Add QuickMark Editing Marks to a Turnitin Paper in GradeMark

Instructors can use GradeMark to add comments, marks, and rubrics to students' submissions. A QuickMark is a standard editing mark that is reused on student paper and that can be tracked through the statistics tool in GradeMark. GradeMark comes with four QuickMark sets for standard editing. Instructors and administrators can create additional QuickMark editing marks and QuickMark sets for their own use. Once you have started, adding QuickMark editing marks to a GradeMark paper is as easy as clicking the mark in your QuickMark palette, and placing the mark on the paper.

QuickMarks allow instructors to quickly add frequently used comments to student papers. Simply drag-and-drop the comments from the QuickMark set on the right to the student paper.

1. Click on a QuickMark from the QuickMark Set on the right.

2. Drag the QuickMark to the desired location in the student paper.

3. Release the held click. The QuickMark will be placed on the paper.
