposure to advance nursing roles in practice and research.

Prerequisites: Accelerated or Pre-Licensure or Direct Admit Program Student.

NURSE 465 Management of Community and Public Health Nursing Credits: 4

This course focuses on applying the nursing process to the care of target community population and the individual. Emphasis is placed in health promotion and disease prevention. Discussion will include epidemiological, social, political, economic and cultural factors that influence the health of a population. The clinical components will consist of application of the nursing process to identify, prioritize, and meet the health needs of aggregates across the lifespan.

Prerequisites: Pre-Licensure or Direct Admit Program Student.

NURSE 467 Management of Critical & Emergent Care Credits: 5

This course focuses on applying the nursing process to the care of critically ill clients. Key concepts are: assimilation, integration, and prioritization of information to take decisive client-focused action. Students will manage appropriately the interface between client and technology so that a safe, respectful, and caring environment is established and maintained. Nursing knowledge of cardiovascular/hemodynamic monitoring and acute management of pulmonary, neurological, renal, gastrointestinal, shock, and traumatic emergencies is included.

Prerequisites: Pre-Licensure or Direct Admit Nursing Program Student.

NURSE 468 Effectiveness in Complex Health Systems Credits: 4

This leadership course focuses on effectiveness in complex health systems, by building upon acquired personal and interpersonal knowledge, skills and effectiveness in health outcomes. Organizational culture and systems, leadership and management theories, cultural competence, internal and external politics, and the impact of future managerial and societal paradigm changes on health care and health care delivery systems are presented. Knowledge of budgeting and health care finance, use of the legislative system, quality management, customer service, and leadership and management styles are explored.

Prerequisites: Pre-Licensure, Accelerated or Direct Admit Nursing Program Student.

NURSE 468A Effectiveness in Complex Health Systems I Credit: 1.5

This first part of two leadership courses focuses on effectiveness in complex health systems by building upon acquired personal and interpersonal knowledge, skills, and effectiveness in health outcomes. The role of the registered nurse in advocating for clients in the health care system as well as political and regulatory processes is explored.

NURSE 468B Effectiveness in Complex Health Systems II Credits: 2.5

This is the second part of two leadership courses and focuses on effectiveness in complex health systems by building upon acquired personal and interpersonal knowledge, skills, and effectiveness in health outcomes. Organizational culture and systems, leadership and management theories, cultural competence, and the impact of future managerial and societal paradigm changes on health care and health care delivery systems are presented. Knowledge of budgeting and health care finance, use of the legislative system, quality management, customer service, and leadership and management styles are explored.

NURSE 472 Clinical Internship Credits: 5

This is the final clinical application course designed to complement didactic content from the core-nursing component of the baccalaureate program. The student will integrate and apply knowledge acquired in didactic course work and from previous clinical experiences. Emphasis is placed on effectiveness in personal, interpersonal, human health, and complex health systems. In collaboration with preceptors from the clinical unit, students will manage direct care for clients in health care settings.

Prerequisites: Pre-Licensure or Direct Admit Nursing Program Student.

NURSE 476 Research Methods in Health Sciences Credits: 3

This course focuses upon the development of inquiry skills necessary to identify relevant research-based literature and apply findings from research to practice. Students will develop an understanding of basic research concepts and evidence based practice in addition to skills in finding, appraising, and using health related literature.

Prerequisites: NURSE 345, HLSC 345, or STAT 235.

NURSE 481 Block I: Tools for Personal Effectiveness Credits: 6

This is the first in the four-course sequence. The student will discover that the foundation for professional nursing practice is personal effectiveness. Personal effectiveness is contingent upon an understanding of the historical roots of the profession, the meaning of professionalism, image and power bases, professional standards, moral development, political role socialization and professional values. Personal effectiveness is enhanced through critical reflection of personal perspectives and biases, valuing and use of theory and research, critical thinking and decision-making, informatics' technology, the ability to manage time and stress, and the use of a career plan and informatics.

Prerequisites: RN-BSN Nursing Program Student.

NURSE 482 Block II: Tools for Interpersonal Effectiveness Credits: 3

This is the second in the four-course sequence. The student will discover that interpersonal effectiveness is a prerequisite to effective management of the care of humans and of teams. Interpersonal effectiveness is contingent on an understanding of professional value and caring, ethics in health care, legalities of practice, communication theories, and the dynamics of groups and teams. Interpersonal effectiveness is enhanced through the use of such skills as conflict resolution and negotiation, delegation, managing change, advocacy, team membership, group management, political awareness, technology utilization, and communication techniques. Content appropriate to these areas will be covered within this course.

Prerequisites: RN-BSN Nursing Program Student.

NURSE 483 Block III: Effectiveness in Human Health Outcomes Credits: 6

This is the third in a four-course sequence. It builds upon the personal and interpersonal skills acquired in the first two block courses and focuses on effectiveness in human health outcomes. The student will discover that effectiveness in human health outcomes is a primary goal in the delivery of an optimum continuum of health care that encompasses health promotion, disease prevention and illness care across the lifespan. Achieving effectiveness in human health outcomes across the wellness-illness continuum and the individual-to-community continuum is contingent on acquiring an understanding of epidemiology, levels of care, communicable disease control, case management, theories applicable to aggregate populations, cultural competence, evidence-based care, and information technology.

Prerequisites: RN-BSN Nursing Program Student.

NURSE 484 Block IV: Effectiveness in Complex Health Systems Credits: 6

This is the final course in the four-course sequence. Students will build upon the knowledge and skills acquired in the prior three course in order to examine the essentials of structure and designs, behavior and culture, synergy, workplace diversity, health care finance, and power and politics within complex health systems. Organizational theories, leadership, management and nursing's social responsibility in an emerging global health care environment will also be explored.

Prerequisites: RN-BSN Nursing Program Student.

NURSE 485 Application to Practice I Credits: 3

This is the first of two clinical application courses designed to complement didactic content from the four-course block sequence (NURSE 481 - NURSE 484). Students will integrate an increasingly complex knowledge base with an emphasis on developing effectiveness: personally, interpersonally, and in the health management of populations of clients within systems of community and professional organizations and practice settings. Student cohort groups, in collaboration with personnel from health related organizations and faculty, assess population health needs, identify outcomes and develop action plans based on real need. The practice experience learning processes and outcomes will be collective and provide solutions for the health care community.

Prerequisites: RN-BSN Nursing Program Student.

NURSE 486 Application to Practice II Credits: 3

This is the second of two Practicum application courses designed to complement didactic content from the four-course block sequence (NURSE 481 - NURSE 484) to integrate complex knowledge for personal and interpersonal development in the health management of populations of clients. Student cohort teams will apply new skills and knowledge to real issues and problems in the delivery of nursing care with an emphasis on teamwork performance and action plan implementation and outcome evaluation. The processes and outcomes of those experiences will be collaborative and provide solutions for the health care community.

Prerequisites: RN-BSN Nursing Program Student.

NURSE 490 Special Topics Credits: 1-9

A course of study in a special area of interest in nursing under individual faculty direction.

Prerequisites: RN-BSN or Graduate Nursing Program Student.

NURSE 490AP2 Special Topics Credits: 1-9

Special Topics

Prerequisites: RN-BSN or Graduate Nursing Program Student.

Oboe (OBOE)

Courses

OBOE 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit towards the major.

OBOE 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury performance is required.

OBOE 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

OBOE 101 Freshman Oboe I Credits: 2-4

OBOE 102 Freshman Oboe II Credits: 2-4

OBOE 201 Sophomore Oboe I Credits: 2-4

OBOE 202 Sophomore Oboe II Credits: 2-4

OBOE 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

OBOE 301 Junior Oboe I Credits: 2-4

OBOE 302 Junior Oboe II Credits: 2-4

OBOE 401 Senior Oboe I Credits: 2-4

OBOE 402 Senior Oboe II Credits: 2-4

Organ (ORGAN)

Percussion (PERCSN)

Courses

PERCSN 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit toward the major.

PERCSN 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

PERCSN 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

PERCSN 101 Freshman Percussion I Credits: 2-4

PERCSN 101J Freshman Percussion I (Jazz) Credits: 2-4

PERCSN 102 Freshman Percussion II Credits: 2-4

PERCSN 102J Freshman Percussion II (Jazz) Credits: 2-4

PERCSN 201 Sophomore Percussion I Credits: 2-4

PERCSN 201J Sophomore Percussion I (Jazz) Credits: 2-4

PERCSN 202 Sophomore Percussion II Credits: 2-4

PERCSN 202J Sophomore Percussion II (Jazz) Credits: 2-4

PERCSN 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

PERCSN 301 Junior Percussion I Credits: 2-4

PERCSN 301J Junior Percussion I (Jazz) Credits: 4

PERCSN 302 Junior Percussion II Credits: 2-4

PERCSN 302J Junior Percussion II (Jazz) Credits: 4

PERCSN 401 Senior Percussion I Credits: 2-4

PERCSN 401J Senior Percussion I (Jazz) Credits: 4

PERCSN 402 Senior Percussion II Credits: 2-4

PERCSN 402J Senior Percussion II (Jazz) Credits: 4

Philosophy (PHILOS)

Courses

PHILOS 210 Introduction to Philosophy Credits: 3

An introduction to many of the central problems of philosophy. The various dimensions of philosophy are examined as it related to our relationships with each other, our understanding of our world and our understanding of ourselves. Connections between classical philosophers and contemporary issues are explored as philosophy is considered as a deeply personal and also as a social phenomenon.

PHILOS 210 - MOTR PHIL 100: Introduction to Philosophy

PHILOS 221 Contemporary Moral Issues Credits: 3

This course offers a philosophical examination of ethical issues in contemporary society. Topics for discussion include ethical conflicts arising in business and technology, engineering, healthcare, politics, and the environment. Moral concerns addressed may include reproductive rights and technologies, warfare, capital punishment, pornography, privacy, consumerism, euthanasia, sexuality, and animal welfare.

PHILOS 221 - MOTR PHIL 102: Introduction to Ethics

PHILOS 222 Foundations Of Logic and Scientific Reasoning Credits: 3

This course introduces the basic concepts and methods of modern logic, beginning with premise, inference, conclusion, and argument, with emphasis on understanding and reconstructing complex patterns of reasoning, and analysis and construction of valid arguments.

PHILOS 222 - MOTR PHIL 101: Introduction to Logic

PHILOS 250 Special Readings In Philosophy Credits: 3

An investigation of readings on a topic, a philosophical movement, or a philosopher to be selected by the instructor. The course is designed to meet the needs of students who are interested in a specific issue or person in philosophy but do not yet possess the necessary background and skill demanded of those who have taken work beyond the introductory course (s) in philosophy.

PHILOS 310WI Ancient Philosophy Credits: 3

A survey of the central figures of classical philosophy: the pre-Socratics, Socrates, Plato, Aristotle, the Stoics, the Epicureans and other philosophers of antiquity. The contributions of major philosophers to the development of science, religion, and social and political theories are studied. Recommended preparation: PHILOS 210 and PHILOS 222.

PHILOS 320WI History of Modern Philosophy Credits: 3

A survey of the central figures of modern philosophy: Rene Descartes, Baruch Spinoza, G.W. Leibniz, Thomas Hobbes, John Locke, George Berkeley, David Hume and Immanuel Kant. In addition to the philosophical issues of the period, cultural, historical and political matters are considered.

A secondary goal is the establishment of the pedigree of contemporary philosophical problems. Recommended preparation: PHILOS 210 and PHILOS 222.

PHILOS 321 Ethics Credits: 3

Attention is given to the nature of ethical ideas and the development and history of ethical theory.

Prerequisites: PHILOS 210, or PHILOS 221, or PHILOS 222.

PHILOS 325 Aesthetics Credits: 3

The basic problems of aesthetics are examined, with special emphasis on the character of the work of art, the aesthetic response of the viewer, the creative process of the artist, and the nature of aesthetic criticism. These topics are discussed in light of conflicting aesthetic theories. Recommended preparation: PHILOS 210 and PHILOS 222.

PHILOS 329 American Philosophy Credits: 3

The main trends of American thought are covered, with special emphasis on the philosophies of Peirce, James and Dewey.

Prerequisites: PHILOS 210 or PHILOS 222.

PHILOS 332 Existentialism Credits: 3

A study of the development of existentialism. Selections from the works of such thinkers as Kierkegaard, Nietzsche, Sartre, Heidegger, Camus and other related philosophers are considered. Special attention is devoted to the existential movements in literature, social science and medicine.

Recommended preparation: PHILOS 222.

PHILOS 333 Social And Political Philosophy Credits: 3

A consideration of representative views of the place of man in contemporary society. Contributions in psychology, political theory, economics, sociology and anthropology are investigated philosophically with a view toward offering a critical appraisal of the nature of man in the human community.

PHILOS 335 Philosophy Of Mind Credits: 3

A study of problems arising in connection with such topics as mental phenomena, the relation of mind to body, free will and determinism, the self and personal identity, and 'thinking' machines. Classical and contemporary treatments of such concepts as 'mind', 'intention', 'sensation', 'perception', 'stimulus', etc., and their relation to action and behavior are considered. Recommended preparation: PHILOS 210 or PHILOS 222.

PHILOS 337 Philosophy Of History Credits: 3

A discussion of methodological and substantive issues, including the nature of historical explanation, whether history can be a science, and various theories of history such as those of Vico, Hegel, Marx, and Collingwood.

Prerequisites: PHILOS 210 or PHILOS 222.

PHILOS 340 Philosophy Of Law Credits: 3

An analysis of major philosophies of law, including methods of justifying legal systems through natural law, legal positivism, sociological jurisprudence, theology, etc. Contemporary legal theories are critically analyzed. Recommended preparation: PHILOS 210 or PHILOS 222.

PHILOS 370 Environmental Ethics And Policy Credits: 3

Various philosophical approaches to issues such as the value of nature, human obligations to non-human animals, species, ecosystems and future generations; environmental justice; restoration; resource use; environmental politics; and the relation between environmental issues, policy and ethics will be discussed critically.

PHILOS 430 Plato Credits: 3

Selected dialogues of Plato are studied with a view to understanding Plato's philosophy and its position in the world of Greece and antiquity. Plato's philosophy is also examined with reference to his place in the Western tradition and in modern philosophy. Recommended preparation: PHILOS 210 or PHILOS 222.

PHILOS 431 Aristotle Credits: 3

Selected portions of Aristotle's works on logic, metaphysics, science, ethics, politics, and poetics are studied with a view to understanding Aristotle's philosophy and its position in the world of Greece and antiquity. Aristotle's philosophy is examined with reference to its place in the Western tradition and in modern philosophy. Recommended preparation: PHILOS 210 or PHILOS 222.

PHILOS 448 Recent Ethical Theories Credits: 3

An analysis and investigation of modern and contemporary ethical theories. Among the theories considered are ethical relativity, the emotive theory, utilitarianism, neo Kantianism, and situation ethics.

Prerequisites: PHILOS 321.

PHILOS 451 History and Philosophy of Bioethics Credits: 3

This course will provide an overview of the history of medicine and bioethics from antiquity to the present. In addition to key historical events, the course will provide an overview of foundational ethical theories. The course will explore key events in bioethics and the responses to them in the bioethics literature.

PHILOS 480 Selected Topics Credits: 1-3

Each time this course is offered a particular philosopher or particular area of philosophy will be the topic of discussion. The course may be repeated for credit when the topic varies.

Prerequisites: PHILOS 210 or PHILOS 222.

PHILOS 480A Selected Topics Credits: 1-3**PHILOS 480B Selected Topics Credits: 1-3****PHILOS 480E Selected Topics Credits: 1-3****PHILOS 490 Special Topics And Readings Credits: 1-3**

Intensive reading and/or research in an area selected by the student in consultation with the instructor. May be repeated for credit when the topic varies.

Prerequisites: Departmental consent.

PHILOS 490B Special Topics And Readings Credits: 1-3

Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies.

Prerequisites: PHILOS 222, PHILOS 310WI, PHILOS 320WI, PHILOS 321.

PHILOS 490F Special Topics and Readings Credits: 1-3

Intensive reading and/or research in an area selected by the student in consultation with the instructor. By permission only. May be repeated for credit when the topic varies.

Prerequisites: PHILOS 222, PHILOS 310WI, PHILOS 320WI, PHILOS 321.

PHILOS H310 Ancient Philosophy - Honors Credits: 3**PHILOS H321 Honors: Introduction To Ethics Credits: 3****PHILOS H332 Existentialism Credits: 3**

A study of the development of existentialism. Selections from the works of such thinkers as Kierkegaard, Nietzsche, Sartre, Heidegger, Camus and other related philosophers are considered. Special attention is devoted to the existential movements in literature, social science and medicine.

Prerequisites: PHILOS 210, PHILOS 222.

PHILOS H333 Social And Political Philosophy Credits: 3

A consideration of representative views of the place of man in contemporary society. Contributions in psychology, political theory, economics, sociology and anthropology are investigated philosophically with a view toward offering a critical appraisal of the nature of man in the human community. No prerequisites.

PHILOS H370 Environmental Ethics And Policy Credits: 3

Various philosophical approaches to issues such as the value of nature, human obligations to non-human animals, species, ecosystems and future generations; environmental justice; restoration; resource use; environmental politics; and the relation between environmental issues, policy and ethics will be discussed critically.

Physical Education (PHYS-ED)

Courses

PHYS-ED 106 Badminton Credit: 1

This course teaches the basic rules, skill techniques, terminology and strategy for badminton.

PHYS-ED 125 Golf Credit: 1**PHYS-ED 157 Weight Training Credit: 1**

Weight Training helps students build a solid foundation of current weight training knowledge and practice that can be used throughout their lifetime. Information in the course is consistent with recommendations of the National Strength and Conditioning Association (NSCA) and the American College of Sport Medicine (ACSM). Based on individual goals and assessments, beginning weight training students will create a personal training program and implement a record keeping system to keep track of their progress.

PHYS-ED 158 Advanced Weight Training Credit: 1

This course teaches free weight training exercises that are used within a well-balanced training program, and provides experience needed to design weight training programs.

PHYS-ED 174 Cross Training Credit: 1

This course provides knowledge, skill and opportunity to improve primary sport/activity performance or overall fitness, through designing and participating in a variety of cross training physical activities.

PHYS-ED 175 Personal Fitness Credits: 2

This course is designed to expose students to facts about and experiences in dealing with motor, physical, physiological, psychological and nutritional aspects of the human being. Specific areas of study include hypokinetic disease, physical fitness, nutrition and wellness concepts.

PHYS-ED 175L Lifetime Fitness Lab Credit: 1

This course is designed to provide supervised activity experiences including self assessment and self directed physical exercise programs that are coordinated with the lecture portion of the course.

PHYS-ED 180 Beginning Swimming Credit: 1

This course is designed to equip each student with basic water safety skills and knowledge in order to make them reasonably safe while in, on or about the water.

PHYS-ED 181 Fitness Swimming Credit: 1

This course is designed to challenge and encourage each student to develop an individualized fitness program based on personal goals. Lap swimming as well as water exercise will be incorporated in the class.

PHYS-ED 189 Special Topics: Activity Credit: 1

A course designed to deal with a special activity class which is not available in the regular course offerings. Activity class, instructors and prerequisites to be listed in the semester bulletin.

