- **SLO 1: FOUNDATIONAL KNOWLEDGE** Candidates synthesize major theoretical, conceptual, historical, and evidence-based foundations of literacy and language, the ways in which they interrelate, and the role of the reading/literacy specialist in schools. **SLO 2: CURRICULUM AND INSTRUCTION** Candidates use foundational knowledge to design literacy curricula to meet needs of learners, especially those who experience difficulty with literacy; design, implement, and evaluate small-group and individual evidence-based literacy instruction for learners; collaborate with teachers to implement effective literacy practices. **SLO 3: ASSESSMENT AND EVALUATION** Candidates evaluate, select, and use valid, reliable, fair, and appropriate assessment tools to screen, diagnose, and measure student literacy achievement; inform instruction and evaluate interventions; assist teachers in their understanding and use of assessment results; advocate for appropriate literacy practices to relevant stakeholders. **SLO 4: DIVERSITY AND EQUITY** Candidates synthesize research, relevant theories, pedagogies, and essential concepts of diversity and equity; the ways in which these interrelate with themselves and others as cultural beings; create classrooms and schools that are inclusive and affirming; advocate for equity at school, district, and community levels. **SLO 5: LEARNERS AND THE LITERACY ENVIRONMENT** Candidates use a variety of print and digital materials to meet the developmental needs of all learners; engage and motivate all learners; integrate digital technologies in appropriate, safe, and effective ways; and collaborate with school personnel to foster a positive climate that supports a literacy-rich learning environment. **SLO 6: PROFESSIONAL LEARNING AND LEADERSHIP** Candidates collaborate with colleagues to use evidence to design and facilitate literacy interventions in school- or community-based settings; evaluate, revise, and improve their practice; develop their leadership and facilitation skills; and advocate on behalf of teachers, students, families, and communities.

Language and Literacy: MA Degree Program

MA Program Mission

The Language and Literacy MA Degree Program prepares exemplary literacy educators to meaningfully contribute to schools and communities as teachers, leaders, and advocates. Students in this program study literacy from critical sociopolitical, cultural, psychological, historical, linguistic, and literary perspectives, and apply their knowledge in culturally and linguistically diverse classrooms. Students develop and evaluate effective, evidence-based instructional strategies, practices, and programs that support literacy learning and achievement at PreK-12, college, or adult levels. The program curriculum emphasizes collaborative inquiry and innovation, equity, advocacy, and professional leadership and learning.

The Language and Literacy MA program is aligned with national standards for the preparation of specialized literacy professionals, as established by the International Literacy Association and CAEP. It also reflects principles and rigorous standards approved by Missouri's State Board of Education.

MA Educational Goals

Goal 1: Candidates will synthesize foundational knowledge related to language and literacy development, including appropriate cognitive, linguistic, motivational, and critical sociocultural theories, relevant research, and essential concepts of diversity and equity.

Goal 2: Candidates will design, implement, and evaluate literacy curriculum and instruction that meets the needs of diverse learners through effective, evidence-based practices, assessments, and environments.

Goal 3: Candidates will collaborate with a variety of stakeholders, including professional colleagues and families, to positively impact literacy learning and achievement in PreK-12, college, or adult educational contexts.

Goal 4: Candidates will advocate for ethical, equitable, and inclusive literacy practices, assessments, and learning environments that recognize and value diversity in schools and society.

Goal 5: Candidates will engage in professional learning, leadership and systematic and ongoing reflection on their practice.

MA Student Learning Objectives

Adapted from *Standards for the Preparation of Literacy Professionals 2017*. Specialized Literacy Professionals Matrix by Roles © 2018 by the International Literacy Association.

SLO 1: FOUNDATIONAL KNOWLEDGE

Candidates synthesize major theoretical, conceptual, historical, and evidence-based foundations of literacy and language, the ways in which they interrelate, and the role of the reading/literacy specialist in schools.

SLO 2: CURRICULUM AND INSTRUCTION

Candidates use foundational knowledge to design literacy curricula to meet needs of learners, especially those who experience difficulty with literacy; design, implement, and evaluate small-group and individual evidence-based literacy instruction for learners; collaborate with teachers to implement effective literacy practices.

SLO 3: ASSESSMENT AND EVALUATION

Candidates evaluate, select, and use valid, reliable, fair, and appropriate assessment tools to screen, diagnose, and measure student literacy achievement; inform instruction and evaluate

interventions; assist teachers in their understanding and use of assessment results; advocate for appropriate literacy practices to relevant stakeholders.

SLO 4: DIVERSITY AND EQUITY

Candidates synthesize research, relevant theories, pedagogies, and essential concepts of diversity and equity; the ways in which these interrelate with themselves and others as cultural beings; create classrooms and schools that are inclusive and affirming; advocate for equity at school, district, and community levels.

SLO 5: LEARNERS AND THE LITERACY ENVIRONMENT

Candidates use a variety of print and digital materials to meet the developmental needs of all learners; engage and motivate all learners; integrate digital technologies in appropriate, safe, and effective ways; and collaborate with school personnel to foster a positive climate that supports a literacy-rich learning environment.

SLO 6: PROFESSIONAL LEARNING AND LEADERSHIP

Candidates collaborate with colleagues to use evidence to design and facilitate literacy interventions in school- or community-based settings; evaluate, revise, and improve their practice; develop their leadership and facilitation skills; and advocate on behalf of teachers, students, families, and communities.

Program Requirements

This degree can usually be completed within five semesters. Coursework is available in online and hybrid formats.

Code	Title	Credits
Specific Reading Teaching Knowledge Requirements (21-24 hours)		
EDRD 5439	Language and Literacy Across the Disciplines	3
EDRD 5501	Teaching Of Reading	3

EDUC-R&P 5510	Child Behavior And Development	3
EDUC-R&P 5512	Adolescent Development and the School	3

Total: Minimum 30 credit hours required

Master of Arts: Special Education

Admission Requirements

Candidates entering the master's program with emphasis in MM/CC disabilities must hold a baccalaureate degree and have an overall 3.0 GPA or higher on a 4.0 scale and successfully complete an interview with program faculty. Official admission to the University of Missouri-Kansas City graduate school is required. Admission deadlines are at least 10 business days prior to the beginning of each new term.

The Master of Arts in Special Education degree program leads to initial teacher certification in Special Education in the state of Missouri. The focus for certification is mild/moderate cross-categorical disabilities. This degree is sought by those who wish to enhance their knowledge and skills in teaching children and adolescents with exceptional learning needs, to serve as advocates for children and their families, and to work collaboratively with colleagues.

Student Learning Outcomes

Students graduating from this program will:

- 1. Understand how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
- 2. Understand individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
- 3. Work with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.
- 4. Understand the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make these aspects of the discipline accessible and meaningful for learners to assure mastery of the content.
- 5. Understand how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.
- 6. Understand and use multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.

- 7. Plan instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.
- 8. Understand and use a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.
- 9. Engage in ongoing professional learning and use evidence to continually evaluate their practice, particularly the effects of their choices and actions on others (learners, families, other professionals, and the community), and adapt practice to meet the needs of each learner.
- 10. Seek appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

Minor: Exercise Science

Student Learning Outcomes

Students graduating from this program will:

- Integrate anatomic and biomechanics components of human movement, especially as they interact during athletic performance, bouts of exercise and physical activities of daily life.
- Describe, explain, and apply physiological facts and principles to real life situations, especially as they occur in athletics, and fitness and health promotion establishments.
- Identify the specific anatomical considerations, physical conditioning requirements, diet and exercise regimes, and injury prevention strategies, needed to improve physical health outcomes.

- Describe ways to use theories of behavior change to develop programs addressing a variety of lifestyle changes.
- Demonstrate superior knowledge of exercise science.

Program Requirements

Coursework must be completed with a grade of C- or better.

Code	Title	Credits
HLSC 110	Personal Wellness	3
HLSC 120	Anatomy & Physiology I *	4
HLSC 160	Anatomy and Physiology II *	4
PHYS-ED 300	Mechanical Analysis of Human Movement (prereq: HLSC 120 and HLSC 160 or concurrent enrollment)	3
PHYS-ED 350	Physiology of Sport and Exercise (prereq: HLSC 120 and HLSC 160 or concurrent enrollment)	3
PHYS-ED 370	Psychology of Sport and Exercise	3
PHYS-ED 391	Fitness Assessment and Exercise Prescription	3
Total Credits		23

* If students are transferring an approved course equivalency for Anatomy & Physiology I & II that totals less than eight hours, they are required to take courses from the "strongly recommended" list to ensure they have earned a total of 23 hours to be awarded the Minor in Exercise Science. These courses include PHYS-ED 157, HLSC 200, and PHYS-ED 398.

Ph.D. - Counseling Psychology

Student Learning Outcomes

The main goal of our program is to prepare entry level health service psychologists trained in a counseling psychology model to improve the welfare of individuals and communities through scholarship and applied interventions. This main goal is broken down in four specific aims:

Aim 1: Graduates develop a professional identity as a health service counseling psychologist.

Aim 2: Graduates understand the importance and complexity of cultural and individual diversity, including knowledge of their cultural selves. They acquire the competence to apply knowledge of diversity in all areas of science and practice, and will engage in practice activities and research, attending to minority populations and/or other aspects of diversity.

Aim 3: Graduates understand psychology as a scientific discipline. They are able to create, evaluate, and ethically contribute to the empirical knowledge base of psychological practice and theory. They can carrying out original and independent empirical investigations of psychological phenomena.

Aim 4: Graduates are trained to meet the varied needs of their diverse clients using ethical interventions based in counseling theory and informed by science. Graduates are able to establish effective professional and inter-professional/interdisciplinary relationships and effectively use and provide supervision, consultation, and instruction/teaching.

Overview

The PhD program in Counseling Psychology offers broad and general training that emphasizes multicultural and individual diversity within a scientist-practitioner model. Our program model is intended to educate ethical and flexible health service counseling psychologists who can work in a variety of settings and rely on the underlying philosophies and values of counseling psychology and the scientist-practitioner model. The program has been fully accredited by the American Psychological Association since 1985.

Admission Criteria

The program accepts bachelor's-level and master's-level applicants. Approximately six to ten students are admitted to the Counseling Psychology program each year.

Recommended minimum for bachelor's level applicants:

- The completion of a bachelor's degree with a major in psychology.
- Official GRE scores obtained within the last five years.
- An overall undergraduate 3.0 GPA covering all college work taken prior to the bachelor's degree, or 3.25 for the major courses or the last 60 credits of the bachelor's degree.
- Additional requirements may apply for international students.

Recommended minimum for master's level applicants:

- The completion of a master's degree in counseling or a closely related area.
- Official GRE scores obtained within the last five years.
- Graduate GPA of 3.5 or above.
- Additional requirements may apply for international students.

Applicants will be evaluated using the following dimensions: academic potential, research potential, research interest, interpersonal characteristics, contribution to program diversity, commitment to multiculturalism, professional goals and interest, understanding of the profession of counseling psychology.

Alternative Criteria: students who do not meet the regular recommended criteria may be admitted under alternative criteria provided there is good reason to believe that the regular criteria do not adequately manifest the student's potential to do quality work in the program. The Counseling Psychology faculty reserves the right to require those who are admitted under the alternative criteria to take some background core courses in psychology before or during the first year of their doctoral training in the areas of general psychology, theories of personality, tests and measurement, abnormal psychology, experimental psychology, and introductory statistics. This decision will be made by the admission committee and the student's assigned advisor, and communicated to the student before he/she starts the program.

The admission committee will consist of three or more faculty members and one or more student members. The student member must be in his or her final year of the academic program (i.e., doing the pre-doctoral internship in the subsequent academic year). Using the above criteria, the admission committee will select approximately thirty applicants to be offered interviews. Campus interview will be recommended, but not required. Phone interviews are offered for those who cannot make the campus interview on our Interview Day. Admission will be offered to a small number of the applicants interviewed. In addition, the committee selects a list of those who were interviewed to serve as alternates. Candidates will be notified of the admissions decisions no later than March 15. Candidates are required to act on the notifications by April 15th. If a first-round candidate does not accept, an alternate for the position will be selected from the list of the remaining candidates. Alternates will have 7 days to act on the notification, but if the offer is made on or after April 15, they will have 3 days to give a definite response. In making decisions, the Counseling Psychology Program at UMKC does not discriminate against anyone on the basis of race, gender, ethnicity, sexual orientation, age, religion, nationality, or physical disability and appearance.

Admission Requirements

Admission deadline: December 1st

Please note that the application materials must be submitted to two separate offices:

MATERIALS TO BE SENT TO THE **UMKC ADMISSIONS OFFICE:**

University of Missouri – Kansas City
Office of Admissions
120 Administrative Center
5100 Rockhill Road
Kansas City, MO 64110-2499
Phone: (815) 235-1111

1. UMKC Application for Admission* online at <http://www.umkc.edu/admissions/>
2. Application Fee
3. Official transcripts from all post-secondary institutions
4. Official Graduate Record Examination (GRE), including the GRE writing scores, sent directly from ETS, obtained within the last 5 years. After you have taken the GRE, scores take 5-6 weeks to arrive at UMKC.

MATERIALS TO BE SENT TO **DIVISION OF COUNSELING AND EDUCATIONAL PSYCHOLOGY OFFICE:**

University of Missouri – Kansas City
ATTN: PhD in Counseling Admissions Committee
215 Education Building
5100 Rockhill Road
Kansas City, MO 64110-2499
Phone: 816)235-2722
Email: umkccep@umkc.edu

1. Cover Sheet for the PhD in Counseling Psychology (attached)
2. Curriculum Vita
 - Personal information (address, phone, email)
 - Educational background
 - Relevant clinical and research experiences

- Relevant volunteer work
- Honors or awards
- Membership / leadership in professional organizations
- Presentations and publications

3. Three letters of recommendation

- Raters should be professional references, this excludes family and friends
- Raters should address your suitability for professional studies in counseling
- Raters should address your interpersonal and intellectual functioning and skills in research, counseling and written and oral communication
- Raters should enclose their letters of recommendation along with the provided rating sheet (attached) in an envelope and sign their names across the sealed flap of the envelope

4. Personal statement

- Submit a concise 500 word max statement concerning your professional goals. Also, address your professional and applied interest and experiences.

*Please note that admission to UMKC does not guarantee admission to the Doctor of Philosophy degree program in Counseling Psychology.

Additional Requirement for International Applicants

Success in the counseling profession relies heavily on oral expression and, therefore, the Counseling and Educational Psychology division faculty require that all non-native English speaking international applicants demonstrate their proficiency in English, preferably by taking the internet-based Test of English as a Foreign Language (iBT TOEFL). Applicants are expected to demonstrate their oral English proficiency by obtaining a score of at least 23 points (score range 0-30) on the speaking section and at least 20 points (score range 0-30) on the listening section of the iBT TOEFL before their applications are reviewed by the admissions committee. Please be aware that the minimum admission score for the iBT TOEFL test set by the UMKC International Student Affairs Office is 79, and that the Counseling and Educational Psychology division requires specific minimum scores on the speaking and listening subtests in addition to the University requirement.

While iBT TOEFL scores are strongly preferred by the Counseling and Educational Psychology division faculty, scores on the International English Language Testing System (IELTS) will also be considered as evidence of English proficiency. Applicants taking the IELTS are expected to demonstrate their oral English proficiency by obtaining a score of at least 7 (score range 0-9) on the speaking subsection of the IELTS and a 6.5 (score range 0-9) on the listening subsection. In addition, applicants are expected to obtain a score of 6.5 on the total IELTS before applications are reviewed by the admissions committee. Please note that the minimum admission score for the IELTS test set by the UMKC International Student Affairs Office is 6, and that the division requires specific minimum scores and a higher overall score than the University requirement.

NOTE: Both TOEFL and IELTS scores must not be more than two years old.

Retention

Education majors are expected to maintain a quality of achievement significantly above minimum UMKC standards for degree work. Individual student progress will be monitored throughout the program. Satisfactory progress is required of all students for retention in the teacher preparation program. Students are expected to maintain academic standards, perform satisfactorily in clinical courses, refrain from academic dishonesty, comply with the established University and teacher education timetables and requirements, and refrain from unethical or unprofessional behavior or behaviors that obstruct the training process or threaten the welfare of the student or others. Other circumstances involving student behavior will be addressed by the faculty on an individual basis.

Title II Notice

Title II of the Higher Education Act requires that every institution of higher education provide public information regarding the pass rate of the institution's graduates on the teacher certification or licensure assessment of the state in which the institution is located. Additionally, Title II requires that a comparison of each program's pass rate be made with the average pass rate in the state. Annual reporting on licensure assessments and other measures can be found at <https://education.umkc.edu/about/leadership/annual-reporting-measures/>

Scholarships

School of Education Scholarship Information

Three types of scholarships are available to students: Automatic (considered when applying to UMKC); Additional scholarships to apply for through the UMKC Financial Aid and Scholarships Office, and School of Education scholarships. The SOE scholarships are available to undergraduate and graduate students in our programs.

Applicants

- Must be admitted to the School of Education
- Submit application typically by February 1st (official date will be posted on the School of Education website)
- Must complete a new application each year
- Previous recipients may reapply
- Number and dollar amount of awards vary from year to year
- Awards are not automatically renewable
- Undergraduate students must be enrolled in at least 12 credit hours each semester during the new academic year to receive a scholarship
- Graduate students must be enrolled in at least 6 credit hours each semester during the new academic year to receive a scholarship

Procedures

The procedure for applying for a scholarship will be found on the School of Education website.

Selection Process/Timeline

- December: Scholarship application opens
- February 1st: Applications are due and committee begins review
- April: All applicants are notified if selected
- September: All scholarship recipients will be honored at the SOE scholarship event scheduled in the beginning of the next academic year.

For more information about the SOE Scholarships go to <http://education.umkc.edu/students/scholarships-and-financial-aid/>

Special Services

Public School Placements

The School of Education assists in making placements to enable teachers and other school personnel to complete their various practicum experiences. All field placements require students to have a current background clearance check.

Students admitted to the Teacher Education program are required to complete practicums within one of the School of Education's nine partner districts (Center School District, KCMO, KCKS, Grandview, Hickman Mills, Independence, North Kansas City, Raytown, Turner and UMKC-sponsored charter schools). All Teacher Education programs require students to complete at least a semester-long student teaching experience. During student teaching, students are under the guidance of cooperating mentor teachers and members of the University's education staff. Weekly seminars are a required part of the program.

Career Services at UMKC

The Career Services Office offers a variety of career and job-related services to students and alumni. Through Career Services, students can receive resume, interview and job search assistance. Teacher Education and School Counseling students in their last year of coursework can interview with representatives of area school districts through a Career Day sponsored by Career Services.

Students or graduates seeking a teaching or administrative position are urged to register and keep their records current in the Career Services Office, Atterbury Student Success Center, 5000 Holmes (2nd Floor), phone (816) 235-1636 or check their Web site: <http://www.career.umkc.edu/>.

Education Lab

Two computer labs are located in the School of Education Learning Commons in room 129 in the Education Building. Lab resources include Windows Pro workstations, printers and scanners. For more information including hours of availability, contact SOE Student Services, room 129, phone (816) 235-2716, email umkceducation@umkc.edu.

Student Organizations

The *School of Education Student Government* strives to expand the students' academic concerns and abilities, promote students' involvement in the School of Education and the University, act on all matters concerning students' welfare, aid faculty and students in cooperative work and promote a professional attitude and feeling of responsibility. Community service is also a regular part of the activity of the SOESG. The organization meets on a regular basis and welcomes all students' attendance and participation.

The *American Psychological Association – Student Affiliate Group* encourages professional development within the field of counseling psychology. It also serves as a meeting time for the members to discuss issues and concerns of the counseling psychology doctoral program. It encourages students to organize educational, social and fund raising events, and to act as a liaison with the counseling psychology faculty and the UMKC community.

The *Master's of Counseling Student Organization* (MCSA) is the organization for students pursuing their Master's in Counseling and Guidance. It serves as a source of support and advocacy for students enrolled in the program. In addition to seminars and social events, MCSA has a student mentorship program. For more information, contact your MCSA officers or the division Administrative Assistant at (816) 235-2722.

The *Higher Education Student Association* (HESA) is a student-run organization founded to further the understanding of the purpose and practices of higher education. HESA's purpose is to serve the specific and current needs of students enrolled in or interested in the Higher Education Administration program at UMKC. The goals of the organization are to:

- Create a community among higher education administration students, faculty, and alumni
- Provide a forum for the exchange of ideas on current issues in higher education
- Offer professional experiences in conference participation, planning and organization
- Network with other Higher Education Student associations
- Assist in the professional advancement of members

Undergraduate Programs

The School of Education offers the following undergraduate degree programs:

- B.A., Early Childhood Education (p. 1473)
- B.A., Elementary Education (p. 1478)
- B.A., Middle School Education (p. 1483)
- B.A., Secondary Education (p. 1487)
- Minor, Exercise Science (p. 1533)

Students may contact the School of Education Student Services Office for specific program information.

Students may also elect to pursue a dual degree between Education and Arts and Sciences. Secondary education majors may earn a B.A. or B.S. degree in a major in the College of Arts and Sciences. Elementary and early childhood education majors may earn a bachelor of liberal arts degree in the College of Arts and Sciences. Contact the advising office of the College of Arts and Sciences for more details.

General Information

The School of Graduate Studies is responsible for monitoring compliance to the campus-wide minimum graduate academic regulations, which are explained in detail in the **General Graduate Academic Regulations and Information** section of this catalog. Working with and through the Graduate Council and Graduate Officers Committee, the School also provides leadership and coordination of all graduate programs, offers programs to prepare graduate students for faculty positions in a variety of educational settings, and administers a number of competitive graduate fellowships.

The School also serves as the academic and administrative home for students admitted to the Interdisciplinary Ph.D. program. All other graduate students are admitted to the school or college in which their degree programs are housed.

Courses

SGS 5501 Disability and Community Support Credits: 3

This is an academic service-learning course that will integrate 15 classroom contact hours with 60 service hours within a framework of Disability Studies.

Prerequisites: LAW 8815S.

SGS 5590A Special Topics Credits: 1-6

SGS 5651A Preparing Future Faculty I Credit: 1

Course is the first in a 6-course series focusing on teaching at a college or university and exploring the opportunities at, and differences among, various types of institutions of higher education. Course development and exploring the various roles and responsibilities of university faculty members are the emphases of the first two courses.

Prerequisites: Year I Preparing Future Faculty Fellow or doctoral student recommended by two faculty members in student's doctoral program.

SGS 5651B Preparing Future Faculty II Credit: 1

Course is the second in a 6-course series focusing on teaching at a college or university and exploring the opportunities at, and differences among, various types of institutions of higher education. Course development and exploring the various roles and responsibilities of university faculty members are the emphases of the first two courses.

Prerequisites: SGS 5651A.

SGS 5652A Preparing Future Faculty III Credit: 1

Course is the third in a 6-course series focusing on teaching at a college or university and exploring the opportunities at, and differences among, various types of institutions of higher education. The emphasis in SGS 5652A and SGS 5652B is on the teaching/classroom experience including using technology effectively. Students may enroll simultaneously in SGS 5651A and SGS 5652A.

Prerequisites: Year 2 Preparing Future Faculty Fellow, or recommendation by two faculty members in student's doctoral program.

SGS 5652B Preparing Future Faculty IV Credit: 1

Course is the fourth in a 6-course series focusing on teaching at a college or university and exploring the opportunities at, and differences among, various types of institutions of higher education. The emphasis in SGS 5652A and SGS 5652B is on the teaching/classroom experience with a focus on using technology effectively. Students who have completed SGS 5651A and SGS 5652A may enroll simultaneously in SGS 5651B and SGS 5652B.

Prerequisites: SGS 5652A.

SGS 5653A Preparing Future Faculty V Credit: 1

Course is the fifth in a 6-course series focusing on teaching at a college or university and exploring the opportunities at, and differences among, various types of institutions of higher education. The emphasis in SGS 5653A and SGS 5653B is on academic collaboration and preparing for the academic job market. Students may enroll simultaneously in SGS 5652A and SGS 5653A.

Prerequisites: EDUC-R&P 5639 and either Preparing Future Faculty Fellow or recommendation by two faculty members in student's doctoral program.

SGS 5653B Preparing Future Faculty VI Credit: 1

Course is the last in a 6-course series focusing on teaching at a college or university and exploring the opportunities at, and differences among, various types of institutions of higher education. The emphasis in SGS 5653A and SGS 5653B is on academic collaboration and preparing for the academic job market. Students who have completed SGS 5652A and SGS 5653A may enroll simultaneously in SGS 5652B and SGS 5653B.

Prerequisites: SGS 5653A.

Mission and Administrative Organization of Graduate Education

UMKC currently offers more than 50 graduate degrees at the master's, educational specialist and doctoral levels, plus a number of graduate certificates. Graduate students represent about 35 percent of the total campus enrollment. The graduate student population is diverse in ethnicity, gender and racial background. As an urban university, our programs strive to accommodate adult working students. Nearly two-thirds of all graduate students are enrolled part time and the average age is 35.

The Graduate Council, representing a cross section of campus graduate faculty, sets policy, establishes minimum graduate education standards and monitors the quality of graduate education at UMKC. The graduate faculty in the various graduate degree programs may set standards more stringent than the minimums outlined in this catalog section, and in such cases, the program standards take precedence over the campuswide minimum regulations. The School of Graduate Studies is responsible for monitoring compliance to the campuswide minimum graduate academic regulations; providing leadership and coordination of all graduate programs; and serves as the academic home for students admitted to the Interdisciplinary Ph.D. program. Information on the Interdisciplinary Ph.D. program (p. 1538) may be found in the School of Graduate Studies section of this catalog.

Interdisciplinary Leadership Certificate in Disability Studies

Minimum Requirements for Admission

Possession of a baccalaureate degree from a regionally accredited institution is required. Application for admission to the Leadership Certificate in Disability Studies program must be made to the School of Graduate Studies.

Student Learning Outcomes

Students graduating from this program will:

- Demonstrate appropriate depth and breadth of knowledge in their disciplines.
- Use skills of interdisciplinary scholarship and research to integrate multiple perspectives.

- Work effectively in a collaborative environment.
- Effectively communicate results of their research to diverse audiences.
- Understand and value diverse approaches to problems.
- Use self-reflection for personal and professional improvement.

Program Requirements

The Interdisciplinary Leadership in Disability Studies certificate program is offered through the School of Graduate Studies and the Institute for Human Development. Disability Studies is a relatively new, interdisciplinary field that studies disability from a social and cultural context. The certificate can be completed either in conjunction with a graduate degree program or as a free-standing credential. Students in such diverse fields as sociology, psychology, nursing, pharmacy, law, social work, public administration, urban planning and design and education are well suited for this certificate. Students who receive the certificate will be prepared to influence public policy, professional practice, societal arrangements and cultural values that shape the meaning of disability.

Required Courses

Code	Title	Credits
LAW 8815R	Disabilities And The Law	2-3
SOC-WK 5563	Life Span Issues in Developmental Disabilities	3
SGS 5501	Disability and Community Support	3

Curriculum Requirements

At least 60 percent of the certificate course work must be at or above the 500 level.

Credit Hours

A minimum of 12 credit hours is required for the certificate.

Requirements for Retention

Students must maintain a 3.0 grade point average while enrolled. The minimum acceptable grade for 400 level courses is B, and for 500 level and above courses, B-.

Time Limit for Completion of Certificate Program

All work toward the Leadership Certificate in Disability Studies must be completed in 4 years.

Contact Information

For additional information contact:

UMKC Institute for Human Development
215 W. Pershing Road, 6th Floor
Kansas City, MO 64108
(816) 235-1770

Graduate Certificate in College Teaching & Career Preparation

Minimum Requirements for Admission

Applicants to the "Preparing Future Faculty" Graduate Certificate in College Teaching and Career Preparation can be current UMKC graduate students or graduate students who reside in states where UMKC is authorized to deliver online education to residents. All applicants must have the recommendation of their primary graduate advisor or their supervisory committee chair and their faculty mentor, who may serve both these types of roles.

Although space in the program is limited and current doctoral students will be given first preference, all graduate students who are recommended by a faculty member in their discipline area may also be considered for admission to the program.

The course requirements include six 1-credit hour seminar courses completed in four consecutive semesters. The remaining 6 credit hours in the program include one teaching theory practicum course and an elective course chosen from a provided selection that is to be determined by the student in consultation with the Director of the Graduate Certificate Program and/or the graduate faculty member who will serve as their faculty mentor.

Student Learning Outcomes

Students graduating from this program will:

- develop a syllabus for an introductory course in the student's field that includes student learning outcomes and assessment of learning outcomes.
- develop a teaching philosophy statement, curriculum vitae, cover letter for a job application, and presentation of a research agenda in an electronic teaching portfolio.
- demonstrate an understanding of how expectations for teaching, research and service are incorporated into a faculty member's day-to-day activities.
- explore the differences among different types of institutions for faculty teaching, research, and service expectations in higher education.
- collaborate with peers and mentors to demonstrate expanded knowledge of effective pedagogical techniques and theories of cognition and motivation, including online educational settings, to support diverse learners.

Student learning outcomes for the program are designed to meet the student's individual needs and research interests, and satisfy discipline-specific requirements.

Program Requirements

In today's competitive academic job market, academic institutions increasingly desire faculty members who not only possess the appropriate academic credentials, but can demonstrate that they are prepared to be excellent teachers and well-rounded colleagues. The 12 credit hour graduate certificate in College Teaching and Career Preparation is intended primarily for doctoral students who are preparing for college-level teaching careers, regardless of the discipline(s) in which they plan to teach; however, students from all graduate degree programs, and who are recommended by a faculty member in their discipline area, will also be considered for admission. The structure of this graduate certificate program balances the emphases on both career exploration and teaching excellence.

The certificate complements the discipline knowledge of graduate programs by (1) focusing on strategies for successful teaching, including incorporating technology into the college classroom and in online learning environments, and (2) familiarizing students with the demands of college teaching and the nature of the academic environment in a variety of institutions of higher education. Courses that satisfy program requirements are taken for graduate credit; and, upon completion, the certificate is officially noted on the student's transcript.

Curriculum Requirements

The "Preparing Future Faculty" Graduate Certificate in College Teaching and Career Preparation requires a minimum of 12 credit hours. A six-course series of Preparing Future Faculty (PFF) seminar courses is the core of this 12 credit hour graduate certificate curriculum. The one-credit hour seminar courses are graded on a credit/no credit basis and are offered year-round for four semesters, with a new cohort beginning each Fall semester. Students in the PFF Seminar courses not only refine their teaching skills, but also explore the opportunities at, and differences among, a variety of institutions of higher education -- public, private, 2-year and 4-year. For the remaining six credits of the certificate program, students complete a 3-credit hour theoretical teaching practicum course, EDUC-C&I 5640, plus one of the following 3-credit hour courses as approved by the graduate certificate program director: EDUC-R&P 5639 **OR** EDUC-UL 5556.

All courses are taught completely on-line, with 3 on-campus monthly PFF lecture sessions in the Fall and Spring semesters that can be attended face-to-face or via distance education technology.

Code	Title	Credits
Required Core Courses		
Seminars		6
SGS 5651A & SGS 5651B	Preparing Future Faculty I and Preparing Future Faculty II	2
SGS 5652A & SGS 5652B	Preparing Future Faculty III and Preparing Future Faculty IV	2
SGS 5653A & SGS 5653B	Preparing Future Faculty V and Preparing Future Faculty VI	2
One additional course		3
EDUC-R&P 5639	Educational Psychology: Focus on Teaching in Higher Education	3
EDUC-UL 5556	The College Student	3
Teaching Practicum		3
EDUC-C&I 5640	Curriculum and Teaching for the College Classroom	3
Total Credit Hours		12

Requirements for Retention

Students must maintain a cumulative 3.0 graduate GPA while enrolled and receive no grade below a B- in courses applied to the certificate program.

Time Limit for Completion of Certificate Program

3 years maximum.

Interdisciplinary Ph.D. Program

Mission, Philosophy and History

Research is rapidly expanding as global problems and issues require scholars with an interdisciplinary approach to problem solving. It will no longer be enough to know one area, one discipline, one field. Inquiry and discovery are crossing disciplines. For this reason, in 1990, UMKC developed and introduced an interdisciplinary doctoral degree program that spans traditional boundaries across disciplines while helping students develop knowledge and skills for independent research on the fundamental questions of the present and the future.

The Interdisciplinary Ph.D. program is designed to provide self-directed students with academic training at the highest level of scholarship, while allowing their participation as colleagues in research of fundamental importance. Students in the program develop the ability to integrate principles and theories from at least two disciplines (Primary and Co-Discipline), using approaches, methods, ethical principles, and tools to pursue a research line of inquiry.

There are currently 20 Primary disciplines and 21 Co-Disciplines accepting applications for the Interdisciplinary Ph.D. program. Enrollment in the program includes more than 360 students. More than 800 students have graduated during the program's existence.

The following core values and attributes underscore UMKC's Interdisciplinary Ph.D. program:

Learning is enhanced by a search for knowledge across discipline boundaries.
Therefore, the program:

- Is student-centered.
- Enables students to acquire the skills of interdisciplinary scholarship and research.
- Broadens students' exposure to multiple academic fields.

Interdisciplinary research draws on discipline-based knowledge, generating integrated solutions to problems that cross discipline boundaries.
Therefore, the program:

- Is problem-oriented.
- Integrates the attributes of a broad-based interdisciplinary approach with the grounding of a traditional academic focus.
- Provides a solid grounding in theories, concepts and methodologies of two or more disciplines.

Learning thrives in an environment open to a diversity of ideas, cultural backgrounds, discipline perspectives and approaches to problems.
Therefore, the program:

- Instills an appreciation of different disciplines.
- Integrates the disciplinary perspectives to give students the methodological and theoretical tools to thrive in a wide range of scholarly and professional environments.

Society derives great benefit from collaborative efforts that transcend discipline boundaries to solve problems. Therefore, the program:

- Prepares individuals to be multi-functional; to combine disparate skills to solve problems.
- Provides opportunities for individuals to gain skills in working within a collaborative environment.

In the course of pursuing a Ph.D., there are many skills students obtain that are transferable to other occupations. Acquisition of transferable skills allows graduates to compete for positions in a variety of work settings. Transferable skills such as analytical thinking and problem solving, verbal communication, project management, and technical writing and design, allow students to be nimble throughout their careers, changing positions and career directions.

Program Description

Applicants to the Interdisciplinary Ph.D. program must meet both the general and the discipline-specific criteria for admission and be recommended for admission by the doctoral faculty review groups in the chosen discipline(s). Upon approval by the graduate dean, students are admitted to the School of Graduate Studies. The School of Graduate Studies monitors student progress in the program, enforces program regulations and facilitates communication among the disciplines. A discipline coordinator, usually a doctoral faculty member, coordinates admission reviews and monitoring progress of students within each discipline.

Doctoral students in this program take coursework and conduct their research in at least two disciplines. The content of their program of study is formulated by the student, in consultation with UMKC doctoral faculty, to meet their individual needs and research interests and to satisfy discipline-specific requirements.

Program Goals

Students in the interdisciplinary Ph.D. Program will acquire:

1. grounding in the primary and co-disciplines;
2. the ability to integrate the principles and theories of each of the disciplines;
3. the ability to effectively communicate findings and approaches to solving interdisciplinary research problems;
4. research skills in each discipline such as approaches, methods, ethical principles, and tools to pursue a research line of inquiry;
5. the ability to form effective teams with diverse scholars across disciplines to solve novel research questions.

Disciplines currently participating:

Administrative and Information Sciences

- Educational Leadership, Policy and Foundations (School of Education)

Biological and Chemical Sciences

- Biomedical and Health Informatics (p. 1555) (School of Medicine)
- Cell Biology and Biophysics (School of Biological Sciences)
- Chemistry (College of Arts and Sciences)
- Molecular Biology and Biochemistry (School of Biological Sciences)
- Oral and Craniofacial Sciences (School of Dentistry)
- Pharmaceutical Science (School of Pharmacy)
- Pharmacology (School of Pharmacy)

Humanities and Arts

- English (College of Arts and Sciences)
- Humanities Consortium (p. 1587) (College of Arts and Sciences) *(only available as a co-discipline option)*
- Music Education (Conservatory) *(only available as a primary discipline option)*

Physical, Mathematical, Engineering and Computer Sciences

- Computer Networking and Communication Systems (School of Computing and Engineering)
- Computer Science (School of Computing and Engineering)
- Electrical and Computer Engineering (School of Computing and Engineering)
- Engineering (School of Computing and Engineering)
- Geosciences (College of Arts and Sciences)
- Mathematics (College of Arts and Sciences)
- Physics (College of Arts and Sciences)

Social and Behavioral Sciences

- Curriculum and Instruction (School of Education)
- Economics (College of Arts and Sciences)
- History (College of Arts and Sciences)
- Social Science Consortium: Economics, Political Science and Sociology (p. 1607) *(only available as a co-discipline option)*

The above list of participating disciplines constitutes a dynamic list that can change annually as members are added to or dropped from the doctoral faculty, or as the resources in various academic units change. Applicants should contact the School of Graduate Studies Office for information about modifications to the above list that might have occurred since this catalog was prepared.

Admission to UMKC's Interdisciplinary Ph.D. program is highly competitive. Enrollment in the program is limited, and admission is granted only to students who have a mature commitment to advanced study and scholarship. Admission is also subject to availability of adequate faculty and other resources within an applicant's chosen discipline(s).

After being admitted to the Interdisciplinary Ph.D. program, and no later than the end of the semester in which the student completes the Comprehensive Examination, each student must satisfy the interdisciplinary doctoral residency requirement by completing at least 18 credits, exclusive of dissertation research (5696-5699), within 24 months. Students may be admitted either provisionally or fully to the program; however, within 24 months of being fully admitted, each student must develop a Plan of Study proposal in consultation with the doctoral faculty members who have agreed to serve on the student's supervisory committee. Although no fixed set of courses is required, students are expected to prepare a rigorous Plan of Study that includes at least 30 didactic course hours beyond the baccalaureate degree, exclusive of thesis and dissertation research credits. More credit hours may be required by either the student's supervisory committee, the student's disciplines, the Interdisciplinary Ph.D. Executive

Committee, or the Dean of the School of Graduate Studies. The number of credits included on the Plan of Study shall be predicated upon the extent of the student's previous academic preparation, the discipline-specific requirements of the student's disciplines, and the nature of the student's field of study.

Students must take and pass a Comprehensive Examination containing components of each discipline to which they have been admitted to determine if they are ready to advance to candidacy and the final phases of their Ph.D. program. Typically the Comprehensive Examination will be conducted as the student nears completion of the didactic coursework listed on the plan of study. The final phases of the program shall comprise:

- Completion of significant research
- A written dissertation acceptable to the doctoral faculty
- Successful oral defense of the research work and dissertation

Program Administration

Quality control of the Interdisciplinary Ph.D. program rests with those faculty members certified by the University of Missouri to chair and serve on doctoral supervisory committees. These doctoral faculty members are responsible for the design and implementation of a student's doctoral plan of study and for the assessment of the qualifications of a student they recommend to the Curators for the Ph.D. degree. To help students formulate an appropriate plan of study, the doctoral faculty are divided into five broad groups corresponding to research interests and expertise. The groupings do not preclude an interdisciplinary plan of study and research involving more than one of these five groups, but are intended only to provide a structure that will assist students and doctoral faculty in developing a plan of study for each Interdisciplinary Ph.D. student. A 15-member executive committee of the doctoral faculty, chaired by the Dean of the School of Graduate Studies, formulates the policies that govern Interdisciplinary Ph.D. studies. Ten members of the committee are elected by the doctoral faculty. The Chancellor, in view of the election results and in consultation with the Dean of the School of Graduate Studies, appoints five members. There are three members from each of the five broad research areas. This process ensures representation from across the primary areas of responsibility assigned to the campus by the Curators. The Interdisciplinary Ph.D. Executive Committee is also charged with formulating, monitoring and reviewing goals of the Interdisciplinary Ph.D. program and recommending changes in goals, procedures and policies to the faculty. Any proposed major change must be ratified by the doctoral faculty of the campus.

Doctoral Faculty Participation in the Interdisciplinary Ph.D. Program

Major responsibility for assessment of Doctoral Faculty qualifications rests at the department level where nominations for membership are initiated. Doctoral Faculty must be duly nominated and approved regular (tenured or tenure-track) members of the faculty with the rank of assistant professor or higher. In UMKC's Interdisciplinary Ph.D. program, three members of a student's supervisory committee must be members of the UMKC doctoral faculty, and the research advisor must be from the primary discipline area.

There are three classifications of Graduate Faculty membership at the University of Missouri-Kansas City: (a) Graduate Faculty, (b) Ex-officio graduate faculty and (c) Adjunct Graduate Faculty. The Graduate Dean approves these appointments on an annual basis.

The supervisory committee shall be composed of one doctoral faculty from each of the primary and co-disciplines with a maximum of three from any one discipline. Up to two of the remaining members of each committee can hold either graduate or adjunct graduate faculty status. Final approval of the composition of each supervisory committee shall be obtained in writing by the advisor (or committee chair) from the Dean of the School of Graduate Studies. Where graduate or adjunct graduate faculty are included, the advisor shall provide a strong justification for their inclusion.

For purposes of the Interdisciplinary Ph.D. program, a discipline is defined as an academic unit, such as a department or division (with a chair/head) within a school, college or academic program. To be able to participate as a discipline in the Interdisciplinary Ph.D. program, a discipline, meeting the above definition, must have at least four regular doctoral-faculty members.

Doctoral Faculty Discipline Affiliation

Continuing doctoral faculty are reviewed for five-year reappointment and nominations for new appointments are considered throughout each academic year. Consequently, the list of doctoral faculty is dynamic and subject to change. Current lists are available from the School of Graduate Studies.

Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission

When preparing an application for admission, applicants must designate which one of the disciplines is to become the applicant's primary discipline for initial advising, record-keeping and receiving/sending mail in the event that admission is granted. A student's research advisor must be affiliated with the student's primary discipline.

All applicants are encouraged to review the requirements for the Primary and Co-discipline(s) by visiting the Interdisciplinary Ph.D. website (<https://sgs.umkc.edu/interdisciplinary-ph-d-studies-at-umkc/>). It is recommended that applicants talk to the Interdisciplinary Ph.D. Discipline Coordinators in their areas of interest BEFORE applying to the program. Discipline Coordinators offer valuable program, academic and application information.

Please read through all steps below before beginning your application!

To apply to the Interdisciplinary Ph.D. program, visit <https://futureroo.umkc.edu/apply/>

- Select “Graduate” and “Start New Application”
 - There will not yet be an option to choose the Interdisciplinary Ph.D. program.
- Complete the “Personal Info” section and “Continue.”
- Within the “Academic Information” section, you will choose your intended starting semester.
 - Put a check mark as to whether you have previously enrolled as a degree-seeking student at UMKC.
 - For “Degree Program,” select “Interdisciplinary Studies Ph.D.” Two more drop-down menus will appear for you to select your discipline choices.
 - Click “Continue” after selecting your choices.
- Complete the “Academic History.” Your official transcripts will be required for every institution listed here (exception: if you attended UMKC, you do NOT need to order the UMKC transcripts).
- In the “Test Scores” section, each test score entered requires the official scores to be sent to the university.
- Within “Letters of Recommendation,” you have the choice of your recommender uploading or mailing the letter. For an upload, the recommender will receive an email with a link. He/she needs to fill out the online form AND upload the letter.
 - Note that if you already have the letters in hand, you can upload them at the end of this process after submitting the application.
- Complete the “Additional Information” section.
- Complete the “Signature” section with your full name.
- Review your application and “Submit” it.
 - **Note: You cannot alter any information in the above steps after you click “Submit” here.**
- If you have other documents to submit, please use the next page to upload them under the appropriate categories (examples include a resume, writing sample, cover letter, or recommendation letters you already have).

To check your application status, please visit <https://futureroo.umkc.edu/status/> (<https://futureroo.umkc.edu/status/>)

Official transcripts should be sent directly to the UMKC Admissions Office. Please check with the Admissions Office (http://www.umkc.edu/admissions/contact_us.cfm) (domestic applicants) or the International Student Affairs Office (<http://www.umkc.edu/isao/>) (ISAO – international applicants) regarding the receipt of your official transcript(s). Your application cannot be reviewed until official transcripts have been received.

Test scores should be sent directly to UMKC from ETS - Institution code: 6872

Waiver requests for TOEFL/IELTS/GRE: Applicants must talk with the Interdisciplinary Ph.D Discipline Coordinators in their areas of interest BEFORE requesting a waiver for the official test score requirements. After talking with the Coordinators, a waiver request can be submitted in writing through the Application site. Upload your waiver request in a PDF format. Choose “Other” for the document type listed in the drop down menu.

If you have questions regarding the application process, please contact the School of Graduate Studies at 816-235-1301 or umkcsgs@umkc.edu.

Additional Information

1. The deadlines for applications to the Interdisciplinary Ph.D. program vary by discipline. All application materials must be uploaded, and test scores and official transcripts must be received in Admission Offices by the earliest discipline deadline. (For example, if one discipline’s deadline is February 1st and the other March 15th, then application materials must be received by the February 1st deadline.)
2. The timeline for applicants to expect admission decisions varies by discipline. Most admission decisions are made approximately four to six weeks after the latest deadline. For example, if one discipline deadline is February 1st and the other March 15th, an admission decision should be received, approximately, by April 15th to April 30th.
3. Applicants will be notified of admission decisions by mail. Newly admitted international applicants will receive necessary admission documentation by courier service from the International Student Affairs Office.
4. Admission decisions cannot be provided over the telephone.

Application for admission to Interdisciplinary Ph.D. study is made through the UMKC Admissions Office or, in the case of international applicants, through the UMKC International Student Affairs Office (ISAO). For additional program information, applicants should contact the School of Graduate Studies. E-mail requests may be sent to umkcsgs@umkc.edu (graduate@umkc.edu); the phone number is (816) 235-1301. Application information and an online application system are also available from the School of Graduate Studies Website.

Mailing Address

University of Missouri-Kansas City
School of Graduate Studies
AC 300F
5115 Oak Street

Kansas City, MO 64112-2499

The general criteria for admission for Interdisciplinary Ph.D. program study are as follows:

- Graduate Record Examination (GRE) scores will be evaluated by the disciplines *[If an applicant's GRE scores are more than five years old, and other predictors of ability to do doctoral-level work in the applicant's file are marginal, the applicant may be asked to retake the GRE general test before an admission decision is made].*
- A grade-point average of at least 2.75 (on a 4.0 scale) covering all college work taken prior to the bachelor's degree, or a grade-point average of at least 3.0 covering all post-baccalaureate work completed to date.
- Recommendation for provisional or full admission by the doctoral faculty review group in participating disciplines for a primary discipline and at least one co-discipline area.

Graduates of schools outside the United States may be considered for admission to this doctoral program at UMKC, subject to the following criteria.

1. They must have completed a course of study at least the equivalent of a U.S. baccalaureate degree.
2. They must have above-average grades in previous college study.
3. They are required to establish proof of adequate English proficiency as part of the UMKC admissions process. Applicants from countries in which English might be one of the official languages, but is not necessarily the first language of the majority of the population, must attain a minimum composite score of either 79 on the iBT Test of English as a Foreign Language (TOEFL), or a score of 6.0 on the IELTS to be considered for admission.¹ The results of the examination must be received in the UMKC International Student Affairs Office before the application deadline. Exceptions to this policy:
 - Non-native speakers who hold degrees or diplomas from post-secondary institutions in English-speaking countries (such as the United States, Antigua, Australia, Bahamas, Barbuda, Belize, Canada, Dominica, Fiji, Gambia, Ghana, Guyana, Ireland, Jamaica, Liberia, Mauritius, New Zealand, Sierra Leone, Solomon Islands, South Africa, St. Christopher (St. Kitts), St. Lucia, St. Vincent, Tobago, Trinidad, Uganda, United Kingdom [England, Scotland, Wales and Northern Ireland], Zambia and Zimbabwe), provided they have spent a minimum of two years in successful full-time study there and English was the medium of instruction.
 - International transfer students from other institutions in the United States or Canada who have spent a minimum of two years in successful full-time study.
4. In addition to 1 through 3 above, international graduate students must satisfy any program-specific admission criteria. For instance, the Graduate Management Admission Test (GMAT) is required for applicants for graduate study toward the M.B.A. degree. Several programs require TOEFL scores that are well above the minimum stated previously. The Graduate Record Examination (GRE), including the appropriate Advanced Test, is either required or strongly recommended for all other international graduate applicants. International students planning to apply are directed to consult the appropriate degree program listing for additional criteria and medical requirements. There are detailed instructions for the application process for international students available on the International Student Affairs Office (ISAO) website: <http://info.umkc.edu/ISAO/future-students/apply/>

¹ In the United States, the Educational Testing Service, Princeton, NJ 08541, U.S.A., can be contacted for application forms to take this test. Contact <http://www.ils.org/> for information on the International English Testing System. Detailed information can be obtained from U.S. embassies, consulates general, bi-national centers and other offices throughout the world.

Participating disciplines may establish whatever additional criteria or higher standards they consider to be appropriate and such discipline-specific criteria will take precedence over the general criteria. Applicants should note that several discipline areas have set more rigorous admission requirements, and a number of discipline areas have established qualifying requirements for students who intend to include that discipline in their doctoral programs. These discipline-specific requirements range from specific prerequisite coursework, to successful completion of a qualifying examination, to having the equivalent of a master's degree in the area, to having higher scores on specific segments of the GRE and are listed in greater detail later in this section.

Students may apply for admission with or without meeting the general criteria of the School of Graduate Studies and any additional criteria established by the discipline areas. Meeting these criteria does not automatically make any student eligible for admission. In exceptional circumstances, students who do not meet the general criteria of the School of Graduate Studies and the disciplines may be admitted.

The School of Graduate Studies' minimum requirements for admission to the Interdisciplinary Ph.D. program are determined by the doctoral faculty in the academic units in which the student will be doing work, and by the UMKC doctoral faculty through representation on the Interdisciplinary Ph.D. Executive Committee. Admission to the program is subject to availability of adequate faculty and other resources within an applicant's chosen disciplines and the approvals of the Dean of the School of Graduate Studies and the Interdisciplinary Ph.D. Executive Committee.

Application Procedure

The deadlines for applications varies by discipline.

Although new students in most disciplines may be accepted in all terms, some disciplines will only consider applications for the fall term.

Applicants are responsible for:

1. Submitting a completed **Application for Admission or Readmission to Interdisciplinary Ph.D. Studies** form to the UMKC Admissions Office, or in the case of international applicants, to the UMKC International Student Affairs Office (ISAO). All applications must be accompanied by the appropriate non-refundable application fee (\$45 for domestic applicants or \$75 for international applicants).
2. Uploading the following supplementary materials (shown below) into the online application site.
 - *A narrative statement / Statement of intent* outlining professional background and educational plans.
 - *Three letters of recommendation.* (The applicant provides referee contact information in the online application site. The referee receives an email invitation to upload the reference letter into the site.)
 - *Any supplemental material requested by the discipline(s).* Note that several disciplines require professional writing samples, tentative outlines of plans of study, or other supplemental materials to complete the application packet. Applicants should consult the discipline-specific information to determine whether supplemental materials are required by the disciplines they select.
 - *Resume / Vita*
3. Having the following supplementary documentation sent to the UMKC Admissions Office or in the case of international applicants, to the UMKC International Student Affairs Office (ISAO):
 - *Official test scores (GRE, TOEFL, etc.).* The applicant must request the testing agency to send official GRE test scores to the School of Graduate Studies. According to the Educational Testing Service:
 - GRE test scores are part of your reportable history for five years after the testing year in which you tested (July 1 – June 30). As of July 1, 2015, GRE scores earned July 1, 2010, to the present will be available in your reportable GRE score history.
 - Scores from individuals who tested between July 1, 2010 and July 31, 2011, were purged from the GRE database in mid-July 2016.
 - *Official transcripts from all colleges attended.* All applicants must submit an official transcript from the school where their bachelor's degrees were obtained. This transcript must show all courses, grades and credits attempted or completed at the undergraduate level. Unless the transcript of the degree-granting institution shows the complete record of undergraduate work taken at all other schools, an official transcript from each of the other institutions must be supplied. In addition, applicants must submit an official transcript from each school where other coursework has been taken or degrees have been obtained after the bachelor's degree.
 - *Waiver requests for TOEFL/IELTS/GRE:* Applicants must talk to the Interdisciplinary Ph.D. Discipline Coordinators in their areas of interest BEFORE requesting a waiver for the official test score requirements. After talking with the Coordinators, a waiver request can be submitted in writing through the online application system as an additional document.

International applicants must submit the following additional forms:

1. Official Statement of Finances form (Guidelines: <http://info.umkc.edu/ISAO/wp-content/uploads/2016/04/Admission-Requirements-Financial-Statement-Guidelines040816.pdf>)
2. Affidavit of Support – if a friend of family member is providing Statement of Finances
3. If transferring from another U.S. institution:
 - a. Transfer-In Form
 - b. Copy of passport
 - c. Copy of visa
 - d. Current I-20 or DS-2019
 - e. I-94 Form

All credentials submitted in support of the application for admission to the Interdisciplinary Ph.D. program become UMKC property. They will not be returned to the applicants and UMKC cannot copy them for release to a third party.

The deadlines for applications to the Interdisciplinary Ph.D. program vary by discipline. All application materials must be received by the earliest discipline deadline. (For example, if one discipline's deadline is February 1st and the other March 15th, then application materials must be received by the February 1st deadline.) If required test scores, transcripts, recommendation forms or supplementary documentation appropriate to the applicant's discipline selections are missing at the application deadline for the disciplines, the application will not be reviewed by the faculty review groups in the specified disciplines for admission in the term requested.

An applicant can expect the review and recommendation process to take approximately 4 to 6 weeks after the latest discipline deadline. For example, if one discipline deadline is February 1st and the other March 15th, an admission decision should be received, approximately, by March 31st to April 15th. The faculty review groups in some disciplines review all applications as a group, while in other disciplines, applications are reviewed and acted upon on a revolving basis, as received. The review and recommendation process within the disciplines varies in length depending upon the disciplines' review policies.

For questions about the contents of their admission files, or to determine whether their official transcripts or test scores have been received, applicants may contact the Admissions Office (816) 235-1111 or admit@umkc.edu. International applicants may check on the status of their applications by contacting the ISAO at <http://www.umkc.edu/isao/> (816) 235-1113 or isao@umkc.edu. Applicants may also contact the School of Graduate Studies, (816) 235-1301 or umkcsgs@umkc.edu for information on the status of their applications.

Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements

The following requirements pertain specifically to students pursuing Interdisciplinary Ph.D. programs. However, Interdisciplinary Ph.D. students are subject to, and also should refer to, those regulations common to all graduate students and the dissertation requirements common to all doctoral students included in the General Graduate Academic Regulations and Information section of this catalog. Students should also consult the specific requirements for the disciplines to which they have been admitted. Where discipline requirements are more stringent than the general requirements, the discipline requirements take precedence.

Change of Disciplines by Admitted Students (p. 1549)

Interim Advisor (p. 1549)

Qualifying Requirements for Full Admission (p. 1549)

Research Advisor and Supervisory Committee (p. 1549)

Interdisciplinary Ph.D. Plan of Study (p. 1550)

Interdisciplinary Ph.D. Residency Requirement (p. 1551)

Transfer Credit (p. 1551)

Comprehensive Examination (p. 1551)

Program Time Constraints (p. 1551)

Dissertation Research Proposal Development and Approval (p. 1552)

Dissertation and Completion of Degree (p. 1552)

Interdisciplinary Ph.D. Student Appeal Process (p. 1552)

Change of Discipline by Admitted Students

Once a student is admitted to Interdisciplinary Ph.D. study, any change of disciplines requires a review process by the disciplines, similar to the initial admission review. Forms to initiate this review may be obtained from the School of Graduate Studies or downloaded from their website.

Interim Advisor

Once an Interdisciplinary Ph.D. student is admitted to the School of Graduate Studies, the Coordinators of the chosen disciplines will serve as the student's interim advisors in those disciplines unless/until a suitable doctoral faculty member is identified. Students who have had minimal prior graduate study will be encouraged to explore research opportunities before choosing fields of endeavor.

As the student progresses and develops focused research interests, the interim advisors are expected to assist in identifying potential research advisors among doctoral-faculty members in appropriate research areas with whom the student can discuss research plans. The interim advisors also provide academic guidance until the student selects a research advisor, has satisfied all qualifying requirements and is classified as fully admitted. The interim advisor in the student's primary-unit discipline reports on the student's progress to the dean of the School of Graduate Studies. If another faculty member has not been identified as the research advisor by the time the student is fully admitted and ready to formulate the plan of study, the interim advisor in the primary unit discipline will automatically become the student's research advisor.

Qualifying Requirements for Full Admission

Admission to the Interdisciplinary Ph.D. program is granted on a provisional or fully admitted basis as determined by the doctoral faculty review group of the student's chosen discipline(s). Upon their acceptance as provisional Ph.D. students, applicants are notified of the specific qualifying requirements they must satisfy before they can be classified as fully admitted Ph.D. students. Provisional admission does not guarantee advancement to full admission, and full admission does not guarantee advancement to Ph.D. candidacy.

When all qualifying requirements have been completed, the primary advisor requests that the student's classification be changed to fully admitted.

Research Advisor and Supervisory Committee

The chair and a majority of the members of a student's supervisory committee must be from disciplines certified as eligible to participate in the Ph.D. program. The student's committee chair must be a regular doctoral faculty member from the student's primary discipline, and has the final authority over the student's program. A graduate or adjunct graduate faculty member may be the dissertation director if approved by the primary discipline.

The advisor assists the student in identifying other members of the doctoral faculty to form a supervisory committee appropriate to the student's research goals. A request for appointment of supervisory committee is included as part of the written proposal for the student's Ph.D. plan of study.

The supervisory committee shall consist of at least four members composed of one doctoral faculty from each of the primary and co-disciplines. Up to two of the remaining members of each committee can hold either graduate or adjunct graduate faculty status. Final approval of the composition of each supervisory committee shall be obtained from the Dean of the Graduate school. Where graduate or adjunct graduate faculty are included, the advisor shall provide a strong justification for their inclusion.

An outside reader may also be included on the supervisory committee as a non-voting member.

Annual Evaluation of Progress

Interdisciplinary Ph.D. students must submit a summary of their accomplishments over the previous year and a projection of the progress they intend to make during the next academic year. This annual evaluation form is distributed to students in two parts, one in the spring and one in the fall. The faculty advisors will review the student's report and provide feedback. Failure to meet this requirement may result in a hold being placed on the student's enrollment.

Plan of Study

Within 24 months of admission, a student chooses a research advisor and forms a supervisory committee. In consultation with the research advisor and other members of the proposed supervisory committee, the student prepares a proposed Ph.D. plan of study, obtains all required signatures and submits the proposed plan to the School of Graduate Studies for review and final approval. This submission *must occur within 24 months* of the semester admitted to the program. Failure to meet this requirement may result in a hold being placed on the student's enrollment.

In addition to any coursework completed prior to admission that is being credited toward discipline-specific requirements, the written Interdisciplinary Ph.D. plan of study includes courses and other activities at UMKC that should normally be completed approximately two years from the time the Ph.D. student is fully admitted, a preliminary research statement about overall plans for dissertation study and research, and a list of the proposed members of the supervisory committee.

The Interdisciplinary Ph.D. Plan of Study Guidelines

- The plan of study must include coursework from all the student's disciplines and must satisfy all of the applicable discipline-specific core requirements.
- Didactic coursework on the plan of study will include a minimum of nine credit hours in a co-discipline area.
- All plans of study must include a minimum of 12 hours of dissertation research (5696-5699) credit.
- At least two-thirds of the total courses included on the plan of study must be numbered 5500 or above if taken at UMKC, or, if taken from an institution with a course-numbering system that differs from UMKC's, they must be courses intended primarily for graduate students.
- UMKC courses at the 100 and 200 levels, and courses with equivalent lower-division numbers taken at another institution, are not available for graduate credit and may not be applied toward the hours required for the degree nor included in the discipline percentages.
- At least 75 percent of the coursework on the plan, exclusive of dissertation credits, must be in disciplines certified as eligible to participate in the Interdisciplinary Ph.D. program.
- Students' needs will be examined on a case-by-case basis by their supervisory committees, and appropriate language or related research skill requirements will be incorporated into each student's plan of study.
- The plan of study will include a brief description of the course focus and the name of the supervising professor for any independent study courses listed.
- The plan of study will specify which courses are being used to satisfy the residency requirement.
- The plan of study will outline the comprehensive examination expectations.
- The plan of study will include a preliminary research plan for the dissertation research, including key bibliographic references.

If modifications to discipline-specific requirements are made after the student is admitted, the student has the option of proceeding under either the requirements in place at the time the student entered the Ph.D. program or the current requirements.

Plan of Study Approval Process

Once the supervisory committee members and student have agreed on and signed the plan of study, appropriate academic officers corresponding to the student's choice of disciplines [dean(s) or program director(s), department chair(s), division head(s), etc.], must then review and certify by signature that the courses and all other resources are currently available at UMKC and in the respective units for the student to initiate the plan of study. The student then submits the certified plan of study to the Dean of the School of Graduate Studies for review and approval.

The School of Graduate Studies will accept Interdisciplinary Ph.D. plan of study proposals for review and final approval only if:

- The Ph.D. coursework falls within the guidelines outlined above.
- The student will enroll at UMKC for dissertation credit under the supervision of a UMKC doctoral faculty member.
- The plan includes written assurance from the appropriate academic officers that:
 - a. adequate faculty, laboratories, library support and all other necessary resources are presently available at UMKC to support the proposed Ph.D. plan of study, and
 - b. the courses included in the plan are either presently available at UMKC or can be taken by the student as a visiting student in a time period less than that required to satisfy the residency requirements on the other campus.

The School of Graduate Studies will either approve of the plan as presented or will return the plan to the student with recommendations for modification. Once the proposed plan of study and supervisory committee are approved by the Interdisciplinary Ph.D. Program Director, a confirmation letter will be sent to inform the student and committee of the approval. The approved plan will also be filed with the Registrar. Any further

modifications of the plan of study must be made in consultation with the student's supervisory committee and approved by the School of Graduate Studies.

Residency Requirement

Interdisciplinary Ph.D. students must satisfy the doctoral residency requirement by satisfactory completion of at least 18 credits in no more than 24 consecutive months. When satisfying the residency requirement, all Interdisciplinary Ph.D. students are subject to the following restrictions:

1. The doctoral residency requirement must be satisfied no later than the end of the semester in which the student completes his or her comprehensive examinations.
2. Students must achieve a cumulative graduate grade-point average of at least 3.0 in all courses counted toward satisfying the residency requirement.

Transfer Credit

Ph.D. plans of study are tailored to the needs of individual students based on their prior academic work as evidenced by transcripts and other credentials. An approved plan of study may recognize class work from other institutions as determined by the student's supervising committee, either as qualifying courses or as relevant to a program of study.

Graduate credit earned before entering a UMKC doctoral program may be applied to the doctoral degree if it is of acceptable quality and appropriate to the student's program of study as determined by the student's academic unit and supervisory committee. The total amount of graduate credit earned from all other academic institutions before admission to a UMKC doctoral program and applied to the doctoral degree cannot exceed half the number of credit hours, exclusive of dissertation research credits, required for the degree. For graduate coursework completed at UMKC prior to admission to a doctoral program, any number of credit hours required for the doctoral degree, exclusive of dissertation research, can be satisfied using previous UMKC graduate credit if approved by the student's academic unit and supervisory committee. All graduate coursework, completed prior to admission and not used to earn the master's degree or educational-specialist degree, must be no more than seven years old at the time the doctoral program of study is approved.

After admission to the doctoral program, if a student wishes to take graduate coursework at another institution and apply it to their doctoral program, the student must receive written approval from the doctoral program's graduate officer and from the student's supervisory committee chair, as appropriate, before the coursework is taken. Such coursework is not considered as transfer credit. Upon completion of the coursework, the student must have the official transcript forwarded to the UMKC registrar.

Comprehensive Examination

To advance to degree candidacy, Interdisciplinary Ph.D. students are required to pass a Comprehensive Examination that integrates components of each discipline to which they have been admitted. Either the written or oral or both component(s) of the Comprehensive Examination must include an evaluation of the student's ability to integrate content, theory and/or methods from each specified discipline. The doctoral Comprehensive Examinations must be completed at least seven months before the date of graduation.

The following requirements must have been met before students can take the Comprehensive Examination(s):

1. Successful completion of all qualifying requirements and full admission to the School of Graduate Studies.
2. Appointment of a research advisor and supervisory committee.
3. Filing and approval of the Ph.D. plan of study and completion of essentially all coursework or other study required for the degree.

The student must be enrolled when taking the Comprehensive Examination. Comprehensive Examinations are not administered when UMKC is not officially in session. The Comprehensive Examination may be written, oral or both. A student, through his or her advisor, applies to the Director of the Interdisciplinary Ph.D. program for an examining committee. This committee consists of members of the student's supervisory committee and others approved by the Director of the Interdisciplinary Ph.D. program. The examination is arranged and conducted by the examining committee. Upon completion of the examination, the student's research advisor sends a report of the results, carrying the signatures of all members of the examining committee, to the Director of the Interdisciplinary Ph.D. program, who then informs the student and the registrar. A student is considered to have passed the Comprehensive Examination if no more than 20 percent of the committee members vote for failure of the student. If failure is reported, the examining committee will either recommend termination as a Ph.D. student or suggest additional work or other remedial measures. Furthermore, a student who has failed may not take a second examination for at least 12 weeks. Failure of the second Comprehensive Examination shall automatically preclude candidacy at this institution.

Program Time Constraints

The doctoral student must take and pass the doctoral Comprehensive Examination and advance to candidacy within five years from the beginning of doctoral coursework (within four years if entering with a master's degree in the same or closely related field). After the establishment of degree candidacy, a maximum of five years will be allowed for completion of degree requirements. Failure to complete the work within the periods specified will necessitate re-evaluation of the entire program and may result in a notice of termination. In compelling circumstances and on the written

recommendation of a majority of the student's supervisory committee members, the Director of the Interdisciplinary Ph.D. program may grant a one-year extension. Some academic units may impose more stringent time requirements.

Dissertation Research Proposal Development and Approval

The student's supervisory committee must approve the research activities associated with a dissertation. These activities must be performed under the direct and continuing supervision of the supervisory committee chair. If the proposed research involves the use of human subjects, animals or radioactive materials, the student and the research advisor must obtain prior written approval of the proposed research by the appropriate Institutional Review Board, the Animal Care and Use Committee or the Radiation Safety Committee.

For the approval process, the Ph.D. candidate must submit a brief dissertation research proposal. The dissertation proposal shall include the following:

- An abstract.
- A statement regarding the general purpose of the research.
- Background information, including a review of the relevant literature, the rationale for the research and a concise statement of the hypotheses to be investigated and/or the research questions to be answered.
- Methods.
- Appropriate protocol or application if human subjects, animals or radioactive materials are to be used in the research.

This proposal must be approved in writing by all members of the student's supervisory committee and filed with the School of Graduate Studies. It is in the best interest of the Ph.D. student to complete the approval process of the dissertation research proposal before significant progress is made on the completion of the dissertation. Any important changes in the research outlined in the proposal must be approved by the supervisory committee.

Dissertation and Completion of Degree

Doctoral Dissertation Requirement

All UMKC Ph.D. degrees require a dissertation as the final component of the program. The doctoral faculty view the dissertation as one of the most important aspects of the student's experience because:

- It is a work of original research or scholarship that makes a contribution to existing knowledge.
- It is an educational experience that demonstrates the candidate's mastery of research methods and tools of the specialized fields.
- It demonstrates the candidate's ability to address a major intellectual problem.

For regulations pertaining to formatting the dissertation and the process for approval, the reader is directed to Thesis and Dissertation Preparation and Approval Process, included under Graduate Academic Regulations in this catalog section.

Final Dissertation Examination

Final examinations in defense of the dissertation are open to all members of the doctoral faculty, who may attend as interested observers. The format and procedures of the defense are determined by the supervisory committee and its chair. The date, time and location must be announced and published at least two weeks before each final examination takes place. This examination may be conducted only after the dissertation has been approved by the Dean of the School of Graduate Studies, and may not be administered when UMKC is not officially in session.

The defense of the dissertation is approved when a majority of the supervisory committee recommend approval and sign the Report of the Result of Final Doctoral Examination form. Within 48 hours of the defense, the supervisory committee chair will report the results of the final dissertation examination in writing to the candidate.

Deposit of Approved Dissertation with Libraries

For regulations pertaining to deposit of the approved dissertation with the libraries, please refer to Thesis and Dissertation Preparation and Approval Process, included under Graduate Academic Regulations in this catalog section.

Interdisciplinary Ph.D. Student Appeal Process

Students should process any petitions for waiver of policy or other academic appeals to their interim advisors or research advisors. The advisors should attach their recommendation and forward the request to the doctoral faculty review groups within the disciplines.

If the appeal does not require a policy decision, action on the appeal may be handled at the discipline level. If a policy decision is required or if, after action by the discipline, the student wishes a higher level of review of the case, the appeal or petition, complete with documentation of all reviews up to that point, may be forwarded to the Dean of the School of Graduate Studies for action or referral to the appropriate subcommittees of the Interdisciplinary Ph.D. Executive Committee.

Interdisciplinary Ph.D. Discipline-Specific Requirements

All Interdisciplinary Ph.D. applicants and students must first meet the general requirements of the School of Graduate Studies for admission and retention in the Interdisciplinary Ph.D. program. (General Graduate Academic Regulations and Information, Application Procedure and Minimum Criteria

for Admission, Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.) In addition to these general academic regulations that have been outlined in previous sections of the general catalog, disciplines may set more stringent discipline-specific requirements that take priority over the general requirements. Discipline-specific requirements for disciplines eligible to participate in the Interdisciplinary Ph.D. program are listed in alphabetical order by name of discipline. These guidelines are subject to ongoing review and revision, and the doctoral faculty reserves the right to make judicious changes in discipline-specific requirements. The student is referred to coordinators in the disciplines for the most current information.

Interdisciplinary Ph.D. Satisfactory Progress Policy

The UMKC Graduate Academic Regulations establish the maximum timeline for academic progress (see policy KC-ACA-3786) and ineligibility due to unsatisfactory progress or performance (see policy KC-ACA-3741). The satisfactory progress of doctoral students in the Interdisciplinary Ph.D. program is assessed annually by a student's primary doctoral mentor, discipline coordinator, supervisory committee (when appropriate) and the Interdisciplinary Ph.D. program director on the basis of academic performance, as well as by meeting the various deadlines for language examinations, qualifying and comprehensive examinations, dissertation proposal defense, and any other discipline specified requirements.

A student who fails to maintain satisfactory progress will be advised in writing by the Discipline Coordinator and the Interdisciplinary Ph.D. Program Director of the corrective steps needed, the timeline for meeting those steps, and apprised of the consequences of failing to take those steps. Failure to satisfactorily take corrective action by the established timeline could result in a recommendation by the Interdisciplinary Ph.D. Program Director to the Dean of the School of Graduate Studies for program dismissal and ineligibility for further graduate study. A student who fails to maintain satisfactory progress may also lose eligibility for financial aid or funding (e.g., assistantship, fellowship).

A student can be classified as "not making satisfactory progress" and recommended for possible dismissal at any point in their academic training, regardless of whether they are within the maximum time constraints outlined in the UMKC Graduate Academic Regulations.

Students who fail to make satisfactory academic progress and are consequently recommended for dismissal and ineligibility for further study have the right to submit documentation to the Dean of the School of Graduate Studies for review and consideration when determining the student's eligibility status. Per the UMKC graduate academic regulations, students have the right to appeal the Graduate Dean's decision to the Provost (p. 462).

Student Learning Outcomes

The course requirements for the program are not predetermined, but rather formulated by the student in consultation with the UMKC doctoral faculty who will serve on their supervisory committee, to meet the student's individual needs and research interests, satisfy discipline-specific requirements and assure upon graduation students are able to:

- Students will demonstrate a thorough degree of knowledge in the primary discipline and co-discipline.
- Students will demonstrate interdisciplinarity in their writing by integrating methods, theories, paradigms, concepts, etc. from more than one discipline.
- Students will demonstrate an ability to use proper investigation techniques for their chosen disciplines.
- Students will effectively use oral and written forms of communication to convey their ideas.

Art History

Art History is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies. **This discipline is currently NOT accepting new students for the primary or the co-discipline.** Questions should be directed to the Graduate Advisor, Dr. Cristina Albu, at (816) 235-2985 or AlbuC@umkc.edu.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

Except in unusual circumstances, students who select Art History as the primary discipline in the Interdisciplinary Ph.D. program must begin their work during the fall term. Applications must be received by the School of Graduate Studies no later than January 15. The Art History doctoral faculty will review applications and make recommendations for admission by the end of February. Applications that are incomplete as of January 15, and completed applications submitted after this deadline, may not be considered until the following year.

Scholarship awards and Graduate Teaching Assistantships are made in the spring, to begin the following fall; students may sometimes be able to apply for Graduate Teaching Assistantships in the fall, for the following spring.

In rare cases, with the approval of the discipline Coordinator and faculty advisor, students may apply in the fall for the following spring.

Applicants who choose Art History as their primary discipline, or applicants whose coursework in Art History will comprise at least 50 percent of the Ph.D. plan of study, must meet the criteria for admission specified by the School of Graduate Studies.

Applicants are expected to hold an M.A. in art history, anthropology or history (or earn its equivalent during course work) and a minimum graduate-level GPA of 3.5 on a 4.0 scale.

Students with a B.A. degree must apply to our M.A. program, as the first step.

Students with some graduate work beyond the B.A., but without the M.A. degree, *may* be considered for the Interdisciplinary Ph.D; they will be expected to complete all requirements for the M.A. degree.

In advance of the application (at least one month, but best to allow at least 6 weeks), eligible applicants should contact the discipline coordinator. The coordinator will help the student identify a faculty adviser.

Before an application is reviewed, a member of our doctoral faculty must agree to oversee the project. Faculty members generally accept applications only within their realms of expertise.

The discipline coordinator is available to help students with most aspects of the application process.

In addition to the required application form, test scores, recommendations and transcripts, applicants must provide:

1. A brief statement of academic and professional goals
2. A plan that specifies a research topic, demonstrates its interdisciplinary nature, and considers how interdisciplinary methods would be utilized (consult your faculty adviser)
3. Provide a research writing example (a research paper).

Suggested Compatible Co-disciplines

Curriculum and Instruction (p. 1568), Economics (p. 719), English (p. 1580), History (p. 1584), Humanities Consortium (p. 1587), Social Science Consortium (p. 1607)

Primary and Co-discipline applicants granted *provisional* admission will receive notification of deficiencies and of the conditions that must be met before full admission can be considered.

The Art History doctoral faculty makes recommendations to the dean of the School of Graduate Studies on each application; recommendations reflect the majority vote of the doctoral faculty.

Alternate Admission Criteria

In exceptional cases, candidates who do not meet either the School of Graduate Studies' or the Art History program's minimum requirements for admission may be admitted under alternate criteria. This may include satisfactory performance in a 5000-level course in the program, plus written recommendations of faculty to serve on the doctoral committee.

Core Requirements

Art History as a Primary Discipline

Code	Title	Credits
Required Courses		
ART-HIST 5501	Scope And Methods Of Art History ¹	3

¹ Research methodology courses.

Remaining credits depend upon what courses the student has taken before coming into the program. Students will generally design a total plan of study (primary discipline and co-discipline coursework) that includes 60 hours beyond the baccalaureate degree (including 12 credit hours for the dissertation) or 30 hours beyond the master's degree if that degree is in Art History.

Art History as a Co-discipline

Code	Title	Credits
Required Courses		
ART-HIST 5501	Scope And Methods Of Art History	3

Remaining credits depend on the student's research interests and graduate-level course work before entering the program.

Requirements for Comprehensive Exams

Oral and written Comprehensive Exams are required, with questions based on courses taken and dissertation topic; one question will focus on the primary discipline, one on the co-discipline.

Other Discipline-Specific Special Requirements

Normally, reading knowledge of two foreign languages is required, as determined by the Supervisory Committee for each student. Students will master a reading knowledge of two foreign languages for Art History as a Primary discipline or as a Co-discipline.

The Supervisory Committee must include two art historians.

Biomedical and Health Informatics

Discipline Coordinator

Jenifer E. Allsworth, Ph.D. (816) 235-1781, allsworthj@umkc.edu

Biomedical and Health Informatics is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and [Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements](#). Information on applying to the Biomedical and Health Informatics discipline can be found at the School of Medicine website for the primary discipline and co-discipline.

Discipline Overview

Biomedical and Health Informatics is the “scientific field that deals with biomedical information, data, and knowledge – their storage, retrieval, and optimal use for problem solving and decision making. It accordingly touches on all basic and applied fields in biomedical science and is closely tied to modern information technologies, notably in the areas of computing and communication, i.e. medical computer science.” (Definition from Stanford University, Medical Informatics.) The National Center for Biotechnology Information defines Bioinformatics as the “field of science in which medicine, biology, computer science, and information technology merge to form a single discipline. The ultimate goal of the field is to enable the discovery of new biological insights as well as to create a global perspective from which unifying principles in biology and health can be discerned.”

Curriculum Overview

The goal of the Biomedical and Health Informatics Ph.D. discipline is to train researchers to contribute to the translation of basic science findings into patient care and ultimately into community standards and policy. Given the diversity of specialties that are included in the field of biomedical and health informatics, individual training will vary depending on the student’s career goals. Graduates of this discipline will be able to apply knowledge and skills in the area of biomedical and health informatics by: generating a research hypothesis; proposing, conducting, and reporting research; performing appropriate statistical analysis; and, communicating scientific information.

Admissions

Applicants must meet both the general and the discipline specific criteria for admission and be recommended for admission by the doctoral faculty review groups in at least two disciplines. Upon approval by the graduate dean, students are admitted to the School of Graduate Studies.

General Admissions Requirements

Please visit the Interdisciplinary Ph.D. Program Admissions Page (<http://sgs.umkc.edu/iphd-landing-page/>) to learn about the general application requirements.

Discipline Specific Admissions Requirements

Please visit the School of Medicine website for information on applying to the Biomedical and Health Informatics primary discipline and co-discipline to learn about the discipline specific application requirements. Your application to the Biomedical and Health Informatics primary discipline or co-discipline is NOT complete until you submit a one-page goal statement explaining your interest in the discipline through the School of Medicine Supplemental Application.

Suggested Compatible Disciplines

Cell Biology and Biophysics (<https://catalog.umkc.edu/colleges-schools/graduate-studies/cell-biology-biophysics/>), Computer Science (<https://catalog.umkc.edu/colleges-schools/graduate-studies/computer-science/>), Engineering (<https://catalog.umkc.edu/colleges-schools/graduate-studies/engineering/>), Mathematics (<https://catalog.umkc.edu/colleges-schools/graduate-studies/mathematics/>), Molecular Biology and Biochemistry (<https://catalog.umkc.edu/colleges-schools/graduate-studies/molecular-biology-biochemistry/>), Oral and Craniofacial Sciences (<https://catalog.umkc.edu/colleges-schools/graduate-studies/oral-craniofacial-sciences/>), Pharmaceutical Sciences (<https://catalog.umkc.edu/colleges-schools/graduate-studies/pharmaceutical-sciences/>), Pharmacology (<https://catalog.umkc.edu/colleges-schools/graduate-studies/pharmacology/>), Public Affairs and Administration (<https://catalog.umkc.edu/colleges-schools/graduate-studies/public-affairs-administration/>), Social Science Consortium (<https://catalog.umkc.edu/colleges-schools/graduate-studies/social-science-consortium-economics-political-science-sociology/>)

Core Program Requirements

Biomedical and Health Informatics as a Primary Discipline

In order to complete the Interdisciplinary Ph.D. with Biomedical and Health Informatics as the primary discipline, students complete a minimum of 48 credit hours in post-baccalaureate studies consisting of the following:

- 36 credit hours of didactic course work
 - 21 credit hours of primary discipline course work
 - 9-12 credit hours of co-discipline course work
 - 6 credit hours of elective course work
- 12 credit hours of dissertation research

No more than 60% of didactic course work in the student's overall Plan of Study can be from any one discipline. A minimum of 9 credit hours of graduate coursework in the co-discipline is required by the Interdisciplinary Ph.D. Program. Specific requirements of the student's chosen co-discipline may require additional credit hours beyond the nine listed here.

Core coursework in the Biomedical and Health Informatics Primary discipline will include a minimum of 18 credit hours of courses in the table below. Courses taken to meet this requirement may be adjusted to reflect the courses taken in the chosen co-discipline.

Code	Title	Credits
Biostatistics (select 2 of the following)		6 hours required
MEDB 5501	Applied Biostatistics I	
MEDB 5502	Applied Biostatistics II	
MEDB 5503	Mixed-Effects Models	
MEDB 5535	Quantitative Aspects of Epidemiologic Research	
Research Methodology and Research Ethics		6 hours required
MEDB 5510	Clinical Research Methodology	
MEDB 5561	Responsible Conduct of Research	
Informatics (select 2 of the following)		6 hours required
MEDB 5520	Introduction to Medical Informatics	
BIOLOGY 5525	Bioinformatics and Data Analysis	
COMP-SCI 5565	Introduction to Statistical Learning	
COMP-SCI 5590	Special Topics (Machine Learning)	

Elective Coursework

The number of credit hours of elective graduate coursework that a student completes will vary depending on the number of credit hours required by their co-discipline; the total number of graduate coursework credit hours across their primary discipline, co-discipline, and electives must equal a minimum of 36 credit hours. Students may work with their advisors to tailor elective coursework based on their specific areas of interest. For example, students interested in genomics will take different elective courses than students interested in a clinical research emphasis. At least 75% of the total coursework must be from disciplines that are certified as eligible to participate in the Interdisciplinary PhD program.

Discipline Specific Requirements

- Qualifying Examination: The qualifying examination must be successfully completed before the student can enroll in dissertation and research hours and focus on their dissertation research.
- Comprehensive Examination: The comprehensive examination will consist of both a written component and an oral component that reflects dissertation research.
- Dissertation Research: Dissertation research will be conducted while the student is enrolled in Pre-Dissertation and Research (MEDB 5696) and Dissertation and Research (MEDB 5699) credit hours. Twelve credit hours in Dissertation and Research must be completed before the dissertation will be approved. Dissertation research will be reported in both a written format (three publication-ready manuscripts) and an oral format (formal presentation of dissertation research).
- Written Dissertation: The final format of the dissertation work to be submitted to the university will follow general dissertation formatting guidelines and will include the three publication-ready manuscripts.

- Graduate Seminar: Primary discipline students are required to attend and actively participate in the Multidisciplinary Seminar (MEDB 5540) until successful completion of the Qualifying exam, which will include providing research presentations.

Biomedical and Health Informatics as a Co-discipline

Based on students' experience and the requirements of their primary discipline, they will be required to complete at least 9 credit hours from the co-discipline as specified by the UMKC Interdisciplinary Ph.D. Program. While the following courses are suggested core components for the Biomedical and Health Informatics co-discipline, students will work with the discipline coordinator to create an individualized plan of study for their co-discipline courses.

Code	Title	Credits
MEDB 5501	Applied Biostatistics I	3
MEDB 5502	Applied Biostatistics II	3
MEDB 5510	Clinical Research Methodology	3
Depending on prior coursework, the below may be substituted.		
MEDB 5511	Principles and Applications of Epidemiology	3
MEDB 5514	Human Genome Epidemiology	3
MEDB 5520	Introduction to Medical Informatics	3
MEDB 5535	Quantitative Aspects of Epidemiologic Research	3

Note: All students will be expected to have Biostatistics as a core competency for this co-discipline; however, it is assumed that students with a primary discipline in Mathematics will not need additional course work in statistical analysis.

Prerequisite Coursework

Prerequisite coursework may not count toward the student's required graduate credits.

For the department's policy on academic progression, please contact the discipline coordinator.

Cell Biology and Biophysics

Discipline Coordinator

Karen Bame, (816) 235-2243, bamek@umkc.edu

Cell Biology and Biophysics faculty who are members of the Doctoral Faculty (<http://sgs.umkc.edu/for-faculty-and-staff/doctoralgraduate-faculty-lists/>)

Cell Biology and Biophysics is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

A cumulative GPA of at least 3.0 (on a 4.0 scale) on all college work for bachelor's degree or post-baccalaureate work. Due to the sequencing of coursework, new students selecting cell biology and biophysics as their primary discipline will normally only be admitted in the fall term.

Qualifying Requirements for Full Admission

Minimum of 16 hours of approved graduate coursework at UMKC toward the Ph.D. program with a grade-point average of at least 3.0 on a 4.0 scale. International students must establish English proficiency.

Suggested Compatible Co-disciplines

Chemistry (p. 1223), Molecular Biology and Biochemistry (p. 1591), Pharmaceutical Sciences (p. 1599), Pharmacology (p. 1600), Oral and Craniofacial Sciences (p. 1594), Physics (p. 1602)

Core Program Requirements

Cell Biology and Biophysics as a Primary Discipline

Minimum Core

33 credit hours of courses and 15 credit hours of dissertation research for a total of 48 credit hours of post-baccalaureate credits, distributed as indicated below. The core courses should be completed by the end of the second academic year after admission to the graduate program on a full-time basis (individual arrangements will be made for part-time students).

Code	Title	Credits
LS-CBB 5530	Cell and Molecular Biology I	3
LS-CBB 5520	Cell and Molecular Biology II	3
LS-CBB 5596	Advanced Experimental Cell Biology I	2
or LS-CBB 5597	Advanced Experimental Cell Biology II	
LS-CBB 5612	Seminar in Cell Biology and Biophysics (2 x 1 cr. hr.)	2
LS-CBB 5690	Analytical Methods in Cell Biology and Biophysics	1-4
or LS-MBB 5690	Analytical Methods in Molecular Biology and Biochemistry	
BIOLOGY 5501	Proposal Writing	1
7 cr. hr. in discipline or related discipline courses (LS-CBB, LS-MBB, BIOL, PHARM, etc.) 15 cr. hr. LS-CBB 5699, Dissertation Research		

Seminar courses are part of this component of required courses, up to a maximum of three for the program, as are additional credits of Advanced Experimental Molecular or Cell Biology (a total of four credits in experimental laboratory courses, independent of thesis research, is required). 5700-level courses may not be used to satisfy cell biology and biophysics discipline-specific course requirements.

Any of the above courses, whether part of the primary or related discipline requirements, will be credited toward the 33-credit Ph.D. course requirement if taken as part of any graduate program at UMKC and if a grade of "B" or better is received.

In addition to the basic 33-credit course core, each student's Supervisory Committee may require up to nine credit hours in additional elective courses in any University-approved doctoral discipline as preparation for specific areas of research. No more than seven credit hours of 5500-level courses, or their equivalents, can be taken at institutions outside UMKC.

For Students with Cell Biology and Biophysics as a Co-discipline

Code	Title	Credits
LS-CBB 5530	Cell and Molecular Biology I	3
LS-CBB 5520	Cell and Molecular Biology II	3
LS-CBB 5612	Seminar in Cell Biology and Biophysics	1
Additional SBC graduate courses (LS-CBB, LS-MBB or BIOL) for a minimum of 10 cr. hr.		

A sufficient amount of other core courses to constitute the required percentage of their overall program of study. 5700-level courses may not be used to satisfy cell biology discipline-specific course requirements.

Requirements for Comprehensive Exams

Full-time students with cell biology as their primary discipline must take their comprehensive examination before the beginning of the third academic year after admission to Ph.D. study. Part-time Ph.D. students in this discipline must complete their comprehensive examination immediately after completion of the 25-hour course requirement on their Ph.D. plan of study.

Format

For students with this discipline as their primary discipline, written and oral examinations are required.

Written Portion

The written examination, for students who have cell biology and biophysics as their primary discipline consists of an NIH-style grant proposal that the student will prepare. The topic of the research proposal will be determined by the student in consultation with the student's supervisory committee.

Oral Portion

The oral examination has two aspects: (1) questions covering the grant proposal prepared by the student for the written examination and (2) other related material in the student's area of specialization, including fundamental knowledge of the student's chosen disciplines.

Other Discipline-Specific Special Requirements

Students with this discipline as a primary discipline must participate in the teaching program of the School of Biological and Chemical Sciences.

Students with this discipline as a primary discipline or co-discipline must participate in seminars.

Retention in Program

No more than one C grade will be permitted in basic core coursework. If a student with this discipline as the primary discipline receives more than one C grade in a basic course, he or she will be dropped from the doctoral program. Students with this discipline as a co-discipline who receive more than one C grade will be dropped from the discipline.

The doctoral faculty in Cell Biology and Biophysics meets formally at the end of each academic year to discuss and evaluate all graduate students' progress. Each student's committee also meets with the student at least once a year. After the annual doctoral faculty meeting, each student receives a written evaluation of his or her status and a report is placed in the student's file.

Chemistry

Discipline Coordinator

Zhonghua Peng, (816) 235-2288, pengz@umkc.edu

Chemistry faculty who are members of the doctoral faculty.

Chemistry is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the [School of Graduate Studies](#).

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in [Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission](#) and [Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements](#).

Discipline-specific Admission Requirements

Chemistry as a Primary Discipline

Normally, only applications to full-time academic status will be considered. To qualify for full admission (Note: full admission is unrelated to full-time academic status), applicants are expected to have the equivalent of an American Chemical Society-approved bachelor's degree in chemistry, which includes coursework in general chemistry, analytical chemistry, one year of organic chemistry, inorganic chemistry and one year of physical chemistry requiring calculus and physics as prerequisites. (For example, see UMKC's B.S. program in the Chemistry section in this catalog.) Applicants will be admitted as provisional students with a limited number of undergraduate deficiencies. They will be notified, at the time admission is offered, of any requirements to be met for reclassification as fully admitted. Undergraduate courses included in these requirements must be completed with grades of "C" or higher.

Applicants should take particular note of the physical chemistry requirement.

Applications are only accepted through the online system, and include:

1. Official, confidentially transmitted transcripts.
2. Statement of purpose.
3. Three confidentially transmitted letters of recommendation (academic and/or professional).
4. English language proficiency requirement.

Suggested Compatible Co-disciplines

Curriculum and Instruction (p. 1568), Engineering (p. 1579), Geosciences (p. 1583), Mathematics (p. 1589), Pharmaceutical Sciences (p. 1599), Pharmacology (p. 1600), Physics (p. 1602)

Chemistry as a Co-discipline

Applicants are expected to have undergraduate coursework in general chemistry and organic chemistry. Applicants accepted as provisional students will be notified, at the time admission is offered, of any requirements to be met for reclassification as fully admitted. Undergraduate courses included in these requirements must be completed with grades of "C" or higher.

Core Program Requirements

Chemistry as a Primary Discipline

Coursework Requirements

Students are to see the principal graduate advisor, or their research advisor, for advising and signature prior to registering each semester.

Students must successfully complete a minimum of fifteen credit hours and a maximum of eighteen credit hours of didactic chemistry graduate coursework, among which one course must be from Group A, one course from Group B, and a minimum of two additional courses (six credit hours) from any graduate chemistry course numbered 5500 to 5589, excluding CHEM 5520R, CHEM 5530A, CHEM 5530B and CHEM 5540R. The remaining required chemistry credit hours may be satisfied with directed studies (CHEM 5590). In addition, students must complete one credit hour of chemistry seminar (CHEM 5611). A grade of C+ (2.3) or less in more than two chemistry courses applicable to the Ph.D. program will result in termination from Ph.D. candidacy.

Code	Title	Credits
Group A		
CHEM 5531	Classical Thermodynamics	3
CHEM 5532	Chemical Kinetics	3
CHEM 5533	Quantum Chemistry	3

CHEM 5534	Molecular Spectroscopy	3
CHEM 5535	Statistical Thermodynamics	3
Group B		
CHEM 5521R	Mechanisms Of Organic Reactions	3
CHEM 5522	Synthetic Organic Chemistry	3

In addition, students must successfully complete twelve (12) to fifteen (15) credit hours of 400-level or above coursework in other disciplines, among which a minimum of nine (9) credit hours must be in their co-discipline(s). A minimum of three (3) credit hours in the codiscipline must be at the 5500+ level. Students may be required to take additional courses as outlined by their plan of study.

Any of the above chemistry courses will be credited toward the Ph.D. coursework requirement if taken as part of any previous graduate program at UMKC and a grade of B- (2.7) or better is received. Also, students who have received a grade of B- (2.7) or better in graduate chemistry coursework taken as part of a degree program at another institution may have up to six credit hours of equivalent required coursework waived upon approval of a majority of the supervisory committee. A written request for this waiver is to be submitted and approved before submission of the student's plan of study.

Courses/Experiences Providing Instruction in Research Methodology

Expertise in research methodology will be acquired under the mentorship of the research advisor and supervisory committee. The student's progress will be assessed annually by his/her supervisory committee and the results will be forwarded to the School of Graduate Studies.

Number of Credit Hours Required beyond Bachelor's Degree

A total of 46 credit hours are required, among which 30 credit hours are from didactic courses, 15 credit hours from dissertation research and 1 credit hour of chemistry seminar. Among the 30 didactic hours, a minimum of 15 credit hours and a maximum of 18 credit hours are from chemistry, and a minimum of 9 credit hours are from the co-discipline. Up to six credit hours of chemistry courses may be waived, as described above under Coursework Requirements.

Chemistry as a Co-discipline

Coursework Requirements

Students are required to complete a minimum of three courses (nine credit hours) at the 400-level or above from classes offered by the Department of Chemistry or in conjunction with other units as approved in the student's plan of study. At least three of these credit hours must be at the 5500+ level and taken from courses offered by the Department of Chemistry. The systematic courses CHEM 5520R and CHEM 5530 may be used to satisfy the "400-level or above" requirement, but not the "5500+ level" requirement. CHEM 5590, CHEM 5599 and CHEM 5699 may not be used to satisfy these requirements. Students who receive a grade of C+ (2.3) or less in two or more courses used to satisfy these requirements will be disqualified from using Chemistry as their co-discipline.

Any of the above chemistry courses will be credited toward the Ph.D. coursework requirement if taken as part of any previous graduate program at UMKC and if a grade of B- (2.7) or better is received. Transfer credit from another institution cannot be applied to Chemistry's co-discipline requirement.

Special Requirements

Chemistry as a Primary Discipline

Placement Examinations

Incoming students take placement examinations in analytical inorganic, organic and physical chemistry. Placement examinations are typically administered the week preceding the first week of classes of the fall and spring semesters. Students scoring below the 50th percentile in the organic and/or physical chemistry exams are required to enroll in CHEM 5520R and/or CHEM 5530A /CHEM 5530B, respectively. Enrollment in other graduate organic or physical chemistry courses is not permitted until CHEM 5520R and/or CHEM 5530A /CHEM 5530B, respectively, is(are) successfully completed. CHEM 5530A /CHEM 5530B is currently offered concurrently with CHEM 431 or CHEM 432. A student is required to take either CHEM 5530A/CHEM 431 or CHEM 5530B/CHEM 432 or both, depending on his/her performances in the various sub-disciplines of the physical chemistry placement exam. Should a student be required to take both CHEM 5530A/CHEM 431 and CHEM 5530B/CHEM 432, the average grade of the two CHEM 5530 courses will be considered for the fulfillment of the physical chemistry deficiency. Two grades of C+ (2.3) or lower, or one grade of less than C- (1.7) in CHEM 5520R / CHEM 5530 will result in termination from the degree program. These courses may not be counted toward the coursework requirements above. Students must complete all additional coursework required as a result of the placement exam scores by the end of their first three regular semesters.

Research Advisor

Full-time students are to select a research advisor from the doctoral faculty of the Department of Chemistry and a supervisory committee by the end of their first regular (e.g. fall or spring) semester on campus. For chemistry as the primary discipline, the student's supervisory committee shall consist of the research advisor in chemistry and two additional chemistry doctoral faculty as well as at least one doctoral faculty member from each co-discipline.

Seminar

Students are required to attend and participate in all regularly scheduled and special Chemistry Department seminars and colloquia. Students are required to present a one-hour chemistry seminar (CHEM 5611) during their second year following full admission to the Ph.D. program, based on their dissertation research project. This seminar will include a thorough review of the literature pertinent to their project and a description of the objectives, the proposed methodology and the significance of this research. An abstract is to be posted and distributed one week prior to the presentation date.

Time Constraints and Financial Support

Students must complete all requirements for their degree within seven years from the date of full admission to the Ph.D. program. Under compelling circumstances and on the written recommendation of a majority of the supervisory committee, a single extension for up to one year may be requested for approval by the dean of the School of Graduate Studies. Full-time (as defined in the current UMKC catalog) Ph.D. students may receive financial support (in the form of fellowships or teaching assistantships) from the Department of Chemistry for a maximum of five years. Students from countries not having English as their first language, and who are to be supported as GTAs, must meet the UMKC standards for international students to become certified as GTAs. Full information on that process can be found here: Policy on Award of Teaching Assistantships (p. 465).

Dissertation

All supervisory committee members are to receive a final draft of the dissertation for approval of form and content at least two weeks before submission to the dean of the School of Graduate Studies for certification. Candidates should submit preliminary drafts well in advance of this deadline. After the dissertation is certified for acceptance, the student must present an oral defense of his/her research in the form of a dissertation seminar. The supervisory committee will make a final determination of the acceptability of the dissertation immediately following this presentation. Only minor changes may be made to the dissertation at this point.

Expectations for Interdisciplinary Work

Chemistry as a Primary Discipline

Students develop and pursue a plan of study that includes coursework from the primary discipline and co-discipline(s). The interdisciplinary nature of the student's program is emphasized in the comprehensive examination, which includes material from all disciplines in the plan of study.

Chemistry as a Co-discipline

The Department of Chemistry will cooperate with the student's primary discipline in assessing the interdisciplinary nature of the student's progress.

Comprehensive Examination Guidelines

Chemistry as Primary Discipline

All students are required to prepare a research proposal describing a research project. An abstract is to be posted and distributed, and a written copy of this proposal (in standard NSF or NIH format) given to all members of the examination committee (consisting of the student's supervisory committee and others selected by the Dean of the School of Graduate Studies) at least one week prior to presentation in a proposal seminar. This seminar must be presented to all members of the examination committee by the end of the second year following full admission to the Ph.D. program.

A written comprehensive examination will be prepared and administered by the examination committee before completion of the student's third year following full admission to the Ph.D. program. This examination will be based on the student's coursework and on general knowledge in all areas of his/her specialization. All efforts will be made to emphasize the multidisciplinary nature of the student's program in this examination. If the student fails the written portion of the comprehensive examination, he/she may petition the examination committee to allow for a single opportunity to retake it. This second examination must be completed no earlier than 12 weeks and no later than six months from the date of completion of the first examination.

The research proposal and the written comprehensive exam constitute parts of the comprehensive exam. An IPhD student may elect to enroll in 3 credit hours of CHEM 5590, the grade for which will be CR/NC-only and will be based on the outcome of the comprehensive exam; retroactive enrollment is allowed. An Interdisciplinary PhD student with chemistry as the primary discipline, who has passed the comprehensive exam can have up to 9 credit hours of CHEM 5590/CHEM 5599/ CHEM 5699 counted towards a non-thesis MS degree in Chemistry.

Chemistry as a Co-discipline

The comprehensive examination will be determined by the student's primary discipline in cooperation with the co-discipline(s).

Computer Networking and Communication Systems

Discipline Coordinator

Sejun Song, (816) 235-5661, songsej@umkc.edu

Computer Networking and Communication Systems faculty who are members of the doctoral faculty.

Computer Networking and Communication Systems is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

A student who meets the minimum discipline requirements stated below will be considered for regular admission to the Ph.D. program. A student who does not meet some of the requirements but shows high potential for advanced-level work may be considered for provisional admission. Admission also depends on factors such as number of seats available, resources available in the area of student's interest, the quality of previous work, etc. A student not qualifying for admission to the Ph.D. program may be considered for admission to the M.S. computer science or electrical engineering program. Requirements for admission are similar whether the applicant is requesting Computer Networking and Communication Systems as the primary discipline or co-discipline.

Academic Preparation

The applicant must have a bachelor's degree in computer science, computer engineering, electrical engineering, or related field requiring substantial training in at least one of the above fields and in mathematics with a GPA of 3.5 or better on a 4.0 scale, cumulative as well as in the major field. A master's degree is preferred for admission.

Aptitude for Advanced Work

The student must demonstrate an aptitude for advanced-level work through national/international standardized examinations such as the GRE. The expected performance level is the 85th percentile in the quantitative portion of the GRE examination.

Proficiency in English

The student must demonstrate his or her proficiency in oral and written communication in English through national/ international standardized English examinations such as TOEFL, verbal portion of the GRE, etc. The expected proficiency level is the 50th percentile in the verbal portion of the GRE or a TOEFL score of at least 550 on the paper-based test or 213 on the computer-based test. For tests taken after Sept. 26, 2005, the minimum required score is 80. UMKC students may also satisfy this requirement by obtaining an English Proficiency Certification from the English Department.

Note: As per University policy, all international students are tested for proficiency in English upon arrival on campus, irrespective of their scores in TOEFL or verbal portion of GRE, or any other test. A student's advisor may also require the student to take the above test, irrespective of the student's native language. As a result of this test, the student may be required to improve his or her oral and written communication in English before enrollment in the courses of the chosen disciplines.

Recommendations

The student must provide at least *three* recommendation letters from the professors from his or her previous institution(s). If the applicant has been out of school for several years, recommendation letters from his or her supervisors (technical) will be acceptable. However, even in this situation, a recommendation letter from his or her last academic institution is highly recommended. A recommendation from a faculty member in the Computer Science Electrical Engineering (CSEE) Department at UMKC must be provided if the student has taken courses from or worked with the CSEE faculty.

Statement of Goals and Objectives

The applicant must provide a 250- to 500-word essay on his or her goals and objectives of pursuing the Ph.D. in the chosen fields.

Admission at an Advanced Level

An applicant who has already completed significant graduate coursework (15 or more semester hours of the post-master's work or 30 or more hours of the post-bachelor's work) toward a Ph.D. at another institution must provide reasons for changing institutions. The applicant must also provide a letter of endorsement from a doctoral faculty member in Computer Networking and Communication Systems indicating willingness to be the student's research advisor.

Alternate Admission Criteria

The applicant may have received a bachelor's degree or a master's degree in computer science, computer engineering, electrical engineering or electronics or any other related field with substantial training in mathematics. An applicant not meeting the minimum admission requirements, or not having sufficient academic preparation (stated below under prerequisite knowledge) for advanced work in the chosen discipline(s), may be considered for provisional admission by the Computer Science and Electrical Engineering Department's Ph.D. committee if the committee sees high potential for advanced work from the rest of the applicant's credentials. Evidence of high potential might be pertinent work experience, published papers or extremely high achievement in related areas. In any case, the required GPA (or GPAs) must be at least 3.0. Applicants with an established research or publication record in a quantitative science are encouraged to apply to this discipline.

Qualifying Requirements for Full Admission

Prerequisite Knowledge

A Ph.D. student selecting Computer Networking and Communication Systems as the primary discipline is expected to have the level of preparation represented by the following courses before attempting advanced study. Every student must have coursework in mathematics at MATH 250 or above level, and at least four of the following course sequences (or their equivalent):

Code	Title	Credits
COMP-SCI 291	Discrete Structures II	3
COMP-SCI 303	Data Structures	3
COMP-SCI 404	Introduction to Algorithms and Complexity	3
E&C-ENGR 330	Electronic Circuits	3
E&C-ENGR 380	Signals and Systems	3
COMP-SCI 394R	Applied Probability	3
COMP-SCI 420	Introductory Networking and Applications	3
COMP-SCI 421A	Foundations of Data Networks	3
E&C-ENGR 477	Introduction to Wireless Networking	3
COMP-SCI 431	Introduction to Operating Systems	3
E&C-ENGR 474	Introduction to Communication Systems	3
E&C-ENGR 426	Microcomputer Architecture and Interfacing	3

A Ph.D. student selecting Computer Networking and Communication Systems as a co-discipline is required to have at least three of the CS/ECE courses listed above.

Length of Time to Complete Qualifying Requirements

When a student is admitted provisionally, the CSEE Ph.D. committee will specify the conditions and length of time available to satisfy conditions to achieve regular-admission status.

Suggested Compatible Co-disciplines

Computer Science (p. 1564), Economics (p. 719), Electrical and Computer Engineering (p. 1573), Engineering (p. 1579), Geosciences (p. 1583), Mathematics (p. 1589), Physics (p. 1602)

A co-discipline outside of this list may be considered only in exceptional cases.

Core Program Requirements

The amount of work required for the Ph.D. depends on the student's level of preparation. For example, a student entering the Ph.D. program after earning a bachelor's degree may expect to do significantly more work compared to a student who enters after earning a master's degree.

Qualifying and Comprehensive Examination Guidelines

The Qualifying Exam is a written test administered by the CSEE Department's Ph.D. committee. The test questions are from a set of fundamental courses spanning computer science, electrical and computer engineering, and telecommunication and computer networking. The Comprehensive Exam is administered by the doctoral committee of the candidate. A student can either take a written test or opt for an oral presentation covering both primary discipline and co-discipline areas. Discussion with and agreement from the student's doctoral committee is required before choosing the best option.

The candidates should contact the CSEE Division office and the chair of their doctoral committee for more information.

Computer Networking and Communication Systems as a Co-Discipline

The number of hours required for a student who chooses Computer Networking and Communication Systems as a co-discipline will be at least 12 graduate credit hours. Up to three of these credit hours may be at the 400-level. Each student is required to take CSEE 5110 as part of the minimum 12 credit hours. Contact the Discipline Coordinator for the list of approved courses.

Financial Aid

Various forms of financial aids (such as graduate research assistantships, graduate teaching assistantships, graduate fellowships) are available through the Computer Science and Electrical Engineering Department and the School of Graduate Studies. Contact the discipline coordinator for more information.

Computer Science

Discipline Coordinator

Yugyung Lee, (816) 235-5932, leeyu@umkc.edu

Computer Science is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the [School of Graduate Studies](#).

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in [Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission](#) and [Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements](#).

Discipline-Specific Admission Requirements

A student who meets the minimum discipline requirements stated below will be considered for regular admission to the Ph.D. program. A student, who does not meet some of the requirements but shows high potential for advanced-level work, may be considered for provisional admission. Admission also depends on factors such as number of seats available, resources available in the area of student's interest, the quality of previous work, etc. A student who does not qualifying for admission to the Ph.D. program, may be considered for admission to the M.S. in computer science program. Requirements for admission are similar, whether the applicant is requesting computer science as the primary or co-discipline. Minimum Recommended Ph.D. Admission Requirements:

1. GPA (Bachelor or equivalent Degree): 3.5 in the scale of 4 (or equivalent)
2. GPA (MS or equivalent Degree if any): 3.5 in the scale of 4 (or equivalent)
3. GRE (Quantitative) minimum score: 80%
4. TOEFL iBT minimum Score: 89 or IELTS minimum score: 6.5
5. Prior Projects or Publications (Preferred)*
6. Internationally Acceptable Accreditation of the Prior Degree Awarding Institutes

* Prior research project and/or publication record is not required for admission into CS Ph.D. program. However, doctoral faculty members give very high value to the students with such backgrounds.

Direct or Expedited PhD Program

It is not required to have an MS or equivalent degree to apply to CS Ph.D. program. We accept well qualified and motivated students with a Bachelor degree directly into our Ph.D. program. We actively encourage students in the Direct Ph.D. Program to try to complete the doctoral study within 4 or 5 years after the Bachelor degree. To complete the Ph.D. degree in an expedited timeline, first, the student has to be dedicated and well qualified. Second, the student must make a comprehensive plan at the beginning of the doctoral study to complete all the relevant steps within a strict timeline, which is challenging but not impossible.

Clarification of Minimum Requirements and Decision Process

Academic Preparation

The applicant must have a bachelor's degree and/or a master's degree in computer science, computer engineering, electronics, communications engineering or any other field requiring substantial training in at least one of the above fields and in mathematics with a GPA of 3.5 or better on a 4.0 scale, cumulative as well as in the major field; and a GPA of 3.5 or better on a 4.0 scale, in all post-baccalaureate or post-master's degree work.

Aptitude for Advanced Work

The student must demonstrate an aptitude for advanced-level work through national/international standardized examinations such as the GRE. The expected performance level is the 80th percentile in the quantitative portion of the GRE examination. The student must also show an excellent performance in all of his or her coursework.

Proficiency in English

The student must demonstrate his or her proficiency in oral and written communication in English through national/international standardized English examinations such as TOEFL, verbal portion of the GRE, etc. Because of this test, the student may be required to improve his or her oral and written communication in English before enrollment in the courses of the chosen disciplines.

Note: For students with a North American (USA and Canada) B.S. or M.S. degree the English Proficiency requirement is exempt.

Recommendation Letters

The student must provide at least **three** recommendation letters, identifying clearly his or her academic achievements and exceptional quality, from the professors from his or her previous institution(s). If the applicant has been out of school for several years, recommendation letters from his or her supervisors (technical) will be acceptable. However, even in this situation, a recommendation letter from his or her last academic institution is highly recommended. A recommendation from a faculty member in the Computer Science Electrical Engineering (CSEE) Department at UMKC must be provided if the student has taken courses from or worked with the CSEE faculty.

Statement of Goals and Objectives

The applicant must provide a 250- to 500-word essay on his or her goals and objectives of pursuing the Ph.D. in the chosen fields. This is an important document for reviewing the application. Applicants, therefore, are advised to provide a clear account of their academic achievements and plans for higher study.

Admission at an Advanced Level

An applicant who has already completed significant graduate coursework (15 or more semester hours of post-master's work or 30 or more hours of post-bachelor's work) toward a Ph.D. at another institution must provide reasons for changing institutions. The applicant must also provide a letter of endorsement from a computer science doctoral faculty member indicating willingness to be the student's research advisor.

Ph.D. Admission Decision Process

Ph.D. admission decision is made by the CS Ph.D. Committee considering individual doctoral faculty member's needs and preferences. The role of CS Ph.D. Committee is to ensure that Ph.D. applicants satisfy the minimum requirements (GPA, GRE, TOEFL/IELTS, reputation of prior degree awarding institutes and other scholarly achievements). If the requirements are satisfied and a doctoral faculty member accepts the new applicant only then the CS Ph.D. Committee takes a positive decision about a particular applicant. In rare occasion, we bring exceptionally well-qualified students without the acceptance from a doctoral faculty.

Qualifying Requirements for Full Admission

Prerequisite Knowledge

A Ph.D. student selecting Computer Science (CS) as the primary (coordinating) Ph.D. discipline is expected to have the level of preparation represented by a four-year undergraduate degree in computer science. The applicant may have received a bachelor's degree or a master's degree in computer science, computer engineering, electrical engineering or electronics, or any other related field with substantial training in mathematics. An applicant with only a B.S. degree in computer science must have at least a GPA of 3.5/4.0 and an applicant with at least a year of graduate work must have at least a GPA of 3.5/4.0 before attempting advanced study.

Selection of a Co-Discipline and Suggested Compatible Co-Disciplines

To broaden the knowledge of the PhD students, the Interdisciplinary Ph.D. program requires each student to select a co-discipline closely related to the primary discipline. The following are suggested compatible co-disciplines for CS students:

Biomedical and Health Informatics (<https://catalog.umkc.edu/colleges-schools/graduate-studies/biomedical-health-informatics/>), Cell Biology and Biophysics (<https://catalog.umkc.edu/colleges-schools/graduate-studies/cell-biology-biophysics/>), Chemistry (<https://catalog.umkc.edu/colleges-schools/graduate-studies/chemistry/>), Computer Networking and Communication Systems (<https://catalog.umkc.edu/colleges-schools/graduate-studies/telecommunication-computer-networking/>), Economics (<https://catalog.umkc.edu/colleges-schools/graduate-studies/economics/>), Electrical and Computer Engineering (<https://catalog.umkc.edu/colleges-schools/graduate-studies/electrical-computer-engineering/>), Engineering (<https://catalog.umkc.edu/colleges-schools/graduate-studies/engineering/>), Geosciences (<https://catalog.umkc.edu/colleges-schools/graduate-studies/geosciences/>), Mathematics (<https://catalog.umkc.edu/colleges-schools/graduate-studies/mathematics/>), Molecular Biology and Biochemistry (<https://catalog.umkc.edu/colleges-schools/graduate-studies/molecular-biology-biochemistry/>), Oral and Craniofacial Sciences (<https://catalog.umkc.edu/colleges-schools/graduate-studies/oral-craniofacial-sciences/>), Pharmaceutical Sciences (<https://catalog.umkc.edu/colleges-schools/graduate-studies/pharmaceutical-sciences/>), Pharmacology (<https://catalog.umkc.edu/colleges-schools/graduate-studies/pharmacology/>), Physics (<https://catalog.umkc.edu/colleges-schools/graduate-studies/physics/>)

A co-discipline outside of this list may be considered only in exceptional cases. These co-disciplines require 3 or 4 courses to be taken by the CS Ph.D. students to fulfill the co-discipline requirements.

Notes:

- CS Ph.D. students do not need to apply to a Co-Discipline at the time of admission.
- CS Ph.D. students have to select a co-discipline in the first semester after coming to UMKC.
- CS Ph.D. students are advised to consult their primary (CS) adviser to select an appropriate co-discipline.
- CS Ph.D. students can change their co-discipline any time before the comprehensive exam.

Transfer of Course Credit

New Ph.D. students with some prior graduate level course works from another university can apply to transfer up to 6 credit hours in each discipline (primary and co-discipline).

Length of Time to Complete Qualifying Requirements

When a student is admitted provisionally, the CSEE Ph.D. Committee will specify the conditions and length of time available to satisfy them to achieve full admission status.

Alternate Admission Criteria

The applicant may have received a bachelor's degree or a master's degree in computer science, computer engineering, electrical engineering or electronics, or any other related field with substantial training in mathematics. An applicant not meeting the minimum admission requirements, or not having sufficient academic preparation (stated below under prerequisite knowledge) for advanced work in the chosen primary discipline(s), may be considered for provisional admission by the CSEE Department Ph.D. committee if the committee sees high potential and preparation for advanced work from the rest of the applicant's credentials. Evidence of high potential might be pertinent work experience, published papers or extremely high achievement in related areas. In any case, the required GPA (or GPAs) must be at least 3.0 on a 4.0 scale, and the coursework deficiencies for doctoral study in computer science must not be more than 18 semester hours. Applicants with an established research or publication record in a quantitative science are encouraged to apply.

Application for an MS Degree while Enrolled in CS Ph.D. Program

CS Ph.D. students may apply to receive an MS degree upon passing the qualifying and comprehensive exams provided that the coursework required for MS degree under course only option is completed. This is a very good option for students in CS Direct Ph.D. Program. However, this is subject to primary Ph.D. supervisor's approval.

Note: If a CS Ph.D. student fails to pass the Qualifying Exam in two attempts or cannot successfully complete the Comprehensive Exam, the student will not be allowed to apply for transfer to the MS program or apply to receive an MS degree even if the coursework required for MS degree under course-only option is completed. Please consult your CS Ph.D. supervisor and/or CS Ph.D. Discipline Coordinator for details.

Core Program Requirements

The amount of work required for the Ph.D. depends on the student's level of preparation. For example, a student entering the Ph.D. program after earning a bachelor's degree may expect to do significantly more work compared to a student who enters after earning a master's degree.

Computer Science as a Co-Discipline

- Students who choose CS as a co-discipline need to take 3 CS graduate courses (9 credit hours).
- Students who choose CS as a co-discipline do not need to take the CS Ph.D. Qualifying Exam.
- CNS and ECE Ph.D. students are automatically eligible for CS Co-Discipline.

Discipline Course Requirements

The total Interdisciplinary Ph.D. course credit (didactic) requirement is 30 hours which is divided into (a) primary discipline (12 credits), (b) co-discipline (9 credits), and (c) the remaining 9 credits can be completed either by doing graduate level courses at UMKC in any participating discipline or credits can be transferred from students' previous institutions. This credit transfer must be approved by the CSEE Department Ph.D. committee.

Full-time Status and Doctoral Residency Requirement

US Domestic students can enroll into any number of credit hours per semester during the regular academic year (Fall and Spring). International students are usually required to enroll in 9 credit hours per semester during the regular academic year (Fall and Spring) to maintain full-time (visa) status. However, for international graduate (PhD and MS) students with 50% FTE (20 hours per week) appointments as Graduate Research/Teaching Assistants the requirement is 6 credit hours of enrollment per semester for full time equivalence. Enrollment is not required in Summer. Interdisciplinary Ph.D. students must satisfy the doctoral residency requirement by satisfactory completion of at least 18 credits within 24 consecutive months.

Financial Aid

Various forms of financial aid (such as graduate research assistantships, graduate teaching assistantships, graduate fellowships) are available through the Computer Science Electrical Engineering Department and the School of Graduate Studies. Contact the discipline coordinator for more information. Most of our Ph.D. students are funded through Graduate Research Assistantship (GRA) and/or Graduate Teaching Assistantship (GTA). GRA support is provided by individual doctoral faculty members from their research grants. GTA support comes from Department Chair's instructional fund. However, the GTA support is also provided based on the recommendation of the Ph.D. advisor. The Department Chair normally honors the requests for GTA support if there are available GTA slots. Therefore, every Ph.D. student must have a faculty advisor to get funding in the form of GRA or GTA. Once a Ph.D. student is admitted the Department Chair and the doctoral faculty members will try our best to provide funding to the student throughout the Ph.D. study. However, the applicants must keep in mind that the number of funding slots (GRA and GTA) for the Ph.D. students are not unlimited. The supports are provided based on respective faculty adviser's recommendations and Department Chair's needs. The awarding of GRA and GTA funding is a competitive process. The students are required to maintain high academic standing and demonstrate strong research performance to get continuous support throughout the Ph.D. study. Our Department's policy is to provide support to as many Ph.D. students as possible. Additionally, the UMKC School of Graduate Studies provides many different types of fellowships, awards and scholarships to qualified graduate students through a competitive selection process. Please visit the website of the School of Graduate Studies for further details.

Note:

- A GTA can only be awarded to a student after the student has successfully demonstrated his or her teaching potential to a committee and has successfully passed the English language test.

- If a student receives financial aid in the form of GTA/GRA from the CSEE Department or its doctoral faculty members after the full admission and enrolment into CS Ph.D. program, the student must complete the doctoral study. If a funded Ph.D. student decides to leave the program at any stage before the completion no terminal MS or equivalent degree will be awarded.

Monthly Stipend for Ph.D. Students with GRA/GTA Appointments

Ph.D. students with 50% FTE (20 hours per week) appointments as GRA/GTA will receive a stipend of around \$6000 (subject to availability of funds) per semester during the Fall and Spring semesters. This stipend will be paid in 4 or 5 monthly installments. All GRA/GTA appointments (if awarded) are for one regular academic year (Fall and Spring) for the new students. Beyond the first year, the GRA/GTA supports are subject to availability and performance. There is no guaranteed financial support for the Summer semester.

Tuition Rates and Credits

UMKC offers in-state tuition rates to all (domestic and international) Ph.D. students. Ph.D. students with 50% FTE (20 hours per week) GRA/GTA support from CSEE department will receive a tuition fee coverage of up to 6 credit hours per semester at in-state rate. Therefore, all Ph.D. students (domestic and international) with 50% FTE (20 hours per week) GRA/GTA appointment can maintain full-time status (6 credit hours per semester) with all tuition and fees covered by UMKC and CSEE Department. This tuition and fee coverage is in addition to the stipend mentioned above. However, there are some additional fees and expenses that have to be paid by the students at the time of registration, such as health insurance, books and supplies, and living costs.

Timeline and Steps Toward the Completion of CS Ph.D. Degree

New Ph.D. students are strongly advised to make a clear plan in consultation with the CS Ph.D. advisor as soon as they start their doctoral study to complete the following steps within the required time line:

1. Annual Evaluation: Every Ph.D. student is required to complete an annual evaluation. It is an online survey sent in two parts - one in the fall and one in the spring. The Annual Evaluation allows the student to discuss the previous year's achievements and the next year's goals, then the primary and co-discipline advisors provide feedback and guidance.
2. Ph.D. Qualifying Examination: Students taking an CS Ph.D. Discipline as the primary (coordinating) unit should make the first attempt to pass the qualifying exam during the first three (3) regular semesters after fully admitted to the doctoral study at UMKC. The student must pass both parts of the qualifying exam within four (4) regular semesters. Summer term is not counted.
3. Plan of Study: The Ph.D. Plan of Study form, signed by the student, members of the student's proposed Supervisory Committee, and the Academic Administrators in the student's disciplines, must be filed with the School of Graduate Studies no later than the end of the second year (24 months) after the student has been fully admitted. The Interdisciplinary Ph.D. Plan of Study may be filed prior to that time.
4. Formation of Ph.D. Supervisory Committee: The Supervisory Committee shall consist of at least five members composed of one doctoral faculty from each of the primary and co-disciplines, with a maximum of three from any one discipline. Regarding the formation of the committee the student should consult the primary (CS) Ph.D. supervisor, who will be the Chair of the Committee. Names and signatures of the committee members have to be submitted with the Plan of Study.
5. Fulfilling Ph.D. Residency Requirement: Ph.D. students must satisfy the doctoral residency requirement by satisfactory completion of at least 18 credits within 24 consecutive months.
6. Comprehensive Examination: The format and general requirements for the Comprehensive Exam vary according to the Ph.D. discipline. The Comprehensive Exam is administered by the candidate's supervisory committee. A student can either take a written test or opt for an oral presentation covering both primary and co-discipline areas. Discussion with and agreement from the student's doctoral committee is required before choosing the best option. Candidates should contact the CSEE Department's office and the chair of their supervisory committee for more information.
 - a. The CS Ph.D. discipline usually requires the students to make a formal presentation on the background study, current progresses and future plans regarding the selected research problems for doctoral study. CS students can take the Comprehensive Exam any time after passing the CS Ph.D. Qualifying Exam and the approval of the Plan of Study by the School of Graduate Studies.
7. Interdisciplinary Ph.D. Research Proposal: After the completion of the Comprehensive Exam, each Ph.D. student must submit a written Research Proposal to the School of Graduate Studies.
8. Doctoral Dissertation: The format and general requirements for the Doctoral Dissertation exam vary according to the discipline. The CS Ph.D. discipline requires the students to make a formal presentation on the outcomes of the doctoral research in front of the committee members. CS comprehensive exam and dissertation defense presentations are open to all students and faculty members. In addition, it is recommended that students submit a draft copy of the dissertation to the committee members prior to the presentation. The defense of the dissertation is approved when a majority of the supervisory committee members recommend approval and sign the Report of Results of Final Dissertation Examination form. Students can schedule the Dissertation Defense six months after the comprehensive exam. Link to Graduate School Forms (<https://sgs.umkc.edu/forms/>).
9. Final Dissertation Submission: During the semester of the Dissertation Defense, Ph.D. students must formally submit their Ph.D. dissertation according to the format and instructions of the School of Graduate Studies.

Notes:

- Ph.D. students are allowed to apply for extensions/exceptions/changes under exceptional circumstances.
- Part-time Ph.D. students may apply for flexibility of the timeline regarding the above-mentioned steps.
- Students are advised to regularly check the updates and modifications by the Schools of Graduate Studies.

Ph.D. Qualifying Exam for Computer Science Discipline

The qualifying exam is conducted to confirm that the student has a sound understanding of the fundamentals of computer science and has developed good problem-solving skills and research potential. This document includes the syllabus and describes the procedure for taking the qualifying exam in the Computer Science discipline.

Eligibility

The student must be fully admitted to the Ph.D. program at UMKC. Students admitted provisionally will have to satisfy all requirements stipulated in the letter of admission before being fully admitted.

Duration for Clearing Qualifying Exam

Both full-time and part-time students must take the Ph.D. qualifying exam by the third semester from the date of full admission. For example, if a student is fully admitted in the Fall 2015 semester, then he or she must take the qualifying exam by the Fall 2016 semester. Failure to do so will disqualify the student from continuing in the Ph.D. program. Upon consultation with his/her interim advisor, a student may choose to take the qualifying exam earlier than the third semester. If a student fails the qualifying exam in the first attempt then he or she **MUST** retake it in the subsequent semester. Failure to clear the exam in the second attempt disqualifies the student from remaining in the Ph.D. program with Computer Science as the primary discipline.

Qualifying Exam Application Dates

The Ph.D. qualification certification application will be received twice a year, the end of each semester.

Qualifying Exam Application Format

The CS Discipline Ph.D. qualification certification application will need to include (1) the following two components (Written and Oral) and (2) advisor's recommendation letter. It must be sent to the CS discipline Ph.D. coordinator (Dr. Lee, leeyu@umkc.edu).

Written component: Meet Either criterion 1 or 2

1. Proof of a minimum GPA of 3.5 (A- or higher) on a 4.0 scale for CS5592 Design of Advanced Algorithm or equivalent qualification (e.g., transferred courses, passed equivalent Ph.D. Qualifying exam before transferring to UMKC)
2. Proof of publications in top conference* or journals* including formal methods or algorithms

Oral component:

1. Proof of a minimum GPA of 3.5 (A- or higher) from at least one Ph.D. level seminar course in CS department, UMKC (e.g., CSEE5690 Research Methods and Experimental Design, CSEE5690 Recent Advances in Deep Learning).

After reviewing the application, the committee will cast votes of "pass" or "fail" on both the oral and written components. Failure to do so will disqualify the student from continuing in the Ph.D. program. Upon consultation with his/her advisor, a student may choose to submit the qualification certification application earlier than the third semester. If a student fails the qualification certification application in the first attempt, he or she **MUST** resubmit it in the subsequent semester. Failure to clear the qualification certification in the second attempt disqualifies the student from remaining in the Ph.D. program with Computer Science as the primary discipline.

Curriculum and Instruction

Discipline Coordinator

Candace Schlein, (816) 235-5754, schleinc@umkc.edu

Curriculum and Instruction is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

Applicants who designate Curriculum and Instruction as their primary discipline will be expected to have a Master's degree; and a GPA of at least 3.5 on a 4.0 scale, covering all post-baccalaureate work completed to date.

If the discipline is selected as the primary discipline and the dissertation research will have a primary orientation in Curriculum and Instruction, the student must obtain the agreement of a member of the doctoral faculty in Curriculum and Instruction to serve as research advisor before the student can be admitted.

The applicant must provide the following supplementary documentation:

1. Written recommendations from appropriate professors and practitioners in the field (selected by student).
2. Brief narrative stating research interest
3. Sample research or scholarly writing

Suggested Compatible Co-disciplines

Chemistry (p. 1223), Educational Leadership Policy and Foundations (p. 1572), English (p. 1580), History (p. 1584), Mathematics (p. 1589), Physics, (p. 1602) Social Science Consortium (p. 1607)

Core Program Requirements

All students with Curriculum and Instruction as primary discipline are required to complete:

Code	Title	Credits
Curriculum and Instruction Course Requirements (24 hours minimum)		
EDUC-C&I 5618 or EDUC-C&I 5620	Survey Of Research In Curriculum Seminars In Theories Related To Curriculum	3
EDUC-C&I 5626	Seminar in Multicultural Perspectives In Education	3
EDUC-C&I 5570 or EDUC-C&I 5571	Curriculum And Instruction In Technology Cognition & Technology	3
EDUC-C&I XXX	15 hours of EDUC-C&I Electives	15
Research Course Requirements (12 hours minimum)		
EDUC-R&P 5608	Introduction To Graduate Research	3
EDUC-R&P 5505	Statistical Methods I	3
EDUC-R&P 5555	Statistical Methods II ^{3 credits; taken instead of EDUC-R&P 5605/5606}	3
EDUC-R&P 5605 & EDUC-R&P 5606	Quantitative Analysis I: Regression And Analysis Of Variance and Quantitative Analysis II : Multivariate Data Analysis ^{6 credits total; must be taken as a sequence}	6
EDUC-R&P 5612	Applied Quantitative Research in Education ^{3 credits; Preq of EDUC-R&P 5555 or 5605}	3
EDUC-R&P 5615	Qualitative Research Theory & Design Educational Setting. Part 1	3
EDUC-R&P 5616	Qual Data Collection And Analysis In Educational Settings. Part 2 ^{3 credits; Prereq of EDUC-R&P 5615}	3
All courses taken to fulfill this requirement must be completed during I.Ph.D. program; students may not count coursework completed for previous degree programs to these requirements.		
Special Topics (or equivalent experiences or coursework)		
Special Topics in the Responsible Conduct of Research: An Introductory Overview		
Special Topics in the Responsible Conduct of Research: Human Subjects Research		
EDUC-C&I 5697	Dissertation Curriculum And Instruction	12

All students with Curriculum and Instruction as a co-discipline are required to complete:

Code	Title	Credits
Core Courses		
Select one of the following:		3
EDUC-C&I 5505 or EDUC-C&I 5506 or EDUC-C&I 5591	Introduction To Curriculum Theory Curriculum Design Curriculum & Instruction For The 21St Century	
EDUC-C&I 5618 or EDUC-C&I 5620	Survey Of Research In Curriculum Seminars In Theories Related To Curriculum	3
EDUC-C&I 5626	Seminar in Multicultural Perspectives In Education	3
EDUC-C&I 5570 or EDUC-C&I 5571	Curriculum And Instruction In Technology Cognition & Technology	3

One elective course (3-credit hours)

3

Total Credits

15

Ph.D. study in Curriculum and Instruction prepares students with diverse academic and professional backgrounds to meet equally diverse career and scholarly goals. Moreover, rather than being a homogeneous field with a relatively uniform approach to Ph.D. study, Curriculum and Instruction encompasses several separate specialized areas, each with its own requirements and expectations regarding doctoral work. Hence, students accepted for the Interdisciplinary Ph.D. program with Curriculum and Instruction as their co-discipline may have backgrounds in one of the educational fields represented in the School of Education, in one of the disciplines represented in the College of Arts and Sciences, or in a professional field such as criminology, computer science or law. Students accepted with Curriculum and Instruction as their primary discipline would typically have prior academic training and experience in curriculum and instruction. Advisors would tend to be specialists in reading education, physical education, special education, educational psychology, mathematics education, science education or curriculum and instruction. The doctoral student in Curriculum and Instruction may be preparing for teaching and research in higher education, for a curricular or supervisory position in a public school district or for work in a government agency, private foundation or an educational training role in business and industry. Consequently, a single set of minimum standards cannot possibly fit all Ph.D. programs for which Curriculum and Instruction is the primary discipline or co-discipline. Instead, sensitivity to individual student needs and goals, as well as regard for the different approaches to doctoral study represented in the several fields within Curriculum and Instruction, require flexibility and diversity in program planning.

Within the context described, a minimum of 24 hours in Curriculum and Instruction is required of students with Curriculum and Instruction as their primary discipline and a minimum of 15 hours in Curriculum and Instruction is expected of students selecting Curriculum and Instruction as their co-discipline. In no case will a program be drawn up or approved that contains only coursework previously completed. Additional requirements may be set by the student's doctoral supervisory committee on the basis of the individual's program goals, previous academic preparation and relevant prior experiences.

Comprehensive Examination Requirements

(Written and Oral examinations required)

Last week of August, February, and October.

Economics

Discipline Coordinator

Scott Fullwiler, (816) 235-5700, scottf@umkc.edu

Economics is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in [Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission](#) and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

In addition to the general criteria for admission, the criteria for admission to the Interdisciplinary Ph.D. program in Economics are:

1. A score of at least 154 in verbal reasoning, a score of at least 154 in quantitative reasoning and at least a 4.0 on the analytical portions of the general Graduate Record Examination.
2. A grade-point average of at least 3.0 (on a 4.0 scale) covering all college work taken prior to the bachelor's degree, or a grade-point average of at least 3.0 (on a 4.0 scale) covering all post-baccalaureate work completed to date.
3. Recommendations for provisional or full admission by the doctoral faculty review group in at least two participating disciplines.
4. Applicants for whom English is not the native language and have studied less than two years (full time) in a U.S. academic program or a comparable program in an English-speaking country are required to obtain a TOEFL score of at least 550 on the paper-based test or 213 on the computer-based test. In addition, to qualify for **full admission** status, international students must achieve a score of at least 4.0 on the Test of Written English (TWE) portion of the TOEFL examination. Students admitted provisionally because of the TWE requirement may take a TWE equivalency test through UMKC's Applied Language Institute once they arrive on campus.
5. Applicants must have at least 18 undergraduate semester credit hours in economics, including intermediate microeconomics and macroeconomics and a course in elementary statistics. In addition, it is strongly recommended that applicants have some of the following courses: econometrics, mathematical economics, history of economic thought, heterodox economics, economic history, calculus and linear algebra. Students with fewer than 18 credit hours will be admitted only on a provisional status.
6. Applicants matriculated into the M.A. Economics program at UMKC may apply for admission to the Interdisciplinary Ph.D. program in Economics as soon as they have completed 15 credit hours and have earned a grade-point average of 3.25 or better.
7. Applicants who wish to transfer to the UMKC Interdisciplinary Ph.D. program in Economics from other institutions must have obtained a grade-point average of at least 3.0 covering all their graduate work. Transfer students must apply for transfer credits toward the Interdisciplinary Ph.D. as soon as possible after completion of a minimum of 12 credits at UMKC with a grade-point average of 3.0 or better. Up to 30 transfer credit hours

may be granted. No transfer credit will be granted for any courses not relevant to the Interdisciplinary Ph.D. in Economics or for any course with a GPA of less than 3.0.

The deadline for receipt of completed applications and supporting documentation is Feb. 1 for the fall semester and Sept. 1 for the spring semester.

Alternate Admission Criteria

Applicants who do not fit the above criteria may petition the Economics doctoral committee with evidence of scholarly publication, research and recommendations, but the decision rests with the committee.

Qualifying Requirements for Full Admission

At the time admission is offered, provisional students will be notified of any course deficiencies or qualifying requirements to be met for full admission. The faculty will make a decision with regard to full admission based upon the student's performance in meeting the qualifying requirements.

Suggested Compatible Co-disciplines

Curriculum and Instruction (p. 1568), Educational Leadership Policy and Foundations (p. 1572), History (p. 1584), Public Affairs and Administration (p. 1605), Social Science Consortium (p. 1607)

Core Program Requirements

For Students with Economics as a Primary Discipline

The Interdisciplinary Ph.D. in Economics consists of a minimum of 18 required coursework credit hours in Economics—including:

Code	Title	Credits
ECON 5506	Advanced History Of Economic Thought	3
ECON 5551	Advanced Institutional Theory	3
ECON 5601	Colloquium In Advanced Macroeconomics	3
ECON 5602	Colloquium In Advanced Microeconomics	3
ECON 5625	Colloquium In Econometrics	3
ECON 5688	Colloquium On Political Economy	3
Total Credits		18

If the student has not taken the prerequisites to ECON 5601, ECON 5602 and ECON 5625, he/she will be required to take ECON 5501, ECON 5502, ECON 5521, and ECON 5525 --an additional 12 coursework credit hours (or, a total of 30 hours). All students are strongly urged to take two fields in Economics, each consisting of two three-credit hour courses for a total of 12 additional coursework credit hours. These courses will be taken in Economics and at least one additional field such as sociology, history, public administration, education, mathematics, political science, geosciences, computer science or others, provided that such fields participate in the doctoral program.

Code	Title	Credits
Required Courses		
ECON 5501	Advanced Macroeconomic Analysis	3
ECON 5502	Advanced Microeconomic Analysis	3
ECON 5506	Advanced History Of Economic Thought	3
ECON 5521	Mathematical Economics (Calculus I strongly recommended)	3
ECON 5525	Econometric Methods	3
ECON 5551	Advanced Institutional Theory	3
ECON 5601	Colloquium In Advanced Macroeconomics	3
ECON 5602	Colloquium In Advanced Microeconomics	3
ECON 5625	Colloquium In Econometrics	3
ECON 5688	Colloquium On Political Economy	3
Additional Requirements		
Coursework in an outside field or fields, depending upon the requirements of co-discipline regulations		
Dissertation and oral examination		12
Total Credits		42

For Students with Economics as a Co-discipline

Those students taking Economics as a co-discipline will take a minimum of 12 hours in Economics, at the graduate level, including:

Code	Title	Credits
ECON 5501	Advanced Macroeconomic Analysis	3
ECON 5502	Advanced Microeconomic Analysis	3

Comprehensive Examination Guidelines

Primary discipline students are required to pass a qualifying examination in Economics theory—micro, macro and political economy, and in quantitative methods. Students taking field concentrations must pass a Comprehensive Examination in those fields, or meet the requirement by an alternative means that is accepted by the department.

Co-discipline students must receive grades of "B" or better in ECON 5501 and ECON 5502. In addition, the oral portion of the Comprehensive Examination will require students to integrate knowledge between topics in Economics and the student's coordinating unit.

Educational Leadership, Policy and Foundations

Discipline Contact

Shirley Marie McCarther, (816) 235-2451, mccarthers@umkc.edu

Educational Leadership, Policy and Foundations is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

Applicants who designate Educational Leadership, Policy and Foundations as their primary discipline will be expected to have a grade-point average of at least 3.0 on a 4.0 scale, covering all college work taken prior to the bachelor's degree, or a GPA of at least 3.5 on a 4.0 scale, covering all post-baccalaureate work completed to date.

Applications are only reviewed once a year, for admission beginning the next fall term. To be considered, applications must be submitted to the Admissions Office by February 15.

The applicant must provide the following supplementary documentation:

1. Written recommendations from appropriate professors and practitioners in the field (selected by the applicant).
2. An autobiographical sketch. (This should be a brief resume of academic and professional goals and the applicant's personal, academic and career history as it relates to those goals. It should also include reasons for choosing educational leadership, policy and foundations as a field of study.)
3. Evidence of graduate-level writing ability provided by writing samples, prior scholarly writing or the successful completion of an essay examination.

Applicants are required to provide official GRE test scores. GRE scores will be used by doctoral faculty in the discipline as one of several criteria used to evaluate the strength of the application. No other assessment results will be substituted for the GRE. When evaluating applications, faculty members will take into account evidence in the applications of such factors as demonstrated leadership skills, commitment to education, communication and academic skills, a clear and important research agenda, cultural background, etc. There is no minimum aggregate GRE score required for applications to be considered for educational leadership, policy and foundations. Applicants must meet the GRE requirements for their other discipline(s).

In addition, an applicant, the applicant's advisor or any member of the division may request that the applicant meet with and be interviewed by the division faculty.

Alternate Admission Criteria

International applicants will be considered for admission to the Ph.D. program on the basis of background, experience and educational attainments in their home countries. Exceptions to the general criteria for admission to Interdisciplinary Ph.D. study may be made for students whose potential for success in the doctoral program may not be reflected in the general criteria.

Qualifying Requirements for Full Admission

In some cases, the division may ask that 12 hours of work at UMKC, including an education foundations course, be taken prior to full admission.

Students admitted under alternate criteria will be notified upon acceptance of any coursework deficiencies they must satisfy or other preparation they must undertake prior to full admission.

Suggested Compatible Co-disciplines

Curriculum and Instruction (p. 1568), Economics (p. 719), History (p. 1584), Social Science Consortium (p. 1607)

Core Program Requirements

Students with Educational Leadership, Policy and Foundations as a co-discipline will be required to take a minimum of 15 credit hours of core courses. The core curricula will vary, depending on whether students' research is primarily in educational leadership or the social-philosophical foundations of education and on the types of educational setting upon which they wish to focus. Specific courses will be selected with the advice and consent of the student's faculty advisor and supervisory committee. The supervisory committee may elect to accept coursework in an educational-specialist program or other post-master's degree program as counting toward the 15-credit-hour requirement.

Students seeking administrative certification for public school positions should check with their advisors to be sure they include all courses currently required in the states in which they wish to become certified.

The amount of required coursework, beyond the minimum 15-credit-hour core requirement, taken by students with Educational Leadership, Policy and Foundations as their primary discipline, will depend upon their previous preparation in the discipline, their previous research competencies, their personal career goals and their research interests.

All students with Educational Leadership, Policy and Foundations as either the primary discipline or the co-discipline are required to take and complete EDUC-UL 5685, the seminar on problems and issues in education and urban leadership.

Other Discipline-Specific Special Requirements

The student, at a minimum, will be required to take and complete 12 hours of coursework that provides extensive preparation in research methodologies relevant to her or his professional goals and intended dissertation project. The student will select specific courses with the advice and consent of her or his faculty advisor and supervisory committee. Typical courses which would satisfy this requirement include (but are not limited to):

Code	Title	Credits
EDUC-R&P 5505	Statistical Methods I	3
EDUC-R&P 5508	Principles And Methods Of Research	3
EDUC-R&P 5605	Quantitative Analysis I: Regression And Analysis Of Variance	3
EDUC-R&P 5608	Introduction To Graduate Research	3
HISTORY 5591	Archival Methods	3
HISTORY 5687	Doctoral Research Seminar	3
SOCIOL 5510	Sociological Methods I	3
SOCIOL 5511	Sociological Methods II	3
EDUC-UL 5601	Research In Education Administration: Qualitative Theory & Design	3
EDUC-UL 5603	Research In Education Administration: Qualitative Data & Analysis	3

Requirements for Comprehensive Examinations

Students with Educational Leadership, Policy and Foundations as the primary discipline must pass a Comprehensive Examination including both the primary discipline and the co-discipline areas.

Electrical and Computer Engineering

Discipline Coordinator

Ahmed Hassan (hassnAM@umkc.edu), (816) 235-6219,

Electrical and Computer Engineering faculty who are members of the doctoral faculty.

Electrical and Computer Engineering is a Ph.D. discipline with the following five Concentration Areas:

1. Computer, VLSI and Embedded Systems Design
2. Nanotechnology
3. Electromagnetics, Radio Frequency (RF) Circuits, and Signal Processing
4. Computer Vision, Multimedia and Machine Learning
5. Power Electronics and Renewable Energy

Notes:

1. Our Ph.D. Programs are administered by the Interdisciplinary Ph.D. Program (http://web2.umkc.edu/catalog/Interdisciplinary_Ph_D_Program.html) of School of Graduate Studies (http://web2.umkc.edu/catalog/School_of_Graduate_Studies_0.html) at UMKC.
2. As part of Interdisciplinary Ph.D. Program (http://web2.umkc.edu/catalog/Interdisciplinary_Ph_D_Program.html) requirement, ECE Ph.D. students must select a related co-discipline from which they must take 3 or 4 courses to strengthen the knowledge in topics broadly related to their research areas.
3. ECE Ph.D. students **do not need to select the Co-Discipline during the application process**. This has to be done in the first semester after coming to UMKC.
4. The discipline-specific requirements listed here are *in addition* to the requirements listed in the Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission (http://web2.umkc.edu/catalog/Interdisciplinary_Ph_D_Application_Procedure_and_Minimum_Criteria_for_Admission.html) and the Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements (http://web2.umkc.edu/catalog/Minimum_Interdisciplinary_Ph_D_Academic_Regulations_and_Degree_Requirements.html).

Discipline-Specific Admission Requirements

A student who meets the minimum discipline requirements stated below will be considered for regular admission to the Ph.D. program. A student who does not meet some of the requirements but shows high potential for advanced-level work, may be considered for provisional admission. Admission also depends on factors such as number of seats available, resources available in the area of student's interest, the quality of previous work, etc. A student who does not qualifying for admission to the Ph.D. program, may be considered for admission to the M.S. in Electrical Engineering program. Requirements for admission are similar, whether the applicant is requesting Electrical and Computer Engineering as the primary or co-discipline.

Minimum Recommended Ph.D. Admission Requirements:

1. GPA (Bachelor or equivalent Degree): 3.5 in the scale of 4 (or equivalent)
2. GPA (MS or equivalent Degree if any): 3.5 in the scale of 4 (or equivalent)
3. GRE (Quantitative) minimum score = 85%
4. TOEFL iBT minimum Score = 89 or IELTS minimum score = 6.5
5. Prior Projects or Publications (Preferred)*
6. Internationally Acceptable Accreditation of the Prior Degree Awarding Institutes

• *Prior research project and/or publication record is not required for admission into ECE Ph.D. program. However, doctoral faculty members give very high value to the students with such backgrounds.*

Direct or Expedited Ph.D. Program

It is not required to have an MS or equivalent degree to apply to ECE Ph.D. program. We accept well-qualified and motivated students with a Bachelor's degree directly into our Ph.D. program. We actively encourage students in the **Direct Ph.D. Program** to try to complete the doctoral study within 4 or 5 years after the Bachelor degree. To complete the Ph.D. degree in an expedited timeline, first, the student has to be dedicated and well qualified. Second, the student must make a comprehensive plan at the beginning of the doctoral study to complete all the relevant steps within a strict timeline, which is challenging but not impossible.

Clarification of Minimum Requirements and Decision Process

Academic Preparation

The applicant must have a bachelor and/or a master's degree in electrical and/or computer engineering, electronics, communications engineering or any other field requiring substantial training in at least one of the above fields and in mathematics with a GPA of 3.5 or better, cumulative as well as in the major field; and a GPA of 3.5 or better in all post-baccalaureate or post-master's degree work.

Aptitude for Advanced Work

The student must demonstrate an aptitude for advanced-level work through national/international standardized examinations such as the GRE. The expected performance level is the 85th percentile in the quantitative portion of the GRE examination.

- In rare occasion, ECE Ph.D. Discipline Coordinator exempts GRE requirement for students with outstanding publication or scholarly records in internationally renowned journals, conferences or similar forums.

Proficiency in English

The student must demonstrate his or her proficiency in oral and written communication in English through national/international standardized English examinations such as TOEFL, verbal portion of the GRE, etc. Because of this test, the student may be required to improve his or her oral and written communication in English before enrollment in the courses of the chosen disciplines.

- For students with a North American (USA and Canada) B.S. or M.S. degree the English Proficiency requirement is exempt.

How a Ph.D. Applicant Can Request for the Waiver of any Test Score?

As mentioned above, under special circumstance a Ph.D. applicant can request for the waiver of any test (GRE/TOEFL/IELTS) score. Usually **the GRE waiver request is granted** for students who have already demonstrated outstanding performance in research or other scholarly activities prior to applying to UMKC for graduate admission.

Applicants must talk to the respective Ph.D. Discipline Coordinator (https://webmail.umkc.edu/owa/redir.aspx?SURL=XE6le1p_ZuDqPSgMooWMNlzm9UKEnDzT4hrhbMX2tTOOLwTfAjfTCGgAdAB0AHAAOgAvAC8AcwBnAHMALgB1AG0AawBjAC4AZQBkAHUALwBmAG8Acq%3a%2f%2fsgs.umkc.edu%2ffor-faculty-and-staff%2finterdisciplinary-ph-d-coordinators%2f) BEFORE requesting a waiver for the official test score requirements.

After talking with the Coordinators, a waiver request can be submitted in writing through the Supplementary Interdisciplinary Ph.D. Application site (iSAP). Choose "Uploads" from the left-hand menu, then "Add files" to upload your waiver request in a PDF format. Choose "Other" for the document type listed in the drop down menu, then click "Start" to add the TOEFL/IELTS/GRE waiver request to your application.

