How to Create a Wiki with Campus Pack
(Audience: Instructors)

Instructors can create wikis for instructional use on Blackboard using Campus Pack.

1) Log in to your Blackboard course site and access one of your content areas. In this example, Course Content.

2) Hover over the Tools button and select Campus Pack Wiki.
3) Create a title and a description (optional) of the wiki.

4) The deployment type determines who has a copy of the wiki.
   - **Class Copy**: One copy for the entire class which each student can access
   - **Group**: One copy for each group in the class which students within the group access
   - **Individual**: One copy for each student in the class which only that individual student can access

5) You can create a Grade Book Entry if you would like to grade students on their participation in the wiki.
   - **Note**: This option is *only available* while creating the wiki. If a Grade Book Entry is not created then any grading will have to be done manually in the Blackboard Grade Center.

6) Click **Add** to create the wiki.