PHYS-ED 189AY Special Topics:Activity Credit: 1**PHYS-ED 189BE Special Topics: Activity Credit: 1****PHYS-ED 189YO Special Topics: Activity Credit: 1**

Special topics in physical education.

PHYS-ED 203 Aquatic Skills And Teaching Techniques Credits: 2

The purpose of this course is to train students to teach water safety and swimming courses through observation, participation and peer teaching.

Prerequisites: Swimmer level skill.

PHYS-ED 206 First Aid And Safety Credit: 1

Methods of administering first aid in case of accident or sudden illness; bandaging; resuscitation; and caring for wounds and injuries. Safety in schools will be stressed. (Elective).

PHYS-ED 207 Outdoor And Leisure Pursuits Credits: 2

Designed to acquaint students with opportunities for leisure and recreational activity in the outdoors. Emphasizes safety measures and planning skills as well as development of particular movement skills and knowledge about associated wildlife.

PHYS-ED 212 Self Defense Credit: 1

Study in the theory of self defense. Content focuses on: technique for eliminating dangers from daily living, methods for recognizing and avoiding dangers, and skills and strategies for employing physical defense when necessary.

PHYS-ED 300 Mechanical Analysis of Human Movement Credits: 3

Study of the kinesiology and biomechanical aspects of human motion with focus on application to sport skill, dance and exercise situations.

Prerequisites: HLSC 120 and HLSC 160 or concurrent enrollment.

PHYS-ED 300L Mechanical Analysis of Human Movement Lab Credit: 1

Lab activities that support the study of kinesiology and biomechanical aspects of human motion with focus on application to sport skill, dance, and exercise situations.

Co-requisites: PHYS-ED 300.

PHYS-ED 312 Physical Education For Elementary Schools Credits: 2

Identifies physical education needs of elementary school child in relation to his/her total development with emphasis on methods and materials.

PHYS-ED 312L Laboratory Experiences in Physical Educ for the Elementary School Credit: 1

This course consists of laboratory teaching experiences, with skill theme combinations of games, gymnastics, dance fitness.

Co-requisites: PHYS-ED 312.

PHYS-ED 323 Nutrition for Fitness and Sport Credits: 3

This course examines the role nutrition, complemented by exercise, may play in the enhancement of fitness and sport performance. Considerable attention will be devoted to the use of nutritional ergogenic aids with reference to athletic performance.

Prerequisites: BIOLOGY 218, BIOLOGY 218L, LS-PHYS 217.

PHYS-ED 350 Physiology of Sport and Exercise Credits: 3

Study of the concepts and principles of exercise physiology with the intent of learning how to apply them to exercise, sport and movement experiences. Includes development of fitness testing skills, program planning and exercise.

Prerequisites: HLSC 120 and HLSC 160 or concurrent enrollment.

PHYS-ED 350L Physiology of Sport and Exercise Lab Credit: 1

Using lab activities, the course uses the concepts and principles of exercise physiology and applies them to exercise, sport, and movement experiences. Includes the development of fitness testing skills, program planning and exercise.

Co-requisites: PHYS-ED 350.

PHYS-ED 361WI Sociology of Sport and Exercise Credits: 3

The critical examination of the function of sport in the American culture, in an interdisciplinary fashion, with a focus on the contemporary scene. The work of the course will include readings on sociological issues of sport and exercise, the writing of mini-research papers, and a long paper with a presentation. Recommended preparation: Introduction course in sociology.

PHYS-ED 370 Psychology of Sport and Exercise Credits: 3

Exploration of psychological constructs related to the competitive sport process and to physical activity.

PHYS-ED 389 Special Topics In Health And Physical Education Credits: 1-3

This course is designed to offer a topic which is not available in the regular course offerings. Topics, instructors and prerequisites to be listed in the semester bulletin.

PHYS-ED 391 Fitness Assessment and Exercise Prescription Credits: 3

This course introduces students to health appraisal and fitness assessment of individuals. The course proceeds with prescribing exercise and conditioning programs, to enhance health and develop physical performance.

Prerequisites: PHYS-ED 350.

PHYS-ED 401 Teaching Healthy Behaviors in the Schools Credits: 3

Study of school health and physical activity programs with emphasis on methods and materials for health, safety, and classroom physical activity instruction in grades K-8.

PHYS-ED 401L Health Teaching In The Schools Lab Credit: 1

Students will attain beginning level competence in skills related to teaching health in schools, including planning, preparation and presentation skills. Computer skills will be used to search internet, e-mail, and develop a computer generated presentation.

PHYS-ED 499 Internship Credits: 3-6

Extensive experience in a practical situation under supervision of university faculty and on-site personnel. Breadth and intensity of involvement will depend on student ability. Available only to upper-division majors.

Physical Sciences (PHY-SCI)

Courses

PHY-SCI 110 Foundations Of Physical Sciences I Credits: 4

Fundamental principles and concepts of the various physical and mathematical sciences, integrated by the history and philosophy of science.

PHY-SCI 110 - MOTR PHYS 110L: Essentials Physical Sciences w/Lab

**PHY-SCI 110L Foundations Of Physical Sciences, Laboratory I Credit: 1**

General laboratory and discussion sessions on various topics in the physical and mathematical sciences.

PHY-SCI 110L - MOTR PHYS 110L: Essentials Physical Sciences w/Lab

**PHY-SCI 130 Physics of Sports Credits: 3**

A course intended for liberal arts students focusing on the physics involved in different sports. Physical laws and technological developments that impact sports will be studied.

PHY-SCI 140 How Things Work Credits: 3

A course intended for liberal arts students focusing on the principles of operations, histories, and relationships of objects from our daily environment. The areas of investigation include mechanical and thermal objects, electromagnetism, light, special materials and nuclear energy.

Co-requisites: PHY-SCI 140L.

PHY-SCI 140L How Things Work Laboratory Credit: 1

Simple experiments based on everyday experiences are analyzed in terms of conceptual physics. The material includes elements of mechanics of a rigid body, elastic properties of matter, fluid dynamics, thermodynamics, electromagnetism, optics and modern physics.

Co-requisites: PHY-SCI 140.

PHY-SCI 150 Astronomy: Motions of the Cosmos Credits: 3

An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the fundamental laws of gravity and motion crucial to the formation of stars and planetary systems, the growth of black holes and galaxies, and the evolution of cosmic structure.

PHY-SCI 153L Introductory Astronomy Laboratory Credits: 2

An introductory exploration of astronomical phenomena and concepts through quantitative laboratory activities requiring data collection, analysis and interpretation. This course is open to students from all majors. Concurrent enrollment in either PHY-SCI 150 or PHY-SCI 155 is encouraged but not required.

PHY-SCI 171 Physics For Future Presidents Credits: 3

A course intended for liberal arts students focusing on the physics they need to be informed citizens in a democracy. Energy, global warming, terrorism, and health are examples of the important topics examined from the perspective of how science should inform policy.

PHY-SCI 410A Selected Topics In Contemporary Science Credits: 3**PHY-SCI 435 Selected Topics In The History Of Science Credits: 3**

Selected Topics In The History Of Science

Physics (PHYSICS)

Courses

PHYSICS 130 Physics of Sports Credits: 3

A course intended for liberal arts students focusing on the physics involved in different sports. Physical laws and technological developments that impact sports will be studied.

PHYSICS 131L Backyard Physics Credit: 1

This laboratory course uses readily available ingredients to develop a conceptual understanding of the laws of nature and mathematics. Experiments can be conducted in the residence hall, apartment, park or home using everyday, inexpensive equipment and materials.

PHYSICS 140 How Things Work Credits: 3

A course intended for liberal arts students focusing on the principles of operations, histories, and relationships of objects from our daily environment. The areas of investigation include mechanical and thermal objects, electromagnetism, light, special materials and nuclear energy.

Co-requisites: PHYSICS 140L.

PHYSICS 140 - MOTR PHYS 100L: Essentials in Physics with Lab

PHYSICS 140L How Things Work Laboratory Credit: 1

A course intended for liberal arts students focusing on the principles of operations, histories and relationships of objects from our daily environment. The areas of investigation include mechanical and thermal objects, electromagnetism, light, special materials and nuclear energy.

Co-requisites: PHYSICS 140.

PHYSICS 140L - MOTR PHYS 100L: Essentials in Physics with Lab

PHYSICS 150 Astronomy: Motions of the Cosmos Credits: 3

An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the fundamental laws of gravity and motion crucial to the formation of stars and planetary systems, the growth of black holes and galaxies, and the evolution of cosmic structure.

PHYSICS 153L Introductory Astronomy Laboratory Credits: 2

An introductory exploration of astronomical phenomena and concepts through quantitative laboratory activities requiring data collection, analysis and interpretation. This course is open to students from all majors.

PHYSICS 155 Astronomy: Starlight and Star Stuff Credits: 3

An introductory exploration of modern topics in astronomy with an emphasis on developing conceptual models for the interactions between light and matter crucial to the life and death of stars, the analysis of starlight and interstellar chemistry, and the interpretation of cosmic history.

PHYSICS 210 General Physics I Credits: 4

Introduction to mechanics, wave motion and sound and heat and thermodynamics. Three hours lecture and two hours laboratory per week.

Co-requisites: MATH 110 or MATH 120 (or higher); ACT Math Sub-score of 28 or higher; or SAT Math Sub-score of 660 or higher.

PHYSICS 210 - MOTR PHYS 150L: Physics I with Lab

PHYSICS 220 General Physics II Credits: 4

Introduction to electricity and magnetism, light and optics and modern physics. Three hours lecture and two hours laboratory per week.

Prerequisites: PHYSICS 210.

PHYSICS 240 Physics For Scientists and Engineers I Credits: 5

Introduction to mechanics, wave motion and sound and heat and thermodynamics.

Co-requisites: MATH 210 or MATH 266.

PHYSICS 240 - MOTR PHYS 200L: Advanced Physics I with Lab

PHYSICS 250 Physics For Scientists and Engineers II Credits: 5

Introduction to electricity and magnetism, light and optics and modern physics. Four hours lecture and two hours laboratory per week.

Prerequisites: PHYSICS 240.

Co-requisites: MATH 220 or MATH 268.

PHYSICS 310 Mechanics I Credits: 3

Advanced statics and dynamics of particles and rigid bodies including gravitation.

Prerequisites: PHYSICS 220 or PHYSICS 250; and MATH 250 or MATH 268.

PHYSICS 311 Mechanics II Credits: 3

Continuation of Mechanics I, including mechanics of continuous media, Lagranges equations, tensor algebra and theory of small vibrations.

Prerequisites: PHYSICS 310.

PHYSICS 330 Methods Of Theoretical Physics I Credits: 3

Introduction to mathematical and numerical methods used in the theoretical modeling of physical systems. Treatments of linear systems in scientific and engineering applications will be emphasized.

Prerequisites: MATH 250 or MATH 268.

PHYSICS 342 Physics of Science Fiction Credits: 3

This course will quantitatively explore the representation of physics in science fiction books, movies and television shows. Many popular science fiction concepts will be explored, spanning centuries of physics from Galileo to string theory.

Prerequisites: PHYSICS 220 or PHYSICS 250; and MATH 120 or MATH 125.

PHYSICS 350 Modern Physics With Engineering Applications Credits: 3

An introduction to the theories that revolutionized science and technology in the twentieth century. Topics include special and general relativity, introductory quantum mechanics and atomic structure. Inventions and applications based on these are also examined.

Prerequisites: MATH 220 or MATH 268 and PHYSICS 220 or PHYSICS 250.

PHYSICS 353 Practical Astronomy Credits: 3

A practical overview of the basic methods of observational astronomy research, including the principles of telescopes, detectors and measurement theory.

Prerequisites: PHYSICS 250 and MATH 210 or MATH 220.

PHYSICS 355 Stellar Astrophysics Credits: 3

A mathematical and conceptual overview of the observed properties of stars and the fundamental astrophysics of radiative transfer, hydrostatic equilibrium, atomic processes and thermonuclear energy production that govern their structure, atmospheres and remnants.

Prerequisites: PHYSICS 240 and PHYSICS 250, MATH 210 or MATH 220.

PHYSICS 356 Galaxies Credits: 3

A mathematical and conceptual overview of the observed properties and astrophysics of galaxies highlighting star formation and evolution, the interstellar medium, the Milky Way, galaxy populations and demographics, active galactic nuclei, and galaxy formation and evolution.

Prerequisites: PHYSICS 250 and MATH 210 or MATH 220.

PHYSICS 385L Physics of Electronics Credits: 3

An introduction to the solid state physics of basic electronic components and their operation through both theory and practical labwork.

Prerequisites: PHYSICS 220 or PHYSICS 250.

PHYSICS 395L Computer Interfacing Laboratory Credits: 3

An introduction to data acquisition and automation by computer interfacing transduction and control equipment through the serial and parallel buses. The course is multidisciplinary, balancing the physics of transduction to the computer science of automation programming to the electrical engineering of bus protocols. Both high- and low-level programming are taught within the context of automating an experimental procedure. Digital-to-analog and analog-to-digital conversion is also covered.

Prerequisites: PHYSICS 385L.

PHYSICS 410 Thermal Physics Credits: 3

A study of the laws of thermodynamics and their applications, with an introduction to kinetic theory. Statistical methods are emphasized.

Prerequisites: PHYSICS 220 or PHYSICS 250; and MATH 250 or MATH 268.

PHYSICS 420 Optics Credits: 3

Geometrical optics, physical optics and introduction to selected topics in modern optics.

Prerequisites: PHYSICS 220 or PHYSICS 250 and MATH 210 or MATH 216 or MATH 266.

PHYSICS 450 Introduction To Solid State Physics Credits: 3

Crystal structure and binding, elementary lattice dynamics and energy band theory. Free electron models, theory of semiconductors and metals.

Prerequisites: PHYSICS 310 or PHYSICS 410.

PHYSICS 460 Electricity And Magnetism I Credits: 3

Static electric fields in free space and material media; Kirchoff's laws and direct current circuits; static magnetic fields.

Prerequisites: PHYSICS 220 or PHYSICS 250; and MATH 250 or MATH 268.

PHYSICS 461 Electricity And Magnetism II Credits: 3

Magnetostatics; alternating current circuits; Maxwell's equations and radiation; special relativity; topics in electromagnetism.

Prerequisites: PHYSICS 460.

PHYSICS 465 Cosmology Credits: 3

This course provides a foundation in both physical and observational cosmology. Students will acquire both a mathematical and conceptual understanding of the formation and dynamics of the Universe.

Prerequisites: PHYSICS 240 and PHYSICS 250, MATH 210 or MATH 220.

PHYSICS 472 Introduction To Quantum Mechanics Credits: 3

Introduction to the theory and applications of quantum mechanics with emphasis on the mathematical treatment of modern physics.

Prerequisites: PHYSICS 350.

PHYSICS 476LW Advanced Laboratory Credits: 3

This course offers a selection of important experiments in physics, performed with modern instrumentation. It is designed to give students a deeper understanding of physics and help them develop experimental abilities and improve their communication skills.

PHYSICS 490 Special Problems Credits: 1-3

The kind of problem and the amount of credit to be given by arrangement with the department.

PHYSICS 499 Undergraduate Research Credits: 1-3

Independent student research on a physics/astrophysics project under the supervision of a faculty member. Projects will engage students in aspects of the scientific process including data collection and analysis, research methods and strategies, scientific discussion and written/oral communication. Requires a minimum of 3-4 hours of research per week for each credit hour.

PHYSICS H150 Honors: Introduction To Astronomy Credits: 3

Honors: Introduction To Astronomy

PHYSICS H220 General Physics II Credits: 4

Fundamental principles of physics including sound, electricity, magnetism, optics, elementary modern physics, and applications of these principles to different interdisciplinary natural science.

Prerequisites: PHYSICS 210 (or equivalent).

PHYSICS H240 Physics For Science And Engineering I Credits: 5

Introduction to mechanics, wave motion and sound and heat and thermodynamics.

Co-requisites: MATH 210.

PHYSICS H250 Physics For Science And Engineering II Credits: 5

Introduction to electricity and magnetism, light and optics and modern physics.

Prerequisites: PHYSICS 240.

Co-requisites: MATH 220.

Piano (PIANO)

Courses

PIANO 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit toward the major.

PIANO 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

PIANO 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

PIANO 101 Freshman Piano I Credits: 2-4

PIANO 101J Freshman Piano I (Jazz) Credits: 2-4

PIANO 102 Freshman Piano II Credits: 2-4

PIANO 102J Freshman Piano II (Jazz) Credits: 2-4

PIANO 201 Sophomore Piano I Credits: 2-4

PIANO 201J Sophomore Piano I (Jazz) Credits: 2-4

PIANO 202 Sophomore Piano II Credits: 2-4

PIANO 202J Sophomore Piano II (Jazz) Credits: 2-4

PIANO 300 Studio Class Credits: 0

PIANO 301 Junior Piano I Credits: 2-4

PIANO 301J Junior Piano I (Jazz) Credits: 4

PIANO 302 Junior Piano II Credits: 2-4

PIANO 302J Junior Piano II (Jazz) Credits: 4

PIANO 401 Senior Piano I Credits: 2-4

PIANO 401J Senior Piano I (Jazz) Credits: 4

PIANO 402 Senior Piano II Credits: 2-4

PIANO 402J Senior Piano II (Jazz) Credits: 4

Political Science (POL-SCI)

Courses

POL-SCI 210 American Government Credits: 3

American government and politics, with special reference to the U.S. Constitution. This course meets the state requirement for study of the U.S. and Missouri Constitutions.

POL-SCI 210 - MOTR POSC 101: American Government

POL-SCI 220 Introduction To Comparative Politics Credits: 3

Introduces students to general concepts of political authority and systematically analyzes the causes and consequences of variation in political institutions, processes and policies across countries, illustrating concepts and themes with case studies of major European and Asian countries.

POL-SCI 220 - MOTR POSC 202: Introduction to Comparative Politic

POL-SCI 221 Introduction to Comparative Politics and Research Credits: 3

This course introduces students to general concepts of political authority, and systematically analyzes the causes and consequences of variation in political institutions, processes and policies across countries. This course also introduces students to research in comparative politics, with students developing an independent research project.

POL-SCI 230 International Relations Credits: 3

An analysis of relations among nations, with emphasis on structures of international power, causes of war, and approaches to peace.

POL-SCI 230 - MOTR POSC 201: International Relations

POL-SCI 301 Western Political Philosophy Credits: 3

An examination of the major theories of politics from Plato to today.

POL-SCI 303 Political Behavior Credits: 3

This course will survey research on conventional and unconventional forms of mass political behavior. Topics to be discussed include campaign participation, voting behavior, public opinion, the media, and participation in protests and revolutions. This course will also cover the methodological approaches to the study of political behavior.

POL-SCI 304 Politics of Developing Countries Credits: 3

The course examines the key arguments that have been advanced to account for differences across countries in rates and levels of economic and political development.

POL-SCI 308 Parties and Interest Groups Credits: 3

Introduction to parties and interest groups in the United States and their important role in the political process. Topics include the formation, organization, activities, and impact of political parties and interest groups in American politics.

POL-SCI 309 Public Opinion Credits: 3

Explores public opinion in the United States, surveying theories and empirical research on the measurement, formation, and distribution of public opinion.

POL-SCI 313 Politics In The American States Credits: 3

A study of the structures, functions, and politics of the institutions of American state governments and an assessment of their role in the federal system. This course is particularly interested in the extent to which political economy and political culture, broadly defined, influence public policy within the states.