Recommendation Letters

The student must provide at least three recommendation letters from professors from his or her previous institution(s). If the applicant has been out of school for several years, recommendation letters from his or her supervisors (technical) will be acceptable. However, even in this situation, a recommendation letter from his or her last academic institution is highly recommended. A recommendation from a faculty member in the Computer Science Electrical Engineering (CSEE) Department at UMKC must be provided if the student has taken courses from or worked with the CSEE faculty.

Statement of Goals and Objectives

The applicant must provide a 250 to 500 words essay on his/her goals and objectives of pursuing the Ph.D. in the chosen fields.

Prior Research Projects and Publications (Preferred but not Required)

The applicant is encouraged to submit evidence of prior research projects and/or publications (if any).

Admission at an Advanced Level

An applicant who has already completed significant graduate coursework (15 or more semester hours of post-master's work or 30 or more hours of post-bachelor's work) toward a Ph.D. at another institution must provide reasons for changing institutions. The applicant must also provide a letter of endorsement from a doctoral faculty member in Electrical and Computer Engineering indicating their willingness to be the student's research advisor.

Ph.D. Admission Decision Process

Ph.D. admission is primarily based on individual doctoral faculty members' needs and preferences. The role of the ECE Ph.D. Discipline Coordinator is to ensure that Ph.D. applicants satisfy the minimum requirements (GPA, GRE, TOEFL/IELTS, reputation of prior degree awarding institutes and other scholarly achievements). If the requirements are satisfied, ECE requires (except in rare cases) a doctoral faculty member to accept advisory duties for a student to be admitted.

Communication with our Doctoral Faculty Members

In addition to reviewing the academic credentials of a new Ph.D. applicant, many of our faculty members prefer interviewing the student before making any decision. Therefore, ***we strongly advise new Ph.D. applicants to contact our doctoral faculty members in the areas of their research interests before or after starting the application process.*** However, it is not required that every Ph.D. applicant must contact a relevant doctoral faculty member prior to the application. Whenever we receive a new Ph.D. application we share the information with all ECE doctoral faculty members for their consideration. **ECE Doctoral Faculty Members and Research Areas may viewed on the website:** <http://sce.umkc.edu/degree-programs/doctoral/electrical-computer-engineering/>

Qualifying Requirements for Full Admission

Prerequisite Knowledge

A Ph.D. student selecting Electrical and Computer Engineering (ECE) as the primary Ph.D. discipline is expected to have the level of preparation represented by a four-year undergraduate degree in electrical/computer engineering. The applicant may have received a bachelor's degree or a master's degree in computer science, computer engineering, electrical engineering or electronics, or any other related field with substantial training in mathematics.

Selection of a Co-Discipline and Suggested Compatible Co-Disciplines

To broaden the knowledge of the Ph.D. students UMKC Interdisciplinary Ph.D. program requires each student to select a co-discipline closely related to the primary discipline.

The following are suggested compatible co-disciplines for ECE students:

Computer Networking and Communication Systems (<https://catalog.umkc.edu/colleges-schools/graduate-studies/telecommunication-computer-networking/>), Computer Science (<https://catalog.umkc.edu/colleges-schools/graduate-studies/computer-science/>), Engineering (<https://catalog.umkc.edu/colleges-schools/graduate-studies/engineering/>), Mathematics (<https://catalog.umkc.edu/colleges-schools/graduate-studies/mathematics/>), Physics (<https://catalog.umkc.edu/colleges-schools/graduate-studies/physics/>)

A co-discipline outside of this list may be considered only in exceptional cases. These co-disciplines require 3 or 4 courses to be taken by the ECE Ph.D. students to fulfill the co-discipline requirements.

Notes:

- *ECE Ph.D. students do not need to apply to a co-discipline at the time of admission.*
- ECE Ph.D. students have to select a co-discipline in the first semester after coming to UMKC.
- ECE Ph.D. students are advised to consult their primary (ECE) adviser to select an appropriate co-discipline.
- ECE Ph.D. students can change their co-discipline any time before the comprehensive exam.

Transfer of Course Credit

New Ph.D. students with some prior graduate level course works from another university can apply to transfer up to 6 credit hours in each discipline (primary and co-discipline).

Alternate Admission Criteria

An applicant not meeting the minimum admission requirements, or not having sufficient academic preparation (stated above under prerequisite knowledge) for advanced work in the chosen discipline (s), may be considered for provisional admission by the CSEE Departmental Ph.D. committee if the committee sees high potential for advanced work from the rest of the applicant's credentials. Evidence of high potential might be pertinent work experience, published papers or extremely high achievements in related areas. A student not having an undergraduate degree in electrical and/or computer engineering may be admitted provisionally if the admission committee determines that the student has a strong aptitude for research and is willing to take prerequisite courses as determined by the admission committee based on the student's academic record.

Application for an MS Degree while Enrolled in ECE Ph.D. Program

ECE Ph.D. students may apply to receive an MS degree upon passing the qualifying and comprehensive exams provided that the coursework required for MS degree under course only option is completed. This is a very good option for students in ECE Direct Ph.D. Program. However, this is subject to primary Ph.D. supervisor's approval.

Note:

- If an ECE Ph.D. student fails to pass the Qualifying Exam in two attempts or cannot successfully complete the Comprehensive Exam, the student will not be allowed to apply for transfer to the MS program or apply to receive an MS degree even if the coursework required for MS degree under course-only option is completed. Please consult your ECE Ph.D. supervisor and/or ECE Ph.D. Discipline Coordinator for details.

Core Program Requirements

The amount of work required for the Ph.D. depends on the student's level of preparation. For example, a student entering the Ph.D. program after earning a bachelor's degree may expect to do significantly more work compared to a student who enters after earning a master's degree.

Electrical and Computer Engineering as a Co-Discipline

- Students who choose ECE as a co-discipline need to take 3 ECE graduate courses (9 credit hours).
- Students who choose ECE as a co-discipline **do not need** to take the **ECE Ph.D. Qualifying Exam**.

• **CNS, CS, Engineering and Physics Ph.D. students are automatically eligible for ECE as a co-discipline.**

Full-time Status and Doctoral Residency Requirement

US Domestic students can enroll into any number of credit hours per semester during the regular academic year (Fall and Spring). International students are usually required to enroll in 9 credit hours per semester during the regular academic year (Fall and Spring) to maintain full-time (visa) status. However, for international graduate (Ph.D. and MS) students with 50% FTE (20 hours per week) appointments as Graduate Research/Teaching Assistants the requirement is 6 credit hours of enrollment per semester for full time equivalence. Enrollment is not required in Summer.

Interdisciplinary Ph.D. students must satisfy the doctoral residency requirement by satisfactory completion of at least 18 credits within 24 consecutive months. When satisfying the residency requirement, all Interdisciplinary Ph.D. students are subject to the following restrictions:

1. The doctoral residency requirement must be satisfied no later than the end of the semester in which the student completes his or her comprehensive examinations.
2. Students must achieve a cumulative graduate grade-point average of at least 3.0 in all courses counted toward satisfying the residency requirement.
3. Dissertation research credits (696 to 699) may not be counted toward satisfying the doctoral residency requirement

Financial Aid

Various forms of financial aid (such as graduate research assistantships, graduate teaching assistantships, graduate fellowships) are available through the Computer Science and Electrical Engineering Department and the School of Graduate Studies. Contact the discipline coordinator for more information.

Most of our Ph.D. students are funded through a **Graduate Research Assistantship (GRA)** and/or a **Graduate Teaching Assistantship (GTA)**. GRA support is provided by individual doctoral faculty members from their research grants. GTA support comes from Department Chair's instructional fund. However, the GTA support is also provided based on the recommendation of the Ph.D. advisor. The Department Chair normally honors the requests for GTA support if there are available GTA slots. Therefore, every Ph.D. student must have a faculty advisor to get funding in the form of a GRA or GTA. Once a Ph.D. student is admitted we (the Department Chair and the doctoral faculty members) will try our best to provide funding to the student throughout the Ph.D. study. However, the applicants must keep in mind that the number of funding slots (GRA and GTA) for the Ph.D. students are not unlimited. The supports are provided based on respective faculty advisor's recommendations and Department Chair's needs. The awarding of GRA and GTA funding is a competitive process. The students are required to maintain high academic standing and demonstrate strong research performance to get continuous support throughout the Ph.D. study. Our Department's policy is to provide support to as many Ph.D. students as possible.

Additionally, the UMKC School of Graduate Studies provides many different types of fellowships, awards and scholarships to qualified graduate students through a competitive selection process. Please visit the website of the School of Graduate Studies for further details.

Note:

- **If a student receives financial aid in the form of GTA/GRA from the CSEE Department or its doctoral faculty members after the full admission and enrollment into ECE Ph.D. program, the student must complete the doctoral study. If a funded Ph.D. student decides to leave the program at any stage before the completion, no terminal MS or equivalent degree will be awarded.**

Monthly Stipend for Ph.D. Students with GRA/GTA Appointments

Ph.D. students with 50% FTE (20 hours per week) appointments as GRA/GTA will receive a stipend of around \$6000 (subject to availability of funds) per semester during the Fall and Spring semesters. This stipend will be paid in 4 or 5 monthly installments. All GRA/GTA appointments (if awarded) are for one regular academic year (Fall and Spring) for the new students. Beyond the first year, the GRA/GTA supports are subject to availability and performance. **There is no guaranteed financial support for the Summer semester.**

Other Fees and Health Insurance

Students are responsible for some additional fees, health insurance, books and supplies, and living costs.

Timeline and Steps Toward the Completion of ECE Ph.D. Degree

New Ph.D. students are strongly advised to make a clear plan in consultation with the ECE Ph.D. advisor as soon as they start their doctoral study to complete the following steps within the required time line:

1. **Annual Evaluation:** Every Ph.D. student is required to complete an annual evaluation in two parts - one in spring and one in fall. These are online surveys to evaluate last year's achievements and next year's goals, then the primary and co-discipline advisors provide feedback for the students.
2. **Ph.D. Qualifying Examination:** Students taking an ECE Ph.D. Discipline as the primary unit should make the first attempt to pass the qualifying exam **during the first three (3) regular semesters after fully admitted to the doctoral study at UMKC**. The student must pass both parts of the qualifying exam within four (4) regular semesters. Summer term is not counted.
3. **Plan of Study:** The Ph.D. Plan of Study form, signed by the student, members of the student's proposed Supervisory Committee, and the Academic Administrators in the student's disciplines, must be filed with the School of Graduate Studies **no later than the end of the second year (24 months)** after the student has been fully admitted. The Interdisciplinary Ph.D. Plan of Study may be filed prior to that time.
4. **Formation of Ph.D. Supervisory Committee:** The Supervisory Committee shall consist of at least five members composed of one doctoral faculty from each of the primary and co-disciplines, with a maximum of three from any one discipline. Regarding the formation of the committee the student should consult the primary (ECE) Ph.D. supervisor, who will be the Chair of the Committee. Names and signatures of the committee members have to be submitted with the **Plan of Study**.
5. **Fulfilling Ph.D. Residency Requirement:** Ph.D. students must satisfy the doctoral residency requirement.
6. **Comprehensive Examination:** The format and general requirements for the Comprehensive Exam vary according to the Ph.D. discipline. The Comprehensive Exam is administered by the candidate's doctoral committee. A student can either take a written test or opt for an oral presentation covering both primary and co-discipline areas. Discussion with and agreement from the student's doctoral committee is required before choosing the best option. Candidates should contact the CSEE Department's office and the chair of their doctoral committee for more information.

The ECE discipline usually requires the students to make a formal presentation on the background study, current progresses and future plans regarding the selected research problems for doctoral study. ECE students can take the **Comprehensive Exam any time after passing ECE Ph.D. Qualifying Exam and the approval of the Plan of Study** by the School of Graduate Studies.

1. **Interdisciplinary Ph.D. Research Proposal:** After the completion of the Comprehensive Exam each Ph.D. student must submit a written Research Proposal to the School of Graduate Studies.

2. **Doctoral Dissertation:** The format and general requirements for the Doctoral Dissertation exam vary according to the discipline. The ECE discipline requires the students to make a formal presentation on the outcomes of the doctoral research in front of the committee members. *ECE Comprehensive Exam and dissertation defense presentations are open to all students and faculty members.* In addition, it is recommended that students submit a draft copy of the dissertation to the committee members prior to the presentation. The defense of the dissertation is approved when a majority of the supervisory committee members recommend approval and sign the Report of Results of Final Dissertation Examination form. Students can schedule **Dissertation Defense six months after the Comprehensive Exam.**
3. **Final Thesis Submission:** After the successful completion of the Dissertation Defense, Ph.D. students must formally submit their Ph.D. dissertations according to the format and instructions of the School of Graduate Studies.

Notes:

- Ph.D. students are allowed to apply for extensions/exceptions/changes under exceptional circumstances.
- Part-time Ph.D. students may apply for flexibility of the timeline regarding the above-mentioned steps.
- Students are advised to regularly check the updates and modifications by the Schools of Graduate Studies.

Qualifying Examination Guidelines

The Qualifying Exam is a written test administered by the ECE Ph.D. committee. The test questions are from a set of fundamental courses in electrical and computer engineering. The ECE Ph.D. discipline offers the qualifying exam twice a year, once in the spring semester and once in the fall semester. Students taking an ECE Ph.D. Discipline as the primary (coordinating) unit should take the qualifying exam during the first 18 months after fully admitted. In case a student failed in his/her first attempt, and then he/she should take the failed part of exam again in the next consecutive term. Students who fail both attempts will be disqualified for the Ph.D. admission in ECE. ***The ECE Qualifying Exam is only for students whose primary Ph.D. discipline in ECE. Students from other primary disciplines who select ECE as a co-discipline will not be required to take the ECE Qualifying Exam.***

Qualifying Exam has two parts:

- 1) Compulsory Part (Part-I)
- 2) Concentration Area Based Part (Part-II)

Part-I: Compulsory Part of Ph.D. Qualifying Exam (Math and Circuit Theory): (Open Notes)

1. Part I of the exam will be held twice every year on the **third Friday of April and November**
2. It is compulsory for every student taking the qualifying exam to pass Part I, which will be based on E&C-ENG 276 (Circuit Theory I) and E&C-ENG 341R (Applied Engineering Analysis II).
3. Students are required to attempt only six questions out of ten.
4. Students are required to attempt at least two questions from each E&C-ENGR 276 and E&C-ENGR 341R. Total Time = 3 hours

Part-II: Concentration Area Based Part of the Ph.D. Qualifying Exam: (Open Notes)

1. Part II of the exam will be held twice every year on the Monday following the Part-I of the exam.
2. Students will be tested out from one of the concentration areas selected by the student.
3. Faculty in charge of the courses belonging to that particular concentration area will be asked to submit three questions per course and submit them to the ECE Ph.D. coordinator.
4. From the selected concentration area the students will be required to select three courses.
5. The students will be required to attempt only six questions out of nine questions from the selected 3 courses.
6. Students are required to attempt at least one question from each of the three courses selected for that concentration area. Total Time = 3 hours

ECE Ph.D. Concentration Areas for Qualifying Exam (Part II):

1. Computer, VLSI and Embedded Systems Design
2. Nanotechnology
3. Electromagnetics, Radio Frequency (RF) Circuits, and Signal Processing
4. Computer Vision, Multimedia and Machine Learning
5. Power Electronics and Renewable Energy

ECE Ph.D. Qualifying Exam Dates:

1. Spring Semester Exam: **Part I:** Third Friday of April and **Part II:** Monday following the Part I Exam
2. Fall Semester Exam: **Part I:** Third Friday of November and **Part II:** Monday following the Part I Exam

A Snapshot of Qualifying Exam Guidelines:

1. Please consult your Ph.D. Adviser about area selection and timing of your Ph.D. Qualifying Exam.
2. **Clarification of Open Notes Policy:** Students are allowed to bring 2-page doubled-sided written notes per subject during the exam. Students are not allowed to bring any textbook and other printed materials. Electronic copies of the notes are not allowed.

Restrictions on Electronic Devices: Scientific Calculators are allowed during the both parts of the examination. However laptop, smartphone, tablet, PDA or any other internet connected device will be absolutely prohibited during the both parts of the qualifying examination.

Engineering

Discipline Coordinator

Ceki Halmen, (816) 235-1286, halmenc@umkc.edu

Engineering is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

A student who satisfies the general requirements for admission and meets the minimum discipline requirements stated below will be considered for regular admission to the Ph.D. program with Engineering as a discipline. A student who does not meet some of the requirements but shows high potential for advanced-level work may be considered for provisional admission. Admission also depends on factors such as number of seats available, resources available in the area of the student's interest, the quality of previous work, etc. Requirements for admission are the same whether the applicant is requesting Engineering as the primary discipline or the co-discipline.

1. The applicant must have a bachelor's degree or a master's degree in civil or mechanical engineering or related disciplines with a grade-point average of at least 3.0 on a 4.0 scale in the last 60 hours of undergraduate engineering coursework. In addition, a GPA of 3.5 or better in all post-baccalaureate coursework is required. Pre-program requirements may be specified in case the bachelor's degree is in a discipline different than that to which the candidate is applying.
2. The student must demonstrate an aptitude for advanced-level work by obtaining a cumulative GRE score of at least 302 (verbal + quantitative) and a minimum of 158 on the quantitative portion of the examination. GRE requirements may be waived for applicants with a baccalaureate from an ABET accredited program who have passed the Fundamentals of Engineering (FE) exam.
3. TOEFL or IELTS scores are required for international students without prior U.S. degrees. The minimum required score is 80 or 6.5 on TOEFL or IELTS, respectively. TOEFL requirements may be waived for applicants with a baccalaureate from an ABET accredited program.
4. The student must provide at least three recommendation letters from professors at previous institutions or mentors at work.
5. The applicant must provide a maximum 300-word statement on their goals and objectives in pursuing the Ph.D. The statement at the least should indicate which of the areas (civil or mechanical) the student is interested in and preferably indicate the sub-discipline the student is interested in as well, such as structures, construction management, biomechanical, HVAC etc.
6. Provisional admission may be granted if the minimum GPA and GRE requirements are not met, but other indicators promise the student's success in the program. To be fully admitted to the Interdisciplinary Ph.D. program, the provisionally admitted student must obtain a grade of B or better in the first nine hours of coursework and submit a satisfactory GRE score within their first year of the program.

Suggested Compatible Co-disciplines

Chemistry, Computer Networking and Communication Systems (<https://catalog.umkc.edu/colleges-schools/graduate-studies/telecommunication-computer-networking/>), C (<https://catalog.umkc.edu/colleges-schools/graduate-studies/computer-science/>) Computer Science, Electrical and Computer Engineering, G (<https://catalog.umkc.edu/colleges-schools/graduate-studies/geosciences/>) Geosciences, M (<https://catalog.umkc.edu/colleges-schools/graduate-studies/mathematics/>) Mathematics, M (<https://catalog.umkc.edu/colleges-schools/graduate-studies/molecular-biology-biochemistry/>) Molecular Biology and Biochemistry, O (<https://catalog.umkc.edu/colleges-schools/graduate-studies/oral-craniofacial-sciences/>) Oral and Craniofacial Sciences (<https://catalog.umkc.edu/colleges-schools/graduate-studies/oral-craniofacial-sciences/>), Physics (<https://catalog.umkc.edu/colleges-schools/graduate-studies/physics/>)

Core Program Requirements

Engineering as Primary Discipline

Students without an MS degree need to complete a minimum of 42 credit hours of approved didactic graduate coursework (not research hours) beyond the baccalaureate. At least two-thirds of these hours must be at the 5500/5600 level. The graduate coursework may include courses taken at UMKC or other institutions and approved for transfer by the student's supervisory committee. A minimum of 12 credit hours of dissertation research taken at UMKC (CIV-ENGR 5699, E&C-ENGR 5699 or MEC-ENGR 5699) is required.

Example Minimum Requirements without an MS degree

Code	Title	Credits
Primary discipline (Engineering)		33
Co-discipline (e.g. Mathematics or Physics)		9
Dissertation research		12
Total beyond M.S. degree (minimum of 30 hours)		54

Students with an MS degree need to complete a minimum of 18 credit hours of approved didactic graduate coursework (not research hours) beyond the MS degree. At least two-thirds of these hours must be at the 5500/5600 level. The graduate coursework may include courses taken at UMKC or other institutions and approved for transfer by the student's supervisory committee. A minimum of 12 credit hours of dissertation research taken at UMKC (CIV-ENGR 5699, E&C-ENGR 5699 or MEC-ENGR 5699) is required.

Example Minimum Requirements beyond an MS Degree

Code	Title	Credits
Primary discipline (Engineering)		9
Co-discipline (e.g. Mathematics or Physics)		9
Dissertation research		12
Total beyond M.S. degree (minimum of 30 hours)		30

Engineering as Co-discipline

A student electing Engineering as co-discipline will be required to complete a minimum of 9 credit hours in Engineering graduate courses, of which at least six hours must be at the 5500/5600-level.

Qualifying Examination Guidelines

Students may be required to complete a qualifying exam by the research advisor. If required, the exam will be administered by the graduate committee in conjunction with the research advisor in the first year of study. The exam will consist of two parts: (1) a written exam based on core areas in civil/mechanical engineering OR an engineering problem related to the student's emphasis area, AND (2) an oral defense of the exam and other discipline fundamentals or the problem solution. The department will keep a record of whether the student has passed or failed the exam. The student may request one more attempt to retake the exam in the event of a failed grade. The student will be recommended for termination from the doctoral program after two failed attempts.

Comprehensive Examination Guidelines

To advance to degree candidacy, an Interdisciplinary Ph.D. student is required to pass a Comprehensive Examination administered by the student's research advisor and supervisory committee. This Comprehensive Exam will consist of two parts. Part One will be a written exam over the student's Ph.D. coursework or the submission of a grant proposal to the committee. Part Two will be an oral defense of the student's dissertation research proposal.

English

Discipline Coordinator

John Barton, (816) 235-2764, bartonjc@umkc.edu

English is a discipline in the Interdisciplinary Ph.D. Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

For new students selecting English as a discipline, admission will normally be for the fall term. Application dossiers must be complete by Jan. 15. Because the university closes over the winter holidays and classes may not resume until after Martin Luther King Day, prospective students should initiate contact with the department's Discipline Coordinator and faculty in November.

Applicants who select English as their primary discipline will be expected to have the M.A. in English or equivalent coursework as determined by the English department doctoral committee. Applicants who select English as a co-discipline should have completed a master's degree or equivalent coursework. In most cases, students will be expected to have completed, with a grade of B or better, 12 hours of English courses at the 300- or 400-level (or appropriate equivalents) that are approved by the English department doctoral committee.

An applicant who plans to pursue a degree with English as a discipline is required to provide the English department doctoral committee with the names of three individuals who are academically or professionally qualified to assess the applicant's ability to pursue doctoral work. References

submitted to the School of Graduate Studies for admission to doctoral studies may be judged by the English department doctoral committee as sufficient evaluation, but the department reserves the right to request further information.

Applicants also are required to submit samples of written work to the English department doctoral committee. The applicant must submit a sample of academic prose with a research component that demonstrates the applicant's ability to undertake graduate course work in English and to engage in a scholarly conversation, preferably on a subject closely related to the applicant's proposed doctoral studies. The applicant's narrative statement, submitted with the application form, should provide a well-focused justification of the proposed course of study that is compatible with the department's resources. Applicants should consult with the Interdisciplinary Ph.D. coordinator in English for advice on the preparation of the narrative. Applicants may also seek advice on the narrative from doctoral committee members with special expertise in the applicant's chosen fields of study.

Applications will be evaluated by a committee of the doctoral faculty in the English department; the committee will recommend to the department chair and dean of the School of Graduate Studies whether the applicant should be admitted. These English-specific requirements apply to all applicants intending to have English as primary discipline or co-discipline.

Students who expect to write a dissertation that draws primarily on research in English must apply for English as their primary discipline.

In cases where an applicant has not yet met the foreign language requirement or GRE scores are still pending, provisional admission may be recommended.

Qualifying Requirements for Full Admission

In addition to the below criteria, the committee considers the applicant's writing sample, letters of recommendation, personal statement, and the overall viability of the applicant's proposed dissertation project.

English as Primary Discipline

Relevant Foreign Language Skills

Applicants must demonstrate facility in a foreign language relevant to study in English. The language requirement will ordinarily be met by two years of satisfactory college-level language study. Students may be required to demonstrate additional language skills to undertake or complete their dissertations.

English as a Co-discipline

Foreign Language Skills

Demonstrate foreign language competence in the same manner as students with English as the primary discipline.

Suggested Compatible Co-disciplines

Curriculum and Instruction (p. 1568), History (p. 1584)

Core Program Requirements

All students who list English as a discipline, whether as primary discipline or co-discipline, are required to take ENGLISH 5500 or its equivalent and to include two English doctoral faculty members on their committees. Students enrolling with English as their primary discipline are required to take a total of 18 hours in English, including ENGLISH 5547 and ENGLISH 5500. Students enrolling with English as their co-discipline are required to take a minimum of 12 hours in English, including English 5500 and one of the following: ENGLISH 5519, ENGLISH 5547, ENGLISH 5545, or HMNTY 5510.

Students admitted with English as the primary discipline are subject to the following requirements:

- Only English courses numbered 400 or above will be accepted for the Ph.D. degree. Courses taken in other disciplines may be taken at the 300-level or above.
- No grade below B in any course will be accepted to apply toward the Ph.D. degree.
- In most cases, no more than one-third of coursework in English, exclusive of credit for dissertation work, that is classified as independent study will be accepted for the Ph.D. degree.
- Students will be expected to complete the majority of their coursework at UMKC.
- In certain cases, exceptions to these requirements may be allowed.

Other Discipline-Specific Special Requirements

For foreign language requirement, see "Qualifying Requirements for Full Admission" for this discipline.

Comprehensive Examination Guidelines

The examinations must be taken within a year of completing coursework. Prior to taking exams, students must have a supervisory committee, an approved plan of study on file with the School of Graduate Studies and have completed all required coursework. See Comprehensive Examination

guidelines (<http://catalog.umkc.edu/colleges-schools/graduate-studies/minimum-interdisciplinary-phd-academic-regulations-degree-requirements/#Comprehensive%20Examination>) from the School of Graduate Studies for full details.

At least six months before taking Comprehensive Exams, the student will submit a tentative reading list of primary and critical works for all examinations. The supervisory committee will then meet to review the proposed reading list and address any oversights or imbalances.

PRIMARY DISCIPLINE ENGLISH

Before advancing to Ph.D. candidacy, students whose primary discipline is English will take a series of examinations: general examinations over two designated areas in English studies; the examination required by the co-discipline; and an oral interdisciplinary subject examination.

1. The General Area Examination

Areas for the general area examination will be designated at the time of the submission of the program of study. These may be changed only with the consent of the supervisory committee. The examination is designed to test the breadth of the candidate's knowledge in two areas of English studies whether periods of literary history (e.g., British 19th century, American literature from 1865, British and American literature since 1945) or other areas of expertise (e.g., linguistics, history of the language, rhetoric, genre studies, literacy studies). For students whose primary discipline is English, the examining committee for the general area examination must include at least two members of the graduate faculty in English. The reading lists, which are subject to the approval of the examining committee, should reflect interdisciplinarity. The general area examination consists of two parts, each receiving equal weight. The format of these examinations, designed in consultation with the student to reflect a sustained preparation (typically three to six months), will include a written component (e.g., a three-four hour sitting or a 72-hour "take-home" period for each area).

2. Co-Disciplinary Examinations

Students whose primary discipline is English will fulfill examination requirements of their co-discipline.

3. The oral interdisciplinary subject examination

The oral interdisciplinary subject examination will examine the student's command of methodology and current scholarship as well as primary sources and standard scholarly works in the field and assess the student's ability to integrate content, theory, and/or methods in the discipline of English and the student's co-discipline(s). At least two weeks before the oral interdisciplinary subject examination, the student will submit a dissertation prospectus detailing chapters, methodology, and bibliography subject to the approval of the supervisory committee. The exam is typically administered in a single two-hour sitting.

For students whose co-discipline is English, an examination covering one of the areas described above in "The General Area Examination" will be designed in consultation with the primary discipline.

Doctoral Dissertation Requirement

The dissertation defense will be a one and a half hour discussion of the dissertation that includes all members of the Supervisory Committee. The majority of the committee must vote for approval of the dissertation in order for the student to graduate. See the School of Graduate Studies guidelines for further procedures and deadlines.

Entrepreneurship

Discipline Coordinator

Brian Anderson (816) 235-2316, andersonbri@umkc.edu

Entrepreneurship and Innovation is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies. **This discipline is currently NOT accepting new students for the primary or the co-discipline.**

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Program Intent

The Department of Global Entrepreneurship and Innovation (GEI) participates in the Interdisciplinary Ph.D. program and meets the needs of students interested in supplementing his or her primary research interests with a course of study in entrepreneurship and innovation. Students interested in specifically focusing on entrepreneurship and innovation, with the intention of pursuing a career as a tenure-track faculty member in a business school, should consider the GEI full-time Ph.D. program offered through the Bloch School of Management.

Suggested Primary Disciplines

Computer Science (p. 1564), Economics (p. 719), Engineering (p. 1579), Mathematics (p. 1589), Physics (p. 1602)

Program Requirements

Students who select entrepreneurship as a co-discipline must complete four doctoral seminars (12 credits) offered by GEI doctoral faculty. The Ph.D. Program Director must approve the chosen courses, consistent with the student's research interests and background.

Comprehensive Examination

Students will complete an Entrepreneurship and Innovation Comprehensive Examination determined by the GEI faculty at the completion of the four required courses.

Dissertation

Students will work with the primary discipline on the extent to which the entrepreneurship and innovation literature informs the dissertation's central research question. At least one dissertation committee member should be a member of the GEI doctoral faculty, but may not chair the committee.

Geosciences

Discipline Coordinator

Fengpeng Sun, (816) 235-2973, sunf@umkc.edu

Geosciences faculty who are members of the doctoral faculty.

Geosciences is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

Specific admission requirements defined by the faculty in Geosciences follow the guidelines established by the School of Graduate Studies. Typically, a student would be expected to hold an undergraduate or master's degree in environmental sciences, geology, geography or a closely-related field. Opportunities within the department range from the physical sciences to the humanities. Because of the wide range of faculty expertise, and in keeping with the general spirit of the entire interdisciplinary program, the faculty in Geosciences has deliberately chosen to establish broad guidelines for admission of Interdisciplinary Ph.D. students. All prospective graduate students must attain a GPA of 3.0 or above, on a 4.0 scale, in all university work prior to admission. Three letters of recommendation from professors as well as a proposal from the prospective student detailing goals and expectations are needed for an evaluation of the application. Students are expected to have an advisor at the time of admission.

Non-native English-speaking applicants seeking Geosciences as a primary discipline must demonstrate proficiency in English. This requirement can be satisfied by obtaining English proficiency certification from UMKC.

Suggested Compatible Co-disciplines

Faculty members in Geosciences conduct research in applied geophysics, atmospheric sciences, climate variability and climate change, engineering geology, environmental geology, geoarchaeology, geochemistry, geomorphology, GIS, mineral deposits, neotectonics, Quaternary environments, stratigraphy and volcanos and hazards planetary geology. Suitable co-disciplines for the Interdisciplinary Ph.D. program are practically unlimited. Consultation with the principal graduate advisors for geology and geography would be a good way for the student to explore the possibilities.

Previous and existing students have designated the following co-disciplines: Chemistry (p. 1223), Computer Science (p. 1564), Curriculum and Instruction (p. 1568), Economics (<https://catalog.umkc.edu/colleges-schools/graduate-studies/economics/>), Engineering (p. 1579), History (<https://catalog.umkc.edu/colleges-schools/graduate-studies/history/>), Mathematics (<https://catalog.umkc.edu/colleges-schools/graduate-studies/mathematics/>), Physics (p. 1602), Social Science Consortium (p. 1607)

Other excellent possibilities would include: Educational Leadership, Policy and Foundations (<https://catalog.umkc.edu/colleges-schools/graduate-studies/educational-leadership-policy-foundations/>)

Core Program Requirements

Specific core program requirements follow the guidelines established by the School of Graduate Studies and are otherwise defined by the student's supervisory committee in consultation with each individual student.

Other Discipline-Specific Special Requirements

While there is no set minimum number of hours for all students, at least 50 percent of the course credit hours for students who select Geosciences as their primary discipline must be taken in Geosciences. Students who have selected Geosciences as a primary discipline or a co-discipline are expected to take no less than three courses from Geosciences as determined by their supervisory committee. Other special requirements are defined by the student's supervisory committee in individual consultation with each student.

Requirements for Comprehensive Examinations

Comprehensive examinations of all Ph.D. students who select Geosciences as the primary discipline will contain both written and oral components and may include questions from each of the co-disciplines and from related fields as determined by the student's examining committee. The

examining committee consists of the student's supervisory committee and others who may be appointed by the dean of the School of Graduate Studies.

Interdisciplinary Work

The faculty in Geosciences are committed to an interdisciplinary approach and expect that all Ph.D. students, whether enrolled in the primary or the co-disciplinary category, will complete courses and conduct research with this principle in mind.

History

Discipline Coordinator

Matthew Osborn, (816) 235-6118 x8, osbornmw@umkc.edu

History faculty who are members of the doctoral faculty.

History is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in [Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission](#) and [Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements](#). Please refer to the UMKC History Department website for up-to-date information on the Interdisciplinary Ph.D. program in History.

Discipline-Specific Admission Requirements

Except in unusual circumstances, students who select History as a discipline in the Interdisciplinary Ph.D. program must begin their work during the fall term. Applications must be received by the School of Graduate Studies no later than January 15. The doctoral faculty of the Department of History will review applications and make their recommendations for admission by the end of February. Applications that are incomplete as of January 15, and completed applications submitted after this deadline, may not be considered until the following year.

Applicants who choose History as their primary discipline, or applicants whose coursework in History will comprise at least 50 percent of the Ph.D. plan of study, must meet the criteria for admission specified by the School of Graduate Studies. In addition, they must:

1. Possess a master's degree in History or its equivalent.
2. Have earned a GPA of 3.5 on a 4.0 scale in graduate courses.

Students who choose History as a co-discipline and whose coursework in History will constitute less than 50 percent of the Ph.D. plan of study must meet the criteria for admission specified by the School of Graduate Studies. In addition, they must fulfill other entrance requirements specified by the doctoral faculty of the Department of History.

- 1) Co-discipline applicants who have a background in History will be considered as candidates for full admission.
- 2) Co-discipline applicants who have little or no background in History will normally be considered only as candidates for provisional admission. These applicants, if provisionally admitted, will be required to take a certain number of content courses at either the undergraduate or graduate level, to be determined by the student's prospective mentor, and maintain a B+ average before being considered for full admission.

All applicants for admission must submit in addition to the requirements specified by the School of Graduate Studies:

1. A sample of written work.
2. A brief statement of academic and professional goals.
3. A 1,000-word essay that specifies a research topic, demonstrates its interdisciplinary nature and shows how historical methods and approaches would be utilized.

Primary and Co-discipline applicants granted provisional admission will receive notification of deficiencies and of the conditions that must be met before full admission can be considered.

The doctoral faculty of the Department of History, in consultation with the History faculty as a whole, makes recommendations to the dean of the School of Graduate Studies on each application for admission. These recommendations reflect the majority vote of the doctoral faculty.

Applicants are advised that meeting the criteria of the School of Graduate Studies and the Department of History does not automatically result in admission to the Interdisciplinary Ph.D. program. When making recommendations to the School of Graduate Studies, the History faculty considers other factors as well, particularly the availability of faculty qualified to work in the applicant's area of interest and the availability of library resources and research materials.

Alternate Admission Criteria

In exceptional cases, candidates who do not meet either the School of Graduate Studies' or the History Department's minimum requirements for admission may be admitted under alternate criteria. The doctoral faculty of the department have adopted the following alternate criteria, one or more of which will be used to assess the applicant's ability: satisfactory performance in 5500- or above-level classes taken in the department's master's degree program; positive, written recommendations of our faculty willing to work with the applicant who have evaluated his or her previous work;

satisfactory completion of specified courses in the department before consideration or reconsideration of a candidate's application; publications or comparable professional achievements related to the study of History.

The Plan of Study

If full admission is granted, the student who chooses History as a discipline must satisfy the residency requirements of the School of Graduate Studies, and must fulfill the course requirements of the Ph.D. plan of study as prepared by the student and his or her advisor(s) and approved by the Interdisciplinary Ph.D. Program Director.

A student whose primary discipline is History will be required to list at least 18 hours of graduate-level history courses (exclusive of dissertation credits) on the plan of study. These will include: 3 hours of HISTORY 5581GR (How To History I) if this course or its equivalent has not been taken before; 1 hour of History 5582B (How to History II B); 3 graduate colloquia; and at least one graduate-level research seminar. The remainder of the program must be in courses numbered 5500 or above.

Students for whom History is a co-discipline will be required to take, at the minimum, 15 hours of graduate-level history courses. These will include: 3 hours of HISTORY 5581GR (How To History I); 1 hour of History 5582B (How To History II B); two graduate colloquia; and one graduate-level research seminar. In exceptional or unusual circumstances, some of these hours may be waived upon petition to the student's supervisory committee.

Any student who switches disciplines in the course of his or her graduate career, either adding history as the primary or co-discipline, or changing History from the co-discipline to the primary discipline, must fulfill all of the requisite doctoral requirements in History for that level (e.g., number of course hours, distribution requirements, exams).

Requirements for Comprehensive Examinations

The School of Graduate Studies guidelines for the Comprehensive Examination can be found [here](#).

The History Department requires that the Comprehensive Examination of a student listing History as a discipline include both a written and an oral component. The History members of the supervisory Committee will determine the structure and duration of the History component of the Comprehensive Exam.

For students with History as the Primary discipline, there is a list of Doctoral Fields appended below. The written comprehensives will consist of two examinations, the first from a Chronological/National field; the second from a Topical/Interdisciplinary field.

For Co-discipline students, the written comprehensives will consist of questions drawn from one of the Chronological/National fields or one of the Topical/Interdisciplinary fields appended below.

For both primary and co-discipline students, it is assumed that each examination will include a historiographical component.

In the oral examination conducted by the supervisory committee, both primary and co-discipline students will be expected to answer questions of an interdisciplinary nature.

A student with History as either a primary or co-discipline is considered to have passed the Comprehensive Examination if the History member/s of the examining committee vote that the candidate passes, and if no more than 20 percent of the examining committee vote to fail the student. If failure is reported, the examining committee will either recommend termination as a Ph.D. student or suggest additional work or other remedial measures. Furthermore, a student who has failed may not take a second examination for at least 12 weeks. Failure of a second Comprehensive Examination shall automatically preclude candidacy at this institution.

Dissertation Requirements

A student for whom History is a discipline must meet the requirements of the History Department for the discipline, as well as those of the School of Graduate Studies. On a Ph.D. plan of study, where History is the primary discipline, there must be a minimum of 12 credits in HISTORY 5699R (dissertation hours).

The final examination in defense of the dissertation is open to all members of the doctoral faculty, who may attend as interested observers. The supervisory committee and its chair will determine the format and procedures of the defense. The date, time and location must be announced and published at least two weeks before each final examination takes place.

For a student with History as a discipline, this examination may be conducted only after the dissertation has been approved by the History member/s of the supervisory committee.

The defense of the dissertation is approved when a majority of the supervisory committee, including the History member/s of the committee, recommends approval and signs the Report of Results of Final Doctoral Examination form. Within 48 hours of the defense, the supervisory committee chair will report the results of the final dissertation examination in writing to the candidate.

Language Requirements

Those students for whom History comprises their Primary discipline must complete a competency examination in at least one foreign language that will be relevant to their dissertation research and/or future career. The language exam format will be determined by the student's supervisory committee and will be assessed by a member of the department of foreign languages and literatures or another expert in the field. Students can also choose to complete two years of undergraduate language study in lieu of a challenge exam. Students with research interests that require competency in more than one language will be encouraged to be certified in relevant languages, but will be examined at the discretion of the supervisory committee. Students who do not require a foreign language competency to complete their dissertation research may be exempted from this requirement, but only at the discretion of the supervisory committee.

Those students with History as their co-discipline will ordinarily not be required to demonstrate language competency unless their research topic requires it. It is strongly recommended, however, that all Interdisciplinary Ph.D. students choosing History as either primary or co-discipline should pursue some kind of language study or equivalent research skill, such as in quantitative methods.

Retention in the Doctoral Program

A doctoral student must maintain a 3.0 grade-point average in each semester of coursework taken at UMKC. A person receiving a failing grade in a class will normally not be retained in the doctoral program. In exceptional cases, such a student may petition to be placed on probation for one semester.

A student who falls below a 3.0 grade-point average, or whose work is deemed unsatisfactory at any stage of doctoral work by the History member/s of the supervisory committee, with the concurrence of a majority of the resident doctoral faculty of the department, may be declared ineligible for further study.

History Department Policies Regarding Doctoral Faculty

No doctoral student shall be permitted to form a supervisory committee on which the only History faculty members are former faculty at UMKC or adjunct faculty members. Refer to the website of the School of Graduate Studies for a list of current doctoral faculty.

Ordinarily, emeritus professors of doctoral faculty status in History shall be allowed to serve on doctoral committees for no more than five years after retirement. Such service shall only be on committees that the required faculty member was already on at the time of retirement. Emeritus faculty members can have their doctoral status extended beyond five years only if at least two-thirds of the members of the History doctoral faculty vote to approve this.

Emeritus professors in History cannot chair dissertation committees. They can, however, co-chair with the approval of a majority of the regular resident doctoral faculty.

The History department adheres to the guidelines of the American Historical Association with regard to student ethics and the responsible conduct of research. The AHA Statement on Standards of Professional Conduct can be found at <http://www.historians.org/pubs/Free/ProfessionalStandards.cfm>.

Doctoral Fields

Areas	Chronological/National	Topical/Interdisciplinary
Europe	• Ancient Europe	• Area Focus: Ancient Greece & Rome; Medieval Britain, Early Modern Britain & Modern Britain; Modern Germany
	• Medieval Europe	• Global Interactions
	• Early Modern Europe	• Material Culture & Everyday Life
	• Modern Europe	• History of Science, Technology & Medicine (STEM)
—		• State Formation & National Identity
		• Women, Gender & Family
Latin America	• Encounter & Colonial	• Area Focus: Mexico; Central America; Cuba; Puerto Rico; the Southern Cone
	• Post-Independence	• Global Interactions
		• Identity & Culture
		• State Formation & National Identity
—		• Women, Gender & Family
East Asia	• Pre-1600	• Area Focus: Japan; China

	• Post-1600	• Comparative Religions
		• Global Interactions
		• History of Science, Technology & Medicine (STEM)
		• Material Culture & Everyday Life
		• State Formation & National Identity
		• Women, Gender & Family
–		
United States	• Early America	• African-American History
	• Modern America - 1800 to the Present	• Area Focus: South; West; Midwest
		• Borderlands
		• Children & Youth
		• Civil Rights
		• Environmental History
		• Global Interactions
		• History of Science, Technology & Medicine (STEM)
		• Identity & Culture
		• Latinx
		• Material Culture & Visual Culture
		• Public History
		• Sexuality
		• Urban
		• Women, Gender & Family

Humanities Consortium

Discipline Coordinator

Larson Powell, (816) 235-2729, powelllar@umkc.edu

Humanities Consortium is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

The Humanities Consortium is only available as a co-discipline option, not as a primary discipline.

Application dossiers for the Humanities Consortium must be complete by January 15 for fall admission or September 1 for spring admission. Dossiers should include:

- an application for graduate study
- a brief statement of academic and professional goals (1 page)
- three (3) letters of recommendation from individuals who are academically or professionally qualified to assess the applicant's ability to pursue doctoral work
- transcripts from all post-secondary schools attended
- a well-focused research proposal that demonstrates the applicant's rationale for application to the Humanities Consortium as a co-discipline and the interdisciplinary nature of the plan of study (1 pages)
- a sample of academic writing (20 pages or less)

Qualifying Requirements for Full Admission to the Humanities Consortium

Applicants to the Humanities Consortium as a co-discipline will be expected to hold a master's degree (MA, MFA, MM, or appropriate MS) or equivalent coursework in a Humanities-related field.

- TOEFL minimum composite score of 550 or IELTS score of 6.0 (international applicants). Applicant should be able to demonstrate facility in English appropriate for graduate work
- a GPA of 3.5 or better in previous graduate study

Applicants who do not meet the requirements above may be granted provisional admission for one year by the doctoral faculty in the Humanities Consortium. An applicant admitted provisionally receives notification of deficiencies and of the conditions which must be met within the first year before the doctoral faculty will consider an applicant for full admission. At the end of the first year, the provisional admission will be reviewed.

Applicants are advised that meeting the criteria of the School of Graduate Studies and the Humanities Consortium does not automatically result in admission to the Interdisciplinary Ph.D. program. When making admission decisions, the doctoral faculty of the Humanities Consortium considers other factors as well, particularly the availability of faculty qualified to work in the applicant's area of interest and the availability of library resources and research materials.

Recommendations for admission are made by a sub-committee of the Humanities Consortium doctoral faculty which reviews all applications. Applicants are strongly encouraged to contact and confirm **two** faculty advisors from two distinct disciplines when applying - the Humanities Consortium is an umbrella enterprise that incorporates several disciplines. For advice on finding a faculty advisor, applicants should contact the Coordinator, Dr. Larson Powell, at PowellLar@umkc.edu (powelllar@umkc.edu).

Foreign Language Study

Applicants must demonstrate competency in the foreign language or languages necessary to pursue the stated research plan (or describe a plan of study to achieve this facility). Students may be required, at the discretion of their dissertation committees, to demonstrate or acquire additional language skills to undertake or complete their dissertations.

Suggested Compatible Primary Disciplines

Curriculum and Instruction (p. 1568), English (p. 1580), History (p. 1584)

Core Program Requirements

As a means of introducing doctoral students to interdisciplinary work and to the various fields of inquiry in the Arts & Humanities, the Humanities Consortium requires 15 hours of dedicated coursework.

The following three courses (9 hours) are required:

Code	Title	Credits
HMNTY 5510	Methods in Critical Theory	3
Two additional courses (HMNTY 5500, Introduction to Interdisciplinary Humanities and HMNTY 5520, Research & Creative Methodologies in Humanities are also required)		6
Total Credits		9

Two graduate-level courses (3 credits each, numbered at the 400 level or above) are also required, totaling 6 hours. The two elective courses may be in any discipline except the student's primary discipline, but these courses are subject to approval by the student's primary advisor, the Humanities Consortium Director, and the instructors of the chosen courses. No more than one course that is classified as independent study may be used as an elective course in the Humanities Consortium.

No grade below B in any course will be accepted to apply toward the Ph.D. degree.

Transfer credit will be at the discretion of the dissertation committee in consultation with the Humanities Consortium Coordinator. No more than 6 hours of transfer credit will be allowed.

Retention in the Doctoral Program

Students are expected to maintain a 3.0 GPA during their program of study. A student who falls below a 3.0 GPA, with the concurrence of the doctoral faculty in the Humanities Consortium, may be declared ineligible for further study. A student receiving the grade of F in any graduate course during the program of study will not normally be retained in the program.

Comprehensive Examination Guidelines

The School of Graduate Studies guidelines for the Comprehensive Examination can be found here (p. 1551).

Before advancing to Ph.D. candidacy, students in the Humanities Consortium will take a Comprehensive Examination that includes both written and oral components. Each student's dissertation committee will be charged, in accordance with SGS guidelines, with setting the requirements for the Comprehensive Examination and for evaluating the results of this exam.

Interdisciplinarity

Students in the Humanities Consortium will be expected to devise a Plan of Study that demonstrates a commitment to interdisciplinary work and to develop a dissertation that illustrates interdisciplinary practices.

Mathematics

Discipline Coordinator

Noah Rhee, (816) 235-2854, rheen@umkc.edu

Mathematics is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

In order to complete the Interdisciplinary Ph.D. with Mathematics as the primary discipline, students are expected to complete the following requirements:

1. Qualifying Coursework

A student who is admitted to the Interdisciplinary Ph.D. program while having not completed all of the qualifying coursework as described below must complete the missing courses with a GPA of 3.0 or better in order to be deemed qualified to continue in the Interdisciplinary Ph.D. program in the Department of Mathematics and Statistics. A student who has a Bachelor's degree in Mathematics or Statistics must complete the qualifying courses for his or her emphasis with a GPA of 3.0 or better in order to be deemed qualified.

The qualifying courses for the Interdisciplinary Ph.D. are as follows:

Mathematics Emphasis

MATH 5509 General Algebra I

MATH 5513 Real Variables I

MATH 5532 Advanced Numerical Analysis I

MATH 5510 Complex Variables I

MATH 5521 Differential Equations

MATH 5545 Mathematical Methods In Science And Engineering

Statistics Emphasis

STAT 5501 Statistical Design Of Experiments

MATH 5513 Real Variables I

STAT 5537 Mathematical Statistics I

STAT 5547 Mathematical Statistics II

STAT 5551 Applied Statistical Analysis

STAT 5565 Regression Analysis

STAT 5572 Multivariate Analysis

2. Doctoral Course Work

Following the completion of Qualifying Coursework, the student needs to complete the Doctoral Coursework described below. This coursework must be completed with a B(3.0) average.

Mathematics Emphasis

MATH 5519 General Algebra II

MATH 5523 Real Variables II

MATH 5542 Advanced Numerical Analysis II

Any one of STAT 5576, STAT 5578, or STAT 5588

Statistics Emphasis

STAT 5576 Probability

STAT 5578 Advanced Mathematical Statistics

STAT 5588 Theory of Linear Model

Any one of MATH 5519, MATH 5523, or MATH 5542

Additional elective courses may be required at the discretion of the Interdisciplinary Ph.D. Supervisory Committee.

3. Qualifying Exams

Within a year of completing the doctoral Core Coursework, the student is required to complete the Interdisciplinary Ph.D. qualifying examinations. The written examinations under either emphasis are based on two of the three doctoral core courses.

- For the Mathematics emphasis, the written examinations are based on two of the following Doctoral Core Courses: MATH 5519, MATH 5523, and MATH 5542.
- For the Statistics emphasis, the written examinations are based on two of the following Doctoral Core Courses: STAT 5576, STAT 5578, and STAT 5588.
- The student may take one written examination from the opposite emphasis if his or her supervisory committee deems it in the best interest of the student's Plan of Study, provided the student has taken the course on which the examination is based.
- If a student fails either one or more qualifying exams on the first attempt, he or she may retake the failed parts from the first attempt after a period of 12 weeks. If the student fails the qualifying examination(s) a second time, he or she is terminated from the Interdisciplinary Ph.D. program in Mathematics.

4. The Interdisciplinary Ph.D. Comprehensive Examination

Following the completion of the qualifying examinations, the student is deemed fully qualified to carry out doctoral-level research. At this stage, the student begins his or her doctoral research. Within two years of successful completion of the qualifying examination, the student is required to complete the Interdisciplinary Ph.D. Comprehensive Examination. This examination consists of both a written and an oral portion. The written portion is developed by the student's Supervisory Committee, and it consists of questions related to the student's research and possible avenues for future work. The student is allotted two weeks to complete the written portion of the examination. Following the completion of the written portion, the student shall submit his or her answers to each member of the Supervisory Committee. The oral portion of the examination is a two-hour session with the student and the Supervisory Committee members in which the student describes his or her research and fields questions and comments about the responses provided in the written portion of the examination. Following the successful completion of the Comprehensive Examination, the student is admitted to Candidacy. Following admission to Candidacy, the student is required to complete twelve Research and Thesis credit hours. If a student fails either the written or the oral portion of the comprehensive exam one time, he or she may retake it after a period of 12 weeks, per School of Graduate Studies regulations. If the student fails either part of the examination a second time, he or she is automatically terminated from the Interdisciplinary Ph.D. program.

5. Dissertation and Final Oral Examination

Within two years of admission to Candidacy, the student is required to have completed the necessary research and writing to form the Dissertation. Once this is complete, the student must complete the Final Oral Examination. This is a two-hour discussion with the student and the supervisory committee. The student must prepare a presentation that outlines the content of the dissertation. The presentation is a public event, so anyone is free to attend. Following the completion of the presentation is a closed-door session with the student and the Supervisory Committee in which the Candidate fields questions and comments regarding the content of the Dissertation. Following successful completion of the Final Oral Examination, the committee will make recommendations for revisions to the dissertation, and the Candidate is required to address these recommendations in order to complete the Interdisciplinary Ph.D.

6. Other Requirements

- In addition to the requirements listed above, the student must satisfy the co-discipline coursework requirements.
- All Interdisciplinary Ph.D. students with mathematics as the primary discipline are required to attend the department graduate seminar at least five times per semester. Those who cannot fulfill this requirement must contact the graduate seminar coordinator.
- The student must satisfy all requirements set forth by the School of Graduate Studies.

Mathematics as a Co-discipline

To get full admission, an applicant should have a Bachelor's degree in mathematics/statistics from an accredited college or university, or a Bachelor's degree in another subject including evidence of a strong performance in at least three mathematics courses beyond Calculus I, II, and III. An applicant with Mathematics as co-discipline may get a provisional admission if the above conditions are not fully satisfied at the time of application.

The number of hours required in mathematics for a student who chooses Mathematics as a co-discipline will be at least 9 graduate credit hours. Up to three of these credit hours may be at the 400-level. The Mathematics hours counting toward the degree must have a B (3.0) average.

Suggested Compatible Co-disciplines

Cell Biology and Biophysics (p. 1557), Chemistry (p. 1223), Computer Networking and Communication Systems (p. 1561), Computer Science (p. 1564), Curriculum and Instruction (p. 1568), Electrical and Computer Engineering (p. 1573), Engineering (p. 1579), Geosciences (p. 1583), Molecular Biology and Biochemistry (p. 1591), Physics (p. 1602)

Molecular Biology and Biochemistry

Discipline Coordinator

Karen Bame, (816) 235-2243, bamek@umkc.edu

Molecular Biology and Biochemistry faculty who are members of the Doctoral Faculty (<http://sgs.umkc.edu/for-faculty-and-staff/doctoralgraduate-faculty-lists/>)

Molecular Biology and Biochemistry is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

A cumulative GPA of at least 3.0 (on a 4.0 scale) on all college work for bachelor's degree or post-baccalaureate work. Due to the sequencing of coursework, new students selecting molecular biology and biochemistry as their primary discipline will normally only be admitted in the fall term.

Qualifying Requirements for Full Admission

Minimum of 16 hours of approved graduate coursework at UMKC toward the Ph.D. program with a grade-point average of at least 3.0 on a 4.0 scale. International students must establish English proficiency.

Suggested Compatible Co-disciplines

Chemistry (p. 1223), Cell Biology and Biophysics (p. 1557), Oral and Craniofacial Sciences (p. 1594), Pharmaceutical Science (p. 1599), Pharmacology (p. 1600), Physics (p. 1602)

Core Program Requirements

Molecular Biology and Biochemistry as a Primary Discipline

Minimum core requirement is 33 course credit hours and 15 dissertation research credits in Molecular Biology and Biochemistry for a total of 48 post-baccalaureate credit hours, distributed as indicated below:

Code	Title	Credits
LS-MBB 5561	General Biochemistry I	4
LS-MBB 5562	General Biochemistry II	3
LS-MBB 5596 or LS-MBB 5597	Advanced Experimental Molecular Biology I Advanced Experimental Molecular Biology II	2
LS-MBB 5611	Seminar in Molecular Biology and Biochemistry (2 x 1 cr. hr.)	2
LS-MBB 5690 or LS-CBB 5690	Analytical Methods in Molecular Biology and Biochemistry Analytical Methods in Cell Biology and Biophysics	1-4
BIOLOGY 5501	Proposal Writing	1

7 cr. hr. in discipline or related discipline courses (LS-CBB, LS-MBB, BIOL, PHARM, etc.) 15 cr. hr. LS-MBB 5699 Dissertation Research.

Related Discipline Courses Required

Ten additional course credit hours in one related discipline or combination of disciplines. Related disciplines are defined as Cell Biology and Biophysics, Chemistry, Pharmaceutical Science, Pharmacology, Oral and Craniofacial Sciences or other. Seminar courses may be part of this

component of required courses, up to a maximum of three for the program, as are two additional credits of advanced experimental molecular or cell biology.

Electives

Each student's supervisory committee may require additional courses in any University-approved doctoral discipline as preparation for specific areas of research. These additional requirements may not exceed nine credit hours beyond the 33 credits required for the basic course core. These electives may be taken at any time during enrollment as a graduate student, up to the semester prior to that in which the dissertation defense will occur. No more than seven course credit hours of 5500-level courses, or their equivalent, can be taken at institutions outside UMKC. Remember that 5700-level courses may not be used to satisfy course requirements for the program.

Molecular Biology and Biochemistry as a Co-discipline

Code	Title	Credits
Required courses		
LS-MBB 5561	General Biochemistry I	4
LS-MBB 5562	General Biochemistry II	3
LS-MBB 5611	Seminar in Molecular Biology and Biochemistry	1
Additional SBC graduate courses (LS-CBB, LS-MBB or BIOL) for a minimum of 10 cr. hr.		

Other Discipline-Specific Special Requirements

Research

The School of Biological and Chemical Sciences offers research opportunities in many areas of modern life sciences that address problems of basic life processes at the cellular, subcellular and molecular levels. Graduate studies offered with primary participation of the faculty in the Division of Molecular Biology and Biochemistry are based on the belief that training for research can be best accomplished by having an appropriate breadth of background coursework, combined with a depth of specialization in a particular research area. The faculty have established guidelines that have a minimum of formal requirements so that students have the flexibility to advance at a pace consistent with development of the individual. Diligence, creativity and independent thinking are the qualities desired in the candidate's dissertation work.

Teaching

As part of their graduate training, all Ph.D. students with Molecular Biology and Biochemistry as the primary discipline participate in the teaching program of the School of Biological and Chemical Sciences. This is an important component of preparation for a career in academia or other institutions and aids in the development of effective communication skills.

Seminars

Students will participate in seminars in which current developments in various areas of life sciences will be discussed and explored. Students also will present seminars on their own work or on work in the current scientific literature. The latter is taken as part of the core of graduate-level courses in the primary or co-disciplines.

Course Restrictions

5700-level courses may not be used to satisfy molecular biology and biochemistry discipline-specific course requirements.

Dissertation

The dissertation abstract and proposal must be submitted to and approved by the supervisory committee prior to beginning the third academic year of study after enrollment in the Ph.D. program.

Retention in Program

For students with this discipline as their primary discipline, no more than one C grade in a core course, and no D or F grades, are permitted. A student who receives more than one C grade will be recommended for termination from the doctoral program. A student who receives a D or F grade will be dropped from the program.

The doctoral faculty in Molecular Biology and Biochemistry meets formally at the end of each academic year to discuss and evaluate the progress of all graduate students. Each student's committee also meets with the student at least once a year. After the annual doctoral faculty meeting, all students receive written evaluations of their status and a report is placed in each student's file.

Requirements for Comprehensive Examinations

To become a Ph.D. candidate, the student must pass a Comprehensive Exam that may be taken on completion of essentially all of the coursework specified in the student's study plan and on satisfactorily fulfilling the requirements for full admission. This must be done before the *beginning* of the third academic year after admission to UMKC with graduate student status, or (for part-time students) immediately after completion of 25 credit

hours approved by the discipline-doctoral program at UMKC. This exam will be administered by the student's supervisory committee and will test the student's knowledge of background material, as well as the student's ability to analyze and interpret information and solve problems.

Written Portion

The written examination for students who have Molecular Biology and Biochemistry as their primary discipline consists of an NIH-style grant proposal that the student will prepare. The topic of the research proposal will be determined by the student in consultation with the student's supervisory committee.

Oral Portion

The oral examination also has two aspects: (1) questions covering the grant proposal prepared by the student for the written examination and (2) other related material in the student's area of specialization, including fundamental knowledge of the primary and secondary disciplines.

Music Education

Discipline Coordinator

Joseph Parisi, (816) 235-2919, parisijo@umkc.edu

Music Education faculty who are members of the doctoral faculty.

Music Education is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

In addition to the general criteria, applicants selecting music education as a discipline must:

- Have an aggregate minimum undergraduate GPA of 3.0 and graduate GPA of 3.5 on a 4.0 scale.
- Submit a thesis or equivalent evidence of written scholarship.
- Have minimum scores of 143 on the verbal, 138 on the quantitative and 3.0 on the writing portion of the GRE.
- Have an acceptable on-campus interview with doctoral faculty members from this discipline.
- Demonstrate comprehensive musicianship through videotape, performance, classroom teaching, audition or jury.
- Music Education: Minimum 3 years K-12 teaching experience.
- Music Therapy: Minimum of 3 years full-time musical therapy clinical experience or the equivalent.
- Comprehensive musicianship and/or clinical effectiveness submitted by videotaped or live demonstrations in solo performance, ensemble performance/conducting, classroom teaching, or clinical applications.
- In most cases, students entering the Interdisciplinary Ph.D. program will have earned at least one degree in Music Education and/or Music Therapy.

Alternate Admission Criteria

Applicants may ask to be considered under the following alternate admission criteria:

- Have an undergraduate GPA of 3.0 or a graduate GPA of 3.5 on a 4.0 scale.
- Submit a thesis or equivalent evidence of written scholarship.
- Score 900 or above on the SAT with both the verbal and math scores above 400; or score 21 or above on the ACT.
- Have an acceptable off-campus interview with at least two UMKC music education/therapy doctoral faculty or have two written recommendations from UMKC doctoral faculty.
- Music Education: Minimum 3 years K-12 teaching experience.
- Music Therapy: Minimum of 3 years full-time musical therapy clinical experience or the equivalent.
- In most cases, students entering the Interdisciplinary Ph.D. program will have earned at least one degree in Music Education and/or Music Therapy.
- Comprehensive musicianship and/or clinical effectiveness submitted by videotaped or live demonstrations in solo performance, ensemble performance/conducting, classroom teaching, or clinical applications.

Suggested Compatible Co-disciplines

Curriculum and instruction is the leading co-discipline. Other potential co-disciplines can be considered by students in consultation with primary discipline coordinator and faculty.

Core Program Requirements

Music Education will function only as a primary discipline in the UMKC Interdisciplinary Ph.D. program. Because of this, the following minimum standards apply only to students with Music Education as their primary discipline.

Research

Two important goals for students with Music Education as their primary discipline and Curriculum and Instruction as a co-discipline will be to develop research skills and increase their awareness of important research literature. Through introductory courses, students will become acquainted with research techniques, problems and literature in music education/therapy. Additional research courses in the School of Education and other academic units will provide more tools for structuring research designs and analyzing data. Students in the program will assist their faculty mentors in research while developing a research agenda of their own. The number and nature of research classes placed on each student's program of study will be determined by the background, goals and interests of the student.

Teaching Techniques and Philosophies

While students may have widely divergent career goals, ranging from becoming a district music supervisor in a K-12 program, training undergraduate music therapists or being a college choral conductor, all will be actively involved in the education process in some form. To develop a comprehensive acquaintance with education at all levels, Ph.D. students will enroll in methods classes, will be assigned to observe and teach undergraduate classes at UMKC and will observe and help supervise student teachers in local K-12 schools. Courses in the Conservatory, the School of Education and other academic units will help students efficiently interpret the techniques and philosophies they observe in the classroom, determine their own goals and philosophies, and consequently, become better teachers.

Seminars and Core Courses

While research and teaching are areas of great importance, it is anticipated that most students will need theoretical information to structure their teaching and research endeavors. Courses in theories of learning in general and in music, as well as seminars on the latest teaching techniques and methodologies, will give students a knowledge base to better facilitate their own teaching and to prepare future students to teach. Particular attention will be given to cultivating critical thinking skills in students and nurturing multicultural values.

Program Requirements

It is anticipated that most students selecting Music Education and Curriculum and Instruction as their disciplines will have completed a master's degree in music education or a related field. Students with backgrounds in music therapy are also encouraged to apply.

While total degree-hour requirements for the Ph.D. will vary depending on each student's career goals, previous experience and training, it is anticipated that for most students, course requirements will include 35 to 45 pre-dissertation hours. If a student has completed a bachelor's or master's degree in some area other than music education/therapy, additional work beyond this approximate range will probably be required. No specific course requirements are designated. Depending on the previous work of the individual and the career direction sought, each program of study, including foreign language requirements, will be considered on an individual basis.

Co-discipline Requirements

Curriculum and Instruction is the most common co-discipline for Music Education in the Interdisciplinary Ph.D. program. It is anticipated there will be many permutations which are a product of this combination. Within the spirit of flexibility, which is the essence of the Interdisciplinary Ph.D. program, students are allowed to enroll in other fields of study such as history, philosophy, psychology, art and non-music education/therapy Conservatory classes. The primary area of study outside Music Education will constitute from 15 to 50 percent of pre-dissertation hours in the planned program of study.

Comprehensive Examination Guidelines

Interdisciplinary Ph.D. students will complete three research projects previously approved by the Supervisory Committee. In addition, an oral exam pertaining to the research projects will take place with the Supervisory Committee. Two weeks prior to the oral presentation, students will prepare a single document that serves as an overview of the three projects (in consultation with the Committee Chair or primary discipline Coordinator). This overview should include: (1) an introduction that explains the three projects and where/when they took place (part of a class, independent study, etc.); (2) the title of each project; (3) completion date; (4) any pertinent presentations where the project has been presented; (5) publication if applicable; (6) benefits to self; and (7) benefits to the profession.

Oral and Craniofacial Sciences

Discipline Coordinator

Mary P. Walker, Director of Graduate Programs (816) 235-2825, walkemp@umkc.edu

Oral and Craniofacial Sciences faculty who are members of the doctoral faculty (<http://sgs.umkc.edu/for-faculty-and-staff/doctoralgraduate-faculty-lists/>)

Oral and Craniofacial Sciences is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Overview

In concert with the School of Graduate studies, the Department of Oral and Craniofacial Sciences offers a doctoral program that must include the in-depth study of at least two disciplines. Students in the Oral and Craniofacial Sciences program can choose to participate in any of the department's three areas of research focus:

- ***Biomaterials/Bioengineering of Biological Tissues and Replacements***

The overall goal of this program is to apply an integrated approach involving innovative computer modeling and organic synthesis, novel biocompatibility evaluation, comprehensive materials characterization, and mechanistic development of improved dental biomaterials. One component of this program is an engineering component that emphasizes micro- and nano-structure/property characterization of natural biomaterials such as bone, dentin, and enamel as a tissue engineering approach to the development of replacement materials.

- ***Mineralized Tissue Biology***

This program is aimed at determining basic biological mechanisms and the cause and treatment of disease of bone and teeth during development and in the adult. Approaches include the use of basic in vitro methods combined with genomics, proteomics, bioinformatics, and transgenic technology.

- ***Translational and Clinical Research***

Translational and clinical research involves results from clinical observations translating into basic research and incorporates basic research findings into clinical assessment and practice. The identification, characterization and synthesis of materials for clinical use requires the combined efforts and expertise of clinical scientists, materials scientists, biostatisticians, bioengineers, geneticists, chemists, physicists, and computer scientists.

Program

The Interdisciplinary Ph.D. program is composed of a significant supervised research effort along with courses in areas such as biomaterials, research design and methodology, statistics, grantsmanship, biochemistry, proteomics, genomics, histology, and pathology. The primary didactic effort will be in oral and craniofacial sciences (biomaterials/bioengineering of biological tissues and replacements, mineralized tissue biology, or translational/clinical research) and the student will select a secondary area of concentration from other Interdisciplinary Ph.D. disciplines.

Duration

The length of the program is dependent on the academic background and abilities of the applicant and may vary from three to five years. The program culminates with an Interdisciplinary Ph.D. in Oral and Craniofacial sciences degree and the designated co-discipline(s).

Student Learning Outcomes

The developed program of study will meet the student's individual needs and research interests, satisfy discipline-specific requirements, and assure upon graduation that students are able to:

1. Demonstrate a deeper understanding of the link between scientific research and clinical health care practice
2. Conduct thorough literature reviews based on an understanding of periodical databases and scholarly journals in the health sciences; have the aptitude to assess the validity of literature and determine how it may be applied in both research and clinical settings
3. Demonstrate the ability to conduct original research projects, drawing on an understanding of the current literature, appropriate study design, methodologies, and data analysis
4. Develop the capability to produce written materials that are clear, well-organized, insightful, and drawn from evidence-based research
5. Employ the communications skills needed to successfully convey important scientific and clinical concepts in oral presentations and communications
6. Apply professional ethics with the highest standards of integrity in all facets of research

Eligibility

An applicant must meet the minimum general requirements for admission to Interdisciplinary Ph.D. study at UMKC and must satisfy grade point average requirements as stated in the admission requirements section of the Academic Regulations and Information of Doctor of Philosophy Studies at the University of Missouri-Kansas City

. To advance to candidate status, the student must successfully complete written and oral Comprehensive Examinations relevant to their primary and co-discipline(s).

Discipline-Specific Admission Requirements

In addition to the general minimum requirements for admission to interdisciplinary Ph.D. study, an applicant must hold either (1) a baccalaureate degree, (2) an M.S degree, or (3) a D.D.S. or equivalent degree. In general, an applicant will be expected to have a minimum cumulative GPA of 3.0 based on a 4.0 scale for previous education programs, including dental school (if applicable).

Applicants must also meet the following minimum GRE requirements:

GRE	Score Scale
Quantitative	150
Verbal	155
Analytical Writing	4.0

The TOEFL is required for all international applicants, who must have a score of at least 80. An IELTS score of 6.0 or above may be accepted in place of the TOEFL.

All application materials should be submitted prior to March 1 for students wishing to begin their study in the fall semester; however, applications will be accepted throughout the year. Evaluation criteria include the following:

- Transcripts. Analysis of transcripts from all prior institutions is required.
- Letters of recommendation. Three letters of recommendation are required from current or former teachers who are familiar with the applicant's past achievements and research ability.
- Personal statement from applicant. The applicant must submit a letter describing why he or she is interested in pursuing an Interdisciplinary Ph.D. study in oral and craniofacial sciences, how the experience of the program may be used by the candidate in the future, and a list of potential research interests.
- Interviews. Interviews are not required; however, interviews are preferred and will be arranged upon the candidate's request. Successful interviews may enhance the candidate's chance of acceptance.

Suggested Compatible Co-disciplines

Biomedical and Health Informatics (p. 1555), Cell Biology and Biophysics (p. 1557), Chemistry (p. 1223), Computer Networking and Communication Systems (p. 1561), Computer Science (p. 1564), Electrical and Computer Engineering (p. 1573), Engineering (p. 1579), Molecular Biology and Biochemistry (p. 1591), Pharmacology (p. 1600), Physics (p. 1602)

Core Program Requirements

The required minimum core curriculum for students with Oral and Craniofacial Sciences as a discipline will consist of a minimum of nine credit hours in Oral and Craniofacial Sciences. See minimum course requirements below. The student's supervisory committee may require additional courses for an Interdisciplinary Ph.D. program which includes the department of Oral and Craniofacial Sciences as the primary discipline or as a co-discipline. Ph.D. students with Oral and Craniofacial Sciences as their primary unit must either complete these courses at UMKC or must have completed equivalent coursework at approved institutions at the time of their admission to the Interdisciplinary Ph.D. program. Students are referred to other sections of the current UMKC general catalog for listings of appropriate graduate-level courses. The curriculum requirements also include a minimum of 3 credit hours of ethics training.

Minimum Coursework Requirements

The Discipline Coordinator/OCS Program Director will serve as the student's academic advisor for Oral and Craniofacial Sciences Interdisciplinary Ph.D. students. In accordance with the general requirements for the Interdisciplinary Ph.D. program, a Ph.D. student must prepare a coursework plan of study in conjunction with the discipline coordinator/program director and co-discipline coordinator. A student's plan of study must include coursework in Oral and Craniofacial Sciences as well as in at least one other discipline.

Coursework must satisfy all discipline-specific requirements and may include additional courses as appropriate to the student's research focus. Course selection will be made in conjunction with the Department of Oral and Craniofacial Sciences Director of Graduate Research Programs and the General requirements are listed below:

- The Plan must include coursework from all of the student's disciplines
- No more than 60 percent of the total coursework taken at UMKC and included on the Ph.D. Plan of Study, exclusive of dissertation hours, may be from any one discipline
- Coursework from disciplines other than the ones to which the student has been admitted may be included on the Coursework Plan of Study and counted in the total percentage
- No more than 25 percent of the total coursework may be from disciplines not formally participating in the Interdisciplinary Ph.D. Program
- The Plan must include at least 30 didactic hours beyond the baccalaureate degree, exclusive of dissertation research hours, in courses taken at UMKC or in courses taken at another institution which are approved for transfer by the Discipline Coordinator/Program Director
- The Plan must include a minimum of 9 credit hours, exclusive of dissertation research hours, in a co-discipline area to which the student has been admitted
- The Plan must include at least 12 hours of dissertation credits

Code	Title	Credits
Required Core Curriculum		
BIO-SCI 5751	Elements of the Scientific Method	1-2
BIO-SCI 5752	Research Methods in Oral and Craniofacial Sciences	1-5

BIO-SCI 5830	Structural Characterization of Dental Biomaterials	
MEDB 5561	Responsible Conduct of Research	

Departmental Research Orientation

Enrollment in BIO-SCI 5751 required

- Interdisciplinary Ph.D. students will select and rotate through a minimum of four laboratories in the Department of Oral and Craniofacial Sciences conducting a short research project in each. At the end of the semester, a report is required reviewing the research project and instrumentation in each laboratory. Students are also required to attend the weekly Department of Oral and Craniofacial Sciences Seminar Series and the monthly Professional Development Seminar Series. Research presentations cover a variety of biological, engineering and behavioral science disciplines relevant to oral science education and the oral health care profession. Presentations will be by faculty, students, and invited guest lecturers.

Enrollment in BIO-SCI 5752 required

- As the student identifies a research focus for the dissertation project, they will begin reviewing the literature and relevant instrumentation in conjunction with a selected research advisor.

Seminar Series

- Graduate students are expected to attend the weekly Department of Oral and Craniofacial Sciences Seminar Series and the monthly Professional Development Seminar Series
Information available from Department of Oral and Craniofacial Sciences website at <http://dentistry.umkc.edu/oralbio/oralbiologyseminar.shtml> (<http://dentistry.umkc.edu/oralbio/oralbiologyseminar.shtml/>)

Thesis and Dissertation Defense Exams

- Graduate students are expected to attend all thesis and dissertation defense exams

Other Discipline-Specific Special Requirements

Dissertation Research

In accordance with general Interdisciplinary Ph.D. program requirements, each student with Oral and Craniofacial Sciences as the primary discipline must submit a dissertation proposal, prepared in consultation with the student's dissertation chair, which describes an interdisciplinary program of original research on a significant problem in Oral and Craniofacial Sciences. The proposal will be reviewed by the student's Ph.D. supervisory committee. The student may be required to revise and resubmit the proposal to the supervisory committee. A copy of the accepted proposal will then be forwarded to the School of Graduate Studies.

The student must provide evidence that a substantial portion of the dissertation will be submitted for publication to refereed journals. Such proof may be in the form of a manuscript in preparation for submission or a submitted manuscript. The student must submit the complete dissertation, in electronic form, to his or her faculty advisor for review and preliminary approval at least eight weeks before the expected date of graduation.

Appeals

In the event of disputes or special requests concerning a student's Ph.D. program, written appeals or documentation must first be submitted to the student's supervisory committee. If a resolution of the problem cannot be affected at that level, the written appeals process takes effect.

Academic Retention

A 3.0 or better grade-point average is required of all work applicable to the Interdisciplinary Ph.D. program. A Ph.D. student with oral and craniofacial sciences as a discipline is subject to termination from the Interdisciplinary Ph.D. program if: (1) his or her grade-point average falls below 3.0; (2) more than four hours of C (2.0) grades are received; or (3) any grade of D or F is received.

A recommendation for termination from the program will be made by the student's dissertation chair to the program director. The next level of review would be the department chair, associate dean for research and graduate programs, and then the Interdisciplinary Ph.D. executive committee and the Dean of the School of Graduate Studies.

Comprehensive Examination Guidelines

A Comprehensive Examination will be administered to all students enrolled in the Interdisciplinary Ph.D. program whose subject emphasis area is Oral and Craniofacial Sciences. The examination includes both written and oral components. Content of the Comprehensive Examination will be tailored to the student's field of research interest and prepared with input from all members of the student's supervisory committee.

Oral and Craniofacial Sciences as a Co-discipline

- The Plan of Study must include a minimum of 9 approved credit hours, exclusive of dissertation research hours, in the Oral and Craniofacial Sciences co-discipline area
- At least one member of the Department of Oral and Craniofacial Sciences doctoral faculty must serve on the dissertation committee
- The Department of Oral and Craniofacial Sciences Graduate Program Director will serve as the interim advisor to co-discipline Interdisciplinary Ph.D. students.

Students will select courses applicable to their program from the following list with guidance from the Department of Oral and Craniofacial Sciences Director of Graduate Research Programs.

Code	Title	Credits
BIO-SCI 5751	Elements of the Scientific Method	1-2
BIO-SCI 5752	Research Methods in Oral and Craniofacial Sciences	1-5
RES-ME 5700	Introduction To Research Methodology	2-3
RES-ME 5704	Introduction to Biostatistics	2-3
BIO-SCI 5710	Genetics and Biochemistry of Cranial Facial Biology	2
BIO-SCI 5739	Biomaterials for the Dental Specialist	1
BIO-SCI 5742	Biomaterials for the Restorative and General Dentist	2

UMKC is An Equal Opportunity/Access/Affirmative Action/Pro Disabled & Veteran Employer

Pharmaceutical Sciences

Discipline Coordinator

Kun Cheng, (816) 235-2425, chengkun@umkc.edu

Pharmaceutical Science faculty who are members of the doctoral faculty.

Pharmaceutical Science is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

Applicants must hold a professional degree in pharmacy (Pharm.D. or B.S.) or a baccalaureate degree in a related field such as chemistry, biology or mathematics with an undergraduate GPA of at least 3.0 on a 4.0 scale. Students who hold a master's degree in an appropriate discipline may be admitted on satisfaction of the general requirements of the School of Graduate Studies. Application deadlines are October 1st for the spring semester and February 1st for the fall semester.

Qualifying Requirements for Full Admission

Admission depends on agreement of a member of the doctoral faculty in the discipline to serve as research advisor. Students seeking admission to the Pharmaceutical Science discipline of the Interdisciplinary Ph.D. program should have completed coursework in calculus, organic chemistry, physical chemistry, biochemistry, microbiology, human anatomy and physiology where appropriate to their interests. Course equivalency is determined by the Pharmaceutical Science discipline faculty on a case-by-case basis. Students are required to pass the discipline placement exams before appearing for the Comprehensive Exams administered by the supervisory committee.

On admission, all students are assigned interim faculty advisors as stated in the letter of admission. Graduate students must adhere to the guidelines as stated in the School of Pharmacy Graduate Programs section of this catalog pertaining to selection and changes of faculty advisors.

Suggested Compatible Co-disciplines

Biomedical and Health Informatics (p. 1555), Chemistry (p. 1223), Cell Biology and Biophysics (p. 1557), Mathematics (p. 1589), Molecular Biology and Biochemistry (p. 1591), Oral and Craniofacial Sciences (p. 1594), Pharmacology (p. 1600)

Core Program Requirements

Pharmaceutical Sciences as the Primary Discipline

Code	Title	Credits
Pharmaceutical Sciences Courses		12
Co-Discipline Courses		9
Other Coursework		6
Statistics		3
PHARM 5580A or PHARM 5580C	Seminar in Pharmaceutical Sciences Seminar in Pharmacology/Toxicology	1
PHARM 5699	Research and Dissertation	1-16
Total Credits		45

Pharmaceutical Science as Co-discipline

The Pharmaceutical Science doctoral faculty member(s) of the supervisory committee will confer regarding the student's program of study and recommend appropriate courses offered by the co-discipline. Generally, courses in the co-discipline will constitute successful completion of at least 20 percent of the approved course of study. All students choosing Pharmaceutical Science as a co-discipline must complete at least three graduate-level courses in Pharmaceutical Science compatible with research objectives recommended by the supervisory committee.

Provisionally-admitted co-discipline students in Pharmaceutical Science in fulfillment of their full-admission requirements must take at least 9 credits of the regular recommended courses:

Code	Title	Credits
Select three of the following:		9
PHARM 5521	Advanced Organic Medicinal Chemistry	
PHARM 5527	Analytical Methods	
PHARM 5533	Advanced Pharmacokinetics and Biopharmaceutics	

PHARM 5588	Biotechnology	
PHARM 5605	Fundamentals of Pharmaceutical Sciences	3
PHARM 5631	Pharmaceutical Formulations I	
PHARM 5632	Novel Drug Delivery Systems	3
PHARM 5634	Protein and Nucleic Acid Drug Delivery	
Total Credits		15

and pass with a "B" or better.

Other Discipline-Specific Special Requirements

Requirements for Retention

Students who receive two C grades or one D grade in didactic courses are subject to dismissal from the program. A student who receives one F grade will not be retained. Students will not be allowed to attain more than one C grade in a co-discipline course.

Appeals

Appeals by graduate students on matters pertaining to research or studies in the discipline will be routed initially to the supervisory committee and managed according to the appropriate procedures established within the School of Pharmacy.

Comprehensive Examination Guidelines

Ph.D. students who choose Pharmaceutical Science as the primary discipline must successfully pass comprehensive oral and written examinations given by the Supervisory Committee by the end of the third year. The Comprehensive Examinations will be given after the student has completed the majority of didactic coursework requirements but not later than the end of the third year. The Comprehensive Examinations (written and oral) must be passed before a doctoral student can be admitted to candidacy.

Pharmacology

Discipline Coordinator

Dr. Hari Bhat, (816) 235-5903, bhath@umkc.edu

Pharmacology faculty who are members of the Doctoral Faculty.

Pharmacology is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

Due to course sequencing, new students will ordinarily be accepted only in the fall term. Applicants must hold a professional degree in pharmacy (Pharm.D. or B.S.) or a baccalaureate degree in biological, chemical science or health science. In special situations, baccalaureate degrees in other disciplines will be evaluated for possible admission. For graduates of foreign schools, the applicant must have completed a course of study at least the equivalent of a U.S. baccalaureate degree.

Prospective students must have an aggregate minimum grade-point average of 3.0 on a 4.0 scale for all college work taken prior to the bachelor's degree, or an aggregate GPA of at least 3.5 on all post-baccalaureate work to date (minimum of nine hours). For graduates of foreign schools, the applicant must have above-average grades in previous college study.

Prospective students must have a minimum aggregate GRE score of 295 for verbal and quantitative and 3.5 out of 6.0 for analytical writing.

For graduates of foreign schools, the applicant must have a minimum score of 550 on written or 213 computer-based or 80 on Internet-based TOEFL exam or alternatively, a minimum score of 6 on the IELTS.

Qualifying Requirements for Full Admission

Students seeking admission to the Pharmacology discipline of the Interdisciplinary Ph.D. program should have completed coursework in organic chemistry I and II, biochemistry I and II, calculus, anatomy, microbiology, physiology I and II and a biostatistics course. Deficiencies existing on admission must be satisfied during the first two semesters of graduate work. In addition, during the first year of graduate study, provisional Ph.D. students with Pharmacology as a discipline must complete the following courses with a grade of B or better.

Code	Title	Credits
PHARM 5509	Toxicology	3
PHARM 5519	Pharmacology I	2
PHARM 5520	Pharmacology II	4
PHARM 5530	Pharmacology III	4
PHARM 5615	Methods In Pharmacology And Toxicology	3
Total Credits		16

Suggested Compatible Co-disciplines

Cell Biology and Biophysics (p. 1557), Chemistry (p. 1223), Molecular Biology and Biochemistry (p. 1591), Pharmaceutical Science (p. 1599)

Core Program Requirements

Pharmacology as Primary Discipline

Specific course requirements will be determined by the student in consultation with the research advisor and the supervisory committee. Generally, 65 post-baccalaureate credit hours, including 20 hours of research and dissertation and 45 hours of coursework, are required for the Ph.D. degree.

No more than 27 credit hours (60 percent) can be obtained from a single discipline (preferably in Pharmacology). The remaining 18 credit hours (40 percent) can be obtained from one or more participating disciplines. No more than 25 percent of the coursework (~11 credits) from non-participating disciplines will be counted toward the Ph.D. degree. More co-disciplines will be required. As many as 15 credits may be allowed for courses taken in a master's degree program at another institution with the concurrence of the student's supervisory committee.

Code	Title	Credits
Pharmacology Requirements		
PHARM 5519	Pharmacology I	2
PHARM 5520	Pharmacology II	4
PHARM 5530	Pharmacology III	4
PHARM 5509	Toxicology	3
PHARM 5615	Methods In Pharmacology And Toxicology	3
PHARM 5580C	Seminar in Pharmacology/Toxicology	1
Additional Requirements		
EDUC-R&P 5505	Statistical Methods I	3
Co-Discipline courses ¹		7-11
Advanced courses (5500-level or above) ²		3-7
Total		35

¹ 7-11 credit hours in one or a combination co-disciplines, which may include Cell Biology and Biophysics, Chemistry, Molecular Biology and Biochemistry, Oral and Craniofacial Sciences, Pharmaceutical Science or other pertinent areas as approved by the supervisory committee.

² 2-6 credit hours of advanced courses (5500 level or above) Pharmacology or related areas as approved by the supervisory committee.

Other Electives

A supervisory committee may require that additional coursework be taken to prepare the student in a specific research area. This additional requirement may not exceed six credit hours, may be taken in any approved doctoral discipline and must be completed prior to the semester in which the dissertation defense occurs.

Pharmacology as Co-discipline

Students who apply for Pharmacology as a co-discipline should have completed coursework equivalent to LS-PHYS 399 and LS-PHYS 400, which are offered at UMKC. Deficiencies existing on admission must be satisfied during the first two semesters of graduate work. When Pharmacology is chosen as the co-discipline, the minimum course requirements are completion of PHARM 5519, PHARM 5520 and one credit hour of PHARM 5580C, plus sufficient courses constituting the required percentage of their program of study, as approved by the supervisory committee. No C grade in any core course will be permitted. Students who receive more than one C grade on elective courses will be dropped from Pharmacology as a co-discipline. Students must take and successfully pass a written and oral Comprehensive Examination administered by the supervisory committee members from the Division of Pharmacology. Co-discipline students should take the Pharmacology Comprehensive Examination no later than one semester after completing their required co-discipline coursework.

Other Discipline-Specific Special Requirements

Additional Coursework

Students will be expected to complete at least three credit hours of statistics. Students are expected to take sufficient computer courses or training as to be proficient in word processing and the use of spread sheets and data bases.

Retention in Program

Graduate students are required to maintain a cumulative grade-point average of B (3.0 on a 4.0 scale). In any semester when the cumulative GPA falls below 3.0, the graduate student will automatically be placed on probation. The student is allowed one semester to return to good academic standing (cumulative GPA of 3.0). A graduate student should not let the cumulative GPA fall below 3.0 in two semesters throughout the entire program. Students who receive a grade of C in six credit hours or more, or who receive a grade lower than C, or one no-credit grade will be dismissed from the graduate school. Any C grade in courses offered by the Pharmacology division should be repeated no more than once.

Appeals

For special requests or disputes concerning a student's Ph.D. program, written appeals with documentation must first be submitted to the student's supervisory committee. If a resolution of the problem cannot be obtained at the supervisory committee level, the written appeals process must then progress through the following levels:

1. Division Chair, Pharmacology.
2. Graduate Programs Committee, School of Pharmacy.
3. Interdisciplinary Ph.D. Program Director.
4. Dean, School of Graduate Studies.

Comprehensive Examination Guidelines

The graduate school requires that a student demonstrate adequate intellectual mastery of the field of specialization and of appropriate co-discipline fields by passing a Comprehensive Examination before being admitted into candidacy for the Ph.D. degree. To satisfy this requirement the student must pass two parts of the Comprehensive Examination given by the supervisory committee.

The Comprehensive Examination must be taken before the beginning of the student's third year after admission to full-time graduate study at UMKC. The Comprehensive Examination consists of both written and oral components. The format of the Comprehensive Examination consists of the writing and oral defense of a research proposal in the style of an NIH grant. This topic of the proposal is in an area distinct from the student's intended dissertation project and approved by the committee in advance of the examination.

Written Examination

The written examination will consist of a National Institutes of Health (NIH) grant proposal including Specific Aims, Methods, and Research Design sections; budget pages are unnecessary. The content will integrate fundamental knowledge from both the primary discipline and co-disciplines. The written proposal must be submitted to the supervisory committee at least two weeks in advance of the oral portion of the examination.

Oral Examination

The oral examination shall consist of the student's presentation of their grant to the supervisory committee in order that the committee can evaluate the student's critical thought process and the student's ability to develop and defend an original research proposal. The oral examination includes (1) questions covering the grant proposal prepared by the student for the written examination and (2) other related material in the student's area of specialization, including fundamental knowledge of the primary discipline and co-discipline(s).

On satisfactory completion of the written and oral portions of the Comprehensive Examination, the student becomes a candidate for the Ph.D. In the event a student does not pass the examination, one additional attempt may be made at a date no sooner than 12 weeks, and within one year, of the original attempt. A student who fails either the written or the oral examination a second time will be automatically dropped from the program.

A student must pass the doctoral Comprehensive Examination and advance to Ph.D. candidacy within four years from the beginning of doctoral coursework (within three years if entering with a master's degree in the same or closely related field). After the establishment of degree candidacy, a maximum of four years will be allowed for completion of degree requirements (three years for students with a master's degree). Failure to complete the work within the periods specified will necessitate re-evaluation of the entire program and may result in a notice of termination.

Physics

Discipline Coordinators

Paul Rulis, (816) 235-5945, rulisp@umkc.edu

Mark Brodwin, (816) 235-2508, brodwinm@umkc.edu

Physics faculty who are members of the doctoral faculty.

Physics is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

For admission to the program, an applicant must meet the requirements of the School of Graduate Studies (<https://catalog.umkc.edu/general-graduate-academic-regulations-information/graduate-admission-policies-procedures/>), the Interdisciplinary Ph.D. (<https://catalog.umkc.edu/colleges-schools/graduate-studies/interdisciplinary-phd-application-procedure-minimum-criteria-for-admission/>) program, and specific Department of Physics and Astronomy admission requirements described below. The graduate studies committee of the Department of Physics and Astronomy will review applications and make admission recommendations to the School of Graduate Studies. The basic criterion for admission is the likelihood that an applicant will be successful in the Interdisciplinary Ph.D. program, particularly in the research component of the program. All applicants must satisfy the graduate studies committee that they meet this criterion through evidence such as transcripts, letters of recommendation, statements of purpose, GRE scores (general and optionally the subject), performance on the department written examination, etc. Furthermore, a member of the doctoral faculty must be willing to accept the applicant as a research student. International students are required to have a TOEFL score of at least 550 (213 CBT) for admission and 575 (230 CBT) to be eligible for a teaching assistantship.

Qualifying Requirements for Full Admission

In addition to the above requirements, applicants must meet the following minimum requirements for the appropriate category listed below to be considered for full admission with physics as a discipline. The doctoral studies committee may recommend provisional admission for those applicants who fail to meet these requirements.

Applicants for admission to the Interdisciplinary Ph.D. program electing physics as their primary discipline must have a bachelor's or master's degree in physics or the equivalent. Those applicants holding only a bachelor's degree will be expected to provide exceptionally strong evidence of their academic ability and research capability in physics.

Applicants for admission to the Interdisciplinary Ph.D. program electing physics as their co-discipline must hold at least a bachelor's degree in a compatible field. These applicants must have successfully completed coursework in physics beyond a first (general or engineering physics) introductory course and must have mathematical background sufficient for advanced coursework in physics.

Suggested Compatible Co-disciplines

Chemistry (p. 1223), Computer Networking and Communication Systems (p. 1561), Computer Science (p. 1564), Curriculum and Instruction (p. 1568), Electrical and Computer Engineering (p. 1573), Engineering (p. 1579), Geosciences (p. 1583), Mathematics (p. 1589)

Core Program Requirements

The credit hour requirement for Ph.D. students with physics as the primary discipline will depend on the student's entering status and individual program. A minimum of thirty (30) credit hours of didactic course work is required. A minimum of twelve (12) credit hours of 5699 Research and Dissertation is required. Any credit hours earned in 5696 Dissertation Research will be counted toward the 12 credit-hour total of 5699 credit hours once the student has successfully presented and defended a Dissertation Research Proposal. Further, if a student in the Physics MS program took 5599 Research and Thesis credit hours but *was not* awarded a degree then those hours may be converted into 5699 Research and Dissertation credit hours.

Physics as a Primary Discipline

Code	Title	Credits
PHYSICS 5500	Methods Of Mathematical Physics I	3
PHYSICS 5510	Theoretical Mechanics I	3
PHYSICS 5520 & PHYSICS 5521	Electromagnetic Theory And Applications I and Electromagnetic Theory And Applications II	6
PHYSICS 5530 & PHYSICS 5531	Quantum Mechanics I and Quantum Mechanics II	6
PHYSICS 5540	Statistical Physics I	3

Students with physics as their primary discipline must either complete these courses at UMKC or must have already completed equivalent coursework at approved institutions at the time of their admission to the Interdisciplinary Ph.D. program at UMKC.

Physics as a Co-discipline

Students are required to complete a minimum of three courses (9 credit hours) at the 300-level or above, from classes offered by the Department of Physics and Astronomy. At least three of these credit hours must be at the '5500+ level'. Labs, special topics, and research courses do not satisfy any

of the above requirements. Students who receive a grade of B- or less in two or more courses used to satisfy these requirements will be disqualified from using Physics as their co-discipline.

Retention in Program

Ph.D. students with Physics as their primary discipline must maintain a 3.25 grade-point average. Students with Physics as a co-discipline must maintain a 3.0 GPA in Physics courses. A student's failure to maintain the minimum GPA will result in a probationary status for the following semester. A failure to remove the GPA deficiency during the probationary semester will then result in the student's dismissal from the Interdisciplinary Ph.D. program.

Appeals

Exceptions to any of the discipline-specific regulations must be approved by the student's supervisory committee and by the physics doctoral studies committee. In the event of disputes or special requests concerning a student's Ph.D. program, written appeals and/or documentation must first be submitted to the student's supervisory committee. If a resolution of the problem cannot be affected at that level, the written appeals process must then progress through the following levels: (1) Doctoral studies committee of the Physics Department; (2) Interdisciplinary Ph.D. Program Director; (3) Dean of the School of Graduate Studies.

Interdisciplinary Ph.D. Examination Guidelines

Physics as Primary Discipline

Departmental Written Examination (a.k.a. Ph.D. Qualifying Exam)

During January of each year, the Department of Physics and Astronomy will administer a written, Ph.D. Qualifying examination of all Interdisciplinary Ph.D. students with Physics as their primary discipline that have not yet passed the exam. The two-part exam will be given during two sessions (morning and afternoon) of four hours each on the first Saturday after the start of the Spring Semester. Each part of the exam will contain approximately eight questions at varying levels of difficulty (advanced undergraduate to introductory graduate). The following subject areas will be addressed in the given order by the two examination sessions:

1. Mechanics and Electromagnetism.
2. Quantum Mechanics and Thermodynamics.

Students must pass the written examination at the Ph.D. Qualifying level before being invited to take the comprehensive examination in fulfillment of the Interdisciplinary Ph.D. program requirements.

Students need only pass the written examination once. However, all graduate students in the Interdisciplinary PhD program or who intend to enroll in the Interdisciplinary PhD program must attempt the exam every year until they pass it. Under a limited set of extenuating circumstances (serious personal or family health issues, visa issues, etc.) a student may be granted an exception to not take the exam in a given year via a petition to the Department of Physics and Astronomy faculty.

A maximum of two attempts will be permitted, and any student who does not attempt the exam when required to do so will be deemed to have failed the exam on that attempt, unless they have been given prior permission to delay taking the exam. Students who are required to take this exam are encouraged to consult with the Department of Physics and Astronomy Graduate Advisors (Profs. Paul Rulis (rulis@umkc.edu; 816-235-5945) and Mark Brodwin (brodwin@umkc.edu; 816-235-2508)) for detailed information concerning procedures and regulations for the exam.

Ph.D. Comprehensive Exam

Ph.D. seeking students who have passed the Departmental Written Exam must pass a Ph.D. Comprehensive Exam to advance to Ph.D. Candidacy. The Ph.D. Comprehensive Exam consists of a proposal of the Ph.D. research topic written in the format of a National Science Foundation proposal narrative with an oral presentation to the student's full Ph.D. committee. This exam must be completed within 12 months of completing the coursework and the qualifying exam degree requirements. The exact timing and topic of this written and oral comprehensive exam will be determined by the student and their supervisory committee.

Defense of Ph.D. Dissertation

The dissertation defense administered by the student's supervisory committee can be taken only after the student has passed their Ph.D. comprehensive exam. The defense may be oral, written, or both and it may include the student's thesis or dissertation proposal and associated background material.

Physics as an Interdisciplinary Ph.D. Co-discipline

There are no formal qualifying or Comprehensive Examination requirements for students whose co-discipline is Physics.

Political Science

Political Science faculty who are members of the doctoral faculty. (<http://sgs.umkc.edu/for-faculty-and-staff/doctoralgraduate-faculty-lists/>)

This discipline is currently NOT accepting new students for the primary or the co-discipline. Questions should be directed to the graduate advisor of the department, Dr. Rebecca Best, at (816) 235-2691 or BestRH@umkc.edu.

Political Science is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Suggested Compatible Co-disciplines

Economics (p. 719), Educational Leadership Policy and Foundations (<https://catalog.umkc.edu/colleges-schools/graduate-studies/educational-leadership-policy-foundations/>), English (<https://catalog.umkc.edu/colleges-schools/graduate-studies/english/>), History (p. 1584)

Core Program Requirements

In general, students must take whatever specific courses are deemed necessary by their committees.

The amount of work required for the Ph.D. depends on the student's level of preparation. A student entering the Ph.D. program without an M.A. in political science may expect to do significantly more work than that required of a student with such a degree in hand.

Students with Political Science as their co-discipline must take at least 12 hours in political science as designated by their committees, but must include POL-SCI 5501 Seminar in American Government, POL-SCI 5530 Seminar in International Relations, and POL-SCI 5513 Seminar in Comparative Politics.

Requirements for Comprehensive Examinations

These examinations are given twice a year. Further information is available from the department.

Public Affairs and Administration

Discipline Coordinator

Arif Ahmed, (816) 235-2319, ahmedar@umkc.edu

This discipline is currently NOT accepting new students for the primary or the co-discipline.

Public Affairs and Administration is a discipline in the Interdisciplinary Ph.D. Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Overview

The Public Affairs and Administration (PAA) discipline in the Interdisciplinary Ph.D. program is designed to prepare students for research careers in universities, public and nonprofit agencies, healthcare institutions, or for other roles in which research training is needed. Successful applicants must show evidence of a strong interest and the ability to successfully engage in research and exhibit promise as skillful teachers. The PAA doctoral faculty supports the development of strong research capacities and requires all Ph.D. students to complete a significant supervised empirical research study for the dissertation.

Program

The Interdisciplinary Ph.D. program is comprised of coursework and research in at least two disciplines. The primary didactic effort will be in PAA and the student will select at least one secondary area of concentration (co-discipline) from other Interdisciplinary Ph.D. disciplines.

Duration

Both primary discipline and co-discipline students in PAA must complete all requirements for their degree within six years from the date of admission to the Ph.D. program. PAA primary discipline students must complete all coursework and pass disciplinary area and Comprehensive Examinations within the first three years of the aforementioned six year period. Under compelling circumstances and on the written recommendation of a majority of the supervisory committee, a single extension for up to one year may be requested for approval by the Interdisciplinary Ph.D. Program Director.

PAA primary discipline students may receive financial support (in the form of fellowships or graduate assistantships) from the Department of Public Affairs contingent upon satisfactory progress towards degree completion. Specific conditions of funding, if provided, will be enumerated in the offer letter; however, in most instances, such funding will be available only for the first three years in the program.

Discipline-Specific Admission Requirements

The PAA doctoral faculty will consider applications for admission to the primary discipline from only the applicants willing to pursue doctoral studies with full-time academic load (as defined in the current UMKC catalog).

All applicants (primary and co-discipline) are required to submit official scores for all three sections of the GRE General Test. Applicants must also submit official transcripts of coursework from all colleges and universities attended. Additionally, a narrative statement of interest, a writing sample, three letters of reference, and a résumé are required. Admission is based on an applicant's overall record of academic achievement and the doctoral faculty's judgment of the applicant's likelihood of successfully completing the Ph.D. We expect that those admitted will have scored well on the GRE and have high GPAs.

Applicants should pay particular attention to the narrative statement that accompanies their application. The PAA doctoral faculty gives substantial weight to this statement. It should provide a clear description of the applicant's intellectual interests, how those interests evolved and the research direction(s) the applicant intends to pursue. A good statement also discusses the fit between the applicant's interests and the resources available at UMKC (for example, it might identify faculty with whom the applicant hopes to work). Narrative statements need not be limited to one page. Applicants should provide a sample of academic writing (such as an undergraduate or master's thesis or a paper from a graduate seminar) that illustrates writing skills and the potential for scholarly work. Applicants are also encouraged to seek letters of recommendation from people who can address their potential for engaging in scholarly research.

The PAA doctoral faculty seeks to admit only students whose research interests fit the interests and capabilities of the doctoral faculty. We admit only students for whom a member of the doctoral faculty agrees to serve as interim advisor, and after the student's plan of study is completed, that faculty member should also be willing to chair (for primary discipline students) or serve on the student's supervisory committee. This requirement of commitment from a member of the PAA doctoral faculty applies to all applicants seeking admission to PAA as a primary or co-discipline. We strongly recommend that applicants communicate with PAA doctoral faculty about their interests and attempt to secure commitments from faculty to serve as PAA advisor and supervisory committee chair/member. Since applications are reviewed immediately following the respective application deadline, applicants should contact faculty by e-mail, telephone or in person before that time.

The primary discipline applicants should be available to appear (in person or via video conferencing) in front of the PAA PhD admissions panel for interview.

Suggested Compatible Co-disciplines

Biomedical and Health Informatics (p. 1555), Curriculum and Instruction (p. 1568), Economics (p. 719), Educational Leadership Policy and Foundations (p. 1572), History (p. 1584), Social Science Consortium (p. 1607)

Core Program Requirements

The exact amount of coursework will be determined by the student's level of preparation and as deemed necessary by the supervisory committee. The following are minimum requirements, exclusive of dissertation research credits.

PAA as Primary Discipline

The Interdisciplinary Ph.D. in PAA consists of a minimum of 34 credit hours coursework.

Code	Title	Credits
Required Courses		
Mandatory enrollment in Doctoral Seminar in the first semester		1
PUB-ADM 5610	Inquiry In Public Administration And Affairs	3
PUB-ADM 5620A	Literature Of Public Affairs And Administration: Political Science	3
PUB-ADM 5620B	Literature Of Public Affairs And Administration:Organizational Theory & Behavior	3
Two additional graduate courses (approved by the supervisory committee) in statistics and research methods in relation to the student's likely dissertation topic		6
One or more of the following requirements may be waived or replaced, with the approval of the supervisory committee, by other PUB-ADM or HLTH-ADM courses if a student has previous course work that is substantially equivalent to any of the following courses.		
PUB-ADM 5525	Financial Accountability And Policy Development	3
PUB-ADM 5526	The Politics of Administration	3
PUB-ADM 5530	Capstone Seminar in Public Administration	3
PUB-ADM 5541	Public Policy Development and Analysis	3
PUB-ADM 5544	Program Evaluation	3

PUB-ADM 5548	Leadership, Change and Social Impact	3
Total Credits		34

PAA as Co-discipline

The PAA co-discipline consists of a minimum of 15 credit hours coursework.

Code	Title	Credits
Required Courses		
PUB-ADM 5610	Inquiry In Public Administration And Affairs	3
PUB-ADM 5620A	Literature Of Public Affairs And Administration: Political Science	3
PUB-ADM 5620B	Literature Of Public Affairs And Administration:Organizational Theory & Behavior	3
Two additional graduate courses (approved by the supervisory committee) in PUB-ADM or HLTH-ADM		6
Total Credits		15

Transfer Credit

Transfer of graduate credit earned before entering the PhD program, including courses taken toward the Master of Public Administration degree at UMKC, will be evaluated on a case-by-case basis and will be approved at the discretion of the supervisory committee.

Requirements for Comprehensive Examinations

Disciplinary Area and Comprehensive Examinations

Before taking the Comprehensive Examination, students with PAA as their primary discipline must pass three “disciplinary area exams”. The exams are developed, administered and evaluated by committees of PAA doctoral faculty in each of the following areas: (1) public administration and policy analysis, (2) organizational studies, and (3) inquiry, research methods and statistics. The Comprehensive Examination for each PAA primary discipline student is developed, administered and evaluated by the student’s supervisory committee and is customized for the student. Co-discipline Comprehensive Examinations may be required as well and are determined by the requirements of the particular student’s co-discipline(s).

The Comprehensive Examination for students with PAA as their co-discipline consists of two areas: (1) public administration and policy analysis and (2) organization studies. The PAA examination is customized for each student and developed, administered and evaluated by the PAA faculty member(s) on the student’s supervisory committee.

Dissertation

To successfully complete the Ph.D. program each student must write a dissertation based on empirical research that constitutes a contribution to knowledge in their field of interest. Students with PAA as their primary discipline are expected to write dissertations that include some consideration of public management or public policy issues. The minimum number of hours for a doctoral dissertation with PAA as the primary discipline is 12, though some committees may require more.

Students with PAA as their primary discipline may, at the direction of their dissertation committee, complete a “traditional” dissertation or a “manuscript-based” dissertation. The general guidelines for each dissertation type are provided in the Public Affairs and Administration Doctoral Student Handbook.

Social Science Consortium

Discipline Coordinator

Doug Bowles, (816) 235-1394, bowlesdh@umkc.edu

Social Science Consortium is a discipline in the Interdisciplinary Ph.D. (p. 1543) Program administered by the School of Graduate Studies.

Note: The discipline-specific requirements listed here are *in addition* to the requirements listed in Interdisciplinary Ph.D. Application Procedure and Minimum Criteria for Admission and Minimum Interdisciplinary Ph.D. Academic Regulations and Degree Requirements.

Discipline-Specific Admission Requirements

The Social Science Consortium (SSC) is only available as a co-discipline option, not as a primary discipline, and has no discipline-specific admission requirements. It is the general policy of the SSC to admit all students who are admitted by their primary discipline. Newly admitted students are assigned to the SSC Coordinator as their faculty advisor, pending formation of their supervisory committee.

Suggested Compatible Primary Disciplines

Curriculum and Instruction (p. 1568), Economics (p. 719), Educational Leadership Policy and Foundations (p. 1572), Geosciences (p. 1583), History (p. 1584)

Core Program Requirements

The Social Science Consortium Program of Study requires 12 hours of dedicated coursework.

Code	Title	Credits
Required Courses		
SOC-SCI 5610	Philosophy Of Social Science	3
SOC-SCI 5630	Seminar in Research Methodology	3
Select two 3-hour electives, to be approved by SSC advisor.		6
Total Credits		12

Disciplinary graduate-level courses are, in general, eligible as electives. The following courses are pre-approved, though others may be approved by the student's SSC advisor: SOCIOL 5501, SOCIOL 5502, ECON 5511, ECON 5588, POL-SCI 5501, POL-SCI 5513, POL-SCI 5530, POL-SCI 5541, SOC-SCI 5621, SOC-SCI 5622, SOC-SCI 5690A

Sequencing is a very important consideration in the program of study listed above, complicated by the constraint that most courses fulfilling the program are offered only in either fall or spring semesters. It is highly recommended that students with the SSC as their co-discipline take SOC-SCI 5610 (offered fall semesters only) as early as possible, preferably in the fall semester of the first year.

SOC-SCI 5630 is designed to assist students with preparation of a defensible dissertation proposal, providing interdisciplinary integration of the SSC program of study with the student's primary discipline. It is intended to be taken as the conclusion of both primary discipline and SSC program coursework.

Requirements for Comprehensive Examinations

In accordance with the School of Graduate Studies guidelines, Comprehensive Exams are administered on an individual basis by the members of each student's dissertation committee. Committees are required to have at least one member drawn from the co-discipline. SSC faculty representatives on each student's committee participate in administration of the Comprehensive Exam.

Associate Deans:

Nancy Levit, Associate Dean for Faculty and Academics

Jasmine Abdel-khalik, Associate Dean of Students

Jeffrey Thomas, Associate Dean for International Programs

This catalog covers the academic programs of the School of Law. Prospective students should be aware that the School reserves the right to make changes in admission requirements and other specifications in the catalog. All statements in this publication are announcements of present policies only and are subject to change at any time without prior notice. They are not to be regarded as offers to contract.

Faculty

Jasmine Abdel-khalik; Associate Dean for Students and Associate Professor of Law; B.A. (Cornell University); J.D. (University of Michigan).

David Achtenberg; Emeritus Professor of Law; B.A. (Cornell University); J.D. (University of Michigan).

Ayyoub Ajmi; Associate Director, Leon E. Bloch Law Library; B.A. (University of Texas at Arlington), M.S. in Library & Information Science (University of North Texas).

Mark Berger; Emeritus Professor of Law; B.A. (Columbia University); J.D. (Yale University).

Jeffrey B. Berman; Emeritus Associate Dean and Professor of Law; B.S. (City University of New York); J.D. (Brooklyn Law School); M.S. (University of Denver).

William K. Black; Associate Professor of Economics and Law; A.B., J.D. (University of Michigan); Ph.D. (University of California at Irvine).

Bruce Bubacz; Curators' Professor of Philosophy and Professor of Law; B.A. (Ripon College); M.S., Ph.D. (University of Washington-Seattle).

Paul D. Callister; Professor of Law and Director, Leon E. Bloch Law Library; B.A. (Brigham Young University); J.D. (Cornell University); M.S. in Library & Information Science (University of Illinois at Urbana-Champaign).

Edward Cantu; Associate Professor of Law; B.A. (Texas State University); J.D. (University of Texas).

Julie M. Cheslik; Associate Professor of Law; B.A., J.D. (University of Iowa).

Corinne Cooper; Emerita Professor of Law; B.A., J.D. (University of Arizona).

Ryan W. Copus; Associate Professor of Law; B.A. (University of Texas, Austin), J.D. (Harvard University), Ph.D. (University of California, Berkeley).

Robert C. Downs; Emeritus Professor of Law; B.A. (Kansas State University); J.D. (University of Nebraska); LL.M. (University of Missouri-Kansas City).

William G. Eckhardt; Emeritus Teaching Professor of Law; B.A. (University of Mississippi); LL.B. (University of Virginia).

Kenneth D. Ferguson; Professor of Law; B.A. (Drake University); J.D. (Oral Roberts University).

Jessica Foxx; Faculty Fellow in Law; B.A. (University of Central Missouri), J.D. (University of Missouri-Kansas City).

Judith Frame; Teaching Professor of Law and Director of LL.M. Tax Program; B.B.A. (University of Wisconsin); J.D. (University of Tulsa); LL.M. (New York University).

Robert H. Freilich; Emeritus Professor of Law; B.A. (University of Chicago); M.I.A. (Columbia University); J.D. (Yale University); LL.M., J.S.D. (Columbia University).

Barbara A. Glesner Fines; Dean and Rubey M. Hulen Professor of Law; B.Ph. (Thomas Jefferson College); J.D. (University of Wisconsin); LL.M. (Yale University).

Francis M. Hanna; Emeritus Professor of Law; B.Ed. (Chicago State University); J.D. (Northwestern University).

Christopher Holman; Professor of Law; B.A. (California State University, East Bay); Ph.D. (University of California, Davis); J.D. (University of California-Berkeley).

Edwin T. Hood; Emeritus Professor of Law; B.B.A., J.D. (University of Iowa); LL.M. (New York University).

Christopher R. Hoyt; Professor of Law; B.A. (Northwestern University); M.S., J.D. (University of Wisconsin); C.P.A.

Jamila Jefferson-Jones; Professor of Law; A.B. (Harvard and Radcliffe Colleges, Harvard University), J.D. (Harvard University).

Sarah N. Johnson; Faculty Fellow in Advocacy; B.S. (University of Nebraska-Lincoln), J.D. (Creighton University, University of Nebraska).

Mary Kay Kisthardt; Emerita Professor of Law; B.A. (King's College), J.D. (Pennsylvania State), LL.M. (Yale University),

John Q. LaFond; Emeritus Edward A. Smith/Missouri Chair in Law, the Constitution and Society; B.A., J.D. (Yale University).

Steve Leben; Visiting Professor of Law; B.S., J.D. (University of Kansas).

Rana R. Lehr-Lehnardt; Associate Teaching Professor of Law; B.A., J.D. (Brigham Young); LL.M. (Columbia).

Nancy Levit; Associate Dean for Faculty and Curators' Distinguished Professor and Edward D. Ellison Professor of Law; B.A. (Bates College); J.D. (University of Kansas).

Douglas O. Linder; Emeritus Professor of Law; B.A. (Gustavus Adolphus College); J.D. (Stanford University).

Yvette Lindgren; Associate Professor of Law; B.A. (University of California, Los Angeles), J.D. (University of California, Hastings), LL.M., J.S.D. (University of California, Berkeley).

Anthony J. Luppino; Rubey M. Hulen Professor of Law and Director of Entrepreneurship Program; A.B. (Dartmouth College); J.D. (Stanford University); LL.M. (Boston University).

Timothy E. Lynch; Associate Professor of Law; B.A. (University of Chicago); M.B.A. (Indiana University); J.D. (Harvard).

Ann Marie Marciarille; Professor of Law; B.A. (Amherst), M.T.S., J.D. (Harvard University).

Danielle Merrick; Associate Clinical Professor of Law and Director of the Entrepreneurial Legal Services and Intellectual Property Clinic; B.S.W. (University of Kansas); J.D., LL.M. (University of Missouri-Kansas City).

Rodney K. Miller; Assistant Clinical Professor of Law; B.A. (University of Michigan); J.D. (University of Pittsburgh).

Andre Moenssens; Emeritus Douglas Stripp/Missouri Professor of Law; J.D. (Chicago-Kent College of Law); LL.M. (Northwestern University).

Thomas E. Nanney; Visiting Associate Professor of Law; B.A. (Dartmouth College); M.A. (Harvard University); J.D. (University of California, Los Angeles).

Sean D. O'Brien; Professor of Law; B.A. (Northwest Missouri State University); D.H.L. (Benedictine College); J.D. (University of Missouri-Kansas City).

Mary Kay O'Malley; Clinical Professor and Director of Child and Family Services Clinic; B.A. (St. Mary-of-the-Woods College); J.D. (Washburn University); M.A. (University of Missouri-Kansas City).

Joshua Pluta; Director of Research and Instructional Services, Leon E. Bloch Law Library; B.A. (University of Nebraska-Lincoln); M.A. (University of Missouri-Columbia); J.D. (University of Nebraska-Lincoln).

Judith Popper; Clinical Professor of Law; B.A. (Agnes Scott College); J.D. (University of Missouri-Kansas City).

Staci Pratt; Director of Public Services, Leon E. Bloch Law Library; B.A. (Dartmouth College), J.D. (Boston College), M.S.W. (University of Kansas), M.S.L.I.S. (University of Missouri).

John W. Ragsdale Jr.; William P. Borland Distinguished Faculty Scholar and Professor of Law; B.A. (Middlebury College); J.D. (University of Colorado); LL.M. (University of Missouri-Kansas City); S.J.D. (Northwestern University).

Margaret Reuter; Clinical Professor of Law and Director of Field Placement Programs; B.A. (Douglass College, Rutgers University); J.D. (New York University).

Allen K. Rostron; William R. Jacques Constitutional Law Scholar and Professor of Law; B.A. (University of Virginia); J.D. (Yale University).

Irma S. Russell; Edward A. Smith/Missouri Chair in Law, the Constitution and Society; B.A., M.A., J.D. (University of Kansas).

Ellen Y. Suni; Emerita Dean and Professor; B.A. (City College of New York); J.D. (Boston University).

Wanda M. Temm; Eleanore C. Blue Lawyering Skills Professor and Director of Bar Services; B.A. (Ottawa University); M.S. (Purdue University); J.D. (University of Kansas).

Jeffrey E. Thomas; Associate Dean for International Programs and Daniel L. Brenner Faculty Scholar and Professor of Law; B.A. (Loyola Marymount University); J.D. (University of California-Berkeley).

Mikah Thompson; Associate Professor of Law; B.S. (Missouri State University); J.D. (Washington University).

L. Michaelle Tobin; Clinical Professor of Law; B.A., J.D. (University of Missouri-Columbia).

Daniel Weddle; Clinical Professor and Director of Academic Support; B.S. (University of Kansas); J.D. (University of Kansas).

Barbara E. Wilson; Emerita Clinical Professor of Law; B.A. (University of Missouri - Columbia); M.A. (University of Nebraska); J.D. (University of Missouri-Columbia).

Del Wright Jr.; Associate Professor of Law; B.S. (University of Maryland); J.D. (University of Chicago); M.P.P. (Harvard Kennedy School of Government).

Courses

LAW 834 Doing Business in Brazil: A Legal Overview Credit: 1

Exploration of basic principles of Brazilian law and key legal institutions and doctrines that would be useful for a person seeking to do business in Brazil.

LAW 8501 Contracts I Credits: 3

Formation and performance of simple contracts; consideration; express and constructive conditions, excuse of conditions; remedies for breach; contracts for benefit of third parties; assignment; impossibility of performance and discharge.

LAW 8502 Contracts II Credits: 3

Prerequisites: LAW 8501.

LAW 8511 Torts Credits: 3

Wrongs to the person and to property; legal remedies through which compensation or other relief may be obtained.

LAW 8521 Civil Procedure – Pleadings, Motions, and Related Matters Credits: 3

Pleading; joinder of parties and claims; pre-trial motions; discovery; summary judgment; pre-trial and trial procedure; post trial motions.

LAW 8522 Civil Procedure - Jurisdiction Credits: 2

Court systems; personal jurisdiction and venue; federal jurisdiction; choice of law; preclusion; appellate procedure.

LAW 8522D Discovery Practice in Civil Litigation Credits: 1-3

This course focuses on the various discovery techniques which are commonly used in federal civil practice, and also compares state procedures. General topics include the uses of discovery, informal discovery, building the discovery plan, ethical issues, privileges and protections, the discovery tools, electronic discovery, experts, motions to compel discovery, and sanctions.

LAW 8522E Electronic Discovery Credits: 1-2

Discovery practice and laws related to electronically stored information in litigation.

Prerequisites: LAW 8521 LAW 8522.

LAW 8522L Civil Procedure Skills Lab Credits: 1-3

Students are trained in practical skills necessary for pre-trial litigation, including client interviewing and drafting pre-trial documents such as pleadings.

Prerequisites: LAW 8521 (or co-requisite).

LAW 8522W Civil Procedure: War or Justice Credit: 1

Philosophical problem in civil dispute resolution: identifying relevant criteria for evaluating a civil dispute resolution system, and assessing the extent to which the current system and alternatives satisfy those criteria.

Prerequisites: LAW 8521 Civil Procedure – Pleadings OR LAW 8522 Civil Procedure – Jurisdiction

LAW 8531 Lawyering Skills I Credits: 3

Introduction to legal reasoning; case analysis and synthesis; case research; structure and style in legal writing with emphasis on expository writing, including office memoranda.

LAW 8531I Common Law, Legal Analysis & Writing Credits: 3

Introduction to legal reasoning; case analysis and synthesis; case research; structure and style in legal writing with emphasis on expository writing, including office memoranda.

LAW 8532 Lawyering Skills II Credits: 2

Introduction to advocacy; introduction to interviewing, counseling and negotiation; statutory and computerized research; writing to and on behalf of a client, including a trial or appellate brief; oral advocacy.

LAW 8532I Introduction to American Legal Skills Credits: 2-3

Introduction to oral and written advocacy; interviewing, counseling and negotiation; and alternative dispute resolution.

Prerequisites: LL.M. students.

LAW 8532R American Legal Research Credit: 1

Introduction to research resources in the U.S. and techniques to systematically process and solve basic research problems found in law practice.

LAW 8541 Property I Credits: 3

Introduction to the nature of property; basic personal property law; adverse possession; possessory estates; basic future interests; marital and concurrent interests; landlord-tenant relationships.

LAW 8542 Property II Credits: 3

Licenses, easements, real covenants, equitable servitudes; nuisances; basic water law; brokerage; financing, mortgages, deeds of trust; contract of sale, deeds, closing; title insurance, warranties; recording; eminent domain; zoning.

LAW 8543 Adverse Possession Credit: 1

Explores the ancient yet evolving subject of adverse possession as it applies to real property in the United States and around the world. Topics explored include: the ancient doctrine as developed under the common law, the variety of statutory refinements to adverse possession doctrine in the United States and modern attempts to statutorily limit the doctrine, and comparative perspectives on adverse possession including the abrogation of the doctrine in Canada, and the effects of that abrogation on resolution of property disputes there.

Prerequisite: Property I

LAW 8552 Federal Taxation Credits: 3

Theory, history, and principles of federal income taxation; basic concepts of income, classification of income and deductions.

LAW 8590 Special Topics Credits: 1-6

The study of a contemporary topic of interest. This course is designed to facilitate one of two purposes: an initial offering of a new course (prior to formal approval) or an initial and possible only offering of new topics.

LAW 8601 Business Organizations Credits: 3

Partnership, limited liability company and corporation law; choice of business forms, formation of partnerships, limited liability companies and corporations; rights, duties, and powers of partners, members, shareholders, directors, and officers; closely held corporations; proxy regulation; derivative suits; dividends and stock redemptions; introduction to the Securities Act of 1933 and Securities Exchange Act of 1934.

LAW 8601C International Criminal Tribunals Credit: 1

This course will examine the types of international criminal tribunals available for the prosecution of individuals accused of war crimes, the crime of aggression, crimes against humanity, and genocide. The course will begin with an introduction to the history of international criminal law and a comparative examination of various international criminal tribunals, including the Nuremberg trials, ad hoc criminal tribunals (ICTY and ICTR), the permanent International Criminal Court in The Hague, and hybrid criminal tribunals (Cambodia, Lebanon, and Sierra Leone). The course will then focus more specifically on the International Criminal Court (ICC), including the ICC's formation and jurisdiction and examples of individuals and situations investigated and prosecuted thus far by the court.

Prerequisites: Part of the Ireland Law Program.

LAW 8601L Transactional Lawyering Skills Lab Credit: 1

Students are trained in counseling clients and negotiating business formation, dissolution, and liability issues as well as drafting appropriate documents.

Co-requisites: LAW 8601.

LAW 8601R Doing Business In Ireland, Part I Credit: 1

A survey of International Trade Law and European and American Competition Law that impact on American multinational companies operating in the Republic of Ireland.

LAW 8601S Doing Business in Ireland, Part II Credits: 0.5

A survey of the Ireland Company Law and comparative United States Corporate Law and a survey of United States corporate taxation of multinational companies operating in Ireland.

LAW 8602 International Field Experience Credits: 1-2

In connection with relevant coursework, this limited international field experience will permit students to visit a foreign country to see the application of their coursework in a comparative perspective, including tours of legal facilities, visits with experts from the host country, and service learning opportunities.

Prerequisites: Permission of instructor and designated accompanying coursework.

LAW 8603 Taxation Of Business Organization Credits: 2-3

Survey course of the taxation of business enterprises, particularly partnerships, corporations and subchapter S corporations.

Prerequisites: LAW 8552, LAW 8601.

LAW 8605 Antitrust And Fair Competition Law Credits: 2-3

This course examines fair competition law as a body of law designed to protect consumers. Understanding fair competition law requires looking at Supreme Court case law but also lower court decisions, economic analysis, and government enforcement guidelines and policy statements.

LAW 8609 Ethical Issues In Family Law Representation Credits: 1-2

Advanced study of the ethical obligations of public and private attorneys in estate, family, and juvenile law representation. Topics may include identification of the client, ethical and legal obligations of confidentiality and disclosure, competence and client communication, respect for third persons (particularly obligations toward children of clients) and other related subjects. Paper and presentation required. When offered for 2 credit hours, the course fulfills the Schools Professional Responsibility graduation requirement.

Prerequisites: (or concurrent) LAW 8611, LAW 8751.

LAW 8610 Introduction to Trusts Credit: 1

This course explores the law of trusts, including the elements of a valid trust; its creation, administration and termination; the nature of a beneficiary's interest; and the fiduciary duties of trustees.

Prerequisites: Property I and Property II, Estates and Trusts

LAW 8611 Estates And Trusts Credits: 3

Intestate succession; testamentary dispositions; execution, modification, and revocation of wills; will contests; advancements, ademption, and exoneration; family allowances; rights of estate creditors; express, implied, resulting, and constructive trusts; basic tax aspects of estates and trusts; rule against perpetuities; will substitutes.

LAW 8611L Estates and Trusts Lab Credits: 1-3

This experiential course applies the knowledge acquired in the basic Estates and Trusts course to the process of gathering, evaluating, planning, drafting, and executing an estate plan in a non-tax environment.

Prerequisites: LAW 8611; LAW 8541; LAW 8542.

LAW 8613I Estate Planning and Drafting Lab Credits: 2

Students are assigned to attorneys at law firms or trust departments and will work on estate planning projects assigned by the supervising attorney. Exams may include drafting will and trust instruments, researching legal issues, and drafting memos.

Prerequisites: LAW 8611.

LAW 8614 Estate Planning and Drafting Credits: 1-4

Continuation of Estates Trusts I using problems and cases as a basis for class discussion. Working in teams, students engage in the planning of estates for actual clients, proceeding through the entire process and culminating in the execution of wills, trusts or other appropriate instruments. Course is not open to students who have taken Estate Planning.

Prerequisites: LAW 8611.

LAW 8614R Estate Planning For Retirement Plan Benefits Credit: 1

The income, gift, estate and generation-skipping transfer tax consequences and rules related to the ownership, distribution and withdrawal of retirement plan benefits, including minimum required distributions, designating beneficiaries, spousal rights and rollover options

LAW 8615 Estate Planning and Practice Credits: 3-4

Tax-oriented examination of contemporary estate planning problems for the larger estates, with emphasis on issues of direct concern to practitioners. This course is designed for LL.M. students.

LAW 8615R Estate Planning For Charitable Giving Credit: 1

Survey of federal income tax and transfer tax laws governing gifts to charitable organizations, charitable remainder trusts and charitable lead trusts; procedural requirements to assure deductibility; and planning and drafting considerations.

LAW 8617R Elder Law For Estate Planners Credit: 1

An examination of the legal tools available for the elderly client for decision-making, both health care and financial, in the event of incapacity, and asset preservation, including Medicare and Medicaid qualification. The course will cover the use of trust; durable powers of attorney, and advance directives for health care and living wills and the relationship to court guardianship.

LAW 8621 Evidence Credits: 3

General principles relating to proof of facts in civil and criminal trials; presumptions; order of proof; relevancy; judicial notice; real and demonstrative evidence; authentication; best evidence rule; hearsay; competency; impeachment; rehabilitation.

LAW 8631 Constitutional Law Credits: 4

Core issues relating to the U.S. Constitution, including the doctrine of judicial review, the powers of Congress and the President, limitations on state power, and judicial protection of individual rights.

LAW 8633 First Amendment Law Credits: 2-3

Basic themes and advanced problems relating to the law of the First Amendment to the United States Constitution, including exploration of the values behind the protection, subversive advocacy, regulation of speech in the public forum, access to the media, regulation of the press, symbolic expression, libel, obscenity, commercial speech, picketing, right of association, loyalty oaths, legislative investigations and government demands for information, separation of church and state, free exercise of religion, state aid to the religious schools, regulation of religion-based conduct.

LAW 8633R Law and Religion Credits: 1-2

Explores the interaction of the legal system with religious beliefs and institutions. The course examines issues such as the establishment and free exercise clauses of the United States Constitution, the influence of religion in law making, and religion issues presented in famous trials.

LAW 8634 Criminal Law Credits: 3

Introduction to substantive criminal law, its role and purpose in our society; principles of liability, common law and statutory offenses; defenses; punishment.

LAW 8634I International Criminal Law Credits: 1-2

An introductory course in International Criminal Law focusing on the criminal prosecution of individuals under international law, primarily by international tribunals (or "hybrid" international/national tribunals) and secondarily by national tribunals applying international law. The course will include a consideration of aspects of criminal law that are common to most criminal legal systems, with a particular focus on those crimes that are "international;" will revisit the concept of criminal jurisdiction, how it is acquired, and its limitations, such as immunity for heads of state and diplomats; and will examine the elements of war crimes, crimes against humanity, and genocide, as well as a few other crimes of international concern; and excuses or justifications under international law, such as self-defense and insanity.

LAW 8635 Criminal Procedure I Credits: 3

Introduction to the administration of criminal justice; constitutional rights of the accused; due process; privilege against self-incrimination; right to counsel; arrest, search, and seizure; wire-tapping; police interrogation and confessions; pre-trial identification procedures.

LAW 8635S Wrongful Convictions Credits: 2-3

An examination of the causes of wrongful convictions, a consideration of systemic reforms that might minimize convicting the innocent and a focus on recurring ethical issues that confront prosecutors and criminal defense lawyers. Students also will work with The Midwestern Innocence Project on cases of possible actual innocence. This course provides an insider's look into the operation of the criminal justice system and is designed to help students gain insight into features of the criminal justice system that have a tendency to produce wrongful convictions. It should be of particular interest to any student interested in working in a prosecutor's office, public defender's office or for a firm doing defense work. It is a prerequisite for any student wishing to enroll in the Innocence Project clinic. Limited enrollment (normally, up to 16 students)

LAW 8635T Wrongful Convictions II Credits: 2-3

A follow-up class to Wrongful Convictions I, open only to students who have completed Wrongful Convictions I. The course will involve "hands on" work with cases that have passed through the first level of screening in Wrongful Convictions I with students receiving the transcripts and case documents in addition to the briefs and opinion in the case. Students will receive these documents and report on the likelihood that an inmate is innocent and the strategies available for pursuing the claim of innocence.

LAW 8636 Criminal Procedure II Credits: 3

Continuation of the study of the administration of criminal justice; exclusionary rules; bail; prosecutor's discretion; grand jury; preliminary hearing; jurisdiction, venue; joinder and severance of offenses and defendants; right to speedy trial; pleas of guilty; discovery; trial by jury; publicity; double jeopardy.

LAW 8636A Federal Trial Practice Credits: 2-3

A practical skills course involving consideration and application of the rules of procedure and evidence to civil and criminal cases brought in federal court, including, but not limited to the legal requirements of federal jury instructions, motions in limine, pretrial preparation, pretrial conferences, notice requirements, voir dire, opening statements, direct and cross, evidentiary foundations for exhibits, computerized and computer-related evidence, character and related evidence, witnesses (lay, lay opinion, summary, character, experts), and closing arguments.

LAW 8637R U.S. Attorney's Office Law Internship Credits: 3-6

US Attorney's Office Legal Interns work in the United States Attorney's Office directly with Assistant US Attorneys (AUSA's) in one of the Criminal Division units. Activities include legal research and drafting memoranda, motions and briefs; observations and participation in trials, pre-trial hearings, and motions, as appropriate; and general assistance with litigation.

Co-requisites: LAW 8749.

LAW 8638R Entrepreneurial Lawyering: Solo And Small Firm Practice Credits: 3

Course will focus on law practice management for solo and small firms. Topics include organizational structure, firm management, fee setting and allocation, and effective and ethical marketing. Course includes attendance at the Missouri Bar Solo and Small Firm Conference.

LAW 8639 Legal Practice Technology Skills Credits: 1-3

This course will facilitate technology competencies for students for use in practice settings, regardless of the size or setting of the law firm, business, or agency. The course will familiarize students with the basic legal technologies necessary for the twenty-first century lawyer, but will also include word-processing, spreadsheet and database skills appropriate for the legal setting. More advanced portions of the course include computer-assisted drafting, file architecture design, security protocols, and client communications.

LAW 8639B Legal Tech-Competency Training Credit: 1

This course provides students with the opportunity to gain advanced knowledge in the software skills needed by legal practitioners, including: word processing, visual communication, cloud computing, document automation, data analytics, and project management.

LAW 8639D Legal Document Assembly Credits: 1-3

Document automation and assembly can help attorneys more efficiently and accurately deliver legal services to the public and their employer—thus helping attorneys be more competitive in the legal services market place. This two-credit hour course will teach students the skills necessary for document automation and familiarize them with HotDocs, the predominant provider of document assembly applications. Students will produce programmed documents, interviews, and systems for estate planning, businesses planning, or such other projects as are suitable for document assembly. The course may be taught over an eight week period or a summer term. No computer programming experience is required.

LAW 8639L Practice Management Technology Lab Credits: 2-3

Building on theory of the role technology in law practices, students will learn how to use document assembly software and learn to be proficient with other software with hands on exercises and work.

LAW 8641R Legislation Credits: 2-3

This course explores a variety of topics under the broad heading of "Legislation." Included among them are: electoral and representational structures, legislative drafting, canons of statutory interpretation, identifying and utilizing legislative history, the role of referendums and initiatives as a supplement to representative institutions, public choice theory, and other theories of legislation. The course also includes an opportunity for students to participate in the drafting of legislation for the Kansas or Missouri State legislatures. Paper optional.

LAW 8643C Competitive Business Intelligence Credit: 1

Develops the skills necessary to search publicly available information to find vital facts about individuals, businesses, organizations, markets, and industries, and conduct so-called "due diligence" investigations. The first focus is on using public records, commercial services, and company information to gather information about parties. The second focus is on data and statistics, including finding, processing, and interpreting that information.

Prerequisites: Lawyering Skills 1

LAW 8643D European Union Data Protection & Privacy Credit: 1

This course will examine the history of global data protection and privacy, with a particular focus on the General Data Protection Regulation, essentials of a data privacy policy, enforcement, key privacy laws in the U.S., and an evaluation of the future of privacy law.

LAW 8643F Advanced Legal Research: Foreign, Comparative and International Law Credit: 1

The course is designed to familiarize students with the basic resources of international law by taking an in-depth look at foreign and comparative law resources, teaching students how to utilize and think systematically about those resources and instructing students in the strategies and processes necessary to conduct scholarly research and practice international law. Students taking the course will improve their research competency in authorizing scholarly papers with a comparative or international perspective.

LAW 8643L Advanced Legal Research-Litigation Credit: 1

Prepares students who wish to focus on advocacy and litigation (including students in litigation with respect to Family Law and Urban, Land Use and Environmental law). The course is also intended to facilitate research for the student's legal research and writing requirement. The course will refresh and refine research skills, help students to think systemically about legal research, and familiarize students with applicable resources. As the final project, students will have the opportunity to develop an in-depth research "path finder" or guide for an approved topic of their own choosing.

LAW 8643T Advanced Legal Research: Transactional Law Credits: 1-2

Prepares students who wish to focus on transactional law. The course is also intended to facilitate research for the student's legal research and writing requirement, although it does not satisfy the writing requirement. The course will refresh and refine research skills, help students to think systemically about legal research, and familiarize students with applicable resources relevant to transactional law including business organizations, tax, pension, labor and employment, competitive business intelligence, real estate, securities, sale of businesses, etc. As the final project, students will have the opportunity to develop an in-depth research "path finder" or guide for an approved topic of their own choosing.

LAW 8650 Race and the Law Seminar Credits: 1-3

In-depth examination of the role that race plays in American society as a whole and in judicial decision-making in particular. Course will examine the effect of race on various areas of the law, including torts, contracts, property, criminal law, and criminal procedure. Course will also examine the effect of race on jury decisions and explore the concept of implicit bias. Research paper.

LAW 8656 Public Defender Trials Internship Credits: 3-6

Public Defender Law Interns assist in the defense of indigent criminal defendants. Each intern is assigned to a single public defender to allow the intern to observe the life and practice of a public defender, including direct engagement with client (fact development and defense strategy), case file analysis, research, drafting, and exposure to all stages of court proceedings. This is a two-semester internship providing a progression of skill building. Students eligible for Rule 13 student practice authorization may present directly in court.

Co-requisites: LAW 8749.

LAW 8656A Missouri Attorney General's Office Internship Credits: 3-6

Law Interns work side by side with Assistant Attorneys General in the Kansas City regional office representing the State of Missouri in civil or criminal proceedings. Law Interns may be placed in one or more of the divisions of the AG's office: financial services, litigation, labor, consumer protection, public safety, or governmental affairs. Students eligible for Rule 13 student practice authorization may present directly in court. Students may appear in Jackson, Clay, Platte, and/or Cass Counties.

Co-requisites: LAW 8749.

LAW 8656C Jackson County Prosecutor Internship-Family Law Prosecution Credits: 1-3

Family Law Prosecution Interns assist Jackson County Prosecutor's Office, Child Support Division, in prosecuting cases involving paternity establishment and child support. The internship provides formalized instruction, and individual mentoring and supervision from assistant prosecutors.

Co-requisites: LAW 8749.

LAW 8656F Federal Public Defender Internship Credits: 3-6

Federal Defender Interns work in the Federal Public Defender's Office, under attorney supervision to engage with clients; undertake legal research; draft memoranda, motions and briefs; observe and participate in trials, pre-trial hearings and motion hearings; and assist, in general, with litigation.

Co-requisites: LAW 8749.

LAW 8656P Jackson County Prosecutor Internship Credits: 3-6

Law Interns work with attorneys of the Jackson County Prosecuting Attorney's Office in downtown Kansas City and Independence offices. Interns are assigned to specific units: General Crimes, Violent Crimes, Sexual Violence, Warrant Desk, or Independence Office. The internship provides practical experience, courtroom exposure, and an introduction to prosecution hearings and trials. The internship is a two-semester progression of fieldwork allowing students opportunity to build skills and confidence. Students eligible for Rule 13 student practice authorization may present directly in court.

Co-requisites: LAW 8749.

LAW 8662 Federal Court Internship Credits: 2-6

Federal Court Interns serve in a clerkship with a judge or magistrate in a federal court, principally in the Western District of Missouri. Students may also intern with federal judges in different states, with approval of the faculty director of the field placement program. Students generally undertake research, draft memoranda and other documents, observe court, and debrief with judges and clerks regarding the legal issues and lawyering styles in the matters before the court.

Prerequisites: LAW 8522.

Co-requisites: LAW 8749.

LAW 8662F Family Court Internship Credits: 2-6

Family Court Interns serve in the chambers of Family Law judges and commissioners and observe mediation, conciliation, adult abuse docket, and cross-court visits. The internship offers students an opportunity to gain practical legal skills, learn about the programs ordered by the judges to assist families in crisis, and develop a working knowledge of the Family Court Division. Family Court judges hear a wide range of matter concerning families, marriage, and children, including marriage (dissolution, annulments, maintenance), child custody, paternity, child support, adult abuse, juvenile delinquency, adoptions, and guardianships.

Prerequisites: LAW 8521, LAW 8522; LAW 8751 (completed or currently enrolled).

LAW 8662M Missouri Court of Appeals Internship Credits: 2-6

Appellate Court Interns work in the chambers of a Missouri Court of Appeals Judge. Students generally undertake research, draft memoranda, and produce substantial written work under the supervision of the judge or the judge's clerks. They also observe various proceedings (both in chambers and in the courtroom) and interact with the judges, their clerks, and court staff. Students debrief with judges and clerks regarding the legal issues and lawyering styles of the matters and advocates before the court.

Co-requisites: LAW 8749.

LAW 8665A Animal Law Credits: 2

This course will begin with a brief overview of the philosophical and cultural issues underlying human/animal relationships, including basic theories of the legal systems's responses to social change. Legal issues relating to food animals, companion animals, laboratory animals, wild animals, and performing animals will be examined with reference to: (1) federal statutes (Animal Welfare Act, Endangered Species Act, Marine Mammal Protection Act, Wild Horses and Burros Act, Animal Damage Control Act, National Wildlife Refuge System Administration Act, Refuge Recreation Act, National Environment Police Act, and Humane Slaughter Act); (2) state statutes (anti-cruelty, wills and trusts, hunting, racing and fighting statutes); (3) local animal control regulations; and (4) extensive common law (standing, rights, free exercise of religion, property, landlord-tenant disputes, torts, marital dissolution and custody, and bailment).

LAW 8700 Trial Advocacy I Credits: 2

A practical skills course in advocacy which introduces students to the fundamental components of a typical civil and criminal trial and requires students to perform exercises involving each component and try a mock civil or criminal case from provided problem materials.

Co-requisites: LAW 8621.

LAW 8700C Drafting Civil Jury Instructions Credits: 1-2

Covering the essential skills in drafting appropriate civil jury instructions and preserving objections for appeal in civil cases. This is a "skills course" in which students learn the fundamentals of drafting and arguing civil jury instructions.

LAW 8700D Taking and Defending Depositions Credits: 1-2

introduces the fundamentals of depositions, concluding with a mock deposition. Topical coverage includes: what is a deposition and what is the purpose of depositions; who may be deposed and when; deposition questioning; using exhibits; objections; preparing for the deposition; and producing a witness for deposition. Each student will take and/or defend a mock deposition.

LAW 8701 International Study Exchange Credits: 1-15

Semester study at foreign law school.

Prerequisites: by permission.

LAW 8702 Conflict of Laws Credits: 1-3

Domicile; jurisdiction and limitations on the exercise of jurisdiction; judgments; full faith and credit; choice of law; conflicts problems in federal and international settings; conflicts problems in selected areas.

Prerequisites: LAW 8521.

LAW 8703 Trial Advocacy II Credits: 2-3

A practical skills course in the art of trial advocacy with an emphasis on technique, style, and methods of persuasion. During class sessions, students perform exercises involving the various stages of a law suit, and are critiqued on their performances. Following performance of the exercises, students are divided into teams and try a mock case in a trial competition, from which the Law School's National Trial Competition Teams are selected. The trials are evaluated by trial lawyers and federal or state judges. Limited enrollment.

Prerequisites: LAW 8700.

LAW 8704A Lawyering Skills Competition-Appellate Credits: 1-4

This course is limited to students who represent the law school in faculty supervised regional, national or international lawyering skills competitions. These competitions require application of lawyering skills in a range of substantive law areas and intensive practice of lawyering skills, judged by faculty and practitioners in the field. Students enrolled in this course will be representing the school in various moot court appellate advocacy competitions. Students will research and draft briefs or equivalent advocacy documents, develop oral arguments, conduct practice oral arguments before a range of student, faculty, and practitioner judges, and represent the law school in regional national or international competitions.

LAW 8704C Lawyering Skills Competition-Client Counseling Team Credits: 1-2

The course is limited to students who represent the law school in faculty supervised regional, national or international lawyering skills competitions. Students enrolled in this course will be representing the school in the client counseling competitions. Students will research a problem from a range of areas of law and develop problem solving and client counseling strategies and documents and conduct mock client interviews.

LAW 8704I Lawyering Skills Competition Credits: 1-2

This course provides an overview of international commercial arbitration and focuses with more specifically on international investment protection law and bilateral investment treaty provisions. The course will provide preparation for the International LL.M. Commercial Arbitration Competition, but it is open to J.D. students.

LAW 8704N Lawyer Skills Competition-Negotiation Team Credits: 1-2

The course is limited to students who represent the law school in faculty supervised regional, national and international lawyering skills competitions. Students enrolled in this course will be representing the school in various negotiation competitions. Students will research a problem from a range of law and develop negotiation strategies and documents and conduct mock negotiations.

LAW 8704T Lawyer Skills Competition-Transactional Practice Teams Credits: 1-2

The course is limited to students who represent the law school in faculty supervised regional, national or international lawyering skills competition. Students enrolled in this course will be representing the school in various negotiation competitions and meets. Students will research a problem involving business transactions or tax and prepare analysis and problem solving strategies.

LAW 8705 Trial Advocacy III Credits: 2

Students, under the supervision of trial advocacy faculty, participate in trial competitions. Enrollment by invitation only.

Prerequisites: LAW 8700, LAW 8703.

LAW 8705I Comparative Advocacy in Ireland Credit: 1

This course will look into the comparative role of Advocacy both in the courtroom and the boardroom for European and U.S. systems. The course will introduce students to a comparative look at the basic structure and legal systems in Ireland and the US. The field of Advocacy is rapidly expanding as evidenced by the adoption of affirmative advocacy programs in Ireland as well as the U.S. An example of the topics covered include: A comparative overview of the Barrister/Solicitor and U.S. systems of justice. The students will be introduced to "access to justice" which is a comparative look at European and US approaches. The course will also focus on the prosecutions under both the European and US systems as well as a discussion of the influence of crimes on international trade, business and a comparative look at the role of advocacy in those systems. Students will be exposed to advocacy for persons with disabilities that include a comparative look at the Ireland and US systems with resulting effects on business and trade. Finally the course will involve review and discussion of the global considerations for Advocacy.

Prerequisites: Part of the Ireland Law Program.

LAW 8706 Class Actions and Multidistrict Litigation Credits: 2-3

As related to litigation of complex cases, study of special issues of party joinder and intervention, class action requirements and limitations, discovery, case management, and estoppel by verdict or judgment.

Prerequisites: LAW 8521, LAW 8522.

LAW 8707A Advanced Legal Writing: Practical Skills Development Credits: 2-3

Preparation of students for writing problems commonly encountered in the first two years of law practice: jury instructions, general correspondence, opinion letters, simple contracts, litigation motions and pleadings including a complaint, answer and some discovery documents. Individual feedback provided.

LAW 8707B Advanced Legal Writing: Business Contract Drafting Credits: 3

Preparation of transactional documents including, for example, confidentiality agreements, consulting agreements, employment agreements, technology licensing agreements.

Prerequisites: LAW 8501, LAW 8502, LAW 8601.

LAW 8707C Advanced Legal Writing: Litigation Drafting Credits: 2-3

Preparation of litigation documents and pleadings, including complaint or petition; cross-claim, counterclaim or third-party petition; answer; discovery documents such as a set of interrogatories or requests to admit; dispositive motions; and settlement agreements.

Prerequisites: LAW 8521, LAW 8522.

LAW 8707E Advanced Legal Writing: Scholarly Writing Credit: 1

Preparation of students for scholarly writing including independent study, law review, and seminar papers. Focus will be on topic identification and refinement; developing a thesis; research strategies including reiterative and mediated searching, systemic evaluation of resources, problem typing and solving, and resources for specific topics in the law; proper attribution and use of authority; developing a working draft; and creating a balanced, thorough, and carefully reasoned and supported analysis.

LAW 8707F Advanced Legal Writing: Appellate Brief Writing Credit: 1

Preparation of federal and state court appellate briefs, including the jurisdictional statement; statement of the case; statement of facts; points relied on; statement of the issues presented; summary of the argument; argument; and responses and replies to arguments. Prepares students to outline and organize arguments; edit and revise written work; and finalize an appellate brief.

