# Signing in to the EHS Database

The Environmental Health & Safety department uses OnSite (previously known as EHSAssistant) as a data management program for users of hazardous materials here at UMKC. OnSite is utilized to track the safe use and storage of hazardous materials and proper disposal of hazardous waste, among many other essential functions. To sign in to OnSite, you must have filled out the OnSite Access application and the application must be reviewed and accepted prior to gaining access. Contact EHS for the OnSite Access application.

**Step 1:** To find OnSite's database, go to UMKC's EHS website. Click on the **OnSite/EHSA Database** icon shown in the picture below.

**Step 2:** Sign in using your Single-Sign On (SSO) username and password.

**Step 3:** If you are a user, it should take you right to the database home page as seen below. If not, contact EHS for troubleshooting.