POL-SCI 316 Terrorism And Political Violence Credits: 3

This course explores terrorism and armed struggle from theoretical and historical perspectives, and analyzes a number of violent movements with nationalist, ideological, and religious motivations.

POL-SCI 318 Political Psychology Credits: 3

The field of political psychology is an interdisciplinary field that draws on both psychology and political science to address topics in the political world. This course will focus on a variety of topics including inter-group conflict, stereotyping and prejudice, political socialization, attitude formation and change, political communication, decision heuristics and biases, public opinion, and the future of political psychology.

POL-SCI 319 Campaigns And Elections Credits: 3

This course will examine the role of campaigns in determining the outcome of both congressional and presidential elections and the way that electoral rules structure both campaign strategies and electoral outcomes. This course focuses on topics such as the role of the media, campaign advertising, campaign financing, public opinion, registration requirements, and the role of interest groups.

POL-SCI 336 American Foreign Policy Credits: 3

Understanding the contemporary debate over American foreign policy in terms of the premises and perspectives of several competing schools of thought.

POL-SCI 345 Women and Politics Credits: 3

This course investigates the role that women play in the political realm and how political institutions, laws, and norms shape women's experience in politics as citizens, activists, candidates and political leaders, plus the causes and consequences of women's participation and barriers to same.

POL-SCI 348 Constitutional Law: The Federal System Credits: 3

A study of the president, congress and state governments from the perspective of the Constitution, emphasizing powers and limitations on the exercise of authority.

POL-SCI 349 Constitutional Law: Civil Liberties Credits: 3

A study of civil liberties in American society, emphasizing factors and forces that restrict or enlarge their scope, as understood through constitutional interpretation.

POL-SCI 357 Western European Politics Credits: 3

This course explores democratic representation and political institutions in Western Europe.

POL-SCI 360 Labor, Politics and Society Credits: 3

This course explores many aspects of unions and the labor movement in society and the vital role organized labor plays as a pillar of democratic society. Unions impact the economy, growth, and the distribution of wealth, and the impact racial and gender equality, social security health and job safety, energy and the environment, and even foreign relations. As a social movement, labor has had a major impact on American history. This course covers these topics from a labor perspective. It examines current obstacles for union organizing, recent union campaigns, labor's political role, and the relationship between labor and the media. This course is part of the Certificate Program in Labor Studies and is offered on the University of Missouri Interactive Video Network at UMKC, UMSL, and UMC.

POL-SCI 362 Latin America and International Relations Credits: 3

This course we will survey the relations between Latin American states and between Latin America and the world. Taking the Latin American states as the key actors, we examine the history of US-Latin American relations, including current issues such as drug trafficking, immigration and terrorism. We will also study the region as a player on the international stage, examining Latin America's changing role in the world arena related to trade, development, and the environment. Finally we examine the emergence of new leadership in Latin America.

POL-SCI 365WI Congress and Parliaments Credits: 3

The objective of this course is to examine the election and behavior of legislators and legislatures in the United States compared to other countries' political systems, especially how these differences affect representation and policy making. Students will write and think critically about how structures of legislatures affect political outcomes.

POL-SCI 366 British Politics Credits: 3

This course focuses on the contemporary politics of the United Kingdom, particularly elections, institutions, and political parties.

POL-SCI 370 Labor Law Credits: 3

In this course, participants will examine the role of government in the regulation of labor-management relations in the United States. While the focus of the course will be on federal laws regulating private sector labor relations, parallel issues addressed in the Railway Labor Act and state public sector labor relations law will also be covered. Specific topics include the legal framework for the organization of workers, definition of prohibited or unfair labor practices of employers and unions, legal regulation of the collective bargaining process, regulation of the use of economic weapons in labor disputes, enforcement of collective bargaining agreements and the regulation of internal trade union activities.

POL-SCI 380 Political Science And Politics Credits: 1-6

Offered as a special course in the individual faculty member's area of research specialization. The course may be repeated for credit when the topic varies. The topic and instructor will be announced in advance.

POL-SCI 401 Legitimacy, Power, and the Survival of Political Systems Credits: 3

This course examines what allows political systems to survive, exert power, and maintain control over their population. It focuses on the concept of legitimacy – i.e. whether people believe a government has the right to make decisions that are binding on the mass public. The course covers how political systems and institutions develop legitimacy, how that legitimacy helps maintain control of the mass public, and why people sometimes choose to willingly follow commands issued by political authorities and other times choose to resist or rebel.

POL-SCI 404 Conflict Resolution Credits: 3

This course examines theories of peace and conflict resolution in the international system. Students will assess the challenges to conflict resolution, international cooperation, and peace as well as the means through which states and non-state actors overcome those challenges. Students will critically evaluate theories of conflict resolution and peace, while learning to apply those theories to current events.

POL-SCI 408 Judicial Politics Credits: 3

An examination of the judiciary in the American political process, emphasizing the role of judges, lawyers and the Supreme Court.

POL-SCI 425WI Seminar in Comparative Politics Credits: 3

A survey of the major research in comparative politics including state building, nationalism, democracy, nondemocratic regimes, economic development, and political violence. This course satisfies the College of Arts and Sciences Writing Intensive requirement.

Prerequisites: POL-SCI 220 or POL-SCI 221.

POL-SCI 452 Concepts in International Relations Credits: 3

This course exposes advanced undergraduate students to major conceptual and theoretical approaches to international relations. Recommended preparation: Prior course in international relations, politics, economics, or history.

POL-SCI 480 Government And Politics Credits: 1-6

This variable credit course will explore different contemporary issues and problems related to government and politics. Credit may apply to the major but will not satisfy any of the four subfields distribution requirements.

POL-SCI 491 Internship Credits: 1-6

With the written consent of the department chairman, students may participate in structured internship programs approved by the department for a maximum of six hours.

POL-SCI 493 Study Abroad Credits: 1-6

With prior approval from the department advisor, students may complete coursework at an approved foreign university and receive up to 6 hours of political science credit.

POL-SCI 497 Political Science Tutorial Credits: 2

Senior political science majors may apply to do independent study under a selected professor. Must have written consent of the professor prior to registration. Only one tutorial will count toward the major.

POL-SCI 498 Honors Tutorial Credits: 1-3

Senior political science majors with a grade point average of 3.4 or above in political science may apply to do independent study under a selected professor. Must have written consent of professor prior to registration. Only one tutorial will count toward the major.

Psychology (PSYCH)

Courses

PSYCH 151 College Study Skills and Resources Credits: 3

Course helps Propel students develop critical thinking, time management and academic skills, necessary for success in college and future employment. Students will learn about their individual learning styles and skills as well as the academic resources available to help them develop new skills. They will also explore and use various software and apps to help them stay organized and build self-sufficiency.

Prerequisites: Propel Student.

PSYCH 152 Developing a Person-Centered Life Plan Credits: 3

In this course students in the Propel Program will develop a person-centered plan that will serve as a foundation for their college experience and their future. The course approaches the topic with the belief that people with disabilities are people first and therefore the person-centered life engages the whole person and ensures person-centered supports.

Prerequisites: Propel Student.

PSYCH 153 Communication Skills for Networking, Employment, and Friendship Credits: 3

Through this course, students in the Propel program will gain communication skills, networking skills; learn how to build friendships; and gain important insight on personal safety.

Prerequisites: Propel Student.

PSYCH 154 Personal Finance and Disability Services Credits: 3

This course will introduce Propel students to disability services and systems that they will need in their adult lives. A second focus on personal finance will help students understand how disability benefits affect their personal finances.

Prerequisites: Propel Student.

PSYCH 155 Developing a Career Credits: 3

Career development is a journey of self-assessment and decision-making. Using an interactive discovery process, students identify possible careers that would match personality type, strengths, interests, skills, and/or values. With Career Center resources, Propel students identify strategies for leveraging the college experience to jumpstart a career.

Prerequisites: Propel Student.

PSYCH 156 Transition Skills Credits: 3

Propel students will learn how to identify, report and avoid abuse, neglect, and exploitation. They will also learn about their personal rights, including the right to confidentiality.

Prerequisites: Propel Student.

PSYCH 207 Orientation to the Psychology Major Credit: 1

This course provides an introduction to the field of Psychology, and to the Department of Psychology at UMKC. Students will explore major requirements, behaviors associated with academic success, campus resources, and faculty research and teaching interests.

Co-requisites: PSYCH 217.

PSYCH 210 General Psychology Credits: 3

A survey of the fundamental principles, theories, and methods of psychological science.

PSYCH 210 - MOTR PSYC 100: General Psychology

**PSYCH 212 Social Psychology Credits: 3**

Survey of behavior in the actual, imagined, and implied presence of others, including attitudes, the self, conformity, altruism, aggression, prejudice, and group processes.

Prerequisites: PSYCH 210 with a C- or better.

PSYCH 217 Academic and Career Opportunities in Psychology Credits: 2

This course explores post-BA career options for students majoring in Psychology. Students will examine psychology-related career opportunities with a bachelor's degree, and options for psychology-related careers after earning a graduate degree. Emphasis will be placed on students developing academic plans that will prepare them for professional success.

Prerequisites: PSYCH 207 (or coreq) and PSYCH 210 with C- or better. Must be Psychology BA major and have completed a minimum of 15 credit hours.

PSYCH 222 Child Psychology Credits: 3

Survey of child development from conception to adolescence, including major theories, developmental milestones and research related to the physical, cognitive, social and emotional growth of children.

Prerequisites: PSYCH 210 with a C- or better.

PSYCH 252 Psychology of Communicating Your Lived Experience Credits: 3

This course provides frameworks for people interested in communicating their lived experiences with disabilities. This course will not satisfy the College of Arts and Sciences' Social and Behavioral Science distribution or Humanities distribution degree requirements.

PSYCH 253 Disability Civil Rights Movements Credits: 3

A survey of disability civil rights movements. The course includes such topics as institutionalization and deinstitutionalization, education, protests, civil rights advocacy, and the Americans with Disabilities Act. Students will develop a timeline of disability history milestones and conduct oral history interviews with Kansas City area individuals with disabilities.

Prerequisites: Propel Student.

PSYCH 255 Accessible, Inclusive Internships Credits: 3

Through this experiential learning opportunity, students complete an internship with a company, non-profit, governmental or community-based organization. Through a combination of direct observation, reflection, and evaluation, students relate the experience to their academic study and to their career exploration.

Prerequisites: Propel Student.

PSYCH 257 Disability History and Culture Credits: 3

An examination of selected political, cultural, economic and social forces shaping disability from historical and present day perspectives. The course is taught with discussions and reflections with local disability leaders.

Prerequisites: Propel Student.

PSYCH 258 Leadership and Disabilities Credits: 3

Students learn about leadership theories and develop leadership skills as they apply theory to practical situations.

Prerequisites: Propel Student.

PSYCH 302 Research Design in Psychological Science Credits: 3

An overview of research designs and data collection methods used in psychological science. Emphasis is placed on comparing strengths and limitations of various research designs and data collection methods as well as identifying appropriate uses of those research designs and data collection methods.

Prerequisites: PSYCH 210 with a C- or better.

PSYCH 305 Psychology of Gender Credits: 3

An examination of theory and research on the biological, psychological, and social aspects of gender. Differences and similarities in men's and women's affect, cognition, and behavior will be explored. Perceptions of how gender affects cognitions and behaviors will also be discussed.

Prerequisites: PSYCH 210 with a C- or better.

PSYCH 316 Quantitative Methods In Psychology Credits: 3

Introduction to the use, calculation, reporting, and interpretation of descriptive and elementary inferential statistical techniques in psychological science.

Prerequisites: PSYCH 210 with a C- or better; and MATH 110 or MATH 116 or STAT 115 or MOTRMATH 110 or higher level math (with a grade of C- or higher); or ALEKS Score of 61 or higher.

PSYCH 320 Ethnic and Minority Perspectives in Psychology Credits: 3

The theory, methods and content of psychology relevant to the interests and needs of ethnic minorities, and the contributions of ethnic groups and other minorities to psychology.

Prerequisites: PSYCH 210 with a C- or better.

PSYCH 323 Theory and Methods of Personality Credits: 3

The development, organization, dynamics and determinants of personality. May not be taken for graduate credit.

Prerequisites: PSYCH 210 with a C- or better.

PSYCH 405 Motivation and Emotion Credits: 3

A review of the principles of both human and animal motivation from classical drive, behavioral, and cognitive perspectives. May not be taken for graduate credit.

Prerequisites: PSYCH 210 with a C- or better.

PSYCH 407 Cognitive Psychology Credits: 3

Historical foundations and current state of knowledge regarding human information processing and the mental processes that underlie human behavior.

Prerequisites: PSYCH 210 with a C- or better.

PSYCH 418 Brain and Behavior I Credits: 3

Introduction to the neural bases of human behavior, including movement, learning and memory, sensation and perception, emotion, cognition, psychological, and neurological disorders.

Prerequisites: PSYCH 210 with a C- or better.

PSYCH 433 Abnormal Psychology Credits: 3

Introduction to major psychological problems and disorders as well as consideration of some of the many interacting biopsychosocial influences viewed from an empirically-informed perspective. May not be taken for graduate credit.

Prerequisites: PSYCH 210 with a C- or better.

PSYCH 440 The Psychology Of Aging Credits: 3

Survey of concepts, theory, and methods in the psychology of aging, including biological and social influences on behavior.

Prerequisites: PSYCH 210 with a grade of C- or better.

PSYCH 450 Special Topics Credits: 1-3

Offered as the result of student demand, specialized faculty interests, or the availability of a visiting expert in a field related to psychology.

Prerequisites: PSYCH 210 with a grade of C- or better.

PSYCH 461 Field Practicum Credits: 1-6

Provides supervised human services experience in an external community agency or organization that addresses human or social problems.

Prerequisites: PSYCH 210 with a C- or better.

PSYCH 490 Directed Individual Research Credits: 1-6

Students work on an individual research project under the supervision of a departmental faculty member.

Prerequisites: PSYCH 210 with a grade of C- or better.

PSYCH 491 Psychology Research Externship Credits: 1-6

Provides supervised research experience in an external community agency or organization that examines basic or applied research questions.

Prerequisites: PSYCH 210 with a C- or better.

PSYCH 495WI Contemporary Issues in Psychology Credits: 3

In-depth analysis of a contemporary issue in psychology. Emphasis will be placed on reading and writing about empirical approaches to contemporary challenges in psychological science.

Prerequisites: PSYCH 210 and PSYCH 302 both with a C- or better.

PSYCH H210 General Psychology Credits: 3

A survey of the fundamental principles, theories, and methods of psychological science.

Prerequisites: Departmental consent.

Public Administration (PUB-ADM)

Courses

PUB-ADM 410 Research Methods In Public Administration Credits: 3

This introductory course focuses on quantitative empirical research design and statistical analyses in relation to public administration issues and concerns.

Prerequisites: Departmental consent.

PUB-ADM 420 Urban Environmental Policy Credits: 3

Our cities are a first line of action in our efforts to sustain our environment. Many have begun to examine and address the connection between city problems and environmental and climate change, and the disproportionate impacts that they often have on the disadvantaged, yet these initiatives address only the surface of the issue. It is essential for scientists, public administrators, environmentalists, and policy thinkers to pay greater attention to the environmental challenges of our cities. Students examine and assess the challenge of understanding, developing and implementing coherent environmental policy to address such challenges in urban communities.

PUB-ADM 421 Managing for Sustainability in an Urban Environment Credits: 3

Managing for sustainability requires an understanding of theories of organization, environmental management, and sustainability, including how to define and achieve sustainability. Students examine the complexities associated with issues of sustainability and the interrelationship between the global, the local and the personal. This includes consideration of how organizations function, the obstacles to sustainability confronted by sustainability managers, and specific management strategies and tools available to sustainability managers. It also involves the study of change models and their application by managers faced with the challenge of moving an organization from an old operational model to a more sustainable new organizational design.

PUB-ADM 422 Ethics for Nonprofit and Public Administrators Credits: 3

It is essential that organization and community leaders and managers understand the imperatives of ethical practice and ethical leader and manager behavior in nonprofit and governmental settings. Students are prepared to identify and assess the ethical implications of management and policy alternatives, to spot ethical issues before they become crises, and to competently and confidently develop and implement ethical decisions and actions in policy and practice. The ethical dimensions of democracy, political loyalty, pressure politics, interest group issues, pluralism, diversity and multi-cultural challenges, corruption and evil, honesty, the limits of ethical codes, whistle-blowing are included.

PUB-ADM 448 Leadership For Public Service Credits: 3

The two core purposes of this course are for students to learn about effective and ethical leadership, and for students to understand and develop their own capacity for leadership. The course is organized around three general themes: 1) leadership as relations with subordinates, including issues of work motivation; 2) leadership as lateral relations, including organizational politics and conflict management and resolution; and 3) leadership as influence in the organization's environment.

Prerequisites: Departmental consent.

PUB-ADM 455 Non-Profit Leadership Issues Credit: 1

Focusing on leadership issues in nonprofits, this course will explore issues in an intensive seminar format (fifteen class hours). Topics include building and renewing nonprofit boards, and the power of diversity in nonprofit organizations. Recommended for nonprofit management students.

PUB-ADM 455B Non-Profit Leadership Issues: Board-Staff Relations Credit: 1**PUB-ADM 487 Special Topics Credits: 3**

Special topics in public administration.

PUB-ADM 492 Creating and Measuring Social Impact Credits: 3

Students learn alternative approaches for conceptualizing and understanding the performance, effectiveness, and impact of nonprofit organizations and the programs they operate, and employ the basic frameworks and processes by which social impact can be measured and evaluated. This includes the use of logic models and theories of change to inform the design, operation, and evaluation of programs, with specific attention to data-based analytic approaches to impact assessment.

Prerequisites: Junior or senior standing.

PUB-ADM 493 Nonprofit Fundraising and Development Credits: 3

Examines the processes and functions by which nonprofit organizations plan, organize, implement and evaluate the work of fundraising and development to secure the financial resources needed to support and sustain their programs and activities. Students gain an understanding of and practical experience in employing the basic approaches and techniques used by nonprofits to raise and deploy philanthropic resources, including annual and multi-year giving programs, major gift solicitation, planned giving initiatives, capital campaigns, and prospect research and proposal writing.

Prerequisites: Junior or senior standing.

PUB-ADM 494 Leading and Managing Nonprofit Organizations Credits: 3

Examines the processes by which nonprofit charitable organizations and associations are governed, led, and managed, with particular attention to the work of the board, executives, and managers. Students learn a strategic framework by which to sustain and enhance the performance and impact of these nonprofit organizations. Among topics of special importance are the dimensions of governance, strategy and planning that are unique to nonprofit public service organizations, including stages of organization development, the planning and business model development associated with the financial management, human resource management, board leadership, ethical decision making, and organizational effectiveness and accountability.

Prerequisites: Junior or senior standing.

PUB-ADM 495 Voluntarism, Philanthropy & The Non-Profit Sector In The U.S. Credits: 3

Nonprofit organizations are omnipresent in our lives. They provide necessary social services to all sectors of society. They are important instruments of socialization. This course investigates this under-examined sector of our society. It looks to theoretical reasons for the sector, its empirical trends, and the significant challenges that it faces.

PUB-ADM 497 Special Topics In Public Administration Credits: 1-3

Study and research in areas of special interest under individual faculty direction.