LAW 8707G Advanced Legal Writing: Compliance Drafting Credits: 1-2

This course provides students the opportunity to prepare compliance-related documents to support businesses in highly-regulated industries like health care, higher education, and business and financial institutions. The course will include an overview of the current compliance landscape both domestically and internationally. Classes will include discussions of applicable laws and regulations governing corporate behavior. Students will draft a portfolio of documents—e.g., policies and procedures; codes of conduct—common to corporate compliance programs. Recommended preparation: LAW 8764, LAW 8731.

Prerequisites: LAW 8531, LAW 8532.

LAW 8707J Advanced Legal Writing: Compliance Drafting Credits: 3

Preparation of compliance-related documents to support businesses in highly-regulated industries like health care, higher education, and business and financial institutions. Drafting a portfolio of documents—e.g., policies and procedures; codes of conduct—common to corporate compliance programs.

Prerequisites: LAW 8531 Lawyering Skills 1; LAW 8532 Lawyering Skills 2

LAW 8707R Advanced Legal Research Administrative Regulations/Legislative History Credit: 1**LAW 8708 Master Clinical Advocacy Course Credits: 3-4**

This semester-long intensive course will introduce students to the law, advocacy and execution of trial strategy in active litigation. The course will function as a unique clinical course, with a law school professor and local counsel serving as the supervising attorneys. The professor will select an active case in local litigation, preferably in its early stages. The students will be responsible, with supervision, for all areas of the litigation process from drafting pleadings, motions, discovery and taking and attending depositions and trial.

LAW 8710 Lawyering Skills Teaching Assistant Methods Credits: 1-3

Legal analysis, research and writing; instruction and discussion of the research and writing process and related topics in legal method and legal education; supervised production of an expository writing, advocacy writing and scholarly writing; development of research and writing exercises for use in the first-year Legal Writing Program and service as Teaching Assistants in the Program; limited enrollment.

LAW 8710B Legal Analysis & Methods Credits: 2

Preparation of students for the bar review and exam process with a focus on improving analytical skills to approach and do well on practice bar exam questions, including essay, multiple-choice, and performance questions. The course will cover specific topics tested on the bar exam with additional emphasis on refining memorization skills and learning how to self-assess understanding of concepts.

LAW 8711 Remedies Credits: 2-3

Remedies for violation of legally protected interests; history and development of equity jurisdiction and modern equity practice; injunctions; declaratory judgments; rescission; reformation; restitution; contempt; damages.

Prerequisites: LAW 8521.

LAW 8712 Problems And Issues In The Death Penalty Credits: 1-2

Issues and problems in the administration of the death penalty; the Missouri capital sentencing scheme; constitutional limitations, statutory schemes, state review systems, procedural matters and collateral review of death sentences.

LAW 8713 Death Penalty Clinic Credits: 1-2

The post-conviction process of collateral review in death penalty cases; training in legal representation of the postconviction petitioner.

Co-requisites: LAW 8712.

LAW 8713C Capital Punishment in the Modern World: Constitutional & Human Rights Perspectives Credit: 1

A consideration of problems and issues in the death penalty, including the following topics: the historical and constitutional perspectives on the death penalty; the practical application of the death penalty in the United States; capital punishment and human dignity; and the future of capital punishment

LAW 8713P Wrongful Convictions Clinic Credits: 1-6

Students, under supervision, provide investigate and legal assistance to prisoners with persuasive actual innocence claims. Students meet weekly with the director of the program for training and evaluation. Assigned tasks depend on the needs of the Innocence Project, and may include interviewing potential clients, gathering records, investigating actual innocence claims, consulting with experts, drafting post-conviction and/or clemency pleadings, and appearing at court hearings. Clinical students work in conjunction with law and journalism students enrolled at the University of Missouri-Columbia. Limited enrollment (normally, 8 students).

Prerequisites: LAW 8634, LAW 8635, LAW 8635S.

LAW 8714 Gender and Justice Credits: 2-3

Students will examine and discuss legal issues of special importance to women. Topics will include (among others) sexual discrimination, sexual harassment, domestic violence, reproductive autonomy, and pornography. The course seeks to present each topic in its social context by supplementing legal readings with materials drawn from the social sciences, literature, and film. Paper required. Enrollment limited to fifteen students.

LAW 8715 Harry Potter and the Law Credit: 1

This course uses the narratives (stories) from the Harry Potter series to explore themes about the role of law and justice in society. The course is designed to help students become more familiar with narrative criticism and the use of narrative for persuasion.

LAW 8716 Cyberlaw Credits: 3

Survey of the areas of the law with existing or potential application to the internet and computers and how changes in the information environment affect law and its application. Areas of law include jurisdiction, contract law, intellectual property law, criminal law, and constitutional law.

LAW 8716C Cybercrime Credits: 1-4

Cyber threats are a global problem challenging all areas of business, and attorneys must be able to advise and defend clients from these threats. Criminal lawyers must be fluent in how new technologies work and how they impact investigations. In this course, students will learn how these new cyber threats and emerging technologies are challenging attorneys across the country. The course will prepare students to think as lawyers when confronting these threats. Course topics will include computer hacking, spamming, spear phishing, Internet fraud and social engineering, cyberstalking, and the rising use of computers and social media in violent crimes.

LAW 8720 Secured Transactions Credits: 3

Secured Transactions in personal property under Article 9 of the Uniform Commercial Code, function and form of a security agreement, process of perfecting a security interest, priority among unsecured parties; secured sales of goods under Article 2 of the Uniform Commercial Code.

LAW 8721 Commercial Transactions Credits: 3

This course offers a study of the Uniform Commercial Code provisions that deal with negotiable instruments (commercial paper)(Article 3), bank collections and deposits (Article 4), funds transfers (Article 4A), and letters of credit (Article 5), as well as the study of alternate payment systems (including electronic fund transfers, credit and debit card payments, and related federal law).

LAW 8723 Banking Law Seminar Credits: 2

Federal and state law governing banking activities; regulation of bank holding companies; formation of banks; the FDIC and FSLIC; interstate banking; deregulation of banking transactions; banking activities by non-banks; regulation of securities activities of banks. Paper required.

Prerequisites: LAW 8721.

LAW 8725 Water Law Credits: 2-3

Private acquisition of water rights through riparian ownership and prior appropriation; public rights to water existent in bed ownership easements and trusts; ground water management; water distribution organizations; federal allocation and control of water resources; interstate allocation.

LAW 8725E Energy Law Credits: 3

The course will deal with the legal, economic and environmental issues of energy production on federal lands and/or under federal jurisdiction. It will focus on a number of energy sources including: oil, coal, natural gas, oil shale, coal bed methane, geothermal, water, wind, and solar. It will also cover the special problems of hydraulic fracturing, air and water pollution, climate change spills, collapses, meltdowns and other disasters as well as liability for cleanup and reclamation.

LAW 8728 Law And The American Indian Credits: 2-3

An anthropological, historical and legal study of the American Indian, including a focus on American Indian traditional law and values, federal policy and current legal issues.

LAW 8729 Preservation Law Credits: 2-3

An exploration of the legal and economic issues impacting preservation of land, wilderness, buildings and archeological and historical sites, including a study of various federal and state preservation legislation, and private land use preservation measures.

LAW 8729C Cultural Preservation Law Credits: 3

This course will focus on Federal, State, and Local Law, directed at the preservation of Prehistoric, Historic, and Modern Culture. It will include sections on: The Values and Philosophy of Preservation, Archaeological Protection Law, the Native American Grave Protection and Reparation Law, Sacred Site Protection, Historic Protection in State and Local Government, the Takings Clause, Land trusts and Conservation Easements, Public-Private Partnerships and Modern Ethnic and Socio-economic Communities.

LAW 8730I Introduction to American Law & Culture Credits: 2-3

Introduction to the American legal system, including government structure, sources of law, common law development, and core substantive areas. Available to LL.M. International students only.

LAW 8731 Professional Responsibility Credits: 2

This course covers the Model Rules of Professional Conduct; role of the lawyer as a professional; confidentiality; conflict of interest; zeal within the bounds of the law; competency; providing legal services. The course explores the meaning of professional judgment and client-centered lawyering.

LAW 8731E Professional Responsibility in Context: Environmental and Resource Law Credits: 2

Covering the law governing lawyers and professional responsibility, setting the perspective and context in the practice of environmental law and resource law. The central focus relates to understanding the role of the lawyer and professional responsibility. The experiential focus is to achieve this goal in a practice context of environment and natural resource law.

LAW 8732C Cross-Cultural Dispute Resolution Credits: 2-3

This course examines the impact of culture on the dispute resolution process. Cultural differences are most pronounced in the international arena, but are also seen in the domestic setting, especially in the US jurisdiction. Students will begin to develop a "cultural fluency" in their law and dispute resolution practice. The subject is timely, and discussion thereof will benefit especially international LLM students, and J.D. students with interests in alternative dispute resolution or international practice. Cross-cultural Dispute Resolution is a blend of both a "course" and a "seminar," as it includes lecture, skills discussion, small-group exercises, independent research and intensive writing. Successful completion of the required research paper will satisfy the research and writing requirement.

LAW 8732I Cross-cultural Business Negotiation Credits: 1-3

This course will introduce students to the foundations of negotiation with several opportunities to participate in negotiation simulations. Negotiation exercises will focus on international business transactions. To create opportunities for cross-cultural interaction and work experience, negotiation teams will, to the extent possible, pair American J.D. students with an international LL.M. students.

LAW 8732R Intro to the Resolution of International Commercial Disputes Credit: 1

This course will introduce students to international commercial dispute resolution. While all forms of dispute resolution will be considered, the course will focus on introducing the fundamentals of arbitration, the use of arbitration between European Union members to resolve commercial disputes, and the use of arbitration between EU members and non-member states to resolve commercial disputes.

LAW 8733 Children In The Law Credits: 2-3

The ways in which the legal system treats children differently from adults and the justifications for such treatment, who should make decisions for the child, decisional authority that should be granted to parents, children and the state in various contexts (e.g., abuse and neglect, health care for the child, foster care, adoption and education).

LAW 8733E Elder Law Credits: 2-3

A course providing a basic foundation for legal practice with older persons, including the following substantive topics: The Older Americans Act, the delivery of legal services to the elderly, ethical considerations, consumer protection, discrimination, Social Security and Supplementary Security Income, Medicare, Medicaid, capacity issues, guardianship and alternatives to guardianship, elder abuse and neglect, adult protective services, nursing homes, long term care, housing, healthcare decisions, end-of-life decisions, estate planning and grandparents' rights.

LAW 8733R Juvenile Offenders & The Law Credits: 2-3

An examination of our justice systems's historical treatment of juvenile delinquent and status offenders, and how the goals and objectives of the past have evolved into today's juvenile offender laws; the rights of juvenile offenders in contrast to those of adult criminals; pre-trial and trial procedural issues under the juvenile code; certification of the juvenile offender as an adult; dispositional/treatment alternatives for juvenile offenders; schools and the juvenile offender.

LAW 8734 Mediation Credits: 2

The process in which a neutral third party assists others in resolving a dispute or planning a transaction; introduction to the nature of the process, its possibilities and limitations, its current and future uses, and how lawyers can and should be involved in it; public policy and political issues surrounding the mediation movement; professional responsibility and malpractice.

LAW 8735 Seminar In Famous Trials Credits: 2-3

Historical and jurisprudential issues involved in a number of "political trials.

LAW 8735R Law Of The European Union (Part I) Credit: 1

An in-depth study of the legal and political framework and institutions of the European Union; the Commission, Council of Ministers, Court of Justice, Court of Auditors, and the European Parliament. Course will examine the interlocking web of European treaties, the expansion of the European Union, the European Union as a trade block and Ireland as a gateway to the European Union for non-bloc nations.

LAW 8736 Debtor-Creditor Rights Credits: 2-3

Creditors' remedies and debtors' rights; provisional remedies; secured transactions (Article 9 of the Uniform Commercial Code); liens and exemptions; overview of bankruptcy law.

LAW 8736M Introduction to Bankruptcy Concepts Credits: 1-2

The course will introduce basic bankruptcy concepts and processes, with a focus on issues that arise in Chapter 7 bankruptcy cases.

LAW 8737R Law Of The European Union (Part II) Credits: 2

An examination of the substantive and procedural law governing the member states of the European Community including such topics as the nature and application of European Union Law, the relationship between European Union and national laws, remedies in national courts, enforcement actions, damages and money claims, free movement of goods and workers competition laws, intellectual property, equal treatment of women and men, and non-discrimination.

LAW 8738 Immigration Law And Process Credits: 2-3

Admission, exclusion, deportation, and naturalization of aliens; structure and powers of relevant federal agencies; categories of immigrant and non-immigrant visas and visa application procedures; asylum, extradition, and refugee status; rights of aliens; public policy issues and proposals for reform; practical problems in immigration.

LAW 8738C Employer Immigration Compliance Plans, Policies & Procedures Credits: 1-2

A practical lawyering skills course in which students learn how to help employers comply with employer immigration compliance requirements in order to avoid possible non-compliance fines, forfeiture of business and personal assets, and jail terms. This course includes an overview of the applicable immigration law and instructs in such matters as corporate client interviewing; Form I-9 Employment Eligibility Form; E-Verify and FAR E-Verify for federal contractors; ICE Best Employment Practices, drafting employer immigration compliance plan, policies and procedures; I-9 Self-Audits, and defending a corporate client in I-9 inspections/investigations by ICE/DHS.

LAW 8738P Immigration Law and Policy Credits: 2-3

A focus on the historical development of immigration law in the United States and fundamental questions of immigration policy. Immigration bills in Congress have been the subject of heated debate, particularly in recent years. This course provides a historical, statutory, and theoretical background for evaluating such proposals. Students will evaluate proposed federal and state legislation across the country and immigration reforms in foreign countries. Particular emphasis will be placed on post-9/11 reforms and the relationship between immigration law and the war on terrorism. The subject matter is useful for the student who intends to practice immigration law, as well as for the non-specialist interested in Immigration law as a policy matter.

LAW 8738R Chinese Law Credits: 4.5

A summer abroad program in Chinese law taught at the University of Peking, Peoples Republic of China by Chinese Professors. Subjects include such topics as: Cultural History and Political Systems of China, Organization of the Chinese Legal System, Chinese Contract Law, Civil Law, Trial Practice Rules of Evidence, Criminal Law Procedure, Family Law, Human Rights Issues, Business Organizations, Taxation, Intellectual Property Law, Banking and Finance, Real Estate Law, Investment Law Practice in China, and Alternative Dispute Resolution.

LAW 8738V Immigration Law & The Violence Against Women Act Credit: 1

A practical lawyering skills course in which students learn how to help abused immigrant women and children to apply for permanent residence in the United States, and how to help victims of violent crimes to apply for legal status. The course includes a short overview of the applicable immigration law and instructs in such matters as client interviewing; analysis of cases; working with victim advocates and experts; drafting affidavits, evidence indexes, petitions, motions and supporting documents; preparation of checklists for clients, case flowcharts, and case timelines; the review and development of evidence; and the drafting of letters to clients and the government.

LAW 8740A Missouri Appellate Procedure Credits: 1-2

Practical application of Missouri appellate procedure rules: appellate jurisdiction, what is appealable and when, appellate case process and the interplay between statutes, Missouri Court Rules and Missouri case law with regard to appellate issues.

Prerequisites: Law 8522 Civil Procedure II.

LAW 8740M Missouri Civil Procedure Credits: 2-3

Selected problems in Missouri civil procedure under Missouri statute and rules. Topics may include venue and personal jurisdiction, pleading and motion practice rules on joinder of parties and claims, statutes of limitation, trial procedure, post-trial motions appellate procedure, discovery, and preclusion.

LAW 8743 Global Legal Systems Credits: 1-3

A study of different legal traditions and systems, mainly within the Civil and the Common Law traditions, focusing on each tradition's history, legal structures, legal actors, procedures, and sources of law. Non-Western Legal traditions such as Islamic, Jewish, Hindu and Indigenous Law may also be considered, time permitting.

LAW 8743C Comparative Criminal Law Credit: 1

A comparative analysis of criminal law jurisprudence in the United States and Europe (especially Ireland and the United Kingdom) with respect to the exclusionary rule, the death penalty, the jury system and the reintegration of ex-offenders into society.

LAW 8743I Ireland Program: Selected Topics in Comparative Law Credits: 1-2

This course addresses a focused area of law from a comparative perspectives of United States, Ireland, and/or EU legal systems.

Prerequisites: part of Ireland Study Abroad Program

LAW 8743L Comparative Health Law Credit: 1

An examination of how the legal systems of several other nations address particular aspects of health law. Specifically, the focus of this course is on patent rights with respect to the health care they receive. This will include, for example, consideration of patient rights when the care received has caused injury due to professional negligence. If time permits, it will also look at how other legal systems address the controversial issues surrounding the "right to die" as well as assisted suicide and euthanasia.

LAW 8745 Law Review Credits: 1-4

Editorial work in connection with the "UMKC Law Review." Open to students selected on basis of scholarship. Ungraded.

LAW 8745R Law Review Board Credits: 1-5

The members of the Law Review Editorial Board edit articles and student notes and comments for publication in the University of Missouri Kansas City Law Review; and shepherd the articles and student pieces through the production process.

LAW 8746 Research & Writing Requirement Credits: 2

Completion of a paper of publishable quality, demonstrating intensive research and analysis under faculty supervision.

LAW 8746C Court Internship Credits: 3-6

Judicial Interns serve in a clerkship with a judge, magistrate, commissioner, or other judicial officer in a state court. Students generally undertake research, draft memoranda, observe hearings and other judicial proceedings, and debrief with judges and clerks regarding the legal issues and lawyering styles in the matters before the court.

Co-requisites: LAW 8749.

LAW 8746I Internship-Estate Planning Credits: 2-6

Estate Planning Interns are mentored by an attorney with an estates law practice, in a private firm or trust company. Law Interns undertake assignments such as review and analysis of estate planning documents, draft provisions for such documents or probate court filings, and/or conduct legal research. The objective of this internship is to expose student to the estate planning law practice.

Prerequisites: LAW 8611 AND LAW 8552.

Co-requisites: LAW 8749.

LAW 8746R Independent Study Credits: 1-3

Independent study, including research and writing projects, under faculty supervision.

LAW 8746W Introduction to Workers' Compensation Law and Practice Credits: 1-2

An introduction to the general history and purpose of the workers' compensation laws with a particular emphasis on Missouri law. Students will be presented with and guided through actual workers' compensation problems which will introduce them to the practical aspects of the practice in this specialized area. With permission from Jefferson City and the Department of Labor and Industrial Relations, the students will be exposed to actual workers' compensation hearings, mediations and other courtroom practices held at the law school and presided over by an Administrative Law Judge.

LAW 8747 Introduction to Appellate Advocacy Credit: 1

Preparation of memorandum (points relied on and summary of argument); presentation of two arguments before practicing attorneys.

LAW 8748 Appellate Advocacy - Ellison Moot Court Competition Credits: 2

Ellison Moot Court Competition; preparation of an appellate brief and presentation of two oral arguments before federal and state judges. Open to the 16 finalists from Appellate Advocacy II. Ungraded.

Prerequisites: 8747 Intro to Appellate Advocacy.

LAW 8749 Field Placement Seminar: Learning from Practice Credits: 1-2

Learning from Practice (LFP) is a seminar (tied to a field placement). The seminar will explore dimensions of professional development of an effective lawyer, including the capacity for reflection, deliberate skill acquisition, and ability to form meaningful professional relationships. Each LFP section has a different focus, but all are designed to complement and provide deeper context to the law interns' fieldwork. One LFP seminar, focused on attorney ethics and values, is catalogued under Professional Responsibility (LAW 8731). It covers the Model Rules of Professional Conduct and explores the dimensions of client-centered lawyering.

Prerequisites: Completion of 30 credit hours toward JD.

Co-requisites: Any field placement course.

LAW 8750C City of Kansas City Municipal Internship Credits: 1-6

City Law Interns work in the Law Department of the City of Kansas City, in municipal court litigation, legal advising, and legal aspects of policy development. Intern assignments include litigation and non-litigation based research and drafting. In litigation context, law interns draft briefs, conduct discovery and case file analysis, and prepare witnesses, and other aspects of trial preparation.

Co-requisites: LAW 8749.

LAW 8751 Family Law Credits: 3

Pre-marital contracts; marriage; annulment; paternity; parent and child; divorce; alimony; division of property; separation agreements; adoption.

LAW 8751F Family Law & Film Credit: 1

An exploration of the function of family law and lawyers in society by examining legal decisions, statutes and legal commentaries in the context of films, including classic, contemporary mainstream, foreign, documentary and independent films. The seminar entails participants viewing a film followed by discussion. During the discussion session students will critique the film in light of assigned reading materials. Using films as analytical tools, the seminar examines the ways in which pop culture products (such as film and television) both reflect and change the social views about family law and lawyers. A pass/fail course.

LAW 8751S Family Violence Credits: 2-3

An in-depth examination of family violence from a legal perspective. Course topics will include interdisciplinary study of the dynamics and psychology of family violence, of historical and social policies, specialized problems of family violence (including intimate partner violence, child abuse and neglect, gay and lesbian battering, and elder abuse) and legal responses. Students will receive practical training in safety planning, intake, review of community resources, case logistics, and advocacy for temporary orders.

LAW 8752G Guardian Ad Litem Workshop Credits: 2

Advanced study of guardian ad litem practice. (GAL). Topics may include adult and child orders of protection, requirements for guardian ad litem appointments, role of the GAL, ethical considerations, working with social workers and other professionals, and best practices in investigation, recommendation, and representation. Students will partner with volunteer attorneys to act as guardians ad litem in order of protection cases.

Prerequisites: Rule 13 certification.

LAW 8752R Family Law Practice Credits: 2

A practical skills course in family law in which students participate in all phases of family law practice, including the initial client interview; the drafting of questionnaires, pleadings, motions custody and discovery plans, support and maintenance proposals, orders and other documents; negotiation, and preparation for litigation. Students work in teams and perform exercises which simulate "real world" situations.

Prerequisites: LAW 8751.

LAW 8752S Child & Family Services Clinic Credits: 1-6

Students represent the clients in obtaining legal rights to custody of children who are currently in foster care or otherwise under the authority of the Department. Students work under the supervision and direction of clinic faculty and faculty directors, receiving classroom instruction in the substantive law and procedure governing juvenile court actions.

Prerequisites: Rule 13 certification.

LAW 8753 International Law Credits: 2-3

Survey of international legal studies; nature and role of international law, its effectiveness in dealing with international problems and its application in domestic jurisdictions.

LAW 8754 International Business Transactions Credits: 2-3

Legal problems encountered in international business; jurisdiction and choice of law; enforcement of judgments; methods of protecting foreign investments; extra-territorial application of United States regulations, e.g. anti-trust law.

LAW 8757 Business Planning Credits: 2-3

Problem-method study of choice of entity and various other legal issues and planning challenges in forming a closely held business entity and in private and public financing of an existing enterprise. The course includes practical training from drafting organizational documents to conducting simulated client interviews and providing written advice concerning hypothetical transaction. Limited enrollment.

LAW 8757L Special Topics In Entrepreneurial Lawyering Credits: 2

Examination of issues related to ethical and effective management and marketing of law practice, emphasizing solo and small firm practice. Topics will vary from year to year, but will generally address issues such as forms of practice, dissolution of practice, practice management systems (including technology assistance), human resources management, advertisement and solicitation, insurance and malpractice.

LAW 8757N Entrepreneurship & New Venture Creation Credits: 3

Jointly-taught by Law School and Bloch (Business) School faculty, this interdisciplinary course provides education in entrepreneurship to a combined class of students from law, business, engineering and perhaps other graduate-level disciplines. Using a combination of readings lectures, electronic blackboard discussions, team business planning projects and presentations, and individual presentations on selected topics, the Course is designed, from a law student's perspective, to both (1) familiarize the student with substantive knowledge of issues from multiple disciplines involved in creating a new venture to commercialize technology and (2) train law students in techniques designed to effectively communicate and resolve legal issues inherent in such projects in a collaborative manner with clients and their advisors from other disciplines.

LAW 8757R Entrepreneurial Law & Practice Clinic Credits: 2

Under faculty supervision, students will counsel start-up companies and their owners and implement business planning advice by drafting articles of incorporation and organization, by-laws, partnership agreements and other business contracts. Other business-related matters ranging from regulatory, consumer, licensing, and taxation requirements; copyrights, trademark, and patent creation; and 501(C)(3) applications for non-profits may also be covered in this course. Clinic students will also receive classroom instruction in the areas of client counseling and business planning and drafting of business documents.

Prerequisites: LAW 8601 and LAW 8552.

LAW 8757V Social Entrepreneurship Ventures Credit: 1**LAW 8758S Securities Regulation Credits: 2-3**

Problem and policy method study of the Securities Act of 1933 and selected aspects of the Securities Exchange Act of 1934; financing of an enterprise; reorganizations; tender offers; proxy regulation; and securities fraud claims.

LAW 8760 Insurance Credits: 2

Life, fire, accident, and liability insurance; nature of insurance; nature of insurance contract; special rules of construction; standard policy provisions; regulation of insurance industry.

LAW 8761M Law, Medicine & Bioethics Credits: 2-3

A study of bioethics and selected legal and ethical issues in medicine with focus on decision-making at the beginning and end of life; reproductive rights and assisted reproductive technologies; the patient-provider relationship (fiduciary, treatment, confidentiality, and disclosure obligations); physician obligations of informed consent and patient care issues; potential hospital and physician liability for medical malpractice; and end of life decision-making (withdrawal and refusal of life sustaining treatment by individuals and their surrogates) and physician-assisted suicide.

LAW 8762 Personal Injury Tort Practice And Procedure Credits: 1-3

Advanced treatment of law of negligence; right of recovery and defenses; practice and procedure in negligence cases, including case intake, pre-discovery investigation, settlement demand packages and other communications with opposing counsel, injury petitions, initial discovery, depositions, retention of experts, pre-trial motions, and mediation.

Prerequisites: LAW 8521, LAW 8522, LAW 8511, LAW 8531 LAW 8532.

LAW 8763 Labor Law Credits: 2-3

Regulation of labor relations pursuant to the national Labor Relations Act, focusing on the establishment of collective bargaining relationships, unfair labor practices, collective bargaining, strikes, picketing and pre-emption.

LAW 8764 Administrative Law Credits: 1-3

Introduction to the administrative process; role, function, and processes of administrative agencies; policy issues of administrative government; judicial review.

LAW 8765 Federal Jurisdiction Credits: 2-3

Federal court system and jurisdiction of the federal courts; diversity of citizenship; removal of cases from state to federal courts; conflicts between state and federal judicial systems; original and appellate jurisdiction of the Supreme Court.

Prerequisites: LAW 8521.

LAW 8766 Land Use Law Credits: 2-3

Legal and administrative aspects of land use and the problems and techniques of urban planning; statutory anti-nuisance devices; controlling land use by private methods (restrictive covenants, easements, and servitudes); zoning; subdivision controls; public acquisition of land; building and housing; urban renewal and redevelopment; environmental quality control (air, water, and conservation); relationship of lawyers, planners, private builders, and owners to governmental policies.

LAW 8767 Land Title Clinic Credits: 1-6

Under supervision, students provide legal assistance to The Land Bank to bring quiet title actions and pursue other legal strategies necessary to return vacant and abandoned properties to productive use.

Prerequisites: Rule 13 eligibility.

LAW 8768R Department of Labor Internship Credits: 3-6

Department of Labor Law Interns assist agency attorneys in the Regional Solicitor's Office of the United States Department of Labor enforcing federal labor statutes, including the Fair Labor Standards Act, Occupational Safety and Health Act, and Office of Federal Contract Compliance Programs, among others. Students undertake legal research, draft discovery requests, review and analyze evidence, participate in client and staff conferences related to enforcement strategy, and assisting enforcement personnel in investigations.

Co-requisites: LAW 8749.

LAW 8769 Law & Poverty Credits: 1-3

Selected problems arising out of the relation of the law to the poor and its effect upon the individual and the family structure; income maintenance (e.g., welfare, social security); discrimination in employment and housing; delivery of professional services (legal, health); administrative and judicial remedies.

LAW 8770 State And Local Government Law Credits: 2-3

Structure, powers, and divisions of local governments in metropolitan areas; role and powers of cities, counties, towns, school and special districts; decentralized and neighborhood governmental units and other local governmental units; legislative, home-rule, and constitutional sources of power; sovereign immunity; boundary adjustments; public employee relations; citizen participation; reapportionment; licensing and permits; ethics and public access to records; regional governance; intergovernmental cooperation; interstate compacts and authorities; function of local government with reference to solution of problems created by urban growth; role of judicial, administrative, and political processes.

LAW 8771 Public Finance Credits: 2-3

Fiscal, economic, and taxation problems and powers of local government in metropolitan areas; constitutional limitations; spending and public finance; property taxes; special assessments and exactions; interstate tax acts; local income taxes; debt financing; debt adjustment; public expenditures and contracts; financing education.

LAW 8773 Environmental Law Credits: 2-3

This course covers law developed to control pollution and to protect our country's physical environment. The course provides introductions to ecological theories and to early common law efforts to protect the environment. But the course mainly focuses on current environmental statutes (for instance, the Superfund Act, the Resource Conservation and Recovery Act, the Clean Air Act, and the Clean Water Act) and on current federal constitutional issues involving the environment. (Priorities in this mix may vary from year to year, depending on current events and related course offerings). Enforcement policies, citizen activism the needs of private industry, and the administrative process are also considered.

LAW 8773C Environmental Compliance Auditing and Permitting Credits: 3

This course provides students with an overview of the key federal environmental statutes and their inter-relationships, including consideration of the Clean Water Act, the Clean Air Act, the Emergency Planning and Community Right to Know Act and the Resource Conservation and Recovery Act. Students will learn about inspections, enforcement and liability; environmental management systems and auditing; and generally, how Congress and the EPA formulate environmental laws and regulations and about the roles in the process of the legislature, the regulators, the regulated communities, citizens and public interest groups.

LAW 8773N Negotiating SuperFund Settlements Credits: 1-2

This course will engage students in the simulated resolution of one or more Superfund cases, with a particular focus on the skills required for negotiated resolution of these matters.

LAW 8773R Environmental Law Internship Credits: 3-6

Environmental Law Interns work with attorneys in government agencies, such as the U.S. Environmental Protection Agency or non-profit organizations focused on environmental protection, resource conservation, public health and related issues. The nature of the lawyering assignments will vary with the host office.

Co-requisites: LAW 8749.

LAW 8774 Citizen Suits under the Endangered Species Act Credit: 1

This course will cover the citizen suit provision of the federal Endangered Species Act, walk-through an example case from initiation to settlement, and consider possible reform to meet the goals of the statute.

Prerequisites: LAW 8521 LAW 8522.

LAW 8775 Appellate Advocacy National Moot Court Competition Credits: 1-2

Participation on National Moot Court competition team. Ungraded.

Prerequisites: LAW 8748, Ellison Moot Court Competition.

LAW 8778 American Academy Matrimonial Lawyers Board Credits: 2

Under direction of professor, students provide editorial assistance in publishing Journal of the American Academy of Matrimonial Lawyers, write a paper on selected topics and prepare summaries and bibliography of current works. Limited enrollment.

LAW 8783 Federal Public Land & Resource Law Credits: 2-3

Exploitation and conservation of natural resources; management of federal lands; water law; energy law; federal wildlife preservation; resolution of disputes involving use of natural resources.

LAW 8783B Buffalo National River: Issues in National Park Law & Management Credit: 1

Specialized study of topics in natural resources law as it relates to the Buffalo National River in northern Arkansas. Students will explore the history of the Buffalo River; the state and federal laws in operation governing the park (e.g., the wild and scenic rivers act, the endangered species act, national historic preservation, etc.); and planning and management issues presented by the multiple uses of the area and its surroundings.

LAW 8783P Preservation of Land & Natural Resources Credits: 2-3

This course will provide a survey of the law and policy of land and natural resource management, with an emphasis on preservation, conservation and sustainability.

LAW 8790 Legal Aid Internship Credits: 3-6

Legal Aid Interns are assigned to one of the practice groups in Legal Aid, focused on legal issues of people with limited means (housing (public and private), consumer protection, community development, government benefits, family law, municipal criminal defense). Principally, students work in one of the Kansas City offices, but may also intern in other offices in Missouri or another state, with approval of the faculty director of the field placement program. Students eligible for Rule 13 student practice authorization may present directly in court.

Co-requisites: LAW 8749.

LAW 8791 Civil Rights Credits: 2-3

Elements of a Section 1983 case, enforceable rights and available defenses; procedural aspects of civil rights cases; suits against federal and state governments.

Prerequisites: LAW 8631.

LAW 8793A Health Law I: Liability and Quality Issues in Health Care Credits: 2-3

Health Law I: Liability and Quality Issues in Health Care

LAW 8793B Health Law II: Regulation, Organization and Finance Credits: 2-3

Health Law II: Regulation, Organization and Finance

LAW 8796 Economics And The Law Credits: 2-3

Tools of economic analysis which have particular application in the law; equity and efficiency are weighed in regulation, pollution, discrimination, monopoly, financial markets, human resources and government expenditure and taxation policy. Principles will be introduced and expanded upon using both lecture and case study techniques.

LAW 8797 Business Torts and Unfair Competition Credits: 2-3

The common law applicable to relations between businesses that compete against each other or that cooperate with each other in the production and distribution of the same product. Tort, contract and property law principles as remedies not available in parallel statutory schemes, such as the antitrust or patent laws. Statutes that codify the common law or create statutory procedures or remedies for common law rights.

LAW 8798 Copyright Law Credits: 2-3

Surveys when copyright protections are extended, the exclusive rights included in copyright, and the limitations of those rights. Additional consideration is given to third-party liability, the challenges of digital technologies, and protections afforded by the Digital Millennium Copyright Act.

LAW 8798A Art Law Credits: 2-3

This course examines several key topics related to the protection of visual arts, including copyright and moral rights and their intersection with First Amendment protection.

LAW 8800 Legal Research Thesis Credits: 1-8

Research for LL.M. thesis.

LAW 8808 Intellectual Property Law Credits: 2-3

Substantive and procedural law of intellectual property. Coverage includes copyrights and patents and other areas at the option of the instructor.

LAW 8808I International Intellectual Property Credit: 1

This course focuses on the main principles of protection and obligations of the signatories to the World Trade Organization Trade Related Intellectual Property Agreement (GATT/TRIP's) - in particular focusing on the main intellectual property and Industrial property rights, including (1) Copyright, (2) Performers Rights, (3) Patents, (4) Trade Marks, and (5) Related rights such as unfair competition and the protection of geographical indications; and addresses what the obligations are that are imposed on signatories in respect of protection and enforcement of these rights.

LAW 8808L Intellectual Property Licensing Credits: 2-3

This course provides for advanced engagement with intellectual property concepts while also providing training in practical skills. The course will first entail reminding students of the differences among the three essential areas of intellectual property law (copyright, patent, and trademark) and indentifying how these differences translate into different standard license agreements. Additionally, students will consider the challenges in drafting a consolidated license agreement that transfers interests in multiple types of intellectual property. Second, the course will include considerable practice for students in drafting contract language.

LAW 8808S Intellectual Property Remedies Credits: 2-3

This course will explore the remedies available to intellectual property owners and the protections available to those accused of infringing copyrights, trademarks, trade secrets and patents. The course will delve into issues of how rapidly advancing technology has made it more difficult to apply the current remedies and explore whether they go too far or not far enough in protecting owners of intellectual property. It will also help students recognize that case evaluation does not end after analyzing whether liability exists.

LAW 8809 Missouri Cannabis Law Credit: 1

This miniterm course will survey the essential features of medical marijuana law in Missouri. It will cover the regulations regarding application for a medical marijuana license (cultivation, dispensary, and infusion/extraction).

Prerequisites: Administrative Law is recommended, but not required.

LAW 8813 Employment Discrimination Law Credits: 2

Substantive and procedural aspects of Equal Employment Opportunity Act and related matters.

LAW 8814R Employment Law Credits: 2-3

Survey of legal doctrines regulating the employment relationship, including the regulation of wages, hours and benefits; privacy in the workplace; workers' compensation; suits for wrongful termination; non-competition agreements; and unemployment compensation. May be offered as a seminar.

LAW 8814U Unemployment Compensation Clinic - Hearings Practice Credits: 1-3

Students represent claimants in administrative hearings appealing denials of their unemployment compensation claims. Students interview and counsel clients, investigate their cases, prepare evidence, and advocate for the clients in these hearings.

LAW 8815 Products Liability Credits: 2-3

Theory and practice in products liability cases; negligence; misrepresentation; strict liability; theories of product defect; applicability of the Uniform Commercial Code including warranties and disclaimers; actions among members of the distribution chain.

LAW 8815R Disabilities And The Law Credits: 2-3

An interdisciplinary study of the law relating to disabled persons in the areas of employment, education, and access to transportation, health, welfare and social services to provide an understanding of how the law affects individuals with disabilities and public and private entities. Legislation considered include the American with Disabilities Act, Section 504 of the Rehabilitation Act of 1973, the individuals with Disabilities Education Act, the Family and Medical leave Act, the Fair Housing Act, the Voting Accessibility for the Elderly and Handicapped Act, and the Title VII of the Civil Rights Act of 1964. The enrollment of graduate students from other disciplines, such as education, business, and health sciences is encouraged to allow for interdisciplinary discussion of the topics involved.

LAW 8815S Leadership In Disability Studies: A Multidisciplinary Approach Credits: 3-4

An overview of the history of disability issues, some individualized perspectives of persons with disabilities, the rationale for interdisciplinary approaches regarding disability studies, and opportunities for leadership development with regard to disability issues. The students will participate in a forum that encourages reflection, exchange of ideas, interaction with persons with disabilities and persons from various fields of study, and case analysis. After an orientation to the study of disabilities, various aspects of community membership for persons with disabilities will be addressed, particularly with regard to the workplace, the neighborhood, and the home. Emphasis with placed on vital leadership roles that facilitate community membership and contribution of persons with disabilities to society.

LAW 8820 Criminal Trial Techniques Credits: 2

Strategy and tactics in handling a criminal case; effective representation of the accused at various stages of the criminal process; securing pre-trial release; plea bargaining; motion practice; discovery; voir dire; opening and closing statements; examination of witnesses; use of the expert; sentencing; appeal; collateral attack.

LAW 8821 Sentencing Mitigation Clinic Credits: 1-6

Students will work in conjunction with practicing attorneys, paralegals, social workers, and investigators serving clients of the Federal Public Defender Offices in the District of Kansas and the Western District of Missouri. The focus of the client representation will be geared towards investigation, development and presentation of mitigating evidence to impact sentencing outcomes.

Prerequisites: LAW 8913.

LAW 8822 Post Conviction Remedies Credits: 2-3

Federal and state remedies for collateral attacks on criminal convictions; vacation of sentences and convictions; federal habeas corpus and similar devices. Paper required when course is offered as a seminar.

Prerequisites: LAW 8635.

LAW 8831R International Human Rights Law Credits: 1-3

Study of the law protecting individuals and groups against governmental violations of internationally guaranteed rights; historical antecedents and theoretical underpinnings; human rights in national law (the United States); post World War II developments; principal international human rights instruments; regional human rights arrangements; human rights of women, refugees, ethnic minorities; implementation of rights; international obligations of the United States; selected civil, political, economic and social rights.

LAW 8832 Law Of International Trade And Finance Credits: 3

Study of the World Trading System, focusing on policy and application, including the WTO, the NAFTA, U.S. trade remedies, foreign direct investments controls, and export controls.

LAW 8832I Introduction to International Trade Credits: 1-3

An examination of the structure and workings of the major global trade regimes, including the World Trade Organization ("WTO") and the North American Free Trade Agreement (the "NAFTA"). The role of international trade in such areas as the environment, labor rights, national security, the developing world, and non-market economies will also be considered. The course will also focus in depth on United States domestic trade remedies, including antidumping, countervailing duties, section 301 and 337 actions as well as on other international trade restricting practices.

LAW 8834 Tax Procedure Credits: 2

Problem-method study of procedures and taxpayers' rights when deficiencies are assessed by the Internal Revenue Service; tax liens; commencement of litigation in Tax Court, Federal District Court, and Court of Claims.

LAW 8834R Tax Clinic Credits: 1-4

Students in the Kansas City Tax Clinic represent low-income clients before the IRS and in United States Tax Court under the supervision of the Clinic Directors. Cases may include delinquent filers, examinations, administrative appeals, Tax Court litigation, innocent spouse, and collection cases including due process, installment agreements, and offers-in-compromise. Students also receive classroom instruction in tax procedure subjects and in client counseling. There is a ten hour orientation prior to the beginning of classes. There is also an additional five hour lecture held during the course of the semester.

LAW 8835 Blockchain, Cryptoassets and the Law Credits: 1-2

Covering blockchains, cryptoassets and related topics in the FinTech area. Blockchains are incorruptible decentralized digital ledgers maintained by a distributed network of computers. All transactions on a blockchain are recorded chronologically and publicly. Cryptoassets are digital assets that use blockchains and cryptography to regulate the creation of new units, verify transactions, and secure the transactions without the intervention of any middleman. Will address whether governments have the power to regulate blockchains and what is the right balance of regulation to protect the public but encourage innovation.

LAW 8837 Negotiating Mergers And Acquisitions Credits: 2-3

Problem-method study of corporate, tax, securities, and business problems entailed in buying and selling a corporation; fundamental corporate changes: recapitalizations, mergers, sale of assets, sale of stock, and tender offers; corporate finance and rehabilitation of financially distressed corporations.

LAW 8837R Mergers & Acquisitions Deals and Corporate Governance Issues Credit: 1

An introduction to the tactical and strategic complexities of litigation and client counseling arising from contested mergers and acquisitions and corporate tactics involving activist shareholders.

Prerequisites: Business Organizations

LAW 8838L Legal Accounting Credit: 1

Accounting as it relates to the work of a lawyer. Understanding financial statements (balance sheet, income statement, cash flow, shareholder's equity), analysis of financial statements; deferral concepts (inventory, depreciation, prepaid expenses), understanding accounting principles, valuation (present value, future value.).

LAW 8838R Tax Practicum I Credits: 1-3

Practical skills training in the sources and methods of tax research (including electronic database sources) using problem method approaches; analytical and planning skills are developed through in-depth case study research.

LAW 8843 Federal Income Taxation Of Estates And Trusts Credits: 2

Income tax problems of the fiduciary; grantor's trusts; income, estate, and gift tax problems relating to optional or discretionary acts of the fiduciary in retention and/or distribution of income or corpus.

LAW 8845 Deferred Compensation Credits: 2-3

Problem-method study of deferred compensation arrangements; qualified pension and profit sharing plans; individual retirement accounts; qualified stock option plans; other methods of deferred compensation.

LAW 8847 Personal Injury Tort Litigation Credits: 1-2

Introduction to the fundamentals of personal injury litigation, including case intake, pre-discovery investigation, settlement demand packages and other communications with opposing counsel, injury petitions, initial discovery, depositions, retention of experts, pre-trial motions, and mediation.

LAW 8848R State And Local Taxation Credits: 2-3

State and local taxation of income, sales and property, including the apportionment of tax obligations to multiple states. Restrictions imposed by constitutional doctrines such as the uniformity and equality requirement and the prohibition on interfering with interstate commerce.

LAW 8850 Applied Evidence Credits: 1-3

Problems and simulations in evidence; application of the rules of evidence in many of the following topic areas: objections to the form of the question; hearsay; lay and expert opinion; authentication, the introduction of real and demonstrative evidence, rules of relevance, cross-examination and impeachment.

LAW 8853 Seminar in Law Science & Technology Credits: 2-3

This class surveys a variety of current topics lying at the intersection of law, science, and technology. During the course of the semester each student will develop their own thesis relating to some specific issue arising out of the interaction of law, science, and technology.

LAW 8858 Consumer Protection Credits: 2-3

Protection of consumers from false advertising, unfair sales practices, and consumer credit and debt collection abuse. Topics which may be covered are Truth-in-Lending Act, Uniform Consumer Credit Code, Fair Debt Collection Practices Act; Interstate Land Sales Disclosure Act, Federal Trade Commission and Missouri Attorney General activity, Missouri consumer credit legislation, consumer warranties, consumer class actions, abusive collection practices.

LAW 8858L Consumer Protection Lab Credit: 1

This course provides students with skills needed for reviewing and investigating consumer complaints; developing problem solving strategies and drafting Attorney General letters, pleadings, and other documents necessary for the enforcement of the complaint. Students work with the Missouri Attorney General's office to screen consumer complaints and recommend actions.

Prerequisites: LAW 8858.

LAW 8861 Real Estate Finance Credits: 2-4

Real estate investment and development; basic financing instruments (e.g., mortgages, deeds of trusts, contracts for deed); foreclosure remedies; home finance, national housing market; financing of commercial and industrial properties; construction financing; mechanic's liens; priority disputes; bankruptcy issues affecting real estate security interests.

LAW 8863 Fair and Affordable Housing Seminar Credits: 1-3

This seminar course will explore issues of fair and affordable domestic housing law through a real property lens. It will be unique in its approach to housing law from an advanced property perspective. Through a mixture of classroom lectures and discussions, experiential exercises and scholarly writing, housing issues will be examined from many perspectives including that of residential and commercial owners, developers, homeowner associations, landlords, tenants, and government regulators.

Prerequisites: LAW 8541; LAW 8542.

LAW 8868 Trusts: Planning, Drafting, Administering & Litigating Credits: 2-3

Focus on advanced planning and drafting of inter vivos private express trusts for individuals, including proper use of readily available forms (tax-related drafting limited to marital and charitable deduction forms), consideration of trustee's duties, powers and liabilities pursuant to the Missouri Trust Code and related cases, and special emphasis on the recently-adopted Uniform Investor Act and the significant changes it has introduced to Missouri trust investment law.

Prerequisites: LAW 8611.

LAW 8870 Seminar in Educational Equality and the Law Credits: 1-3

This seminar will explore the legal aspects of providing educational equality in a nation of diverse ethnicities, cultures, religions, sexual identities, and socio-economic conditions. Through the lenses of legal scholarship and primary legal authorities, students will examine past and current attempts to address the inequities that have long plagued U.S. public education in the K-12 setting. In addition, the course will include extensive instruction in scholarly research, writing, and publication skills.

LAW 8870R Education Law: Government & Legal Aspects Of Education Credits: 2-3

This course is designed to give students an introduction to the major legal doctrines that affect K-12 schools, as well as the policies that underlie or are changing those doctrines. Students should gain a working understanding of the impact of federal and state law on the operation of schools, the rights and responsibilities of teachers and administrators, and the rights of the students who attend those schools.

LAW 8874 Tax-Exempt Organizations Credits: 2

An in-depth examination of the state and federal laws that govern the formation and operation of tax-exempt organizations, with emphasis on Sec. 501 (c) (3) charities; criteria for tax-exempt status; IRS application and reporting procedures; unreported business income tax issues.

LAW 8875 Real Estate Transactions Credits: 2-3

Practice-oriented course, including the development of drafting skills, in which questions involving basic residential and commercial real estate sales and civil and leasing transactions are considered, such as title, title insurance, contract conditions, contract remedies, commercial leasing (office and shopping center issues) and issues concerning and confronting brokers; special emphasis on Missouri and Kansas law.

LAW 8875L Legal Context of Real Estate Decision Making Credits: 1-3

A study of fundamental matters involved in real estate decision making, including an understanding of basic real estate terms of art; the unique attributes of commercial real estate the distinction between office, retail and industrial property leases; the significant business and legal issues that arise in lease negotiations; financing issues, including the negotiation of construction and permanent loan documents; loan application/brokerage agreements; the impact of bankruptcy on real estate transactions; an explanation of different types of insurance coverage applicable to commercial real estate; and construction issues, including how buildings are constructed and the "green" movement impact on current construction practices.

LAW 8876 Sales and Leasing Credits: 1-3

This course is a survey course on the law of sales leasing. The course will examine the sale of goods under Article 2 of the Uniform Commercial Code (UCC), studying the rights, duties, and liabilities of parties to modern sales transactions. The course will also analyze Article 2A (leasing) of the UCC and explore the rights, duties, and liabilities of parties to modern lease transactions. The course will also consider the United Nations Convention on Contracts for the International Sale of Goods (CISG). Topics encompassed will include sale and lease contract formation, establishment of express and implied contract terms,

LAW 8877 Bankruptcy Court Internship Credits: 2-6

Bankruptcy Court Interns serve in the chambers of US Bankruptcy Judge, principally in the Western District of Missouri. Students may also intern with bankruptcy judges in different federal districts, with approval of the field placement faculty director. Legal issues arise under the Bankruptcy Code, as well as secured transactions, contract law, labor law, and tax law. Students undertake research, draft memoranda, observe hearings and other judicial proceedings, and debrief with judges regarding legal issues and lawyering styles.

Co-requisites: LAW 8749.

LAW 8881 Seminar on the Supreme Court Credits: 2-3

Students simulate the work of the Supreme Court on nine cases presently pending before that court. The student justices study the briefs and related material filed in each case, discuss and vote on the cases, and write majority and dissenting opinions. Enrollment in the seminar is limited, fittingly, to nine justices.

LAW 8881P Seminar in Presidential Power Credits: 2

In this course students will examine unsettled and often controversial questions regarding the extent of presidential power in sensitive contexts. Emphasis is placed on how these issues are implicated in current national life. Students will examine and will be expected to actively discuss during class sessions issues such as the president's authority to decline enforcing federal law, the extent of the president's authority to engage in overseas military action without congressional approval (and, assuming approval is required, what form that "approval" must constitutionally take), presidential authority to indefinitely detain "enemy combatants" at Guantanamo Bay, Cuba (or similar locations), the legal effect of presidential signing statements, the extent of presidential oversight authority over administrative agencies, and the propriety of the Court's invocation of the "political question doctrine" when confronted with sensitive questions regarding presidential power.

LAW 8882 Patent Law Credits: 2-3

This course will focus primarily on substantive U.S. patent law, including the laws governing the patentability of particular inventions, the patent procurement process, the rights granted by a patent, and patent enforcement and litigation. As time permits, the course will explore policy issues raised by the current patent system, discuss proposals for reform and international harmonization, and consider alternatives to patent protection such as trade secret and regulatory exclusivity.

LAW 8882R Patent Prosecution Credits: 2-3

This course will focus primarily on the practical application of substantive U.S. patent law, including the laws governing the patentability of particular inventions, the patent procurement process, the rights granted by a patent, and patent enforcement and litigation. In particular, this class will focus on teaching students how to draft a patent application and how to prosecute the application in the U.S. Patent and Trademark office. This class will be designed to mirror the substantive patent law being taught in the Patent Law course. For example, the Patent Law course will present the law and theory of obviousness or novelty; the Patent Prosecution course will instruct in how to deal with and respond to an obviousness or novelty rejection from the U.S. Patent and Trademark Office.

Co-requisites: LAW 8882.

LAW 8884 White Collar Crime Credits: 2-3

Examines substantive federal law in the areas of fraud, public corruption, financial crimes and conspiracy; it also includes examination of procedural and policy issues related to business and white-collar investigations.

Prerequisites: LAW 8634.

LAW 8885 Seminar In Philosophy And Law Credits: 2

An examination from a philosophical perspective of the historical and conceptual relationships present in the evolution, development and analysis of law, including natural law theory, legal positivism and legal realism, and focusing on a specific area of controversy in the law.

LAW 8885H The Quest for a Satisfying Career in Law Credits: 1-2

An examination of what research suggests about the likelihood that a career in law will prove satisfying, including an exploration of the specific types of firms and work environments that are most likely to produce happy lawyers; a consideration of what studies from the fields of neuroscience and psychology suggest about steps that lawyers, law firms, and law schools can take to improve prospects for career satisfaction; and a consideration of how high happiness should rank among life's goals.

LAW 8886 Corporate Taxation I Credits: 2-3

Tax treatment of corporations and shareholders with respect to formation, non-liquidating distributions, stock dividends, redemptions and liquidations. The course may also cover the personal holding company tax, the accumulated earnings tax, collapsible corporations, multiple corporations and tax consequences of corporate reorganizations; survival of tax attributes; acquisition of loss corporations; and a survey of consolidated return reporting.

LAW 8887 Corporate Taxation II Credits: 3

Tax consequences of corporate reorganizations; survival of tax attributes; acquisition of loss corporations; and a survey of consolidated return reporting.

Prerequisites: LAW 8886.

LAW 8888A Partnership Taxation II Credits: 1-3

A study of selected topics in tax planning and in negotiating and drafting organizational documents (e.g. partnership agreements and operating agreements) for entities that will be classified as partnerships for tax purposes, including advanced exploration of issues relating to special allocations and book/tax disparities, optional adjustments to basis, payment to retiring and deceased partners, the impact of I.R.C. Section 751 on partnership distributions and on sales and exchanges of partnership interests, partnership mergers and divisions, partnerships with tax-exempt partners, and tiered partnerships.

Prerequisites: LAW 8888R.

LAW 8888R Partnership Taxation I Credits: 2-3

An in depth examination of the tax principles governing partnerships limited liability companies and other unincorporated organizations classified as partnerships for tax purposes, including questions involving the tax consequences of the formation of such organizations, operating distributions, basis computations, liquidating distributions, and sales of ownership interests.

LAW 8889R Subchapter S Taxation Credits: 1-2

An examination of the tax principles governing Subchapter S Corporations, including the tax consequences of their formation; the taxation of their income and the deductibility of their losses; operating distributions; basis computations; liquidations; distributions; and sales of S Corporation shares of stock.

Prerequisites: LAW 8886.

LAW 8890A Sports Law I, Amateur Sports Law Credits: 2

Coverage of various amateur sports law issues with a focus on the regulation of interscholastic, intercollegiate sports, Olympic and international sports, and sports broadcasting; including such topics as constitutional law, tort law, contract law, and Title IX gender discrimination; and a consideration of federal disability discrimination laws, the status of collegiate athletes who participate in big time sports programs, the regulatory authority of the National Collegiate Athletics Association, The National High School Athletic Association, international and Olympic sports organizations.

LAW 8890B Sports Law II, Professional Sports Law Credits: 2

A focus upon the multitude of legal issues and unique relationships in the sports industry, including, among other issues, professional team sports, other professional sports, facilities management in professional sports, legal implications and the practical realities of the unique labor-management relationships in professional sports. The most significant areas to be studied in the context are antitrust, labor, communications, taxation, contracts law, and intellectual property law.

LAW 8890C The Emergence and Transformation of Concussion Litigation Credits: 1-2

This course will examine the emergence, transformation and development of concussion litigation. Concussion litigation spans multiple areas of the legal landscape – from torts, civil procedure, sports law, labor and employment law and, inter alia, medical-legal aspects. We will begin with the theoretical underpinnings of the emergence of concussion litigation. We will then look at how society, the legislature and the courts have responded to sports concussions. This will require us to analyze what the concussion litigation landscape looks like currently and how it will be shaped in the future.

LAW 8890I Selected Topics in International and Comparative Sports Law Credit: 1

The course introduces students to the basic structure and techniques of dispute resolution utilized in international sports law. The field of international sports law is an ever-expanding area of the law and the term "international sports law" refers to an emerging and distinctive body of rules that govern transnational sports and sporting activities. Distinct bodies of international sports law have developed under the aegis of the Olympic Charter that applies to international sports competition well beyond Olympic competition itself, and encompasses both traditional Olympic sports and non-Olympic sports. Many international sports law disputes are now resolved in the Court of Arbitration For Sport (CAS), a body that may rightly be referred to as a Supreme Court for a very wide array of international sports disputes involving such matters as doping, eligibility, cheating, violence, discrimination, commercialization and intellectual property.

LAW 8890R Entertainment Law Credits: 2-3

An examination of the legal issues affecting the print and broadcast media. Topics covered may include copyright, antitrust, spectrum allocation, right of privacy, first amendment issues (prior restraint, obscenity, commercial speech, defamation and access to both information and judicial proceedings), licensing and new technologies including and beyond cable television.

LAW 8890X Sports Law Internship Credits: 2-6

Sports Law Interns work in offices focused on collegiate or professional sports to learn about the regulatory, compliance, and business aspects of sport and the sporting enterprise. Students analyze and apply regulatory standards, conduct legal research regarding novel legal issues, draft memoranda, legal documents, or other documentation.

Co-requisites: LAW 8749.

LAW 8892R Estate and Gift Tax Credits: 2-3

Problem method study of estate, gift and generation skipping transfer taxes and the income taxation of estates and gifts. Emphasis on lifetime and post-mortem planning as well as compliance requirements.

LAW 8893 International Taxation Credits: 2-3

An introduction to the taxation of income of U.S. citizens, residents and corporations from foreign sources and the income of foreign residents and non-residents from U.S. sources. Topics may include sources of income rules, foreign tax credit provisions, the earned income exclusion for foreign source income, income tax treaties and a survey of the tax treatment of U.S. investments made offshore.

LAW 8893R Taxation Of Property Transactions Credits: 2-3

Income taxation of property transactions. Detailed study of capital gains and losses, passive losses, the at-risk rules, and the alternative minimum tax.

LAW 8895S Jury Selection Credit: 1

Students study the purpose of voir dire and the law pertaining to jury selection and receive hands-on experience in selecting a jury role-playing as lawyers; jurors, and presiding judge in a concluding 2 1/2 hour courtroom simulation (where a jury is selected after making challenges for cause and exercising preemptory strikes); and learn that jury selection is an art not a science-which needs to be tailored to the facts of the case and the witnesses the attorney expects to present. An actual case involving a badly injured young plaintiff and a large corporate defendant-where liability is questionable-is used for the simulation. Students learn active listening skills and how to interpret non-verbal behavior. Examples from prominent, practicing lawyers are presented. The course is graded on a pass/fail basis.

LAW 8897 Seminar In Analytical Strategies Credits: 1-2

Pedagogical philosophy of legal education; common themes in first-year legal education; techniques of cooperative learning of legal materials. Students may act as study group leaders for various first-year course subjects. Ungraded.

LAW 8897B Building MBE Skills Credit: 1

Preparation of students for the bar exam by building bar exam multiple choice skills. Focus will be on strategies and tactics in the topics tested by multiple choice questions. Additional emphasis will be on learning how to self-assess understanding of concepts and judgment errors through intense review of errors. The course will require eight to ten hours a day of class and outside work.

LAW 8897E Introduction to Law Study Credits: 0

This course is designed to help incoming law students navigate the challenging transition to law study. The course is a rigorous, five-day introduction to law school. Each day focuses on a "stage" of law school learning; orientation, class preparation, class, after class review, exam preparation, and exam taking. The course addresses the skills of reading, writing, and thinking at each of these stages through simulated classes, direct teaching of study skills, written and oral exercises, and individual meetings with faculty.

LAW 8897R Governmental and Legal Aspects of Education Credits: 2-3

Study of legal issues within higher education. Focus is on state and federal law and regulations as they pertain to issues from academic freedom to governance and administration. Focus on strategies for preventive law is a major component of the course.

LAW 8898 Construction Law Credits: 2

The Construction Law course would emphasize state and federal construction law and would provide the students with practical experience in drafting contracts, negotiating disputes, and conducting a mock arbitration. The course would cover the contract responsibilities and remedies of contractors, subcontractors, design professionals, sureties and owners, including the United States Government. The course would emphasize the controlling state and federal statutes and regulations, as well as case law which illustrates the application of the statutes and other areas of law not covered by statute. The classroom sessions will include discussion of the practical aspects of legal practice in the construction industry, with instruction and examples regarding the drafting of documents and contracts, negotiation of disputes, and decision-making regarding the type of dispute resolution forum to recommend to a client.

LAW 8900 Takings Law Credits: 1-2

An examination of all aspects of takings law including the historical and constitutional basis for eminent domain, the public use requirement, regulatory takings, development exactions, and alternatives to takings. Comparisons between U.S. and state regimes and comparative takings law.

LAW 8901 Advising Life Sciences and Technology Entrepreneurs Credits: 1-2

A condensed study of the key legal issues for the entire cradle-to-grave (founding-to-exit transaction) life cycle of high-growth technology and life sciences ventures, focusing on these critical phases: structuring and organizing the high-growth venture; relationships with key constituencies; acquiring, protecting and licensing intellectual property assets; financing transactions and realizing wealth through exit transactions.

Prerequisites: LAW 8601.

LAW 8902 Topics and Cases Related to In-House Counsel Credit: 1

This course surveys a wide range of legal issues from the in-house counsel perspective, including those related to professional responsibility, corporate governance, transactions, compliance, risk management, intellectual property and litigation. Through the use of case studies, students will use legal principles and business judgement to analyze scenarios in various corporate settings.

Prerequisites: LAW 8601.

LAW 8903 Fundamentals of Legal Investigations Credits: 2

This course focuses on skills and methods needed to fully obtain facts so as to determine strategies and analyze possible outcomes for all stages of litigation, both criminal and civil. Detailed information on searching public records, Internet sites, and other document retrieval, as well as methods to locate and interview people, will be provided to students through an interactive format. Using an investigation on parallel tracks approach, i.e., paper and people, students will learn the relationship between documents/physical evidence and thorough, reliable interviewing of clients and witnesses.

LAW 8904 Multicultural Lawyering and Spanish for Lawyers Credits: 1-2

In this course, students acquire skills and knowledge needed to represent Spanish speaking clients, including mastering selected Spanish legal vocabulary, working with translators, conducting initial client interviews, and identifying cultural impacts on communication. Ethical dimensions of cross-linguistic and cross-cultural counseling are examined and students receive training in counseling skills.

Prerequisites: Audition with professor to determine minimum Spanish language ability.

LAW 8905 Intellectual Property Litigation Credits: 2

Advanced engagement with intellectual property concepts and practical skills in litigation of these cases. The course will address the three essential areas of intellectual property law concept (copyright, patent, and trademark) and explore how these differences translate into different procedural and substantive considerations in litigation. Simulations of various stages of litigation will focus on litigation strategy and drafting skills.

LAW 8907 Seminar in Advanced Trademark Credits: 2-3

This course examines advanced substantive topics in various trademark areas, some of which are not covered in prior classes and some of which explore areas of controversy in greater depth. Students will also be exposed to the trademark administrative process in greater depth.

LAW 8908 Family Tax Law Credit: 1

The study of federal tax issues relevant to attorneys who practice family law.

Prerequisites: LAW 8552.

LAW 8909 State and Local Government Law in a Nutshell Credit: 1

This course will examine the laws and structures through which Kansas City local government operates. Topics will include the context for local government functions, the city charter and structure of local government, and examination of the particular topics such as economic development tools, property tax abatement, and local agency interactions.

LAW 8910 Intellectual Property Clinic Credits: 2

Under the supervision of faculty who are licensed attorneys, students will counsel start-up companies and their owners and assist with intellectual property matters related to Trade Secrets, Copyright Trademark, Patent and planning in connection with concepts related to Business Torts. Students will conduct patentability and trademark searches, prepare patent landscape reports, trademark registrations, opposition and cancellation responses and assist Clinic clients in identifying trade secrets and potential patentable inventions and preparing invention disclosures as well as provide general intellectual property information and advice to Clinic clients.

Prerequisites: LAW 8808 or LAW 8797 and LAW 8798 or LAW 8882.

LAW 8911 Winning Voir Dire Credit: 1**LAW 8912 Client Interviewing Credits: 1-3**

Basics of client interviewing. Training will include the following components: a) Passive vs. Active Listening b) Forms of Questions c) Preliminary Problem Identification d) Techniques for conducting Initial Interviews e) Providing Information the Supervising Attorney Wants/Needs"

LAW 8913 Mental Health Investigation I Credits: 1-2

This is a one-week, one or two-credit hour practical skills course which focuses on skills and methods needed to identify and understand mental health issues and phenomena that every lawyer will encounter. Students will examine what mental illness is, how it affects sufferers, and how it presents to lay observers so that it can be understood and explored in relevant legal contexts. This course is offered in connection with the Mitigation Skills Workshop, which trains lawyers representing capital clients how to interview clients and witnesses for information relevant to developmental, cognitive and mental health issues; students will participate in role-playing a practical skills exercises with Workshop participants.

LAW 8913B Mental Health Investigations II Credits: 1-2

This is the second half of a practical skills course which focuses on skills and methods needed to identify and understand mental health issues and phenomena that every lawyer will encounter. This course is offered in connection with the Mitigation Skills Workshop, which trains lawyers representing capital clients how to interview clients and witnesses for information relevant to developmental, cognitive and mental health issues; students will participate in role-playing a practical skills exercises with Workshop participants.

LAW 8914 Selected Reading in Legal Scholarship Credit: 1

Students and faculty will read and discuss a substantial book by a legal scholar examining a contemporary issue in law and society from a historical, comparative, or jurisprudential perspective. The course will include discussions with the author and students will complete a short project related to the book topic.

LAW 8914F Law and Film Credits: 1-3

Exploration of the function of law and lawyers in society by examining legal decisions, statutes, and legal commentaries in the context of films, including classic, contemporary mainstream, foreign, documentary, and independent films. Students will view and critique films in light of assigned reading materials. Using films as analytical tools, the seminar examines the ways in which popular culture products (such as films and television) both reflect and change the social views about law and lawyers.

LAW 8915 Social Venture Creation Credit: 1**LAW 8917 Law and Human Trafficking Credits: 1-2**

Theory and legal structures relating to human trafficking, including practical skills in representing victims.

LAW 8919 The Insanity Defense Credits: 1-2

This course will review several aspects of the insanity defense: its history, how it works, and the public perception of the defense. The course will focus on the trial of John Hinckley Jr. for attempted murder of President Ronald Reagan as a vehicle for discussing how the defense is presented, the changes in the defense that the verdict in that trial brought about, recent significant cases and possible future changes in the defense.

LAW 8920 Introduction to Islamic Law Credits: 1-2

This course will provide a basic overview of Islamic law from its origins to the present. Students will study both primary and secondary sources of Islamic law. The course will also compare Islamic legal concepts to those in common law countries.

LAW 8921 Selected Projects in Law, Technology and Public Policy Credits: 1-6

This "studio" course involves the creation of interdisciplinary teams of law and graduate students from UMKC and other graduate and law schools and their media laboratories to work on cutting edge projects at intersections of law, technology and public policy.

LAW 8922 Access to Justice (A2J) Workshop Credits: 1-6

Students will identify an area of law or law process that can be made more accessible with the application of a technology solution. Specifically the students, after analyzing the area of law, will use the CALI A2J-Author guided interview software and document assembly software to create the forms and directions to assist self-represented litigants.

LAW 8923 Interdisciplinary Perspectives on Counseling an Aging Population Credits: 1-2

Study and practice of interdisciplinary perspectives of aging and core competencies in active listening, narrative translation, and service opportunity identification. Using a combination of readings, simulations, skills trainings, team preparations and presentations of case studies and individual reflective papers, the course is designed to engage professional students in understanding each discipline's approach to describing the problem, interacting with patients/clients in identifying the problem and sharing perspectives on developing plans to prevent and address the problem with and on behalf of these patients/clients.

LAW 8925 Entrepreneurial Urban Development Credits: 1-4

The projects-based Entrepreneurial Urban Development course will feature interdisciplinary teams of faculty and graduate or upper-level undergraduate students providing analysis on real estate-based projects relating to the development or redevelopment of properties in urban areas, with a particular focus in, but not necessarily limited to, Kansas City, MO and Kansas City, KS. Students enrolled in the course will receive classroom instruction through modules related to development, land use controls and entitlement processes, affordable housing law and policy, cost analysis, market analysis, feasibility analysis, investment analysis, finance, incentives, design, urban planning, and community engagement.

LAW 9740A Missouri Appellate Practice Credit: 1

Basic rules and procedures for preparing an appeal in Missouri.

Academic Rules and Regulations for Juris Doctor Degree Program

- Attendance
- Examinations and Grades
- Credit in Lieu of Grade Option
- Appeal of Grades
- Withdrawal from Courses
- Scholastic Probation and Dismissal
- Latin Honors
- Dean's Honor List
- Employment by Juris Doctor Degree Candidates
- Plagiarism Policy and Guidelines
- Honor Code

Appeal of Grades

Students are responsible for meeting the standards of academic performance established for each course in which they are enrolled. The establishment of the criteria for grades and the evaluation of student academic performance are the responsibilities of the professor.

The school's grade appeal procedure is available only for the review of allegedly capricious grading, and not for review of a professor's evaluation of a student's academic performance.

Capricious grading, for grade appeal purposes, consists only of any of the following:

- The assignment of a grade to a particular student on some basis other than the performance in the course.
 - The assignment of a grade to a particular student by resort to more exacting or demanding standards than were applied to other students in the course.
 - The assignment of a grade by a substantial departure from the professor's previously announced standards.
1. **Step 1:** The student should first discuss the course grade fully with the professor. This must be done within six weeks after the professor turns in the grade or the beginning of the succeeding regular academic semester, whichever is later.
 2. **Step 2:** If the matter is not resolved through consultation with the professor, the student may appeal to the dean. This must be done within 10 days after notification of the decision of the professor. The appeal to the dean shall be in writing, and shall state which of the three charges of capricious grading is alleged to have been violated and shall specify such facts as are relied upon to support the charge.
 3. **Step 3:** The dean shall review the appeal and, if found to be without merit, shall dismiss it. If it is determined that the appeal may have merit, the dean shall appoint an ad hoc faculty committee to review the record and provide advice on the matter. The grade in any course that is based on an anonymously-graded examination shall be presumed not to be capricious.
 4. **Step 4:** If the dean believes a change in the grade to be warranted, he or she shall present a report to the faculty of the Law School in order that the faculty may act on the matter.
 5. **Step 5:** If the student is dissatisfied with the action of the dean or the faculty, the student, within 10 calendar days of the decision of the dean, may appeal to the provost in accordance with the University of Missouri-Kansas City Procedure for the Appeal of Grades.

Attendance

UMKC School of Law Attendance Policy

Purposes

The American Bar Association requires law schools to have "sound academic standards, including those for regular class attendance." See American Bar Association, Standards & Rules of Procedure for Approval of Law Schools, Standard 308(a). Consistent with this directive, the UMKC School of Law faculty believes that dependability is an essential characteristic of a good lawyer. The Law School's attendance policy seeks to promote the development of good professional habits and to ensure that students succeed in their classes, on the bar exam, and as attorneys.

General Policy

Students should strive to have as few absences from classes as possible. A student will be allowed to miss up to 15 percent of the class sessions in a course. Each absence above the 15 percent level will result in a one-step reduction in the student's grade for the course (such as from a B+ to a B). If a student has absences that exceed 22 percent of the class sessions in a course, the student will be administratively withdrawn from the course.

The faculty member who is teaching the course may choose to waive one or more of the one-step grade reductions. The faculty member may require the student to do extra academic work (such as extra reading, writing, or research) as a condition for waiving a grade reduction.

Faculty members cannot waive or prevent the administrative withdrawal of a student from a course.

The Law School strongly advises students to miss as few classes as possible. While students are allowed to miss up to 15 percent of classes without penalty, students should treat that as a maximum amount that can be missed if absolutely necessary, not as the amount of absences that would be typical or expected.

Examples

The following examples illustrate how the policy applies to courses with some of the most common scheduling formats. [1] (p.)

For a Fall or Spring course that meets once per week for 14 weeks:

- 2 absences allowed without penalty
- 3rd absence results in a one-step grade reduction
- 4th absence results in withdrawal from the course

Fall or Spring course that meets twice per week for 14 weeks:

- 4 absences allowed without penalty

5th and 6th absences each result in one-step grade reductions

7th absence results in withdrawal from the course

Fall or Spring course that meets three times per week for 14 weeks:

6 absences allowed without penalty

7th and 8th and 9th absences each result in one-step grade reductions

10th absence results in withdrawal from the course

Summer course that meets once per week for 7 weeks:

1 absence allowed without penalty

2nd absence results in withdrawal from the course

Summer course that meets twice per week for 7 weeks:

2 absences allowed without penalty

3rd absence results in a one-step grade reduction

4th absence results in withdrawal from the course

Summer course that meets three times per week for 7 weeks:

3 absences allowed without penalty

4th absence results in a one-step grade reduction

5th absence results in withdrawal from the course

Mini-term course that meets five times in one week:

1st absence results in a one-step grade reduction

2nd absence results in withdrawal from the course

Stricter Requirements

Faculty members may choose to impose attendance requirements for their courses that are stricter than those of the general policy. In other words, a faculty member may allow fewer (but not more) absences than the general policy would allow. If a faculty member intends to impose a stricter attendance policy for a course, the faculty member must notify students of the policy, in writing (whether on paper or by electronic means), before or during the first week of the semester. The announcement must specify how many absences will be allowed and what the consequences will be for each absence exceeding the allowed number.

Procedures

1. Attendance will be taken at every class session of every course. The faculty member teaching the course may make a record of the attendance, or the attendance may be taken by other methods such as passing around an attendance sheet or by means that allow students to sign in electronically.
2. It is important that students arrive on time for classes. If a student misses any substantial portion of a class session (in other words, more than just a few minutes of the class) because the student arrived late or left before the class ended, the faculty member teaching the course will be entitled to count that as an absence. If a student is repeatedly late for class, even late by just a minute or two, the faculty member may give the student a warning that any further late arrivals will be counted as absences.
3. If a student is failing a course at the time of being administratively withdrawn for excessive absences, the student will get a "WF" designation (for withdraw failing) on the student's transcript for the course. Otherwise, a student who is administratively withdrawn for excessive absences will get a "W" designation (for withdraw) on the student's transcript for the course.
4. This policy addresses only attendance at classes. It does not affect a faculty member's requirements or guidelines for the submission of papers or other assignments. The faculty member teaching a course has the sole discretion to decide whether to accept late submissions of work or to award penalties for failing to turn in a paper or other assignment on time.
5. This policy does not draw a distinction between "excused" and "unexcused" absences. Students inevitably will have situations arise where they need to miss classes for perfectly understandable reasons, such as illness, a job interview, or car trouble. The need to occasionally miss class for these sorts of reasons is already accounted for under the policy, which allows students to miss up to 15 percent of the class sessions in a course

without being penalized. Every absence therefore will be counted regardless of the reason for the absence. Likewise, students will sometimes need to miss classes due to having a significant role in an activity that is part of a Law School course or program, such as participating in a legal skills competition as part of one of the Law School's teams, or attending a hearing as part of one of the Law School's clinical courses or field placements. All absences are counted, so whenever possible, students should attempt to schedule these sorts of matters so they do not conflict with classes. To the extent that conflicts sometimes cannot be avoided, students must plan ahead and avoid using up their allowed absences for other things, so that they will have enough absences left to cover the times when they need to miss class because of a Law School activity. In exercising their discretion about whether to allow a grade reduction for excessive absences to be waived, professors can take into account the extent to which the student's absences were due to participation in Law School activities.

6. When a class meets on a day or at a time other than when the class is regularly scheduled to meet (such as for a make-up class session), attendance is mandatory and absences will be counted unless the professor determines that extraordinary circumstances justify making an exception.

7. Falsification of attendance records (such as if a student signs in as present for a class that the student did not attend, or if another student signs in for a student who is absent) constitutes a violation of the UMKC School of Law Honor Code and will be reported to the Honor Court for prosecution.

Relationship to University Attendance Policies

This policy supersedes University attendance policies in all respects.

Adopted by the UMKC School of Law faculty on August 30, 2018; amended September 13, 2018, and October 11, 2018.

[1] (p.) Where a course has class sessions that are different lengths of time, the calculation of the 15 percent and 22 percent limits will be based on class minutes. For example, if a class met on Mondays for 50 minutes and on Wednesdays for 100 minutes, for 14 weeks, that would be a total of 2,100 minutes of class time. An absence for a Monday session of the class would count as missing 50 minutes of the class, and an absence for a Wednesday session of the class would count as missing 100 minutes of the class. So a student who missed three Mondays and two Wednesdays would have a total of 350 minutes of absences and would be over the 15 percent limit. A student who missed six Mondays and no Wednesdays would have a total of 300 minutes of absences and would be slightly under the 15 percent limit.

Credit in Lieu of Grade Option

After completion of the first year, a student may take one elective course ordinarily graded (except a 4-or-more-credit-hour class) on an ungraded basis. For a "pass" to be posted on the student's record, work done for the course must be equivalent to a grade of C- or better; otherwise, the actual grade received will be posted. If students are taking a graded course that is required for an emphasis, the student may not exercise this ungraded option and also have the course count toward the emphasis.

The student must make this election before the beginning of the semester by completing and filing the appropriate form (available at the Law School) in person at Registration and Records (Administrative Center (<http://www.umkc.edu/virtualtour/admincenter.asp>), Room 115, 5115 Oak).

Dean's Honor List

The Dean's Honor List recognizes students who have demonstrated academic excellence in a semester. To be so recognized, a student must have achieved at least a 3.0 GPA for the semester while taking at least 8 credit hours of law school courses, with at least 2 graded law school courses and at least 4 graded law school credit hours. A student will not be on the Dean's Honor List if the student has any incomplete grades in graded courses that semester. The names of the students on the Dean's Honor List will be announced after each Fall and Spring semester.

Employment by Juris Doctor Degree Candidates

Full advantage of the opportunity for a sound legal education only can be gained by devotion of sufficient energy and attention to legal studies. The excessive diversion of time and energy to employment can seriously impair success in law school and preparation for law practice. For this reason, full-time first-year law students **should not** engage in any outside work, and upper-class students **should not** engage in excessive outside work. UMKC School of Law defines "excessive outside work" as work in excess of 20 hours per week during the academic term. Full-time students on academic probation may not have outside work.

Examinations and Grades

In most courses, the final grade is based largely on the student's achievement on an examination or final paper given at the end of the semester. Examinations are anonymous, and papers are identified solely by number, unless the circumstances of the assessment make this inappropriate. Each student is expected to take examinations at the scheduled times, unless an appropriate arrangement is made with the Director of Student Services pursuant to policy. Failure to take an exam at the appropriate time or in the appropriate manner can result in a grade of F.

Grading of student work is on a 4.0 system:

A+	4.3
A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	1.7
D+	1.3
D	1.0
D-	0.7
F	0

Some courses are graded on a credit/no credit (pass/fail) basis.

A student receiving a grade of F in a required course must repeat and pass the course. Grades of F remain on a student's transcript and count toward a student's grade-point average even if a course for which an F is given is repeated and passed.

The temporary grade of I (incomplete) is recorded when the student has not completed the work required for the course.

Exam Tardiness:

Students are expected to be in their seats five (5) minutes prior to the start of the exam. Absent exigent circumstances, students who arrive after the exam has started must begin their exams immediately and WILL NOT receive additional time (this also applies to time used to set up exam software).

Final Examination Rescheduling Policy

A student may request that one or more final examinations be rescheduled under the following circumstances:

- Two final examinations in the same calendar day.
- An evening final examination followed by a morning final examination the next calendar day.
- Three final examinations on three consecutive days (in the first week of examinations only).
- Four final examinations in five days (in the first week of examinations only).
- An emergency warrants rescheduling (request must be documented).

The policy with respect to take-home final examinations is as follows:

- If the take-home final examination is "floating," (e.g. the student may choose when to take it within a defined timeframe) the student may not **create** a conflict by opting to take it during an interval conflicting with another final examination.
- A take-home final examination does not conflict with the preceding final examination(s) under the first or third rules above (two exams in the same calendar day or three exams on three consecutive days), if it may be checked out at least four hours after the prior examination is scheduled to conclude.
- A take-home final examination does not conflict with the preceding final examination(s) under the fourth rule above (four exams in five days), if it may be checked out on Friday, at least four hours after the prior final examination is scheduled to conclude.
- Perceived conflicts involving take-home final examinations of greater than 48 hours in length will be dealt with on a case-by-case basis.

Requests to reschedule a final examination should be directed to the School's Director of Student Support Services.

Once a conflict has been identified, the director will determine which final examination(s) to move, and to what day and time, in order to eliminate the conflict.

Requests to reschedule a final examination on short notice because of severe illness or an emergency must be documented, and will be considered on a case-by-case basis. All such requests must be presented to the Director of Student Support Services for the School of Law **immediately**.

The policy with respect to requests to reschedule based upon disability is as follows:

- All disability-based requests must be approved by the University Office of Student Disability Services
- The Director of Student Support Services will reschedule a final examination because of disability only on request of the University Office of Student Disability Services.

Latin Honors

Three types of Latin honors are awarded to those UMKC School of Law graduates who have achieved academic distinction, they are:

- Summa Cum Laude ("with highest honor")
- Magna Cum Laude ("with great honor")
- Cum Laude ("with honor")

While the University's degree regulations provide some restrictions on the number of graduates in each class that may receive Latin honors which may reduce the percentage of students graduating with Latin honors in each category, in general, Latin honors are awarded as follows:

1. Summa: A student with at least a 3.7 GPA who is also ranked in the top 5 percent of the graduating class.
2. Magna: A student with at least a 3.5 GPA who is also ranked in the top 10 percent of the graduating class.
3. Cum Laude: A student who is in the top 20 percent of the graduating class.

Scholastic Probation and Dismissal

Policy on Academic Probation, Dismissal, and Readmission

The UMKC School of Law seeks to ensure that its students have solid foundations of learning and training for success in law school, on the bar exam, and in their careers. The school also has a responsibility to identify students who are not on track to achieving these objectives. The following standards have been established to provide clear and fair rules regarding academic performance.

GPA requirements

A student will not be subject to academic dismissal or being placed on academic probation until the student has completed taking a total of 12 or more credits of law school courses.

The following requirements apply at the end of each semester when a student has completed taking a total of at least 12 but not more than 32 credits of law school courses:

- A student who has a GPA below 1.8 will be dismissed from law school.
- A student who has a GPA that is greater than or equal to 1.8 but below 2.0 will be placed on academic probation.

The following requirements apply at the end of each semester thereafter once a student has completed taking a total of 33 or more credits of law school courses:

- A student who has a GPA below 2.0 will be dismissed from law school.

A student who is dismissed may seek readmission (see the provisions below on petitions for readmission).

Rules for applying the GPA requirements

1. The GPA requirements apply at the end of each semester (Fall, Spring, and Summer).
2. The "end of a semester" is the time when grades are due and have been submitted for the courses taken by the student that semester. In other words, if grades have been submitted for a course but the student received an "incomplete" in the course, that course will not be taken into account in the calculation of the student's cumulative GPA, and the determination of whether the student is subject to dismissal or placed on academic probation will be done at the end of the semester and will not be postponed until the "incomplete" becomes a grade.
3. Two GPAs will be calculated for students who start law school in the Spring or Summer semester: a cumulative GPA based on all courses taken, and a cumulative GPA based on only the required courses typically taken by first-year students (Civil Procedure I, Constitutional Law, Contracts I & II, Criminal Law, Lawyering Skills I & II, Property I & II, Torts). While the GPA based on the typical first-year required courses will be used for purposes of the first-year class ranks, the GPA based on all courses taken will be used for purposes of academic probation and dismissal.

Probation

A student who is placed on academic probation will have a probationary period in which to raise the cumulative GPA to 2.0. If the student's cumulative GPA is 2.0 or higher at the end of the probationary period, the student will be taken off academic probation and restored to good standing. If the student's cumulative GPA is below 2.0 at the end of the probationary period, the student will be dismissed from law school.

The probationary period will run until the end of the next Fall or Spring semester. For example, if a student was placed on academic probation at the end of the Spring 2020 or Summer 2020 semester, the probationary period would last until the end of the Fall 2020 semester. If a student was placed on academic probation at the end of the Fall 2020 semester, the probationary period would last until the end of the Spring 2021 semester.

If a student takes a leave of absence from school and is not enrolled in any courses, the probationary period will be postponed until the student resumes taking courses. For example, if a student was placed on academic probation at the end of the Fall 2020 semester, but decided not to take any courses in the Spring or Summer and resumed taking classes in the Fall 2021 semester, the probationary period would last until the end of the Fall 2021 semester.

Once a student has been restored to good standing after being on probation, the student must achieve a semester GPA of at least 2.0 for every semester (Fall, Spring, and Summer) in which the student takes any courses throughout the remainder of law school. If a student who was previously on probation has a semester in which the student's semester GPA is below 2.0, the student will be dismissed from law school.

Rules for students on probation

A student who is on academic probation must meet with the law school's director of academic support. In conjunction with the director of academic support, the student must develop a plan for improving academic performance, and the student must adhere to that plan.

A student who is on academic probation must obtain the permission of the Associate Dean for Students before engaging in any significant law school extracurricular activities.

A student who will have a job while on academic probation must obtain the permission of the Associate Dean for Students. If the student attends law school on a full-time basis, there will be a strong presumption that the request to work while on probation should be denied, and permission to work will be granted only in exceptional circumstances.

Effective date: The above policy was adopted by the UMKC law faculty on November 15, 2018. The policy will apply to all students who begin taking courses at UMKC School of Law after January 1, 2019. Students who began taking courses prior to that date will remain subject to the dismissal and probation policies previously in effect, below:

A student who obtains a GPA below 1.8 after completing twelve credit hours will be automatically dismissed from law school. Such student may apply for readmission in the summer of that academic year as under then existing standards and procedures for readmission, and may apply for admission, as a new student to the law school beginning no earlier than the following fall semester. Only under extraordinary circumstances beyond the student's control will the Student Affairs Committee consider a student's petition prior to that summer. If extraordinary circumstances exist, at least one faculty member of the committee and its chair must grant permission for early consideration.

A student will be placed on academic probation if his/her cumulative GPA falls below 2.0. Any student on probation will have one semester to raise the cumulative grade-point average to the required level (2.0) or be dismissed for academic deficiency. A student on academic probation may not work or engage in significant law school extracurricular activities.

Spring and Summer start students will have two cumulative GPAs calculated: a cumulative GPA will be based only on first year required courses ("1L GPA") and a cumulative GPA based on all courses completed, including upper level courses taken in their first spring, summer and fall semester ("Spring/Summer Start 1L GPA"). First year class ranks shall be determined using the 1L GPA. Dismissal and probation shall be determined using the cumulative G.P.A. based on all courses completed.

Students readmitted to the School after dismissal on the grounds of academic deficiency will have one semester to raise the academic average to the required level, unless the faculty decides that a longer period is warranted.

If a probationary student successfully raises his or her average to the required level at the end of the probationary period and subsequently falls below 2.0 again, the student will be dismissed and a second probationary period will be granted only after a petition and favorable faculty action.

Readmissions Policy Guidelines

A student who is dismissed from law school may submit a petition seeking to be readmitted to law school.

I. Student Affairs Committee

The Student Affairs Committee, which is composed of law faculty members and is appointed annually by the law school's dean, will consider and make decisions on all petitions for readmission. A student who submits a petition for readmission will have the opportunity to appear in person before the Student Affairs Committee to discuss and answer questions about the petition and the grounds for readmission.

II. Criteria for readmission

No petition for readmission will be granted unless the student submitting the petition clearly establishes that both of the following requirements are met:

1. There is a substantial likelihood that the student will be able to make up his or her grade deficiency within an appropriate time and manner in accordance with a plan established by the Student Affairs Committee (or by the faculty, if the faculty grants readmission under the appeal procedure set forth below).
2. The student's academic difficulties were substantially attributable to circumstances or events which do not reflect the student's abilities to perform successfully in law school and as a lawyer.

Circumstances or events that might meet the second element of this test include a serious illness or other medical problem; situations causing severe emotional distress for the student (such as the death of a close family member, divorce or separation from a longstanding partner, or being the victim of an assault or other serious crime); or having a documented disability that can be reasonably accommodated but previously was not.

Every factor which the student feels contributed to the student's academic difficulties should be clearly stated in the readmission petition. Every ground for readmission should be supported by relevant documentation to the extent practicable. The petition may also address any remedial steps the student plans to take, or that others might be able to implement on behalf of the student, in the event the petition is granted. The student submitting the petition must certify the truthfulness of all statements in the petition.

III. Timing for petitions

Readmission petitions generally will not be accepted or considered right away, so a student who is dismissed should expect to be out of school for at least one semester even if the student is ultimately going to be readmitted. This avoids having students rush to make decisions about seeking readmission, and gives students a reasonable period of time in which to step away from school and think about the student's experience with law school, the reasons for seeking readmission, and the means through which the student's academic performance can be improved. It also enables the Student Affairs Committee (or faculty, in the event of an appeal) to consider petitions carefully and not rush to make decisions in haste.

The following general rules therefore will apply:

- When a student is dismissed at the end of the Fall semester, the student's petition will not be accepted and considered until the Summer semester. If readmission is granted, it will take effect for the next Fall semester, at the earliest. For example, if a student was dismissed at the end of the Fall 2020 semester, the student's petition would be heard during the Summer 2021 semester and would result in readmission starting no earlier than the Fall 2021 semester.
- When a student is dismissed at the end of the Spring or Summer semester, the student's petition will not be accepted or considered until the Fall semester. If readmission is granted, it will take effect for the next Spring semester, at the earliest. For example, if a student was dismissed at the end of the Spring 2020 or Summer 2020 semester, the student's petition would be heard during the Fall 2020 semester and would result in readmission starting no earlier than the Spring 2021 semester.

A student may submit a request for a special exception to allow a readmission petition to be submitted and heard immediately after the dismissal occurs. A special exception will be made only if the chair of the Student Affairs Committee and at least one other faculty member on the committee agree that a special exception should be made. When a student is dismissed after the student's first semester of law school (or at the point where a student first has taken a total of 12 credits of law courses, if the student took less than 12 credits in the first semester), the burden of justifying a special exception will be extremely heavy, and a special exception will be made only in the most truly extraordinary circumstances.

IV. Attending classes after dismissal

A student who is dismissed from law school must stop attending classes and withdraw from all courses immediately upon receiving notification of the dismissal, unless a request for a special exception is made, under Part III of these rules, to allow the student to have a readmission petition heard immediately. If a request for a special exception is made, the student can remain enrolled and attend classes until a decision is made on the request for a special exception. If the request for a special exception is denied, the student then must immediately stop attending classes and withdraw from all courses. If the request for a special exception is granted, the student can remain enrolled and attend classes until the process of considering the readmission petition has been completed.

V. Granting a readmission petition

A readmission petition will be granted if a majority of the members of the Student Affairs Committee who are participating in the matter vote in favor of readmission. (This means that if the Student Affairs Committee has an even number of members and the vote is a tie, readmission will not be granted.)

If the Student Affairs Committee makes a decision in favor of readmission, that decision is final and there is no process for further review or rejection of the Committee's decision.

If the Student Affairs Committee makes a decision in favor of readmission, the Committee will specify in writing the conditions on which readmission is granted and provide this document to the readmitted student. The conditions might include (but are not limited to) specifying courses that the readmitted student must take; establishing steps that the readmitted student must take to improve academic performance; or imposing restrictions on having a job or other activities the readmitted student may undertake while attending law school. Ordinarily, a readmitted student will be placed on

academic probation and given one semester (Fall or Spring) to raise the cumulative GPA to 2.0, but in appropriate cases the Student Affairs Committee may set other schedules or deadlines that the student's cumulative GPA or semester GPAs must satisfy.

VI. Appeal from the denial of a readmission petition

If the Student Affairs Committee denies a readmission petition but at least one member of the Committee voted in favor of readmission, the student is entitled to appeal that decision and have it reviewed by the faculty of the law school.

If the Student Affairs Committee denies a readmission petition and no member of the Committee voted in favor of readmission, the student is not entitled to appeal the decision, but may ask the law school's dean to review the Committee's decision. Such a request for the dean's review must be made within 10 days of the student receiving notice of the Committee's decision. If the dean finds that extraordinary circumstances justify an appeal, the dean may permit the student to appeal the decision and have it reviewed by the faculty of the law school. If the dean decides to permit the appeal, the dean must state the reasons for doing so, in writing, and provide that explanation to the faculty. If the dean decides not to permit an appeal, that decision is final and not subject to any further review or appeal. The dean may delegate to an associate dean the responsibility for reviewing a Committee decision and determining whether extraordinary circumstances justify allowing an appeal to the faculty.

If an appeal goes to the faculty (either because the Student Affairs Committee's decision to deny the petition was not unanimous or because the dean opted to allow an appeal to the faculty), then the faculty will consider and vote on the appeal at a faculty meeting. If the appeal arises at a time (such as during the summer) when the faculty will not be having a meeting, the faculty's Policy & Planning Committee, which is elected to represent the faculty, may consider and vote on the appeal on behalf of the faculty.

If the faculty votes to deny the readmission petition, that decision is final and there is no process for further review or rejection of the faculty's decision. If the faculty votes to grant the readmission petition, the faculty will specify in writing the conditions on which readmission is granted and provide this document to the readmitted student (just as the Student Affairs Committee would do, under Part V above, if the Committee granted readmission).

VII. New evidence

A student whose readmission petition was not successful will be allowed to submit another petition only if the new petition presents new evidence. New evidence is evidence not available or not reasonably discoverable at the time the previous petition was considered. Subsequent petitions will be considered through the same process and with the same standards set forth above for readmission petitions.

VIII. Petition by a student who was previously readmitted

Only in the most exceptional circumstances will a student who has previously been readmitted and subsequently dismissed be readmitted again.

Withdrawal from Courses

A student enrolled in a course cannot unilaterally withdraw from it but must secure permission from the associate dean to do so, and must follow prescribed withdrawal procedures. A student who is not in good standing in the course at the time of withdrawal (has earned a grade of F at that point) will receive a grade of WF (withdraw failing) for the course.

Activities and Services

- Professional and Social Activities (p. 1642)
- Financial Aid (p. 1641)
- Law Library (<http://catalog.umkc.edu/colleges-schools/law/law-general-information/leon-e-bloch-law-library/>)
- Student Services
- Admission to the Bar (p. 1643)
- Internal Communication (p. 1645)
- Career Services (p. 1643)

Fee Information

Educational fees and student program/use fees are set by the University of Missouri Board of Curators. For the most current fee schedule, contact the Cashier's Office at (816) 235-1365.

Financial Aid

For information on financial aid, contact the UMKC Financial Aid and Scholarships Office at (816) 235-1154 or visit their Web site at <http://www.sfa.umkc.edu> (<http://www.sfa.umkc.edu/>).

Professional and Social Activities

Student Organizations

At UMKC, the law school experience extends far beyond the classroom. We offer many ways for students to get involved through organizations matching a variety of interests within the law school and the larger university community. These organizations are listed at the law school's website.

Scholarly Publications

The UMKC School of Law offers two opportunities for students to develop research, writing and editorial skills through membership on the staff of one of the law school's two journals: the UMKC Law Review and the Journal of the American Academy of Matrimonial Lawyers.

Competitions

UMKC Law School has established a strong tradition of excellence in national and regional skills competitions. Students may participate as a member of one of the law school's various lawyering skills competition teams.

Clinics and Internships

Through its various clinical opportunities the law school serves the urban community and provides important opportunities for students to gain valuable experience. More information can be found at the law school's website.

International Programs

Through its study-abroad opportunities, students at the law school can gain valuable global perspectives on the law. Summer study programs permit students to visit China or Ireland and Wales while semester-long study abroad programs are available for students desiring more in-depth experiences abroad.

Accreditation

The Council of the Section of Legal Education and Admissions to the Bar of the American Bar Association (http://www.americanbar.org/groups/legal_education/about_us/section_staff.html.html) is the recognized national agency for accreditation of J.D. programs. UMKC School of Law is accredited by the American Bar Association and is a member of the Association of American Law Schools.

UMKC LAW SCHOOL POLICY ON STUDENT COMPLAINTS REGARDING ACCREDITATION STANDARDS

UMKC School of Law values student input regarding any aspect of the educational process and encourages students to raise concerns and suggestions at any time with the Dean or any Associate Dean. Students' concerns with accreditation standards or any other matter may often be resolved quickly and directly without the need for formal complaint. If, however, a student believes that his or her concerns regarding the law school's compliance with ABA accreditation standards has not been resolved or chooses to forgo informal complaint mechanisms, the following formal complaint procedure is available.

Student Complaints Regarding Compliance with Accreditation Standards

As an ABA-accredited law school, The University of Missouri-Kansas City is subject to the ABA Standards for Approval of Law schools. The Standards may be found at http://www.americanbar.org/groups/legal_education/resources/standards.html. Any student at the School of Law who wishes to bring a formal complaint to the Administration of the School of Law of a significant problem that directly implicates the School's program of legal education and its compliance with the ABA Standards should take the following steps:

1. The student complaint should be submitted in writing to the Dean or any Associate Dean of the School.
2. The writing should describe in detail the behavior, program, or process complained of, and demonstrate how it implicates the School's program of legal education and the School's compliance with a particular identified ABA Standard.
3. The writing must provide both the name of the student submitting the complaint, the student's official University of Missouri-Kansas City email address, telephone number, and a street address for further communication about the complaint.

Procedures for Addressing Complaints Regarding Compliance with Accreditation Standards:

The Dean to whom the complaint is submitted should acknowledge the complaint within ten business days of receipt of the written complaint or as soon as is reasonably possible under the circumstances. Acknowledgment may be made by email, U.S. mail, or by personal delivery.

Within one month of acknowledgment of the complaint or as soon as is reasonably possible under the circumstances, the Dean or the Dean's designee shall either meet with the complaining student or respond to the substance of the complaint in writing. The student should either receive a substantive response to the complaint or information about what steps are being taken by the School to address the complaint or further investigate the complaint.

Appeals may be taken to the Dean of the School, or, if the Dean of the School has decided the merits of the complaint, to the Executive Committee of the School of Law.

Any decision made on appeal by the Dean or the Executive Committee shall be final.

A copy of the complaint and a summary of the process and resolution of the complaint shall be kept in the office of the Dean of the School of Law for a period of eight years.

The Council of the Section of Legal Education and Admissions to the Bar requires that each law school provide a number of disclosures on its public website. Those disclosures can be found here (<http://law.umkc.edu/aba-required-disclosures/>): <http://law.umkc.edu/aba-required-disclosures>.

Admission to the Bar

Graduation from law school does not guarantee admission to the bar.

In addition to a bar examination, there are character, fitness, and other qualifications for admission to the bar in every U.S. jurisdiction. Applicants are encouraged to determine the requirements for any jurisdiction in which they intend to seek admission by contacting the jurisdiction. Addresses for all relevant agencies are available through the National Conference of Bar Examiners (<http://www.ncbex.org/>).

UMKC invites representatives from the Missouri and Kansas Bar Examiners to visit the Law School, participate in a Bar convocation and provide one-on-one meetings with students requesting them to help in successfully meeting character and fitness requirements.

UMKC's support for its students does not end at graduation. UMKC continues to assist our students as they face the last hurdle to practicing law. The bar examination for any state will be one of the most intellectually challenging experiences of any law school graduate's life. The stakes are high, as is the attendant stress. UMKC aids our students by supplementing their bar preparation from commercial vendors with a unique program focused on the strategies and tactics to focus their preparation in order to pass the bar exam.

Career Services

The Law School Professional and Career Development Center (PCDC) provides career planning, strategy counseling, and employer information to the student body and alumni. PCDC also handles all employer outreach, organizes employer events, teaches strategy workshops, and acts as a liaison to the legal community.

In accordance with Section 6-3 of the Bylaws of the Association of American Law Schools and Standard 211(d) of the American Bar Association, the University of Missouri-Kansas City School of Law is committed to the principle of equal employment opportunity for all its students and graduates, commensurate with their abilities and not limited by invidious discrimination, including discrimination based on, race, sex, age, religion, color, national origin, handicap, disability, sexual orientation, or any basis forbidden by applicable law or university regulation.

Disabled Student Services

The law school provides students with a variety of programs to support their academic success, through the office of students services and the law school strategies program.

The University of Missouri-Kansas City endeavors to make all activities, programs and services accessible to students with disabilities. A campus coordinator is available to assist students with a documented disability to arrange for reasonable accommodations concerning all aspects of campus life. It is recommended that students contact the coordinator at least six weeks prior to the beginning of classes to arrange appropriate documentation and reasonable accommodations in the classroom. For information call (816) 235-5696. Individuals with speech or hearing impairments may use Relay Missouri, 1-800-735-2966 (TT) or 1-800-735-2466 (voice).

History

HISTORY

In 1895, three young lawyers with energy and vision, William P. Borland, Edward D. Ellison and Elmer N. Powell, founded the Kansas City School of Law with the active assistance of leading members of the bench and bar. Borland, the first dean of the school, was elected to Congress in 1910 and

was succeeded by Ellison, who served as dean until the School of Law merged with the University of Kansas City in 1938. After affiliation with the University of Missouri System in 1963, the school assumed its present name as the University of Missouri-Kansas City School of Law.

VISION

To be a model urban public law school for the 21st century that economically and efficiently delivers excellent legal education, serves as an intellectual leader in law, and increases access to justice for our community

MISSION

To prepare students to practice law with the competencies needed to integrate academic theory and practical skills to become expert problem-solvers and trusted advisors who serve their clients and their communities in the interests of justice; to provide expertise to benefit our many constituencies through scholarship and engagement, and to increase access to justice through research and service to our community

VALUES

We value:

- Respect for law and lawyers
- Commitment to the rule of law and to justice
- Professionalism, integrity and excellence in everything we do
- Respect for interdisciplinary understandings in advancing law and effective legal practice
- Creativity and innovation and the role of entrepreneurship in advancing the profession and economic development
- The role of advocacy and persuasion to effect positive resolution of disputes and needed social change
- Diversity of backgrounds and views, inclusion and empowerment, and access to law and legal education
- Service to our constituencies, with particular regard to our urban community and its families and children

Leon E. Bloch Law Library

The Leon E. Bloch Law Library is not only a place to study, but a laboratory for students to master legal research skills, both in traditional print and electronic media. In fall 2011, a newly renovated library space opened. The space is designed to focus on first year legal research and writing and it provides a new collaborative technology learning lab to facilitate mastery of on-line legal research skills. In 2010, space in the first floor of the library was converted to provide three additional study rooms for students and a student lounge.

The library serves as a forum for self-directed learning; a place students take control of their educational experience through researching selected paper topics and their own law review notes.

The library contains holdings in major areas of legal scholarship and practice. It is home to rare, early seventeenth century editions of Sir Edward Coke's treatises and case reports. It also preserves the Charles D. Gould Jr. Collection, consisting of photographs and memorabilia from the Nuremburg trials. The collection focuses on trial advocacy, urban law, family law, small business entrepreneurship, and tax law. The library's foreign law holdings are targeted for expansion and access to historical materials have dramatically expanded. What is not held in print in the library, or in its many database services, is conveniently available through the library's online catalog request and delivery service. This service provides access to seventy Missouri libraries and about 18 million items. The service includes access to the holdings of the three other law school libraries in Missouri.

Additional hard to locate items can usually be retrieved through other specialized interlibrary loan services. Besides its collections, the UMKC's law library is especially strong with respect to the expertise of its librarians, most of whom teach courses in legal research and have practiced law for many years or worked as paralegals.

Electronic Resources

Technology has reshaped legal publishing in ways that will forever alter how attorneys and judges approach their work. The information professionals of the Leon E. Bloch Law Library have embraced this transformation in a variety of ways. The new Courtney Turner Trust Collaborative Technology Classroom allows for creative use of technology using laptops and cutting-edge software in both a classroom setting and for student group study. Stand-alone computers that allow access for research on the Internet, printing, and numerous database services are available as well. A fee is charged for some law student printing and for all other patron printing. The Library also provides a scanner and a dedicated workstation for the visually impaired. In addition, each law student receives a password free of charge for accessing law school and university databases from home or at other locations on campus. Wireless access to the Internet is provided to students throughout the law school and library. Perhaps, unique among law schools, the newly renovated lower level of the Library hosts a free laptop clinic, where law students can go with computer and technology problems, many of which can be fixed at the clinic. In Spring 2012, the Library installed state of the art book scanners on all three library floors. The scanners will provide digitization workflow solutions for library business processes, student needs, and other law school business processes. The scanners can create PDFs, OCR documents, as well as audio files for the visually impaired.

Nondiscrimination Policy

The Board of Curators of the University of Missouri and the University of Missouri-Kansas City are committed to the policy that there shall be no discrimination on the basis of race, color, creed, sex, sexual orientation, age, national origin, disability or Vietnam era veteran status. For additional information, see the Statement of Human Rights information included in the Introduction section of this catalog.

RooLaw

Internal communications at the law school are conducted through the Law School's intranet: mylaw.umkc.edu, also known as RooLaw. RooLaw is used for all communications with large, identifiable groups of students, faculty and staff, serving as the primary (and in many cases only) source of information about official and unofficial happenings at the School. A student's home page is a one stop shop for important information about courses, announcements, events, deadlines and the like.

J.D./MBA and J.D./M.P.A. Combined-degree Programs

The School of Law has established combined-degree programs with the Henry W. Bloch School of Business and Public Administration. The program allows students to earn a juris doctor degree and a master of business administration or a master of public administration degree on an accelerated basis through cross-acceptance of some credit hours.

Applicants to the program must satisfy the admission requirements of each school and, if admitted into the program, may enroll in the first year of law school either before or after beginning M.B.A. or M.P.A. courses.

Student Learning Outcomes

Students will demonstrate mastery of core doctrinal knowledge

Students will demonstrate mastery of the skills necessary for objective legal analysis

Students will demonstrate mastery of the skills necessary for effective legal research.

Students will demonstrate mastery of legal writing across formats

Students will demonstrate mastery of the duties of attorneys as members of the legal profession

Students will demonstrate ability to work with people in a professional environment

Students will demonstrate competency in professional work habits

Students will demonstrate entry-level proficiency in lawyering skills

Juris Doctor Degree

Program Description

The law school's Juris Doctor degree program is designed to prepare students for the general practice of law and for policy-forming functions in government, business and other organizations in society. Courses provide students with a basic knowledge of the principles and processes of the Anglo-American system of law and of the integration of law into other disciplines and institutions.

The curriculum and program recognize that in order to be of the utmost service to clients, the lawyer must "see life whole" and appreciate the relationships among legal, social and political aspects of human endeavor. They also recognize that the best interests of society require a lawyer to be a thinker and scholar as well as a skilled technician.

Both the curriculum and methods of instruction are designed to meet these objectives. Although the casebook method is the predominant form of classroom instruction in larger classes, the faculty also employ other approaches. Classes such as lawyering skills, negotiating mergers and acquisitions, mediation, and law practice management combine theory with opportunities to learn about lawyering first-hand. Many of the classes use documents and "real life" problems to demonstrate concepts studied in class. The curriculum also includes opportunities for research and writing, seminar discussions, clinical instruction and skills training.

Academic Support and Success (p. 1646)

Admission (p. 1646)

Scholarships (p. 1664)

Six-Year Law Scholars Program (p. 1664)

Areas of Study

Law students do not have a formal major, but have options for obtaining sequenced and advanced training in areas of interest to them, including:

- Advocacy and Litigation
- Business and Tax Law
- Commercial Law

- Estate Planning and Administration
- Criminal Law and Procedure
- Domestic Relations
- Labor and Employment
- International Law
- Property and Real Estate
- Civil Liberties and Civil Rights
- Environmental Law

In addition, through externships, competitions, journals and student organizations, students are able to develop skills and contacts in specialized areas of the law.

Students may also elect to participate in one of the Law School's formal areas of emphasis within the Juris Doctor degree program:

- Advocacy (p. 1652)
- Business & Entrepreneurial Law (p. 1655)
- Child & Family Law (p. 1658)
- Intellectual Property (p. 1660)
- International Law (p. 1661)
- Urban, Land Use and Environmental Law (p. 1663)

Academic Support and Success

The School of Law is committed to its students' success. Although the study of law is a difficult and challenging endeavor, the school attempts to work with students to maximize their efforts and see them through the process successfully. Several programs contribute to this effort.

The Law School Strategies Program (<http://law.umkc.edu/prospective-students/studying-law-at-umkc/law-school-strategies-program/>) is a comprehensive program including academic skills lectures and courses, study group opportunities, and individualized assistance.

The Law School Strategies Program is available to all students. It is especially beneficial for those students who feel they need assistance in the transition to law study. The Law School Strategies Program is not remedial in nature. Rather, it is designed to maximize the potential of students who participate by teaching skills and strategies for success in law school.

The program begins with a one-week orientation, during which students are introduced to essential learning strategies for law school. During the academic year, the program director and other faculty provide academic skills lectures and workshops focusing on learning styles, learning strategies, time management and development of skills necessary for law school success.

Study group programs maximize student learning through peer teaching. In Structured Study Groups, first-year students have the opportunity to participate in guided study groups in one of their first-year courses. The groups are led by an upper-class student who has successfully completed that course. The student leader attends the class with the first-year students and conducts weekly small-group sessions in which the leader models successful learning strategies for that class. These year-long study group programs are open to all students.

Admission to the Juris Doctor Program

Eligibility

To be eligible to apply for admission to the School of Law's Juris Doctor (J.D.) degree program, a person must have either:

- A bachelor's degree based on a program of courses with substantial intellectual content from an approved institution; or
- Completed at least 90 acceptable hours of credit in courses with substantial intellectual content in an approved institution, completed all non-elective coursework toward a bachelor's degree and made arrangements with the school that will award the degree to accept law school credits for the remainder of the work required to earn that degree, so that the student will earn the degree prior to the granting of the J.D. degree.

Criteria for Admission

The School of Law restricts the number of students admitted each year in order to maintain a favorable faculty-student ratio and to provide the best possible legal education for each student enrolled. Because many more people apply to the School of Law than there are seats available, admission is competitive.

While substantial weight is given to each applicant's LSAT score and undergraduate GPA, the School of Law and its faculty also consider other factors in shaping an entering class. These factors, consistent with the University's values of diversity, inclusiveness and respect, include:

- Advanced or specialized educational achievement demonstrating potential for academic excellence in the study of law.
- Contributions to the cultural diversity of the School of Law.
- A history of overcoming challenges and barriers based on societal discrimination or economic disadvantage.
- Demonstrated leadership qualities.
- A significant and sustained commitment to public or community service.
- Other accomplishments or qualities that indicate the applicant will contribute to the School of Law's academic and service missions.

Admissions Process

Applicants are required to submit a completed application form, the application fee, a personal statement, a resumé, official copies of all undergraduate and graduate transcripts, and two letters of recommendation. All of these items must be submitted through the Credential Assembly Service provided by the Law School Admission Council (LSAC). Instructions for this service may be found on the LSAC website. Once all materials have been submitted, a file is considered complete and ready for review.

The Admissions Committee invites qualified applicants to have a personal interview as part of the application process. The law school makes admission decisions on a rolling admissions basis. That is, decisions are made as files are completed. This process begins in September of the year preceding the academic year applicants are applying for and continues until sufficient admissions are granted to fill the entering class. Accordingly, applications should be submitted as early as possible.

Seat deposit fees must be paid by specified deadlines to secure a spot as a student at the School of Law. These fees are nonrefundable but will be credited toward the cost of tuition and fees for the first semester of law school classes. Students planning to start law school in the Spring semester typically will have seat deposit fees due in late November. Students planning to start law school in the Summer semester typically will have seat deposit fees due in April. Students planning to start law school in the Fall semester typically will have a first seat deposit fee due in April and a second seat deposit fee due in May. The exact deadlines for seat deposit fees will be specified when an applicant receives an offer of admission from the School of Law.

LSAT/LSAC

In order to gain admission, an applicant must take the LSAT. The test may be taken at various locations, including UMKC. An LSAT score is required to complete the application for admission, and it is the applicant's responsibility to take an LSAT exam that will be scored in time to meet the application deadline. Information concerning the test is available online at <http://www.lsac.org/> or by writing to:

Law School Admission Council (LSAC)
662 Penn Street
Newtown, PA 18940

Applicants also must submit official copies of their college and university transcripts (and graduate school transcripts, if any) to LSAC via their Credential Assembly Service. Further information and a registration form for this purpose may be obtained at the website and mailing address above. LSAC will automatically provide LSAT scores and copies of transcripts to the School of Law once an application has been submitted and processed.

Prerequisites

No undergraduate courses are specifically required for admission to the Law School. The best preparation is a broad liberal arts education designed to provide an understanding of the institutions and values with which the law deals and the development of those skills and habits of thought essential to legal reasoning.

Any course of study leading to an undergraduate degree will be sufficient for admission, as long as the emphasis was an intellectually demanding one that challenged the student to employ critical-thinking skills and communicate effectively. Courses with a strong emphasis on writing are particularly encouraged in light of the crucial role effective writing plays both in law school and law practice.

Matriculation Options: Full-Time and Part-Time Progress

Most students matriculate on a full-time basis. Some students, however, may do so on a part-time basis.

The opportunity to proceed part-time is designed for students who are unable to enroll on a full-time basis, such as those with family or career responsibilities. These students typically enroll in 8 to 9 hours of classes each semester in the first year, and 8 to 12 hours per semester thereafter. In all other respects, students enrolled part-time are required to satisfy all graduation requirements applicable to full-time students, including the requirement that they complete all degree requirements within five years (unless special permission is granted to extend that time limit). Part-time students develop programs with the associate dean that are designed to parallel, as much as possible, the sequence of courses for full-time students.

A full-time student may not become a part-time student without permission of the associate dean. Part-time students may not become full-time students until they have completed all first-year courses, unless they obtain permission to proceed full-time from the associate dean. Once part-time students have completed all required first-year courses, they may enroll full-time or part-time for remaining coursework at their option. Students are

cautioned, however, that enrollment in 13 or more hours triggers the rule limiting outside work to no more than 20 hours per week and full-time first-year law students should not engage in any outside work.

Admission with Advanced Standing

Except for transfer applicants enrolled at the University of Missouri-Columbia (to whom transfer is granted more liberally), an applicant for admission with advanced standing must meet the requirements applicable to entering students; be eligible to return as a student in good standing to their current law school; and present a letter from the Dean of their law school showing such eligibility. Transfer applicants typically have completed one full year of law study, and admission will be largely based on law school academic performance. For transfer applicants seeking to start courses at the School of Law in the Fall semester, an admissions decision generally would be made in the summer, as soon as the application is complete and the applicant's current law school has issued grades for the Spring semester.

When a transfer applicant is admitted, the School of Law will review the work successfully completed by the transfer applicant at other law schools in order to determine how many transfer credits the applicant will be awarded and which of the School of Law's course requirements the applicant has already fulfilled. The School of Law generally will award transfer credit for a maximum of 45 credit hours, but may grant special permission to give transfer credit for more than 45 credit hours.

Except in the case of students transferring from the University of Missouri-Columbia, hours for a course in which the transfer applicant received less than a C grade will not transfer. Although transfer credit will not be given for a course with a grade of C or below, the associate dean may opt to waive the need for a transfer student to retake the course. Grades earned at another law school are not transferred, nor do such grades count for class ranking purposes.

Admission Without Undergraduate Degree (90+ Program)

Students who have completed at least 90 acceptable hours of credit in courses with substantial intellectual content and have completed all non-elective coursework toward a bachelor's degree, may be admitted on the condition that the undergraduate degree be earned prior to or simultaneously with the granting of the J.D. degree. This condition can only be met if the institution which will grant the undergraduate degree will accept credits earned in the UMKC School of Law.

Since the UMKC School of Law does not confer the undergraduate degree and assumes no responsibility in regard to it, it is the duty of the student to make certain that the requirements for the degree are satisfied. Questions concerning requirements for the undergraduate degree or of the transferability of law credits to complete the degree should be directed to the institution granting the undergraduate degree.

A letter from the institution confirming that it will accept credits earned in the UMKC School of Law to complete the undergraduate degree must be submitted as part of the application for admission.

Assistance to Students with Financial Need

There are various government loan programs administered by the UMKC Financial Aid and Scholarships Office. They include the Federal Stafford Subsidized and Unsubsidized Loan Programs, the Perkins Loan Program and the Access Loan Program. The office also administers a limited amount of scholarship funds in which law students may participate.

The following funds administered by the Law School and the Law Foundation provide assistance to students with financial need.

Michael J. Albano Scholarship Fund

The UMKC Alumni Association has provided an endowment honoring Michael J. Albano for need based scholarship awards to Missouri resident students in the School of Law. The recipient must be in the high need category for financial aid.

The James A. Bayless Emergency Loan Fund

A fund established to provide emergency short-term loans for law students.

The Joseph S. Chartrand Memorial Fund

This is a memorial fund established from contributions in memory of Joseph S. Chartrand, an alumnus who taught part-time at the University of Kansas City (UKC was the predecessor to UMKC). The Chartrand fund provides an annual amount to assist students in purchasing law books. Selection is based on applications by both incoming and current students.

The Tiera Farrow Memorial Scholarship

A memorial fund established by Tiera Farrow, a 1903 graduate of the Law School, provides a partial scholarship to a worthy woman law student in need of financial aid. Selection is based on applications by both incoming and current students.

Max Foust Scholarship

Established by colleagues of Max Foust, this scholarship is awarded to a law student with financial need. Preference is given to a student who has experience or skills which can be indicators of success in the area of trial advocacy. Selection is based on applications by both incoming and current students.

Suzanne Gilmore Memorial Scholarship

Family, friends and classmates established this scholarship in memory of Suzanne Gilmore, an alumna of the class of 1991. The scholarship is awarded to an older-than-average law student who is a single custodial parent pursuing a law degree as a second degree. Selection is based on applications by both incoming and current students.

The Hispanic Bar Association of Greater Kansas City Scholarship Fund

The Hispanic Bar association of Greater Kansas City has established a fund to provide scholarships to UMKC School of Law students of Hispanic descent with financial need.

The Elmer B. Hodges Memorial Scholarship

An endowment fund established in the memory of Elmer B. Hodges provides scholarships for second- and third-year law students in need of financial aid.

Kavanaugh Family Trust

The law firm of Kenner & Kavanaugh has provided funding to award a scholarship to one or more worthy law students with financial need.

C.R. Krimminger Scholarships

Established by a gift from C.R. (Law 1934) and Katheryn L. Krimminger, the C.R. Krimminger Scholarships are awarded each year to academically qualified students who demonstrate financial need. An application is required.

Lathrop & Gage Diversity Scholarship

The law firm of Lathrop & Gage has created an endowment for the Law School to fund a scholarship for an outstanding student with financial need whose presence in the school furthers the goal of diversity to which the Law School is committed. Selection is based solely on admission files.

Judge Gene R. Martin Scholarship Fund

The Honorable Gene R. Martin has established a fund to award scholarships to deserving law students based upon need.

John Sublett Logan Scholarship

This scholarship was established by the John Sublett Logan Foundation in memory of Mr. Logan. It is designed to assist students in their legal education who, it is believed, will succeed in the legal profession and will give of themselves and their talents to the community in which they live. Selection is based on applications by incoming students. Preference will be given to those applicants who are natives or permanent residents of the St. Joseph, Missouri area.

The Robert B. McCreight Loan Fund

A memorial fund established by bequest from the estate of Gevene S. McCreight in memory of her husband Robert B. McCreight (Class of 1932), who had a long and distinguished career as an officer and director of stockyard companies and as president of the American Stockyards Association.

The Thomas McMorris, Jr. Scholarship Fund

A scholarship fund for the recruitment of under-represented students enrolling full-time at the School has been established to honor the memory and promote the vision of Thomas McMorris, Jr., who was active in the civil rights' movement and served as president of the local chapter of the NAACP. Mr. McMorris believed that for African-Americans to reach their potential and have a voice, they need to be represented where it matters—in the courtroom, boardroom and at every level of government. Applicants must have an undergraduate grade point average of 3.0 or higher and must demonstrate financial need. Selection is based solely on admission files.

Larence Schrader Scholarship

A fund was established by Diane King to endow a scholarship in her father's memory to assist a worthy student who cares about the law and has a need for financial assistance.

Additional Scholarships

For further information about available scholarships, see the School of Law website.

J.D. Degree Requirements

Student Learning Outcomes

Students graduating from this program will:

- Students will demonstrate mastery of core doctrinal knowledge.
- Students will demonstrate mastery of the skills necessary for objective legal analysis
- Students will demonstrate mastery of the skills necessary for effective legal research.
- Students will demonstrate mastery of legal writing across formats
- Students will demonstrate mastery of the duties of attorneys as members of the legal profession
- Students will demonstrate ability to work with people in a professional environment.
- Students will demonstrate competency in professional work habits
- Students will demonstrate entry-level proficiency in lawyering skills

Required Courses

First Year Required Courses

Full-time students complete the following required courses during the first year.

Full-Time Progress

Code	Title	Credits
Typical Fall Semester		
LAW 8501	Contracts I	3
LAW 8634	Criminal Law	3
LAW 8531	Lawyering Skills I ¹	3
LAW 8541	Property I	3
LAW 8511	Torts	3
Typical Spring Semester		
LAW 8521	Civil Procedure I	3
LAW 8631	Constitutional Law	4
LAW 8502	Contracts II	3
LAW 8532	Lawyering Skills II ¹	2
LAW 8542	Property II	3
Total Credits		30

¹ **Lawyering Skills I and II:** These two first-year courses introduce students to legal reasoning; analytical and critical thinking; case research and analysis; legal writing, including office memoranda, briefs and letters to and on behalf of clients; advocacy; and all forms of legal research. They offer education in many of the fundamental skills and processes of legal practice through a combination of lecture classes and small group sessions. They are required of all first-year law students in order to supply a strong foundation of thinking, research and writing skills upon which all later, advanced courses will depend.

Part-time Progress

Students enrolled on a part-time basis typically take three of the required courses, including Lawyering Skills, in their first year. The remaining courses must be completed in their second year of study.

Other Required Courses

Students must complete the following courses as a condition of graduation:

Code	Title	Credits
Required to be Taken During the Summer Preceding or During the Fall of the Second Year		
LAW 8601	Business Organizations	3
LAW 8552	Federal Taxation	3
LAW 8522	Civil Procedure II	2
Required to be Taken During the Summer Preceding or During the Second Year		
Evidence		3
Required to be Taken Prior to Graduation.		

LAW 8635	Criminal Procedure I	3
LAW 8731	Professional Responsibility	2
A course that fulfills the school's jurisprudential requirement		2-3
Experiential Course or courses (see below)		6
Total Credits		24-25

Experiential Course Requirement

A student must take 6 credit hours in a course or combination of courses that meet the school's experiential course requirement. These courses are primarily clinical, internship, or skills simulation courses. Courses fulfilling the requirement will be designated by the faculty.

Requirements for the J.D. Degree

1. Completion of 91 credit hours, 75 of which must be classroom credits.
2. A cumulative GPA of at least 2.0 (see Administrative Rules and Regulations, Scholastic Probation and Dismissal, in this section)
3. Completion of all required courses (see Required Courses in this section).
4. Fulfilling the school's research and writing requirement. This requires students to have a rigorous writing experience evidencing legal analysis resulting in a paper of professional quality.
5. Regular and punctual class attendance.
6. Successful completion of all coursework within five years from the day students began their course of studies leading toward the degree. A student will not be allowed to enroll in any course after the five-year period, unless an exception is granted by the Student Affairs Committee.

Policy on Certification of Completion of Graduation Requirements for Bar Authorities

The Law School will certify to a state's bar authorities (such as a board of law examiners) that a student has completed degree requirements and is eligible to take a bar exam only if the following conditions have been met.

1. **Graduation Date:** A student will not be certified to take a bar exam prior to the date the student's degree has been awarded. This means that:
 - a. A May graduate's first bar exam cannot be before July of the graduation year.
 - b. An August or December graduate's first bar exam cannot be before February following the graduation year.
2. **Papers:** A student writing a paper for any course (including seminars, independent studies, and all other courses) must submit a complete, finished version of the paper by the following dates. The deadlines apply to papers written to fulfill the Research & Writing (R&W) requirement, but the deadlines also apply to all other papers.
 - a. A student graduating in May and taking the bar exam in July must have every paper completed and submitted to the professor by May 1st of the graduation year.
 - b. A student graduating in December and taking the bar exam the following February must have every paper completed and submitted to the professor by December 1st of the graduation year.
 - c. A professor may set an earlier deadline for a particular course, independent study, paper, or R&W requirement.
 - d. These deadlines are not waivable.
3. **Incompletes:** A student who has an Incomplete for any credit or credits from a previous semester must have all work required to earn the credits completed by the following dates.
 - a. A student graduating in May and taking the bar exam in July must have all work required to earn the credits completed by May 1st of the graduation year.
 - b. A student graduating in December and taking the bar exam the following February must have all work required to earn the credits completed by December 1st of the graduation year.
 - c. A professor may set an earlier deadline for the completion of any work for an Incomplete.
 - d. These deadlines are not waivable.

These deadlines will not apply where the student has an Incomplete for credits from a previous semester only because the student was in a course involving a commitment to do something (such as for a law journal, clinic, or field placement) for multiple semesters and credit is not awarded for the prior semester until the full commitment has been completed.

Note: This policy will be in effect starting with the Spring 2019 semester. It therefore will apply to students graduating in May 2019 and thereafter. A special exception to part 1 of the policy may be made for students graduating in August 2019, allowing those students to be certified to take the bar exam in July 2019, but only if the student completes all work necessary to fulfill all graduation requirements by May 25, 2019.

J.D. Advocacy Emphasis Area Requirements

Emphasis in Advocacy

Admission Requirements

Selection of Students for Admission to the **Emphasis in Advocacy**

- Deadline for admission to the Emphasis in Advocacy program: Students should apply not later than their fifth semester of law school. Decisions as to whether a student will be admitted to the Emphasis in Advocacy will be made in the semester in which the student applies.
- Procedure and Criteria for Selection:
 - The maximum number of students who will be permitted to enter the emphasis each year will be set by the director of advocacy taking into account the ability to provide adequate supervision and advising.
 - The director of advocacy will select the students to be admitted to the program. Criteria to be considered may include previous general academic performance in law school, previous academic performance in courses seen as particularly relevant to advocacy, level of interest, and ability to identify an advisor willing to advise and supervise the student.
 - No student shall be admitted to the Advocacy program unless he or she has a grade-point average of 2.7 or above in all law school classes previously taken.
- Part-time Students and Other Students with Unusual Schedules: The director of advocacy is authorized to make appropriate adjustments in the deadlines for part-time students or other students whose schedules do not substantially conform to the six semester paradigm.

Student Learning Outcomes

Students graduating from this program will:

- Students will demonstrate mastery of core doctrinal knowledge within emphasis area.
- Students will demonstrate mastery of skills necessary for objective legal analysis.
- Students will demonstrate mastery of the skills necessary for effective legal research in the emphasis area.
- Students will demonstrate mastery of legal writing with particular emphasis on persuasive writing.
- Students will demonstrate mastery of the duties of attorneys as members of the legal profession.
- Students will demonstrate ability to work with people in a professional environment
- Students will demonstrate competency in professional work habits
- Students will demonstrate entry-level proficiency in lawyering skills essential to advocacy.

General Requirements

Minimum Total Hours Required

1. A student must take a total of at least 26 hours in approved courses. Approved courses are those listed as "Required Courses," "Grouped Required Courses" and "Elective Courses".
2. No more than three hours of required upper-level courses, (including those used by the student to satisfy the Jurisprudence requirement) may count toward the required 26 hours.
3. A course (including Law 8746) used to satisfy the student's writing requirement (see below) may be counted toward the total hours requirement even if it is also used to satisfy the student's Research and Writing Requirement.

Writing Requirement

1. Each student in the program must complete a written project, approved by an emphasis area supervisor, on a topic dealing directly with litigation.
2. The written project must be of a scope and quality that would satisfy the law school's research and writing requirement for a J.D. degree.
3. The written project may satisfy both the program's requirement and the J.D. requirement.

Practical Skills Component

All students in the program must take either Introduction to Appellate Advocacy or Trial Advocacy I and at least one of the following courses:

- Advanced Legal Writing: Litigation Drafting
- Appellate Advocacy - Ellison Moot Court
- Appellate Advocacy - National Moot Court
- Trial Advocacy II
- Trial Advocacy III

1. Mastery of Clinical Advocacy
2. Lawyering Skills Competition: App. Ad. Team
3. Lawyering Skills Competition: Client Counseling Team
4. Lawyering Skills Competition: Int'l Comm. Arbitration
5. Lawyering Skills Competition: Negotiation Team

Ethics Component

1. Each student in the program must participate in at least one, substantial, non-credit workshop on ethical issues for litigators.
2. Workshops will be organized by the advisors and conducted by faculty, practicing lawyers, or judges.

Research Component

1. Each student in the program must participate in at least one, half-day, non-credit workshop on research materials and sources frequently consulted by litigators on issues directly related to the litigation process.
2. Workshops will be organized by the program advisers and the librarians. They will be conducted by faculty, librarians, practicing lawyers or judges.

Supervising and Advising Component

1. Each student in the program shall be assigned an advisor.
2. Each student in the program shall meet with his or her advisor not less than twice a semester.

Curriculum Requirements

Distribution of Courses

1. Required Courses: All students in the program must take each of the following courses:

Code	Title	Credits
LAW 8521	Civil Procedure – Pleadings, Motions, and Related Matters	3
LAW 8522	Civil Procedure - Jurisdiction	2
LAW 8532	Lawyering Skills II	2-3
LAW 8621	Evidence	3
LAW 8635	Criminal Procedure I	3

2. Grouped Required Courses:

All students in the program must also satisfy the Core Course Requirement, the Advanced Course Requirement, and the Skills Requirement set forth below:

a. Core Course Requirement: All students in the program must take at least two of the following core courses:

Code	Title	Credits
LAW 8636	Criminal Procedure II	3
LAW 8702	Conflict of Laws	1-3
LAW 8706	Class Actions and Multidistrict Litigation	2-3
LAW 8711	Remedies	2-3
LAW 8764	Administrative Law	1-3
LAW 8765	Federal Jurisdiction	2-3
LAW 8822	Post Conviction Remedies	2-3

b. Advanced Course Requirement: All students in the program must take at least one of the following advanced courses:

Code	Title	Credits
LAW 8636A	Federal Trial Practice	2-3
LAW 8732	Lawyers and Dispute Resolution	2-3
LAW 8734	Mediation	2
LAW 8740M	Missouri Civil Procedure	2-3

LAW 8791	Civil Rights	2-3
LAW 8820	Criminal Trial Techniques	2
LAW 8850	Applied Evidence	1-3
LAW 8905	Intellectual Property Litigation	2

c. Skills Requirement: All students in the program must take either Law 8747 Introduction to Appellate Advocacy or Law 8700 Trial Advocacy I and at least one of the following courses:

Code	Title	Credits
LAW 8700	Trial Advocacy I	2
LAW 8703	Trial Advocacy II	2-3
LAW 8704A	Lawyering Skills Competition-Appellate	1-2
LAW 8704C	Lawyering Skills Competition-Client Counseling Team	1-2
LAW 8704N	Lawyer Skills Competition-Negotiation Team	1-2
LAW 8705	Trial Advocacy III	2
LAW 8707C	Advanced Legal Writing: Litigation Drafting	2-3
LAW 8747	Introduction to Appellate Advocacy	1
LAW 8775	Appellate Advocacy National Moot Court Competition	1-2
LAW 8903	Fundamentals of Legal Investigations	2

3. Electives: The following electives may also help satisfy the minimum total hours requirement:

a. Clinics and Externships

Code	Title	Credits
LAW 8637R	U.S. Attorney's Office Law Internship	3-6
LAW 8656	Public Defender Trials Internship	3-6
LAW 8656A	Missouri Attorney General's Office Internship	3-6
LAW 8656C	Jackson County Prosecutor Internship-Family Law Prosecution	1-3
LAW 8656F	Federal Public Defender Internship	3-6
LAW 8656P	Jackson County Prosecutor Internship	3-6
LAW 8662	Federal Court Internship	2-6
LAW 8662F	Family Court Internship	2-6
LAW 8713	Death Penalty Clinic	1-2
LAW 8713P	Wrongful Convictions Clinic	1-6
LAW 8746C	Court Internship	3-6
LAW 8750C	Municipal Internship	1-6
LAW 8752S	Child & Family Services Clinic	1-6
LAW 8768R	Department of Labor Internship	3-6
LAW 8773R	Environmental Law Internship	3-6
LAW 8790	Legal Aid Internship	3-6
LAW 8814E	Unemployment Compensation Clinic - Appellate Practice	2
LAW 8877	Bankruptcy Court Internship	2-6

b. Other Coursework

Code	Title	Credits
LAW 8609	Ethical Issues In Family Law Representation	1-2
LAW 8743	Global Legal Systems	1-3
LAW 8746R	Independent Study	1-3
LAW 8764	Administrative Law	1-3
LAW 8813	Employment Discrimination Law	2
LAW 8858L	Consumer Protection Lab	1

(if approved by student's emphasis area adviser on the basis that the course of study or legal research relates directly to litigation)

LAW 8635S	Wrongful Convictions	2-3
LAW 8635T	Wrongful Convictions II	2-3

LAW 8712	Problems And Issues In The Death Penalty	1-2
LAW 8732R	Intro to the Resolution of International Commercial Disputes	1
LAW 8735	Seminar In Famous Trials	2-3
LAW 8745S	UMKC All Journal Staff	1-4
LAW 8746W	Introduction to Workers' Compensation Law and Practice	1-2
LAW 8881	Seminar on the Supreme Court	2-3
LAW 8911	Winning Voir Dire	1
LAW 8913	Mental Health Investigation 1	1-2

Any other course if, before beginning the course, the student obtains written approval from both the emphasis area adviser in consultation with the associate dean. Such approval shall not be granted unless the adviser can find that, in light of the student's other courses and the student's litigation-related goals, the course will advance the student's study of litigation to an extent equivalent to other litigation electives.

Courses may be added or deleted from the lists contained in sections 1 through 3 above with approval of the advocacy emphasis committee and the faculty.

All emphasis students will be required to develop an electronic portfolio of self-selected documents and videos, and which will include a final skills assessment. Students will present their portfolio before a panel of two or three people including faculty and members of the bar.

Important Note: Because the School is committed to keeping up with changes in the practice of law, the requirements for emphasis areas may change during the course of a student's enrollment at the School. The requirements at the time a student is granted admission into the emphasis area are the requirements that govern completion of the student's emphasis requirements. For possible revised requirements that will take effect with the next academic year, ask the emphasis area advisor for the most recent iteration of requirements. A course not listed above can meet emphasis area requirements if approved by the emphasis area advisors, Professors Sean O'Brien, Mikah Thompson, Michaelle Tobin, Ryan Copus, and Steve Leben.

Graduation Requirements

For a student to be recognized as having graduated with an Emphasis in Litigation, the student must have fulfilled the following requirements:

- The student must have satisfied all general and curriculum requirements set forth above.
- The student must have achieved a grade-point average of at least 3.0 in the field. This grade-point average shall be computed considering all Required Courses, Grouped Required Courses, and Elective Courses in the emphasis taken by the student, including any that exceed the minimum hour requirements for the Emphasis in Litigation.

J.D. Business and Entrepreneurial Emphasis Area Requirements

Emphasis in Business & Entrepreneurial Law

The Emphasis in Business and Entrepreneurial Law program is designed to provide within the J.D. degree a well-rounded course of study for students interested in an emphasis in business law and transactional practice.

Admission

Any candidate for the J.D. degree who has earned passing grades in the Business Organizations and Federal Taxation courses may apply for the Emphasis in Business and Entrepreneurial Law program.

The deadline for application to the program shall be no later than the beginning of the second week of classes of the student's sixth semester of law school. Any student who applies after the beginning of his or her fourth semester must demonstrate that the program can be completed by the end of the sixth semester of law school. Appropriate adjustments will be made to deal with part-time students not on the regular semester schedule. Exceptions to the deadlines may be made with approval of the Emphasis Faculty Advisors, Professors Chris Hoyt, Anthony Luppino, Del Wright and Dani Merrick, by majority vote.

Student Learning Outcomes

Students graduating from this program will:

- Students will demonstrate mastery of core doctrinal knowledge within emphasis area
- Students will demonstrate mastery of skills necessary for objective legal analysis.
- Students will demonstrate mastery of the skills necessary for effective legal research in the emphasis area.
- Students will demonstrate mastery of legal writing with particular emphasis on transactional drafting.
- Students will demonstrate mastery of the duties of attorneys as members of the legal profession.
- Students will demonstrate ability to work with people in a professional environment

- Students will demonstrate competency in professional work habits
- Students will demonstrate entry-level proficiency in lawyering skills especially relevant to the emphasis area.

Requirements

Minimum Total Hours Required

The program will require satisfaction of the required courses (Group A) and a minimum of 9 credit hours of courses from the approved elective courses (Group B) listed below. Any course in Group A or B may be counted toward the required total hours even if it is also used to satisfy the student's Emphasis Research and Writing Requirement.

Writing Requirement

Students must complete an academic research paper of high professional quality, concerning a business or entrepreneurial law topic. The research paper must be certified as acceptable by one of the Emphasis Faculty Advisors. Students may fulfill this requirement, with a research paper on a business or entrepreneurial law topic, in conjunction with any of the Group A or B courses, or independently as part of the general J.D. Research and Writing Requirement, as part of an Independent Study option, or through one of the Law Schools' journal offerings. There is no separate requirement that the research paper be graded.

Practical Skills Requirement

Students must complete at least one course containing a substantial practical skills component. The following courses satisfy this requirement:

Code	Title	Credits
LAW 8601L	Transactional Lawyering Skills Lab	1
LAW 8638R	Entrepreneurial Lawyering: Solo And Small Firm Practice	3
LAW 8707B	Advanced Legal Writing: Business Contract Drafting	3
LAW 8757	Business Planning	2-3
LAW 8757R	Entrepreneurial Law & Practice Clinic	2
LAW 8837	Negotiating Mergers And Acquisitions	2-3
LAW 8875	Real Estate Transactions	2-3

Also, an Advanced Research course on business, tax or securities law, or on another area of law approved by the Emphasis Faculty Advisors

In lieu of one of those courses, the Practical Skills Requirement may be met by such other internships, externships, simulation courses, drafting courses, or other courses designed to provide exposure to the type of work commonly performed by lawyers in the business and entrepreneurial law field, as the Emphasis Faculty Advisors find acceptable.

Ethics Requirement

Each candidate for the Emphasis must attend at least four clock hours of these ethics offerings prior to graduation, provided through lectures, seminars, workshops, or other instruction dealing with ethical issues that frequently arise in the business and entrepreneurial law field, as approved by the Emphasis Faculty Advisors.

Research Requirement

All students in the program must satisfy an advanced research requirement which provides familiarity with materials and sources frequently consulted by lawyers practicing in the business and entrepreneurial law field. Subject to approval by the Emphasis Faculty Advisors this may entail a separate course, a component of an existing course, a separate lecture, seminar or workshop offering, or demonstrably satisfactory training on advanced research in connection with the Emphasis Writing Requirement.

Curriculum Requirements

Prerequisites or Co-requisites

Code	Title	Credits
LAW 8552	Federal Taxation	3
LAW 8601	Business Organizations	3

Required Courses(Group A) (All must be taken on a graded basis unless otherwise approved by the Emphasis Faculty Advisors)

Code	Title	Credits
LAW 8720 or LAW 8861	Secured Transactions Real Estate Finance	3
LAW 8758S	Securities Regulation	2-3
LAW 8838L	Legal Accounting (or other approved prior accounting education)	1

LAW 8886 & LAW 8888R or LAW 8603	Corporate Taxation I and Partnership Taxation I Taxation Of Business Organization	2-3
--	---	-----

Grouped Required Courses (Group B) (Must take at least 9 credit hours, all taken on a graded basis, from among these courses)

Code	Title	Credits
LAW 8590 or LAW 8763	Special Topics Labor Law	1-6
LAW 8601L	Transactional Lawyering Skills Lab	1

LAW 8837	Negotiating Mergers And Acquisitions	2-3
LAW 8861 or LAW 8875 or LAW 8875L	Real Estate Finance (if not taken to satisfy Group A course) Real Estate Transactions Legal Context of Real Estate Decision Making	2-4
LAW 8874	Tax-Exempt Organizations	2
LAW 8876	Sales and Leasing	1-3
LAW 8898	Construction Law	2
LAW 8901	Advising Life Sciences and Technology Entrepreneurs	1-2

If a Group B course is properly counted toward the 9 credit hour Group B requirement and also listed above as a course satisfying the Practical Skills Requirement, it may be applied to satisfaction of both the those requirements. A course listed above as a course satisfying the Practical Skills Requirement but not listed as a Group B course may not be applied to satisfaction of the Group B requirement.

Graduation

For a student to be recognized as having graduated with an Emphasis in Business and Entrepreneurial Law, the student must have achieved a grade-point average of at least 3.0 in the minimum number of Emphasis course requirements listed as Required (Group A) or Grouped Required (Group B); provided that a student may, at the student's option, omit a grade received in either Corporate Tax or Partnership Tax, while still counting the course to reach the required number of academic credit hours for the Emphasis; and that a student may also omit any grade received in any Grouped Required

(Group B) course, so long as the student has grades from at least 9 credit hours of other Group B courses properly included and counted in the grade point average necessary for the Emphasis.

Important Note: Because the School is committed to keeping up with changes in the practice of law, the requirements for emphasis areas may change during the course of a student's enrollment at the School. The requirements at the time a student is granted admission into the emphasis area are the requirements that govern completion of the student's emphasis requirements. For possible revised requirements that will take effect with the next academic year, ask the emphasis area advisor for the most recent iteration of requirements. A course not listed above can meet emphasis area requirements if approved by the emphasis area advisors, Professors Chris Hoyt, Anthony Luppino, Del Wright, and Dani Merrick.[LN1] (p.)

J.D. Child & Family Law Emphasis Area Requirements

UMKC School of Law Emphasis in Child and Family Law

The UMKC School of Law Emphasis in Child and Family Law prepares students to serve the whole family – from infants to elders – and maintains a unique collaborative and interdisciplinary framework. The emphasis program requires that students master the basic doctrine and legal theories involved when the legal system interacts with families. In addition, however, students undertake study exposing them to the perspectives of other disciplines such as psychology and social work. Students study the unique ethical dilemmas of this area of law and gain hands-on experience in representing children and families in the program's clinical components. Finally, all students in the emphasis complete an in-depth capstone research and writing project and a portfolio presentation.

Admission Requirements

Students may apply after completing their second semester (or 29 credit hours). Students who are close to completing the hourly requirements may petition for early admission for good cause shown.

An application form will be available and must be submitted by the deadline announced by the Child and Family Law Faculty. Decisions as to whether a student will be admitted to the Emphasis in Child and Family Law will be made in the semester in which the student applies.

Procedure and Criteria for Selection:

The Child and Family Law Faculty will select the students to be admitted to the program. Criteria to be considered may include previous general academic performance in law school, previous academic performance in courses seen as particularly relevant to the emphasis area, level of interest in serving children or families, and availability of an advisor to advise and supervise the student.

The Child and Family Law Faculty is authorized to make appropriate adjustments in the deadlines for part-time students or other students whose schedules do not substantially conform to the six-semester paradigm.

Student Learning Outcomes

Students graduating from this program will:

- Research, identify issues, analyze, and apply core legal doctrines relating to families and children
- Prepare professional letters, pleadings, agreements, and other legal documents necessary for child and family law practice
- Speak and listen respectfully and effectively with families and children, counsel their clients competently, and interact effectively on their behalf with lawyers and other professionals
- Identify and resolve ethical issues and act in conformity with the rules of professional regulation
- Demonstrate entry-level proficiency in client counseling, and courtroom advocacy.

General Requirements

Curriculum Requirements

Of the 15 hours required for the emphasis, the student must complete

Code	Title	Credits
LAW 8751	Family Law	3
LAW 8752S	Child & Family Services Clinic	1-6
LAW 8733	Children In The Law	2-3
LAW 8751S	Family Violence	2-3

The remainder of the required credit hours from other core curriculum courses or a list of elective courses (listed below)

Prerequisite Course

All students in the emphasis must take Family Law. Because this foundational course is a prerequisite for most other courses in the emphasis, students accepted for the emphasis will be given a priority in enrollment in the course.

Code	Title	Credits
LAW 8751	Family Law	3

Jurisprudence Requirement

Students must fulfill their Jurisprudence requirement through Gender and Justice unless approval is given for another course by the Child and Family Law Faculty.

Code	Title	Credits
LAW 8714	Gender and Justice	2-3

Clinical Requirement

All students in the Child and Family Law program must successfully complete the Child & Family Services Clinic.

Code	Title	Credits
LAW 8752S	Child & Family Services Clinic	1-6

Elective Courses

Code	Title	Credits
LAW 8590	Special Topics	1-6
LAW 8611L	Estates and Trusts Lab	1-3
LAW 8617R	Elder Law For Estate Planners	1
LAW 8732C	Cross-Cultural Dispute Resolution	2-3
LAW 8733E	Elder Law	2-3
LAW 8733R	Juvenile Offenders & The Law	2-3
LAW 8734	Mediation	2
LAW 8738	Immigration Law And Process (if approved by Child and Family Law advisor)	2-3
LAW 8746R	Independent Study	1-3
LAW 8752G	Guardian Ad Litem Workshop	1-2
LAW 8752R	Family Law Practice	2
LAW 8778	American Academy Matrimonial Lawyers Board	2
LAW 8815R	Disabilities And The Law	2-3
LAW 8815S	Leadership In Disability Studies: A Multidisciplinary Approach	3-4
LAW 8870R	Education Law: Government & Legal Aspects Of Education	2-3
LAW 8908	Family Tax Law	1

Field Placement courses with the permission of the Child and Family Law Faculty

Miniterm courses if approved by the Child and Family Law Faculty. In the past, these have included: Poverty Law, Violence Against Women Act, Law & Human Trafficking, and Family Law and Film

Any other law school course if, before beginning the course, the students obtains written approval from the Child and Family Law Faculty. Such approval shall not be granted unless the Child and Family Law Faculty find that, in light of the student's other courses and the student's goals in the emphasis study, the course will advance the student's study of Child and Family Law to an extent equivalent to other Child and Family Law electives.

Courses may be added or deleted from the lists contained in the sections above with approval of the Child and Family Law Faculty.

Writing Requirement

A paper on a Family Law related topic satisfied through:

A seminar course, R & W (LAW 8746), Independent Study (LAW 8746R) or a Journal note/comment for Law Review or the Journal of the American Academy of Matrimonial Lawyers

Ethics Requirement

Satisfied through separate assessment focused on ethical issues in family representation

Graduation Requirements

For a student to be recognized as having graduated with an Emphasis in Child and Family Law, students must have

- timely completed all emphasis requirements
- made application at the time of graduation
- received the approval of a member of the Child and Family Law faculty of the student's portfolio, and
- earned a 3.0 grade point in emphasis course work (required and elective courses). This grade-point average shall be computed considering all Required and Elective Courses in the emphasis taken by the student, including any that exceed the minimum hour requirements for the Emphasis

Important Note: Because the School is committed to keeping up with changes in the practice of law, the requirements for emphasis areas may change during the course of a student's enrollment at the School. The requirements at the time a student is granted admission into the emphasis area are the requirements that govern completion of the student's emphasis requirements. For possible revised requirements that will take effect with the next academic year, ask the emphasis area advisors for the most recent iteration of requirements. A course not listed above can meet emphasis area requirements if approved by the emphasis area advisors, Yvette Lindgren, Mary Kay O'Malley, and Barbara Glesner Fines.

