Introducing Cisco Jabber for iPhone

The Cisco Jabber Instant Messaging for iPhone application allows you toremain in contact with those on your contact list while you are away from your desktop. With the application on your Apple device, you can utilize the following:

End User Features:
- Basic IM (including Emoticons)
- Search the Corporate Directory
- Manage IM Contacts (Add, Accept, Delete.)
- Reconnects Automatically
- Change Presence Status
- Log into Desktop and Mobile IM clients simultaneously
- Push notifications

Collaboration Features:
- Start or Join an instant meeting.
- Click to call, click to email, click to SMS
- Cross launch Cisco Jabber or P2P for VoIP calls

Remain only an instant message away from any of your Jabber Instant Messaging contacts, any time, any place. The purpose of this document is to help you quickly set up or upgrade and use Jabber IM on your Apple iOS device.

Requirements To successfully use the Cisco Jabber for iPhone & iPad, ensure that the following requirements are met.

Supported Devices
Apple iOS devices supported by the Cisco Jabber IM application include:
- iPhone 4/4S
- iPhone 5/5C/5S
- iPad 2
- iPad with Retina Display (3rd and 4th Generation)
- iPad Air
- iPad Mini
- iPad Mini with Retina Display
- iPod Touch (5th Generation)

Supported Apple iOS Operating Systems
- Requires iOS 7.1 or later

Cisco Jabber for iPhone & iPad - First Time Use - Set Up Instructions

The Cisco Jabber for iPhone & iPad is available for download from the App store. Navigate to your App Store and search for Cisco Jabber and download and install.
Configuring the Client

Step 1. To launch the client, select the **Jabber IM** icon.

![Jabber IM icon]

Step 2. When you are prompted to accept Cisco Terms of Use, select “Accept” to proceed.

![Accept terms of use]

Step 3. Enter your Ohio University email address, then select **Submit**.

![Enter email address]

Step 4. Enter the password for the account type you selected then select **Sign In**.
Step 5. Once the client has signed in you will the Contacts tab. To view your Presence Status and the Favorites, Chats, Recents, Voice Messaging tab click the Jabber Menu icon in the upper left corner of the screen.

### Using the Jabber for iPhone & iPad Application

**Starting a Chat**

Step 1. To initiate a chat, navigate to the Contacts tab and scroll through your contacts to search for the contact you’d like to initiate a conversation with. Tap their name to open a chat window.
Step 2. Type your message into the text box located at the bottom of the chat window. To enter an emoticon, select the Emoticon icon next to the text box and choose which you want to send.

Step 3. Press Send.

Searching for Contacts
The search function in Cisco Jabber IM for iPhone client is a filtering type of search within your current contact list or can search the Global Directory. Open the Jabber Menu, then:

Step 1. Select the Search & Call bar.
Step 2. Enter the name or User ID of the contact you are searching. As you enter text the contacts displayed will narrow.

Step 3. When you have found and selected a contact you can add them to your Contacts directly by selecting Add to Contacts.
Adding a Contact

Contacts can be added to your Contacts list on the client. Note: The contacts will be added to all Cisco IM clients.

Step 1. Select the Contacts tab then the + (plus) symbol in the top right corner of the screen.

Step 2. Choose a Group for the contact and optionally Add to Favorites, then begin entering the name or User ID.

Step 3. As you enter the text search results narrow until the contact is found. Select the contact, then select Done.
Switching Chats

When multiple chat sessions are open, you can easily switch to other chat sessions. You can view different chats the following ways:

Step 1. Select the Chat tab to see the list of open chat sessions from the Jabber Menu. Select a chat to view or send messages.

The Chat tab displays red badge to notify you that an IM message has arrived and the chat will have a badge next to it. Select the relevant chat to open and view.

Viewing Profile Information

Step 1. Select the Contacts tab from the Jabber Menu.
Step 2. Select the white Arrow next to a contact’s name to view their Profile. (If you tap the contact instead, you will initiate an IM conversation.)
Step 3. From the profile you can complete the following actions:

- Initiate a call
- Add contact to favorites list
- Start a chat
- Call directory numbers
- Send an email

Adding Favorites

There are two ways to add a contact to your Favorites.

Navigate to the **Favorites** tab, select **Edit** in the top right corner of the screen. Then select the **Add (+)** icon in the upper left corner. The list of all your contacts will appear. You can search or tap a contact to add them to your list of Favorites.
Or, you can search for a contact, view their directory information and select the **Star** button.

**Deleting a Favorite**

**Step 1.** To delete a contact from your Favorites list, go to the **Favorites** tab.

**Step 2.** Swipe left on the contact and select **Delete**.
Presence Status

Your Presence status can be updated from the Contacts tab on your Jabber IM for iPhone client.

Step 1. Select the Jabber Menu.
Step 2. Select your Name to open the Presence status options.
Step 3. Tap the required presence status.
Client Settings

Select the Settings tab to access the following Jabber client settings:

![Settings menu with various options]

Note the icons next to the Account Settings:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>✔️</td>
<td>Account connected</td>
</tr>
<tr>
<td>🔴</td>
<td>Account trying to connect, or reconnect</td>
</tr>
<tr>
<td>🟢</td>
<td>Account not connected***</td>
</tr>
</tbody>
</table>

***If your account is not connected, you will need to select the account and enter your user name, password, and server information if prompted.

Logging in to both Desktop and Mobile Jabber IM Clients

Cisco Enterprise Instant Messaging applications allow you to be logged into “multiple resources”, which means that you can be logged into both your desktop IM application and Jabber IM for iPhone mobile client at the same time. When you are logged into both, you will receive messages on both applications until you
respond. Once you respond, messages will only be sent to that “resource” or application, the device with the most recent activity.

**Auto Reconnect**

When your signal drops, the Jabber application will automatically try to reconnect you. If the application is unsuccessful in finding a Wi-Fi or cellular data connection, you will be logged out. You will need to log in again when you are able to establish a network connection. The application will automatically look for a wireless connection first and then a cellular data second. This is a feature to help minimize any unnecessary data charges.