Prerequisites: Departmental consent.

PUB-ADM 497B Special Topics In Public Administration Credits: 1-3

Public Health (PBHL)

Courses

PBHL 158 Public Health Principles Credits: 3

This course will introduce the student to the core functions of public health, the ten essential services, core public health competencies, and the difference between population-based and individual health services. Through case studies and practice-related exercises, students will examine current health trends and issues applying a public health perspective.

PBHL 245 Qualitative Research Methods for Public Health Credits: 3

This course explores the basics of qualitative research within public health and the community. The course will examine the definitions and methods of qualitative research. Research questions asked by qualitative researchers will be explored. The course will also introduce basics of qualitative research design, data collection, and qualitative analysis in public health. The relationship between qualitative and quantitative research, as well as mixed methods research, will be discussed.

Prerequisites: PBHL 158.

PBHL 335 Historical and Contemporary Issues in Public Health Credits: 3

This course examines the historical and present day roles and responsibilities of public health policy, practice, and professionals. Students will review and discuss successes and failures of public health practitioners and their impact on community health outcomes. Topics such as chronic, infectious and communicable diseases, urban crowding, environmental changes, immunizations, food production methods, increased global mobility, the persistence of poverty, mental health, and violence and injury prevention will be discussed.

Prerequisites: PBHL 158.

PBHL 358 Environmental Public Health Credits: 3

In this course, students will explore environmental factors affecting public health. Students will be introduced to public health and the food industry, vector control and disease, chemical and biological hazards found in the environment, and their impact on population health. During the course students will learn how environmental health policy decisions have the potential to impact the health of the population.

Prerequisites: PBHL 158.

PBHL 445 Core Competencies in Health Education Credits: 3

This course is designed to enforce the core areas of responsibility required to become a professional health educator. Course content will include the skills required to assess needs, assets and capacity for health education, plan, implement, and evaluate health programs, administer and manage health education programs, serve as a resource person, and communicate and advocate for health and health education. Students will begin preparing for the certification exam offered through the National Commission for Health Education.

Prerequisites: PBHL 158 (PBHL Major and Minor Students); HLSC 430 (PBHL Major Students).

PBHL 458 Communicable Disease Investigation Credits: 3

This course will introduce students to communicable disease control and investigation. Throughout the course, students will learn how to identify outbreaks, explore disease investigation tools, and identify disease causes. Students will investigate the spread of disease among humans, animals, and the environment. The history of disease containment, evolution of disease control, and specific interventions developed to protect the public will be explored.

Prerequisites: PBHL 158 and HLSC 410.

PBHL 490 Special Topics Credits: 1-9

A course of study in a special area of interest in public health sciences under individual faculty direction.

PBHL 496 Evidence-Based Public Health Capstone & Seminar Credits: 6

This course provides an experience-based capstone project for the senior student. Within the context of public health, the student will complete an evidence-based service learning, research, or problem-based project under the guidance of a site supervisor within the agency or organization, and a BSPH faculty member. The capstone will include a seminar session where students and faculty share learning, information, and understanding of their experience in a public health.

Prerequisites: Departmental consent.

Reading (EDRD)

Courses

EDRD 439 Language & Literacy across the Disciplines Credits: 3

Principles and application of disciplinary literacy in the middle and secondary classroom. Class will be primarily composed of discussion and lecture. As a part of the course, teacher candidates will inquire into and analyze disciplinary practices in 5-12 schools.

Prerequisites: Admission to teacher education program.

Real Estate (RL-EST)

Courses

RL-EST 321 Real Estate Principles Credits: 3

The student will be introduced to the very basics of real estate from the terminology, real estate's role in the economy, legal foundations, government controls, appraisal processes, valuation processes, brokering and closing transactions, time value of money, basic management issues and lease clauses, and basic standard form purchase contracts.

RL-EST 421 Real Estate Finance Fundamentals Credits: 3

This course will provide a fundamental understanding of basic financial concepts of real estate including compounding and discounting, construction of amortization tables and after-tax yield analysis for a simple real estate investment. It also touches on the basics of title insurance, ownership issues, fixed rate versus variable rate mortgages in residential real estate, understanding housing bubbles, and trends in valuation of residential real estate. In addition, the student will complete mathematical comparisons of leasing versus owning a home.

Prerequisites: ENT 301 or FIN 325.

RL-EST 425 Principles of Real Estate Property Management Credits: 3

Explores the complexities of managing apartments, condominiums, office buildings, industrial property, and shopping centers. This course covers rental markets, development of rental schedules, leasing techniques and negotiations, repairs and maintenance, tenant relations, merchandising, selection and training of personnel, accounting and owner relations.

RL-EST 496 Internship: Real Estate Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Internship coursework is evaluated on a credit/no credit basis.

Prerequisites: Departmental consent.

RL-EST 497 Special Topics: Real Estate Credits: 1-3

Study and research in areas of special interest under individual faculty direction.

Prerequisites: Departmental consent.

Religious Studies (RELIG-ST)

Courses

RELIG-ST 400 Special Topics In Religious Studies Credits: 1-3

Special topics in religious studies which are not offered regularly. The focus of the course varies by semester and instructor.

RELIG-ST 497RS Special Topics And Readings Credits: 1-6

Intensive reading and/or research in an area selected by the student in consultation with the instructor. May be repeated for credit when the topic varies.

Saxophone (SAXOPH)

Courses

SAXOPH 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit toward the major.

SAXOPH 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

SAXOPH 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

SAXOPH 101 Freshman Saxophone I Credits: 2-4

SAXOPH 101J Freshman Saxophone I (Jazz) Credits: 2-4

SAXOPH 102 Freshman Saxophone II Credits: 2-4

SAXOPH 102J Freshman Saxophone II (Jazz) Credits: 2-4

SAXOPH 201 Sophomore Saxophone I Credits: 2-4

SAXOPH 201J Sophomore Saxophone I (Jazz) Credits: 2-4

SAXOPH 202 Sophomore Saxophone II Credits: 2-4

SAXOPH 202J Sophomore Saxophone II (Jazz) Credits: 2-4

SAXOPH 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

SAXOPH 301 Junior Saxophone I Credits: 2-4

SAXOPH 301J Junior Saxophone I (Jazz) Credits: 4

SAXOPH 302 Junior Saxophone II Credits: 2-4

SAXOPH 302J Junior Saxophone II (Jazz) Credits: 4

SAXOPH 401 Senior Saxophone I Credits: 2-4

SAXOPH 401J Senior Saxophone I (Jazz) Credits: 4

SAXOPH 402 Senior Saxophone II Credits: 2-4

SAXOPH 402J Senior Saxophone II (Jazz) Credits: 4

Sociology (SOCIOL)

Courses

SOCIOL 101 Sociology: An Introduction Credits: 3

An introduction to the study of society and the basic concepts of sociology.

SOCIOL 101 - MOTR SOCI 101: General Sociology

SOCIOL 201 Introduction To Social Psychology Credits: 3

Exploration of the relationships between human behavior and social context. The course focuses on how realities are socially constructed and sustained, the role of symbol systems, definitions of the situation, the self as a product of interaction, and the relationship between language, thought and culture.

SOCIOL 203 Social Problems Credits: 3

An examination of major social problems of modern Western society, including issues of racial conflict, war, civil rights, youth movements, the mass media, urban poverty, and crime. The topics will vary from year to year depending upon the instructor.

SOCIOL 211 Social And Psychological Development Through The Life Cycle Credits: 3

A survey of significant psychosocial issues, events and crises throughout the human life span. The life cycle of the family is examined as the primary context within which individual development occurs. Although the primary emphasis will be on normal adjustment and development, attention will also be given to the occurrence of special problems and deviations at each life stage.

SOCIOL 300 Special Topics in Sociology Credits: 1-3

Each time this course is offered, a different area of sociology, to be announced, will be given. On demand.

SOCIOL 300A Special Topics In Sociology Credits: 1-3

Each time this course is offered, a different area of sociology, to be announced, will be given.

SOCIOL 302 Social Stratification Credits: 3

The distribution of power, privileges and prestige are examined in a historical and comparative perspective. The process whereby distribution systems develop, become institutionalized, and become transformed are analyzed.

SOCIOL 306 Culture, Emotion, and Identity Credits: 3

This course introduces students to some of the key theoretical perspectives and debates within the field of psychological anthropology. By drawing upon cross-cultural studies of emotion, personhood, sexuality, illness, and consciousness it seeks to understand some of the ways that culture and society influence human psychology and experience.

SOCIOL 310R Families And The Life Course Credits: 3

This course is an upper level introduction examining the sociological, historical, and social psychological research on the family, focusing primarily on the United States. The course examines families of varied ethnicity, as well as family compositions at different stages of the life course. Emphasis is placed on the interdependence of family members, as well as how society and policy influence the family.

SOCIOL 313R Sociology Of Gender Credits: 3

This course is an introduction to the sociological study of gender in contemporary U.S. society. Special attention is directed to how gender is experienced inter-sectionally with other social categories, including social class, race, sexuality, and age.

SOCIOL 316 Sociology Of Death And Dying Credits: 3

Examination of attitudes, behaviors and institutions related to death and dying in contemporary American society. Topics include the status of death in American society, effects of the setting on dying, interaction with the dying, funeral practices, bereavement customs, surviving spouse, and suicide.

SOCIOL 317 Policies Of Drug Use And Control Credits: 3

Utilizing both historical and contemporary information, this course provided an assessment of the "drug problem" in the U.S. and policies of control developed in response to the problem. Drug use criminalization, legalization, medical treatment and prevention strategies and related issues are considered in regard to scientific knowledge related to the patterns, causes and impact of substance abuse.

SOCIOL 320 Social Deviance Credits: 3

The dominant sociological perspectives on deviance will be discussed with special attention given to the processes that define behavior and persons as deviant and the impact of such definitions on social relationships and identity.

SOCIOL 322 Race And Ethnic Relations Credits: 3

The nature, origin and dynamics of ethnic and race relations in the U. S. and other societies. Specific attention will be given to the historical and contemporary contexts of prejudice discrimination and confrontation.

SOCIOL 326 Consumer Society Credits: 3

This course explores the emergence of Consumer Society as both a sociohistorical development and as an object of social scientific inquiry. Students will explore how the study of Consumer Society has been animated by different scholarly questions, debates, and analytic approaches.

SOCIOL 328 Body and Society Credits: 3

Body and Society is an interdisciplinary and comparative approach to the study of the body as the subject and object of social processes. Interdisciplinary approaches to topics such as meaning, ritual, performance, and practice will provide a framework for classical as well as contemporary explorations of bodily representation and experiences across a variety of cultural contexts.

Prerequisites: ANTHRO 103.

SOCIOL 332 Sociology Of Political Life Credits: 3

The concept of power, community power structure and decision making. The social basis of liberal democracy; consensus and legitimacy; political stability and instability. Power and politics in a mass society; elites and masses; democracy and oligarchy; alienation; bureaucracy; pluralism and totalitarianism. Ideology and social movements.

SOCIOL 337 Community Development In Urban America Credits: 3

The focus in this course is on experiential learning in which the student participates in several urban community development projects that allow for learning about collaboratives, networking, problem-solving, and requisite skills to successfully manage a project. Principles of community development are presented to give the student background for understanding the projects visited.

SOCIOL 348 Latinx Immigrants, Migrants, and Refugees in the U.S Credits: 3

This course addresses the culture of societies of U.S. citizens, immigrants, and refugees of Latin American heritage living in the U.S. The course emphasizes recent anthropological, historical, cultural, and sociological studies.

SOCIOL 357 Social Movements Credits: 3

This course focuses on the link between social movements and political change in the modern world. Social movements arise outside official channels and against established political orders. Students will develop an understanding of the relation between social mobilization and institutional change in various countries, especially in the United States.

SOCIOL 358 Culture and Society Credits: 3

This course examines the "culture concept" at the heart of the contending theories of society, which is used to describe a society or way of life, a whole social order, or particular aesthetic styles and objects. The course links these various topics together in a concluding section on culture in the age of the Internet and globalization.

SOCIOL 359 Media and Society Credits: 3

This course examines the rise, development and change of mass media in American society from broadsheets and news flyers through contemporary media formats.

SOCIOL 361 Social Theory Credits: 3

A survey of the major orientations in social theory, their historical development, and contemporary issues and controversies in social theory. Recommended preparation: A course in social science.

SOCIOL 362 Methods Of Sociological Research Credits: 3

Experimental and observational schemes; survey analysis; interview and questionnaire designs; scaling techniques; sampling. Recommended preparation: A course in Social Science.

SOCIOL 363 Introduction to Statistics in Sociology/Criminal Justice Credits: 3

A first course in the statistical analysis of quantitative data. Course emphasizes descriptive statistics, probability theory, parameter estimation, bivariate hypothesis testing, and computer applications.

Prerequisites: MATH 110 or higher, or STAT 115 or MOTRMATH 110.

SOCIOL 380 Technology and Society Credits: 3

This course will help students explore the ways technology shapes and is shaped by human interaction. Students will read interdisciplinary literature that builds theoretical and interpretive frameworks around classical and contemporary case studies. A fundamental question to be addressed throughout the course: how does the comparative study of technology help us understand what it means to be human?

SOCIOL 390R Directed Field Experience I Credits: 1-6

The student will work within one or more social agencies or organizations in the city under the joint supervision of a professional within the organization and a member of the Sociology Department. In-class discussion will cover the major problems of social organization.

SOCIOL 391 Directed Field Experience II Credits: 1-6

A continuation of SOCIOL 390R.

SOCIOL 397 Independent Readings In Sociology Credits: 1-3

Intensive readings in an area selected by the student with prior consultation with instructor. Recommended preparation: Twelve hours of sociology coursework.

SOCIOL 398 Independent Research In Sociology Credits: 1-6

Intensive research in an area selected by the student with prior consultation with instructor.

Prerequisites: Twelve hours of sociology.

SOCIOL 404WI The Sociology Capstone: Senior Seminar Credits: 3

This seminar explores the interrelationships between sociology theory, research methods, and statistics. It may focus on major contemporary issues building on and integrating knowledge obtained in previous courses. Recommended preparation: SOCIOL 362.

Prerequisites: SOCIOL 363.

SOCIOL 410R Aging In Contemporary Society Credits: 3

Attitudes and stereotypes, the status of the aged in American society; the social psychology of the aging process; the response of societal institutions such as the family and political system to the aging of the population as a whole. Applications and potentials of research are considered.

SOCIOL 411 Sociology Of Human Sexuality Credits: 3

A cross cultural examination of the most fundamental dichotomy in human society: male and female. Considering sex both as a biological and social category, this course compares diversity and similarity in the interrelationships of male and female in patterns of behavior and social organization found in human societies across time and space.

SOCIOL 418 Feminist Theories Credits: 3

This class introduces the major feminist theories and their primary authors over the last 200 years. The class takes both a historical view (beginning with two millennia of male-centered theories about women) and a conceptual approach (theories are grouped by common ground) and familiarizes the student with both the historical processes that necessitate feminist theories as well as with the breadth and depth of the historically and currently available scholarship.

Prerequisites: WGS 201.

SOCIOL 431 Social Organization Of The City Credits: 3

An examination of the social structure of the American city with special reference to the historical development of American cities. Attention will be focused on the role of social institutions as they have changed in relation to urban problems.

SOCIOL 433 Immigration and the City Credits: 3

This course examines key issues and controversies in immigration research. Special attention will be paid to the social, economic, and historical developments of urban immigrant communities.

SOCIOL 434 Spatial Thinking in Social Science Credits: 3

This course will review ways in which social scientists have incorporated the concepts of space, place, and distance into their theories and research. Readings will be drawn from interdisciplinary work in the areas of urban sociology, criminology, health and demography that deal with spatial organization of communities and cities, spatial disparity of health and crimes, and mobility.

Prerequisites: junior, senior, or graduate standing.

SOCIOL 440R Sociology Of Medicine Credits: 3

Relationship of basic concepts in sociology to health and medical care. Cultural and class variations in health status. Social and cultural aspects of health. Recommended preparation: A course in social science.

SOCIOL 441 Globalization and Development Credits: 3

Focuses on issues of economic development, social stratification, political institutions, and political mobilization in societies where colonialism provided the context for their long-term disadvantages in the international economic order. Specific attention is paid to the intersection of the international components that define the options and limits for societal development (e.g., market shifts, international institutions and contracts, foreign policies, and migration) and the distinct social, political and cultural implications of these factors for developing societies.

Spanish (SPANISH)

Courses

SPANISH 110 Elementary Spanish I Credits: 3

The goals of this course are an ability to speak and to understand simple (spoken) Spanish as well as to read and write simple prose.

SPANISH 110 - MOTR LANG 103: Spanish I

**SPANISH 120 Elementary Spanish II Credits: 3**

Continuation of SPANISH 110.

SPANISH 120 - MOTR LANG 104: Spanish II

**SPANISH 211 Second Year Spanish I Credits: 3**

Further development of comprehension and communicative skills in the language. Readings of moderate difficulty and grammar review. Practice in writing. The goal is attainment of intermediate proficiency in the language.

SPANISH 216 Spanish For The Health Sciences Credits: 3

This course will enable the student to converse with Hispanic patients and/or hospital personnel in situations such as admissions, patient care, lab work as ordered by a physician or dentist, emergency room procedures, etc. In addition, medical readings in Spanish will give professional and paraprofessional students an increased vocabulary related to the many fields within the health sciences. This course will satisfy one semester of the AS language requirement.

SPANISH 221 Second Year Spanish II Credits: 3

Continuation of SPANISH 211.

SPANISH 280 Special Intermediate Spanish Topics I Credits: 1-4

Instruction of Spanish on the second-year/intermediate level introducing new methods of foreign language teaching or special texts and topics not normally offered through regular courses.

SPANISH 290 Special Intermediate Spanish Topics II Credits: 1-4

Continuation of SPANISH 280.

Prerequisite: SPANISH 221.

SPANISH 301 Introduction to Literary Studies Credits: 3

Emphasis will be placed on the study of literary theory and the philosophical ideas behind the literary movements, their relations and differences. A representative work or works of each genre will be thoroughly studied and analyzed. Critical reports will be written about different features of the literary works under consideration. Strongly recommended for all majors, to be taken before 400-level literature courses.

Prerequisites: SPANISH 221.

SPANISH 315 Intermediate Conversation And Composition I Credits: 3

Grammar review, practice in speaking and writing Spanish; emphasis on idiomatic usage and practical vocabulary. Required for major.

Prerequisites: SPANISH 221.

SPANISH 316 Spanish for Health Sciences II Credits: 3

The purpose of this class is to progressively develop the ability to communicate well with native speakers in a medical setting. Communicative and cultural goals are achieved through listening, speaking, reading and writing in the Spanish language.

Prerequisites: SPANISH 216 or SPANISH 221.

SPANISH 325 Intermediate Conversation And Composition II Credits: 3

Continuation of SPANISH 315. Required for major.

Prerequisites: SPANISH 221.

SPANISH 351 Latin American Civilization Credits: 3

Historical development of Latin America. Readings from representative literary works.

Prerequisites: SPANISH 221.

SPANISH 365 The Search for Mexican Identity Credits: 3

The goal of the course is to familiarize the student with the poignant search for self awareness and definition witnessed in the letters and fine arts of Mexico in the 20th-century. Readings will include works by Vasconcelos, Reyes, Ramos, Paz, Rulfo and Fuentes, and will be complemented by slide presentations of pertinent works by major artists.