J.D. Intellectual Property Emphasis Area Requirements

Student Learning Outcomes

Students graduating from this program will:

- Be able to identify legal issues in intellectual property practice and apply basic principles of intellectual property law necessary to resolve those issues. Assessed by essay tests, graded with rubrics, in required courses.
- Be able to use specialized knowledge of intellectual property doctrine to resolve emerging issues in the field. Assessed by tests or papers, graded with rubrics, in elective courses.
- Be able to research advanced topics in the field and use that research to solve a focused, complex issue in the field. Assessed by faculty critique of the research paper requirement and re-writing until paper is of faculty-agreed standard of quality.

Student will have to take a total of 16 credit hours from the below mandatory and elective courses. All courses must be taken for a grade (with the exception of those courses for which a grade option is unavailable).

Required

Code	Title	Credits
The following class must be taken:		
LAW 8808	Intellectual Property Law	2-3
At least two of the following must be taken:		
LAW 8797	Business Torts and Unfair Competition	2-3
LAW 8798	Copyright Law	2-3
LAW 8882	Patent Law	2-3

Electives (The remaining hours to be satisfied from the following)

Code	Title	Credits
LAW 8798A	Art Law	2-3
LAW 8808L	Intellectual Property Licensing	2-3
LAW 8808S	Intellectual Property Remedies	2-3
LAW 8853	Seminar in Law Science & Technology	2-3
LAW 8882R	Patent Prosecution	2-3
LAW 8901	Advising Life Sciences and Technology Entrepreneurs	1-2
LAW 8905	Intellectual Property Litigation	2
LAW 8907	Seminar in Advanced Trademark	2-3

No more than one of the following can count toward the required 16 credit hours: LAW 8910 Intellectual Property Clinic, Technology Transfer Externship, or LAW 8757N Entrepreneurship & New Venture Creation (with IP faculty advisor approval).

Other courses may be approved by the IP faculty advisor to count towards the Emphasis. Where a course includes a substantial component of IP law, part of that course may count towards the 16-hour requirement with advance approval from the IP faculty advisor.

The above requirements are in addition to any hours received in connection with completion of the Advanced Research Requirement (See below).

Advanced Research Requirement

A paper satisfying the R&W requirement or an equivalent independent study writing project (including law review notes or comments) must be undertaken by writing on an IP subject, which subject has been approved by the student's IP faculty advisor. This requirement may also be satisfied through the writing of a professional quality brief as a team member in the Giles Sutherland Rich Memorial Moot Court Competition or, with the approval of the student's IP faculty advisor, by writing of a professional quality brief in another equivalent IP competition that has a brief writing component.

Class papers do not satisfy this requirement, but may be expanded as an independent paper or the R&W paper, with approval of the IP faculty advisor, the expanded paper may satisfy this requirement. Any credits earned through satisfaction of this writing requirement will NOT be counted towards the 16 hours.

Practical Skills Requirement

Students must complete at least one course containing a substantial practical skills component. A course used to satisfy the practical skills requirement can also count toward the 16 hours of required coursework. The following courses satisfy this requirement:

Code	Title	Credits
LAW 8757N	Entrepreneurship & New Venture Creation (with IP faculty advisor approval)	3
LAW 8910	Intellectual Property Clinic	2
LAW 8808L	Intellectual Property Licensing	2-3
LAW 8905	Intellectual Property Litigation	2
LAW 8882R	Patent Prosecution	2-3
Technology Transfer Externship		

Alternatively and with approval of the IP faculty advisor, the requirement may be met by other internships, externships, moot courts, simulation courses, drafting courses, or other courses or activities designed to provide exposure to type of work we performed as IP lawyers in the field.

Ethics Requirement

Ethical considerations will be incorporated into the listed required emphasis area courses.

Important Note: Because the School is committed to keeping up with changes in the practice of law, the requirements for emphasis areas may change during the course of a student's enrollment at the School. The requirements at the time a student is granted admission into the emphasis area are the requirements that govern completion of the student's emphasis requirements. For possible revised requirements that will take effect with the next academic year, ask the emphasis area advisor for the most recent iteration of requirements. A course not listed above can meet emphasis area requirements if approved by the emphasis area advisors, Professors Jasmine Abdel-khalik, Chris Holman, and Paul Callister.

J.D. International Law Emphasis Area Requirements

Admission Requirements

After their first year, students may be admitted to the International Law Emphasis.

Student Learning Outcomes

Students graduating from this program will:

- Students will demonstrate mastery of core doctrinal knowledge within emphasis area
- Students will demonstrate mastery of skills necessary for objective legal analysis. This is a general student learning outcome for the JD degree and is assessed through essay examinations graded using rubrics in required courses and through performance on licensing examinations.
- Students will demonstrate mastery of the skills necessary for effective legal research in the emphasis area.
- Students will demonstrate mastery of legal writing in the emphasis area.
- Students will demonstrate mastery of the duties of attorneys as members of the legal profession.
- Students will demonstrate ability to work with people in a professional environment
- Students will demonstrate competency in professional work habits
- Students will demonstrate entry-level proficiency in lawyering skills especially relevant to the emphasis area.

Program Requirements

Courses:

Student will have to take a total of 16 credit hours from the below mandatory and elective courses.

Code	Title	Credits
Required Course		
LAW 8753	International Law	2-3
Additional Required Courses (must take one of the following):		1-4.5
LAW 8743	Global Legal Systems	
LAW 8754	International Business Transactions	
LAW 8738R	Chinese Law	
LAW 8743C	Comparative Criminal Law	
or LAW 8735R	Law Of The European Union (Part I)	
or LAW 8737R	Law Of The European Union (Part II)	

Electives:

The remaining credit hours (10) must be satisfied from the following courses (note: not all below are offered every year):

Code	Title	Credits
LAW 8702	Conflict of Laws	1-3
LAW 8704A	Lawyering Skills Competition-Appellate	1-4
or LAW 8704I	Lawyering Skills Competition	
LAW 8738P	Immigration Law and Policy	2-3
or LAW 8738	Immigration Law And Process	
LAW 8753L	Transnational Litigation & Arbitration	2-3
LAW 8754	International Business Transactions	2-3
LAW 8831R	International Human Rights Law	1-3
LAW 8832	Law Of International Trade And Finance	3
LAW 8883	Seminar In National Security Law	2-3
LAW 8904	Multicultural Lawyering and Spanish for Lawyers	1-2
International Law		2-3

Courses offered as part of an approved overseas experience (while typically only one approved overseas experience will count towards the emphasis, the International Law Faculty may, in his or her discretion, count additional credits earned from other overseas experiences. Other Courses may be approved by the International Law Faculty to count towards the Emphasis. Where a course includes a substantial component of comparative and/or foreign law, part or all of that course may count towards the 16 hour requirement with advance approval from the International Law Faculty.

Required Overseas Legal Experience

This would include such experiences as:

- The **Ireland, China, Oxford** or other law summer programs; or
- An **overseas Mini-Term** course (if offered); or
- Another experience approved in advance by the ICF advisor.
These experiences may constitute a “skills” component, depending on the specifics of the experience.

Required Writing Project:

- A paper satisfying the R&W requirement or an equivalent independent study writing project (including Law Review Comments) must be undertaken by writing on an international or comparative law subject (subject to be approved by the International Law Faculty advisor).
- This requirement may also be satisfied through participation on the Jessup International Moot Court Team or other equivalent international competition with approval of the International Law Faculty advisor.
- Class papers do not satisfy this requirement, but may be expanded as an independent paper or the R&W paper, and with approval of the International Law Faculty advisor, the expanded paper may satisfy this requirement. Any credits earned through satisfaction of this writing requirement will **NOT** be counted towards the 16 hours.

Graduation Requirement

To graduate with the International Law Emphasis, students must have a minimum GPA within the emphasis area of 3.0.

Important Note: Because the School is committed to keeping up with changes in the practice of law, the requirements for emphasis areas may change during the course of a student's enrollment at the School. The requirements at the time a student is granted admission into the emphasis area are the requirements that govern completion of the student's emphasis requirements. For possible revised requirements that will take effect with the next academic year, ask the emphasis area advisor for the most recent iteration of requirements. A course not listed above can meet emphasis area requirements if approved by the emphasis area advisors Timothy Lynch, Jeffrey Thomas, and Rana Lehr-Lehnardt.

J.D. Urban, Land Use and Environmental Law Emphasis Area Requirements

UMKC students can engage in a course of study within the J.D. degree with an emphasis in Urban and Land Use Law, Environmental Law or both.

Admission Requirements

Students in their second or third year may elect to specialize in the "Urban, Land Use and Environmental Law" curricular emphasis program. To do so, a student should apply no later than the end of the second year. Advice about compliance with the requirements is available from the Emphasis Faculty Advisors Professors Julie Cheslik, John Ragsdale, and Irma Russell.

Student Learning Outcomes

Students graduating from this program will:

- Students will demonstrate mastery of core doctrinal knowledge within emphasis area
- Students will demonstrate mastery of skills necessary for objective legal analysis.
- Students will demonstrate mastery of the skills necessary for effective legal research in the emphasis area.
- Students will demonstrate mastery of legal writing.
- Students will demonstrate mastery of the duties of attorneys as members of the legal profession.
- Students will demonstrate ability to work with people in a professional environment
- Students will demonstrate competency in professional work habits
- Students will demonstrate entry-level proficiency in lawyering skills especially relevant to the emphasis area.

Program Requirements

Minimum Total Hours Required

Students must complete at least 15 semester hours of approved course work in the emphasis including at least two of three Group A Core Courses, at least two Group B Specialized Courses, and at least one Group C Elective and Interdisciplinary Courses. All courses used to satisfy the emphasis requirements must be taken for a grade (with the exception of those courses for which a grade option is not available) and a grade of B- or higher must be earned.

Advanced Research and Writing Requirement

Students must complete an academic research paper of publishable quality concerning a topic within the purview of the emphasis area. This requirement may be filled (1) in conjunction with any of the approved emphasis courses, (2) as part of the law school's Research and Writing requirement, (3) as part of an Independent Study, (4) through one of the Law School's journal offerings, or (4) through a research project pursued through an internship, externship or other practical experience. Emphasis faculty advisors must approve of the topic and paper quality in order to satisfy this requirement.

Practical Skills Requirement

Students must satisfactorily complete a one-semester practical skills experience or its equivalent. The following coursework and clinics satisfy this requirement:

Code	Title	Credits
LAW 8773C	Environmental Compliance Auditing and Permitting	3
LAW 8773N	Negotiating SuperFund Settlements	1-2
LAW 8773R	Environmental Law Internship	3-6
LAW 8921	Selected Projects in Law, Technology and Public Policy	1-6
LAW 8925	Entrepreneurial Urban Development	1-4
Abandoned Housing Clinic		

EPA Law Clinic Region VII, EPA Law Clinic Agricultural Center, and placement with an approved governmental or other private or public agency including the City of Kansas City and other entities as approved by a Emphasis Faculty Advisor.

Course Requirements

Code	Title	Credits
Group A: Core Courses; must take a minimum of two:		2-6
LAW 8764	Administrative Law	
LAW 8766	Land Use Law	
LAW 8773	Environmental Law	
Group B: Specialized Courses; must take a minimum of two:		2-8
LAW 8725	Water Law	
LAW 8725E	Energy Law	
LAW 8728	Law And The American Indian	
LAW 8765	Federal Jurisdiction	
LAW 8783P	Preservation of Land & Natural Resources	
LAW 8783	Federal Public Land & Resource Law	
LAW 8783P	Preservation of Land & Natural Resources	
LAW 8848R	State And Local Taxation	
LAW 8861	Real Estate Finance	
LAW 8863	Fair and Affordable Housing Seminar	
LAW 8870	Seminar in Educational Equality and the Law	
LAW 8875	Real Estate Transactions	
LAW 8898	Construction Law	
Group C: Elective and Interdisciplinary Courses; may count one additional course from Group C		1-6
LAW 8641R	Legislation	
LAW 8706	Class Actions and Multidistrict Litigation	
LAW 8734	Mediation	
LAW 8771	Public Finance	
LAW 8773C	Environmental Compliance Auditing and Permitting	
LAW 8773N	Negotiating SuperFund Settlements	
LAW 8773R	Environmental Law Internship	
LAW 8783B	Buffalo National River: Issues in National Park Law & Management	
LAW 8796	Economics And The Law	
LAW 8870R	Education Law: Government & Legal Aspects Of Education	
LAW 8900	Takings Law	
LAW 8909	State and Local Government Law in a Nutshell	
LAW 8921	Selected Projects in Law, Technology and Public Policy	
LAW 8925	Entrepreneurial Urban Development	
Any graduate level course in PUB-ADM		
Any graduate level course in RL-EST		

Important Note: Because the School is committed to keeping up with changes in the practice of law, the requirements for emphasis areas may change during the course of a student's enrollment at the School. The requirements at the time a student is granted admission into the emphasis area are the requirements that govern completion of the student's emphasis requirements. For possible revised requirements that will take effect with the next academic year, ask the emphasis area advisor for the most recent iteration of requirements. A course not listed above can meet emphasis area requirements if approved by the emphasis area advisors, Professors Julie Cheslik, John Ragsdale, and Irma Russell.

Scholarships

Scholarship information is available at the law school's website (<http://law.umkc.edu/prospective-students/financial-aid/scholarships/>) at <http://law.umkc.edu/prospective-students/financial-aid/scholarships/>.

Six-Year Law Scholars Program

For information on the six-year law scholars program, see the Pre-Law (p. 951) section of the catalog.

LL.M./M.P.A. Combined Degree Program

A combined LL.M./M.P.A. degree program between the School of Law and the Henry W. Bloch School of Business and Public Administration can be arranged with the approval of the Law School graduate studies committee.

Master of Laws Degree

Eligibility for the LL.M. Program

The School of Law offers two graduate study programs in law leading to the master of laws degree: the LL.M. (Taxation); and the LL.M. in Law (General). The Master of Laws permits students to emphasize their study in one of eight emphasis areas or in an areas of the student's choice based on the curriculum, subject to approval by the student's academic advisor and to availability of courses. An emphasis area is elective and is not required. Admission to the LL.M program in taxation is limited to applicants who have attained the juris doctor or equivalent degree from an approved law school and who have a law school GPA of at least 2.7 on a 4.0 scale.

Admission to the Master of Laws requires a degree in law which may be a bachelor's degree, an LL.B., a juris doctor or some other law degree from an accredited or similarly recognized institution. The Master of Laws (General) does not have a minimum GPA requirement, but academic performance is a significant consideration in the admissions decision. If the law degree was obtained at an institution where the language of instruction is not English, the applicant must also demonstrate English competency through either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) examinations and in an admissions interview. Successful applicants typically have a minimum TOEFL score of 550 on the paper exam or 80 on the Internet version, or a minimum IELTS score of 5.5, but not all students with scores that meet the minimum requirements will be admitted. In some cases, the School of Law will require additional English student at UMKC prior to the start of the LL.M. program as a condition of admission.

Admissions Process

An LL.M. admission application, application fee and official law school (if applicable) and undergraduate transcripts must be submitted for admission. In addition, the Master of Laws requires a personal statement and one letter of recommendation. International students whose first language is not English or whose law instruction was not in English also must provide an office TOEFL or IELTS score, literal English translations of academic credentials that are not in English, a copy of the biographical information page from the applicant's passport, and an original or certified copy of a financial statement proving financial ability to pay the first year of educational and living expenses. If a letter of support is provided for the financial proof, the letter must be notarized and must explain the relationship between the sponsor and the applicant. Documents that are not in English must be accompanied by an English translation. International students also must have an interview with the Director or Associate Director of the LL.M. as part of the application process.

There is no formal application deadline for the LL.M. program in taxation, but early submission of applications is recommended.

The application deadline for the Master of Laws is March 1 to allow time for international students to obtain their visas, but applications are accepted after the deadline subject to availability in the entering class.

Academic Rules and Regulations (p. 1666)

Scholarships (p. 1666)

Master of Laws Degree Requirements

1. Completion of 24 credit hours. For taxation, 18 of the 24 credit hours must be taken from the list of required and elective courses provided for each program. For the Masters of Laws, the student must take four required courses (unless an equivalent course was taken in an accredited U.S. J.D. program), and elective courses as required for the specific emphasis area or as approved by the academic advisor.
2. A cumulative GPA of at least 2.7 is required for the LL.M. (Taxation), and 2.0 for the Master of Laws.
3. Completion of all required courses. See the "Required Courses" for each program.
4. Enrollment in a minimum of 2-4 credit hours each semester.
5. For any of the emphasis areas in the LL.M. program, each student will be required to complete an internship. That internship will need to be approved as appropriate by the academic advisor.
6. Successful completion of all coursework (including thesis, if applicable) within three years from the beginning of the course of studies leading toward the degree.

Upon enrollment in the graduate program, a student is assigned a faculty advisor. In consultation with the advisor, the student develops a plan of study that meets the requirements for the degree in the program area selected. The advisor must approve enrollment in all courses. Post-J.D. study may be undertaken on a non-LL.M. basis. Applicants who wish to obtain an LL.M. degree but who do not have the required grade-point average may be permitted to enroll as a non-degree candidate. They may be considered for later admission to the degree program on the basis of performance in courses taken as a non-degree candidate. Additional information on the specific programs, can be found at the law school's website. (<http://law.umkc.edu/prospective-students/llm-program/>)

LL.M. Academic Rules and Regulations

Appeal of Grades,

The rules and regulations for the LL.M. programs in regard to appeal of grades is the same as specified for the Juris Doctor degree program.

Scholastic Probation and Dismissal

A student will be placed on scholastic probation whenever the student's GPA falls below 3.0 for the LL.M. (Urban Affairs), 2.7 for the LL.M. (Taxation) or when a student fails to earn at least a grade of Credit in one course for the LL.M. in Lawyering. For the LL.M. programs in taxation and urban affairs, a student on probation must attain the required cumulative GPA by the end of the next semester of coursework, or, unless an exception is made by the Graduate Studies Committee, the student will be dismissed from the program for academic deficiency. For the LL.M. in Lawyering, a student who fails to obtain a grade of at least Credit in a second course will be dismissed from the program for academic deficiency.

Attendance, Examinations and Grades, and Withdrawal from Courses

The rules and regulations for the LL.M. programs in regard to attendance; examinations and grades; and withdrawal from courses are the same as specified for the Juris Doctor degree programs, unless modified by the student's LL.M. advisor with the consent of the graduate studies committee.

LL.M. Scholarships

Scholarship information is available at the law school's website (<http://law.umkc.edu/prospective-students/financial-aid/scholarships/>) at <http://law.umkc.edu/prospective-students/financial-aid/scholarships/>.

Master of Laws

Student Learning Outcomes

Students graduating from this program will:

- 1. Law Skills. All LL.M. in Law students will acquire or improve the following legal skills: the ability to read and analyze legal texts, including cases; the ability to conduct legal research on U.S. law sources; the ability to spot legal issues raised by typical legal problems; the ability to apply the law to factual scenarios; the ability to analyze legal issues and predict likely judicial outcomes; the ability to communicate legal analysis clearly in writing and orally; the ability to interview witnesses and clients; the ability to counsel clients with legal analysis and legal options; the ability negotiate a legal issue or problem with an adversary; the ability to make persuasive arguments based on the combination of law and facts.
- 2. Legal English. For those students who were trained in law outside of the U.S. or another English-speaking, common law country, they will develop a working knowledge of key legal English terms used in law practice in the United States.
- 3. Knowledge of U.S. Law. Students in the LL.M. in Law program will learn or deepen their understanding of U.S. law generally and in particular sub-areas of U.S. law in one of the emphasis areas or such other area or combination of areas selected by the student with the approval of the academic advisor.

Required Coursework

Law 8730I Introduction to American Law & Culture

Law 8531I Common Law, Legal Writing and Analysis

Law 8532I Introduction to American Legal Skills

Law 8532R American Legal Research

Emphasis Areas

For an emphasis, a student must earn at least 12 credit hours towards the LL.M. in Law in courses that will support the emphasis area. Students also must complete a significant writing project, academic or professional, which may be undertaken in connection with a course, as an independent study, or in connection with a thesis.

The following emphasis areas are available: Business and Entrepreneurial Law (p. 1667), Child and Family Law (p. 1668), Criminal Law (p. 1669), Intellectual Property Law (p. 1669), International Law (p. 1670), Litigation (p. 1670), Tax Law (p. 1671), and U.S. Law (p. 1672). Some courses have been pre-approved as supporting these emphasis areas, and others may be approved by the student's academic advisor. Students are not required to select an emphasis area, but may choose a different course of study with approval of the academic advisor. Course schedules change on an annual basis, so all courses listed below may not be available in a particular year. The LL.M. student's academic advisor may approve additional courses not listed as counting towards an emphasis area. One course, Global Legal Systems, is listed for each emphasis area because students write papers to compare US law to the law of other countries, and that course can count towards an emphasis area if the paper topic supports the emphasis and is approved by the academic advisor.

Grading

The grading scale for students in the LL.M. in Law is as follows:

- A (including + and -)
- B (including + and -)
- C (including + and -)
- Credit
- No Credit

The A, B, C grades are given consistent with standards for J.D. students, and credits for courses taken from the J.D. curriculum may count towards a J.D. degree in the event of transfer to that program if the LL.M. student earns a grade of C or better. A “Credit” grade signifies that the student has not performed to the level required of a juris doctor student, but that the student has demonstrated basic competency on course objectives as those objectives relate to the LL.M. in Law. Courses in which a student earns a grade of “Credit” count towards the LL.M. in Law, but will not count towards a J.D. degree. A “No Credit” indicates that the student did not demonstrate basic competency on course objectives, and that course does not count towards fulfilling the graduation requirements for the LL.M. in Law degree.

Accommodation of English as a Second Language students.

Students who speak English as a second language may be given additional time on timed final exams in courses offered in the J.D. program. Students may be given up to 50% additional time depending on the English ability and the length and nature of English immersion experienced by the student, but may not be given any additional time depending on the circumstances to be evaluated by the Manager of Student Services in consultation with the Associate Dean of International Programs.

As an additional accommodation of ESL students, a professor in his or her discretion may allow additional work beyond that assigned generally in the course to allow a student in the LL.M. in Law to achieve a “Credit” grade. The professor is to indicate at the beginning of the course whether he or she will allow additional work, and what conditions or standards may apply. The nature, quality and length of any additional work is to be decided upon by the faculty member who is the instructor in the course. Examples of additional work include a paper, re-taking of an exam, an oral examination, field observations and reports.

Thesis

The LL.M. in Law does not require the completion of a thesis, but students may choose to undertake a thesis on a subject matter to be approved by the student’s academic advisor. The thesis must show substantial evidence of original research and should be at least 20 pages in length for each credit hour of thesis credit in which the student enrolls. Students may take thesis credit for up to a maximum of eight credit hours with approval of the academic advisor.

Master of Laws - Business and Entrepreneurial Law

Student Learning Outcomes

Students graduating from this program will:

- **Lawyering Skills.** All LL.M. in Lawyering students will acquire or improve the following legal skills: the ability to read and analyze legal texts, including cases; the ability to conduct legal research on U.S. law sources; the ability to spot legal issues raised by typical legal problems; the ability to apply the law to factual scenarios; the ability to analyze legal issues and predict likely judicial outcomes; the ability to communicate legal analysis clearly in writing and orally; the ability to interview witnesses and clients; the ability to counsel clients with legal analysis and legal options; the ability negotiate a legal issue or problem with an adversary; the ability to make persuasive arguments based on the combination of law and facts.
- **Legal English.** For those students who were trained in law outside of the U.S. or another English-speaking, common law country, they will develop a working knowledge of key legal English terms used in law practice in the United States.
- **Knowledge of U.S. Law.** Students in the LL.M. in Lawyering program will learn or deepen their understanding of U.S. law generally and in particular sub-areas of U.S. law in one of the emphasis areas or such other area or combination of areas selected by the student with the approval of the academic advisor.

Below is a partial list of courses that would support the emphasis area identified. Course schedules change on an annual basis, so all courses listed below may not be available in a particular year. The LL.M. student’s academic advisor may approve additional courses not listed as counting towards an emphasis area. One course, Global Legal Systems, is listed for each emphasis area because students write papers to compare US law to the law of other countries, and that course can count towards an emphasis area if the paper topic supports the emphasis and is approved by the academic advisor.

Master of Laws in General Law

Student Learning Outcomes

Students graduating from this program will:

- 1. Law Skills. All LL.M. in Law students will acquire or improve the following legal skills: the ability to read and analyze legal texts, including cases; the ability to conduct legal research on U.S. law sources; the ability to spot legal issues raised by typical legal problems; the ability to apply the law to factual scenarios; the ability to analyze legal issues and predict likely judicial outcomes; the ability to communicate legal analysis clearly in writing and orally; the ability to interview witnesses and clients; the ability to counsel clients with legal analysis and legal options; the ability negotiate a legal issue or problem with an adversary; the ability to make persuasive arguments based on the combination of law and facts.
- 2. Legal English. For those students who were trained in law outside of the U.S. or another English-speaking, common law country, they will develop a working knowledge of key legal English terms used in law practice in the United States.
- 3. Knowledge of U.S. Law. Students in the LL.M. in Law program will learn or deepen their understanding of U.S. law generally and in particular sub-areas of U.S. law in one of the emphasis areas or such other area or combination of areas selected by the student with the approval of the academic advisor.

Required Coursework

Law 8730I Introduction to American Law & Culture

Law 8531I Common Law, Legal Writing and Analysis

Law 8532I Introduction to American Legal Skills

Law 8532R American Legal Research

Emphasis Areas

For an emphasis, a student must earn at least 12 credit hours towards the LL.M. in Law in courses that will support the emphasis area. Students also must complete a significant writing project, academic or professional, which may be undertaken in connection with a course, as an independent study, or in connection with a thesis.

The following emphasis areas are available: Business and Entrepreneurial Law (p. 1667), Child and Family Law (p. 1668), Criminal Law (p. 1669), Intellectual Property Law (p. 1669), International Law (p. 1670), Litigation (p. 1670), Tax Law (p. 1671), and U.S. Law (p. 1672). Some courses have been pre-approved as supporting these emphasis areas, and others may be approved by the student's academic advisor. Students are not required to select an emphasis area, but may choose a different course of study with approval of the academic advisor. Course schedules change on an annual basis, so all courses listed below may not be available in a particular year. The LL.M. student's academic advisor may approve additional courses not listed as counting towards an emphasis area. One course, Global Legal Systems, is listed for each emphasis area because students write papers to compare US law to the law of other countries, and that course can count towards an emphasis area if the paper topic supports the emphasis and is approved by the academic advisor.

Grading

The grading scale for students in the LL.M. in Law is as follows:

- A (including + and -)
- B (including + and -)
- C (including + and -)
- Credit
- No Credit

The A, B, C grades are given consistent with standards for J.D. students, and credits for courses taken from the J.D. curriculum may count towards a J.D. degree in the event of transfer to that program if the LL.M. student earns a grade of C or better. A "Credit" grade signifies that the student has not performed to the level required of a juris doctor student, but that the student has demonstrated basic competency on course objectives as those objectives relate to the LL.M. in Law. Courses in which a student earns a grade of "Credit" count towards the LL.M. in Law, but will not count towards a J.D. degree. A "No Credit" indicates that the student did not demonstrate basic competency on course objectives, and that course does not count towards fulfilling the graduation requirements for the LL.M. in Law degree.

Accommodation of English as a Second Language students.

Students who speak English as a second language may be given additional time on timed final exams in courses offered in the J.D. program. Students may be given up to 50% additional time depending on the English ability and the length and nature of English immersion experienced by the student, but may not be given any additional time depending on the circumstances to be evaluated by the Manager of Student Services in consultation with the Associate Dean of International Programs.

As an additional accommodation of ESL students, a professor in his or her discretion may allow additional work beyond that assigned generally in the course to allow a student in the LL.M. in Law to achieve a "Credit" grade. The professor is to indicate at the beginning of the course whether he or she will allow additional work, and what conditions or standards may apply. The nature, quality and length of any additional work is to be decided upon by the faculty member who is the instructor in the course. Examples of additional work include a paper, re-taking of an exam, an oral examination, field observations and reports.

Thesis

The LL.M. in Law does not require the completion of a thesis, but students may choose to undertake a thesis on a subject matter to be approved by the student's academic advisor. The thesis must show substantial evidence of original research and should be at least 20 pages in length for each credit hour of thesis credit in which the student enrolls. Students may take thesis credit for up to a maximum of eight credit hours with approval of the academic advisor.

Master of Laws in Taxation

Student Learning Outcomes

Students graduating from this program will:

- 1.KNOWLEDGE: Graduates be able to demonstrate in-depth knowledge of tax law; the policies underlying systems of taxation and procedures relating to the administration of tax laws and the resolution of disputes with taxing authorities; and the context of tax rules, so that analysis of uncertain areas of the law can be aided by an appreciation of underlying theory and policy
- 2.SKILLS: Graduates will be able to research and analyze tax issues. Students will be able to read carefully and comprehend intricate statutes and regulations, exercising the patience and diligence needed to work with detailed definitions, cross-references and exceptions to general rules. Students will have mastered issue-spotting and problem-solving skills through detailed analysis of tax problems. Students will have demonstrated an ability to communicate tax advice to in clear terms understandable to clients and non-tax professionals.
- ETHICS: Students will demonstrate sensitivity to ethical obligations associated with giving tax advice, and will demonstrate knowledge of the statutory, regulatory and common law anti-abuse rules.

Required Courses

Code	Title	Credits
LAW 8834	Tax Procedure	2
or LAW 8834R	Tax Clinic	
LAW 8838R	Tax Practicum I	2
or LAW 8746R	Independent Study	
LAW 8886	Corporate Taxation I	2-3
LAW 8888R	Partnership Taxation I	3
LAW 8893R	Taxation Of Property Transactions	2-3
LAW 8889R	Subchapter S Taxation	1
Total Credits		12-14

Elective Courses

Code	Title	Credits
LAW 8614R	Estate Planning For Retirement Plan Benefits	1
LAW 8615R	Estate Planning For Charitable Giving	1
LAW 8617R	Elder Law For Estate Planners	1
LAW 8746R	Independent Study	0.5-3
LAW 8838L	Legal Accounting	1
LAW 8838R	Tax Practicum I	1-3
LAW 8838L	Legal Accounting	1
LAW 8838R	Tax Practicum I	1-3

LAW 8843	Federal Income Taxation Of Estates And Trusts	2
LAW 8845	Deferred Compensation	2-3
LAW 8848R	State And Local Taxation	2-3
LAW 8874	Tax-Exempt Organizations	2
LAW 8888A	Partnership Taxation II	1-3
LAW 8892R	Taxation Of Estates, Gifts And Trusts	2-3
LAW 8908	Family Tax Law	1

In addition to those approved electives, the Director of the Graduate Tax Program may approve a post-J.D. Tax, LL.M. student taking up to 6 credit hours of other elective courses offered at the UMKC School of Law or other UMKC graduate or professional schools, without the necessity of obtaining Graduate Studies Committee approval, if, in the Director's judgment, such courses are graduate level courses suitable to prepare the student for a tax-sensitive practice area (e.g., business planning, estate planning or real estate development). The following courses are currently pre-approved for purposes of that option (but students may petition the Director of the Graduate Tax Program for approval of other courses if the Director finds such courses appropriate under the standard set forth in the previous sentence).

LAW 8874	Tax-Exempt Organizations	2
LAW 8614R	Estate Planning For Retirement Plan Benefits	1

Special Rules for Application of Courses Taken at Other Law Schools Toward Tax, LL.M. Degree

The Director of the Graduate Tax Law Program may allow Tax, LL.M. candidates to count towards degree requirements up to 6 credit hours of tax courses taken as J.D. or LL.M. students at other law schools so long as (i) they are, in the judgment of both the Director and the applicable instructor here, of comparable coverage and quality to the corresponding required or elective tax courses eligible or required for LL.M credit at UMKC and (ii) the student earned a grade of "B" or higher in such course(s). A student seeking to have one or more courses taken at another law school counted toward the UMKC Tax, LL.M. degree requirements under this provision must petition the Director of the Graduate Tax Program for such treatment and provide the Director with the necessary information to determine if such treatment is in order (this would normally involve reviewing the student's transcript and the syllabus and assignments list for the subject course(s) taken elsewhere).

Combined J.D./LL.M. (Taxation) Degree Program

Qualified UMKC J.D. students will be permitted to apply up to 10 credit hours (12 with the permission of the Graduate Studies Committee) of UMKC graduate courses approved for this purpose toward an LL.M. (Taxation) degree as well as toward a J.D. degree. This will allow students to earn the Tax, LL.M. on an accelerated basis.

This "combined" J.D./Tax, LL.M program is available to qualified students who begin their legal studies at the UMKC School of Law, and to students who transfer to the UMKC School of Law or who attend it as visiting/certification students during their fifth or sixth semester of law study. With respect to students who take some courses at a different law school and some at UMKC School of Law (as a transfer or visiting/certification student) in no event will more than a total of 12 credit hours toward the Tax, LL.M be awarded for courses approved under "Special Rules for Application of Courses Taken at Other Law Schools Toward Tax, LL.M Degree" above and the Combined J.D./Tax, LL.M program. For further information on admissions and combined degree requirements, contact the Director of the Graduate Tax Law Program.

School of Law Administrative Rules

Inclement Weather Policy

In the event of inclement weather and a determination by the University that classes are to be cancelled and/or closed, the University will provide for immediate distribution of information through UMKC Alert!, the University's mass notification system program, including: text messaging, personal and UMKC voice mail, personal and UMKC email, and pagers; mass email/voicemail notice to UMKC Everyone (faculty, staff & students); and postings on UMKC home page (<http://umkc.edu/>), Law School Intranet a/k/a the Rooniverse (<https://mylaw.umkc.edu>); and UMKCA!ert! (<http://www.umkc.edu/umkcalert/>). Faculty/staff and students can opt to have the emergency notification, which includes school closing and class cancellations sent by text or voice mail to their personal phones. The link to the emergency notification FAQ page is http://www.umkc.edu/umkcalert/umkcalert_faq.asp.

Alcoholic Beverages

It is a violation of University regulations to use, sell, purchase or serve alcoholic beverages on University property unless specifically approved by the Vice Chancellor for Student Affairs and Enrollment Management.

Student groups desiring approval must request the approval at least two weeks prior to the date of the intended use. Request forms are available on the All Organizations Council Site on the Law School Intranet a/k/a RooLaw (<https://roolaw.umkc.edu>).

Parking

The parking lot and driveway on the north side of the law building are for faculty and staff parking. Violators deprive faculty and staff of parking spots they pay for and violators will be ticketed and their vehicles may be towed or locked by a "boot." Students must register their vehicles at UMKC Parking Operations and pay for a student parking permit. Student permits are valid only in student parking lots. Parking regulations are enforced Monday through Friday, 6 a.m.-10 p.m. throughout the year, including the time between semesters. The following link pertains to parking operations: <http://www.umkc.edu/adminfinance/parking/>.

Degree Programs

The Bloch School offers the degrees of Bachelor of Business Administration (B.B.A.); Bachelor of Science in Accounting (B.S.A.); Master of Business Administration (M.B.A.); Master of Public Administration (M.P.A.); Master of Science in Accounting (M.S.A.); Master of Science in Finance (M.S.F.); and Master of Science in Entrepreneurial Real Estate (M.S.E.R.E.). Within the M.B.A. program there are Executive M.B.A. (E.M.B.A.), and Professional M.B.A. (P.M.B.A.) offerings. Additionally, the School has two joint degree programs with the UMKC School of Law, the J.D./M.B.A. and the J.D./M.P.A. degrees, participates in the Interdisciplinary Ph.D. program and offers a Ph.D. in Entrepreneurship & Innovation. The Bloch School also offers business and entrepreneurship minors and a Graduate Certificate in Data Analytics. The Department of Public Affairs also has a Graduate Certificate in Nonprofit Management and Innovation and a Graduate Certificate in Urban Policy and Management.

History

The University has offered business courses since 1933. In 1953, with the support and encouragement of the Kansas City community, the School of Business Administration was established. Since that time, the Bloch School has grown to a student body of 2000 and a faculty of approximately 50 professional educators. In January 1988, the School was renamed for Henry W. Bloch, co-founder of H&R Block, and moved into a newly expanded building. In 2010, the School officially changed its name to the Henry W. Bloch School of Management to reflect our differentiation as a school that integrates business management, public administration and the infusion of a global, innovative and entrepreneurial mindset. In the fall of 2013, a second building was added to the Bloch School, the Bloch Executive Hall for Entrepreneurship and Innovation.

Vision

We are Kansas City's business school, partnering with for-profit, non-profit, and public sector stakeholders to promote inclusive prosperity.

Mission

We leverage our partnerships and connectivity to promote experiential learning, encourage career and entrepreneurial success, provide access to thought leaders, and develop talent through distinctive education experiences.

Values

Following the inspiration offered by Mr. Henry W. Bloch, our work is guided by our commitment to:

- Entrepreneurial thinking
- Civic mindedness and a community orientation
- Inclusiveness and respect for diversity
- Global awareness
- Integrity
- Working hard, persevering, and making a difference

Accreditation

The Bloch School is accredited by AACSB International - The Association to Advance Collegiate Schools of Business and by the Network of Schools of Public Policy, Affairs, and Public Administration (NASPAA).

Advising and Student Services

Staff in the Student Services Office, room 115 of Bloch Heritage Hall, assist undergraduate students in planning programs and registering for courses. Freshmen and junior students must be advised each semester and advising is required for new students and students on probation. Students pursuing the M.B.A., M.S.A., M.S.E.R.E., and M.S.F. degrees are advised by staff in the Graduate Programs Office, room 418 of the Bloch Executive Hall.

Advising information can be found at <https://bloch.umkc.edu/students/advising/>. Faculty of the School's six curricular departments are also available to discuss students' programs. Students in the M.P.A. programs are advised by departmental faculty with support from the Graduate Programs Office.

Scholarships

The Bloch School offers numerous scholarships for students enrolled in Bloch degree programs. Information and application links are available on the Bloch School Web site at <https://bloch.umkc.edu/students/paying-for-school/>. March 1 is the deadline for the majority of these scholarships, which are awarded for the following academic year. For information on loans, grants and other financial aid, contact the UMKC Student Financial Aid and Scholarships Office.

Internships

Students who want to experience work opportunities while in school are encouraged to take their learning beyond the classroom through internships. For-credit internships typically carry one to three hours of credit. To earn academic credit, students should identify a Bloch School faculty member qualified and willing to supervise an internship, complete an internship form available on the Bloch School Web site at <https://bloch.umkc.edu/students/policies-and-forms/> and enroll in an approved internship course. Interested students should contact the Bloch Career Center for internship opportunities. International students must also apply through the International Student Affairs Office to receive approval to work off campus.

International Study Abroad

Bloch School students have the opportunity to study abroad for credit. Students may study for a week, a semester, or an academic year. Students who are interested in study abroad opportunities should contact the Bloch School Student Services Office or the UMKC Study Abroad and Global Engagement Office.

Career Support

The Bloch Career Center is a full-service office working with students, alumni and employers. Their staff are committed to helping Bloch students connect with careers they care about and collaborate with Kansas City's top employers to create opportunities for Bloch School students.

Faculty

Arif Ahmed^{2,3}; associate professor of health administration, and chair, Department of Public Affairs; B.D.S. (Dhaka Dental College); M.S.P.H., Ph.D. (University of Illinois - Urbana-Champaign).

M. Ishrat N Ali^{2,3}; assistant professor of global entrepreneurship, and innovation; B.S., M.S. (University of Dhaka); M.B.A., Ph.D. (Darden School of Business, University of Virginia).

Brian Anderson^{2,3}; associate professor of global entrepreneurship, and Ph.D. program director; B.S. (University of Colorado at Denver); M.S. (University of Denver); Ph.D. (Indiana University)

Barbara A. Bichelmeyer²; provost, UMKC, and professor of management; B.S., B.A., Ph.D. (University of Kansas).

Erin E. Blocher¹; assistant teaching professor, B.A., M.A. (University of Kansas)

Bryan C. Boots; assistant teaching professor, and managing director for venture creation, Regnier Institute for Entrepreneurship and Innovation; B.S., M.S. (Kansas State University); M.B.A. (University of Missouri-Kansas City).

Bonnie Brown²; assistant professor of accountancy; B.S., M.S. (Appalachian State University); Ph.D. (University of Central Florida); C.P.A.

Ranjit Christopher²; assistant professor of marketing; B.E. (University of Madras); Ph.D. (Arizona State University).

Kimberly Church²; assistant professor of accounting; B.B.A. (Pittsburg State University); M.A. (Kansas State University); Ph.D. (University of Arkansas).

John Clark^{2,3}; associate professor of finance and chair, Department of Finance; B.A., M.A., Ph.D. (University of Alabama).

Charles Connely; associate teaching professor, and managing director, Lewis White Real Estate Center; B.B.A., M.B.A. (University of Missouri - Kansas City); C.C.I.M., C.F.P., C.P.M.

James R. DeLisle; academic director of the Lewis White Real Estate Center, and associate professor of real estate; B.B.A., M.S., Ph.D. (University of Wisconsin).

Kalpesh Kaushik Desai; professor of marketing and supply chain management, and chair, Department of Marketing and Supply Chain Management; B.Commerce (Bombay University); M.B.A. (Jamnalal Bajaj Inst. of Mgmt. Studies, India); Ph.D. (University of Texas at Austin).

David Donnelly²; professor of accounting; B.S.B.A., M.B.A. (Kansas State University); Ph.D. (University of Illinois); C.P.A.

Christopher Garmon²; assistant professor of public affairs; B.A. (New College of Florida); Ph.D. (University of Florida).

Phillip Gonsher, assistant director of mentor programs, Regnier Institute for Entrepreneurship and Innovation, and associate teaching professor of entrepreneurship; B.A. (Ottawa University); M.A. (Webster University); M.L.A. (Baker University).

Hye-Sung Han^{2,3}; assistant professor in urban affairs; B.A., M.A. (Seoul National University); MCP (Massachusetts Institute of Technology); Ph.D. (University of North Carolina at Chapel Hill).

Andy Heise; assistant director, Regnier Institute for Entrepreneurship and Innovation, and assistant teaching professor; B.M., M.B.A. (Millikin University).

Scott Helm; associate teaching professor, director of E.M.B.A., director of E.M.P.A., and associate director of the Midwest Center for Nonprofit Leadership; B.A. (Washington College); M.P.A., I.Ph.D. (University of Missouri-Kansas City).

Jeffrey S. Hornsby^{2,3}; professor of entrepreneurship, and innovation/Henry W. Bloch Missouri Endowed Chair in entrepreneurship and innovation, director, Regnier Institute for Entrepreneurship and Innovation, and chair, Department of Global Entrepreneurship and Innovation; B.A. (Miami University, Ohio); M.A. (Western Kentucky University); Ph.D. (Auburn University).

David Jarrett; visiting assistant professor; B.A. (University of North Carolina at Chapel Hill); M.B.A. (University of Virginia).

Jeff S. Johnson; associate professor of marketing; B.S., M.B.A., Ph.D. (University of Nebraska-Lincoln).

Jae C. Jung^{2,3}; associate professor of international business; B.A., M.B.A. (Korea University); Ph.D. (University of Western Ontario).

William R. Keeton; assistant teaching professor; B.A., M.A. (Yale University); Ph.D. (Massachusetts Institute of Technology).

David Kenner; instructor; B.A. (University of Kansas); J.D. (Columbia University).

Brian S. Klaas²; dean, Henry W. Bloch School of Management, and professor of management; B.S., M.S. (Illinois State University); Ph.D. (University of Wisconsin-Madison).

Julie K. Kline; assistant teaching professor; B.S. (Kansas State University); M.S.A. (University of Missouri-Kansas City); C.P.A.

David Kuipers; associate professor of finance; B.S. (Iowa State University); M.S. (University of Houston-Clear Lake); Ph.D. (University of Missouri-Columbia).

Atul Kulkarni; assistant professor of marketing; B. Engg. (Pune University); M.S., M.B.A., Ph.D. (University of Illinois at Urbana-Champaign).

Robyn M. Martin; assistant teaching professor; B.B.A., M.B.A. (University of Missouri-Kansas City).

Alexandria Krause Matlack; instructor; B.A. (University of Nebraska-Omaha); M.S. (New York University).

Nathan Mauck^{2,3}; associate professor of finance; B.S. (Kansas State University); Ph.D. (Florida State University).

Anthony Mendes; assistant teaching professor; B.A., M.S. (Central Missouri State University); M.B.A. (Rockhurst University); Ph.D. (University of Missouri-Kansas City).

Forest E. Myers; instructor; M.A., Ph.D. (Kansas State University).

Brent Never^{2,3}; associate professor of nonprofit leadership; B.A. (Connecticut College); Ph.D. (Indiana University).

David Nicol; assistant teaching professor; B.Sc. (Ohio State University); M.A. (Case Institute of Technology), Ph.D. (Case Western Reserve University).

Mark Parry^{2,3}; Ewing Marion Kauffman/Missouri Endowed Chair in Entrepreneurial Leadership, and professor of marketing; B.A. (Metropolitan State College); M.A. (University of Texas-Arlington); Ph.D. (University of Texas-Dallas).

Nicholas Carl Peroff; professor emeritus and emeritus James C. Olson Professor of Public Administration; B.S., M.A., Ph.D. (University of Wisconsin-Madison).

Stephen W. Pruitt; Arvin Gottlieb/Missouri Endowed Chair in Business Economics and Finance; B.S. (Purdue University); M.B.A. (Ohio State University); Ph.D. (Florida State University).

David O. Renz; professor emeritus and director, Midwest Center for Nonprofit Leadership; B.S., M.A., Ph.D. (University of Minnesota).

Seyed Roozmehr Safi^{2,3}; assistant professor of management information systems; B.S. (Azad University); M.B.A. (Sharif University of Technology); Ph.D. (Texas Tech University).

Leigh Salzsieder; associate professor of accounting, and chair, Department of Accountancy; B.A. (Drury University); M.B.A. (University of Kansas); Ph.D. (University of South Carolina).

Tammie Schaefer^{2,3} associate professor of accounting; B.S., MBA (Rockhurst University); Ph.D. (University of South Carolina); C.P.A.

Melissa Schulte; assistant teaching professor; B.S., M.Acc. (Kansas State University), C.P.A.

Anthony Vatterott; visiting assistant professor; B.A., M.A., M.B.A. (Webster University); Ph.D. (University of Missouri-St. Louis).

Nikita Waldron; instructor; B.A., B.S., M.A. (University of Kansas), C.P.A.

Sidne G. Ward^{2,3}; associate dean, director of global management education initiatives, and associate professor of management information systems; B.A., M.B.A. (University of Oklahoma); Ph.D. (University of California-Los Angeles).

Robert Waris; instructor; B.A. (University of Missouri-Columbia); M.A., M.B.A., Ph.D. (University of Missouri-Kansas City).

Alan W. Weber; assistant teaching professor; B.S. (Purdue University); M.B.A. (University of Missouri-Kansas City).

John Patrick Welsh; assistant teaching professor; B.S. (University of Missouri-Columbia); M.B.A. (St. Louis University).

Larry D. Wigger, Jr.; assistant teaching professor; B.A. (William Jewell College); M.S., M.B.A. (Elmhurst College).

Benjamin J. Williams; assistant teaching professor; managing director, Regnier Institute for Entrepreneurship and Innovation, and Enactus coordinator; B.B.A. (Drury University); J.D. (University of Connecticut School of Law); M.B.A. (University of Missouri-Kansas City).

Anne Williamson^{2,3}; Victor and Caroline Schutte/Missouri Professor of Urban Affairs; B.B.A. (middle Tennessee State University); M.A. (University of Florida); Ph.D. (University of Georgia).

Michael Wizniak; assistant teaching professor; B.A. (University of Kansas); M.B.A. (University of Missouri-Kansas City).

Professor Emeriti

Latheff N. Ahmed; professor emeritus of public administration; B.A. (University of Mysore); M.A., Ph.D. (University of Kansas).

Raj Arora; professor emeritus of marketing; B.S., M.S. (University of South Carolina); Ph.D. (Claremont Graduate School).

Brian L. Belt; professor emeritus of business and public administration; B.I.E, M.S.I.E (Ohio State University); M.B.A. (Texas Christian University); Ph.D. (University of North Texas).

Lee Bolman; professor emeritus; B.A. Ph.D. (Yale University).

Rita-Marie Cain Reid; professor emerita of business law; B.A. (Rockhurst University); J.D. (University of Kansas).

David Cornell; associate professor emeritus of accounting; B.S. (University of Kentucky); M.B.A. (Eastern Kentucky University); Ph.D. (Louisiana State University); C.P.A., C.M.A.

Nancy Day; professor emerita of human resources; B.S. (Missouri State University); M.A. (University of Missouri-Kansas City); Ph.D. (University of Kansas).

Stephen DeLurgio; professor emeritus; B.S. (University of Missouri-Rolla); M.B.A., Ph.D. (St. Louis University).

William B. Eddy; dean emeritus, Bloch School, and professor emeritus; B.S., M.S. (Kansas State University); Ph.D. (Michigan State University).

Nolen M. Ellison; professor emeritus of public administration; B.S. (University of Kansas); Ph.D. (Michigan State University).

Larry R. Garrison; professor emeritus of accounting; B.S.B.A. (University of Central Missouri); M.S. (University of Missouri-Kansas City); Ph.D. (University of Nebraska-Lincoln); C.P.A.

Fred H. Hays; (<https://cf1.umkc.edu/intapps/lookup/?LastName=hays>) associate professor emeritus of finance; B.B.A., M.S. (Baylor University); Ph.D. (Louisiana State University).

Robert D. Herman; professor emeritus of organizational behavior; B.A. (Kansas State University); M.S., Ph.D. (Cornell University).

Jack D. Heysinger; dean emeritus, Bloch School, and professor emeritus of law and administration; B.A., J.D. (University of Iowa); LL.M. (University of Michigan).

Karl F. Johnson; professor emeritus of public administration; B.B.A., M.P.A. (University of Missouri-Kansas City); Ph.D. (University of Oregon).

LaVern E. Krueger; associate professor emeritus of accounting; B.S. (University of Wisconsin - Whitewater); M.S.B.A. (University of Denver); D.B.A. (University of Colorado); C.P.A.

Neil E. McNeill; associate professor emeritus of accounting; B.S. (University of Kansas); M.B.A. (University of Pittsburgh); D.B.A. (Harvard University); C.M.A.

Alfred N. Page; professor emeritus of management, finance and communication studies; B.A. (Macalester College); M.B.A., Ph.D. (University of Chicago).

Roger A. Pick; professor emeritus of management information systems; B.S. (University of Oklahoma); M.S., Ph.D. (Purdue University).

Leon Robertson professor emeritus of strategic and international management; B.S., M.S. (Georgia Institute of Technology); Ph.D. (Georgia State University).

Probir Roy; associate professor emeritus of quantitative analysis; B.S. (Indian School of Mines); M.B.A. (Indian Institute of Management); Ph.D. (University of Cincinnati).

Robert D. Schrock; professor emeritus of finance; B.A. (McPherson College); M.A., Ph.D. (University of Kansas).

Eleanor Brantley Schwartz; chancellor emerita, UMKC; dean emerita, Bloch School; and professor emerita of business and public administration; B.A.A., M.B.A., D.B.A. (Georgia State University).

Joseph F. Singer; professor emeritus of business operations and analysis; B.S. (Morningside College); M.B.A. (University of Missouri-Kansas City); Ph.D. (University of Arkansas).

Marilyn Taylor; professor emerita of strategic management; B.A. (University of South Florida); M.B.A., D.B.A. (Harvard University).

Edwin H. White; professor emeritus of law and administration; A.B., J.D. (University of Missouri-Columbia); M.A. (University of Missouri-Kansas City).

Walter B. Wright; dean emeritus of continuing education and extension; dean emeritus, Bloch School; and professor emeritus of business administration; B.A. (University of Iowa); M.B.A. (University of Kansas).

Accounting Courses

ACCTNG 210 Introduction To Financial Accounting Credits: 3

An overview of basic concepts and terminology associated with reporting financial information to parties outside of an organization. This course requires students to take an accompanying lab that meets one day a week.

Prerequisites: MATH 110 or MATH 120 or higher; or ALEKS score of 61 or higher; or ACT MATH sub-score of 28 or higher; or SAT MATH sub-score of 660 or higher; and 30 hours completed.

ACCTNG 211 Introduction To Managerial Accounting Credits: 3

An introduction to the use of cost accounting concepts and information in managing the activities of a business.

Prerequisites: ACCTNG 210 and completion of 45 hours.

ACCTNG 306 Introduction to the Accounting Profession and Procedures Credits: 3

A study of the profession of accounting, the accounting process, and tools used in implementing that process.

Prerequisites: ACCTNG 210 and completion of 45 hours.

ACCTNG 307 Cost Management Credits: 3

A study of the principles and techniques of cost accounting with emphasis on the structure of cost accounting systems and the processing, summarizing and reporting of cost information. Topics include various issues relevant for manufacturing and service organizations, and introduction of situations that require the application of cost information to managerial settings.

Prerequisites: ACCTNG 211 and junior standing Bloch student.

ACCTNG 310 Intermediate Accounting Credits: 3

A study of theory and application of external corporate reporting. The course covers a variety of financial accounting issues including assets, liabilities, revenue recognition, and accounting change analysis. Publications and pronouncements of the accounting professions are emphasized where applicable.

Prerequisites: ACCTNG 306 and Bloch student.

ACCTNG 318 Introduction to Data Analysis in Accounting Credits: 3

With the proliferation of large data sets, the ability to use a variety of software tools to gain understanding of this data has become an invaluable skill set in modern accounting. The statistical concepts and spreadsheet versatility presented in earlier course work will be augmented with graphical presentation types and best practices, database structure and usability, and statistical application here. These skills will be embedded in the methodology of data analysis commonly found in accounting environments.

Co-requisites: ACCTNG 310.

ACCTNG 350 Accounting Systems And Controls Credits: 3

This course examines a number of systems employed to process accounting information, the internal control activities typically used in each system and associated documentation techniques.

Prerequisites: ACCTNG 310 (or co-requisite, ACCTNG 306, and Pre-MSA student).

ACCTNG 360 Accounting Research and Communications Credits: 3

A study of solving accounting issues by conducting research in the professional literature and communicating the results of that research to users. Students practice oral and written communication skills.

Prerequisites: ACCTNG 310.

ACCTNG 405 Auditing Credits: 3

A study of how the auditor determines the nature and amount of evidence that should be accumulated considering the unique aspects of an engagement, as well as some idea of how that evidence is evaluated in the context of a financial audit.

Prerequisites: ACCTNG 311 and ACCTNG 350.

ACCTNG 412 Introduction to Income Taxation Credits: 3

An examination of the theory, practice, and research methodology of taxation as applied to individuals and business entities.

Prerequisites: ACCTNG 211.

ACCTNG 418 Data Analytics for Accounting Credits: 3

Data Analytics is an investigation of the stories that large data stores can tell if only we know how to unravel them. As such, this course will examine big data sources from both a data-mining and a hypothesis-testing approach.

Prerequisites: Senior standing and BS Accounting student.

ACCTNG 420 Advanced Accounting Credits: 3

A study of the accounting for business combinations and the preparation of consolidated financial statements.

Prerequisites: ACCTNG 310.

ACCTNG 421 Governmental/Not-For-Profit Accounting Credits: 3

An overview of accounting for state and local governments and not-for-profit entities. Pronouncements of the accounting profession are emphasized where applicable.

Prerequisites: ACCTNG 310.

ACCTNG 464 Principles of Internal Auditing Credits: 3

A study of how the internal auditor determines the nature and amount of evidence that should be accumulated considering the unique aspects of an engagement, as well as some idea of how that evidence is evaluated in the context of a financial audit.

Prerequisites: ACCTNG 311 and ACCTNG 350.

ACCTNG 470 Fraud Examination Credits: 3

An examination of the elements of fraud and the fraud auditing process.

Prerequisites: Junior standing Bloch student.

ACCTNG 487 Special Topics Credits: 3

Special topics in accounting.

ACCTNG 496 Internship: Accounting Credit: 1

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Internship coursework is evaluated on a credit/no credit basis.

Prerequisites: Departmental consent.

ACCTNG 497 Special Topics In Accounting Credits: 1-3

Study and research in accounting areas of special student interest, under individual faculty supervision and guidance.

Prerequisites: Departmental consent.

ACCTNG 5503 Financial Accounting for Decision Making Credits: 3

An introduction to the role of financial accounting in organizational decision making. The course provides students with an understanding of the process for reading, analyzing, and interpreting financial accounting data to make informed business decisions. Students will learn the strengths and limitations of accounting information and how it can be used to create value for the organization.

Prerequisites: Students must be enrolled in a Bloch School graduate program.

ACCTNG 5517 Survey Of Accounting Credits: 3

An overview of financial and managerial accounting. The course introduces the various reports that are used by stockholders, creditors, and managers to assess company performance and evaluate financial health. In addition, techniques are presented that assist firm managers in planning, control, and decision-making activities.

ACCTNG 5550 Accounting Information Systems Credits: 3

This course examines a number of systems employed to process accounting information, the internal control activities typically used in each system, and associated documentation tools.

Prerequisites: ACCTNG 310, MIS 202.

ACCTNG 5551 Governmental/Not-for-Profit Accounting Credits: 3

An overview of accounting for state and local governments and not-for-profit entities. Pronouncements of the accounting profession are emphasized where applicable. Recommended preparation: ACCTNG 310.

ACCTNG 5556 Cost Management Credits: 3

A study of the principles and techniques of cost accounting with emphasis on the structure of cost accounting systems and the processing, summarizing, and reporting of cost information. Topics include various issues relevant for manufacturing and service organizations, and introduction of situations that requires the application of cost information to managerial settings.

Prerequisites: ACCTNG 5517.

ACCTNG 5557 Introduction To Income Taxation Credits: 3

An investigation of the structure of federal, state, and local taxation, along with an examination of the impact of taxes on the management decision process. This course is not open to students who have completed ACCTNG 412.

ACCTNG 5558 Financial Accounting Theory Credits: 3

A study of the theory and practice of financial accounting with emphasis upon financial statement preparation and analysis of asset, liability, and equity measurement.

Prerequisites: ACCTNG 360.

ACCTNG 5559 Advanced Financial Accounting Theory Credits: 3

A study of advanced topics in financial accounting. Topics include business combinations and financial statement consolidation theory and practice. Recommended preparation: ACCTNG 310.

ACCTNG 5560 Introduction To Auditing And Accounting Systems Credits: 3

Fundamentals underlying the design of accounting systems and the processing of accounting data. Current auditing standards and procedures are extensively investigated, with emphasis on the nature of internal control, audit evidence, and audit reports.

Prerequisites: ACCTNG 5558.

ACCTNG 5564 Principles of Internal Auditing Credits: 3

A study of how the internal auditor determines the nature and amount of evidence that should be accumulated considering the unique aspects of an engagement, as well as some idea of how that evidence is evaluated in the context of a financial audit.

Prerequisites: ACCTNG 311 and ACCTNG 350.

ACCTNG 5568 Data Analytics for Accounting Credits: 3

Data Analytics is an investigation of the stories large data stores can tell if only we know how to unravel the story. As such, this course will investigate big data sources from both a data-mining and a hypothesis-testing approach.

Prerequisites: Admission to the MS Accounting degree program.

ACCTNG 5570 Fraud Examination Credits: 3

An examination of the elements of fraud and the fraud auditing process.

Prerequisites: Must be admitted to a graduate program in the Bloch School of Management.

ACCTNG 5572 Tax Theory And Business Applications Credits: 3

A study of substantive issues relating to the taxation of business entities including multi-jurisdictional considerations. Topics include business formation and dissolution, business valuation, selection of business entity, compensation of employees, sales or exchanges of business property, and business tax credits. Recommended preparation: ACCTNG 412 or ACCTNG 5557.

ACCTNG 5575 Managerial Accounting: Issues, Tools And Analysis Credits: 3

A look at various tools used to assist in the planning, control, performance evaluation, and decision-making activities of managers. Contemporary issues that confront management are introduced where appropriate.

Prerequisites: ACCTNG 307.

ACCTNG 5576 Tax Research, Procedure And Practice Credits: 3

An examination of the theory, practice, and research methodology of taxation as applied to individuals and business entities. Recommended preparation: ACCTNG 412 or ACCTNG 5557 or equivalent.

Prerequisites: MS Accounting program student.

ACCTNG 5577 Advanced Auditing Credits: 3

An analysis of real-world cases of audit problems with emphasis on red flags, pressures auditors face, and serious implications of audit failure (both perceived and real). Recommended preparation: ACCTNG 405 or ACCTNG 5560.

ACCTNG 5578 Current Problems In Accounting Credits: 3

This course will focus on an in-depth exploration of specific problems including, but not confined to those accounting problems which have resulted in official positions being published or considered by the accounting profession.

Prerequisites: ACCTNG 360.

ACCTNG 5580 Financial Reporting Systems Credits: 3

Executive decision making and leadership requires financial fluency. Using a blended format, students develop the necessary capacities to manage financial reporting systems. Case materials offer students the opportunity to build on their analytical skill in regards to financial statements.

Prerequisites: Admission to Executive MBA Program.

ACCTNG 5587 Special Topics Credits: 3

This course is designed to facilitate one of two purposes: an initial offering of a new course (prior to formal approval) or an initial and possible only offering of new topics.

ACCTNG 5595 Internship Credit: 1

An opportunity for students to integrate their academic studies via employment with a business/organization in the community.

ACCTNG 5597 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

ACCTNG 5899 Required Graduate Enrollment Credit: 1

Business Public Administration Courses

B&PA 524 Public Policy Context for Business Decisions Credits: 2

This course is designed to provide intensive exposure to the forces and personalities in Washington, D.C. that shape America's business policy. EMBA participants learn how to understand and anticipate the impact of public policy on their businesses and how to become more effective participants in the national decision-making process.

Prerequisites: Admission to the Executive MBA program.

Dec Science and Operation Mgmt Courses

DSOM 211 Business Analytics I Credits: 3

Business Analytics I is an engaging, interactive course, ensuring the student has relevant, useful analytic skills applicable in both coursework and workplace. The student will learn in an interdisciplinary fashion, by analyzing practical business scenarios from Accounting, Finance, Marketing, Operations, and Supply Chain Management. The student will become proficient in spreadsheet use for data administration, analysis, and visual presentation. The statistical analysis focus in Business Analytics I is on descriptive and predictive measures, equipping the student for analysis, reporting, and business forecasting.

Prerequisites: MATH 110 with a grade of C- or higher; or MATH 120 or higher with a grade of C- or higher; or ALEKS Score of 61 or higher; or ACT Math Sub-score of 28 or higher; or SAT Math Sub-score of 660 or higher.

DSOM 309 Intermediate Business Statistics Credits: 3

This course emphasizes statistical applications in business, and students will complete research projects using one or more multivariate statistical techniques. Topics covered will include statistical software (such as SAS or SPSS), multiple regression, Chi-Square, analysis of variance, non-parametric methods, multidiscriminant analysis, factor analysis, and a brief introduction to structural equation models.

Prerequisites: MATH 206 and STAT 235.

DSOM 311 Business Analytics II Credits: 3

Business Analytics II explores data science, including database access/query, big data, cloud computing, and the internet of things (IoT). The student will consider business ethics, information security, and privacy concerns in today's virtual/gig economy. The student will learn to integrate data from outside sources into various platforms, including Excel, Tableau, and Domo. The student will learn prescriptive analytics and will practice useful optimization methods. Practical interdisciplinary business exercises will draw from Accounting, Finance, Marketing, Operations, and Supply Chain Management, for future use.

Prerequisites: DSOM 211 or STAT 235 or STAT 115 or MOTRMATH 110 and completion of 45 hours.

DSOM 326 Production/Operations Management Credits: 3

This course presents an introduction to the concepts, models, and methods of operations management. Students will study approaches to planning, scheduling, and controlling product and service facilities, processes, cost, quality, quantity, production, capacity, inventory, and distribution requirements. Computer applications and computer-based operations control systems will be introduced as a means to effectively manage the operations functions of both product and service organizations.

Prerequisites: ECON 202 and STAT 235 and completion of 45 hours.

DSOM 340 Supply Chain and Operations Management Credits: 3

The student will become familiar with and appreciate the concepts, models, methods, and technologies of supply chain and operations management in modern enterprises. Students will become familiar with the integrated view of procurement, operations and logistics management. Students will also understand the management of the flow of products from raw material sourcing and acquisition through delivery to the final user. Students will also become familiar with the modern technologies used in supply chain and operations management.

Prerequisites: DSOM 211 (or STAT 235 or STAT 115 or MOTRMATH 110) and ECON 202 and completion of 45 hours.

DSOM 346 Service Industry Analytics Credits: 3

This course presents an introduction to the concepts, models, and methods of decision making in service operations management. Students will study approaches to project management, decision analysis, scheduling, queuing systems, optimization/allocation models, forecasting, and profitability analysis. Computer applications and computer-based operations control systems will be introduced as a means to effectively manage the operations functions of service organizations.

Prerequisites: DSOM 326 or DSOM 340.

DSOM 431 Quality Management and Process Improvement Credits: 3

A study of planning and managing effective quality and processes in organizations. Students are expected to master important quality management and process improvement tools including Six Sigma, Statistical Process Control, TQM, Theory of Constraints, and other contemporary tools via appropriate software, case studies, and projects.

Prerequisites: DSOM 309 or DSOM 311; and DSOM 326 or DSOM 340.

DSOM 432 Spending Analytics, Contracts, and Risk Management Credits: 3

Students will advance to competency their understanding of the role of contracting, sourcing and supply management to support firm strategies. A comprehensive review of the process of costing, pricing, supplier evaluation and development and product cost aggregation will be used in analyzing spend and improving the supply chain partnerships, transactional relationships and intermediary distributors, agents and brokers with the goal of risk mitigation, cost efficiency and value added.

Prerequisites: DSOM 326 or DSOM 340.

DSOM 442 Logistics, Transportation, Warehousing, and Distribution Credits: 3

Logistics, Transportation, Warehousing and Distribution teaches effective, efficient design and management of supply chain networks, including complexities and challenges of warehousing, channel distribution and transportation, global logistics, value chains and performance management. We focus on practical examples of integrated networks of activity and data-driven performance-based logistics decisions.

Prerequisites: DSOM 326 or DSOM 340.

DSOM 443 Project Management Credits: 3

Planning and control of projects, to include network models, risk analysis, time reduction, resource scheduling, leadership, and evaluation.

DSOM 444 Digital Transformations and Supply Chain Credits: 3

This course provides the foundation for understanding the key issues associated with the digital transformation in the supply chain landscape and its implications for security and business continuity. Students learn about emerging technologies such as artificial intelligence (AI), blockchain, cloud computing, and the Internet of things (IoT) as they relate to operations and supply chain management. They learn how these technologies can contribute to the flexibility, traceability, compliance, and accountability in production, transportation, warehousing, and distribution. They also learn about the security risks associated with the use of these technologies.

Prerequisites: DSOM 326 or DSOM 340.

DSOM 445 Strategic Sourcing and Supplier Relationship Management Credits: 3

This course explores the roles of procurement and strategic sourcing as components of an overall supply chain strategy, and the impact this strategy has on the competitive success and profitability of organizations. The course is structured into three segments: before you source, how to source, and after sourcing.

Prerequisites: DSOM 326 or DSOM 340.

DSOM 487 Special Topics Credits: 3

Special topics in decision science and operations management.

DSOM 5508 Statistical Analysis In Business Credits: 3

Data analysis and statistical inference in the context of business management. Communication of analysis and conclusions using text, numbers, and graphics is emphasized. Understanding the conceptual framework of probability and statistics as it relates to statistical tests and procedures is emphasized more than computational methods. Most of the work will be done using a computer spreadsheet. The course includes the topics of estimation, tests of hypotheses, analysis of variance, and multiple regression.

DSOM 5509 Business Analytics for Strategic Decision Making Credits: 3

Business analytics has become a key component in accomplishing strategic and operational goals. Students will become familiar with the concepts and principles of analytics. Utilizing real world cases, students will apply current analytical concepts to help solve managerial problems and support decision processes.

Prerequisites: Admission to Executive MBA Program.

DSOM 5511 Global Supply Chain and Operations Management Credits: 3

Global Supply Chain and Operations Management (SCOM) provides a holistic investigation of how businesses produce goods and offer services. Strategic approaches to planning, scheduling, and controlling cost, time, and quality are discussed. Students are exposed to the full circle of supply chain management, including demand planning, sourcing and procurement, production decisions, inventory and handling, MRP and ERP systems, Lean/JIT, quality management, CSR and sustainability. Spreadsheet models for managing operations, analyzing performance, and forecasting expectations are examined.

Prerequisites: MIS 5507

DSOM 5540 Service Operations Management Credits: 3

This course focuses on the increasing importance and role of service in our economy. Topics studied are: the role of services in an economy, the nature of services, service strategy, the service delivery system, service facility location, the service encounter, service quality, productivity and quality improvement. Methods of process analysis in service organizations, methods improvement procedures, and work measurement techniques are developed to provide the basis for analyses of processes, layouts, and job design in a service organization.

Prerequisites: DSOM 5507 or DSOM 5511.

DSOM 5543 Project Management Credits: 3

Planning and control of projects, to include network models, risk analysis, time reduction, resource scheduling, leadership, and evaluation.

DSOM 5544 Global Supply Chain and Logistics Management Credits: 3

A study of integrated global supply chain management and logistics. Topics include integrating global ERP and forecasting systems, inventory management, distribution requirements planning, supply chain management, purchasing and supplier/vendor networks, logistics, transportation networks, and E-operations. ERP systems and network optimization are studied relative to both production and service operations.

Prerequisites: DSOM 5507 or DSOM 5511.

DSOM 5545 Strategic Sourcing & Supplier Relationship Management Credits: 3

This course explores the roles of procurement and strategic sourcing as components of an overall supply chain strategy, and the impact this strategy has on the competitive success and profitability of organizations. The course will be structured into three segments: before you source, how to source, and after sourcing. Topics will include spend analysis, supplier research, market analysis, supplier evaluation, global sourcing considerations, negotiating, and supplier relationship management. The students will also gain an appreciation of the ethical, contractual, risk management, sustainability, and legal issues faced by purchasing professionals.

DSOM 5566 Supply Chain and Operations Management Credits: 3

An examination of the basic principles and strategies used to manage the production and distribution of goods and services. This course positions operations management (OM) as an important tool for achieving strategic leadership through competitive advantage, and illustrates how the managerial integration of OM functions with corporate strategy improves business processes.

Prerequisites: DSOM 5509 or equivalent; Admission to the Executive MBA program.

DSOM 5587 Special Topics Credits: 3

Special topics in decision science and operations management.

DSOM 5595 Internship Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community.

DSOM 5597 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

DSOM 5899 Required Graduate Enrollment Credit: 1

Entrepreneurship Innovation Courses

ENT 301 Entrepreneurship Toolkit Credits: 3

This course is for non-business majors (majors outside of the Bloch School) working towards an entrepreneurship minor. In this course students learn the basic elements of organizational functions including management, accounting, finance, and economics as foundational principles of entrepreneurship.

ENT 315 Entrepreneurial Mindset and Opportunity Recognition Credits: 3

This course teaches students how to develop an entrepreneurial mindset. Students will utilize play, creative problem solving, design thinking, and creativity tools while developing skills to mitigate risk and recognize opportunities.

ENT 321 Real Estate Principles Credits: 3

Starting with the basics of real estate terminology, students learn real estate's role in the economy, it's legal foundations, government controls, appraisal processes, valuation processes, brokering and closing transactions, time value of money, basic management issues and lease clauses, and basic standard form purchase contracts.

ENT 326 Creativity, Innovation, and Problem Solving Credits: 3

This course examines creativity and innovation, and their application to problem solving and developing new initiatives. Students will develop the ability to understand and solve problems and initiate opportunities by thinking new things. They will understand the concepts, skills, information, attitudes, and resources that leaders need to create valuable ideas, products, or initiatives.

ENT 327 Designing the Business Model Credits: 3

This course will teach students how to design a business model, refine that business model, and create a plan for a new venture. This course will take students through several different toolkits that can be used to create for-profit startups, social ventures, or create value within an existing organization.

Prerequisites: ENT 315.

ENT 329 Entrepreneurship Scholars Credits: 3

In this course, students will acquire the skills required to manage and grow a successful new venture through hands-on, real-world work on their own venture. Students will work with the instructor and at least one mentor to identify specific deliverables and a long term venture plan. Students will manage their enterprise, attend a series of workshops, and work with their peers, instructional coaches and mentors to further their venture. Special application and selection process.

Prerequisites: Departmental consent.

ENT 332 Managing the New Venture: Experiential Learning Credits: 3

In this course, students will acquire the skill sets needed to manage and grow a successful new venture, and will actually manage a new enterprise.

Prerequisites: ENT 327.

ENT 341 Technology Entrepreneurship Credits: 3

This course is designed to familiarize students with the creation of successful, high-value enterprises, with an emphasis on markets for technology and venture capital. Students identify a business opportunity, create a technology-based solution, and assess the commercial and technological viability of the business opportunity. Case studies will emphasize life sciences, engineering, and information technologies.

ENT 361 New Product Development Credits: 3

This course introduces students to a formal process used to develop new physical products. Throughout the process, students learn how an abstract idea can be transformed into concrete product concepts that will in turn be translated into tangible working prototypes.

ENT 364 Entrepreneurial Management and Innovation Credits: 3

Students are exposed to the unique entrepreneurial experience of conceiving, evaluating, creating, managing, and eventually selling a business. The goal is to provide a comprehensive background with practical application of important concepts applicable to an entrepreneurial environment. Key business areas of finance, accounting, marketing, and management will be addressed from an entrepreneurial perspective.

ENT 412 Entrepreneurial Finance Credits: 3

This course examines the financing and valuation of new ventures from the perspectives of entrepreneurs and venture capitalists. The focus is on financial thinking, tools, and techniques that are relevant for seeking new venture financing and making investment decisions. The course is suitable for anyone with an interest in startup companies, venture capital, or private equity firms.

Prerequisites: ACCTNG 210; or ENT 301 and ENT 327.

ENT 421 Real Estate Finance Fundamentals Credits: 3

This course will provide a fundamental understanding of basic financial concepts of real estate including compounding and discounting, construction of amortization tables and after-tax yield analysis for a simple real estate investment. It also touches on the basics of title insurance, ownership issues, fixed rate versus variable rate mortgages in residential real estate, understanding housing bubbles, and trends in valuation of residential real estate. In addition, the student will complete mathematical comparisons of leasing versus owning a home.

ENT 425 Corporate Entrepreneurship Credits: 3

This course seeks to equip students with the skills required to develop new ideas and create viable new businesses or processes within the context of an established organization. The course will address the development of an internal culture of innovation, processes for reviewing ideas and for developing business concepts, strategic analysis, and positioning for competitive advantage.

ENT 432 Entrepreneurial Marketing and Selling Credits: 3

This course exposes students to the objectives, challenges, and requirements for effective, results-oriented marketing activities and sales efforts for the entrepreneur/new venture. Key topics include the selection, design, and budgeting of entrepreneurial marketing and advertising programs, along with effective selling, customer acquisition, and service/retention efforts.

ENT 460 Creating the Enterprise Credits: 3

This course looks at the processes and skills individuals require in order to create their own enterprise, manage a new business, or work within an entrepreneurial organization. Students will learn how to take a good idea, assess that idea, and develop an appropriate business model, and will work in teams to develop a full-length business plan.

Prerequisites: (or concurrent) ACCTNG 211, FIN 325, MKT 324, MGT 330, DSOM 326.

ENT 461 Social Entrepreneurship Credits: 3

This course introduces students to social entrepreneurship through lectures and discussions, key readings, guest speakers such as social entrepreneurs, case studies, videos, service-learning activities, and group assignments. Students will develop an understanding of the social entrepreneurship process, the differences between social entrepreneurship and business entrepreneurship, social enterprise, and different revenue streams including the importance of sustainability. By the end of the course, students will be able to develop a social entrepreneurship project proposal on a social problem they are compassionate about and make a presentation to the class.

ENT 462 Entrepreneurial Experience Credits: 3

In this course students integrate skillsets and apply an entrepreneurial mindset to a practical experience. The process includes identifying an opportunity, taking action, and evaluating outcomes of actions taken. The experience will be through project based consulting for a startup or entrepreneurial organization or within the context of a student's own venture with prior approval.

Prerequisites: ENT 327, ENT 412.

ENT 487 Special Topics Credits: 3

Special topics in entrepreneurship.

ENT 496 Internship: Entrepreneurship Credits: 1-3

This course provides an opportunity for students to integrate their academic studies via employment with a business or organization in the community.

Prerequisites: Departmental consent.

ENT 497 Special Topics: Entrepreneurship Credits: 1-3

Study and research in areas of special interest under individually faculty direction.

Prerequisites: Departmental consent.

ENT 5508 Corporate Entrepreneurship and Innovation: Meeting the Management Challenge Credits: 3

This course seeks to equip students with the skills required to develop new ideas and create viable new businesses within the context of an established organization. The course will address the development of an internal culture of innovation, processes for reviewing ideas and for developing business concepts, strategic analysis, and positioning for competitive advantage.

Prerequisites: Enrolled in a Bloch School graduate program.

ENT 5525 Entrepreneurship: Managing Creativity And Innovation Credits: 3

The course examines the nature of creativity and innovation and how entrepreneurship involves the ability to identify market opportunity based on new ideas. Detailed attention is given to the entrepreneurial process: the concepts, skills, know-how and know-who, information, attitudes, alternatives and resources that entrepreneurs need to manage creativity in the process of creating something with tangible economic value.

ENT 5529 Entrepreneurship Scholars Credits: 3

In this course, students will acquire the skills required to manage and grow a successful new venture through hands-on, real-world work on their own venture. Students will work with the instructor and at least one mentor to identify specific deliverables and a long term venture plan. Students will manage their enterprise, attend a series of workshops, and work with their peers, instructional coaches and mentors to further their venture.

ENT 5531 New Product Development Credits: 3

A systematic overview of the management issues that arise during the process of new product development (NPD). Students learn integration across the traditional management functions and the tools and concepts for linking development to strategy and for managing the development process for speed, efficiency, and market impact. Students will develop a physical prototype of a product that meets and exceeds real customer needs.

ENT 5533 Technology Management Credits: 3

This course introduces the student to formal frameworks for considering ethical, management, and commercial opportunities and challenges of new technologies. The student will consider the business model, business process, and commercial impact of cutting-edge technologies in a survey-style format. Technologies will be considered both from the perspective of an established organization seeking to innovate, as well as from the perspective of a new startup.

ENT 5535 Small Business Management And Entrepreneurship Credits: 3

This course focuses on the nature of the entrepreneurial organization; its volatility and flux, where standard operating procedures are lacking and organizational structure, culture and leadership style are created anew each day. Successful small business management requires that a series of developmental challenges be identified and addressed if the venture is to succeed.

ENT 5545 Entrepreneurship And New Venture Creation Credits: 3

The objectives of this course are: (1) to build personal appreciation for the challenges and rewards of entrepreneurship in an independent mode by examining/simulating its environment; (2) to present and examine, through the use of complex case studies and high level guest/lectures, economic, legal and managerial mechanisms proven useful in creating new wealth; and (3) to foster continued development of venture ideas, suitable as career entry options or for investments, using a tutorial approach to business plan development, presentation and evaluation.

ENT 5552 Entrepreneurial Marketing Credits: 3

This course exposes students to the objectives, challenges, and requirements for effective, results-oriented marketing activities and sales efforts for the entrepreneur/new venture. Key topics include the selection, design, and budgeting of entrepreneurial marketing and advertising programs, along with effective selling, customer acquisition, and service/retention efforts.

ENT 5561 Product and Service Innovation Credits: 2

Product and Service Innovation provides students with experience in new venture creation and product innovation management. Each learning team will be challenged to uncover opportunities in industry. In the process, students will explore customer preferences and translating preferences into the development process.

Prerequisites: Admission to the Executive MBA program.

ENT 5563 Social Entrepreneurship Credits: 3

This course introduces students to social entrepreneurship through lectures and discussions, key readings, guest speakers such as social entrepreneurs, case studies, videos, service-learning activities, and group assignments. Students will develop an understanding of the social entrepreneurship process, the differences between social entrepreneurship and business entrepreneurship, social enterprise, and different revenue streams including the importance of sustainability. In this course, students will develop a social entrepreneurship project proposal on a social problem in collaboration with a non-profit organization in the Kansas City area.

ENT 5567 Strategy and New Venture Creation Credits: 3

Strategy and New Venture Creation provides a capstone experience for Executive MBA students. Students are exposed to and experience entrepreneurship topics relevant to high-growth potential new ventures including the various stages, processes, and issues involved with creation through to venture harvest / exit. Through completion of the course students will understand and undergo the process for new venture creation, developing specific skills of benefit in both entrepreneurial and corporate environments.

Prerequisites: Admission to the Executive MBA program.

ENT 5576 Real Estate Property Management Credits: 3

This course explores the complexities and integration of property and portfolio management which are critical to the creation, control and capture of real estate value. Students learn how to approach real estate in a more holistic manner by integrating management functions that range from individual property types to portfolios of properties. Students learn how to incorporate marketplace factors in their decisions and apply modern portfolio theory and other tools to construct and manage properties and portfolios in a socially responsible manner. Using experiential methods students learn to apply critical thinking to solve complex property and portfolio management problems.

Prerequisites: ENT 5571.

ENT 5585 Entrepreneurial Finance and Venture Capital Investment Credits: 3

This course exposes students to the process of financing and investing in a new venture. The primary objective of this course is for students to develop a good understanding of the objectives, strategies, and challenges in financing and valuation of entrepreneurial firms through analyzing unique financial issues these firms and their investors face. Students will develop skills for assessing new venture financial viability, cash needs, funding sources, valuation, and funding structure.

ENT 5587 Special Topics Credits: 3

Special topics in entrepreneurship.

ENT 5591 Small Business Management Practicum Credits: 3

An integrated management course designed to examine the principles of business management applicable to solving the problems of small and medium size businesses and assisting in their development.

ENT 5595 Internship Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community.

ENT 5597 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

ENT 5681 Multivariate Statistical Methods-II Credits: 3

Theoretical and research applications of MANOVA, canonical correlation, multiple discriminant analysis, factor analysis, and introduction to structural equation modeling using appropriate software. Students are expected to undertake a major research project during this class and to apply appropriate multivariate statistical analyses to their chosen academic research topic.

ENT 5682 Structural Equation Modeling Credits: 3

This course presents structural equation modeling. It includes a review of regression, as well as the study of path analysis, including model specification, methods of estimation, recursive and non-recursive models; direct, indirect, and total effects methods of estimation; single and multi-group analyses; moderators; mediators; structural equation model specification; identification, methods of estimation, second-order factor analysis, and the assessment of casual structure. Students are expected to continue a research project started in ENT 5681.

ENT 5683 Mathematical Models For Entrepreneurship Credits: 3

The purpose of this course is to provide an introduction to mathematical models in entrepreneurship and related disciplines. Classes will focus on the use of mathematical models to characterize the nature of various entrepreneurship-related decisions in complex environments. For each topic considered (e.g., RD investment decisions in new product entry, diffusion, and marketing mix variables), students will examine select examples of scholarly articles. Presentations and discussions are designed to help students understand and critique existing models and stimulate the development of new theoretical viewpoints.

ENT 5691 Doctoral Seminar In Theoretical Foundations Of Entrepreneurship I Credits: 3

ENT 5691 is designed as a broad survey of major topics in the field of entrepreneurship. Its objective is to familiarize students with some of the primary theoretical underpinnings of the field as well as some of the common and/or promising methodological approaches to the study of entrepreneurial phenomena. Topics covered in the course include a theoretical overview, entrepreneurs, environment and organizational founding.

Prerequisites: Doctoral standing.

ENT 5692 Foundations Entrepreneurship Credits: 3

ENT 5692 is designed as a continuation of ENT 5691, providing a broad survey of major topics in the field of entrepreneurship. Its objective is to familiarize the student with some of the primary theoretical underpinnings of the field as well as some of the common and/or promising methodological approaches to the study of entrepreneurial phenomena. Topics covered in the course include: entrepreneurship's links with other disciplines, venture capital and venture capitalists, new venture strategy, new venture performance, growth processes and challenges, and entrepreneurial networks and alliances.

ENT 5693 Technology, Innovation, And Entrepreneurship Credits: 3

This seminar will explore academic literature of technology, innovation, and entrepreneurship. Specific topics include emerging technologies, evolutionary theory, building capabilities based on networks, organizational learning, technological innovation, institutional economics, network externalities, knowledge transfer, technological trajectories and path dependencies.

Prerequisites: Doctoral standing.

ENT 5694 Doctoral Seminar In Theories Of The Firm And Strategy Credits: 3

In this course, students will become familiar with and develop an in-depth understanding of the concepts, models, and paradigms that collectively form the foundation for strategic thinking. Students will develop the ability to critically integrate findings from strategic research programs. Employing an appreciation for the interdisciplinary nature of strategic marketing and management, the purpose is to develop a keen awareness of major gaps that exist in the strategic literature. Students will strengthen the skills needed to conduct original strategic marketing research that can be published in the leading academic journals.

Prerequisites: Doctoral Standing.

ENT 5699 Dissertation and Research in Entrepreneurship and Innovation Credits: 1-12

Dissertation research and writing in Entrepreneurship and Innovation Discipline.

ENT 5899 Required Graduate Enrollment Credit: 1

Finance Courses

FIN 325 Financial Management Credits: 3

This course provides an overview of the relationship between business decisions and the value of the firm, as determined by the marketplace. Students will study the composition of capital structure, capital budgeting, and cost of capital theory, including incremental analysis of investment situations.

Prerequisites: ACCTNG 210 and completion of 45 hours.

FIN 326 Financial Management 2 Credits: 3

Explores leverage and capital structure, dividend policy, raising capital, short-term financial planning, working capital management and international financial management. FIN 326 builds on the content of FIN 325. A cursory knowledge of accounting principles is assumed, as well as fluency with simple algebra and arithmetic skills.

Prerequisites: FIN 325.

FIN 340 Financial Markets and Institutions Credits: 3

This course introduces students to U.S. financial markets and institutions, explaining how they operate, how they promote economic growth and well-being, and how they malfunction in financial crises. Among the financial markets examined are those for short-term debt, mortgages, government and corporate bonds and equity. Financial institutions studied include investment banks, commercial banks and savings institutions, pension plans, mutual funds, hedge funds, and private equity funds. The course also examines the role of the Federal Reserve in the financial system and the nature and purpose of financial regulation.

Prerequisites: FIN 325.

FIN 345 Investments Credits: 3

The course develops the theoretical framework necessary for a systematic approach to portfolio management. Content includes consideration of investment objectives, measurement of risk and returns, alternative uses of invested funds, analysis of securities markets, and the techniques of security analysis. Students will have an opportunity for the creation and management of an investment portfolio.

Prerequisites: FIN 325.

FIN 350 Introduction to Risk Management and Insurance Credits: 3

This course introduces students to the principles of personal and corporate risk management. Personal risk management topics include: personal insurance planning, annuity investing and personal liability management. Corporate risk management topics include: managing corporate risk, reducing risk through hedging, and legal liability risk.

FIN 351 International Financial Management Credits: 3

The world's business activities and economics are becoming more integrated. This course provides an introduction, appreciation and understanding of how this process impacts financial decisions for global business. Students should expect to develop an integrated analytical and decision making perspective that will enable them to extend financial concepts such as capital budgeting and risk management, and instruments such as forwards, swaps, fixed income analysis, arbitrage, etc. to their international analogs.

Prerequisites: FIN 325.

FIN 369 Payment Systems Credits: 3

The payment system is central to virtually all economic transactions. The payment system also has been undergoing fundamental changes over the past two decades. Yet, the payment system is one of the least understood parts of the economic system. The purpose of this course is to examine the payment system from economic, business, and regulatory standpoints.

FIN 419 Financial Statement Analysis Credits: 3

Students will take an in-depth look at the external financial statements that are prepared by corporations, including the tools needed to organize, summarize, and understand corporate financial data for use in decision making. Ratio analysis, trend analysis, earnings forecasting, bankruptcy predictors, statistical methods important to finance, and financial data bases are among the topics that will be covered.

Prerequisites: FIN 325.

FIN 428 Commercial Bank Management Credits: 3

This course presents an overview of financial management of the interest spreads, credit risk, liquidity, and capital positions of commercial banks. Topics to be covered include analysis of bank profitability, lending functions and policy, securities investment strategies, fund attraction, regulatory examination, capital adequacy, and integrated asset/liability management. Instructional media includes cases and computerized bank management simulation.

Prerequisites: FIN 325.

FIN 435 Advanced Corporate Finance Credits: 3

The course focuses on the finance function of the firm from the managerial perspective. Topics include working capital management, capital budgeting, financial structure, merger and reorganization, capital rationing, and analysis of risk. Students will use cases and computer techniques.

Prerequisites: FIN 326.

FIN 445 Advanced Investments Credits: 3

Students take an in depth look at some of the advanced investment analysis tools used by practicing portfolio managers. This course covers the valuation of both derivative securities and fixed-income securities. There is also a strong focus on managing price risk, interest rate risk, and exchange rate risk. In addition there is an emphasis on bond portfolio management and derivative security applications.

Prerequisites: FIN 345.

FIN 451 Life & Health Insurance Credits: 3

This course focuses on insurance issues related to life and health insurance. Content includes consideration of life insurance needs, annuities, disability insurance, long-term care insurance, and personal and corporate health insurance issues.

Prerequisites: FIN 350.

FIN 452 Property and Casualty Insurance Credits: 3

This course focuses on insurance issues related to commercial property and liability insurance. Content includes consideration of issues related to managing risks such as loss of business income, employer liability, management liability, environmental liability and cyber-liability.

Prerequisites: FIN 350.

FIN 453 Risk Management Credits: 3

This course focuses on insurance issues related to managing corporate risk. Content includes consideration of issues related to managing risk such as enterprise risk management, reinsurance, corporate property and liability, and corporate uses for death and disability insurance for key employees.

Prerequisites: FIN 350.

FIN 454 Principles of Surety and Corporate Liability Credits: 3

This course focuses on insurance issues related to surety bonding and corporate liability. Content includes consideration of issues related to managing risk such as mitigating environmental liability, corporate safety programs, and surety bonding.

Prerequisites: FIN 350.

FIN 476 Introduction to Fintech Credits: 3

This course will introduce students to Fintech and provide an overview of the main areas in which it is disrupting finance. These areas include lending and equity investment (algorithmic lending, P2P lending and crowdfunding platforms); financial market infrastructure (cryptocurrencies, blockchain technology, smart contracts); portfolio management and financial advice (robo-investment); and financial trading (algorithmic trading, digital trading platforms). Students will learn how the new financial technologies work, how incumbents and new entrants might profit from the technologies, and how the technologies could affect the efficiency, accessibility, fairness, and security of the financial system.

FIN 487 Special Topics Credits: 3

Special topics in finance.

FIN 496 Internship: Finance Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Internship coursework is evaluated on a credit/no credit basis.

Prerequisites: Departmental consent.

FIN 497 Special Topics: Finance Credits: 1-3

Study and research in areas of special interest under individual faculty direction.

Prerequisites: Departmental consent.

FIN 5501 Economics For Administration Credits: 3

This course is designed for graduate students in the School of Business and Public Administration. Topics include the theory and determination of national income, fiscal policy, monetary theory and policy, production and cost theory, and market structure.

FIN 5502 Corporate Financial Management I Credit: 1.5

This course provides a rigorous distillation of time value of money analysis techniques, methods which form the basic quantitative approach used in corporation finance. The three main topic areas covered during the course are the principles of time value of money analysis itself, its application to the valuation of corporate bond and equity securities, and the quantitative decision making rules utilized in corporate capital budgeting analysis.

Prerequisites: ACCTNG 5501.

FIN 5509 Financial Management Credits: 3

An introduction to the role of financial management through the development of a conceptual framework appropriate for financial decision making. Generally, financial management is charged with the responsibility for obtaining and effectively utilizing the funds necessary for the operation of an enterprise. As such, the conceptual framework includes elements of financial planning (financial analysis, cash budgeting and profit planning), capital budgeting (rate of return and cost of capital), and basic considerations of alternative sources of funds.

Prerequisites: Student must be enrolled in a Bloch School graduate program.

FIN 5515 Managerial Economics Credits: 2

This course studies the relationships between the economic theory and system as a whole and the ways in which their functioning is affected by the behavior of the interdependent sectors of which they are composed. Students will explore the major factors and determinants of economic prospects relevant to profit-maximizing production and pricing decisions for the firm.

Prerequisites: admission to executive MBA program.

FIN 5532 Financial Management Credits: 3

An introduction to the role of financial management through the development of a conceptual framework appropriate for financial decision making. Generally, financial management is charged with the responsibility for obtaining and effectively utilizing the funds necessary for the operation of an enterprise. As such, the conceptual framework includes elements of financial planning (financial analysis, cash budgeting and profit planning), capital budgeting (rate of return and cost of capital), and basic considerations of alternative sources of funds.

Prerequisites: ACCTNG 5517, DSOM 5508, and FIN 5501.

FIN 5537 Enterprise Risk Management Credits: 3

Students conduct a comprehensive assessment of the physical, reputation, emotional, financial, and facilities risks associated with an organization and its events. They must also assess each risk based on its probability of occurrence and severity of consequences and make decisions about accepting, modifying, transferring, and/or eliminating risks based on those assessments.

Prerequisites: FIN 5532.

FIN 5550 Advanced Financial Management Theory And Policies Credits: 3

Advanced financial management covering topics such as working capital, financial structure, cost of capital, dividend policy and valuation. Discussions include both financial theory as well as financial policy. Includes exposure to literature central to the development of finance theory. Recommended preparation: FIN 235 or FIN 5509.

FIN 5551 International Financial Management Credits: 3

This course analyzes present and future international financial market conditions and extends the decision-making tasks of financial management into the context of problems of the international and foreign financial systems. The financial constraints of the international business environment and their effect on standard concepts of financial management are studied along with international currency flows, capital structure problems, working capital management, foreign investment, and international banking practices. Recommended preparation: FIN 235 or FIN 5509.

FIN 5552 Financial Markets and Institutions Credits: 3

This course introduces students to U.S. financial markets and institutions, explaining how they operate, how they promote economic growth and well-being, and how they malfunction in financial crises. Among the financial markets examined are those for short-term debt, mortgages, government and corporate bonds, and equity. Financial institutions studied include investment banks, commercial banks and savings institutions, pension plans, mutual funds, hedge funds, and private equity funds. The course also examines the role of the Federal Reserve in the financial system and the nature and purpose of financial regulation. Recommended preparation: FIN 325 or FIN 5509.

FIN 5553 Investment Analysis Credits: 3

Development of a theoretical framework applicable to the solution of problems related to creation and management of the investment portfolio. Consideration is given to the analysis of risk, functions of security markets, sources of information, evaluation of securities, and measurement of investment return. Recommended preparation: FIN 235 or FIN 5509.

FIN 5556 Management Of Financial Intermediaries Credits: 3

This course addresses the management operations of selected financial intermediaries including commercial banks and thrift institutions. Attention is given to asset-liability structure, the development and delivery of financial services, institutional structure, legal and regulatory factors, and the dynamics of the competitive environment. Recommended preparation: FIN 325 or FIN 5509.

FIN 5557 Derivative Securities Credits: 3

This course is designed to introduce students to the basic principles of financial risk management. The student should develop a working knowledge of issues regarding both the theoretical valuation and application of derivative securities. Applications will focus on techniques designed to manage financial risks in the corporate environment. Specifically, the course will focus on using futures, options, and swaps to hedge financial risks. Valuation issues will be explored to identify theoretical pricing fundamentals that can be applied toward valuing newly developed securities. Recommended preparation: FIN 235 or FIN 5509.

FIN 5560 Financial Modeling Credits: 3

The primary objective of this course is to introduce students to some of the fundamental quantitative methods used in investment analysis. The student should develop a working knowledge of measuring risk and return, probability theory, sampling and estimation, hypothesis testing, correlation analysis, regression and time series analysis. The course will emphasize experimental learning by applying these concepts to real data in a spreadsheet environment. Recommended preparation: FIN 235 or FIN 5509.

FIN 5561 Financial Statement Analysis Credits: 3

Students will take an in-depth look at the external financial statements that are prepared by corporations, including the tools needed to organize, summarize, and understand corporate financial data for use in decision making. Ratio analysis, trend analysis, earnings forecasting, bankruptcy predictors statistical methods important to finance, and financial data bases are among the topics that will be covered. Recommended preparation: FIN 235 or FIN 5509.

FIN 5562 Fixed Income Analysis Credits: 3

The primary objective of this course is to provide an overall view of the role of debt markets in the modern economy. The course will cover the characteristics of instruments traded in money and capital markets; determinants of and the relationships between different security prices; and international aspects of financial markets. Topics include: valuing fixed income securities, managing interest rate risk, interest rate theory, the organization of bond markets and the structure and pricing theory underlying the mortgage-related fixed income market. Recommended preparation: FIN 235 or FIN 5509.

FIN 5563 Valuation/Mergers and Acquisitions Credits: 3

The primary objective of this course is to introduce students to techniques used to value both exchange-traded and private firms. Students should apply these techniques to cases involving mergers and acquisitions, initial public offerings private firm valuation and the valuation of a publicly traded stock. Recommended preparation: FIN 235 or FIN 5509.

FIN 5564 Portfolio Management Credits: 3

The primary objective of this course is to introduce students to some of the fundamental portfolio management tools used by practicing investment professionals. The student should develop a working knowledge of issues regarding portfolio construction, asset allocation, mean-variance optimization, performance measurement, and client relationship management. Recommended preparation: FIN 235 or FIN 5509.

FIN 5565 Alternative Investments Credits: 3

The primary objective of this course is to introduce students to investing in alternative assets. The student should develop a working knowledge of various types of alternative investments and how they impact the risk-return profile of a portfolio. The course will cover investments in hedge funds, private equity, real estate, commodities, real assets, energy, and infrastructure. Recommended preparation: FIN 235 or FIN 5509.

FIN 5566 Financial Plan Development Credits: 3

Personal financial planning differs for each of us for a variety of reasons including age, family, wealth, needs, income, and personalities to name a few. Nonetheless the tax, financial, and risk environments which inspire us to set goals are similar for all of us. Financial planners must take all of these financial and nonfinancial factors into consideration as they devise a plan for their clients. Our objectives, therefore, are to study the personal financial planning process and environment, examine the questions of financial planning, learn financial planning techniques, and develop the ability to prepare integrated financial plans for our clients.

FIN 5567 Payment Systems Credits: 3

Payment systems are central to modern economies, underpinning nearly all economic exchange among consumers, businesses, and government entities. Payment systems in the U.S. have undergone fundamental changes recently. Yet, these systems are among the least studied and least understood components of our economy. The purpose of this course is to provide an in-depth knowledge of U.S. payment systems and an analytical framework for evaluating and responding to ongoing changes in the payments landscape.

FIN 5568 Organizational Finance Credits: 2

Organizational Finance covers the fundamentals of finance with an emphasis on learning how to critically think as a business leader with a financial mindset.

Prerequisites: Admission to the Executive MBA program.

FIN 5576 Fundamentals of Fintech Credits: 3

This course will introduce students to Fintech and provide an overview of the main areas in which it is disrupting finance. These areas include lending and equity investment (algorithmic lending, P2P lending and crowdfunding platforms); financial market infrastructure (cryptocurrencies, blockchain technology, smart contracts); portfolio management and financial advice (robo-investment); and financial trading (algorithmic trading, digital trading platforms). Students will learn how the new financial technologies work, how incumbents and new entrants might profit from the technologies, and how the technologies could affect the efficiency, accessibility, fairness, and security of the financial system.

Prerequisites: FIN 5532.

FIN 5580 Organizational Valuation & Financial Modeling I Credits: 2

This course will cover the concept of risk and reward and that to eliminate risk is to eliminate reward. We will delve into how management considers the entity's risk appetite in evaluating strategic alternatives, setting related objectives and developing mechanisms to manage related risks.

Prerequisites: Admission to Executive MBA program.

FIN 5582 Seminar In Finance Credits: 3

Advanced work in financial management, investment analysis, and financial markets and institutions will form the basis for the Seminar. Each topic selected will provide the opportunity for an investigative study on the part of the student. Major problems, hypotheses, and cases, together with the literature addressing the specific topic, will serve as the springboard for classroom activity. Both written and oral reports are required.

FIN 5587 Special Topics Credits: 3

Special topics in finance.

FIN 5595 Internship Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community.

FIN 5597 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

FIN 5899 Required Graduate Enrollment Credit: 1

Health Administration Courses

HLTH-ADM 471 Financial Management Issues of Health and Human Services Organizations Credits: 3

An overview of the financial management problems of health and human services organizations. A broad range of topics is examined: financial statements, ratio analysis, cost accounting, reimbursement and pricing, management of working capital, budgeting and programming, capital financing, and cash management.

HLTH-ADM 473 Health and Social Equity Credits: 3

Study of the interaction between health and social factors (i.e., the social determinants of health). We will explore the links between social, economic, and health disparities, both here in the United States and throughout the world. We will evaluate efforts to reduce social, economic, and health disparities, through public policies and initiatives of health care and non-profit organizations.

Prerequisites: DSOM 211 (or STAT 235 or STAT 115 or MOTRMATH 110).

HLTH-ADM 477 Leadership and Management in Health Care Organizations Credits: 3

An overview of leadership and management in health care, reflecting the uniqueness of this sector, is provided. Concepts of interprofessional relationships and team-based care delivery are introduced. Approaches to aligning diverse perspectives and interests with organizational priorities, leading change and improvement efforts, and promoting organizational learning are discussed.

HLTH-ADM 480 The Economics of Health and Medicine Credits: 3

Study of health care markets and how they function, with a particular focus on health care markets in the U.S. We will explore economic phenomena that distinguish health care markets, such as price discrimination, adverse selection, moral hazard, and public goods. We will take an in-depth look at the U.S. markets for health insurance, hospitals, physicians, and pharmaceuticals and compare the structure of these markets to their foreign counterparts. We will study government regulations and reform efforts and their impact on health care markets.

Prerequisites: DSOM 311.

HLTH-ADM 481 Health Policy in the United States Credits: 3

Examination of the relationship between determinants of health, major current health policy issues, and health policy making in the United States. The public policy process and its effects on the organization, financing, and delivery of health care are examined in detail. The roles of key players in health policy formulation and the public policy responses to current health policy are also examined.

HLTH-ADM 5551 Leadership and Strategy in Healthcare Credits: 3

This course provides an overview of major leadership and strategic issues in healthcare organizations in the areas of: 1) leadership and organizational dynamics, 2) strategic thinking and planning, 3) population health and health policy, 4) human resources, 5) performance management, and 6) organizational ethics. The course is eligible for inclusion in the Executive MBA program.

Prerequisites: Instructor approval required.

HLTH-ADM 5552 Managing Healthcare Organizations Credits: 3

This course provides an overview of major issues and essential tools in managing healthcare organizations in the areas of: 1) legal and regulatory issues that confront a healthcare organization, 2) healthcare quality and data analysis, 3) patient safety, 4) risk management, 5) process management, 6) healthcare economics, 7) cost and comparative effectiveness, 8) fundamental principles of financial management. The course is eligible for inclusion in the Executive MBA program.

Prerequisites: Instructor approval required.

HLTH-ADM 5571 Financial Management Issues of Health and Human Services Organizations Credits: 3

This course is intended to provide an overview of the financial management problems of health and human services organizations. A broad range of topics is examined: financial statements, ratio analysis, cost accounting, reimbursement and pricing, management of working capital, budgeting and programming, capital financing, and cash management.

HLTH-ADM 5572 Quality and Safety in Health Care Credits: 3

Overview of the quality, safety, and process management concepts, approaches, and issues relevant to healthcare delivery settings, including use of analytical techniques used to identify and mitigate contributing factors and process management tools that enable healthcare organizations to achieve their quality and safety goals.

HLTH-ADM 5573 Health and Social Equity Credits: 3

Examines the complex relationship between the social and political environment and health outcomes. All policy is health policy – economic, transportation, natural and built environments, schools. This course examines how social equity shapes health behaviors and how the life odds in different communities expose the historical legacies of past injustices. Only ten percent of health disparities are explained by access to care, although health care and health insurance dominate the public conversation. Draws on guest speakers, books, journal articles, popular press, film and art; as varied as are the social determinants of health, so are media that explore those relationships.

HLTH-ADM 5577 Leadership and Management in Health Care Organizations Credits: 3

An overview of leadership and management in health care, reflecting the uniqueness of this sector, is provided. Concepts of interprofessional relationships and team-based care delivery are introduced. Approaches to aligning diverse perspectives and interests with organizational priorities, leading change and improvement efforts, and promoting organizational learning are discussed.

HLTH-ADM 5578 Data Analysis for Health Care Managers Credits: 3

Data analysis tools that are useful to health care managers are developed. Common health care data structures and coding systems are introduced using health care databases that track actual patients and providers. Methods of data analysis used in health care management decision-making are studied, including risk-adjustment, contract analysis, quality measurement, cost-effectiveness analysis, and competition analysis.

Prerequisites: PUB-ADM 5510 or equivalent

HLTH-ADM 5580 The Economics of Health and Medicine Credits: 3

We will study health care markets and how they function, with a particular focus on health care markets in the U.S. We will explore economic phenomena that distinguish health care markets, such as price discrimination, adverse selection, moral hazard, public goods, and supplier-induced demand. We will take an in-depth look at the U.S. markets for health insurance, hospitals, physicians, medical devices, and pharmaceuticals and compare the structure of these markets to their foreign counterparts. We will study government regulations and reform efforts and their impact on health care markets. Economic tools that are useful for health care managers (e.g., the analysis of risk, bargaining theory) will also be covered.

Recommended preparation: Some mathematical social science.

HLTH-ADM 5581 Health Policy in the United States Credits: 3

This course helps students develop an understanding of the determinants of health, major current health policy issues, and health policy making in the United States. The public policy process and its effects on the organization, financing, and delivery of health care are examined in detail. The roles of key players in health policy formulation and the public policy responses to current health policy are also examined.

HLTH-ADM 5586 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

HLTH-ADM 5587 Special Topics Credits: 3

This course is designed to facilitate one of two purposes: an initial offering of a new course (prior to formal approval) or an initial and possible only offering of new topics.

HLTH-ADM 5595 Internship Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community.

Management Courses

MGT 100 Foundations of Business Credits: 3

Provides an introduction to the functional areas of business (e.g., accounting, systems, finance, marketing, human resources, and entrepreneurship) as well as a number of contemporary business topics, including social responsibility, diversity, ethics, and globalization. Additionally, students will be exposed to various topics that facilitate a successful transition from high school to college. Examples include an overview of University and Bloch School resources, development of effective study habits, time and stress management, selection of a major and career options.

MGT 256 Legal and Regulatory Contexts of Organizations Credits: 3

An examination of the legal, regulatory, and ethical environment in which businesses operate. Students are introduced to our legal system, focusing on selected areas of business law. Not available for credit for students who have completed MGT 306.

MGT 301 Effective Business Communication Credits: 3

The instructor introduces students to the strategic nature of business communication. By the end of the course, students should be able to analyze business situations, prepare messages that fulfill the intended purpose of their communication, and meet the needs and expectations of business audiences. Students will develop the tools to deliver effective, professional written and oral communications, and will learn how to use library and electronic business research tools.

Prerequisites: DISC 200 or ENGLISH 225 or equivalent and Bloch School student with 45 hours earned.

MGT 301A Effective Business Communication for Non-Native Speakers Credits: 3

Students will learn the strategic nature of business communication with a focus on building business English language skills and understanding U.S. business terminology and culture. By the end of the course, students should be able to analyze business situations, prepare messages that fulfill the intended purpose of their communication, and meet the needs and expectations of business audiences. Students will develop the tools to deliver effective, professional written and oral communications, in addition to cultivating their English language abilities in the business environment.

Prerequisites: DISC 200 or ENGLISH 225 or equivalent and Bloch School student with 45 hours earned.

MGT 306 Legal, Ethical And Regulatory Environment Of Business Credits: 3

The course looks at legal and moral thought, with attention to ethical issues in business. Students are introduced to our common law system; selected areas of law, with attention to the inclusion of cultural and moral values; and an introduction to government regulation of business.

Prerequisites: Bloch or BIT student with sophomore standing.

MGT 320 Law Of Commercial Transactions Credits: 3

Study of major areas of law included in the Uniform Commercial Code. Topics may include sales, commercial paper, bank deposits and collections, aspects of property law, documents of title, investment securities, and secured transactions.

Prerequisites: MGT 306.

MGT 330 Understanding the Individual in the Organization Credits: 3

This course explores the micro dynamics of organizations: the individual and his/her relationship to other people, teams, and work groups. Topics will include: individual traits, behaviors, and skills for effective performance; self-assessment and professional development; staffing; motivation; individual and group dynamics; multicultural understanding and diversity; and ethical decision making.

Prerequisites: MGT 301 or MGT 301A or concurrent enrollment (for BBA and BSA students); Bloch business minor or BIT student with sophomore standing.

MGT 332 Principles of Organizational Behavior Credits: 3

A study of the principles and foundations of managing individuals, groups, and organizations. This course seeks to develop students' understanding of the concepts and approaches that constitute the fields of organizational behavior and management and how these concepts and approaches may be applied effectively in the workplace. Not available for credit for students who have completed MGT 330.

Prerequisites: MGT 301 or MGT 301A or ACCTNG 360 or concurrent enrollment (for BBA and BSA students); Bloch minor or BIT student with sophomore standing.

MGT 337 Managing Human Capital Credits: 3

Building on prior coursework, this course will provide students with advanced human resource concepts and practices as well as practical experience in how human resources should be managed in successful businesses. Student groups will work with a local organization to diagnose, analyze, and make recommendations regarding effective programs in staffing, developing, rewarding, motivating, and managing its personnel.

Prerequisites: MGT 330 or MGT 332.

MGT 355 Organizational Effectiveness and Leadership Credits: 3

Students will study the macro dynamics of organizations: broad knowledge of how organizations work and the various ethical means of impacting outcomes. Topics will include: structure, culture, and politics of organizations; human resources and linkages to organizational culture and success; organization influence and political savvy; managing change and learning in a global context; organizational governance, codes of conduct, and internal controls; the role of business in society; and various professional development issues.

Prerequisites: MGT 330 or MGT 332.

MGT 360 Groups and Teams Credits: 3

Teamwork has become increasingly popular in many organizations. Whether formally integrated into the organizational structure, or temporarily created around specific projects, teams can be an important competency of organizations. They are considered an effective performance unit, and expected to efficiently cope with the fast changes and demands of today's business environment. Attaining the full advantages from teamwork requires effective management of team processes and dynamics. This course focuses on issues in team development, internal processes, and members' behavior, as well as management skills needed to effectively lead teams in organizations.

Prerequisites: Bloch student and completion of 45 hours.

MGT 365 Managing in a Virtual Environment Credits: 3

This course builds on the fundamentals of individual and group behavior to emphasize how organizational design and management practices have been dramatically affected by the proliferation of social media and other internet technologies. Students examine cases and engage in virtual exercises to experience ethical and mindful ways to engage in the virtual environment. Virtual-appropriate variations of interaction, collaboration, conflict management, decision-making, problem-solving, and leadership are introduced. Students also examine geographic and cultural issues potentially encountered in a global virtual organization.

Prerequisites: MGT 330 or MGT 332.

MGT 367 Human Resource Analytics Credits: 3

A survey of analytical methods necessary to understand critical HR topics and make effective human capital decisions. Analytical methods in staffing, rewards, benefits, performance management, diversity, legal issues, safety, and current HR topics will be explored.

Prerequisites: MGT 337 and DSOM 211 (or STAT 235 or STAT 115 or MOTRMATH 110).

MGT 370 International Management Credits: 3

Students receive an introduction to management in an international environment, addressing the management functions and behaviors necessary to develop global vision and management skills at a strategic (macro) and interpersonal (micro) level. Cross-cultural management and competitive strategy are evaluated in the context of global changes.

Prerequisites: Bloch student and completion of 45 hours.

MGT 372 Ethics and Leadership Credits: 3

Students use a variety of frameworks and approaches to address ethics both abstractly (via case studies) and as a practical matter, as it will affect them and how they approach life in the workplace and other organizations. Students analyze (1) the role of values and ethics in decisions that individuals, managers, and organizations make on a daily basis, as well as the responsibility of each party in these decisions, as well as (2) the impact of individual, relational, and cultural differences on how individuals, managers, and organizations recognize, understand, make, and sometimes revisit ethical choices.

Prerequisites: MGT 332 or MGT 330 or concurrent enrollment.

MGT 374 Leading a Positive Workplace Credits: 3

Students will build their understanding of the dynamics of relationships, organizations, and organizational life in building and maintaining a positive workplace. Students will incorporate individual, interpersonal, organizational, and societal foci for managing at an individual and organizational level. Strengths-based leadership, values, ethics, diversity, managing within and across levels, negotiation, conflict management, and other broad areas of leading a positive workplace will be covered. Not available for credit for students who have completed MGT 355.

Prerequisites: MGT 332 or MGT 330.

MGT 375 Global Mindset for Managers Credits: 3

Students receive an in-depth look at the major geopolitical and cultural factors that have forged the international conflicts, relations, and identities that international business managers should thoroughly comprehend to effectively navigate cross-border ventures. In-depth regional and country business and cultural profiles will be investigated to provide students with multiple contrasting perspectives to their own upbringing or sense of identity (a global mindset), allowing them to better sympathize, communicate, and collaborate when working in cross-cultural business environments.

Prerequisites: MGT 370.

MGT 410 Corporate Social Responsibility Credits: 3

Students will examine the role of corporate social responsibility (CSR) in modern society. Students will learn that being able to respond to needs and values of stakeholders is a key to success in the globalized business environment. This course also offers opportunities for students to apply knowledge to practical decision-making using case studies, research projects, or other course activities.

Prerequisites: MGT 332 or MGT 330 or concurrent enrollment; MGT 301 or MGT 301A or ACCTNG 360 or concurrent enrollment.

MGT 470 International Study in Business Credits: 3

This course is designed to provide a study-abroad experience for the student. The course involves three components: study of international business through on-campus lectures and discussions; travel to a foreign country for visitations to business firms, government organizations, and cultural sites; and critique sessions of the international learning experience after travel completion.

Prerequisites: Departmental consent with special application and selection process.

MGT 471 Strategic Management Credits: 3

The study of business strategy concepts and application using case studies representing "real world" situations. The course stresses the formulation of business strategies to achieve organizational objectives using strategic analysis and models based upon external and internal assessments of the organization's environment.

Prerequisites: Junior standing and completion of ACCTNG 211; FIN 325; MGT 330 or MGT 332; MKT 324; and completion of or concurrent enrollment in DSOM 326 or DSOM 340.

MGT 487 Special Topics Credits: 3

Special topics in management.

Prerequisites: Departmental consent.

MGT 496 Internship: Management Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Internship coursework is evaluated on a credit/no credit basis.

Prerequisites: Departmental consent.

MGT 497 Special Topics: Management Credits: 1-3

Study and research in areas of special interest under individual faculty direction.

Prerequisites: Departmental consent.

MGT 5501 International Business Environment Credit: 1.5

The aim of this course is to provide a broad introduction of the international business environment. Students will develop understanding of different economic, cultural political and legal environments affecting international business activities. They will further explore why international trade and government interventions occur among and across countries and how world financial institution have developed historically.

MGT 5502 Leadership in Organizations Credit: 1.5

This course focuses on how organizations work and how leaders can help them work better. Its goal is to provide ideas, tools, and tactics that will help students become more effective leaders. The course is designed to challenge students conceptually through readings, discussions, and developmental assessments, and to challenge at the level of self-awareness and action through teamwork, reflective activities, role plays, case applications, and "leadership challenges".

MGT 5503 Leadership Residency Credits: 2

The leadership residency engages students in the fundamentals of business and effective leadership practice during a one-week immersive experience. Using a business simulation, students learn the fundamentals of collaborative teamwork and basic concepts in the program's leadership curriculum. Additionally, the simulation introduces students to the core management areas of financial management and decision making, providing an overview of management strategy rooted in financial modeling and analysis.

Prerequisites: Admission to Executive MBA Program.

MGT 5507 Human Capital Management Credit: 1.5

This course seeks to provide managers with knowledge, skills, and resources to effectively manage human capital in organization of all sizes. It presents an overview of the theory, research, and practices used to strategically align HR policies and practices with the organization's overall business goals. The course highlights how HR policies and practices can support business objectives in a diverse, global environment while supporting ethical principles. Within a strategic HRM framework, functional areas of staffing, training and development, performance management, total rewards (compensation and benefits), and managing employment relationships are covered.

MGT 5512 Leading and Managing People, Teams and Organizations Credits: 3

Leading and Managing People, Teams and Organizations focuses on how aspiring leaders can enhance their effectiveness by addressing the human side of enterprise. It combines an exploration of key leadership tasks (e.g. shaping vision and purpose, engaging and influencing others, and sustaining momentum) with the study of essential human resources practices including hiring, developing, motivating, and creating a positive, rewarding workplace. Students will leave with concrete tools for understanding the organizational context, managing human capital, and bringing the best out of talented people.

Prerequisites: Students must be enrolled in a Bloch School graduate program.

MGT 5514 Strategic Management in the Globalized World Credits: 3

As the world has become increasingly integrated through globalization, today's business leaders must possess an awareness of global business environments and ability to navigate them. The aim of this course is to provide a broad introduction of the international business environment and strategic management concepts, and how a firm can gain competitive advantages. Upon completion of this course, students will possess an ability to recognize the opportunities and challenges and formulate strategies in the globalized business environment.

Prerequisites: FIN 5509 or concurrent enrollment; DSOM 5511 and MKT 5504.

MGT 5516 Leading Teams Credits: 3

This course is designed to enhance the student's understanding of designing, forming, developing, leading, and evaluating high-performing teams in traditional and virtual organizations. In-class projects will facilitate students' assessment and application of their own talents to the arts of member selection, coaching, and trust building to engage team members in productive and ethical group processes to achieve successful outcomes. Cases will be used to diagnose and potentially solve team difficulties considering intra-team, organizational, and extra-organizational factors.

Prerequisites: MGT 5512 or MGT 5502 or MGT 5507 or PUB-ADM 5548.

MGT 5517 Leading Through Influence and Persuasion Credits: 3

This course challenges students to think about power dynamics in organizations and the array of influence approaches leaders develop and use to build support for their ideas and strategies. Using reading, case studies, and self-reflection tools, this course engages students in critical thinking about business scenarios that require a variety of leader influence strategies beyond traditional "command and control" approaches. Through exploration of concepts such as mapping the terrain, building social capital, and managing across, students develop a toolkit of ethical strategies for enhancing their organizational credibility and influence.

Prerequisites: MGT 5512 or MGT 5502 or MGT 5507 or PUB-ADM 5548.

MGT 5518 Leadership & Motivation Credits: 3

The course explores leadership as a relationship between leaders and those they are leading that enables people to work together in the service of shared goals. The course focuses on five basic tasks of leadership: (1) diagnosis-understanding what's happening; (2) shaping purpose and values; (3) enlisting and engaging people (including coaching, building high-performance cultures, motivating and inspiring); (4) sustaining momentum; (5) reflection and assessment.

Prerequisites: MGT 5512 or MGT 5502 or MGT 5507 or PUB-ADM 5548.

MGT 5519 Conflict Management and Negotiation Strategies Credits: 3

This course explores the nature of successfully managing conflict in organizational settings, as well as the skills needed to be an effective negotiator. In this course, students will learn the difference between functional and dysfunctional conflict, how to stimulate functional conflict, various styles for managing conflict, ways to identify the desired outcomes of conflict, how to prepare for negotiations, various dispute resolution techniques, and the characteristics of effective negotiators. The course uses a variety of tools - readings, case studies, videos, and guest speakers - to engage students in real business scenarios related to managing conflict and negotiation strategies.

Prerequisites: MGT 5512 or MGT 5502 or MGT 5507 or PUB-ADM 5548.

MGT 5523 Negotiation, Conflict Management, and Influence Skills Credits: 2

Opportunities for negotiation, conflict management, and influence are everywhere. Effective negotiators use analytical skills, interpersonal sensitivity, and communication acumen to resolve conflicts, influence others, and reach agreements that serve their interests and preserve or enhance their reputations. Students will develop deep familiarity with fundamental negotiation concepts such as BATNA, reservation price, interests, and distributive and integrative negotiation. Students will also develop their practical knowledge and skills from pre-negotiation planning to post-negotiation evaluation through intensive experiential simulations with peer review and rapid feedback, personal journals, and coaching.

Prerequisites: Admission to Executive MBA Program.

MGT 5531 Leadership, Strategy and Human Resources Credits: 2

Focuses on the leader as a catalyst in developing high-performance, market-based cultures and as a human resource strategist in marshaling the workforce. Geared to the general manager, the course presents ideas and tools for building, bonding, and linking the workforce to accomplish the organization's mission. Topics include ideas and tools for identifying, recruiting, and retaining talent; developing and coaching subordinates; appraising and rewarding performance; and delegating to balance control and risk.

Prerequisites: Admission to Executive MBA program.

MGT 5533 Leading and Managing Change Credits: 3

This course provides students with analytical skills and insights to more effectively manage and lead change, especially within those organizations characterized by complexity and/or uncertainty. Using a variety of vehicles-including case studies, articles, and speakers-the course engages students in timely, real change scenarios and associated management challenges, such as adaptation in changing markets; turnarounds in troubled businesses; integrative change in acquisitions, and process change in stable businesses.

Prerequisites: MGT 5512 or MGT 5502 or MGT 5507 or PUB-ADM 5548.

MGT 5538 Strategic Management Credits: 3

Strategic Management sets the tone for year 2 of the Executive MBA. Students study the formulation and evaluation of strategy, including industry analysis, strategic positioning, and the boundaries of the firm. Students address the capacity of executive leadership to create and communicate a clear direction for a company's future. Additional focus areas include competition and innovation.

Prerequisites: Admission to the Executive MBA Program. Completion of Semester 1 and Semester 2 of the Executive MBA program.

MGT 5545 International Management Credits: 3

Examination of the management of contemporary international business organizations through a study of the political, economic, social and technological factors and their relationship and impact upon the administrative activities and strategies of the international firm.

MGT 5546 Seminar in International Management Credits: 3

This course focuses on the issues that business organizations face in a global economy. The instructor will introduce global strategic decisions via case studies.

Prerequisites: MGT 5545.

MGT 5547 Global Initiatives in Management Credits: 2

Global Initiatives in Management examines the complexity of management across national boundaries. The course explores the interrelationship and impact of political, economic, social, and technological factors when formulating and executing strategy internationally.

Prerequisites: Admission to the Executive MBA program

MGT 5552 International Study in Business Credits: 3

This course is designed to provide a study-abroad experience for the student. The course involves three components: study of international business through on-campus lectures and discussions; travel to a foreign country for visitations to business firms, government organizations, and cultural sites; and critique sessions of the international learning experience after travel completion.

Prerequisites: special application and selection process.

MGT 5557 Leadership And Organizations Credits: 3

Leadership and Organizations provides tools and tactics for assessing organizations' needs and constraints through multiple lenses, and assessing one's own leadership strengths and weaknesses for development and alignment with organization needs. Additionally, students will be introduced to a framework for ethical decision making, and how ethics is important to the strategic outcomes of an organization.

Prerequisites: Admission to Executive MBA Program.

MGT 5566 Attracting, Retaining, and Developing Human Capital Credits: 3

This course presents theoretical frameworks and practical applications for determining optimal person-organization fit and person-job fit within organizations. Emphasis will be placed on integrating recruitment, selection, retention, and training and development strategies and practices with overall business strategies. The importance of strategically planning and implementing staffing and development processes will be addressed as critical contributors to organizational effectiveness and sustainability. Recommended preparation: MGT 5512 or MGT 5502 or MGT 5507 or PUB-ADM 5548.

MGT 5567 Total Rewards Management Credits: 3

Total Rewards Management presents both theory and practice for designing effective rewards systems within organizations. The development of base pay and incentives and how they can be linked to performance will be covered. Characteristics of the work environment, such as recognition and development opportunities will also be considered in terms of their contribution to the total reward system. Recommended preparation: MGT 5512 or MGT 5502 or MGT 5507 or PUB-ADM 5548.

MGT 5568 Talent Management Credits: 2

Attraction, retention, motivation, and management of the organization's human resources is critical in our knowledge-based economy. This course will address strategic issues around sourcing, acquiring, motivation, retaining, and managing workers in domestic and global enterprises from a variety of industries.

Prerequisites: Admission to Executive MBA program.

MGT 5569 Leadership Accountability and the Legal Implications Credits: 2

Highlights the accountability of leaders and the challenges they face in the rapidly changing business environment. The course studies the political, social, ethical, and global environment in which American business organizations operate and the impact on today's leaders. Topics include creating and maintaining affiliate relationships and joint ventures, as well as prohibitions in anti-competitive behavior, protection of intellectual property, operating within a regulated environment, and securities law.

Prerequisites: Admission to Executive MBA Program.

MGT 5570 MBA Capstone-Global Management Consultancy Credits: 3

An integrative global management consulting experience for a real world organization that applies analytical skills in the areas of finance, marketing, information systems, supply chain management, human resources, leadership, innovation, international, and strategy. Course deliverables include written and oral reports for the client organization. The course requires travel to visit client organization's operations.

Prerequisites: MBA students must have completed all required core courses AND be in the last year of their program. MSA, MPA, MSF, MSERE, or MSGE program students may enroll with consent of instructor. Special application and selection process.

MGT 5571 Influence, Persuasion and Change Credits: 2

Presents ideas, strategies, and tools for leading change in complex organizations. This course challenges students to think about the execution of change strategies through assessment or organizational power dynamics and appropriate influence styles for achieving results. Emphasis is placed on analyzing these attributes and skills most critical for building influence, especially in change initiatives, and on defining an ethical approach to leading, influencing, and persuading others.

Prerequisites: Admission to the Executive MBA program.

MGT 5572 MBA Capstone-The Capstone Consulting Project Credits: 3

An integrative management consulting experience for a real world organization that requires application of conceptual models and analytical skills in multiple disciplines including areas such as finance, marketing, information systems, supply chain management, human resources, leadership innovation, international, and strategy. Course deliverables include written and oral reports for the client organization. The course requires interaction with senior managers in the client organization with anticipation of in-person or virtual visits to the firm.

Prerequisites: MBA students must have completed all required core courses AND be in the last year of their program. MSA, MPA, MSF, MSERE, or MSGE program students may enroll with consent of instructor.

MGT 5581 Current Issues in Management with Technology Credits: 2

Technology is being incorporated in all aspects of management. The current issues course explores the strategic deployment of technology in operational areas like supply chain, marketing, human resources and accounting. Students are exposed to technology as a strategic tool to be incorporated in core management functions.

Prerequisites: Admission to EMBA program.

MGT 5585 Integrated Business Strategies (Capstone) Credits: 2

Integrates the disciplines of business to help the student develop a comprehensive understanding of business planning and strategy. Students will use cases and simulation to plan and test alternative business strategies in a competitive environment. The course examines the critical factors involved in strategic decision making.

Prerequisites: Admission to the MBA Program.

MGT 5587 Special Topics Credits: 3

The study of a contemporary management topic of interest.

MGT 5595 Internship Credits: 1-3

An opportunity for students to integrate their academics studies via employment with a business/organization in the community.

MGT 5597 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

MGT 5899 Required Graduate Enrollment Credit: 1

Management Information Systems Courses

MIS 202 Computer Applications In Management Credits: 3

A comprehensive coverage of computer tools for personal productivity in a management context, including spreadsheets and databases.

Prerequisites: MATH 110 or MATH 120 or higher; or ALEKS score of 61 or higher; or ACT MATH sub-score of 28 or higher; or SAT MATH sub-score of 660 or higher.

MIS 402 Information Management Credits: 3

This course introduces students to the impact of information technologies and systems on the enterprise. Business Intelligence and decision support capabilities are explored as well.

Prerequisites: MIS 202 and junior standing Bloch student.

MIS 415 Managing the Information Systems Resource Credits: 3

All organizations today have information systems, and managing the related resources (systems personnel, software applications, databases, networks, computing hardware) is a necessary skill for many employees. This course is aimed at developing the non-technical skills that business-school graduates need to make appropriate decisions about the deployment of information systems throughout the firm.

Prerequisites: MIS 202 and junior standing Bloch student.

MIS 487 Special Topics Credits: 3

Special topics in management information systems.

Prerequisites: Departmental consent.

MIS 496 Internship: Management Information Systems Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Internship coursework is evaluated on a credit/no credit basis.

Prerequisites: Departmental consent.

MIS 497 Special Topics: Management Information Systems Credits: 1-3

Study and research in areas of special interest under individual faculty direction.

Prerequisites: Departmental consent.

MIS 5507 Business Analytics and Statistics Credits: 3

Business Analytics is about the science and the art of using data for making well-informed business decisions. The course covers the techniques used for acquiring and preparing data, as well as various statistical methods and procedures for mining the data to identify and infer patterns, relationships, and trends. It discusses how these methods can be used by managers for descriptive, predictive, and prescriptive purposes. Upon the successful completion of this course, the student will have the knowledge and the hands-on skills to apply business analytics techniques to various business contexts.

Prerequisites: Bloch School graduate program student.

MIS 5529 Decision Support Systems Credits: 3

Information systems to support decision makers in organizations. This course focuses on influences of cognitive biases and group think on decision makers. Identification of both potential uses of information technology to support decision makers and potential effects of information technology on the decision making processes, and may include a number of computer-oriented assignments.

Prerequisites: MIS 5507.

MIS 5540 Information Technology as a Strategic Tool Credits: 2

This course examines the critical linkage between an organization's business, cultural, and information technology (IT) strategies. In organizations today, information technology has become a key component in accomplishing strategic and operational goals. The course provides concepts and a framework for understanding and enhancing the role IT can play in innovation, change, and continuous organizational learning.

Prerequisites: Admission to the Executive MBA program.

MIS 5552 Data Base Management Credits: 3

Data administration, including theory of relational databases and projects using relational data management packages. The course looks at data modeling and information engineering, entity-relationship modeling, database design, normalization, data dictionaries, distributed databases, database servers, data quality assurance, data integrity, SQL, and may include a number of computer-oriented assignments.

Prerequisites: MIS 5507.

MIS 5554 Systems Analysis, Design And Engineering Credits: 3

This course introduces tools for documenting information system requirements and design and implementation methods; organization of software projects; system specifications, documentation and diagramming standards; programming languages and methodology; costs and schedule estimation, project management; program verification, and internal control issues.

MIS 5557 Data Management and Data Mining for Business Analytics Credits: 3

Data are the major ingredient for making quality business decisions. Students are introduced to the major steps in storing and preparing data as the raw input for decision-making. This includes an introduction to relational databases and data warehouses. Students also learn data mining techniques and statistical methods for inferring and extracting actionable insight from data. These methods help identify relationships and trends in existing cases and provide predictive power about new, unseen cases. Upon successful completion of this course, students will have an understanding of how data can be used to support fact-based decision-making across various business functions and contexts.

Prerequisites: MIS 5507, or DSOM 5509, or PUB-ADM 5510, or ACCTNG 5568, or RL-EST 5573, or FIN 5560.

MIS 5558 Management of Information Technology Credits: 3

Topics to be covered include procurement and management of computer systems, economics of hardware and software, software acquisition, RFQs, RFPs, contract terms and conditions, end-user computing, capacity planning, contribution of computing to business objectives, control, audit, and security of information technology; legal and ethical perspectives; and international issues.

MIS 5587 Special Topics Credits: 3

Special topics in management information systems.

MIS 5597 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

MIS 5899 Required Graduate Enrollment Credit: 1

Marketing Courses

MKT 324 Principles of Marketing Credits: 3

The course focuses on the processes involved in the marketing of goods and services, including the meaning and importance of marketing terminology, the marketing mix, the marketing concept, consumerism, market segmentation, market and marketing research, and the impacts of different competitive structures on marketing decision making.

Prerequisites: Completion of 45 hours.

MKT 335 Customer Insights Credits: 3

This course draws upon findings from various disciplines including cognitive psychology, social psychology, sociology, economics, and anthropology to understand and predict buying behavior. Structured around applications in marketing strategy, topical coverage includes motivation, perception, attitude change, choice decisions and the consumption process, as well as post-purchase satisfaction.

Prerequisites: MKT 324.

MKT 348 Marketing Research Credits: 3

Marketing Research is designed to systematically introduce students to the most commonly used tools/techniques used to arrive at major business decisions from a consumer/customer perspective. The course emphasizes analysis of data using statistical models. Students will use designated software to analyze data to address real-world marketing problems pertaining to market entry decisions, new product development, product positioning, and pricing.

Prerequisites: MKT 324; and DSOM 211 (or STAT 235 or STAT 115 or MOTRMATH 110) or DSOM 309.

MKT 390 Customer Data Analytics Credits: 3

Customer Data Analytics is designed to systematically introduce students to contemporary tools/techniques pertaining to the analysis of customer data to assist with business decision-making. The course emphasizes analysis of data using statistical models. Students will use designated software to analyze a wide variety of customer data for business purposes such as assessing customer response to marketing intervention, classification, clustering (for market segmentation), etc.

Prerequisites: MKT 324 and DSOM 211 or DSOM 309.

MKT 418 Advertising and Branding Credits: 3

Students receive exposure to the planning, implementation, and evaluation of various advertising and promotion strategies. Topics covered will include communication process, brand positioning, branding strategies, creative strategies; media planning, and promotional effectiveness.

Prerequisites: MKT 324.

MKT 420 Sales Management Credits: 3

This course examines the strategic management of the boundary-spanning function of the organization, the sales force. Topics include the selling process, customer relationship management, organizing the sales effort, utilizing sales force automation technology, understanding the salesperson's role, selecting appropriate salespeople, motivating the sales force, conducting training programs, and evaluating the efficacy of individual salespeople and the overall sales function.

MKT 430 Personal Selling Credits: 3

Regardless of what career you choose, sales will be a part of your life. Sales is an extremely common first job for graduating students and more than half of business graduates hold their first job in sales. The skills you will learn in this course are especially applicable to the professional selling context, however, they are also very relevant in non-sales applications. For example, this class will provide guidance in how to effectively conduct a job interview, make a sales proposal, deal with objections, manage your managers, and much more. These skills are valuable in any job regardless of major.

MKT 442 Social Media and Mobile Marketing Credits: 3

The course builds around Database Marketing principles, whether supporting marketing at a distance without requiring a physical wholesale or retail intermediary; or supporting physical retail. Social and Mobile media principles, on-line measurement, digital marketing strategy, and tactics by on-line platform are discussed across a variety of media and devices. Students must demonstrate competence in SEO (Search Engine Optimization) and on-line analytics.

Prerequisites: MKT 324.

MKT 465 Introduction to Retailing and Pricing Credits: 3

This course presents an approach to retail and pricing management. Topics covered in the course include: retail strategy development, understanding the customer, retail information systems, market location selection, merchandise buying and handling, financial operations management, human resource management, operations management, store layout and design, laws ethics, and retail tactics.

Prerequisites: MKT 324

MKT 480 Strategic Marketing Credits: 3

Marketing 480 is the capstone course in the marketing curriculum. The intent of this course is to review and integrate the important concepts you have learned in your other marketing and general business classes into a unified whole. This class is very intensive as well as interactive.

Prerequisites: MKT 324.

MKT 487 Special Topics Credits: 3

Special topics in marketing.

MKT 496 Internship: Marketing Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Internship coursework is evaluated on a credit/no credit basis.

Prerequisites: Departmental consent.

MKT 497 Special Topics: Marketing Credits: 1-3

Study and research in areas of special interest under individual faculty direction.

Prerequisite: Departmental consent.

MKT 5501 Marketing Management Credit: 1.5

This course goes beyond the explanation of basic concepts of marketing. The goal is to present a strategic and integrative perspective of marketing in the contemporary digital, global and competitive marketing environment. The emphasis is on the interface between an organization's objectives, capabilities, resources and marketplace needs and opportunities. Examples of major topics to be covered are market-oriented philosophy and corresponding strategy, customer relationship management, branding and brand equity, services marketing, marketing ethics, defensive and offensive marketing strategies, product positioning, distribution and pricing strategies.

MKT 5504 Marketing Management Credits: 3

The course presents concepts of marketing, describes marketing strategy, and defines marketing tactics. Marketing law, fiduciary responsibilities, and marketing ethics for executives impacted by marketing success are identified. The goal is to present a strategic and integrative perspective of marketing in the contemporary digital, global and competitive marketing environment. The integration between an organization's objectives, capabilities, resources and marketplace needs and opportunities is described. Examples of major topics to be covered are marketing philosophies and their corresponding strategies, technology-driven customer relationship management, branding and brand equity, services marketing, product positioning, distribution and pricing strategies, and implementation of marketing tactics in.

Prerequisites: Students must be enrolled in a Bloch School graduate program.

MKT 5539 Social and Mobile Marketing Credits: 3

The course builds around Database Marketing principles, whether supporting marketing at a distance without requiring a physical wholesale or retail intermediary; or supporting physical retail. Social and Mobile media principles, on-line measurement, digital marketing strategy, and tactics by on-line platform are discussed across a variety of media and devices. Students must demonstrate competence in SEO (Search Engine Optimization) and on-line analytics. Students learn to calculate Lifetime Value, Break-Even, PL on a Campaign, and Payback period using industry accepted methodologies.

Prerequisites: MKT 5504.

MKT 5555 International Marketing Credits: 3

This course focuses on marketing problems confronting international business managers and the ways they may be analyzed and resolved.

The course content includes concepts and techniques useful in international marketing; effects of national differences on marketing practices; organization for international marketing; and strategy formulation for international markets.

Prerequisites: MKT 5504.

MKT 5560 Customer Insights and Communication Strategy Credits: 3

A review of behavioral science concepts and related academic research to help understand customer behaviors and communications targeted to them. Special emphasis is placed on applications of these concepts to problems related to strategies of product, pricing, promotion, and place or distribution.

Prerequisites: MKT 5504.

MKT 5562 Marketing Research & Data Analysis Credits: 3

This course is designed to systematically introduce you to the most commonly used tools/techniques used to arrive at major business decisions from a consumer/customer perspective. The course emphasizes analysis of data using statistical software. Students will be taught to use designated software to analyze data to address real-world marketing problems.

Prerequisites: MKT 5504 and MIS 5507.

MKT 5565 Marketing Management Credits: 2

Marketing management examines the role of marketing in driving profitable revenue growth in companies. The focus is placed on tools and approaches to analyzing and understanding customer needs- including the roles of market research and brand equity- and the development of integrated marketing plans to deliver to those needs.

Prerequisites: Admission to Executive MBA Program.

MKT 5566 Customer Data Analytics Credits: 3

This course is designed to systematically introduce you to the most commonly used tools/techniques for the analysis of customer data for managerial decision-making in a wide variety of business settings. The course emphasizes tools for predictive analytics using statistical software. Students will be taught basic concepts pertaining to regressions, choice models, classification, and segmentation techniques together with hands-on training in designated software. Recommended preparation: Graduate level course in business statistics or decision science.

Prerequisites: MKT 5504 and MIS 5507.

MKT 5575 Applied Strategic Marketing Credits: 3

This course focuses on advanced marketing skills and practical techniques for defining and meeting the needs of the chosen market. The emphasis is on key drivers of marketing effectiveness, including creating a market-oriented culture, customer-focused information systems, the relationship of various components of marketing, and the response to marketing variables. A variety of pedagogical approaches, including applied projects, may be employed.

Prerequisites: MKT 5504.

MKT 5587 Special Topics Credits: 3

Special topics in marketing.

MKT 5595 Internship Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community.

MKT 5597 Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

MKT 5899 Required Graduate Enrollment Credit: 1

Public Administration Courses

PUB-ADM 410 Research Methods In Public Administration Credits: 3

This introductory course focuses on quantitative empirical research design and statistical analyses in relation to public administration issues and concerns.

Prerequisites: Departmental consent.

PUB-ADM 420 Urban Environmental Policy Credits: 3

Our cities are a first line of action in our efforts to sustain our environment. Many have begun to examine and address the connection between city problems and environmental and climate change, and the disproportionate impacts that they often have on the disadvantaged, yet these initiatives address only the surface of the issue. It is essential for scientists, public administrators, environmentalists, and policy thinkers to pay greater attention to the environmental challenges of our cities. Students examine and assess the challenge of understanding, developing and implementing coherent environmental policy to address such challenges in urban communities.

PUB-ADM 421 Managing for Sustainability in an Urban Environment Credits: 3

Managing for sustainability requires an understanding of theories of organization, environmental management, and sustainability, including how to define and achieve sustainability. Students examine the complexities associated with issues of sustainability and the interrelationship between the global, the local and the personal. This includes consideration of how organizations function, the obstacles to sustainability confronted by sustainability managers, and specific management strategies and tools available to sustainability managers. It also involves the study of change models and their application by managers faced with the challenge of moving an organization from an old operational model to a more sustainable new organizational design.

PUB-ADM 422 Ethics for Nonprofit and Public Administrators Credits: 3

It is essential that organization and community leaders and managers understand the imperatives of ethical practice and ethical leader and manager behavior in nonprofit and governmental settings. Students are prepared to identify and assess the ethical implications of management and policy alternatives, to spot ethical issues before they become crises, and to competently and confidently develop and implement ethical decisions and actions in policy and practice. The ethical dimensions of democracy, political loyalty, pressure politics, interest group issues, pluralism, diversity and multi-cultural challenges, corruption and evil, honesty, the limits of ethical codes, whistle-blowing are included.

PUB-ADM 448 Leadership For Public Service Credits: 3

The two core purposes of this course are for students to learn about effective and ethical leadership, and for students to understand and develop their own capacity for leadership. The course is organized around three general themes: 1) leadership as relations with subordinates, including issues of work motivation; 2) leadership as lateral relations, including organizational politics and conflict management and resolution; and 3) leadership as influence in the organization's environment.

Prerequisites: Departmental consent.

PUB-ADM 455 Non-Profit Leadership Issues Credit: 1

Focusing on leadership issues in nonprofits, this course will explore issues in an intensive seminar format (fifteen class hours). Topics include building and renewing nonprofit boards, and the power of diversity in nonprofit organizations. Recommended for nonprofit management students.

PUB-ADM 455B Non-Profit Leadership Issues: Board-Staff Relations Credit: 1

PUB-ADM 487 Special Topics Credits: 3

Special topics in public administration.

PUB-ADM 492 Creating and Measuring Social Impact Credits: 3

Students learn alternative approaches for conceptualizing and understanding the performance, effectiveness, and impact of nonprofit organizations and the programs they operate, and employ the basic frameworks and processes by which social impact can be measured and evaluated. This includes the use of logic models and theories of change to inform the design, operation, and evaluation of programs, with specific attention to data-based analytic approaches to impact assessment.

Prerequisites: Junior or senior standing.

PUB-ADM 493 Nonprofit Fundraising and Development Credits: 3

Examines the processes and functions by which nonprofit organizations plan, organize, implement and evaluate the work of fundraising and development to secure the financial resources needed to support and sustain their programs and activities. Students gain an understanding of and practical experience in employing the basic approaches and techniques used by nonprofits to raise and deploy philanthropic resources, including annual and multi-year giving programs, major gift solicitation, planned giving initiatives, capital campaigns, and prospect research and proposal writing.

Prerequisites: Junior or senior standing.

PUB-ADM 494 Leading and Managing Nonprofit Organizations Credits: 3

Examines the processes by which nonprofit charitable organizations and associations are governed, led, and managed, with particular attention to the work of the board, executives, and managers. Students learn a strategic framework by which to sustain and enhance the performance and impact of these nonprofit organizations. Among topics of special importance are the dimensions of governance, strategy and planning that are unique to nonprofit public service organizations, including stages of organization development, the planning and business model development associated with the financial management, human resource management, board leadership, ethical decision making, and organizational effectiveness and accountability.

Prerequisites: Junior or senior standing.

PUB-ADM 495 Voluntarism, Philanthropy & The Non-Profit Sector In The U.S. Credits: 3

Nonprofit organizations are omnipresent in our lives. They provide necessary social services to all sectors of society. They are important instruments of socialization. This course investigates this under-examined sector of our society. It looks to theoretical reasons for the sector, its empirical trends, and the significant challenges that it faces.

PUB-ADM 497 Special Topics In Public Administration Credits: 1-3

Study and research in areas of special interest under individual faculty direction.

Prerequisites: Departmental consent.

PUB-ADM 497B Special Topics In Public Administration Credits: 1-3

PUB-ADM 5507 Management in Context Credits: 3

This course introduces students to management in business, public, and nonprofit organizations, with an emphasis on the political, legal, regulatory, social, and global contexts. Students will take this course at the beginning of their M.B.A. program and will learn to integrate the course content into their other courses. They will apply theories and concepts to organizational issues, legal, and ethical problems. They will be exposed to the major differences between U.S. and international approaches regarding many management issues.

Prerequisites: Students must be enrolled in a Bloch School graduate program.

PUB-ADM 5510 Research Methods in Public Administration Credits: 3

This introductory course focuses on quantitative empirical research design and statistical analyses in relation to public administration issues and concerns.

PUB-ADM 5523 Public Policy and Industry Credits: 3

Private sector organizations are subject to the public policy process and decisions from executive agencies of the government. Public policy and industry enables students to build business acumen, cultivating an understanding of how public sector decisions impact strategic objectives. Specific attention will be devoted to the impact economic policies have on private sector organizations.

Prerequisites: Admission to the Executive MBA program.

PUB-ADM 5525 Financial Accountability And Policy Development Credits: 3

Modern fiscal policy and its administrative implications to planning, budgeting, revenue administration, accounting and appraisal, and the process for assuring accountability in the development, timing, and execution of public programs.

Prerequisites: PUB-ADM 5510.

PUB-ADM 5526 The Politics of Administration Credits: 3

This course will introduce the subject of public administration from a political perspective. Special attention will be given to an examination of the administrative branch of government. More specifically, the course will focus on the demands directed to administrators from various sectors of the political system, the ways in which administrators respond to those demands, and methods available for the analysis of public policies that help us assess the impacts that flow from administrators' actions.

PUB-ADM 5528 Supervision, Performance Leadership, & Human Resource Management Credits: 3

Focuses on the public service leader as a catalyst in developing and sustaining high-performance, outcome-based cultures and as a human resource strategist in marshaling the workforce. Geared to the work of nonprofit, health care, and government executives and managers, the course addresses strategies for developing, organizing, and mobilizing the workforce to accomplish the organization's mission. Topics include recruiting, engaging and retaining talent, including volunteers; developing and coaching subordinates; appraising and rewarding performance; delegation; and legal dimensions of HR, including anti-discrimination law.

Prerequisites: PUB-ADM 5548.

PUB-ADM 5529 Social Responsibility and Social Entrepreneurship Credits: 2

Using the social enterprise concept, students learn the theory that major companies can move social responsibility from a cost center to a profit center. In this evolving landscape, social entrepreneurs are at the vanguard of creating new business models for neglected markets that corporations can emulate, partner with or acquire to take to scale. As the traditional lines blur among nonprofits, government and business, it is critical that business students understand the opportunities and challenges in this new landscape.

PUB-ADM 5530 Capstone Seminar in Public Administration Credits: 3

This course examines theories of public organizational design, structure and change, including various issues in the administration of public organizations. Questions of professional ethics and management in the public interest are also considered. This is the final course in the MPA core curriculum.

Prerequisites: PUB-ADM 5525, PUB-ADM 5526, PUB-ADM 5544, PUB-ADM 5548 (or equivalents), or concurrent enrollment. Health-services students can substitute HLTH-ADM 5571 for PUB-ADM 5525, and HLTH-ADM 5578 for PUB-ADM 5544.

PUB-ADM 5535 Urban Policy and Administration Credits: 3

An examination of contemporary problems and issues found in urban environments. This includes exploration of the historical, political, economic, and social foundations of contemporary urban problems. Students will use general knowledge of public policy processes to develop skills, strategies, and knowledge necessary to analyze urban problems and develop policy solutions. An explicitly multi-sector focus will inform urban policy analysis and solutions.

PUB-ADM 5536 Managing Urban Economic Development Credits: 3

This course explores what managers in the public, nonprofit and private sectors need to know about urban economic development. Topics include (a) theories of urban economic development, (b) varying forms of development (e.g., attraction of new industries, central business district development, neighborhood economic development), (c) policy managerial tools for stimulating development, and (d) issues of equity in economic development.

PUB-ADM 5538 Comparative Urban Administration Credits: 3

An analysis of urban administration and planning in different comparative political, economic, and cultural settings. Analytical techniques will be applied to case studies of selected urban administrative processes involving American and other cities.

PUB-ADM 5539 Urban Planning for Public Administrators Credits: 3

This course is designed to provide students in urban administration with a comprehensive overview of the planning process. Course topics include a review of planning and the problems of effective planning implementation.

PUB-ADM 5540 Local Government Management Credits: 3

An examination of the challenges encountered in the local government management function and its role. Topics covered include political and organizational structure, service delivery, finance, personnel policies, intergovernmental relations, urban development, and leadership. The course includes presentations by practicing professionals, an emphasis on the case study method, and opportunities to analyze real-world issues and prepare recommendations for addressing them.

PUB-ADM 5541 Public Policy Development and Analysis Credits: 3

Public, nonprofit, and health organizations must navigate dense systems of complementary and contradictory public policies. These policies assign value to the actions of citizens, and are designed through a process of negotiation and analysis. In this course students will develop the frameworks and analytical methods necessary to understand the process of policy creation as well as the costs and benefits associated with any given policy, including the economic foundations for policy and the impact of policy on management decisions.

PUB-ADM 5544 Program Evaluation Credits: 3

Survey of the tools and procedures for evaluating and analyzing policies and programs in the public sector, including nonprofit and human services organizations. Consideration of such topics as definition of goals, developing measures of effectiveness, evaluation research designs, benefit-cost analysis, and the special problems of rational analysis in a political environment.

Prerequisites: PUB-ADM 5510.

PUB-ADM 5546 Socially Responsible Management and Ethics Credits: 2

An introduction to the context of management in business, public, and nonprofit organizations with a specific emphasis on the political, regulatory, social, natural and global environment of management. Students gain an understanding of organizations and management that can be used in day-to-day work environments, apply theories and concepts to identify organizational issues, problems, and/or ethical considerations. Working individually and in groups, students explain in written and oral formats, and in general and specific terms, what an organization is, how it works, and how it relates to them, to other organizations, and the environment.

PUB-ADM 5548 Leadership, Change and Social Impact Credits: 3

The two core purposes of this course are for students to learn about effective and ethical leadership, and for students to understand and develop their own capacity for leadership in dynamic, complex, and multisector environments. The course is organized around three general themes: 1) leadership as relations with subordinates, including issues of work motivation; 2) leadership as lateral relations, including organizational politics and conflict management and resolution; and 3) leadership as influence in the organization's environment.

PUB-ADM 5551 Managing Nonprofit Organizations Credits: 3

Managing Nonprofit Organizations is designed to prepare students for a career in executive management in private, nonprofit/nongovernmental organizations. The course examines the overall concepts of management and strategy in the nonprofit setting, and the role of board and executive leadership in providing strategic direction for the organization. The course addresses topics of special importance in the governance and strategic management of charitable nonprofit organizations, including organization development, board leadership, strategic planning, human resource management, organizational performance and effectiveness, and marketing.

PUB-ADM 5552 Community Organizations and Public Policy Credits: 3

This course includes examination of both neighborhood organizations and organizations intended to promote other communities of interest. In relation to neighborhood organizations, topics considered include the varieties of neighborhoods, the role of neighborhood organizations in local politics, the use of neighborhoods in administrative and political decentralization, and federal policy toward neighborhood issues. In relation to other community organizations, topics considered include the basis of such organizations, their roles in public affairs and their effects on policy processes.

PUB-ADM 5553 Legal Framework & Financial Management of Nonprofit Organizations Credits: 3

Utilizing a comparative approach the course examines the legal basis and tax treatment of private, nonprofit organizations in the U.S. Related topics also considered include concepts of fund and cost accounting, budgeting processes, earned income strategies, employee compensation and benefits practices, laws and regulations affecting lobbying, competition with business and unrelated business income tax.

PUB-ADM 5554 Seminar on Social Entrepreneurship Credits: 3

Seminar on Social Entrepreneurship is a graduate-level special-topics seminar that offers students from across the university the opportunity to engage in an in-depth examination of social entrepreneurship and how it is being understood, developed and practiced in the nonprofit sector. Students will gain a broad understanding of the various conceptions, types and aspects of social entrepreneurship, learn about processes for engaging in entrepreneurial nonprofit organization development, and discuss design and implementation issues with nonprofit leaders who have implemented various forms of social entrepreneurship.

PUB-ADM 5555 Topics In Nonprofit Fundraising Credits: 1-3

In order to flexibly treat the variety of strategies and techniques of charitable fundraising, these courses will usually be offered in variable credit hour segments, covering traditional and emerging fundraising topics. Each semester, two two-credit-hour segments and two one credit-hour segments will be offered. The two credit hour courses - "Organizing for Successful Fund Raising" and "Creating and Implementing the Annual Development Plan" - cover the basics of fund raising. The one-credit hour courses allow students to explore several different issues related to fund raising such as direct marketing and planned giving. These courses are recommended for nonprofit management students.

PUB-ADM 5555A Topics in Nonprofit Fund Raising: Organizing for Successful Fund Raising Credits: 2

Organizing for successful fundraising.

PUB-ADM 5555B Topics In Nonprofit Fund Raising: Creating & Implementing Annual Development Plans Credits: 2

Creating and implementing annual development plans.

Prerequisites: PUB-ADM 5555A.

PUB-ADM 5555C Topics in Nonprofit Fund Raising: Direct Marketing & Direct Mail in Fundraising Credit: 1

Direct marketing and direct mail in fundraising.

PUB-ADM 5555D Topics In Nonprofit Fund Raising: Planned Giving and Major Gift Solicitation Credit: 1

Planned Giving and Major Gift Solicitation.

PUB-ADM 5555E Topics in Nonprofit Fund Raising: Contemporary Trends/Ethical Issues in Fund Raising Credit: 1

Contemporary trends/ethical issues in fundraising.

PUB-ADM 5555F Topics in Nonprofit Fund Raising: Prospect Research and Proposal Writing Credit: 1

Prospect research and proposal writing.

PUB-ADM 5555G Developing Campaigns and Working with Consultants Credit: 1

In this course, various fund development campaigns and strategies will be explored; students will understand the differences between construction, renovation, equipment, program development and endowment as gift objectives. The phases of a campaign will be reviewed along with background on committee structures, goal-setting, leadership, timing and gift tables. The role of fund raising counsel will be explored. Participants will have an understanding of campaigns as important, episodic exercises for nonprofit agencies.

PUB-ADM 5555H Measurement and Evaluation for Fundraising Success and Social Impact Credit: 1

Nonprofit leaders can spend an enormous amount of time and effort creating evaluation models and reporting relevant data to funders to demonstrate positive social impact. Demonstrating success of a program or initiative is the basis for ensuring that a nonprofit has been a good steward of its mission and donated funds. However, the investment in building and fulfilling evaluation models must be commensurate with the funds awarded. This course will provide an overview of the planning and development of evaluation approaches that align well with the organization's and funder's needs. The course will introduce participants to the development and use

PUB-ADM 5555X Topics in Nonprofit Fundraising Credit: 1

Special topics in nonprofit fundraising.

PUB-ADM 5556 Innovation in Nonprofit Management and Leadership Credits: 3

This course provides an opportunity for students in the nonprofit management specialization to examine "breaking" innovations in nonprofit management and leadership. Intra- and inter-sectoral collaborative strategies and total quality management are illustrative examples. Other topics will be considered as warranted. Recommended preparation: PUB-ADM 5525, PUB-ADM 5548, and at least six hours of nonprofit management coursework.

PUB-ADM 5557 Nonprofit Fundraising and Development Credits: 3

Examines the processes and functions by which nonprofit organizations plan, organize, implement and evaluate the work of fundraising and development to secure the financial resources needed to support and sustain their programs and activities. Students gain an understanding of and practical experience in employing the basic approaches and techniques used by nonprofits to raise and deploy philanthropic resources, including annual and multi-year giving programs, major gift solicitation, planned giving initiatives, capital campaigns, and prospect research and proposal writing.

PUB-ADM 5558 Ethics for Nonprofit and Public Administrators Credits: 3

It is essential that organization and community leaders and managers understand the imperatives of ethical practice and ethical leader and manager behavior in nonprofit and governmental settings. Students are prepared to identify and assess the ethical implications of management and policy alternatives, to spot ethical issues before they become crises, and to competently and confidently develop and implement ethical decisions and actions in policy and practice. The ethical dimensions of democracy, political loyalty, pressure politics, interest group issues, pluralism, diversity and multi-cultural challenges, corruption and evil, honesty, the limits of ethical codes, whistle-blowing are included.

PUB-ADM 5559 Nonprofit Organizations in Context Credits: 3

This course provides a survey of the origins, development and contemporary functioning of the private, nonprofit sector in the U.S. The course explores theories and concepts that describe the social, political, legal and economic meaning of voluntarism, philanthropy and the nonprofit sector.

PUB-ADM 5565 Topics In Urban Administration Credits: 1-3

To flexibly treat the variety of strategies, information, and techniques in urban administration and leadership, these courses will be offered in variable credit hour segments. Each semester, courses will be offered around traditional and emerging topics. An initial "basics" series will be offered on community development organizations, urban economic development and community development strategies.

PUB-ADM 5565A Community Economic Development: The Planning Context Credit: 1**PUB-ADM 5565B Community Economic Development Tools & Techniques Credit: 1****PUB-ADM 5565C Implementing Effective Community Economic Development Credit: 1****PUB-ADM 5565D Topics in Urban Administration Credits: 1-3**

To flexibly treat the variety of strategies, information, and techniques in urban administration and leadership, these courses will be offered in variable credit hour segments. Each semester, courses will be offered around traditional and emerging topics. An initial "basics" series will be offered on community development organizations, urban economic development and community development strategies.

PUB-ADM 5566 Urban Environmental Policy Credits: 3

Our cities are a first line of action in our efforts to sustain our environment. Many have begun to examine and address the connection between city problems and environmental and climate change, and the disproportionate impacts that they often have on the disadvantaged, yet these initiatives address only the surface of the issue. It is essential for scientists, public administrators, environmentalists, and policy thinkers to pay greater attention to the environmental challenges of our cities. Students examine and assess the challenge of understanding, developing and implementing coherent environmental policy to address such challenges in urban communities.

PUB-ADM 5567 Managing for Sustainability in an Urban Environment Credits: 3

Managing for sustainability requires an understanding of theories of organization, environmental management, and sustainability, including how to define and achieve sustainability. Students examine the complexities associated with issues of sustainability and the interrelationship between the global, the local and the personal. This includes consideration of how organizations function, the obstacles to sustainability confronted by sustainability managers, and specific management strategies and tools available to sustainability managers. It also involves the study of change models and their application by managers faced with the challenge of moving an organization from an old operational model to a more sustainable new organizational design.

PUB-ADM 5570 Diversity in the Workplace Credits: 3

This course explores the many issues raised by the growing diversity of backgrounds (e.g., race, gender, culture) employees bring to the workplace. The course will examine diversity issues including demographics, relevant legislation, values questions, demands on management, and effects on service delivery to clients. To better illustrate the issues, some class sessions will feature guest lecturers representing a diversity of backgrounds and work settings.

PUB-ADM 5573 Health and Social Equity Credits: 3

Examines the complex relationship between the social and political environment and health outcomes. All policy is health policy – economic, transportation, natural and built environments, schools. This course examines how social equity shapes health behaviors and how the life odds in different communities expose the historical legacies of past injustices. Only ten percent of health disparities are explained by access to care, although health care and health insurance dominate the public conversation. Draws on guest speakers, books, journal articles, popular press, film and art; as varied as are the social determinants of health, so are media that explore those relationships.

PUB-ADM 5581 Seminar In Urban Administration Credits: 3

Advanced work on special topics in urban administration. Topics will vary.

Prerequisites: PUB-ADM 5535.

PUB-ADM 5582 Developing the Social Enterprise Credits: 3

Developing the Social Enterprise is the offering of a new seminar that has been developed to provide an in-depth exploration and examination of nonprofit entrepreneurship and how it is being understood, implemented and practiced in the nonprofit sector. Developing the Social Enterprise is a graduate-level course that offers the opportunity to study in depth this oft-discussed yet often misunderstood phenomenon. Students will gain a broad understanding of the various conceptions, types and aspects of nonprofit enterprise, learn about processes for engaging in entrepreneurial nonprofit organization development, and discuss design and implementation issues with nonprofit leaders who have implemented some form of social entrepreneurship in their own organizations.

PUB-ADM 5585 Seminar In Public Affairs Credits: 3

Advanced work on special topics in public affairs.

PUB-ADM 5585A Seminar In Public Affairs Credits: 3

Advanced work on special topics in public affairs.

PUB-ADM 5585B Seminar In Public Affairs Credits: 3

Advanced work on special topics in public affairs.

PUB-ADM 5585C Seminar In Public Affairs Credits: 3

Advanced work on special topics in public affairs.

PUB-ADM 5587 Special Topics Credits: 3

Special topics in public administration.

PUB-ADM 5595 Internship Seminar Credits: 1-3

Combined classroom study and field internship. To be offered only when government agency internships approved by the Public Administration Committee are available.

Prerequisites: 18 credit hours of completed courses.

PUB-ADM 5598A Supervised Research: Nonprofit Management Credits: 1-6

PUB-ADM 5598C Supervised Research: Urban Administration Credits: 1-6

PUB-ADM 5598G Supervised Research: Unspecified Credits: 1-6

PUB-ADM 5599 Thesis Credits: 1-9

PUB-ADM 5610 Inquiry In Public Administration And Affairs Credits: 3

This course is designed to provide Ph.D. students a thorough grounding in strategies of inquiry. Issues considered include competing metatheoretical paradigms and alternative conceptions of explanation in the social and policy sciences, the implications of such alternatives for empirical research, the variety and standards of qualitative and quantitative approaches to theory and research, theory construction, and research ethics. Contemporary problems in public administration and affairs research and theory are emphasized.

Prerequisites: Doctoral student in the Interdisciplinary Ph.D. program.

PUB-ADM 5620 Literature of Public Affairs and Administration Credits: 3-6

This course grounds the student in the central ideas of the public affairs and administration literature and in the prominent themes of the discipline. The course is offered in two versions: A, in which the political science approach to public affairs and administration is emphasized; and B, in which the organizational theory and behavior approaches to public affairs and administration are emphasized. Ph.D. students whose primary discipline is public affairs and administration are ordinarily expected to complete both versions.

Prerequisites: Doctoral student in the Interdisciplinary Ph.D. program.

PUB-ADM 5620A Literature Of Public Affairs And Administration: Political Science Credits: 3-6

Literature Of Public Affairs And Administration: Political Science. Prerequisites: PUB-ADM 5525, PUB-ADM 5526, and PUB-ADM 5544.

PUB-ADM 5620B Literature Of Public Affairs And Administration:Organizational Theory & Behavior Credits: 3-6

Literature Of Public Affairs And Administration:Organizational Theory Behavior.

Prerequisites:PUB-ADM 5530 and PUB-ADM 5548.

PUB-ADM 5699 Dissertation And Research In Public Affairs And Administration Credits: 1-12

Dissertation research and writing in the Public Affairs and Administration discipline.

PUB-ADM 5899 Required Graduate Enrollment Credit: 1

Real Estate Courses

RL-EST 321 Real Estate Principles Credits: 3

The student will be introduced to the very basics of real estate from the terminology, real estate's role in the economy, legal foundations, government controls, appraisal processes, valuation processes, brokering and closing transactions, time value of money, basic management issues and lease clauses, and basic standard form purchase contracts.

RL-EST 421 Real Estate Finance Fundamentals Credits: 3

This course will provide a fundamental understanding of basic financial concepts of real estate including compounding and discounting, construction of amortization tables and after-tax yield analysis for a simple real estate investment. It also touches on the basics of title insurance, ownership issues, fixed rate versus variable rate mortgages in residential real estate, understanding housing bubbles, and trends in valuation of residential real estate. In addition, the student will complete mathematical comparisons of leasing versus owning a home.

Prerequisites: ENT 301 or FIN 325.

RL-EST 425 Principles of Real Estate Property Management Credits: 3

Explores the complexities of managing apartments, condominiums, office buildings, industrial property, and shopping centers. This course covers rental markets, development of rental schedules, leasing techniques and negotiations, repairs and maintenance, tenant relations, merchandising, selection and training of personnel, accounting and owner relations.

RL-EST 496 Internship: Real Estate Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community. Internship coursework is evaluated on a credit/no credit basis.

Prerequisites: Departmental consent.

RL-EST 497 Special Topics: Real Estate Credits: 1-3

Study and research in areas of special interest under individual faculty direction.

Prerequisites: Departmental consent.

RL-EST 5556 Entrepreneurial Real Estate Process Credits: 3

This interdisciplinary course adopts an entrepreneurial approach to the real estate process spanning concept generation, planning, research, acquisition, design, construction, finance, and investment. The course is open to students from various units across campus. Students will engage in experiential learning to sensitize them to the breadth of inquiry, critical thinking and analysis involved in contemporary real estate. Instruction focuses on creation of optimal spatial solutions for targeted users on targeted sites that are economically viable, sustainable and environmentally responsible. The course emphasizes the importance of focusing on value creation, control and capture across the full life cycle of real estate.

RL-EST 5571 Real Estate Finance Credits: 3

This course introduces students to the full spectrum of real estate finance and investment analysis. It helps students quantify the financial implications of various real estate decisions for individual properties as well as more strategic decision-making applied to real estate portfolios. Using a combination of experiential and incremental learning students develop the foundation skills necessary to support more advanced concepts and financial theory. The course explores time value of money, law, leverage, underwriting, discounted cash flow, investment analysis, and capital markets. Students also develop advanced modeling skills and learn how to apply state-of-the-art financial packages to support decisions.

Prerequisites: RL-EST 5556.

RL-EST 5573 Real Estate Feasibility and Market Analysis Credits: 3

This course helps students develop entrepreneurial, fact-based approaches to problem-solving and decision support. It incorporates experiential learning to help students deploy quantitative and qualitative approaches that incorporate the perspectives of space users, space producers, and market facilitators. Students learn how to address the goals and objectives of a particular client, while also considering the externalities and impacts such decisions have on the built environment. Students will integrate critical thinking with spatial and financial analytical methods and state-of-the-art tools to quantify market demand and to translate that demand to a spatial solution that is marketable and financially feasible.

Prerequisites: RL-EST 5556.

RL-EST 5574 Real Estate Construction and Development Credits: 3

This course explores principles and techniques of construction project management and real estate development. Adopting a holistic perspective it places the production of real estate in a broader context of product life cycles drawing on systems analysis, planning, programming, budgeting and staffing, controlling major projects. Students apply experiential learning and assume the role of a developer who marshals the resources needed to produce real estate. It explores new projects and renovation of existing space with emphasis on customizing products to fit user needs. The course sensitizes students with emphasis on creating sustainable products that are socially responsible and economically viable.

Prerequisites: RL-EST 5556.

RL-EST 5576 Real Estate Property and Portfolio Management Credits: 3

This course explores the complexities and integration of property and portfolio management which are critical to the creation, control and capture of real estate value. Students learn how to approach real estate in a more holistic manner by integrating management functions that range from individual property types to portfolios of properties. Students learn how to incorporate marketplace factors in their decisions and apply modern portfolio theory and other tools to construct and manage properties and portfolios in a socially responsible manner. Using experiential methods students learn to apply critical thinking to solve complex property and portfolio management problems.

Prerequisites: RL-EST 5571.

RL-EST 5577 Real Estate Valuation Credits: 3

This course provides students with an understanding of real estate appraisal garnered through a combination of lectures, projects and discussions. Students explore valuation theory, behavioral processes, and the unique nature of the inefficient real estate market. Through hands on exercises that constitute the experiential learning students apply best practices embedded in the three approaches to value that underpin real estate appraisal: cost, income and sales comparisons. Students also analyze the impact of macroeconomic conditions, supply/demand conditions, capital flows, and investor behavior. Students develop proprietary valuation models and apply appropriate quantitative tools and software for predicting most probable prices.

Prerequisites: RL-EST 5556.

RL-EST 5578 Legal Context of Real Estate Credits: 3

This interdisciplinary course acquaints business and law school students with legal issues in development, ownership and operation of commercial real estate. It also explores the roles of various professionals in real estate transactions. Students will learn legal concepts and terminology, and acquire familiarity with key issues and documents relating to real estate decisions and entrepreneurship, including leasing, insurance, negotiations, construction and architect's contracts, transactions, regulation, financing and bankruptcy. Students learn how to apply risk management to design and construction contracts, insurance, bonding and indemnification, as well choice of business entity, income tax planning and negotiation of joint ventures.

RL-EST 5587 Special Topics Credits: 3

Special topics in real estate.

RL-EST 5595 Internship Credits: 1-3

An opportunity for students to integrate their academic studies via employment with a business/organization in the community.

RL-EST 5597 Real Estate: Independent Study Credits: 1-6

Independent study and research in areas of special interest under individual faculty direction.

RL-EST 5899 Required Graduate Enrollment Credit: 1

About the Bloch School

Degree Programs

The Bloch School offers the degrees of Bachelor of Business Administration (B.B.A.), Bachelor of Science in Accounting (B.S.A.), Master of Business Administration (M.B.A.), Master of Public Administration (M.P.A.), Master of Science in Accounting (M.S.A.), Master of Science in Finance (M.S.F.), and Master of Science in Entrepreneurial Real Estate (M.S.E.R.E.). Within the MBA program there are Executive M.B.A. (E.M.B.A.) and Professional M.B.A. offerings. Additionally, the Bloch School has two joint degree programs with the UMKC School of Law, the J.D./M.B.A. and the J.D./M.P.A. degrees, participates in the Interdisciplinary Ph.D. program and offers a Ph.D. in Entrepreneurship & Innovation. The Bloch School also offers business and entrepreneurship minors. The Department of Public Affairs also has a Graduate Certificate in Nonprofit Management and Innovation and a Graduate Certificate in Urban Policy Administration.

History

The University has offered business courses since 1933. In 1953, with the support and encouragement of the Kansas City community, the School of Business Administration was established. Since that time, the Bloch School has grown to a student body of 1900, and a faculty of approximately 50 professional educators. In January 1988, the School was renamed for Henry W. Bloch, co-founder of H&R Block, and moved into a newly expanded building. In 2010, the School officially changed its name to the Henry W. Bloch School of Management to reflect our differentiation as a school that integrates business management, public administration and the infusion of a global, innovative and entrepreneurial mindset. In the fall of 2013, the School opened a second building with a focus on entrepreneurship and innovation and executive education.

Vision

We are Kansas City's business school, partnering with for-profit, non-profit, and public sector stakeholders to promote inclusive prosperity.

Mission

We leverage our partnerships and connectivity to promote experiential learning, encourage career and entrepreneurial success, provide access to thought leaders, and develop talent through distinctive education experiences.

Values

Following the inspiration offered by Mr. Henry W. Bloch, our work is guided by our commitment to:

- Entrepreneurial thinking
- Civic mindedness and a community orientation
- Inclusiveness and respect for diversity
- Global awareness
- Integrity
- Working hard, persevering, and making a difference

Accreditation

The Bloch School is accredited by AACSB International - The Association to Advance Collegiate Schools of Business and by the Network of Schools of Public Policy, Affairs, and Administration (NASPAA).

Advising and Student Services

Staff in the Student Services Office, room 115 of the Bloch Heritage Hall, assist undergraduate students in planning programs and registering for courses. Freshmen and junior students must be advised each semester and advising is required for new students and students on probation. Students pursuing the M.B.A., M.P.A., M.S.A., M.S.E.R.E. and M.S.F. degrees are advised by staff in the Graduate Programs Office, room 418 Bloch Executive Hall. Advising information can be found at <https://bloch.umkc.edu/students/advising/>. Faculty of the School's six curricular departments are also available to discuss students' programs. Students in the M.P.A. and M.S.E.R.E. programs are also advised by departmental faculty.

Scholarships

The Bloch School offers numerous scholarships for students enrolled in Bloch degree programs. Information and application links are available on the Bloch School Web site at <https://bloch.umkc.edu/students/paying-for-school/>. March 1 is the deadline for the majority of these scholarships, which are awarded for the following academic year. For information on loans, grants and other financial aid, contact the UMKC Student Financial Aid and Scholarships Office.

Internships

Students who want to experience work opportunities while in school are encouraged to take their learning beyond the classroom through internships. For-credit internships typically carry one to three hours of credit. To earn academic credit, students should identify a Bloch School faculty member qualified and willing to supervise an internship, complete an internship form available on the Bloch School Web site at <https://bloch.umkc.edu/students/policies-and-forms/> and enroll in an approved internship course. Interested students should contact the Bloch Career Center for internship opportunities. International students must also apply through the International Student Affairs Office to receive approval to work off campus.

International Study Abroad

Bloch School students have the opportunity to study abroad for credit. Students may study for a week, a semester (including summer), or an academic year. Students who are interested in study abroad opportunities should contact the Bloch School Student Services Office or the UMKC Study Abroad and Global Engagement office.

Career Support

The Bloch Career Center is a full-service office working with students, alumni and employers. Their staff are committed to helping Bloch students connect with careers they care about and collaborate with Kansas City's top employers to create opportunities for Bloch School students.

Graduate Programs

Graduate Programs:

- Graduate Certificate in Business Analytics (p. 1714)
- Graduate Certificate in Nonprofit Management and Innovation (p. 1715)
- Graduate Certificate in Urban Policy and Management (p. 1716)
- Master of Business Administration
- Master of Public Administration
- Master of Science in Accounting
- Master of Science in Entrepreneurial Real Estate (p. 1726)
- Master of Science in Finance (p. 1727)

- PhD in Entrepreneurship and Innovation (p. 1729)
- Interdisciplinary Ph.D. Programs

Doctor of Philosophy

Student Learning Outcomes

The course requirements for the program are not predetermined, but rather formulated by the student in consultation with the UMKC doctoral faculty who will serve on their supervisory committee, to meet the student's individual needs and research interests, satisfy discipline-specific requirements and assure upon graduation students are able to:

- Demonstrate appropriate depth and breadth of knowledge in their disciplines.
- Use skills of interdisciplinary scholarship and research to integrate multiple perspectives.
- Work effectively in a collaborative environment.
- Effectively communicate results of their research to diverse audiences.
- Understand and value diverse approaches to problems.
- Use self-reflection for personal and professional improvement.

Program Requirements

The Bloch School participates in the Interdisciplinary Ph.D. program through the Department of Public Affairs and through the Department of Global Entrepreneurship and Innovation. The Department of Global Entrepreneurship and Innovation also offers a stand-alone Ph.D. program. Information about discipline-specific admission and program requirements may be found in the School of Graduate Studies section of this catalog. Those interested in doctoral study in entrepreneurship and innovation should visit the Department of Global Entrepreneurship and Innovation (<https://bloch.umkc.edu/about-us/academic-departments/global-entrepreneurship-and-innovation/>) website.

All Interdisciplinary Ph.D. applicants and students must first meet the general requirements of the School of Graduate Studies for admission and retention in the Interdisciplinary Ph.D. program. In addition to these general academic regulations that have been outlined in previous sections of the general catalog, disciplines may set more stringent discipline-specific requirements that take priority over the general requirements. Discipline-specific requirements for disciplines eligible to participate in the Interdisciplinary Ph.D. program are listed in alphabetical order by name of discipline. These guidelines are subject to ongoing review and revision, and the doctoral faculty reserves the right to make judicious changes in discipline-specific requirements. The student is referred to coordinators in the disciplines for the most current information.

Graduate Certificate in Business Analytics

Student Learning Outcomes

Students graduating from this program will:

- 1. Assess the ethical considerations of business analytics applications, models, and processes.
- 2. Design business analytics processes for reproducibility and replicability.
- 3. Choose the best application and modeling approach to solve a given business analytics problem
- 4. Utilize common business analytics databases.
- 5. Conduct data analyses for descriptive, predictive, and prescriptive purposes using common business analytics models and algorithms.
- 6. Construct data visualizations.
- 7. Interpret the results of data analyses and communicate those results to stakeholders.

Students in the certificate program will complete 12-credit hours across four courses; there are two required courses, and two are electives. We will offer the certificate to degree and non-degree students. For degree students, we will make the certificate available to anyone enrolled in a Bloch master's degree program, including:

- Professional Master of Business Administration (PMBA)
- Executive Master of Business Administration (EMBA)
- Master of Public Administration (MPA)
- Master of Science in Accountancy (MSA)
- Master of Science in Entrepreneurial Real Estate (MSERE)
- Master of Science in Finance (MSF)

Certificate students take the first core course as part of their degree program. For non-degree certificate students, they will take *MIS 5507 -- Business Analytics and Statistics*.

Code	Title	Credits
Select one of the following courses based on degree plan:		3
MIS 5507	Business Analytics and Statistics (PMBA and Non-Degree Students)	
DSOM 5509	Business Analytics for Strategic Decision Making (EMBA Students)	
PUB-ADM 5510	Research Methods in Public Administration (MPA Students)	
ACCTNG 5568	Data Analytics for Accounting (MSA Students)	
RL-EST 5573	Real Estate Feasibility and Market Analysis (MSERE Students)	
FIN 5560	Financial Modeling (MSF Students)	
Additional Required Coursework:		3
MIS 5557	Data Management and Data Mining for Business Analytics	
Elective Coursework (choose two of the following):		6
MKT 5562	Marketing Research & Data Analysis	
MKT 5587	Special Topics (Customer Data Analytics)	
PUB-ADM 5544	Program Evaluation ((MPA Students))	
HLTH-ADM 5578	Data Analysis for Health Care Managers (MPA Students)	
MIS 5529	Decision Support Systems	
MIS 5552	Data Base Management	
Total Credits		12

Graduate Certificate in Nonprofit Management and Innovation

Student Learning Outcomes

Students graduating from this program will:

- Lead and manage nonprofit organizations and programs effectively and in entrepreneurial and innovative ways.
- Engage in sophisticated decision making to effectively address the long term needs and interests of communities, organizations, and their stakeholders.
- Effectively engage, interact, and communicate, verbally and in writing, with diverse constituencies and audience.

Graduate Certificate in Nonprofit Management and Innovation

The Department of Public Affairs offers a 15 credit hour professional Graduate Certificate in Nonprofit Management and Innovation. This certificate may be earned alone or in combination with another graduate degree at UMKC and is especially appropriate for those who aspire to a successful career leading and managing nonprofit and community-based organizations.

Admission requirements are the same as those required for admission to the department's regular M.P.A. program. Students in other graduate programs at UMKC and are interested in pursuing this certificate should contact the Bloch School Graduate Programs Office (<https://bloch.umkc.edu/students/advising/>).

Curriculum for the Nonprofit Management and Innovation Certificate:

Code	Title	Credits
Required Courses:		12
PUB-ADM 5548	Leadership, Change and Social Impact	
PUB-ADM 5551	Managing Nonprofit Organizations	
PUB-ADM 5553	Legal Framework & Financial Management of Nonprofit Organizations	
PUB-ADM 5559	Nonprofit Organizations in Context	
Select at least one of the following:		3
PUB-ADM 5554	Seminar on Social Entrepreneurship	
PUB-ADM 5556	Innovation in Nonprofit Management and Leadership	
PUB-ADM 5557	Nonprofit Fundraising and Development	
PUB-ADM 5582	Developing the Social Enterprise	
Total Credits		15

Graduate Certificate in Urban Policy Administration

Student Learning Outcomes

Students graduating from this program will:

- Lead and manage nonprofit and governmental urban organizations and programs that exist to meet the needs of their urban communities effectively and in entrepreneurial and innovative ways.
- Engage in sophisticated decision making to effectively address the long term needs and interests of communities, organizations, and their stakeholders.
- Engage, interact, and effectively communicate, verbally and in writing, with diverse constituencies and audiences.
- Analyze and evaluate urban problems, policies and policy options and evaluate the feasibility of potential policy solutions.

Graduate Certificate in Urban Policy and Management

The Department of Public Affairs offers a 12 credit hour professional Graduate Certificate in Urban Policy and Management. This certificate may be earned alone or in combination with another graduate degree at UMKC and is especially appropriate for those who aspire to a successful career leading and managing local and regional government or community-based nonprofit organizations.

Admission requirements are the same as those required for admission to the department's regular M.P.A. program. Students in other graduate programs at UMKC who are interested in pursuing this certificate should contact the Bloch School Graduate Programs Office (<https://bloch.umkc.edu/students/advising/>).

Curriculum for the Urban Policy and Management Certificate:

Code	Title	Credits
Required Courses:		
PUB-ADM 5526	The Politics of Administration	3
PUB-ADM 5535	Urban Policy and Administration	3
PUB-ADM 5539	Urban Planning for Public Administrators	3
Select at least one of the following:		3
PUB-ADM 5536	Managing Urban Economic Development	
PUB-ADM 5540	Local Government Management	
PUB-ADM 5552	Community Organizations and Public Policy	
PUB-ADM 5554	Seminar on Social Entrepreneurship	
Total Credits		12

Graduate Policies and Procedures

Admission Requirements

Admission to Bloch School graduate programs is based on evaluation of qualifications including, but not limited to, cumulative undergraduate grade point average, career/educational goals, work experience and exam scores. Individual program application and admission requirements can be viewed at:

Professional MBA: <https://bloch.umkc.edu/graduate-program/pmba/admissions/>

Master of Public Administration: <https://bloch.umkc.edu/graduate-program/mpa/admissions/>

Master of Science in Accounting: <https://bloch.umkc.edu/graduate-program/msa/>

Master of Science in Entrepreneurial Real Estate: <https://bloch.umkc.edu/graduate-program/msere/msere-admissions/>

Master of Science in Finance: <https://bloch.umkc.edu/graduate-program/msf/>

Applicants to the Executive M.B.A. (E.M.B.A.) program are considered for admission based on educational record and career history, quality and length of professional and managerial experience, strength of personal interview and one written essay, two references and support of employer. A GMAT or GRE score is not required for applications to the executive programs, but may be requested by faculty. Detailed admissions information can be found at <https://bloch.umkc.edu/emba/admissions/>.

Most classes are offered on weekday evenings. Selected courses may be offered in an intensive weekend format. E.M.B.A. courses are offered on weekends (Friday/Saturday).

Retention and Graduation Requirements for Graduate Students

All students enrolled in any of the Bloch School graduate programs (M.B.A., E.M.B.A., M.S.F., M.S.E.R.E., M.S.A., M.P.A., and certificates) must maintain a minimum 3.0 grade point average (GPA) in all courses for which graduate credit is given. Students with GPAs that fall below the minimum 3.0 are placed on probation and are allowed two successive semesters (including the summer semester, if enrolled) to restore their GPAs to the required 3.0 level. While on probation, graduates must achieve a 3.0 term GPA in order to enroll for the ensuing term. If a student's term GPA is below a 3.0 or, if after two successive semesters, the cumulative GPA is below a 3.0, the student will be dismissed from the Bloch School. Good standing is achieved only if the GPA is 3.0 or above. No course with a grade below B- (2.7), in any 300- or 400-level course, or below C (2.0) in any 5000-level course or above, will count toward any advanced degree program; however, the grade will be included in the calculation of the student's GPA. Eighty percent of the credits for the degree must be passed with a grade of B (3.0) or better.

M.B.A., M.S.A., M.S.F., M.S.E.R.E., and certificate students must file an official program of study with the Graduate Programs Office when reaching the 50% completion point in their degree programs. For the M.P.A. program, this must occur once a student has reached 18 hours. This form constitutes a contract and must be signed by the student, faculty advisor and department chair. Any changes to the program must be approved on a new form by the same three individuals. Students are responsible for ensuring their program of study falls within the program guidelines.

All students must file an application for graduation by the announced campus deadline during the student's last semester (students are encouraged to submit earlier if possible). This application and the program of study must be filed by the announced deadline in order to obtain the degree.

Transfer Credit

Students may petition to transfer up to 6 hours of graduate credit into their program. Coursework must be from an accredited institution, with a grade of B or better, and appropriate to the student's program. Also, the coursework must have been taken within seven years of completion of all requirements for the Bloch School degree. Credit must not be more than seven years old at the time of graduation. Evaluation of transfer credit is done by faculty and requires documentation provided by the student.

Course Repeat Policy

Whenever students repeat a graduate-credit course, they must submit a course repeat form to the Graduate Programs Office no later than the fourth week of the term. Students seeking graduate degrees are limited to repeating no more than 20 percent of the credits applicable toward a graduate degree. If approved by the school or department or Interdisciplinary Ph.D. supervisory committee, students may repeat a course once to improve their GPA or satisfy the program requirements. The second grade received will be used to calculate the GPA that will be used in satisfying degree requirements.

Independent Study

Students are limited to no more than six hours of independent study/internship and no more than three hours of any one practicum, including the small business practicum. For the M.P.A. program, students are limited to a total of six hours, of which three credit hours can be an internship. Interested students should consult with their advisor or staff in the Graduate Programs Office.

Master of Business Administration

Student Learning Outcomes

Students graduating from this program will:

- Define, analyze, and evaluate business decisions in a global setting through an integrated analysis using tools found in the major business disciplines.
- Effectively demonstrate critical thinking skills in inference, analysis, and evaluation.
- Demonstrate the ability to work in teams.
- Conceptualize a complex issue into a coherent written statement and/or oral presentation.
- Demonstrate mastery of fundamental quantitative tools by successfully using those tools to interpret and evaluate quantitative information and synthesize that information with relevant non-quantitative information in order to arrive at a business decision.

Admission Requirements

Applicants to the P.M.B.A program are considered for admission based on their undergraduate cumulative grade point averages, resumes, goal statements, and other criteria established by the faculty. Some candidates may be eligible for admission without the GMAT exam. For current admission requirements visit <https://bloch.umkc.edu/graduate-program/pmmba/admissions/>.

Program Requirements

The Bloch School offers a Professional (part-time) master of business administration (PMBA (<http://bloch.umkc.edu/pmmba/>)), and an executive master of business administration (EMBA (https://bloch3.umkc.edu/emba/?_ga=2.233800350.1228283700.1556543215-1313670546.1459347259)).

The Professional M.B.A. Curriculum

The P.M.B.A. degree is a 39 credit hour program. The curriculum is comprised of two distinct stages: core classes and elective classes.

The program has the following unique features that are combined to develop graduates that are broadly educated, socially responsible, and knowledgeable managers.

1. A 27 credit hour core curriculum that provides an integrative business foundation for decision-making.
2. A 12 credit hour elective component that allows students the flexibility to design a program that uniquely fits their needs.
3. Students who have earned a bachelor's degree in business or accounting and/or have relevant work experience may waive up to six credit hours of the core related to these experiences. The specific courses waived will be determined in consultation with the managing director of graduate programs. This could reduce the core to 21 credit hours and the M.B.A. degree to a 33 credit hour program.
4. An M.B.A. program of study must include 39 credit hours with a minimum of 33 hours of that course work completed at UMKC. Students approved for a reduced M.B.A. core must show 33 hours on their program of study; 27 of those hours must be completed at UMKC. Transfer credit will be considered in accordance with the guidelines in the Master's Degrees Academic Regulations section of the catalog.

The M.B.A. Core (27 credit hours)

The MBA degree consists of a 27 credit hour core. The core must be taken by all students enrolled in the program and is designed to provide graduates with a critical business foundation. Core courses include the following:

Code	Title	Credits
ACCTNG 5503	Financial Accounting for Decision Making	3
DSOM 5511	Global Supply Chain and Operations Management	3
ENT 5508	Corporate Entrepreneurship and Innovation: Meeting the Management Challenge	3
FIN 5509	Financial Management	3
MGT 5512	Leading and Managing People, Teams and Organizations	3
MGT 5514	Strategic Management in the Globalized World	3
MIS 5507	Business Analytics and Statistics	3
MKT 5504	Marketing Management	3
PUB-ADM 5507	Management in Context	3
Total Credits		27

Electives (12 hours)

The M.B.A. program allows students the flexibility of using 12 credit hours to meet their unique needs. Students should ensure that prerequisites are taken in the proper sequence. Not all classes are offered each semester. Students can select from the following elective options, grouped by discipline.

Accounting

Students with prior preparation in accounting may be eligible to take other courses. Please consult with the M.B.A. program advisor for additional information.

Code	Title	Credits
ACCTNG 5557	Introduction To Income Taxation	3
ACCTNG 5570	Fraud Examination	3

Combined J.D./M.B.A. Program

The Bloch School and UMKC School of Law offer the combined J.D. and M.B.A. program. Students must satisfy the admission and degree requirements for the J.D. program as well as for the P.M.B.A. program. For further information, contact the School of Law or consult the Bloch School JD/MBA webpage (<https://bloch.umkc.edu/graduate-program/pmba/jd-mba-joint-program/>).

Executive M.B.A. Program

Student Learning Outcomes

Graduates of the Bloch School's E.M.B.A. program will gain the business knowledge skills needed to excel as executives, entrepreneurs, and leaders. The E.M.B.A. graduate will:

- Apply strategic frameworks to complex business issues and identify viable options and forward-looking strategies, through the integrated analysis of multiple functional perspectives - e.g. marketing, product development/service delivery, finance, operations, and human capital.
- Demonstrate enhanced understanding of complex public sector systems, processes and leaders, and identify and define the various forces that shape and impact business policy.
- Demonstrate the skills needed to generate creative solutions that address unmet needs and wants, evaluate the relative attractiveness of competing solutions, and organize to exploit opportunities in the marketplace.
- Utilize a knowledge framework to 1) critically think about and assess the impact and linkage of global influences, issues, trends, and decisions in business models; and 2) demonstrate insight and agility in operating within a global business environment.
- Demonstrate the communication and interpersonal skills needed for effective collaboration and creative problem-solving, as well as the versatility to add value in a variety of team roles - leader, expert, facilitator, etc.
- Demonstrate the ability to 1) diagnose complex business situations, recognizing key issues, tensions and dilemmas; and 2) articulate decisions and action plans that reflect comprehensive understanding of the human, political and cultural context as well as nuanced ways of building influence and support.

The Bloch Executive M.B.A. (E.M.B.A.) is a highly-selective degree program for experienced professionals. The program offers a comprehensive integrated curriculum, field experiences, and four residencies. It is distinguished by an emphasis on cohort-learning, teamwork, hands-on projects, leadership coaching and development, and learning activities that contribute substantial value to participants, employers, and the broader community.

Students are admitted each year to a new E.M.B.A. cohort through a special application process. Students begin coursework in mid-August, and program completion requires 21 months.

The program is composed of 16 semester-long, graduate-level courses and four week-long immersion residencies that are focused on leadership, innovation, public policy, and the global marketplace. A variety of teaching formats are employed, including case studies, group projects, simulations and role playing, fieldwork, interactive discussions, and renowned guest lecturers. Daylong classes meet three days per month (one Friday/ Saturday and one additional Saturday). Classes do not meet in June and July. To ensure that all students are up to speed on academic and business basics, the program starts with required orientation and an introduction to key subject areas, such as finance, accounting, and statistics.

Admissions Requirements

The E.M.B.A. is designed for experienced professionals who possess an undergraduate degree from an accredited university and a minimum of 8 years of work experience with growing responsibilities for managing people, projects, and/or budgets. Admissions decisions are based on a combination of a solid academic record, demonstrated professional achievement, and evidence of a strong commitment to learning and to career and professional development. Further information on the Bloch E.M.B.A. program is available at (816) 235-6071 or at the program's web site <https://bloch.umkc.edu/emba/>.

The Curriculum

Semester 1

- **Leadership Residency** introduces students to fundamentals of business, organizational behavior, leadership, and teamwork.
- **Financial Reporting Systems** introduces generally accepted accounting principles and concepts along with the preparation and analysis of financial statements.
- **Leadership and Organizations** focuses on how organizations work and how leaders can set direction, marshal resources, and build support to move initiatives forward.
- **Negotiation, Conflict Management, and Influence Skills**

Semester 2

- **Marketing Management** examines the role of marketing in driving profitable revenue growth in companies.
- **Organizational Finance** gives students a thorough introduction to financial management that blends appropriate amounts of relevant theory with practical application.
- **Business Analytics for Decision Making** investigates the use of detailed sample data for purposes of estimating, predicting, forecasting, and explaining correlations among varied observations.
- **Public Policy and Industry** provides intensive exposure to the impact policy has on private sector performance. The course includes the required 4 day *Washington, D.C. Residency* to expand student understandings of the role of social leadership in the development of business policies, practices and processes.

Semester 3

- **Product and Service Innovation** gives students a grounded understanding of how to identify and evaluate business opportunities. Students engage in a set of business cases assembled to illuminate key concepts in Innovation.
- **Talent Management**
- **Strategic Management** examines the principles essential for the formulation and evaluation of strategy including industry analysis, strategic positioning, and the boundaries of the firm. The course also addresses the capacity of executive leadership to innovate and to create new or added values, as well as their responsibility for developing and communicating a clear vision and direction for a company's future.
- **Elective or Advanced Topics in Finance** builds on the previous finance course in the program and delves deeper into topics such as valuation, enterprise risk management, securities and investments, regulatory frameworks, and corporate governance.

Semester 4

- **Global Initiatives in Management** explores key, contemporary international business issues for leaders and for organizations in today's global economy and includes a required, 11 day, international residency experience in a major business center abroad.
- **Strategy and New Venture Creation** is the EMBA capstone experience. Students must integrate learning from the previous course work to develop a business plan for a new venture.
- **Current issues in Management with Technology** examines how technology impacts management, and exposes students to how technological agility is critical to organization success.
- **Elective or Operations Management**

Master of Public Administration

Student Learning Outcomes

Students graduating from this program will:

- Lead and manage in public governance
- Participate in and contribute to the public policy process
- Analyze, synthesize, think critically, solve problems and make decisions
- Articulate and apply a public service perspective
- Communicate and interact productively with a diverse and changing workforce and citizenry
- Lead in entrepreneurial and innovative ways
- Lead and manage in the nonprofit sector
- Lead and manage in the health sector
- Lead and manage in the urban sector

Admission Requirements

Applicants to the Master of Public Administration (M.P.A.) program are considered for admission on the basis of undergraduate cumulative grade point average, resume, personal statement, and Graduate Record Examination (GRE) scores. However, the requirement to complete the GRE is waived for some applicants. For current admission requirements visit <https://bloch.umkc.edu/graduate-program/mpa/admissions/>.

Program Educational Goals

The Master of Public Administration program prepares entrepreneurial and innovative public service leaders and executives to be effective and successful in an increasingly complex and dynamic world. Public service offers a career filled with excitement, challenge and significance. Career opportunities are numerous, ranging from employment in local, state, national and international governmental and quasi-governmental agencies to employment in health care and nonprofit and nongovernmental organizations. Never has there been a time of greater opportunity for public service leaders and executives who can apply their knowledge and skills to the most important of leadership and management challenges confronting their organizations and communities. The Master of Public Administration (M.P.A.) degree and related certificate programs in Nonprofit Management and Innovation and Urban Policy and Management are offered through the Department of Public Affairs.

Graduates of the Henry W. Bloch School of Management M.P.A. program have the knowledge and skills necessary to effectively and ethically lead and manage dynamic public service organizations. Specifically, M.P.A. graduates are prepared to:

- Engage in sophisticated decision making, grounded in disciplined analytical and critical thought, to effectively address the long term needs and interests of communities, organizations and their stakeholders.
- Understand the process as well as content dimensions of problem analysis and resolution and make effective use of state-of-the-art administrative and management practices and methods, including the effective use of technology.
- Communicate effectively, verbally and in writing.
- Exhibit competence in understanding and addressing the ethical dimensions of public service leadership and management.
- Understand the wide variation that exists in the principles, cultures, and practices of organizations and communities from different parts of the world, and the implications of this variation for effective public service leadership.
- Understand the value of diversity and inclusion and exhibit competence in ethical, effective, culturally competent leadership and management.
- Demonstrate self-confidence and capacity to deal with dynamic, complex, and ambiguous community problems and issues.
- Have the capacity to work effectively in collaboration with others through teams, alliances, and networks to achieve results.

Program Requirements

The M.P.A. degree will be awarded on successful completion of 33-36 semester hours, consisting of 21 hours of required core courses, 12 hours in a selected emphasis area (general program option available) and 3 hours of internship.

An M.P.A. program of study must include 33 credit hours with a minimum of 27 hours of that course work completed at UMKC. Degree candidates required to complete an internship requirement will have a 36 hour program of study where a minimum of 30 hours must be completed at UMKC. Transfer credit will be considered in accordance with the guidelines in the Master's Degrees Academic Regulations section of the catalog.

Degree candidates must complete an academic portfolio meeting the criteria enumerated by the program.

Emphasis Areas

Students seeking the master of public administration degree may choose to specialize in three emphasis areas (12 hours required):

- Health Services Administration
- Nonprofit Management
- Urban Policy and Management

A student may also tailor a general or specific program in order to meet individual talents, needs or job requirements. Such a program must be developed in consultation with and approved by a faculty adviser. Each course is worth three credits unless otherwise noted.

Curriculum

The following courses are required for each student pursuing the nonprofit management and urban administration emphasis areas:

Code	Title	Credits
PUB-ADM 5510	Research Methods in Public Administration	3
PUB-ADM 5525	Financial Accountability And Policy Development	3
PUB-ADM 5526	The Politics of Administration	3
PUB-ADM 5528	Supervision, Performance Leadership, & Human Resource Management	3
or MGT 5512	Leading and Managing People, Teams and Organizations	
PUB-ADM 5541	Public Policy Development and Analysis	3
PUB-ADM 5544	Program Evaluation	3
PUB-ADM 5548	Leadership, Change and Social Impact	3
Total Credits		21

Nonprofit Management Emphasis

Code	Title	Credits
Required:		9
PUB-ADM 5551	Managing Nonprofit Organizations	
PUB-ADM 5553	Legal Framework & Financial Management of Nonprofit Organizations	
PUB-ADM 5559	Nonprofit Organizations in Context	
Select 3 hours from the following:		3
PUB-ADM 5552	Community Organizations and Public Policy	
PUB-ADM 5554	Seminar on Social Entrepreneurship	
PUB-ADM 5556	Innovation in Nonprofit Management and Leadership	
PUB-ADM 5582	Developing the Social Enterprise	
HLTH-ADM 5571	Financial Management Issues of Health and Human Services Organizations	
Total Credits		12

Urban Policy and Management Emphasis

Code	Title	Credits
Required		
PUB-ADM 5535	Urban Policy and Administration	3
PUB-ADM 5539	Urban Planning for Public Administrators	3
Electives		
Select six hours from the following:		6
PUB-ADM 5536	Managing Urban Economic Development	
PUB-ADM 5540	Local Government Management	
PUB-ADM 5552	Community Organizations and Public Policy	
PUB-ADM 5554	Seminar on Social Entrepreneurship	
PUB-ADM 5565	Topics In Urban Administration	
PUB-ADM 5581	Seminar In Urban Administration	
PUB-ADM 5598C	Supervised Research: Urban Administration (1-3 hours)	
Total Credits		12

¹

Students choosing the urban policy and management emphasis are allowed no more than three hours of internship to fulfill the emphasis area. Additional internship hours will count as electives.

Students selecting the health services administration emphasis have the following core requirements:

Code	Title	Credits
PUB-ADM 5510	Research Methods in Public Administration	3
PUB-ADM 5526	The Politics of Administration	3
PUB-ADM 5528 or MGT 5512	Supervision, Performance Leadership, & Human Resource Management Leading and Managing People, Teams and Organizations	3
PUB-ADM 5548	Leadership, Change and Social Impact	3
HLTH-ADM 5580 or PUB-ADM 5541	The Economics of Health and Medicine Public Policy Development and Analysis	3
HLTH-ADM 5571 or PUB-ADM 5525	Financial Management Issues of Health and Human Services Organizations Financial Accountability And Policy Development	3
HLTH-ADM 5578 or PUB-ADM 5544	Data Analysis for Health Care Managers Program Evaluation	3
Total Credits		21

Note: Students should ensure that prerequisites are taken in the proper sequence.

Health Services Administration Emphasis

Code	Title	Credits
Required		
HLTH-ADM 5571 or HLTH-ADM 5580	Financial Management Issues of Health and Human Services Organizations ¹ The Economics of Health and Medicine	3
HLTH-ADM 5581	Health Policy in the United States (Electives)	3
Electives		
Choose six hours from the following:		6
HLTH-ADM 5572	Quality and Safety in Health Care (Electives)	
HLTH-ADM 5573	Health and Social Equity	
HLTH-ADM 5577	Leadership and Management in Health Care Organizations	
HLTH-ADM 5578	Data Analysis for Health Care Managers ¹	
HLTH-ADM 5586	Independent Study	
HLTH-ADM 5587	Special Topics	
HLTH-ADM 5580 or HLTH-ADM 5571	The Economics of Health and Medicine ¹ Financial Management Issues of Health and Human Services Organizations	
Total Credits		12

¹ Students cannot count more than one HLTH-ADM course in both the core and the emphasis area.

Internship Requirement

An internship is required for any M.P.A. student who does not have prior work experience in public, nonprofit or health administration. Students with relevant work experience can be waived from the internship requirement which would result in a 33 hour degree program consisting of 21 hours of core courses and 12 hours in an emphasis area.

Course Replacement for Completion of Related Undergraduate or Graduate Work

Individual courses may be waived if a student presents evidence of significant relevant undergraduate or graduate study, but other graduate courses must be substituted or transferred (with approval of faculty advisor and within allowable limits) to meet the minimum hours requirement.

Note: Students who repeat courses may not count the repeated course toward their degree. Please ensure that prerequisites are taken in the proper sequence.

M.P.A. Workshop Series (noncredit)

The M.P.A. Workshop Series includes short workshops, programs, and noncredit seminars that are designed to enrich the breadth and depth of M.P.A. students' learning experiences and career success. These events address a wide array of topics, ranging from guest lectures on significant civic and public service issues, presented by prominent civic and community leaders, to programs, workshops and development programs in areas such as career planning and professional development, trends and applications associated with emerging technologies and software applications, and trends in professional practice.

All students in the M.P.A. program are required to participate in a minimum of 4 separate Workshop Series events, for a total of at least 10 clock hours, during the course of their degree program. Students may attend as many events as they would like, and many Workshop Series events are open to alumni and the general public.

Examples of Workshop Series programs include:

- Excellence in Professional Writing
- Applications of GIS Technologies in Public Service Decision Making
- Career Development and Job Search Strategies
- Strategies for Navigating Politics in the Civic Environment

Students may also earn credit toward the 4 M.P.A. Workshop Series requirement through leadership involvement in community public service activities, if approved in advance by their M.P.A. degree program adviser.

The B.A. (Urban Affairs)/M.P.A. Program

Students obtaining a B.A. in Urban Affairs in the College of Arts and Sciences may pursue early admission to the master's degree program in public administration and obtain a master's degree in three to four additional semesters. The program allows students to utilize some of the M.P.A. courses to satisfy urban affairs requirements, thereby reducing the number of courses needed to complete both degrees. Contact the Bloch School Student Services Office for more information on this program option.

The B.B.A./M.P.A. Program

Students completing the bachelor of business administration may complete their M.P.A. degree in three to four additional semesters at UMKC if they meet entrance requirements for the public administration graduate program. For more information about this option, contact the Bloch School Student Services Office.

Combined J.D./M.P.A. Program

The Bloch School and the UMKC School of Law offer a combined J.D. and M.P.A. program. Students must satisfy the admission and degree requirements for each school and program. Students *fully admitted* to the School of Law are exempt from the GRE requirement for admission to the M.P.A. program. For further information, contact the School of Law or consult the Bloch School Web site at <https://bloch.umkc.edu/graduate-program/mpa/joint-degree-options/> (<https://bloch.umkc.edu/graduate-program/mpa/joint-degree-options/.html>).

Master of Science in Accounting

Student Learning Outcomes

Students graduating from this program will:

- Use professional judgment to evaluate and analyze data to provide appropriate information for stakeholder decision making (Technical Accounting Knowledge).
- Be able to assess solutions for structured and unstructured business problems and issues (Critical Thinking).
- Be able to evaluate ethical issues utilizing a professional code of conduct (Awareness of Ethics).
- Be able to communicate professionally both orally and in writing (Communication Skills).

Admission Requirements

Applicants to the Master of Science in Accounting (M.S.A.) program are considered for admission based on their undergraduate cumulative grade point averages, resumes, goal statements, and other criteria established by the faculty. Some candidates may be eligible for admission without the GMAT exam. For current admission requirements visit <https://bloch.umkc.edu/graduate-program/msa/msa-admissions/>.

The Curriculum

The Master of Science in Accounting (M.S.A.) program encompasses advanced analysis in a variety of areas. The formal M.S.A. degree requires completion of a minimum of 30 credit hours. Applicants whose undergraduate work was outside of business and accounting will first seek admission at the undergraduate level to complete up to 12 hours of foundation coursework. Students may be exempt from course requirements based on prior coursework and grades earned, with exemptions determined at the time of initial advising and enrollment. Foundation and degree requirements are designed to allow students to meet the requirements to sit for the Unified Certified Public Accountant (CPA) exam in Missouri. Students planning to complete the CPA exam in other states may need additional coursework. Those wishing to prepare for other professional exams may be able to meet requirements by careful course selection within the program. **Note:** Students who repeat courses that have been waived from their program may not count the repeated course for credit toward their degree.

An M.S.A. program of study must include 30 credit hours with a minimum of 24 hours of that course work completed at UMKC. Transfer credit will be considered in accordance with the guidelines in the Master's Degrees Academic Regulations section of the catalog.

Undergraduate Foundation Coursework

Code	Title	Credits
ACCTNG 306	Introduction to the Accounting Profession and Procedures	3
ACCTNG 307	Cost Management	3
ACCTNG 310	Intermediate Accounting I	3
ACCTNG 350	Accounting Systems And Controls	3
Total Credits		12

M.S.A. Coursework

Minimum of 30 credit hours beyond Foundation Coursework.

Code	Title	Credits
Required if not taken elsewhere:		
ACCTNG 5557	Introduction To Income Taxation (unless waived by ACCTNG 412 or equivalent)	3
ACCTNG 5560	Introduction To Auditing And Accounting Systems (unless waived by ACCTNG 405 or equivalent)	3
Required courses:		
ACCTNG 5568	Data Analytics for Accounting	3
ACCTNG 5576	Tax Research, Procedure And Practice	3
ACCTNG 5578	Current Problems In Accounting	3
Electives to arrive at 30 hours		15-21

12 hours may be selected from other Bloch School disciplines.

Master of Science in Entrepreneurial Real Estate

Student Learning Outcomes

Students graduating from this program will:

- Apply current knowledge of real estate fundamentals to solve a variety of real-world problems and be able to incorporate new knowledge as the industry advances (Real Estate Industry Knowledge).
- Draw on their knowledge of real estate markets to manage the development, feasibility, finance, investment, management, transaction, and valuation decisions (Application of Real Estate Knowledge).
- Draw on design-thinking to identify, synthesize, and apply appropriate analytics and technological skills to develop recommendations and make decisions for a range of complex real estate problems (Analytics and Design-Thinking).
- Incorporate business practices from related fields to make informed decisions related to real estate brokerage, development, finance, investment, leasing, management, and valuation (Key Business, Legal and Interdisciplinary Concepts).
- Evaluate the direct and indirect impacts of real estate decisions and demonstrate how to reconcile differences among alternatives to discharge their social responsibility in an economically viable, sustainable manner (Ethics, and Sustainable Practices).
- Be able to communicate professionally, both orally and in writing, as well as determine the appropriate communications to increase effectiveness for various audiences and stakeholders (Communication Skills).

Admission Requirements

Applicants to the Master of Science in Entrepreneurial Real Estate (M.S.E.R.E.) program are considered for admission based on their undergraduate cumulative grade point averages, resumes, goal statements, and other criteria established by the faculty. Some candidates may be eligible for admission without the GMAT exam. For current admission requirements visit <https://bloch.umkc.edu/graduate-program/msere/msere-admissions/>.

Program Requirements

The master of science in entrepreneurial real estate is designed for students interested in all aspects of real estate who have decided their career paths require an advanced level of knowledge. The Lewis White Real Estate Center works in partnership with the Bloch School of Management's Regnier Institute for Entrepreneurship and Innovation which provides a global and entrepreneurial focus to the program.

The program fulfills a vital need for graduate real estate education not offered by any university in the region. Enabling real estate entrepreneurs to keep up with today's ever-changing environment, the program addresses real estate trends such as the global shift in attitude towards eco-friendly developments, reducing carbon footprints and the expansion of green technology in new construction. The knowledge gained will allow participants

to make real estate decisions that require mastery of complex, interdisciplinary skills and an ability to manage teams of professionals with expertise in various fields.

Curriculum

The master of science in entrepreneurial real estate is a 30-credit hour program. Students who are not experienced in real estate or are not working will be encouraged to complete a real estate internship during the summer semester. Students who meet certain standards in terms of academic background and experience may also be able to complete the program on a one-year basis. Some students may also opt to pursue the degree on a part-time basis which may extend their program to two years.

The full-time program cycle begins each fall. To complete the program along with their cohorts, students are required to take two graduate level real estate courses each semester. In addition to the seven required real estate courses (21 credit hours), students will also complete 9 elective credit hours of elective. These electives may also be focused on a narrower set of courses that allow students to pursue individualized areas of focus that will help advance their careers in their chosen area of specialization. Working with advisers, all students will have an approved program of study.

An M.S.E.R.E. program of study must include 30 credit hours with a minimum of 24 hours of that course work completed at UMKC. Transfer credit will be considered in accordance with the guidelines in the Master's Degrees Academic Regulations section of the catalog.

The following courses are required:

Code	Title	Credits
RL-EST 5556	Entrepreneurial Real Estate Process	3
RL-EST 5571	Real Estate Finance	3
RL-EST 5573	Real Estate Feasibility and Market Analysis	3
RL-EST 5574	Real Estate Construction and Development	3
RL-EST 5576	Real Estate Property and Portfolio Management	3
RL-EST 5577	Real Estate Valuation	3
RL-EST 5578	Legal Context of Real Estate	3
Approved electives		9
Total Credits		30

Approved electives can come from any Bloch School discipline (ACCTNG, DSOM, ENT, FIN, MGT, MIS, MKT), Law School (special permission may be needed and options may be limited), Engineering (prerequisites and limitations may apply) and Urban Planning & Design. Students may also work with their advisor to seek approval of other courses.

Master of Science in Finance

Student Learning Outcomes

Students graduating from this program will:

- Demonstrate their ability to analyze financial data by successfully completing a financial statement analysis project.
- Demonstrate their ability to use financial modeling techniques by successfully employing those techniques to reach financial decisions on a case.
- Demonstrate their understanding of how to utilize various asset classes to achieve portfolio objectives including risk management by completing a class project.
- Demonstrate their ability to value business entities (both public and private) by successfully analyzing case information to arrive at an appropriate fair value for a business entity.

Admission Requirements

Applicants to the M.S.F. program are considered for admission based on their undergraduate cumulative grade point averages, resumes, goal statements, and other criteria established by the faculty. Some candidates may be eligible for admission without the GMAT exam. For current admission requirements visit <https://bloch.umkc.edu/graduate-program/msf/admissions/>.

The master of science in finance (M.S.F.) is for students and executives seeking specialized training in finance in preparation for financial certifications such as the Chartered Financial Analyst (CFA), as well as for acquiring career advancement skills in a variety of financial fields.

Our nationally and globally diverse faculty is comprised of experienced educators and recognized scholars who combine theory with practice to provide a balanced learning experience.

The Curriculum

The M.S.F. is a 30 hour program and courses are offered in fall, spring and summer semesters. Students entering the program must meet prerequisites in accounting, finance and statistics. Most courses are offered in the evening and students can pursue the degree part-time or full-time.

The Master of Science in Finance consists of the following three main parts:

1. Core classes required of all M.S.F. students (12 hours)
2. Interest area classes which provide subject matter depth (9 hours)
3. Designated electives (9 hours)

Total hours (30 hours)

An M.S.F. program of study must include 30 credit hours with a minimum of 24 hours of that course work completed at UMKC. Transfer credit will be considered in accordance with the guidelines in the Master's Degrees Academic Regulations section of the catalog. A petition to substitute a higher-level class will be considered for students who have completed college-level course work comparable to required M.S.F. classes.

The core curriculum for all tracks includes the following courses:

Code	Title	Credits
FIN 5552	Global Financial Markets and Institutions	3
FIN 5553	Investment Analysis	3
FIN 5560	Financial Modeling	3
FIN 5561	Financial Statement Analysis	3
Total Credits		12

Interest areas provide students with additional depth in a particular subject area. Some interest areas are designed to prepare students for professional certification exams such as the CFA and CFP. The course requirements for interest areas are detailed below.

Corporate Finance Interest Area

Code	Title	Credits
FIN 5550	Advanced Financial Management Theory And Policies	3
FIN 5563	Valuation/Mergers and Acquisitions	3
Finance Elective		3
Total Credits		9

Financial Analyst Interest Area

Code	Title	Credits
Required Track Courses		
FIN 5557	Derivative Securities	3
FIN 5562	Fixed Income Analysis	3
FIN 5563	Valuation/Mergers and Acquisitions	3
Required Elective Courses		
FIN 5564	Portfolio Management	3
FIN 5565	Alternative Investments	3
Total Credits		15

Financial Services Management Interest Area

Code	Title	Credits
FIN 5556	Management Of Financial Intermediaries	3
FIN 5557	Derivative Securities	3
FIN 5562	Fixed Income Analysis	3
or FIN 5567	Payment Systems	
FIN 5567	Payment Systems	3
FIN 5576	Fundamentals of Fintech	3
Total Credits		15

Flexible Design Interest Area

Pick three FIN designated courses to fill in the track portion of your program. For the designated elective section of the program, at least two courses must have the FIN designation.

Designated Electives

Twelve hours are required and at least 6 hours must be from Finance. Designated electives may include but are not limited to:

Code	Title	Credits
FIN 5550	Advanced Financial Management Theory And Policies	3
FIN 5556	Management Of Financial Intermediaries	3
FIN 5557	Derivative Securities	3
FIN 5562	Fixed Income Analysis	3
FIN 5563	Valuation/Mergers and Acquisitions	3
FIN 5564	Portfolio Management	3
FIN 5565	Alternative Investments	3
FIN 5567	Payment Systems	3
FIN 5576	Fundamentals of Fintech	3
FIN 5582	Seminar In Finance	3
FIN 5587	Special Topics	3
FIN 5595	Internship	1-3
ENT 5585	Entrepreneurial Finance and Venture Capital Investment	3
MGT 5552	International Study in Business	3

Selected courses in economics, management information systems, mathematics, law, real estate or other graduate programs can be approved by a finance faculty member.

Ph.D. in Entrepreneurship and Innovation

This program is not accepting applications for new students for the 2020-2021 academic year.

PROGRAM OVERVIEW

The Regnier Institute for Entrepreneurship and Innovation at the University of Missouri-Kansas City delivers exceptional entrepreneurship education and research programs. Faculty members in Entrepreneurship and Innovation at IEI are productive scholars who regularly publish in top-tier academic journals in entrepreneurship and related fields. We are committed to building one of the best doctoral programs in the country and training the next generation of entrepreneurship professors.

Students will complete two sequences of courses, one dealing with existing research in the areas of entrepreneurship and innovation and a second dealing with research methodologies. Through these courses, students will develop a solid grounding in the entrepreneurship and innovation literature. In addition, students will develop the research skills needed to (1) identify compelling research questions, (2) use theory to identify possible answers to those research question, (3) frame research projects to explore the validity of those answers, and (4) analyze the data generated by that research project using the statistical tools and techniques necessary for publication in leading management journals. All students in the program will take 6 hours of courses per semester for the first two years and 3 to 6 hours of courses per semester afterwards while working as research assistants for designated faculty and conducting dissertation research.

Student Learning Outcomes

Students graduating from this program will:

- SLO 1: Evaluate Theoretical and Empirical Contribution: For any given study published in the entrepreneurship and innovation literature, students should evaluate the strength of the paper's theoretical contribution, and evaluate the usefulness of the paper's empirical contribution in terms of statistical conclusion validity and causal inference. KPM: At the program level, we measure this SLO as whether the student completed all first-year coursework with a passing grade. Course-level rubrics are the purview of the instructing faculty. As a program, whether the student successfully passes all first-year coursework is evidence of making satisfactory progress towards the PhD degree.
- SLO 2: Deduce and Determine a Literature Gap and Empirical Strategy. Given a set of studies and a related dataset, students should deduce a valuable theoretical gap within that literature, and using a provided dataset, be able to determine and execute an appropriate statistical test of a hypothesis derived from the identified theoretical gap. KPM: We measure this SLO as whether the student successfully completed his or her second-year coursework, and whether the student successfully passes his or her comprehensive exam. There is, by design, no formalized rubric for grading the comprehensive exam. The standard for passing the exam is whether a majority of the doctoral faculty in the Department would grant a "revise and resubmit" decision on the submitted paper. The "revise and resubmit" standard is explicitly the standard that the student would find as

a researcher submitting papers to academic journals. The real-world nature of the grading process exposes the student to the subjective standard he or she will face as tenure-track faculty.

- SLO 3: Derive an Original Research Question and Theoretical Contribution. Working independently, students should derive an original research question in the entrepreneurship and innovation literature, be able connect that question to a delineable theoretical contribution to an entrepreneurship conversation, and design an appropriate empirical strategy to evaluate that research question. KPM: We measure this SLO as whether the student successfully defends his or her dissertation proposal at the end of the third-year in the program. Defining the originality of a research question and its potential contribution is at the discretion of the student's dissertation committee Chair.
- SLO 4: Persuasively Argue the Validity of Original Research. Students should persuasively argue and defend the validity—the usefulness of the research question and supporting statistical conclusion validity—of his or her original research. KPM: We measure this SLO as whether the student successfully defends his or her dissertation research at the end of the fourth year of the program. There is, by design, no set rubric for this evaluation. To be successful as tenure-track faculty, the student should be able to defend his or her research to a diverse audience of scholars who may or may not have familiarity with the student's research question.

PROGRAM STRUCTURE

Total credits required for graduation; 45 credit hours

Total residency requirements, if any: 42 credit hours

Code	Title	Credits
Required Theory Courses (12 credit hours):		
ENT 5691	Doctoral Seminar In Theoretical Foundations Of Entrepreneurship I	3
ENT 5692	Foundations Entrepreneurship	3
ENT 5693	Technology, Innovation, And Entrepreneurship	3
ENT 5694	Doctoral Seminar In Theories Of The Firm And Strategy	3
Required Methodology Courses (15 credit hours):		
ENT 5587	Special Topics	6
ENT 5681	Multivariate Statistical Methods-II	3
ENT 5682	Structural Equation Modeling	3
ENT 5683	Mathematical Models For Entrepreneurship	3
ENT 5699	Dissertation and Research in Entrepreneurship and Innovation	1-12

Required Elective Courses (6 credit hours):

Students will select two electives in consultation with their advisor. In all cases, the timing and composition of electives will be chosen with the approval of the student's advisor so that these courses will support the doctoral candidate's research focus.

Comprehensive Exams

Students are expected to take their comprehensive exams after the completion of their course requirements. Exams are administered by the RIEI faculty. However, a second failure will result in termination from the program.

Comprehensive examinations in the co-discipline may also be required either as part of major comprehensive exams or as separate exams.

Dissertation

In addition to the course work, research papers, and comprehensive exams, each Ph.D. candidate must successfully complete a dissertation in Entrepreneurship. The dissertation must be an original and independent piece of work.

Each dissertation is supervised by a five-member dissertation committee. The proposal must be approved by the dissertation committee before the end of the student's third year in the program. After the dissertation has been written to the satisfaction of the dissertation committee, the student presents the dissertation to the faculty and other Ph.D. students, and the student must defend the dissertation in a final oral examination by the committee. All dissertation requirements must be completed by the end of the sixth year in the program.

Teaching effectiveness training

All first-year students are required to participate in UMKC's teaching effectiveness training program. International students must pass a SPEAK test as part of the training. Teaching assistants assigned to teach core courses will receive additional guidance from faculty course coordinators. Each student will have the opportunity to independently teach at least two classes before graduating.

Financial support

We offer full tuition waivers and very competitive stipends to a limited number of students who are in the Stand-Alone Ph.D. program or the Interdisciplinary Ph.D. program with Entrepreneurship as the Coordinating Discipline. In addition, students are encouraged to compete for fellowships offered through the UMKC School of Graduate Studies.

Annual Evaluation

A student must complete a formal evaluation by the supervisory committee every year during the summer. Students are expected to maintain a minimum cumulative grade point average (GPA) of 3.3. Unsatisfactory performance on any of the requirements can lead to termination from the program.

Special Programs and Centers

Bloch Executive Education Center

Bloch School (<http://www.umkc.edu/virtualtour/bloch.asp>)

Bloch Executive Education Center

5108 Cherry Street, #417

(816) 235-6071

<https://bloch.umkc.edu/executive-education/>

Bloch Executive Education programs are designed to engage business, government, and non-profit leaders in applied learning. The Center offers customized programs, seminars, certificates and international programs that support innovation and leadership development in the U.S. and around the world. Custom programs are designed in concert with clients to support enterprise-wide initiatives and strategies. International programs serve to expose public and private international executives and scholars to the U.S. educational system as well as business operations. Management seminars are available to emerging leaders and senior executives based on personal and professional competency needs. Our nationally-recognized faculty provokes thought and challenges perspectives through relevant curricula that feature innovative thought, research insights, and business best practices.

Cookingham Institute of Urban Affairs

Bloch School

5110 Cherry Street, #305

(816) 235-2894

<http://bloch.umkc.edu/cookingham/>

The mission of the L.P. Cookingham Institute is to improve understanding of the sustainability of urban regions through research, educational programming, and community engagement. The Cookingham Institute also seeks to engage the UMKC community on issues related to urban and regional sustainability and to promote interdisciplinary research on urban topics. The Cookingham Institute is the means by which the Bloch School of Management supports research and teaching directed at improving our understanding of the factors affecting the fiscal and social sustainability of urban regions. The Greater Kansas City region provides an important context for our work, but the Institute is focused on producing knowledge relevant to urban regions across the country. In keeping with the Bloch School's commitment to research and education on entrepreneurship and innovation, a special focus of the Institute is on understanding innovation in the public sector.

Lewis White Real Estate Center

Bloch School (<http://www.umkc.edu/virtualtour/bloch.asp>)

5110 Cherry Street, #312

(816) 235-6288/5188

<http://www.umkc.edu/whitecenter/>

The Lewis White Real Estate Center (White Center) engages in teaching, research, and service activities. On the teaching front, working through the Department of Global Entrepreneurship and Innovation, the White Center is the primary champion of the Master of Science in Entrepreneurial Real Estate, as well as the undergraduate emphasis, and individual courses in Real Estate. The White Center's support for real estate activities cuts across campus through its commitment to interdisciplinary education. In addition to its educational activities, the White Center helps support academic research to help advance the body of knowledge and support real estate faculty. It also conducts and supports applied research to help advance best practices on the professional front. Consistent with UMKC, Bloch and Department missions, the White Center also engages in meaningful community and professional service activities, and supports service to the broader real estate academy.

Midwest Center for Nonprofit Leadership

Bloch School

5110 Cherry Street

(816) 235-2305

<https://bloch.umkc.edu/mcnl/>

The Midwest Center for Nonprofit Leadership (MCNL) is the education, research and community service center of the Department of Public Affairs in the Henry W. Bloch School of Management whose mission is to strengthen the performance and effectiveness of nonprofit public service organizations and their leaders. The Center is dedicated to building healthier communities through nonprofit leadership, and it does so through

high quality community-oriented education, research and facilitation programs and services. The Midwest Center provides an extensive array of programs for the education, professional development and personal renewal of nonprofit organization leaders and managers, including programs on nonprofit boards and governance, ethical and effective leadership and management, financial management, and social entrepreneurship. It is especially dedicated to meeting the needs of the many small and medium-sized community-based organizations and agencies serving the Kansas City metropolitan region. The Center also operates a Nonprofit Resource Center that is open to students and all members of the community.

Regnier Institute for Entrepreneurship and Innovation

Bloch School (<http://www.umkc.edu/virtualtour/bloch.asp>)

5108 Cherry Street, BEH 329

Kansas City, MO 64110-2499

P. (816) 235-6200

F. (816)-235-6529

<https://bloch.umkc.edu/entrepreneurship/>

The mission of the Regnier Institute for Entrepreneurship and Innovation at the Henry W. Bloch School of Management is to inspire and nurture entrepreneurs and innovators through transformational education and research. Our vision is to be a global leader in creating and disseminating knowledge to advance entrepreneurship and innovation. We encourage entrepreneurship, not just among business students, but among all students, and welcome those from any UMKC discipline who want to learn how to spark ideas and create new products and businesses.

The Institute and the Department of Entrepreneurship and Innovation offers entrepreneurship and innovation education at every educational level. Institute faculty and staff develop, deliver, and administer the Bloch School's Entrepreneurship programs at all levels, including two doctoral degree programs, M.B.A. and Executive M.B.A. programs, a specialized Masters degree in Entrepreneurial Real Estate, an undergraduate program, and our renowned Entrepreneurship Scholars Program. Our entrepreneurship programs focus on building an entrepreneurial mindset that can be used to create a new business, create value in an existing organization, solve social problems, or live a more entrepreneurial life. Our courses and programs are taught by an accomplished and influential cross-disciplinary faculty recognized for their research and teaching accomplishments.

Student Organizations

Student Organizations

Alpha Kappa Psi

Alpha Kappa Psi is the oldest and largest co-educational professional business fraternity with more than 200 chapters internationally. They are open to all majors that are interested in business and becoming one of tomorrow's leaders. With professional and personal development, leadership, networking and entrepreneurial opportunities, they can help you enhance your resume, distinguish yourself from your peers, and teach you skills that employers want.

Beta Alpha Psi

UMKC's Epsilon Delta chapter of Beta Alpha Psi, the national scholastic and professional accounting organization, provides opportunities for self-development and association among student members, practicing accountants and accounting faculty. Activities include technical programs presented by professionals, tutoring, taxpayer assistance, off-campus activities and social events.

Bloch School Student Association

The Bloch School Student Association (BSSA) is a board of directors to represent the student body on various campus and school administrative committees and sponsors a number of activities and events.

Delta Sigma Pi

Delta Sigma Pi, the nation's largest and most diverse professional business fraternity, is open to students interested in all fields of business. Through professional speakers and seminars, developmental workshops and interactive social events with business leaders, faculty members and prominent alumni, the fraternity provides students an excellent opportunity to explore the business environment while still concentrating on academics.

Enactus

Enactus is an international organization that connects student, academic and business leaders through entrepreneurial-based projects empowering people to transform opportunities into real, sustainable progress for themselves and their communities. Enactus is one of the largest organizations in the world, with 1,700 teams across 36 countries. Students in UMKC Enactus use entrepreneurial processes to solve needs within communities around the world. UMKC Enactus uses Human Centered Design to understand needs before creating sustainable solutions. At the end of every year UMKC Enactus presents their outcomes to a panel of judges at the Enactus USA National Competition. The goal of the competition is to select the team that has had the largest impact in their community. UMKC Enactus is one of the largest and most successful teams in the country, finishing strongly at national competition, and even receiving international recognition. www.umkcenactus.org (<http://www.umkcenactus.org>)

Financial Management Association

The Financial Management Association UMKC Student Chapter (FMA-UMKC) is affiliated with the Financial Management Association International (FMA), a premier global leader in developing and disseminating knowledge about financial decision making for academics, practitioners and students. We are leaders in providing financial literacy related to financial decision-making and encouraging as well as developing college students' financial interests through investment competitions, community projects, an active speaker program, corporate tours, a business career fair and newsletters. Also, we aspire to excellence as an organization.

Institute of Management Accountants Student Chapter

The Institute of Management Accountants is one of the largest accounting organizations in the world, but don't let the name fool you. This organization caters to all business majors seeking a career in public or private organizations in the role of management, finance, accounting or economics in an effort to bridge the gap between students and professionals. The student chapter is affiliated with national IMA and the local KC professional chapter to prepare students for a career in business and encourage pursuit of the Certified Management Accountant (CMA) exam based on accounting, finance and economics topics. The group is open to all majors and provides access to IMA scholarships/awards, an Honors Society, IMA leadership conference travel, plant tours, networking with professionals in the community and development of recognized professional competencies for career success.

International Business Club

The International Business Club (IBC) seeks to provide an opportunity for academic and structured collaboration of the world of international business for UMKC students in Business Administration and Commerce; to foster a familiarity of the opportunities, benefits, obstacles, and challenges of business abroad through discussion, analysis, practice, and research; to increase opportunities for its members through internships and job placement both abroad and at home; and to collaborate and contribute to the University of Missouri-Kansas City, the Bloch School, and the community through service and professionalism.

Public Administration Student Association

The Public Administration Student Association (PASA) is made up of M.P.A. and I.Ph.D. students who are interested in networking and socializing with students, faculty and professionals outside the classroom to enrich their experience at UMKC. PASA's purpose is to engage students academically, professionally, and socially in the study and practice of public administration.

Undergraduate Programs

Undergraduate Programs:

- Bachelor of Business Administration
- Bachelor of Science in Accounting
- Business Administration Minor
- Entrepreneurship Minor

Bachelor of Business Administration

Emphasis Areas:

- Analytics and Business Intelligence Emphasis (p. 1733)
- Entrepreneurship and Innovation Emphasis (p. 1740)
- Finance Emphasis (p. 1746)
- Health Administration Emphasis (p. 1753)
- Management Emphasis (p. 1759)
- Marketing Emphasis (p. 1766)
- Nonprofit Management Emphasis (p. 1772)
- Real Estate Emphasis (p. 1779)
- Supply Chain Management Emphasis (p. 1786)

Bachelor of Business Administration: Analytics and Business Intelligence Emphasis

University Requirements

General Education

UMKC Essentials is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour program includes a First Year Experience course; three critical thinking courses in the areas of Arts & Humanities, Natural & Physical Sciences, and Social & Behavioral Sciences; a

Culture and Diversity course; a Civic & Urban Engagement course; two courses in Composition and one course in Communication; and a Math Pathway course.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

Exit Examinations

Information on exit examinations is available in the Undergraduate Academic Regulations and Information (p. 488) section of the catalog.

Missouri Higher Education Civics Achievement Examination

In accordance with Missouri Senate Bill 807 (section 170.013.1), 'any student entering a public institution of higher education for the first time after July 2019 who is pursuing an associate's or bachelor's degree from such institution shall successfully pass an examination on the provisions and principles of American civics with a score of seventy percent or greater as a condition of graduation from such institution'. To satisfy this requirement at UMKC, students access the exam through the Canvas site. This requirement will be listed in the degree audit system as, 'Take State Mandated Missouri Higher Education Civics Achievement Examination', and listed on the transcript as 'Missouri Civics Examination'.

Student Learning Outcomes

Students graduating from this program will:

- be able to design business analytics processes for reproducibility and replicability;
- be able to choose the best application and modeling approach to solve a given business analytics problem;
- be able to interpret the results of data analyses and communicate those results to stakeholders.

Admission Requirements

First-time college students are eligible to be admitted to the Bloch School if they meet regular UMKC entrance requirements. Those transferring from other institutions must have 2.5 cumulative and University of Missouri (UM) GPAs. Intra-university transfers can enter Bloch School programs with a 2.25 UM GPA. All students are required to maintain a 2.25 cumulative University of Missouri GPA while enrolled in this program.

Program Requirements

The Bloch School requires a minimum of 120 credit hours to earn the Bachelor of Business Administration (B.B.A.) degree. This total includes coursework in the following areas: General Education, Basic Skills, General Electives, Business Core, Emphasis Area, and Interest Area. All students pursuing the B.B.A. degree must select an emphasis area and a complementary interest area.

See the Bloch School Undergraduate Policies and Procedures section (link to <http://catalog.umkc.edu/colleges-schools/henry-w-bloch-management/undergraduate-programs/undergraduate-policies-procedures/>) for additional information.

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

Code	Title	Credits
Choose one of the following:		3
CJC 364	The Supreme Court And The Criminal Process	
HISTORY 101	U.S. History to 1877	
HISTORY 102	U.S. History Since 1877	
HONORS 230	Honors American Government	
POL-SCI 210	American Government	
Total Credits		3

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

Graduation Requirements

The BBA degree will be awarded on satisfaction of the following:

1. Completion of the degree requirements and a minimum of 120 credit hours.
2. Achievement of a 2.25 GPA; satisfactory academic standing is based on:
 - a. Cumulative GPA of 2.25 for all University of Missouri courses; and
 - b. GPA of 2.25 for all required junior-and senior-level in-major courses completed at UM schools.
3. Completion of 50% of junior/senior in-major courses at UMKC.
4. Completion of HEIghten, and other assessment exercises assigned by the Bloch faculty.
5. Completion of the Constitution requirement.
6. Filing of a required application for graduation at the beginning of the senior year.

Students are responsible for ensuring their course of study falls within program guidelines.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major. Please see the tab above to view the major map for this program.

UMKC's Transfer Guides (<https://www.umkc.edu/admissions/transfer-guides.html>) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.

UMKC's PlanMyDegree 'Audit' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree audit system provides an individual evaluation of all degree requirements (General Education, Degree Specific, Major Specific, etc.) for students' officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. This evaluation is used to certify all graduation requirements.

UMKC's PlanMyDegree 'Plans' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree planning tool enables students to develop a personalized semester by semester plan of study towards completion of degree requirements for student's officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. Update and edit your full plan to degree completion each term and confirm accuracy each semester with your Academic Advisor(s).

Major Map**Four Year Graduation Plan - Courses & Critical Benchmarks for First Time College Students:**

UMKC's Major Maps are detailed, undergraduate four-year course outlines that inform students on the classes they should take and when to take them. Outlines are updated yearly. Graduate students should visit their program's individual school for program outlines.

The following is a sample course of study. Your path to graduation may vary based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning, and placement in Mathematics. You are responsible for checking prerequisites to any courses. It is the Student's responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement.

CC Critical Courses provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Recommendations to Maintain Progress toward 4-Year Degree Completion

- Completion of the First Semester Experience (FSE) course in first term.
- Early completion of Written Communication, Oral Communication, and Math Pathway requirements.
- Maintain the minimum GPA required for academic Good Standing for your degree program.

- Completion at least 15 credit hours toward degree each regular semester. (*Students may use the summer to ensure completion of 30 hours per academic year or to lighten Fall and Spring course loads.*)
- Enrollment in Critical Courses as listed on the Major Map is recommended in order to maintain timely progress and completion of prerequisite coursework.
- Regular consultation with Academic Advisor(s) for program(s) of study is strongly recommended and may be required for some degree programs.

Graduation Requirements

The BBA degree will be awarded on satisfaction of the following:

1. Completion of the degree requirements and a minimum of 120 credit hours.
2. Achievement of a 2.25 GPA; satisfactory academic standing is based on:
 - a. Cumulative GPA of 2.25 for all University of Missouri courses; and
 - b. GPA of 2.25 for all required junior-and senior-level in-major courses completed at UM schools.
3. Completion of 50% of junior/senior in-major courses at UMKC.
4. Completion of HEIghten, and other assessment exercises assigned by the Bloch faculty.
5. Completion of the Constitution requirement.
6. Filing of a required application for graduation at the beginning of the senior year.

Students are responsible for ensuring their course of study falls within program guidelines.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses

are taken, students are encouraged to consult with the undergraduate advisor for this major. Please see the tab above to view the major map for this program.

UMKC's Transfer Guides (<https://www.umkc.edu/admissions/transfer-guides.html>) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.

UMKC's PlanMyDegree 'Audit' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree audit system provides an individual evaluation of all degree requirements (General Education, Degree Specific, Major Specific, etc.) for students' officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. This evaluation is used to certify all graduation requirements.

UMKC's PlanMyDegree 'Plans' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree planning tool enables students to develop a personalized semester by semester plan of study towards completion of degree requirements for student's officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. Update and edit your full plan to degree completion each term and confirm accuracy each semester with your Academic Advisor(s).

Major Map

Four Year Graduation Plan - Courses & Critical Benchmarks for First Time College Students:

UMKC's Major Maps are detailed, undergraduate four-year course outlines that inform students on the classes they should take and when to take them. Outlines are updated yearly. Graduate students should visit their program's individual school for program outlines.

The following is a sample course of study. Your path to graduation may vary based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning, and placement in Mathematics. You are responsible for checking prerequisites to any courses. It is the Student's responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement.

CC Critical Courses provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Recommendations to Maintain Progress toward 4-Year Degree Completion

- Completion of the First Semester Experience (FSE) course in first term.
- Early completion of Written Communication, Oral Communication, and Math Pathway requirements.
- Maintain the minimum GPA required for academic Good Standing for your degree program.
- Completion at least 15 credit hours toward degree each regular semester. *(Students may use the summer to ensure completion of 30 hours per academic year or to lighten Fall and Spring course loads.)*
- Enrollment in Critical Courses as listed on the Major Map is recommended in order to maintain timely progress and completion of prerequisite coursework.
- Regular consultation with Academic Advisor(s) for program(s) of study is strongly recommended and may be required for some degree programs.

Bachelor of Business Administration: Finance Emphasis

University Requirements

General Education

UMKC Essentials is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour program includes a First Year Experience course; three critical thinking courses in the areas of Arts & Humanities, Natural & Physical Sciences, and Social & Behavioral Sciences; a Culture and Diversity course; a Civic & Urban Engagement course; two courses in Composition and one course in Communication; and a Math Pathway course.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

Exit Examinations

Information on exit examinations is available in the Undergraduate Academic Regulations and Information (p. 488) section of the catalog.

Missouri Higher Education Civics Achievement Examination

In accordance with Missouri Senate Bill 807 (section 170.013.1), 'any student entering a public institution of higher education for the first time after July 2019 who is pursuing an associate's or bachelor's degree from such institution shall successfully pass an examination on the provisions and principles of American civics with a score of seventy percent or greater as a condition of graduation from such institution'. To satisfy this requirement at UMKC, students access the exam through the Canvas site. This requirement will be listed in the degree audit system as, 'Take State Mandated Missouri Higher Education Civics Achievement Examination', and listed on the transcript as 'Missouri Civics Examination'.

Student Learning Outcomes

Students graduating from this program will:

- be able to synthesize course material via experiential learning by constructing models using financial data in a spreadsheet environment;
- be able to investigate corporate financial decisions utilizing capital budgeting techniques;
- be able to evaluate the business strategies of different types of organizations using financial statements.

Admission Requirements

First-time college students are eligible to be admitted to the Bloch School if they meet regular UMKC entrance requirements. Those transferring from other institutions must have 2.5 cumulative and University of Missouri (UM) GPAs. Intra-university transfers can enter Bloch School programs with a 2.25 UM GPA. All students are required to maintain a 2.25 cumulative University of Missouri GPA while enrolled in this program.

Program Requirements

The Bloch School requires a minimum of 120 credit hours to earn the Bachelor of Business Administration (B.B.A.) degree. This total includes coursework in the following areas: General Education, Basic Skills, General Electives, Business Core, Emphasis Area, and Interest Area. All students pursuing the B.B.A. degree must select an emphasis area and a complementary interest area.

See the Bloch School Undergraduate Policies and Procedures section (link to <http://catalog.umkc.edu/colleges-schools/henry-w-bloch-management/undergraduate-programs/undergraduate-policies-procedures/>) for additional information.

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have "satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions."

Courses at UMKC that satisfy this state requirement are:

Code	Title	Credits
Choose one of the following:		3
CJC 364	The Supreme Court And The Criminal Process	
HISTORY 101	U.S. History to 1877	
HISTORY 102	U.S. History Since 1877	
HONORS 230	Honors American Government	
POL-SCI 210	American Government	
Total Credits		3

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

Graduation Requirements

The BBA degree will be awarded on satisfaction of the following:

1. Completion of the degree requirements and a minimum of 120 credit hours.
2. Achievement of a 2.25 GPA; satisfactory academic standing is based on:
 - a. Cumulative GPA of 2.25 for all University of Missouri courses; and
 - b. GPA of 2.25 for all required junior-and senior-level in-major courses completed at UM schools.
3. Completion of 50% of junior/senior in-major courses at UMKC.
4. Completion of HEIghten, and other assessment exercises assigned by the Bloch faculty.
5. Completion of the Constitution requirement.
6. Filing of a required application for graduation at the beginning of the senior year.

Students are responsible for ensuring their course of study falls within program guidelines.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major. Please see the tab above to view the major map for this program.

UMKC's Transfer Guides (<https://www.umkc.edu/admissions/transfer-guides.html>) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.

UMKC's PlanMyDegree 'Audit' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree audit system provides an individual evaluation of all degree requirements (General Education, Degree Specific, Major Specific, etc.) for students' officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. This evaluation is used to certify all graduation requirements.

UMKC's PlanMyDegree 'Plans' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree planning tool enables students to develop a personalized semester by semester plan of study towards completion of degree requirements for student's officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. Update and edit your full plan to degree completion each term and confirm accuracy each semester with your Academic Advisor(s).

Major Map

Four Year Graduation Plan - Courses & Critical Benchmarks for First Time College Students:

UMKC's Major Maps are detailed, undergraduate four-year course outlines that inform students on the classes they should take and when to take them. Outlines are updated yearly. Graduate students should visit their program's individual school for program outlines.

The following is a sample course of study. Your path to graduation may vary based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning, and placement in Mathematics. You are responsible for checking prerequisites to any courses. It is the Student's responsibility to ensure that all program requirements are met. CC Critical Courses provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Recommendations to Maintain Progress toward 4-Year Degree Completion

- Completion of the First Semester Experience (FSE) course in first term.
- Early completion of Written Communication, Oral Communication, and Math Pathway requirements.
- Maintain the minimum GPA required for academic Good Standing for your degree program.
- Completion at least 15 credit hours toward degree each regular semester. *(Students may use the summer to ensure completion of 30 hours per academic year or to lighten Fall and Spring course loads.)*
- Enrollment in Critical Courses as listed on the Major Map is recommended in order to maintain timely progress and completion of prerequisite coursework.
- Regular consultation with Academic Advisor(s) for program(s) of study is strongly recommended and may be required for some degree programs.

Bachelor of Business Administration: Health Administration Emphasis

University Requirements

General Education

UMKC Essentials is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour program includes a First Year Experience course; three critical thinking courses in the areas of Arts & Humanities, Natural & Physical Sciences, and Social & Behavioral Sciences; a Culture and Diversity course; a Civic & Urban Engagement course; two courses in Composition and one course in Communication; and a Math Pathway course.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

Exit Examinations

Information on exit examinations is available in the Undergraduate Academic Regulations and Information (p. 488) section of the catalog.

Missouri Higher Education Civics Achievement Examination

In accordance with Missouri Senate Bill 807 (section 170.013.1), 'any student entering a public institution of higher education for the first time after July 2019 who is pursuing an associate's or bachelor's degree from such institution shall successfully pass an examination on the provisions and principles of American civics with a score of seventy percent or greater as a condition of graduation from such institution'. To satisfy this requirement at UMKC, students access the exam through the Canvas site. This requirement will be listed in the degree audit system as, 'Take State Mandated Missouri Higher Education Civics Achievement Examination', and listed on the transcript as 'Missouri Civics Examination'.

Student Learning Outcomes

Students graduating from this program will:

- be able to analyze and synthesize diverse stakeholder perspectives in health services;
- be able to articulate and communicate health policy positions to key decision makers;
- be able to apply the frameworks of economic decision-making to the health landscape;
- be able to perform basic economic analysis using models and applied mathematics.

Admission Requirements

First-time college students are eligible to be admitted to the Bloch School if they meet regular UMKC entrance requirements. Those transferring from other institutions must have 2.5 cumulative and University of Missouri (UM) GPAs. Intra-university transfers can enter Bloch School programs with a 2.25 UM GPA. All students are required to maintain a 2.25 cumulative University of Missouri GPA while enrolled in this program.

Program Requirements

The Bloch School requires a minimum of 120 credit hours to earn the Bachelor of Business Administration (B.B.A.) degree. This total includes coursework in the following areas: General Education, Basic Skills, General Electives, Business Core, Emphasis Area, and Interest Area. All students pursuing the B.B.A. degree must select an emphasis area and a complementary interest area.

See the Bloch School Undergraduate Policies and Procedures section (link to <http://catalog.umkc.edu/colleges-schools/henry-w-bloch-management/undergraduate-programs/undergraduate-policies-procedures/>) for additional information.

Graduation Requirements

The BBA degree will be awarded on satisfaction of the following:

1. Completion of the degree requirements and a minimum of 120 credit hours.
2. Achievement of a 2.25 GPA; satisfactory academic standing is based on:
 - a. Cumulative GPA of 2.25 for all University of Missouri courses; and
 - b. GPA of 2.25 for all required junior-and senior-level in-major courses completed at UM schools.
3. Completion of 50% of junior/senior in-major courses at UMKC.
4. Completion of HEIghten, and other assessment exercises assigned by the Bloch faculty.

5. Completion of the Constitution requirement.
6. Filing of a required application for graduation at the beginning of the senior year.

Students are responsible for ensuring their course of study falls within program guidelines.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major. Please see the tab above to view the major map for this program.

UMKC's Transfer Guides (<https://www.umkc.edu/admissions/transfer-guides.html>) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.

UMKC's PlanMyDegree 'Audit' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree audit system provides an individual evaluation of all degree requirements (General Education, Degree Specific, Major Specific, etc.) for students' officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. This evaluation is used to certify all graduation requirements.

UMKC's PlanMyDegree 'Plans' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree planning tool enables students to develop a personalized semester by semester plan of study towards completion of degree requirements for student's officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. Update and edit your full plan to degree completion each term and confirm accuracy each semester with your Academic Advisor(s).

Major Map

Four Year Graduation Plan - Courses & Critical Benchmarks for First Time College Students:

UMKC's Major Maps are detailed, undergraduate four-year course outlines that inform students on the classes they should take and when to take them. Outlines are updated yearly. Graduate students should visit their program's individual school for program outlines.

The following is a sample course of study. Your path to graduation may vary based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning, and placement in Mathematics. You are responsible for checking prerequisites to any courses. It is the Student's responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement.

CC Critical Courses provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Recommendations to Maintain Progress toward 4-Year Degree Completion

- Completion of the First Semester Experience (FSE) course in first term.
- Early completion of Written Communication, Oral Communication, and Math Pathway requirements.
- Maintain the minimum GPA required for academic Good Standing for your degree program.
- Completion at least 15 credit hours toward degree each regular semester. *(Students may use the summer to ensure completion of 30 hours per academic year or to lighten Fall and Spring course loads.)*
- Enrollment in Critical Courses as listed on the Major Map is recommended in order to maintain timely progress and completion of prerequisite coursework.
- Regular consultation with Academic Advisor(s) for program(s) of study is strongly recommended and may be required for some degree programs.

Bachelor of Business Administration: Management Emphasis

University Requirements

General Education

UMKC Essentials is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour program includes a First Year Experience course; three critical thinking courses in the areas of Arts & Humanities, Natural & Physical Sciences, and Social & Behavioral Sciences; a Culture and Diversity course; a Civic & Urban Engagement course; two courses in Composition and one course in Communication; and a Math Pathway course.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

Exit Examinations

Information on exit examinations is available in the Undergraduate Academic Regulations and Information (p. 488) section of the catalog.

Missouri Higher Education Civics Achievement Examination

In accordance with Missouri Senate Bill 807 (section 170.013.1), 'any student entering a public institution of higher education for the first time after July 2019 who is pursuing an associate's or bachelor's degree from such institution shall successfully pass an examination on the provisions and principles of American civics with a score of seventy percent or greater as a condition of graduation from such institution'. To satisfy this requirement at UMKC, students access the exam through the Canvas site. This requirement will be listed in the degree audit system as, 'Take State Mandated Missouri Higher Education Civics Achievement Examination', and listed on the transcript as 'Missouri Civics Examination'.

Student Learning Outcomes

Students graduating from this program will:

- be able to assess and implement effective business leadership and organizational behavior processes;
- be able to understand the functions of effective human resource management;
- be able to design and assess organizational strategy and plan execution.

Admission Requirements

First-time college students are eligible to be admitted to the Bloch School if they meet regular UMKC entrance requirements. Those transferring from other institutions must have 2.5 cumulative and University of Missouri (UM) GPAs. Intra-university transfers can enter Bloch School programs with a 2.25 UM GPA. All students are required to maintain a 2.25 cumulative University of Missouri GPA while enrolled in this program.

Program Requirements

The Bloch School requires a minimum of 120 credit hours to earn the Bachelor of Business Administration (B.B.A.) degree. This total includes coursework in the following areas: General Education, Basic Skills, General Electives, Business Core, Emphasis Area, and Interest Area. All students pursuing the B.B.A. degree must select an emphasis area and a complementary interest area.

See the Bloch School Undergraduate Policies and Procedures section (link to <http://catalog.umkc.edu/colleges-schools/henry-w-bloch-management/undergraduate-programs/undergraduate-policies-procedures/>) for additional information.

UMKC Essentials

Code	Title	Credits
First Semester Experience Course (GEFSE)		3
Written Communication:		
ENGLISH 110	English I: Introduction To Academic Prose	3
ENGLISH 225	English II: Intermediate Academic Prose	3
Oral Communication (choose one of the following):		3

Civic & Urban Engagement Course (GECUE)		3
Total Credits		27

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have "satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions."

Courses at UMKC that satisfy this state requirement are:

Code	Title	Credits
Choose one of the following:		3
CJC 364	The Supreme Court And The Criminal Process	
HISTORY 101	U.S. History to 1877	

HISTORY 102	U.S. History Since 1877	
HONORS 230	Honors American Government	
POL-SCI 210	American Government	
Total Credits		3

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

Graduation Requirements

The BBA degree will be awarded on satisfaction of the following:

1. Completion of the degree requirements and a minimum of 120 credit hours.
2. Achievement of a 2.25 GPA; satisfactory academic standing is based on:
 - a. Cumulative GPA of 2.25 for all University of Missouri courses; and
 - b. GPA of 2.25 for all required junior-and senior-level in-major courses completed at UM schools.
3. Completion of 50% of junior/senior in-major courses at UMKC.
4. Completion of HEIghten, and other assessment exercises assigned by the Bloch faculty.
5. Completion of the Constitution requirement.
6. Filing of a required application for graduation at the beginning of the senior year.

Students are responsible for ensuring their course of study falls within program guidelines.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major. Please see the tab above to view the major map for this program.

UMKC's Transfer Guides (<https://www.umkc.edu/admissions/transfer-guides.html>) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.

UMKC's PlanMyDegree 'Audit' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree audit system provides an individual evaluation of all degree requirements (General Education, Degree Specific, Major Specific, etc.) for students' officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. This evaluation is used to certify all graduation requirements.

UMKC's PlanMyDegree 'Plans' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree planning tool enables students to develop a personalized semester by semester plan of study towards completion of degree requirements for student's officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. Update and edit your full plan to degree completion each term and confirm accuracy each semester with your Academic Advisor(s).

Major Map**Four Year Graduation Plan - Courses & Critical Benchmarks for First Time College Students:**

UMKC's Major Maps are detailed, undergraduate four-year course outlines that inform students on the classes they should take and when to take them. Outlines are updated yearly. Graduate students should visit their program's individual school for program outlines.

The following is a sample course of study. Your path to graduation may vary based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning, and placement in Mathematics. You are responsible for checking prerequisites to any courses. It is the Student's responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement.

CC Critical Courses provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Recommendations to Maintain Progress toward 4-Year Degree Completion

- Completion of the First Semester Experience (FSE) course in first term.
- Early completion of Written Communication, Oral Communication, and Math Pathway requirements.
- Maintain the minimum GPA required for academic Good Standing for your degree program.

- Completion at least 15 credit hours toward degree each regular semester. (*Students may use the summer to ensure completion of 30 hours per academic year or to lighten Fall and Spring course loads.*)
- Enrollment in Critical Courses as listed on the Major Map is recommended in order to maintain timely progress and completion of prerequisite coursework.
- Regular consultation with Academic Advisor(s) for program(s) of study is strongly recommended and may be required for some degree programs.

Bachelor of Business Administration: Marketing Emphasis

University Requirements

General Education

UMKC Essentials is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour program includes a First Year Experience course; three critical thinking courses in the areas of Arts & Humanities, Natural & Physical Sciences, and Social & Behavioral Sciences; a Culture and Diversity course; a Civic & Urban Engagement course; two courses in Composition and one course in Communication; and a Math Pathway course.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

Exit Examinations

Information on exit examinations is available in the Undergraduate Academic Regulations and Information (p. 488) section of the catalog.

Missouri Higher Education Civics Achievement Examination

In accordance with Missouri Senate Bill 807 (section 170.013.1), 'any student entering a public institution of higher education for the first time after July 2019 who is pursuing an associate's or bachelor's degree from such institution shall successfully pass an examination on the provisions and principles of American civics with a score of seventy percent or greater as a condition of graduation from such institution'. To satisfy this requirement at UMKC, students access the exam through the Canvas site. This requirement will be listed in the degree audit system as 'Take State Mandated Missouri Higher Education Civics Achievement Examination', and listed on the transcript as 'Missouri Civics Examination'.

Student Learning Outcomes

Students graduating from this program will:

- be able to understand and describe fundamental concepts and strategies pertaining to product, pricing, promotions, distribution, customer behavior, marketing research, and sales;
- be able to demonstrate critical thinking skills by employing appropriate tools/techniques to solve marketing-related problems;
- be able to effectively communicate marketing-related business problems and solutions through individual and/or team-based written project reports and oral presentations.

Admission Requirements

First-time college students are eligible to be admitted to the Bloch School if they meet regular UMKC entrance requirements. Those transferring from other institutions must have 2.5 cumulative and University of Missouri (UM) GPAs. Intra-university transfers can enter Bloch School programs with a 2.25 UM GPA. All students are required to maintain a 2.25 cumulative University of Missouri GPA while enrolled in this program.

Program Requirements

The Bloch School requires a minimum of 120 credit hours to earn the Bachelor of Business Administration (B.B.A.) degree. This total includes coursework in the following areas: General Education, Basic Skills, General Electives, Business Core, Emphasis Area, and Interest Area. All students pursuing the B.B.A. degree must select an emphasis area and a complementary interest area.

See the Bloch School Undergraduate Policies and Procedures section (link to <http://catalog.umkc.edu/colleges-schools/henry-w-bloch-management/undergraduate-programs/undergraduate-policies-procedures/>) for additional information.

UMKC Essentials

Code	Title	Credits
First Semester Experience Course (GEFSE)		3
Written Communication:		
ENGLISH 110	English I: Introduction To Academic Prose	3
ENGLISH 225	English II: Intermediate Academic Prose	3
Oral Communication (choose one of the following):		3
COMM-ST 110	Fundamentals Of Effective Speaking And Listening	
COMM-ST 140	Principles Of Communication	
COMM-ST 212	Argumentation And Debate (offered via dual credit only)	
COMM-ST 277	Interpersonal Communication	
Math Pathway (satisfied in major requirements below)		
Critical Thinking in Arts & Humanities (GECRT-AH)		3
Critical Thinking in Natural & Physical Sciences (GECRT-SC)		3
Critical Thinking in Social & Behavioral Sciences (GECRT-SS)		3
Culture & Diversity Course (GECDV)		3
Civic & Urban Engagement Course (GECUE)		3
Total Credits		27

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have "satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions."

Courses at UMKC that satisfy this state requirement are:

Code	Title	Credits
Choose one of the following:		3
CJC 364	The Supreme Court And The Criminal Process	
HISTORY 101	U.S. History to 1877	
HISTORY 102	U.S. History Since 1877	
HONORS 230	Honors American Government	
POL-SCI 210	American Government	
Total Credits		3

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

Graduation Requirements

The BBA degree will be awarded on satisfaction of the following:

1. Completion of the degree requirements and a minimum of 120 credit hours.
2. Achievement of a 2.25 GPA; satisfactory academic standing is based on:
 - a. Cumulative GPA of 2.25 for all University of Missouri courses; and
 - b. GPA of 2.25 for all required junior-and senior-level in-major courses completed at UM schools.
3. Completion of 50% of junior/senior in-major courses at UMKC.
4. Completion of HEIghten, and other assessment exercises assigned by the Bloch faculty.
5. Completion of the Constitution requirement.
6. Filing of a required application for graduation at the beginning of the senior year.

Students are responsible for ensuring their course of study falls within program guidelines.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major. Please see the tab above to view the major map for this program.

UMKC's Transfer Guides (<https://www.umkc.edu/admissions/transfer-guides.html>) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.

UMKC's PlanMyDegree 'Audit' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree audit system provides an individual evaluation of all degree requirements (General Education, Degree Specific, Major Specific, etc.) for students' officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. This evaluation is used to certify all graduation requirements.

UMKC's PlanMyDegree 'Plans' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree planning tool enables students to develop a personalized semester by semester plan of study towards completion of degree requirements for student's officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. Update and edit your full plan to degree completion each term and confirm accuracy each semester with your Academic Advisor(s).

Major Map

Four Year Graduation Plan - Courses & Critical Benchmarks for First Time College Students:

UMKC's Major Maps are detailed, undergraduate four-year course outlines that inform students on the classes they should take and when to take them. Outlines are updated yearly. Graduate students should visit their program's individual school for program outlines.

The following is a sample course of study. Your path to graduation may vary based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning, and placement in Mathematics. You are responsible for checking prerequisites to any courses. It is the Student's responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement.

CC Critical Courses provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Recommendations to Maintain Progress toward 4-Year Degree Completion

- Completion of the First Semester Experience (FSE) course in first term.
- Early completion of Written Communication, Oral Communication, and Math Pathway requirements.
- Maintain the minimum GPA required for academic Good Standing for your degree program.
- Completion at least 15 credit hours toward degree each regular semester. (*Students may use the summer to ensure completion of 30 hours per academic year or to lighten Fall and Spring course loads.*)
- Enrollment in Critical Courses as listed on the Major Map is recommended in order to maintain timely progress and completion of prerequisite coursework.
- Regular consultation with Academic Advisor(s) for program(s) of study is strongly recommended and may be required for some degree programs.

Bachelor of Business Administration: Nonprofit Management Emphasis

University Requirements

General Education

UMKC Essentials is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour program includes a First Year Experience course; three critical thinking courses in the areas of Arts & Humanities, Natural & Physical Sciences, and Social & Behavioral Sciences; a Culture and Diversity course; a Civic & Urban Engagement course; two courses in Composition and one course in Communication; and a Math Pathway course.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

Exit Examinations

Information on exit examinations is available in the Undergraduate Academic Regulations and Information (p. 488) section of the catalog.

Missouri Higher Education Civics Achievement Examination

In accordance with Missouri Senate Bill 807 (section 170.013.1), 'any student entering a public institution of higher education for the first time after July 2019 who is pursuing an associate's or bachelor's degree from such institution shall successfully pass an examination on the provisions and principles of American civics with a score of seventy percent or greater as a condition of graduation from such institution'. To satisfy this requirement at UMKC, students access the exam through the Canvas site. This requirement will be listed in the degree audit system as, 'Take State Mandated Missouri Higher Education Civics Achievement Examination', and listed on the transcript as 'Missouri Civics Examination'.

Student Learning Outcomes

Students graduating from this program will:

- be able to lead and manage nonprofit organizations and programs effectively and in entrepreneurial and innovative ways;
- be able to engage in sophisticated decision making to effectively address the long term needs and interests of communities, organizations, and their stakeholders;
- be able to effectively engage, interact, and communicate, verbally and in writing, with diverse constituencies and audience.

Admission Requirements

First-time college students are eligible to be admitted to the Bloch School if they meet regular UMKC entrance requirements. Those transferring from other institutions must have 2.5 cumulative and University of Missouri (UM) GPAs. Intra-university transfers can enter Bloch School programs with a 2.25 UM GPA. All students are required to maintain a 2.25 cumulative University of Missouri GPA while enrolled in this program.

Program Requirements

The Bloch School requires a minimum of 120 credit hours to earn the Bachelor of Business Administration (B.B.A.) degree. This total includes coursework in the following areas: General Education, Basic Skills, General Electives, Business Core, Emphasis Area, and Interest Area. All students pursuing the B.B.A. degree must select an emphasis area and a complementary interest area.

See the Bloch School Undergraduate Policies and Procedures section (link to <http://catalog.umkc.edu/colleges-schools/henry-w-bloch-management/undergraduate-programs/undergraduate-policies-procedures/>) for additional information.

Graduation Requirements

The BBA degree will be awarded on satisfaction of the following:

1. Completion of the degree requirements and a minimum of 120 credit hours.
2. Achievement of a 2.25 GPA; satisfactory academic standing is based on:
 - a. Cumulative GPA of 2.25 for all University of Missouri courses; and
 - b. GPA of 2.25 for all required junior-and senior-level in-major courses completed at UM schools.
3. Completion of 50% of junior/senior in-major courses at UMKC.
4. Completion of HELghten, and other assessment exercises assigned by the Bloch faculty.
5. Completion of the Constitution requirement.
6. Filing of a required application for graduation at the beginning of the senior year.

Students are responsible for ensuring their course of study falls within program guidelines.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major. Please see the tab above to view the major map for this program.

UMKC's Transfer Guides (<https://www.umkc.edu/admissions/transfer-guides.html>) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.

UMKC's PlanMyDegree 'Audit' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree audit system provides an individual evaluation of all degree requirements (General Education, Degree Specific, Major Specific, etc.) for students' officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. This evaluation is used to certify all graduation requirements.

UMKC's PlanMyDegree 'Plans' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree planning tool enables students to develop a personalized semester by semester plan of study towards completion of degree requirements for student's officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. Update and edit your full plan to degree completion each term and confirm accuracy each semester with your Academic Advisor(s).

Major Map

Four Year Graduation Plan - Courses & Critical Benchmarks for First Time College Students:

UMKC's Major Maps are detailed, undergraduate four-year course outlines that inform students on the classes they should take and when to take them. Outlines are updated yearly. Graduate students should visit their program's individual school for program outlines.

The following is a sample course of study. Your path to graduation may vary based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning, and placement in Mathematics. You are responsible for checking prerequisites to any courses. It is the Student's responsibility to ensure that all program requirements are met. CC Critical Courses provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Recommendations to Maintain Progress toward 4-Year Degree Completion

- Completion of the First Semester Experience (FSE) course in first term.
- Early completion of Written Communication, Oral Communication, and Math Pathway requirements.
- Maintain the minimum GPA required for academic Good Standing for your degree program.
- Completion at least 15 credit hours toward degree each regular semester. *(Students may use the summer to ensure completion of 30 hours per academic year or to lighten Fall and Spring course loads.)*
- Enrollment in Critical Courses as listed on the Major Map is recommended in order to maintain timely progress and completion of prerequisite coursework.
- Regular consultation with Academic Advisor(s) for program(s) of study is strongly recommended and may be required for some degree programs.

Bachelor of Business Administration: Real Estate Emphasis

University Requirements

General Education

UMKC Essentials is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour program includes a First Year Experience course; three critical thinking courses in the areas of Arts & Humanities, Natural & Physical Sciences, and Social & Behavioral Sciences; a Culture and Diversity course; a Civic & Urban Engagement course; two courses in Composition and one course in Communication; and a Math Pathway course.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

Exit Examinations

Information on exit examinations is available in the Undergraduate Academic Regulations and Information (p. 488) section of the catalog.

Missouri Higher Education Civics Achievement Examination

In accordance with Missouri Senate Bill 807 (section 170.013.1), 'any student entering a public institution of higher education for the first time after July 2019 who is pursuing an associate's or bachelor's degree from such institution shall successfully pass an examination on the provisions and principles of American civics with a score of seventy percent or greater as a condition of graduation from such institution'. To satisfy this requirement at UMKC, students access the exam through the Canvas site. This requirement will be listed in the degree audit system as, 'Take State Mandated Missouri Higher Education Civics Achievement Examination', and listed on the transcript as 'Missouri Civics Examination'.

Student Learning Outcomes

Students graduating from this program will:

- be able to demonstrate technical competence in various real estate calculations and modeling;
- be able to devise solutions for unstructured real estate problems;
- be able to use cohesive and logical reasoning patterns for evaluating real estate information, material and data.

Admission Requirements

First-time college students are eligible to be admitted to the Bloch School if they meet regular UMKC entrance requirements. Those transferring from other institutions must have 2.5 cumulative and University of Missouri (UM) GPAs. Intra-university transfers can enter Bloch School programs with a 2.25 UM GPA. All students are required to maintain a 2.25 cumulative University of Missouri GPA while enrolled in this program.

Program Requirements

The Bloch School requires a minimum of 120 credit hours to earn the Bachelor of Business Administration (B.B.A.) degree. This total includes coursework in the following areas: General Education, Basic Skills, General Electives, Business Core, Emphasis Area, and Interest Area. All students pursuing the B.B.A. degree must select an emphasis area and a complementary interest area.

See the Bloch School Undergraduate Policies and Procedures section (link to <http://catalog.umkc.edu/colleges-schools/henry-w-bloch-management/undergraduate-programs/undergraduate-policies-procedures/>) for additional information.

UMKC Essentials

Code	Title	Credits
First Semester Experience Course (GEFSE)		3

Total Credits		27

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have "satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions."

Courses at UMKC that satisfy this state requirement are:

Code	Title	Credits
Choose one of the following:		3
CJC 364	The Supreme Court And The Criminal Process	
HISTORY 101	U.S. History to 1877	
HISTORY 102	U.S. History Since 1877	
HONORS 230	Honors American Government	
POL-SCI 210	American Government	
Total Credits		3

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.

- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

Graduation Requirements

The BBA degree will be awarded on satisfaction of the following:

1. Completion of the degree requirements and a minimum of 120 credit hours.
2. Achievement of a 2.25 GPA; satisfactory academic standing is based on:
 - a. Cumulative GPA of 2.25 for all University of Missouri courses; and
 - b. GPA of 2.25 for all required junior-and senior-level in-major courses completed at UM schools.
3. Completion of 50% of junior/senior in-major courses at UMKC.
4. Completion of HEIghten, and other assessment exercises assigned by the Bloch faculty.
5. Completion of the Constitution requirement.
6. Filing of a required application for graduation at the beginning of the senior year.

Students are responsible for ensuring their course of study falls within program guidelines.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major. Please see the tab above to view the major map for this program.

UMKC's Transfer Guides (<https://www.umkc.edu/admissions/transfer-guides.html>) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.

UMKC's PlanMyDegree 'Audit' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree audit system provides an individual evaluation of all degree requirements (General Education, Degree Specific, Major Specific, etc.) for students' officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. This evaluation is used to certify all graduation requirements.

UMKC's PlanMyDegree 'Plans' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree planning tool enables students to develop a personalized semester by semester plan of study towards completion of degree requirements for student's officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. Update and edit your full plan to degree completion each term and confirm accuracy each semester with your Academic Advisor(s).

Major Map**Four Year Graduation Plan - Courses & Critical Benchmarks for First Time College Students:**

UMKC's Major Maps are detailed, undergraduate four-year course outlines that inform students on the classes they should take and when to take them. Outlines are updated yearly. Graduate students should visit their program's individual school for program outlines.

The following is a sample course of study. Your path to graduation may vary based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning, and placement in Mathematics. You are responsible for checking prerequisites to any courses. It is the Student's responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement.

CC Critical Courses provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Recommendations to Maintain Progress toward 4-Year Degree Completion

- Completion of the First Semester Experience (FSE) course in first term.
- Early completion of Written Communication, Oral Communication, and Math Pathway requirements.
- Maintain the minimum GPA required for academic Good Standing for your degree program.
- Completion at least 15 credit hours toward degree each regular semester. *(Students may use the summer to ensure completion of 30 hours per academic year or to lighten Fall and Spring course loads.)*
- Enrollment in Critical Courses as listed on the Major Map is recommended in order to maintain timely progress and completion of prerequisite coursework.
- Regular consultation with Academic Advisor(s) for program(s) of study is strongly recommended and may be required for some degree programs.

Bachelor of Business Administration: Supply Chain Management Emphasis

University Requirements

General Education

UMKC Essentials is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour program includes a First Year Experience course; three critical thinking courses in the areas of Arts & Humanities, Natural & Physical Sciences, and Social & Behavioral Sciences; a Culture and Diversity course; a Civic & Urban Engagement course; two courses in Composition and one course in Communication; and a Math Pathway course.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

Exit Examinations

Information on exit examinations is available in the Undergraduate Academic Regulations and Information (p. 488) section of the catalog.

Missouri Higher Education Civics Achievement Examination

In accordance with Missouri Senate Bill 807 (section 170.013.1), 'any student entering a public institution of higher education for the first time after July 2019 who is pursuing an associate's or bachelor's degree from such institution shall successfully pass an examination on the provisions and principles of American civics with a score of seventy percent or greater as a condition of graduation from such institution'. To satisfy this requirement at UMKC, students access the exam through the Canvas site. This requirement will be listed in the degree audit system as, 'Take State Mandated Missouri Higher Education Civics Achievement Examination', and listed on the transcript as 'Missouri Civics Examination'.

Student Learning Outcomes

Students graduating from this program will:

- be able to conceptualize a multi-echelon supply chain to add value for upstream suppliers and downstream customers;
- be able to interpret contracts, solicitation and specification methods, and purchase-supply analysis for between and within supply chain linkages;
- be able to integrate quality management, process improvement methodologies, quantitative spend analysis and total cost of ownership metrics into supply chain decisions.

Admission Requirements

First-time college students are eligible to be admitted to the Bloch School if they meet regular UMKC entrance requirements. Those transferring from other institutions must have 2.5 cumulative and University of Missouri (UM) GPAs. Intra-university transfers can enter Bloch School programs with a 2.25 UM GPA. All students are required to maintain a 2.25 cumulative University of Missouri GPA while enrolled in this program.

Program Requirements

The Bloch School requires a minimum of 120 credit hours to earn the Bachelor of Business Administration (B.B.A.) degree. This total includes coursework in the following areas: General Education, Basic Skills, General Electives, Business Core, Emphasis Area, and Interest Area. All students pursuing the B.B.A. degree must select an emphasis area and a complementary interest area.

See the Bloch School Undergraduate Policies and Procedures section (link to <http://catalog.umkc.edu/colleges-schools/henry-w-bloch-management/undergraduate-programs/undergraduate-policies-procedures/>) for additional information.

Graduation Requirements

The BBA degree will be awarded on satisfaction of the following:

1. Completion of the degree requirements and a minimum of 120 credit hours.
2. Achievement of a 2.25 GPA; satisfactory academic standing is based on:
 - a. Cumulative GPA of 2.25 for all University of Missouri courses; and
 - b. GPA of 2.25 for all required junior-and senior-level in-major courses completed at UM schools.
3. Completion of 50% of junior/senior in-major courses at UMKC.
4. Completion of HEIghten, and other assessment exercises assigned by the Bloch faculty.

5. Completion of the Constitution requirement.
6. Filing of a required application for graduation at the beginning of the senior year.

Students are responsible for ensuring their course of study falls within program guidelines.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major. Please see the tab above to view the major map for this program.

UMKC's Transfer Guides (<https://www.umkc.edu/admissions/transfer-guides.html>) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.

UMKC's PlanMyDegree 'Audit' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree audit system provides an individual evaluation of all degree requirements (General Education, Degree Specific, Major Specific, etc.) for students' officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. This evaluation is used to certify all graduation requirements.

UMKC's PlanMyDegree 'Plans' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree planning tool enables students to develop a personalized semester by semester plan of study towards completion of degree requirements for student's officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. Update and edit your full plan to degree completion each term and confirm accuracy each semester with your Academic Advisor(s).

Major Map

Four Year Graduation Plan - Courses & Critical Benchmarks for First Time College Students:

UMKC's Major Maps are detailed, undergraduate four-year course outlines that inform students on the classes they should take and when to take them. Outlines are updated yearly. Graduate students should visit their program's individual school for program outlines.

The following is a sample course of study. Your path to graduation may vary based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning, and placement in Mathematics. You are responsible for checking prerequisites to any courses. It is the Student's responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement.

CC Critical Courses provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Recommendations to Maintain Progress toward 4-Year Degree Completion

- Completion of the First Semester Experience (FSE) course in first term.
- Early completion of Written Communication, Oral Communication, and Math Pathway requirements.
- Maintain the minimum GPA required for academic Good Standing for your degree program.
- Completion at least 15 credit hours toward degree each regular semester. *(Students may use the summer to ensure completion of 30 hours per academic year or to lighten Fall and Spring course loads.)*
- Enrollment in Critical Courses as listed on the Major Map is recommended in order to maintain timely progress and completion of prerequisite coursework.
- Regular consultation with Academic Advisor(s) for program(s) of study is strongly recommended and may be required for some degree programs.

Bachelor of Science in Accounting

University Requirements

General Education

UMKC Essentials is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour program includes a First Year Experience course; three critical thinking courses in the areas of Arts & Humanities, Natural & Physical Sciences, and Social & Behavioral Sciences; a Culture and Diversity course; a Civic & Urban Engagement course; two courses in Composition and one course in Communication; and a Math Pathway course.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

Exit Examinations

Information on exit examinations is available in the Undergraduate Academic Regulations and Information (p. 488) section of the catalog.

Missouri Higher Education Civics Achievement Examination

In accordance with Missouri Senate Bill 807 (section 170.013.1), 'any student entering a public institution of higher education for the first time after July 2019 who is pursuing an associate's or bachelor's degree from such institution shall successfully pass an examination on the provisions and principles of American civics with a score of seventy percent or greater as a condition of graduation from such institution'. To satisfy this requirement at UMKC, students access the exam through the Canvas site. This requirement will be listed in the degree audit system as, 'Take State Mandated Missouri Higher Education Civics Achievement Examination', and listed on the transcript as 'Missouri Civics Examination'.

Student Learning Outcomes

Students graduating from this program will:

- use professional judgment to determine, find, and analyze data to provide appropriate information for stakeholder decision making (Technical Accounting Knowledge).
- be able to analyze domestic and global business issues (General Business Knowledge).
- analyze innovation, new business development and high-growth-potential entities (Entrepreneurship & Innovation).
- be able to devise solutions for structured and unstructured business problems and issues (Critical Thinking Skills).
- be able to apply a professional code of conduct to resolve ethical issues in Accounting (Awareness of Ethics).
- be able to communicate professionally both orally and in writing (Communication Skills).
- be able to use technology in modern organizational operations (Technology Skills).

Admission Requirements

First-time college students are eligible to be admitted to the Bloch School if they meet regular UMKC entrance requirements. Those transferring from other institutions must have 2.5 cumulative and University of Missouri (UM) GPAs. Intra-university transfers can enter Bloch School programs with a 2.25 UM GPA. All students are required to maintain a 2.25 cumulative University of Missouri GPA while enrolled in this program.

Program Requirements

The Bloch School requires a minimum of 120 credit hours to earn the Bachelor of Science in Accounting degree. This total includes course work in the following areas: General Education, Electives, Basic Skills, Accounting and Business Requirements.

See the Bloch School Undergraduate Policies and Procedures section (link to <http://catalog.umkc.edu/colleges-schools/henry-w-bloch-management/undergraduate-programs/undergraduate-policies-procedures/>) for additional information.

Upon graduation from the B.S.A. program, a student will have the skill set and professional mindset needed to perform in entry-level financial accounting, taxation, cost management and auditing positions.

UMKC Essentials

Code	Title	Credits
First Semester Experience Course (GEFSE)		3
Written Communication:		
ENGLISH 110	English I: Introduction To Academic Prose	3
ENGLISH 225	English II: Intermediate Academic Prose	3
Oral Communication (choose one of the following):		3
COMM-ST 110	Fundamentals Of Effective Speaking And Listening	
COMM-ST 140	Principles Of Communication	
COMM-ST 212	Argumentation And Debate (offered via dual credit only)	
COMM-ST 277	Interpersonal Communication	
Math Pathway (satisfied in major requirements below)		
Critical Thinking in Arts & Humanities (GECRT-AH)		3
Critical Thinking in Natural & Physical Sciences (GECRT-SC)		3
Critical Thinking in Social & Behavioral Sciences (GECRT-SS)		3
Culture & Diversity Course (GECDV)		3
Civic & Urban Engagement Course (GECUE)		3
Total Credits		27

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

Code	Title	Credits
Choose one of the following:		3
CJC 364	The Supreme Court And The Criminal Process	
HISTORY 101	U.S. History to 1877	
HISTORY 102	U.S. History Since 1877	
HONORS 230	Honors American Government	
POL-SCI 210	American Government	
Total Credits		3

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

¹ A maximum of two hours of PE activity is accepted as elective credit. Applied or military science and vocational courses may not be taken for elective credit.

Minimum GPA: 2.25 (Major; Univ of MO)

Total Credit Hours: 120**Graduation Requirements**

The BS Accounting degree will be awarded on satisfaction of the following:

1. Completion of the degree requirements and a minimum of 120 credit hours.
2. Achievement of a 2.25 GPA; satisfactory academic standing is based on:
3. Cumulative GPA of 2.25 for all University of Missouri courses; and
4. GPA of 2.25 for all required junior-and senior-level in-major courses completed at UM schools.
5. Completion of 50% of junior/senior in-major courses at UMKC. Additionally, accounting students must complete at least 15 hours of upper-level accounting courses at UMKC.
6. Completion of HEIghten, and other assessment exercises assigned by the Bloch faculty.
7. Completion of the Constitution requirement.
8. Filing of a required application for graduation at the beginning of the senior year.

Students are responsible for ensuring their course of study falls within program guidelines.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major. Please see the tab above to view the major map for this program.

UMKC's Transfer Guides (<https://www.umkc.edu/admissions/transfer-guides.html>) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.

UMKC's PlanMyDegree 'Audit' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree audit system provides an individual evaluation of all degree requirements (General Education, Degree Specific, Major Specific, etc.) for students' officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. This evaluation is used to certify all graduation requirements.

UMKC's PlanMyDegree 'Plans' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree planning tool enables students to develop a personalized semester by semester plan of study towards completion of degree requirements for student's officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. Update and edit your full plan to degree completion each term and confirm accuracy each semester with your Academic Advisor(s).

Major Map

Four Year Graduation Plan - Courses & Critical Benchmarks for First Time College Students:

UMKC's Major Maps are detailed, undergraduate four-year course outlines that inform students on the classes they should take and when to take them. Outlines are updated yearly. Graduate students should visit their program's individual school for program outlines.

The following is a sample course of study. Your path to graduation may vary based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning, and placement in Mathematics. You are responsible for checking prerequisites to any courses. It is the Student's responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement.

CC Critical Courses provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Recommendations to Maintain Progress toward 4-Year Degree Completion

- Completion of the First Semester Experience (FSE) course in first term.
- Early completion of Written Communication, Oral Communication, and Math Pathway requirements.
- Maintain the minimum GPA required for academic Good Standing for your degree program.
- Completion at least 15 credit hours toward degree each regular semester. *(Students may use the summer to ensure completion of 30 hours per academic year or to lighten Fall and Spring course loads.)*
- Enrollment in Critical Courses as listed on the Major Map is recommended in order to maintain timely progress and completion of prerequisite coursework.
- Regular consultation with Academic Advisor(s) for program(s) of study is strongly recommended and may be required for some degree programs.

Business Administration Minors

Business Administration Minor

Student Learning Outcomes

Students graduating from this program will:

- General Business Knowledge: Students will be able to analyze domestic and global business issues.
- Technology Skills: Students are able to use technology in modern organizational operations.

Students interested in business may complete a minor in either business administration or entrepreneurship. The minors are open to degree-seeking undergraduate students, with the exception of students pursuing a degree in programs that do not recognize minors. Additionally, students pursuing a degree in business or accounting are not eligible for the minor in Business Administration.

Students must achieve a minimum GPA of 2.25 in all Bloch School courses. Students are limited to 30 hours of coursework in the Bloch School.

Students interested in the Business Administration or Entrepreneurship minors should contact staff in the Bloch School Student Services Office, room 115, Bloch Heritage Hall.

Program Requirements

The minor consists of the following coursework and is subject to the student satisfying all applicable prerequisites. A minimum of 12 hours must be completed at UMKC.

Code	Title	Credits
Program Prerequisite (not included in 18 hours for minor)		
MATH 110	Precalculus Algebra (or MATH 120 or higher; or 61 ALEKS score or higher.)	3
Business Minor Foundational Courses		
ACCTNG 210	Introduction To Financial Accounting (Includes Lab)	3
MIS 202	Computer Applications In Management	3
BIT students may substitute COMP-SCI 101, COMP-SCI 371 or COMP-SCI 470 for MIS 202		
Required Courses		
MKT 324	Principles of Marketing	3
FIN 325	Financial Management	3
MGT 332	Principles of Organizational Behavior	3
Business Elective		
300/400-level Bloch course		3
Total Credits		18

Entrepreneurship Minor

Student Learning Outcomes

Students graduating from this program will:

- Demonstrate technical competence in domestic and global business through the study of major disciplines within the fields of business.
- Define, analyze and devise solutions for structured and unstructured business problems and issues by using cohesive and logical reasoning patterns for evaluating information, materials and data.
- Conceptualize a complex issue into a coherent written statement and oral presentation.
- Exhibit competence in the uses of technology in modern organizational operations.
- Demonstrate the fundamentals of creating and managing innovation, new business development and high-growth potential entities.

Students interested in business may complete a minor in either business administration or entrepreneurship. The minors are open to degree-seeking undergraduate students, with the exception of students pursuing a degree in programs that do not recognize minors. Additionally, students pursuing a degree in business or accounting are not eligible for the minor in Business Administration.

Students must achieve a minimum GPA of 2.25 in all Bloch School courses. Transfer students with equivalent course credit will be required to take a more advanced course in that same area. Students are limited to 30 hours of coursework in the Bloch School. All coursework toward the minors must be completed at UMKC.

Students interested in the Business Administration or Entrepreneurship minors should contact staff in the Bloch School Student Services Office, room 115, Bloch Heritage Hall.

Program Requirements

The Entrepreneurship minor is designed to help students acquire and refine their entrepreneurial skills. The minor is intended both for Bloch School accounting students and for students outside of the Bloch School who would like to bring an entrepreneurial perspective to their major field of study. Bachelor of Business Administration students are not eligible because of the availability of an Entrepreneurship emphasis within their degree program.

Undergraduate Policies and Procedures

Admission Requirements

Admission to undergraduate programs is available in the fall, spring and summer semesters. Students can elect to attend classes full-time or part-time and although the majority of courses are offered during the day, courses are also offered in the evening. First-time college students are eligible to be admitted to the Bloch School if they meet regular UMKC entrance requirements. Those transferring from other institutions must have 2.5 cumulative and University of Missouri (UM) GPAs. Intra-university transfers can enter Bloch School programs with a 2.25 UM GPA.

Retention Standards

Students in the bachelor of business administration (B.B.A.) or the bachelor of science in accounting (B.S.A.) programs are required to maintain a 2.25 cumulative University of Missouri GPA while enrolled in these programs. Students with GPAs that fall below the minimum 2.25 requirement are placed on probation and are allowed two successive semesters (including the summer semester, if enrolled) to restore their GPAs to the required 2.25. While on probation, undergraduates must achieve a 2.25 term GPA in order to enroll for the ensuing term. If a student's term GPA is below a 2.25 or, if after two successive semesters, the cumulative University of Missouri GPA is still below a 2.25, the student will be dismissed from the Bloch School. Good academic standing is achieved only if the GPAs are 2.25. A 2.25 average in all junior/senior in-major courses is required as well.

Graduation Requirements

The B.B.A. and B.S.A. degrees will be awarded on satisfaction of the following:

1. Completion of the degree requirements and a minimum of 120 credit hours.
2. Achievement of a 2.25 GPA; satisfactory academic standing is based on:
 - Cumulative GPA of 2.25 for all University of Missouri courses; and
 - GPA of 2.25 for all required junior- and senior-level, in-major courses completed at UM schools.
3. Completion of 50% of junior/senior in-major courses at UMKC. Accounting students must complete at least 15 hours of upper-level accounting courses at UMKC.
4. Completion of HElghten, and other assessment exercises as assigned by the Bloch faculty.
5. Completion of the Constitution Requirement (p. 487).
6. Filing of a required application for graduation at the beginning of the senior year.

Students are responsible for ensuring their course of study falls within program guidelines.

Academic Loads

See the General Undergraduate Academic Regulations and Information section of this catalog.

Concurrent Enrollment

Concurrent enrollment (simultaneous enrollment at UMKC and any other institution of higher education) is prohibited under University and Bloch School policy unless approved in advance of enrollment. Petitions are considered in limited situations including demonstrated scheduling conflicts, course cancellations, and in instances where needed courses are not offered. A separate petition is required. Submitting a petition does not guarantee approval. Concurrent enrollment in the final semester may result in a delay of graduation.

Credit by Exam

Students who have received credit by exam from a previous institution must submit official scores to the UMKC Records Office. These scores must be acceptable to the department at UMKC housing the subject area. Credit by exam is not permitted after admission into the junior/senior portion of Bloch School programs. Bloch School freshmen and sophomore students should talk with an academic advisor in the Student Services Office about credit by exam restrictions.

Credit/No Credit

All undergraduate courses in the Bloch School must be taken for a letter grade, except for internship courses (496) which are taken credit/no credit.

Course Repeat Policy

When undergraduate students repeat courses, they can request to have only the grade for the final attempt used in calculating their GPA. The course repeat policy will not automatically be applied to a student's GPA. After completing a repeated course, a student must submit a request for GPA adjustment form to his/her academic advisor. The full GPA adjustment policy is detailed in the Repeated Courses & GPA Adjustment Policy (p. 486) section of the catalog.

Exceptions

Exceptions to academic regulations must be approved by the Bloch School Student Services Office or the Associate Dean for Academic Affairs. To seek exceptions, students must file a formal written petition seeking an exception to academic policy with staff in the Bloch Student Services Office.

Independent Study

Students are limited to a total of six hours of Bloch School internship/independent study coursework, numbering 496 and 497 or MGT 490. Interested students should consult with an adviser in the Bloch School Student Services Office.

Latin Honors

Students must complete a minimum of 60 hours of coursework at UMKC to qualify for Latin Honors.

Dean:

Mary Anne Jackson, M.D.

Vice Deans:

Paul Cuddy, Pharm.D., M.B.A. (Vice Dean for Medical Education, Academic Affairs and Leadership Development)
Steven Waldman, M.D., J.D. (Strategic Initiatives and Stewardship)

Senior Associate Dean:

Dev Maulik, M.D., Ph.D., FACOG, FRCOG (Women's Health)

Associate Deans:

Donald Barnett, M.D. (Kansas City Veterans Affairs Medical Center)
Denise Bratcher, D.O. (Children's Mercy Hospital Programs)
Timothy Dellenbaugh, M.D. (Center for Behavioral Medicine)
Diana Dark, M.D. (Saint Luke's Hospital Programs)
Stefanie Ellison, M.D. (Learning Initiatives)
John Foxworth, Pharm.D. (Academic Enrichment)
Sara Gardner, M.D. (Graduate Medical Education)
David John, M.D. (Alumni Relations)
Paula Nichols, Ph.D. (Research Administration)
Nurry Pirani, M.D. (Council on Curriculum)
Olevia Pitts, M.D. (Research Medical Center)
Brenda Rogers, M.D. (Student Affairs)
Tyler Smith, M.D. (Office of Diversity & Inclusion)
Mark T. Steele, M.D. (Truman Medical Center)
Christine Sullivan, M.D. (Professional Development)
Gary Sutkin, M.D. (Women's Health)
Michael Wacker, Ph.D. (Academic Affairs)
Steven Waldman, M.D. (International Programs)

Assistant Deans:

Alice Arredondo, Ed.D. (Admissions and Recruitment)
Julie Banderas, Pharm.D., FCCP, BCPS (Graduate Studies & Allied Health)
Cary Chelladurai, Ed.D. (Student Affairs)
Lawrence Dall, M.D. (Medical Student Research)
Bridgett Jones, M.D. (Academic Dean of Student Affairs)
Darla McCarthy, Ph.D. (Curriculum)
Robert Riss, M.D. (Career Advising)
Jennifer Quaintance, Ph.D. (Assessment and Quality Improvement)

Council Chairs:

Adam Algren, M.D. (Council on Selection)
James Wooten, Pharm.D. (Faculty Council)
Julie Banderas, Pharm.D. (Graduate Studies)
Stacey Algren, M.D. (Council on Evaluation)
Emily Haury, M.D. (Council of Docents)
Nurry Pirani, M.D. (Council on Curriculum)
Fariha Shafi, M.D. (Diversity Council)

Academic Chairs:

Adam Algren, M.D. Interim (Emergency Medicine)
Michael Artman, M.D. (Pediatrics)
Julie Banderas, Pharm.D., (Graduate Health Professions in Medicine)
Akin Cil, M.D. Interim (Orthopaedic Surgery)
Charles Donohoe, M.D. (Neurology)
Brett Ferguson, D.D.S. (Oral and Maxillofacial Surgery)
Stephen Jarvis, M.D. Interim (Psychiatry)
Kamani Lankachandra, M.D. (Pathology)
Dev Maulik, M.D. (Obstetrics and Gynecology)
Paula Monaghan-Nichols, Ph.D. (Biomedical Sciences)
Jill Moormeier, M.D. (Internal Medicine)
Mark Nichols, Ph.D. (Biomedical and Health Informatics)
Michael O'Dell, M.D. (Community and Family Medicine)
Nelson Sabates, M.D. (Ophthalmology)
Johan Suyderhoud, M.D. (Anesthesiology)
Glenn Talboy, M.D. (Surgery)
Steve Waldman, M.D., J.D. (Medical Humanities and Bioethics)

Brandt C. Wible, M.D. Interim (Radiology)

About the School of Medicine

The University of Missouri opened a medical school in Kansas City in 1971 to meet the health care needs of Missouri and the nation. Using an alternative approach to medical education from that of the traditional four-year school, the UMKC School of Medicine accepts students directly out of high school for the combined baccalaureate/ Doctor of Medicine program (<http://med.umkc.edu/bamd/>), which allows students to graduate in six years with their medical degree.

The School's innovative curriculum provides students with early and continuous patient-care experience and fully integrates liberal arts/humanities, basic sciences and clinical medicine. The learning environment de-emphasizes competition and encourages learning through close faculty-student interaction and student partnerships.

Students begin learning about medicine and interacting with patients from the first day of class. They also learn the skills and attitudes that foster compassion, honesty and integrity. Hands-on learning and clinical experience are integrated throughout all the years of the program. The UMKC School of Medicine also offers the M.D. Program (<http://med.umkc.edu/md/>) to students who have obtained, or will soon earn, a baccalaureate degree. These students may complete their medical degree in four years following their undergraduate programs.

The School of Medicine partners with six of the leading hospitals in Kansas City to provide students and residents outstanding medical education as they rotate through the various clinical departments. These hospitals include Truman Medical Centers, Children's Mercy Kansas City, Saint Luke's Hospital, Center for Behavioral Medicine, the Kansas City VA Medical Center and Research Medical Center. The School does not operate its own hospital, however many of the doctors who practice at these hospitals also hold faculty positions with the School.

Our offerings are growing. The UMKC School of Medicine offers four master's programs: the Master of Science in Anesthesia (<http://med.umkc.edu/msa/>), Master of Medical Science Physician Assistant (<http://med.umkc.edu/pa/>), Master of Health Professions Education (<http://med.umkc.edu/mhpe/>) and the Master of Science in Bioinformatics (<http://med.umkc.edu/msb/>); two Graduate Certificates: Health Professions Education (<http://med.umkc.edu/gchpe/>) and Clinical Research (<http://med.umkc.edu/gc-clinical-research/>). The School of Medicine participates in the Interdisciplinary Ph.D. program (<http://med.umkc.edu/iphd/>) with a primary and co-discipline plan of study in biomedical and health Informatics.

All medical schools are reviewed and accredited by the Liaison Committee on Medical Education, a national body representing the Association of American Medical Colleges and the American Medical Association. This committee has endorsed the academic philosophy and plan, and the School is fully accredited.

For additional information, please click here to visit the School of Medicine website (<http://med.umkc.edu/>).

Mission, Vision & Goals

UMKC School of Medicine Strategic Plan

Mission

The mission of the University of Missouri-Kansas City School of Medicine is to improve the health and well-being of individuals and populations through innovative educational programs in medicine and biomedical science, cutting-edge biomedical research, and leadership in academic medicine. The School strives to implement this mission with the highest professional and ethical standards, in a culture of diversity and inclusiveness, and in an environment that enables each individual to develop to his or her full potential.

Vision

UMKC School of Medicine aims to be the anchoring institution for a leading academic health center.

Introduction and Background

The UMKC School of Medicine opened in 1971 as the result of over a decade of community efforts to establish a medical school in Kansas City, Missouri. Both the history and the current mission and operations of the UMKC School of Medicine are deeply rooted in the community at the local, state, national and international levels. As part of a growing academic health sciences campus in the urban core of Kansas City, Missouri, the School advances the health of the community through education of physicians and other health care professionals, through research and application of new knowledge to health conditions that affect our community, through direct service in the community, and through economic development. In the nearly four decades that the School has been in existence, all of the four mission areas—education, research, service, and economic development—have grown and matured along with the Hospital Hill campus where the School is located. The University of Missouri-Kansas City is a public, urban-serving, research and doctoral university; both it and the School of Medicine are poised to make an even greater contribution to **"Advancing the Health of Our Community"** in the decades to come.