Prerequisites: SPANISH 221.

SPANISH 374 Spanish Literature and Culture II Credits: 3

A study of the development of Spanish peninsular literature and cultures from 1700 to present.

Prerequisites: SPANISH 221.

SPANISH 380 Special Topics Credits: 1-3

Treatment of a particular genre or area of literature or language normally not offered through regular courses. May be repeated for credit when the topic changes.

SPANISH 384 Spanish American Literature and Cultures II Credits: 3

The 19th and 20th-centuries. Selected readings from prose and poetry of Spanish-American writers.

Prerequisites: SPANISH 221.

SPANISH 403 History of the Spanish Language Credits: 3

An introduction to the history of the Spanish language from Latin to the present, with an overview of dialects in the Peninsula and in the Americas.

Prerequisites: SPANISH 315 or SPANISH 325.

SPANISH 414 Early 20th Century Peninsular Literature Credits: 3

Selected topics in early 20th century Spanish literature and culture. May be repeated for credit when the topic changes.

Prerequisites: SPANISH 315 or SPANISH 325.

SPANISH 415 Advanced Conversation And Composition I Credits: 3

Continued practice in speaking and writing Spanish, with attention to the elements of style. Continued in SPANISH 425. First semester required of all majors and second semester recommended. Both semesters required of prospective high school teachers. Either or both semesters may be repeated with the consent of the instructor and the Spanish section head. No more than six hours credit may be applied towards a degree.

Prerequisites: SPANISH 315 or SPANISH 325.

SPANISH 425 Advanced Conversation And Composition II Credits: 3

Continuation of SPANISH 415. See SPANISH 415. Required for teacher certification in Spanish.

Prerequisites: SPANISH 315 or SPANISH 325.

SPANISH 426 Golden Age Spanish Literature Credits: 3

Selected readings in Spanish Golden Age literature and culture. May be repeated for credit when the topic changes.

Prerequisites: SPANISH 315 or SPANISH 325.

SPANISH 427 Pre-Columbian And Spanish Colonial Literature Credits: 3

A study of the pre-Columbian works in drama, narrative, and poetry (Popol Vuh, Apu-Ollantay, Incan and Aztec poetry) leading into a survey of Spanish-American colonial literature.

Prerequisites: SPANISH 315 or SPANISH 325.

SPANISH 428 Contemporary Spanish Poetry Credits: 3

A comprehensive and intensive study of 20th-century Spanish poetry. Poets and poetry will be studied in the light of literary movements, foreign influences, political tendencies and philosophical ideas.

Prerequisites: SPANISH 315 or SPANISH 325.

SPANISH 436 Spain's Transition to Democracy: Literature and Film Credits: 3

This course reviews the cultural production between the death of Francisco Franco in 1975 and the entrance in the European Union in film, literature and music, within its historical and political context.

Prerequisites: SPANISH 315 or SPANISH 325.

SPANISH 453 Spanish-American Short Story Credits: 3

A study of Spanish-American short stories from Romanticism to the present.

Prerequisites: SPANISH 315 or SPANISH 325.

SPANISH 480 Special Topics Credits: 1-3

Each time this course is offered a particular genre or area of literature will be treated. Topics will be announced in advance. May be repeated for credit when the topic changes.

Prerequisites: SPANISH 315 or SPANISH 325.

SPANISH 490 Special Readings Credits: 1-3

Intensive readings in field or literary figure to be selected by the student in consultation with the instructor. Available, by permission only, to advanced students of Spanish; available only when student cannot take regularly scheduled courses.

Prerequisites: SPANISH 315 or SPANISH 325.

SPANISH 499 Senior Seminar (Capstone) Credits: 3

Required for major. Covers seminal works of Peninsular and Latin American literature in their historical and cultural context. Course content varies, but will include such elements as geography, politics, folklore, history of the language, architecture, art and music. To be taken during final Fall Semester of residence.

Prerequisites: SPANISH 315 or SPANISH 325.

Special Education (EDUC-SP)

Courses

EDUC-SP 407 Educating Exceptional Children And Youth Credits: 3

An introductory course in special education concerning issues, theories, and practices for educating the exceptional student in both general and special classrooms or settings; identification and educational intervention procedures for children and adolescents with exceptionalities, including behavior disordered; learning disabled, mentally retarded, speech impaired; visually impaired, physically impaired, hearing impaired, multihandicapped and gifted.

Statistics (STAT)

Courses

STAT 115 Statistical Reasoning Credits: 3

This course is intended for majors in less quantitative fields. The focus of the course will be on developing critical thinking abilities and decision making using data in everyday life. Emphasis will be on statistical reasoning underlying the methods of sampling, statistical inference in terms of evaluating the accuracy of an estimate in the context of uncertainty, drawing conclusions from data and studying relationships in data. Students will be trained to perform hands-on-analysis of real data sets using a computer package. No previous computing experience is required.

STAT 115 - MOTR MATH 110: Statistical Reasoning

**STAT 235 Elementary Statistics Credits: 3**

An introduction to descriptive and inferential statistics. Organization and presentation of data, averages and variations, elementary probability, random variables, special discrete distributions, normal distributions, sampling distributions, point estimation, confidence intervals, and hypothesis testing.

Prerequisites: MATH 110 with a grade of C- or higher; or MATH 120 or higher with a grade of C- or higher; or ALEKS Score of 61 or higher.

STAT 436 Introduction To Mathematical Statistics I Credits: 3

This course is the first of a calculus-based statistics sequence. It begins with basic concepts of probability, discrete and continuous distributions, expectation and variance, and ends with the central limit theorem. Recommended preparation: MATH 301 or COMP-SCI 191.

Prerequisites: MATH 220.

STAT 441 Introduction To Mathematical Statistics II Credits: 3

Sampling Distributions; point estimation; internal estimation; hypothesis testing; analysis of variance; nonparametric methods; statistical software applications; topics in Applied Statistics.

Prerequisites: STAT 436.

STAT 480 Statistical Models in Actuarial Science Credits: 3

This course covers the statistical foundation of actuarial models and their applications. Topics include survival and severity models, Kaplan-Meier and Nelson-Aalen estimators, aggregate and credibility models for insurance losses, discrete time Markov chains, ruin theory, and simulation.

Prerequisites: STAT 441.

STAT 482 Statistical Models for Life Contingencies Credits: 3

The basic statistical theory of actuarial models for life uncertainties such as time of death. Multiple life and multiple decrement models, statistical models for life and contingent insurance; last survivor, disability, withdrawal, retirement and reserving models for life insurance.

Prerequisites: STAT 441.

STAT 496 Internship/Practical Training in Mathematics or Statistics Credits: 1-3

This course provides an internship or other practical training arrangement using mathematics or statistics in an industrial, academic or other professional setting. Department approval of internship experience or practical experience required. Repeatable with up to a combined 3 credits toward the major. Recommended preparation: MATH 250.

String Bass (STR-BASS)

Courses

STR-BASS 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit toward the major.

STR-BASS 100B Applied Study Of A Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

STR-BASS 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

STR-BASS 101 Freshman String Bass I Credits: 2-4**STR-BASS 101J Freshman St Bass I (Jazz) Credits: 2-4****STR-BASS 102 Freshman String Bass II Credits: 2-4****STR-BASS 102J Freshman St Bass II (Jazz) Credits: 2-4****STR-BASS 201 Sophomore String Bass I Credits: 2-4****STR-BASS 201J Sophomore St Bass I (Jazz) Credits: 2-4****STR-BASS 202 Sophomore String Bass II Credits: 2-4****STR-BASS 202J Sophomore St Bass II (Jazz) Credits: 2-4****STR-BASS 300 Studio Class Credits: 0**

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

STR-BASS 301 Junior String Bass I Credits: 2-4

STR-BASS 301J Junior St Bass I (Jazz) Credits: 4

STR-BASS 302 Junior String Bass II Credits: 2-4

STR-BASS 302J Junior St Bass II (Jazz) Credits: 4

STR-BASS 401 Senior String Bass I Credits: 2-4

STR-BASS 401J Senior St Bass I (Jazz) Credits: 4

STR-BASS 402 Senior String Bass II Credits: 2-4

STR-BASS 402J Senior St Bass II (Jazz) Credits: 4

Teacher Education (TCH-ED)

Courses

TCH-ED 130 Number Systems and Related Topics Credits: 3

This course is designed for elementary preservice teachers to meet certification requirements for a course in number theory. The course provides a constructive development of the real number system, introduces concepts from elementary number theory and applies this knowledge of quantitative systems to solve various types of problems. Recommended preparation: High School Algebra and Geometry.

TCH-ED 140 Geometry for Elementary Teachers Credits: 3

This course is designed for elementary preservice teachers to meet certification requirements for a course in geometry. It provides a constructive development of axiomatic geometry and introduces concepts from transformation geometry. Elements of spatial sense and measurement are included and an emphasis is placed on applying this knowledge to solve various types of problems. Recommended preparation: High School Algebra and Geometry.

TCH-ED 150 Foundations of Urban Education Credits: 3

This course is designed to introduce students to the social and philosophical issues in urban education and will include an emphasis on culture, race, class, and ethnicity as they relate to schooling in urban America.

TCH-ED 151 Introduction to Urban Education Field Experience Credits: 2

Introduction to Urban Education Field Experience. The field experience is intended to give students an opportunity to see the application of learning theory in authentic classroom situations. Students are encouraged to become involved in the learning of the classroom and provide a helping hand to the teacher.

TCH-ED 152 Urban Education Seminar 1: Social Justice Credits: 2

Introductory seminar to the field of urban education. This seminar aligns with the other fall semester experiences and allows students an opportunity to dialogue about the possible application of their experience work as it applies to teaching in an urban school. Students will be introduced to current topics in education and society; identify, develop and enhance study strategies; observe, listen and think critically, sharpen writing skills; and work effectively in groups.

TCH-ED 153 Math Methods for Urban Education teachers: Number Systems Credits: 2

Designed for elementary school teacher. A constructive development of the real number system beginning with the system of whole number, concepts for the elementary number theory; applications of quantitative systems to problems in discrete mathematics.

TCH-ED 160 Introduction to Teaching Credits: 3

Introduction to the historical, social and philosophical dimensions of teaching. Prospective teacher candidates gain greater insight into the commitment, purpose, and responsibility associated with professional teaching practice. Particular focus is place on productive teaching practices and the habits of mind of expert teachers.

TCH-ED 201 Children's Literature Credits: 3

This course emphasizes the critical analysis and selection of a variety of genres of multicultural children's literature in order to create "windows and mirrors" (Bishop, 1990) through literature for diverse educational settings. It will emphasize the skills and dispositions needed to share literature with culturally and linguistically diverse groups of children and explore prevalent myths and stereotypes in society that are often reflected in children's and young adult literature.

TCH-ED 202 Literature for Adolescents Credits: 3

Focus upon literature for adolescents and ethnic literature, specifically, and upon the special reading interests of the adolescent in relation to the methods and materials of reading in grades 6-12, generally. Attention to literature selection standards, censorship, individualized instruction, and literary theory.

TCH-ED 203 Health, Safety, and Nutrition in Early Childhood Education Credits: 3

This course is an introduction to wellness in Early Childhood Education grounded in cultural funds of knowledge and community histories of learners and their families. Students examine and act upon systemic inequities related to health, safety, and nutrition; investigate scheduling, procedural, and policy elements related to health, safety, and physical activity/rest; design space elements that nurture physical development, social interactions, and emotional well-being; and create learning experiences that promote health and physical development.

TCH-ED 251 Child and Adolescent Development for Urban Educators Credits: 3

This course is designed to provide students with the information they will use as educators to design developmentally appropriate practices for the children they will work with in the classroom setting, thus discussions about how the information is translated into the classroom will be applied.

TCH-ED 252 Field Exp: Child/Adolescent Development Credit: 1

This field experience is designed in conjunction with TCH-ED 251 to provide students with real-world interactions to study the development of children from birth to adolescence. Field experience settings have been arranged to provide students with an opportunity to observe and interact with children as they study the four stages of development.

TCH-ED 253 Urban Education Seminar II: Social Justice Credit: 1

This seminar aligns with the other semester experiences and allows students an opportunity to dialogue about the possible application of their experience work as it applies to teaching in an urban school. Students will be introduced to current topics in urban education and society; identify, develop and enhance study strategies; observe, listen and think critically, sharpen writing skills; and work effectively in groups as they explore social justice and the relationship between society and schools.

TCH-ED 254 Math Methods for Urban Teachers: Geometry Credits: 2

Designed for elementary school teachers. A constructive development of geometry and concepts from elementary teacher education; applications will be made to connect with elementary curriculum.

TCH-ED 255 Intergrated Music and Visual Arts Credits: 3

Basic principles of creativity and their application in the multicultural teaching of art, creative dance and musical and rhythmic interpretation will be explored. An emphasis is placed on interrelationship of these disciplines and their integration into the curriculum. Special emphasis will be placed on helping students to develop a wider and more respectful understanding of our nation's cultural diversity as reflected in all art forms. Students will be exposed to the literature, poetry, theater, visual art and music contributed by African-Americans, Hispanic Americans and Native Americans among other.

TCH-ED 256 Field Experience: Music and Visual Arts Credit: 1

The field experience is intended to give students an opportunity to see the application of learning theory and integration of the arts in authentic classroom situations.

TCH-ED 258 Math Methods for Urban Teachers: Probability and Statistics Credits: 2

Designed for Elementary and Middle School Teachers. This course is designed to provide undergraduate students in elementary and middle school mathematics with the foundational knowledge of the teaching of probability and statistics and how to use the elements of statistics to interpret and solve problems in elementary and middle school classrooms.

TCH-ED 259 Introduction to Urban Teaching Credits: 3

This course is designed to introduce students to the sociopolitical context of urban education, schooling, teaching and learning. It will provide an overview of education in a multicultural democracy, mostly African Americans, Latino Americans, and other racial/ ethnic groups and immigrants. Specifically, it will introduce students to the notion of teaching for social justice, the social justice teacher and social empowerment. Opportunities will be provided for students to review research, debunk stereotypes, negative views, and to recognize urban learners as capable, motivated, and resilient. The ultimate goal of this course is to facilitate experiences that will enable students to develop the knowledge, skills and dispositions needed for learning in urban schools.

TCH-ED 265 Field Experience: Urban Teaching Credit: 1

As a co-requisite to Introduction to Urban Teaching, students will spend 60 hours in urban schools working with diverse student populations, specifically; students will work with African Americans, Latino Americans, and English Language Learners grades K-8. Reflection and discussion of clinical experiences will occur during the urban education seminar and Introduction to urban education classes. Students will keep a reflective journal of their experiences working with diverse learners.

TCH-ED 266 Urban Education IV: Classroom Management Credit: 1

This course will present the foundations for developing expertise in classroom management. Theory and activities will introduce students to strategies and procedures to manage student's behavior as well as keep them on task throughout the school day. The intent of this course is to provide the prospective teacher with the skills and the expertise necessary to manage the classroom behavior of students effectively while creating a caring and supportive atmosphere.

TCH-ED 300 Summer Community Experience Credits: 3

This course provides an in-depth examination into both the evolution of ghetto communities and dynamics of community building in inner cities, with special emphasis on Kansas City, Missouri. In addition, theories of educational psychology as well as child and adolescent behavior will be infused to assist participants in developing age appropriate mentoring/teaching strategies and activities.

TCH-ED 310 Classroom Climate and Organization Credits: 3

This course is focused on understanding classroom practices that support student cognitive and social development, that supports learning for students from diverse cultural and experiential backgrounds; and developing a well-organized, attractive and functional physical space for learning.

TCH-ED 311 Curriculum and Learning Theory Credits: 4

Focus on classroom organization, building relationships with students, and applying theoretical knowledge of child development to the analysis of contexts impacting students' educational experiences. Classroom processes and teacher interactions that undergird effective instruction and proactive classroom management.

TCH-ED 312 Legal and Ethical Aspects of Teaching Credits: 3

This course provides an introduction to landmark court cases, federal and state laws, and regulations that frame students' and teachers' rights and responsibilities and that provide guidance for ethical professional practices.

TCH-ED 314 Cultural Diversity and Teaching English Language Learners Credits: 3

Foundational knowledge on teaching diverse populations and practical instructional approaches for meeting the needs of linguistically and culturally diverse learners. Emphasis on studying and applying instructional strategies that are appropriate for addressing the unique needs of children whose primary language may not be English.

TCH-ED 315 Assessment and Data Literacy Credits: 3

Data collection and assessment strategies—including formative, summative, formal, and informal—to be used in developing student learning profiles, planning learning experiences, and monitoring student progress toward academic goals. Topics include the impact of assessment on equitable education for diverse learners, critical observation and questioning, basic qualitative and quantitative data analysis, working with data teams, collaboration/communication with families and other educational stakeholders, setting and monitoring learning goals, and the ethics of data collection and sharing.

TCH-ED 316 Reading and Language Arts I Credits: 4

This course emphasizes learning theories and methods for teaching and assessing literacy. It will primarily focus on the components of a culturally responsive literacy curriculum for elementary students in diverse, urban contexts. This course is field-based and there will be multiple opportunities for observing, teaching, and assessing elementary school children.

Co-requisites: TCH-ED 397.

TCH-ED 317 Reading and Language Arts II Credits: 4

This course emphasizes methods for elementary literacy instruction and assessment. The course will primarily focus on the components of a culturally responsive writing curriculum for elementary students in diverse, urban contexts. This course includes a supervised field experience where teacher candidates implement literacy assessment and instruction with students.

Prerequisites: TCH-ED 316.

TCH-ED 318 Literacy Assessment and Instruction Credits: 3

Focus on using formal and informal assessments to design appropriate literacy instruction for diverse learners in urban elementary classrooms.

TCH-ED 330 Analyzing Learning Environments in Urban Contexts Credits: 3

This course serves as the major vehicle for articulating a programmatic construction of classroom management as establishing productive learning environments, facilitating social interaction, and planning relevant and engaging learning experiences based upon deep knowledge of individual students' contexts and cultures.

Co-requisites: TCH-ED 422.

TCH-ED 333 Learning Environments: Birth to Grade 3 Credits: 3

Course provides an analysis of learning environments (community, school, and classroom) as socio-emotional and physical spaces that nurture learning and development of early childhood learners in urban settings. Teacher candidates use the analysis to frame the design of learning environments as context and content of meaning making.

TCH-ED 350 Multi-Media Production For The Classroom Credit: 1

An introductory course in the media production techniques involving knowledge and practical use of computers, scanners, digital video, digital audio and graphics to create professional multimedia for use in the classroom. The class is designed for prospective and current classroom teachers.

TCH-ED 351 Literature for a Lifetime Credits: 6

This course will provide students with an encompassing survey of fiction and non-fiction literature appropriate for all age ranges from the young child to adult. Lectures and discussions will focus on the value of literature as a tool for thinking, as a way of illuminating modern life, as a means of understanding history and human behavior, and as a source of aesthetic pleasure and lifelong enjoyment. Students will learn how to select and critique both the media used in illustrated books and the literacy techniques and forms of the many genres of literature. In this course special emphasis will be placed on literature that reflects life in many cultures and periods of history, in particular from those racial and ethnic sources that make modern America such a pluralistic and diverse society. There will also be an emphasis on the universal themes that run through literature of the societies.