School of Medicine Education Programs: The UMKC School of Medicine was founded on an innovative medical education system based on: early and continuous clinical experiences, humanities woven throughout the curriculum, small group learning communities centered around a physician "docent," continuous assessment of student progress, and an emphasis on application of the basic sciences in clinical medicine. The combined degree program allows the school to accept the majority of its students directly out of high school and to develop the skills, knowledge, and attitudes of these students longitudinally over six years with a goal of instilling the highest standards of medical professionalism, clinical competency, humanism, and altruism during a highly formative period of their lives. The community-based setting has freed the school of fiscal and administrative concerns

over the management of hospitals and practice plans. Time has proven the value of the innovative concepts and format of the original design of the medical school outlined in the original Academic Plan¹. The history and the first thirty-five years of education outcomes were recently published².

In addition to the baccalaureate/MD program, the School also admits three other categories of students seeking the MD degree: students who already have a baccalaureate degree and complete the last four years of the program as “MD-only” students; students who have a DDS degree and complete a combined MD/Oral Surgery residency program; and a limited number of transfer students who have completed their first two years of medical school at an accredited program. Over the past decade, all programs leading to the MD degree combined have resulted in approximately 90 graduates per year. Residency choices of students span the specialties and subspecialties, with approximately 40% initially entering the primary care fields of internal medicine, family medicine, pediatrics and medicine/pediatrics. In addition, 45% of graduates remain in the state of Missouri and the counties surrounding the two largest metropolitan areas of Kansas City and St. Louis. The school will continue its strong commitment to increasing the number of graduates of the medical school who serve the healthcare needs of Missouri.

Beginning in 2008, the school accepted its first students into graduate degree programs. The Masters of Science in Anesthesia leading to a career as anesthesiologist assistants opened in 2008, and the Masters of Science in Bioinformatics opened in Fall 2009. Since then the school has added the Master of Medical Science Physician Assistant, Master in Health Professions Education, Graduate Certificate in Health Professions Education and Graduate Certificate in Clinical Research. Most recently, the School of Medicine established a doctoral discipline in Biomedical and Health Informatics as part of the UMKC Interdisciplinary PhD program. These graduate programs are, another means to meet pressing local and regional healthcare needs.

The School of Medicine is the institutional sponsor for over 40 residency and fellowship programs accredited by the Accrediting Council for Graduate Medical Education (ACGME) conducted at affiliated hospitals. Today, there are nearly 500 residents and fellows in these programs at six affiliated hospitals. Graduates from these programs are a major source of physicians in Kansas City and the surrounding regions.

In 2008, the School of Medicine became accredited by the Accrediting Council for Continuing Medical Education (ACCME) for the first time to offer continuing medical education (CME) programs. Previously, the School relied on affiliated hospital CME departments to provide educational credits for continuing education activities held for faculty and by faculty. In looking at the future directions of required competencies and life-long learning needed for patient care and maintenance of licensure and certifications, it was decided that the School should develop these programs as part of its longitudinal medical education activities. Additionally, these programs provide infrastructure for faculty development programs in scholarship in clinical practice, education and research.

School of Medicine Research Programs: The early efforts of the school were directed toward growth and building of medical education programs on the base of strong clinical affiliations. Over the past decade, scholarly research has become a major goal in order to discover and apply new knowledge to improve human health, to develop and maintain a community of scholars in support of a robust learning environment, and to provide economic development in the region. Concurrently, there has been increasing emphasis on research within the university as a whole and the region. The School of Medicine now has 22 endowed chairs and professorships, more than any other academic division in the University of Missouri System, and the research funding has increased exponentially. The current total extramural funding in grants and contracts in the School has increased four-fold over the past decade and is now \$23 million annually. Total federal funding represents approximately half of the total. Research efforts are focused toward impact on community health conditions, especially in areas that link to areas of clinical strength. These efforts are designed to build and utilize large databases that go beyond “translational” research in general, and to have impact on the health of our community in particular. Health impact may be either at the individual level—i.e. “personalized medicine”—or at the population level. Additionally, it may be directed at either prevention or diagnosis and treatment of disease.

School of Medicine Community Engagement: The UMKC School of Medicine is an essential community partner in advancing health through education and training of physicians and other healthcare providers, through research and application of new knowledge to address health issues, through direct provision of care (including volunteer work and service learning), and through economic development and stability in the urban core. Much has changed in the nearly 40 years since the School’s founding, but the values that relate to a commitment to serve the community have not.

The community has called for an overall strategic plan from UMKC3, including in the life and health sciences. The School of Medicine is ready to deepen this partnership with the community to advance the health of our community. The following strategic plan outlines the specific goals and objectives of the School for 2010-2015. These goals and objectives are designed to align with the overall strategic plans of the University of Missouri System and the University of Missouri-Kansas City

Summary of Goals and Strategic Objectives

Educate outstanding physicians, scientists, and healthcare providers for Missouri and the United States.

Goals:

- Advance our standing as a premier accelerated, dual-degree medical education program in the United States.
- Expand our program in Graduate Health Professions in Medicine by developing new degree and/or certificate programs to meet future healthcare and health sciences needs.
- Ensure that our learners have opportunities to engage in high-quality Research.
- Provide and enhance an outstanding clinical and educational experience in a positive learning environment for residents and fellows in their chosen field of medicine.
- Provide and enhance an outstanding clinical and educational experience, opportunities for lifelong learning, career advising, and a positive learning environment for students.

Increase cutting-edge biomedical research.

Goals:

- Develop a strategic research fund to catalyze translational and health outcomes research.
- Advance existing programmatic excellence in health outcomes, informatics, patient safety, and community health.
- Join forces with our academic, clinical, and community partners to develop a UMKC Health Sciences research agenda.
- Engage with industry partners to pursue innovative entrepreneurial opportunities.

Enhance the ability of our clinical partners to deliver state-of-the-art patient care.

Goals:

- Develop a framework to establish UMKC Health Sciences Center.
- Increase the scope and mission of education and research in simulation.
- Join forces with our clinical and academic partners to develop shared simulation strategies and goals.

Improve the health of our community.

Goals:

- Recruit and retain faculty members who engage in funded, community-based research.
- Establish community-wide collaboratives to leverage resources for the advancement of community health.

Faculty

Graduate Health Professions in Medicine

Julie Banderas; Assistant Dean, Chair, professor Department of Graduate Health Professions in Medicine; Pharm.D., (University of Nebraska)

Lance Carter; Assistant Program Director; Assistant Teaching Professor; M.S.A., AA-C (Case Western Reserve)

Sara Cox; Assistant Teaching Professor; B.S. (Wichita State University) MPAS (University of Nebraska Medical Center)

Katherine Ervie; Program Director; Assistant Teaching Professor; B.A. (Butler University), MPAS (University of Nebraska Medical Center)

Melanie Guthrie; Program Director; Associate Teaching Professor; M.S.A. (Case Western University)

Dan T. Hladky; Assistant Teaching Professor; B.S. (Case Western Reserve University)

Angellar Manguvo; Associate Teaching Professor

Stephanie Painter; Assistant Teaching Professor

Janell Ridenour; Assistant Teaching Professor; B.S. (University of Dallas M.M.S (Yale Medical School)

Biomedical Sciences

Limin Mao; Research Professor; M.D. (Tongji Medical University)

Darla McCarthy; Associate Teaching Professor; Ph.D. (University of Colorado – Boulder)

Paula Monaghan-Nichols; Department Chair, Associate Dean for Research, Professor; Ph.D. (Medical Research Council, Edinburgh, Scotland)

Bart Patenaude; Associate Teaching Professor; Ph.D. (University of Louisville)

Nilofer Qureshi; Professor; Ph.D. (University of Wisconsin)

Neerupma Silswal; Associate Research Professor; Ph.D.

Chad Touchberry; Assistant Teaching Professor; Ph.D. (University of Kansas)

Michael Wacker; Assistant Dean, Vice-Chair of Biomedical Sciences, Medical Student Research and Associate Teaching Professor; Ph.D. (University of Kansas)

Kristin A. Wright; Assistant Teaching Professor; Ph.D.

Lei Zhang; Associate Research Professor; M.D. (Hebei Medical University), Ph.D. (Peking Union Medical College)

Biomedical/Health Informatics

Jenifer Allsworth; Associate Professor; Ph.D. (Brown University)

Jannette Berkley Patton; Professor; Ph.D. (University of Kansas)

An-Lin Cheng; Professor; Ph.D. (University of Georgia)

Stacy Farr; Associate Research Professor; Ph.D. (The Johns Hopkins Bloomberg School of Public Health)

Monica Gaddis; Associate Teaching Professor; Ph.D. (Indiana University)

Timothy Hickman; Associate Teaching Professor; B.A./M.D. (University of Missouri – Kansas City)

Mark Nichols; Associate Research Professor; Ph.D. (Yale University)

Stephen Siimon; Teaching Professor; Ph.D. (University of Iowa)

Kim Smolderen; Associate Professor; Ph.D. (Tilburg University, Tilburg Netherlands)

Community and Family Medicine

Michael O'Dell; Chair, Department of Community and Family Medicine and Professor; M.D., M.S.H.A. (University of Kansas, School of Medicine)

Human Therapeutics

Nicholas Norgard; Associate Teaching Professor; Ph.D.

Humanities

Steve Waldman; Associate Dean of International Studies; Chair, Medical Humanities and Bioethics; M.D. (University of Missouri – Kansas City School of Medicine)

Internal Medicine

John Spertus; Professor; Daniel Lauer, M.D. Endowed Chair in Metabolism and Vascular Disease Research; M.D. (University of California)

OB/Gyn

Dev Maulik; Senior Associate Dean For Women's Health; Chair, Department of Obstetrics and Gynecology and Professor; M.D. (University of Calcutta); Ph.D. (University of London)

Gary Sutkin; Associate Dean For Women's Health; Program Director, Department of Obstetrics and Gynecology; Professor; M.D. (Northwestern University); M.B.A. (J.L. Kellogg Graduate School of Management)

Ophthalmology

Karl E. Kador; Assistant Professor; Ph.D. (University of Nebraska - Lincoln)

Peter Koulen; Professor; Felix and Carmen Sabates Endowed Chair in Vision Research; Ph.D. (Johannes Gutenberg University)

Orthopaedics

Akin Cil; Interim Chair, Department of Orthopaedic Surgery and Professor; M.D. (Hacettepe University Faculty of Medicine); Franklin D. Dickson/ Missouri Endowed Chair in Orthopaedic Surgery

Pediatrics

Mary Anne Jackson; Dean, Professor; M.D. (University of Missouri – Kansas City School of Medicine)

Graduate

Graduate Degree Programs:

Masters of Science Degrees:

Master of Science in Anesthesia
 Master of Science in Bioinformatics (p. 1830)
 Master of Medical Science Physician Assistant (p. 1827)
 Master of Health Professions Education (p. 1826)

Graduate Certificate Degrees:

Graduate Certificate in Clinical Research
 Graduate Certificate in Health Professions Education (p. 1826)

Doctor of Philosophy:

Interdisciplinary Ph.D. primary and co-discipline: Biomedical and Health Informatics (p. 1825)

Medical

Medical Degree Programs:

Baccalaureate/M.D. Program (p. 1833)

M.D. Program (p. 1836)

For additional information about the above Medical Degree programs, please visit the website (<http://www.med.umkc.edu/prospective/>) or contact:

Anesthesia Courses

ANESTH 5505 Anatomy for Anesthesiologist Assistants I Credit: 1

This course is designed to meet the needs of students seeking a Master of Science in Anesthesia degree at UMKC. A thorough understanding of anatomy provides a basic foundation for future coursework and for the profession of Anesthesiologist Assistant. This course covers gross anatomy from a regional (or systemic in some cases) perspective bringing together all body systems present in each defined area of study.

Prerequisites: Acceptance to the MSA program.

ANESTH 5506 Anatomy for Anesthesiologist Assistants II Credit: 1

In this course, students will learn anatomy that directly impacts clinical situations. Diagnostic skills will be enhanced through an understanding of radiologic tests, identification of common chest X-rays, and a basic understanding of transesophageal echocardiography. Students will learn to recognize the basic 4 chamber TEE views and diagnose the most common lesions and abnormalities in patients undergoing cardiac surgery. An ultrasound machine will be used to identify anatomy for a variety of clinical procedures, including intravenous line placement, central line placement, arterial line placement, and peripheral nerve block placement. Students will learn the principles of how to operate and manipulate the ultrasound monitor, and will learn the relevant anatomy and anesthetic implications and management for the most common peripheral nerve blocks used today. In addition, clinically significant anatomy case studies in anesthesia will be presented and discussed.

Prerequisites: Acceptance to the MSA program.

ANESTH 5518 Professionalism for the Anesthesiologist Asst I Credits: 0.5

Introduction to legal and ethical areas of Anesthesiologist Assistant practice; professional behavior, legal obligations of anesthetists and patient, and social and community contexts of health care.

Prerequisites: Acceptance to the MSA program.

ANESTH 5528 Professionalism for the Anesthesiologist Asst II Credits: 0.5

Special topics in Anesthesiologist Assistant practice; impact of substance abuse, cognitive deficiency and mental illness in creating an impaired provider.

Prerequisites: Acceptance to the MSA program.

ANESTH 5538 Professionalism for the Anesthesiologist Asst III Credits: 0.5

Special topics in Anesthesiologist Assistant practice; principles of evidence based medicine and approaches to mastering life long learning and maintaining professional competencies.

Prerequisites: Acceptance to the MSA program.

ANESTH 5540 Patient Monitoring and Instrumentation Credits: 3

This is a three credit hour course which integrates concepts of circuits and engineering with the clinical application of anesthesia instrumentation. To the extent possible, the material covered will be directly linked to clinical scenarios. In order for the monitors to be fully understood from a clinical management perspective, relevant physiology related to the monitors and to the field of anesthesia will be taught and practiced. In addition to the monitors, students will gain an in depth understanding of all parts of the anesthesia machine, anesthesia circuits, central line and arterial line equipment, and the properties of common intravenous and inhalational anesthetics.

ANESTH 5541 Methods of Anesthesia I Credits: 2

In this course, students will be prepared to give safe anesthesia in all types of cardiac surgery, learn how to interpret arterial blood gases, and obtain an in depth understanding of ACLS principles so that they will be prepared for any resuscitation scenario in the OR. A cardiac drug card will be administered. Videos and PPTs will be administered to help students understand the concepts of ACLS, acid base management, cardiac bypass, cardiac surgery monitoring, techniques, and anesthetic management.

Prerequisites: ANESTH 5540.

ANESTH 5548 Anesthesiologist Assistant Senior Seminar Credits: 0.5

This is 0.5 credit hour course taken in the final semester of the Master of Science in Anesthesia Program and is designed to prepare the student for their future roles. This course will prepare the student for the job market and placement and enforce the life-long learning needed within medical professions. The course will contain information on student loan payback, financial literacy after graduation, and leadership opportunities for the graduate. The course will also clinically update the students in basic life saving for the healthcare provider (BLS), advanced cardiac life saving (ACLS) and Pediatric advance life saving (PALS).

ANESTH 5556 Physiology for Anesthesiologist Assistants I Credits: 3

This course is the first of two parts of a human physiology series. The course is designed to provide an understanding of basic neurophysiology, autonomic nervous system, blood, respiratory and cardiovascular physiology. Topics of special interest to anesthesiologist assistants will be highlighted.

ANESTH 5557 Physiology for Anesthesiologist Assistants II Credits: 2

This course is the 2nd of two parts of a human physiology series. The course is designed to provide an understanding of endocrine, reproductive, neonatal, gastrointestinal, and neurophysiology. Topics of special interest to anesthesiologist assistants will be highlighted as it relates to the physiology.

Prerequisites: ANESTH 5556.

ANESTH 5558 Anesthesia & Co-existing Disease I Credits: 2

This course provides an essential anesthesia link to the basic anatomy and physiology classes in the Masters of Science in Anesthesia program. The content outline intentionally corresponds with and builds upon that of the Physiology for Anesthesiologist Assistants coursework. This course focuses on primary cardiac, respiratory and endocrine coexisting diseases that affect anesthetic care. It provides for the student a strategic plan in the management of patients with these disease processes.

Prerequisites: ANESTH 5556.

ANESTH 5559 Anesthesia & Co-existing Disease II Credits: 2

This is the second course that establishes an essential anesthesia link to the basic anatomy and physiology classes in the Masters of Science in Anesthesia program. The content outline intentionally corresponds with and builds upon that of the Physiology for Anesthesiologist Assistants coursework. This course focuses on a variety of coexisting diseases states but all focuses on pediatric and obstetric co-existing disease and how they affect anesthesia management.

Prerequisites: ANESTH 5558.

ANESTH 5560 Introduction to Anesthesia Credits: 2

Introduction to basic concepts dealing with clinical anesthesia. Medical terminology, human anatomy, medical chart interpretation and drug dosage calculations.

ANESTH 5561 Orientation to Simulation and Clinical Application Credits: 5

This skills based course is an introduction to the student's clinical experience in the operating room. The goal is to rapidly engage students in anesthesia patient care. Fundamental procedures and techniques used in administering anesthesia will be emphasized. Simulated clinical models are used to allow students to first practice anesthesia care in a safe, controlled, low pressure environment. Students are prepared for quality immersion into patient care. Operating room set up and etiquette, pre-operative assessment, IV placement techniques, airway management, intraoperative care, and postoperative management are emphasized. Course includes hands on introduction to the operating room and anesthetic management and students obtain 80-100 hours of clinical contact time.

ANESTH 5563 Anesthesia Clinical Experience I Credits: 4

During this course students gain clinical and professional experience in the operating room. In this course students are expected to perform program competencies with the level of assistance developed in the programs goals for skills development. Students will be one on one with a Certified Anesthesiologist Assistant or Anesthesiologist clinical supervisor while obtaining these goals. Students will complete a specific IV, pre-surgical testing and post anesthesia care unit rotation during their clinical experience courses.

Prerequisites: ANESTH 5561.

ANESTH 5564 Anesthesia Clinical Correlation II Credit: 1

This one credit course is designed to help students understand how to effectively research and apply current anesthesia journal articles, and to prepare for the NCCAA certification examination. The students will spend the entire semester studying 6 (Principles of anesthesia/ Instrumentation and monitoring, anesthesia delivery systems, physics / renal, genital urologic / respiratory system / clinical subspecialties) of the 16 topics that are included on the NCCAA certification examination. Homework will include submission of test questions based on their presentations and the 6 assigned NCCAA testing topics. The students will also receive an assignment to find and summarize a journal article from one of the 6 assigned topics. The students will cap off the semester with a clinical final examination, which includes submitted questions from assigned topics.

Prerequisites: ANESTH 5562.

ANESTH 5565 Anesthesia Clinical Experience II Credits: 8

During this course students gain clinical and professional experience in the operating room. In this course students are expected to perform program competencies with the level of assistance developed in the programs goals for skills development. Students will be one on one with a Certified Anesthesiologist Assistant or Anesthesiologist clinical supervisor while obtaining these goals. Students will complete a specific IV, pre-surgical testing and post anesthesia care unit rotation during their clinical experience courses.

ANESTH 5567 Anesthesia Clinical Experience III Credits: 16

Clinical clerkship component of program clinical phase. Students are in the operating room (OR) five days per week and through the combined clinical experience clerkships will receive extended exposure to all clinical subspecialties. Students complete 4 week or 8 week rotations at several hospitals to gain experience with general surgery, obstetrics, pediatrics, trauma surgery, neurosurgery, cardiovascular surgery, orthopedic surgery, intensive care unit and others. Students are expected to perform program competencies with the level of assistance developed in the programs goals for skills development. Students will be one on one with a Certified Anesthesiologist Assistant or Anesthesiologist clinical supervisor while obtaining these goals.

Prerequisites: ANESTH 5565, ACLS and PALS certification.

ANESTH 5568 Anesthesia Clinical Correlation III Credit: 1

This one credit course is designed to help students understand how to effectively research, apply, and prepare for the NCCAA certification examination. The students will spend the entire semester studying 4 (cardiovascular/ Hematology coagulation / Metabolism endocrine / Neurosciences neuromuscular) of the 16 topics that are included on the NCCAA certification examination. Homework will include submission of test questions based on the 4 assigned NCCAA testing topics. The students will cap off the semester with a clinical final examination, which includes submitted questions from the assigned topics. This course also includes a one week in person session where will identify risk management issues for anesthesia providers, learn key strategies when applying for a job and demonstrate key points of patient assessment in the ICU. Recertification for Basic Life Support (BLS) occurs during this course.

Prerequisites: ANESTH 5564.

ANESTH 5569 Anesthesia Clinical Experience IV Credits: 12

Clinical clerkship component of program clinical phase. Students are in the operating room (OR) five days per week and through the combined clinical experience clerkships will receive extended exposure to all clinical subspecialties. Students complete 4 week or 8 week rotations at several hospitals to gain experience with general surgery, obstetrics, pediatrics, trauma surgery, neurosurgery, cardiovascular surgery, orthopedic surgery, intensive care unit and others. Students are expected to perform program competencies with the level of assistance developed in the programs goals for skills development. Students will be one on one with a Certified Anesthesiologist Assistant or Anesthesiologist clinical supervisor while obtaining these goals.

Prerequisites: ANESTH 5567.

ANESTH 5570 Anesthesia Clinical Correlation IV Credit: 1

This one credit course is designed to help students understand how to effectively research and apply current anesthesia journal articles, and to prepare for the NCCAA certification examination. The students will spend the entire semester studying 6 (Peds the Neonatal Period / Pharmacology / Regional Anesthesia Pain Management/ GI Hepatic/ OB Perinatal Management) of the 16 topics that are included on the NCCAA certification examination. Homework will include submission of test questions based on their presentations and the 6 assigned NCCAA testing topics. The students will also receive an assignment to find and summarize a journal article from one of the 6 assigned topics. The students will cap off the semester with a clinical final examination, which includes submitted questions from assigned topics.

Prerequisites: ANESTH 5568.

ANESTH 5571 Anesthesia Clinical Experience V Credits: 16

Clinical clerkship component of program clinical phase. Students are in the operating room (OR) five days per week and through the combined clinical experience clerkships will receive extended exposure to all clinical subspecialties. Students complete 4 week or 8 week rotations at several hospitals to gain experience with general surgery, obstetrics, pediatrics, trauma surgery, neurosurgery, cardiovascular surgery, orthopedic surgery, intensive care unit and others. Students are expected to perform program competencies with the level of assistance developed in the programs goals for skills development. Students will be one on one with a Certified Anesthesiologist Assistant or Anesthesiologist clinical supervisor while obtaining these goals.

Prerequisites: ANESTH 5569.

ANESTH 5573 Anesthesia Clinical Experience VI Credits: 16

Clinical clerkship component of program clinical phase. Students are in the operating room (OR) five days per week and through the combined clinical experience clerkships will receive extended exposure to all clinical subspecialties. Students complete 4 week or 8 week rotations at several hospitals to gain experience with general surgery, obstetrics, pediatrics, trauma surgery, neurosurgery, cardiovascular surgery, orthopedic surgery, intensive care unit and others. Students are expected to perform program competencies with the level of assistance developed in the programs goals for skills development. Students will be one on one with a Certified Anesthesiologist Assistant or Anesthesiologist clinical supervisor while obtaining these goals.

Prerequisites: ANESTH 5571.

ANESTH 5575 Pharmacology for Anesthesiologist Assistants I Credits: 2

Basic concepts in pharmacology: principles of drug action, receptor theory, pharmacokinetics, pharmacodynamics and drug dose calculations. The course will emphasize the primary medications used to provide anesthesia and to support patients during the perioperative period.

ANESTH 5576 Pharmacology for Anesthesiologist Assistants II Credit: 1

This is a one credit hour course designed for the M.S. in Anesthesia Program. The course prepares students to apply knowledge of pharmacotherapy to anesthesia care by taking into account type of surgery and patient coexisting diseases.

ANESTH 5577 Methods of Anesthesia II Credits: 3

In this course, students will be prepared to manage anesthetics for more complex situations. Anesthetic management for certain patient conditions will include permanent implantable pacemakers, fluid electrolyte abnormalities, and congenital heart disease. Clinical management for individual patient populations will include obstetrics and pediatric advanced life support (PALS). In addition, clinically relevant information regarding advanced equipment and techniques will include 12 lead ECG interpretation, ultrasound guided peripheral nerve blocks, neuraxial anesthesia, and physics for anesthesiologist assistants.

ANESTH 5578 Pharmacology for Anesthesiologist Assistants III Credits: 2

This is a two credit hour course designed for the M.S. in Anesthesia Program. The course prepares students to apply knowledge of pharmacotherapy to anesthesia care by taking into account type of surgery and patient coexisting diseases.

Prerequisites: ANESTH 5575, ANESTH 5576.

ANESTH 5585 Physiological Model-based Simulation I Credits: 2

This is a two credit hour course, which utilizes physiological model-based simulation and procedure simulation to integrate anesthesia-associated basic science knowledge into a laboratory setting. The focus for this semester is designed to help student become proficient in central lines, pulmonary artery monitoring, epidural and spinal placement, and managing more complex anesthetic cases involving trouble shooting and crisis management via simulation. Advanced Cardiac Life Saving is obtained during this course.

ANESTH 5586 Physiological Model-based Simulation II Credits: 2

This is a two credit hour course, which builds upon the technical skills learned in ANES 5585. Students will be asked to manage complex anesthetic cases involving multiple co- existing diseases and methods of anesthesia. Pediatric Advanced Lifesaving Saving (PALS) is a certification required to be obtained during this course.

Prerequisites: ANESTH 5585.

ANESTH 5590 Special Topic Credits: 0.5-3

An opportunity to explore new topics or existing topics in greater detail and are not included in the usual course offerings.

Basic Medical Science Courses

BMS 5590 Special Topics Credits: 1-3

An opportunity to explore new topics or existing topics in modified or greater detail; topics which are not included in the usual course offerings.

BMS 9265 Human Biochemistry 1 - Medical Credits: 5

Presents basic principles of human biochemistry. Addresses structure, function, biosynthesis, degradation and utilization of the major constituents of living systems. Employs an integrative approach to the basic science and clinical medicine aspects of normal and defective metabolism.

BMS 9296 Human Structure Function I Credits: 6

Part 1 of a 4 part series (January-February). Integrated course in anatomy, histology, embryology, physiology and biochemistry. This unit covers introductory principles and the musculoskeletal system.

BMS 9297 Human Structure Function II Credits: 5

Part 2 of a 4 part series (February-April). Integrated course in anatomy, histology, embryology, physiology and biochemistry. This unit covers cardiopulmonary and gastrointestinal systems.

BMS 9298 Human Structure Function III Credits: 5

Part 3 of a 4 part series (April-May). Integrated course in anatomy, histology, embryology, physiology and biochemistry. This unit covers urinary and reproductive systems.

BMS 9300 Human Gross Anatomy I Credits: 5

Regional study of the anatomy of the chest, abdomen and pelvis. A systematic and regional study of the anatomy of the maxillofacial and anterior neck structures with emphasis on the biomedical applications of the anatomy studies.

BMS 9301 Human Gross Anatomy II Credits: 5

A continuation of BMS 9300.

BMS 93065 Anatomy of the Head & Neck Credits: 2

A regional approach to the study of the head and neck. Content will include a brief discussion of human anatomy and didactic information on the structures of the head and neck as they relate to the practice of dental hygiene.

BMS 9308 Histology Credits: 2.5

A motivative microanatomic study of the normal morphology of cells, tissues, organs and organ systems to stimulate the learning of terminology and basic cellular structure of the human body.

BMS 9310 Medical Neurosciences Credits: 9

Lecture-based course covering major neurological disorders and disease states. Specific neurologic diseases will be correlated to the didactic sessions by clinicians. Laboratory component is oriented around brain dissection sessions. Laboratory experience will demonstrate gross lesions and integrate the lesions with the clinical symptoms. A variety of supplemental audiovisual material also supports the class.

Prerequisites: BMS 9298.

Co-requisites: BMS 9399.

BMS 9311 Medical Microbiology Credits: 5

Covers basic scientific principles of virology, bacterial physiology and genetics. Presents information relevant to the pathogenesis of human infections caused by viruses, bacteria, fungi, protozoa and helminthes. Provides a concise presentation of basic immunological principles and their clinical relevance. Provides a concise review of antimicrobial therapeutic regimens including mechanism of action and clinical settings in which specific agents might be used. Utilizes case presentations to illustrate the manner in which reasonable differential diagnoses are developed and a rational approach toward empiric antimicrobial usage.

BMS 9399 Human Structure Function IV Credits: 6

Part 4 of a 4 part series (June-July). Integrated course in anatomy, histology, embryology, physiology and biochemistry. This unit covers the head and neck system. Includes a comprehensive examination for the Human Structure Function Series I-IV.

BMS 9701 Clinical Anatomy of Head and Neck Credits: 2-4

A detailed dissection of the maxillofacial and anterior neck regions, with the emphasis being placed on the clinical application of the surgical procedures used in these areas. This course may not be used to satisfy Cell Biology and Biophysics or Molecular Biology and Biochemistry discipline-specific requirements for the Interdisciplinary Ph.D. program.

Medical Bioinformatics Courses

MEDB 5501 Applied Biostatistics I Credits: 3

Introduction to statistical concepts and analytic methods as applied to health science. Course includes lectures and hands on computer laboratory.

Prerequisites: graduate or professional students and an advanced math course (i.e. Calculus, statistics).

MEDB 5502 Applied Biostatistics II Credits: 3

The second in the Applied Biostatistics sequence and is intended for graduate, doctoral, and professional students in the biological, clinical and medical fields, and medical education. Statistical concepts, analysis methods, and research designs commonly used in these fields are included: diagnostic testing, hypothesis testing, power analysis, analysis of variance, analysis of covariance, multivariate analysis of variance, propensity scoring, simple and multiple regression, logistic regression, and survival analysis. Familiarity with basic statistics and the statistical techniques presented in Applied Biostatistics I is required. Statistical analyses involved in this course will be performed primarily using the SPSS statistical analysis package. The course will also cover the interpretation, presentation and the write up of analytical results and graphs.

Prerequisites: MEDB 5501.

MEDB 5503 Mixed-Effects Models Credits: 3

This course will cover the computational basis of mixed-effects models and how to apply these models to analyze data. Students will learn how to graph, investigate, and model data that are not independent and identically distributed, and how to evaluate model fit.

Prerequisites: MEDB 5507, MEDB 5501, MEDB 5502.

MEDB 5505 Introduction to R Credit: 1

Provides a working familiarity with R. No advanced programming or statistical analytic skills, other than the ability to create and modify text files are needed. Basic methods for data import, data management, simple graphics, and basic statistical analysis are introduced. Provides student with a firm foundation to address these areas in advanced statistics classes or in the student's research efforts, including thesis/dissertation research. A basic understanding of statistical terminology and a working familiarity with computer-based data files (e.g., Excel) is necessary. A basic understanding of the concepts of computer coding is recommended.

MEDB 5506 Introduction to SPSS Credit: 1

Session provides a working familiarity with SPSS. Students are not expected to have advanced programming or statistical analysis skills, other than the ability to create and modify text files. Basic methods for data import, data management, simple graphics, and basic statistical analysis are introduced. This class will not cover advanced statistical methods, but will provide the student with a firm foundation to address these areas in advanced statistics classes or in the student's research efforts, including thesis/dissertation research. A basic understanding of statistical terminology and a working familiarity with computer-based data files (e.g., Excel) is necessary.

MEDB 5507 Introduction to SAS Credit: 1

Course provides a working familiarity with SAS. Students are not expected to have advanced programming or statistical analysis skills, other than the ability to create and modify text files. Basic methods for data import, data management, simple graphics, and basic statistical analysis are introduced. This class will not cover advanced statistical methods, but will provide the student with a firm foundation to address these areas in advanced statistics classes or in the student's research efforts, including thesis/dissertation research. A basic understanding of statistical terminology and a working familiarity with computer-based data files (e.g., Excel) is necessary.

MEDB 5508 Introduction to SQL Credits: 2

This course is an introduction to SQL programming. The course is designed to teach students basic skills that will prepare them to use SQL for data analysis.

MEDB 5510 Clinical Research Methodology Credits: 3

This course trains the student to contribute to research design, planning, and implementation, and to manage and interpret health-related data. This course will provide a broad overview of clinical research in terms of definition, methodology, conduct and applications. The course will explore basic elements of clinical research including the hierarchy of clinical research design and the conduct of clinical research. Application of clinical research knowledge to specific health-related issues will also be explored. Course topics include: conceiving the research question; study designs; questionnaire construction; research methodology; research ethics; human subjects requirements; the role of statistical analysis in clinical research; research proposal preparation; and research based on analysis of secondary data. Both classroom and online asynchronous sections offered.

MEDB 5511 Principles and Applications of Epidemiology Credits: 3

This course will provide an introductory overview of the principles of epidemiology and illustrate applications in specialized topic areas. Course lectures will introduce measures of effect used to study disease in human populations, epidemiological study designs, concepts of causal inference, and threats to study validity. Specialized lectures will demonstrate the application of these concepts in select health and disease conditions.

MEDB 5512 Clinical Trials Credits: 3

Clinical Trials explores the knowledge and skills required to conduct clinical trials, and implications of clinical trials on practice in medicine and allied health.

MEDB 5513 Overview of Health Services Research Credits: 3

Provides an overview of the U.S. health care and public health systems including issues about cost, access, and quality of health care. This course focuses on the role of research and information in the process of redesigning of health care delivery in the U.S. for the purpose of improving the value of health services.

Prerequisites: MEDB 5501, MEDB 5510 or MEDB 5511.

MEDB 5514 Human Genome Epidemiology Credits: 3

Designed for biological researchers and clinicians interested in studying common human diseases using state of the art genomics/genetics epidemiological approaches. Comprehensive introduction to concepts and methodologies of quantitative/statistical genetics, emerging technologies and analytical methods for genomic science, basic study design, utilization of software packages for analyses of genomic data, successful examples of using human genome epidemiology information to improve health, and ethical, legal and social issues in the design and conduct human genome epidemiology research.

MEDB 5520 Introduction to Medical Informatics Credits: 3

This course provides an overview of Biomedical and Health Informatics. It describes the use of data, information and knowledge in improving healthcare and biomedical research. This includes the use of technology and computers to store, retrieve, and process data. Topics include clinical decision making, standards and clinical terminology, natural language processing, imaging, electronic health records, patient monitoring, consumer health informatics, public health informatics, clinical decision support, bioinformatics, translational bioinformatics and clinical research informatics.

MEDB 5521 Clinical Bioinformatics Credits: 3

Clinical bioinformatics will provide the foundation required for effective communication between computational, biological and clinical experts. This class uses a series of exercises to enable participants to independently perform gene and protein-based bioinformatics queries and analyses. Throughout the course, core biological principles are explained, as are the foundational technology and computational topics. Students will become proficient with public bioinformatics resources. This course will prepare students to apply the techniques to their research or participation in interdisciplinary clinical terms.

MEDB 5525 Social Determinants of Health Credits: 3

This course will describe how social, economic and political factors affect health. It will examine strategies to address social determinants of health to reduce health inequities. Students will explore how specific social determinants like socioeconomic status, race ethnicity, and lifestyle influence health, use a "life course" approach to look at different stages of life and the effect of social determinants on specific populations.

MEDB 5530 Independent Study I Credits: 1-3

Focused readings and/or special research project in an area selected by the graduate student in consultation with the advisor.

MEDB 5531 Independent Study II Credits: 1-3

Focused readings and/or special research projects in an area selected by the graduate student in consultation with the advisor.

MEDB 5535 Quantitative Aspects of Epidemiologic Research Credits: 3

This course offers students advanced training in the analysis of epidemiological data. Topics include application of common measures of frequency and association, confounding, effect modification, bias, misclassification, and sensitivity analysis in epidemiologic and clinical data sources.

Prerequisites: MEDB 5501, MEDB 5502 and one of the following: MEDB 5510 or MEDB 5511

MEDB 5540 Multidisciplinary Graduate Seminar Credit: 1

This course will be a combination of discussion, presentations, and didactic presentations that will allow students and faculty to exchange information and explore current research across the disciplines that make up the bioinformatics degree program. The course is designed to help student develop critical skills for evaluating published research, designing research projects, and communicating research findings.

MEDB 5550 Health Outcomes Seminar Credit: 1

The course content is guided by a series of seminars presented by research researchers who are actively engaged in health outcomes studies. It explores multiple topics that are unique relevant to clinical investigators. Faculty and peer discussion forums highlight key concepts and applications.

MEDB 5560 Medical Decision Making Credits: 3

This course will introduce the concept of medical decision making under uncertainty through an examination of disease probabilities and how they are altered by the characteristics of the diagnostic test being studies or used clinically. Decision trees will be introduced as a mechanism for communicating complex medical decisions and introductory level decision analysis will be presented. The measurement of patient values for alternative outcomes will be introduced as they pertain to direct payoff values as well as modifiers to cost payoffs.

MEDB 5561 Responsible Conduct of Research Credits: 3

An interdisciplinary course which covers principles and day-to-day practicalities of research ethics, information about regulatory requirements for conducting research including safety issues and the use of humans, animals and radioactive biohazardous materials; discuss current issues in the ethical aspects of research, such as scientists' obligations with respect to public policy and advocacy.

MEDB 5573 Biostatistical Consulting Practicum Credits: 2-4

This course is designed to provide students with an opportunity for statistical consulting training. Students will work on real consulting projects that were received through the Research and Statistical Consult Service. Projects may involve sample size calculation, study design, data analysis, generating statistical reports and manuscripts. Student will be able to apply their statistical knowledge and communication skills while learning how to work with other researchers.

Prerequisites: MEDB 5501, MEDB 5502, MEDB 5507 and MEDB 5503.

MEDB 5589 Special Topics Credits: 1-3

An opportunity to explore in depth topics not included in usual course offerings. One or more topics will be announced in advance of registration.

MEDB 5591 Internship I Credits: 1-3

Opportunity to apply knowledge and skills in clinical, computational, or genomics research and gain insight into potential career options. Students develop appreciation for teamwork and commitment in professional environments.

Prerequisites: MEDB 5501, MEDB 5502, MEDB 5510, MEDB 5513.

MEDB 5592 Internship II Credits: 1-3

Opportunity to apply knowledge and skills in clinical, computational, or genomics research and gain insight into potential career options. Students develop appreciation for teamwork and commitment in professional environments. Internship II is applicable to students who have previously completed 3 hours of internship.

Prerequisites: MEDB 5501, MEDB 5502, MEDB 5510, MEDB 5513, MEDB 5591.

MEDB 5595 Capstone Experience Credits: 3

This course is designed for the non-thesis student to demonstrate that they have mastered key learning objectives expected of the graduating master's student in the Clinical Research emphasis area. After completion of the core courses in the Masters of Bioinformatics curriculum, students will apply their learning to developing, implementing and presenting results from a project that demonstrates integration of the knowledge, abilities and values emphasized in the degree program.

MEDB 5599 Research and Thesis Credits: 1-6

Research for thesis.

MEDB 5696 Pre-Dissertation Research Credits: 1-6

This course is individually directed research leading to the preparation of a doctoral dissertation.

Prerequisites: Permission of the instructor.

Co-requisites: Completion of comprehensive exam.

MEDB 5699 Research and Dissertation Credits: 1-12

Research and dissertation preparation for IPhD degree students participating in Biomedical and Health Informatics primary and co-discipline.

Prerequisites: instructor approval

MEDB 5899 Required Graduate Enrollment Credit: 1

Medicine Courses

MEDICINE 9110 Fundamentals of Medical Practice I Credits: 5

Introduces students to professional values, attitudes and skills required to practice medicine competently. Develops student competence in basic communication, relationship-building and patient centered interviewing skills. Provides self-awareness and personal growth strategies that facilitate the acquisition of professional behavior affecting honesty and integrity, compassion and altruism, as well as the management of stress. Explores non-biological factors influencing health and the appreciation of different value systems and life styles. Promotes ethical considerations relating to professional behavior and student conduct as a forerunner to professional behavior. Emphasizes the team approach in solving medical problems through direct small group activities as part of weekly onsite docent experiences. Integrates patient interviews and examinations with sciences fundamental to clinical medicine.

MEDICINE 9115 Medical Terminology Credit: 1

1 credit hour/twice weekly each semester. Methodical introduction to the language of medicine and its usage in modern clinical documentation.

Introduces word elements in a logical, graduated sequence correlated with laboratory practice. Encourages skills in etymological analysis based on the word elements presented to facilitate interpretation of composite medical terms.

MEDICINE 9119 Learning Basic Medical Sciences Credit: 1

1 credit hour/1 hour per week. Provides students with an understanding of their own learning processes and those study strategies that promote maximum learning efficiency. Active participation in course increases achievement in both science and non-science courses, smoothes transition to college-level work, and further develops reasoning and thinking skills that apply to medical school

MEDICINE 9120 Fundamentals of Medical Practice II Credits: 5

Introduces students to professional values, attitudes and skills required to practice medicine competently. Develops student competence in basic communication, relationship-building and patient centered interviewing skills. Provides self-awareness and personal growth strategies that facilitate the acquisition of professional behavior affecting honesty and integrity, compassion and altruism, as well as the management of stress. Explores non-biological factors influencing health and the appreciation of different value systems and life styles. Promotes ethical considerations relating to professional behavior and student conduct as a forerunner to professional behavior. Emphasizes the team approach in solving medical problems through direct small group activities as part of weekly onsite docent experiences. Integrates patient interviews and examinations with sciences fundamental to clinical medicine.

MEDICINE 9210 Fundamentals Of Medical Practice III Credits: 5

5 credit hours, 3 hours per week onsite, 2 hours lecture. Reinforces important concepts in diversity and professionalism. Continues the team approach in solving medical problems through direct small group activities as part of weekly onsite docent experience.

MEDICINE 9220 Fundamentals Of Medical Practice IV Credits: 5

5 credit hours, 3 hours per week onsite, 2 hours lecture. Reinforces important concepts in diversity and professionalism. Continues the team approach in solving medical problems through direct small group activities as part of weekly onsite docent experiences. Integrates patient interviews and examinations with sciences fundamental to clinical medicine, including biochemistry, anatomy, physiology, biochemistry and social sciences. Exposes students to a series of interviews with seasoned professionals who address issues of professionalism and career development.

MEDICINE 9221 Hospital Team Experience Credit: 1

1 credit hour/2-week assignment in hospital. Teaches students to make good observations, interact appropriately with patients, family, and hospital staff, assist with non-physician duties, and perform technical skills appropriate to assigned departments. Facilitates understanding of allied health care personnel roles in patient care, communication among health care professionals and its influence on the delivery of health care and patient outcomes, and the hospital process and structure of authority within the hospital.

MEDICINE 9308 Clinical Practice of Medicine I Credits: 3

Basic communication/clinical examination skills will be taught in the classroom with skills workshops. Students will learn to enhance their communication skills with patients and their families aligned with a systems-based approach to the physical examination. Students will also begin to practice complaint-based histories and a review of systems to prepare them for their Year 3 Continuing Care Clinic Clerkship and clinical decision-making. Students will practice communication and interpersonal skills in small groups and also have the opportunity to practice examination skills in workshops, with standardized patients, and linked to their experiences in the Continuing Care Clinic clerkship.

Prerequisites: Successful completion of HSF III, and enrollment in HSF IV.

MEDICINE 9309 Clinical Practice of Medicine II Credits: 5

Advanced communication/physical examination skills will be taught in the classroom with communication skills workshops. Students will learn/practice skills to communicate/examine patients aligned with a systems-based pathophysiology approach. Students will learn/practice a complaint-based HP exam by system aligned to their objectives in the Pathology II: Pathophysiology course. Students will learn/develop skills in clinical diagnosis and decision-making by system that includes instruction/practice on more advanced physical examination skills. Students will practice communication and interpersonal skills in small groups and also have the opportunity to practice examination skills in workshops, with standardized patients, and linked to their experiences in the Continuing Care Clinic.

Prerequisites: BMS 9298.

Co-requisites: BMS 9399.

MEDICINE 9310 History of Medicine Credit: 1

In this course students will learn the ways disease has altered history and that conceptions of disease undergo constant change. Topics covered include diseases and their relationships to other medical sciences, as well as the historical and scientific developments which led to our present understanding of diseases and medicine.

MEDICINE 9312 Pathology I: General Pathology, Genetics, and Immunology Credits: 10

Students will learn and be able to apply basic science education in the clinical practice of medicine. This application includes the areas of gross and microscopic anatomy, biochemistry, genetics, pathophysiology, and immunology. Students will develop a basic understanding of laboratory tests. They will develop competency in clinical diagnosis based on pathologic findings related to anatomic pathology, laboratory medicine and pathophysiology. Course materials will also cover prevention of disease and disability, global health issues, forensic medicine and pathology, age and gender-related issues in pathology and medicine, and appropriate utilization of Pathology and Laboratory Medicine Services.

MEDICINE 9313 Pathology II: Systems-Based Pathology and Pathophysiology Credits: 11

Students will learn and apply basic science education in the clinical practice of medicine through systems-based teaching about disease. This application includes the areas of biochemistry, genetics, pathophysiology, and medical microbiology. Students will expand their understanding of basic laboratory tests with a focus on interpretation and gain familiarity with more complex or specialized laboratory tests, enhancing their abilities in test selection and interpretation. They will also begin to approach a multi-system health problem in terms of its pathogenesis, the mechanisms of systemic interactions, and consequent/subsequent potential complications. Content areas emphasized include cardiovascular, lymphatic, hematologic, gastrointestinal, renal, hepatic, and genitourinary systems.

MEDICINE 9383 Continuing Care Clinic Credits: 5

Provides ambulatory and continuous care experience in general medicine clinics. The docent teams are assigned to a clinic in which students see and follow a panel of patients on a continuous basis for up to four years, where necessary, under the supervision of docents. Provides continuity of care from inpatient hospitalization to outpatient care, allowing longitudinal experience for the student and personalized care for the patients. Allows students to observe the natural progression of disease and experience the rewards and challenges of an ongoing doctor-patient relationship.

MEDICINE 9385 Introduction to Pharmacology Credits: 2

Consists of self-paced, independent learning, computer-based instruction. Introductory principles of pharmacology are covered that provide students with basic knowledge and skills necessary for upcoming didactic and clinical curriculum. Students become familiar with drug information resources, pharmaceutical calculations, and prescription writing skills, and learn basic mechanisms of drug action, preventive therapeutics and pharmacokinetic principles.

MEDICINE 9387 Extended Clinic I Credits: 5**MEDICINE 9390 Clinical Correlations Credits: 5**

5 credit hours. Case-based discussions provided by clinicians that serve to reinforce basic science concepts provided during BMS 9296, BMS 9297, and BMS 9298.

MEDICINE 9401 Internal Medicine/Docent Instruction Yr 4 Credits: 10

Students spend this eight-week rotation on the medical wards at Truman Medical Center, each working as a integral member of a docent team that includes the docent, residents and attending health care staff. Year 3 and 5, and Year 4 and 6 students are paired together in a junior-senior partnership. Rounds, conference and consultations.

MEDICINE 9401BR Internal Medicine/Docent Instruction Yr 4 Credits: 5

Students spend this eight-week rotation on the medical wards at Truman Medical Center, each working as a integral member of a docent team that includes the docent, residents and attending health care staff. Year 3 and 5, and Year 4 and 6 students are paired together in a junior-senior partnership. Rounds, conference and consultations. This section is a single four-week block of the rotation.

MEDICINE 9408 Pharmacology Credits: 10

Introduces the study of the interaction of drugs with biological systems. Provides the medical student with relevant basic pharmacology of the model drugs under clinical investigation and in use today. Includes extensive small group activities.

MEDICINE 9471 Family Medicine Credits: 5

Exposes students to the unique specialty that focuses on the family. Students experience the act of medicine as well as science, working with patients in the context of their family and community. Includes care of the child, the adolescent, pregnant women, young and middle aged adults, and the elderly. Addresses ambulatory medicine, prevention and health maintenance.

MEDICINE 9472 Behavioral Science in Medicine Credits: 5

Teaches the basic taxonomy, assessment methods and treatment interventions of chemical dependence and major psychiatric disorders. Serves as preparation for the psychiatry rotation. Examines relevant ethical issues commonly faced in current medical practice. Utilizes case studies and a problem-centered approach in addition to clinical experience including home health care visits, supervised interviewing, and time on an inpatient chemical dependency unit. Challenges the student to achieve an integrated theoretical understanding of various approaches in behavioral sciences as a background for meeting patients needs. Teaches communication skills including education of older patients.

MEDICINE 9482 Patient, Physician, Society I Credits: 2

Introduces students to a 7-week unit emphasizing medical decision making. Introduces students to a 6-week unit which focuses on public health. Activities include lecture, problem sets, small group projects.

MEDICINE 9483 Continuing Care Clinic Credits: 5

Provides ambulatory and continuous care experience in general medicine clinics. The docent teams are assigned to a clinic in which students see and follow a panel of patients on a continuous basis for up to four years, where necessary, under the supervision of docents. Provides continuity of care from inpatient hospitalization to outpatient care, allowing longitudinal experience for the student and personalized care for the patients. Allows students to observe the natural progression of disease and experience the rewards and challenges of an ongoing doctor-patient relationship.

MEDICINE 9483RC Year Four Repeat Clinic Credits: 5

Prerequisites: MEDICINE 9383.

MEDICINE 9484 Patient, Physician, Society II Credits: 2

Introduces students to a unit emphasizing medical ethics and palliative care. Activities include lecture, small group sessions, and assigned readings.

MEDICINE 9485 Ambulatory Care Pharmacology Credits: 2

Consists of a self-paced, independent learning, computer-based instruction. Focuses on integration of patient-related data with basic science data. Students obtain skills in assessing patient risk or disease staging and selecting appropriate pharmacotherapy based on such information. The selected topics focus on outpatient pharmacotherapy of common disease states for which there are established treatment guidelines, such as hypertension, heart failure, diabetes mellitus, asthma, pain, and hyperlipidemia.

MEDICINE 9487 Extended Clinic II Credits: 5**MEDICINE 9501 Internal Medicine/Docent Instruction Yr 5 Credits: 10**

Students spend this eight-week rotation on the medical wards at Truman Medical Center, each working as an integral member of a docent team that includes the docent, residents and attending health care staff. Year 3 and 5, Year 4 and 6 students are paired together in the junior-senior partnership. Rounds, conference and consultations.

MEDICINE 9501BR Internal Medicine/Docent Instruction Yr 5 Credits: 5

Students spend this eight-week rotation on the medical wards at Truman Medical Center, each working as a integral member of a docent team that includes the docent, residents and attending health care staff. Year 3 and 5, and Year 4 and 6 students are paired together in a junior-senior partnership. Rounds, conference and consultations. This section is a single four-week block of the rotation.

MEDICINE 9503 Pediatrics Rotation Credits: 10

This eight-week rotation is designed to help students master t skills necessary in assessing normal and abnormal development and behavioral variation in the newborn, infant and child in the outpatient clinical setting. History-taking and physical examination of infants, children and adolescents are emphasized.

MEDICINE 9503BR Peds Rotation Credits: 5**MEDICINE 9505 General Surgery Rotation Credits: 10**

Introduces students to the field of general surgery. Emphasizes the indications, contraindications, types of operative management, and the mortality and morbidity of various operations. Involves the student in several different kinds of learning experiences, such as preoperative and postoperative care, work in the operating room, outpatient clinic visits, night call, student conferences and resident conferences. Covers skills in surgical scrub, putting on gown and gloves, knot tying, vena puncture, proctoscopy, and suturing of the skin. Students assist in performing skills such as insertion of CVP catheters, insertion of a chest tube, thoracentesis, paracentesis and Swan-Ganz catheters.

MEDICINE 9506 Obstetrics-Gynecology Rotation Credits: 10

Provides the student with an opportunity to gain basic competence in obstetrics and gynecology, including proficiency in the history and physical examination related to the obstetric and gynecologic patient. Emphasizes outpatient gynecology, family planning and techniques for early detection of gynecologic cancer. Provides basic information in reproductive physiology and endocrinology, infertility, gynecologic oncology, and the psychologic aspect of diseases of women. Covers concepts of prenatal care and fundamentals of normal labor and delivery, and pregnancy complications.

MEDICINE 9506BR Obset-Gynecol Rotation Credits: 5**MEDICINE 9514 Medicine, War & Bioethics Credits: 5**

This course considers the continually evolving relationship between medicine, war, and the arts, from the slaughter of the American Civil War (1861-65) to today's conflicts in Iraq. Our focus is on the extraordinary difficult medical and ethical decisions faced by physicians in times of war, and the ways in which those experiences are reflected in the arts. Topics include the effects of disease on armies, biological warfare, the development of ambulance and hospital services in the Civil War, battlefield medicine, the diagnosis and treatment of shellshock victims in WWI, chemical warfare, the pioneering of plastic surgery, triage techniques in WWII, nuclear warfare, and the personal experiences of physicians in the Vietnam and Iraq wars.

MEDICINE 9515 Medicine and Music Credits: 5

This course will explore ways in which music and medicine interact, including the following topics: therapeutic applications of music (music therapy), current research on how the brain processes music, the treatment of medical themes (including illness and disease, patients, physicians, and human experimentation) in musical works, and how certain composers' medical conditions affected their creative output.

MEDICINE 9515A1 Independent Readings Month Credits: 5

Independent Readings Month

MEDICINE 9516 Medicine and Film Credits: 5

Movies are narratives that record, instruct, motivate, entertain and transform. This course investigates the ways in which physicians, patients, and medical students have been portrayed in Hollywood films over the course of the twentieth and the early twenty-first centuries. Compassion, idealism, and heroism were common traits in early doctor movies but there was also a recurrent theme of the greedy callous doctor who valued research over patient welfare, and profits over ethics. We discuss how films reflected, changed, and molded perceptions of physicians and patients in the past, and examine what contemporary portrayals of the medical profession can tell us about the expectations and fears of patients today.

MEDICINE 9517 Medicine and Literature Credits: 5

The aim of this course is to engage students in the process of self-reflection about their roles as health care professionals through the lens of literature. Reading about the ways in which people interact with professionals, patients, and disease can enrich our understanding of cultural, economic, and social issues. Medical literature is a diverse field and it increases our awareness of the different reactions to medicine and illness. This course is intended to improve our empathy for patients and peers.

MEDICINE 9518 Medicine, Law and Bioethics Credits: 5

This course provides the basic doctrines and principles of the law that form the foundation for legally and ethically sound medical practice. It includes the comprehensive coverage of the history of legal medicine in the United States and the dynamics of law applied to the practice of medicine. Current developments in the U.S. health care delivery and in the field of bioethics are identified along with the impact on practice of medicine. Lecture, discussion, and writing about legal and ethical issues related to the practice of medicine prepares students in Year 5 and Year 6 to assume the legal and ethical responsibilities of the M.D. degree. This course fulfills the requirement for a Medical Humanities course in year 5 or year 6.

MEDICINE 9519 Medicine and Philosophy Credits: 5

The class is constructed on three premises. First, everyone is a philosopher. Second, philosophy is not passive, it is an activity. In class, we will do philosophy. Students will be given some basic philosophic tools and they will then be asked to critically examine, refine and sharpen their thinking. Third, the practice of medicine requires critical and creative thinking. Students must acquire voluminous knowledge and information. Philosophy addresses wisdom, how to apply the knowledge and information wisely.

Prerequisites: Must be a professional student in the UMKC School of Medicine.

MEDICINE 9570 Family Medicine Preceptorship Credits: 5

Provides work experience with a rural Missouri physician. Helps students understand the responsibilities and importance of family physicians in the provision of health care. Provides continuing emphasis on the need for and importance of family practice.

MEDICINE 9571 Psychiatry Rotation Credits: 5

Gives each medical student a clinical assignment that involves responsibility for patient care under supervision on the adult inpatient service and experience in the clinic. Includes seminars in psychopathology, psychiatric syndromes, mechanisms of defense, psychopharmacology, drug and alcohol abuse and specific psychosocial assessment.

MEDICINE 9578 Medicine and Art Credits: 5

Lecture, discussion.

MEDICINE 9583 Continuing Care Clinic Credits: 5

Provides ambulatory and continuous care experience in general medicine clinics. The docent teams are assigned to a clinic in which students see and follow a panel of patients on a continuous basis for up to four years, where necessary, under the supervision of docents. Provides continuity of care from inpatient hospitalization to outpatient care, allowing longitudinal experience for the student and personalized care for the patients. Allows students to observe the natural progression of disease and experience the rewards and challenges of an ongoing doctor-patient relationship.

MEDICINE 9583RC Year Five Repeat Clinic Credits: 5

Monthlong course in which students repeat or complete outstanding requirements of Year 5 Continuing Care Clinic.

MEDICINE 9585 Prescribing for Special Populations Credits: 2

Consists of a self-paced, independent learning, computer-based instruction. Teaches principles of prescribing for special populations. Students learn to recognize special patients and to assess risks and benefits and individualize drug therapy in special patient situations. The course addresses concepts of pharmacology in five commonly-encountered special populations: pediatrics, elderly, patients with liver or kidney disease, and pregnant or breast-feeding patients.

MEDICINE 9587 Extended Clinic III Credits: 5**MEDICINE 9594 Medicine and Body Image Credits: 5**

Lecture, discussion, writing about ethical issues related to death.

MEDICINE 9601 Internal Medicine/Docent Instruction Yr 6 Credits: 10

Students spend this eight-week rotation on the medical wards at Truman Medical Center, each working as an integral member of a docent team that includes the docent, residents and attending health care staff. Year 3 and 5, and Year 4 and 6 students are paired together in a junior-senior partnership. Rounds, conference and consultations.

MEDICINE 9601BR Internal Medicine/Docent Instruction Yr 6 Credits: 5

Students spend this eight-week rotation on the medical wards at Truman Medical Center, each working as a integral member of a docent team that includes the docent, residents and attending health care staff. Year 3 and 5, and Year 4 and 6 students are paired together in a junior-senior partnership. Rounds, conference and consultations. This section is a single four-week block of the rotation.

MEDICINE 9678 Emergency Medicine Credits: 5

Based at Truman Medical Center Hospital Hill or Saint Luke's Hospital of Kansas City, the major affiliated adult hospitals for the School of Medicine. Emphasizes principles, concepts and skills necessary for the initial evaluation and care of medical and surgical emergencies. Teaches management of simple lacerations, burns, contusions, sprains, and infections, and recognition of life threatening emergencies and initiation of emergency care in response.

MEDICINE 9683 Continuing Care Clinic Credits: 5

Provides ambulatory and continuous care experience in general medicine clinics. The docent teams are assigned to a clinic in which students see and follow a panel of patients on a continuous basis for up to four years, where necessary, under the supervision of docents. Provides continuity of care from inpatient hospitalization to outpatient care, allowing longitudinal experience for the student and personalized care for the patients. Allows students to observe the natural progression of disease and experience the rewards and challenges of an ongoing doctor-patient relationship.

MEDICINE 9685 Rational and Safe Drug Prescribing Credits: 2

Consists of self-paced, independent learning, computer-based instruction. Teaches principles of clinical pharmacology that will assist the student in responsibly prescribing medications. Students develop skills in making informed clinical decisions through studying topics such as literature evaluation, medication errors, adverse drug reactions, drug allergies, drug interactions, overdose management, alternative therapies, and therapeutic drug monitoring.

MEDICINE 9687 Extended Clinic IV Credits: 5**MEDICINE 9714A2 Academic General Year I Credit: 1****MEDICINE 9715A1 Independent Readings Month Credits: 5****MEDICINE 9716A1 Independent Study Month Credits: 5****MEDICINE 9732 Academic-Biomedical and Health Informatics Credits: 5****MEDICINE 9816C11 Family Practice Sub-Internship Credits: 5**

MEDICINE 9928-C61 Pediatrics-Child and Adolescent Psychiatry Credits: 5

MEDICINE 9929-C61 Pediatrics-Plastic Surgery Credits: 5

MEDICINE 9930-C61 Pediatrics-Orthopedic Surgery Credits: 5

MEDICINE 9940-C61 Pediatrics-Allergy and Immunology Credits: 5
Pediatrics-Allergy and Immunology.

Prerequisites: Must be a School of Medicine Student.

MEDICINE 9945-C81 Anesthesiology-Sub-Internship Credits: 5

MEDICINE 9972-C81 Surgery-General Sub-Internship Credits: 5

MEDICINE 9973-C81 Surgery Orthopedics Sub-Internship Credits: 5
Surgery Orthopedics Sub-Internship.

MEDICINE 9974-C81 Surgery Neurological Sub-Internship Credits: 5
Surgery Neurological Sub-Internship.

MEDICINE 9975-C81 Surgery-Trauma Credits: 5
Surgery-Trauma

Prerequisites: Must be an SOM student

MEDICINE 9976-C81 Surgery - Oral and Maxillofacial Surgery Credits: 5

MEDICINE 9977-C81 Surgical Oncology Credits: 5
Elective in Surgical Oncology.

MEDICINE 9985 Miscellaneous - Medical Clinical Nutrition Credits: 5

Build upon basic (biochemistry/physiology) and clinical science knowledge and skills in order to be able to perform nutrition assessments in children/adults, counsel patients and families on nutrition, order medical nutrition therapy, work with multidisciplinary teams, and appropriately refer for specialized nutrition/feeding services. The elective utilizes didactic instruction, case studies, team projects, individual assignments, and outside reading combined with clinical/community experiences to facilitate student acquisition of knowledge/skills. Gain an appreciation of nutritional therapy from both the clinician and patient/family perspective. Didactic sessions, case studies, and clinical experiences are designed to augment students' outside reading of assigned and suggested references.

Physician Assistant Courses

MEDPA 5501 Anatomy for the Physician Assistant Credits: 3

This course studies the anatomy of the human body and its correlation and relationship of anatomic configuration to diagnosis of clinical problems.

Prerequisites: MMSPA student.

MEDPA 5502 Foundations in Basic Medical Science Credits: 4

This course introduces the basic principles of biochemistry, microbiology, immunology, and pharmacology which prepares the student for Science and Practice of Medicine I - IV.

Prerequisites: MMSPA student.

MEDPA 5503 Research Applications in Medicine Credit: 1

This course introduces the student to clinical research in medicine and its application to clinical decision making through the concepts and principles of evidence-based medicine.

MEDPA 5504 Ethics, Law and Policy Credit: 1

This course examines ethical rules, principles, and theories as they relate to health care.

MEDPA 5505 Clinical Assessment for the PA Credits: 2

This course will focus on developing foundational physical exam and history taking skills for the physician assistant.

MEDPA 5511 Clinical Practicum I Credit: 1

The Clinical Practicum course series will develop professional behaviors, reinforce effective communication with classmates, patients and preceptors, introduce patient safety concepts and give the student clinical experience under preceptor supervision to develop and apply the skills learned in the curriculum.

MEDPA 5512 Clinical Practicum II Credit: 1

This course will consist of a variety of activities including lectures, clinical exposure, interprofessional education activities, service learning, and community health experiences. Emphasis will be on developing communication skills, exhibiting professional behaviors, recognizing diversity and needs of the community, and identifying attributes of a health care team.

Prerequisites: MEDPA 5511.

MEDPA 5513 Clinical Practicum III Credit: 1

This course will consist of a variety of activities including lectures, clinical exposure, interprofessional education activities, service learning, and community health experiences. Emphasis will be on developing communication skills, exhibiting professional behaviors, recognizing diversity and needs of the community, and identifying attributes of a health care team.

Prerequisites: MEDPA 5512.

MEDPA 5514 Clinical Practicum IV Credit: 1

This course will consist of a variety of activities including lectures, clinical exposure, interprofessional education activities, service learning, and community health experiences. Emphasis will be on developing communication skills, exhibiting professional behaviors, recognizing diversity and needs of the community, and identifying attributes of a health care team.

Prerequisites: MEDPA 5513.

MEDPA 5521 PA Professions I Credit: 1

This course in the PA Professions series that will focus on the history of the PA profession including the social, regulatory, ethical and professional aspects. Instruction will also be provided in clinical management practices and procedures including coding systems for diagnosis and reimbursement, quality assurance and risk management.

MEDPA 5522 PA Professions II Credit: 1

This course focuses on the impact of racial, ethnic and socioeconomic health disparities on health care delivery. The student will become aware of differing health beliefs, values and expectations of patients and other health care professionals that can affect communication, decision-making, compliance and health outcomes.

MEDPA 5523 PA Professions III Credit: 1

This course in the PA Professions series will provide basic doctrines and principles of the law to serve as a foundation for legally and ethically sound medical practice. It will include a comprehensive coverage of the history of legal medicine in the United States, the dynamics of the law applied to medical issues and the recent developments in health care delivery and biomedical issues. The legal and ethical issues of narrative medicine in medical practice and its practical applications will be explored and discussed.

MEDPA 5524 PA Professions IV Credit: 1

This course in the PA Professions will give students knowledge of the evolution of the health care industry's components and describe the technical, economic, political and social forces that shaped their development. Principles of health policy and public health will be discussed so the student will have a systematic way of thinking about health care in the United States, its problems and the alternatives for managing these problems.

MEDPA 5531 Science and Practice of Medicine I Credits: 9

This is a first of four series course that will address the physiology, pathophysiology, basic medical science, clinical presentation, pharmacotherapeutics, physical exam and clinical skills of disease processes presented in a systems format.

MEDPA 5532 Science and Practice of Medicine II Credits: 12

This is the second of a four series course that will address the physiology, pathophysiology, basic medical science, clinical presentation, pharmacotherapeutics, physical exam and clinical skills of disease processes presented in a systems format.

Prerequisites: MEDPA 5531.

MEDPA 5533 Science and Practice of Medicine III Credits: 20

This is the third of a four series course that will address the physiology, pathophysiology, basic medical science, clinical presentation, pharmacotherapeutics, physical exam and clinical skills of disease processes presented in a systems format.

Prerequisites: MEDPA 5532.

MEDPA 5534 Science and Practice of Medicine IV Credits: 19

This is the fourth in a four series course that will address the physiology, pathophysiology, basic medical science, clinical presentation, pharmacotherapeutics, physical exam and clinical skills of disease processes presented in a systems format.

Prerequisites: MEDPA 5533.

MEDPA 5580 Senior Seminar Credit: 1

This course will focus on discussion, study, and review of previously covered health topics in preparation for the Physician Assistant National Certification Exam (PANCE).

MEDPA 5581 Professional Development for the PA Credits: 0.5

This course focuses on professional development topics for the graduating PA students. Students attend and participate in seminars and discussions pertinent to employment and practice as a PA. Students enroll in the course each of the three semesters that make up the program clinical phase (semesters 5, 6, and 7).

Prerequisite: Must be a student in the MMS Physician Assistant program.

MEDPA 5589 Special Topics Credits: 1-3

An opportunity to explore in depth topics not included in usual course offerings. One or more topics will be announced in advance of registration.

MEDPA 5595 Capstone Credit: 1

This course will align didactic, clinical and professional instruction as well as Graduate Learning Competencies into a project that will have lasting impact for patients, clinical practice, PA education and/or the PA profession.

MEDPA 5610 Family Medicine I Rotation Credits: 4

This is a required 4-week rotation in an ambulatory family medicine setting.

MEDPA 5611 Family Medicine II Rotation Credits: 4

This is a required 4-week rotation in an ambulatory family medicine setting.

MEDPA 5612 Elective Family Medicine Rotation - 4 week Credits: 4

This is an elective 4-week rotation in an ambulatory family medicine setting.

MEDPA 5613 Elective Family Medicine Rotation II - 4 week Credits: 4

This is an elective 4-week rotation in an ambulatory family medicine setting.

MEDPA 5614 Elective Family Medicine Rotation I-2 week Credits: 2

This is an elective 2-week rotation in an ambulatory family medicine setting.

MEDPA 5615 Elective Family Medicine Rotation II - 2 week Credits: 2

This is an elective 2-week rotation in an ambulatory family medicine setting.

MEDPA 5620 Internal Medicine Rotation I Credits: 4

This is a required 4-week rotation in inpatient and/or outpatient adult medicine setting.

MEDPA 5621 Internal Medicine Rotation II Credits: 4

This is a required 4-week rotation in inpatient and/or outpatient adult medicine setting.

MEDPA 5622 Elective Internal Medicine Rotation I Credits: 4

This is an elective 4-week rotation in inpatient and/or outpatient adult medicine setting.

MEDPA 5623 Elective Internal Medicine Rotation II Credits: 4

This is an elective 4-week rotation in inpatient and/or outpatient adult medicine setting.

MEDPA 5624 Elective Internal Medicine Rotation I - 2 week Credits: 2

This is an elective 2-week rotation in inpatient and/or outpatient adult medicine setting.

MEDPA 5625 Elective Internal Medicine Rotation II - 2 week Credits: 2

This is an elective 2-week rotation in inpatient and/or outpatient adult medicine setting.

MEDPA 5630 Emergency Medicine Rotation Credits: 4

This is a required 4-week rotation in an emergency medicine setting.

MEDPA 5632 Elective Emergency Medicine I - 4 week Credits: 4

This is an elective 4-week rotation in the emergency medicine setting.

MEDPA 5633 Elective Emergency Medicine II - 4 week Credits: 4

This is an elective 4-week rotation in the emergency medicine setting.

MEDPA 5634 Elective Emergency Medicine I - 2 week Credits: 2

This is an elective 2-week rotation in the emergency medicine setting.

MEDPA 5635 Elective Emergency Medicine II - 2 week Credits: 2

This is an elective 2-week rotation in the emergency medicine setting.

MEDPA 5640 Women's Health Rotation Credits: 4

This is a required 4-week rotation in a women's health setting.

MEDPA 5642 Elective Women's Health Rotation I - 4 week Credits: 4

This is an elective 4-week rotation in a women's health setting.

MEDPA 5643 Elective Women's Health Rotation II - 4 week Credits: 4

This is an elective 4-week rotation in a women's health setting.

MEDPA 5644 Elective Women's Health I - 2 week Credits: 2

This is an elective 2-week rotation in a women's health setting.

MEDPA 5645 Elective Women's Health II - 2 week Credits: 2

This is an elective 2-week rotation in a women's health setting.

MEDPA 5650 Pediatrics Rotation Credits: 4

This is a required 4-week rotation in a pediatric medicine setting.

MEDPA 5652 Elective Pediatrics Rotation I Credits: 4

This is an elective 4-week rotation in a pediatric medicine setting.

MEDPA 5653 Elective Pediatrics Rotation II Credits: 4

This is an elective 4-week rotation in a pediatric medicine setting.

MEDPA 5654 Elective Pediatrics Rotation I - 2 week Credits: 2

This is an elective 2-week rotation in a pediatric medicine setting.

MEDPA 5656 Elective Pediatrics Rotation II 2 week Credits: 2

This is an elective 2-week rotation in a pediatric medicine setting.

MEDPA 5660 General Surgery Rotation Credits: 4

This is a required 4-week rotation in a general surgery setting.

MEDPA 5662 Elective Surgery Rotation I Credits: 4

This is an elective 4-week rotation in a surgery setting.

MEDPA 5663 Elective Surgery Rotation II Credits: 4

This is an elective 4-week rotation in a surgery setting.

MEDPA 5664 Elective Surgery Rotation I - 2 week Credits: 2

This is an elective 2-week rotation in a surgery setting.

MEDPA 5665 Elective Surgery Rotation II - 2 week Credits: 2

This is an elective 2-week rotation in a surgery setting.

MEDPA 5670 Behavioral Medicine Rotation Credits: 4

This is a required 4-week rotation in a behavioral health setting.

MEDPA 5671 Behavioral Medicine Rotation - 2 week Credits: 2

This is a required 2-week rotation in a behavioral health setting.

MEDPA 5672 Elective Behavioral Medicine I Credits: 4

This is an elective 4-week rotation in the behavioral medicine setting.

MEDPA 5673 Elective Behavioral Medicine II Credits: 4

This is an elective 4-week rotation in the behavioral medicine setting.

MEDPA 5674 Elective Behavioral Medicine I - 2 week Credits: 2

This is an elective 2-week rotation in the behavioral medicine setting.

MEDPA 5675 Elective Behavioral Medicine II - 2 week Credits: 2

This is an elective 2-week rotation in the behavioral medicine setting.

MEDPA 5680 Geriatrics Rotation Credits: 4

This is a required 4-week rotation in a geriatric specialty care setting.

MEDPA 5681 Geriatrics Rotation - 2 week Credits: 2

This is a required 2-week rotation in a geriatric specialty care setting.

MEDPA 5682 Elective Geriatrics Rotation I Credits: 4

This is an elective 4-week rotation in the geriatric medicine setting.

MEDPA 5683 Elective Geriatrics Rotation II Credits: 4

This is an elective 4-week rotation in the geriatric medicine setting.

MEDPA 5684 Elective Geriatrics Rotation I - 2 weeks Credits: 2

This is an elective 2-week rotation in the geriatric medicine setting.

MEDPA 5685 Elective Geriatrics Rotation II - 2 weeks Credits: 2

This is an elective 2-week rotation in the geriatric medicine setting.

MEDPA 5690 Elective Clinical Rotation I Credits: 4

This is a 4-week clinical rotation experience in a new setting or an established area that students wish to gain additional experience.

MEDPA 5691 Elective Clinical Rotation II Credits: 4

This is a 4-week rotation in a newly or recently established clinical setting.

MEDPA 5692 Elective Clinical Rotation I - 2 week Credits: 2

This is a 2-week clinical rotation experience in a new setting or an established area that students wish to gain additional experience.

MEDPA 5693 Elective Clinical Rotation II - 2 week Credits: 2

This is a 2-week clinical rotation experience in a new setting or an established area that students wish to gain additional experience

MEDPA 5899 Required Graduate Enrollment Credit: 1

Required Graduate Enrollment.

Admission Requirements

Current High School Students

The School of Medicine offers a six-year B.A./M.D. program that requires students to complete both a baccalaureate degree and doctor of medicine degree. Admission to the B.A./M.D. program is highly competitive, and admitted students are challenged by a demanding curriculum scheduled for 35 weeks in the first year and 48 weeks in each of the remaining five years.

Applicants for admission to Year 1 of the six-year medical program must first be accepted by the University of Missouri – Kansas City. Admission to the university is determined by a combination of ACT score and class rank, as well as graduation from an accredited U.S. high school with completion of the following high school curriculum.

- Four units of English
- Four units of Mathematics (Algebra 1 or higher)
- Three units of science (including one unit of Biology and one unit of Chemistry)
- Three units of social studies
- Two units of a single foreign language
- One unit of fine arts (visual arts, music, dance, or theater).

For more information about UMKC admission requirements and/or the application procedures, please contact the UMKC Office of Admissions at:

Office of Admissions
University of Missouri – Kansas City
120 Administrative Center
5100 Rockhill Road
Kansas City, MO 64110-2499

In addition, School of Medicine applicants are also required to submit a supplemental application and additional supporting documents, consisting of the following:

- Personal statement (500 words or less)
- Short answer responses
- Listing of all health-related and co-curricular activities (high school only)
- References (minimum 3, must be provided on official School of Medicine Reference Forms)

The School of Medicine strongly encourages prospective students to earn credit through Advanced Placement (AP) courses, if available, in math, English, European history, or American history.

Students whose high school does not offer biology, chemistry, and/or foreign language are encouraged to contact the Council on Selection at the School of Medicine.

Students are selected to interview based on the information provided in a complete application. Once interviews are complete, the Council on Selection will convene to determine which students will be offered admission to the program. Most applicants to the combined degree program display outstanding academic credentials and backgrounds and strong leadership and involvement. The applicant pool is extremely competitive, and no one component of the application guarantees an offer of admission.

Current College Students

Students with 24 college credit hours or less:

Students with 24 hours or less of post high school graduation college credit at the time of application are eligible to apply for admission to the 6-year B.A./M.D. program. These applicants will be reviewed with the same criteria as freshman applicants.

If the applicant is currently enrolled in college in the semester in which they apply to the six-year program, the number of hours accumulated at the end of that semester must not exceed the 24-hour credit limit. While the application is being processed, applicants may continue taking college courses during the next semester.

Applicants must have earned a 3.0 GPA or higher at the end of the fall semester in order to be considered for admission. Official college transcripts must be submitted along with other application materials. Grades for courses completed in the fall semester in which the applicant applied must also be submitted upon completion of the semester. A current ACT test within the last three years is also required.

Students with more than 24 college credit hours:

Students who have completed more than 24 post high school college credit hours and have not yet received a Bachelor's degree are not eligible to apply to the School of Medicine.

Students who have earned, or will be earning in the year of application, a Bachelor's degree:

Students who have completed more than 24 post high school college credit hours and have earned, or will soon earn, a Bachelor's degree are eligible to apply to the M.D. Program.

A limited number of positions are available for students who have completed their baccalaureate degree. For admission requirements for entrance as an M.D. Program student, please contact the Council on Selection in the School of Medicine.

For more information about the combined B.A./M.D. program, please contact the Council on Selection at:

UMKC School of Medicine
Council on Selection
2411 Holmes
Kansas City, MO 64108

Application Deadlines

Completed application materials will be accepted during the following period:

- Earliest date - Aug. 1 of the year preceding the fall semester for which applying.
- Latest date - Nov. 1 of the year preceding the fall semester for which applying.

All applications must be complete with supporting documents by November 1. Late applications will be considered on a space available basis. Incomplete applications will not be considered.

(Applicants are urged to apply as soon after Aug. 1 as possible.)

High school students wishing to enter this program should recognize that many other well-qualified high school students with strong science backgrounds also will be applying. Because this is a state-assisted university, primary consideration is given to Missouri residents with over fifty percent of the incoming class from the state of Missouri.

Criminal background checks will be performed on combined-degree students and M.D. Program students before matriculation into the program.

Application Fee

Applicants are strongly advised to apply online. A \$35 non-refundable application fee is required.

These fees are for students applying with the online application only. Paper applications may be assessed a higher fee.

Graduate Programs

Graduate Degree Programs:

Masters of Science Degrees:

- Master of Science in Anesthesia
- Master of Science in Bioinformatics (p. 1830)
- Master of Medical Science Physician Assistant (p. 1827)
- Master of Health Professions Education (p. 1826)

Graduate Certificate Degrees:

- Graduate Certificate in Clinical Research
- Graduate Certificate in Health Professions Education (p. 1826)

Doctor of Philosophy:

- Interdisciplinary Ph.D. primary and co-discipline: Biomedical and Health Informatics (p. 1825)

Doctor of Philosophy

Degree Requirements

The Department of Biomedical and Health Informatics participates in the Interdisciplinary Ph.D. program at UMKC. Students interested in studies at the doctoral level in Biomedical and Health Informatics, should apply to the Interdisciplinary Ph.D. program in the School of Graduate Studies.

Detailed information on the general and discipline-specific admission requirements for the Interdisciplinary Ph.D. is found in the School of Graduate Studies (<http://catalog.umkc.edu/colleges-schools/graduate-studies/>) section of this catalog, with specific details in the Biomedical and Health Informatics (p. 1555) discipline section. More information about the program can be found on the school's Website at <http://sgs.umkc.edu/interdisciplinary-ph-d-studies-at-umkc/>.

Graduate Certificate in Clinical Research

Student Learning Outcomes

Students graduating from this program will:

- Have the ability to perform statistical analysis
- Have the ability to generate a research hypothesis
- Have the ability to propose, conduct, and report research

Program Description

The Department of Biomedical and Health Informatics (DBHI) at the School of Medicine (SOM) offers a Graduate Certificate in Clinical Research. The Graduate Certificate is a valuable credential for health care professionals who want exposure to the fundamentals of clinical research methods and applications. Junior faculty, clinical fellows, physicians, nurses, pharmacists, dentists, clinical research coordinators, and other health professionals will advance their research careers and become more discriminate consumers of research upon completion of this program.

Please visit our Department Website (<http://med.umkc.edu/dbhi/>) to learn more about this program.

Curriculum Description

Students must complete the following courses while maintaining a 3.0 or better grade point average to earn the Graduate Certificate:

Code	Title	Credits
MEDB 5501	Applied Biostatistics I	3
MEDB 5510	Clinical Research Methodology	3
MEDB 5511	Principles and Applications of Epidemiology	3
MEDB 5512	Clinical Trials	3
MEDB 5513	Overview of Health Services Research	3

Since the Graduate Certificate includes coursework that counts toward the Master of Science in Bioinformatics (MSB) Degree, Graduate Certificate graduates will be offered the option of applying to the MSB program. If accepted, they will be able to apply 15 credit hours towards completion of the MSB degree or the MSB with an emphasis in Clinical Research.

Admission Requirements

Please visit our [Admissions Page \(http://med.umkc.edu/gc-clinical-research/\)](http://med.umkc.edu/gc-clinical-research/) to learn about our requirements.

Graduate Certificate in Health Professions Education

Student Learning Outcomes

Students graduating from this program will:

- Have the ability to deliver effective, theory-based instruction in large group, small group, and clinical settings
- Have the ability to develop skill in educational research as it relates to the quality of instructional practice
- Have the ability to design evidence-based educational programs and materials with appropriate scope, sequence, and focus for learners
- Have the ability to understand assessment and to effectively use assessment tools to track student progress and to promote student learning
- Have the ability to develop skill in program and curriculum development and evaluation in health professions education
- Have the ability to identify current issues in health professions education and develop skill in monitoring changes in the field

Program Overview

The Graduate Certificate in Health Professions Education provides an educational research foundation for teaching and assessment in health professions education. The certificate, which includes six courses (18 credit hours), is based on a mix of both classroom and online instruction.

Plan of Study

Code	Title	Credits
HPRE 5530	Current Issues in Health Professions Education	3
HPRE 5550	Assessment in Health Professions Education	3
HPRE 5508	Principles and Methods of Research	3
HPRE 5560	Teaching in Health Professions Education	3
HPRE 5522	Curriculum Design in Health Professions Education	3
HPRE 5580	Program Evaluation in Health Professions Education	3

Please visit the Program Website (<http://med.umkc.edu/gchpe/>) to learn more about this program:

Master of Health Professions Education

Program Overview

The Masters Degree in Health Professions Education (MHPE) provides an educational research foundation for teaching, assessment and leadership in health professions education. The MHPE curriculum is comprised of twelve courses which focus on the application of learning principles to educational practice. All courses emphasize an applied project based on students' professional experiences. The educational portfolio serves as an integrative tool across courses and as a showcase for student accomplishments.

Program Features

- Inter-professional—For all health education professionals
- Educational research foundation—Evidence-based decision making
- Application—Based on solving real instructional problems in health professions education
- Professional Portfolio—Documents learning goals and accomplishments
- Online and Blended—Most coursework is online with occasional in-class meeting

Student Learning Outcomes

Students graduating from this program will:

- Have the ability to understand and apply educational research in health professions education.
- Have the ability to design evidence-based educational programs and materials.
- Have the ability to deliver effective, theory-based instruction in large, small and clinical group settings.
- Have the ability to effectively use assessment tools to reflect student progress in learning.
- Have the ability to evaluate the effectiveness of programs, curricula and instructional events.
- Have the ability to develop cultural awareness and commitment to diversity.
- Have the ability to provide reflective and evidence-based leadership.

Degree Requirements

A minimum of 36 credit hours are required to earn the Master of Health Professions Education degree. Students must complete the program of study while maintaining a 3.0 or better grade point average.

Code	Title	Credits
MEDB 5501	Applied Biostatistics I	3
HPRE 5500	Leadership and Administration in Health Professions Education	3
HPRE 5508	Principles and Methods of Research	3
HPRE 5522	Curriculum Design in Health Professions Education	3
HPRE 5530	Current Issues in Health Professions Education	3
HPRE 5535	Community Engagement in Education	3
HPRE 5540	Independent Study	3
HPRE 5550	Assessment in Health Professions Education	3
HPRE 5560	Teaching in Health Professions Education	3
HPRE 5566	Teaching about Culture and Health	3
HPRE 5580	Program Evaluation in Health Professions Education	3
HPRE 5588	Learning Portfolio in Health Professions Education	3
Total Credits		36

Master of Medical Science Physician Assistant

PROGRAM DESCRIPTION

The Master of Medical Science Physician Assistant degree is offered by the School of Medicine. The mission of the program is to educate competent, compassionate, and culturally-aware Physician Assistants who are prepared to meet the healthcare needs of our community. Graduates will advance the Physician Assistant profession through clinical excellence, service, and dedication to lifelong learning.

Student Learning Outcomes

Students graduating from this program will:

- Demonstrate competency in interpersonal and communication skills
- Demonstrate competency in medical knowledge
- Demonstrate competency in professionalism
- Demonstrate competency in practice-based learning and improvement
- Demonstrate competency in systems-based practice
- Demonstrate competency in interprofessional collaborative practice
- Demonstrate competency in social, cultural, and community contexts of health care
- Demonstrate competency in patient care

DEGREE REQUIREMENTS

To complete the program graduate students must complete a 7-semester program of study. Within the program of study, successful students earn 129.5 credit hours, which includes 48 credit hours (12 months) comprised of clinical rotation experiences. Students must pass a Promotion exam during semester 4 and a Summative exam during semester 7. Students must also maintain a 3.0 or better grade point average to receive the Master of Medical Science Physician Assistant degree.

Required Courses Include:

Code	Title	Credits
Year 1 Spring Semester (21 credit hours)		
MEDPA 5501	Anatomy for the Physician Assistant	3
MEDPA 5502	Foundations in Basic Medical Science	4
MEDPA 5504	Ethics, Law and Policy	1
MEDPA 5505	Clinical Assessment for the PA	2
MEDPA 5511	Clinical Practicum I	1
MEDPA 5521	PA Professions I	1
MEDPA 5531	Science and Practice of Medicine I	9
Year 1 Summer Semester (14 credit hours)		
MEDPA 5512	Clinical Practicum II	1
MEDPA 5522	PA Professions II	1
MEDPA 5532	Science and Practice of Medicine II	12
Year 1 Fall Semester (22 credit hours)		
MEDPA 5513	Clinical Practicum III	1
MEDPA 5523	PA Professions III	1
MEDPA 5533	Science and Practice of Medicine III	20
Year 2 Spring Semester (25 credit hours)		
MEDPA 5600 Clinical Rotation - May		4
MEDPA 5514	Clinical Practicum IV	1
MEDPA 5524	PA Professions IV	1
MEDPA 5534	Science and Practice of Medicine IV	19
Year 2 Summer Semester (8.5 credit hours)		
MEDPA 5600 Clinical Rotation - June		4
MEDPA 5600 Clinical Rotation - July		4
MEDPA 5581	Professional Development for the PA	0.5
Year 2 Fall Semester (20.5 credit hours)		
MEDPA 5600 Clinical Rotation - August		4
MEDPA 5600 Clinical Rotation - September		4
MEDPA 5600 Clinical Rotation - October		4
MEDPA 5600 Clinical Rotation - November		4
MEDPA 5600 Clinical Rotation - December		4
MEDPA 5581	Professional Development for the PA	0.5
Year 3 Spring Semester (18.5 credit hours)		
MEDPA 5600 Clinical Rotation - January		4
MEDPA 5600 Clinical Rotation - February		4
MEDPA 5600 Clinical Rotation - March		4
MEDPA 5600 Clinical Rotation - April		4
MEDPA 5580	Senior Seminar	1
MEDPA 5581	Professional Development for the PA	0.5
MEDPA 5595	Capstone	1

MEDPA 5600s are a series of required and elective clinical rotations. Required clinical rotations include Family Medicine, Adult Internal Medicine, Women's Health, Emergency Medicine, Pediatrics, General Surgery, Behavioral Medicine, and Geriatrics. Student schedules are supplemented with additional 2 to 4 week elective rotations.

Master of Science in Anesthesia Program

Student Learning Outcomes

Students graduating from this program will:

- Demonstrate competency in patient care including preoperative preparation/anesthetic plan, patient monitoring, airway management, patient positioning, and anesthesia record documentation
- Demonstrate competency in integration of basic medical knowledge into clinical practice through application of concepts from foundational coursework in the clinical setting
- Demonstrate competency in clinical management through mastery of skills in multitasking, problem solving, specialty specific management and techniques, responding to changes in patient status, and overall case management
- Demonstrate competency in self-learning and professionalism
- Demonstrate competency in communication with preceptors, operating room staff, other health professionals, and patients

Program Description

The Master of Science in Anesthesia program at the UMKC School of Medicine prepares students to become anesthesiologist assistants (AAs). The program mission is to graduate AAs with advanced specialized knowledge and skills and individuals who are compassionate, competent, ethical and patient-centered AAs who work within an Anesthesia Care Team.

Degree Requirements

To complete the program students must complete a 7 semester plan of study, which involves 112 credit hours of coursework, and at least 2000 clinical hours (obtained during Anesthesia Clinical Experience courses). The minimum patient case requirements are outlined in the student handbook. Students must also maintain a 3.0 or better grade point average to earn the Master of Science in Anesthesia degree.

Required Courses Include:

Semester 1 (January to May) (16.5 credit hours)

Code	Title	Credits
ANESTH 5505	Anatomy for Anesthesiologist Assistants I	1
ANESTH 5518	Professionalism for the Anesthesiologist Asst I	.5
ANESTH 5540	Patient Monitoring and Instrumentation	3
ANESTH 5556	Physiology for Anesthesiologist Assistants I	3
ANESTH 5560	Introduction to Anesthesia	2
ANESTH 5561	Orientation to Simulation and Clinical Application	5
ANESTH 5575	Pharmacology for Anesthesiologist Assistants I	2
Total Credits		16.5

Semester 2 (May to August) (13.5 credit hours)

Code	Title	Credits
ANESTH 5528	Professionalism for the Anesthesiologist Asst II	0.5
ANESTH 5541	Methods of Anesthesia I	2
ANESTH 5557	Physiology for Anesthesiologist Assistants II	2
ANESTH 5558	Anesthesia & Co-existing Disease I	2
ANESTH 5563	Anesthesia Clinical Experience I	4
ANESTH 5576	Pharmacology for Anesthesiologist Assistants II	1
ANESTH 5585	Physiological Model-based Simulation I	2
Total Credits		13.5

Semester 3 (August to December) (17.5 credit hours)

Code	Title	Credits
ANESTH 5506	Anatomy for Anesthesiologist Assistants II	1
ANESTH 5538	Professionalism for the Anesthesiologist Asst III	0.5
ANESTH 5559	Anesthesia & Co-existing Disease II	2
ANESTH 5565	Anesthesia Clinical Experience II	8
ANESTH 5577	Methods of Anesthesia II	3
ANESTH 5578	Pharmacology for Anesthesiologist Assistants III	1
ANESTH 5586	Physiological Model-based Simulation II	2
Total Credits		17.5

Semester 4 (January to May) (17 credit hours)

Code	Title	Credits
ANESTH 5564	Anesthesia Clinical Correlation II	1
ANESTH 5567	Anesthesia Clinical Experience III	16
Total Credits		17

Semester 5 (May to August) (13 credit hours)

Code	Title	Credits
ANESTH 5568	Anesthesia Clinical Correlation III	1
ANESTH 5569	Anesthesia Clinical Experience IV	12
Total Credits		13

Semester 6 (August to December) (17 credit hours)

Code	Title	Credits
ANESTH 5570	Anesthesia Clinical Correlation IV	1
ANESTH 5571	Anesthesia Clinical Experience V	16
Total Credits		17

Semester 7 (January to May) (16.5 credit hours)

Code	Title	Credits
ANESTH 5573	Anesthesia Clinical Experience VI	16
ANESTH 5548	Anesthesiologist Assistant Senior Seminar	0.5
Total Credits		16.5

Master of Science Program in Bioinformatics

Student Learning Outcomes

Students graduating from this program will:

- Have the ability to perform statistical analysis.
- Have the ability to generate a research hypothesis.
- Have the ability to propose, conduct, and report research.
- Have the ability to apply knowledge and skills in biomedical informatics.
- Have the ability to communicate scientific information.

Program Description

The Department of Biomedical and Health Informatics at the School of Medicine, in cooperation with the School of Biological Sciences and the School of Computing and Engineering, offers the Master of Science in Bioinformatics degree. Students may complete the degree without an area of emphasis or may choose one of three emphasis areas (Clinical Research, Computational Bioinformatics, or Genomic Bioinformatics).

The program is designed to prepare a new generation of informatics professionals who will have the necessary skills to work collaboratively for the advancement of health sciences. Graduates are expected to be effective team members who can contribute to education, research, and development in the fields of bioinformatics and/or clinical research. This degree program prepares students to assume a variety of professional informatics

positions in translational research and development, institutional management, public policy, information systems, hospitals, private industry, or as members of a clinical research team. Students completing the M.S. Bioinformatics degree may also choose to continue their education at advanced graduate levels.

Program Goals

1. Produce competent researchers at the interface of biomedical and health informatics and clinical research
2. Produce graduates able to establish partnerships with stakeholders and the community
3. Produce effective communicators
4. Produce ethical and responsible researchers

Degree Requirements

A minimum of 36 credit hours are required to earn the Master of Science in Bioinformatics degree. Students must complete the program of study while maintaining a 3.0 or better grade point average to earn the MSB. The total number of credit hours, required coursework, elective course work and Thesis or Capstone requirements vary based on the MS Bioinformatics option selected by the student. These options are shown in the following table:

	MSB without an Emphasis	Computational Emphasis	Clinical Research Emphasis	Genomics Emphasis
Required course hours	18	24	24	33
Elective course hours*	12	6	6	0
Research & Thesis hours	6	6	6	6
Capstone option available*	Yes	Yes	Yes	No
Minimum Total hours	36	36	36	39

*Students may choose to complete the 3 credit hour Capstone course and 3 additional elective credit hours in place of Research and Thesis credit hours. This option is not available for the Genomics Bioinformatics emphasis.

MSB Emphasis Options

1. The M.S. in Bioinformatics (without an emphasis area): Gives students flexibility to complete a bioinformatics curriculum that best meets their academic and career goals.
2. Clinical Research: Emphasizes the creation and understanding of data generated by patient care and clinical studies and on the statistical methodology needed for clinical research and improved bedside care.
3. Computational Bioinformatics: Emphasizes the development and use of the next generation of bioinformatics tools and software.
4. Genomic Bioinformatics: Emphasizes the use of existing software for biological analysis and the analysis of a diverse set of biological data.

The required coursework for each M.S. Bioinformatics option are listed below. Information about elective coursework can be obtained from program faculty. Please visit our Department Website (<http://med.umkc.edu/msb/>) to learn more about this program.

M.S. Bioinformatics without emphasis area

Code	Title	Credits
MEDB 5501	Applied Biostatistics I	3
MEDB 5502	Applied Biostatistics II	3
MEDB 5510	Clinical Research Methodology	3
MEDB 5561	Responsible Conduct of Research	3

At least 2 from the following:

MEDB 5520	Introduction to Medical Informatics	3
or MEDB 5521	Clinical Bioinformatics	
or BIOLOGY 5525	Bioinformatics and Data Analysis	
or COMP-SCI 5566	Introduction to Bioinformatics	

Clinical Research Emphasis

Medical Degree Programs

B.A. / M.D. (p. 1833)

Program Overview (p. 1833)

From high school student to medical student (p. 1833)

A medical student's journey begins as soon as they enter the UMKC School of Medicine's B.A./M.D. program. Immediate exposure to a curriculum that builds a strong foundation in medical science and clinical skills is integrated with the liberal arts and humanities into a year-round program. Our program allows students to choose an undergraduate major and earn their B.A. and M.D. in six years. (p. 1833)

M.D. Program (p. 1836)

Program Overview (p. 1836)

The UMKC School of Medicine offers an opportunity for medical education to students who have obtained, or will soon earn, a baccalaureate degree. This program is the M.D. Program. Students interested in the M.D. Program must apply for admission between May 1 and August 1. If selected for admission, students will begin coursework in January. (p. 1836)

B.A. / M.D.

B.A./M.D. Program

Program Overview

From high school student to medical student

A medical student's journey begins as soon as they enter the UMKC School of Medicine's B.A./M.D. program. Immediate exposure to a curriculum that builds a strong foundation in medical science and clinical skills is integrated with the liberal arts and humanities into a year-round program. Our program allows students to choose an undergraduate major and earn their B.A. and M.D. in six years.

During the first two years of the program, three-fourths of a student's time is dedicated to the arts and sciences to fulfill baccalaureate degree requirements, while one-fourth is spent in medical school coursework. In the final four years of the program, the majority of the student's time is spent in medical school coursework with a smaller percentage of time spent completing baccalaureate degree requirements.

Students pursue baccalaureate degrees in a variety of areas:

- Liberal Arts
- Chemistry
- Biology

The ability to pursue certain undergraduate degree options is dependent on the college credit a student is able to transfer in from high school. College credit may be accepted for Advanced Placement, International Baccalaureate, CLEP or dual-enrollment courses.

Clinical Experience and Physician Interaction

Students begin clinical experiences in the third week of the program through the docent system. A docent is a teaching physician who also serves as a mentor as a student advances through the curriculum. In years 1 – 2, students are assigned to docent teams of 10 – 15 students from their class. In this early docent experience, students are educated and mentored on the fundamentals of medicine.

In years 3 – 6, students are assigned to docent teams of 12-15 year 3 – 6 students, a docent, a clinical pharmacologist, a clinical medical librarian, an education team coordinator and other health care professionals. In this docent experience, students spend a half day per week every week assisting with outpatient care in a continuing care clinic. This team also works together on the internal medicine rotation two months out of the year in years 4 – 6.

Research

Students have the opportunity to work with faculty in both clinical and research settings. Students involved in research have the opportunity to present their findings each spring at the annual Student Research Summit, and funding is available to support student research projects. The Office of Research Administration facilitates student research programs as well as coordinates supplemental research lectures and seminars.

Service

Students at the UMKC School of Medicine have the opportunity to develop community partnerships, provide community service and reflect upon their experiences. Students participate in service-based programs, such as the Sojourner Clinic, a free outpatient clinic developed and managed by medical students, and the Kansas City Free Eye Clinic.

Core Competencies

Our curriculum utilizes experiences with patients, peers and faculty in clinical settings that develop students who are passionate about medicine. Students learn the skills and attitudes for compassion, honesty and integrity which receive the same priority as scientific and technical skills.

To further develop these skills and attitudes, the School of Medicine uses the following core competencies as the foundation for all educational experiences, as well as the selection of new students.

Interpersonal and communication skills are crucial to a successful doctor-patient relationship. Through immediate and ongoing patient interaction, our students learn to engage with patients, families and other members of the health care team. Our graduates are able to establish a therapeutic relationship with patients, regardless of age or cultural background, and are able to communicate in an effective manner.

It is important for both medical students and graduates to have an acute sense of **professional behavior** during interactions with others in clinical, academic, and co-curricular activities. Students master the professional behaviors of respect, compassion and empathy, altruism, honesty, excellence and accountability. In addition, our students are taught the value of moral reasoning and ethical judgment and learn to identify ethical issues in medicine, evaluate ethical choices, and recommend and defend those choices. Our graduates have the ability to recognize individual patient value systems, while integrating moral reasoning and ethical judgment in the care of patients without compromising their own ethical integrity.

The **medical knowledge** students gain during their four years of medical training allows our graduates to apply both basic and clinical science to understand, explain and solve complex, multi-system problems. Our students receive four years of outstanding clinical education that sets them apart from other medical school graduates, allowing our students greater opportunity to evaluate problems from multiple perspectives and to identify an appropriate and rational solution to address those problems. Additionally, our graduates are able to apply the knowledge, skills and concepts from all scientific perspectives to overall patient care.

By acquiring **practice-based learning and improvement skills**, including how to access and evaluate medical information, students learn how to provide effective up-to-date patient care. Learning how to use evidence-based medicine and skills related to patient safety and continuing quality improvement furthers students' development into graduates competent in practice-based learning.

Through **systems-based practice**, our graduates are able to actively incorporate psychological, social, cultural and economic factors that influence both individual patients and communities. Our graduates have an increased awareness of the role diversity plays in the context of health care, and use this awareness to benefit patients and serve as better health advocates.

Through a variety of teaching and learning strategies, students acquire the attitudes, knowledge and skills required for **patient care** through time-honored data gathering methods of history-taking and the physical examination, appropriate use and interpretation of tests, identification and in some instances administration of needed procedures, formulation of diagnoses and companion management plans using clinical reasoning and problem-solving skills and provision of patient education. They learn how to care for the full range of patient problems – acute, chronic, emergent, preventative, rehabilitative – in inpatient, outpatient and continuing care settings.

Curriculum

During the first two years of the program, three-fourths of a student's time is dedicated to the arts and sciences to fulfill baccalaureate degree requirements, while one-fourth is spent in medical school coursework. In the final four years of the program, the majority of the student's time is spent in medical school coursework with a smaller percentage of time spent completing baccalaureate degree requirements.

Students will select from three baccalaureate degree options: **Liberal Arts, Chemistry and Biology**. Selection of the baccalaureate degree is dependent upon the number of transferable courses available from high school (AP, IB, dual enrollment, etc.)

Typical six-year program of study (p. 1845)

Years 1 & 2

- Through the docent team, clinical experience begins immediately in the first year and increases as students advance through the next six years.
- Beginning in Year 1, information learned in the classroom is integrated in the clinical experience. Presentations on various medical symptoms and clinical findings are provided to integrate anatomy and physiology with medical history-taking and provide a format for learning about developing a differential diagnosis based on the patient's history.
- The Fundamentals of Medicine series (I-IV) builds on communication skills and learning to perform a patient-centered interview. This provides the students an opportunity to learn more about themselves, their profession and further develop effective interviewing skills. The Fundamentals of Medicine series offers a unique theme each semester: women's health (Fall Year 1), geriatrics (Spring Year 1), pediatrics (Fall Year 2) and adult medicine (Spring Year 2).
- In addition, students meet two to three hours a week with their docent teams to interact with patients, learn the basics of clinical medicine and develop fundamental skills.

Year 3

In Year 3, students join a new docent team, a group of 1 to 15 medical students who will learn together in Years 3 through 6. A docent and other health care professionals will provide supervision and support as students continue to develop medical knowledge and clinical skills.

- Students move from classes primarily on the Volker Campus to the Hospital Hill Campus for intensified basic medical science classes that prepare students for increased clinical responsibilities.
- A Year 3 student is paired with a Year 5 senior partner who serves as a mentor, allowing advanced students to take additional responsibility for the professional development of younger students. This junior-senior partnership allows students to teach each other, as well as build knowledge, skills and camaraderie.
- One half-day a week throughout Years 3 through 6, students assist to diagnose and treat patients in outpatient clinics located at two of our partner hospitals, Truman Medical Center Hospital Hill or Saint Luke's Hospital. This clinical assignment provides continuity of patient care, as well as a wealth of clinical experience.

Years 4 – 6

In Year 4, students will return to the UMKC Volker campus to complete coursework towards the baccalaureate degree. While completing the undergraduate degree, students continue to participate in clinical assignments.

During the last three years of the program, students have a number of experiences to complete the curriculum.

- Students will be immersed in a one-block rural Missouri preceptorship that provides experiences in societal and health care concerns unique to non-urban primary care settings.
- Two blocks a year, students join their full docent team for daily ward rounds called docent rotation. This docent rotation, block clinical rotations and continuing care clinic make up most of the final three years.
- Clerkships in Emergency Medicine, Family Medicine, Obstetrics/Gynecology, Pediatrics, Psychiatry and Surgery are the required medical school clerkship offerings in the final two years.

** Three to 12 credit hours will come from general degree requirements and/or core major requirements.*

***Students may take 6-7 electives in year 6. They must choose three clinical electives from nine designated categories. One of these electives must be a critical care elective.*

Student Learning Outcomes

Please click here to review the Student Learning Outcomes (<http://med.umkc.edu/docs/catalog/UMKC-SOM-SLO.pdf>)

Graduation Requirements

BACCALAUREATE DEGREE

- Students must select an undergraduate B.A. major or emphasis area from a variety of disciplines.
- The most common baccalaureate degrees are in liberal arts, biology and chemistry.
- Students may earn up to 30 semester hours of college credit through the Advanced Placement program, International Baccalaureate program or specific subject-area examinations of the College Level Examination Program (CLEP).
- Students must satisfactorily complete a minimum of 90 semester hours of non-medical courses on the UMKC Volker Campus in the following subject areas: English, fine arts, government, history, humanities, literature, natural science, philosophy and social/ behavioral science.
- Thirty additional semester hours toward the baccalaureate degree are awarded from required concurrent medical coursework.
- Students enrolled in the combined degree program at UMKC are required to complete a minimum of 38 hours of credit through the College of Arts and Sciences and/or the School of Biological Sciences subsequent to matriculation into the B.A./M.D. program regardless of the amount of previous credit earned.

DOCTOR OF MEDICINE DEGREE

- Students in the combined B.A./M.D. program must have satisfactory completion, certified by the UMKC registrar, of requirements for the baccalaureate degree and 38 months of medical curriculum credit.
- Students must achieve Certification in Advanced Cardiac Life Support.
- Students must receive docent certification of clinical competence.
- Student must earn a cumulative GPA of 2.8-4.0.
- Students must earn passing scores on Step 1 and Step 2 CS & CK of the United States Medical Licensing Examination (USMLE).
- Students must complete 48 months of enrollment in the School of Medicine, Years 3-6.
- At least three clinical electives are required and these must come from a minimum of three of the nine School of Medicine approved clinical elective categories. One of these electives must be a critical care elective.
- Students are expected to evaluate the quality of their experiences through course and performance evaluations, an annual program assessment, a graduation questionnaire and a survey of their performance at the end of their first postgraduate year.

Applying for Admission

M.D. Program

M.D. Program

Program Overview

The UMKC School of Medicine offers an opportunity for medical education to students who have obtained, or will soon earn, a baccalaureate degree. This program is the M.D. Program. Students interested in the M.D. Program must apply for admission between May 1 and August 1. If selected for admission, students will begin coursework in January.

Clinical Experience and Physician Interaction

Students join a group of 10 to 12 fellow medical students, called a docent team. Early and continued contact with a team of clinical physicians, known as docents, builds student capacity for clinical judgment. Docent teams include a docent, a clinical pharmacologist, a clinical medical librarian, an Education Team Coordinator and other health care professionals.

Half a day every week for three-and-a-half years, students assist with outpatient care in continuing care clinics at two of our partner hospitals. This clinical assignment provides a continuity of patient care, as well as a wealth of clinical experience, and allows students to work with full-time, hospital-based staff, including physicians, nurses and residents.

Students practice skills through the use of state-of-the art simulators that replicate the human body and human conditions.

Two months a year for the last three years, students join their full docent team for daily ward rounds called DoRo, or docent rotation.

New students are paired with a senior partner who serves as another mentor, allowing advanced students to take additional responsibility. Peer and self-evaluations are used to augment student education and training.

Research

Students have the opportunity to work with faculty in both clinical and research settings. Students involved in research have the opportunity to present their findings each spring at the annual Student Research Summit, and funding is available to support student research projects. The Office of Research Administration facilitates student research programs as well as coordinates supplemental research lectures and seminars.

Service

Students at the UMKC School of Medicine have the opportunity to develop community partnerships, provide community service and reflect upon their experiences. Students participate in service-based programs, such as the Sojourner Clinic, a free outpatient clinic developed and managed by medical students, and the Kansas City Free Eye Clinic.

Core Competencies

Our curriculum utilizes experiences with patients, peers and faculty in clinical settings that develop students who are passionate about medicine. Students learn the skills and attitudes for compassion, honesty and integrity which receive the same priority as scientific and technical skills.

To further develop these skills and attitudes, the School of Medicine uses the following core competencies as the foundation for all educational experiences, as well as the selection of new students.

Interpersonal and communication skills are crucial to a successful doctor-patient relationship. Through immediate and ongoing patient interaction, our students learn to engage with patients, families and other members of the health care team. Our graduates are able to establish a therapeutic relationship with patients, regardless of age or cultural background, and are able to communicate in an effective manner.

It is important for both medical students and graduates to have an acute sense of **professional behavior** during interactions with others in clinical, academic, and co-curricular activities. Students master the professional behaviors of respect, compassion and empathy, altruism, honesty, excellence and accountability. In addition, our students are taught the value of moral reasoning and ethical judgment and learn to identify ethical issues in medicine, evaluate ethical choices, and recommend and defend those choices. Our graduates have the ability to recognize individual patient value systems, while integrating moral reasoning and ethical judgment in the care of patients without compromising their own ethical integrity.

The **medical knowledge** students gain during their four years of medical training allows our graduates to apply both basic and clinical science to understand, explain and solve complex, multi-system problems. Our students receive four years of outstanding clinical education that sets them apart from other medical school graduates, allowing our students greater opportunity to evaluate problems from multiple perspectives and to identify an appropriate and rational solution to address those problems. Additionally, our graduates are able to apply the knowledge, skills and concepts from all scientific perspectives to overall patient care.

By acquiring **practice-based learning and improvement skills**, including how to access and evaluate medical information, students learn how to provide effective up-to-date patient care. Learning how to use evidence-based medicine and skills related to patient safety and continuing quality improvement furthers students' development into graduates competent in practice-based learning.

Through systems-based practice, our graduates are able to actively incorporate psychological, social, cultural and economic factors that influence both individual patients and communities. Our graduates have an increased awareness of the role diversity plays in the context of health care, and use this awareness to benefit patients and serve as better health advocates.

Through a variety of teaching and learning strategies, students acquire the attitudes, knowledge and skills required for **patient care** through time-honored data gathering methods of history-taking and the physical examination, appropriate use and interpretation of tests, identification and in some instances administration of needed procedures, formulation of diagnoses and companion management plans using clinical reasoning and problem-solving skills and provision of patient education. They learn how to care for the full range of patient problems – acute, chronic, emergent, preventative, rehabilitative – in inpatient, outpatient and continuing care settings.

Curriculum

M.D. students enter the medical program and enroll in the Human Structure Function series in January and remain in the program for 52 consecutive blocks. Three distinct curriculum plans have been devised, which allow M.D. students to proceed through the curriculum along one of three possible tracks. Two tracks provide the M.D. students with five blocks of time during which they do not formally enroll. The first track allows M.D. students to elect the five-block leave of absence immediately following completion of USMLE Step 1, and the second track provides for a five-block leave of absence midway through the clinical clerkship sequence. The third track allows M.D. students to complete their 52 blocks of continuous enrollment in December, and does not provide any break during the program other than one block of vacation time per year of enrollment.

Code	Title	Credits
Year 1		
BMS 9296	Human Structure Function I	6
BMS 9297	Human Structure Function II	5
BMS 9298	Human Structure Function III	5
BMS 9311	Medical Microbiology	5
MEDICINE 9220	Fundamentals Of Medical Practice IV	5
MEDICINE 9308	Clinical Practice of Medicine I	3
MEDICINE 9312	Pathology I: General Pathology, Genetics, and Immunology	10
MEDICINE 9383	Continuing Care Clinic	5
MEDICINE 9385	Introduction to Pharmacology	2
MEDICINE 9390	Clinical Correlations	5
Year 2		

MEDICINE 9309	Clinical Practice of Medicine II	5
MEDICINE 9313	Pathology II: Systems-Based Pathology and Pathophysiology	11
MEDICINE 9401	Internal Medicine/Docent Instruction Yr 4	10
MEDICINE 9408	Pharmacology	10
MEDICINE 9471	Family Medicine	5
MEDICINE 9472	Behavioral Science in Medicine	5
MEDICINE 9482	Patient, Physician, Society I	2
MEDICINE 9483	Continuing Care Clinic	5
MEDICINE 9484	Patient, Physician, Society II	2
MEDICINE 9485	Ambulatory Care Pharmacology	2
Year 3		
MEDICINE 9501	Internal Medicine/Docent Instruction Yr 5	10
MEDICINE 9503	Pediatrics Rotation	10
MEDICINE 9505	General Surgery Rotation	10
MEDICINE 9506	Obstetrics-Gynecology Rotation	10
MEDICINE 9570	Family Medicine Preceptorship	5
MEDICINE 9571	Psychiatry Rotation	5
MEDICINE 9583	Continuing Care Clinic	5
MEDICINE 9585	Prescribing for Special Populations	2
Medical Humanities/Social Science Elective		5
Year 4		
MEDICINE 9601	Internal Medicine/Docent Instruction Yr 6	10
MEDICINE 9678	Emergency Medicine	5
MEDICINE 9683	Continuing Care Clinic	5
MEDICINE 9685	Rational and Safe Drug Prescribing	2
Electives ¹		30
Total Credits		222

¹ Students may take six to seven electives in Year 4. Students must complete at least three clinical electives from nine designated categories. One of these electives must also be a critical care elective.

Student Learning Outcomes

Please click here to review the Student Learning Outcomes (<http://med.umkc.edu/docs/catalog/UMKC-SOM-SLO.pdf>)

Graduation Requirements

Approval of each student's curriculum plan is contingent on the following expectations:

1. Continuous enrollment in the School of Medicine for 52 blocks (including four blocks vacation).
2. Four vacation blocks (one per 13 block period) during the 52 blocks of enrollment.
3. Successful completion of 34 blocks of UMKC School of Medicine credit for graduation.
4. Participation in Fundamentals of Medicine IV (MED 9220) concurrent with participation in Human Structure Function.
5. Enrollment in all required School of Medicine rotations and courses with students in Years III through VI of the six-year program including the Patient Physician Society Series and Self-Paced Pharmacology Series.
6. All students will be required to complete a one blocks humanities/social sciences course in the last two years. Any alternative must be petitioned.

Applying for Admission

Please click here to visit the program website (<http://med.umkc.edu/md/apply/>) for information regarding:

Medical Student Organizations, Publications and Awards

Alpha Omega Alpha

The Delta Chapter of the Alpha Omega Alpha Honor Society is an organization open to the no more than 1/6th of the graduating class. In accordance with the national constitution, scholastic achievement should be the primary but not sole basis for election of a student. Leadership capabilities, ethical standards, fairness in dealing with colleagues, potential for achievement in medicine, integrity, compassion, professionalism, conscientiousness, and a record of service to the school and community at large should be criteria considered in addition to the academic record. Memberships are also granted each year to a faculty member, an alum of the school, and a member of the housestaff or fellow each year.

American Medical Association - Medical Student Section

Dedicated to representing medical students, improving medical education, developing leadership and promoting activism for the health of America.

American Medical Student Association

The primary goal of AMSA is the initiation of student-organized projects for the benefit of medical students and the community on local, state and national levels. The development of hypertension clinics, presentations about venereal disease to area high schools, AIDS awareness programs and a drug-replacement program represent some of AMSA's projects in past years.

American Medical Women's Association

The AMWA promotes an understanding of the individual in medicine. Its membership is open to all interested men and women. AMWA's programs include speakers on special topics, field trips, social projects and other activities of benefit to all students.

Association of American Medical Colleges - Organization of Student Representatives

The OSR is the student branch of the Association of American Medical Colleges (AAMC). The OSR is charged with the representation of the undergraduate medical student body of the United States to the academic medical community.

Asian Pacific American Medical Students' Association

The goals of APAMSA are to educate all medical students about health-care needs specific to the Asian Pacific community and to address issues important to Asian Pacific American medical students.

Christian Medical/Dental Society

This group is open to students of all faiths. The organization fosters greater understanding of spiritual concerns in relationship to health and well-being.

Global Medicine Relief Program

GMRP's mission is to promote quality health care in under-served communities around the world by working with local doctors and health care professionals and by providing medical supplies and equipment; to provide dental, hygiene and basic health care supplies in areas of natural disaster; to promote human rights in developing regions by improving health infrastructure; to participate in a global community of organizations which are similarly dedicated to providing health care in developing regions; and to organize student groups at all educational levels in these humanitarian efforts. GMRP especially seeks to touch the lives of the most vulnerable people in any population and believes in the importance of assisting both internally and externally displaced refugees.

Gold Humanism Society

The Gold Humanism Society is sponsored by the Arnold P. Gold Foundation and is closely linked to the Sirridge Office of Medical Humanities.

Medical Student Advisory Council

The MSAC serves as the student government body in the School of Medicine and is comprised of student-elected representatives who focus on promoting student interests, keeping the administration informed of student opinion and organizing social activities. MSAC serves as an umbrella organization for student interest groups in the areas of Anesthesiology, Emergency Medicine, Family Medicine, Geriatric Medicine, Internal Medicine, International Medicine, Med/Peds, Obstetrics/Gynecology, Physical Medicine and Rehabilitation, Psychiatry, Spanish in Medicine, and Surgery

Sojourner Clinic

The Sojourner Health Clinic is a free clinic developed and managed by UMKC Medical Students to provide outpatient care to the homeless and underprivileged population served by Grand Avenue United Methodist Temple. On Sunday afternoons, the students, with faculty supervision, provide acute and chronic medical care to the Sojourners of downtown Kansas City, many of whom also are served a free hot lunch at Grand Avenue Temple.

Student National Medical Association

The promotion of the interests of minority students is the foundation of the SNMA. Leadership development, social awareness, service to humanity and excellence as physicians are the major objectives of this group

Student Wellness Council

The Student Wellness Council promotes healthy habits and wellness amongst UMKC School of Medicine students

Publications

A monthly publication of the school, P.R.N., provides information on school programs, policies and student activities and is distributed online to School of Medicine students, their families and faculty. A quarterly magazine, Panorama, is primarily distributed to alumni, affiliated hospitals and friends of the school and is available throughout the school.

Philosophy

The fundamental purpose of medical schools is to educate physicians. The prime objective of all professionals, physicians included, is to apply a sophisticated body of knowledge and skills to the solution of problems faced by people. In doing so, the individual will follow standards of the profession for competence, ethics and communication and will demonstrate commitment to the principles of professionalism - altruism, humanism, excellence and accountability.

The school does not separate the several obligations of a medical school: to educate the student, the house officer and the physician; to attract new talent to the health-care field and to ensure that talent remain active and prepared; to maintain maximum standards of ethics and care; to have concern equally for the individual and for the community; and to foster inquiry, to find answers and to apply those answers.

Requirements for Graduation in the B.A. - M.D. Combined Program

B.A./M.D. Program

In order to graduate from the UMKC School of Medicine B.A./M.D. Program, students must complete the following graduation requirements. Baccalaureate Degree

- Students must select an undergraduate B.A. major or emphasis area from a variety of disciplines
- The most common baccalaureate degrees are in liberal arts, biology, chemistry, communication studies, philosophy, psychology and sociology.
- Students may earn up to 30 semester hours of college credit through the Advanced Placement Program, International Baccalaureate Program or specific subject-area examinations of the College Level Examination Program (CLEP).
- Students must satisfactorily complete a minimum of 90 semester hours of non-medical courses on the UMKC Volker campus in the following subject areas: English, fine arts, government, history, humanities, literature, natural science, philosophy and social/behavioral science.
- Thirty additional semester hours toward the baccalaureate degree are awarded from required concurrent medical coursework.
- Students enrolled in the combined degree program at UMKC are required to complete a minimum of 38 hours of credit through the College of Arts and Sciences and/or the School of Biological Sciences subsequent to matriculation into the B.A./M.D. program regardless of the amount of previous credit earned.

Doctor of Medicine Degree

Students in the combined B.A./M.D. program must have satisfactory completion, certified by the UMKC registrar, of requirements for the baccalaureate degree and 38 months of medical curriculum credit.

- Students must achieve Certification in Advanced Cardiac Life Support.
- Students must receive docent certification of clinical competence.
- Student must earn a cumulative GPA of 2.8 – 4.0.
- Students must earn passing scores on Step 1 and Step 2 CS & CK of the United States Medical Licensing Examination (USMLE).
- Students must complete 48 months of enrollment in the School of Medicine, Years 3 – 6.
- At least three clinical electives are required and these must come from a minimum of three of the nine School of Medicine approved clinical elective categories. One of these electives must be a critical care elective.
- Students are expected to evaluate the quality of their experiences through course and performance evaluations, a graduation questionnaire and a survey of their performance at the end of their first postgraduate year.

Residency & Subspecialty Programs

Residencies & Subspecialty Fellowships

See information about Residencies & Subspecialty Fellowships on the Graduate Medical Education Page >>>> (<http://med.umkc.edu/gme/residencies-and-fellowships/>)

Student Learning Outcomes for Six Year B.A.-M.D. Program

Years 1-2

Effective Communication

- The student demonstrates competence in written communications such as laboratory reports, term papers and other classroom writing assignments.
- The student demonstrates competence in oral communications in a one-on-one setting, such as introducing and beginning a history with an individual patient. History-taking skills at this level will be very basic and straightforward.
- The student demonstrates effective listening skills with faculty members, other students and patients.

Clinical Skills

- The student is able to perform the basic elements of a history. The student will have observed a physical examination and observed some of the routine clinical procedures.

Using Basic Science in the Practice of Medicine

- The student has an introductory and very general understanding of anatomy and microbiology.
- The student has a more advanced understanding and an ability to apply some information to a few clinical situations in biochemistry and physiology.

Diagnosis, Management and Prevention

- The student has an introductory understanding of principles of diagnosis, management and prevention.
- The student is able to identify general, rather than specific approaches to management, but is usually not expected to carry them out in real settings.

Lifelong Learning in Medicine, Basic Sciences, the Social Sciences and the Humanities

- The student is proficient in framing a question, utilizing modern information searching modalities, organizing data, compiling and using information to answer the question in the context of a structured setting, such as an undergraduate course.
- The student has an introductory knowledge of the humanities and social science. Enough information is learned at this level to stimulate the student to desire further learning in medicine, humanities and social sciences.

Self-awareness, Self-care, Personal Growth and Professional Behavior

- The student exhibits behaviors indicative of personal self-awareness through a process of self reflection. Students are able to identify potential areas of weakness and are able to conceive of potential options for addressing these areas.
- The student is able to identify areas of strength and is able to build on these strengths.
- The student is able to set goals for a self-study plan.
- The student is aware of his/her personal growth in regards to age specific developmental tasks.
- The student knows the elements of professional behavior and can explain the meaning of each element.
- The student can cite an example of how each of the elements applies in Year 1 and Year 2 coursework for the baccalaureate and M.D. degree.

- The student shows courteous regard for other students and faculty and acknowledges the views of others. The student shows courteous regard for his/her mentor on aging and for the patients they meet in their docent group experiences. The student interacts with patients they meet in their docent group experiences in an appropriately compassionate fashion. The student expresses empathy for his/her mentor on aging as appropriate.
- The student puts the legitimate needs of his/her mentor on aging, patients, docent group members and study group members first before his/her own needs.
- The student demonstrates academic honesty in all aspects of his/her coursework for the baccalaureate-M.D. degree.
- The student carries through on assignments and other responsibilities; arrives promptly for meetings or classes; accepts personal responsibility for group projects; and completes course evaluations in a timely and thoughtful fashion.
- The student searches out opportunities to learn and tries to excel in their coursework.

Diversity and the Social and Community Contexts of Health Care

- The student appreciates some of the non-biological factors that influence health, disease, disability and access to care.
- The student attributes proper importance to identifying non-biological factors.
- The student is aware of different value systems and life styles.

Moral Reasoning and Ethical Judgment

- The student can identify and apply ethical considerations relating to professional behavior and student conduct as a forerunner to professional behavior.
- The student develops an introductory understanding of ethical choices related to a few controversial medical issues.

Problem-Solving Skills

- The student displays competence in basic problem-solving skills as applied to basic science courses or simple, straightforward medical problems.

Years 3-4

Effective Communication

- The student develops and demonstrates competency in using the written language effectively by:
 - Medical record documentation in the continuing care clinic and on docent rotation.
 - Writing papers for courses and rotations.
 - Essay examinations in medical ethics.
- The student develops and demonstrates competency in using oral language and listening effectively by:
 - Communicating with patients and families in the continuing care clinic and on docent rotation.
 - Communicating with senior partners, peers and faculty.
 - Functioning as an effective junior partner.

Clinical Skills

- The student is able to perform a comprehensive history and physical examination of patients in the outpatient setting and the general medical wards, excluding critical care settings.
- The student is competent in performing venipuncture and basic CPR.
- The student is able to perform a gram-stain, vaginal smear wet prep, stool occult blood, urinalysis, urine pregnancy test, finger stick glucose determination and peak expiratory flow rate.
- The student has observed and is familiar with some of the more complex or specialized lab and diagnostic tests.
- The student knows the basics in the interpretation of plain x-ray studies; chest x-ray, abdominal x-ray.

Using Basic Science in the Practice of Medicine

- The student applies knowledge in the areas of behavioral science, anatomy, pathology, biochemistry, physiology, microbiology and immunology, and pharmacology to the overall care of patients.

Diagnosis, Management, Continuing Care and Prevention

- The student is able to interpret standard diagnostic studies and history and physical examination data. From these data, the student is able to state the most likely diagnosis when presented with straightforward presentations of common problems in general internal medicine. The student is expected to carry out management plans in those situations that are relatively straightforward and uncomplicated.

Lifelong Learning in Medicine, Basic Sciences, the Social Sciences and the Humanities

- The student is able to do a computerized literature search as it applies to patient problems.
- The student is able to comprehend the medical literature and understand basic statistics and the scientific method.
- The student is continually motivated by an awareness of the limits of his/her personal knowledge and experience.

Self-awareness, Self-care, Personal Growth and Professional Behavior

- The student is reflective about him or herself in a group context.
- He or she is able to confront his/her own values as they relate to the practice of medicine.
- The student is able to identify real situations of stress and his/her response to these situations.
- The student is able to practice personal techniques for relaxation and time management and can modify behavior and respond to constructive criticism.
- The student is able to identify learning needs, plan a program to meet those needs and determine how well they have met them and what further learning issues they need to address.
- The student identifies the elements of professional behavior and can explain the meaning of each element: respect, compassion and empathy, altruism, honesty, responsibility, and excellence. The student can give an example of how each of the elements of professionalism applies to Year 3 and Year 4 coursework for the baccalaureate and MD degrees and actively demonstrates them by behavior.
- The student shows courteous regard for patients, students, faculty, and members of the health care team and acknowledges their views.
- The student interacts with patients, patients' families, and members of the health care team in an appropriately empathic and compassionate fashion.
- The student contributes to the docent team and other small groups by sharing knowledge and skills, expressing positive attitudes and accepting help from others to address his/her deficiencies.
- The student recognizes how potential conflicts between his/her own needs and the legitimate needs of patients, docent group members, and study group members might be resolved and can discuss a rationale for alternative resolutions.
- The student is honest in all aspects of coursework for the baccalaureate-MD degree and takes responsibility for his/her errors in the patient care setting after discussion with supervisors.
- The student carries through on assignments and other responsibilities; arrives promptly for meetings, classes, rounds and clinics; accepts personal responsibility for group projects and for assigned patients; and completes course evaluations in a timely and thoughtful fashion.
- The student searches out opportunities to learn, demonstrates lifelong learning skills, and tries to excel in coursework and scholarship.

Diversity and the Social and Community Contexts of Health Care

- The student elicits and identifies non-biological factors as part of the routine history taking and includes those issues, as appropriate, in the problem list formulations and management plans.
- The student takes personal responsibility for discussing these issues with patients, assessing their needs and matching them to appropriate community resources.
- The student works with his/her individual patients and families to enhance their total well-being.

Moral Reasoning and Ethical Judgment

- The student is able to employ ethical concepts and reasoning when presented with typical ethical cases in medicine, and is able to recognize ethical issues in medical practice.

Problem-Solving Skills

- The student displays competence in problem-solving skills with common clinical problems utilizing a limited knowledge base.

Years 5-6

Effective Communication

- The student develops and demonstrates competency in using the written language effectively by:
 - medical record documentation on clinical rotations.
 - preparing written patient education material.
 - writing clinical papers.
 - journals, short stories, papers or poetry during medical humanities and social science courses.
- The student develops and demonstrates competency in using oral language and listening effectively by:
 - communicating with patients and families in the continuing care clinic and clinical rotations.
 - presenting new patients to faculty in continuing care clinic and clinical rotations.
 - delivering lectures on clinical rotations utilizing slides and handouts.

- communicating with student partners, peers, faculty and the health care providers.
- oral examinations.
- The student develops and demonstrates competency in respecting patients and sharing information effectively with patients, families and health care team members by:
 - interacting with the individuals on clinical rotations and the continuing care clinic.
 - working as an integral part of the docent team and teams on other clinical rotations.
 - functioning as an effective senior student partner.

Clinical Skills

- The student is able to perform the basic and emergency elements of a history and physical examination smoothly and efficiently in the outpatient setting, inpatient setting, critical care setting and emergency department settings.
- The student is able to perform and interpret basic clinical procedures, laboratory and diagnostic tests smoothly and efficiently as listed.
- The student is able to describe the procedural steps necessary to carry out advanced clinical procedures as listed.
- The student observes and is able to state the indications, complications, and limitations of advanced clinical procedures as listed.
- The student is aware of the indications, complications and limitations of and interpret from the written reports complex and specialized laboratory and diagnostic tests as listed.

Using Basic Science in the Practice of Medicine

- The student is able to explain a multi-system health problem in terms of pathogenesis, mechanisms of system-to-system interactions and potential complications. The student is able to present therapeutic goals and interventions aimed at the multiple pathophysiological forces in motion.
- The student is able to exhibit clinical decision analysis that weighs the pros and cons of proposed interventions, taking into consideration such factors as drug-drug interactions and the trade-off of proposed drug interventions in the context of multi-system problems.

Diagnosis, Management, and Prevention

- The student is able to state the most likely diagnosis and management plan when presented with presentations of common problems in any of the major disciplines.
- The student is able to integrate the approach of care to individuals, families and communities, taking advantage of opportunities for prevention and education in addition to the immediate physical care.
- The student through his/her experiences in the continuing care clinic is able to provide continuing care and management for both chronic and acute medical problems and provide appropriate plans for prevention.

Lifelong Learning in Medicine, Basic Sciences, the Social Sciences and the Humanities

- The student begins to explore new opportunities for intellectual growth and professional enlightenment in medicine, the social sciences and humanities.
- The student attends a continuing medical education course.
- The student continues to recognize his/her limits of knowledge and experience.
- The student is able to recognize the significance of valid scientific discoveries reported in medical journals and recognize unsubstantiated, inaccurate or poorly performed studies and conclusions.

Self-awareness, Self-care, Personal Growth and Professional Behavior

- The student utilizes skill in coping with stress during clinical rotations.
- The student develops and demonstrates appropriate personal values and beliefs relevant to his/her practice of medicine.
- The student identifies the elements of professional behavior and can explain the meaning each element: respect, compassion and empathy, altruism, honesty, responsibility, and excellence.
- The student gives examples of how each of the elements of professionalism applies to Year 5 and Year 6 coursework for the baccalaureate and MD degrees and actively demonstrates them by behavior. He/she teaches these elements of professional behavior to junior students by explicit role modeling.
- The student shows courteous regard for patients, student, faculty and health care team members, and acknowledges their views. He/she teaches respect for other people to junior students by explicit role modeling.
- The student interacts with patients, patient families and members of the health care team in an appropriately empathic and compassionate fashion. He/she teaches compassion and empathy to junior students by explicit role modeling.
- The student contributes to the docent team and other small groups by exercising effective leadership and active teaching of teamwork.
- The student resolves potential conflicts between his/her own needs and the legitimate needs of his/her patients or health care team members appropriately and can discuss a credible rationale for the resolution.

- The student is honest in all aspects of coursework for the baccalaureate-MD degree and takes responsibility for his/her errors in the patient care setting after discussion with little or no supervision.
- The student carries through on assignments and other responsibilities; arrives promptly for meetings, classes, rounds and clinics; accepts personal responsibility for group projects and for assigned patients; and completes course evaluations in a timely and thoughtful fashion. He/she teaches junior students about responsibility through explicit role modeling.
- The student searches out opportunities to learn, demonstrates lifelong learning skills, and endeavors to excel in coursework and scholarship. He/she teaches junior students about life learning.

Diversity and the Social and Community Contexts of Health Care

- The student is able to identify and propose solutions for non-biological factors that influence health, disease, disability and access to care.
- The student is able to utilize resources in the community that may provide assistance to his or her patients.
- The student is an advocate for better health for the patients and the community.
- The student demonstrates knowledge of practice management, utilization review, quality improvement and economic and cultural issues in health care.

Moral Reasoning and Ethical Judgment

- The student is able to identify patient care and health policy ethical issues and choices in his or her own clinical experience; to evaluate critically alternative ethical courses of action by analyzing and articulating reasons for the relative importance of the different ethical considerations bearing on each choice; to select and ethically defend a course of action.
- The student recognizes the importance of the ethical treatment of research subjects and the functions of an Institutional Review Board.

Problem Solving

- The student displays competence in more advanced clinical problem solving using a comprehensive knowledge base.
- The student can effectively utilize a team approach in solving clinical problems.

Typical Six-Year Program of Study

Graduation Plan - Courses & Critical Benchmarks for First Time College Students:

The following is a sample course of study. Your path to graduation may vary based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning, and placement in Mathematics. You are responsible for checking prerequisites to any courses. It is the Student's responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement.

Students in the six-year program can choose from three undergraduate degrees as shown below: **Bachelor of Arts in Biology, Bachelor of Arts in Chemistry, or Bachelor of Liberal Arts**. Undergraduate degrees are conferred by either the School of Biological & Chemical Sciences or the College of Arts & Sciences, as appropriate for the declared undergraduate program.

CC Critical Courses provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

6 Year BA/MD Program - Bachelor of Arts in Biology

Please Note:

- AP, IB, CLEP, or transfer credit may be applied to select courses below. See UMKC Registration and Records for details.
- Students may satisfy the ENGLISH 110 requirement with ACT English subscore of 30 or above or SAT verbal subscore of 690 or above.
- **One of the following courses must be completed before beginning the 6-year combined degree curriculum in order to be able to complete the BA Biology:** BIOLOGY 108+108L General Biology with lab (4 cr, min grade B) *OR* CHEM 211 + 211L General Chemistry I with lab (5 cr, min grade B)

6 Year BA/MD Program - Bachelor of Arts in Chemistry

Please Note:

- AP, IB, CLEP, or transfer credit may be applied to select courses below. See UMKC Registration and Records for details.
- Students may satisfy the ENGLISH 110 requirement with ACT English subscore of 30 or above or SAT writing subscore of 690 or above.
- **The following courses must be completed before beginning the 6-year combined degree curriculum in order to be able to complete the BA Chemistry:**
 - PHYSICS 210 General Physics I AND PHYSICS 220 General Physics II OR PHYSICS 240 Physics for Sci/Engr I AND PHYSICS 250 Physics for Sci/Engr II (4-5 cr, min grade B)
 - MATH 210 Calculus I OR STAT 235 Elementary Statistics (3-4 cr, min grade B)

6 Year BA/MD Program - Bachelor of Liberal Arts

Please Note:

- AP, IB, CLEP, or transfer credit may be applied to select courses below. See UMKC Registration and Records for details.
- Students may satisfy the ENGLISH 110 requirement with ACT English subscore of 30 or above or SAT writing subscore of 690 or above.
- Students may satisfy the MATH 110 or higher requirement with ACT Math subscore of 28 or above or SAT math subscore of 660 or above.
- BLA students MUST complete a minor. Most BA/MD students complete the chemistry minor and the following classes will count toward that: CHEM 211, CHEM 211L, CHEM 212R, CHEM 212LR, CHEM 320, CHEM 320L, BMS 9265, and a 3xx/4xx CHEM elective.

Faculty

Eduardo Abreu^{2,3}; Professor of Nursing; B.S., M.S. (Federal University Rio de Janeiro); M.D. (State University Rio de Janeiro); D.Eng. (Cleveland State University).

Eileen Amari-Vaught; Clinical Associate Professor of Nursing; B.S. (University of Scranton); B.S.N., M.S.N. (University of Kansas); Ph.D. (University Tennessee - Knoxville).

Marti Anselmo; Clinical Instructor of Nursing; B.S.N. (Central Missouri State University); M.S.N. (University of Missouri-Kansas City).

Cheri Barber; DNP Program Director and Clinical Assistant Professor of Nursing; B.S.N. (Immaculata University); M.S.M. (Drexel University); D.N.P. (University of Missouri-Kansas City).

Bella Michelle Birdashaw; Clinical Instructor of Nursing; B.S.N. (Washburn University); M.S.N., D.N.P. (University of Kansas).

Margaret Brommelsiek; Assistant Professor of Research, Director of Inter-professional Education, Health Sciences Schools; B.A. (Eckerd College); M.S., Ph.D. (Florida State University).

Lorraine Buchanan; Clinical Assistant Professor; B.S.N.

Danna Calvin-Weeks; Clinical Assistant Professor of Nursing; B.S.N (University of Missouri-Columbia); M.S.N. (University of Missouri-Kansas City).

Matthew Chrisman; Teaching Assistant Professor of Health Sciences; B.S. (Missouri Western State University); M.S. (Kansas State University); Ph.D. (University of Iowa).

Vance Crain; Clinical Assistant Professor of Nursing; B.S.N., M.S. (University of Kansas); D.N.P. (University of Missouri-Kansas City).

Amber Davies; C.R.N.A. Program Director and Clinical Assistant Professor of Nursing; B.A. (Rockhurst University); B.S.N. (Research College of Nursing); M.A., D.N.P. (University of Missouri-Kansas City).

Erin Ellington²; Clinical Assistant Professor; B.A. (Western Kentucky University); M.S.N. (Vanderbilt University); D.N.P. (University of Missouri-Kansas City).

Sally N. Ellis Fletcher; Associate Dean for Students; B.S.N. (Avila University); M.S.N. (University of Missouri-Kansas City); Ph.D. (University of Rochester).

Amanda Emerson^{2,3}; Assistant Professor of Nursing; Ph.D. (University of Missouri-Kansas City).

Stacy Farr; Assistant Teaching Professor of Health Sciences; B.S. (Nebraska Wesleyan University); MPH (University of Kansas School of Medicine); Ph.D. (Johns Hopkins Bloomberg School of Public Health).

Susan Garrett; Assistant Teaching Professor; B.A. (University of Missouri-Kansas City); M.P.H. (University of Kansas Medical Center).

Martha Goodwin; Clinical Instructor of Nursing; B.S.N. (University of Kansas); M.S.N. (University of Colorado).

Heather J. Gotham³; Associate Research Professor; B.A. (University of Wisconsin-Stevens Point); M.A. (New School for Social Research); M.S., Ph.D. (University of Missouri-Columbia).

Amanda Grimes^{2,3}; Teaching Assistant Professor of Health Sciences; B.S. (Southeast Missouri State University); M.S., Ph.D. (University of Arkansas).

Brandi Guetterman; Clinical Assistant Professor of Nursing; B.S.N. (University of Kansas); M.A., D.N.P. (University of Missouri-Kansas City).

Penny Hamdi; Clinical Assistant Professor; B.S.N.

Jamie Hatchette; Clinical Assistant Professor; B.S.N.; M.S.N.

Jamie Hunt; B.H.S. Program Director and Teaching Associate Professor of Health Sciences; B.S. (University of Arkansas); M.S.Ed., Ph.D. (University of Kansas).

Paige Johnson; Clinical Assistant Professor; B.S.N.

Susan J. Kimble²; D.N.P. Program Director and Clinical Associate Professor of Nursing; B.S.W. (University of Nebraska); B.S.N., M.S.N., D.N.P. (University of Missouri-Kansas City).

Laura Lamphear; Clinical Assistant Professor of Nursing; B.S.N. (St. Luke's School of Nursing); M.S.N. (Mid America Nazarene University).

Sue Lasiter^{2,3}; Ph.D. Program Director and Associate Professor; B.S.N.; M.S.N.; Ph.D.

Kristin C. Lee; Interim Associate Dean and Pre-licensure and Accelerated B.S.N. Program Director and Clinical Assistant Professor of Nursing; B.S.N. (Purdue University); M.S.N. (University of Missouri-Kansas City).

Lyla Lindholm²; Clinical Assistant Professor of Nursing; B.S.N. (Washburn University); M.S.N. (University of Kansas); D.N.P. (University of Missouri-Kansas City).

Mark Lipari; Clinical Assistant Professor of Nursing; B.S.N. (Avila College); M.A., D.N.P. (University of Missouri-Kansas City).

Martha Lofgreen; Clinical Assistant Professor of Nursing; B.S.N. (University of Kansas); M.S.N. (University of Missouri-Kansas City).

Brenda Miller; Clinical Instructor; B.S.N.

Tho Kim Nguyen; Clinical Assistant Professor of Nursing; B.S.N. (University of Kansas); M.S.N. (University of Missouri-Kansas City).

Gregory L. Osterhaus; Assistant Professor of Nursing; Ph.D. (University of Kansas).

Debra Pankau; Clinical Instructor; B.S.N.; M.S.N., Ph.D. (University of Missouri-Kansas City).

Jane Anthony Peterson; Clinical Associate Professor of Nursing; B.S. (Kearney State College); M.S.N. (Texas Woman's University); Ph.D. (University of Nebraska Medical Center).

Cheryl Pilsl; Clinical Assistant Professor of Nursing; B.S.N. (Northwest Missouri State University); M.A., D.N.P. (University of Missouri-Kansas City).

Kelli Pryor; Clinical Assistant Professor of Nursing; B.S.N. (University of Missouri-Columbia); M.A., D.N.P. (University of Missouri-Kansas City).

Wallace Ralston; Clinical Assistant Professor of Nursing; B.S.N. (University of Kansas); M.A., D.N.P. (University of Missouri-Kansas City).

Lynn M. Rasmussen²; Assistant Clinical Professor of Nursing; B.S.N., M.S.N. (University of Kansas); Ph.D. (University of Missouri-Kansas City).

Daphne A. Reavey^{2,3}; Clinical Instructor of Nursing; B.S.N. (University of Kansas); M.S.N., Ph.D. (University of Missouri-Kansas City).

Melissa Joy Roberts; Dean and Assistant Professor of Nursing; B.S.N., M.S.N. (University of Missouri-Columbia); J.D. (University of Missouri-Kansas City).

Jana E. Rudigier; Clinical Instructor of Nursing; B.S.N. (University of Kansas); M.S.N. (University of Missouri-Kansas City).

Cynthia L. Russell^{2,3}; Professor of Nursing; B.S.N., M.S.N. (Rush University); Ph.D. (Saint Louis University).

Carol E. Schmer²; Ph.D. Program Director and Clinical Assistant Professor of Nursing; B.S.N., M.S.N., Ph.D. (University of Missouri-Kansas City).

Jennifer Schwarz; Clinical Assistant Professor of Nursing; B.S.N. (University of Kansas); M.A., D.N.P. (University of Missouri-Kansas City).

Renee M. Semarge; Teaching Assistant Professor of Health Sciences; B.A. (University of Kansas); M.P.H. (University of Kansas School of Medicine).

Anita J. Skarbek²; R.N.-B.S.N. Program Director and Clinical Assistant Professor of Nursing; B.S.N., M.S.N. (University of Missouri-Kansas City); Ph.D. (Walden University).

Lorene L. Stephan; Clinical Assistant Professor of Nursing; B.S.N. (Fort Hays State University); M.S.N., D.N.P. (University of Kansas).

Denise Stuit; Clinical Assistant Professor of Nursing; B.S.N. (Dordt College); D.N.P. (University of Iowa).

Dipti P. Subramaniam; Teaching Assistant Professor in the School of Nursing and Health Studies, B.S. (University of Tulsa), M.P.H., Ph.D. (Saint Louis University)

Ellen Tappero; Clinical Instructor of Nursing; B.S.N. (University of South Carolina); M.N. (University of California-Los Angeles); D.N.P. (Arizona State University).

Laura J. Thiem; Program Director and Clinical Assistant Professor of Nursing; B.S.N. (Norfolk State University); M.S.N. (Old Dominion University); Post Master's Certificate (University of Missouri-Columbia).

Lyn E. Vargo; Clinical Assistant Professor of Nursing; B.S. (Purdue University); B.S.N., M.S.N. (St. Louis University); PhD. (University of Missouri-St. Louis).

Brenda G. Walker-Williams; Clinical Instructor in Nursing; B.S.N., M.S.N. (Webster University).

Peggy Ward-Smith^{2,3}; Associate Professor of Nursing; B.S.N. (Rush University); M.S.N. (St. Xavier University); M.S. (Avila University); Ph.D. (University of Missouri-Kansas City).

Nancy Willis-Smith²; Clinical Assistant Professor of Nursing; B.S.N. (Pittsburg State University); M.S.N. (University of Kansas); D.N.P. (University of Missouri-Kansas City).

Jacquelyn S. Witt; Clinical Associate Professor of Nursing; B.S.N. (Central Missouri State University); M.S.N., J.D. (University of Missouri-Kansas City).

Janet Wood; Clinical Assistant Professor; B.S.N., D.N.P.

Christine M. Zimmerman²; Clinical Instructor of Nursing; B.S.N. (Creighton University); M.S.N., Ph.D. (University of Missouri-Kansas City).

Health Sciences Courses

HLSC 100 Student Success Strategies Credit: 1

Topics will include setting goals for academic success, anticipating obstacles, problem solving solutions, and time management. Students will practice improving their listening, note-taking, and reading skills. They will practice communication, public speaking, and writing skills. Students will begin self-evaluation strategies to learn more about their motivation for successfully completing their academic program.

HLSC 101 Introduction to Health Sciences Credits: 2

This course introduces students to career options in health sciences. Students will explore basic concepts related to understanding one's role and scope of practice, professional responsibilities, and education and credentialing requirements for various careers in health. The course will explore basic concepts required by any health professional including history, safety, ethics, interpersonal skills, general well-being, as well as special skills and aptitudes required in various health career clusters. Students will explore health career paths in medical, government, business, non-profit, and many other sectors.

HLSC 110 Personal Wellness Credits: 3

This course presents an overview of health behaviors and actions needed to achieve a combination of physical, mental, and social well-being through intelligent lifestyle choices. Effective strategies for staying healthy and improving one's health will be explored. Elements of stress management, preservation of physical and mental well-being, personal hygiene and strong social relationships will be discussed.

HLSC 120 Anatomy & Physiology I Credits: 4

This course examines the structure and function of the human body from the molecular to the organism level as they interact among all body systems across the life span. Instructors also attempt to correlate course materials with the clinical aspects of the application of physiological knowledge. Co-requisite laboratory exercises provide practical application of theoretical concepts. In this first term of two-term course, molecular biology, biochemistry, cellular biology, and histology are studied as well as the integumentary, musculoskeletal, and nervous systems.

HLSC 125 Medical Terminology Credit: 1

This course is designed to provide the student with a foundation in medical terminology and the components of health records. Course content will include how medical terms are formed; how medical terms are applied to organs, body systems and pathological conditions; how common medical abbreviations are used; and how health records are organized and compiled.

HLSC 160 Anatomy and Physiology II Credits: 4

This course is a continuation of HLSC 120. Co-requisite laboratory exercises provide practical application of theoretical concepts. Physiologic systems including endocrine, cardiovascular, immune, respiratory, digestive, renal, and reproductive are studied as well as embryology and genetics.

Prerequisites: HLSC 120 or NURSE 120.

HLSC 200 First Aid / CPR Credit: 1

This course is designed to certify students with the American Heart Association (AHA) in Basic Life Saving for Healthcare Providers and bloodborne pathogens. Students will be exposed to critical concepts of high quality Cardiopulmonary Resuscitation (CPR), the AHA's Chain of Survival, and 1 and 2 rescuer CPR and Automatic External Defibrillator (AED) for adult, child and infants. Bag-mask technique, rescue breathing, relief of choking will be covered. Adult and pediatric first aid basics, medical emergencies, injury emergencies, and environmental emergencies will be covered. The course will include information on bloodborne pathogens (protection, action, proper cleaning and reporting).

HLSC 230 Health Issues in Aging Credits: 3

This course focuses on promotion and maintenance of the health and well-being of the older adult population. Current trends and needs of the ever changing and diversifying older adult population are discussed. The physiological and psychological domains, socio-cultural influences, legal and ethical issues, and health care resources pertaining to older adults in relationship to their health and quality of life are explored. Assessments, problems and strengths, interventions, and outcomes specific to the older adult population are discussed. Opportunities are provided for interaction with the older adult population through service learning.

HLSC 252 Human Growth and Development Credits: 3

This course provides a basic introduction to the theory for human growth and development across the life span. Emphasis is placed upon the biological and the psychosocial aspects of growth and development. Content is organized in a modified chronological order dividing information into major stages of growth and development across the lifespan.

HLSC 252 - MOTR PSYC 200: Lifespan Human Development

**HLSC 255 Spanish for Health Care Pre-Professionals Credits: 3**

This course focuses on conversational Spanish, medical terminology in Spanish, and written/read Spanish. This course will provide the student with basic knowledge that will allow communication with clients who speak/read/write Spanish. This is a fast paced course and will require practice of the language outside of the classroom in order to master the material presented. Recommended preparation: SPANISH 110.

HLSC 300 Diversity in Health Credits: 3

This course will explore social determinants of health, i.e. how social, cultural, political, historical, and economic influences shape the individual's own values, beliefs, and behaviors. This course expands students' basic knowledge of cultural diversity to provide special focus on health disparities among marginalized populations. Students will examine diversity by exploring health inequities related to race and ethnicity, immigration status, disabilities, gender, access, poverty, sexual identity, and veteran status. The course includes experiential learning with organizations focused on reducing health disparities.

Prerequisites: HLSC 101 or PBHL 158.

HLSC 310 Healthcare Systems Credits: 3

The course is designed to provide a description and overview of the organization, financing, and delivery of healthcare in the United States. The historical background and the impact of socio-political, economic, and cultural influences will be explored. The purpose of the course is to provide a framework of understanding of the healthcare system through examination of public and private sectors, market competition, and government regulation. Major issues currently facing the healthcare system will be examined.

Prerequisites: HLSC 101 (or co-requisite) or PBHL 158 (or co-requisite).

HLSC 315 Health Literacy Credit: 1

In this course participants will explore the fundamentals of health literacy and demonstrate the impact on health outcomes. Students will be introduced to tools that health care professionals can use to assess the health literacy of their patients/clients. Tools and resources to provide health information at the correct health literacy level will be presented. Students will explore interventions that can increase an individual's health literacy.

HLSC 323 Bluford Healthcare Leadership Institute Phase I Credits: 3

This course is a leadership development program designed to expose students to dynamic leadership principles while analyzing challenging issues in today's healthcare landscape with leading national and local executives in the field. Topics covered include social determinants of health, delivery of healthcare in the U.S., for profit and not for profit healthcare systems, public health, public policy, and health law. The course includes site trips to an urban core safety net hospital and its behavioral health department, a community health center, and a healthcare informational technology corporation among others. Students will need to be accepted into the Bluford program to take this course.

HLSC 325 Human Sexuality Credits: 3

This course is designed to introduce students to the field of human sexuality. Course content will include sexual anatomy and physiology, sexuality across a life-span, sexually transmitted infections, contraception, pregnancy and childbirth, sexual orientation, love and relationships, sexual therapy, sex education, gender identity and gender roles and social and legal issues related to sex. Recommended preparation: HLSC 110.

HLSC 345 Quantitative Analysis in the Health Sciences Credits: 3

This course focuses upon the skills required for the utilization of scientific findings in evidence-based care. The conceptual basis of descriptive and inferential statistics found in the properties of the normal distribution, comprise the core of these skills. Using the normal distribution as a structure for understanding descriptive and inferential procedures, the course presents information necessary to the selection, computation and interpretation of basic statistics relevant to evidence based-care in the health sciences. Discussions of variables, measurement and tabular and graphic presentation of data precede the development of computation skills.

Prerequisites: MATH 110 or MATH 116 or STAT 115 or MOTRMATH 110 or higher level math course; or ALEKS score of 61 or higher; or ACT Math sub-score of 28 or higher; or SAT Math sub-score of 660 or higher.

HLSC 403A Comparative Weight Loss I Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Specific topics that will be addressed include risks of overweight/obesity; common psychological issues for the overweight/obese; societal perceptions and barriers for overweight/obese individuals. This course consists of one hour of didactic work with one module per week for four weeks.

HLSC 403B Comparative Weight Loss II Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Comparison of common medically recommended diets and diet programs and their efficacy/risks; exercise requirements for weight loss and weight maintenance. This course consists of one hour of didactic education with one module per week for four weeks.

Co-requisites: HLSC 403A.

HLSC 403C Comparative Weight Loss 3 Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Comparison of pharmacologic weight loss options and their efficacy/risks; non-prescription medications/nutraceuticals for weight loss and their efficacy/risks; and bariatric surgeries and efficacy/risks. This course consists of one hour of didactic work with one module per week for four weeks.

Co-requisites: HLSC 403A.

HLSC 404 Introduction to Social Justice Credit: 1

This course is designed to increase a student's knowledge regarding personal and social biases based on race, ethnicity, culture, religion, age, sex, sexual orientation, social and economic status, political ideology, disability and how these entities contribute to social injustice. The focus of the course will center on issues involving diversity, prejudice and oppression that impacts social justice. During the course, students will be introduced to tools for developing social justice literacy in order to take action towards establishing a more just society.

HLSC 408 Gender, Health and Development in Senegal Credits: 3

This course examines women's economic empowerment, health education initiatives, philanthropy, and social entrepreneurship in West Africa and Senegal in particular. In the main city of Dakar we will visit indigenous and global nonprofits to study their policies and processes. The culture, both urban and rural, will be experienced in order to provide a unique perspective on the Senegalese and their culture.

Prerequisite: Departmental consent.

HLSC 410 Epidemiology Credits: 3

This course is an introduction to epidemiology with an emphasis on applications in public health. Students will learn basic principles of epidemiology, including the relationship of simple statistics to epidemiology and public health, methods of disease investigation, epidemiological study designs and their uses and measures of effects. Through the course, students will be able to apply measures of disease incidence and prevalence, and explain the uses of screening tests and criteria for their evaluation, including measures of validity. The class will explore epidemiology in environmental health and social sciences.

Prerequisites: HLSC 101 or PBHL 158; HLSC 345, NURSE 345, or STAT 235.

HLSC 417 Information Systems and Technology for Improved Health Care Credits: 3

This course provides a basic introduction to health information technology across health care settings. Students will acquire an understanding of key concepts associated with health informatics and network models, systems and management strategies, health information strategic planning, clinical and public health application, data retrieval and analytics, public policy, research, and one's professional responsibility to protect electronic health care records.

HLSC 419 Introduction to Social Epidemiology Credit: 1

This course is designed to increase a student's knowledge of Social Epidemiology, which is the branch of epidemiology that studies the social determinants of health. Social processes will be explored that center on social networks, social support, social capital, social cohesion, and contributing ecological factors that influence health and wellness. Students will discover how social relationships and institutions, such as familial relationships, group culture, policies, and global economic forces, promote or undermine the health of populations. Students will also explore how social inequity indicators involving income, health insurance, and access to care inter-relate and often lead to negative health outcomes.

HLSC 423 Bluford Healthcare Leadership Institute Phase II Credits: 3

This course provides students opportunities to build upon and apply the healthcare knowledge learned during the first phase of the Bluford Healthcare Leadership Institute in an internship in a notable healthcare organization. Throughout the internship, students will be mentored by members of the organization's leadership team and be afforded unique opportunities to learn effective leadership practices, skills, and characteristics. Students will complete an internship project and at the conclusion of the internship will deliver their findings to the organization's leadership.

HLSC 430 Health Program Management Credits: 3

This course is designed to acquaint students with assessment, planning, implementation, and evaluation of health programs. Issues of health financing, health policy, health delivery, and population health will be explored. The course provides a broad introduction to key concepts in health program management, common issues, evidence-based tools, and usable strategies, regardless of the health settings. Vocabulary relevant to policy makers, managers, administrators, and consumers will be studied. Students will develop mock health programs using provided outlines and budgetary restrictions, while considering human resource restraints, climate, relevance of health issue, and readiness for change.

Prerequisites: HLSC 310.

HLSC 440 Ethics and Policy of Public Health Promotion Credits: 3

This course distinguishes biomedical ethics from public health ethics, highlighting the driving principle of justice in public health policy. Historical and present ethical issues will be explored within a variety of health based organizations and settings. The relationship of how ethics drives policy decisions and improves health outcomes will be discussed. The course will also examine how health policy is created in relationship to core ethical theories and public health justifications.

Prerequisites: HLSC 300.

HLSC 450 Urban Health Credits: 3

This course focuses on the unique health needs and outcomes of individuals and communities located within an urban core. Included in the course, are the specific ways in which health interventions can be delivered to urban populations to promote better health outcomes and quality of life. The course provides information on urban characteristics including crowding, poverty and crime in exacerbating the health and wellness needs of this historically underserved community.

Prerequisites: HLSC 300.

HLSC 460 Global Health Credits: 3

This course discusses the complexity of health in a global context. It is designed as an overview of the biological, social and environmental contributors to health and diseases in populations around the world. Course content will include case studies of various global organizational structures and systems relative to population health, selected infectious diseases, nutritional deficiencies and health effects of environmental change.

Prerequisites: HLSC 300.

HLSC 470 Technology, Marketing and Media in Health Credits: 3

This course will focus on past, present, and future trends in health marketing and messaging. Technology's role in marketing health will be explored. Marketing principles will be used to evaluate strategies to promote health behavior change and social policy. Course content will link current trends in consumer health and how these trends are marketed to the public. Examples include mobile apps and devices, personal health data collection, health data storage, and health risk assessment tools. Students will discuss the philosophical, social and legal issues in the use and abuse of health technology, health marketing, and health in the media.

Prerequisites: HLSC 440 (or co-requisite).

HLSC 476 Research Methods in Health Sciences Credits: 3

This course focuses upon the development of inquiry skills necessary to identify relevant research-based literature and apply findings from research to practice. Students will develop an understanding of basic research concepts and evidence based practice in addition to skills in finding, appraising, and using health related literature.

Prerequisites: HLSC 345, NURSE 345, or STAT 235.

HLSC 480 Leadership and Management in Health Professions Credits: 3

This course will provide the student with a theoretical foundation of leadership and management in health professions. The principles of authority, power, politics, decision making, and influence will be explored. Organizational philosophies will be examined within the context of current health issues. The leadership skills of negotiation, delegation, conflict resolution, coaching and mentoring will be discussed, as related to health professions. The role of communication will be examined across organization systems. The effect on gender and cultural diversity on communication will be discussed.

Prerequisites: HLSC 300.

HLSC 490 Special Topics Credits: 1-9

A course of study in a special area of interest in health sciences under individual faculty direction.

Prerequisites: Departmental consent.

HLSC 492 Health Sciences Specialty Course Credits: 3

This course provides students an opportunity to develop advanced knowledge and skills in health sciences. Concepts and topics covered throughout the course of the Bachelor of Health Sciences program will be revisited and practiced through a variety of applied assignments and experiences. Students will integrate examples and case studies from their Health Sciences Internship settings into the course.

Prerequisites: Departmental consent.

Co-requisites: HLSC 494.

HLSC 494 Health Science Internship Credits: 6

An experience-based internship for the senior student. Depending upon the health professions career selected, the student will complete a service learning, research, or problem-based experience under the guidance of a site supervisor within the agency or organization that is mutually agreed upon.

Prerequisites: Departmental consent.

Co-requisites: HLSC 492.

Nursing Courses

NURSE 101 Introduction to Nursing Credits: 2

This introductory two-hour course is designed to facilitate role socialization into professional nursing. Beginning with a brief historical overview of professional nursing, nursing is defined and the philosophical and practice standards of the profession are discussed. The student explores nursing's image and power bases in relationship to professional accountabilities and roles. The value and tenets of evidence-based care are emphasized and integrated with use of nursing process in professional, reflective decision-making. A review of educational paths in professional nursing leads the student into a comprehensive survey of the multiple roles, responsibilities, and requisite skills of the professional nurse today and in the future.

NURSE 120 Anatomy & Physiology I Credits: 4

This course examines the structure and function of the human body from the molecular to the organismal level as they interact among all body systems across the life span. Instructors also attempt to correlate course materials with the clinical aspects of the application of physiological knowledge. Co-requisite laboratory exercises provide practical application of theoretical concepts. In this first term of two-term course, molecular biology, biochemistry, cellular biology, and histology are studied as well as the integumentary, musculoskeletal, and nervous systems.

Prerequisites: Pre-Nursing or Bachelor of Health Sciences Student.

NURSE 125 Medical Terminology Credit: 1

This course is designed to provide the student with a foundation in medical terminology and the components of health records. Course content will include how medical terms are formed; how medical terms are applied to organs, body systems and pathological conditions; how common medical abbreviations are used; and how health records are organized and compiled.

NURSE 127 Drug Calculations Credit: 1

The drug calculation course is designed to introduce the student to methods of drug dosage calculation needed for medication administration in the health care setting. This course will review basic mathematical concepts, introduce medication specific terminology, discuss interpretation of medication orders, identify key elements of the medication label and enable the student to calculate appropriate and accurate drug dosages.

NURSE 160 Anatomy and Physiology II Credits: 4

This course is a continuation of NURSE 120. Co-requisite laboratory exercises provide practical application of theoretical concepts. Physiologic systems including endocrine, cardiovascular, immune, respiratory, digestive, renal, and reproductive are studied as well as embryology and genetics.

Prerequisites: Pre-Nursing or Bachelor of Health Sciences Student.

NURSE 220 Fundamental Concepts & Skills Credits: 6

This course focuses on fundamental concepts, skills, and techniques that provide a foundation for clinical practice. The beginning student will identify factors that may influence the human system and applies the nursing process in health care setting using basic nursing interventions.

Prerequisites: Pre-Licensure or Direct Admit Nursing Program Student.

NURSE 230 Health In Aging Credits: 2

This course focuses on the role of the nurse in promoting and maintaining the health of the older adult population. Evidence based nursing care of the older adult that includes physiological, psychological, pharmacological, and nutritional considerations as affected by theories on aging, socio-cultural influences, legal and ethical issues, and health care resources are explored. Nursing assessment, diagnoses, interventions, and outcomes specific to a diverse older adult population are discussed. Opportunities are provided for interaction with the older adult population.

Prerequisites: Pre-Licensure or RN to BSN Student.

NURSE 250 Health Assessment for Nursing Practice Credits: 3

This course is designed to provide a systematic approach to the physiological, psychological, sociocultural and developmental assessment of individuals emphasizing findings considered to be within normal limits. The health history is emphasized as a tool for assessing mental and physical status. This course is designed for pre-licensure students. This three credit hour course consists of two didactic and one credit hour of clinical/lab per week.

Prerequisites: Pre-Licensure or Direct Admit Nursing Program Student.

NURSE 252 Human Growth and Development Credits: 3

This course provides a basic introduction to the theory for human growth and development across the life span. Emphasis is placed upon the biological and the psychosocial aspects of growth and development. Content is organized in a modified chronological order dividing information into major stages of growth and development across the lifespan.

Prerequisite: Pre-Licensure Nursing Program Student.

NURSE 255 Spanish for Health Care Pre-Professionals Credits: 3

This course focuses on conversational Spanish, medical terminology in Spanish and written/read Spanish. This course will provide the student with basic knowledge that will allow basic communication with clients who speak/read/write Spanish. This is a fast-paced course and will require practice of the language outside of the classroom in order to master the material presented. Recommended preparation: SPANISH 110.

NURSE 256 Pharmacology Credits: 3

This is a course in pharmacology that builds on prior knowledge of anatomy, physiology, chemistry, microbiology and pathophysiology. The major focus of the course is the basic and clinical concepts of pharmacology in evidence-based care. This course covers drug knowledge in the areas of pharmacotherapeutics, pharmacodynamics, pharmacokinetics, adverse reactions and contraindications, therapeutics indications and nursing implications.

Prerequisites: NURSE 127, NURSE 220, NURSE 230, NURSE 250, and NURSE 395.

NURSE 262 Management of Adult Health I Credits: 5

This medical-surgical course focuses on utilization of the nursing process to the specific illnesses of the adult client in the acute care setting. High volume disease processes with associated nursing care are emphasized. The effects on the individual as a holistic system are explored. Skills are developed in caring for persons with biological, psychological and social system alterations to facilitate optimal client outcomes.

Prerequisites: NURSE 127, NURSE 220, NURSE 230, NURSE 250, and NURSE 395.

NURSE 315 Health Literacy Credit: 1

In this course participants will explore the fundamentals of health literacy and demonstrate the impact on health outcomes. Students will be introduced to tools that health care professionals can use to assess the health literacy of their patients/clients. Tools and resources to provide health information at the correct health literacy level will be presented. Students will explore interventions that can increase an individual's health literacy.

NURSE 326 Applied Physiology Credits: 3

In this course, clinical applications to physiologic concepts are highlighted and emphasized among all body systems across the life span. Discussion will include anatomical landmarks critical to health assessment and clinical manifestations related to physiological processes. This three credit hour course consists of two credit hours of didactic and one hour of lab work that will further demonstrate these concepts through dissection, laboratory experiments, and case studies.

Prerequisites: Departmental consent.

NURSE 342 Legal & Ethical Issues Credits: 2

This course is designed to investigate medical-legal issues and explore the implications that legal intervention and interpretation as well as litigation have on the scope of nursing practice and the delivery of patient care. Ethical standards of nursing practice and diverse individual and group values are explored, and various ethical systems, concepts and principles used in ethical decision making are introduced.

Prerequisites: Pre-Licensure Nursing Program Student.

NURSE 345 Quantitative Analysis In The Health Sciences Credits: 3

This course focuses upon the skills required for the utilization of scientific findings in evidence-based care. The conceptual basis of descriptive and the inferential statistics found in the properties of the normal distribution, comprise the core of these skills. Using the normal distribution as a structure for understanding descriptive and inferential procedures, the course presents information necessary to the selection, computation and interpretation of basic statistics relevant to evidence based-care in the health sciences. Discussions of variables, measurement and tabular and graphic presentation of data precede the development of computation skills.

Prerequisites: MATH 110 or MATH 116 or STAT 115 or MOTRMATH 110 or higher level math course; or ALEKS score of 61 or higher; or ACT Math sub-score of 28 or higher; or SAT Math sub-score of 660 or higher.

NURSE 360 Management of Mental Health Credits: 4

This course is designed to introduce psychiatric mental health nursing through the study of sound psychiatric nursing theory. This course will focus on the nursing process framework, and the establishment and maintenance of a therapeutic nurse-client relationship. Emphasis is placed on assessment, therapeutic communication, neurobiological theory, and pharmacology. Nursing interventions will focus on all aspects of client care, communication, client/family teaching, and community resources and their practical application in a variety of clinical settings.

Prerequisites: Pre-Licensure or Direct Admit Nursing Program Student.

NURSE 362 Management of Adult Health II Credits: 5

This medical-surgical course focuses on application of the nursing process to the delivery and the management of adult clients across the care continuum. This course builds on Adult Health I content to include high risk disease processes with associated nursing care. Emphasis is placed on the interaction between the client, family, nursing, and the environment to result in optimal client outcomes.

Prerequisites: Pre-Licensure or Direct Admit Nursing Program Student.

NURSE 364 Management of Maternal & Family Health Credits: 4

This course focuses on the application of the nursing process in the adaptation of the childbearing family. Emphasis is placed on adaptation during pregnancy, labor, birth and the postpartum period. Key concepts to be addressed include maternal, fetal, neonatal and family adaptation throughout the maternity cycle, common alterations during the cycle and culturally sensitive, family-centered nursing care. Maternal, fetal and neonatal physiology, pathophysiology and pharmacology will be addressed.

Prerequisites: Accelerated or Pre-Licensure or Direct Admit Program Student.

NURSE 366 Management of Child & Adolescent Health Credits: 4

This course focuses on the application of the nursing process in the care of the pediatric client. Emphasis is placed on providing developmentally appropriate care to healthy, acutely ill and chronically ill pediatric clients holistically within the context of a family system. Key concepts to be explored include age appropriate anatomy, physiology, pathophysiology, and pharmacology and their application to the nursing strategies of health assessment, health promotion, disease prevention, pain management, family-centered and culturally sensitive care.

Prerequisites: Accelerated or Pre-Licensure or Direct Admit Program Student.

NURSE 395 Pathophysiology Credits: 3

This course will focus on alterations in biological processes that affect the body's internal homeostasis. A conceptual approach will be used to emphasize general principles of pathophysiology. The etiology, pathogenesis, clinical manifestations, and sequelae of various alterations of human structure and function will be examined. Knowledge from the basic and clinical sciences will be integrated.

Prerequisites: Pre-Licensure or RN to BSN Nursing Program Student.

NURSE 401 Health Assessment for Clinical Practice Credits: 3

This course is designed to provide a systematic approach to the physiological, psychological, socio-cultural and developmental assessment of individuals emphasizing findings considered to be within normal limits. The health history is emphasized as a tool for assessing mental and physical status. This course is designed for students with previous health care education, including knowledge of biochemical functions of systems and concepts of normal. This course consists of guided self-study and on-site clinical practicum.

Prerequisites: RN-BSN or Graduate Nursing Program Student.

NURSE 403A Comparative Weight Loss I Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Specific topics that will be addressed include risks of overweight/obesity; common psychological issues for the overweight/obese; societal perceptions and barriers for overweight/obese individuals. This course consists of one hour of didactic work with one module per week for four weeks.

NURSE 403B Comparative Weight Loss II Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Comparison of common medically recommended diets and diet programs and their efficacy/risks; exercise requirements for weight loss and weight maintenance. This course consists of one hour of didactic education with one module per week for four weeks.

NURSE 403C Comparative Weight Loss 3 Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long term and short term implications. Comparison of pharmacologic weight loss options and their efficacy/risks; non-prescription medications/nutraceuticals for weight loss and their efficacy/risks; and bariatric surgeries and efficacy/risks. This course consists of one hour of didactic work with one module per week for four weeks.

NURSE 404 Introduction to Social Justice Credit: 1

This course is designed to increase a student's knowledge regarding personal and social biases based on race, ethnicity, culture, religion, age, sex, sexual orientation, social and economic status, political ideology, disability and how these entities contribute to social injustice. The focus of the course will center on issues involving diversity, prejudice and oppression that impacts social justice. During the course, students will be introduced to tools for developing social justice literacy in order to take action towards establishing a more just society.

NURSE 408 Gender, Health and Development in Senegal Credits: 3

This course examines women's economic empowerment, health education initiatives, philanthropy, and social entrepreneurship in West Africa and Senegal in particular. In the main city of Dakar we will visit indigenous and global nonprofits to study their policies and processes. The culture, both urban and rural, will be experienced in order to provide a unique perspective on the Senegalese and their culture.

NURSE 417 Information Systems and Technology for Improved Health Care Credits: 3

This course provides a basic introduction to health information technology across health care settings. Students will acquire an understanding of key concepts associated with health informatics and network models, systems and management strategies, health information strategic planning, clinical and public health application, data retrieval and analytics, public policy, research, and one's professional responsibility to protect electronic health care records.

NURSE 419 Introduction to Social Epidemiology Credit: 1

This course is designed to increase a student's knowledge of Social Epidemiology, which is the branch of epidemiology that studies the social determinants of health. Social processes will be explored that center on social networks, social support, social capital, social cohesion, and contributing ecological factors that influence health and wellness. Students will discover how social relationships and institutions, such as familial relationships, group culture, policies, and global economic forces, promote or undermine the health of populations. Students will also explore how social inequity indicators involving income, health insurance, and access to care inter-relate and often lead to negative health outcomes.

NURSE 462 Special Topics Credits: 2

This course is designed to explore current issues and trends influencing nursing practice. Economical, political, social and cultural issues are analyzed as they relate to interdisciplinary healthcare topics. Special Topics is aimed at preparing nursing students for immediate and long term milestones in their practice, which includes NCLEX licensure study, current clinical and practice issues, and exposure to advance nursing roles in practice and research.

Prerequisites: Accelerated or Pre-Licensure or Direct Admit Program Student.

NURSE 465 Management of Community and Public Health Nursing Credits: 4

This course focuses on applying the nursing process to the care of target community population and the individual. Emphasis is placed in health promotion and disease prevention. Discussion will include epidemiological, social, political, economic and cultural factors that influence the health of a population. The clinical components will consist of application of the nursing process to identify, prioritize, and meet the health needs of aggregates across the lifespan.

Prerequisites: Pre-Licensure or Direct Admit Program Student.

NURSE 467 Management of Critical & Emergent Care Credits: 5

This course focuses on applying the nursing process to the care of critically ill clients. Key concepts are: assimilation, integration, and prioritization of information to take decisive client-focused action. Students will manage appropriately the interface between client and technology so that a safe, respectful, and caring environment is established and maintained. Nursing knowledge of cardiovascular/hemodynamic monitoring and acute management of pulmonary, neurological, renal, gastrointestinal, shock, and traumatic emergencies is included.

Prerequisites: Pre-Licensure or Direct Admit Nursing Program Student.

NURSE 468 Effectiveness in Complex Health Systems Credits: 4

This leadership course focuses on effectiveness in complex health systems, by building upon acquired personal and interpersonal knowledge, skills and effectiveness in health outcomes. Organizational culture and systems, leadership and management theories, cultural competence, internal and external politics, and the impact of future managerial and societal paradigm changes on health care and health care delivery systems are presented. Knowledge of budgeting and health care finance, use of the legislative system, quality management, customer service, and leadership and management styles are explored.

Prerequisites: Pre-Licensure, Accelerated or Direct Admit Nursing Program Student.

NURSE 468A Effectiveness in Complex Health Systems I Credit: 1.5

This first part of two leadership courses focuses on effectiveness in complex health systems by building upon acquired personal and interpersonal knowledge, skills, and effectiveness in health outcomes. The role of the registered nurse in advocating for clients in the health care system as well as political and regulatory processes is explored.

NURSE 468B Effectiveness in Complex Health Systems II Credits: 2.5

This is the second part of two leadership courses and focuses on effectiveness in complex health systems by building upon acquired personal and interpersonal knowledge, skills, and effectiveness in health outcomes. Organizational culture and systems, leadership and management theories, cultural competence, and the impact of future managerial and societal paradigm changes on health care and health care delivery systems are presented. Knowledge of budgeting and health care finance, use of the legislative system, quality management, customer service, and leadership and management styles are explored.

NURSE 472 Clinical Internship Credits: 5

This is the final clinical application course designed to complement didactic content from the core-nursing component of the baccalaureate program. The student will integrate and apply knowledge acquired in didactic course work and from previous clinical experiences. Emphasis is placed on effectiveness in personal, interpersonal, human health, and complex health systems. In collaboration with preceptors from the clinical unit, students will manage direct care for clients in health care settings.

Prerequisites: Pre-Licensure or Direct Admit Nursing Program Student.

NURSE 476 Research Methods in Health Sciences Credits: 3

This course focuses upon the development of inquiry skills necessary to identify relevant research-based literature and apply findings from research to practice. Students will develop an understanding of basic research concepts and evidence based practice in addition to skills in finding, appraising, and using health related literature.

Prerequisites: NURSE 345, HLSC 345, or STAT 235.

NURSE 481 Block I: Tools for Personal Effectiveness Credits: 6

This is the first in the four-course sequence. The student will discover that the foundation for professional nursing practice is personal effectiveness. Personal effectiveness is contingent upon an understanding of the historical roots of the profession, the meaning of professionalism, image and power bases, professional standards, moral development, political role socialization and professional values. Personal effectiveness is enhanced through critical reflection of personal perspectives and biases, valuing and use of theory and research, critical thinking and decision-making, informatics' technology, the ability to manage time and stress, and the use of a career plan and informatics.

Prerequisites: RN-BSN Nursing Program Student.

NURSE 482 Block II: Tools for Interpersonal Effectiveness Credits: 3

This is the second in the four-course sequence. The student will discover that interpersonal effectiveness is a prerequisite to effective management of the care of humans and of teams. Interpersonal effectiveness is contingent on an understanding of professional value and caring, ethics in health care, legalities of practice, communication theories, and the dynamics of groups and teams. Interpersonal effectiveness is enhanced through the use of such skills as conflict resolution and negotiation, delegation, managing change, advocacy, team membership, group management, political awareness, technology utilization, and communication techniques. Content appropriate to these areas will be covered within this course.

Prerequisites: RN-BSN Nursing Program Student.

NURSE 483 Block III: Effectiveness in Human Health Outcomes Credits: 6

This is the third in a four-course sequence. It builds upon the personal and interpersonal skills acquired in the first two block courses and focuses on effectiveness in human health outcomes. The student will discover that effectiveness in human health outcomes is a primary goal in the delivery of an optimum continuum of health care that encompasses health promotion, disease prevention and illness care across the lifespan. Achieving effectiveness in human health outcomes across the wellness-illness continuum and the individual-to-community continuum is contingent on acquiring an understanding of epidemiology, levels of care, communicable disease control, case management, theories applicable to aggregate populations, cultural competence, evidence-based care, and information technology.

Prerequisites: RN-BSN Nursing Program Student.

NURSE 484 Block IV: Effectiveness in Complex Health Systems Credits: 6

This is the final course in the four-course sequence. Students will build upon the knowledge and skills acquired in the prior three course in order to examine the essentials of structure and designs, behavior and culture, synergy, workplace diversity, health care finance, and power and politics within complex health systems. Organizational theories, leadership, management and nursing's social responsibility in an emerging global health care environment will also be explored.

Prerequisites: RN-BSN Nursing Program Student.

NURSE 485 Application to Practice I Credits: 3

This is the first of two clinical application courses designed to complement didactic content from the four-course block sequence (NURSE 481 - NURSE 484). Students will integrate an increasingly complex knowledge base with an emphasis on developing effectiveness: personally, interpersonally, and in the health management of populations of clients within systems of community and professional organizations and practice settings. Student cohort groups, in collaboration with personnel from health related organizations and faculty, assess population health needs, identify outcomes and develop action plans based on real need. The practice experience learning processes and outcomes will be collective and provide solutions for the health care community.

Prerequisites: RN-BSN Nursing Program Student.

NURSE 486 Application to Practice II Credits: 3

This is the second of two Practicum application courses designed to complement didactic content from the four-course block sequence (NURSE 481 - NURSE 484) to integrate complex knowledge for personal and interpersonal development in the health management of populations of clients. Student cohort teams will apply new skills and knowledge to real issues and problems in the delivery of nursing care with an emphasis on teamwork performance and action plan implementation and outcome evaluation. The processes and outcomes of those experiences will be collaborative and provide solutions for the health care community.

Prerequisites: RN-BSN Nursing Program Student.

NURSE 490 Special Topics Credits: 1-9

A course of study in a special area of interest in nursing under individual faculty direction.

Prerequisites: RN-BSN or Graduate Nursing Program Student.

NURSE 490AP2 Special Topics Credits: 1-9

Special Topics

Prerequisites: RN-BSN or Graduate Nursing Program Student.

NURSE 5503A Comparative Weight Loss I Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Specific topics that will be addressed include risks of overweight/obesity; common psychological issues for the overweight/obese; societal perceptions and barriers for overweight/obese individuals.

NURSE 5503B Comparative Weight Loss 2 Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long and short term implications. Correlations between lifestyle issues such as diet, sleep, stress, and exercise will be explored. Common medically recommended diets and diet programs will be compared on the basis of their efficacy/risks; exercise requirements for weight loss, and weight maintenance.

Prerequisites: NURSE 5503A.

NURSE 5503C Comparative Weight Loss 3 Credit: 1

This course explores the bio/psycho/social aspects of weight gain and obesity and compares common weight loss methods according to risk, benefits, and long and short term implications. Compare pharmacologic weight loss options and their efficacy/risks; non-prescription medications/nutraceuticals for weight loss and their efficacy/risks; and bariatric surgeries and efficacy/risks.

Prerequisites: NURSE 5503A.

NURSE 5508 Advanced Growth and Development Credit: 1

This course is designed to provide students with advanced comprehensive knowledge regarding the physical growth and psychosocial development from birth to 21 years of age within the context of the child's family and community. Analysis and interpretation of growth and development patterns will be examined as they relate to primary health care of children, birth to 21 years of age aiding in the determination of the health status.

NURSE 5509 Technical Foundations of Advanced Practice Credit: 1

This course will provide students with the advanced informatics skills necessary to develop an evidence-based reflective practice. Self-paced progressive modules will allow students to use advanced health care technologies to develop and apply informatics skills so that they can manage and communicate advanced clinical information and knowledge.

NURSE 5515NE Role of the Nurse Educator Credits: 2-3

This course will explore the role of the nurse educator within the academic, acute care, and outpatient settings. Emphasis will be on the development, evaluation, differences and implementation of the nurse educator in the functional roles. Students are introduced to the NLN Core Competencies of Nurse Educators to evaluate their own practice. Ethical and legal issues related to practice as a nurse educator are discussed.

NURSE 5516 Curriculum Development in Nursing Credits: 3

This course prepares the nurse educator to develop, review, and evaluate nursing curricula. Emphasis will be placed on theoretical foundations, principles of program evaluation, and issues in curriculum design.

Prerequisites: NURSE 5515NE.

NURSE 5517 Teaching Strategies in Nursing Credits: 2

This course examines principles and techniques in teaching nursing. Techniques concerning classroom management, writing objectives and implementing active teaching strategies are explored. Emphasis is placed on respecting the diverse learning needs of students in the educational environment.

Prerequisites: NURSE 5515NE.

Co-requisites: NURSE 5515NE.

NURSE 5526 Health Promotion Across the Lifespan Credits: 3

This course is designed to provide students with a strong knowledge base related to concepts of health promotion and health protection for clients across the life span. Clients are conceptualized as individuals, families and populations. An application of various developmental theories for the child, adult, older adult and family will provide the basis to individualize health-care needs for various age and family groups. Core concepts for the course include: theories of health and health promotion and protection, reasoned action, health belief model, epidemiology, disease and injury prevention, health education, growth and development, nutrition, and family systems theory.

Prerequisites: NURSE 5550 (or co-requisite).

NURSE 5527 Cultural Diversity & Values Credits: 3

This course explores how each individual's life context (social, political, historical, and economic) and culture construct their individual's values, beliefs and behaviors. Applying multi-disciplinary concepts and theory, the course expands students' basic knowledge of cultural diversity, approaches to culture and cultural competency, values and ethics, theories of moral development, cultural assessment skills, and ethical decision-making models for clinical practice. Ethical dilemmas created by differing cultural values and the role of health professionals in leading ethical decision-making are explored. Core concepts for the course include: cultural awareness, cultural knowledge, cultural skill, cultural encounter, values clarification, and ethical analysis.

NURSE 5528 Healthcare Policy & Advocacy Credits: 3

This course is designed to focus on the integral relationship between health care policy and advocacy. Content will include principles and processes related to U.S. health policy and politics in relation to the overall system and issues of cost, quality and access; interrelationships between policy, political trends, and quality of care and access at the point of service; elimination of health care disparities, ethical and obligatory values related to the role of the health care professional.

NURSE 5529 Ethics in Advanced Practice & Research Credits: 3

Advanced nursing practice, ethics, and research are intricately connected. This course is designed to explore the content necessary to apply ethical principles to complex issues encountered in advanced nursing practice. Essential ethical principles include assuring the common good through the continual presence of respect for human dignity, autonomy, beneficence, and distributive justice, as those apply to the integration of advanced practice and research. Graduate prepared nurses are responsible for impacting individual care, the care of populations, and environmental health, therefore advocacy for social justice and ethical health care policy are also discussed.

NURSE 5531 Graduate Pharmacology Specialty Credits: 2

This course builds on principles of pharmacology learned in Pharmacotherapeutics for Advanced Practice Nursing. This course focuses on principles and practices necessary for safe prescribing and medication management of a specialty population (e.g., pediatrics, acute care, mental health).

Prerequisites: NURSE 5548, NURSE 5549, NURSE 5550.

Co-Requisites: NURSE 5532.

NURSE 5532 Pediatric Acute Care I Credits: 3

This is the first of two courses in which the management of complex acute, critical, and chronically ill patients with urgent and emergent conditions is explored. The focus is on alterations in pathophysiology, advanced assessment, diagnosis, and collaborative management of infants, children and adolescents with selected episodic/chronic health problems in acute/critical care.

Prerequisites: NURSE 5548, NURSE 5549, NURSE 5544 NURSE 5547.

Co-requisites: NURSE 5534 NURSE 5531.

NURSE 5533 Pediatric Acute Care II Credits: 3

This is the second of two courses in which the management of complex acute, critical, and chronically ill patients with urgent and emergent conditions is explored. The focus is on alterations in pathophysiology, advanced assessment, diagnosis, and collaborative management of infants, children and adolescents with selected episodic/chronic health problems in acute/critical care.

Prerequisites: NURSE 5532 NURSE 5534.

Co-requisites: NURSE 5535.

NURSE 5534 Advanced Practice Clinical Practicum I (Pediatric Acute Care) Credits: 4

This practicum course focuses on the clinical management of the pathological alterations presented in the Pediatric Acute Care I course. The course is designed to provide clinical experience in the development and application of the roles of the pediatric acute care nurse practitioner. The clinical setting will be used for application and evaluation of pathophysiologic and psychosocial concepts in implementing and evaluating care in the clinical settings.

Prerequisites: NURSE 5544, NURSE 5547, NURSE 5548, NURSE 5549, NURSE 5564.

Co-requisites: NURSE 5531, NURSE 5532.

NURSE 5535 Advanced Practice Clinical Practicum II (Pediatric Acute Care) Credits: 4

The emphasis of this course is on the integration of theory, assessment, and advanced therapeutics in high acuity patient care. The student will gain the necessary management skills to provide specialized patient centered care across the entire pediatric age spectrum from complex chronic illness to physiologic deterioration and life threatening instability, including palliative and end of life care, while incorporating the family as a full partner in decision making.

Prerequisites: NURSE 5532, NURSE 5534.

Co-requisites: NURSE 5533.

NURSE 5544 Advanced Health Assessment Skills Credits: 2

This course provides a systematic approach to collection and documentation of advanced health/physical assessment, including the comprehensive history, physical, and psychological assessment of signs and symptoms, pathophysiological changes, psychosocial and cultural variations of the patient. The assessment should be conducted within the context of the family and community, incorporating cultural and developmental variations, and the needs of the patient.

Prerequisites: Undergraduate Health Assessment Course.

NURSE 5546 Foundations of Family Psychiatric Nursing Advanced Practice Credits: 3

This foundational course focuses on factors impacting mental health and the development of psychiatric disorders. The scope of practice and roles of the Psychiatric Mental Health Nurse Practitioner will be introduced. Both pharmacological and nonpharmacological therapeutic modalities will be explored. Comprehensive psychiatric evaluation skills will be developed. Attention will be given to the development of therapeutic relationships, assessment considerations across the lifespan, crisis evaluation and different types of diagnostic tools and approaches. Diagnostic reasoning skills will be applied to mental illness and students will begin to integrate assessment finding into diagnoses in the Diagnostic and Statistical Manual of Mental Disorders.

Prerequisites: NURSE 5547M.

Co-requisites: NURSE 5547M.

NURSE 5547 Diagnostic Reasoning/Advanced Assessment Credits: 3

This course emphasizes utilization of advanced health/physical assessment skills, interpretation of diagnostic testing and lab values, validation, documentation and analysis of findings through diagnostic reasoning to develop and process differential diagnosis.

Prerequisites: NURSE 5544.

NURSE 5547C Diagnostic Reasoning/Advanced Assessment-Children Credits: 3

This course emphasizes utilization of advanced health/physical assessment skills, interpretation of diagnostic testing and lab values, validation, documentation and analysis of findings through diagnostic reasoning to develop and process differential diagnosis. The course consists of two hours of didactic/ discussion and one hour of clinical/lab credit (45 clock hours).

Prerequisites: NURSE 5544.

NURSE 5547N Advanced Assessment of the Neonate Credits: 3

This course is designed to provide a systematic approach to advanced assessment of physiological, psychological, socio-cultural, developmental and spiritual assessment of the fetus, the mother during the prenatal period, and the neonate. This course builds on basic health assessment skills and emphasizes advanced assessment skills, diagnostic test interpretation, validation, documentation and analysis of perinatal, genetic and embryological factors impacting neonatal health and development.

Prerequisites: Admission into the MSN NNP program.

NURSE 5547NE Health Assessment & Clinical Reasoning for Nurse Educators Credits: 4

This course is designed to provide a systematic approach to teaching physiological, psychological, sociocultural, developmental and spiritual assessment. The course builds on basic health assessment skills and emphasizes: comprehensive assessment skills, interpretation of laboratory results, validation of findings, documentation and analysis of assessment findings; and teaching strategies – teaching methodologies, clinical application, and student evaluation.

Prerequisites: NURSE 401, NURSE 5548.

NURSE 5547PM Diagnostic Reasoning/Advanced Assessment Credits: 2

2 credit hours (1 didactic; 1 lab for a minimum of 45 contact/clock hours). This course is designed to provide a systematic approach to the advanced assessment of physiological, psychological, socio-cultural, developmental and spiritual assessment of individuals. The post-MSN student will build on previous advanced assessment skills and content with emphasis on adding advanced physical assessment skills, lab work interpretation, validation, documentation and analysis of assessment findings appropriate to their desired role area. Students will meet the same outcome standards of the track in which they are currently enrolled.

Prerequisites: Free-standing Health Assessment Course.

NURSE 5547W Diagnostic Reasoning/Advanced Assessment Credits: 3

This course emphasizes utilization of advanced health/physical assessment skills, interpretation of diagnostic testing and lab values, validation, documentation and analysis of findings through diagnostic reasoning to develop and process differential diagnosis. The course consists of two hours of didactic/ discussion and one hour of clinical/lab credit (45 clock hours).

Prerequisites: NURSE 5544.

NURSE 5548 Advanced Pathophysiology Across the Lifespan Credits: 3

Advanced pathophysiology is the study of the alterations of normal physiological functioning in cellular, tissue, organ and organ systems. These alterations form the basis for understanding a variety of pathophysiological conditions and the manifestations and impact of abnormal physiological functioning on clients across the life-span. Advanced pathophysiology deals with both generalized processes and major organ system dysfunctions. This course consists of three hours of lecture/discussion per week and individual self study.

NURSE 5548N Physiology/Pathophysiology Of The Neonate Credits: 2

Concepts of embryology, neonatal physiology and pathophysiology are used to provide an in-depth study of normal functioning and alteration of normal physiological functioning in cellular, tissue, organ, and organ systems. Alterations form the basis for understanding a variety of pathophysiological conditions and the manifestations and impact of abnormal physiological functioning on neonates. Both generalized processes and major system dysfunctions are addressed.

Prerequisites: Admission to the Neonatal Nurse Practitioner Track, NURSE 5548.

NURSE 5549 Pharmacology Across the Life Span for Advanced Nursing Practice Credits: 3

This is a course in clinical pharmacotherapeutics that builds on prior knowledge of drug classification, actions, interactions and adverse drug reactions. The major focus of the course is the pharmacotherapeutic prescribing of medications for primary health care management across the life span by advanced practice nurses. The Missouri laws for advanced practice nurse prescriptive authority will be addressed. This course consists of three hours of lecture/discussion/in-class clinical module work per week.

Prerequisites: NURSE 5548, NURSE 5549R.

NURSE 5549N Pharmacology for the Neonate Credits: 3

This course is designed to provide a systematic approach to advanced assessment of physiological, psychological, socio-cultural, developmental and spiritual assessment of the fetus, the mother during the prenatal period, and the neonate. This course builds on basic health assessment skills and emphasizes advanced assessment skills, diagnostic test interpretation, validation, documentation and analysis of perinatal, genetic and embryological factors impacting neonatal health and development.

Prerequisites: Admission into the MSN NNP program.

NURSE 5549R Pharmacokinetics & Pharmacodynamics: Application for Graduate-Prepared Nurses Credit: 1

This course builds on prior knowledge of anatomy, physiology, chemistry, microbiology, pathophysiology and pharmacology. Drug classes are reviewed in preparation for advanced clinical judgment. The principles for decision-making about drug selection, use and monitoring are explored. General principles of pharmacokinetics and pharmacodynamics are discussed. Pertinent patient education concerning select pharmacotherapeutics agents is reviewed.

Prerequisites: Admission to UMKC School of Nursing and Health Studies.

NURSE 5550 Theoretical Foundations in Nursing Credits: 3

This course focuses on critical analysis of theory and the utilization of various levels of nursing and related theories as a base for nursing at the graduate level. It further examines the inter-relationship of theory, research and practice in the development of a scientific body of nursing knowledge. The student will analyze methods by which knowledge is gained and validated. Students will synthesize several different theories from which to form the basis of their practice. Relationships of theory, practice and research will be discussed.

Prerequisites: Completion of BSN.

NURSE 5551B Pharmacology for Women's Health: Common Medical Conditions Credits: 2

This course in clinical pharmacology builds on current knowledge of drug classification, actions, interactions, and adverse drug reactions. The focus is the use of medications by advanced practice providers in the management of common medical conditions in women's health. Emphasis will be placed on the evidence based pharmacological management of women with medical conditions such as cardiovascular conditions, autoimmune disorders, diabetes, gastrointestinal conditions, lower urinary tract disorders, drugs that promote mental health, dermatological conditions, and an overview of chemotherapeutics. This four-week course consists of online discussion, case studies and quizzes.

Prerequisites: NURSE 5549.

NURSE 5555 Nursing Research Credits: 3

This course is designed to prepare graduate nursing students to utilize research findings in order to provide high quality health care and improve nursing practice. This knowledge includes fundamentals of research methods, procedures for the evaluation of research and the application of research findings to clinical practice and organizational decision making.

Prerequisites: NURSE 5550, a graduate level statistics course.

NURSE 5557 Qualitative Methods in Nursing Research Credits: 3

This course is designed to provide the student with the skills necessary to the understanding and conduct of qualitative research. Various methods, including ethnographic, phenomenologic, historic, grounded theory and aesthetic inquiry are presented and discussed. Emphasis is placed upon the appropriateness of each method for different research problems. This course consists of three hours of lecture/discussion per week.

Prerequisites: NURSE 5550, NURSE 5555.

NURSE 5558 Research Design Credits: 3

This course is designed to provide the student with experience in the development of a research proposal. Research skills acquired in previous courses will be synthesized to produce the components of a proposal.

Prerequisites: NURSE 5555.

NURSE 5559 Evaluation Methods in Nursing Credits: 2

This course examines principles of assessment and evaluation in nursing education. Techniques concerning formative and summative evaluation, test writing, clinical evaluation, and test item analysis will be explored. Emphasis is placed on respecting the diverse learning needs of the students in the educational environment.

Prerequisites: NURSE 5517.

NURSE 5564A Primary Care of Adults I Credits: 5

This course is designed to prepare nurse practitioner students to manage common health problems of adults. The focus is on developmentally appropriate preventive health care and management of common acute/episodic illnesses. Students will integrate role competencies, professional standards, and legal requirements essential to the NP role. Core content includes differential diagnosis, therapeutic management, adherence, anticipatory guidance, patient/family education, legal and professional issues, standards of practice, and advanced practice role competencies.

Prerequisites: NURSE 5526, NURSE 5548, NURSE 5550, NURSE 5547A and N5555.

Co-requisites: NURSE 5549.

NURSE 5564AG Advanced Practice Clinical Practicum I Credits: 4

Advanced Practice Clinical Practicum I.

NURSE 5564C Primary Care of Children I Credits: 5

This course is designed to prepare nurse practitioner students to manage common pediatric health problems. The focus is on evidence-based developmentally appropriate preventive health care and management of common acute/episodic illnesses. Students will integrate role competencies, professional standards, and legal requirements essential to the NP role. Core content includes differential diagnosis, therapeutic management, adherence, anticipatory guidance, patient/family education, legal and professional issues, standards of practice, and advanced practice role competencies. Clinical practice and clinical seminar comprise the clinical experience.

Prerequisites: NURSE 5526, NURSE 5547C, NURSE 5548, NURSE 5550.

Co-requisites: NURSE 5549, NURSE 5555.

NURSE 5564F Primary Care of Families I Credits: 5

This course is designed to prepare nurse practitioner students to manage common health problems across the life span. The focus is on developmentally appropriate preventive health care and management of common acute/episodic illnesses. Students will integrate role competencies, professional standards, and legal requirements essential to the NP role. Core content includes differential diagnosis, therapeutic management, adherence, anticipatory guidance, patient/family education, legal and professional issues, standards of practice, and advanced practice role competencies.

Prerequisites: NURSE 5526, NURSE 5547F, NURSE 5548, NURSE 5550.

Co-requisites: NURSE 5549.

NURSE 5564M Family Psychiatric Nursing Advanced Practice I Credits: 5

This course is designed to prepare students to manage psychiatric illness in individuals. Emphasis will be given to psychiatric disorders commonly encountered such as thought disorders, mood disorders, anxiety disorders, personality disorders and substance abuse. Special attention will be given to illnesses occurring in childhood and older age. Focus will be on strengthening mental health diagnostic skills and management of psychiatric illness in individuals. Students will learn to identify and treat short term mental health issues, chronic disorders and acute exacerbations. Psychotropic medication management skills will be developed. Students will begin their clinical hours during this course with a minimum of 165 in total. Patients seen in clinical settings will be across the lifespan.

Prerequisites: NURSE 5526, NURSE 5546, NURSE 5547M, NURSE 5548, NURSE 5550.

Co-requisites: NURSE 5549.

NURSE 5564N Neonatal Nursing I Credits: 3

This course integrates the physiologic, pharmacologic, and assessment skills and principles in determining appropriate care of the ill neonate. This course covers case management of respiratory, cardiovascular and neurologic disorders. Current research and evidenced-based practices are used as the course framework. The effects of critical conditions on the growth and development of the neonate, including subsequent chronic health problems as well as the short and long term consequences to the child's family are emphasized. The use of specific interventions and diagnostic procedures are demonstrated and applied in laboratory/clinical settings.

Prerequisites: NURSE 5549N.

Co-requisites: NURSE 5566N.

NURSE 5564NE Clinical for Nurse Educators Credits: 5

This clinical course provides students an opportunity to develop advanced knowledge and clinical skills in an acute care clinical setting. Clinical practice hours will be spent in a variety of settings providing the students the opportunity to provide clinical education and advanced patient care in a specialty population. The students demonstrate their clinical development and clinical reasoning skills by evaluating the process of nursing care (assessment, intervention/management, evaluation) from an evidenced-based perspective.

Prerequisites: All required courses except NURSE 5572 and NURSE 5598.

NURSE 5564W Primary Health Care of Women Credits: 5

This course is designed to prepare the woman's health nurse practitioner student to manage the primary health care of women. The course will focus on the etiology, symptomatology, diagnosis and management of gynecologic and non-gynecologic primary health care problems throughout the lifespan. Emphasis will be placed on caring for women within a holistic, collaborative framework and recognizing how the changing roles of women in today's society can affect their lives and their health status. Concepts, theories and evidence-based practice related to health promotion and maintenance, and illness prevention are addressed.

Prerequisites: NURSE 5526, NURSE 5547W, NURSE 5548, and NURSE 5550; NURSE 5549 and NURSE 5555 (pre or co-req).

NURSE 5566A Primary Care of Adult-Gerontology II Credits: 5

This course is designed to prepare adult-gerontology nurse practitioner (NP) students in the care and management of adults with chronic health problems. The focus is on the differentiation and therapeutic management of chronic health problems encountered in various health care settings. The course enables students to develop a research and theory based practice for disease state management of health care for adults. Core concepts: theories, grief and loss, chronicity and pain; and advanced nursing skills.

Prerequisites: NURSE 5549, NURSE 5564A.

NURSE 5566C Chronic Child Health Care (Clinical II) Credits: 5

This course is designed to apply knowledge and skill to advanced evidence-based nursing care of children experiencing complex/chronic health problems. The organizing framework is case management of chronic health states. Students will apply several theoretical models to acute and chronic conditions of children at different developmental stages representing various socioeconomic and cultural groups, in primary or specialized care settings. Core concepts are stress, coping, adaptation, pain management, grief, loss, nutritional support, ethical decision-making, and symptom management.

Prerequisites: NURSE 5549 and NURSE 5564C.

NURSE 5566F Primary Care of Families II Credits: 5

This course is designed to prepare family nurse practitioner (NP) students in the care and management of families with chronic health problems. The focus is on the differentiation and therapeutic management of chronic health problems encountered in various health care settings. The course enables students to develop a research and theory based practice for disease state management of health care for families. Core concepts: theories, grief and loss, chronicity and pain; and advanced nursing skills.

Prerequisites: NURSE 5549, NURSE 5564F.

NURSE 5566M Family Psychiatric Nursing Advanced Practice II Credits: 5

In this course, management of mental health problems will expand beyond the individual to include families, groups and the greater community. This course will emphasize development of psychotherapy skills by the advanced practice nurse. Theoretical foundations and intervention approaches for individuals, group and family therapies will be explored. Unique or modified approaches for pediatric and older adult populations will be covered. Students will be exposed to the common psychotherapy modalities and will identify which approaches they will adopt and utilize in psychotherapy clinical experiences. Clinical management will also expand from outpatient settings to include crisis evaluation and inpatient care.

Prerequisites: NURSE 5549, NURSE 5546, NURSE 5564M.

NURSE 5566N Neonatal Nursing II Credits: 3

This course integrates physiologic, pharmacologic, and assessment skills and principles determining appropriate care of the ill neonate. This course covers case management of gastrointestinal, renal, endocrine, hematologic, orthopedic, ophthalmologic, dermatologic and immune disorders.. Current research and evidenced-based practices are used as the course framework. The effects of critical conditions on the growth and development of the neonate, including subsequent chronic health problems as well as the short and long term consequences of the child's family are emphasized. The use of specific interventions and diagnostic procedures are demonstrated and applied in laboratory/clinical settings.

Prerequisites: NURSE 5549.

NURSE 5566W Care of the Childbearing Woman Credits: 5

This course is designed to prepare the woman's health nurse practitioner students in the care and management of the childbearing woman. The focus of the course is on the normal adaptation and pathologic alterations throughout the childbearing period. Emphasis is placed on management of women and families from preconception through the puerperium. Concepts, theories and evidence-based research related to the biopsychosocial and cultural aspects of childbearing are addressed. Core concepts include adaptation, stress and coping, grief and loss, pain and symptoms management.

Prerequisites: NURSE 5564W.

NURSE 5572 Advanced Nursing Practice: Synthesis Practicum Credits: 5

This course is a concentrated, experiential, supervised clinical opportunity to function in an advanced practice nursing role. The focus of this intensive clinical practicum is on the synthesis and application of previous theory and clinical courses under the guidance of a preceptor. Students will be expected to apply advanced clinical decision-making skills and evidence-based practice guidelines to the assessment, management, and evaluation of complex healthcare problems. Core concepts include advanced nursing practice, functional role responsibilities, ethical, legal and health policy issues, and activities with the emphasis on their relationship to patient outcomes. The patient systems for this experience include individuals and families within the context of community.

Prerequisites: All required courses except NURSE 5598, NURSE 5599, and electives.

NURSE 5572II Preceptorship II Credits: 5

This course provides opportunities to apply knowledge and skills from advanced nursing role, theory, research and neonatal clinical courses to the advanced therapeutic management of high-risk neonates. This is the second of two preceptorship courses which builds upon acquired clinical skills of NURSE 5572NI and can be taken concurrently or in consecutive semesters. Emphasis is placed on therapeutic measures within a conceptual framework or model applying findings from research relevant to comprehensive care of neonates. The client system will be the neonate and family.

Co-requisites: NURSE 5572NI.

NURSE 5572M Advanced Nursing Practice: Synthesis Practicum Credits: 5

This course is a concentrated, experiential, supervised clinical opportunity to function in a psychiatric advanced practice nursing role. The focus of this intensive clinical practicum is on the synthesis and application of previous theory and clinical courses under the guidance of a preceptor. Students will be expected to apply advanced clinical decision making skills and evidence based practice guidelines to the assessment, management, and evaluation of complex healthcare problems. Core concepts include advanced nursing practice, functional role responsibilities, ethical, legal and health policy issues, consultation/collaboration and activities with the emphasis on their relationship to patient outcomes. A minimum of 330 clinical hours is required. Patients seen in clinical settings will be across the lifespan.

Prerequisites: All required courses except NURSE 5598.

NURSE 5572NE Synthesis Practicum for Nurse Educators Credits: 3

3 Credit Hours (3 clinical for a minimum of 180 contact/clock hours). This course provides the student a concentrated, experiential opportunity to function in the role as nurse educator. Core concepts include functional role responsibilities, teaching strategies and theory utilization. Emphasis is placed on professional role development and the concept of life-long learning.

Prerequisites: All required courses except NURSE 5598.

NURSE 5572NI Preceptorship I Credits: 5

This course provides opportunities to apply knowledge and skills from advanced nursing role, theory, research and neonatal clinical courses to the advanced therapeutic management of high-risk neonates. This is the first of two preceptorship courses. The other course, NURSE 5572II, can be taken concurrently or in consecutive semesters. Emphasis is placed on therapeutic measures within a conceptual framework or model applying findings from research relevant to comprehensive care of neonates. The client system will be the neonate and family.

Prerequisites: NURSE 5564N, NURSE 5566N.

NURSE 5581A Simulation in Healthcare-State of the Science, Ethical, and Theoretical Foundations Credit: 1

This course provides an introduction to principles, ethics, and theory guiding simulation education in healthcare. Emphasis is on analysis of the evidenced-based research related to simulation, and regulatory processes through interprofessional discussions.

NURSE 5581B Simulation in Healthcare-Development and Curricular Integration Credit: 1

This course introduces students to simulation center design, scenario development, and curriculum integration. Through inter-professional collaboration, students will examine the process of developing simulations and developing realistic, measurable objectives.

NURSE 5581C Simulation in Healthcare-Debriefing and Evaluation Methods Credit: 1

This course prepares students to evaluate learning in the simulation environment and facilitate debriefing. Evaluation methods based on simulation learning domains and objectives are explored.

NURSE 5583A Accreditation in Nursing Education –Procedural Overview and Accreditation Credit: 1

The course provides a foundational understanding of the accreditation process for the Accreditation Commission for Education in Nursing (ACEN) and Commission on Collegiate Nursing Education (CCNE). Procedural overview includes discussion on the accreditation self-study process, standards, on-site evaluation, and the accreditation decision-making process and accreditation. Emphasis will be placed on guidelines for assessment of student learning outcomes and preparation for continuing review.

NURSE 5583B Accreditation in Nursing Education –Accreditation Commission for Education in Nursing (ACEN) Credit: 1

This course builds upon foundational principles of accreditation by exploring the process as related to the Accreditation Commission for Education in Nursing (ACEN). Emphasis is placed on how to implement the accreditation process to successfully complete a self-study report.

Prerequisites: NURSE 5583A.

NURSE 5583C Accreditation in Nursing Education –Commission on Collegiate Nursing Education (CCNE) Credit: 1

This course builds upon foundational principles of accreditation by exploring the process as related to the Commission on Collegiate Nursing Education (CCNE). Emphasis is placed on how to implement the accreditation process to successfully complete a self-study report.

Prerequisites: NURSE 5583A.

NURSE 5587 Research Utilization in Nursing Credits: 3

This course will prepare nurses to implement a research utilization model to validate practice. The theoretical basis for research utilization and practical instances of its application in nursing will be examined. Opportunities will be provided to develop a research utilization plan to address a clinical area of practice.

Prerequisites: NURSE 5550, NURSE 5555.

NURSE 5590 Directed Scholarly Activity Credits: 1-2

This course provides individualized experiences to prepare the student for their comprehensive examination.

Prerequisites: Permission of the instructor.

Co-requisites: Completion of core course requirements.

NURSE 5597A Independent Study in Nursing/Patient Care-Elective Credits: 1-6

Guided study of selected topics and/or areas in nursing and/or patient care.

Prerequisites: NURSE 5550.

NURSE 5597AHA Independent Study in Nursing Credits: 1-6

NURSE 5597AS Independent Study In Nursing Credits: 1-6

Independent Study In Nursing

NURSE 5597B Independent Study in Nursing/Patient Care-Equivalent Credits: 1-6

Guided study of selected topics and/or areas in nursing and/or patient care.

Prerequisites: NURSE 5550.

NURSE 5597EPR Independent Study in Nursing Credits: 1-6

NURSE 5597HA Independent Study in Nursing Credits: 1-6

NURSE 5597LS Independent Study In Nursing Credits: 1-6

NURSE 5597P1 Independent Study in Nursing Credits: 1-6

NURSE 5597P2 Independent Study in Nursing Credits: 1-6

NURSE 5597PCF Independent Study In Nursing Credits: 1-6

NURSE 5597PF Independent Study In Nursing Credits: 1-6

NURSE 5597PN Independent Study Nursing Credits: 1-6

NURSE 5597ST Independent Study In Nursing Credits: 1-6

NURSE 5597WLA Indep Study in Nursing Credits: 1-6

Indep Study in Nursing

NURSE 5597WLB Indep Study in Nursing Credits: 1-6

Indep Study in Nursing

NURSE 5597WLC Indep Study in Nursing Credits: 1-6

Indep Study in Nursing

NURSE 5598 Directed Research Credits: 1-6

Individual research project for students to utilize beginning research skills in designing and conducting independent studies under the direction of the faculty.

Prerequisites: NURSE 5550, NURSE 5555.

NURSE 5599 Research Thesis Credits: 1-9

Individual study under the direction of a member of the faculty leading to the preparation and oral defense of a thesis.

Prerequisites: NURSE 5550, NURSE 5555.

NURSE 5601 Clinical Institute I Credit: 1

1 credit hour (1 didactic) This course provides an introduction to the knowledge and skills essential to becoming a graduate student. Students utilize theory, evidence based practice/research, and clinical expertise to become expert practitioners in their population foci. Content includes relevant UMKC policies and procedures, technology utilization to conduct library literature searches, access to course content on electronic platforms, and planning for success in graduate school. The literature review search progresses to application of the content, through written and verbal communication. Techniques building on critical thinking skills to start clinical diagnostic reasoning skills are introduced along with graduate school expectations and outcomes.

Prerequisites: Admission to the MSN or DNP programs.

NURSE 5602 Healthcare Systems & Leadership Credits: 3

This course focuses on the DNP as leader within the complex health care industry. Utilizing information technology, an in-depth study of the socio-political, economic, cultural and historical background of the American health care system the system of health professions will form the foundation for exploration of leadership needs the DNP leadership role.

Prerequisites: Admission to the DNP program.

NURSE 5603 Research Institute I Credits: 2

This course will provide a hands-on introduction to the process of becoming a research scientist. Content will include the responsible conduct of research, its core element, the emerging guideline, relevant UMKC policies and procedures, and the impact to the Researcher in his/her day-to-day activities. This course also includes literature reviews, scholarly writing, technology in the Research process, developing a program of scholarship and effective time management.

Prerequisites: Admission to the PhD program at the School of Nursing and Health Studies.

NURSE 5604 Research Institute II Credits: 2

This course will provide interactive sessions to develop skills necessary for the synthesis of research findings, the identification of funding sources and the initiation of the grant writing process. Also included will be the opportunity to develop and present research findings in multiple venues.

Prerequisites: NURSE 5603, Completion of 6 credit hours of PhD coursework.

NURSE 5607NA Health Care Policy and Leadership for the Nurse Anesthetist Credits: 2

This course provides an in-depth study of the health care policy process, emphasizing ways that Doctor of Nursing Practice (DNP) prepared Certified Registered Nurse Anesthetists (CRNAs) can incorporate health policy advocacy into their practice. The content prepares DNP CRNAs to be effective, innovative leaders in nurse anesthesia and health care. Students will participate in a leadership experience in one of four areas: education, research, administration, or politics.

Prerequisites: Active status in both UMKC SoNHS BSN-DNP NA program and the TMC School of Nurse Anesthesia.

NURSE 5608 Theory Development I Credits: 3

The philosophical underpinnings of nursing and the theoretical development of nursing science will be explored in this course. The discipline of nursing and the relationship between nursing theory, research, and practice will be discussed. Students will analyze nursing and non-nursing theories for research or clinical questions. Students will identify a theoretical framework to guide their research or evidence-based practice project.

Prerequisites: Twelve credit hours of graduate level course work, including NURSE 5550 and NURSE 5555, or their equivalents.

NURSE 5610 Theory Development in Nursing II Credits: 3

Nursing and non-nursing models, frameworks and theories will be analyzed and critically evaluated. Philosophical tenants will be debated. Students will identify the range of applicable theories for their area of research. Appropriate application of theories to independent and dependent variables, mediators and moderators, cofactors, correlates and outcomes will be explored. Students will develop concepts, hypotheses, and research goals that utilize an identified theory for nursing research.

Prerequisites: NURSE 5608.

NURSE 5611 Healthcare Economics & Quality Credits: 3

This course focuses on the principles of, and complex relationship between, cost and efficiency and effectiveness and health care quality outcomes. Economic perspectives and needs from industry, organizations, providers and consumers will all be examined. Throughout the course, issues regarding the inextricable link between cost and quality within the complex healthcare environment will be examined and addressed, with emphasis on DNP nurse intervention and leadership.

Prerequisites: Admission to the DNP program.

NURSE 5612 Statistics I Credits: 3

This graduate statistics online course is designed for students in the graduate programs. The course provides a comprehensive understanding of: describing data, logic of sampling, and test statistics; hypothesis testing, type 1 and type 2 errors; power; one-way ANOVA (analysis of variance); planned comparison, post-hoc tests and trend analysis; factorial ANOVA; repeated measures designs and mixed randomized repeated designs; simple and multiple regression; and ANCOVA (analysis of co-variance).

Prerequisites: Upper division undergraduate statistics course.

NURSE 5613 Application of Evidence-based Practice I Credits: 3

This course is designed to provide an analytic and systematic approach to evaluate evidence-based research and guidelines used in clinical practice. The course builds on methods of evidence-based practice (EBP), theoretical foundations, ethical principles, research design, and statistical analyses. The student will develop an evidence-based approach to address a clinical question and to construct an integrative literature review. In the course, an EPB project is designed to provide quality health care. The project plan incorporates the integrative literature review, scientific methods, outcome measurement, and data analysis.

Prerequisites: NURSE 5555, NURSE 5608.

NURSE 5614 Health Policy & Ethics Credits: 2

This course examines health policy and ethics as they intersect with other public policies. Legal, financial, and ethical issues associated with policy development and evaluation are critically examined.

Prerequisites: Admission into the Ph.D. in Nursing Program.

NURSE 5615NA Chemistry and Physics for the Nurse Anesthetist Credits: 3

This course is designed to provide the nurse anesthesia student a foundational knowledge needed for the provision of anesthesia. This course will review elements of general, organic, and biochemistry pertinent to understanding structure, characteristics and basic mechanisms of metabolic pathways and pharmacology routinely administered during the anesthetic period. Pertinent laws and principles of physics will be presented. The student will be prepared to apply pertinent laws and principles of physics to the provision of anesthesia services.

Prerequisites: Acceptance into School of Nurse Anesthesia Program.

NURSE 5616NA Anesthesia Crisis Resource Management Credit: 1

This course is designed for the graduate nurse anesthesia student to optimize their expert clinical judgement during low-frequency, high-acuity anesthesia crisis events. The history, importance, and theory of patient safety during dynamic anesthetic situations will be discussed, as well as specific skills and practices that improve performance. The goal of this course is for the student to develop knowledge and skills of Anesthesia Crisis Resource Management (ACRM) prior to graduation.

Prerequisites: NURSE 5619NA3.

NURSE 5617 Application of Evidence-based Practice II Credits: 3

This course is designed to provide an analytic and systematic approach to incorporation of evidence-based research into clinical practice. The course builds on the underpinnings of evidence-based practice (EBP) including theoretical foundations, ethical and cultural principles, quality, policy and economic considerations, design and methods, and statistical analysis of outcomes. In this course, the student will use the integrated literature review and principles of human subject protection to develop an evidence-based practice project proposal and submit the proposal for approval. Support for the EBP improvement plan includes technology and information systems.

Prerequisites: NURSE 5613.

NURSE 5617B Application of Evidence-based Practice II Credits: 3

In this course, the student will use the integrated literature review and principles of human subject protection to develop an evidence-based practice (EBP) project proposal. Students will collaborate with a site in preparation for the project. Support for the EBP improvement plan includes technology and information systems.

Prerequisites: NURSE 5617.

NURSE 5619NA1 Principles of Nurse Anesthesia Practice I Credits: 2

This course introduces the nurse anesthesia student to concepts necessary to plan and execute safe individualized anesthetics. Content includes assessment of co-morbid conditions and patient populations in anesthesia, appropriate plans of care, anesthetic techniques, prevention of complications, fluid management, monitoring and utilization of anesthesia equipment. Fundamental concepts and techniques essential to clinical anesthesia practice focus on theoretical, practical and professional considerations involved in the administration of general anesthesia, conscious sedation and regional anesthesia, inside and outside the operating room. Content includes evidence based student led conferences, anesthetic literature, morbidity and mortality, inter-disciplinary and intra-disciplinary conferences and use of informatics systems.

Prerequisites: NURSE 5619NAB.

NURSE 5619NA2 Principles of Nurse Anesthesia II Credits: 3

This course is designed to provide the nurse anesthesia student a broad knowledge base in multiple concepts, topics and techniques. This course builds on concepts learned in Principles I and delineates techniques of anesthesia management that are considered more situation specific with specialized diagnostic and anesthetic procedures. Primarily focused on patients and existing co-morbidities, the course intensively covers more advanced concepts and principles of anesthetic management including neurosurgical, thoracic, vascular and trauma procedures. Content includes evidence based student led morbidity and mortality conferences, inter-disciplinary and intra-disciplinary conferences, use of informatics systems and simulation based learning.

Prerequisites: NURSE 5619NA1.

NURSE 5619NA3 Principles of Nurse Anesthesia Practice III Credits: 3

The course covers advanced concepts and principles of anesthetic management with emphasis on cardio-thoracic anesthesia and anesthetic emergencies. The course builds on Principles I and II and focuses more on critical thinking, skill development, specific procedures utilized in anesthetic practice including advanced airway techniques and placement of invasive monitoring modalities as well as crisis management in anesthesia. Content includes evidence based student led conferences, utilization of anesthetic literature, morbidity and mortality, inter-disciplinary and intra-disciplinary conferences, use of medical informatics systems and simulation based learning.

Prerequisites: NURSE 5619NA2.

NURSE 5619NAB Basic Principles of Nurse Anesthesia Practice Credits: 2

This course is designed to build on topics introduced in orientation and provides the student with the knowledge needed to begin the delivery of anesthesia. This course encompasses a variety of topics including pharmacology and equipment utilized in the provision of anesthesia, airway anatomy and management, commonly administered fluid, colloids, non-colloids, and blood products and an overview of anesthesia and trauma. Lecture topics will be assimilated into high fidelity simulation scenarios to prepare the student for clinical residency courses.

Prerequisites: NURSE 5619NAO.

NURSE 5619NAO Orientation to Nurse Anesthesia Practice Credits: 2

This course is designed to give the first year nurse anesthesia student a broad field orientation to anesthesia topics. The course will provide a foundation of knowledge for the safe practice of anesthesia. This will be an initial introduction to the art and science of anesthesia. The course content will include: patient assessment of cardiac status for anesthesia, anesthetic equipment and workplace safety. The anesthesia machine is incorporated into the learning process to reinforce principles introduced in class. Institutional policies/procedures will be reviewed along with interprofessional communication skills. Education regarding personal wellness and substance abuse risks will be discussed.

Prerequisites: Admission into the DNP-NA program.

NURSE 5620 Advanced Practice V - DNP Clinical Credits: 5

This course is designed to increase the clinical expertise of the student by fostering the development of a specific area of focus. It allows the student to investigate specific procedures, skills or clinical knowledge that will be later utilized in the DNP practicum course. The course is designed to be self-directed allowing the student to focus on her/his own specific clinical interests and/or area of expertise. This five credit hour course consists of one credit hour of didactic and four credit hours of clinical (120 hours).

Prerequisites: All DNP coursework except NURSE 5624.

NURSE 5621A Clinical III Credits: 4

This course will provide students with the opportunity to apply knowledge from previous graduate courses to advanced primary care nursing of adults and geriatrics. The focus is to demonstrate refined advanced assessment, diagnosis, and treatment skills in clinical practice as appropriate in areas of specialization related to multiple disease processes associated in the care of adults and geriatrics. This practice will be based on the application of evidence in the biophysical, psychosocial, behavioral, sociopolitical, cultural, economic, interprofessional practice and nursing science arenas.

Prerequisites: NURSE 5564A- Ambulatory Care Of Adults

NURSE 5621C Clinical III Credits: 4

This course will provide students with the opportunity to apply knowledge from previous graduate courses to advanced primary care nursing of children. The focus is to demonstrate refined advanced assessment, diagnosis, and treatment skills in clinical practice as appropriate in areas of specialization related to multiple disease processes associated in the care of children. This practice will be based on the application of evidence in the biophysical, psychosocial, behavioral, sociopolitical, cultural, economic, interprofessional practice and nursing science arenas.

Prerequisites: NURSE 5566C.

Co-requisites: NURSE 5617B.

NURSE 5621F Clinical III Credits: 4

This course will provide students with the opportunity to apply knowledge from previous graduate courses to advanced primary care nursing of individuals and families. The focus is to demonstrate refined advanced assessment, diagnosis, and treatment skills in clinical practice as appropriate in areas of specialization related to multiple disease processes associated in the care of individuals and families. This practice will be based on the application of evidence in the biophysical, psychosocial, behavioral, sociopolitical, cultural, economic, interprofessional practice and nursing science arenas.

Prerequisites: NURSE 5566F.

Co-requisites: NURSE 5617B.

NURSE 5621W Clinical III Credits: 4

This course will provide students with the opportunity to apply knowledge from previous graduate courses to advanced primary care nursing of women. The focus is to demonstrate refined advanced assessment, diagnosis, and treatment skills in clinical practice as appropriate in areas of specialization related to multiple disease processes associated in the care of women. This practice will be based on the application of evidence in the biophysical, psychosocial, behavioral, sociopolitical, cultural, economic, interprofessional practice and nursing science arenas.

Prerequisites: NURSE 5566W.

Co-requisites: NURSE 5617B.

NURSE 5622 Statistics II Credits: 3

This graduate statistics on-line course is designed to provide a conceptual understanding of the statistical procedures associated with: advanced multiple regression; moderators and mediators in multiple regression; path analysis; logistic regression; factor analysis; MANCOVA; MANOVA; cluster analysis; and canonical correlation.

Prerequisites: NURSE 5612.

NURSE 5623A Advanced Nursing Practice: Synthesis Practicum Credits: 5

This course is a concentrated, experiential, supervised clinical opportunity to function at the highest level of advanced nursing practice. The focus is on the synthesis and application of previous theory, primary care, and specialty clinical courses. Students will be expected to apply advanced clinical decision making skills and evidence based practice guidelines to the assessment, management, and evaluation of complex healthcare problems. Core concepts include integrated nursing science with knowledge of ethical, legal, and health policy issues.

Prerequisites: NURSE 5621A.

Co-requisites: NURSE 5629.

NURSE 5623C Advanced Nursing Practice: Synthesis Practicum Credits: 5

This course is a concentrated, experiential, supervised clinical opportunity to function at the highest level of advanced nursing practice. The focus is on the synthesis and application of previous theory, primary care, and specialty clinical courses. Students will be expected to apply advanced clinical decision making skills and evidence based practice guidelines to the assessment, management, and evaluation of complex healthcare problems. Core concepts include integrated nursing science with knowledge of ethical, legal, and health policy issues.

Prerequisites: NURSE 5621C.

Co-requisites: NURSE 5629.

NURSE 5623F Advanced Nursing Practice: Synthesis Practicum Credits: 5

This course is a concentrated, experiential, supervised clinical opportunity to function at the highest level of advanced nursing practice. The focus is on the synthesis and application of previous theory, primary care, and specialty clinical courses. Students will be expected to apply advanced clinical decision making skills and evidence based practice guidelines to the assessment, management, and evaluation of complex healthcare problems. Core concepts include integrated nursing science with knowledge of ethical, legal, and health policy issues.

Prerequisites: NURSE 5621F.

Co-requisites: NURSE 5629.

NURSE 5623M Advanced Nursing Practice: Synthesis Practicum Credits: 5

This course is a concentrated, experiential, supervised clinical opportunity to function at the highest level of advanced nursing practice. The focus is on the synthesis and application of previous theory, mental health care, and specialty clinical courses. Students will be expected to apply advanced clinical decision making skills and evidence based practice guidelines to the assessment, management, and evaluation of complex healthcare problems. Core concepts include integrated nursing science with knowledge of ethical, legal, and health policy issues.

Prerequisites: NURSE 5621M.

Co-requisites: NURSE 5629.

NURSE 5623W Advanced Nursing Practice: Synthesis Practicum Credits: 5

This course is a concentrated, experiential, supervised clinical opportunity to function at the highest level of advanced nursing practice. The focus is on the synthesis and application of previous theory, primary care, and specialty clinical courses. Students will be expected to apply advanced clinical decision making skills and evidence based practice guidelines to the assessment, management, and evaluation of complex healthcare problems. Core concepts include integrated nursing science with knowledge of ethical, legal, and health policy issues.

Prerequisites: NURSE 5621W.

Co-requisites: NURSE 5629.

NURSE 5624 Advanced Practice VI-DNP Practicum Credits: 5

This course is designed to synthesize all previous coursework through the implementation and evaluation of a "tangible and deliverable academic product that is derived from the practice immersion experience" (DNP essentials, p.20). Individual student work may take a variety of forms, but will include the elements of evidence evaluation and utilization, systems analysis, and dissemination of best practice information.

Prerequisites: NURSE 5620.

NURSE 5627NA Regional Anesthesia Credit: 1

This course is designed for graduate nurse anesthesia students to review anatomy, pharmacodynamics, pharmacokinetics and physiological effects of local anesthetics and to learn techniques to administer various types of regional anesthesia.

Prerequisites: NURSE 5619NAB.

NURSE 5628NA1 Advanced Physical Health Assessment for the Nurse Anesthetist I Credits: 2

This is the first of a two course series that will present the various elements required to perform a systematic assessment with an emphasis on the patient preparing to undergo anesthesia throughout the lifespan. Integration of in-depth health history, physical and psychological signs and symptoms, diagnostic testing, pathophysiologic changes, psychosocial, and cultural characteristics of the individual are emphasized. Professional documentation and communication of findings will be practiced. The student will integrate knowledge and advanced assessment skills to perform a comprehensive pre-anesthesia assessment.

Prerequisites: NURSE 5619NA0.

Co-requisites: NURSE 5619NAB.

NURSE 5628NA2 Advanced Physical Health Assessment for the Nurse Anesthetist II Credit: 1

This is the second of a two course series. This course will integrate the student's knowledge and skills to work effectively and efficiently within the healthcare team to formulate an anesthesia plan of care which takes into consideration assessment findings related to underlying pathology, life circumstance, culture, and ethnicity. Content will include advanced diagnostic testing pertinent to the patient preparing for anesthesia. Assessment skills and critical thinking will be refined through clinical experiences. This course consists of 0.5 credit hours of didactic and 0.5 credit hours of clinical (45 hours).

Prerequisites: NURSE 5628NA1.

NURSE 5629 Clinical Institute III Credits: 3

This course is designed to synthesize all previous course work. The students will utilize education, knowledge and experiences to complete their final DNP project data collection and evaluation of a "tangible and deliverable academic product that is derived from the practice immersion experience" (AACN Essentials 2006, p. 20). Individual student work may take a variety of forms, but will include the multi-faceted elements required of evidence evaluation and utilization, systematic analysis, and dissemination of project data to support best practice.

Prerequisites: NURSE 5617B, NURSE 5621.

Co-requisites: NURSE 5623.

NURSE 5630 Health Care Systems Credits: 3

This course is a guided, in-depth exploration, analysis and evaluation of selected health care systems literature. Other nursing literature will be reviewed as appropriate.

Prerequisites: Admission into Ph.D. in Nursing program.

NURSE 5631 State of the Science Credits: 3

This course is a guided in-depth exploration of literature on a selected focus area. Appropriate contextual system literature will be reviewed as appropriate. Scholarly writing for a variety of contexts will be presented.

Prerequisites: Admission into a doctoral program and completion of a doctoral level theory course or permission of instructor

NURSE 5632 Health Restoration & Support Credits: 3

This course is a guided, in-depth exploration, analysis and evaluation of selected health restoration support literature. Other nursing literature will be reviewed as appropriate.

Prerequisites: Admission into Ph.D. in Nursing program.

NURSE 5636NA Obstetrical Anesthesia Credit: 1

This course is designed to provide the graduate nurse anesthesia student with a broad knowledge base in the field of obstetrical anesthesia. Anatomy and physiology of pregnancy, co-morbidities in the pregnant patient and anesthesia procedures for the pregnant patient will be presented. Lecture topics will be assimilated into high fidelity simulation scenarios to prepare the student for clinical residency courses.

Prerequisites: NURSE 5619NA1.

Co-requisites: NURSE 5619NA2.

NURSE 5637 Healthcare Outcomes and Epidemiology Credits: 2-3

This course is an application of basic epidemiologic principles. This course provides the foundation for assessment and evaluation of health outcomes in a variety of populations, clinical settings, and systems. Concepts introduced include fundamentals of epidemiology, determinants of health, screening, outbreak investigation, and disease surveillance. The course includes content on descriptive and analytic epidemiology. CRNA students enroll for 2-credits; all other DNP students are required to enroll for 3-credits.

Prerequisites: NURSE 5612 or equivalent.

NURSE 5638NA1 Pharmacology of Anesthesia I Credit: 1

The course is the first in a two semester sequence designed to provide the graduate nurse anesthesia student with the knowledge of pharmacology and the human physiologic responses to pharmacologic agents when administered to the patient perioperatively.

Prerequisites: NURSE 5619NA3.

NURSE 5638NA2 Pharmacology of Anesthesia II Credits: 2

This course is the second in a two semester sequence designed to provide the graduate nurse anesthesia student with the knowledge of pharmacology and the human physiologic responses to pharmacologic agents when administered to the patient perioperatively.

Prerequisites: NURSE 5638NA1.

NURSE 5640NA Pediatric Anesthesia Credit: 1

This course is designed for the graduate nurse anesthesia student to learn anatomy and physiology specific to the pediatric patient. The most common pathophysiologic states found in the pediatric surgical patient will be discussed as well as fluid management and pharmacology as it relates to the pediatric patient. The goal of this pediatric course is to give the student the basic knowledge of pediatric anesthesia as a foundation, prior to their pediatric clinical rotation.

Prerequisites: NURSE 5619NA2.

Co-requisites: NURSE 5619NA3.

NURSE 5641NA Acute and Chronic Pain Management Credits: 2

The student will develop a basic understanding of pain management as it relates to the field of anesthesia. Relevant anatomy, physiology, and pharmacology will be reviewed to evaluate the risks, benefits, and options of various pain management approaches. Students will be required to demonstrate proficiency in regional anesthesia techniques and management of pain in patients of all ages and varying stages of wellness.

Prerequisites: Nurse 5619NA1, Nurse 5619NA2.

NURSE 5642NA Comprehensive Review Credit: 1

This is a comprehensive review course that covers all areas of anesthesia, as well as all anesthesia techniques. This course will discuss normal physiology and pathophysiology of all organ systems and how various anesthesia techniques and pharmacology affect these systems. The student will be equipped with the knowledge of how to choose appropriate anesthetic techniques for various disease states and surgical procedures.

Prerequisites: NURSE 5619NA2.

Co-requisites: NURSE 5619NA3.

NURSE 5643NA Professional Practice for the Nurse Anesthetist Credits: 2

This course is designed to explore a range of non-clinical issues in nurse anesthesia practice. Students will gain an appreciation of the professional ideals of the Doctor of Nursing Practice (DNP) prepared Certified Registered Nurse Anesthetist (CRNA) through both online and on-site group discussion. In addition, students will attend professional meetings including: Student Registered Nurse Anesthetist (SRNA) Leadership Luncheon, Missouri Association of Nurse Anesthetists (MoANA) Lobby Day; Wellness in the Workplace, an event highlighting the risks of chemical dependency in nurse anesthesia practice; and one additional state or national professional meeting.

Prerequisites: Active status in both the UMKC SONHS DNP-NA Track and TMC School of Nurse Anesthesia.

NURSE 5650NA1 Clinical Anesthesia I Credits: 0

The first of three clinical anesthesia practicums designed to provide the nurse anesthesia student simulated learning and complete hands on, supervised clinical practice on adult patients. The foci are skill development and safe anesthetic practice throughout the perioperative period. Students are assigned day experiences and call shifts at Truman Medical Center. Experiences progress in acuity and include, but are not limited to, general, gynecological, orthopedic, oral maxillary facial, urologic, dental, ophthalmic and endoscopic procedures. Core content includes formulation and management of perianesthesia plan of care, utilization of technology, application of EBP, technical skill development and advanced practice role competencies.

Prerequisites: NURSE 5650NA0, NURSE 5619NAB.

NURSE 5650NA2 Clinical Anesthesia II Credits: 0

The second of three clinical anesthesia practicums designed to provide the nurse anesthesia student simulated learning and complete hands on, supervised clinical practice on adult patients. The foci are skill development and safe anesthetic practice throughout the perioperative period. Students are assigned day experiences and call shifts at Truman Medical Center. Experiences progress in acuity and include, but are not limited to, general, gynecological, orthopedic, oral maxillary facial, urologic, dental, ophthalmic and endoscopic procedures. Core content includes formulation and management of perianesthesia plan of care, utilization of technology, application of EBP, technical skill development and advanced practice role competencies.

Prerequisites: NURSE 5650NA1.

NURSE 5650NA3 Clinical Anesthesia III Credits: 0

The third of three clinical anesthesia practicums designed to provide the nurse anesthesia student simulated learning and complete hands on, supervised clinical practice on adult patients. The foci are skill development and safe anesthetic practice throughout the perioperative period. Students are assigned day experiences and call shifts at Truman Medical Center. Experiences progress in acuity and include, but are not limited to, general, gynecological, orthopedic, oral maxillary facial, urologic, dental, ophthalmic and endoscopic procedures. Core content includes formulation and management of perianesthesia plan of care, utilization of technology, application of EBP, technical skill development and advanced practice role competencies.

Prerequisites: NURSE 5650NA2.

NURSE 5650NA4 Clinical Anesthesia IV Credits: 0

This course is the first of a three semester nurse anesthesia residency/practicum designed to provide concentrated, experiential, supervised, high acuity, perioperative experiences. The focus is on the synthesis and application of all previous courses. Students will be expected to apply advance clinical decision-making skills and evidence-based practice guidelines to the assessment, management and evaluation of complex procedures and patients across the lifespan. Students attend specialty rotations at up to 9 different sites. Core concepts include nurse anesthesia practice, technical skill development, integration of technology and evidence based practice to the patient and/or healthcare system, and ethical, legal and professional issues.

Prerequisites: NURSE 5619NA3 and NURSE 5650NA3.

NURSE 5650NA5 Clinical Anesthesia V Credits: 0

This course is the second of a three semester nurse anesthesia residency/practicum designed to provide concentrated, experiential, supervised, high acuity, perioperative experiences. The focus is on the synthesis and application of all previous courses. Students will be expected to apply advance clinical decision-making skills and evidence-based practice guidelines to the assessment, management and evaluation of complex procedures and patients across the lifespan. Students attend specialty rotations at up to 9 different sites. Core concepts include nurse anesthesia practice, technical skill development, integration of technology and evidence based practice to the patient and/or healthcare system, and ethical, legal and professional issues.

Prerequisites: NURSE 5650NA4.

NURSE 5650NA6 Clinical Anesthesia VI Credits: 0

This course is the third of a three semester nurse anesthesia residency/practicum designed to provide concentrated, experiential, supervised, high acuity, perioperative experiences. The focus is on the synthesis and application of all previous courses. Students will be expected to apply advance clinical decision-making skills and evidence-based practice guidelines to the assessment, management and evaluation of complex procedures and patients across the lifespan. Students attend specialty rotations at up to 9 different sites. Core concepts include nurse anesthesia practice, technical skill development, integration of technology and evidence based practice to the patient and/or healthcare system, and ethical, legal and professional issues.

Prerequisites: NURSE 5650NA5.

NURSE 5650NAO Clinical Anesthesia Orientation Credits: 0

Orientation to clinical practice during which students participate in hands on, supervised clinical practices and simulated clinical learning experiences. Students orient to the Hospital, OR, and Anesthesia department. Clinical education focus is on safe anesthetic practice and skill development throughout the entire perioperative period. Experiences include basic airway management, equipment procurement, anesthesia assessment process, induction and emergence from anesthesia. Clinical orientation experiences include multiple patient populations, ages and sub specialties within anesthesia practice.

Prerequisites: NURSE 5619NAO.

Co-requisites: NURSE 5619NAB.

NURSE 5659NA Health Systems, Economics and Quality in Nurse Anesthesia Practice Credits: 2

This course is designed to introduce the nurse anesthesia student to the fundamental principles of healthcare economics and healthcare systems. The effects of economics will be discussed from a broad viewpoint and from the various perspectives of anesthesia care delivery models. This course will also discuss the impact of quality indicators on anesthesia practice. The course will begin with a leadership summit and continue with online content and discussion forums.

Prerequisites: NURSE 5674NA1.

NURSE 5661NA1 Anesthesia & Co-Existing Diseases I Credits: 2

This course is the first in a two semester series designed to provide senior nurse anesthesia students with the knowledge of pathophysiology of various disease states and their anesthesia implications.

Prerequisites: NURSE 5619NA3.

NURSE 5661NA2 Anesthesia & Co-Existing Diseases II Credit: 1

This course is the second in a two semester series designed to provide senior nurse anesthesia students with the knowledge of pathophysiology of various disease states and their anesthesia implications.

Prerequisites: NURSE 5661NA1.

NURSE 5662 Psychometrics Credits: 3

This course focuses on application of psychometric theories and practices related to instrumentation in nursing research. The basic methodologies and techniques for constructing, testing, and evaluating instruments will be discussed and applied by students. Content will focus on theoretical foundations of measurement, item construction, instrument design, item analysis, validity and reliability assessment. Criteria for evaluating existing instruments will also be discussed.

Prerequisites: NURSE 5612; NURSE 5622; NURSE 5668.

NURSE 5666 Designing Nursing Research Credits: 3

This doctoral level course directs the student to develop research writing skills necessary for developing their dissertation and future program of research. Critical analyses of methodologies and design are accomplished. The strengths and weakness of various research designs (non-experimental, quasi-experimental, experimental and randomized clinical trial) are evaluated via in-depth discussions.

Prerequisites: NURSE 5610, NURSE 5612, NURSE 5622, NURSE 5662, NURSE 5668, NURSE 5670.

NURSE 5668 Quantitative Research Credits: 3

Quantitative research methods used to build nursing's body of knowledge are explored. Experimental, quasi-experimental, and correlational designs and clinical trials are analyzed. Emphasis is placed on design, data generation, analysis, and dissemination of findings. Issues pertaining to the use of quantitative methods will also be explored.

Prerequisites: NURSE 5610, PSYCH 5516.

NURSE 5670 Qualitative Research Methods Credits: 3

Qualitative research methods used to build nursing's body of knowledge are explored in this seminar course. Emphasis is placed on design, data generation and analysis, and dissemination of findings. Issues regarding qualitative research are identified and analyzed.

Prerequisites: Admission to the Nursing Ph.D. program.

NURSE 5671 Advanced Qualitative Research and Mixed Methods Credits: 3

This graduate level course is designed for students who have had an introduction to qualitative research methods and want to pursue more in-depth study of these methodologies, with emphasis on a chosen methodology that they hope to use in their own research. Appropriateness of methodological choice in relation to research question, application of theory, rhetorical style and author presence, and criteria for judging quality will be among the topics explored for various methodologies and data generation (collection) and data analysis skills will be practiced. The course will also acquaint students with the growing literature on mixed methods research.

Prerequisites: Admission to the Nursing Ph.D. program, an introductory qualitative research course.

NURSE 5674NA1 Scholarly Project in Nurse Anesthesia I Credits: 3

This is the first in a series of four courses that culminate in a scholarly project in nurse anesthesia that demonstrates the scholarship of integration and application. This is a distance education course. The student will identify a complex problem in their area of interest and expertise, design, implement, and evaluate an innovative solution to this problem. The student will use the breadth of knowledge and scholarship skills gained through their program of study to improve practice and/or patient outcomes. It validates the student's ability to translate research evidence into practice. This project lays the foundation for future scholarship.

Prerequisites: NURSE 5555.

NURSE 5674NA2 Scholarly Project in Nurse Anesthesia II Credits: 2

This is the second in a series of four courses that culminate in a scholarly project in nurse anesthesia that demonstrates the scholarship of integration and application. This is a distance education course. The student will identify a complex problem in their area of interest and expertise, design, implement, and evaluate an innovative solution to this problem. The student will use the breadth of knowledge and scholarship skills gained through their program of study to improve practice and/or patient outcomes. It validates the student's ability to translate research evidence into practice. This project lays the foundation for future scholarship.

Prerequisites: NURSE 5674NA1.

NURSE 5674NA3 Scholarly Project in Nurse Anesthesia III Credits: 2

This is the third in a series of four courses that culminate in a scholarly project in nurse anesthesia that demonstrates the scholarship of integration and application. This course is a face-to-face course. The student will identify a complex problem in their area of interest and expertise, design, implement, and evaluate an innovative solution to this problem. The student will use the breadth of knowledge and scholarship skills gained through their program of study to improve practice and/or patient outcomes. It validates the student's ability to translate research evidence into practice. This project lays the foundation for future scholarship.

Prerequisites: NURSE 5674NA2.

NURSE 5674NA4 Scholarly Project in Nurse Anesthetist IV Credits: 2

This is the fourth in a series of four courses that culminate in a scholarly project in nurse anesthesia that demonstrates the scholarship of integration and application. This course is a face-to-face course. The student will identify a complex problem in their area of interest and expertise, design, implement, and evaluate an innovative solution to this problem. The student will use the breadth of knowledge and scholarship skills gained through their program of study to improve practice and/or patient outcomes. It validates the student's ability to translate research evidence into practice. This project lays the foundation for future scholarship.

Prerequisites: NURSE 5674NA3.

NURSE 5696 Pre-Dissertation Credits: 1-2

This course is individually directed research leading to the preparation of a doctoral dissertation.

Prerequisites: Permission of the instructor.

Co-requisites: Completion of the comprehensive examination.

NURSE 5697A Special Topics Nursing Elective Credits: 1-6

This course consists of the guided study of special topics in areas of nursing theory and/or research.

Prerequisite: Admission into PhD in Nursing Program

NURSE 5697APP Special Topics Nursing Credits: 1-6**NURSE 5697AR Special Topics Nursing Credits: 1-6****NURSE 5697B Special Topics Nursing-Equivalent Credits: 1-6**

This course will cover guided study of course equivalent topics in areas of nursing theory and/or research.

Prerequisites: Admission into Ph.D. in Nursing program.

NURSE 5697CI Special Topics Nursing Credits: 1-6**NURSE 5697CP Special Topics Nursing Credits: 1-6****NURSE 5697CR Special Topics Credits: 1-6**

This course will cover guided study of course equivalent topics in areas of nursing theory and/or research.

Prerequisites: Admission into Ph.D. in Nursing program.

Academic Regulations in the School of Nursing & Health Studies

Students in UMKC's School of Nursing and Health Studies (SoNHS) are expected to be familiar with the contents of the UMKC General Catalog and UMKC School of Nursing and Health Studies Policies & Procedures Manual and comply with the provisions pertaining to their level of study. The UMKC General Catalog outlines the minimum academic regulations and degree requirements. The UMKC School of Nursing and Health Studies may adopt additional and/or more stringent requirements for admission, retention and degrees that take priority over the Catalog's minimum regulations to provide students with the best possible preparation for successful completion of licensure examinations. All policies are reviewed annually. Policy changes become effective the fall following the approved change. Students will be notified via UMKC e-mail if there are exceptions to the effective date. These policies and procedures can be found in the School of Nursing and Health Studies Policies and Procedures Manual located at <http://sonhs.umkc.edu/wp-content/uploads/2014/10/policy-procedure.pdf>.

Students must also be familiar with the Nursing Honor Code found at <http://sonhs.umkc.edu/wp-content/uploads/2014/10/honor-code.pdf>.

Performance standards may be influenced annually by various regulatory agency requirements and subject to change. Students will be notified in writing within 24 hours of mandated changes. Students admitted the BSN program prior to any mandated change will not be held to the new requirements.

Academic and Professional Behavior

Students in the School of Nursing and Health Studies abide by the University of Missouri Student Conduct Code (http://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.010_standard_of_conduct/) (listed in the appendices of this catalog) and by the School of Nursing and Health Studies Honor Code (<http://sonhs.umkc.edu/wp-content/uploads/2014/10/honor-code.pdf>). The Standards of Professional and Ethical Behavior detailed in the honor code have been developed to guide students who are enrolled at all levels with the UMKC SoNHS, including undergraduate and graduate students, and are designed to assure accountability for the professional and ethical standards of the nursing profession.

STUDENT CONCERNS – ALL PROGRAMS

During the semester, if a student has concerns about their course, the student should follow the steps listed below:

1. Contact the instructor directly to set up a meeting. This meeting should be in person or by telephone.
2. If the issues are not resolved satisfactorily for the student, the student should then consult with the course coordinator if the course is a team-taught course.
3. If the issues are not resolved satisfactorily for the student, then the student should first make an appointment with the program director.
4. If issues are not resolved, the student may meet with the Associate Dean for Students.
5. If the issue remains unresolved they may meet with the Dean for the School of Nursing and Health Studies. The Dean's decision is considered final.
6. If the student's concerns are related to perceived discrimination, the student should refer to UMKC's Student Grievance Process. This process may be found on the UMKC website at: <https://catalog.umkc.edu/special-notice/equal-opportunity-guidelines/discrimination-grievance-procedure-for-students/> and process flowchart can be found at: http://info.umkc.edu/saem/wp-content/uploads/2015/10/Grievance_Flow_ChartRevised.pdf. If the student's concerns are related to grades and those are not resolved upon completion of the course, the student may pursue a Grade Appeal.

See the School of Nursing Policy and Procedures for Grade Appeal located on the School of Nursing webpages at <http://sonhs.umkc.edu/wp-content/uploads/2014/10/policy-procedure.pdf>.

7. No other sequences, procedures or avenues of discourse are acceptable for consideration or issues arising in individual courses.

TIME LIMIT ON SCIENCE COURSES – UNDERGRADUATE PROGRAMS

BSN Pre-Licensure (PL) & Accelerated Track (AT): Students applying to the BSN pre-licensure and accelerated track must have science course requirements completed within the past five academic years prior to beginning courses within the nursing major. For example, if students begin Nursing course work Fall Semester 2010, then science courses completed Fall Semester 2005 or later will be accepted. Pre-requisite science courses include Chemistry or Bio-Chemistry; Anatomy & Physiology; and Microbiology with a grade of B- or better.

RN-BSN: Students applying to the RN-BSN program and working as RN's do not have a time limit on their science courses.

Bachelor Health Studies: At the time of graduation, Anatomy & Physiology and Nutrition must be no more than 10 years old.

CRIMINAL BACKGROUND CHECK AND DRUG SCREENING – ALL CLINICAL PROGRAMS

- An offer for admission to a School of Nursing and Health Studies clinical program is contingent on findings from the criminal background screen and drug test. All screens and tests must be free of discrepancies. If results indicate discrepancies, an offer for admission will be immediately rescinded.
- Once students are admitted into a clinical program, they are required to provide information and make payment to a SoNHS selected company, for a Criminal Background Check. If the results of this check show that the student has a pending or recent (within the last three years) criminal conviction for an offense involving narcotics, alcohol, crimes against persons or abuse/neglect, the student will be dismissed from the program.

CLINICAL DRESS & PROFESSIONAL APPEARANCE – ALL PROGRAMS

School of Nursing and Health Studies has a clinical dress and professional appearance that is located in the SoNHS policy and Procedure. Standards for dress and appearance are more conservative so that it is acceptable in all clinical, community, and professional settings. Dress code standards apply to all clinical, laboratory, simulation, and UMKC sponsored events where the uniform is worn.

Undergraduate and graduate programs have specific and different requirements. Please refer to the School of Nursing and Health Studies Policy and Procedure Manual.

Accreditation

The Baccalaureate, Master's, and DNP programs at the UMKC School of Nursing and Health Studies are accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Academic Programs Offered

Please visit the School of Nursing and Health Studies' website at <http://sonhs.umkc.edu> for more specific program information and plans of study for the following nursing programs.

Bachelor of Science in Nursing (BSN)

- Accelerated Track (for students with a previous bachelor's degree) (69 credit hours)
- Pre-licensure Track (128 credit hours)
- RN-BSN Track/RN-BSN Completion (120 credit hours)

Master of Science in Nursing (MSN)

- Nurse Educator (41 credit hours)

Master of Science in Nursing - Nursing Practice (MSN NP)

- Acute Care Pediatric Nurse Practitioner (52 credit hours)
- Adult Gerontology Nurse Practitioner (46 credit hours)
- Family Nurse Practitioner (46 credit hours)
- Neonatal Nurse Practitioner (45 credit hours)
- Pediatric Nurse Practitioner (46 credit hours)
- Psychiatric Mental Health Nurse Practitioner (46 credit hours)
- Women's Health Nurse Practitioner (46 credit hours)

Bachelor of Science in Nursing to Doctor of Nursing Practice (BSN-DNP)

- Adult Gerontology Nurse Practitioner (74 credit hours)
- Certified Registered Nurse Anesthetist (73 credit hours)
- Family Nurse Practitioner (74 credit hours)
- Pediatric Nurse Practitioner (74 credit hours)
- Women's Health Nurse Practitioner (74 credit hours)

Post-MSN Certificate Options

- Acute Care Pediatric Nurse Practitioner (16 credit hours)
- Adult Gerontology Nurse Practitioner (18 credit hours)
- Family Nurse Practitioner (18 credit hours)
- Neonatal Nurse Practitioner (24 credit hours)
- Nurse Educator Post Master's Certificate Program (12 credit hours)
- Pediatric Nurse Practitioner (18 credit hours)
- Psychiatric Mental Health Nurse Practitioner (16 credit hours)
- Women's Health Nurse Practitioner (18 credit hours)

Post Master's APRN to Doctor of Nursing Practice (MSN-DNP) (31 credit hours)

MSN-DNP NP New Emphasis (or Foci) (62 credit hours)

- Adult Gerontology Nurse Practitioner
- Family Nurse Practitioner
- Neonatal Nurse Practitioner
- Pediatric Nurse Practitioner (Acute or Primary Care track)
- Psychiatric Mental Health Nurse Practitioner
- Women's Health Nurse Practitioner

APRN MSN-DNP 2nd NP Emphasis (or Foci) (43-45 credit hours)

- Adult Gerontology Nurse Practitioner
- Family Nurse Practitioner
- Neonatal Nurse Practitioner
- Pediatric Nurse Practitioner (Acute or Primary Care track)
- Psychiatric Mental Health Nurse Practitioner
- Women's Health Nurse Practitioner

BSN-PhD in Nursing (73 credit hours)

MSN-PhD in Nursing (61 credit hours)

Admissions

UMKC's Office of Admissions is located in room 120, Administrative Center, 5115 Oak St. All applicants should complete the UMKC application for admission. Applications and transcripts should be mailed to the UMKC Office of Admissions, 120 Administrative Center, 5100 Rockhill Road, Kansas City, MO 64110-2499. Go to <http://www.umkc.edu/admissions/>

All nursing programs offered by the UMKC School of Nursing and Health Studies (SoNHS) require supplemental application materials. It is recommended that applicants review the requirements for undergraduate and graduate degree programs on the UMKC School of Nursing and Health Studies website to access supplemental application materials and review application deadline dates. All application materials must be received by the stated deadline for the specific program. Applications received after these dates may or may not be reviewed depending on available space. The UMKC SoNHS website can be found at: <http://sonhs.umkc.edu/>.

Once admitted, all official University communication is conducted via UMKC e-mail.

Bachelor of Health Sciences

University Requirements

General Education

UMKC Essentials is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour program includes a First Year Experience course; three critical thinking courses in the areas of Arts & Humanities, Natural & Physical Sciences, and Social & Behavioral Sciences; a Culture and Diversity course; a Civic & Urban Engagement course; two courses in Composition and one course in Communication; and a Math Pathway course.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

Exit Examinations

Information on exit examinations is available in the Undergraduate Academic Regulations and Information (p. 488) section of the catalog.

Missouri Higher Education Civics Achievement Examination

In accordance with Missouri Senate Bill 807 (section 170.013.1), 'any student entering a public institution of higher education for the first time after July 2019 who is pursuing an associate's or bachelor's degree from such institution shall successfully pass an examination on the provisions and principles of American civics with a score of seventy percent or greater as a condition of graduation from such institution'. To satisfy this requirement at UMKC, students access the exam through the Canvas site. This requirement will be listed in the degree audit system as, 'Take State Mandated Missouri Higher Education Civics Achievement Examination', and listed on the transcript as 'Missouri Civics Examination'.

Student Learning Outcomes

Students graduating from this program will:

- Apply knowledge from physical, biological, behavioral, business, and social aspects of health into inter-professional practice.
- Create (plan, implement, and evaluate) evidence-based health programs relevant to targeted populations and desired health outcomes.
- Demonstrate professional conduct, and strong interpersonal skills in their chosen career path.
- Identify the specific challenges, and opportunities of improving health outcomes and reducing health disparities in diverse and urban environments.

Bachelor of Health Sciences (BHS) Mission

Supporting the SoNHS' mission to prepare the health professional workforce in improving health outcomes, the purpose of the Bachelor of Health Sciences program is to prepare graduates for a wide variety of careers in health or to pursue post-graduate education. Through an innovative combination of coursework, service learning, volunteerism, and a senior year internship, students will apply theoretical concepts in evidence-based health programming and health policy development into diverse community settings.

What is a Bachelor of Health Sciences?

With a comprehensive science-based curriculum, the Bachelor of Health Sciences degree combines urban-focused coursework in health policy, health program development, health and wellness, and population health outcomes. With a combination of coursework, service learning, volunteerism, and a senior year internship, students will apply theoretical concepts in evidence-based health programming and policy development in community settings. The UMKC BHS Degree Program offers a comprehensive curriculum designed to prepare students for a wide variety of careers in health or to pursue post-graduate education. The program is offered through the UMKC School of Nursing & Health Studies and includes coursework in the physical, biological, behavioral, business and social aspects of health.

Minor Options

The BHS requires completion of 120 credits of coursework, which includes elective coursework. Students are urged to align those elective classes within a targeted area of specialization. These minor options may enhance your marketability in the workplace.

MINORS

MINOR IN PUBLIC HEALTH

MINOR IN EXERCISE SCIENCE

What can I do with a Bachelor of Health Sciences?

The UMKC BHS Degree Program is the perfect choice for students who are interested in a career in health focusing on health prevention, health promotion, population health, and health behavior change. UMKC is offering the BHS Degree in response to the growing workforce demand for health professionals in a variety of areas including, personal health and wellness, social determinants of health, occupational health and safety, community

health, and environmental health. Graduates may find career options in government settings, non-for profit organizations, community health centers, workplace health and wellness companies, and health promotion organizations.

Student Organization

BHS Society is a student organization centered around the health sciences field of study. The goals of this organization are to promote philanthropy within the community, advocate health education, and cultivate leadership among members.

Progression Policy

Students in the BHS program must earn a minimum grade of “C-” in all Health Sciences and CHEM 206 (or equivalent). They must earn a minimum grade of “D-” in non-Health Sciences courses. For a full list of courses and the required grade, refer to the Major Map.

This means that a grade below a “C-” in a Health Sciences/CHEM 206, or below a “D-” in a non-Health Sciences course will need to be repeated to earn a passing grade.

If a student’s cumulative GPA falls below 2.0, the student will be placed on Academic Probation. To be removed from Academic Probation, students must achieve a cumulative GPA of 2.0 within the next two successive semesters (if enrolling in summer classes, summer is included).

Students must be removed from Academic Probation within the next two successive semesters or they will be Academically Dismissed.

Students whose semester cumulative GPA falls below 2.0 must enroll in HLSC 100 Student Success Strategies. Students must successfully complete this one-hour course in addition to earning a cumulative GPA of 2.0 before being returned to good academic standing. This one-hour course is offered each fall and spring.

Program Requirements

UMKC Essentials

Code	Title	Credits
First Semester Experience Course (GEFSE)		3
Written Communication:		
ENGLISH 110	English I: Introduction To Academic Prose	3

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

Code	Title	Credits
Choose one of the following:		3
CJC 364	The Supreme Court And The Criminal Process	
HISTORY 101	U.S. History to 1877	
HISTORY 102	U.S. History Since 1877	
HONORS 230	Honors American Government	

POL-SCI 210	American Government	
Total Credits		3

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major. Please see the tab above to view the major map for this program.

UMKC's Transfer Guides (<https://www.umkc.edu/admissions/transfer-guides.html>) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.

UMKC's PlanMyDegree 'Audit' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree audit system provides an individual evaluation of all degree requirements (General Education, Degree Specific, Major Specific, etc.) for students' officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. This evaluation is used to certify all graduation requirements.

UMKC's PlanMyDegree 'Plans' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree planning tool enables students to develop a personalized semester by semester plan of study towards completion of degree requirements for student's officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. Update and edit your full plan to degree completion each term and confirm accuracy each semester with your Academic Advisor(s).

Major Map

Four Year Graduation Plan - Courses & Critical Benchmarks for First Time College Students:

UMKC's Major Maps are detailed, undergraduate four-year course outlines that inform students on the classes they should take and when to take them. Outlines are updated yearly. Graduate students should visit their program's individual school for program outlines.

The following is a sample course of study. Your path to graduation may vary based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning, and placement in Mathematics. You are responsible for checking prerequisites to any courses. It is the Student's responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement.

First Year

CC Critical Courses provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Recommendations to Maintain Progress toward 4-Year Degree Completion

- Completion of the First Semester Experience (FSE) course in first term.
- Early completion of Written Communication, Oral Communication, and Math Pathway requirements.
- Maintain the minimum GPA required for academic Good Standing for your degree program.
- Completion at least 15 credit hours toward degree each regular semester. *(Students may use the summer to ensure completion of 30 hours per academic year or to lighten Fall and Spring course loads.)*
- Enrollment in Critical Courses as listed on the Major Map is recommended in order to maintain timely progress and completion of prerequisite coursework.
- Early and continuous enrollment in Foreign Language through completion of level required for degree program is recommended. *(The Foreign Language placement exam is highly recommended to ensure placement in the correct course level.)*
- Regular consultation with Academic Advisor(s) for program(s) of study is strongly recommended and may be required for some degree programs..

Bachelor of Science in Nursing

University Requirements

General Education

UMKC Essentials is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour program includes a First Year Experience course; three critical thinking courses in the areas of Arts & Humanities, Natural & Physical Sciences, and Social & Behavioral Sciences; a Culture and Diversity course; a Civic & Urban Engagement course; two courses in Composition and one course in Communication; and a Math Pathway course.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

Exit Examinations

Information on exit examinations is available in the Undergraduate Academic Regulations and Information (p. 488) section of the catalog.

Missouri Higher Education Civics Achievement Examination

In accordance with Missouri Senate Bill 807 (section 170.013.1), 'any student entering a public institution of higher education for the first time after July 2019 who is pursuing an associate's or bachelor's degree from such institution shall successfully pass an examination on the provisions and principles of American civics with a score of seventy percent or greater as a condition of graduation from such institution'. To satisfy this requirement at UMKC, students access the exam through the Canvas site. This requirement will be listed in the degree audit system as, 'Take State Mandated Missouri Higher Education Civics Achievement Examination', and listed on the transcript as 'Missouri Civics Examination'.

There are three options available to complete a Bachelor of Science in Nursing (BSN) degree:

- Pre-Licensure (4 Year traditional program in nursing for students who want to obtain a BSN and do not possess a previous bachelor's degree or RN license)
- Accelerated (2nd degree option for students who possess a bachelor's degree in another discipline, do not possess an RN license and want to obtain a BSN)
- RN-BSN (BSN Completion Program for students who are currently licensed registered nurses (RNs), possess an associate's degree or diploma in nursing and want to obtain a BSN). Enrollment may be full or part-time.

BSN Pre-licensure (4 Year Traditional Program in Nursing)

Student Learning Outcomes

Students graduating from this program will:

- incorporate knowledge from arts, humanities and sciences in the planning and provision of professional nursing care;
- demonstrate Personal Effectiveness as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Critical Thinking, Professional Valuing/Caring, and Professional Role Development;
- demonstrate Interpersonal Effectiveness as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Communication, Teaching/Learning, and Technology Utilization;
- demonstrate Effectiveness in Human Health Outcomes as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Health Promotion and Disease Prevention and Evidence-Based Care; and
- demonstrate Effectiveness Within Complex Health Systems as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Leadership/Management, Global Perspectives, and Health Care Systems and Policy.

Undergraduate baccalaureate nursing education is designed to prepare a nurse generalist who demonstrates responsibility, accountability and critical thinking. The nurse generalist uses a comprehensive approach to health care and can meet diversified health concerns of individuals, families and communities at all stages of development. The UMKC School of Nursing and Health Studies offers an innovative program in the management of health.

Admissions

Students begin the BSN Pre-licensure program as Bachelor of Health Sciences (BHS) Pre-Nurse students. Refer to Major Map for additional details.

The Direct Admissions Program has additional requirements, please see below.

Students fulfill all prerequisite courses prior to enrolling in nursing courses.

Students must earn a grade of B- or better in all pre-requisite courses required for admission to the nursing program. Students who receive a grade of less than B- may repeat these courses. Nursing courses may not be attempted more than twice. The only nursing courses that may be taken prior to admission into the nursing program are NURSE 101, NURSE 120, NURSE 125, NURSE 160, NURSE 252 and/or NURSE 345. Students who wish to take nursing courses after notification of admission to the nursing program the summer before beginning the clinical major may do so but the SoNHS Policies & Procedures for BSN PL and AT Program will apply. A 2.75 GPA for **all** courses required in the nursing program attempted or earned, and maintain a minimum cumulative GPA of 2.75 each semester.

Once admitted to the nursing program, or prior to, students must achieve a grade of C or better in all general education courses and a B- or better in all nursing courses.

Once courses in Phase I are completed, an application is submitted to the BSN-PL program, Applications are due each January to begin the following fall semester, The remaining pre-requisite courses must be completed in the following spring semester in order to begin the BSN Clinical Program in the following fall semester, if an offer of admission is issued.

Procedure for Application to the Nursing Major

- Admission to UMKC
- Submission of the School of Nursing and Health Studies Application materials which are posted in November on the School of Nursing and Health Studies website
- The SoNHS Appointed Committee reviews all applications to the Nursing Major

Program Requirements

UMKC Essentials

POL-SCI 210	American Government	
Total Credits		3

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

Program Prerequisites

A minimum grade of B- is required for each pre-requisite course. Students taking pre-requisites or admitted to the nursing program must achieve a grade of B- or better in all courses. Minimum nursing GPA is 2.75. A grade of less than B- (C+, C, C-, D+, D, F, NR and) or Audit/AT is not satisfactory for progression into the nursing program.

Code	Title	Credits
BIOLOGY 112	Microbiology and Living	3
CHEM 115 & 115L	Elements Of Chemistry I and Elements Of Chemistry, Laboratory I (or any CHEM+LAB course) ¹	5
HLSC 101	Introduction to Health Sciences ²	2
MATH 110	Precalculus Algebra (or higher; satisfies Math Pathway)	3
NURSE 101	Introduction to Nursing	2
NURSE 120	Anatomy & Physiology I	4
NURSE 160	Anatomy and Physiology II	4
Total Credits		23

¹ The courses Anatomy & Physiology, Chemistry with lab and Microbiology **CANNOT BE OLDER THAN FIVE YEARS** from when you are beginning the clinical program.

² Waived if student has 60+ credit hours and a 3.5+ GPA.

Professional Degree Requirements

The remaining courses below are clinical courses ONLY and will be completed by the student once formally accepted into the clinical major (six semesters-3 years long): You must be accepted into the three-year clinical program to begin these courses. Nursing courses may not be attempted more than twice. The only nursing courses that may be taken prior to admission into the nursing program are NURSE 101, NURSE 120, NURSE 125, NURSE 160, NURSE 252 and/or NURSE 345. A three-credit hour foreign language is required for the degree and can be taken at any time prior to graduation. Students who wish to take nursing courses after notification of admission to the nursing program the summer before beginning the clinical major may do so but the SoNHS Policies & Procedures for BSN PL and AT Program will apply. A 2.75 GPA for all courses required in the nursing program attempted or earned, and maintain a minimum cumulative GPA of 2.75 each semester.

Once admitted to the nursing program, students must achieve a grade of C or better in all general education courses and a B- or better in all nursing courses. Students must obtain a final grade of 80% or higher in order to progress in the nursing program. Students must also earn a 78% or higher on the combined average of the course examinations (defined as "Tests" and "Final Exams") in order to progress in the nursing program. Students who receive a grade of less than B- may repeat these courses. Nursing courses may not be attempted more than twice.

Code	Title	Credits

NURSE 476	Research Methods in Health Sciences	3
Total Credits		75

Graduation with a BSN degree does not guarantee licensure. Students must successfully complete the NCLEX exam and apply for licensure with their state's Board of Nursing to obtain a license as a registered nurse.

Minimum GPA: 2.75

Total Credit Hours: 128

Direct Admit Program

The UMKC School of Nursing and Health Studies (SONHS) offers the Direct Admit Program for outstanding high school students who intend to enter UMKC as freshmen. Eligible students are offered direct admission into the Pre-Licensure Bachelor of Science in Nursing (B.S.N.) Program as freshmen, allowing them to be pre-admitted to the clinical major.

BENEFITS

- Early assurance of admission to the clinical program, if criteria are met and maintained.
- Clinical supplemental application waived.

Anyone who does not meet Direct Admit eligibility requirements during their senior year of high school may still apply to the Pre-Licensure B.S.N. Program during their first or second year of college using the clinical supplemental application, depending on how long it takes to complete prerequisites.

- Opportunity for early interaction with current clinical students through involvement in the Student Nurses' Association (SNA).
- Opportunity to assist with SONHS events (i.e. White Coat Ceremony, pinning, commencement, etc.)

ELIGIBILITY REQUIREMENTS

- Meet UMKC freshmen admission criteria
- Composite ACT score of 27 or higher (or equivalent SAT Composite score)

DIRECT ADMIT APPLICATION

1. Complete the online Direct Admit application at:

<http://sonhs.umkc.edu/admissions/undergraduate-admissions/>

DIRECT ADMIT PROGRESSION TO CLINICAL MAJOR CRITERIA

Direct Admit students will progress to the clinical program as long as academic progression requirements are met, as listed below:

1. Maintain cumulative GPA and individual semester GPA of 2.75 or higher
2. Maintain nursing prerequisite GPA of 2.75 or higher (cumulative of first five prerequisite courses listed below)
3. Complete all Pre-Licensure B.S.N. prerequisite courses with a grade of B- or better on the first attempt.

Please note: If either the cumulative/semester GPA requirement or pre-requisite course grade of B- or better on first attempt is not achieved the Direct Admission status will be revoked and the student will need to apply to the Pre-Licensure program using the admission requirements listed above.

Accelerated (AT); (2nd Degree option for students with a previous bachelor's degree)

Student Learning Outcomes

Students graduating from this program will:

- incorporate knowledge from arts, humanities and sciences in the planning and provision of professional nursing care;
- demonstrate Personal Effectiveness as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Critical Thinking, Professional Valuing/Caring, and Professional Role Development;
- demonstrate Interpersonal Effectiveness as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Communication, Teaching/Learning, and Technology Utilization;
- demonstrate Effectiveness in Human Health Outcomes as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Health Promotion and Disease Prevention and Evidence-Based Care; and
- demonstrate Effectiveness Within Complex Health Systems as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Leadership/Management, Global Perspectives, and Health Care Systems and Policy.

Undergraduate baccalaureate nursing education is designed to prepare a nurse generalist who demonstrates responsibility, accountability and critical thinking. The nurse generalist uses a comprehensive approach to health care and can meet diversified health concerns of individuals, families and

communities at all stages of development. The UMKC School of Nursing and Health Studies offers an innovative program in the management of health.

Admissions

Students must have completed a bachelor's degree from a regionally accredited institution by July 1st of the year of application.

Students fulfill all prerequisite courses prior to enrolling in nursing courses. If students complete prerequisites at UMKC they enroll as Bachelor of Health Sciences (BHS) Accelerated (AT) students (Phase I).

Students must earn a grade of B- or better in all pre-requisite courses required for admission to the nursing program. Students who receive a grade of less than B- may repeat these courses. Nursing courses may not be attempted more than twice.

Once admitted to the nursing program, students must achieve a grade of C or better in all general education courses and a B- or better in all nursing courses.

Once prerequisite courses are completed, an application is submitted to the BSN-AT program, Applications are due each January to begin the following fall semester, The remaining pre-requisite courses must be completed in the following spring semester in order to begin the BSN Clinical Program in the following fall semester, if an offer of admission is issued.

The only nursing courses that may be taken prior to admission into the nursing program are NURSE 101 (<https://catalog.umkc.edu/search/?P=NURSE%20101>), NURSE 120 (<https://catalog.umkc.edu/search/?P=NURSE%20120>), NURSE 125 (<https://catalog.umkc.edu/search/?P=NURSE%20125>), NURSE 160 (<https://catalog.umkc.edu/search/?P=NURSE%20160>), NURSE 252 (<https://catalog.umkc.edu/search/?P=NURSE%20252>) and/or NURSE 345 (<https://catalog.umkc.edu/search/?P=NURSE%20345>). Students who wish to take nursing courses after notification of admission to the nursing program the summer before beginning the clinical major may do so but the SoNHS Policies & Procedures for BSN PL and AT Program will apply.

Criteria for Admission to Nursing Major

- Admission to UMKC
- Students must have completed a bachelor's degree from an accredited institution by the end of the spring semester of the year of application
- Students must maintain a 2.75 GPA each semester for all courses required in the nursing program attempted or earned
- Satisfactory completion of all pre-requisite courses by the end of the spring semester of the year of application. Refer to Time Limit on Science Courses Policy (science courses taken must be no older than five years). Completed courses must include: Chemistry w/lab, Microbiology, Anatomy & Physiology with lab, Nutrition, and Human Growth & Development Across the Lifespan.

Procedure for Application to the Nursing Major

- Complete UMKC application and send ALL official transcripts and fees to:
University of Missouri-Kansas City
Office of Admissions
- Submission of the School of Nursing and Health Studies Application materials, which are posted in November, on the School of Nursing and Health Studies website
- The Student Affairs Committee reviews all applications to the Nursing Major

Program Requirements

Program Prerequisites

A minimum grade of B- is required for each pre-requisite course. Students taking pre-requisites or admitted to the nursing program must achieve a grade of B- or better in all courses. Minimum nursing GPA is 2.75. A grade of less than B- (C+, C, C-, D+, D, F, NR) or Audit/AT is not satisfactory for progression in the nursing program.

Total Credit Hours: 91

RN-BSN (BSN Completion Program for students who are current RNs)

Student Learning Outcomes

Students graduating from this program will:

- incorporate knowledge from arts, humanities and sciences in the planning and provision of professional nursing care.
- demonstrate Personal Effectiveness as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Critical Thinking, Professional Valuing/Caring, and Professional Role Development.
- demonstrate Interpersonal Effectiveness as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Communication, Teaching/Learning, and Technology Utilization.
- demonstrate Effectiveness in Human Health Outcomes as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Health Promotion and Disease Prevention and Evidence-Based Care.
- demonstrate Effectiveness Within Complex Health Systems as evidenced by progressing from awareness to knowledge to proficiency in the following competencies: Leadership/Management, Global Perspectives, and Health Care Systems and Policy.

Undergraduate baccalaureate nursing education is designed to prepare a nurse generalist who demonstrates responsibility, accountability and critical thinking. The nurse generalist uses a comprehensive approach to health care and can meet diversified health concerns of individuals, families and communities at all stages of development. The UMKC School of Nursing and Health Studies offers an innovative program in the management of health.

Admission

- **Applicants applying to the RN-BSN program must have a Nursing diploma or Associates degree in nursing from a regionally accredited college or university, with a nursing program that is accredited by a nationally recognized nursing accrediting agency (CCNE or ACEN)**
- Graduation from a state board of nursing – approved school of nursing. Applicants requesting admission to the BSN program who are graduates of diploma or non-accredited A.D.N. programs may be admitted on provisional status.
- Current unencumbered licensure as a registered nurse with licensure in the jurisdiction where clinical study is to be conducted. The license must remain unencumbered throughout the program. A student whose license becomes encumbered while in the program will be dismissed.
- Minimum cumulative GPA of 2.5 (on a 4.0 scale) from the basic school of nursing and all previous and subsequent college coursework. Students applying with a cumulative GPA ranging from 2.0 to 2.499 may be admitted on probation based on review of individual circumstances.
- Open and rolling admission program. Students may apply for any semester (fall, spring or summer) and once admitted, can enroll in courses as determined by their plan of study.
- Applicants from approved associate-level RN degree programs may be provisionally admitted to the RN-BSN program prior to securing licensure. If admitted as degree-seeking students, these applicants must provide documentation of a valid, unencumbered RN license prior to the end of their first term of enrollment in the RN-BSN program. For information regarding currently approved programs, contact the UMKC Nursing department.

Additional details regarding the admission process for applicants to the RN-BSN program can be found in the School of Nursing & Health Studies Policy & Procedure Manual at: sonhs.umkc.edu/wp-content/uploads/2014/10/policy-procedure.pdf. (<http://sonhs.umkc.edu/current-students/>)

Procedure for Application to the Nursing Major for RN-BSN:

- Apply using the general UMKC application & the RN-BSN Supplemental Application (Please note: The RN-BSN Supplemental Application is housed within the general UMKC application).

Additional requirements:

- Valid, current and unencumbered RN license. If NCLEX results are pending, students must submit proof of licensure prior to the first nursing course (N481). Note: an unencumbered RN license must be maintained throughout the program.

Additional Notifications

State regulations require that UMKC be authorized to offer online degrees in the state where a student resides while enrolled in the program. UMKC is currently authorized to offer online programs in the states listed on the UMKC Online webpage: <http://online.umkc.edu/state-authorization/>. If you are in one of the online programs and there is a possibility that you would relocate to another state while enrolled in the program, you must notify your academic advisor or the program director immediately. Note that regulations in that state may stipulate additional or specific requirements that may prohibit or limit your ability to enroll in or complete the online degree through UMKC.

Required General Education Coursework

Students must complete 50 credit hours in general education coursework.

UMKC Essentials

Code	Title	Credits
First Semester Experience Course (GEFSE; Satisfied in program requirements below)		
Written Communication:		
ENGLISH 110	English I: Introduction To Academic Prose	3
ENGLISH 225	English II: Intermediate Academic Prose	3

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have "satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions."

Courses at UMKC that satisfy this state requirement are:

Code	Title	Credits
Choose one of the following:		3
CJC 364	The Supreme Court And The Criminal Process	
HISTORY 101	U.S. History to 1877	
HISTORY 102	U.S. History Since 1877	
HONORS 230	Honors American Government	
POL-SCI 210	American Government	
Total Credits		3

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.
- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

Code	Title	Credits
Additional coursework:		29

These courses are required for graduation and not for admission into the RN-BSN program.

*If you have already earned a bachelor's degree or an associate of arts degree from a regionally accredited college, you are exempt from the above general education courses.

A minimum grade of C is required in all general education, science and nursing courses in order to progress in the nursing program. A grade of less than C (C-, D+, D, F, NR) or Audit/AT is not satisfactory for progression.

Professional Degree Requirements

Lower Division Nursing courses

The lower division component of the RN-BSN track requires 28 credit hours of coursework which may be obtained in one of two ways:

- By transfer coursework from an associate degree program accredited by a nationally recognized nursing accrediting body;
- Successful passage of the National Council Licensure Examination (NCLEX).

Students requesting admission to the BSN program who are graduates of diploma or non-National League for Nursing (NLN) accredited Associates Degree in Nursing (ADN) programs may be admitted on provisional status. Upon completion of Nurse 481 - Block I: Tools for Personal Effectiveness (6 credit hours) and Nurse 482 - Block II: Tools for Interpersonal Effectiveness (3 hours) with a grade of C or better and a minimum semester GPA of 2.75, 28 hours of credit by NCLEX exam will be added to the UMKC transcript and the provisional status will be removed.

Upper Division Nursing courses

The upper division nursing courses below (400 level - 36 hours) are required to be completed through UMKC. Students must have a minimum cumulative GPA of 2.75 for all college credit attempted or earned coursework to enroll in any 200-level or higher nursing course. A semester GPA of 2.75 must be maintained to progress in the nursing curriculum.

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major. Please see the tab above to view the major map for this program.

UMKC's Transfer Guides (<https://www.umkc.edu/admissions/transfer-guides.html>) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.

UMKC's PlanMyDegree 'Audit' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree audit system provides an individual evaluation of all degree requirements (General Education, Degree Specific, Major Specific, etc.) for students' officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. This evaluation is used to certify all graduation requirements.

UMKC's PlanMyDegree 'Plans' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree planning tool enables students to develop a personalized semester by semester plan of study towards completion of degree requirements for student's officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. Update and edit your full plan to degree completion each term and confirm accuracy each semester with your Academic Advisor(s).

Major Map

Four Year Graduation Plan - Courses & Critical Benchmarks for First Time College Students:

UMKC's Major Maps are detailed, undergraduate four-year course outlines that inform students on the classes they should take and when to take them. Outlines are updated yearly. Graduate students should visit their program's individual school for program outlines.

The following is a sample course of study. Your path to graduation may vary based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning, and placement in Mathematics. You are responsible for checking prerequisites to any courses. It is the Student's responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement.

CC Critical Courses provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Recommendations to Maintain Progress toward 4-Year Degree Completion

- Completion of the First Semester Experience (FSE) course in first term.
- Early completion of Written Communication, Oral Communication, and Math Pathway requirements.
- Maintain the minimum GPA required for academic Good Standing for your degree program.
- Completion at least 15 credit hours toward degree each regular semester. *(Students may use the summer to ensure completion of 30 hours per academic year or to lighten Fall and Spring course loads.)*
- Enrollment in Critical Courses as listed on the Major Map is recommended in order to maintain timely progress and completion of prerequisite coursework.
- Early and continuous enrollment in Foreign Language through completion of level required for degree program is recommended. *(The Foreign Language placement exam is highly recommended to ensure placement in the correct course level.)*
- Regular consultation with Academic Advisor(s) for program(s) of study is strongly recommended and may be required for some degree programs..

Bachelor of Science in Public Health

University Requirements

General Education

UMKC Essentials is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour program includes a First Year Experience course; three critical thinking courses in the areas of Arts & Humanities, Natural & Physical Sciences, and Social & Behavioral Sciences; a Culture and Diversity course; a Civic & Urban Engagement course; two courses in Composition and one course in Communication; and a Math Pathway course.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

Exit Examinations

Information on exit examinations is available in the Undergraduate Academic Regulations and Information (p. 488) section of the catalog.

Missouri Higher Education Civics Achievement Examination

In accordance with Missouri Senate Bill 807 (section 170.013.1), 'any student entering a public institution of higher education for the first time after July 2019 who is pursuing an associate's or bachelor's degree from such institution shall successfully pass an examination on the provisions and principles of American civics with a score of seventy percent or greater as a condition of graduation from such institution'. To satisfy this requirement at UMKC, students access the exam through the Canvas site. This requirement will be listed in the degree audit system as, 'Take State Mandated Missouri Higher Education Civics Achievement Examination', and listed on the transcript as 'Missouri Civics Examination'.

Student Learning Outcomes

Students graduating from this program will:

- Apply foundational knowledge of the science of public health to analyze and address public health issues in the community.
- Students will transmit foundational knowledge of public health in both interpersonal and formal communications.
- Students will integrate, synthesize and apply knowledge through cumulative and experiential activities
- Create evidence-based public health programs relevant to the needs of communities.

Bachelor of Science in Public Health (BSPH) Mission

The Bachelor of Science in Public Health (BSPH) program aims to support the SoNHS' mission in preparing the health professional workforce in improving health outcomes. The mission is to develop public health leaders in practice and research for diverse careers and post-graduate education. Through an innovative combination of coursework, service learning, volunteerism, and a senior year evidence-based public health capstone, students will apply theoretical concepts in evidence-based programming and health policy development to attain the highest standards of health and well-being of diverse populations.

Minor Options

The BSPH requires completion of 120 credits of coursework, which includes elective coursework. Students are urged to align those elective classes within a targeted area of specialization. These minor options may enhance your marketability in the workplace.

MINOR IN EXERCISE SCIENCE

Student Organization

BHS Society is a student organization centered around the health sciences field of study. The goals of this organization are to promote philanthropy within the community, advocate health education, and cultivate leadership among members.

Admissions

The structure of the BSPH program is based upon the extensive experience the SoNHS has with structuring nursing and health sciences programs. Students will complete 120 hours as required by UMKC for degree completion. Provisionally admitted students may not be admitted to the program. Transfer students must have a GPA of 2.5 or better. Students must maintain a 2.5 GPA to remain in the Bachelor of Science in Public Health. Academic advisors will assist students pursuing a BSPH in maximizing appropriate transfer credits ensuring a streamlined path through the program.

Progression Policy

Students in the BSPH program must earn a minimum grade of “C-” in all Public Health, Health Sciences, and Science and Math requirements (BIOLOGY 108/BIOLOGY 108L, BIOLOGY 112, BIOLOGY 218, CHEM 206, and MATH 110 or higher). They must earn a minimum grade of “D-” in non-Public Health/Health Sciences courses. For a full list of courses and the required grade, refer to the Major Map.

This means that a grade below a “C-” in a Health Sciences/Public Health/Science and Math requirements or below a “D-” in a non-Public Health/Health Sciences course will need to be repeated to earn a passing grade.

If a student’s cumulative GPA falls below 2.5, the student will be placed on Academic Probation. To be removed from Academic Probation, students must achieve a cumulative GPA of 2.5 within the next two successive semesters (if enrolling in summer classes, summer is included).

Students must be removed from Academic Probation within the next two successive semesters or they will be Academically Dismissed.

ENGLISH 110	English I: Introduction To Academic Prose	3
ENGLISH 225	English II: Intermediate Academic Prose	3
Oral Communication (choose one of the following):		3
COMM-ST 110	Fundamentals Of Effective Speaking And Listening	
COMM-ST 140	Principles Of Communication	
COMM-ST 212	Argumentation And Debate (offered via dual credit only)	
COMM-ST 277	Interpersonal Communication	
Math Pathway (satisfied in major requirements below)		
Critical Thinking in Arts & Humanities (GECRT-AH)		3
Critical Thinking in Natural & Physical Sciences (GECRT-SC)		3
Critical Thinking in Social & Behavioral Sciences (GECRT-SS)		3
Culture & Diversity Course (GECDV)		3
Civic & Urban Engagement Course (GECUE)		3
Total Credits		27

Constitution Course Requirement

Section 170.011.1 of the Missouri Revised Statutes, 2015, states that all candidates for a degree issued by a college or university in the state of Missouri must have “satisfactorily passed an examination on the provisions and principles of the Constitution of the United States and of the state of Missouri, and in American history and American institutions.”

Courses at UMKC that satisfy this state requirement are:

Code	Title	Credits
Choose one of the following:		3
CJC 364	The Supreme Court And The Criminal Process	
HISTORY 101	U.S. History to 1877	
HISTORY 102	U.S. History Since 1877	
HONORS 230	Honors American Government	
POL-SCI 210	American Government	
Total Credits		3

There are a few other ways this requirement can be satisfied for students transferring to UMKC:

- Take an equivalent course from the list above at a regionally accredited institution.
- Earn credit for one of the above courses through AP, IB, or CLEP.
- Take a course that directly satisfies the Missouri Constitution Requirement at another Missouri institution.
- Have a previous bachelors degree (or higher) from a regionally accredited institution.

- Have an Associate of Arts degree from a regionally accredited institution.
- Complete the 42 Hour Core at a Missouri institution and have it listed on the official transcript.

Code	Title	Credits
Science and Math Requirements		
BIOLOGY 108 & 108L	General Biology I and General Biology I Laboratory	4
BIOLOGY 218	Introductory Anatomy	3
BIOLOGY 112	Microbiology and Living	3
CHEM 206	Human Nutrition	3
MATH 110	Precalculus Algebra (or higher; or STAT 115 or MOTRMATH 110; or ACT Math sub-score of 28 or higher; or SAT Math sub-score of 660 or higher; satisfies GE Math Pathway)	3
Total Credits		16

UPD 420	Transportation Planning	

Minimum GPA: 2.5

Total Credits: 120

Tools for Planning and Fulfilling Academic Requirements

UMKC's Major Maps are detailed, semester by semester plans that lead a student to complete all degree requirements within four years. Plans include benchmarks and critical courses by term that assist a student's evaluation of progress and major "fit". In order to ensure that the appropriate courses are taken, students are encouraged to consult with the undergraduate advisor for this major. Please see the tab above to view the major map for this program.

UMKC's Transfer Guides (<https://www.umkc.edu/admissions/transfer-guides.html>) provide detailed guidance on recommended transfer coursework, plans of study, transfer timelines, and transfer contact information. To ensure a seamless transfer experience, students are encouraged to work with both their community college advisor and a UMKC advisor when planning their coursework.

UMKC's PlanMyDegree 'Audit' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree audit system provides an individual evaluation of all degree requirements (General Education, Degree Specific, Major Specific, etc.) for students' officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. This evaluation is used to certify all graduation requirements.

UMKC's PlanMyDegree 'Plans' (<https://www.umkc.edu/registrar/academic-programs/plan-my-degree.html>) degree planning tool enables students to develop a personalized semester by semester plan of study towards completion of degree requirements for student's officially recorded (Office of Registration and Records) and "what if" exploratory plans of study. Update and edit your full plan to degree completion each term and confirm accuracy each semester with your Academic Advisor(s).

Major Map

Four Year Graduation Plan - Courses & Critical Benchmarks for First Time College Students:

UMKC's Major Maps are detailed, undergraduate four-year course outlines that inform students on the classes they should take and when to take them. Outlines are updated yearly. Graduate students should visit their program's individual school for program outlines.

The following is a sample course of study. Your path to graduation may vary based on factors such as college credit you earned while in high school, transfer work from other institutions of higher learning, and placement in Mathematics. You are responsible for checking prerequisites to any courses. It is the Student's responsibility to ensure that all program requirements are met. This guide is not a substitute for academic advisement.

First Year

Fall Semester	Credits	Spring Semester	Credits
PBHL 158 ^{CC}		3 BIOLOGY 108 & 108L (or BIOLOGY 109 & BIOL 109L)	4

		15	12

Total Credits: 120

CC Critical Courses provide feedback regarding major fit and help indicate likelihood of successful completion of chosen academic program and degree.

Recommendations to Maintain Progress toward 4-Year Degree Completion

- Completion of the First Semester Experience (FSE) course in first term.
- Early completion of Written Communication, Oral Communication, and Math Pathway requirements.
- Maintain the minimum GPA required for academic Good Standing for your degree program.
- Completion at least 15 credit hours toward degree each regular semester. *(Students may use the summer to ensure completion of 30 hours per academic year or to lighten Fall and Spring course loads.)*
- Enrollment in Critical Courses as listed on the Major Map is recommended in order to maintain timely progress and completion of prerequisite coursework.
- Regular consultation with Academic Advisor(s) for program(s) of study is strongly recommended and may be required for some degree programs..

Doctor of Nursing Practice Program

BSN-DNP

Student Learning Outcomes

Students graduating from this program will:

- Synthesize research-based evidence to create, implement, evaluate, and translate into practice
- Serve as leaders in nursing and health care by effecting organizational and/or public policy development
- Demonstrate expert knowledge, values, and skills to improve health outcomes in a specialized area and/or population foci of nursing
- Demonstrate expertise in increasingly complex practice, leadership, and/or faculty roles.

Program Options

Core Coursework for the Nurse Practitioners

Code	Title	Credits
NURSE 5526	Health Promotion Across the Lifespan	3
NURSE 5527	Cultural Diversity & Values	3

Facilities

The University of Missouri-Kansas City has extensive educational facilities on the Volker campus combined with the health care educational facilities and the School of Nursing and Health Studies offices on Hospital Hill campus. Facilities include libraries, resource centers, audiovisual resources, data processing and science information specialists. The affiliated clinical facilities include Truman Medical Center, Children's Mercy Hospital and nearly 100 community-wide facilities in the Kansas City metro area.

Financial Assistance

The School of Nursing and Health Studies offers a range of scholarships, traineeships and other funds for both full- and part-time graduate and undergraduate nursing students. Students who complete the Free Application for Federal Student Aid (FAFSA) are eligible for the following:

- Brisley Phillips Scholarship
- Chuck and Glo Curtis Scholarship
- Claudene L. Iwig Scholarship
- General Hospital Memorial Scholarship
- Goppert Scholarship
- Helen Blond Scholarship
- John S. Waggoner Memorial Nursing Scholarship
- Laura Larkin Dexter Scholarship
- RN - BSN Scholarship
- Susie Sinton Scholarship

Other funds may be available for students demonstrating financial need. Applications for nursing scholarships are considered after submission of the FAFSA. Priority deadline for that submission is February 1. Further information about applications and qualifications for any of these funds may be obtained from the School of Nursing and Health Studies Student Services Office, room 1410, 2464 Charlotte Street, Kansas City, MO 64108-2718.

History

In 1973-74, a graduate nursing program was started under the aegis of the School of Graduate Studies. On Nov. 16, 1979, the Board of Curators approved a proposal to establish a school of nursing at the University of Missouri-Kansas City. In 1981, following a developmental period, two new curricula were implemented. These were an upper-division baccalaureate degree for registered nurses and a revised master's degree program for clinical nurse specialists. In 1992, the Board of Curators approved the offering of an inter-campus, cooperative doctoral program in nursing (Ph.D. N.D.). The doctoral curricula was implemented on the Kansas City campus in the Fall Semester of 1995. In 2000, the Board of Curators approved the offering of a pre-licensure baccalaureate degree program beginning in the Fall Semester of 2001. The Board of Curators approved the Doctor of Nursing Practice (DNP) program which began in 2007 and graduated its first post-master's class in December 2008. A name change to the School of Nursing and Health Studies was approved in February 2013 following the opening of the Bachelor of Health Sciences (BHS) began in the fall of 2011. The Masters level Nurse Practitioner tracks were re-opened in Fall 2016 and Post MSN Certificate Program was opened in 2017. In 2018, the Bachelor of Public Health (BSPH) and Masters level Acute Care Pediatric Nurse Practitioner track were opened and began enrolling students in the spring 2018.

International Students

The School of Nursing and Health Studies coordinates recruitment, retention and continuing advisement for nursing students from abroad in cooperation with the University's Office of International Student Affairs. In addition to the English proficiency examination (TOEFL), all graduates of foreign schools of nursing must complete the Commission on Graduates of Foreign Nursing Schools (CGFNS) qualifying examinations. This will enable registered nurses applying to the School of Nursing and Health Studies to take the National Council Licensure Examinations (NCLEX) for licensure as a registered nurse in Missouri. Students who are registered nurses must also send official transcripts to the CGFNS to determine degree equivalencies. Information about specific requirements for admission and progression may be obtained from the School of Nursing and Health Studies Student Services Office. The School of Nursing and Health Studies retains the right to assess the level of current clinical skills prior to enrollment in clinical coursework.

Master of Science in Nursing (M.S.N.)

Student Learning Outcomes

Students graduating from this program will:

- Implement skills and strategies to advance professional nursing and health across populations and settings.
- Integrate theory and research in evidence-based nursing and teaching practice.
- Serve as a leader in unit and organizational based change.

Degree Requirements

Students have the option to attend full-time or part-time. Nurse practitioner students choosing to attend full-time must begin in a summer semester.

Core Courses Required of all Students

Code	Title	Credits
NURSE 5526	Health Promotion Across the Lifespan	3
NURSE 5527	Cultural Diversity & Values	3
NURSE 5528	Healthcare Policy & Advocacy	3
NURSE 5550	Theoretical Foundations in Nursing	3
NURSE 5555	Nursing Research	3
Total Credits		15

Total Credit Hours for the Degree: 47

Minor in Health Sciences

Student Learning Outcomes

Students graduating from this program will:

- Students will be able to apply knowledge from behavioral, business, and social aspects of health into inter-professional practice.
- Students will be able to create (plan, implement, and evaluate) evidence-based health programs relevant to targeted populations and desired health outcomes.
- Students will demonstrate professional conduct, and strong interpersonal skills in their chosen career path.
- Students will be able to identify the specific challenges, and opportunities of improving health outcomes and reducing health disparities in diverse and urban environments.

Students earning a Minor in Health Sciences must earn a minimum grade of "C-" in all Health Sciences courses. This means that a grade below a "C-" in a Health Sciences course will need to be repeated to earn a passing grade.

Program Requirements

Code	Title	Credits
HLSC 101	Introduction to Health Sciences	2
HLSC 300	Diversity in Health	3
HLSC 410	Epidemiology	3
HLSC 430	Health Program Management	3
HLSC 440	Ethics and Policy of Public Health Promotion	3
HLSC 470	Technology, Marketing and Media in Health	3
Plus one of the following three courses:		3

HLSC 450	Urban Health	
HLSC 460	Global Health	
HLSC 480	Leadership and Management in Health Professions	
Total Credits		20

Minor in Public Health

Student Learning Outcomes

Students graduating from this program will:

- Apply knowledge of the science of public health into inter-professional practice.
- Create (plan, implement and evaluate) evidence-based public health programs relevant to the needs of the community.
- Demonstrate professional conduct, strong inter-professional skills, and knowledge of the roles and scope of practice of public health providers in accordance with the Council on Linkages Competencies initial level of competencies for public health.
- Identify the specific challenges and opportunities in a population based approach to improving the health of the public.

Students earning a Minor in Public Health must earn a minimum grade of "C-" in all Health Sciences courses. This means that a grade below a "C-" in a Health Sciences course will need to be repeated to earn a passing grade.