TCH-ED 365 Seminar in Teacher Identity, Power and Privilege Credit: 1

Focus on developing teacher candidates' knowledge of themselves and their roles in facilitating learning for diverse student populations. Acquaints pre-service teachers with three areas of multicultural education: knowing one's self, knowing diverse student populations, and knowing effective practices which will accelerate the learning of the diverse student populations.

TCH-ED 366 Field Experience: Literacy Credit: 1

Students will spend 100 hours working in an urban school classroom. Students will have the opportunity to apply learning and lessons designed in the semester's pedagogical courses, particularly Integrated Instruction: Language Arts and Social Studies. Students will work with their seminar leader, having the opportunity to be observed and conference about their teaching.

TCH-ED 385 Teaching and Learning with Technology Credits: 3

This course addresses the fundamentals of using technology in education and planning instruction to engage PK-12 students in problem solving and critical thinking using technology. Topics within the course are informed by International Society for Technology in Education Standards (ISTE), InTASC Model Core Teaching Standards and Learning Progressions for Teachers 1.0, Missouri Teacher Standards and Quality Indicators, and Missouri Learning Standards.

TCH-ED 396 English Language Study for Middle and High School Teachers Credits: 3

Explores the fundamentals of teaching English language and grammar study, emphasizing patterns in the English language including sounds, words, sentences, meaning, and discourse as they are manifested in daily lives. Educationally relevant topics, such as applications of sociolinguistics to the teaching of English language and literature, varieties of grammar, and linguistic descriptions of styles and registers are an integral part of the course.

TCH-ED 397 Practicum I - Elementary Credit: 1

The overarching goal for this introductory field experience is to help teacher candidates shift their perspectives from that of a student to that of a classroom teacher. Emphasis is on observing the relationship among students' experiences within and outside of school, and planning specific learning experiences for academic and social growth and development. Additionally, teacher candidates attend to the individual student's responses to learning experiences, as well as the social dynamic among students as they work together in a classroom.

TCH-ED 398 Practicum II – Elementary Credit: 1

This field experience is part of Block 2—the second field experience within a four-block sequence. The overarching goal is for teacher candidates to observe the implementation of the school curriculum in specific disciplines. Topics include the structure of the discipline, interrelatedness among basic concepts, discipline specific practices, and the design of instruction to facilitate deep learning.

Prerequisites: TCH-ED 397.

TCH-ED 399 Continuous Enrollment Credit: 1

A practicum experience for students delaying student teaching for one semester.

TCH-ED 400 Child Development Credits: 3

Intellectual and social development from birth through adolescence and their implications for the educative process.

TCH-ED 402 Integrated Arts Credits: 3

Basic principles of creativity and their application in the multicultural teaching of art, creative dramatics, creative movement and musical rhythmic interpretation will be explored. An emphasis will be placed on the interrelationship of these disciplines and integration into the curriculum.

TCH-ED 403 Educational Psychology Credits: 3

This course will provide an introductory examination of psychological research and theory which have implications for, and applications to learning and instruction in interactive social contexts, such as classrooms.

TCH-ED 404 Education of the Exceptional Child and Youth Credits: 3

Students will be introduced to identification and educational intervention strategies for educating exceptional children and adolescents in inclusive classroom situations. This course requires a 10-hour field experience.

TCH-ED 405 Practicum I Credit: 1

Taken in conjunction with elementary and middle school methods courses. Students are expected to spend 60 hours at classroom sites throughout the semester.

TCH-ED 406 Practicum II: Elementary Credit: 1

Taken in conjunction with elementary courses. Students are expected to spend 60 hours at classroom sites during the semester.

TCH-ED 407 Practicum III - Elementary Credit: 1

Taken in conjunction with the elementary courses. Students are expected to spend 60 hours at classroom sites during the semester.

TCH-ED 408WI Advanced Foundations Credits: 3

The course will concentrate on the development of a philosophical, historical and social model to assist in understanding the complexities, strengths and problems of present day education.

TCH-ED 409 Curriculum and Assessment Credits: 3

Curriculum and Assessment is the first of a three-part course sequence designed to assist the preservice teacher in acquiring the knowledge and skills to become an effective practitioner in a world of constant change. The preservice teacher in turn will become a professional educator and facilitator of learning by developing an understanding of the varied roles and relationships that are an integral part of the teaching/learning process. This course focuses on the meaning of curriculum, the role of standards in curriculum design and implementation, the role of assessment is used to effectively enhance instruction and student learning.

TCH-ED 410 Teacher in the Classroom Credits: 2

This is the second of a three-part sequence designed to assist the preservice teacher in acquiring the knowledge and skills to become an effective practitioner in a world of constant change. The preservice teacher in turn will become a professional educator and facilitator of learning by developing an understanding of the varied roles and relationships that are an integral part of the teaching/learning process. It is designed to assist preservice teachers in not only make the transformation from to student to professional educator, but also in developing the knowledge, management, and reflective skills to implement a well-planned and effective curriculum that meets the needs, interests challenges and lives of students who live in and will function in an increasingly culturally diverse, democratic society in an interdependent world.

TCH-ED 412 Language Arts in the Elementary and Middle School Credits: 3

Provides instruction in planning, implementing and assessing language arts activities. Critical analysis in classroom settings is emphasized. Other issues discussed include: literature-based instruction, multicultural perspectives, special needs students and professional behaviors.

TCH-ED 413 Mathematics in the Elementary School I Credits: 3

Mathematics-specific pedagogy. Methods, techniques, tools and materials for the effective teaching of mathematics. Focuses on the principles, methods, and materials of elementary school mathematics instruction and state curriculum in the context of diverse student backgrounds.

TCH-ED 414 General Methods Elementary and Middle - 3 Credits: 2

To summarize and synthesize the pre-service educational experience. To become knowledgeable about the realities of a school life in a "real" classroom.

TCH-ED 415 Reading I: Intro to Literacy and Reading Instruction Credits: 4

This course introduces concepts about literacy processes; i.e., social, cultural, cognitive and linguistic foundations of reading and writing processes. The major focus of the course is on learning components of a comprehensive reading curriculum, and a range of instructional approaches and methods appropriate for learners at different stages of literacy development.

TCH-ED 416 Reading II: Assessing and Teaching Diverse Learners Credits: 4

This course focuses on understanding the major components of reading processes (phonemic awareness, word identification and phonics, vocabulary and background knowledge, fluency, comprehension strategies, and motivation) and how they are integrated in fluent reading for individual students at different stages of literacy development. The major project for the course involves assessing and teaching an individual student of the course of the semester. Teacher candidates should also assess and teach small groups of readers.

Prerequisites: TCH-ED 415, admission into teacher education program.

TCH-ED 417 Science Methods in the Elementary School Credits: 3

Prepares teacher candidates in teaching methods focused on ways of involving elementary-aged children (grades 1-6) in science activities and experiences designed to promote curiosity, inquiry-based investigation, and application of scientific concepts as they explore the world.

TCH-ED 418 Social Studies in the Elementary School Credits: 3

The social studies methods course is designed to provide the prospective teacher with the theory, content, powerful teaching practices, and understanding of the role of social studies in a global and multicultural society. The prospective teacher will acquire the knowledge, skills and dispositions needed to design and enact a transformative social studies curriculum that prepares the young to develop civic competence.

TCH-ED 419 Student Teaching in Elementary School Credits: 3-12

Culminating field experience in an elementary school (grades 1-6). Elementary program student teachers engage in an all-day, full semester placement in an elementary classroom. Elementary majors must enroll in 9 credit hours. Hours for other programs using this field experience vary. Teacher candidates should seek advisor approval.

TCH-ED 420 Adolescent Development Credits: 3

Various aspects of physiological, emotional, cognitive, social and moral development in the transition from childhood to adolescence will be considered. Attention is focused on a conception of adolescence that is grounded on current research and theory.

TCH-ED 422 Practicum I - Middle and High School Credit: 1

The overarching goal for this introductory field experience is to help teacher candidates shift their perspectives from that of a student to that of a classroom teacher. Emphasis is on observing the relationship among students' experiences within and outside of school, and planning specific learning experiences for academic and social growth and development. Additionally, teacher candidates attend to the individual student's responses to learning experiences, as well as the social dynamic among students as they work together in a classroom.

Prerequisites: Admission to the Teacher Education Professional Program.

TCH-ED 423 Practicum II - Middle and High School Credit: 1

This field experience is part of Block 2—the second field experience within a four-block sequence. The overarching goal is for teacher candidates to observe the implementation of the school curriculum in specific disciplines. Topics include the structure of the discipline, interrelatedness among basic concepts, discipline specific practices, and the design of instruction to facilitate deep learning.

Prerequisites: TCH-ED 422.

TCH-ED 424 Practicum III - Middle and High School Credit: 1

This field experience is part of Block 3—the third field experience within a four-block sequence. The overarching goal for this field experience is for teacher candidates to apply conceptual and theoretical knowledge to practice in identifying appropriate instructional strategies, planning instruction, and assessing learning. The emphasis is on understanding the relationships among instructional practices, learner characteristics, and learning outcomes.

Prerequisites: TCH-ED 423.

TCH-ED 425 General Methods - Secondary 2 Credits: 2

The intent of this course is to prepare pre-service teachers to be effective managers of instruction who are skillful in interpersonal communication. Course activities include opportunities for applying techniques based upon a variety of management/discipline models. Field experiences permit on-site observation of various management styles.

TCH-ED 427 Reading in the Secondary School Credits: 3

An examination of the reading process and study of methods and materials used by the secondary school classroom teacher in assessing student reading ability, determining the readability of content area materials and teaching students of all reading levels how to comprehend their textbooks and other printed instructional materials in various content area subjects.

TCH-ED 429 Mathematics in the Elementary School II Credits: 3

Mathematics-specific pedagogy. Methods, techniques, tools and materials for the effective teaching of mathematics. Focuses on the principles, methods, and materials of elementary school mathematics instruction and state curriculum in the context of diverse student backgrounds.

Prerequisites: TCH-ED 413.

Co-requisites: TCH-ED 479.

TCH-ED 430 Gateway to Teaching Credits: 3

This course is designed to introduce pre-service teachers to the education profession and to the teacher education program at UMKC. Through lecture discussion and field experiences the students will examine the social, political, cultural and professional aspects of teaching in 21st century America. In addition, the students will be given an overview of the teacher preparation program and the requirements and expectations for completing the program and qualifying for a certificate to teach in the state of Missouri.

Prerequisites: Admission into the Teacher Education program.

TCH-ED 431 Summer Community Experience Credits: 3

This field-based course provides an in-depth examination into both the evolution of urban communities and dynamics of community building in inner cities, with special emphasis on Kansas City, Missouri. In addition, theories of educational psychology as well as child and adolescent behavior will be infused to assist participants in developing age appropriate mentoring/teaching strategies and activities. Students in the course are engaged with the community through field trips, simulations, course events, and community service.

TCH-ED 432 Special Methods of Teaching English in Middle and High Schools Credits: 3

This course stresses the skills, knowledge, and dispositions pertinent to teaching English Language Arts in middle schools and high schools.

TCH-ED 433 Special Methods of Teaching Mathematics in Middle and High Schools Credits: 3

This course stresses the skills, knowledge, and dispositions pertinent to teaching mathematics in middle schools and high schools.

TCH-ED 434 Seminar in Social Science Curriculum Credits: 3

This seminar course is designed to strengthen teacher candidates' content knowledge for designing and enacting transformative social science curriculum and pedagogy. Students will actively examine key content, concepts, themes, issues, multiple perspectives, and enduring questions embedded in the social science disciplines such as history, geography, economics, anthropology, sociology, political science and psychology and cultural and social contexts to enhance their knowledge, skills, and confidence for designing and enacting a transformative social science curriculum for diverse middle and high school students' development of civic competence.

TCH-ED 435 Special Methods of Teaching Science in Middle and High Schools Credits: 3

Provides an opportunity for future science teachers to refine their skills as science educators and at the same time to reflect upon the ways and whys of teaching science.

TCH-ED 436 Special Methods of Teaching Social Science in Middle and High Schools Credits: 3

This course will assist teacher candidates in developing the knowledge, skills, and dispositions needed to design and enact powerful transformative social studies curricular experiences, to foster middle and secondary school students' abilities to make informed, reasoned decisions and actions for the public good. Students will be introduced to powerful teaching practices, issues, and resources in secondary school social science.

TCH-ED 437 Student Teaching in High School Credits: 3-9

Culminating experience in a secondary school (grades 9-12).

TCH-ED 438 Culturally Responsive Strategies for Teaching Diverse Learners Credits: 3

This course is designed to move students from cultural awareness to the application of culturally responsive practice. Specifically, this course will heighten students' understanding of cultural characteristics and their relationships to teaching and learning. Students will learn culturally responsive strategies and their enactment in instruction for diverse learners.

TCH-ED 440 Introduction To Early Childhood Education Credits: 3

This course is an introduction to the historical, theoretical, ethical, and pedagogical underpinnings of the early childhood education profession. Teacher candidates explore play, inquiry-based learning, documentation, and the role of family and community within diverse curriculum approaches to early childhood education.

TCH-ED 441 Language Development Credits: 3

An introduction to what language is, how first and second languages are acquired, and how to support language development in early childhood classrooms in collaboration with families and communities. Teacher candidates construct knowledge through university classroom experiences, observations of focal children in urban educational settings, and family interviews.

TCH-ED 442 Assessment, Screening, and Data-Informed Early Childhood Teaching Credits: 3

This course provides analysis of assessment methods, application of authentic assessment throughout the teaching cycle and investigation of data-based decision-making through focused inquiry and application in the practicum setting.

TCH-ED 443 Mathematics in Early Childhood II Credits: 3

Approaches to assessing and developing mathematical competencies in young children, birth through Grade 3. Emphasis is placed upon mathematics as a sense-making tool through which actions such as observation, classification, ordering, pattern seeking, and testing of ideas drive experiences and problem solving in the child's immediate environment.

Prerequisites: TCH-ED 444.

TCH-ED 444 Mathematics in Early Childhood I Credits: 3

Approaches to developing mathematical competencies in young children, through Grade 3. Emphasis is placed upon mathematics as a sense-making tool through which actions such as observation, classification, ordering, pattern seeking, and testing of ideas drive experiences and problem solving in the child's immediate environment. A variety of materials and tools are studied in terms of the ways they help children explore, develop and test ideas, construct meaning, and communicate ideas.

TCH-ED 445 Science In Early Childhood Credits: 3

This course provides an exploration of the major concepts and culturally responsive teaching strategies in early childhood science (birth –Grade 3). Teacher candidates analyze inquiry processes and tools in science to develop integrated learning experiences that ensure mastery of content and promote curiosity, creativity, inquiry, and self-awareness as learners explore their world.

TCH-ED 446 Early Childhood Creative Activities Credits: 3

Analysis of symbolic representations, creativity, and imagination as a foundation for learning and development of diverse learners in urban early childhood settings. Hands on exploration of creative materials and activities from different representational systems to shape planning of learning experiences and environments that enhance learning and promote children's creative abilities development.

TCH-ED 447 Social Studies in Early Childhood Credits: 3

This course provides an exploration of the major concepts and teaching strategies in early childhood social studies (birth-Grade 3). Teacher candidates analyze the processes and tools of scientific inquiry related to social studies to design integrated learning experiences that incorporate authentic local and global issues relevant to the learners.

TCH-ED 450 Integrating The Curriculum In Early Childhood Education Credits: 3-4

A culminating curriculum course for early childhood students. The overall goal is to help students become more aware, skilled and informed about developmentally and educationally appropriate practice and curriculum for children during early childhood. Its focus is on constructing an integrated curriculum. A field-based experience is included.

TCH-ED 451 Child Guidance in Early Childhood Classrooms Credits: 3

This course provides an analysis of theory and research on child guidance to frame teacher candidates' development of guidance procedures that meet ethical guidelines and foster a classroom environment conducive to optimal learning and development of early childhood learners.

TCH-ED 452 Family and Program Relationships in Early Childhood Education Credits: 3

This course provides an analysis of purposes and procedures of family, school and community partnerships that frame teacher candidates' collaborations, consultation, and teaching of early childhood learners in urban settings.

TCH-ED 453 Learning from Parents Credits: 2

Designed to provide students with direct interactions with parents whose children are participating in early childhood programs, birth to age 8. Emphasis is placed upon students' understanding of, and sensitivity to, parents' perspectives regarding the care and education of their young children and recognition of parents as significant informants about their children.

Co-requisites: TCH-ED 452.

TCH-ED 454 Human Relations In The Early Childhood Classroom Credits: 3

Students will analyze the connections between an effective helping relationship and effective teaching in the early childhood classroom. Effective interpersonal communication skills will be identified and practiced. The development of self-concept will be discussed.

TCH-ED 455 Student Teaching In Preschool Credits: 6-10

Observation and student teaching under supervision in a preschool setting.

TCH-ED 456 Student Teaching in Early Childhood Credits: 9

Culminating field experience in Early Childhood. Student teachers engage in an all day, full-semester placement in a K-3 early childhood setting.

Co-requisites: TCH-ED 486.

TCH-ED 457 Infant and Toddler Care and Education Credits: 3

This course provides an investigation into infant/toddler care and education theories and practices. Teacher candidates explore relevant curriculum and teaching methods, visit infant and toddler programs, analyze state regulations and national standards for quality care, and evaluate early learning environments.

TCH-ED 458 Practicum For Learning About Infants And Toddlers Credit: 1

The purpose of this course is to learn about child care and education practices in various centers. We will discuss how practices are influenced or constrained by human biology and developmental stages, as they are by ecological and environment pressures such as mothers' work roles. The central themes of the course can be summarized by the phrases purposeful care practices and the optimal practices for infants and toddlers.

TCH-ED 459 Early Childhood Program Management Credits: 3

This course provides an exploration of the program manager's role as a leader who establishes school culture, implements and maintains policies and procedures, and partners with families and communities to facilitate high performing urban early childhood learning environments. Teacher candidates analyze licensing and accreditation regulations that contribute to health, safety and nutrition of learners; interview administrator and community members; and observe at an urban early childhood program.

TCH-ED 460 Middle School Curriculum Credits: 2

This course offers the pre-service teachers an overview of middle school goals, basic principles, and organizations. The course explores interdisciplinary teaming, flexible scheduling, exploratory and advisory programs, and other aspects of the organization within the context of middle school goals and practices.

TCH-ED 461 Student Teaching In Middle School Credits: 6-9

Culminating field experience in a middle school setting. Student teachers engage in an all-day, full semester placement in a middle school classroom. Middle School Education majors must enroll in 9 credit hours. Hours for other programs using this field experience vary. Teacher candidates should seek advisor approval.

Prerequisites: TCH-ED 424.

TCH-ED 462 Middle School Philosophy and Organization Credits: 3

This course offers teacher candidates an overview of middle school goals, basic principles, and organizations. Topics include interdisciplinary teaming, flexible scheduling, exploratory and advisory programs, and other aspects of the organization within the context of middle school goals and practices.

TCH-ED 463 Literacy Intervention across the Disciplines Credits: 3

Examination of research, policy, and effective practice of literacy intervention in middle and secondary disciplinary classrooms (i.e. English/language arts, mathematics, science, social studies). Topics will include recognition of reading and writing difficulties, response-to-intervention (RTI), scaffolding instruction for grade level reading comprehension, metacognition, and culturally responsive literacy instruction.