Program Requirements

Code	Title	Credits
HLSC 345	Quantitative Analysis in the Health Sciences	3
HLSC 410	Epidemiology	3
HLSC 440	Policy and Ethics in Health	3
PBHL 158	Public Health Principles	3
PBHL 358	Environmental Public Health	3
PBHL 445	Core Competencies in Health Education	3
PBHL 458	Communicable Disease Investigation	3
Total Credits		21

Nurse Educator Certificate

Student Learning Outcomes

Students graduating from this program will:

- Implement skills and strategies to advance professional nursing and health across populations and settings
- Synthesize teaching/learning theories and research
- Design curriculum to address the diverse learning needs of students in the educational environment.

Program Description

Hands-on experience in objective writing, teaching, clinical instructing, test writing and student management are offered through educational experiences provided by master educators.

Completion of the program meets the educational requirements to be eligible for the NLN CNE Certification Exam. There are four courses required for the program with a total of 12 credit hours. All courses must be completed within three years.

Note: Students are responsible for arranging their clinical preceptor (<http://sonhs.umkc.edu/wp-content/uploads/2014/10/preceptor-agreement.pdf>) and site for the Practicum course. It is the student's responsibility to maintain clinical eligibility to practice during the program. It is recommended that the student become comfortable in the clinical setting in preparation for Practicum.

Program Admission Requirements

In addition to the admission requirements for UMKC, the requirements for admission into the NEC program are:

- MSN from an accredited nursing program
- Submission of current resume or curricula vitae
- Copy of current licensure as a registered nurse with licensure in the jurisdiction where clinical study is to be conducted

The Post-Master's NE Certificate Program Courses

Code	Title	Credits
NURSE 5515NE	Role of the Nurse Educator	2
NURSE 5516	Curriculum Development in Nursing	3
NURSE 5517	Teaching Strategies in Nursing	2
NURSE 5572NE	Synthesis Practicum for Nurse Educators (Preceptorship Course)	3
NURSE 5559	Evaluation Methods in Nursing	2

Organizations

Student Nurses Association (SNA)

Membership in the Student Nurses Association (SNA) is automatic for all students admitted to and enrolled in the School of Nursing and Health Studies nursing degree programs. Students admitted into pre-nursing are encouraged to attend all meetings. Officers and representatives to the school's standing committees are elected annually. Council meetings and special events are held periodically throughout the academic year.

Sigma Theta Tau International, Lambda Phi Chapter

This international nursing honor organization is designed to recognize and encourage superior scholarship and leadership achievements in nursing. Students are eligible for consideration as junior and senior undergraduate students and as continuing graduate students. Membership, based on integrity and scholarship, is by invitation only. The induction of new members is held each spring.

Nursing Alumni Association

All students at the School of Nursing and Health Studies qualify for membership in the Nursing Alumni Association. Objectives of the alumni association are to provide mentoring to the student body and garner support for the school. Meetings are held periodically and officers are elected each spring by the Nursing Alumni Board.

BHS Society

The BHS Society is a student organization centered around the health sciences field of study. The goals of this organization are to promote philanthropy within the community, advocate health education, and cultivate leadership among members.

Ph.D. in Nursing

Student Learning Outcomes

Students graduating from this program will:

- Develop the science of nursing through rigorous, original research
- Steward the discipline through dissemination of scholarly work
- Educate the next generation of nurses and add to the global community of scholars.

Program Requirements

Post-MSN Nurse Practitioner Certificates

UMKC offers post-master's nurse practitioner certificate programs for students who possess an M.S.N. or D.N.P. and who wish to pursue a nurse practitioner certificate in a specialty area of care (tracks) without completing another degree. Please refer to the Graduate Admissions (<http://sonhs.umkc.edu/admissions/graduate-admissions/>) page on the SoNHS website for more information regarding admission and required materials.

The sample plans of study listed represent the minimum required courses. Based on previous course work, additional courses may be required as determined by each certification board*. After admission is confirmed, a gap analysis and individualized program of study will be completed and developed based on previous course work. The following courses are the usual prerequisite graduate level course work (or equivalent) to be completed prior to or as part of the certificate program of study. These courses may be from your MSN graduate program or completed at UMKC with your certificate hours. Completion of Post-MSN Nurse Practitioner certificates meets the educational requirements to be eligible to sit for the national accreditation exam in that area.

*Minimum requirements from certification boards include the following:

Advanced pathophysiology
 Advanced pharmacology/applied pharmacology
 Advanced health assessment across the lifespan
 Diagnostic Reasoning for the APRN
 Health promotion

The certificate options available are listed below:

- Post-MSN Acute Care Pediatric Nurse Practitioner Certificate
- Post-MSN Family Nurse Practitioner Certificate
- Post-MSN Neonatal nurse Practitioner Certificate
- Post-MSN Pediatric Nurse Practitioner Certificate
- Post-MSN Psychiatric Mental Health Nurse Practitioner Certificate
- Post-MSN Women's Health Nurse Practitioner Certificate

Post-MSN Acute Care Pediatric Nurse Practitioner Certificate

Student Learning Outcomes

Students graduating from this program will:

- Implement skills and strategies to advance professional nursing and health across acute care pediatric populations and settings.

Post-MSN Acute Care Pediatric Nurse Practitioner (21 credit hours)

Code	Title	Credits
NURSE 5531	Graduate Pharmacology Specialty	2
NURSE 5532	Pediatric Acute Care I	3
NURSE 5533	Pediatric Acute Care II	3
NURSE 5534	Advanced Practice Clinical Practicum I (Pediatric Acute Care)	4
NURSE 5535	Advanced Practice Clinical Practicum II (Pediatric Acute Care)	4
NURSE 5564C	Primary Care of Children I	5
Total Credits		21

Post-MSN Family Nurse Practitioner Certificate

Student Learning Outcomes

Students graduating from this program will:

- Implement skills and strategies to advance professional nursing and health across populations and settings.
- Integrate theory and research in evidence-based nursing practice.
- Serve as a leader in unit and organization-based change.

Post-MSN Family Nurse Practitioner (18 credit hours)

Code	Title	Credits
NURSE 5549	Pharmacology Across the Life Span for Advanced Nursing Practice	3
NURSE 5564F	Primary Care of Families I	5
NURSE 5566F	Primary Care of Families II	5
NURSE 5572	Advanced Nursing Practice: Synthesis Practicum	5
Total Credits		18

Post-MSN Neonatal Nurse Practitioner Certificate

Student Learning Outcomes

Students graduating from this program will:

- Implement skills and strategies to advance professional nursing and health across populations and settings.

Post-MSN Neonatal Nurse Practitioner Certificate (24 credit hours)

Code	Title	Credits
NURSE 5548N	Physiology/Pathophysiology Of The Neonate	2
NURSE 5549N	Advanced Assessment of the Neonate	3
NURSE 5547N	Advanced Assessment of the Neonate	3
NURSE 5564N	Neonatal Nursing I	3
NURSE 5566N	Neonatal Nursing II	3
NURSE 5572NI	Preceptorship I	5
NURSE 5572II	Preceptorship II	5
Total Credits		24

Post-MSN Pediatric Nurse Practitioner Certificate

Student Learning Outcomes

Students graduating from this program will:

- Implement skills and strategies to advance professional nursing and health across pediatric populations and settings.

Post-MSN Pediatric Nurse Practitioner (18 credit hours)

Code	Title	Credits
NURSE 5549	Pharmacology Across the Life Span for Advanced Nursing Practice	3
NURSE 5564C	Primary Care of Children I	5
NURSE 5566C	Chronic Child Health Care (Clinical II)	5
NURSE 5572	Advanced Nursing Practice: Synthesis Practicum	5
Total Credits		18

Post-MSN Psychiatric Mental Health Nurse Practitioner Certificate

Student Learning Outcomes

Students graduating from this program will:

- Implement skills and strategies to advance professional nursing and health across populations and settings.

Post-MSN Psychiatric Mental Health Nurse Practitioner (18 credit hours)

Code	Title	Credits
NURSE 5546	Foundations of Family Psychiatric Nursing Advanced Practice	3
NURSE 5564M	Family Psychiatric Nursing Advanced Practice I	5
NURSE 5566M	Family Psychiatric Nursing Advanced Practice II	5
NURSE 5572	Advanced Nursing Practice: Synthesis Practicum	5
Total Credits		18

Post-MSN Women's Health Nurse Practitioner Certificate

Student Learning Outcomes

Students graduating from this program will:

- Implement skills and strategies to advance professional nursing and health across women's health populations and settings.

Post-MSN Women's Health Nurse Practitioner (18 credit hours)

Code	Title	Credits
NURSE 5549	Pharmacology Across the Life Span for Advanced Nursing Practice	3
NURSE 5564W	Primary Health Care of Women	5
NURSE 5566W	Care of the Childbearing Woman	5
NURSE 5572	Advanced Nursing Practice: Synthesis Practicum	5
Total Credits		18

Post-MSN Adult Gerontology Nurse Practitioner Certificate

Student Learning Outcomes

Students graduating from this program will:

- Implement skills and strategies to advance professional nursing and health across adult/geriatric populations and settings.

Post-MSN Adult Gerontology Nurse Practitioner (18 credit hours)

Code	Title	Credits
NURSE 5549	Pharmacology Across the Life Span for Advanced Nursing Practice	3
NURSE 5564A	Primary Care of Adults I	5
NURSE 5566A	Primary Care of Adult-Gerontology II	5
NURSE 5572	Advanced Nursing Practice: Synthesis Practicum	5
Total Credits		18

Roger W. Sommi

Associate Dean for UMKC School of Pharmacy at MSU:

Paul O. Gubbins

History

Originally organized in 1885 as the Pharmaceutical Department of the University of Kansas City, the school was reorganized and reincorporated in 1898 as the Kansas City College of Pharmacy and Natural Science. In 1943, this forerunner of the present school joined the University of Kansas City as its third professional school.

When the University of Kansas City was incorporated into the University of Missouri System in 1963, the School of Pharmacy became the only state-supported pharmacy school in Missouri. In October 2010, the school commemorated 125 years of excellence in pharmaceutical education, research and service.

The School of Pharmacy is a member of the American Association of Colleges of Pharmacy (AACP). The doctor of pharmacy program is accredited by the Accreditation Council for Pharmacy Education (ACPE). Information about ACPE can be found at <https://www.acpe-accredit.org/>.

Degrees Offered

The School of Pharmacy offers the advanced professional degree of doctor of pharmacy. In addition, the School of Pharmacy participates in the School of Graduate Studies Interdisciplinary Ph.D. program with emphasis areas in pharmaceutical sciences and pharmacology and toxicology.

The UMKC School of Pharmacy currently has three Pharm.D. program sites: the UMKC campus site (Kansas City), the UMKC School of Pharmacy at the University of Missouri (Columbia) site, and the UMKC School of Pharmacy at Missouri State University (Springfield). The Pharm.D. program is a single program with multiple locations. All students at each site are enrolled through UMKC and graduate from UMKC. The required curriculum is the same for all students enrolled in the UMKC Pharm.D. program. Students located at distant sites are enrolled in the same required classes as students on the Kansas City campus. The same program policies and procedures apply to all students in the Pharm.D. program, regardless of program site.

Students interested in or that are currently pursuing Interdisciplinary Ph.D. programs of study should consult the School of Graduate Studies section of this catalog for degree requirements and other academic regulations applicable to the degree program.

Advising Systems

Student Support - Academic and Faculty Advising

Upon entry into the doctor of pharmacy program, each student is assigned a faculty advisor who serves as a mentor throughout the program. If students are experiencing difficulties, whether academic or personal, or if seeking more in-depth information about the curriculum or career paths, they should seek counsel from their faculty advisor. It is important that students keep in contact with their faculty advisor throughout the program as they will monitor their progress and success.

Academic advisors in the Pharmacy Office of Student Affairs also work closely with early assurance, pre-pharmacy and current pharmacy students to provide assistance during the application and admission process, ensuring proper admission requirements and matriculation procedures are met. After entry, academic advisors assist students through subsequent enrollment and progression requirements and through final graduation completion. Academic advisors act as liaisons to various campus services and departments of the campus community and can link students with resources to address any academic or personal issues. Professional staff in the Office of Student Affairs also serve as advisors to individual classes and to the Pre-pharmacy Society in addition to assisting pharmacy student organization and class officers.

Both the academic and faculty advisors are familiar with sources of assistance and will help students seek the best solutions to their issues and concerns. Building a strong relationship with both advisors is strongly encouraged. Students that encounter academic difficulty during the program should meet with their advisors for guidance and for help in smooth transitions.

The School of Pharmacy offers a variety of services to assist students in support of the academic experience. For more information visit: <http://pharmacy.umkc.edu/student-affairs/> and <http://pharmacy.umkc.edu/pharm-d/advising/#main-content>.

Libraries

The University Libraries provide the full spectrum of information services to support study and research in pharmacy. For additional information, consult the University Libraries section of this catalog.

Student Affairs

The School of Pharmacy offers a variety of services to assist students in support of their academic experience.

Student services, which are available not only through the School of Pharmacy but throughout the University, are outlined in the Division of Student Affairs section of this catalog.

Student Involvement

Student Government

The student body annually elects an Executive Council for student pharmacists. The name of this primary council is Pharmacy Student Council (PSC). This body supports individual pharmacy students, student organizations, and the student body at the Kansas City, Columbia, and Springfield locations. The PSC is dedicated to representing the views, ideas, and concerns of the student body. This council consists of a president, administrative vice president, executive vice president, student government association senators, student activity fee committee representative and student council liaisons from each pharmacy campus location.

The Script

The Script, a pharmacy student-administered newsletter, is published several times each semester. Its purpose is to inform the student body, as well as the faculty and staff of student activities and achievements, announce available opportunities and report on developments affecting student life. Articles and calendar items are welcomed from any pharmacy student, student organization, faculty or staff member.

Student Organizations

The UMKC School of Pharmacy hosts a number of very active pharmacy student organizations. The following organizations are recognized by the UMKC Office of Student Involvement. UMKC students routinely win local, regional and national awards for their outstanding community service activities, leadership efforts, and commitment to patient care. General descriptions of each organization can be found under the Pharmacy Student Organizations section of the Pharmacy School website at: <http://pharmacy.umkc.edu/pharm-d/student-organizations> (<http://pharmacy.umkc.edu/pharm-d/student-organizations/>).

- Academy of Managed Care Pharmacy (AMCP)
- American Association of Pharmaceutical Scientists (AAPS)
- American Pharmacists Association Academy of Student Pharmacists (APhA-ASP)
- Black Student Pharmacists Organization (BSPO)
- College of Psychiatric and Neurologic Pharmacists (CPNP)
- Kappa Epsilon (KE)
- Kappa Psi (KY)
- National Community Pharmacists Association (NCPA)
- Pharmaceutical Sciences Graduate Student Association (PSGSA)
- Pharmacy Student Council (PSC)
- Phi Lambda Sigma Leadership Society (PLS)
- Pre-Pharmacy Society
- Public Health Organization (PHO)
- Rho Chi Society (RH)
- Student College of Clinical Pharmacy (SCCP)
- Student Society of Health-System Pharmacists (SSHP)
- Student National Pharmaceutical Association (SNPhA)

State Licensure Requirements

Students planning to practice the profession of pharmacy are required to satisfy the licensure requirements of the state in which they intend to practice. Licensure requirements vary, therefore, information concerning these requirements should be obtained by contacting the board of pharmacy of the state concerned.

Students accepted and enrolled in the doctor of pharmacy curriculum are required to obtain a valid Intern Pharmacist License issued by the Missouri Board of Pharmacy in order to fully participate in and continue through the curriculum. In addition, enrolled students must also obtain intern pharmacist professional liability insurance and keep insurance current through the duration of the program. The Missouri Intern Pharmacist License and professional liability insurance must remain current and valid through the last Advanced Pharmacy Practice Experience. Successful completion of all portions of the curriculum, both credit and non-credit requirements, are necessary for a student to meet graduation requirements and accrue sufficient internship hours toward pharmacist licensure eligibility.

All UMKC Pharm.D. students must read and adhere to the UMKC School of Pharmacy Student Intern Pharmacist License and Intern Liability Policy (<http://pharmacy.umkc.edu/pharm-d/internship-and-licensure-information/>) as posted on the School of Pharmacy website.

The state of Missouri requires that an applicant for pharmacist licensure be 21 years of age, a graduate of an ACPE accredited school of pharmacy approved by the state's board of pharmacy and have on file with the board proof of obtaining a minimum number of internship hours in a retail/community or hospital pharmacy practice setting under the supervision of a registered pharmacist/preceptor. Refer to the Missouri Board of Pharmacy and the National Association of Boards of Pharmacy websites for the most up-to-date information as requirements can change at any time.

Career Applications

Doctor of Pharmacy Careers

A number of graduates choose to practice in community and hospital pharmacy practice settings, but a wide variety of career possibilities in the pharmacy profession are available. Pharmacists have a great spectrum of practice environments to choose from in which their professional skills can be applied. Career information can be found through any of the national pharmacy professional associations. For information about these opportunities, see <http://pharmacy.umkc.edu/pharm-d/faqs/>

The doctor of pharmacy program also provides an appropriate academic base for students wishing to enter graduate study in the pharmaceutical sciences, pharmacology, toxicology, chemistry, biology, business, and/or public health. Others have gone on to pursue degrees in medicine, dentistry, or law.

Postgraduate training in the form of a residency and optional fellowship is recommended for all doctor of pharmacy graduates seeking advanced career opportunities in industry or academia.

- Academic Regulations and Requirements
- Doctor of Pharmacy (p. 1941)
- Pharmacy (PHARM 7000) Courses (p. 193)

Faculty

Mostafa Z. Badr professor emeritus of pharmacology and pharmaceutical sciences; B.S., M.S. (Cairo University, Egypt); Ph.D. (University of Louisville).

Kylie Barnes; clinical associate professor of pharmacy practice and administration; PharmD (St. Louis College of Pharmacy).

Sarah Billings; clinical assistant professor of pharmacy practice and administration; Pharm.D. (St. Louis College of Pharmacy).

Brandi L. Bowers; clinical assistant professor of pharmacy practice and administration; Pharm.D. (University of Arkansas For Medical Sciences).

Wayne M. Brown; associate professor emeritus of pharmacy practice and administration; B.S. (Medical College of South Carolina); M.S., Ph.D. (University of Mississippi).

Angela Brownfield; clinical associate professor of pharmacy practice and administration and assistant director, experiential programs; Pharm.D. (St. Louis College of Pharmacy).

Patrick J. Bryant; clinical professor of pharmacy practice and administration and director, UMKC Drug Information Center; Pharm.D. (University of Nebraska Medical Center).

Kun Cheng^{2,3}; professor of pharmacology and pharmaceutical sciences; B.S., M.S. (China Pharmaceutical University, China); M.S. (National University of Singapore, Singapore); Ph.D. (University of Tennessee).

Lisa Cillessen; clinical assistant professor of pharmacy practice and administration; Pharm.D. (Ohio State University).

Kelly Cochran; clinical associate professor of pharmacy practice and administration; Pharm.D. (Butler University).

Sarah R. Cox; clinical assistant professor of pharmacy practice and administration; Pharm.D. (Butler University).

Glenn H. Eberhart professor emeritus of pharmacology and pharmaceutical sciences; B.S. (University of Denver); M.S., Ph.D. (University of California).

Elizabeth Englin; clinical assistant professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Simon H. Friedman^{2,3}; professor of pharmacology and pharmaceutical sciences; B.S. (Massachusetts Institute of Technology); Ph.D. (University of California, San Francisco).

Maqual Graham; associate dean academic affairs, school of pharmacy, and professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Paul Gubbins; associate dean, school of pharmacy, professor of pharmacy practice and administration; PharmD (University of Illinois at Chicago College of Pharmacy).

William G. Gutheil^{2,3}; professor of pharmacology and pharmaceutical sciences; B.S. (California Polytechnic State University); Ph.D. (University of Southern California).

Kendall Guthrie; clinical assistant professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Jamie Hall; clinical assistant professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Jeremy P. Hampton; clinical associate professor of pharmacy practice and administration; B.S. (Rockhurst University); Pharm.D. (University of Missouri-Kansas City).

Karen L. Hardinger; clinical professor of pharmacy practice and administration and director, assessment; Pharm.D. (University of Kansas).

Kathryn Holt; clinical assistant professor of pharmacy practice and administration; Pharm.D. (Medical University of South Carolina).

Orisa J. Igwe^{2,3}; professor of pharmacology and pharmaceutical sciences; B.S. (Northeast Louisiana University); M.S. (University of Kentucky); Ph.D. (University of Cincinnati).

Thomas P. Johnston^{2,3}; professor of pharmacology and pharmaceutical sciences; B.S., Ph.D. (University of Minnesota).

Barbara Kasper; clinical assistant professor of pharmacy practice and administration; Pharm.D. (South Dakota State University).

Maureen E. Knell; clinical professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Chi H. Lee^{2,3}; professor of pharmacology and pharmaceutical sciences; B.S. (Seoul National University, South Korea); M.S. (University of Washington); Ph.D. (Rutgers University).

Cameron C. Lindsey; professor of pharmacy practice and administration and director, co-curriculum; Pharm.D. (University of Missouri-Kansas City).

Yifei Liu; associate professor of pharmacy practice and administration; B.S. (West China University of Medical Sciences, China); M.S., Ph.D. (University of Iowa).

Heather Lyons-Burney; clinical assistant professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Patricia A. Marken; associate dean student affairs, school of pharmacy, and professor of pharmacy practice and administration; B.S. (Dalhousie University, Canada); Pharm.D. (Medical University of South Carolina).

Diane McClaskey; clinical assistant professor of pharmacy practice and administration and assistant director, experiential programs; B.S. (Drake University College of Pharmacy & Allied Health Sciences).

Cydney McQueen; clinical associate professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Tatum Mead; clinical associate professor of pharmacy practice and administration; Pharm.D. (University of Iowa); B.A. (University of Northern Iowa).

Russell B. Melchert; dean, school of pharmacy, and professor of pharmacology and pharmaceutical sciences; B.S., Ph.D. (The University of Oklahoma Health Sciences Center).

Srikumaran K. Melethil professor emeritus of pharmacology and pharmaceutical sciences; B.Pharm., M.Pharm. (Andhra University, India); Ph.D. (State University of New York at Buffalo).

Mridul Mukherji^{2,3}; associate professor of pharmacology and pharmaceutical sciences; B.S. (University of Allahabad, India); M.S. (University of Calicut, India); Ph.D. (University of Oxford, United Kingdom).

Leigh Anne Nelson; professor of pharmacy practice and administration; B.S., Pharm.D.(University of Missouri-Kansas City).

Sarah M. Oprinovich; clinical assistant professor of pharmacy practice and administration; Pharm.D.(Purdue University).

Erica Ottis; clinical associate professor of pharmacy practice and administration; Pharm.D. (St. Louis College of Pharmacy).

Melissa Palmer; clinical assistant professor of pharmacy practice and administration; Pharm.D.(University of Missouri-Kansas City).

Mark Patterson; associate professor of pharmacy practice and administration; B.A. (Bowdoin College); M.P.H. (Yale University); Ph.D. (University of North Carolina-Chapel Hill School of Pharmacy).

Robert W. Piepho; dean emeritus and professor emeritus of pharmacology and pharmaceutical sciences; B.S. (University of Illinois); Ph.D. (Loyola University).

Jordan M. Rowe; clinical assistant professor of pharmacy practice and administration; Pharm.D. (University of Arkansas For Medical Sciences).

Valerie L. Ruehter; clinical associate professor of pharmacy practice and administration and director, experiential programs; B.S., Pharm.D. (University of Missouri-Kansas City).

Dominick Salvatore; clinical assistant professor of pharmacy practice and administration; Pharm.D. (St. Louis College of Pharmacy).

Jennifer A. Santee; clinical associate professor of pharmacy practice and administration; Pharm.D. (University of Iowa).

Mark T. Sawkin; clinical associate professor of pharmacy practice and administration; B.S., Pharm.D. (Wayne State University).

Stephanie Schauner; clinical associate professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Peter S. Silverstein; associate research professor of pharmacology and pharmaceutical sciences; B.A. (Duke University); MA (Lehman College of City University of New York); Ph.D. (Auburn University).

Andrew Smith; clinical associate professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Roger W. Sommi, Jr.; associate dean, school of pharmacy, professor of pharmacy practice and administration and vice chair, division of pharmacy practice and administration; B.S. (University of Wisconsin-Madison); Pharm.D. (University of Utah).

Morgan Sperry; clinical associate professor of pharmacy practice and administration; Pharm.D. (Creighton University).

Amanda M. Stahnke; clinical associate professor of pharmacy practice and administration; BA (Westminster College); Pharm.D. (Southern Illinois University).

Steven Stoner; clinical professor of pharmacy practice and administration and chair, Division of Pharmacy Practice and Administration; Pharm.D. (University of Nebraska).

Diana Tamer; clinical assistant professor of pharmacy practice and administration; B.S.,(American University of Beirut); Pharm.D. (Lebanese American University).

Heather Taylor; clinical assistant professor of pharmacy practice and administration; Pharm.D. (University of Arkansas for Medical Sciences).

Jianping Wang^{2,3}; associate professor of pharmacology and pharmaceutical sciences; M.D., M.S. (Second Military Medical University); Ph.D. (Louisiana State University of Health Sciences Center).

Eric Wombwell; clinical associate professor of pharmacy practice and administration; Pharm.D. (University of Missouri-Kansas City).

Bi-Botti C. Youan^{2,3}; professor of pharmacology and pharmaceutical sciences; Pharm.D. (University of Cote, Abidjan); MBA (United Business Institutes, Belgium); M.Sc., Ph.D. (Catholic University of Louvain, Belgium).

David M. Yourtee professor emeritus of pharmacology and pharmaceutical sciences, School of Pharmacy and School of Medicine; B.S. (University of Missouri-Columbia); Ph.D. (University of Missouri-Kansas City).

⁴ Located at UM-St. Louis campus

Courses

PHARM 5507 Basic Pharmacology Credits: 3

Basic pharmacological concepts and important classes of pharmacologic agents.

Prerequisites: BIOLOGY 218, LS-PHYS 217.

PHARM 5508 Medicinal Chemistry of Drug Classes Credits: 3

This course will focus on major drug classes, both natural and synthetic, with emphasis on their chemical properties, their mode of action, their structure-activity relationships, and their metabolic fate. Structure-activity relationships and the influence of organic functional groups on physicochemical properties of drugs and their pharmacological activities will be emphasized. Drug metabolism will also be covered, with a focus on organic functional group transformations.

PHARM 5509 Toxicology Credits: 3

Principles of general toxicology and toxicology of industrial and household chemicals, agricultural agents, social poisons, and selected therapeutic agents.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 5519 Pharmacology I Credits: 2

Basic pharmacological principles of drug absorption, distribution, metabolism and elimination; concept of drug-receptor interactions; dose-response relationships and mechanism of action; and signaling mechanisms.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 5520 Pharmacology II Credits: 4

Principles of and advances in chemotherapy, biology, mechanism of action; clinical applications and adverse effects of various drug groups.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 5521 Advanced Organic Medicinal Chemistry Credits: 3

The focus of this course is an examination of the physical-chemical basis of drug action, particularly focusing on the formation of drug-target complexes. This includes the mathematical description of this binding, as well as an advanced description of the physical forces responsible for binding. In addition we will examine the energetic and entropic factors that contribute to complex stability, examining real world examples when possible.

PHARM 5527 Analytical Methods Credits: 3

A detailed study of the methods used to detect, identify, and quantitate drugs, small molecules, enzymes, proteins, and biological molecules. The statistical foundation, core concepts, and practical implementation of analytical methods are areas of emphasis. State-of-the-art instrumentation and recent technological developments are also presented, including biotechnology based methods such as proteomics methods and quantitative PCR.

PHARM 5530 Pharmacology III Credits: 4

Mechanism of action; therapeutic uses; and adverse effects of drugs affecting different organ systems.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 5531 Physical Pharmacy Equilibria Credits: 3

Advanced principles of aqueous solutions, acid-base equilibria, solubility and complexation. Mathematical solutions and state-of-the-art research applications.

Prerequisites: B.S. in pharmacy.

PHARM 5533 Advanced Pharmacokinetics and Biopharmaceutics Credits: 3

This course involves the study of the rates at which drug absorption, distribution, metabolism, and excretion occur in the body following medication administration. The student will be expected to kinetically model a given physiological process associated with the disposition of a drug in any tissue, write a series of equations, and then solve those equations to produce a final set of equations that can be used to predict the concentrations of drug in the biological matrix of interest. Knowledge of derivation of equations is expected, along with real-world application of resulting equations.

Prerequisites: PHARM 7303 and MATH 345 (both with a grade of B or better).

PHARM 5550 Stability of Pharmaceuticals Credits: 3

The course provides instruction in the processes responsible for instability of pharmaceuticals. Course content includes, but is not limited to, instability due to light, oxygen, and metal ions; the effect of temperature on the rate of drug decomposition; the effect of dielectric constant and ionic strength on degradation; and physical and chemical instability of newer polypeptide drugs. In addition, practical strategies to prevent instability of the active compound and excipients used in pharmaceutical formulations is provided.

Prerequisites: MATH 210, PHARM 7202, PHARM 7203.

PHARM 5555 Religion, Culture and Health Credits: 3

This course addresses the impact of religious beliefs on the culture practices of contemporary society, and aims at examining the relationship between these beliefs, modern sciences and health.

PHARM 5560 Discussions in Pharmacology Credit: 1

Discussions in Pharmacology (also called Pharmacology Journal Club), is a graduate course. It is designed to provide graduate student the opportunity to read, interpret and present literature to fellow peers, post-docs and faculty. The Journal Club presentations promote active and lively discussion and exchange of ideas. The class is a mandatory requirement for all graduate students in the Division of Pharmacology Toxicology.

Prerequisites: B.S. (or equivalent) in biology, chemistry, pharmacy or related biomedical sciences.

PHARM 5580A Seminar in Pharmaceutical Sciences Credit: 1

Enrollment and participation required of all graduate students in the School of Pharmacy during each semester of graduate study.

PHARM 5580C Seminar in Pharmacology/Toxicology Credit: 1

Enrollment and participation required of all graduate students in the School of Pharmacy during each semester of graduate study.

PHARM 5588 Biotechnology Credits: 3

In this graduate course, the principle theories, techniques and strategies to conduct experiments using common biotechnology/molecular biology techniques will be discussed. The course material has been designed to provide up to date information on techniques in biotechnology. Knowledge on these basic biotechnology/molecular biology techniques will be useful in diverse fields like biochemistry and pharmaceutical sciences to work with nucleic acid and proteins (or equivalent) in biology, chemistry, pharmacy or related discipline.

PHARM 5590A Special Topics Pharmacy Credits: 1-3**PHARM 5599A Research And Thesis Pharmacy Credits: 1-9****PHARM 5599C Research And Thesis Pharmacology Credits: 1-9****PHARM 5605 Fundamentals of Pharmaceutical Sciences Credits: 3**

This is an entry-level graduate course for all incoming graduate students who select Pharmaceutical Sciences either as the primary discipline or co-discipline. The course will teach the fundamentals of the Pharmaceutical Science discipline. The fundamentals include drug discovery, drug absorption and metabolism, formulation development, physical pharmacy, pharmaceuticals, drug delivery, molecular biology, cell biology, medicinal chemistry, and pharmacokinetics.

PHARM 5615 Methods In Pharmacology And Toxicology Credits: 3

Exposure to some of the techniques employed in research in pharmacology and toxicology. There are eight one-hour introductory lectures for the course, followed by six hours of laboratory per week.

PHARM 5630 Cytochrome P450: Drug Metabolism, Bioavailability, Interactions and Toxicity Credits: 3

This course is designed to provide students up-to-date scientific facts on drug metabolism, bioavailability interactions, and toxicity (DMBIT) in perspective of cytochrome P450 (CYP) and the factors that affect DMBIT. The course will also include prospects of CYP applications for various purposes in reference to drug metabolism. The course will include lectures, lab experience, and student seminar/report.

Prerequisites: B.S. (or equivalent) in chemistry, biology, pharmacy, or related subject.

PHARM 5631 Pharmaceutical Formulations I Credits: 3

Advanced theory and practice of Pharmaceutical formulations, including classical and current research. This course will introduce the principles of biomaterial based drug delivery systems and unify knowledge from the fields of biology, materials science, and pharmaceuticals.

Prerequisites: B.S. in Pharmacy.

PHARM 5632 Novel Drug Delivery Systems Credits: 3

The course offers up-to-date information about drug transport mechanisms and drug absorption processes across various absorptive membranes ie., buccal, nasal, dermal, corneal, pulmonary, and oral mucosae. The course material has been designed to provide current ideas and thinking about gene delivery, drug targeting to tumor cells and lipid and carrier mediated drug delivery. It provides unique information about cell culture models as a predictor of drug delivery as well as physical chemistry of surfaces in various microparticulates and lipid emulsion systems.

PHARM 5633 Receptor Pharmacology and Signal Transduction Credits: 3

Molecular characterization of drug receptors involving quantitative description of functional studies with agonists and antagonists and binding of ligands to receptors; the molecular structure of receptors and the signaling systems that couple receptors to their pharmacologic functions.

Prerequisites: LS-BIOC 370, PHARM 5519, PHARM 5520, PHARM 5530.

PHARM 5634 Protein and Nucleic Acid Drug Delivery Credits: 3

In the graduate course, the principle theories, techniques and strategies in developing protein and nucleic acid drugs will be discussed. The course material has been designed to provide up to date information in protein and nuclear acid drug delivery. It offers unique information on how to combine knowledge of chemistry, molecular biology and pharmaceutical sciences to achieve successful therapeutic application of protein and nucleic acid.

Prerequisites: B.S. in bioengineering, biology, chemistry, pharmacology, or pharmacy.

PHARM 5640 Biochemical and Molecular Toxicology Credits: 3

This course will provide students with a comprehensive mechanistic understanding of various molecular events that lead to and/or are associated with chemically/environmentally induced degenerative or proliferative diseases. The course will include lectures student presentations of recent advances in biochemical and molecular toxicology and student report on a topic of interest as it pertains to the subject being taught. The title of the report has to be approved by the course coordinator.

Prerequisites: B.S. (or equivalent) in biochemistry, biology, chemistry, or molecular biology.

PHARM 5645 Cancer Biotechnology I Credits: 3

This course is designed to provide a basic understanding of tumor progression, molecular events and signaling mechanisms underlying tumor formation. Epidemiological approaches, etiology, and current methods of detection and diagnosis of cancer will be discussed. Current pharmacological management strategies of cancer and future therapeutic interventions will also be reviewed.

Prerequisites: BIOLOGY 202 (or equivalent).

PHARM 5690BB Special Topics Toxicology Credits: 1-3**PHARM 5690C Special Topics Pharmacology Credits: 1-3****PHARM 5690PCII Special Topics Pharmacy Credits: 1-3**
Special Topics Pharmacy**PHARM 5699 Research and Dissertation Credits: 1-16**

Available for Doctorate program with the following emphasis areas: (A) Pharmacy, (B) Pharmaceutical Chemistry, (C) Pharmacology, (AA) Pharmacy Administration, and (BB) Toxicology.

PHARM 5699A Research And Dissertation - Pharmacy Credits: 1-16**PHARM 5699B Research And Dissertation Pharmaceutical Chemistry Credits: 1-16****PHARM 5699BB Research And Dissertation Toxicology Credits: 1-16****PHARM 5699C Research And Dissertation Pharmacology Credits: 1-16****PHARM 5899 Required Graduate Enrollment Credit: 1****PHARM 7100A Introductory Topics in Pharmacy I Credit: 1**

These courses include presentations and discussions on the profession of pharmacy including: the roles and responsibilities of the pharmacist, educational requirements to obtain the degree, career opportunities, student life, legal and ethical issues, and study skills development.

PHARM 7101 Introduction to the Professional Degree Program and Pharmacy Practice Credits: 2

This course introduces students to the profession of pharmacy by communicating drug names, defining drug-related problems and discussing professional responsibilities and roles of a pharmacist. Students will examine and reflect on personal knowledge, skills, abilities, beliefs, biases, motivation, and emotions that could enhance or limit personal and professional growth following completion of various self-assessments. This course also assists students to assume responsibility for their own learning. One 2-hour class session is held per week.

Prerequisites: Admission to the Pharm.D. Program.

PHARM 7110 Professional Skills II: Pharmacy Calculations Credits: 2

This course provides instruction in performing and applying the necessary calculations involved in pharmacy practice and the dispensing, manufacturing and preparation of dosage forms. Topics covered include but are not limited to: fundamentals of pharmaceutical calculations, exponents, ratios, percentages, proportions and fractions); International System of Units; pharmaceutical measurements; interpretations of medication orders and prescriptions; density, specific gravity and specific volume; patient specific parameters involved in dosing (surface area, weight and age); isotonicity and buffer solutions; milliequivalents, millimoles and milliosmoles; dilution, concentration and allegation; and reduction/enlargement of formulas. Students must have an understanding of mathematical principles to include algebra and calculus.

Prerequisites: MATH 210.

PHARM 7151 Introduction to Pharmacy Law Credit: 1

This course will examine the federal laws that pertain to the practice of pharmacy.

PHARM 7199 Pharmacy Grand Rounds Credits: 0.25

The School of Pharmacy offers Grand Rounds seminars for the student body regarding timely and important topics and issues facing the profession of the School.

PHARM 7202 Pharmaceutics I Credits: 3

Overall, in this course, the principles of chemistry, physics and mathematics are applied to the pharmaceutical sciences. Elements of mathematics, states of matter, acid-base chemistry, solubility, partitioning, isotonicity, interfacial phenomena, rheology, reaction kinetics, incompatibilities, and stabilization of pharmaceutical formulations and dispersed systems will be considered.

Prerequisites: MATH 210, PHYSICS 210, CHEM 322R, PHARM 7110.

PHARM 7203 Pharmaceutics II Credits: 3

Discussion of pharmaceutical processes, equipment and material used in drug delivery systems and the preparation and evaluation of various drug delivery systems and formulations.

Prerequisites: PHARM 7202.

PHARM 7203L Pharmaceutics II Lab Credit: 1

In this lab course, students will perform hands-on pharmaceutical processes, use manufacturing equipment, and prepare formulations in which selected dosage forms are manufactured and evaluated. This is a professional elective option for Pharm.D. students.

Prerequisites: PHARM 7202.

Co-requisites: PHARM 7203.

PHARM 7223 Rural Health and Agricultural Medicine Credits: 2

Intended to introduce inter-professional health professions students to agricultural health and rural medicine in order to prepare them to serve rural populations. Provided in collaboration with the Great Plains Center for Agricultural Health Safety, this course will provide a solid foundation in prevention strategies for safety and health in production agriculture. Students will recognize relevant demographic, socioeconomic and social determinants of health. Participants will be equipped with resources and tools that can support them in their future service to rural communities and emphasize the importance of interdisciplinary collaboration among health professions in order to reduce risks and optimize health.

Prerequisites: Students must be enrolled in health professions coursework.

PHARM 7224 Introduction to Cannabis Medicine Credit: 1

The course will serve as an introduction to the endogenous cannabinoid system and explore the clinical potential and the clinical, social, and legal problems associated with medicinal use of cannabis and cannabinoid medicines.

PHARM 7231 Drug Development and Pharmaceutical Career Opportunities Credits: 2

An introduction to the drug development industry and the process by which a new drug is brought to market. Students will use knowledge gained in previous coursework to deepen their understanding of how the biopharma and pharmaceutical industry functions. There will be an overview of discovery, preclinical, clinical, regulatory, drug safety, marketing, and medical affairs functions within the pharmaceutical industry. Opportunities that exist for Doctor of Pharmacy graduates to develop careers in these areas will also be discussed.

Prerequisites: PHARM 7101 or PHARM 7489.

PHARM 7233 U.S. Health Care System and Marketing Credits: 3

U.S. Health Care System and Marketing is a required course for the Doctor of Pharmacy degree program at The University of Missouri -Kansas City School of Pharmacy. It consists of two modules: U.S. Health Care System and Medication Safety (Module I) , and Health Care Marketing (Module 2). The learning objectives of the course are to (1) characterize components of the U.S. health care system at the macro level, including public health programs; (2) discuss medication errors and management within the U.S. health care system; (3) manage patients' health care needs using technological resources to optimize safety and efficacy of medication use systems; and (4) analyze the marketing process for health care projects and services, including business ethics in marketing activities. This course provides the context and builds the knowledge base for future required courses in economic, social, and administrative sciences.

PHARM 7244 Introduction to Drugs of Abuse Credits: 2

As a health professional in training, it is important to know the mental and behavioral effects of abusing both prescription and illicit substances. This knowledge will help the health professional to be more understanding of their patients who may be suffering with a substance abuse problem. Introduction to Drugs of Abuse will focus on both the physical and psychological effects of substances such as hallucinogens, amphetamines, alcohol, and nicotine among others. The course will also be discussing important topics such as behavioral modification, the controversies of treatment, and the role of the pharmacist in the treatment of substance abuse. A substantial focus will also be placed on patient experiences and the psycho-social aspects of substance abuse.

Prerequisites: BIOLOGY 218, BIOLOGY 218L.

Co-requisites: LS-PHYS 399, LS-PHYS 400.

PHARM 7245 Top Drugs I Credit: 1

This 1.0 hour course is designed as an introduction to up to 300 of the most commonly prescribed medications. This course will provide students with the opportunity to learn basic drug knowledge including brand (trade) and generic names, narcotic class, therapeutic class, common dosage forms, and FDA approved indications, dosing, pharmacology/pharmacokinetics, drug interactions, contraindications/precautions, and adverse effects.

Prerequisites: Successful completion of the P1 year in the Pharm.D. Program

PHARM 7266 Medical & Medication Error Evaluation & Management Credit: 1

A course designed to discuss the current body of evidence with respect to medical quality, medication errors, and strategies used to improve quality minimize error rates. At the completion of the course, the student should be able to (1) review and synthesize evidence within the literature; (2) describe the policy framework designed to improve health care quality; (3) describe characteristics and factors that enable encourage providers to improve the quality of care; (4) describe common causes of medication errors; (5) differentiate strategies to prevent errors; (6) correlate medication errors and specific disease states.

PHARM 7275 The Pharmacists' Role in Global Health Credits: 2

This course is designed to introduce students to the global context of public health. "Global Health" is defined as the application of principles of public health to health issues and challenges that transcend geopolitical boundaries, and to the complex array of global and local forces that affect these health issues.

PHARM 7277 Zoonotic Illnesses Credit: 1

A zoonotic illness is a disease that can be transmitted from animals to humans – over 60% of all human infections are zoonotic. The purpose of this course is to increase student knowledge relative to infectious diseases caused by zoonotic transmission/pathogens. Topic discussion will include background evolution of the disease, diagnostic considerations, management, monitoring and reporting of the infectious diseases to the local health department. This course will serve to reinforce the principles of infectious diseases pharmacotherapy and further expose students to diseases encountered in rural Missouri (i.e. tick bites, farm animals). Classes are didactic in nature.

Prerequisites: Microbiology course from any accredited college or university.

PHARM 7289 Introduction to Complementary and Alternative Medicine Credit: 1

An elective course designed to introduce a variety of the most common complementary and alternative medicine (CAM) modalities. Each modality will be defined and explained and any clinical evidence for or against will be discussed. An important emphasis will be on how patient use of these therapies may affect their needs for medication therapy management and counseling. For example, patients who see a naturopathic physician may be more likely to use herbal therapies that may interact with their prescription medications.

Prerequisites: Good standing in the P2 Doctor of Pharmacy year; P1 students may enroll with instructor approval.

PHARM 7303 Pharmacokinetics and Biopharmaceutics Credits: 3

This course involves the study of the rates at which drug absorption, distribution, metabolism, and excretion occur in the body following medication administration. The student will be taught to calculate pharmacokinetic parameters, and then utilize those values to optimize pharmacotherapy in his/her patient. So as to promote inter-professional healthcare dialogue, this course will demonstrate how to make informed recommendations associated with both drug administration and monitoring to medical and nursing healthcare providers. Recommendations include, but are not limited to, suggesting changes in the dose, dosing frequency, infusion rate, steady-state plasma drug concentrations, 'peak' and 'trough' plasma drug concentrations, drug/drug interactions, drug/food interactions, and dosing adjustment in the context of diminished kidney or liver function.

PHARM 7307 Advanced Pathophysiology Credits: 4

Advanced pathophysiology I is the study of the alterations of normal physiological functioning in cellular, tissue, organ, and organ systems. These alterations form the basis for understanding a variety of pathophysiological conditions and the manifestations and impact of abnormal physiological functioning on patients across the life span. Advanced pathophysiology I deals with both generalized disease processes and major organ system dysfunction. Students will have the opportunity to identify clinical signs and symptoms for various disease states and associate those symptoms with pathophysiological changes. The focus of this course is not on the pharmacologic management of disease, though medication management categories may be briefly introduced as it relates to mechanism of action and the physiologic abnormality contributing to the disease state.

Prerequisites: LS-BIOC 370, LS-PHYS 400.

Co-requisites: PHARM 7362, PHARM 7245.

PHARM 7308 Advanced Pathophysiology II Credits: 3

Advanced pathophysiology II is the study of the alterations of normal physiological functioning in cellular, tissue, organ, and organ systems. These alterations form the basis for understanding a variety of pathophysiological conditions and the manifestations and impact of abnormal physiological functioning on patients across the life span. Advanced pathophysiology II deals with both generalized disease processes and major organ system dysfunction. Students will have the opportunity to identify clinical signs and symptoms for various disease states and associate those symptoms with pathophysiological changes.

Prerequisites: LS-BIOC 370, LS-PHYS 400, PHARM 7307.

Co-requisites: PHARM 7363, PHARM 7345.

PHARM 7310 Academic Service Learning I Credit: 1

Academic Service Learning is a professional elective course where students are assigned to either an area clinic in Kansas City or the MedZou program in Columbia. A minimum of 30 contact hours must be completed during the assigned semester. Health education will be the primary focus.

PHARM 7311 Pharmacy in the 21st Century Technology Credits: 2

This course allows students to develop the skills to evaluate and use Health Care Information Technology (HCIT) in contemporary pharmacy practice. The elective course is offered in the winter semester only.

Prerequisites: Third year status or higher in the Pharm. D. program.

PHARM 7313 Career Planning Credit: 1

This course enables students to engage in the study of career opportunities in the areas of industry, hospital/clinic practice, retail and managed care settings. Pharmacy opportunities are explored through lecture and discussion, guest speakers in the various areas and student exploration with business contacts and research. Topics include understanding career opportunities, achieving one's professional goals, compensation packages and negotiations, and designing a path to accomplish career objectives.

PHARM 7316 Introduction to Pharmaceutical Policy Analysis Credits: 2

This course addresses multiple key influential pharmaceutical policy areas shaping pharmacy practice, and will teach critical thinking skills required to measure both federal and state level policy impact in patient safety and access to medications.

Prerequisites: PHARM 7151, PHARM 7325.

PHARM 7317 Drug Induced Diseases Credits: 2

Drug-induced disease is an unintended effect if a drug that results in mortality or morbidity with symptoms sufficient to prompt a patient to seek medical attention and/or require hospitalization. This course will aid students in the identification, management, and prevention of drug-induced diseases.

Prerequisites: PHARM 5519, PHARM 7307.

PHARM 7318 Introduction to Critical Care Medicine Credits: 2

Critical Care is a multidisciplinary healthcare specialty that cares for patients with acute, life-threatening illness or injury. The management of these patients requires advanced knowledge in various disease states, pathophysiological changes as a result of the illness or injury, as well as the pharmacologic agents used in their treatment. The course will serve as an introduction to Critical Care medicine and will allow students to gain exposure to all that encompasses caring for the critically ill. It will not only focus on specific disease states, but also delve into the negative outcomes associated with such illnesses and provide an introduction to both medical and pharmacologic management of them. The course is not meant to provide students with a comprehensive review but rather provide a glimpse into the specialty of Critical Care Medicine.

Prerequisites: Successful completion of all pharmacy didactic and experiential courses through semester four.

PHARM 7324 Medication Management in Transitions of Care Credit: 1

Transitions of care is an important aspect of patient care in all pharmacy practice settings. The pharmacist plays a crucial role in medication management during the transitions of care process. The purpose of this course is to increase student knowledge and skills relative to the pharmacist's role in transitions of care. Students will learn strategies to effectively develop and implement pharmacy-led transitions of care services in various healthcare settings.

Prerequisites: PHARM 7414. PHARM 7414L.

PHARM 7325 Patient Assessment and Professional Communication Credits: 2

In this course, students will continue developing necessary skills to provide patient-centered care. Students will be introduced to health informatics and an electronic medical record. Students will be taught the four components of a SOAP note, a method of documentation used by healthcare providers. Students will learn how to physically assess patients and document findings in SOAP format in a patient's record. Students will also learn how to effectively communicate with other healthcare professionals and document the interactions.

Prerequisites: PHARM 7101, PHARM 7414.

Co-requisites: PHARM 7325L.

PHARM 7325L Applied Skills Lab: Patient Assessment and Professional Communication Credits: 0.5

This applied skills lab is associated with the Patient Assessment and Professional Communication course. Learning activities are designed to complement didactic instruction while allowing students to apply knowledge in a simulated environment. Students are expected to perform physical assessments on each other while under supervision and document patient information accurately and periodically within the electronic medical record system. Student achievement of core abilities will be assessed through an Objective Structured Clinical Examination. One 2-hour lab session is held every other week or weekly but no more than 10 sessions per semester.

Prerequisites: PHARM 7101, PHARM 7414.

Co-requisites: PHARM 7325.

PHARM 7326 Evidence Based Medicine Credits: 4

Pharmacists, if they are to assume the role of "medication expert," must learn how to evaluate the reliability of information relevant to healthcare options and choices. A pharmacist then can develop a clinical recommendation with justifications based on this evidence. Students will be taught a rigorous 5-Step systematic methodology assisting them with integrating this process into multidisciplinary healthcare decision-making for improved patient care.

Prerequisites: PHARM 7325, PHARM 7405.

Co-requisites: PHARM 7420.

PHARM 7331 Aseptic Technique & Compounded Sterile Preparations Credit: 1

In 7331, students will gain knowledge necessary to prepare sterile compounds including review of environmental requirements, proper aseptic technique, and dose calculations as well as legal and regulatory issues.

Prerequisites: Successful completion of all prior professional Pharm.D. program coursework through semester three and OSHA Bloodborne Pathogen Safety Training.

Co-requisites: PHARM 7331L.

PHARM 7331L Applied Skills Lab: Aseptic Technique & Compounded Sterile Preparations Credits: 0.5

The learning activities in 7331L are designed to complement didactic instruction and allow students to apply knowledge in a simulated environment. In 7331L, students will also demonstrate proper aseptic technique skills to compound and label, sterile preparations for safe and effective use.

Prerequisites: Successful completion of prior professional program coursework and OSHA Bloodborne Pathogen Safety Training.

Co-requisites: PHARM 7331.

PHARM 7334 Pharmacy Based Immunization Delivery Credit: 1

Pharmacy-based Immunization Delivery is an interactive training program that teaches student pharmacists the skills necessary to become a primary source for vaccine information and administration. The program teaches the basics of immunology and focuses on practice implementation, administration technique and legal/regulatory issues.

Prerequisites: PHARM 7307, PHARM 7361.

PHARM 7339 Business Plan and Entrepreneurship in Community Pharmacy Credits: 2

Business Plan and Entrepreneurship in Community Pharmacy course is designed to provide an opportunity for students enrolled in the School of Pharmacy to further explore business plan development and entrepreneurship in the community pharmacy setting. Upon course completion, the student will be able to understand and complete the necessary components of a full business plan and proposal that involves innovation and creativity in pharmacy practice. Students are expected to participate in a team approach to delegate all aspects of the business plan, as well as participate in classroom activities and discussions of innovative practice.

Prerequisites: PHARM 7101, PHARM 7151, PHARM 7233, PHARM 7414, PHARM 7414L, PHARM 7465.

PHARM 7341 Medicinal Chemistry I Credits: 3

This course is the study of medicinally active substances, both natural and synthetic, which describes their chemical properties, their mode of action, their structure-activity relationships and their metabolic rate. Starting with their origin, it is shown how drugs in a series are developed by chemical modification, quantitative structure activity relationships and receptor theory. The chemical properties of a drug are described and explained. The mode of action of the drug is explained on a biochemical basis whenever possible. Once a drug has had its medicinal effect, it is excreted or metabolized. Reasons for excretion or metabolism are explained.

Prerequisites: CHEM 322R.

PHARM 7344 Medicinal Chemistry II Credits: 3

This course is a continuation of PHARM 7341. This course will focus on major drug classes, both natural and synthetic, including their chemical properties, their mode of action, their structure-activity relationships and their metabolic fate. Structure-activity relationships and the influence of organic functional groups on physicochemical properties of drugs and their pharmacological activities will be emphasized. Drug metabolism will also be covered, with a focus on organic functional group transformations.

Prerequisites: PHARM 7341.

PHARM 7345 Top Drugs II Credit: 1

This 1.0 hour course is designed as an introduction to up to 300 of the most commonly prescribed medications. This course will provide students with the opportunity to learn basic drug knowledge including brand (trade) and generic names, narcotic class, therapeutic class, common dosage forms, and FDA approved indications, dosing, pharmacology/pharmacokinetics, drug interactions, contraindications/precautions, and adverse effects.

PHARM 7353 Investigative Toxicology Credits: 2

The science of investigative toxicology is an emerging science that plays a central role in forensic toxicology and pathology regarding conditions of and for exposure of many different kinds of environmental, biological, chemical, or physical agents. Investigative toxicology may include criminal or civil legal matters. The duties of an investigative toxicologist include the qualitative and quantitative analysis of drugs or poisons in biological systems and other physical evidence collected at the scene of the investigation. This also includes the interpretation of the exposure scene evidence and findings in regard to the physiologic and behavioral effect of those exposed to the detected/suspected chemical(s) at time of exposure. The complete investigation of the cause or causes of sudden or chronic chemical exposure and its potential aftermath is an important civic responsibility. The use of toxicologic information in investigation assessment requires careful field and laboratory analysis, evaluation of data.

PHARM 7361 Pharmacology I Credits: 2

Basic pharmacological principles of drug absorption, distribution, metabolism and elimination; concept of drug-receptor interactions; dose-response relationships and mechanism of action; and signaling mechanisms.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 7362 Pharmacology II Credits: 4

Principles of and advances in chemotherapy, biology, mechanism of action; clinical applications and adverse effects of various drug groups.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 7363 Pharmacology III Credits: 4

Mechanism of action; therapeutic uses; and adverse effects of drugs affecting different organ systems.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 7364 Concepts of Epidemiology and Statistics In-Research Credits: 3

This course introduces students to study design, principles, concepts, and application of epidemiological and statistical methods in research. First part of the course will cover understanding the epidemiological principle, measuring the occurrence of disease, measures of disease association, and types of study designs, interpretation and evaluation of epidemiologic research. Second part will provide hands-on experience for students on developing skills to analyze research data using appropriate statistical methods by means of statistical software to calculate the measures of disease association. This course will help students to evaluate health care studies with respect to study design, statistical analysis, interpretation, and evidences of association. During this course students will develop an epidemiologic study proposal. Students will learn to analyze and interpret the output of these analyses using the Statistical Package for the Social Science (SPSS).

Prerequisites: STAT 436.

PHARM 7366 Oncology and Hematology Pharmacotherapy Credits: 3

This course provides disease-oriented and pharmacy-oriented insight into the pathophysiology, diagnosis, and rational drug treatment of malignancy. The pharmacist's role in selecting drug products, individualizing dosages, supportive care, and monitoring patients is emphasized, with additional emphasis on safety and handling.

Prerequisites: PHARM 7361, PHARM 7420.

PHARM 7369 Advanced Psychiatry Credits: 2

This course aims to expand student pharmacist knowledge in regards to psychiatric pharmacy practice. Students will develop skills in patient assessment, treatment plan development, and professional communication. Course content and projects are aimed at expanding the students' understanding of a wide range of psychiatric disorders and developing their ability to discuss and analyze these disorders and their implications for patients and society as a whole.

Prerequisites: Successful completion of all pharmacy coursework through semester five.

Co-requisites: PHARM 7485P, PHARM 7485L.

PHARM 7377 Principles of Nutrition Support Credits: 2

Clinical nutrition, a multidisciplinary field, has become an important practice area for the hospital pharmacist. Its growth has been the result of an awareness of the high incidence of malnutrition among hospitalized patients and its effects on morbidity and mortality. Nutrition support is an important therapy provided to patients in the acute care, homecare and long term care settings. This course will introduce the student to the fundamentals of nutrition support and prepare him/her for future involvement in this important practice area.

PHARM 7378 Introduction to Community Pharmacy Practice Credits: 3

This course is a required Introductory Pharmacy Practice Experience (IPPE) in which students will spend three weeks during the summer after their first year providing patient-centered care in a community pharmacy practice setting. The experience will emphasize application of knowledge gained in didactic coursework at the student's level in the curriculum. This IPPE provides a blend of activities that focus on both the delivery of care to patients as well as the dispensing of medications. The Introductory Pharmacy Practice Experiences seek to establish a solid practice foundation on which students will continually build as they progress through the Doctor of Pharmacy curriculum.

Prerequisites: Successful completion of all professional program coursework through semester two. Proof of current pharmacy non-credit requirements and immunization documentation.

PHARM 7379 Introduction to Health Systems Pharmacy Practice Credits: 3

This course is a required Introductory Pharmacy Practice Experience (IPPE) in which Pharm.D. students will spend three weeks during the summer after their second year providing patient-centered care in a health systems pharmacy practice setting. The experience will emphasize application of knowledge gained in didactic coursework at the student's level in the curriculum. Activities focus on understanding the medication use system and delivering care to patients in a hospital setting. The Introductory Pharmacy Practice Experiences seek to establish a solid practice foundation on which students will continually build as they progress through the Doctor of Pharmacy curriculum.

Prerequisites: Successful completion of all professional program coursework through semester four. Proof of current pharmacy non-credit requirements and immunization documentation.

PHARM 7389 Advances In Drug Therapy Credits: 2

This course provides the fundamentals of recent advances in drug delivery and therapy. Concepts covered include advanced and novel drug delivery systems, modern drug analysis tools, the role of efflux proteins in drug kinetics, and transporter/receptor mediated drug delivery.

Prerequisites: PHARM 7303.

PHARM 7397 Home Health Care Credits: 2

Anything a patient does in the home concerning their healthcare is considered Home Health Care. All aspects of Home Health Care are covered in this class. Diabetic Ostomy products care, Durable Medical Equipment (Wheelchair, cane, crutches, etc.), home Renal Dialysis, Wound Care, Respiratory Therapy, IV accesses, Home Infusion Therapy, Hospice Care, and Enteral Nutrition are presented and discussed. Reimbursement issues are not discussed due to constantly changing regulations. This is a "hands-on" class with participation in, for example, ostomy fitting, crutches fitting, enteral nutrition taste testing, and a tour of a Home Infusion Pharmacy.

Prerequisites: PHARM 7362, PHARM 7405.

Co-requisites: PHARM 7420.

PHARM 7398 Comprehensive Diabetes Management Credits: 4

The purpose of the course is to provide the student with a multidisciplinary foundation in the principles of diabetes management. The student will develop his-her knowledge and ability to assess, manage, educate and monitor patients with diabetes. The faculty are comprised of a multidisciplinary team of experts for the online lectures. The in-class discussion will be led by a faculty member who specializes in diabetes management.

Prerequisites: PHARM 7303.

PHARM 7399 Required Enrollment Credit: 1

Required enrollment for international students in pharmacy training sites.

PHARM 7405 Pharmacotherapy I: Emphasis on Self-Care and Nonprescription Medications Credits: 4

Pharmacotherapy I integrates the fundamentals of pathophysiology and pharmacology to help develop the student's ability to provide patient-centered care. Upon course completion, students will be able to assess and provide pharmaceutical care for patients with illnesses commonly encountered in community pharmacy practice utilizing the QuEST/SCHOLAR MACS process to assess a patient's condition systematically and completely, as well as following the Pharmacist Patient Care Process (PPCP). Students are expected to identify medical and medication-related problems, recommend nonprescription drug therapy, prescription drug therapy when appropriate, and monitor for safe and effective drug use. Students are also expected to provide accurate medication counseling. In general, three hours per week are devoted for traditional didactic, classroom based instruction, teaching and learning and two hours for case recitation.

Prerequisites: PHARM 7279, PHARM 7307, PHARM 7325, PHARM 7361, PHARM 7414.

Co-requisites: PHARM 7405L.

PHARM 7405L Applied Skills Lab Pharmacotherapy I: Emphasis on Self-Care and Nonprescription Medications Credits: 0.5

Students enrolled in this applied pharmacotherapy lab will gain skills necessary to provide care for patients with illnesses commonly encountered in community practice. Learning activities are designed to complement didactic instruction while allowing students to apply knowledge in a simulated environment. Students will be afforded opportunities to provide patient-centered care utilizing the QuEST/SCHOLAR MACS process. Student achievement of core abilities will be assessed through an Objective Structured Clinical Examination.

Prerequisites: PHARM 7307, PHARM 7325, PHARM 7361, PHARM 7414.

Co-requisites: PHARM 7405.

PHARM 7406P IPPE: General Medicine I Credits: 2

This course is a required Introductory Pharmacy Practice Experience (IPPE) which provides a continuum of patient care activities throughout the third professional year. The student will spend one academic year (Fall and Spring Semesters) in a patient care setting with a minimum of 90 contact hours (45 contact hours each semester). The Pharmacist's Patient Care Process will be emphasized in the care of patients with commonly seen illnesses. Students are expected to become involved in the provision of direct patient care collaborating with other healthcare professionals and improving rational drug therapy in a practice environment. Students will take part in rounds, conferences, consultations and other activities as determined by the supervising faculty. General Medicine I practice site time allows maximum time and opportunity to engage IPPE students in patient care activities; interactions with patients, caregivers, and other health care professionals; and to apply their patient care knowledge and skills in authentic practice settings.

Prerequisites: PHARM 7420, PHARM 7485P.

PHARM 7407P APPE Patient Care Selective Credits: 4

The student will spend one month actively participating in the delivery of direct patient care in an interprofessional practice setting where there are ongoing clinical pharmacy services. Students will take part in rounds, conferences, consultations and other activities as directed by the faculty preceptor. Faculty preceptors may add site-specific objectives as indicated.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7409P APPE Health Systems Credits: 4

The student will spend one month assigned to a health system site. Emphasis of study will be on the pharmacy systems of hospital/health systems, medication safety and quality, and professional practice. Clinical applications will be maintained throughout the rotation. Students will take part in department activities to enhance understanding of the integration of all aspects of patient-centered care within the department and other services in the facility/health system. Faculty preceptors may add site-specific objectives as indicated.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7410P APPE Ambulatory Patient Care Credits: 4

The student will spend one month actively participating in the delivery of direct patient care in an interprofessional ambulatory patient care practice setting where there is an ongoing program of clinical pharmacy services. Students will take part in rounds, conferences, consultations and other activities as directed by the faculty preceptor. Faculty preceptors may add site-specific objectives as indicated.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential coursework through semester six.

PHARM 7412P APPE Advanced Community Pharmacy Credits: 4

The student will spend one month in a progressive community pharmacy setting. Emphasis of study will be on the clinical aspects of providing comprehensive patient care services to diverse patient populations in a community practice. Patient-centered care activities will be emphasized throughout the rotation. Students will take part in all aspects of patient care within the practice. Faculty preceptors may add site-specific objectives as indicated.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7414 Patient-Centered Care and Ethical Practice Credits: 2

Students will understand the concept as well as the pharmacist's role in providing patient-centered care. Students will learn how to build relationships through consideration of the patient's personal values, preferences and beliefs. Students will learn how to effectively communicate with patients to obtain health and medication histories and to counsel for medication adherence. Drug knowledge for the most commonly prescribed medications will be learned, assessed and applied throughout this course and the associated applied skills lab (7414L). One 2-hour class session is held per week.

Prerequisites: PHARM 7101.

Co-requisites: PHARM 7414L.

PHARM 7414L Applied Skills Lab: Patient-Centered Care and Ethical Practice Credits: 0.5

This applied skills lab is associated with Patient-Centered Care and Ethical Practice course. Learning activities are designed to complement didactic instruction while allowing students to apply knowledge to patient care in a structured lab environment. Student achievement of core abilities will be assessed through completion of assigned activities and an Objective Structured Clinical Examination (OSCE). One 2-hour lab session is held on designated weeks as outlined in the course schedule.

Prerequisites: PHARM 7101.

Co-requisites: PHARM 7414.

PHARM 7418P APPE Elective I Credits: 4

Elective experiences give students the opportunity to mature professionally, secure the breadth and depth of experiences needed to achieve curricular outcomes, and explore various sectors of practice. Students may repeat required rotations as electives if space is available or may approach a preceptor to tailor an elective experience to develop an area of interest. Faculty preceptors may add site-specific objectives as indicated. Electives may include a maximum of two experiences without a patient care focus.

Prerequisites: Successful completion of all pharmacy required non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7419P APPE Acute Patient Care Credits: 4

The student will spend one month actively participating in the delivery of direct patient care in an interprofessional acute practice setting where there are ongoing clinical pharmacy services. Students will take part in rounds, conferences, consultations and other activities as directed by the faculty preceptor. Faculty preceptors may add site-specific objectives as indicated.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7420 Pharmacotherapy II Credits: 7

Pharmacotherapy II is designed to develop the student's ability to assess patients and provide pharmaceutical care. The course focuses on developing and applying problem-solving strategies for complex illnesses commonly encountered in pharmacy practice. Students are expected to identify medical and medication-related problems, recommend drug therapy and monitor for safe and effective drug use. Students are also expected to provide medication counseling. Throughout the semester, students are expected to retrieve and utilize relevant patient data from an electronic medical record system to make patient care decisions. Six hours of large group and two hours of small group discussions occur weekly.

Prerequisites: PHARM 7279, PHARM 7280, PHARM 7307, PHARM 7325, PHARM 7361, PHARM 7362, PHARM 7405, PHARM 7414.

Co-requisites: PHARM 7420L, PHARM 7406P.

PHARM 7420L Applied Skills Lab: Pharmacotherapy II Credits: 0.5

Students enrolled in this applied pharmacotherapy lab will gain skills necessary to provide care for patients with illnesses commonly encountered in pharmacy practice. Learning activities are designed to complement didactic instruction while allowing students to apply knowledge in a simulated environment. Students will be afforded opportunities to utilize home monitoring tests, conduct medication reviews, and therapeutically manage patients at a distance (telepharmacy). Student achievement of core abilities will be assessed through an Objective Structured Clinical Examination (OSCE).

Prerequisites: PHARM 7279, PHARM 7280, PHARM 7307, PHARM 7325, PHARM 7361, PHARM 7362, PHARM 7405, PHARM 7414.

Co-requisites: PHARM 7420, PHARM 7406P.

PHARM 7420P APPE Elective II Credits: 4

Elective experiences give students the opportunity to mature professionally, secure the breadth and depth of experiences needed to achieve curricular outcomes, and explore various sectors of practice. Students may repeat required rotations as electives if space is available or may approach a preceptor to tailor an elective experience to develop an area of interest. Faculty preceptors may add site-specific objectives as indicated. Electives may include a maximum of two experiences without a patient care focus.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7421P APPE Elective III Credits: 4

Elective experiences give students the opportunity to mature professionally, secure the breadth and depth of experiences needed to achieve curricular outcomes, and explore various sectors of practice. Students may repeat required rotations as electives if space is available or may approach a preceptor to tailor an elective experience to develop an area of interest. Faculty preceptors may add site-specific objectives as indicated. Electives may include a maximum of two experiences without a patient care focus.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7422P APPE Elective IV Credits: 4

Elective experiences give students the opportunity to mature professionally, secure the breadth and depth of experiences needed to achieve curricular outcomes, and explore various sectors of practice. Students may repeat required rotations as electives if space is available or may approach a preceptor to tailor an elective experience to develop an area of interest. Faculty preceptors may add site-specific objectives as indicated. Electives may include a maximum of two experiences without a patient care focus.

Prerequisites: Successful completion of all pharmacy non-credit requirements and all didactic and experiential pharmacy coursework through semester six.

PHARM 7424 Introduction To Dietary Supplement Therapeutics Credits: 2

This course is intended to provide students with an awareness of important issues about dietary supplements to consider when providing pharmaceutical care to patients. Students will become familiar with regulations for dietary supplements, learn communication skills specific to discussing supplement use with patients, and the skills to retrieve and interpret reliable information to be able to make decisions about new or unfamiliar supplements.

Prerequisites: PHARM 7361.

PHARM 7427 Hospital Pharmacy Credits: 2

This course in Hospital Pharmacy is designed to expose students to the daily operation of a typical hospital pharmacy, integration of informatics and automation, and understanding of historical concepts in hospital pharmacy management. The course consists of one, two-hour lecture per week. The course will be delivered via traditional didactic lecture format and interactive group discussions.

PHARM 7434 Pharmacy Preparations: Compounding Credit: 1

In the Pharmacy Preparations: Compounding Course, students will gain knowledge and skills necessary to compound extemporaneous non-sterile preparations. The course will cover regulations governing pharmaceutical compounding in Missouri, ethical considerations applicable to compounds, various dosage forms including advantages and disadvantages of each, techniques used in preparing compounds, and the counseling information to be included for each type of dosage form covered in the course. Students will utilize their knowledge of pharmaceutical calculations in the preparation of the formulations such as calculating doses and ingredient quantities.

Prerequisites: PHARM 7110.

Co-requisites: PHARM 7434L.

PHARM 7434L Applied Skills Lab: Pharmacy Preparations: Compounding Credit: 1

Students enrolled in this compounding lab will apply knowledge gained in the associated course necessary to compound extemporaneous non-sterile preparations. Students are expected to accurately prepare, dispense, and label a variety of the most commonly prescribed extemporaneous formulations, including liquid, solid, semi-solid, and topical preparations.

Prerequisites: PHARM 7110.

Co-requisites: PHARM 7434.

PHARM 7439 Pediatric Pharmacotherapy Credits: 3

Pediatric Pharmacotherapy provides disease-oriented and pharmacy-oriented insight into the pathophysiology, diagnosis, and rational drug treatment of diseases primarily encountered in the pediatric population. The pharmacist's role in selecting drug products, individualizing dosages, and monitoring patients is emphasized.

Prerequisites: PHARM 7361, PHARM 7362, PHARM 7420.

PHARM 7451 Pharmacy Law Credit: 1

State laws impacting pharmacy practice.

Prerequisites: PHARM 7151.

PHARM 7463 Basic and Clinical Toxicology Credits: 2

Fundamentals of toxicology, including discussion of the general classes of poisonous substances, their physiological effects, and methods of treatment.

Prerequisites: Successful completion of prior professional program coursework or course coordinator's permission.

PHARM 7465 Health Economics and Medicine Credits: 3

This course introduces major economic dimensions of healthcare system and public health practices. Covers concepts necessary to understand provider and consumer behavior, health care market structure, government involvement in health care, reimbursement strategy, determinants of health, distribution channels for biopharmaceuticals, pharmacovigilance, economic evaluation of healthcare services, and comparative-effectiveness research.

Prerequisites: PHARM 7233.

PHARM 7466 Pharmacy Practice Leadership, Management, and Innovation Credits: 3

Pharmacy Practice Leadership, Management, and Innovation is a required course for the Doctor of Pharmacy degree program. The goals of the course are to teach basic leadership and management principles and apply them to pharmacy practice in a variety of situations and settings. Leadership principles are related to broad personal and organizational missions and visions. Management principles are related to operational details of managing human resources, inventory, and finances. In order to achieve these goals, this course will review specific topics, including but not limited to, leadership and professional development, entrepreneurship, operations management, application of reimbursement mechanisms, pay-for-performance, and innovative pharmacist services. Pharmacists need to understand these principles and applications as a means of providing optimum care for patients, especially when pharmacists emerge as important contributors to the future of the U.S. health care system.

Prerequisites: PHARM 7465.

PHARM 7467 Religion, Culture and Health Credits: 3

This course addresses the impact of religious beliefs, education, and cultural practices on health and healthcare issues pertinent to various segments of our society.

PHARM 7484P Pharmacy Seminar Credit: 1

Pharm. D. Student Seminar course is designed to provide students with examples and reasoning behind the fundamentals of seminar preparation and delivery and opportunity to utilize their knowledge by presenting a seminar. This experience will be achieved through identification of a topic, development and presentation of a seminar. The student is expected to complete two 40-minute seminars over two semesters.

Prerequisites: PHARM 7485P.

PHARM 7485L Applied Skills Lab: Pharmacotherapy III Credits: 0.5

Students enrolled in this applied pharmacotherapy lab will gain skills necessary to provide care for patients with illnesses commonly encountered in pharmacy practice. Learning activities are designed to complement didactic instruction while allowing students to apply knowledge in a simulated environment. Students will be afforded opportunities to provide pharmacy services, including but not limited to, Medication Therapy Management, therapeutic Drug Utilization Review, Patient Centered Medical Home and telepharmacy. Multiple activities will incorporate concepts of interprofessional team-based care. Student achievement of core abilities will be assessed through an Objective Structured Clinical Examination.

Prerequisites: PHARM 7279, PHARM 7280, PHARM 7307, PHARM 7325, PHARM 7361, PHARM 7362, PHARM 7405, PHARM 7414, PHARM 7420.

Co-requisites: PHARM 7485P, PHARM 7406P.

PHARM 7485P Pharmacotherapy III Credits: 7

Pharmacotherapy III is designed to develop the student's ability to assess patients and provide pharmaceutical care. The course focuses on developing and applying problem-solving strategies for complex illnesses commonly encountered in pharmacy practice. Students are expected to identify medical and medication-related problems, recommend drug therapy and monitor for safe and effective drug use. **Prerequisites:** PHARM 7279, PHARM 7280, PHARM 7307, PHARM 7325, PHARM 7361, PHARM 7362, PHARM 7405, PHARM 7414, PHARM 7420, 7420L.

Co-requisites: PHARM 7485L, PHARM 7406P.

PHARM 7489AB Introduction to Nuclear Pharmacy & Nuclear Medicine Credits: 2

Nuclear pharmacy employs the safe and effective use of radiopharmaceuticals and other drugs with the purpose of improving patient health. The purpose of this course is to educate students regarding the diagnostic and therapeutic roles of radiopharmaceuticals in healthcare and teach the proper procedures and techniques that go into safely compounding and handling these products. Students will visit Cardinal Health Nuclear Pharmacy where they will be able to demonstrate the techniques they have learned. Students will attend four two-hour lectures and have the opportunity to witness the utilization of a radiopharmaceutical during a diagnostic scan at Truman Medical Center.

PHARM 7489CC Special Topics-Pharmacy Credits: 1-5

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors and prerequisites to be listed in the term bulletin. Elective.

PHARM 7489CE Special Topics in Pharmacy Credits: 1-5

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors and prerequisites to be listed in the term bulletin. Elective.

PHARM 7489RB Special Topics Pharmacy Credits: 1-5

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors and prerequisites to be listed in the term bulletin. Elective

PHARM 7489SI Special Topics in Pharmacy Credits: 1-5

A course designed to deal with a topic which is not available in the regular course offerings. Topics, instructors and prerequisites to be listed in the term bulletin. Elective.

PHARM 7497E Directed Individual Study-Clinical Pharmacy Credits: 1-4

Study in areas of special interest under individual faculty direction. Elective. Not to exceed five semester credits.

Academic Regulations and Requirements

Class Attendance

Students should refer to the UMKC Attendance Policy (p. 477) under the Academic Regulations section of this catalog.

Absences from Scheduled Examinations

Students must refer to the individual course policies within the syllabus.

Policy for Examination Process

Students must refer to the individual course policies within the syllabus.

Inclement Weather Policy

Please refer to the School of Pharmacy inclement weather policy related to campus closures because of weather related issues - I (https://pharmacy.umkc.edu/wp-content/uploads/2016/08/Inclement_Weather_and_Campus_Closure_Policy.pdf)nclement Weather Policy (https://pharmacy.umkc.edu/wp-content/uploads/2016/08/Inclement_Weather_and_Campus_Closure_Policy.pdf)

Academic Loads

All coursework in the pharmacy curriculum is sequential and success depends upon the instruction and content from the previous semester and builds upon knowledge needed for subsequent semesters. Pharmacy students must enroll for the total program as outlined for each semester in the most current version of the curriculum. Therefore, all coursework and related requirements must be successfully completed in sequence, as outlined, before matriculating to the next professional year.

Grading System

Refer to the grade-point system listed in the General Undergraduate Academic Regulations and Information section of this catalog and to the individual course syllabi. Note: Letter grade changes must be made no later than four weeks from the beginning of the next semester, to include summers, unless a shorter time frame be affixed by a course coordinator. This policy applies to School of Pharmacy departmental courses only and does not apply to incomplete grades.

Doctor of Pharmacy students are not eligible for GPA Adjustment through the UMKC repeated courses policy.

Academic Standing for Doctor of Pharmacy Students

A student's academic standing is determined by their academic performance while progressing through the University of Missouri-Kansas City School of Pharmacy (UMKC SOP) Doctor of Pharmacy curriculum.

Reasons for the Policy

The UMKC SOP recognizes that students admitted to professional studies may encounter academic difficulty or need a leave to attend to personal issues. The SOP has established policies designed to give students an opportunity to be reinstated following a leave of absence, withdrawal or poor academic performance.

Academic Standing Defined

Good Academic Standing: The student is currently enrolled in the UMKC SOP.

Academic Concern: Less than a C grade on a test or major assignment. Students meeting criteria for Academic Concern will be monitored through the Student Success Program.

Academic Probation: Less than a 2.00 term grade point average (GPA), with no grades of D, F, WF or NC, or less than a 2.00 cumulative GPA in any **one** semester.

Academic Dismissal:

- Receipt of a D, F, WF or a NC grade in any coursework in a single semester
 - Receipt of less than a 2.00 term GPA while on academic probation
- Placement on Academic Probation **two** consecutive semesters
- Placement on Academic Probation **more than two** non-consecutive semesters

NOTES:

- Any student who is placed on academic probation is notified in writing by the Associate Dean for Student Affairs (ADSA).
- A student will be notified in writing by the ADSA following their first and second academic dismissal from the Doctor of Pharmacy program.
- A student may request reentry into the program following their first and second academic dismissal from the Doctor of Pharmacy program.

A student **is not eligible for readmission** if he/she is academically dismissed for a third time. The third dismissal causes the student to be irrevocably dismissed from the UMKC SOP. A student who is academically dismissed for a third time will be notified by the Dean of the School of Pharmacy.

A student who is irrevocably dismissed from the UMKC SOP may consult with the ADSA or the Director of Student Affairs regarding options for their academic career beyond pharmacy and logistics of transferring to another major. A Faculty Advisor (FA) cannot advise students who are irrevocably dismissed from the UMKC SOP and should refer them to the ADSA or the Director of Student Affairs.

Leave of Absence:

Pharmacy students can petition the Academic Progression Committee for a leave of absence under the following stipulations:

- Student is eligible for reentry into the UMKC SOP.
- *P1-P3 year*: Petition must be initiated during the current term no later than the 12th week of class.
- *P4 year*: Petition must be initiated no later than one week before the start of the next rotation.
- Petition includes a personal statement detailing reason for leave.
- Documentation from a health care professional is provided to support reasons for a medical leave.
- Documentation from Department of Defense is provided to support reasons for a military leave.
- NOTE: Petitions for leaves resulting from catastrophic events will be given an exception to the timelines stated above.

Requesting a Leave of Absence

Students requesting a Leave of Absence must submit a completed SOP petition form (<http://pharmacy.umkc.edu/pharm-d/policies/>) then see Program Policies and Procedures then Petition Form, the UMKC Request for Leave of Absence form (<https://www.umkc.edu/registrar/forms-resources/student-resources/>) and required supporting documentation. The forms are submitted to the Office of Student Affairs (OSA) for the School of Pharmacy who forwards them to the Academic Progression Committee Chair. The Chair calls a meeting of the Academic Progression Committee who hears the petition.

Pharmacy students approved for Leave of Absence:

- Will be withdrawn from all courses as per University policy.
- Are approved for up to one year leave only. An extension may be requested if needed and well documented. The extension cannot extend more than two years beyond the original date that the leave started. Students who do not return by the date noted on their approved leave and who are not granted an approved extension will be required to reapply for admission.
- Will not be enrolled for pharmacy coursework in the subsequent semester(s).

A student on a leave of absence will not:

- Be eligible for any financial aid disbursements during the semester(s) while on a leave of absence. A student on a leave of absence will be reported to lenders and loan service agencies as “non-attending” and will need to contact his/her lenders for information on possible repayment requirements, deferments and forbearances.
- Have access to campus computing labs, Student Health and Wellness Services, or any campus or university services available only to currently enrolled students. Students on a leave will be able to maintain their UMKC exchange email account.

NOTE – Any student dismissed from the Doctor of Pharmacy program or approved for a leave of absence must notify the Missouri Board of Pharmacy and their current pharmacy employer of their change in status immediately as they are ineligible to maintain any current pharmacy intern license.

Procedures After a Change in Academic Standing**Academic Probation:**

All cases of probation are reviewed by the Academic Progression Committee to discuss reasons for the unsatisfactory progress. Following review, the ADSA will notify the student of their academic probation status by letter. In order to be removed from Academic Probation status, the student must:

- Receive no less than a 2.00 term GPA in the next academic semester;
- Raise their cumulative GPA above 2.00 in the next academic semester.

Readmission After a Leave of Absence:

Petitions for readmission after a leave of absence will be reviewed by the Academic Progression Committee. Re-entry is contingent on their eligibility to continue, results of a new Criminal Background Check, and space available in the class the student seeks to re-enter. Pharmacy students returning from a leave of absence must:

- *P1-P3 year:* Submit the petition form at least two months prior to the beginning of the **term** applying for re-entry. Upon re-entry will continue under the student's same academic standing status that was in place at the time the leave of absence began.
- *P4 year:* Submit the petition form at least one month prior to the desired re-entry date. Note that students are rescheduled to rotations on a space available basis. Attempts will be made to restart the student on their desired date, but there are no guarantees of availability.
- Be held under the policies and procedures in place at the time of their re-entry.
- Complete a new Criminal Background Check.
- If applicable, supply a letter from a health professional and/or other entity verifying that the student can return to full-time, collegiate work.
- Provide any additional documentation from other entities as required by the SOP to support readiness for readmission.
- Incorporate any curricular or policy changes into modified plan of study.

NOTE: Program and graduation requirements may change during a student's leave of absence. It is at the discretion of the SOP to define the program and graduation requirements once the student has been approved to return from a leave of absence.

Readmission of Eligible Students After Academic Dismissal:

- A student is eligible for readmission to the Doctor of Pharmacy program after their first and second academic dismissal. The student must request reentry within one year from notice of their academic dismissal. Readmission is determined on a case by case basis.
- If readmitted, the student is placed on an academic contract and must meet the conditions of their contract throughout their remaining time as a UMKC SOP student. A student cannot continue in the program until the Dean or designee has approved the students' academic contract.
- An academic contract includes an individualized modified plan of study to complete the curriculum and other programmatic requirements and additional expectations needed to maintain enrollment in the program.
- A student is **not eligible for readmission** if they are dismissed after failing to meet the terms of their academic contract for a third time. A third academic dismissal causes the student to be irrevocably dismissed from the UMKC SOP.

The following steps must be completed for an eligible student to request reentry:

- Meet with their FA and the ADSA to discuss factors contributing to their dismissal and their proposed readmission plans (timing, coursework, additional improvement strategies)
- A written contract is developed by the FA, ADSA, ADAA (Associate Dean of Academic Affairs) and other individuals as deemed necessary by the ADSA. Readmission contracts consider, but are not limited to the following factors:
 - Performance in previous course work completed by the student and other circumstances surrounding their dismissal.
 - Corrective measures taken by the student to address academic readiness, financial problems, personal matters, course work deficiencies, and/or ongoing support needed to address any relevant issues.
 - Availability of space in the professional class the student seeks to enter. The student may be assigned to their original campus location or to an alternative campus location based upon space availability.
- Conditions of readmission include, but are not limited to:
 - The student remains on contract and meets all terms in their contract for the duration of their tenure in the Doctor of Pharmacy program.
 - The student meets with their FA and other individuals as set forth in the contract.
 - The student does not receive any grades of NC, D, F in any course during the remainder of their tenure in the Doctor of Pharmacy program.
 - The student does not receive less than a 2.00 term GPA.
 - The student cannot withdraw from any required course unless they have a Leave of Absence approval from the Academic Progression Committee.
 - Completion of a new Criminal Background Check, when necessary.
- The student, FA, ADSA and ADAA discuss the contract. If the student agrees to the stipulations in the contract, he/she signs it and provides a signed copy to ADSA. If the student disagrees, he/she submits a written appeal using the petition form within 10 working days of receipt of the contract. The appeal is submitted to the ADSA who forwards it to the Academic Progression Committee. The Chair calls a meeting of the Academic Progression Committee who hears the appeal. The student is required to present their appeal in person to the Academic Progression

Committee. The ADSA, ADAA and FA will answer any questions about the original contract at that meeting. The Academic Progression Committee determines the student's final contract.

Request for Modified Plan of Study for Students Not on Academic Contract

In exceptional circumstances, a student can request a modification to their original curricular plan of study if they are not on an academic contract. Circumstances can include but are not limited to:

- Health or personal reasons not resolved by a Leave of Absence.
- Receipt of course withdrawal without assessment or course withdrawal passing.
- NOTE:
 - The SOP follows the UMKC Undergraduate Course Withdrawals policy
 - **Students should not withdraw from any coursework without first communicating in writing with their FA or the ADSA.**
 - Students who withdraw from required coursework are ineligible to continue in the regular curriculum, must be approved for a modified plan of study to continue in the program. They may have a **delayed graduation completion date.**

Students who seek a Modified Plan of Study must meet with their FA, ADSA, ADAA and other individuals as deemed appropriate to develop the plan and submit that plan for approval by the Academic Progression Committee prior to continuing in the program. All modified plans of study are approved on a case-by-case basis, must meet all UMKC and UMKC SOP prerequisites and policies and procedures and be approved by the Academic Progression Committee.

Remediation Policy for UMKC Pharm.D. Program

This remediation policy addresses didactic course-specific remediation.

Remediation Policy:

- A. Remediation is a privilege. Considerations for eligibility include (but are not limited to) the following: The student must have demonstrated regular attendance, completed assigned coursework, communicated with the instructor and/or course coordinator, and utilized other available academic resources throughout the semester in an attempt to meet the course learning outcomes and avoid a failing grade. The course coordinator has the right to deny the student the option of remediation.
- B. If a student earns a non-progressing grade and has been granted permission to remediate, a course grade of "Incomplete" ("I") will be given.
- C. Course remediation will be determined by the course coordinator and completed within 4 weeks following the end of the semester.
- D. No grade higher than a "C" can be earned in the course with remediation. If the student fails remediation, the original course grade will take the place of the "I" grade.
- E. Students will be allowed to remediate no more than three (3) times during years 1 through 3 of the professional degree program with no more than 2 courses remediated in the same semester.

Appeal of Disputed Grades

Policy Statement

The School of Pharmacy affirms the principle that students are responsible for meeting the standards of academic performance established for each course. Further, the course coordinator is responsible for setting the criteria for grades, evaluation of student performance, and assignment of grades.

Students have the right to appeal for change of the grade they received in a course. Grade appeal is only available for reviewing allegedly capricious grading, and not to review the instructor's evaluation of the student's academic performance.

Capricious grading, as that term is used here, consists only of any of the following:

1. the assignment of a grade to a particular student on some basis other than the performance in the course;
2. the assignment of a grade to a particular student by resorting to more exacting or demanding standards than were applied to other students in the course; (Note: Additional and/or different grading criteria may be applied to graduate students enrolled for graduate credit in 300 and 400 level courses.)
3. the assignment of a grade by a substantial departure from the instructor's previously announced standards.

Procedures for Appeal of a Disputed Grade

Informal Disposition

Students are encouraged to meet with the course coordinator to discuss the disputed grade prior to formally initiating a grade appeal. If the student is still not satisfied with the grade, they can then initiate the formal grade appeal process as outlined below. The student can also discuss their case with their faculty advisor* as they seek informal resolution.

Pre Appeal Meetings

The student and their faculty advisor may meet with Associate Dean for Student Affairs before entering Step 1a or 1b or at any other time throughout the process to ensure all parties understand the processes involved in a grade appeal. The Associate Dean for Student Affairs is also available to meet with the course coordinator and the relevant division chair to discuss procedural issues.

Appeal Step 1 – Appeal to Course Coordinator

Step 1a

- Appeals involving didactic courses

The student will first discuss any disputed grade with the course coordinator.

The student must clearly state in writing that they are enacting Step 1 of the grade appeal process and provide a written petition stating how the disputed grade meets one or more definition(s) of capricious grading. This must be done within six weeks after the beginning of the succeeding regular academic semester.

Step 1b – Appeals involving Experiential Education

The student will first discuss any disputed grade with the instructor responsible of the assignment of an experiential rotation grade. In the case of a grade being assigned by an *adjunct* faculty preceptor, the Director of Experiential Rotations will serve as arbitrator on behalf of the adjunct member. **The student must clearly state in writing that they are enacting Step 1 of the grade appeal process and provide a written petition stating how the disputed grade meets one or more definition(s) of capricious grading.** This must be done within six weeks after the beginning of the succeeding regular academic semester.

Appeal Step 2 – Appeal to Division Chair **

If the matter cannot be resolved during Step 1, the student will describe their case in a written petition. The petition must be given to the Division Chair within 10 consecutive calendar days following the meeting with the course coordinator. An airing of the petition with the appropriate Division Chair and the student's faculty advisor* provides the student an opportunity to present the matter in dispute and to assist all parties to comprehend the issue germane to the situation. The Division Chair will report the outcome in writing to the student within 10 consecutive calendar days.

Appeal Step 3 – Appeal to School of Pharmacy Executive Committee

If the grade appeal is not resolved to the satisfaction of the student in Step 2, the student requests in writing that that the Division Chair refer the matter, with all pertinent records, to the Dean** of the School of Pharmacy. The request must be made within 10 consecutive calendar days of the Chair's notification to the student. The Dean will refer the entire case to the School of Pharmacy Executive Committee (members holding academic appointments) as soon as possible, but no later than 21 consecutive calendar days.

The Executive Committee will:

- Review the Chair's decision and all documents reviewed during Step 2.
- Hear from the student.
- Hear from the course coordinator.
- Find and consider other pertinent data as indicated. The student has the right to submit additional evidence during Step 3.

By formal motion and vote, the Executive Committee will arrive at a recommendation to the Dean to either sustain the grade as assigned or to alter the grade in favor of the student. (NOTE - In this deliberation, the Dean, as Chair, may enter into the deliberation but will not vote on the recommendation, except as necessary to break a tie.) The outcome of this hearing will be reported in writing to the student within 10 consecutive calendar days.

Appeal Step 4 – Appeal to Provost

In the event that the student is not satisfied with the outcome of Step 3, the student can appeal to the Provost 10 consecutive calendar days after notification of the Dean's decision.

Additional Procedural Considerations:

- Students can request permission to take next semester courses while appealing their grade from the previous semester. The student makes their request in writing to each course coordinator who teaches in the upcoming semester. The coordinator grants or denies permission to the student, in writing, on a case by case basis. The student must have permission from all course coordinators to attend their class while a grade is under appeal

in order to progress. The student provides all written permissions to the Associate Dean for Student Affairs who will facilitate registration for that semester.

o No student will be allowed to continue into APPE's until all coursework through the P3 year is complete and all grade appeals are completed.

o If a student exhausts all steps in the appeal process and the grade is upheld, permission to attend the classes is immediately rescinded. Depending upon the timing the grade appeal decision – fees for that semester may or may not be able to be recouped.

• *The student has the right to use someone other than their assigned faculty advisor to assist him/her through the appeal process.

• **The Dean, Associate Dean or Department Chair can name a designee if they are unable to fulfill their role in the appeal process.

• Witnesses or statements of support are not allowed as part of any School of Pharmacy grade appeal hearing. Students can bring their faculty advisor or another individual of their choosing to the hearing. That individual cannot directly address the school representative hearing the case at that step. The student and the individual can speak to each other during the hearing step(s).

• Step 4 procedures are determined by the Provosts office. Appeals are submitted to gradeappeals@umkc.edu.

Noncredit Requirements

All doctor of pharmacy students are expected to actively obtain certain certifications, meet specified standards, as well as participate in professional activities offered or required by the School of Pharmacy. These activities, standards, and certifications mirror those expected in professional practice and are intended to better prepare the student for professional life. The following are requirements for all Pharm.D. students that must be adhered to throughout the program. Students will be notified if additional certifications or requirements apply. Additional information regarding these requirements and other School of Pharmacy Policies and Procedures that must be followed are found on the School's web page at <http://pharmacy.umkc.edu/pharm-d/policies/>.

The following requirements apply to Doctor of Pharmacy students (as defined for each item), unless a waiver is obtained from the appropriate school official.

Career Fair

All students must attend and participate at the Pharmacy Career Enhancement and Professional Preparation Day during their final year of the program unless previously excused, in writing, in advance of the event by the Dean or designee.

Certifications in Basic Cardiac Life Support/Cardio Pulmonary Resuscitation (BCLS/CPR) for Health Professionals

All students must complete BCLS/CPR through the American Heart Association or the American Red Cross. Certification must be obtained and submitted to the School by December 31 of the P1 year and renewed during the P3 year. The certification must remain current and be valid through the last Advanced Pharmacy Practice Experiential [APPE] rotation.

Health Insurance Coverage

All Pharm.D. students must obtain and provide proof of health insurance coverage no later than the end of the first week of every fall semester and the coverage must remain current throughout enrollment in the program.

Criminal Background Checks (CBCs)

The University, on behalf of the School of Pharmacy, agrees to inform students that as a condition of full admission to the Doctor of Pharmacy program and for participating in any affiliated institution or site [academic service learning and/or introductory and advanced pharmacy practice experiential rotations], students must obtain and provide verification of a current, criminal background check prior to final acceptance/matriculation into the program and again prior to starting any Introductory Pharmacy Practice Experience (IPPE) and any Advanced Pharmacy Practice Experience (APPE). The affiliated hospital/institution/practice site hereby understands and agrees that the decision to permit a student to participate at that affiliated hospital/institution/practice site on the basis of the result of any criminal background check remains solely with the affiliated hospital/institution and not the University. Failure on the student's part to submit to criminal background checks will delay progression or render a student unable to complete the professional degree program. The School of Pharmacy is not responsible if a student is unable to be placed in an educational experience at any affiliation site because of findings on his/her CBC.

Drug Screens

Pharmacy students will be required to complete a urine drug screen annually prior to starting their summer Introductory Pharmacy Practice Experiences and again prior to starting Advanced Pharmacy Practice Experiences. Students may be subject to additional requirements as a condition of participation in experiential education and patient care activities at affiliated sites. The drug screen will be collected as per the Pharm.D. Student Urine Drug Screen Policy (https://pharmacy.umkc.edu/wp-content/uploads/2016/01/UDS_Policy.pdf). If the school is made aware of the results of any positive findings, they will be shared with the Associate Dean for Student Affairs for further evaluation.

Students may be required to complete random drug screens as part of compliance with the UMKC School of Pharmacy Alcohol and Drug Use Policy.

Procedures for Alcohol and Drug Use Related Issue

A. Procedure for Reporting Any History of Alcohol or Drug Related Conviction - Prior to Admission

All applicants admitted to the SOP are provisionally admitted until their Criminal Background Check (CBC) is reviewed and cleared. Failure to report prior drug or alcohol convictions that are discovered following entry into the Pharm.D. program can result in the case being submitted to the Honor Council for review. Any drug or alcohol related conviction on an applicant's preadmission CBC will be investigated by the UMKC School of Pharmacy Associate Dean for Student Affairs (ADSA). These findings can lead to a review by the Admissions Committee and result in the withdrawal of the offer of admission.

B. Procedure for Reporting Alcohol and Drug Related Offenses – Current Students

Any student arrested or charged with a drug or alcohol related offense **at any time during their enrollment in the UMKC School of Pharmacy** (e.g. minor in possession, driving under the influence, driving while intoxicated, public intoxication, open container, etc...) must notify, **in writing**, the ADSA within 7 days of the arrest or issue of a citation. The ADSA will investigate the incident and can refer the findings to the Honor Council for review and disposition.

Any student convicted upon a plea or a verdict of guilty or following a plea of nolo contendere to a drug or alcohol related charge, or who receives a suspended imposition of sentence will have their case will be reviewed by the ADSA and they may be remanded to the SOP Honor Council (http://info.umkc.edu/pharmacy/wp-content/uploads/2014/04/Honor_Council_Procedures.pdf) for review and disposition.

C. UMKC School of Pharmacy Procedure for Working with Chemically Impaired Students

UMKC is committed to providing an environment that is safe, healthy and conducive to the academic achievement of all. Abuse of drugs and alcohol is a disruption to this environment and poses significant health and emotional problems that can jeopardize campus safety, patient safety and the personal and professional development of students.

The School of Pharmacy recognizes its obligations to be supportive of students who are chemically impaired. Students are strongly encouraged to self-report to the SOP ADSA any problems with substance abuse and to seek help voluntarily for their issues. The ADSA can offer information about resources for the student as they seek assistance. If a student is determined to be impaired while in class or during professional practice experiences, their case will be reviewed by the ADSA and they may be remanded to the SOP Honor Council (http://info.umkc.edu/pharmacy/wp-content/uploads/2014/04/Honor_Council_Procedures.pdf) for review and disposition. In these cases, the school may require monitoring in order for the student to continue as a student in the School of Pharmacy.

D. Available Resources: Alcohol and Substance Abuse Prevention

Kansas City Location - Counseling Center

- Alcohol and other substance use services are offered to assist students, faculty and staff with concerns regarding alcohol and other substances. Specially trained staff are available to provide evaluations, support, educational and early intervention, and recovery related services. The staff can also assist students, faculty and staff in locating resources in the surrounding community for particular needs

Columbia Location

- Student Health Center** - The Student Health Center provides medical services, psychiatric and counseling services, alcohol/drug problems, and health education.
- B.A.S.I.C.S. (Brief Alcohol Screening and Intervention for College Students)** - This program, which has been demonstrated by research to reduce harmful drinking behavior in college students, is administered by the Wellness Resource Center. Students referred to the BASICS attend an interactive workshop with a group of their peers, receive personalized feedback, and meet for an hour with a counselor to discuss their alcohol use and related issues.

Springfield –The Counseling and Testing Center at MSU (<http://counselingcenter.missouristate.edu/>)

The Counseling and Testing Center provides a wide array of alcohol and other drug services to currently enrolled students at Missouri State University. Confidential alcohol and drug related assessments and services are provided at the Counseling and Testing Center. Services range from information and referral services to assessments, counseling, and educational programs. Assessments require one session and may require a second follow-up session with a clinician specializing in substance abuse counseling. The assessment will involve an interview and standardized assessment tools. Students may also be seen for brief substance abuse counseling or referred elsewhere, as appropriate.

HIPAA Training

Students must successfully complete HIPAA training **annually**.

- Note: completing the online HIPAA course does not relieve students from having to complete additional training as required by any individual practice site.

Intern Pharmacist Licensure and Liability Insurance

Students enrolled in the Doctor of Pharmacy curriculum at UMKC are required to obtain a valid Intern Pharmacist License issued by the Missouri Board of Pharmacy during the first semester of enrollment in order to fully participate in the curriculum. In addition students must provide proof of current professional intern pharmacist liability insurance during the first semester of enrollment. The Intern Pharmacist License and Liability Insurance must remain valid through the last Advanced Pharmacy Practice Experience (APPE).

In order to apply for and maintain a valid Missouri Intern Pharmacist License and proper liability insurance, the following rules apply - Student Intern Pharmacist License and Intern Liability Policy (<http://pharmacy.umkc.edu/pharm-d/internship-and-licensure-information/>)

Laptop/Tablet Requirements

Pharm.D students are required to have a wireless capable mobile device for course completion. There is no required brand or model (please note that the Google Chromebook or other laptops/tablets running the Android operating system **do not** meet specification. In addition Windows must not be the "RT" version.). Laptops and tablets must support Windows, OSX, or iOS. If you are unsure regarding compatibility, contact Information Services prior to purchasing a device (<http://www.umkc.edu/IS/support/>). See the following for specific information regarding minimum and preferred configurations and software for Windows and Macintosh computers - https://pharmacy.umkc.edu/wp-content/uploads/2017/07/Pharmacy_Student_Laptop_Requirements.pdf

Missouri Family Care Registry List

All students must register during their Fall P2 semester. Instructions on how to complete this requirement will be provided from the Office of Experiential Education.

Immunization Requirements

Health care providers (HCP) are at risk for contracting and transmitting infectious diseases as a result of contact with their patients. All doctor of pharmacy students must provide proof of vaccination or evidence of immunity for their own protection and the protection of their patients for these diseases and conditions - Measles, Mumps, and Rubella (MMR), Varicella (Chickenpox), Hepatitis B, Tdap (Tetanus-Diphtheria-Pertussis), Tuberculosis (TB) and influenza. Students living in university sponsored residence halls must abide by the immunization requirements of their respective facilities as well as those listed below. For more information regarding the procedures for submitting documentation proofs, students must refer to the School of Pharmacy Immunization Requirements policy as follows:

- School of Pharmacy Immunization Requirements (https://pharmacy.umkc.edu/wp-content/uploads/2020/03/UMKC_SOP_Immunization_Policy_2020-2021.pdf)

Pharm.D. Orientation

All entering students must attend and participate in all sessions of the Doctor of Pharmacy orientation prior to full matriculation into the First Professional Year unless they are excused, in writing, in advance of the event by the Dean or designee.

Professionalism Policies and Standards

Students must adhere to all Professionalism Standards.

Standards of Professional and Ethical Conduct and Honor Council Procedures

All students entering the Doctor of Pharmacy program receive are informed about the Honor Council Procedures and Standards of Professional and Ethical Behavior. These policies and procedures provide peer and faculty review to ensure these standards are upheld by each pharmacy student. In all cases of academic dishonesty, the instructor shall make an academic assessment about the student's grade on that work and in that course.

- http://info.umkc.edu/pharmacy/wp-content/uploads/2014/04/Honor_Council_-Procedures.pdf
- https://pharmacy.umkc.edu/wp-content/uploads/2014/04/Course_Policy-Professional_Ethical_Behavior.pdf

Standards of Professional Attire and Classroom Behavior

Upon acceptance and entry into the School of Pharmacy, students begin a process of developing the knowledge, skills and attitudes that creates the fundamental core of the profession of pharmacy. The development of these competencies to a practitioner's level takes several years, but early initiation of these professional behaviors promotes the development of professionalism. In order to provide students direction to this end, upon entering the Doctor of Pharmacy program all students learn about the school's Standards of Professional Attire and Classroom Etiquette and must abide by these standards.

- Course Policy-Professional Attire-Classroom Etiquette (https://pharmacy.umkc.edu/wp-content/uploads/2018/08/Behavior_and_Attire_Policy.pdf)

Minimal Technical Standards for Pharm.D. Admission, Matriculation and Graduation

As a condition for admission, students must read the Minimal Technical Standards for Pharm.D. Admission, Matriculation and Graduation and certify that they are able to meet these standards.

- http://info.umkc.edu/pharmacy/wp-content/uploads/2014/04/Technical_Standards_APPROVED-4_11.pdf (https://pharmacy.umkc.edu/wp-content/uploads/2014/04/Technical_Standards.pdf)

Safety Training

All pharmacy students are required to attend and complete required safety training and receive certification beginning with the First Professional Year and maintain certifications on an annual basis to include, but not limited to, Blood Borne Pathogens, Fire Hazard, Chemical Management, and Hazard Communication.

White Coat Ceremony

All students are expected to attend and participate in the School of Pharmacy Professional Dedication Ceremony during the fall semester of the P2 year, unless previously excused, in writing, in advance of the event by the Dean or designee.

Pre-NAPLEX

All students are required to complete the Pre-NAPLEX during a predetermined date as a requirement for continued enrollment. Information about dates and the exam will be provided by the Office of Experiential Education.

Course Evaluations and Graduating Student Exit Surveys

All students are required to complete and submit course and instructor evaluations at the end of each semester of enrollment in order to progress. During the P4 year, all seniors are required to complete and submit the required Graduating Student Exit Surveys in order to finalize graduation completion requirements.

Co-Curricular Requirements

All students are required to complete co-curricular requirements for graduation from the Doctor of Pharmacy program. Co-curricular activities complement and advance the learning that occurs within the formal didactic and experiential curriculum. These experiences are conducted outside the classroom and encompass learning outcomes that take time to gain multiple exposures in order to hone and attain mastery. Students are made aware of these requirements and deadlines for completion each semester of enrollment.

Note: The School of Pharmacy reserves the right to add other noncredit requirements as deemed necessary to protect the health and safety of the students or to further their education.

Directed Individual Study

The opportunity to undertake independent study is offered through Pharmacy 7497 courses. These courses may satisfy part of the pharmacy elective requirements. Generally, the student receives the individual attention of a professor in the chosen field of study, and the project may involve any topic considered appropriate to the academic needs of the student. Once the student and instructor have agreed on a project, a permission-to-enroll form that includes an outline of the proposed course of study signed by the instructor must be reviewed and approved for credit by the school's curriculum committee chair. This must be done at least one month prior to the start of the term in which the coursework is to commence. Pharmacy 7497 requests that are part of a national, regional, or local competitive proposal or any part of a student organizational initiative may not be used for Directed Individual Study proposals.

No more than five credit hours of Pharmacy 7497 courses may be counted toward the degree requirements. Pharmacy 7497 courses are offered on a credit/no credit grading basis.

Off-campus Learning Experiences

All Pharm.D. students are required to participate in experiential learning rotations. All of the experiential learning courses—Introductory Pharmacy Practice Experiences and Advanced Pharmacy Practice Experiences—are conducted in actual practice settings (e.g., community, hospitals, nursing homes, etc.) under the supervision of licensed pharmacy practitioners—instructors who serve as exemplary role models in their particular types of pharmacy practice. Students are expected to provide their own transportation to sites assigned for the experiential learning.

Students may be assigned to an experiential learning experience at a different location than where they completed their didactic coursework. During the Introductory and Advanced Pharmacy Practice Experiential rotations, living, travel, and health expenses are the responsibility of the student. Other expenses may apply.

Outside Employment

Because of the intensity of the professional curriculum, students are strongly urged to limit outside employment to no more than 10 hours per week while enrolled in the school. Students experiencing academic difficulties as a result of commitments to outside employment or over commitments to professional or other extracurricular activities may be asked by the school's academic progression committee to stop outside work or limit extracurricular involvement until their academic difficulties are resolved.

Campus/Site Transfer

In the event that a Pharm.D. student wishes to transfer from one program site to another, the following policies and procedures are in effect:

1. A student will be allowed only one transfer between program locations during their enrollment in the School of Pharmacy.
2. Students will be allowed to transfer only at the end of an academic year; there will be no mid-year transfers.
3. Students requesting to transfer between program sites must submit a petition to the Associate Dean for Student Affairs by July 1. The Associate Dean will discuss the petition with relevant parties in order to render a final decision. Petitions will be granted on a first-come, first-served basis.
4. Petitions will be granted only if space in the class is available at the program site to which the student wishes to transfer. Transfers resulting in a class size that differs from the initial intended class size require special permission from the Dean.

Additional Policies and Stipulations

Students should refer to the UMKC School of Pharmacy website and individual course syllabi for additional policies and required forms.

Note: Program requirements and course descriptions are subject to change without notice after publication of this catalog. Pharmacy students are encouraged to remain in contact with their advisor and professional staff in the Pharmacy Office of Student Affairs to stay apprised of current program requirements in effect.

Doctor of Pharmacy

Doctor of Pharmacy Competencies

A pharmacist is a medication expert whose obligation is to deliver pharmaceutical care. Pharmaceutical care is "the responsible provision of drug therapy for the purpose of achieving a definite outcome that improves a patient's quality of life" (Hepler and Strand). A pharmacist's functions include, but are not limited to:

- Identifying, preventing and/or resolving drug-related problems.
- Preventing disease and promoting good health practices through rational drug therapy.
- Providing drug information to the public.
- Educating other health care professionals about appropriate drug therapies.
- Collaborating with other health care professionals to improve health outcomes, especially as they relate to the appropriate use of medications.
- Ensuring that medications are delivered to the patient in a safe manner.

Many practice areas are covered by these responsibilities. The curriculum is designed to develop the competencies of graduates, allowing them to assume these responsibilities as well as the all of the current curricular outcomes expected of Doctor of Pharmacy graduates detailed on the School of Pharmacy website under the *Curriculum Policies and Procedures* section at: <http://pharmacy.umkc.edu/pharm-d/curriculum-and-registration/>.

Admission Requirements

The doctor of pharmacy (Pharm.D.) degree provides minimum and advanced level competencies necessary for the graduate to assume a pharmacist's professional responsibilities and qualify for national and state pharmacist licensure examinations. The program of study emphasizes clinical sciences and training experiences. The training of doctor of pharmacy students concentrates on rational drug therapy decision-making within the inter-professional health care team.

Doctor of Pharmacy Minimum Pre-Pharmacy Course Requirements

A minimum of 54 credit hours of pre-professional, college level coursework, including the specified requirements listed below, must be successfully completed, with a grade of C or higher, prior to the fall of the entering class year of the professional pharmacy program of study. In addition, an overall cumulative college grade-point average of no less than 2.75, on a 4.0 scale and a science/math grade-point average of no less than 2.5 on a 4.0 scale must be achieved on all college-level work completed through the end of the fall term preceding the year of entry to meet minimum eligibility requirements. Repeated course grades are averaged together in applicants overall cumulative and science/math grade point average calculations. Applicants should note that admission is competitive and that meeting the minimum requirements is not a guarantee of admission. **NOTE:** Students in the Early Assurance Program must have earned, at time of application, a cumulative college GPA of 3.25 or higher; a collegiate science/math GPA of 3.25 or higher; and a minimum PCAT composite of 40.

Equivalent, pre-pharmacy courses must be completed at UMKC or any regionally accredited college or university. Applicants should contact the UMKC Pharmacy Office of Student Affairs to insure proper course equivalents have been met. Second year college pre-pharmacy courses, listed below, must be successfully completed within five years prior to admission entry date. Applicants with elective space during their pre-pharmacy preparation should consider courses that shape their understanding of the human condition. Courses in psychology, sociology, ethics, and anthropology, will assist a student in assuming their role in caring for people. Completion of additional communication studies courses is also encouraged.

In addition to the courses below, a three credit hour (3.0) Statistics course will be required for students entering Fall 2022 forward.

Pre-Pharmacy Courses / Minimum Semester Hours

Year I	Credits
General Chemistry I & II with Labs	8
Calculus with Analytical Geometry ¹	4
General Biology I & II ²	6
Physics with Lab ³	4
English Composition I & II	6
Public Speaking or Communication Studies Course	3
American History I or II or Introduction to Political Science course covering U.S. Constitution	3
	34
Year II	Credits
Organic Chemistry I & II with Labs ⁴	8
Cell Biology ⁴	3
Human Anatomy with Lab ^{4,5}	4
Microbiology with Lab ⁴	4
Medical Terminology ⁴	1
Statistics*	3
Electives completed at student discretion	8
	31

Total Credits: 65

¹ Calculus courses that are less than 4.0 credit hours or that do not include analytical geometry will not meet the minimum requirement.

² Preparatory or introductory biology courses will not meet the minimum requirement.

³ Physics courses must be at least algebra and trigonometry based.

⁴ NOTE: Second year college pre-pharmacy courses must be successfully completed within five years prior to Fall admission entry date.

⁵ Successful completion of two semesters of Human Anatomy and Physiology with labs will meet the Human Anatomy requirement. Comparative or Vertebrate Anatomy courses will not meet the Human Anatomy requirement.

* *In addition to the courses above, a three credit hour (3.0) Statistics course will be required for students entering Fall 2022 forward so the total pre-pharmacy credits will be 57.

General CLEP credits will not be accepted to fulfill the mathematics, biology, physics, or chemistry requirements. Advanced Placement Program scores through the College Board are accepted for some pre-pharmacy courses. Check acceptable scores and courses at <http://www.umkc.edu/registrar/transfer-credit/default.asp>. Contact an academic advisor in the School of Pharmacy regarding minimum score requirements and course transferability. Official scores from the College Board must be sent to the UMKC Records Office for evaluation.

Early Assurance (EA) Program

UMKC School of Pharmacy offers an Early Assurance Program for high school students with a strong interest in and aptitude for science and math and excellent communication skills. Students who meet the EA criteria for admission from high school have an assured seat in the Pharm.D. program if the minimum specified requirements from EA to the Pharm.D. program are achieved during their collegiate freshmen and sophomore years at UMKC. The minimum eligibility criteria to apply for the EA program include 1) a non-weighted high school GPA at the end of the junior year of 3.5 or higher; or 2) a non-weighted high school GPA at the end of the junior year of 3.0 or higher and a minimum ACT composite of 25 or higher or SAT equivalent; and meet the UMKC core requirements through high school curricular units. Students wanting to apply for the EA Program must complete and submit the following: the on-line UMKC Application For Admission and fee; the on-line Early Assurance Application; official high school transcripts through semester six; official college transcripts as applicable; official ACT/SAT scores, as applicable; and one reference letter. The priority deadline for the EA program is March 1st.

Additional information regarding degree program and admission requirements is located on the UMKC School of Pharmacy Pharm.D. Admissions webpage located at <https://pharmacy.umkc.edu/pharm-d/>. (<https://pharmacy.umkc.edu/pharm-d/>) Applicants with questions regarding admission should contact

UMKC School of Pharmacy
Office of Student Affairs
2464 Charlotte Street, Suite 1219 / Kansas City, MO / 64108
(816) 235-1613/ Fax (816) 235-5562
pharmacy@umkc.edu

Application Procedures

Applications for the doctor of pharmacy program are accepted between July 15 through April 1 for consideration for admission to the class entering the following fall. Admission to the Doctor of Pharmacy program is competitive and meeting minimum requirements for admission does not guarantee admission. New students are admitted to the doctor of pharmacy program only in the fall of each year.

As part of the process for application to the Doctor of Pharmacy program, all of the application steps and instructions located within the applications must be adhered to carefully and all required documents must be submitted no later than the April 1st deadline, unless otherwise stated. Applicants must:

1. Complete and submit the PharmCAS application with all supporting and required documentation and fee. The PharmCAS application is located at <http://www.pharmcas.org/>. Official transcripts(s) from each college and/or university attended showing all coursework attempted and completed through the Fall term prior to admission entry date must be submitted to PharmCAS;
2. Submit recent, official scores from the Pharmacy College Admission Test (PCAT) to PharmCAS;
3. Submit an electronic PharmCAS reference from specified categories only as noted on the UMKC Doctor of Pharmacy application; references from relatives, friends, or co-workers will not be accepted.
4. Complete and submit a UMKC Doctor of Pharmacy Application for Admission, to include supplemental materials and application fee. The UMKC Pharm.D. Application for Admission is located at <https://pharmacy.umkc.edu/pharm-d/>;
5. Meet and adhere to the *UMKC School of Pharmacy Minimal Technical Standards for Admission, Matriculation and Graduation* as part of the Pharm.D. Application. The Standards are listed on the application, as well as at <http://pharmacy.umkc.edu/pharm-d/policies/> on the School of Pharmacy website under the *Policies and Procedures* section. Students admitted to the Pharm.D. program must continue to meet and adhere to these standards throughout their tenure in the Pharm.D. program;
6. International applicants must complete the UMKC International Undergraduate Application for Admission (<http://www.umkc.edu/isao/>) in addition to the PharmCAS Application and the UMKC Doctor of Pharmacy Application. Copies of all materials submitted to the International Student Affairs Office must be sent to the Pharmacy Office of Student Affairs. The minimum TOEFL [Test of English as a Foreign Language] score required for Pharm.D. applicants is 560 [paper-based]; 220 [computer-based]; 83 [internet-based]. International applicants whose native language is not English or who received their education in a country where the first language is not English must
 - a. Meet the UMKC English Proficiency requirements
 - b. Complete the English Evaluation Examination prior to the first semester of enrollment
 - c. Follow recommendations from the UMKC Applied Language Institute.
7. Complete a formal, structured interview, if selected, at the School of Pharmacy as a factor for admission. Applicants are notified by e-mail before their scheduled interview. Applicants should note that meeting minimum eligibility requirements does not automatically qualify an applicant for an interview. Based on the academic and application credentials of the applicant and the applicant pool, the school will select candidates for an interview. Students who do not qualify for the interview will receive written notice.

Notification of Acceptance

Admission to the Pharm.D. program is competitive. Applicants will receive written notification of the school's decision concerning their applications.

Official supplementary college transcripts must be submitted to the Pharmacy Office of Student Affairs upon completion of winter/spring and summer coursework. Final acceptance is contingent on submission and clearance of a criminal background check, good academic and behavioral standing, successful completion (grade of C- or higher) of the specified minimum hours of required pre-pharmacy courses and any other coursework completed during the winter/spring and/or summer terms prior to admission. Those applicants approved for admission will be required to confirm their acceptance and submit an advance deposit to guarantee their place in the entering class. This deposit is applied to the first term's educational fees and is not refundable. Admitted students are required to attend the School of Pharmacy orientation sessions.

Curricular Requirements

The doctor of pharmacy degree program provides broad and general preparation in professional areas of practice with the intent that, on completion, graduates will be able to practice at a level sufficient to perform the established functions of a pharmacist. In addition, the Pharm.D. program prepares the student for advanced levels of professional practice. The major emphasis is on the clinical sciences and drug-related patient care.

This program is designed to provide advanced education and training in clinical pharmacy and drug information with particular emphasis on interprofessional team participation in the delivery of health care. To enable students to concentrate solely on this advanced professional coursework, those entering the doctor of pharmacy program are strongly encouraged to limit their work and/or intern hours during the academic year.

Because pharmacy is a profession undergoing rapid change, the curriculum is subject to continual review and modification. As society's needs for specific types of pharmaceutical service change, the curriculum will change as well. To assure the best pharmacy education for its students, the School of Pharmacy reserves the right of making judicious changes and improvements in course sequence, course content, or other program requirements at any time that must be completed and adhered to in order to meet graduation degree requirements.

Pharm.D. Graduation Requirements

To graduate, Pharm.D. candidates must successfully complete the 4 year curricular course requirements as listed in addition to the prerequisite course requirements.

To graduate, students must successfully complete all credit and non-credit requirements as listed and in effect at the time of completion. Within these hours, the following credit hour minimums must be met:

Pharm.D. Admission Prerequisites

Code	Title	Credits
Semester 1 Prerequisites		
CHEM 211 & 211L	General Chemistry I and Experimental General Chemistry I	5
MATH 210	Calculus I	4
BIOLOGY 108	General Biology I	3

LS-MCRB 121 & 121L	Human Biology III (Microbiology) and Human Biology III (Microbiology) Lab ¹	4
STAT 235	Elementary Statistics	3
Select any one of the following courses:		3
HISTORY 101	U.S. History to 1877	
HISTORY 102	U.S. History Since 1877	

POL-SCI 210	American Government
Total Credits	15

¹ Marked Science courses must be completed within five years of Pharm.D. program start date.

Student Learning Outcomes

Curricular Outcomes Expected of Doctor of Pharmacy Graduates

Doctor of Pharmacy graduates must possess the basic knowledge, skills, attitudes, and values to independently practice pharmacy at the time of graduation. These Curricular Outcomes expectations are outlined in full on the UMKC School of Pharmacy website under the *Curriculum Policies and Procedures* section at: <https://pharmacy.umkc.edu/current-students/curriculum-and-registration/>.

First Year

Total Credits: 139

- ¹ A minimum of eight credit hours of professional elective course work must be successfully completed prior to enrollment in Advanced Pharmacy Practice Experiences (APPE). Visit <http://pharmacy.umkc.edu/pharm-d/curriculum-and-registration/#main-content> under the *Curriculum and Registration* section and review the Guidelines for Electives and the list of potential professional elective offerings. Students should choose electives and semester placement after consultation with a pharmacy academic advisor in the Office of Student Affairs and/or their faculty advisor.
- ² PHARM 7406P IPPE: General Medicine I is a continuous introductory pharmacy practice experience completed over both fall and spring semesters.
- ³ Students must complete 36 credit hours of Advanced Pharmacy Practice Experiences [APPE] over Semesters 6a-8. APPE prerequisites include satisfactory completion of all credit and non-credit degree and course requirements prior to Semester 6a of the professional curriculum.

Because pharmacy is a profession undergoing rapid change, the curriculum is subject to continual review and modification. As society's needs for specific types of pharmaceutical service change, the curriculum will change as well. To assure the best pharmacy education for its students, the School of Pharmacy reserve the right of making judicious changes and improvement in course sequence, course content, or other program requirements at any time that must be completed and adhered to in order to meet graduation requirements.

Prospective Applicants are encouraged to:

- Visit <http://pharmacy.umkc.edu> (<http://pharmacy.umkc.edu/>) to see equivalencies for schools in Missouri and Kansas to see how prerequisites will transfer to UMKC.
- Visit <http://www.umkc.edu/registrar/transfer-credit/default.asp> to review UMKC AP & IB course work minimums.

Doctor of Pharmacy Professional Program

A pharmacist is a medication expert whose obligation is to deliver pharmaceutical care. Pharmaceutical care is "the responsible provision of drug therapy for the purpose of achieving a definite outcome that improves a patient's quality of life" (Hepler and Strand). A pharmacist's functions include but are not limited to:

- Identifying, preventing and/or resolving drug-related problems.
- Preventing disease and promoting good health practices through rational drug therapy.
- Providing drug information to the public.
- Educating other health care professionals about appropriate drug therapies.
- Collaborating with other health care professionals to improve health outcomes, especially as they relate to the appropriate use of medications.
- Ensuring that medications are delivered to the patient in a safe manner.

Many practice areas are covered by these responsibilities. The curriculum is designed to develop the competencies of graduates, allowing them to assume these responsibilities as well as the all of the current curricular outcomes expected of Doctor of Pharmacy graduates detailed on the School of Pharmacy website <http://pharmacy.umkc.edu/pharm-d/curriculum-and-registration/#main-content> under the *Curriculum and Registration* section.

Interdisciplinary Ph.D. Degree Requirements in Pharmaceutical Sciences and Pharmacology

Interdisciplinary Ph.D. Program Requirements

See discipline-specific requirements for the Interdisciplinary Ph.D. program in Pharmaceutical Sciences and Pharmacology and Toxicology in the School of Graduate Studies section of this catalog.

Scholarships, Special Awards and Financial Assistance

The Dean's List

At the end of each semester, the names of full-time doctor of pharmacy students whose term GPA is 3.5 or higher are placed on the dean's list. These students receive a letter of congratulations and a notation is placed on their permanent records. Students must complete a minimum full-time semester of 12 graded hours to qualify for the dean's list. The credit/no credit option may not be used as part of the 12 hours.

Degrees With Honors

Students who meet the academic standards prescribed by the faculty will be graduated "with honors." The criteria for Latin honors eligibility is as follows:

Doctor of Pharmacy (Pharm.D.) Students

Honors

Summa Cum Laude

- Pharmacy GPA¹ greater than or equal to 3.750.
- No periods of probation.
- No incidents of unprofessional behavior.

No more than 5% of the graduating class will be awarded Summa Cum Laude honors. If more than 5% of the class qualifies under the criteria above, the GPA criteria will be raised and students below the revised GPA will be awarded their degrees with Magna Cum Laude honors.

Magna Cum Laude

- Pharmacy GPA¹ greater than or equal to 3.600.
- No periods of probation.
- No incidents of unprofessional behavior.

No more than 5% of the graduating class will be awarded Magna Cum Laude honors. If more than 5% of the class qualifies under the criteria above, the GPA criteria will be raised and students below the revised GPA will be awarded their degrees with Cum Laude honors.

Cum Laude

- Pharmacy GPA¹ greater than or equal to 3.500.
- No periods of probation.
- No incidents of unprofessional behavior.

No more than 10% of the graduating class will be awarded Cum Laude honors. If more than 10% of the class qualifies under the criteria above, the GPA criteria will be raised and students below the revised GPA will be awarded their degrees without Latin honors.

¹ GPA for Latin honors is the Doctor of Pharmacy GPA on all courses completed at UMKC through the end of the fall semester of the last year of the program.

Graduation Awards

At the annual spring pharmacy commencement ceremony, seniors receiving graduation awards are recognized. At that time, recognition is given to graduating students for superior academic achievement, leadership, and service. Selection of the recipients, except where noted otherwise, is made by vote of the pharmacy faculty in conjunction with the scholarship and awards committee.

Achievers of Excellence Scholarship and Awards Ceremony

Each fall an awards ceremony is held to recognize those students in the School of Pharmacy who receive scholarships or awards from the school, the university or the school's constituent groups. Most of these awards are competitive and are confirmed by the School of Pharmacy scholarship and awards committee.

Student Leadership Recognition

Annually, student leaders are recognized for their efforts on behalf of the school and the university.

Doctor of Pharmacy Graduation Awards

Douglas Adcock Memorial Award

An annual cash award established in memory of Douglas Adcock, a 1977 graduate of the School of Pharmacy, is presented to a student who plans a career in the public health service or who exhibits the ability to overcome adversity with professionalism.

Pharmacy Alumni Association Award

The Alumni Association of the School of Pharmacy gives an engraved plaque to the graduate who has exhibited outstanding leadership in school affairs. Selection is made by the board of directors of the Pharmacy Alumni Association in conjunction with the scholarship and financial aid committee.

The American College of Apothecaries Award

The graduating student who intends to practice in an independent community pharmacy after graduation and who has shown outstanding scholastic achievement and participation in school activities receives an engraved silver bowl from the American College of Apothecaries.

American Pharmacists Association Service Award

A certificate is presented by the American Pharmacists Association-Academy of Student Pharmacists (APhA-ASP) to the graduating student who has done the most for the student branch of the association. Selection is made by the APhA-ASP Executive Board.

First DataBank Medical Writing Award

An *Evaluations of Drug Interactions* loose leaf edition is presented to a graduating doctor of pharmacy student who has demonstrated excellence in medical writing.

Merck Awards

Merck & Company Inc. of Rahway, N.J., presents a Merck Manual and Merck Index to graduating students for noteworthy academic achievement in the area of pharmaceutical chemistry.

Mylan Pharmaceutical Excellence in Pharmacy Award

Mylan Pharmaceuticals Inc. of Birmingham, Ala., presents a plaque and a limited edition lithograph to a graduate in the top 20 percent of the class who exhibits exceptional skills in the area of drug information dissemination.

The Natural Medicines Comprehensive Database Award

Recognition is presented to the senior student who has shown an interest in the use of natural medicines. The recipient also must have proven academic and extracurricular activities demonstrating outstanding promise in the assessment, evaluation and delivery of patient care related to the use of natural medicines. The recipient receives a copy of the natural medicines comprehensive database, a subscription to the Natural Medicines Continuing Education series and a certificate.

Pharmacists Mutual Award

One year of pharmacists liability insurance is presented by the Pharmacists Mutual Insurance Co. of Algona, Iowa, to a graduate, based on academic achievement and professional pharmacy outlook.

Pharmacy Student Organization Awards

Honors are presented to graduating students based on a combination of scholastic achievement, strength of character, dedication and leadership evidenced during residency in the School of Pharmacy as a member of a university recognized pharmacy student organization. Selection is made by the respective pharmacy student organization officers.

TEVA Outstanding Student Award

A personalized plaque and cash award are presented by TEVA Pharmaceuticals of Sellersville, Pa., to a graduate. The criteria are scholastic achievement, professional pharmacy outlook and participation in school activities.

United States Public Health Service Excellence in Public Health Pharmacy Practice Award

A framed certificate and book award is presented to a graduate whose public and community service efforts are recognized.

Fall Scholarships and Awards

A listing of the over 85 UMKC School of Pharmacy scholarships and awards sponsored through pharmacy donors, alumni and friends of the school and their award descriptions can be found on the School of Pharmacy website under the *Scholarships* section.

Other Financial Assistance and Awards

Gracia Bremer Loan Fund

An endowment through the unitrust of Gracia Bremer and Mercantile Bank was established in 1996 for pharmacy students enrolled in years one through five of the first professional program who need additional financial support while pursuing a pharmacy degree.

George H. Hargrave Pharmacy Student Loan Fund

An endowment through the unitrust of George H. and Edith L. Hargrave was established in 1994 for pharmacy students enrolled in years one through five of the first professional program who need additional financial support while pursuing a pharmacy degree.

General Information

What is a University College?

University College is an administrative structure that coordinates the overall academic experience of incoming exploratory/undecided students and continuing students in transition between majors. University College is a portal to the ultimate academic unit in which the student will be granted a degree.

Exploratory or Transitioning Student

Exploratory students are students that are simply not ready to select a major, whether at the time that they enter UMKC or after realizing their initial decisions regarding a major are not what they want. Nationally, a large percentage of students entering colleges and universities are unsure of their academic plans. Estimates indicate that as high as 70% of students change their major at least one time during their academic careers.

Mission

Our mission is to offer every exploratory or transitioning student the opportunity for success through the engagement with faculty and staff, the development of educational plans, the clarification of academic and career goals, and the understanding of the skills developed through UMKC Essentials.

The University College will contribute to the University through the development of a focused community of staff, students, and faculty with a shared responsibility for each student's achievement of advising goals and progress toward degree completion.

Explore, Network, and Decide

Exploratory students are expected to take an active role in their education through systematic exploration, networking, and active decision making. UC student success teams will provide a supportive environment for this approach. UCollege student success teams will be made up of: the Associate Vice Provost for University College and Undergraduate Advising, University College Retention Coordinators/Academic Advisors, seminar series faculty, librarians, peer mentors, and Student Success Center staff.

Cross-Campus Collaboration

The mission of University College is impossible without a multidisciplinary participation and collaboration among all undergraduate academic units. Students in University College explore academic options across the University. Faculty selected to mentor students through the UCollege seminar series are purposely drawn from a breadth of disciplines. Close collaboration between UCollege and all academic units is critical to the successful exploration and ultimate transition of students to their most appropriate academic homes in the College of Arts and Sciences or one of UMKC's schools.

Academic Advising

University College Retention Coordinators will partner with each student in the development and completion of educational goals. Retention Coordinators will provide cross-college academic advising and connections with potential academic units, and facilitate ongoing support and evaluation of each student's progress.

Advising Expectations

- **Fostering Academic Success**
University College Retention Coordinators will partner with each student in the development and completion of educational goals. Retention Coordinators will provide academic advising and connections with potential academic units, and facilitate ongoing support and evaluation of each student's progress. Students are required to regularly engage with their UCollege Retention Coordinator for Strategic Planning, Enrollment Planning, and End of Term check in sessions during each term (at a minimum).
- **Registration Approvals**

All University College students are required to secure an UCollege Retention Coordinator's approval to register for classes. To gain this approval, students must fully participate in enrollment advising expectations set by their UCollege Retention Coordinator prior to enrollment. This advising may include contact with other academic units and/or the completion of additional assessment so that course selection may be optimized. Students' registration must include enrollment in a least one course led by a University College instructor each semester. The appropriate University College seminar and general education curriculum may be administratively added to students' enrollment to ensure that students are making purposeful progress toward major selection.

- Declaration of Major

All UCollege students are required to complete process of a Declaration of Major with the appropriate academic unit and the University Registrar. All UCollege students will be advised of the advising process of the academic unit to which they are transitioning.

Enrollment

- Enrollment for Term

Students must enroll in all required courses and make appropriate selections from optional courses as discussed and documented in their enrollment advising meeting.

All UCollege students should complete enrollment, prior to the first day of classes. All changes to courses indicated as required by the UCollege Retention Coordinator during enrollment advising should be approved by the UCollege Retention Coordinator.

All UCollege students on academic probation are required to complete enrollment prior to the first day of classes. After this day enrollment holds will not be lifted, and therefore no enrollment will be permitted for the term.

- Adding/Dropping a Class

Additions of courses after the first week of classes are deemed unusual and typically negatively impact students' ability to succeed. Students wishing to add/drop after the published deadlines must petition UCollege for an exception to normal academic policy. Forms submitted after the published deadlines must be accompanied by an appropriate, approved petition.

All UCollege students on academic probation are required to complete all courses required by their UCollege Retention Coordinator and documented in their enrollment advising.

Academic Status Related To Grade Point Average

Undergraduate degree-seeking students' academic status is assessed at the end of every term, whether the student is full-time or part-time for that term. A summer session is considered the same as a semester for the purpose of the following regulations:

- In general, students will be placed on academic probation whenever their official UM grade-point average falls below 2.0 (C average). First time college freshman admitted to UMKC on the basis of high school records, who have grade-point averages between 1.50 and 1.99 at the end of the first semester of either full- or part-time study will be placed on academic warning. Students on academic warning must achieve an overall 2.0 average by the end of their second semester or be placed on regular probation.
- Students on academic probation will be restored to good standing whenever the UM grade-point average reaches 2.0 or the GPA level established by their academic units.
- Students on academic probation must remove themselves from probation within three successive semesters (including the semester in which they originally were placed on probation). Otherwise they are ineligible to re-enroll without the approval of the academic units.
- Students are responsible for knowing their academic status by referring to Pathway and their permanent transcript.
- UMKC students transitioning from an academic unit into University College will be reviewed under the above stipulations. Students on probation or dismissed (ineligible to re-enroll) from another UMKC academic unit may be admitted into University College under contracts. In order to be admitted into University College, the student must submit a Petition for Exception including an Academic Recovery plan. This petition must be approved prior to the first day of the term.

Dean's List – Term Performance

The Dean's List is a recognition of excellent academic performance. Students must complete a minimum full-time program of 12 graded hours to qualify for the dean's list with a minimum of a 3.5 grade.

University Requirements

General Education

UMKC Essentials is the university-wide curriculum that all undergraduate students will complete. The 30-credit hour program includes a First Year Experience course; three critical thinking courses in the areas of Arts & Humanities, Natural & Physical Sciences, and Social & Behavioral Sciences; a Culture and Diversity course; a Civic & Urban Engagement course; two courses in Composition and one course in Communication; and a Math Pathway course.

Constitution Course

Every undergraduate student must take a course covering the United States Constitution and the Missouri State Constitution before graduation. Course options are included in the program requirements section below.

Exit Examinations

Information on exit examinations is available in the Undergraduate Academic Regulations and Information (p. 488) section of the catalog.

Missouri Higher Education Civics Achievement Examination

In accordance with Missouri Senate Bill 807 (section 170.013.1), 'any student entering a public institution of higher education for the first time after July 2019 who is pursuing an associate's or bachelor's degree from such institution shall successfully pass an examination on the provisions and principles of American civics with a score of seventy percent or greater as a condition of graduation from such institution'. To satisfy this requirement at UMKC, students access the exam through the Canvas site. This requirement will be listed in the degree audit system as, 'Take State Mandated Missouri Higher Education Civics Achievement Examination', and listed on the transcript as 'Missouri Civics Examination'.

Student Learning Outcomes

Students participating in the program will:

1. Identify and engage with relevant faculty, staff, and community contacts to further career and major exploration;
2. Demonstrate an understanding of the value of UMKC Essentials and the relevance of this knowledge and skills to their academic and career goals;
3. Demonstrate how to effectively access and interact with academic information sources (Undergraduate Catalog, Pathway, PlanMyDegree); Identify and utilize appropriate campus resources and opportunities that can contribute to his/her educational experience, goals, and campus engagement (i.e. Writing Studio, UMKC Tutoring, Peer Academic Leadership Program, and Career Services);
4. Identify broad areas of his/her academic interests, skills, and values as a step toward major & career selection;
5. Develop short- and long- term academic plans and initiate proactive steps toward completion; Identify and comply with relevant academic policies, processes, and procedures related to advising, course planning, and major exploration;
6. Demonstrate an understanding of the value of workplace and community diversity;
7. Demonstrate an understanding of the value of thorough and ongoing personal assessment, balanced with timely decision-making as components to career planning;
8. Demonstrate factual knowledge (terminology, classifications, methods, trends) gained about career decision-making and development;
9. Develop knowledge of specific skills, competencies, and points of view needed by professionals in the fields in which they hold interest; Demonstrate how to effectively utilize information sources related to possible career options (i.e. Handshake, O*Net, Occupational Outlook Handbook U.S. Bureau of Labor Statistics, Faculty and field informational interviews);
10. Use written and oral communication to discover, develop, and articulate plans, ideas and viewpoints regarding career and major choice;
11. Address and interpret evidence gained from multiple sources including self-assessments (interests, skills, values), course experiences/grades work volunteer experiences, extracurricular activities, and other experiences;
12. Define challenges and develop solutions in choosing a major/career path;
13. Develop a personal portfolio which includes a realistic plan to reach career and major goals.

University College Requirements and Regulations

Progress Toward Decision: Admission/Declaration

Hours Completed

- During the term in which the completion of **45 hours** credit hours of acceptable college work occurs and admission requirements have been met, students will complete the administrative process of transitioning to the ultimate academic unit in which their degree will be granted.
- Students transferring into UMKC with greater than **45 hours** of acceptable college work will be required to meet all admission requirements during their initial Fall or Spring term at UMKC. Declaration of major and/or admission processing must be completed by 20th day of the following term.
- Students unable to make a decision regarding their major by the guidelines noted above must provide a plan for the upcoming academic semester and/or requirements and petition University College for permission to continue.
- Purposeful/Required Course Enrollment to Support Decision-making
 - All University College students will enroll in the appropriate level University College seminar course(s) during both Fall and Spring semesters. These courses are: UNIV 100, UNIV 102, UNIV 202.
 - Early and continuous enrollment in the appropriate UMKC Essentials courses, as well as, mathematics and/or foreign languages courses are required depending upon the student's selected exploratory meta major.
 - A grade of C- or higher is required in UNIV 100, UNIV 102, UNIV 202, First Semester Experience, ENGLISH 110 ENGLISH 110, ENGLISH 225, and/or MATH (100 or 200 level) courses.
 - Critical courses will be designated for each plan of study based on academic unit recommendations. Required courses for each enrollment term will be determined by the student's UCollege Retention Coordinator based on the student expressed academic interests.

University College Requirements focus on the completion of the UMKC Essentials that build foundational skills required for all fields. Students select one of four exploratory meta majors and utilize both UMKC Essentials and specified Major Critical Courses to explore and identify their optimal academic plans (degrees, majors, and minors). Options linked below highlight these exploratory course options by meta major.

Arts, Culture, and Human Expression Meta-Major (p. 1952)

Numbers, Functions, Science and Technology Meta-Major (p. 1955)

Individual and Group Behavior Meta-Major (p. 1953)

Life and Health Sciences Meta-Major (p. 1954)

UMKC INSTRUCTIONAL DESIGN & TECHNOLOGY/UMKC ONLINE

Online courses can take a variety of forms, from online synchronous to online asynchronous. Make sure you understand the requirements for each type of online course before you register. Definitions used for the delivery of online courses at UMKC can be found at the Registrar's page under the Codes and Definitions.

Additional information related to online training, courses, tutoring and other resources that support online learning can be found at the UMKC Instructional Design & Technology homepage located at: <https://idt.umkc.edu/>.

For more information regarding state authorization, including where distance education programs are approved, as well as a complete listing of distance education programs, please refer to the UMKC Online web page: <https://online.umkc.edu/>.

Description of the Libraries

The University Libraries (<http://library.umkc.edu/>) consist of the Miller Nichols Library and the Health Sciences Library, and we partner with the Leon E. Bloch Law Library. The University Libraries is an integral partner within UMKC and the greater Kansas City community and seeks to inspire and empower learners engaged in research, discovery, services, and creativity to reach their goals.

The University Libraries provide research facilities, resources and services in support of academic programs. We partner with UMKC Student Disability Services and are committed to providing services and assistance to all members of the UMKC Community. Information about accessibility can be found on the Web site at <http://library.umkc.edu/accessibility> (<http://library.umkc.edu/disability/>) and by calling 816-235-5612 or the Miller Nichols Library at 816-235-1526. The Library accepts calls through the National Relay Service (711) and the Missouri Relay Service (800-735-2966).

The Miller Nichols Library (<http://library.umkc.edu/>) serves primarily the College of Arts and Sciences (<http://cas.umkc.edu/>), the Conservatory (<http://conservatory.umkc.edu/>), and the Schools of Management (<http://www.umkc.edu/bloch/>), Education (<http://www.umkc.edu/education/>),

Biological and Chemical Sciences (<https://sbc.umkc.edu/>), and Computing and Engineering (<http://www.sce.umkc.edu/>). Specialized libraries include: the Leon E. Bloch Law Library (<http://law.umkc.edu/library/>) in the School of Law (<http://law.umkc.edu/>) and the Health Sciences Library (<http://library.umkc.edu/hsl/>) located in the School of Medicine (<http://med.umkc.edu/>), and serving the schools of Medicine (<http://med.umkc.edu/>), Dentistry (<http://dentistry.umkc.edu/>), Nursing & Health Studies (<http://sonhs.umkc.edu/>) and Pharmacy (<http://pharmacy.umkc.edu/>). UMKC faculty, students and staff have access to all collections and services, subject to the policies in effect at each library location.

Other Collections:

- Marr Sound Archives (<http://library.umkc.edu/marr/>) (Miller Nichols Library)
- Music/Media (<https://library.umkc.edu/music-media/>) (Miller Nichols Library)
- Dr. Kenneth J. LaBudde Special Collections (Miller Nichols Library)
- University Archives (http://www.umkc.edu/University_Archives/) (Miller Nichols Library)
- The State Historical Society of Missouri (<http://shs.umsystem.edu/about/kansascity.shtml/>) (Research Center-Kansas City - Newcomb Hall) Associate Director - Lucinda Adams (<http://shs.umsystem.edu/about/staff.shtml/>)

Faculty

Ayyoub Ajmi Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=ajmi>); librarian II; associate director, Leon E. Bloch law Library; B.S. (University of Texas in Arlington); M.L.I.S. (University of North Texas - Denton).

Stephen P. Alleman Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=alleman>); librarian III; head of collection development; B.A. (Tulane University); M.L.S. (Louisiana State University); M.A. (University of New Orleans).

Jason K. Alston Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=Thompson>); assistant teaching professor of information science & learning technology; B.A. (University of North Carolina-Wilmington); M.L.S. (North Carolina Central University); Ph.D. (University of South Carolina).

Paul D. Callister¹ Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=callister>); director, Leon E. Bloch Law Library, and professor of law; B.A. (Brigham Young University); J.D. (Cornell Law School); M.S.L.I.S. (University of Illinois at Urbana-Champaign).

Scott Curtis Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=curtis>); librarian IV; teaching and learning librarian; B.S. (University of Pittsburgh); M.S. (The George Washington University); M.L.S. (Emporia State University).

Brenda L. Dingley Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=dingley>); librarian II; head of scholarly communications; B.A. (Indiana University); A.M.L.S. (University of Michigan-Ann Arbor).

Cynthia Flanagan Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=franco>); librarian I; clinical medical librarian; B.A., M.L.I.S. (University of South Carolina).

Julie A. Hartwell Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=hartwell>); librarian II; instructional design librarian; B.A. (University of South Dakota); M.L.I.S. (University of Iowa).

Mariah L. Harvey Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=harvey>); librarian II; electronic resources and acquisitions librarian; B.S. (Rockhurst University); M.L.S. (University of Missouri-Columbia).

Stuart Hinds Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=hinds>); librarian II; curator of special collections and archives; B.A. (University of Missouri-Kansas City); M.A. (University of Iowa).

Tracey Hughes Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=hughes>); librarian II; teaching and learning librarian; B.S. (McPherson College); M.I.S.L.T. (University of Missouri-Columbia); M.A.L.S. (University of Missouri-Kansas City).

Derek C. Long Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=long>); librarian II; head of marr sound archives; A.S. (Full Sail University); M.L.S. (University of North Carolina).

Mardi Mahaffy Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=mahaffy>); librarian III; head of teaching and learning; B.M. (University of Northern Iowa); M.L.S. (Indiana University).

Kelley K. Martin Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=martin>); librarian II; assessment and user research coordinator; B.A. (University of Missouri-Kansas City); M.Ed. (University of Missouri-Columbia); M.L.I.S. (University of Missouri-Columbia).

Nara L. Newcomer¹ Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=newcomer>); librarian IV; head of music/media library and adjunct associate professor, conservatory of music and dance; B.A. (Bethany College); M.L.S., M.A. (State University of New York at Buffalo).

Buddy D. Pennington Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=pennington>); librarian III; head of electronic resources and systems; B.S., B.S., M.L.S. (University of Missouri-Columbia).

Joshua Pluta Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=pluta>); librarian II; director of research and instructional services, Leon E. Bloch Law Library; M.A. (University of Missouri-Columbia); J.D. (University of Nebraska College of Law).

Bonnie Postlethwaite Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=postlethwaite>); librarian IV; dean of libraries; B.S.E., B.A., M.A. (University of Kansas); M.S.L.S. (University of Illinois).

Staci J. Pratt Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=pluta>); librarian II; director of public services; B.A. (Dartmouth College); J.D. (Boston College Law School), L.L.M. (King's College, University of London); M.S.W (University of Kansas); M.L.I.S. (University of Missouri-Columbia).

Sandy Rodriguez Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=rodriguez>); librarian III; assistant dean of special collections and archives; B.M.M.E., M.S.L.S. (University of Kentucky).

Jennifer R. Salvo-Eaton Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=salvo>); librarian II; head of resource sharing and graduate student services; B.A. (University of Iowa); M.L.S.I.S. (Long Island University).

Wendy A. Sistrunk Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=sistrunk>); librarian III; head of cataloging and metadata management; B.M. (Kansas State University); M.M. (Arizona State University); M.S. (Simmons College).

Lindy Smith Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=pluta>); librarian II; head of labudde special collections; B.M. (Bowling Green State University); M.L.I.S., M.M. (University of Illinois at Urbana-Champaign).

Kristy E. Steigerwalt Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=steigerwalt>); librarian III; head of clinical support; M.L.S. (University of Missouri-Columbia); Pharm.D. (University of Missouri-Kansas City).

Garth L. Tardy Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=pluta>); librarian II; special formats cataloger; B.A. (Bowdoin College); M.S. (University of Kansas); M.L.S. (Indiana University).

Cynthia Marie Thompson Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=Thompson>); librarian III; associate dean of libraries; B.A. (William Jewell College); M.A. (University of Missouri-Columbia); Ph.D. (University of Missouri-Kansas City).

Marie Thompson Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=thompson>); librarian II; teaching and learning librarian; B.A. (University of Missouri Kansas City); M.A. (University of Missouri-Columbia).

Gloria L. Tibbs Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=Tibbs>); librarian III; organizational development coordinator; B.A., M.L.S. (Emporia State University).

Danielle Wellemeyer Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=wellemeyer>); Librarian II; head of outreach and engagement; B.A. (Wichita State University), M.A. (University of Missouri-Columbia); M.A. (Kansas State University).

Fu Zhuo Contact Information (<https://cf1.umkc.edu/intapps/lookup/?LastName=zhuo>); librarian III; teaching and learning librarian; B.A., M.A. (Wuhan University); M.ED. (University of Western Ontario); M.L.I.S. (University of Alberta).