TCH-ED 464 Math Methods for Urban Teachers Credits: 3

Mathematics-specific pedagogy for urban teachers. Methods, techniques, tools and materials for the effective teaching of mathematics. Emphasis on problem solving and reasoning skills in applying mathematics and on teaching in the context of diverse student backgrounds. Portions of this course will occur in urban school classrooms. Students will apply learning to urban classrooms.

Prerequisites: Admission into the Institute for Urban Education.

TCH-ED 465 Urban Education VI: Teaching Diverse Students Credit: 1

This interactive course will investigate and examine the principles of teaching diverse students and factors influencing effectiveness of instruction, including empowering African American males, teaching students from diverse populations and working with students with special needs. Some of the class sessions will be taught electronically and work will be submitted electronically.

Prerequisites: Admission into the Institute of Urban Education.

TCH-ED 466 Field Experience: Diverse Learners Credit: 1

Students will spend a minimum of 90 hours in an urban school classroom. Students will have the opportunity to apply learning and lessons designed in the semester's pedagogical courses, particularly Best Practices for Teaching Math, Science, and strategies for working with diverse learners. Students will work with their seminar leader, having the opportunity to be observed and conference about their teaching.

Prerequisites: Admission into the Institute for Urban Education.

Co-requisites: TCH-ED 465.

TCH-ED 470 Philosophy and History of Science and Technology Credits: 3

This course uses an historical survey to introduce the main philosophical interpretations of the nature and structure of both science and technology. Core concepts such as prediction, explanation, progress, truth, and utility will be examined in light of various philosophical perspectives. Following this, case study methodology will be used to examine interactions among science, technology, and society. Although the major focus will be upon modern Western culture, some attention will be paid to earlier and non-Western cultures. Case studies to be examined include: Perception and Estimation, nuclear power and pesticides; the impact of high technology upon medicine; and the estimated cost/benefit of computer-mediated communications, for example, the Internet.

TCH-ED 475 Working with Families and Communities Credits: 3

This course provides an in-depth examination of research and theory relative to children, family and community which have implications for and application to learning and instruction. Emphasis will be placed on the exploration and critical examination of and insights into the significance of school-family relationships and their relevance to teaching and learning.

TCH-ED 478 Seminar - Elementary Credits: 3

Supports the culminating student teaching experience and the submission of a final professional teaching portfolio. Student teachers analyze the effectiveness of the teaching strategies they are applying in their student teaching experiences, for their effectiveness in facilitating learning in classrooms, and adapt lessons and assessment for individual learners. Student teachers will work cooperatively with school personnel, the larger professional community, and families to meet students' needs.

TCH-ED 479 Practicum III – Elementary Credit: 1

This field experience is part of Block 3—the third field experience within a four-block sequence. The overarching goal for this field experience is for teacher candidates to apply conceptual and theoretical knowledge to practice in identifying appropriate instructional strategies, planning instruction, and assessing learning. The emphasis is on understanding the relationship among instructional practices, learner characteristics, and learning outcomes.

Prerequisites: TCH-ED 398.

TCH-ED 480 Practicum I Early Childhood Credit: 1

The overarching goal for this introductory field experience is to help teacher candidates shift their perspectives from that of a student to that of a classroom teacher. Emphasis is on observing the relationship among students' experiences within and outside of school, and planning specific learning experiences for academic and social growth and development. Additionally, teacher candidates attend to the individual student's responses to learning experiences, as well as the social dynamic among students as they work together in a classroom.

TCH-ED 481 Practicum II Early Childhood Credit: 1

This field experience is part of Block 2—the second field experience within a four-block sequence. The overarching goal is for teacher candidates to observe the implementation of the school curriculum in specific disciplines. Topics include the structure of the discipline, interrelatedness among basic concepts, discipline specific practices, and the design of instruction to facilitate deep learning.

TCH-ED 482 Seminar in Teaching and Evaluating Writing Credits: 3

This course is designed to provide future teachers with a framework for success in the teaching of writing within the English Language Arts curriculum. The goal is to help students turn sound theory provided by the National Writing Project, the National Council of Teachers of English, and other experts in the field of rhetoric and composition into effective practice in the classroom.

TCH-ED 483 Early Childhood Literacy I Credits: 4

This course emphasizes learning theories and methods for early literacy instruction and assessment. It will primarily focus on the components of a culturally responsive literacy curriculum for early childhood students in diverse, urban preprimary and kindergarten contexts. This course includes a field experience with multiple opportunities for observing, teaching, and assessing the literacy development of young children throughout the teaching cycle including engagement with their families and communities.

TCH-ED 484 Early Childhood Literacy II Credits: 4

This course emphasizes learning theories and methods for early literacy instruction and assessment. The course will primarily focus on the components of a culturally responsive curriculum for early childhood students in diverse, urban kindergarten through 3rd grade contexts. This course includes a supervised field experience with multiple opportunities for observing, teaching, and assessing the literacy development of young children throughout the teaching cycle including engaging with their families and communities.

TCH-ED 485 Language Arts in the Early Childhood Classroom Credits: 3

This course provides instruction in planning, implementing, and assessing early childhood (birth through third-grade) language arts activities. Critical analysis in classroom settings is emphasized. Other issues discussed include: literature-based instruction, multicultural perspectives, special needs students and professional behaviors.

TCH-ED 486 Seminar - Early Childhood Credits: 3

Supports the culminating student teaching experience and the submission of a final professional teaching portfolio. Student teachers analyze the effectiveness of the teaching strategies they are applying in their student teaching experiences, for their effectiveness in facilitating learning in classrooms, and adapt lessons and assessment for individual learners. Student teachers will work cooperatively with school personnel, the larger professional community, and families to meet students' needs.

Co-requisites: TCH-ED 456.

TCH-ED 487 Practicum III - Early Childhood Credit: 1

This field experience is part of Block 3, the third field experience within a four-block sequence. The overarching goal for this field experience is for teacher candidates to apply conceptual and theoretical knowledge to practice in identifying appropriate instructional strategies, planning instruction, and assessing learning. The emphasis is on understanding the relationships among instructional practices, learner characteristics, and learning outcomes.

TCH-ED 491 Seminar - Art Education Credits: 3

Supports the culminating student teaching experience and the submission of a final professional teaching portfolio. Student teachers analyze the effectiveness of the teaching strategies they are applying in their student teaching experiences, for their effectiveness in facilitating learning in classrooms, and adapt lessons and assessment for individual learners. Student teachers will work cooperatively with school personnel, the larger professional community, and families to meet students' needs.

TCH-ED 492 Integrated Instruction: Language Arts and Social Studies Credits: 6

This course will focus on teaching Language Arts and Social Studies in the Urban Elementary School. Methods, techniques, tools and materials for the effective teaching will be observed and practiced. Students will work closely with in-service teachers and their university instructor. There will be emphasis on balanced literacy, readers' and writers' workshops, literacy development, assessment techniques and the integration of social studies and language arts. Curriculum mapping and unit planning will be introduced and practiced in this course. This course will focus on school and classroom organization and management, detailed lesson planning, use of instructional materials and media in the teaching of language arts and social studies.

Prerequisites: Admission into the Institute of Urban Education.

TCH-ED 493 Seminar - Mathematics Credits: 3

Supports the culminating student teaching experience and the submission of a final professional teaching portfolio. Student teachers analyze the effectiveness of the teaching strategies they are applying in their student teaching experiences for their effectiveness in facilitating learning in classrooms, and adapt lessons and assessment for individual learners. Student teachers will work cooperatively with school personnel, the larger professional community, and families to meet students' needs.

Co-Requisites: TCH-ED 437 or TCH-ED 461.

TCH-ED 494 Seminar - English/Language Arts Credits: 3

Supports the culminating student teaching experience and the submission of a final professional teaching portfolio. Student teachers analyze the effectiveness of the teaching strategies they are applying in their student teaching experiences, for their effectiveness in facilitating learning in classrooms, and adapt lessons and assessment for individual learners. Student teachers will work cooperatively with school personnel, the larger professional community, and families to meet students' needs.

Co-requisites: TCH-ED 437 or TCH-ED 461.

TCH-ED 495 Seminar - Science Credits: 3

Supports the culminating student teaching experience and the submission of a final professional teaching portfolio. Student teachers analyze the effectiveness of the teaching strategies they are applying in their student teaching experiences, for their effectiveness in facilitating learning in classrooms, and adapt lessons and assessment for individual learners. Student teachers will work cooperatively with school personnel, the larger professional community, and families to meet students' needs.

Co-requisites: TCH-ED 437 or TCH-ED 461.

TCH-ED 496 Seminar - Social Science Credits: 3

Supports the culminating student teaching experience and the submission of a final professional teaching portfolio. Student teachers analyze the effectiveness of the teaching strategies they are applying in their student teaching experiences, for their effectiveness in facilitating learning in classrooms, and adapt lessons and assessment for individual learners. Student teachers will work cooperatively with school personnel, the larger professional community, and families to meet students' needs.

Co-requisites: TCH-ED 437 or TCH-ED 461.

TCH-ED 497 Teaching Internship Credits: 3-8

Teacher candidates will work 3 to 5 days at the school site in which the candidate will complete the year-long teaching internship.

Prerequisites: TCH-ED 398.

TCH-ED 498 Urban Education Seminar VII Credit: 1

This seminar meets weekly for 2 hours and is led by a clinical professor who serves as a mentor for the students throughout their program. Students will work closely with mentor teachers in the application and integration of social justice and the elementary school curriculum. A critical analysis of current practices, teaching methods, materials and how social justice manifests in curriculum and instruction. Emphasis is on understanding cultural diversity and cultural influences on learning. Concepts of a classroom community, parental relations and democratic classroom processes will be addressed. Students will have opportunities to apply their learning to urban classrooms.

Prerequisites: Admission into the Institute for Urban Education.

TCH-ED 499 Capstone Credits: 2

This seminar is designed to complement the student teaching experience through the discussion and analysis of school-based issues. It is intended to help further develop a reflective, critical and analytical approach to pedagogical decision making through supportive collaboration.

Theatre (THEATRE)

Courses

THEATRE 101 Introduction To Acting Credits: 3

An introductory course to acquaint the freshman theatre major and non-major student with the process of acting through relaxation and improvisational exercise.

THEATRE 101 - MOTR PERF 100: Acting I

**THEATRE 102 Acting for the Opera Credit: 1**

Students receive basic foundation of acting technique. Students will demonstrate the ability to apply their tools in practice and articulate their process throughout the semester. The course is designed for the coordination of music and acting with particular emphasis on training the singing actor.

Prerequisites: Bachelor of Music: Music Performance-Voice Option major.

THEATRE 110 Acting I Credits: 3

Basic principles of dramatic performance: training in voice, movement and language as an organic developmental whole.

THEATRE 113 Introduction To Technical Production Credits: 3

An introduction to the technical production process with emphasis on production organization, planning and scenic construction techniques. Required laboratory work.

THEATRE 113C Introduction to Technical Production: Light/Sound Credits: 3

An introduction to the basic principles and techniques of lighting design and technology and sound design and technology.

Co-requisites: THEATRE 180.

THEATRE 121 Oral Interpretation Of Literature Credits: 3

Principles of interpretation, analysis and oral reading of prose and poetry. Emphasis upon platform performance: body language, vocal control and performance techniques.

THEATRE 130 Foundations Of Fine Arts Theatre Credits: 3

An introduction to theatre arts and a general orientation to the creative and technical aspects of live performance. Includes historical overview, analysis of the components of a play, and observation of and critical reaction to theatrical productions. Frequent guest speakers.

THEATRE 180 Theatre Practicum Credit: 1

The course requires involvement with productions in the Conservatory. Students will learn the responsibilities and processes of preparing and executing a live theatrical production. Depending on specialty, students will work backstage, in one of the studios, or in some other capacity as defined and agreed upon by the area coordinator.

THEATRE 200 Script Analysis Credits: 3

The class focuses on reading a script theatrically with a view to mounting a coherent production. Through careful, intensive reading of a variety of plays students study form, structure, genre, character, language, theme, and action as components of a text that provide the theatre artist with the tools for the creation a theatrical production.

THEATRE 210 Introduction To Design For The Theater Credits: 3

An introduction to aesthetics and design for the theater in the areas of scenery, costume, lighting and sound. The emphasis is upon the theory, vocabulary, form, style, historical influences and process in each area. Attendance at theater productions is required. Course is taught by design faculty from each area.

THEATRE 295 Speech For The Theatre I Credits: 3

Training in voice and articulation and the techniques of adaptation to the needs of the artist-performer in the theatre: exercises to free the voice, develop effective breathing, tone production, articulation, flexibility of vocal production, and projection.

THEATRE 295A Speech For The Theater I Credits: 3**THEATRE 295B Speech For The Theater I Credits: 3****THEATRE 298 Movement For Actors Credits: 3**

Basic movement training including relaxation and alignment techniques, exercises to increase physical facility and skills to enhance rhythmic coordination and physical characterization.

THEATRE 298A Movement For Actors Credits: 3**THEATRE 298B Movement For Actors Credits: 3****THEATRE 315 Acting II Credits: 3**

Textual analysis, characterization and building a role.

Prerequisites: THEATRE 300.

THEATRE 317 Scene Design Credits: 3

Introduces the mechanics of layout: perspective, basic drafting techniques, front elevation and floorplan execution. Second half of the semester emphasizes scenic design as an art form. Recommended Preparation: THEATRE 113 and THEATRE 311.

THEATRE 325 Acting III Credits: 3

Study and practice of period and contemporary styles of acting.

Prerequisites: THEATRE 315.

THEATRE 329 Master Class In Acting Credits: 2

(A,B,C,D) Class in advanced studies in acting. May be repeated for credit up to eight hours and guest artist change.

THEATRE 329A Master Class In Acting Credits: 2**THEATRE 329B Master Class In Acting Credits: 2****THEATRE 329C Master Class In Acting Credits: 2****THEATRE 329D Master Class In Acting Credits: 2****THEATRE 333 History of Costuming I Credits: 3**

The study of the history of European costume, with emphasis on the social and economic ramifications of costuming through the ages.

THEATRE 340 Stage Makeup Credit: 1

Lecture and laboratory work in the fundamentals of makeup for the stage.

THEATRE 350 Theatre History I Credits: 3

Development of theatre art, including the physical stage, technical production elements, dramatic literature, and audience behavior from primitive origins to the 18th century.

THEATRE 351WI Theatre History II Credits: 3

Development of Theatre art, including the physical stage, technical production elements, dramatic literature, and audience behavior from the 18th century to the present.

THEATRE 352 History of Costuming II Credits: 3

The study of the history of Non-European costume, with emphasis on the social and economic ramifications of costuming through the ages.

THEATRE 371 Stage Lighting Credits: 3

Stage Lighting is the study of light as a design element. Students will learn the foundation of lighting design theory, technical methods, and general theatrical procedure through lectures, laboratory and crew work. Theatrical genres will vary by semester.

THEATRE 372 Stage Lighting Technology Credits: 2

This course is a comprehensive study of contemporary technical equipment and its usage to actualize lighting design. Areas of emphasis include photometric, color and color theory, lighting control systems, lighting control operations, cueing techniques, data control of intelligent lighting equipment, lighting fixtures, dimming system, hand drafted light plot standards, CAD light plot drafting, lighting specific software programs, video and image projections, and optical special effects. Theatrical genres will vary by semester.

THEATRE 374 Professional Projection Design Credits: 3

This course in projection design for the performing arts will give students an overview of the discipline and introduce students to ideas and technologies used in this field. Through the three weekend sessions, students will learn the practical applications of projection design and the techniques of projection controls. Recommended preparation: basic, fundamental knowledge of computers and basic, fundamental knowledge of theatre designs.

Prerequisites: THEATRE 210.

THEATRE 378 Stage Management I Credits: 3

A functional analysis of the duties and responsibilities of the stage manager, with particular reference to the organization and conducting of rehearsals and performances, professional practices and union requirements. Requires student to be an assistant to a stage manager on a University or an KC Rep production. The first of a two-semester requirement in stage management for theater majors.

THEATRE 400 Special Problems In Theatre Credits: 1-6

(A-M) Research and/or production projects for advanced upperclass students. No more than three hours with any one instructor. (A) Acting; (B) Children's Theatre; (C) Costumes; (D) Scenic Design; (E) Directing; (F) History; (G) Lighting; (H) Playwriting; (I) Sound; (J) Stage Management; (K) Technical Production (L) Theatre Management; (M) Theory and Criticism.

THEATRE 400A Special Problems In Theatre: Acting Credits: 1-6

THEATRE 400B Special Problems In Theatre: Design Credits: 1-6

THEATRE 400C Special Problems In Theatre: Costumes Credits: 1-6

THEATRE 400D Special Problems In Theatre: Scenic Design Credits: 1-6

THEATRE 400E Special Problems In Theatre: Directing Credits: 1-6

THEATRE 400F Special Problems In Theatre: History Credits: 1-6

THEATRE 400G Special Problems In Theatre: Lighting Credits: 1-6

THEATRE 400H Special Problems In Theatre: Playwriting Credits: 1-6

THEATRE 400I Special Problems In Theater: Sound Credits: 1-6

THEATRE 400J Special Problems In Theatre: Stage Management Credits: 1-6

THEATRE 400L Special Problems In Theatre: Theatre Management Credits: 1-6

THEATRE 400M Special Problems In Theatre: Theory And Criticism Credits: 1-6

THEATRE 400N Special Problems In Theatre: Dramaturgy Credits: 1-6

THEATRE 400R Special Problems In Theatre Credits: 1-6

THEATRE 400S Special Topics In Theatre Credits: 1-6

THEATRE 400T Special Problems In Theatre Credits: 1-6

THEATRE 400V Special Problems in Theater Credits: 1-6

THEATRE 400X Special Problems In Theatre Credits: 1-6

THEATRE 403 Theatre Company & Production Credit: 1

This course serves (1) as a weekly company meeting for Theatre majors, (2) an organizing point for production assignments and duties for the semester, and (3) a study of a special topic which will change each semester. Course is repeatable. Required of Majors for every semester they are enrolled.

Prerequisites: Theatre Majors and Minors.

THEATRE 415 Beginning Directing Credits: 3

Theory and process of play production, including interpretation, composition, picturization, movement, rhythm, and character interpretation.

THEATRE 431 Rendering Techniques For The Theatre Designer I Credits: 3

Introduces the mechanics of handling black and white media to develop three-dimensional technique with an emphasis on observational training and object drawing.

THEATRE 432 Costume Design Credits: 3

The practice of the theatrical costume design, leading to the preparation of designs for production, and the execution of designs in actual costuming for the stage.

THEATRE 432A Costume Design Credits: 3

THEATRE 432B Costume Design Credits: 3

THEATRE 432C Costume Design Credits: 3

THEATRE 432D Costume Design Credits: 3

THEATRE 437 Playwriting I Credits: 3

Theory and practice of writing for the theatre with emphasis on the basic techniques.

THEATRE 438 Playwriting II Credits: 3

Theory and practice of writing for the theatre with emphasis on advanced techniques.

THEATRE 451 World Theatre Credits: 3

A study of non-Western theatre, its origins, styles and continuing influences on society and western theatre.

Prerequisites: THEATRE 110.

THEATRE 476 Theatre Sound And Electronics Credits: 3

Study of electronic principles used in audio and control devices. Concentrates on applying knowledge to using the equipment employed in the theatre such as sound-effect systems, inter-communication equipment, and includes a special section on the creation of sound and music for theatre productions.

THEATRE 478 Stage Management II Credits: 2

Practicum course in stage management. Requires stage management of a University production and/or assistant stage management of an KC Rep production and/or assistant stage management of a main stage University production.

Prerequisites: THEATRE 378.

THEATRE 497 Repertory Theatre Credits: 3-6

Apprentice-level responsibilities for Theatre 497 are as follows: apprentices will be used in as many production areas as possible: (1) as actors in small roles and/or extras or supers; (2) as understudies if possible; (3) as needed in the following departments: (a) properties; (b) carpentry and the shop; (c) lighting; (d) costumes; (e) house management; (f) stage management; (g) running crews.

Prerequisites: Departmental consent.

THEATRE 499 Theatre Capstone Credit: 1

Each student plans and executes one significant project in the area of interest which demonstrates significant proficiency in one or more theatrical elements. Supervised by a member of the theatre faculty, the project incorporates research, documentation and a public exhibition.

Prerequisites: Senior Standing.

THEATRE H101 Introduction To Acting Credits: 3

An introductory course to acquaint the freshman theater major and non-major student with the process of acting through relaxation and improvisational exercise.

THEATRE H113 Introduction To Technical Production Credits: 3

An introduction to the technical production process with emphasis on production organization, planning and scenic construction techniques. Required laboratory work.

THEATRE H210 Introduction To Design For The Theater Credits: 3

An introduction to aesthetics and design for the theater in the areas of scenery, costume, lighting and sound. The emphasis is upon the theory, vocabulary, form, style, historical influences and process in each area. Attendance at theater productions is required. Course is taught by design faculty from each area.

THEATRE H315 Acting II Credits: 3

Textual analysis, characterization and building a role.

Prerequisites: THEATRE 300.

THEATRE H350 Theater History I-Honors Credits: 3**THEATRE H351WI Theater History II Credits: 3**

Development of Theater art, including the physical stage, technical production elements, dramatic literature, and audience behavior from the 18th century to the present.

Trombone (TROMB)

Courses

TROMB 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit toward the major.

TROMB 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

TROMB 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

TROMB 101 Freshman Trombone I Credits: 2-4

TROMB 101J Freshman Trombone I (Jazz) Credits: 2-4

TROMB 102 Freshman Trombone II Credits: 2-4

TROMB 102J Freshman Trombone II (Jazz) Credits: 2-4

TROMB 201 Sophomore Trombone I Credits: 2-4

TROMB 201J Sophomore Trombone I (Jazz) Credits: 2-4

TROMB 202 Sophomore Trombone II Credits: 2-4

TROMB 202J Sophomore Trombone II (Jazz) Credits: 2-4

TROMB 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

TROMB 301 Junior Trombone I Credits: 2-4

TROMB 301J Junior Trombone I (Jazz) Credits: 4

TROMB 302 Junior Trombone II Credits: 2-4

TROMB 302J Junior Trombone II (Jazz) Credits: 4

TROMB 401 Senior Trombone I Credits: 2-4

TROMB 401J Senior Trombone I (Jazz) Credits: 4

TROMB 402 Senior Trombone II Credits: 2-4

TROMB 402J Senior Trombone II (Jazz) Credits: 4

Trumpet (TRUMPET)

Courses

TRUMPET 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit toward the major.

TRUMPET 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

TRUMPET 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

TRUMPET 101 Freshman Trumpet I Credits: 2-4

TRUMPET 101J Freshman Trumpet I (Jazz) Credits: 2-4

TRUMPET 102 Freshman Trumpet II Credits: 2-4

TRUMPET 102J Freshman Trumpet II (Jazz) Credits: 2-4

TRUMPET 201 Sophomore Trumpet I Credits: 2-4

TRUMPET 201J Sophomore Trumpet I (Jazz) Credits: 2-4

TRUMPET 202 Sophomore Trumpet II Credits: 2-4

TRUMPET 202J Sophomore Trumpet II (Jazz) Credits: 2-4

TRUMPET 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

TRUMPET 301 Junior Trumpet I Credits: 2-4

TRUMPET 301J Junior Trumpet I (Jazz) Credits: 4

TRUMPET 302 Junior Trumpet II Credits: 2-4

TRUMPET 302J Junior Trumpet II (Jazz) Credits: 4

TRUMPET 368 Orchestral Literature for Trumpet Credit: 1

Intended to introduce students to the standard repertoire for orchestral trumpet; class meets once weekly for an hour. Students will be expected to prepare and play approximately a dozen works per semester, rotating parts in a full trumpet section.

TRUMPET 401 Senior Trumpet I Credits: 2-4

TRUMPET 401J Senior Trumpet I (Jazz) Credits: 4

TRUMPET 402 Senior Trumpet II Credits: 2-4

TRUMPET 402J Senior Trumpet II (Jazz) Credits: 4

Tuba (TUBA)

Courses

TUBA 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit toward the major.

TUBA 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

TUBA 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

TUBA 101 Freshman Tuba I Credits: 2-4

TUBA 102 Freshman Tuba II Credits: 2-4

TUBA 201 Sophomore Tuba I Credits: 2-4

TUBA 202 Sophomore Tuba II Credits: 2-4

TUBA 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

TUBA 301 Junior Tuba I Credits: 2-4

TUBA 302 Junior Tuba II Credits: 2-4

TUBA 401 Senior Tuba I Credits: 2-4

TUBA 402 Senior Tuba II Credits: 2-4

University College (UNIV)

Courses

UNIV 100 Academic Development Credit: 1

This course is designed to help students further develop needed critical thinking and academic skills. Students will have the opportunity to analyze individual learning behavior, and to learn, adopt, and apply critical thinking methods and academic skills that promote success in college.

Prerequisites: University College Student.

UNIV 102 Career and Major Planning Credits: 2

The goal of this course is to provide assistance career/major exploration in order for students who have not declared their majors to make purposeful decisions about academic plans and career goals while fostering academic success. UNIV 102 is required for new transfer or transitioning UMKC students and for students having completed First Semester Experience in the previous term.

Prerequisites: University College Student.

UNIV 202 Next Steps in Career & Major Exploration Credit: 1

Designed to actively engage students in their educational and career-planning process by exploring factors that influence personal decision-making. While the course is practical and applied, it also addresses the broader view of work in our lives. The course will include discussion of factors that impact major and career decision-making in order to empower students to make an appropriate decision.

Prerequisites: UNIV 102.

UNIV 300 Peer Leadership Credit: 1

Designed for the study and practical application of leadership skills that will benefit Peer Leaders working with courses/laboratory instructors and students. Open to Peer Leaders only. May be repeated for a total of 3 hours. Course to be utilized by multiple academic units to support training efforts.

Urban Planning and Design (UPD)

Courses

UPD 203 GIS For Urban Planning Credits: 3

This introductory level GIS course is designed to expose planning students to Geographical Information Systems (GIS). Students will learn basic concepts and theories of GIS and applications of GIS software with hands-on experience. Students will also learn how to search for demographic, socio-economic, land use, transportation, and geospatial data, and how to use such data for their academic research and professional planning work with GIS. Students will apply GIS to the multiple scales of planning work.

UPD 260 History Of Planning And Urban Design Credits: 3

An overview of planning history with an emphasis on the 19th and 20th centuries. The historic framework will include urban history, the rise and development of urban planning, urban design, and social theory and how these areas have affected the shape of our cities.

UPD 280 Land Use Planning Credits: 3

This course explores the basic principles of plan making, land use development and regulation. Students are introduced to contemporary planning and policy issues. Including land use conflicts and alternative models for sustainable planning, design and management. Students will learn how to develop a land use plan using Geographic Information Systems (GIS) and other design tools. An introductory GIS course (UPD 203) is highly recommended.

UPD 300 Quantitative Planning Methods And Techniques Credits: 3

Statistical analysis and other analytic techniques of data gathering. Data and problems framed from complex, real world situations. Competence in firsthand research; survey design; case study method; data gathering methods such as observation, open-ended interviewing and questionnaires.

Prerequisites: MATH 110 or higher; or ALEKS score of 61 or higher; or ACT MATH sub-score of 28 or higher, or SAT MATH sub-score of 660 or higher.

UPD 310 Planning And Design Studio I Credits: 4

This Urban Planning + Design studio course will introduce methods for analyzing urban spaces at the site and neighborhood level. Students will actively solve problems related to the physical planning of cities and communities while continuing to develop abilities in methods of written, oral and graphic presentation.

Prerequisites: ENV-DSN 202 or equivalent.

UPD 312 Planning And Design Studio II Credits: 4

Studio instruction in urban planning and design focusing on the synthesis of land use analyses, regulatory reviews, urban design issues, and public participation facilitation. Continued instruction in techniques for visually presenting planning and design ideas.

Prerequisites: UPD 310.

UPD 320 Planning Theory And Practice Credits: 3

This course examines contemporary urban planning and design practice. Theories about planning practice and related case studies will be the basis of this course. Topics covered will include the definition of urban planning, the idea of the "public realm," planning/design expertise and the rational model, the role of diversity, public participation, communicative planning, advocacy and equity planning, ethics comprehensiveness and the limits of planning. The course will include assignments that will build student's ability to write quick and analytical assessments, often required in planning practice. Students will be required to attend public planning forums in and around the region.

UPD 332CZ Environmental Sustainability Credits: 3

This course will introduce the concept of sustainability and review how sustainability might work at the individual, neighborhood, state, nation and global scales. Students will participate in some form of community engagement on sustainability as well as reflect upon how their own practices impact the environment. Counts toward AS Interdisciplinary "Cluster course." Key course in sustainability minor.

UPD 340 Neighborhood And Community Development Credits: 3

Course provides a comprehensive introduction to the field of community development and neighborhood planning. The development of theoretical models that explain neighborhood change and history in the U.S. will serve as the basis. Issues explored include: community organizing, social movements, federal and state policies, and the role of planning organizations and community development corporations in neighborhood revitalization.

UPD 400 Advanced GIS For Urban Planning Credits: 3

This advanced level GIS course is designed to expose students to high level GIS techniques and geospatial analyses in urban planning. Students will learn advanced theories and geographic information tools with hands-on experiences. Students will have an opportunity to apply their knowledge and skills in GIS to a real world planning project in class.

Prerequisites: UPD 203 or UPD 403 or equivalent.

UPD 403 GIS for Urban Planning Credits: 3

The introductory level GIS course is designed to expose graduate students to Geographical Information Systems (GIS). Students will learn basic concepts and theories of GIS and application of GIS software with hands-on experience. Students will also learn how to search for demographic, socio-economic, land use, transportation, and geospatial data.

UPD 410 Planning and Design Studio III Credits: 4

Instruction in problem analysis and plan development for defined urban or suburban location with multiple constituencies.

Prerequisites: UPD 312.

UPD 411 Professional Practice I Credit: 1

A seminar preparing students for professional practice in urban planning + design including the preparation of a professional resume and portfolio.

UPD 412WI Planning and Design Studio IV Credits: 5

Capstone course that incorporates a topical plan or a comprehensive plan for a client comprising a development subdivision, a community or a redevelopment area.

Prerequisites: UPD 410, RooWriter.

UPD 413 Professional Practice II Credit: 1

A continuation of professional practice seminar addressing issues of professional writing in Urban Planning and Design practice.

UPD 420 Transportation Planning Credits: 3

The course provides fundamental theories, methods, and contemporary issues in transportation planning. The topics covered in this course include the transportation planning process, transportation systems, travel demand analysis, and policy issues such as the linkage between land use and transportation, urban transportation finance, social and environmental justice, transportation and environmental impacts, and traffic congestion.

UPD 430 Planning For Historic Preservation Credits: 3

The course provides a survey of major issues in the field of historic preservation and heritage studies from a planning perspective. Will focus primarily on the built environment of the United States, as well as world heritage sites and international perspectives. The course will include the urban planning techniques used for preserving historic buildings, neighborhood and districts, as well as some of the landmark legal decisions and legislation that have shaped heritage preservation practice in the U.S. Recommended Preparation: UPD 260.

UPD 432 Urban Environment Planning And Design Credits: 3

The built environment does not exist in a vacuum. Cities operate within broad ecological processes. Effective environmental planning can protect important natural resources while providing for a higher quality of life for urban residents. As a survey course in a subfield of urban planning, this course introduces students to environment planning approaches and techniques.

UPD 450 Planning Law And Practice Credits: 3

Introduction to legal procedures basic to urban planning; including legal, constitutional, legislative, and administrative concepts, controls, and land-use regulations.

UPD 472 Urban Redevelopment Credits: 3

Contemporary issues of urban redevelopment, with an emphasis on American cities, will be examined. Redevelopment processes recently completed or underway in the greater Kansas City region will be the subject of a case study and a theoretical review by each student.

UPD 475 American Housing Credits: 3

Students will explore housing in cultural, design, and historical terms and examine contemporary American housing policy.

UPD 490 Urban Planning Internship Credits: 3

Urban planning work experience off-campus with an approved professional, Government, or non-profit agency sponsor. A contract specifying the expected product of the internship is required between the student, agency, and faculty coordinator.

Prerequisites: UPD 203.

UPD 496 Directed Studies In Urban Planning Credits: 1-3

Intensive reading and/or research in an area selected by the student in consultation with the instructor.

UPD 499 Special Topics In Urban Planning Credits: 1-3

Advanced independent research and analysis in urban planning. Topics and methods used in research, to be established by student and academic supervisor prior to enrollment.

Urban Studies (URBAN ST)

Courses

URBAN ST 346 Urban Latin America Credits: 3

Introduction, overview, and analysis of major contemporary urban issues in Latin America.

URBAN ST 495 Urban Studies Internship Credits: 1-6

Students obtain directed practical experience working with non-profits, governments, or private enterprises. Duties will vary based on contractual agreement between the student, host organization, and the professor.

URBAN ST 499WI Urban Studies Seminar Credits: 3

This is the capstone course in the Urban Studies Program and is required for majors in the junior/senior year. Students critique urban research and prepare a paper and an oral presentation on an approved topic.

Viola (VIOLA)

Courses

VIOLA 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit toward the major.

VIOLA 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

VIOLA 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

VIOLA 101 Freshman Viola I Credits: 2-4

VIOLA 102 Freshman Viola II Credits: 2-4

VIOLA 201 Sophomore Viola I Credits: 2-4

VIOLA 202 Sophomore Viola II Credits: 2-4

VIOLA 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

VIOLA 301 Junior Viola I Credits: 2-4

VIOLA 302 Junior Viola II Credits: 2-4

VIOLA 401 Senior Viola I Credits: 2-4

VIOLA 402 Senior Viola II Credits: 2-4

Violin (VIOLIN)

Courses

VIOLIN 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit toward the major.

VIOLIN 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

VIOLIN 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

VIOLIN 100D Applied Study for the Non-Music Major Credit: 1

Nine half-hour lessons. No jury required.

VIOLIN 101 Freshman Violin I Credits: 2-4

VIOLIN 102 Freshman Violin II Credits: 2-4

VIOLIN 201 Sophomore Violin I Credits: 2-4

VIOLIN 202 Sophomore Violin II Credits: 2-4

VIOLIN 300 Studio Class Credits: 0

Experiential lab where students gain orientation and experience with pedagogy, literature, and performance.

Co-requisites: Enrollment in lessons.

VIOLIN 301 Junior Violin I Credits: 2-4

VIOLIN 302 Junior Violin II Credits: 2-4

VIOLIN 401 Senior Violin I Credits: 2-4

VIOLIN 402 Senior Violin II Credits: 2-4

Voice (VOICE)

Courses

VOICE 100A Preparatory Applied Study Credits: 2

One-hour weekly lesson. Limited to two semesters study. Jury examination is required. There shall be a jury which shall be for comments only unless the student is applying for entrance to the 101 level, at which time a graded jury is required. May not be taken for credit toward the major.

VOICE 100B Applied Study of a Second Instrument Credits: 2

Applied study of a second instrument. One half-hour lesson weekly. Applied study for those students who wish to pursue applied study in an area other than, and in addition to, their primary performance study. No jury examination is required.

VOICE 100C Applied Study for the Non-Music Major Credits: 2

Applied study for the non-music major. One half-hour lesson weekly. No jury required.

VOICE 411 Vocal Coaching: Voice Recital Preparation Credit: 1

The purpose of vocal coaching is to aid singers in refining their performance skills in terms of musical style, nuance, language, diction, and character. It is intended to amplify the singer's understanding of the many aspects of performance including musical shaping, dynamic contrasts, poetic/textual architecture, traditional approaches to literature of various periods and styles, and appropriate performance practices related to voice recitals and/or the operatic stage. In addition, singers will develop additional skills in working with a collaborative pianist and explore appropriate expectations when working with conductors/stage directors.

WGS 201 Introduction To Women's, Gender, and Sexuality Studies Credits: 3

This class provides an introduction to the interdisciplinary field of women's, gender, and sexuality studies. The focus of this course will be the many ways gender is integral to our understanding of our world and the communities in which we live.

WGS 301 Introduction to Feminist Theory Credits: 3

This course covers a wide variety of feminist theories and theoretical perspectives, primarily since the 1960s, and is devoted to understanding and evaluating this body of work and the insights and possibilities for change that it suggests.

WGS 405 Special Topics In Women's, Gender, and Sexuality Studies Credits: 1-3

Each time this course is offered a different area of Women's and Gender Studies will be covered. This course may be repeated for credit when the topic changes.

WGS 408 Gender, Health, and Development in Senegal Credits: 3

This course examines women's economic empowerment, health education initiatives, philanthropy, and social entrepreneurship in West Africa and Senegal in particular. In the main city of Dakar we will visit indigenous and global nonprofits to study their policies and processes. The culture, both urban and rural, will be experienced in order to provide a unique perspective on the Senegalese and their culture.

WGS 484 Women's, Gender, and Sexuality Studies Internship Credits: 1-4

The Women's, Gender, and Sexuality Studies Internship Program is an opportunity for undergraduate students to gain on-site experience. Students will receive 1-4 hours of academic credit while learning and working in off- or on-campus placements. Students will engage in the ongoing feminist effort to integrate research with social activism as they apply academic knowledge to their work experience and consider how practical experience informs or alters theory. Internship experiences may take place on or off-campus, such as at the UMKC Women's Center or a local battered women's shelter. The Women's Center Director serves as coordinator for all internship experiences.

Prerequisites: WGS 201.

WGS 499 Women's, Gender, and Sexuality Studies: Senior Seminar Credits: 3

This capstone course focuses on research leading to a term paper on a Women's, Gender, and Sexuality Studies Topic.

Mission and Administrative Organization of Graduate Education

School of Graduate Studies Mission

The School of Graduate Studies (SGS) provides a support network that promotes excellence in graduate education, and supports current and prospective graduate students in achieving their full potential. We do this by:

- Advocating for graduate education
- Recruiting and retaining students
- Assuring quality control in graduate programs
- Managing and distributing financial support
- Providing support services for graduate students
- Partnering with others to promote graduate education

School of Graduate Studies Vision

The vision of the School of Graduate Studies (SGS) is to be a leader in urban graduate education through the support of a diverse student body who advances knowledge and positively impacts our regional, state, national, global, and disciplinary communities.
